About Us Portal

Welcome to the About Us Portal! Most things in life these days are about profiles and swiping right. WCG's primary objective is to help you to feel comfortable about engaging with us, and to that end we have attempted to tell you about us and what we do. Yeah, we think we're cool. Yeah, we think we are pretty smart and very capable as tax advisors. Ultimately our clients are the judge of that, and after swiping right you'll know quite quick if our profile was accurate or a bunch of Brad Paisley Better Online puffery.

Our Expectations of Clients

It might seem a bit audacious that this section is titled Our Expectations of Clients. However, we don't believe the customer is always right (there are plenty of grumpy people out there). As tax advisors, our current clients demand our full attention (and they get it); therefore they do not want us distracted with bad relationships. Globally, we select our clients on two important criteria. First, we expect our clients to be open, honest and responsive in communication.

Second, we only accept clients who view our partnership as a collaboration, where our challenges and successes are shared. But! We fully understand that taxes and consulting are a people business, and two people at times are not a good fit. As such, we have transited clients to another team in search of the right interpersonal connection. Click on the button below to learn more about our client reviews and how we define ideal client relationships. WCG is a full service business consultation and tax preparation firm, and we look forward to working with you as your tax advisor!
