SEC 199A PASS-THROUGH DEDUCTION

AKA: Pass-Through Entity Deduction - Tax Cuts & Jobs Act of 2017 (TCJA), as revised by the Consolidated Appropriations Act, 2018 (P.L. 115-141) and explained in Proposed Regulations Sec 1.199A (released 8/8/2018) and finalized in February 2019.

RAPID FINDER

Overview

As part of TCJA, Congress changed the tax-rate structure for C-corporations to a flat rate of 21% instead of the former graduated rates that topped out at 35%. Needing a way to equalize the rate reduction for all taxpayers with business income, Congress came up with a new deduction for businesses that are not organized as C-corporations. It replaces the Sec 199 Domestic Production Activities Deduction.

TCJA

As a result, TCJA has provided a new and substantial tax benefit for most non-C-corporation business owners in the form of a deduction that is generally equal to 20% of their qualified business income (QBI). This deduction is most commonly known as a pass-through income deduction because it applies to income from pass-through business activities where the income passes through to the individual's, partner's or stockholder's individual 1040 tax return. This category includes income from sole proprietorships, partnerships, S-corporations, rentals, farms, Real Estate Investment Trusts (REITs), and pass-through income from publicly traded partnerships. The shorthand term for this deduction is the Sec 199A deduction, as 199A is the Internal Revenue Code section number for this provision.

The deduction is figured for each individual business activity subject to certain limitations and then combined before being limited to 20% of the taxpayer's taxable income without capital gains.

The Details

OVERVIEW – A Simplified View of the 199A Deduction

The 199A can be very simple or it can be very complex. In fact, it may be one of the most complex deductions ever to come out of Congress. So, before getting into the nitty-gritty of this deduction we will first look at it in its simplest form and work up to the more complex issues.

To begin, let's first get an understanding of some of the terminology and definitions used in computing the Sec 199A deduction:

1. Taxable Income – When figuring the deduction for each pass-through activity of an individual, the deduction may be limited based upon the individual's 1040 taxable income (before the deduction). Do not confuse the taxpayer's 1040 taxable income with a pass-through activity's taxable income.

2. Qualified Business Income (QBI) – Is generally the net profit from a Schedule C, E or F, a 1065 K-1, and 1120S K-1, a 1041 K-1, REITS (dividends) and pass-through income from publicly traded partnerships (PTP). But also see *QBI Reductions for AGI Adjustments* on page 3.24.17

3. The Deduction - The deduction is equal to 20% of the pass-through income (the qualified business income (QBI)) from various business activities. For purposes of the introduction we will only consider QBI from sole proprietorships (Schedule C net profit), partnership K-1s (but not including guaranteed payments) and S-corporation K-1s.

4. Business Categories - There are two categories of business entities when computing the deduction (note: there is actually a third category for farming cooperatives which is quite complicated that we discuss later in the course).

a. Qualified Trades or Businesses (QTB), and

b. Specified Service Trades or Businesses (SSTB) – Which are basically those businesses providing personal services, such as tax practitioners. More details later in the course.

Why are QTB and SSTB In Separate Categories?

If you recall, the purpose of the prior Sec 199 domestic production deduction was to promote manufacturing in the U.S. and only allowed the deduction for the production of goods and not services. Sec 199A replaces the prior Sec 199 and in doing so carried over some of its characteristics which leads us to believe that is why QTBs and SSTBs (which only provide services) have been put into separate categories.

5. Limitations – The major distinction between QTBs and SSTBs is that the 199A deduction phases out for SSTBs for taxpayers with 1040 taxable incomes between the threshold and the cap shown in the table below, while QTBs continue to qualify if they pay wages or have qualified property.

Filing Status	**Threshold**			(Excess over threshold)	**Cap**		
	2018	**2019**	**2020**		**2018**	**2019**	**2020**
Married Joint	315,000	321,400	326,600	100,000	415,000	421,400	426,600
Single & Hd of Hshld	157,500	160,700	163,300	50,000	207,500	210,700	213,300
Married Separate	157,500	160,725	163,300	50,000	207,500	210,725	213,300

Note: Using the inflation adjusted numbers tends to complicate the calculations for teaching purposes. So, **the examples throughout this course material continue to use the 2018 amounts**.

SEC 199A TABLE

The most difficult concept in understanding how the Sec 199A deduction works is the relationship of:

- Filing status
- The taxpayer's 1040 taxable income, and
- The type of trade or business.

To help with that we have developed the chart below that allows you to quickly determine whether a deduction is allowed, and if so, what limitations apply.

Example Assume you have a married couple filing jointly for 2018, they have a 1040 taxable income (before the 199A deduction) of $469,000, and the trade or business is a SSTB. First select the box with their filing status, then move to the right to the correct range of taxable income, and lastly go down in that column to align with the type of business. In this case the SSTB does not qualify for the 199A deduction.

Taxpayer's Filing Status	**1040 Taxable Income (2018)** (Before the 199A deduction)		
Married Filing a Joint Return	Less Than $315,000	Between $315,000 and $415,000	Greater than $415,000
Other filing Statuses	Less Than $157,500	Between $157,500 and $207,500	Greater than $207,500
Type of Business	**The 199A Deduction***		
Specified Service Trade or Business (SSTB)	20% of QBI	Deduction is phased out	No deduction allowed
Qualified Trade or Business	20% of QBI	Wage limitation phased in	Deduction is the lesser of 20% of QBI or the wage limitation

* This is the 199A deduction for a single trade or business activity and is only the first step in determining a taxpayer's overall 199A deduction, which may include multiple sources of 199A deductions that are combined and limited to 20% of the taxpayer's taxable income without capital gains.

Taxable Income Below the Thresholds – Note from the chart above, as long as the taxpayer's taxable income is below the threshold both QTB and SSTB have no limitations and the Sec 199A deduction is a simple 20% of QBI (before applying the 1040 taxable income limitation discussed next).

<u>*1040 Taxable Income Limitation*</u> – Another confusing issue related to this deduction is the fact that after computing the 199A deduction for each of a taxpayer's pass-through business activities and then summing them all up for the total Sec 199A deduction, that deduction is then limited to the lesser of the 199A sum or 20% of the taxpayer's taxable income, less net capital gain. For this purpose, net capital gain includes qualified dividends.

<u>*Specified Trade or Business (SSTB) Examples*</u> – Since those that are taking this course are for the most part tax preparers, Enrolled Agents, and CPAs and they are all SSTBs we will first look at the examples for SSTBs.

<u>SSTB COMPUTATION</u>

Probably the best way to understand this deduction is by doing a simple example:

> ***SSTB Example #1 – Taxable Income Below Threshold -*** *Gary, who files jointly with his spouse, is a CPA and his 2018 net profit (QBI) from his Schedule C sole proprietorship is $350,000. He had no capital gains. Gary's 1040 taxable income before the 199A deduction is $300,000.* ***Since his taxable income is below the $315,000 threshold*** *there are no limitations and Gary's preliminary Sec 199A deduction is $70,000 (20% of $350,000). However, his deduction will be limited by his taxable income to $60,000 (20% x $300,000).*
>
> ***Note 1:*** *If Gary's $350,000 of QBI had been from a partnership K-1 (not counting guaranteed payments) the result would have been the same. It could have also been from an S-corporation K-1 with the same result.*
>
> **Note 2**: To keep this example and those that follow as uncluttered as possible, we are ignoring that some of the pass-through income is subject SE Tax. However, if it is subject to SE tax, the taxpayer would be entitled to an adjustment to income for ½ of the SE tax which would reduce the taxable income and provide a different 20% of taxable income result. Further, before multiplying the QBI by 20%, the QBI must be reduced by the SE tax deduction, as well as any adjustment the taxpayer claimed for SE health insurance premiums and certain retirement plan contributions. Thus, the preliminary QBI deduction will also be less. Again, we are omitting this adjustment from the examples to minimize the clutter and concentrate on the concepts.

Commentary: It is important to note the taxpayer's 1040 taxable income is the decisive factor whether or not any limitations are triggered. In the prior example the QBI income was purposely made higher than the taxpayer's taxable income to illustrate that point.

So, what happens when the taxpayer's taxable income exceeds the threshold? This is where things get to be tricky. Remember SSTBs are treated differently than other qualified trades or businesses and are far less complicated.

> ***SSTB Example #2 – Taxable Income Above the Phaseout Cap -*** *If Gary's 2018 taxable income in Example #1 was above the cap of $415,000 (threshold of $315,000 plus $100,000), then Gary's 199A deduction for would be zero, completely phased out.*

Now this brings us to the complicated example, where Gary's taxable income is above the threshold ($315,000 for MFJ) and below the cap ($415,000). This is where the deduction is phased out.

> ***SSTB Example #3 – Taxable Income Between the Threshold and Phaseout Cap -*** *If Gary's taxable income in Example #1 had been $365,000 his 199A deduction would be partially phased out. For this computation we have developed a worksheet to do the phase-out calculation. We also need some additional information from Gary's Schedule C: the wages Gary paid his employees (for this example $50,000) and the unadjusted basis of his business equipment (we will use $20,000).*

We have developed a SSTB worksheet that includes the phase-out computation. The phase-out is an awkward calculation that takes into consideration the wages paid by the business and the qualified property of the business. **Both of these items will be explained later in the course**. As you can see from the worksheet, Gary's deduction has been partially phased out and his deduction is only $22,500.

Continue to worksheet – next page

199A SSTB Worksheet (2018)

For use **ONLY** with Specified Service Trades or Businesses)

Business Name: ____

☐ Schedule C ☐ Schedule E ☐ Schedule F ☐ 1065 ☐ 1120-S

1.	Qualified Business Income (QBI)	350,000
2.	Taxpayer's 1040 Taxable Income (before the 199A deduction)	365,000
3.	Threshold (enter $315,000 if MFJ; otherwise enter $157,500)	315,000
4.	Differential (enter $100,000 if MFJ; otherwise enter $50,000)	100,000
5.	Line 3 plus Line 4 (top of threshold range)	415,000
6.	If Line 2 equals or exceeds Line 5, **STOP** and enter zero on Line 22. Note: The 199A deduction for this business is zero. If Line 2 is less than Line 5, enter zero here and continue to Line 7.	0
7.	Tentative 199A deduction (20% of Line 1)	70,000
8.	If Line 2 is less than Line 3, **STOP** and enter the amount from Line 7 on Line 22. Note: The preliminary 199A deduction for this business is the full 20% of QBI. If line 2 is greater than Line 3, enter zero here and continue to Line 9.	0
9.	Wages paid by this business	50,000
10.	Assets (unadjusted basis of this business' eligible tangible property)	20,000
11.	50% of wages	25,000
12.	25% of Wages	12,500
13.	2.5% of Assets	500
14.	Line 12 plus line 13	13,000
15.	Wage Limit – Greater of line 11 or Line 14	25,000
16.	Subtract Line 3 from Line 2	50,000
17.	Divide Line 16 by Line 4	0.500
18.	If Line 7 is greater than Line 15, enter ((Line 7 – Line 15) x Line 17). Otherwise enter zero.	22,500
19.	Line 7 less Line 18	47,500
20.	1 minus Line 17	0.500
21.	Line 20 times Line 19	23,750
22.	**Preliminary Section 199A Deduction –** Lesser of Line 18 or Line 21	22,500

Instructions: This worksheet can only be used for specified service trades or businesses. It is designed to determine the preliminary 199A deduction for a single business. The results of this worksheet must be combined with the results from other businesses and flow-through income of the taxpayer to determine the combined preliminary Sec 199A deduction for the taxpayer. The combined preliminary Sec 199A deduction is further limited to 20% of the adjusted taxable income of the taxpayer.

ClientWhys has a separate worksheet for use with other qualified businesses. Although we believe the worksheets compute the deduction correctly, ultimately, the IRS worksheets or forms will take precedence.

Specified Service Trades or Businesses: Generally, includes any trade or business described in Sec 1202(e)(3)(A), but excluding engineering and architecture and trades or businesses that involve the performance of services that consist of investment-type activities. Specified service businesses include trades or businesses involving the performance of services in the fields of: health, law, accounting, actuarial science, performing arts, consulting, athletics, financial services, brokerage services or any trade or business where the principal asset of such trade or business is the reputation or skill of 1 or more of its employees, as defined in Reg. 1.199A-5(b)(2).

QUALIFIED TRADE OR BUSINESS

Now let's take a quick look at the results had Gary's business not been a SSTB and instead was a QTB.

> ***QTB Example #4 – Taxable Income Below Threshold*** *– Using the same situation as Example #1 the results would have been exactly the same since neither a QTB nor a SSTB has any limitations when the taxpayer's taxable income is below the threshold amount for the taxpayer's filing status. Thus, as with Example #1, Gary's preliminary 199A deduction would be $70,000 (20% of $350,000) but limited by his taxable income to $60,000 (20% x $300,000).*

> ***QTB Example #5 – Taxable Income Above the Threshold –*** *Unlike a SSTB whose 199A deduction is completely phased out when the taxpayer's taxable income exceeds the cap, a QTB can still have a deduction based on a so-called wage limitation. Although referred to as the wage limitation, it sometimes includes a percentage of the taxpayer's business assets.*

Wage Limitation - We will cover the wage limitation in more detail later in the course, but here is generally how it works:

When the taxpayer's 1040 taxable income exceeds the cap, in Gary's case $415,000 ($315,000 + $100,000), the deduction is limited to the **lesser** of:

1. 20% of QBI (net of adjustments, see page 3.24.16), or
2. The wage limitation

   The wage limitation is the greater of:

   - 50% of the W-2 wages paid by the business or
   - 25% of the W-2 wages paid by the business plus 2.5% of the unadjusted basis of the business's qualified property (abbreviated UBIA) More on UBIA later.

QTB Example #6 – Taxable Income Between the Threshold and Cap – As with a SSTB there is a complicated phaseout calculation. So rather than trying to explain how this works, we included the phaseout computation in the QTB worksheets that we have developed. There is also an example on page 3.24.12.

Ok, now that you understand the basic concepts of the Sec 199A deduction it is time to learn some definitions related to this deduction.

TAXABLE INCOME (TI)

There are actually two definitions for TI:

1. When figuring the preliminary 199A deduction for a specific qualified trade or business the taxpayer's 1040 taxable income before deducting the 199A deduction is used.

2. After the preliminary 199A deductions for each qualified trade or business are determined, combined with the 199A deductions from real estate investment trusts (REITs) and publicly traded partnerships (PTPs), that total is then limited to 20% of the taxpayer's taxable income. For purposes of this computation the term taxable income refers to the taxpayer's 1040 AGI minus standard or itemized deductions, but without regard to the Sec 199A deduction and without any net capital gain. Thus, the 199A deduction itself is not considered when determining the taxable income for this purpose.

THRESHOLD AMOUNT

For the 199A deduction the term "threshold" is used to both phase out and phase in limitations.

1. **Specified Service Trades or Businesses** – When used in conjunction with the 199A computation for SSTBs, the term threshold refers to the taxable income (TI) level at which the 199A deduction begins to phase out for higher income taxpayers.

2. **Qualified Trades or Businesses** - When used in conjunction with the 199A computation for qualified trades or businesses, the term threshold refers to the TI level at which the wage limitation begins to phase in for higher income taxpayers.

The 199A threshold is actually the same threshold as for the 32% tax bracket under TCJA for 2018 and is inflation adjusted annually. Thus for 2018 it is $315,000 for married taxpayers filing jointly or $157,500 for other filing statuses. The cap (top of the phase-out/phase-in range) is reached when the taxpayer has an additional $100,000 of taxable income for married filing joint taxpayers and $50,000 for others. Thus for 2018 the cap is $415,000 for married taxpayers filing jointly or $207,500 for other filing statuses. See page 3.34.02 for 2019 amounts.

Phaseout Cap – Although there is no official name assigned to this value, we will refer to it as the phaseout cap in this course. Some call it a ceiling. It is the sum of the threshold amount and the delta amount for a taxpayer's filing status. So, for 2018, for MFJ taxpayers it is $415,000 ($315,000 + $100,000) and for others it is $207,500 ($157,500 + $50,000).

TRADE OR BUSINESS

One of the more important issues related to the legislation is the definition of a "trade or business" since that describes the kind of activity that can create income for purposes of the 199A deduction.

The tax code does not provide a definitive "bright line" definition of a trade or business, and the regulations simply adopted an existing subjective definition that relies on the outcomes of past court cases and interpretive rules the IRS has issued under Code Sec. 162, which is the most familiar provision using the term "trade or business." This leaves some room for interpretation; most notably whether or not rental real estate income qualifies for the Sec. 199A deduction. Our research finds that except for totally passive rental real estate activities such as triple net leases, a rental real estate activity is a trade or business for purpose of Section 199A. But more on this later in the course.

The regulation also specifies a "qualified trade or business" means any trade or business other than a specified service trade or business, or the trade or business of performing services as an employee. This was done for the following reasons:

- Specified Service Trade or Business – A special computation was carved out for SSTBs; thus they are included in the term qualified trade or business.
- Performing Services as an Employee – Congress does not want employees claiming this deduction on the basis of their wage earnings. With the suspension of the deduction for employee business expenses from the Schedule A for 8 tax years, they specifically added this phrase to make it clear employees do not qualify for the deduction.

The rental or licensing of tangible or intangible property (rental activity) that does not rise to the level of a Section 162 trade or business is nevertheless treated as a trade or business for purposes of Section 199A, but only if the property is rented or licensed to a trade or business which is commonly controlled under §1.199A-4(b)(1)(i) (regardless of whether the rental activity and the trade or business are otherwise eligible to be aggregated under §1.199A-4(b)(1)).

PASS-THROUGH ENTITIES

The Sec 199A deduction applies to pass-through entities and certain other sources of pass-through income, subject to certain limitations. The following are entities to which the deduction may apply:

- Schedule C
- Schedule E
- Schedule F
- Partnership*
- S-Corporation*
- Real Estate Investment Trust*⬩
- Publicly Traded Partnership* ⬩

*Deduction is determined at the partner or shareholder level.

⬩This component of the Section 199A deduction is not limited by W-2 wages or UBIA of qualified property.

QUALIFIED BUSINESS INCOME (QBI)

QBI is generally the net amount of income, gain, deduction, and loss relating to any qualified trade or business of the taxpayer to the extent these items are effectively connected with the conduct of a trade or business within the U.S. and included or allowed in determining taxable income for the year.

- **QBI Adjustments:**
  - Ordinary gain attributable to the sale of partnership interest is included in QBI. (Sec 751)
  - Changes in accounting method adjustments, both positive and negative, are taken into account when figuring QBI. (Sec 481)
  - Puerto Rico - If all of an individual's QBI from sources within the Commonwealth of Puerto Rico are taxable to the U.S., then the QBI will qualify for the Section 199A deduction.
- **QBI does *not* include:**
  - Certain investment items;
    - Any short- or long-term capital gain or loss.
    - Any dividend, income equivalent, or payment in lieu of dividends.
    - Any interest income other than that which is allocable to the trade or business.

    - Any item of gain or loss from commodity transactions or foreign currency transactions (as described in Sec 954(c)(1) subparagraphs (C) and (D) by substituting qualified trade or business for controlled foreign corporation).
    - Annuity income that is not received in connection with a trade or business.
    - Any item of deduction or loss described in the prior clauses.
  - Reasonable compensation paid to the taxpayer;
  - Guaranteed payment to a partner for services;
  - Guaranteed payment to a partner for use of capital; or
  - Payment to a partner for services rendered with respect to the trade or business.

SPECIFIED SERVICE TRADES OR BUSINESSES (SSTB)

The deduction is limited as to how it applies to specified service trades or businesses described in Sec. 1202(e)(3)(A), but excluding engineering and architecture and trades or businesses that involve the performance of services that consist of investment-type activities.

Specified service trades or businesses are described by the IRS as being trades or businesses in the fields of:

- *Health* – The performances of services by physicians, pharmacists, nurses, dentists, veterinarians, physical therapists, psychologists, and other similar healthcare professionals who provide medical services directly to a patient. Does not include the provision of services not directly related to a medical field, even though the services may purportedly relate to the health of the service recipient. For example, the performance of services in the field of health does not include the operation of health clubs or health spas that provide physical exercise or conditioning to their customers, payment processing, or research, testing, and manufacture and/or sales of pharmaceuticals or medical devices.

- *Law* – The performance of services in the field of law means services provided by lawyers, paralegals, legal arbitrators, mediators, and similar professionals in their capacity as such. The performance of services in the field of law does not include providing services that do not require skills unique to the field of law – for example, services provided to a lawyer by printers, delivery services, or stenography services.

- *Accounting* - The performance of services in the field of accounting means services provided by accountants, enrolled agents, tax return preparers, financial auditors, and similar professionals in their capacity as such. Provision of services in the field of accounting is not limited to services requiring state licensure as a certified public accountant (CPA). The field of accounting does not include payment processing and billing analysis.

- *Actuarial Science* – The performance of services in the field of actuarial science means the services provided by actuaries and similar professionals in their capacity as such. It does not include the services provided by analysts, economists, mathematicians, and statisticians not engaged in analyzing or assessing the financial costs of risk or uncertainty of events.

- *Performing Arts* - The performance of services in the field of the performing arts means the performance of services by individuals who participate in the creation of performing arts, such as actors, singers, musicians, entertainers, directors, and similar professionals performing services in their capacity as such. It does not include providing services that do not require skills unique to the creation of performing arts, such as the maintenance and operation of equipment or facilities for use in the performing arts. Similarly, persons who broadcast or otherwise disseminate video or audio of performing arts to the public are not considered to be providing services in performing arts.

  Commentary*: The preamble of the final regulation used "****writers****" as an example of an occupation that may or may not be a SSTB. To quote the preamble: "To the extent that a writer is paid for written material, such as a song or screenplay, that is integral to the creation of the performing arts, the writer is performing services in the field of performing arts".*

  Applying that standard, it would seem the following professionals could fall into the definition of a SSTB: makeup artists, costume designers, set designers, lighting designer and director, sound and music directors, film editors, etc. However, remember Sec 199A does not apply to the earnings of those paid as employees. For example, a self-employed lighting director would be an SSTB while a lighting technician on payroll would not.

- *Athletics* - The performance of services in the field of athletics means the performances of services by individuals who participate in athletic competition such as athletes, coaches, and team managers in sports such as baseball, basketball, football, soccer, hockey, martial arts, boxing, bowling, tennis, golf, skiing, snowboarding, track and field, billiards, and racing. It does not include providing services that do not require skills unique to athletic competition, such as the maintenance and operation of equipment or facilities for use in athletic events. It also does not include the provision of services by persons who broadcast or otherwise disseminate video or audio of athletic events to the public.

- *Consulting* **-** The performance of services in the field of consulting means providing professional advice and counsel to clients to assist the client in achieving goals and solving problems. Consulting includes lobbyists and other similar professionals performing services in their capacity as such. It does not include minor consulting that accompanies the sale of a product. A trade or businesses is not an SSTP if less than 10% of gross receipts are from consulting (5% where the gross receipts are greater than $25 Million).
- *Financial services* - The definition of financial services applies to services typically performed by financial advisors and investment bankers and provides that the field of financial services includes providing the following financial services to clients: managing wealth, advising clients with respect to finances, developing retirement plans, developing wealth transition plans, the provision of advisory and other similar services regarding valuations, mergers, acquisitions, dispositions, restructurings (including in title 11 (bankruptcy) or similar cases), and raising financial capital by underwriting, or acting as the client's agent in the issuance of securities, and similar services. This includes services provided by financial advisors, investment bankers, wealth planners, and retirement advisors and other similar professionals, but does not include banking services such as taking deposits or making loans.
- *Brokerage Services* **-** The field of brokerage services includes services in which a person arranges transactions between a buyer and a seller with respect to securities for a commission or fee. This includes services provided by stock brokers and other similar professionals but does not include services provided by real estate agents and brokers, or insurance agents and brokers.

> **Commentary:** Final regulation §1.199A-5(b)(2)(x) confirms that this does not include services provided by **real estate agents and brokers, or insurance agents and brokers**. Thus, these activities are **not SSTBs**.

- *Reputation or Skill* - The original legislation included in its list of trades or businesses that were SSTBs, those where the principal asset of a trade or business is the reputation or skill of one or more of its employees or owners. Did this mean, for example, that a self-employed plumber who provided his skill for the business wouldn't be eligible for the 199A deduction? Luckily, in a taxpayer-friendly interpretation, the tax regulations have generally defined "reputation and skill" to mean:

(1) Receiving income for endorsing products or services for which the individual provides endorsement services;

(2) Licensing or receiving income for the use of an individual's image, likeness, name, signature, voice, trademark, or any other symbols associated with the individual's identity; or

(3) Receiving appearance fees or income (including fees or income to reality performers performing as themselves on television, social media, or other forums, radio, television, and other media hosts, and video game players).

> **Examples**: Alex Trebek endorsing Colonial Penn Insurance, Shaquille O'Neal – Celebrity Cruise Lines and the General Insurance

(4) Investing and investment management – see description in Reg. 1.199A5(b)(2)(xi)

(5) Trading – see description in Reg. 1.199A-5(b)(2)(xii)

(6) Dealing in securities (as defined in section 475(c)(2)), partnership interests, or commodities (as defined in section 475(e)(2)) – see description in Reg 1.199A-5(b)(2)(xiii)

$25 MILLION RULE

- *$25 Million or Less* - A trade or business (determined before aggregation) is not an SSTB if the trade or business has gross receipts of $25 million or less (in a taxable year) **and** less than 10% of the gross receipts of the trade or business is attributable to the performance of services in an SSTB.
- *More Than $25 million* - For trades or businesses with gross receipts greater than $25 million (in a taxable year), a trade or business is not an SSTB if less than 5% of the gross receipts of the trade or business are attributable to the performance of services in an SSTB. (Reg. Sec.1.199A-5(c)(1))

DETERMINING W-2 WAGES

Although determining the wages for the purposes of computing the Sec 199A wage limit would seem to be a simple matter of just adding up the wages the business paid, unfortunately it is not. Wages for this purpose will only include wages paid during the calendar year. The wages include wages paid to employees, and if an S corporation, to the officers of the corporation. Reg 1.199A-2(b)(2)(iv) provides the following options in determining wages.

Step One – Determine the W-2 wages. The IRS provides 3 methods to determine the wage amounts with the unmodified box method being the simplest but the one that results in a lower wage number. These methods are the same three options IRS allowed for determining wages eligible for the now-repealed Sec 199 domestic production activities deduction.

- **Unmodified Box Method** – It is the lesser of:
  - Total entries in Box 1 of all Forms W-2 filed with SSA, or
  - Total entries in Box 5 (Medicare wages) of all Forms W-2 filed with SSA.

UNMODIFIED BOX METHOD	
1. Total amounts in Box 1 of W-2s filed for the business entity…	
2. Total amounts in Box 5 of W-2s filed for the business entity…	
TOTAL – UNMODIFIED BOX METHOD – Lesser of 1 or 2	

- **Modified Box 1 Method** – Determined as follows:
  - Total the entries in Box 1 of all Forms W-2 filed with SSA, then
  - Subtract the amounts in the Box 1 total that are not wages for FIT withholding, such as supplemental unemployment benefits, annuity payments and sick pay. (Sec 3402(o))
  - Finally add the total amounts reported in box 12 (excludable pension contributions) codes D, E, F, G, and S.

MODIFIED BOX 1 METHOD	
1. Total amounts in Box 1 of W-2s filed for the business entity…	
2. Amounts in Box 1 not subject to withholding (supplemental unemployment, annuity payments and sick pay)…	< >
3. Total pension plan exclusions included in Box 12 codes D, E, F, G, and S…	
4. TOTAL – MODIFIED BOX 1 METHOD (combine 1, 2 & 3)	

Example: *Modified Box 1 method for SL Lewis, Inc., an S Corporation with two shareholders, Susan Lewis who owns 80% of the stock and Jack Miller who owns 20% of the stock. The total Box 1 wages for the stockholders and employees for the year is $300,000. The $300,000 amount included $4,000 of supplemental unemployment compensation benefits. In addition, Box 12 included $35,000 code D amounts (employee 401(k) contributions). The Modified Box 1 amount is $331,000 ($300,000 – 4,000 + $35,000) which is allocated $264,800 to Susan (80% of $331,000) and $66,200 to Jack (20% of $331,000).*

- **Tracking Wages Method** – The taxpayer actually tracks total wages subject to Federal income tax withholding and makes appropriate modifications. W-2 wages using the tracking wages method are determined as follows:
  - Total of the entries in Box 1 of all Forms W-2 filed with SSA, **plus**
    The total amounts reported in forms W-2 box 12 of Forms W-2 that are coded:
  - D – Sec 401(k) elective deferrals
  - E – Sec 403(b) elective deferrals
  - F - Sec 408(k) salary reduction SEP
  - G – Sec 457(b) deferred compensation plan
  - S – Sec 408(p) salary reduction SIMPLE plan

TRACKING WAGES METHOD	
1. Total amounts in Box 1 of W-2s filed for the business entity…	
2. Total pension plan exclusions included in Box 12 codes D, E, F, G, and S.	
3. TOTAL (line 1 + line 2) – MODIFIED BOX 1 METHOD	

Compensation paid to statutory employees (Form W-2 box 13 is checked), is not includible in the calculation of W-2 wages under any of these methods. Wages paid by another employer, such as a staffing agency, are included, but both businesses can't claim the same wages.

Step Two – Properly allocate W-2 wages so only wages associated with QBI are included in the wage limitation calculation. A business entity could have non-U.S. source income, investment income, and capital gains income – none of which is QBI. An activity may have a concoction of business activities and perhaps not all of the activities produce QBI, and an adjustment may be required. (Sec 1.199A(b)(4))

QUALIFIED PROPERTY

Qualified property is defined as meaning tangible, depreciable property which is **held by** and **available for use** in the qualified trade or business at the close of the tax year, which is **used at any point** during the tax year **in the production of qualified business income**, and the depreciable period for which has not ended before the close of the tax year (Code Sec. 199A(b)(6)(A)). Qualifying **tangible depreciable** property would include, for example:

- Machinery
- Tools
- Vehicles
- Residential Buildings (but not land; land is not depreciable)
- Home office (if using the actual expense method, see below)
- Commercial Buildings (but not land; land is not depreciable)
- Office furnishings
- Computer systems
- Bundled software (sold with the computer)
- Over the counter software
- Qualifying property (leasehold improvements, restaurant property and retail improvement property)
- Race horses
- Certain fruit and nut trees and vines (once they reach production stage)
- Certain livestock (generally those purchased for draft, breeding or dairy)
- Farm buildings (but not land; land is not depreciable)
- See IRS Publication 225 for other depreciable farm property
- See IRS Publication 949 for other depreciable property

NOT included would be Sec. 197 intangibles such as:

- Goodwill and going concern value
- Workforce in place
- Know-how
- Customer and supplier-based intangibles
- Government licenses and permits
- Franchises, trademarks, trade names

Special Circumstances – Placed in Service Date

- MACRS property acquired in Sec 1031 Exchange or involuntary Conversion - Split Basis:
  - *Exchanged Basis - Date placed in service will be date the relinquished property was placed in service.*
  - *Excess Basis – Date the replacement property was placed in service.*
- Acquired in Sec 1031 Exchange or involuntary Conversion – Electing Out of Split Basis - Date the replacement property was placed in service.

Unadjusted Basis Immediately After Acquisition (UBIA) – Generally means cost or other depreciable basis on the date placed in service. (Code Sec. 199A(b)(6)(B)(3)).

- It is not reduced for depreciation.
- It is not adjusted for any tax credits allowed.
- Not reduced for bonus depreciation.
- Not reduced for Sec 179 expensing.
- It is reduced for any personal use during the year – such as personal use of a vehicle.
- In the case of real property it does not include land.
- Improvements are treated as separate qualified property.
- Property is not qualified property if acquired within the last 60 days of the year and disposed of within 120 days without being used for at least 45 days prior to disposition. However, ok if taxpayer can show the purposes was not to increase the 199A deduction.

Home Office - It appears, although generally trivial, that when using the home office actual expense method, the home office can be included in UBIA since per Reg 1.199A-2(a)(3) it is "determined and reported" on the tax return.

Allocating UBIA – Where a taxpayer is a partner or shareholder the partnership or S corporation must allocate the UBIA among the shareholders and partners in the same manner as depreciation is allocated to the shareholder or partner. If the qualified property does not produce tax depreciation during the year (for example, property that has been held for less than 10 years but whose recovery period has ended):

- In the case of a partnership, each partner's share of the UBIA of qualified property is based on how gain would be allocated to the partners if the qualified property were sold at fair market value in a hypothetical sale for cash.

- In the case of an S corporation, each shareholder's share of the UBIA of the qualified property is based on the ratio of shares in the S corporation held by the shareholder over the total shares of the S corporation.

NOTE: There are adjustments related to corporate and partnership dispositions not covered in this material.

Depreciable Period – For this purpose the term depreciable period means the period beginning on the date the taxpayer first puts the property in service and **ending on the later of:**

(a) 10 years after the placed-in-service date or

(b) The last day of the last full year of the applicable MACRS recovery period of the property (Code Sec. 199A(b)(6)(B)).

Item	***Property***	***Cost***	***Life***	***In Service***	***Method***	***Qualifying 199A Property***
1	*Displays cases*	*$4,500*	*7*	*2007*	*Depreciate*	*$ 0*
2	*Additional display cases*	*$2,500*	*7*	*2009*	*100% Bonus*	*$ 2,500*
3	*Storage racks*	*$1,200*	*7*	*2016*	*Sec 179*	*$ 1,200*
4	*Cash register*	*$900*	*5*	*2010*	*Depreciate*	*$ 900*
5	*Price labeling machine*	*$175*	*5*	*2010*	*Expense*	*$ 175*
6	*Computer system*	*$2,300*	*5*	*2015*	*Sec 179*	*$ 2,300*
7	*Delivery Truck (light)*	*$8,700*	*5*	*2012*	*Depreciate*	*$ 8,700*
	TOTAL					***$ 15,775***

Example #7 – Retail Store - *Gary has a retail store that he operates in rented retail space. His property that he used in his business* ***during 2018*** *is listed in the table above.*

When looking at the example, remember that the value we use for "qualifying 199A property" is the unadjusted basis. So, depreciation and expensing is ignored for this purpose. However, property counts as "qualifying property" within its depreciable life or 10 years, whichever is greater. Items 1, 4, 5 and 7 are past their useful lives but only 1 has been in service for a period greater than 10 years. So, all of Gary's property except item #1 counts as "qualifying 199A property". Thus, when the wage limitation is computed for Gary the qualifying property used in the computation will be $15,775.

UBIA Example #8: *Richard is a 25% shareholder in an S-Corporation that is not a specified service trade or business. During 2018 the S-corporation had $30,000 of qualified property it used during the year. Thus, when the wage limitation is computed for Richard, the qualifying property used in the computation will be $7,500 (25% of $30,000).*

UBIA Example #9: *Joyce owns a rental property. She originally purchased the property 12 years ago for $500,000 and the land value was $200,000. $300,000 ($500,000 - $200,000) would be the qualified property value for Joyce's rental property.*

Real Estate Investment Trust (REIT) – Sec 199A also includes qualified REIT dividends as pass-through income. However, for this purpose qualified REIT dividends do not include any portion of a dividend received from an REIT that is a capital gain dividend or qualified dividend.

Qualified Publicly Traded Partnership Income – The term "qualified publicly traded partnership income" means, with respect to any qualified trade or business of a taxpayer, the sum of:

(A) The net amount of such taxpayer's allocable share of each qualified item of income, gain, deduction, and loss (as defined in Sec 199A(c)(3) and determined after the application of Sec 199A(c)(4) from a publicly traded partnership with pass-through income (Sec 7704(c)), and

(B) Any gain recognized by such taxpayer upon disposition of its interest in such partnership to the extent such gain is treated as an amount realized from the sale or exchange of property other than a capital asset under Sec 751(a) (unrealized receivables of the partnership).

REITS and Publicly Traded Partnerships - The regulations make it clear that the 199A computation for REITS and publicly traded partnerships (PTPs) is separate from that of the other 199A computations and has no effect on the other's computation. Thus, should the QBI from REITS and PTPs be negative, the result will be a separate loss carryover and will have no effect on the taxpayer's computation of the business entity 199A deduction.

Cooperative Dividends – Cooperatives are not eligible for the deduction. Instead, cooperatives must provide the necessary information to their patrons on Form 1099-PATR or an attachment to help eligible patrons figure their deduction. See the Instructions for Form 1120-C, U.S. Income Tax Return for Cooperative Associations, for rules applicable to agricultural and horticultural cooperatives

Qualified Trade or Businesses

Now we can continue our study of QTB and learn how to apply the wage limitation to QBI from QTBs.

So even though a taxpayer's 1040 taxable income is above the phaseout cap, they can still get a Sec 199A deduction for a QTB so long as the business entity paid wages and/or has UBIA from qualified property. Those are the elements that make up the wage limitation.

Wage Limitation: When a taxpayer's 1040 taxable income exceeds the phaseout cap the preliminary QBI deduction is limited to the lesser of 20% of QBI or the wage limitation. The wage limitation is the greater of:

- 50% of the W-2 wages that the business paid, or
- 25% of the W-2 wages from the business plus 2.5% of the unadjusted basis of the business's qualified property.

However, TCJA phased in this limitation for taxpayers whose taxable income is between the threshold and the cap, resulting in a rather complicated calculation. So, we will study the limitation as it applies to taxpayers whose taxable income exceeds the phaseout cap and rely on the worksheet for those with 1040 taxable incomes between the threshold and the phaseout cap. We start with a taxpayer that is an S corporation stockholder:

Example #10 – Taxable Income Above the Phaseout Cap - *Therese, who is married and filing a joint return, is an active shareholder (meaning she works in the business and is not simply an investor) in an S-corporation and owns 40% of the stock in the corporation. For 2018 she receives a W-2 in the amount of $250,000 as her compensation for working in the business and a K-1 that includes her flow-through income, QBI, of $150,000. Her taxable income (AGI less standard or itemized deductions) from her 1040 is $500,000, which is above the $415,000 cap, so she is subject to the wage limitation. The corporation paid $600,000 in wages during the year, which includes the $250,000 paid to her, and had $100,000 of qualified property. So, her 199A deduction is determined as follows:*

Summary:
QBI = $150,000
Her share of Wages = $240,000 (40% of $600,000)
Her share of qualified property = $40,000 (40% of $100,000)
20% of her QBI = $30,000
50% of her share of the wages = $120,000 (50% of $240,000)
25% of her share of the wages = $ 60,000 (25% of $240,000)
2.5% of the qualified property = $1,000 (2.5% of $40,000)

The preliminary 199A deduction is limited for this activity to the lesser of 20% of QBI ***($30,000)*** *or the greater of:*

- *50% of the W-2 wages from the business* ***($120,000)*** *or*
- *25% of the W-2 wages ($60,000) from the business plus 2.5% of the unadjusted basis of the business's qualified property ($1,000), which totals* ***$61,000****.*

$120,000 is greater than $61,000 so the preliminary 199A deduction for this entity is the lesser of the $120,000 W-2 limitation or $30,000; thus, ***the deduction is $30,000****.*

Example #11 – Wages Adjusted - *But what would have been the result if Therese had taken a W-2 salary of only $90,000 instead of $250,000 and the difference ($160,000) had been added to her QBI (flow-through income). Her QBI would be $310,000 ($160,000 + $150,000). The wages paid by the S-corporation would drop to $440,000 ($600,000 - $160,000). The qualified property would remain the same and we have a substantially different result.*

Summary:
QBI = $310,000.   Her share of Wages = $176,000 (40% of $440,000)
Her share of qualified property = $40,000 (40% of $100,000)
20% of her QBI = $62,000
50% of her share of the wages = $88,000 (50% of $176,000)
25% of her share of the wages = $44,000 (25% of $176,000)
2.5% of the qualified property = $1,000 (2.5% of $40,000)
So, the preliminary deduction is limited to the lesser of 20% of QBI ***($62,000)*** *or the greater of:*

- *50% of the W-2 wages from the business* ***($88,000)*** *or*
- *25% of the W-2 wages ($44,000) from the business plus 2.5% of the unadjusted basis of the business's qualified property ($1,000), which totals* ***$45,000****.*

$88,000 is greater than $45,000 so the preliminary 199A deduction for this entity is the lesser of the $88,000 W-2 limitation or $62,000; thus ***the preliminary deduction is $62,000****.*

SEE COMPLETED WORKSHEET ON PAGE 3.24.14

Example #12 – Different Results for Different Taxpayer - *Consider also that the S-corporation that Therese was a shareholder in had other shareholders that were drawing a W-2 wage. If they also shifted more of their wages to pass-through income, the S-corporation's wages could be reduced to the point that the wage limitation might become the limiting factor. Consider further if the shareholders were the only employees and they all took no W-2 salary, the W-2 limit would be the 2.5% of qualified property and the maximum 199A deduction would be $2,500 (2.5% of $100,000) split between them.*

Commentary: These two examples highlight the issue of "reasonable compensation" in the context of an S-corporation, since the Sec 199A deduction only applies to the K-1 pass-through income, not wages paid to the shareholder. See page 3.24.21 for further discussion on this topic.

Caution: Reasonable compensation is not an amount determined to suit the best tax advantages of the stockholder. It is based on the facts and circumstances of the situation such as what others are paid for doing the same job, cost of living in the area and a number of other factors. See page 3.24.21 for further discussion of reasonable compensation as it applies to the Sec 199A deduction. Also see chapter 3.29 in this text for a detailed discussion of reasonable compensation.

Continue to worksheet – next page

<u>K-1 Pass through Data</u> – Where a taxpayer has an interest in a pass-through activity, the K-1 from the activity will provide the necessary data to compute the 199A deduction for the activity.

If you are the tax preparer receiving a K-1, as opposed to the one who is preparing the K-1, you are not responsible for making the decision of whether the business entity is a qualified trade or business, or a specified service trade or business. Those determinations are made at the entity level, and you as the preparer simply use the information provided with the K-1. The K-1 or an attachment to the K-1 should show the owner's (stockholder, partner, or beneficiary) share of the information required to compute the 199A deduction for that particular entity.

If the K-1 or attachment doesn't include the owner's (taxpayer's) share of the required data, the owner's share will be presumed to be zero. (Reg. Sec. 1.199A-6(b)(iii))

The table below includes the boxes and code numbers for where the information was located on the 2018 K-1s. The data provided includes QBI, wages, UBIA, REIT dividends and publicly traded partnership income. Makes it easy for the 1040 preparer, but pretty gnarly for the preparer of the 1041, 1065 and 1120-S returns. The determination of whether an entity is a SSTB should be provided as a supplement to the K-1.

15	If Line 2 is equal to or greater than Line 5, skip to Line 21 and enter the **lesser** of Line 6 or Line 14. Otherwise continue to Line 16.	
16	If Line 14 is greater than Line 6, skip to Line 21 and enter the amount from Line 6. If Line 14 is equal to or less than Line 6, continue to Line 17.	
17	Subtract line 3 from Line 2	
18	Divide Line 17 by Line 4	
19	Subtract Line 14 from Line 6	
20	Multiply Line 18 by Line 19	
21	**Preliminary Sec. 199A Deduction** for this business (Line 6 minus Line 20)	62,000

Instructions: This worksheet is designed to determine the preliminary 199A deduction for a single business activity. However, it **cannot** be used for specified service trades or businesses. The results of this worksheet must be combined with the results from other businesses and flow-through income of the taxpayer to determine the combined preliminary Sec 199A deduction for the taxpayer. The combined preliminary Sec 199A deduction is further limited to 20% of the adjusted taxable income of the taxpayer.

ClientWhys has a separate worksheet for use with specified service trades or businesses. Although we believe the worksheets compute the deduction correctly, ultimately, the IRS worksheets or forms will take precedence.

Observations:

1. *For S-corporations, planning to maximize the 199A deduction becomes a balancing act between wages and QBI while walking a tightrope with the reasonable compensation issue.*
2. *Just as a reminder, the 199A deduction is figured at the individual, partner or stockholder level. The other stockholders, besides Therese in our examples above, might have taxable incomes below the threshold and would not be subject to the W-2 limitation.*
3. *If the business in the examples above had been a partnership the net profit would have flowed through to the individual partners as QBI. Where the partnership has no employees and no qualified property the W-2 limitation would be zero, and those partners with taxable income above the cap ($415,000 for MFJ and $207,500 for others) would have no 199A deduction (those between the threshold and cap would a get a partial 199A deduction). The same would apply to a sole proprietorship with no W-2 wages or qualified property.*
4. *That brings up another conflicting issue: employee or independent contractor? Before TCJA, many smaller employers wanted to treat workers as independent contractors as opposed to employees to avoid payroll taxes, reporting and ACA issues. But keep in mind payments to independent contractors don't count in the wage limitation and can have an effect on the 199A deduction.*
5. *On the other hand, there are individuals who are currently treated as employees who would like to be independent contractors for any number of reasons, some legitimate and some not. But the primary issues include:*
    a. *They have substantial employee business expenses and can no longer deduct them under TCJA.*
    b. *They would like to benefit from the 199A deduction.*

    Of course, there are negatives: Paying SE tax instead of only the employee share of the FICA and giving up whatever fringe benefits the employer might offer.

Qualified Trade or Businesses
Where you are computing the 199A deduction for **other** than a specified service trade or business when the taxpayer's 1040 taxable income is <u>between the threshold amount and the cap</u>.

Congress, rather than having a step function, established a gradual transition to the W-2 limitation between the threshold ($315,000 for MFJ and $157,500 or others) and the cap ($415,000 for MFJ and $207,500 for others).

In order to do this, they had to phase-out the 20% of QBI deduction and phase-in the W-2 limitation. This computation is best understood by example.

QTB-Example #13 - Taxable Income Between Threshold and Cap *- In this example we have a taxpayer filing a joint return.*

Taxable Income (TI): $385,000
Threshold: $315,000
Differential: $100,000
QBI: $190,000
Tentative 199A deduction: ***$38,000*** *(20% of $190,000)*
W-2 Wages paid by business: $10,000
Qualified Property: $200,000
a*. 50% of Wages: $5,000 (50% of $10,000)*
b. *25% of Wages: $2,500 (25% of $10,000)*
c*. 2.5% of Qualified Property: $5,000 (2.5% of $200,000)*
d*. Wage Limitation: Greater of a. or (b. + c.) = $7,500*
e*. Difference between TI and Threshold = $70,000*
f*. e. divided by the differential = .70 ($70,000/$100,000)*
g*. Tentative 199A deduction less Wage Limitation = $30,500 ($38,000 - $7,500)*
h*. Phase-out = f. times g. = $21,350 (.70 x $30,500)*
I. Preliminary Section 199A deduction:
Tentative 199A deduction less h. = ***$16,650*** *($38,000 – $21,350)*

SEE COMPLETED WORKSHEET ON PAGE 03.24.16

199A QTB Worksheet (2018)

(**NOT** For Use with Specified Service Trades or Businesses)

1	Qualified Business Income (QBI)	190,000
2	Taxpayer's 1040 Taxable Income (before the 199A deduction)	385,000
3	Threshold (enter $315,000 if MFJ; otherwise enter $157,500)	315,000
4	Differential (enter $100,000 if MFJ; otherwise enter $50,000)	100,000
5	Line 3 plus Line 4 (top of threshold range)	415,000
6	Tentative 199A deduction (20% of Line 1)	38,000
7	If Line 2 is equal to or less Line 3, skip to line 21 and enter the amount from Line 6 on Line 21. If Line 2 is greater than Line 3, continue to Line 8 (leave Line 7 blank).	
8	Taxpayer's share of the total wages paid by this business	10,000
9	Taxpayer's share of qualified business property for this business	200,000
	If Lines 8 and 9 are both zero, skip Lines 10 through 13 and enter zero on Line 14.	
10	50% of Line 8	5,000
11	25% of Line 8	2,500
12	2.5% of Line 9	5,000
13	Line 11 plus Line 12	7,500
14	Wage Limitation – **Greater** of Line 10 or Line 13	7,500
15	If Line 2 is equal to or greater than Line 5, skip to Line 21 and enter the **lesser** of Line 6 or Line 14. Otherwise continue to Line 16.	
16	If Line 14 is greater than Line 6, skip to Line 21 and enter the amount from Line 6. If Line 14 is equal to or less than Line 6, continue to Line 17.	
17	Subtract line 3 from Line 2	70,000
18	Divide Line 17 by Line 4	.7000
19	Subtract Line 14 from Line 6	30,500
20	Multiply Line 18 by Line 19	21,350
21	**Preliminary Section 199A Deduction** for this business (Line 6 minus Line 20)	16,650

Official IRS QTB Worksheet Can Be Found on Pages 55-56 of IRS Pub 535

QBI Adjustments

Seems the IRS decided that certain AGI adjustments were business deductions that must reduce QBI.

<u>*QBI Reductions for AGI Adjustments*</u> - The final regulation §1.199A-3(b)(1)(vi) (page 43-44 final regs) specifies that **solely for the determination of QBI** from a trade or business, the following are included as deductions from gross income when determining the activity's QBI.

- Self-employment tax deduction under Sec. 164(f),
- Self-employed health insurance deduction under Sec 162(l), and
- Deduction for qualified retirement plans under Sec 404.

- **Charitable contributions** under Sec 170 – Sec 199A(c)(1) defines QBI as the net amount of qualified items of income, gain, deduction, and loss with respect to any qualified trade or business of the taxpayer and Sec 199A(c)(3) defines the term "qualified items of income, gain, deduction, and loss" to mean items of income, gain, deduction, and loss to the extent such items are effectively connected with the conduct of a trade or business within the U.S. Thus, a charitable contribution made at the partnership level will reduce QBI even though the charitable contribution is passed through separately to the partners. This is because charitable contributions, although not a business expense, is deemed to be "effectively connected with" the related passthrough entity. So charitable contributions made by a passthrough entity reduces QBI,
- **Unreimbursed partnership expenses** under Sec 162 – There is a provision where partners may separately deduct unreimbursed partnership expenses on the Schedule E, line 28, column (g) and enter "UPE" in column (a) provided the partnership agreement requires the partner to pay the expenses. When a partner takes such a deduction, the partner must reduce the QBI from the partnership by the amount of the expenses deducted,
- **Interest expense on purchase debt financing -** Where a partner or S corp. stockholder financed the purchase the entity, the interest on that debt is deductible on separate line of Schedule E, column II labeled "business interest" and the name of the partnership or S corporation (Schedule E Instructions Line 28). These amounts reduce the QBI.
- **Business Interest Expense Limitation** under Sec 163(j) – Where a business does not meet the inflation income exception amount of $25M ($26M for 2019 and 2020) the amount of deductible interest is limited under Sec 163(j) (See chapter 3.25). Limiting the interest deduction has the effect of increasing the QBI leading one to question if entire amount of interest should be used when computing QBI for the 199A deduction. The regs and the IRS do not provide definitive guidance on this issue. This is a wait and see issue.

Where an individual has multiple activities with qualified business income (QBI) the foregoing adjustments to AGI are proportionately allocated among the business activities.

Example: A self-employed individual has a net profit of $130,000. His SE tax deduction for the tax year would be $9,184. He also has a self-employed health insurance deduction of $20,000 and contributed $5,000 to his SEP account.

QBI Before Adjustments:	$130,000
SE Tax Deduction:	< 9,184>
SE Health Insurance Deduction:	< 20,000>
SEP contribution:	< 5,000 >
QBI for 199A purposes:	**$ 95,816**

If the taxpayer had other business activities, these adjustments would have been proportionately applied to the QBI from each.

Observation – An IRA is not a qualified retirement plan under Sec 404. Thus, the taxpayer might have been able to make a deductible contribution of $5,000 to a traditional IRA instead of the SEP and would not have had to reduce his QBI by the $5,000.

Farming Activities and Horticultural Cooperatives

Cooperatives – As the law was originally written, some farmers would have been allowed an overly generous and unfair deduction of 20% of their qualified cooperative dividends, calculated on a *gross* basis. This was referred to as the "grain glitch" and was fixed by the Consolidated Appropriations Act, 2018. With the fix, the deduction for a specified agricultural cooperative is calculated and passed through to patrons under the rules for the domestic production activities deduction (DPAD) that existed before the repeal of Code Sec. 199. Thus, the cooperative's deduction is generally 9% of the lesser of its taxable income, or its qualified production activities income, but limited to 50% of the co-op's W-2 wages paid that are properly allocable to domestic production gross receipts. Some or all of the co-op's deduction may be passed through to its patrons (the farmers), which then reduces the patron's general QBI deduction. The cooperative must provide its patrons with the necessary information on Forms 1099-PATR or an attachment so each patrons can figure their deduction. Starting with 2019 this will be done on Schedule D of Form 8995-A. *Note:* the draft version of the 2020 Form 1099-PATR includes several new boxes that provide the needed information and that aren't on the 2019 version of the form.

Farming Activities – Other than co-op related, are treated the same as any other QTB when computing the 199A deduction.

What about multiple business activities with QBI?

The preliminary 199A deduction must be determined separately for each individual entity of a taxpayer and the various limitations and restrictions are applied at that level. Then all of the preliminary 199A deductions from the taxpayer's\ sources are combined and limited to 20% the taxpayer's taxable income reduced by net capital gains.

Example #15 – Multiple Activities - *The Morgans file a joint return. Their taxable income is $300,000, which includes $25,000 of net capital gains and REIT dividends of $500. They also have the following business activities for which you have computed the preliminary 199A deduction:*

Schedule C Business	*$42,000*
Schedule E Rental	*4,500*
1120-S K-1	*15,500*

First, sum up all the preliminary 199A deductions for all of the taxpayer's activities. That would include the following:

20% of the REIT Dividends	*$ 100*	
Schedule C Business	*42,000*	
Schedule E Rental	*4,500*	
1120-S K-1	*15,500*	
Total		***$62,100***

Next, compute the taxable income limit:

Taxable Income	*$ 300,000*	
Net Capital Gains	*<25,000>*	
Adjusted Taxable Income	*$ 275,000*	
20% of the Adjusted Taxable Income		***$55,000***

*The taxpayer's 199A deduction is the lesser of $62,100 or $55,000, so in this example the taxable income limited the deduction to **$55,000**.*

199A Summary Worksheet (2018)

1	REIT Dividends		500
2	Qualified Publicly Traded Partnership (PTP) Income		
3	Sum of Lines 1 & 2		500
4	199A Deduction for REITs and PTPs (20% of Line 3)		100
	INCOME FROM INDIVIDUAL FLOW-THROUGH BUSINESS ACTIVITIES		
	Description of Flow-Through Business Activities	**Preliminary 199A Deduction**	
5	Schedule C Business	42,000	
6	Schedule E Rental	4,500	
7	Form 1120-S K-1	15,500	
8	TOTAL lines 5, 6, and 7		62,000
9	Tentative 199A Deduction (Sum of lines 4 and 8)		62,100
	DETERMINATION OF TAXABLE INCOME LIMIT		
10	Enter the taxpayer's Taxable Income (Before the 199A deduction)		300,000
11	Enter the Taxpayer's Net Capital Gains		25,000
12	Adjusted Taxable Income (Line 10 less Line 11)		275,000
13	Taxable Income Limit (Line 12 times 20%)		55,000
14	**Section 199A Deduction for this taxpayer** (lesser of Line 9 or Line 13)		55,000

NUANCES AND SIDE ISSUES:

Not an Adjustment to Gross Income - The deduction is not allowed in computing AGI, but rather is allowed as a deduction reducing taxable income. (Code Sec. 62(a), as added by Act Sec. 11011(b)). Thus it will have no impact on AGI limitations. The IRS added line 9 to the 2018 Form 1040 (line 10 on 2019 draft) to accommodate the 199A deduction.

SE Tax - The deduction is only used to offset taxable income, so it does not reduce the net earnings for self-employment used to compute self-employment (SE) tax. Thus, it will not be used to reduce SE tax.

Reasonable Compensation - With the advent of the Sec 199A deduction the issue of "reasonable compensation" takes on a whole new meaning for S-Corporation shareholders. This has been an issue of contention in the past, with shareholders that are actually working in the business and not just being investors taking minimum or no salary and having all the income pass through via the K-1 as investment income, thus avoiding payroll taxes on the income that should have been treated as W-2 compensation.

As an advisor to your clients it is you who will normally provide guidance to your clients to minimize their tax liability. However, you also have to be concerned about the client's IRS jeopardy for not paying themselves an adequate amount for the services provided and instead treating all remuneration as return on investment.

For S-corporations, the Sec 199A deduction only applies to the K-1 pass-through income, not wages paid to the shareholder. The lure of this 20% deduction will only tempt more employee-shareholders to ignore the reasonable compensation requirements.

So, what is reasonable compensation? There currently is no bright line definition, but courts have consistently imposed reasonable compensation based on facts and circumstances. However, IRS Publication 536 provides the following factors to be considered when determining reasonableness:

- The duties performed by the employee.
- The volume of business handled.
- The character and amount of responsibility.
- The complexities of the business.
- The amount of time required.
- The cost of living in the locality.
- The ability and achievements of the individual employee performing the service.
- The pay compared with the gross and net income of the business, as well as with distributions to shareholders if the business is a corporation.
- The company policy regarding pay for all employees.
- The history of pay for each employee.

In the early stages of tax reform (TCJA) the bill included a safe harbor definition of reasonable compensation of 70% compensation and 30% flow-through income. It also allowed a larger (more taxpayer favorable) allocation to flow-through income where a taxpayer could prove investment in the business justified a larger allocation. Unfortunately, that provision did not make the cut.

As a result, this places an increased burden on tax practitioners, who will find themselves between a rock and a hard place (client and IRS) in determining what is reasonable compensation. Further guidance is needed from IRS; hopefully they will come up with safe harbor guidelines (but given the way they side-stepped the "trade or business" definition in the proposed and final 199A regulations, don't bank on it). Otherwise practitioners are exposed to potential preparer penalties and client litigation. **See BB Chapter 3.29 for additional details.**

Partners' or Shareholders' Allocations - For 2018 and subsequent years partnerships and S-corporations will have to provide, in addition to the usual information included on a K-1, the partner's or shareholder's share of qualified business income (QBI), qualified W-2 income paid by the entity and the partner's/shareholder's share of qualified business property. The 1065 and 1120-S K-1s for 2018 provide codes for boxes 20 (1065 K-1) and 17 (1120S K-1) for that information. The partnership or S-corporation is also required to indicate if the trade or business is a specified service trade or business; this is done on a separate statement.

Large Business Activities – At first impression one would think partners and shareholders of entities with large incomes would not qualify for the Sec 199A deduction. But that may not be true because the deduction is based on each partner's or shareholder's allocation of qualified income, wages and qualified property from the entity and each partner's or shareholder's individual taxable income.

LOSSES FROM QUALIFIED TRADE OR BUSINESS ACTIVITIES

- *Single Activity* – Where there is only a single activity qualifying for the 199A deduction and that activity has a loss, the QBI from that activity is zero, and the loss is carried over to the subsequent year's 199A computation.

- *Multiple Activities All Negative QBI* – Where there are multiple business activities and the QBI from each is negative, the QBI is zero and the negative QBI for each is separately carried over and is used to determine the QBI of each activity in the subsequent year.
- *Multiple Activities But Net QBI Is Positive* - When there are multiple activities involved and one or more have negative QBI, but the total QBI from all activities is positive, the QBI for the positive QBI activities is proportionally reduced by the negative QBI before computing the 199A deduction, and the ones that were negative will have no 199A deduction and no carryover.

The reason for the allocation is that some businesses in the group may be SSTBs and the 199A deduction may be subject to phase-out while other businesses may be subject to the wage limitation, which will limit the 199A differently for each activity.

Example #16 - Losses: *Jake has QBI from three qualified trades or businesses as illustrated in the table below. #1 and #2 show positive incomes while #3 shows negative income. Because the overall QBI is positive, the QBI for #1 and #2 must be proportionately reduced by the negative amount from #3 before the 199A deduction is determined for #1 or #2. The 199A deduction for #3 is zero and there is no negative QBI carryover because the QBI of #1 and #2 have been adjusted for the negative amount.*

Business	QBI	Percent	Adjustment	Adjusted QBI
#1	$20,000	20%	<2,000>	$18,000
#2	$80,000	80%	<8,000>	$72,000
#3	<$10,000>			
Total	$90,000			$90,000

The proposed regulations make it clear that these QBI carryovers and adjustment have no effect on the gain or loss computations or passive loss carryovers for the regular tax computation. They are figured separately without regard to the Sec 199A computations.

Previously suspended losses - Several sections of the Code, including:

- 465, At-Risk Limitation,
- 469, Passive Loss Limitations,
- 704(d), Partnership Losses In Excess of Basis, and
- 1366(d), Shareholder Losses In Excess of Basis

provide carryover losses to subsequent years. For purposes of the 199A deduction to the extent that any previously disallowed losses or deductions are allowed in the taxable year, they are treated as items attributable to the trade or business. These losses are to be used in order from the oldest to the most recent on a first-in, first-out (FIFO) basis. However, losses or deductions that were disallowed for taxable years beginning before January 1, 2018, are not taken into account for purposes of computing QBI in a later taxable year. (Reg. Sec 1.199A-3(b)(1)(iv))

Example #17 – Previously Suspended Losses - *John is preparing his 2018 tax return. He has a rental activity that qualifies for the 199A deduction. John also has a $17,000 passive loss carryover from 2017 for that rental. In 2018 John's rental shows a $12,000 loss.*

- ***Regular Tax Computation*** *- For regular tax purposes John's net passive loss for 2018 is $29,000 ($17,000 + $12,000). John's AGI for the year is less than $100,000, so he is entitled to claim a $25,000 rental loss and has a passive loss carryover of $4,000 to 2019.*
- ***199A Computation*** *– For the 199A computations we do not take into account (we disregard) any passive loss carryovers for any years beginning before January 1, 2018. Thus, we disregard the $17,000 passive carryover from 2017. So John's rental QBI for 2018 is a negative $12,000 and since his rental is his only qualified trade or business his 199A deduction for the year is zero. Now the $12,000 loss becomes a QBI carryover to 2019 and will be taken into account when figuring John's 199A deduction in 2019.*

Possible Unexpected Outcome

Since most rentals are qualified trades or businesses for purposes of Sec 199A, and because of substantial depreciation, many of these rentals will be producing negative QBI. Where a taxpayer has positive QBI from other qualified businesses, the negative QBI will reduce the 199A deduction for those other businesses, something the taxpayer may not have been expecting. Claiming the 199A deduction is not an option if the taxpayer qualifies. IRC Sec 199A(a): "Allowance of deduction - In the case of a taxpayer other than a corporation, there shall be allowed as a deduction…" and "shall" means the deduction is mandatory if qualified to claim it.

TRADE OR BUSINESS AGGREGATION

Aggregating (grouping) trades or businesses offers taxpayers a means of combining their trades or businesses for purposes of applying the W-2 wage and UBIA of qualified property limitations and potentially maximizing the deduction under Section 199A. If such aggregation were not permitted, taxpayers could be forced to incur costs to restructure their business activities solely for tax purposes. In addition, business and non-tax law requirements may not permit many taxpayers to restructure their operations. The IRS feels Sec 469 passive activity grouping is inappropriate relative to the 199A deduction, and therefore provides a separate from of grouping for 199A purposes, that permits the aggregation of separate trades or businesses, provided certain requirements are satisfied.

These grouping rules can become quite complicated because they may be made at the business entity level as well as the individual level. For purposes of this material, although we do include the rules applicable to entity aggregation, we will generally limit the discussion to aggregations at the individual level.

Who Should Consider Aggregation? Taxpayers whose taxable income exceeds the 199A deduction phaseout thresholds and who must rely on the wage limitation in order to qualify their QTB (not SSTB) for a deduction. Taxpayers with taxable income below the phaseout threshold amount do not benefit from aggregation. Aggregation is optional.

Before getting into an illustration, remember the 199A deduction figured at entity level is the **lesser** of:

1. 20% of QBI (net of the SE tax and SE health insurance premium adjustments), or
2. The wage limitation.

   The wage limitation is the **greater** of:

   - 50% of the W-2 wages paid by the business or
   - 25% of the W-2 wages paid by the business plus 2.5% of the unadjusted basis of the business's qualified property (abbreviated UBIA).

Illustrations – The illustrations below assume the taxpayer's taxable income is such that the wage limitation will apply in all cases. It also assumes that none of the businesses are SSTBs, which cannot be included in an aggregation. The 199A deduction determined in the illustrations is the amount determined before the final limitation that caps the combined 199A deductions from all sources to 20% of the taxpayer's taxable income before the 199A deduction and net of any capital gains.

Illustration #1 – To simplify the comparison, this illustration assumes the QTBs only have wages and no UBIA. The outcome is that aggregating these three QTBs results in a substantial increase in the 199A deduction.

Trade or Business (QTB)	QBI	A 20% of QBI	Wages	B 50% of Wages	199A Deduction Lesser of A or B
X	$900,000	$180,000	$500,000	$250,000	$180,000
Y	$800,000	$160,000	$80,000	$40,000	$40,000
Z	$2,000	$400	$400,000	$200,000	$400
The combined 199A Deductions for the trades or businesses figured separately:					**$220,400**
Aggregated Businesses	$1,702,000	$340,400	$980,000	$490,000	**$340,400**

Illustration #2 – This illustration assumes the QTBs only have UBIA and no wages. The results show that aggregating these three QTBs provides the taxpayer a substantial increase in the 199A deduction.

Trade or Business (QTB)	QBI	A 20% of QBI	UBIA	B 2.5% of UBIA	199A Deduction Lesser of A or B
L	$25,000	$5,000	$250,000	$6,250	$ 5,000
M	$40,000	$8,000	$80,000	$2,000	$2,000
N	$15,000	$3,000	$900,000	$22,500	$3,000
The combined 199A Deductions for the trade or businesses figured separately:					**$10,000**
Aggregated Businesses	$80,000	$16,000	$1,230,000	30,750	**$16,000**

QBI Losses – When making the aggregation analysis remember that losses from any QTB or SSTB entity proportionally reduce the QBI of the taxpayer's other entities (see page 3.24.19). So, an aggregation excluding an entity with a loss does not overcome the reduction of QBI for the profitable entities.

Next Step – The next step is to see if the proposed aggregation is permissible under the "aggregation qualification general rules" discussed next and whether the taxpayer is willing to abide by the "operating rules" and the "aggregation rules" also discussed later in this material. One important issue to consider is that once aggregated the eligible QTBs are generally aggregated for all future years.

Aggregation Worksheet

A worksheet taking into account both wages and UBIA is included on page 3.24.25.

(b)(1) - Aggregation Qualification General Rules

Under regulation §1.199A-4, Trades or businesses may be aggregated only if an individual or relevant passthrough entity (RPE) can demonstrate that:

A. The same person, or group of persons, directly or indirectly, own a majority interest in each of the businesses to be aggregated for the majority of the taxable year in which the items attributable to each trade or business are included in income. In the case of trades or businesses owned by an S-Corp, own 50% or more the outstanding shares of stock and in the case of a partnership, have 50% or more of the capital or profits in the partnership.
B. The ownership exists for a majority of the taxable year, including the last day of the taxable year, in which the items attributable to each trade or business to be aggregated are included in income.
C. All of the items attributable to each trade or business to be aggregated are reported on returns with the same taxable year, not taking into account short taxable years;
D. None of the aggregated trades or businesses can be an SSTB.
E. Individuals and trusts must establish that the trades or businesses meet at least two of three factors, which demonstrate that the businesses are in fact part of a larger, integrated trade or business. These factors are:
    1. The businesses provide products, property or services that are the same (for example, a restaurant and a food truck) or they provide products, property or services that are customarily provided together (for example, a gas station and a car wash);
    2. The businesses share facilities or share significant centralized business elements (for example, common personnel, accounting, legal, manufacturing, purchasing, human resources, or information technology resources); or
    3. The businesses are operated in coordination with, or reliance on, other businesses in the aggregated group (for example, supply chain interdependencies).
F. Consistent with other provisions in the proposed regulations, each trade or business must itself be a trade or business as defined in §1.199A-1(b)(13).

Operating Rules

(i) Individuals.

- An individual may aggregate trades or businesses operated directly or through an RPE to the extent an aggregation is not inconsistent with the aggregation of an RPE.
- If an individual aggregates multiple trades or businesses, QBI, W-2 wages, and UBIA of qualified property must be combined for the aggregated trades or businesses for purposes of applying the W-2 wage and UBIA of qualified property limitations of the wage limitation.
- An individual may not subtract from the trades or businesses aggregated by an RPE but may aggregate additional trades or businesses with the RPE's aggregation if the aggregation rules are otherwise satisfied.

(ii) RPEs.

- An RPE may aggregate trades or businesses operated directly or through a lower-tier RPE to the extent an aggregation is not inconsistent with the aggregation of a lower-tier RPE.
- If an RPE itself does not aggregate, multiple owners of an RPE need not aggregate in the same manner.
- If an RPE aggregates multiple trades or businesses, the RPE must compute and report QBI, W-2 wages, and UBIA of qualified property for the aggregated trade or business.
- An RPE may not subtract from the trades or businesses aggregated by a lower-tier RPE but may aggregate additional trades or businesses with a lower-tier RPE's aggregation if the rules of this section are otherwise satisfied.

An individual is permitted to aggregate trades or businesses operated directly and trades or businesses operated through relevant pass-through entities (RPEs.). Individual owners of the same RPEs are not required to aggregate in the same manner.

Aggregation Rules (Reg 1.199A-4(c)(1) and (2)

- Once aggregated must consistently report as such in all future years
- If failed to aggregate on an original return, can't aggregate on an amended return except for 2018 tax year.
- May add newly created or acquired (including by non-recognition transfers) trades or businesses.
- If in the future the aggregation no longer meets the aggregation qualification, then the aggregation ceases to apply, and the taxpayer may reapply qualifications to determine if a new aggregation is permissible.
- *In the case of an individual* – The individual must report aggregated trades or businesses of RPE in which the individual holds a direct or indirect interest.
- *In the case of an RPE* – The RPE must report aggregated trades or businesses of a lower-tier RPE in which the RPE holds a direct or indirect interest.

Disclosure - For each year, the individual or RPE must attach a statement to the return that includes:

- A description of each trade or business;
- The name and EIN of each entity in which a trade or business is operated;
- Information identifying any trade or business that was formed, ceased operations, was acquired, or was disposed of during the taxable year;
- Information identifying any aggregated trade or business of an RPE in which the individual holds an ownership interest.

Example #1 - Jack wholly owns and operates a catering business and a restaurant through separate disregarded entities. The catering business and the restaurant share centralized purchasing to obtain volume discounts and a centralized accounting office that performs all of the bookkeeping, tracks and issues statements on all of the receivables, and prepares the payroll for each business. Jack maintains a website and print advertising materials that reference both the catering business and the restaurant. He uses the restaurant kitchen to prepare food for the catering business. The catering business employs its own staff and owns equipment and trucks that are not used or associated with the restaurant.

Because the restaurant and catering business are held in disregarded entities, Jack will be treated as operating each of these businesses directly and thereby satisfies paragraph (b)(1)(i) of the qualification. With regard to meeting 2 of the 3 requirements of (b)(1)(v), Jack satisfies the following factors:

(b)(1)(v)(A) is met as both businesses offer prepared food to customers; and

(b)(1)(v)(B) is met because the two businesses share the same kitchen facilities in addition to centralized purchasing, marketing, and accounting.

Thus, Jack may aggregate the catering and restaurant businesses. (Reg Ex #1)

Example #2 – Same facts as example #1 except the catering and restaurant businesses are owned in separate partnerships and Jack and three of his friends each own a 25% interest in each of the two partnerships.

Because under paragraph (b)(1)(i) of this section Jack and three of his friends together own more than 50% of each of the two partnerships, they **may** each aggregate the catering business and the restaurant as a single trade or business. (Reg Ex #2)

Example #3 - Phil owns a 60% interest in each of four partnerships (PRS1, PRS2, PRS3, and PRS4). Each partnership operates a hardware store. A team of executives oversees the operations of all four of the businesses and controls the policy decisions involving the business as a whole. Human resources and accounting are centralized for the four businesses.

Phil owns more than 50% of each partnership, thereby satisfying paragraph (b)(1)(i). With regard to meeting 2 of 3 of the requirements of (b)(1)(v), Phil satisfies the following factors:

(b)(1)(v)(A) because each partnership operates a hardware store.

(b)(1)(v)(B) because the businesses share accounting and human resource functions.

Phil decides to only aggregate PRS1, PRS3, and PRS4 and report PRS2, which generates a net taxable loss, as a separate trade or business. Phil's decision to aggregate only PRS1, PRS3, and PRS4 into a single trade or business is permissible. The loss from PRS2 will be netted against the aggregate profits of PRS1, PRS3, and PRS4 pursuant to Sec. 1.199A-1(d)(2)(iii). (Reg Ex#4)

Example #4 - George owns 80% of the stock in an S corporation (S1) and 80% of two partnerships organized as limited liability companies. Thus, George meets the ownership requirements of (b)(1)(i). LLC1 manufactures and supplies all of the widgets sold by LLC2. LLC2 operates a retail store that sells LLC1's widgets. S1 owns the real property leased to LLC1 and LLC2 for use by the factory and retail store.

(b)(1)(v)(A) is met for LLC1 and LLC2 because they sell the same product.

(b)(1)(v)(B) is met for S1, LLC1 and LLC2 because they share significant centralized business elements and are operated in coordination with, or in reliance upon, one or more of the businesses in the aggregated group.

(b)(1)(v)(C) S1 owns the real property leased to LLC1 and LLC2 for use by the factory and retail store. Thus, S1 operated in coordination with, or reliance on, other businesses in the aggregated group.

Thus, each entity meets 2 of the 3 requirements of (b)(10(v) and they may be aggregated. (Reg Ex #8)

Example #5 – Same as example #4, except George owns 80% of the stock in S1 and only 20% each of LLC1 and LLC2. George's son owns a majority interest in LLC2, owns no stock in S1 and has no interest in LLC1. George's mother owns a majority interest in LLC1, owns no stock in S1 and has no interest in LLC2. Since the same group of persons, including George, own a majority interest in LLC1 and LLC2 George is considered to have met the ownership requirements of (b)(1)(i). (Reg Ex #9)

Example #6: Clive owns 60% of PRS1, a partnership, that sells non-food items to grocery stores. He also owns 55% of PRS2, a partnership, which owns and operates a distribution trucking business. The predominant portion of PRS2's business is transporting goods for PRS1. Clive meets the (b)(1)(i) ownership test. With regard to meeting 2 of the 3 requirements of (b)(1)(v), Clive only satisfies one of the factors:

(b)(1)(v)(C) - The businesses are operated in coordination with, or reliance on, other businesses in the aggregated group.

Clive does not meet either (b)(1)(v)(A) – provide the same products, property or services or (b)(1)(v)(B) – Share the same centralized business elements. Thus, Clive cannot aggregate the wholesaler and trucking company. (Reg Ex#12)

Example #7: PRS1, a partnership, owns 60% of a commercial rental office building in state A, and 80% of a commercial rental office building in state B. Both commercial rental office building operations share centralized accounting, legal, and human resource functions. PRS1 satisfies the ownership requirements. With regard to meeting 2 of the 3 requirements of (b)(1)(v), PRS1 satisfies the following factors:

(**b)(1)(v)(A) -** provide products, property and services that are the same.

(**b)(1)(v)(B) -** share significant centralized business elements (accounting, legal, and human resource functions).

Thus, PRS1 may aggregate its commercial rental office buildings. (Reg Ex #16)

Example #8: S, an S corporation owns 100% of the interests in a residential condominium building and 100% of the interests in a commercial rental office building. Both building operations share centralized accounting, legal, and human resource functions.

S satisfies the ownership requirements. With regard to meeting 2 of the 3 requirements of (b)(1)(v), S satisfies the following factor:

(b)(1)(v)(B) - share significant centralized business elements (accounting, legal, and human resource functions)

S does not meet either (b)(1)(v)(A) – provide the same products, property or services (commercial vs residential) or (b)(1)(v)(C) – operate in coordination with or reliance on the others. Thus, S cannot aggregate the commercial and residential businesses. (Reg Ex #17)

Precautionary Note: The regulations are taking the position that the commercial and residential activities do not provide the same products, property and services so cannot use (b)(1)(v)(A) for one of the two out of three requirements to group. So, they can only be aggregated together if they meet the requirements of (b)(1)(v)(B) and (b)(1)(v)(C).

SECTION 199A AGGREGATION WORKSHEET

Use this worksheet to compare the sum of the 199A deductions for several QTBs figured separately to the results of aggregating them.

A	B	C	D	E	F	G	H	I	J	K
QTB	QBI	20% of B	Wages	UBIA	50% of D	20% of D	2.5% of E	G Plus H	Greater of F or I	199A Deduction (Lesser of C or J)
The combined 199A Deductions for the trade or businesses figured separately (Sum of Column K):										**Total** $__________
Aggregated QTBs	------------------ **Total entries from each column above** -------------------									
										Aggregation $__________

Instructions:

1. *Precautions:*
    a. *The taxpayer's taxable income is assumed to be such that without benefit of the wage limitation the 199A deduction would be zero.*
    b. *Do not include any SSTBs, as they are not allowed to be aggregated.*
    c. *If any entity is showing a loss, the allocation of the negative QBI among the positive QBIs must be completed before using this worksheet.*
2. *Enter the IDs of the QTBs to be aggregated in Column A, the QBIs from the businesses in column B, the wages in column D and the UBIAs in column E.*
3. *Next, complete the calculation indicated for columns C, F, G, H, I, J and K for each QTB and enter the results in the box for that QTB.*
4. *Next, total the amounts in column K and enter results in the "total" box.*
5. *Next, In the "Aggregated QTBs" row, total the amounts in columns B, D and E.*
6. *Next, for the "Aggregated QTBs" row, complete the calculations indicated for columns C, F, G, H, I, J and K.*
7. *The benefit from aggregation is the excess of the amount in the "Aggregation" box over the amount in the "Total" box.*
8. ***CAUTION:** Just because this worksheet indicates the aggregation provides a benefit does not mean the QTBs aggregated in this worksheet qualify to be aggregated. That is a separate determination. This worksheet does not take the place of Schedule B of Form 8995-A.*

TRUSTS, ESTATES, AND BENEFICIARIES

- **Grantor Trust** - Where the trust is a grantor trust, the owner will compute its QBI with respect to the owned portion of the trust as if that QBI had been received directly by the owner.
- **Non-grantor Trust** – In the case of a non-grantor trust or estate, the QBI and expenses properly allocable to the business, including the W-2 wages relevant to the computation of the wage limitation, and relevant UBIA of depreciable property must be allocated among the trust or estate and its various beneficiaries.

  Distributable Net Income (DNI) – A beneficiary's share of the DNI deemed to be distributed for the year is used to determine the beneficiary's share of QBI and W-2 wages from the trust for the year. Where part of the DNI is not deemed distributed, that amount shall be used to proportionally determine the QBI and W-2 wages for the trust or estate. Where there is no DNI for the year, all QBI and W-2 wages are allocated to the trust or estate. (Reg §1.199A-6(d)(3)(ii))

  UBIA - To the extent the trust's or estate's UBIA of qualified property is relevant to a trust or estate and any beneficiary, the trust's or estate's UBIA of qualified property will be allocated among the trust or estate and its beneficiaries in the same proportion as DNI of the trust or estate is allocated.

  Trust's TI Threshold - is determined at the trust level without taking into account any distribution deductions.

  Anti-Abuse Provisions - Trusts formed or funded with a significant purpose of receiving a deduction under Section 199A will not be respected for purposes of Section 199A.

  Multiple Trusts - In the case in which two or more trusts have substantially the same grantor or grantors and substantially the same primary beneficiary or beneficiaries, and a principal purpose for establishing such trusts or contributing additional cash or other property to such trusts is the avoidance of Federal income tax, then such trusts will be treated as a single trust for Federal income tax purposes. (Proposed §1.643(f)-1)

Now let's examine the issue of what rentals qualify for 199A

RENTAL PROPERTY AND SEC 199A

Regrettably, the most currently misunderstood issue for preparing taxes could be the most significant - the issue of when a rental activity is a trade or business qualified for the Sec 199A deduction. The final regulation (§1.199A-1(b)(14)) defines a trade or business as being the same as trade or business under Code Sec. 162. Whether a taxpayer is engaged in a trade or business under section 162 requires an examination of all the facts and circumstances. (*Higgins v. Commissioner, 312 U.S. 212 (1941)*)

The courts have laid out two conditions necessary for an activity to be a trade or business. The first requires the taxpayer to carry on the activity with the intent of making a profit. (See *Ferrell v. Commissioner, 90 T.C. 1154 (1988)* and *Dreicer v. Commissioner, 78 T.C. 642, 645 (1982), aff'd without opinion 702 F.2d 1205 (D.C. Cir. 1983))* The second requires the scope and level of taxpayer activity to be considerable, regular, and continuous. (See *Groetzinger v. Commissioner (U.S. Supreme Court) 480 U.S. 23, at 32, 35 (1987)).*

Applying these two conditions to Rental Real Estate **-** The Treasury/IRS regulation writers received a number of requests for "bright line rules" to help taxpayers and tax preparers determine whether a rental real estate activity is a trade or business. In response Treasury/IRS issued Notice 2019-07 to address this issue.

Preparer Trap and Pitfall – To quote a close friend of mine, "dealing with rentals and Sec 199A for 2018 is like sitting in the front seat between Bonnie and Clyde." Making the ultimate decision that a rental activity is a trade or business solely on the basis of the Notice 2019-07 safe harbor can lead to big problems. The 199A deduction takes into account both positive (net profit) and negative (net loss) qualified business income (QBI) and negative QBI reduces the positive QBI from other activities, and in doing so, reduces the 199A deduction. Thus, if a **loss** activity qualifies under Sec. 162 and it is not treated as a trade or business because it did not meet the 250-hour safe harbor, that does not preclude the IRS from determining it is a trade or business based upon Sec 162. The best way to look at the safe harbor is the IRS will not challenge your position that the rental IS a trade or business, BUT it is not a safe harbor that a rental is NOT a trade or business.

Rental Property Safe Harbor - On January 18, 2019, the IRS issued Notice 2019-07 which provided the language of a proposed revenue procedure for "safe harbor" conditions under which a rental real estate activity will be treated as a trade or business for purposes of the 199A deduction.

TAKE NOTE - NOTICE 2019-07 IS ONLY A SAFE HARBOR
RENTALS GENERALLY STILL QUALIFY UNDER SEC 162

Failure of the taxpayer to satisfy the requirements of this safe harbor **does not preclude** a taxpayer from **otherwise** establishing that a "rental real estate enterprise" is a trade or business for purposes of section 199A.

The tax code itself does not provide a definition of a trade or business. Regulation Section 1.199A-1(b) (14) defines "trade or business as a trade or business under Section 162". This means that the taxpayer may rely on the large body of court cases involving the question of rental real estate being a trade or business or investment.

Our research finds that virtually all court cases, except in the 2nd Circuit, refer to real estate rental activities as a trade or business with one notable exception for triple net leases. Thus, it is our considered opinion that most rental activities will qualify as a trade or business even if they do not meet the safe harbor requirements of Notice 2019-07.

It's important to note that Notice 2019-07 prescribes three "safe harbor" conditions that if met for a rental real estate enterprise (enterprise is a tax term introduced by the IRS in this notice), the rental real estate enterprise will be deemed to be a trade or business and eligible for the section 199A 20% deduction. For purposes of this safe harbor, a rental real estate enterprise is defined as an interest in real property held for the production of rents and may consist of an interest in multiple properties.

IMPORTANT: Do not mix up the grouping of rentals into a single rental enterprise to meet the 250-hour requirement with the Sec 199A aggregation rules (discussed on page 3.24.23) that allow taxpayers to aggregate business entities. They are two entirely different issues.

The following are the requirements that must be satisfied for the safe harbor:

1. Separate books and records must be maintained for each rental real estate enterprise;

Observation: It is our opinion that if the rentals are not combined into a single rental enterprise, then each requires its own books and records and bank account to meet the safe harbor requirements. If combined into a single rental enterprise, only a single set of books or bank account would be required.

   a. A real estate enterprise can consist of a single or multiple real estate rentals.
   b. Commercial and residential rentals **cannot** be combined in the same real estate enterprise.

Observation: The rules for aggregation of rental real estate trade or businesses under regulation section 1.199A-4 are similar but not the same as the rules for selecting a rental real estate enterprise under Notice 2019-07. **Both** aggregation under Reg Sec 1.199A-4 and rental real estate enterprise groupings under Notice 2019-07 are optional.

2. For years prior to 2023 at least 250 hours of rental services must be performed by the taxpayer and workers for the taxpayer for the year in question with reference to each rental real estate enterprise.

   A three-year lookback rule applies for taxable years 2023 and following. It specifies that the taxpayer must meet the 250-hour requirement for the rental enterprise for any three of the five prior consecutive taxable years; and

3. The taxpayer must maintain *contemporaneous* records, including time reports, logs, or similar documents, to document the following:
   a. hours of all services performed;
   b. description of all services performed;
   c. dates on which such services were performed; and
   d. who performed the services.

Observation: Contemporaneous is a difficult standard to meet, especially if the landlord is expecting his management company, gardener, pool person and other service providers to keep "contemporaneous records".

Special Relief: Because the safe harbor requirements were issued after the close of 2018, the requirement for contemporaneous records for 2018 does not apply.

Rental services – Rental services that may be counted toward the 250 hour requirement include: (i) advertising to rent or lease the real estate; (ii) negotiating and executing leases; (iii) verifying information contained in tenant applications; (iv) collecting rent; (v) daily operation, maintenance, and repair of the property; (vi) management of the real estate; (vii) purchase of materials for operation such as repairs; and (viii) supervision of employees and independent contractors.

However, rental services do NOT include financial or investment management activities, such as arranging financing; procuring property; studying and reviewing financial statements or reports on operations; planning, managing, or constructing long-term capital improvements; ***or*** *hours spent traveling to and from the real estate*.

Rental services counted toward the 250-hour requirement may be performed by owners or employees, agents, and/or independent contractors working for the owners.

Observation: Many landlords compensate their tenants for performing maintenance and repair services. It appears that rental services performed by a tenant will count towards the 250-hour requirement provided:

1. The tenant, **if compensated,** does so as an employee or independent contractor (if the qualification for independent contractor can be met). However, Notice 2019-07 includes no requirement that a tenant, or anyone for that matter, be compensated for the rental services provided.
2. A contemporaneous record of hours worked must be kept by the person responsible for keeping such records, in this case presumably the tenant. Records must be credible.
3. The services could be performed by the property owner's child, even if the child is not compensated for the work done.

*Triple net leases are not eligible for safe harbor***.** Notice 2019-07 specifies that real estate rented or leased under a triple net lease agreement is not eligible for this safe harbor. A triple net lease includes a lease agreement that requires the tenant or lessee to pay taxes, fees, and insurance, ***and*** to be responsible for maintenance activities for a property in addition to rent and utilities. Also ineligible for the safe harbor is a property leased under an agreement that requires the tenant or lessee to pay ***a portion*** of the taxes, fees, and insurance, **and** to be responsible for maintenance activities allocable to the portion of the property rented by the tenant.

Vacation rentals are not eligible for safe harbor **-** Real estate used as a residence by the taxpayer for **any** portion of the taxable year is not eligible for the safe harbor rules (see converted homes below).

Converted homes are not eligible for safe harbor - Real estate used by the taxpayer (including an owner or beneficiary of a relevant passthrough entity relying on this safe harbor) as a residence for any part of the year under section 280A is not eligible for this safe harbor.

Statement must be attached to the tax return **-** A statement signed by the taxpayer, or the person responsible for keeping the records with personal knowledge of them, must be attached to the return declaring that all of the safe harbor requirements have been met and must include the following language (second paragraph). You can expect your tax software to generate this statement:

STATEMENT

I(we) attest to the fact that the rental enterprise or enterprises for which the Sec 199A deduction has been claimed complies with Section 3.03 of the yet unnumbered proposed revenue procedure as articulated in Notice 2019-07.

Under penalties of perjury, I(we) declare that I(we) have examined the above statement, and, to the best of my(our) knowledge and belief, the statement contains all the relevant facts relating to the revenue procedure, and such facts are true, correct, and complete.

Signatures

Year-to-year consistency required **-** The proposed revenue procedure states that taxpayers may not vary this treatment (i.e., treating each rental as a separate enterprise or grouping rentals as an enterprise) from year-to-year.

Double edged sword - The 199A deduction is 20% of a taxpayer's qualified business income from all of the taxpayer's trades or businesses subject to certain limitations. Many rentals do not show a profit and a rental that is treated as a trade of business that shows a deductible loss for the year will reduce the qualified business income of other trades or businesses of an individual, and as a result, reduces the 199A deduction of that individual.

This raises a serious due diligence question for tax preparers. Suppose a client does meet the safe harbor rules of Notice 2019-07 or qualifies as a trade or business under IRC Sec 162 and ends up with a deductible rental loss. Can this loss be omitted from the QBI calculation? The answer is obvious: if it meets the definition of a trade or business, of course it must be included in the computation of the Sec 199A deduction. To make matters more complicated, just because a rental does not meet the safe harbor rules does not mean it is not a trade or business under IRC Sec 162. The safe harbor criteria only means the IRS won't challenge the presumption that it is trade or business, nothing more.

CAUTION - Interest paid as part of a trade or business rental real estate activity is subject to the section 163(j) limitation on business interest UNLESS the rental real estate activity elects under section 163(j)(7)(B) to be an "electing real property trade or business". The effect of this election is that the rental activity though a trade or business, is not subject to the section 163(j) limitation. It's important to note, however, that there is a small business gross revenue exception from the section 163(j) limitation for any section 162 trade or business, whether or not it is a rental activity, where in the 3 prior years the gross annual revenues are less than $25M ($26M for 2019 and 2020). See chapter 3.25 for further details. The $26M (2019) section 163(j) interest limitation will not apply to most rentals.

Next let's look at Sec 162 which the final Sec 199A regulations say to follow when a rental is trade or business for purposes of the 199A deduction.

Rental Determination Using Sec 162 - The final regulation (§1.199A-1(b)(14)) defines a trade or business as being the same as a trade or business under Code Sec. 162. However, Code Sec. 162 is based on a myriad of court cases and IRS rulings that require the tax preparer to make a subjective determination which can be challenged by the Service. The catch-22 here is that IRS can determine a rental is a trade or business under Sec 162 even if it did not meet the safe harbor of Notice 2019-07. (You'll notice in the court cases we've cited that the IRS will sometimes argue that a rental is a trade or business, and in other cases will take the position that a rental is not a trade or business.) With regard to the Sec 199A deduction, a rental activity with a net profit benefits the taxpayer if it is a trade or business, but if the rental has a net loss it is a disadvantage since a net loss will offset any net profit from other business activities. You can't arbitrarily make those decisions to help a client; the decisions have to be based on facts and circumstances.

We see two problems facing tax practitioners:

- Explaining this very difficult determination to their client so the client (a) understands the determination is subjective, and can be challenged by the IRS, and (b) joins in the decision.
- Understanding the numerous tax court cases and how they might tie into their client's particular circumstances. For that we have developed a **checklist of facts and circumstances** that will help a practitioner determine if a rental is a trade or business under Sec 162 and have tied those facts and circumstance to particular court cases in a summary of **court cases and other guidance** that we have developed. The summary includes over 25 court cases related to rentals as trade or business.

COURT CASES & OTHER GUIDANCE - FOR USE IN DETERMINATION OF RENTAL REAL ESTATE TRADE OR BUSINESS

This is a compilation of court cases and other guidance, each concerning the rental real estate trade or business issue. This is to assist in determining whether a rental activity rises to the level of a trade or business. It may be appropriate to review the entire court case or other guidance if used in making a determination of trade or business. We suggest you use the checklist to gather information from your client to help you make an informed decision as to whether or not your client's rental real estate activity is a trade or business. You will notice that after the name of the case or other guidance there is a short description intended to capture the essence of the cited authority as to the rental real estate trade or business determination. We suggest you share your evaluation with your client and keep this evaluation in the client's file. Remember rental real estate trade or businesses with losses **reduce** QBI and the 20% Sec 199A deduction. Rental real estate trades or businesses with net profits increase QBI and the Section 199A deduction.

(I) THRESHOLD ISSUE - PROFIT MOTIVE REQUIRED & FACTS CONTROL

(1) **HIGGINS v. COMMISSIONER, 25 AFTR 1160 (61 S. Ct. 475), (S Ct), 02/03/1941**

Commentary – "whether the activities of a taxpayer are 'carrying on a business' requires an examination of the facts in each case." 312 U.S. at 217. Taxpayer must have a profit motive. Most rental real estate activities are a for profit activity. Vacation rentals, rental for less than fair rental value and hobby properties are examples of not-for-profit activities.

(II) LEVEL OF ACTIVITY REQUIRED

[2] COMMISSIONER V. GROETZINGER, 480 U.S. 23 (1987)

Commentary – Activities must be "beyond the scope of mere ownership of property" **and** must be **considerable, regular, and continuous activity.** See generally Commissioner v. Groetzinger, 480 U.S. 23 (1987) for "regular and continuous" requirements.

[3] FINAL REGS SUMMARY OF COMMENTS & EXPLANATION OF REVISIONS – Sec 1.199A (Pg 22)

As discussed in part II.A.3.a. of this Summary of Comments and Explanation of Revisions, generally under Section 162, to be engaged in a trade or business, the taxpayer must be involved in the activity with continuity and regularity and the taxpayer's primary purpose for engaging in the activity must be for income or profit. Commissioner v. Groetzinger, 480 U.S. 23, 35 [59 AFTR 2d 87-532] (1987).

Commentary: Final regulations require a taxpayer to be involved in a rental activity with continuity and regularity and the primary purpose to be for income or profit.

[4] GENERAL COUNSEL MEMORANDUM (GCM) 38779

The memorandum says the Tax Court requires only a "*relatively small amount of activity"* for trade or business. The Tax Court has repeatedly ruled that one real estate rental activity managed by the owner, including an agent or manager, meets the Groetzinger standard of activities, which are "beyond the scope of mere ownership of property" and were deemed to be **considerable, regular, and continuous activity.**

(III) CASES INVOLVING A SINGLE RENTAL PROPERTY

[5] LELAND HAZARD, 7 TC 372, Code Sec(s) 23, 07/16/1946

Taxpayer occupied his property as a personal residence until such time as the TP relocated, at which point he rented the personal residence property and at the same time listed it for sale. The property was continuously rented for a period of about 3.5 years at which time it sold. The property was sold for $18,500 for which the taxpayer reported an ordinary trade or business loss of $6,844. No other activity was identified.

The IRS took the position that the home was a capital asset on the grounds that the rental was not a trade or business. The Tax Court found it to be a trade or business. The IRS subsequently acquiesced to this decision.

Commentary – A single rental, formerly a personal residence, was a trade or business – no specific other activity discussed.

[6] ANDERS I. LAGREIDE, 23 TC 508, 12/22/1954

"Taxpayer inherited a residence which she then rented out. The Commissioner there argued the rental of this single piece of residential property amounted to the operation of a trade or business regularly carried on by the taxpayer. The Tax Court agreed, saying: "It is clear from the facts that the real estate was devoted to rental purposes, and we repeatedly held that such use constitutes use of the property in trade or business, regardless of whether or not it is the only property so used. We add that the use of the property in trade or business was, upon the facts, an operation of the trade or business in which it was so used. It is clear, also, that the business was 'regularly' carried on, there having been no deviation, at any time, from the obviously planned use."

Commentary – A single residence was a trade or business – no specific other activity discussed as being required.

[7] CURPHEY 73 T. C. 766(1980)

TP managed 6 units, but the Tax Court made this remarkable statement regarding a single rental property being sufficient for trade or business. "This Court (Tax Court) has held repeatedly in cases subsequent to the Supreme Court decision in Higgins that the rental of even **a single piece of real property** for production of income constitutes a trade or business." See also *Fegan*, 71 T.C. 791, 814 (1979); *Elek*, 30 T.C. 731 (1958), acq. 1958-2 C.B. 5; *Noble*, 7 T.C. 960 (1946), acq. 1946-2 C.B. 4, supra; *Hazard*, 7 T.C. 372 (1946), acq. 1946-2 C.B. 3.

Commentary –Single rental is a trade or business & husband agent OK.

(IV) CASES WHERE TAXPAYER TRIED TO RENT BUT FAILED

(8) GEORGE S. JEPHSON., 37 BTA 1117, Code Sec(s) 23, 06/24/1938

A taxpayer, who purchased a house for renting, listed it for rent with a broker and showed it to prospective tenants but failed to rent it, was engaged in a business, and is entitled to deductions for care and maintenance expenses and depreciation on the property.

Commentary – Taxpayer attempted to rent but was not successful, ruled to be a **trade or business.**

(9) JACKSON V COMMISSIONER 34 T.C.M. 1139 (1975)

"But the record here, while shedding little light on what affirmative steps may have been taken to rent the property, makes clear those measures that were not pursued. Petitioner did not employ a rental agent nor advertise in newspapers his willingness to rent the El Cajon property despite the fact that at times, similar measures were among those used in efforts to sell the property. Moreover, although the property was no longer suitable for occupancy by the time he reluctantly expressed a willingness to accept a tenant, he did not undertake to make any of the repairs that were required to put the property in rentable condition. Such inaction certainly raises doubts about the earnestness with which petitioner tried to rent the property"

Commentary – Purchased for sale-Attempt to rent not serious enough – **Not Trade or Business**

(10) CAMPBELL v. COMMISSIONER 5 TC 272 (1945)

Facts from evidence indicated that TP's "only purpose in buying the property … was to rent it and that he tried to do so by listing it with a broker and showing it to prospective tenants, and that later he bought (another piece of property next door) …as a step in assembling property on which to build an apartment house".

Commentary – Attempt to rent was serious – **Trade or Business found**

(11) ESTATE OF MARIA ASSMANN, 16 T.C. 632 (1951)

Minimal unsuccessful efforts to rent not good enough. (See *Jackson* TCM 1965-275, to the same effect; also see *Redisch* TCM 2015-95, converted second home - unsuccessful attempt to rent - not a trade or business.)

Commentary: Minimal unsuccessful attempts to rent **NOT a trade or Business.**

(V) LEVEL OF ACTIVITY REQUIRED TO BE HIGHER IN 2ND CIRCUIT BUT AGENT ACTIVITY COUNTS

(12) 2ND CIRCUIT (covers the states of Connecticut, New York & Vermont)

Activities must be "beyond the scope of mere ownership and the receipt (collection) of income and these activities must be "continuous" rather than sporadic, "regular" rather than irregular, and "considerable" rather than minimal." (*Keefe* below; *See Alvary v. United States, 302 F.2d 790, 796-797 (2d Cir. 1962); Gilford v. Commissioner, 201 F.2d at 736; Pinchot v. Commissioner, - 17 - [*17] 113 F.2d 718, 719 (2d Cir. 1940); Balsamo v. Commissioner, T.C. Memo. 1987-477; Grier, 120 F. Supp. 395 at 398).* Courts found that minimal activities with respect to the house as compared to the length of ownership, the lack of activity to rent or re-rent, and the absence of employees hired to regularly maintain or repair the premises did not rise to a trade or business - lack of "regular and continuous activity of management" under a facts and circumstances analysis.

Commentary: 2nd circuit requires the taxpayer's rental activities to be "continuous" rather than sporadic, "regular" rather than irregular, and "considerable" rather than minimal. *Grier, 120 F. Supp.* ***395*** *at 398* is the seminal 2nd Circuit case)

(13) GILFORD v. COMMISSIONER, 43 AFTR 221 (201 F.2d 735), (CA2), 02/05/1953

Although it does not appear that the petitioner did anything herself in connection with the management of eight buildings, **an appreciable amount of time and work** was necessarily required on the part of the managing agent. And if such management was a "trade or business," the petitioner was so engaged although she acted only through an agent.

Commentary – Taxpayer's involvement in the rental was entirely through an agent, and the tax court ruled it to be a **trade or business**.

[14] DAVID KEEFE, ET UX., TC MEMO 2018-28

Maintenance and repairs supplied by the taxpayer or an agent of the taxpayer; the taxpayer's employment of labor to manage the property or provide services to tenants; the purchase of materials; the collection of rent; and the payment of expenses. *See also* Alvary v. United States, 302 F.2d 790, 796-797 [9 AFTR 2d 1633] (2d Cir. 1962); Gilford v. Commissioner, 201 F.2d at 736; Pinchot v. Commissioner, 113 F.2d 718, 719 [25 AFTR 447] (2d Cir. 1940); Grier, 120 F. Supp. 395 at 398. The totality of the facts and circumstances surrounding the use of the property must support a conclusion that the alleged rental activities were sufficient, continuous, and substantial enough to constitute a trade or business with respect to the rental of the property.

Commentary: More activity needed since this case was in the 2nd Circuit. "This Court will "follow a Court of Appeals decision which is squarely in point where appeal from our decision lies to that Court of Appeals and to that court alone." Golsen v. Commissioner, 54 T.C. 742, 757 (1970), aff'd, 445 F.2d 985 (10th Cir. 1971). Court determined the taxpayer's efforts were sufficient, continuous, and substantial enough to constitute a **trade or business**.

[15] FACKLER 45 BTA 708, (19) aff'd 133 F2d 509, 30 AFTR 932 (CA-6, 1943)

TP was responsible for expenses such as heat, light, water, insurance, real estate commissions, real estate taxes, miscellaneous expenses and repairs. **Trade or business found**. The sixth Circuit emphasized the importance of "rendering personal services to tenants" but did not elaborate on what those "personal services" were or are.

[16] PETER S. ELEK, 30 TC 731, 06/26/1958

The taxpayer, a Hungarian who relocated to the U.S., had his father take over managing his apartment building in Budapest. The court determined the rental and management of an apartment building or residential property amounted to a trade or business of the owner, and this is true where an agent, in this case his father, acts for the owner.

Commentary – Agent did the management - Taxpayer's involvement in the rental was entirely through an agent, his father, and the tax court ruled it to be a **trade or business**.

(VI) AGRICULTURAL LAND LEASE CASES

[17] BYRON K. ANDERSON, TC MEMO 1982-576, CODE SEC(S). 280A, 09/30/1982

Taxpayer owned 80 acres of farm land which he leased to tenant farmer. The court agreed if the taxpayer had personally farmed the 80 acres it undoubtedly could constitute a trade or business. However, he leased it to a tenant farmer, thereby relieving himself of virtually all of the day-to-day responsibilities of farming and thus was not a trade or business.

Commentary – Farm land leased to a tenant farmer who did all of the day-to-day work, court ruled **NOT a trade or business**

[18] GOOD V COMM 16 T.C. 906 (1951)

For several years' petitioner rented 20 acres of land to tenants who raised hay and grain, the rent being in the form of a quarter share of the profits. For the remainder of the time petitioner rented the property as pasture for $50 per year, and during two or three years a 2-acre portion of it was rented for the storage of lumber, also for $50 a year. When petitioner rented it for both pasture and as a lumber yard the total annual rental of $100 exceeded the property taxes."

Commentary – Farm land leased to a tenant farmer - partially crop share and partially land lease - ruled a **trade or business.**

(VII) MISCELLANEOUS ISSUES

[19] JACKIE H. ROBINSON, ET UX., TC MEMO 2014-120

The Robinsons claimed **losses** for 2007 and 2008 derived from rental real estate expenses and depreciation on their Magnolia house. Though the Robinsons rented out the Magnolia house from 1995 through 1999 and again in December 2009, they received no rents in 2007 or 2008. The property was not held out for rent from 1999 until 2009, a 10-year period, and the Robinsons made no effort to sell the property. The tax court determined the Robinsons did not engage in a real estate trade or business or hold the Magnolia house out for the production of income. They failed to make any significant attempt to sell the property during the years at issue, and the house went unrented for the 10-year period encompassing the tax years at issue.

Commentary – Treatment as a rental was inconsistent, rented for 4 years, unrented for 10 years, then sold. Court ruled **NOT a trade or business**.

[20] EDGAR PERRY, ET UX. V. COMMISSIONER, TC MEMO 2018-90 - RENTAL AT LESS THAN FRV

The court found that the taxpayers failed to carry their burden of establishing that they rented petitioners' second house to petitioners' relatives at fair rental.

Commentary – Taxpayer rented the home for less than fair market to relatives. Thus, **NOT a trade or business**.

[21] VICTORIA BALSAMO, TC MEMO 1987-477, 09/21/1987 - EVIDENCE NOT CREDIBLE & ACTIVITIES ALMOST NONEXISTENT

Petitioner's activities with respect to the premises as rental property were almost nonexistent. Petitioner testified that the lessee, Economopoulos, pointed out to her a dead rat, a bee's nest, and several leaks during her single visit, yet petitioner presented no evidence that she attempted to remedy these problems during her period of ownership.

Commentary: Testimony and other evidence not credible, records incomplete, taxpayer activity almost nonexistent - very short rental period. The court found it was **NOT a trade or business**.

[22] HAJOS 23 T.C.M. 2015 (1964) -PERSONAL RESIDENCE CONVERTED TO RENTAL

Private personal residence for about 1½ years converted to rental for 1 ½ years till sold. Court found it to be a trade or business.

Commentary: Personal residence converted and sold within 1½ years was a **trade or business**.

[23] STRATTON V. COMMISSIONER, T.C. MEMO 1962-218 - IRS ARGUED ONE RENTAL WAS A TRADE OR BUSINESS

IRS argued "the mere renting of the house for the (three-year period) constituted the carrying on of a trade or business." Court determined it was a trade or business.

Commentary: In this case the IRS argued in favor of a trade or business. House rented for three years was a **trade or business**. The sole issue was whether the loss realized when the house was sold in 1951 was an ordinary loss deductible only in the year of the loss or a capital loss which can be carried forward to the years in question.

[23.1] **James B. and Joan E. Murtaugh v. Commissioner (1997-319) - 25% interest in two timeshare units rented** in a resort lodging facility were trade or business even though they lost money for two years and then were sold.

(VIII) OTHER GUIDANCE

[24] NOTICE 2019-07

This notice provides for 250 hours of rental services to achieve a safe harbor designation that a rental real estate enterprise is a trade or business. To qualify for the safe harbor contemporaneous records must detail (i) the hours of all services performed; (ii) description of all services performed; (iii) dates on which such services were performed; and (iv) who performed the services. It also requires the taxpayer to attach a statement, signed under penalty of perjury, that all the safe harbor requirements have been satisfied.

Commentary: Keep in mind the regulations specifically state that rentals can qualify under Sec 162, and the taxpayer need not meet Notice 2019-07's requirements to be a Trade or Business (see cases above).

[25] TRIPLE NET LEASES

Notice 2019-07 excludes triple net leases from qualifying under the safe harbor. In addition, triple net leases do not appear to qualify under Sec 162 either since the taxpayer provides no meaningful rental services.

SECTION 199A

RENTAL REAL ESTATE TRADE OR BUSINESS CHECKLIST:

This checklist is designed to help tax professionals determine the level of activity for the purpose of evaluating a rental activity's qualification for trade or business status under IRC section 162 for purposes of the pass-through deduction under IRC section 199A. The superscripted numbers refer to specific court cases or other guidance included in the "Court Cases & Other Guidance" to be used with this worksheet. This checklist does not provide a definitive determination, but rather assembles the information helpful to arrive at a decision based upon the facts and circumstances of the situation.

☐[24] Check this box if the activity meets the 250-hour safe harbor requirements of Notice 2019-07. (If you have checked this box and documented the safe-harbor requirements, the activity is deemed to be a trade or business for purposes of the Sec 199A, and you don't need to use the checklist.)

The level of activity need not rise to the 250-hour safe harbor level of Notice 2019-07 to qualify as a trade or business under IRC Section 162, but there must be some level of activity above that of a triple net lease, [25] which is specifically excluded from the definition of a trade or business under Sec 199A. (See prologue to the final Sec 199A regulations, page 17, section II.A.3.b. & Notice 2019-07, section 3.05). The courts (particularly the Tax Court confirmed by GCM 38779), have found that only "a relatively small amount of activity" is indicative of a trade or business. Use this worksheet to gather the facts and circumstances to help determine if the rental activity meets the Sec 162 definition of a trade or business.

A. Describe rental property
 ☐Commercial, ☐Residential, ☐Land lease, [17] [18] ☐Farm land [17]
 ☐Other (describe):____

B. How many other rental activities does the taxpayer own? ______

C. How long has this rental property been owned: ______

D. Has its use always been a rental? ☐Yes ☐No [2] [19] [22]

E. If no, explain: ____

F. Is it rented at less than FRV? ☐Yes ☐No [1] [20]

G. Did owner attempt to rent it but fail to do so? ☐Yes ☐No [8] [9] [10] [11]
 If yes, how long did owner attempt to rent? ____________________

H. Describe efforts to rent & conditions that hindered rental: ____

I. Has it been continuously rented or available for rent? ☐Yes ☐No [3] [10] [11] [12]
 If no, explain: ____

J. Check the boxes of the following expenses the owner or owner's property manager or other agent paid on behalf of the taxpayer: [6] [15] [16]
 ☐Mortgage P & I ☐Taxes ☐Insurance ☐Utilities ☐Fees
 ☐Homeowner assessments ☐Other (describe) ______________________

K. Was the taxpayer or the taxpayer's property manager or other agent responsible for the repairs and maintenance for the rental? ☐Yes ☐No [4] [13] [14] [15] [16]

L. Check the boxes and give cost for the repairs and maintenance actually completed by the taxpayer or the taxpayer's property manager or other agent during the year: [8] [14] [15] [16]
 ☐Gardening $_______ ☐Landscaping $_______ ☐Tree service $_______ ☐Pool maintenance $_______
 ☐Painting $_______ ☐Roof repairs $_______ ☐Appliance repair/replacement $_______ ☐Electrical $_______
 ☐ Plumbing $_______ ☐Other (description): ____ $_______

M. Management activities performed by the taxpayer, property manager, or taxpayer's other agent during the year: [9] [13] [16]
 ☐Showed property ☐ Prepared, negotiated and/or renewed leases ☐Presided over evictions ☐Maintained the books and records ☐ Supplying furnishings ☐ Cleaning & preparing unit(s)

*Rental activities that are specifically not trades or businesses:

- Triple net lease [25]
- Home rented to a related individual or entity at less than fair rental value [20]
- Vacation home rental [20]

Conclusion

It is our opinion that the determination of trade or business for rental activities should be based on Sec 162, and the safe harbor used sparingly and only where there is doubt under Sec 162, if at all. Our research of court cases upon which Sec 162 is based indicates most rental real estate activities are trades or businesses.

Consideration should be seriously given to the proper treatment of each activity under relevant case law with the conclusion that, except for exceptions outlined above, a rental real estate activity will be a trade or businesses. Consistency for both net profit and net loss activities is appropriate.

But of course, how you handle this mess is entirely up to you. Court rulings are certainly in our future but that will take a number of years to play out.

WORKSHEETS & NEW IRS FORMS

The following blank worksheets are provided for use by our students

CAUTION

SECTION 199A IS COMPLEX IN ITS WORDING AND ALTHOUGH WE USED OUR BEST EFFORTS TO DEVELOP WORKSHEETS TO COMPUTE THE DEDUCTION, THE ULTIMATE IRS INTERPRETATION MAY BE SOMEWHAT DIFFERENT THAN OURS. THEREFORE, IF YOU USE THESE WORKSHEETS, YOU DO SO AT YOUR OWN RISK**.**

For 2019 the IRS has developed two new forms that take the place of the worksheets that were available for 2018 in the 1040 instructions and Publication 535. According to drafts, these forms are:

- Form 8995 - Qualified Business Income Deduction Simplified Computation
- Form 8995-A - Qualified Business Income Deduction (plus a separate Sch A to handle SSTBs, a separate Sch B for aggregation of business operations, a separate Sch C for loss netting and carryforward, and a separate Sch D to deal with farming cooperatives)

At the time this chapter was updated, a draft of the instructions for Form 8995 (5 pages) was posted on the IRS web site, but those for the 8995-A and its schedules weren't available so we don't know how many pages they will be. The forms drafts are available on the IRS web site, https://apps.irs.gov/app/picklist/list/draftTaxForms.html - enter 8995 in the search box.

2019 199A SSTB Worksheet

(For use **ONLY** with **Specified Service Trade or Businesses**)

Business Name: ______________________________

☐ Schedule C ☐ Schedule E ☐ Schedule F ☐ 1065 ☐ 1120-S

1.	Qualified Business Income (QBI)	
2.	Taxpayer's 1040 Taxable Income (before the 199A deduction)	
3.	Threshold (enter $321,400 if MFJ; $160,725 if MFS and $160,700 others)	
4.	Differential (enter $100,000 if MFJ; otherwise enter $50,000)	
5.	Line 3 plus Line 4 (top of threshold range)	
6.	If Line 2 equals or exceeds Line 5, **STOP** and enter zero on Line 22. Note: The 199A deduction for this business is zero. If Line 2 is less than Line 5, enter zero here and continue to Line 7.	
7.	Tentative 199A deduction (20% of Line 1)	
8.	If Line 2 is less than Line 3, **STOP** and enter the amount from Line 7 on Line 22. Note: The 199A deduction for this business is the full 20% of QBI. If line 2 is greater than Line 3, enter zero here and continue to Line 9.	
9.	Wages paid by this business	
10.	Assets (unadjusted basis of this business' eligible tangible property)	
11.	50% of wages	
12.	25% of Wages	
13.	2.5% of Assets	
14.	Line 12 plus line 13	
15.	Wage Limit – Greater of line 11 or Line 14	
16.	Subtract Line 3 from Line 2	
17.	Divide Line 16 by Line 4	
18.	If Line 7 is greater than Line 15, enter ((Line 7 – Line 15) x Line 17). Otherwise enter zero.	
19.	Line 7 less Line 18	
20.	1 minus Line 17	
21.	Line 20 times Line 19	
22.	**Preliminary Section 199A Deduction –** Lesser of Line 18 or Line 21	

Instructions: This worksheet can only be used for specified service trade or businesses. It is designed to determine the 199A deduction for a single business. The results of this worksheet must be combined with the results from other businesses and flow-through income of the taxpayer to determine the combined Sec 199A deduction for the taxpayer. The combined Sec 199A deduction is further limited to 20% of the adjusted taxable income of the taxpayer.

ClientWhys has a separate worksheet for use with other qualified businesses. Although we believe the worksheets compute the deduction correctly, ultimately, when the IRS worksheets become available, they will take precedence.

Specified Service Trade or Businesses: Generally, includes any trade or business described in Sec 1202(e)(3)(A), but excluding engineering and architecture and trades or businesses that involve the performance of services that consist of investment-type activities. Specified service businesses include trades or businesses involving the performance of services in the fields of: health, law, accounting, actuarial science, performing arts, consulting, athletics, financial services, brokerage services or any trade or business where the principal asset of such trade or business is the reputation or skill of 1 or more of its employees as defined in Prop Reg. 1.199A-5(b)(2)(xiv),

2019 199A QTB Worksheet

(**NOT** For Use with Specified Service Trades or Businesses)

Business' Name: ____

☐ Schedule C ☐ Schedule E ☐ Schedule F ☐ 1065 ☐ 1120-S

1	Qualified Business Income (QBI)	
2	Taxpayer's 1040 Taxable Income (before the 199A deduction)	
3	Threshold (enter $321,400 if MFJ; $160,725 if MFS and $160,700 others)	
4	Differential (enter $100,000 if MFJ; otherwise enter $50,000)	
5	Line 3 plus Line 4 (top of threshold range)	
6	Tentative 199A deduction (20% of Line 1)	
7	If Line 2 is equal to or less Line 3, skip to line 21 and enter the amount from Line 6 on Line 21. If Line 2 is greater than line 3, continue to Line 8 (leave Line 7 blank).	
8	Taxpayer's share of the total wages paid by this business	
9	Taxpayer's share of qualified business property for this business	
	If Lines 8 and 9 are both zero, skip Lines 10 through 13 and enter zero on Line 14.	
10	50% of Line 8	
11	25% of Line 8	
12	2.5% of Line 9	
13	Line 11 plus Line 12	
14	Wage Limit – **Greater** of Line 10 or Line 13	
15	If Line 2 is equal to or greater than Line 5, skip to Line 21 and enter the **lesser** of Line 6 or Line 14. Otherwise continue to Line 16.	
16	If Line 14 is greater than Line 6, skip to Line 21 and enter the amount from Line 6. If Line 14 is equal to or less than Line 6, continue to Line 17.	
17	Subtract line 3 from Line 2	
18	Divide Line 17 by Line 4	
19	Subtract Line 14 from Line 6	
20	Multiply Line 18 by Line 19	
21	**Preliminary Section 199A Deduction** this business (Line 6 minus Line 20)	

Instructions: This worksheet is designed to determine the 199A deduction for a single business activity. However, it **cannot** be used for specified service trades or businesses. The results of this worksheet must be combined with the results from other businesses and flow-through income of the taxpayer to determine the combined Sec 199A deduction for the taxpayer. The combined Sec 199A deduction is further limited to 20% of the adjusted taxable income of the taxpayer.

ClientWhys has a separate worksheet for use with specified service trades or businesses. Although we believe the worksheets compute the deduction correctly, ultimately, when the IRS worksheets become available, they will take precedence.

199A Summary Worksheet

Caution: The Worksheet Does Not Accommodate Business Losses. Loss adjustments must be made at the QBI level for each trade or business activity.

1	REIT Dividends		
2	Qualified Publicly Traded Partnership (PTP) Income		
3	Sum of Lines 1 & 2		
4	199A Deduction for REITs and PTPs (20% of Line 3)		
	INCOME FROM INDIVIDUAL FLOW-THROUGH BUSINESS ACTIVITIES		
	Description of Flow-Through Business Activities	**Preliminary 199A Deduction**	
5			
6			
7			
8	*Total of lines 5, 6 and 7*		
9	Tentative 199A Deduction (Sum of lines 4 and 8)		
	DETERMINATION OF TAXABLE INCOME LIMIT		
10	Enter the taxpayer's Taxable Income (Before the 199A deduction)		
11	Enter the Taxpayer's Net Capital Gains		
12	Adjusted Taxable Income (Line 10 less Line 11)		
13	Taxable Income Limit (Line 12 times 20%)		
14	**Section 199A Deduction for this taxpayer** (lesser of Line 9 or Line 13)		

Instructions: This worksheet is designed to summarize all of the 199A deductions of the taxpayer and apply the final taxable income limit. It does not accommodate situations where one or more of the taxpayer's pass-through businesses has a negative QBI.

ClientWhys has three separate worksheets to develop the information needed for lines 7 thru 9. They include (1) Worksheet for most businesses, (2) Worksheet for specified services trades or businesses and (3) a worksheet for farming and cooperatives activities. Although we believe the worksheets compute the deduction correctly, ultimately, when the IRS worksheets become available they will take precedence.

EXCESS BUSINESS LOSSES & INTEREST DISALLOWANCE

Overview

Excess Business Losses

- Married Filing Joint – Applicable if losses are $510K (2019) or more
- Others - Applicable if losses are $255K (2019) or more

Interest Disallowance

- Applies to taxpayers (other than tax shelters) with average gross receipts for the three prior years of more than $26 million (2019)

Pubs

Forms

EXCESS BUSINESS LOSSES

The Details

Under pre-TCJA law (IRC Sec 461(j)), if a non-corporate taxpayer in the farming business received an applicable government subsidy, including a Commodity Credit loan, for the tax year, the taxpayer's "excess farm loss" for that year wasn't allowed. The amount of loss that could be claimed was limited to a threshold amount of $300,000 ($150,000 for MFS taxpayers).

TCJA

Under TCJA the IRC Sec 461(j) limitation on "excess farm loss" for non-corporate taxpayers no longer applies after 2017 and through 2025. Instead all non-corporate taxpayers' loss deductions are limited to a threshold amount *(IRC Sec. 461(I) as modified by TCJA Sec. 11012(a)).*

An "excess business loss" is the excess (if any) of the taxpayer's aggregate deductions for the tax year that are attributable to trades or businesses of the taxpayer (determined without regard to whether or not the deductions are disallowed for that tax year) over the sum of:

(i) the taxpayer's aggregate gross income or gain for the tax year, which is attributable to those trades or businesses, plus

(ii) $250,000 (200% of that amount for a joint return (i.e., $500,000)). This amount is adjusted for inflation after 2018, and for 2019, these amounts are $255,000 and $510,000, respectively.

APPLICABLE EXCESS BUSINESS LOSS			
Year	2018	2019	2020
Excess Business Loss			
MFJ	$500,000	$510,000	518,000
Others	$250,000	$255,000	259,000

Example: *A single taxpayer, in 2019, has deductions of $500,000 from a business. The taxpayer's gross income from the business is $200,000. The deductible loss would have been $300,000 prior to the TCJA change (provided the business was not a passive activity). The excess business loss under TCJA is $45,000 ($500,000 – ($200,000 + $255,000)). Thus, the taxpayer's deductible business loss for 2019 is $255,000 and the excess business loss of $45,000 is treated as an NOL carried forward to the next year.*

Coordination with Passive Loss Rules – Passive loss limitations apply before the excess business loss rules (Code Sec 461(l)(6)). Presumably, if a loss is disallowed under the passive activity loss rules, any deductions or income from that passive activity would not be considered in the determination of whether a taxpayer has an excess business loss.

Commentary: However, Code Sec. 461(l)(3)(A) language does not limit losses used in determining excess business losses to "active" trades or businesses, so some additional guidance is needed from the IRS.

***Commentary*:** TCJA also modified the NOL deduction for losses incurred after 2017 so there is no carryback and the carryforward is indefinite. But the deduction of post-2017 NOLs can only offset 80% of a taxpayer's income in any year. (See chapter 316 for more detail and an issue about effective date.)

DISALLOWANCE OF BUSINESS INTEREST

TCJA

Effective beginning in 2018, TCJA gets rid of the special and complicated "earnings strippings" rules that were put in place to prevent a U.S. corporation from borrowing money from a foreign subsidiary in a lower tax bracket and then deducting interest on the U.S. corporate return. We won't get into that big business tactic other than to provide a little understanding why this provision was passed. Regardless of business form, the interest expense is limited to the sum of:

1. The taxpayer's business interest income for the tax year;
2. 30% of the taxpayer's adjusted taxable income for the tax year; plus
3. The taxpayer's floor plan financing interest (certain interest paid by vehicle dealers) for the tax year.

The net interest expense disallowance is determined at the taxpayer level. *IRC Sec 163(j)(1) as amended by TCJA Sec. 13301(a)*

For purposes of this limitation, the following definitions and rules apply:

- **Adjusted Taxable Income** - For 2018 through 2021, adjusted taxable income is determined without regard to depreciation, amortization or depletion deductions. In addition, adjusted taxable income means taxable income computed without regard to:
  - Any item of income, gain, deduction, or loss which is not properly allocable to a trade or business;
  - Any business interest income or business interest expense;
  - The amount of any net operating loss deduction;
  - The amount of any qualified business income deduction allowed under section 199A; and
  - Adjustments described in published guidance.
- **Small Business Exemption** – An exemption from the rules applies to taxpayers (other than tax shelters) with average gross receipts for the three prior years of $25 million or less. This amount is inflation-adjusted for years after 2018, so for 2019 the exemption amount is $26 million or less.

SMALL BUSINESS EXCEPTION		
2018	2019	2020
$25 Million	$26 Million	$26 Million

***Commentary*:** Most small businesses are below the threshold so the interest deduction limitation generally will not apply.

- **Real Property Trades or Businesses** – Can elect out of this provision by using the alternative depreciation system (ADS) to depreciate the real property used in a trade or business. For this purpose a real property trade or business means any real property development, redevelopment, construction, reconstruction, acquisition, conversion, rental, operation, management, leasing, or brokerage trade or business. (Form 8990 instructions)

Commentary: The ADS recovery period was reduced for residential real estate from 40 to 30 years by TCJA.

- **Farming Businesses** - Farming businesses and specified agricultural or horticultural cooperatives can elect out of this provision if they use ADS to depreciate any property used in the farming business with a recovery period of ten years or more. For this purpose a farming business includes livestock, dairy, poultry, fish (includes an area where fish and other marine animals are grown or raised and artificially fed, protected, etc., but not an area where they are merely caught or harvested), fruit, nuts, and truck farms. It also includes plantations, ranches, ranges, and orchards. A plant nursery is a farm for purposes of deducting soil and water conservation expenses. (Form 8990 instructions)

See Rev Proc 2019-08 for an explanation how electing real property trades or businesses or farming businesses change to the ADS for property placed in service before 2018. This revenue procedure provides that it is not a change in accounting method.

- **Automobile, Boat, Farm Machinery Dealers –** Interest on debt secured by the inventory is exempt from the limitation.
- **Partnerships and S Corporations** - There are special rules for partnerships and sub-S corporations not covered here, since this course is related to small business and the $25 million gross receipts should effectively provide an exemption for most small businesses. See Form 8990 and its instructions or proposed regulations for additional information.
- **Carryover** - Any business interest that isn't deductible because of the business interest limitation is treated as business interest paid or accrued in the following tax year, and may be carried forward indefinitely, subject to the restrictions applicable to partnerships. If a partnership or S corporation is subject to the business interest deduction limitation, the limitation is applied at the entity level and any disallowed business interest expense (excess business interest expense) is not carried over by the partnership but is allocated to the partners. In contrast, disallowed business interest expense is carried over by an S corporation and the S corporation treats it as business interest expense paid or accrued in the following year.
- **Application of Limitations** - Section 163(j) applies before the application of the at-risk rules (§ 465), passive activity loss provisions (§ 469), and the § 461(l) limitation on excess business losses of noncorporate taxpayers discussed above. (Prop Reg 1.163(j)-3)

<u>IRS Guidance</u> – In Notice 2018-28 (April 3, 2018) the IRS announced its intention to produce regulations addressing various issues related to this new provision, and that in the meantime, taxpayers could rely on the rules described in sections 3 through 7 of the notice. In late December 2018, the IRS issued the promised proposed regulations (NPRM REG-106089-18) that provide general rules and definitions and are organized into eleven sections, proposed §§1.163(j)-1 through 1.163(j)-11.

Excess Business Losses –

- CA does not conform to the IRC Sec 461(j) limitation on "excess farm loss."
- **2018** - CA does not conform to the limitation on excess business losses.
- **Post-2018** - In AB 91 (signed by the governor 6/27/2019), California adopted the TCJA change relating to the limitation on excess business losses of noncorporate taxpayers, with the following exceptions:
  - California law says that any loss which is disallowed under this provision is to "be treated as a carryover excess business loss for the following taxable year" instead of as a net operating loss carryover as it is for federal. This means the carryover amount is used in determining if there's an excess loss in the carryover year for California.
  - The federal provision applies only for years 2018 through 2025, while the California law is effective for taxable years beginning after December 31, 2018 and continues indefinitely.
  - California's, rather than the federal's, passive activity loss provisions are used in determining any excess loss.

Disallowance of Business Interest - CA has no similar provision, and it is unlikely the legislature will pass any conforming legislation.

NOTES

REAL ESTATE PROFESSIONALS

RAPID FINDER

- **Three Tests**
  - Material participation
  - Over half of personal services in RE trades or businesses
  - 750 hours of personal services in RE trades or businesses
- **Election to aggregate**

Related IRC and IRS Publications and Forms

- **Pub 925** – Passive Activity
- **Pub 527** – Rentals
- **IRC 469** – Passive Activity Losses Limited
- **Schedule E** – Instructions
- **Schedule E**
- **IRC Sec 199A**
- **IRC Sec 469(c)(7)**

The TCJA added new Sec 199A that for years 2018 through 2025 allows a deduction of 20% of qualified business income (or 20% of the individual's taxable income, if less) from pass-through activities, including Schedule E rentals. One of the many issues related to the Sec 199A deduction that was raised is whether the same grouping of activities will apply for the Sec 199A computation that is elected for purposes of exempting a qualified real estate professional from the automatic treatment of rentals as passive activities. The answer is NO. In final Reg. 1.199A-4, the IRS says that aggregation is permitted but not required and sets forth the requirements for establishing Sec 199A groupings. The preamble to the final regulations says "The Treasury Department and the IRS do not consider the grouping rules under section 469 an appropriate method for determining whether a taxpayer can aggregate trades or businesses for purposes of applying section 199A." See Chapter 3.24 for details on Sec 199A.

For any tax year in which the taxpayer is a "qualifying taxpayer" (a **real estate professional**), the rule treating all rental activities as passive activities doesn't apply to any **rental real estate** activity of the taxpayer. (Code Sec. 469(c)(7)(A)(i)) Instead, that activity is a passive activity unless the taxpayer materially participates. (Reg § 1.469-9(e)(1))

Thus, **real estate professionals** who materially participate in a **rental real estate** activity may use losses or credits from the activity to offset other, non-passive income. '

Usually Material Participation Test Doesn't Apply for Rental Activities

In general **rental activities are passive** activities regardless of whether the taxpayer materially participates in the activity. (IRC § 469(c)(2) and § 469(c)(4)) So, unless the "rental" really isn't a rental under the exceptions provided in Reg. Sec. 1.469-1T(e)(3), or this special rule for real estate professionals applies, the material participation tests can't be applied to the normal rental. For example, a taxpayer who owned an apartment house (but who doesn't qualify as a real estate professional) and who worked over 500 hours annually on the property would not be considered to have materially participated in the activity, and it would still be a passive activity (albeit eligible for the active participation loss allowance of up to $25,000 per year). Thus, qualifying as a real estate professional is the only way one would be able to deduct in full what would otherwise be a passive activity loss against non-passive income, and then only if material participation in the rental real estate activity can be proven.

REAL ESTATE PROFESSIONAL REQUIREMENTS

A taxpayer is a real estate professional (qualifying taxpayer) for a particular tax year if he meets BOTH of the qualifications below:

- **QUALIFICATION #1** - More than **half of the personal services** (see below) the taxpayer performs during that year **are performed in real property trades or businesses** (see below) in which the taxpayer **materially participates** (Code Sec. 469(c)(7)(B)(i)), **AND**
- **QUALIFICATION #2** - The taxpayer performs more than **750 hours of services** during that year **in real property trades or businesses** in which he **materially participates**. (Code Sec. 469(c)(7)(B)(ii))

A taxpayer who owns at least one interest in rental real estate **and** who meets the above tests is a real estate professional. (Reg § 1.469-9(b)(6))

Being a Full-Time Real Estate Professional Isn't Enough – The IRS audited two years of returns of a couple that filed joint returns and disallowed their rental losses, contending the losses were passive losses (taxpayers' incomes exceeded the cap for the $25,000 loss allowance so no amount of loss was allowed). The taxpayers' position was that the wife's full-time occupation as a real estate professional meant that all rental losses are automatically nonpassive and deductible, regardless of material participation. The key question before the court was whether the taxpayers must establish their material participation in their rental real estate activities separate and apart from the wife's undisputed material participation in her profession as a real estate agent. The Court concluded that they must, but had not, because she kept no records documenting the hours spent in her rental activities since she (erroneously) thought that as a real estate professional she didn't have to prove material participation in the rental activities. (*Gragg v Comm., U.S. Court of Appeals, Ninth Circuit; 14-16053, August 4, 2016, affirming DC Calif. decision)*

Closely-Held C-Corporation - A closely-held C corporation qualifies as a real estate professional if more than 50% of its gross receipts for the tax year are derived from real property trades or businesses in which it materially participates. (Code Sec. 469(c)(7)(D)(i))

PERSONAL SERVICES

"Personal services" means any work performed by an individual in connection with a trade or business, but not as an investor. (Reg § 1.469-9(b)(4)) Services performed as an employee don't count, unless the individual is a more-than-5%-owner of the employer. (Code Sec. 469(c)(7)(D))

REAL PROPERTY TRADE OR BUSINESS

A real property trade or business is: any real property **development, redevelopment, construction, reconstruction, acquisition, conversion, rental, operation, management, leasing or brokerage trade or business.** (Code Sec. 469(c)(7)(C)) The determination of a taxpayer's real property trades or businesses is based on all relevant facts and circumstances. Once a taxpayer determines the real property trades or businesses in which personal services are provided, he can't redetermine them later unless the original determination was clearly erroneous or there's been a material change of facts and circumstances. (Reg § 1.469-9(d)(1))

NOTE – BROKER OR LICENSED RE AGENT

Code Section 469(c)(7)(C) language uses the term "brokerage trade or business" which the IRS interpreted as meaning that a real estate professional had to be a licensed broker. However, a court case interpreted that to include licensed real estate agents. See the details following.

RE PROFESSIONAL DEFINITION – FAVORABLE RULING FOR LICENSED RE AGENTS

A taxpayer generally qualifies as a real estate professional for a particular tax year if:

(1) More than half of the personal services that he or she performs during that year are performed in real property trades or businesses in which he or she materially participates; and

(2) He or she performs more than 750 hours of services during that tax year in real property trades or businesses in which he or she materially participates.

Real Property Trade or Business - The term "real property trade or business" is defined as "any **real property** development, redevelopment, construction, reconstruction, acquisition, conversion, rental, operation, management, leasing, or **brokerage trade or business**." (Code Sec. 469(c)(7)(C)) In determining whether a taxpayer meets the material participation standard, the participation of his spouse is taken into account. (Code Sec. 469(h)(5))

The term "brokerage" is not defined in Code Section 469, the legislative history of that section, or any court decision. But the "brokerage trade of business" terminology included in the text of the Code Section 469(c)(7)(C) has always been interpreted by the IRS to only count for those with a "Broker's" license and did not apply to a licensed real estate agent.

Court looked at the definition in the ordinary and usual (dictionary) sense and has held that a licensed real estate agent's activities counted for purposes of the passive loss exception for qualifying real estate professionals. The taxpayer didn't have to be licensed as a real estate broker to be treated as engaged in the real estate brokerage trade or business. Because she met the material participation standard for qualifying real estate professionals, the agent and her husband could claim losses they incurred on two rental properties they owned.

Real Property Broker Under the Passive Rules - The IRS, in Chief Counsel Advice 201504010 determined:

1. A real estate agent who brings together buyers and sellers of real property **MAY BE engaged in a real property brokerage trade or business** under § 469(c)(7)(C).
2. A mortgage broker who is a broker of financial instruments **IS NOT in a real property brokerage trade or business** within the meaning of § 469(c)(7)(C). This position is backed up by the result in the *Guarino* case discussed next.

<u>*Mortgage Brokerage Not a Real Estate Profession*</u> – In a Tax Court Small Case that cannot be cited as precedent, the Court determined that a taxpayer who was in the mortgage broker business was not a real estate professional under Code Sec 469(c)(7)(C) and therefore losses on his rental properties were subject to the general Sec 469 passive activity rules. While the taxpayer's mortgage brokerage activity constitutes a "brokerage" trade or business, it does not constitute a "real property brokerage" trade or business, said the Court, because the taxpayer was not brokering real estate; he was brokering financial services. The Court went on to cite legislative history of the statute as supporting this distinction and that Congress considered including "financing operations" in the activities listed in section 469(c)(7)(C) but specifically did not do so. (*Guarino v. Commissioner., U.S. Tax Court, T.C. Summary Opinion 2016-12, (Mar. 14, 2016)*)

Trust can qualify as a real estate professional – In *Frank Aragona Trust, (2014) 142 TC No. 9*, the Tax Court ruled that a trust that owned real estate properties qualified for the exception for real estate professionals and therefore was not subject to the passive activity loss (PAL) limitations. In that ruling, the Court found that services performed by individuals on behalf of a trust may be considered personal services performed by the trust. The trust's material participation would allow it to avoid the 3.8% net investment income tax on passive activity.

<u>PROOF OF PARTICIPATION</u>

According to Reg. Sec. 1.469-5T(f)(4), "the extent of an individual's participation in an activity may be established by any reasonable means. Contemporaneous daily time reports, logs, or similar documents are not required if the extent of such participation may be established by other reasonable means," including "but not limited to, the identification of services performed over a period of time and the approximate number of hours spent performing such services during such period, based on appointment books, calendars, or narrative summaries." The Courts, while recognizing that the regulations are somewhat ambivalent on this issue, have frequently denied taxpayers eligibility as a real estate professional because of inadequate, untimely, or irreconcilable records. Uncorroborated estimates of the time devoted to real estate activities have caused many taxpayers to lose their cases. The Tax Court will not allow a post-event "ballpark guesstimate" of hours of participation. (*Bailey v Commissioner, T.C. Memo 2001-296*)

So a taxpayer trying to qualify as a real estate professional for purposes of the Sec. 469(c)(7) rule should keep contemporaneous records (appointment books, calendars, or narrative summaries) of the number of hours spent performing services (both in real estate trades or businesses and other personal services). Notations should be specific as to the amount of time spent and activities performed.

<u>MATERIAL PARTICIPATION</u>

The following tests determine material participation (only one test needs to be met to qualify a taxpayer as a material participant):

- <u>***Time Tests***</u>. A taxpayer is a material participant in an activity if the taxpayer:
  (1) Participates **500 Hours or More** during the tax year;
  (2) Provides "**substantially all the participation"** in the activity;
  (3) **Spends more than 100 hours** on the activity and nobody spends more time than this on the activity; or
  (4) **Spends Aggregate Time** over 500 hours on all "significant participation activities" (SPA's). A SPA is an activity in which the taxpayer spends over 100 hours during the year, but cannot meet one of the three other time tests.
- <u>***Prior participation tests***</u>. A taxpayer may be a material participant based on prior participation rather than TIME. The taxpayer may meet either of these criteria:
  (5) Participate in the activity "materially" **in any 5 of the last 10 tax years**; or
  (6) Taxpayer is in a personal service business and was a **material participant in any 3 previous tax years.**

Material Participation Joint Return
The material participation requirement is determined by taking into consideration a married couple's joint participation.

Limited Partners – A limited partner meets the material participation test if he qualifies under the:

- 500 hours of participation rule,
- Five of ten years of material participation rule, or
- Three years of material participation rule.

A partnership interest isn't treated as a limited partnership interest for the individual's tax year if the individual is a general partner as well as a limited partner in a partnership during the partnership's tax year ending with or within the individual's tax year. However, this treatment appears to conflict with the Senate Report which says that where a taxpayer has both a limited partnership interest and a general partnership interest, lack of material participation is conclusively presumed with respect to the limited partnership interest and material participation for purposes of any other interest is determined by the relevant facts and circumstances.

750 HOURS OF PARTICIPATION

To qualify as a real estate professional a taxpayer must perform more than 750 hours of services during that year in real property trades or businesses in which he materially participates. (Code Sec. 469(c)(7)(B)(ii))

Married Taxpayers - Spouses filing a joint return qualify as real estate professionals only if one spouse separately satisfies the above tests (Code Sec. 469(c)(7)(B), Reg § 1.469-9(c)(4)), without regard to the other spouse's services.

750 Hours Requirement
The personal service requirement of 750 hours must be met by only one of the spouses. They cannot combine their joint hours to meet that requirement.

Each Interest Treated as a Separate Activity Unless Aggregation Elected - In determining whether a taxpayer is a real estate professional, each of his interests in rental real estate is treated as a separate activity, unless he elects (by filing a specified statement with his original income tax return) to treat all interests in rental real estate as one activity. (Code Sec. 469(c)(7)(A); Reg § 1.469-9(g)) The election is binding for the tax year it's made and for all future years in which the taxpayer qualifies. Failure to elect in one year doesn't bar the election in a later year. (Reg § 1.469-9(g)(1)). See page 3.26.05 of this chapter for more on this election.

The material participation requirement is most commonly satisfied by participating in the activity for more than 500 hours during the tax year. A real estate professional with multiple rental real estate interests, who wants to treat all these interests as nonpassive but who has not elected to treat all those interests as a single activity, would have to satisfy this test separately for each interest.

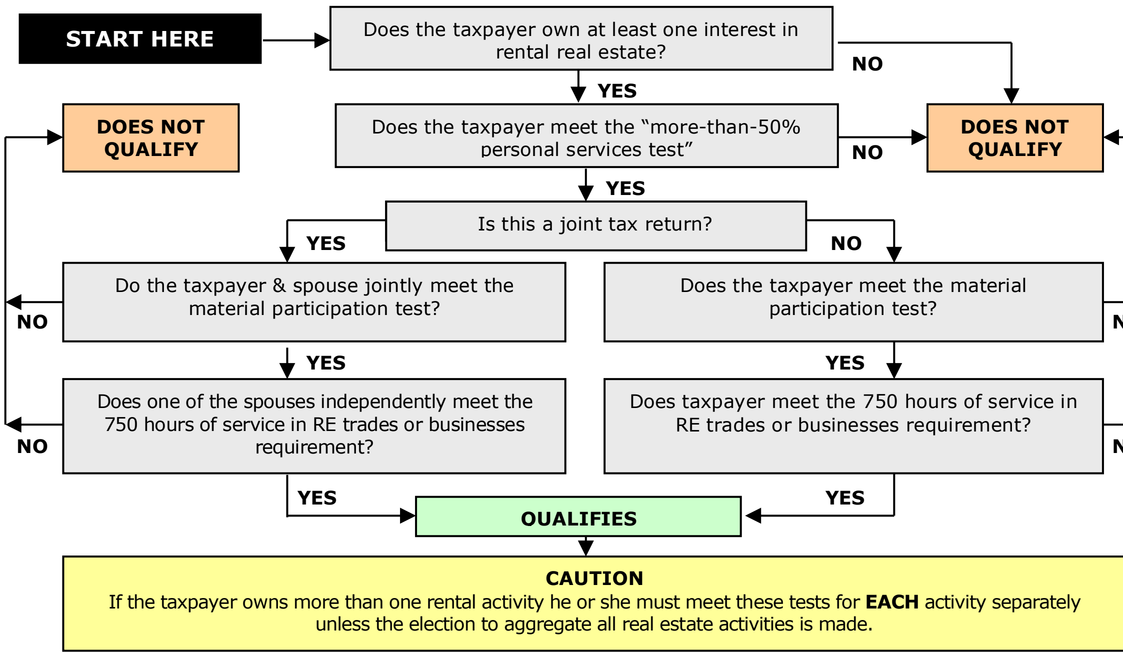
Example: *Peter owns three rentals but did not file the election to treat all of them as a single activity. If Peter is unable to qualify under one of the other material participation tests, he would need to participate in each rental activity for 500 hours a year. At minimum, that would result in 1,500 hours per year or just over 28 hours a week. If Peter had filed the election to treat all three interests as a single activity he would only need to participate in the combined rentals 500 hours a year (just under 10 hours a week).*

Travel Time for the 750-Hour Test - Taxpayer's log originally showed fewer than 750 hours spent on her rental properties, but after it was revised to include travel time from her home to one of her properties, the test was passed. IRS didn't accept the revised log, arguing the travel time was included in the original, but the Tax Court disagreed and held in taxpayer's favor. (Leyh, Richard S., (2015) TC Summary Opinion 2015-27) This is contradictory to a prior ruling where travel between home and a place of business (cattle breeding activity) did not qualify as work related travel. (Truskowsky, Thomas E., (2003) TC Summary Opinion 2003-130). **CAUTION**: in the Leyh decision the Tax Court did not consider the commuting issue. Generally, travel between home and the first business location would not be deductible unless the taxpayer’s home qualifies as the site of a business under the home office rules.

On-Call Time Doesn’t Qualify for the 750 Hour Test - An individual who owned four real estate rental properties could not count the hours that he considered himself "on call" to perform services on the properties toward the 750-hour threshold. The Tax Court said the law and regulations refer to “work performed,” so on-call time, unassociated with services actually performed by the taxpayer, did not count toward the 750-hour requirement (*Moss v Commissioner, U S Tax Court, CCH Dec 58,336, 135 T.C. No. 18).*

Short-Term Rentals Not Included For Purposes of Meeting the 750-Hour Test – The Tax Court, in *Bailey, TC Summary Opinion 2011-22*, ruled that a taxpayer didn't meet the qualifying real estate professional's exception to the *per se* passive activity loss (PAL) rule because one of her properties didn't count for purposes of meeting the 750-hour test since it was used for short-term rentals.

Citing Reg. § 1.469-1T(e)(3)(ii), the Tax Court held that when a taxpayer spends time on a real estate property that is rented for periods averaging less than 7 days, that property is no longer a “rental activity.” Therefore, the time spent on the property is not included for purposes of counting hours for the 750-hour test to be a real estate professional.



ELECTION TO AGGREGATE ALL RENTAL REAL ESTATE INTERESTS

For purposes of the rule exempting rental real estate activities of real estate professionals from automatic treatment as passive activities, a taxpayer may elect to treat all interests in rental real estate as one activity.

> ***Example:*** *John owns interests in three rental buildings, X, Y and Z. He elects to treat the three buildings as a single rental real estate activity. Therefore, in determining whether John's activities with respect to these buildings are passive or nonpassive, John's activities and participation with respect to all three buildings are taken into account in the aggregate.*

Making the election - The election is made by filing a statement with the taxpayer's original income tax return for the tax year. This statement must contain a declaration that the taxpayer is a qualifying taxpayer for the tax year and is making the election under Code Sec. 469(c)(7)(A).

The election may be made in any year in which the taxpayer is a qualifying taxpayer. The failure to make the election in one year doesn't bar the taxpayer from making the election in a later year.

This election is binding for the tax year in which it's made and for all future years in which the taxpayer is a qualifying taxpayer, even if there are intervening years in which the taxpayer isn't a qualifying taxpayer. The election won't have effect in years during which the taxpayer isn't a qualifying taxpayer. Instead the taxpayer's activities will be those determined under "grouping of activity" rules of Reg § 1.469-4.

No valid election was made where a taxpayer failed to attach an election statement to his return. To make an election, a taxpayer must clearly notify IRS of his intent to do so. *(Kosonen, Matti, (2000) TC Memo 2000-107)*

IRS Allowing Late Aggregation Elections – Real estate professionals who follow procedures announced by the IRS in **Rev Proc 2011-34** will be eligible for an extension of time to file the election to aggregate real estate interests as a single activity, without having to apply for a private letter ruling or pay a user fee. To be eligible, the taxpayer must provide a statement, attached to an amended return for the most recent tax year and signed under penalties of perjury (see the Rev Proc for the required wording), stating that he or she:

- Had failed to make the election only because the election would not have been timely;
- Had filed returns consistent with having made an election and aggregating the activities;
- Had timely filed (within 6 months of the due date, excluding extensions) each return that would have been affected by the election if it had been timely made; and
- Has reasonable cause for not making a timely election.

The reason for failing to make a timely election must be explained, and must contain the declaration required by § 1.469-9(g)(3), including the year for which the late election is being made. At the top of the statement, note “FILED PURSUANT TO REV. PROC. 2011-34.” Mail the amended return to the IRS Service Center where the taxpayer’s current year return will be filed.

The IRS will notify the taxpayer if their request for extension to make the election is granted. A taxpayer receiving relief under this revenue procedure is treated as having made a timely election to treat all interests in rental real estate as a single rental real estate activity as of the taxable year for which the late election was requested.

Revoking the election – The election may be revoked if there is a material change in the taxpayer’s facts and circumstances. The fact that an election is less advantageous to the taxpayer in a particular year is not, of itself, a material change in the taxpayer's facts and circumstances. Similarly, a break in the taxpayer's status as a qualifying taxpayer is not, of itself, a material change in the taxpayer's facts and circumstances.

The election may be revoked only in the taxable year in which a material change in the taxpayer's facts and circumstances occurs or in a subsequent year in which the facts and circumstances remain materially changed from those in the election year. To revoke the election, the taxpayer must file a statement with his or her original income tax return for the year of revocation containing (1) a declaration that the election is revoked under section 469(c)(7)(A) and (2) an explanation of the nature of the material change.

Reason to make the election - Electing to treat all of a taxpayer's rental real estate activities as a single activity may make it easier to meet the material participation requirement (resulting in treatment of the rental real estate activities as nonpassive).

Reason not to make the election - It may not be advisable for a taxpayer to make the election to aggregate all rental real estate interests if he has positive net income from rental real estate activities and passive losses from activities other than rental real estate activities. In that case, treating the rental real estate activities as passive would be advantageous, because the taxpayer could use the losses from the other passive activities to offset the income from the rental real estate activities. But if, under these circumstances, the taxpayer made the election to aggregate all rental real estate interests, the rental real estate activities might not be treated as passive, in which case the passive losses from the non-rental real estate activities could not be used to offset the income from the rental real estate activities, and might even be suspended and thus not deductible at all until the taxpayer disposes of the entire activity.

Prior Year Disallowed Passive Loses From Rental Real Estate - Real estate professionals that make the aggregation election may use prior year disallowed passive losses from any of the rental real estate activities that the taxpayer has elected to aggregate, to offset current net income from the aggregated rental real estate activities, regardless of which rental real estate interests within the aggregated activity produced the income or prior-year losses. Moreover, this rule applies even if the disallowed prior year losses arose before the aggregation election was made.

Example: *The facts are the same as the previous example above. In Year 1, John has $30,000 of disallowed passive losses allocable to building X and $10,000 of disallowed passive losses allocable to building Y. In Year 2, John has $5,000 of net income from building X, $5,000 of net loss from building Y, and $10,000 of net income from building Z. John makes the election to treat the three buildings as a single rental real estate activity effective in Year 2. In that year, John participates in the operation of the three buildings for more than 500 hours. He thus materially participates in the combined activity making the combined activity a nonpassive activity.*

A passive activity is any activity:

- *that involves the conduct of any trade or business, and*
- *in which the taxpayer does not materially participate.*

Because of the election, disallowed passive losses from Year 1 of $40,000 ($30,000 plus $10,000) are allocated to the combined activity. John’s net income from the activity for Year 2 is $10,000 ($5,000 – $5,000 + $10,000). This net income is nonpassive income. Under Code Sec. 469(f), the net income from a former passive activity may be offset with the disallowed passive losses from the same activity. As a result, John may offset the $10,000 of net income from the buildings with an equal amount of disallowed passive losses allocable to the buildings, regardless of which buildings produced the income or losses, leaving zero net income from the buildings in Year 2. Moreover, John has $30,000 ($40,000 – $10,000) of disallowed passive losses remaining from the buildings after Year 2.

The election to aggregate all rental real estate interests isn't intended to alter the rules relating to the material participation of a limited partner. H Rept No. 103-111 (PL 103-66) p. 614.

Limited Partner - If a taxpayer makes the election to treat all interests in rental real estate as a single rental real estate activity, and at least one interest in rental real estate is held by the taxpayer as a limited partnership interest, the combined rental real estate activity is treated as a limited partnership interest of the taxpayer for purposes of determining material participation. Accordingly, the taxpayer won't be treated as materially participating in the combined rental real estate activity unless the taxpayer satisfies one of the material participation tests allowed to limited partners explained above. Reg § 1.469-9(f)(1).

If a real estate professional makes the election to treat all interests in rental real estate activities as a single rental real estate activity, and the taxpayer's share of gross rental income from all of the taxpayer's limited partnership interests in rental real estate is less than 10% of the taxpayer's share of gross rental income from all of the taxpayer's interests in rental real estate for the tax year, the taxpayer may determine material participation under any of the tests that apply to rental real estate activities.

CALIFORNIA DIFFERENCES

California does not conform to the Federal treatment of real estate professionals' passive losses. Thus "real estate professionals" who materially participate in their rental activities may deduct their rental losses without limitation for Federal purposes, but they may be limited by the passive loss rules for CA.

NOTES

TANGIBLE PROPERTY CAPITALIZATION AND REPAIR REGULATIONS

Overview

Background: IRC Sec. 263 requires that amounts paid to acquire, produce or improve tangible property must be capitalized and depreciated over its useful life. However, IRC Sec. 162 allows materials, supplies, and repair and maintenance costs to be expensed. But neither IRC section provided bright line definitions and the IRS frequently found itself embroiled in disagreements with taxpayers. Wishing to resolve the issue, the IRS has assembled an extensive set of regulations that are intended to clarify the distinction between improvements that must be capitalized and repairs, materials and supplies that can be expensed.

CAUTION, THIS MATERIAL IS LIMITED IN SCOPE!
Although there will be occasional references to issues that apply to large businesses, this material generally covers only the issues that apply to small taxpayers and businesses. It does not include rotable or temporary spare part issues and regulations.

The Details

Effective Date: These regulations became effective for tax years beginning on or after January 1, 2014 but optionally allowed taxpayers to retroactively apply the regulations to tax years beginning on or after January 1, 2012 (Ann. 2013-7). This opportunity has expired.

Subsequently the IRS issued Rev. Proc. 2015-20 providing **simplified filing for small businesses** and allowed them to apply the regulations prospectively but giving up retroactive audit protection and the ability to make retroactive adjustments based on the new regulations. Those taxpayers adopting the simplified method are permitted to make certain tangible property changes without filing a Form 3115 (used to make accounting method changes) but give up Sec 481(a) adjustments for the prior years (Sec 5 of Rev. Proc. 2015-20).

The regulations are actually a set of rules that apply in different circumstances and include a number of safe-harbors. Below is a list of the items to be covered in this chapter and a reference to the corresponding IRC section or regulation.

UNIT OF PROPERTY (UOP):

At the beginning of any discussion related to the tangible property capitalization and repair regulations, one must have an understanding of a unit of property (UOP). The determination of a unit of property is based on the **functional interdependence standard**.

UOP defined - For purposes of the tangible property capitalization rules:

UOP for assets other than buildings - Generally a UOP consists of all the components that are functionally interdependent (i.e., where placing in service of one component is dependent on the placing in service of other component(s)). (Reg. Sec. 1.263(a)-3(e)(3)(i))

UOP for a building - Generally is the building and its structural components. (Reg § 1.263(a)-3(e)(2)(i))

In general, amounts paid for new buildings or for permanent improvements or betterments made to increase the value of any property or the cost of restoring the property must be capitalized. A unit of property is improved if the amounts paid for activities performed after the property is placed in service by the taxpayer result in **betterment** to the unit of property (UOP), **restore** the UOP, or **adapt the UOP to a new or different use**.

UOP for assets OTHER THAN BUILDINGS - In general, for real or personal property that isn't classified as a building, all the components that are functionally interdependent comprise a single UOP. Components of property are functionally interdependent if the placing in service of one component by the taxpayer is dependent on the placing in service of the other component by the taxpayer. (Reg. § 1.263(a)-3(e)(3)(i))

> ***Example – Not Functionally Interdependent:*** *Xavier is a self-employed accountant who purchased a laptop computer and a printer for use in his business. The computer and printer are separate units of property because they are not functionally interdependent since placing the computer in service is not dependent on placing the printer in service.*

> ***Example – Functionally Interdependent:*** *Lorna is the proprietor of a nursery and landscaping business. She purchased a battery-powered golf cart to use getting around the nursery grounds. She purchased the cart chassis from one vendor and the battery from another and assembled the two components. Because the cart can't operate without the battery, the electric golf cart is a single unit of property.*

UOP for BUILDINGS - In general, each building and its structural components are one UOP - "the building." Amounts are treated as paid for an improvement to a building, and thus capitalized, if they improve:

(1) the **building structure**; or

(2) any designated **building system**.

A ***building structure consists*** of a building and its structural components (Reg. Sec 1.48-1(e)) (unless the component is a building system). (Reg. § 1.263(a)-3(e)(2)(ii)) Under Reg. § 1.48-1(e)(2), the term "structural components" includes such parts of a building as walls, partitions, floors, and ceilings, as well as any permanent coverings therefor such as paneling or tiling; windows and doors; and other components relating to the operation or maintenance of a building.

> ***Example -*** *If a business restores a building structure, such as replacing the entire roof down to the rafters, the expense generally is treated as an improvement to the single UOP consisting of the building. Similarly, if it improves a building system, such as an improvement to the heating, ventilation, and air conditioning (HVAC) system, then the expense constitutes an improvement to the building UOP.*

A ***building system*** consists of the following nine structural components. Each of them (including their sub-components) is a building system that **is separate from the building structure, and to which the improvement rules must be separately applied** (Reg. § 1.263(a)-3(e)(2)(ii)(B)):

1. Heating, ventilation, and air conditioning (HVAC) systems, including motors, compressors, boiler, furnace, chillers, pipes, ducts, and radiators;
2. Plumbing systems – including pipes, drains, valves, sinks, bathtubs, toilets, water and sanitary sewer collection equipment, and site utility equipment used to distribute water and waste to and from the property lines and between buildings and other permanent structures;
3. Electrical systems – including wiring, outlets, junction boxes, lighting fixtures and associated connectors, and site utility equipment used to distribute electricity from property line to and between buildings and other permanent structures;
4. Escalators;
5. Elevators;
6. Fire-protection and alarm systems – including sensing devices, computer controls, sprinkler heads, sprinkler mains, associated piping or plumbing, pumps, visual and audible alarms, alarm control panels, heat and smoke detection devices, fire escapes, fire doors, emergency exit lighting and signage, and fire fighting equipment, such as extinguishers and hoses;
7. Security systems for the protection of the building and its occupants – including window and door locks, security cameras, recorders, monitors, motion detectors, security lighting, alarm systems, entry and access systems, related junction boxes, associated wiring and conduit;
8. Gas distribution system – including associated pipes and equipment used to distribute gas to and from property line and between buildings or permanent structures; and
9. Other structural components identified by IRS in published guidance.

Thus the building structure and the building systems comprise a single UOP, "the building," and any improvement, to any of the systems of that building, including the structure itself, constitute an improvement to the building.

***Example 3 (Reg. Sec. 1.263(a)-3) -* Building structure and systems; condominium** - C owns a condominium unit in a condominium office building and uses the condominium unit in its business of providing medical services. The condominium unit contains two restrooms, each of which contains a sink, a toilet, water and drainage pipes and other bathroom fixtures. C pays an amount for labor and materials to perform work on the pipes, sinks, toilets, and plumbing fixtures that are part of the condominium. If an amount paid by C for work on pipes, sinks, toilets, and plumbing fixtures is an improvement (for example, a betterment) to the portion of the plumbing system that is part of C's condominium, C must treat this amount as an improvement to the condominium.

Depreciation - The **UOP definitions apply only for purposes of the capitalization rules, but not for depreciation purposes**. For example, treating an asset as part of a larger unit of property for capitalization purposes doesn't affect how that asset is treated for depreciation purposes. Thus, the characterization of an asset for depreciation purposes overrides UOP rules.

Notwithstanding the UOP rules, a component (or a group of components) of a UOP **must be treated as a separate UOP for depreciation purposes if, when the taxpayer initially placed the UOP in service, the taxpayer:**

(1) Properly treated the component as being within a different class (see page 3.27.06) of property under Code Sec. 168(e) for MACRS depreciation purposes than the class of the UOP of which the component is a part; **OR**

(2) Properly depreciated the component using a different depreciation method than the depreciation method of the UOP of which the component is a part. (Reg. § 1.263(a)-3(e)(5)(i))

Example *– Tires used on transport industry trucks are often depreciated as a separate asset over five years rather than over the three-year period that applies to the remaining portion of the truck. The tires are a separate unit of property in the year the truck is placed in service (reg. §1.263(a)-3(e)(6), ex. 16).*

Special rules are included in the regulations for leased property, condominiums and cooperatives (not discussed here).

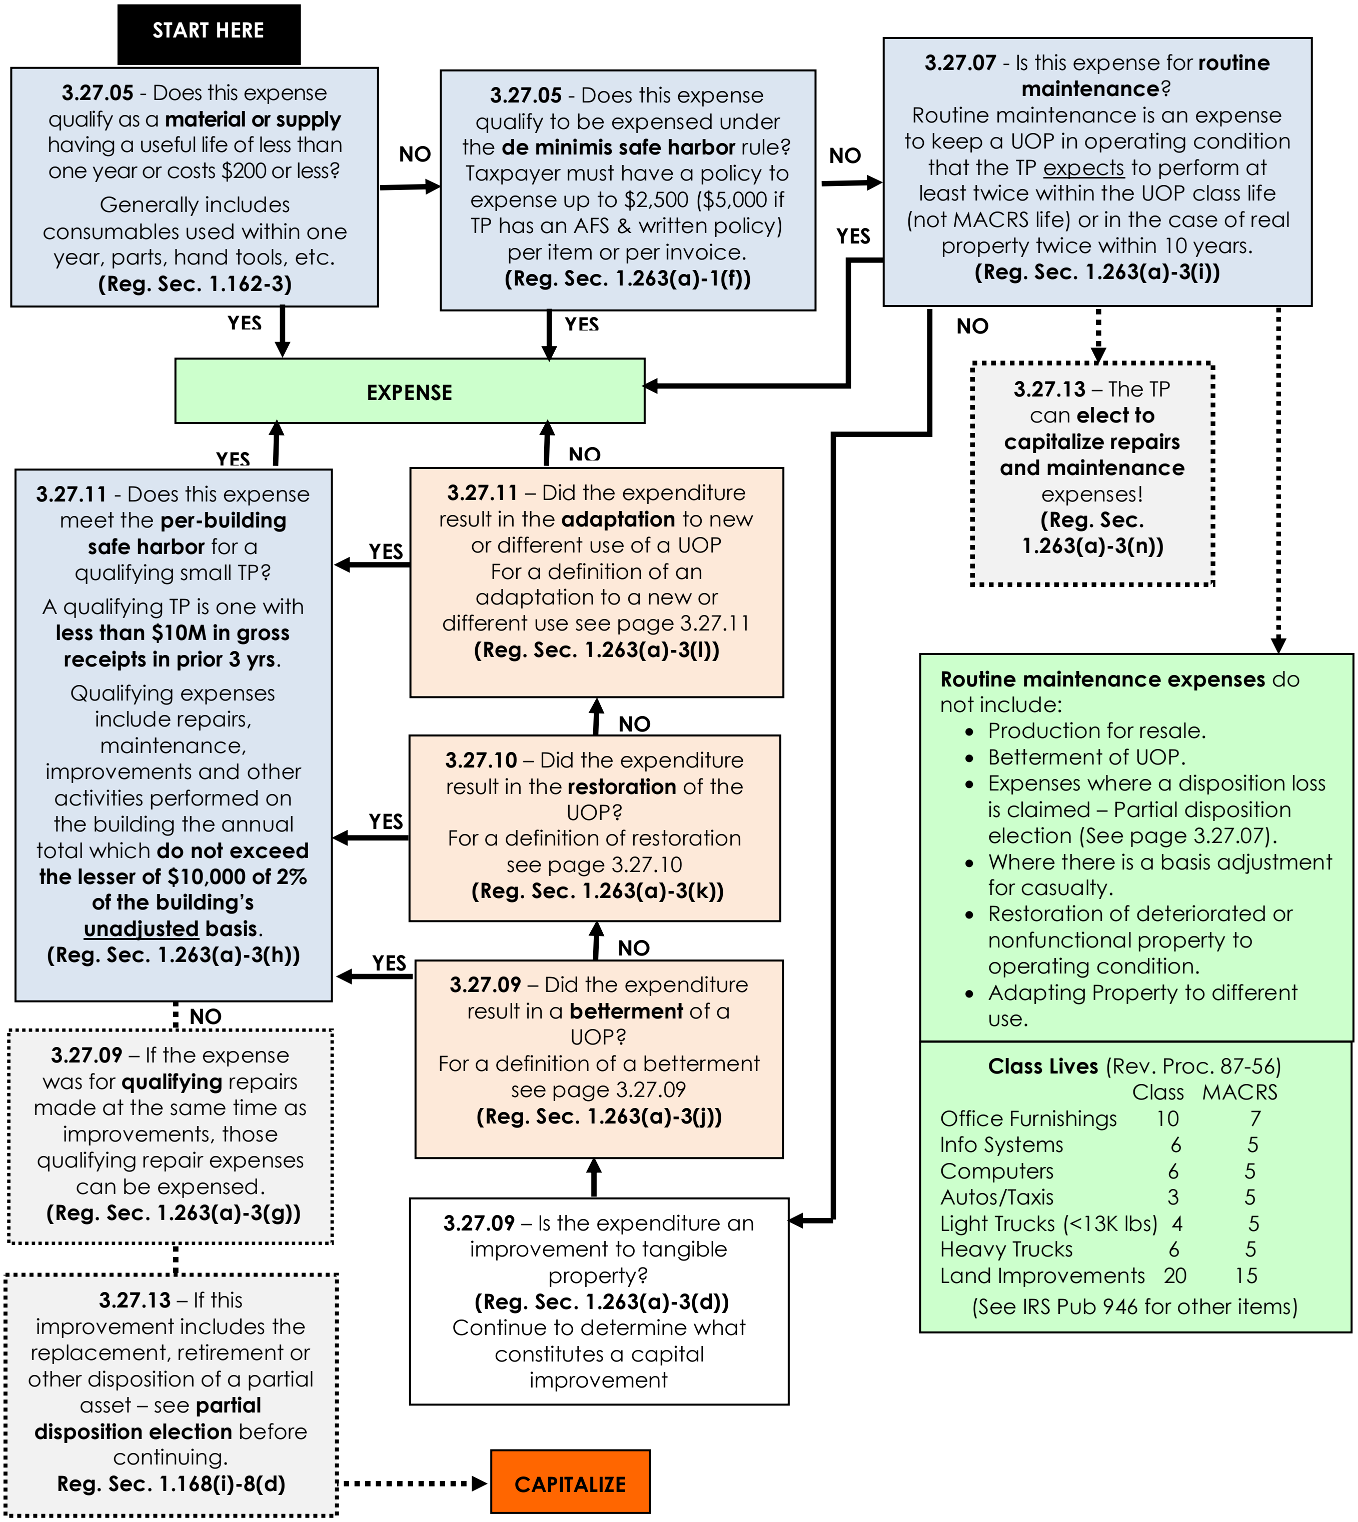
EXPENSE OR CAPITALIZE FLOW CHART

This flow chart provides an **overview** of the expensing options under capitalization and repair regulations. Please note that the numbers preceding the text in each box refers to the page number in this chapter where there is more detail, in most cases including more detailed flow charts, for each expensing option. When you are unsure whether you can write off an expenditure, we recommend you begin with this flow chart.

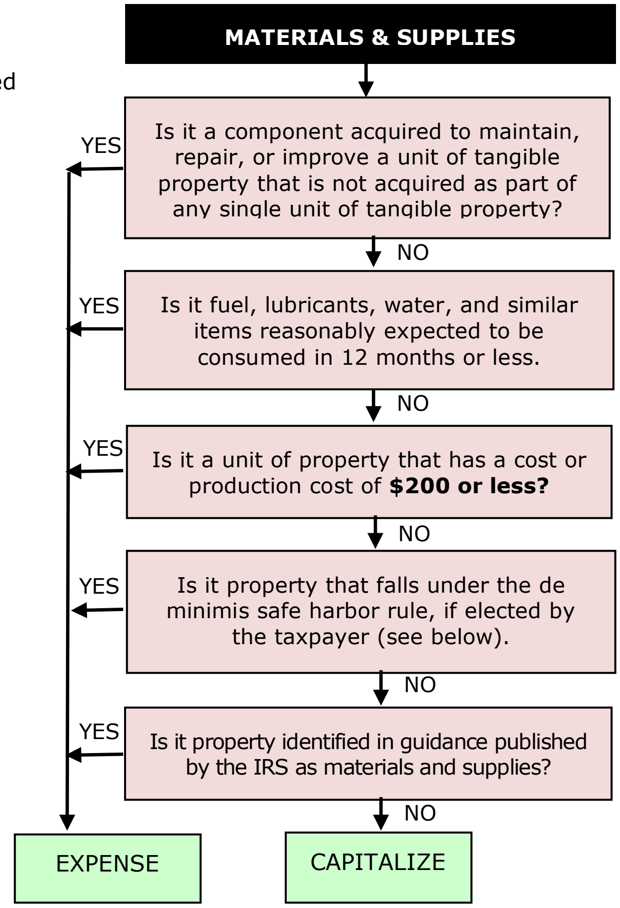


MATERIALS AND SUPPLIES - Reg. Sec. 1.162-3

The cost of acquiring or producing materials and supplies is deductible in the tax year in which the materials and supplies are used or consumed in the taxpayer's operations. "Materials and supplies" means tangible property that is used or consumed in the taxpayer's operations that is not inventory and that:

1. Is a component acquired to maintain, repair, or improve a unit of tangible property owned, leased, or serviced by the taxpayer and that is not acquired as part of any single unit of tangible property (Example: replacing the engine in a fork lift);
2. Consists of fuel, lubricants, water, and similar items that is reasonably expected to be consumed in 12 months or less, beginning when used in the taxpayer's operations (Example: a barrel of grease used to lubricate vehicles);
3. Is a unit of property (UOP) with an economic useful life of 12 months or less, beginning when the property is used or consumed in the taxpayer's operations;
4. Is a UOP that has a cost or production cost of **$200 or less**;
5. Is any property that meets the de minimis rule (see below) **OR**
6. Is identified in guidance published by the IRS as materials and supplies for which treatment is permitted under §1.162-3(d).

Meaning of "Materials & Supplies"
It is important to understand that the term "materials and supplies" applies to more than just consumables and includes a variety of items including tangible property. Be sure to familiarize yourself with the list above.



DE MINIMIS SAFE HARBOR RULE - Reg. Sec. 1.263(a)-1(f)

The de minimis safe harbor rule allows businesses to expense rather than capitalize the purchase of tangible property based on the safe-harbor cost of the item. This regulation applies differently to large businesses and small businesses.

- *Large Businesses* – For purposes of these regulations are ones with "applicable financial statements" (audited financial statements, SEC filings or other government non-tax financial report filing duty).
- *Small Businesses* – Are those without "applicable financial statements".

To adopt a de minimis safe harbor, a business must have an accounting procedure in place before the beginning of the business's tax year that specifies the business's de minimis safe harbor. Failure to do so will result in a safe harbor amount of zero and the only items that can be expensed would be those with a useful life of one year or less or those for which the Sec 179 election is made.

Safe Harbor Amounts - The amount of the safe-harbor is not a single fixed amount for all businesses, but rather an amount adopted by the business subject to a maximum amount. The maximum amounts are:

- For Large Businesses the maximum is $5,000
- For Small Businesses the maximum is $2,500

Example: *Mom and Pop's corner grocery is a small business so they can establish a de minimis safe harbor for any amount between $0 and $2,500.*

Accounting Procedure – In order to establish a de minimis safe harbor, the business must have an accounting policy in effect before the start of the tax year. The regulations don't require a written accounting procedure for small businesses. However, consider how you might prove the policy was in place if it is not in writing.

CAUTION, ANNUAL ELECTION ALSO REQUIRED
In addition to the accounting procedure, **EACH** year the business (or an individual if the business is reportable on Sch C, E, or F) must include an election on its timely filed return (including extensions) to apply the de minimis safe harbor. **The election automatically extends to materials and supplies.**

A taxpayer or small business that has elected to apply the de minimis safe harbor for the acquisition of tangible property **must** apply the de minimis safe harbor to amounts paid for all materials and supplies that meet the safe harbor requirements of the de minimis safe harbor (there are exceptions for rotable and temporary spare parts not covered in this material). If the taxpayer properly applies the de minimis safe harbor to amounts paid for materials and supplies, then these amounts are not treated as amounts paid for materials and supplies under the general expense rules.

Example – *ClientWhys, Inc., a small business, purchases 30 laptop computers. Each laptop computer is a separate unit of property (UOP) costing $1,450 each. ClientWhys has a written accounting policy allowing ClientWhys to expense amounts paid for units of property costing $2,500 or less AND has elected to apply the de minimis safe harbor to the current year and thus ClientWhys will expense the computers.*

DE MINIMIS VERSUS SEC 179 EXPENSING
One can always utilize the Sec 179 election to expense qualified personal tangible property and that might be considered the most efficient way. However, Sec 179 has recapture issues and investment limits. So don't dismiss the de minimis safe harbor without considering its benefits.

The following is a short form accounting policy prepared by ClientWhys. It has not had any legal review. Use at your own risk. Those companies with formal accounting policies in place may wish to use a more formal format.

Accounting Policy - **DE MINIMIS SAFE HARBOR RULE**

Per the provisions of IRS Regulation § 1.263(a)-1(f)(1) [insert Company Name] does hereby elect to apply the de minimis safe harbor expense rules for all units of property (UOP):

1. Costing $______ or less per invoice (or per item as substantiated by the invoice), or
2. Having a useful life (as defined by Sec 1.162-3(c)(4)) of 12 months or less.

______________________________________ __________________________
Signature of Owner or Officer Date:

This procedure must be in place on the first day of the tax year to apply to the tax year. This procedure is irrevocable without IRS consent, via a letter ruling.

The following is a de minimis election statement format prepared by ClientWhys. It has not had any legal review. Use at your own risk. Check to see if your software has this election built in. The election is attached to a timely filed return, including extensions. **Remember this election must be made annually!**

SECTION 1.263(a)-1(f) DE MINIMIS SAFE HARBOR ELECTION

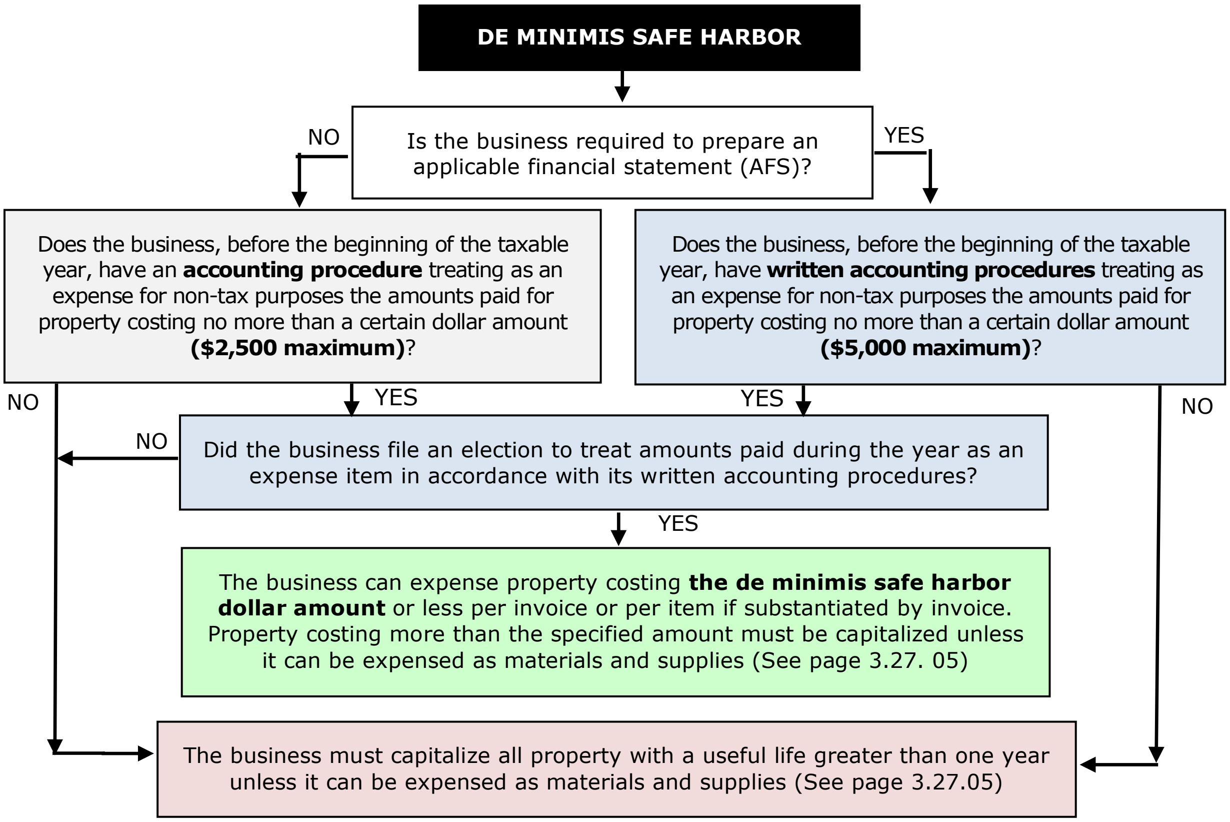
[Name] [Tax ID Number] [Address]

[Name] has an accounting policy adopting the de minimis safe harbor of Treasury Regulation Section 1.263(a)-1(f), and elects to apply the de minimis safe harbor to the [year] tax return.

CAUTION – REALLY IMPORTANT!!!
In general, most clients are not familiar with this election requirement and need to be contacted and made aware of this annual requirement before year-end.

Exceptions to the De Minimis Safe Harbor – The de minimis safe harbor does not apply to amounts paid for property that is or is intended to be included in inventory property; land; and certain rotable, temporary, and standby emergency spare parts a taxpayer elects to capitalize and depreciate; and standby emergency spare parts the taxpayer accounts for under the optional method of accounting (note rotable, temporary, and standby emergency spare parts are not covered in this material).

All or Nothing Election – A taxpayer making this election must make the election for all amounts paid for qualifying expenses during the taxable year including materials and supplies.



<u>SAFE HARBOR FOR ROUTINE MAINTENANCE</u> – (Reg. Sec. 1.263(a)-3(i))

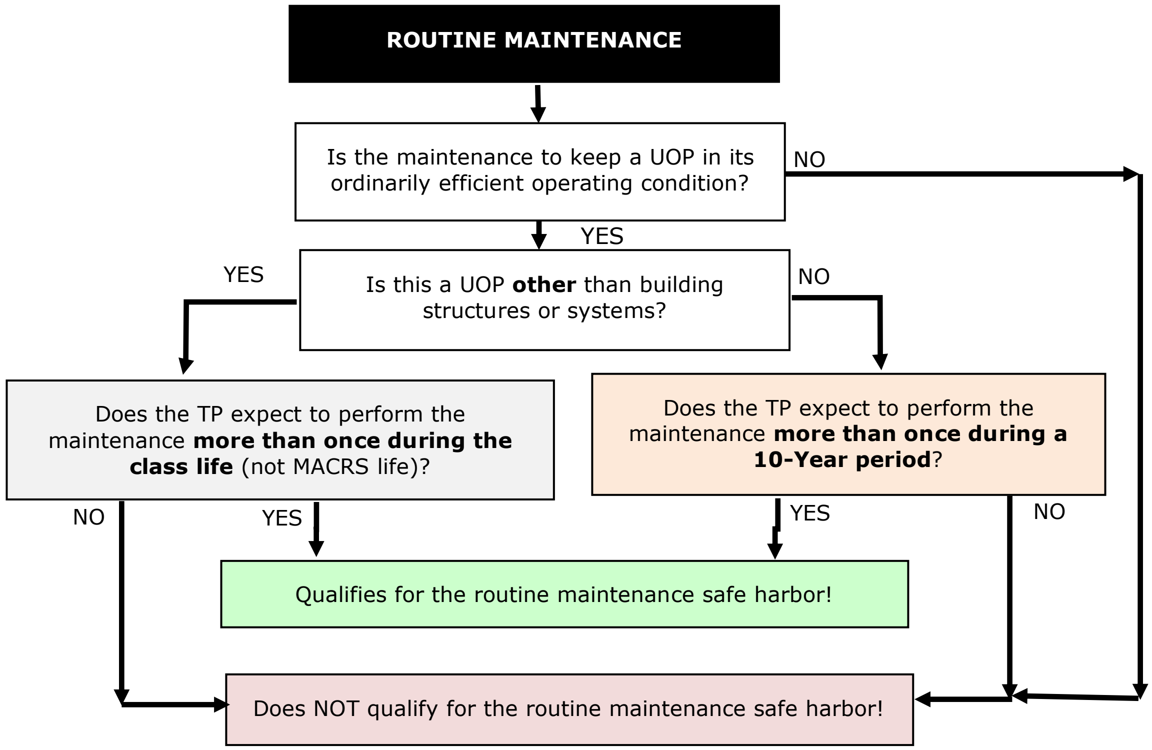
Amounts paid for routine maintenance (as described below) on a unit of tangible property, or in the case of a building (as described below) is deemed not to improve that unit of property, and are expensed if they are not otherwise required to be capitalized (Reg. § 1.162-4(a)). Factors to be considered in determining if an expense is routine maintenance include the recurring nature of the activity, industry practice, manufacturer's recommendations, and the taxpayer's experience. The regulations define routine maintenance as:

- Maintenance the taxpayer expects to perform to keep the unit of property (UOP) in its ordinarily efficient operating condition, **and**
- When the taxpayer places the UOP in service, the taxpayer expects to perform the activities more than once during:
  - **The class life** (not the depreciable life) of the UOP, other than building structures or systems.
  - A **10-year period** for building structures or systems.

Class Life

Class life is not the same as the MACRS recovery class and is described in Rev. Proc. 87-56. The following is a comparison between MACRS recovery periods and class lives.

MACRS Recovery Period	Class Life
3-Year	4 years or less
5-Year	More than 4 years but less than 10
7-Year	10 or more but less than 16
10-Year	16 or more but less than 20
15-Year	20 or more but less than 25
20-Year	25 or more



Routine Maintenance (Other than Buildings) – The cost of routine maintenance performed on a UOP that isn't a building or a structural component is treated as not improving the UOP, and is thus currently deductible. Routine maintenance refers to recurring activities, such as inspecting, cleaning, and testing, and replacing parts with comparable and commercially available replacement parts.

Activities are routine only if, at the time the UOP is placed in service by the taxpayer, the taxpayer reasonably expects to perform the activities more than once during the class life of the UOP. A taxpayer's expectation will not be deemed unreasonable merely because the taxpayer does not actually perform the maintenance a second time during the class life of the UOP, provided that the taxpayer can otherwise substantiate that its expectation was reasonable at the time the property was placed in service.

With respect to a taxpayer that is a lessor of a UOP, the taxpayer's use of the UOP includes the lessee's use of the UOP.

> ***Example (Regulations example #9)*** *– A towboat operator purchases a towboat including its two diesel engines, which are considered a single unit of property. The class life of the towboat is 18 years. The operator is aware that every four years he will need to perform routine maintenance on the two engines to keep them in their ordinarily efficient operating condition. Since the routine maintenance occurs more than once during the towboat's 18-year class life, the maintenance is considered routine. As a result, the amounts paid for the scheduled maintenance to the towboat engines in Year 5 are deemed not to improve the towboat and are not required to be capitalized.*

Routine Maintenance for Buildings **-** Routine maintenance for a UOP that's a building unit is the recurring activities that a taxpayer expects to perform as a result of using the property to keep the building structure or each building system in its ordinarily efficient operating condition. Routine maintenance activities include, for example, the inspection, cleaning, and testing of the building structure or each building system, and the replacement of damaged or worn parts with comparable and commercially available replacement parts.

Routine maintenance may be performed any time during the useful life of the building structure or building systems. However, the **activities are routine only if the taxpayer reasonably expects to perform the activities more than once during the 10-year period** beginning when the building structure or the building system on which the routine maintenance is performed is placed in service by the taxpayer.

A taxpayer's expectation will not be deemed unreasonable merely because it does not actually perform the maintenance a second time during the 10-year period, as long as the taxpayer can otherwise

substantiate that its expectation was reasonable when the property was placed in service. Factors to be considered in determining whether maintenance is routine and whether a taxpayer's expectation is reasonable include the recurring nature of the activity, industry practice, manufacturers' recommendations, and the taxpayer's experience with similar or identical property. For a taxpayer that is a lessor of all or part of a building, its use of the building unit of property includes the lessee's use of its unit of property. (Reg. § 1.263(a)-3(i)(1)(i))

> ***Example (Regulations example #14)*** *– In Year 1, Harry acquires a new office building, which he uses to provide services. The building contains an HVAC system, which is a building system. In Year 1, when Harry placed his building into service, he reasonably expected that every four years he would need to pay an outside contractor to perform detailed testing, monitoring, and preventative maintenance on its HVAC system to keep the HVAC system in its ordinarily efficient operating condition. This scheduled maintenance includes disassembly, cleaning, inspection, repair, replacement, reassembly, and testing of the HVAC system and many of its component parts. If inspection or testing discloses a problem with any component, the part is repaired, or if necessary, replaced with a comparable and commercially available replacement part. The scheduled maintenance at these intervals is recommended by the manufacturer of the HVAC system and is routinely performed on similar systems in similar buildings. In Year 4, he pays amounts to a contractor to perform the scheduled maintenance. Since this routine maintenance occurs more than once every 10 years, the maintenance is considered routine and the costs of the maintenance need not be capitalized.*
>
> *However, if Harry does not perform this scheduled maintenance on his building again until Year 11, Harry's reasonable expectation that he would perform the maintenance every 4 years will not be deemed unreasonable merely because he did not actually perform the maintenance a second time during the 10-year period, provided that he can substantiate that its expectation was reasonable at the time the property was placed in service. If Harry can demonstrate that his expectation was reasonable in Year 1, then the amounts he paid for the maintenance of the HVAC system in Year 4 and in Year 11 are within the routine maintenance safe harbor and need not be capitalized.*

Repairs undertaken contemporaneously with improvements - The regulations specifically provide that indirect costs made at the same time as an improvement, but that do not directly benefit or are not incurred by reason of the improvement, don't have to be capitalized under Code Sec. 263(a). (Reg. § 1.263(a)-3(g))

> ***Example -*** *A company takes a truck out of service to overhaul its chassis. During the overhaul, the truck's broken tail-lights are replaced and tears in the driver's seat are mended. The expenses to fix the lights and seat are deductible as repairs.*

Ineligible expenses - These safe harbor provisions do not apply to costs incurred for:

- The production of property or for resale (inventory).
- For the betterment of a unit of property
- For the cost of replacing components if a retirement loss is claimed, and gain or loss is realized upon the sale of the replaced component.
- For which a basis adjustment is required on account of a casualty loss or event;
- To restore deteriorated and nonfunctional property to its ordinarily efficient operating condition;
- To adapt property to a new or different use;
- To repair, maintain, or improve rotable or temporary spare parts that were deducted when first installed.

Accounting Method Change - Because the above regulations are based primarily on prior law, taxpayers who were previously in compliance with the rules will generally be in compliance with the regulations. In that case, no action is required. Taxpayers that aren't in compliance or that otherwise want to change their method of accounting to use the routine maintenance safe harbor should file Form 3115, Application for Change in Accounting Method, and compute a Code Sec. 481(a) adjustment. Qualifying small taxpayers conform automatically in 2014 and later years comply without filing a 3115 (Rev. Proc. 2015-20)

IMPROVEMENTS TO TANGIBLE PROPERTY – Reg. Sec. 1.263(a)-3(d))

Generally, a taxpayer who owns a unit of property must **capitalize the amounts** paid to improve the UOP that result in a **betterment** to the UOP, **restores** the UOP or **adapts** the UOP to a new or different use. So, if a taxpayer restores a building structure or makes a betterment, the expense is treated as an improvement to the single UOP consisting of the building.

Betterment costs (Reg. Sec. 1.263(a)-3(j)) - which must be capitalized, consist of amounts paid:

- To ameliorate (improve, perfect, upgrade, enhance) a material condition or defect that either existed before the taxpayer acquired the UOP or arose during its production, whether or not the taxpayer was aware of the condition or defect when it was acquired or produced;

- That results in a material addition (including a physical enlargement, expansion or extension) to the UOP; or
- That results in a material increase in capacity, productivity, efficiency, strength, or quality of the UOP or the output of the UOP.

Whether an expense results in a betterment depends on the facts and circumstances, such as the purpose of the expense, the physical nature of the work performed, and the effect of the expense on the UOP. In the case of a building, an amount results in a betterment to the UOP if it results in a betterment to the building or any of the building system properties listed in 1 through 9 on page 03.27.02.

> ***Example:*** *Kim owns a small retail shop. A storm damages the roof of Kim's shop by displacing numerous wooden shingles. She pays a contractor to replace all the wooden shingles on the roof with new wooden shingles. Kim is not required to treat the amount paid to replace the shingles as a betterment because it does not result in a material addition, or material increase in the capacity, productivity, efficiency, strength, or quality of the building structure compared to the condition of the building structure prior to the storm.*
>
> *If wooden shingles were not available on the market and Kim paid the contractor to replace all the wooden shingles with comparable asphalt shingles, the replacement of the old shingles with asphalt shingles would not, by itself, result in a betterment (improvement) to the building structure. However, if the new shingles were made of a material that was a lightweight composite, was maintenance-free and did not absorb moisture, and came with a 50-year warranty and a Class A fire rating, the amount paid for these shingles is considered a betterment. It is a betterment because there was a material increase in the quality of the shop building structure as compared to the condition prior to the storm. Therefore, the amount Kim paid for the betterment to the building structure is an improvement and must be capitalized.*

> **Note:** There are a total of 21 various examples of betterments in the regulations.

Restoration costs (Reg. Sec. 1.263(a)-3(k)) – Restoration costs must be capitalized. An amount **restores** a UOP if it:

(i) Is for the replacement of a component of a UOP for which the taxpayer has properly deducted a loss for that component, other than a casualty loss;

> ***Example*** - ***Replacement of loss component*** - *TP owns a freezer used in TP's manufacturing business that is not part of a building structure or the HVAC system. Several components of the walk-in freezer cease to function and the taxpayer decides to replace them. The TP abandons the old freezer components and recognizes a loss from the abandonment of the components. The TP replaces the abandoned freezer components with new components and incurs costs to acquire and install the new components. The TP must capitalize the amounts paid to acquire and install the new freezer components because the TP replaced components for which it had properly deducted a loss.* (Reg. Sec. 1.263(a)-7, Ex 1)

(ii) Is for the replacement of a component of a unit of property for which the taxpayer has properly taken into account the adjusted basis of the component in realizing gain or loss resulting from the sale or exchange of the component;

> ***Example*** - ***Replacement of sold component*** - *Same facts as in the previous example, except that the TP did not abandon the components but instead sold them to another party and properly recognized a loss on the sale. The TP must capitalize the amounts paid to acquire and install the new freezer components because the TP replaced components for which it had properly taken into account the adjusted basis of the components in realizing a loss from the sale of the components. .* (Reg. Sec. 1.263(a)-7, Ex 2) Note: the new components also would have to be capitalized if the sale had resulted in a gain instead of a loss.

(iii) Is for the restoration of damage to a unit of property for which the taxpayer is required to take a basis adjustment as a result of a casualty loss or relating to a casualty event. However, the amount paid for restoration of damage to the unit of property that must be capitalized under this paragraph (k) is **limited** to the excess (if any) of—

- The amount of the adjusted basis of the single, identifiable property for determining the loss allowable on account of the casualty, over
- The amount paid for restoration of damage to the UOP that also constitutes an improvement.

Example - Restoration after casualty loss *- TP owns an office building that it uses in its trade or business. A storm damages the office building that has an adjusted basis of $500,000. The TP deducts a casualty loss of $50,000, and properly reduces its basis in the office building to $450,000. The TP hires a contractor to repair the damage to the building, including the repair of the building roof and the removal of debris from the building premises. The TP pays the contractor $50,000 for the work. The TP must treat the $50,000 amount paid to the contractor as a restoration of the building structure because the TP properly adjusted its basis in that amount as a result of a casualty loss, and the amount does not exceed the $50,000 ($500,000 - $450,000) limit. Therefore, the TP must treat the amount paid as an improvement to the building unit of property and must capitalize the amount paid. (Reg. Sec. 1.263(a)-7, Ex 3)*

(iv) Returns the unit of property to its ordinarily efficient operating condition if the property has deteriorated to a state of disrepair and is no longer functional for its intended use;

Example - Restoration of property in a state of disrepair *– The TP owns and operates a farm with several barns and outbuildings. The TP did not use or maintain one of the outbuildings on a regular basis, and the outbuilding fell into a state of disrepair. The outbuilding previously was used for storage but can no longer be used for that purpose because the building is not structurally sound. The TP decides to restore the outbuilding and pays an amount to shore up the walls and replace the siding. The walls and siding are part of the building structure and the TP must treat the amount paid as a restoration of the building structure because the amounts return the building structure to its ordinarily efficient operating condition after it had deteriorated to a state of disrepair and was no longer functional for its intended use. Therefore, the TP must treat the amount paid to shore up the walls and replace the siding as an improvement to the building UOP and must capitalize the amount paid. (Reg. Sec. 1.263(a)-7, Ex 6)*

(v) Results in the rebuilding of the unit of property to a like-new condition after the end of its class life. A unit of property is rebuilt to a like-new condition if it is brought to the status of new, rebuilt, remanufactured, or a similar status under the terms of any federal regulatory guideline or the manufacturer's original specifications. Generally, a comprehensive maintenance program, even though substantial, does not return a unit of property to a like-new condition.

(vi) Is for the replacement of a part or combination of parts that comprise a major component or a substantial structural part of a unit of property. Generally, a major component is a part or combination of parts that performs a discrete and critical function in the operation of the unit of property. A substantial structural part is a part or combination of parts that comprises a large portion of the physical structure of the unit of property.

Note: There are a total of 31 various examples of restorations in the regulations.

Adapting to a New Or Different Use (Reg. Sec. 1.263(a)-3(l)) **-** A taxpayer must capitalize as an improvement an amount paid to adapt a unit of property to a new or different use. In general, an amount is paid to adapt a unit of property to a new or different use if the adaptation is not consistent with the taxpayer's ordinary use of the unit of property at the time originally placed in service by the taxpayer.

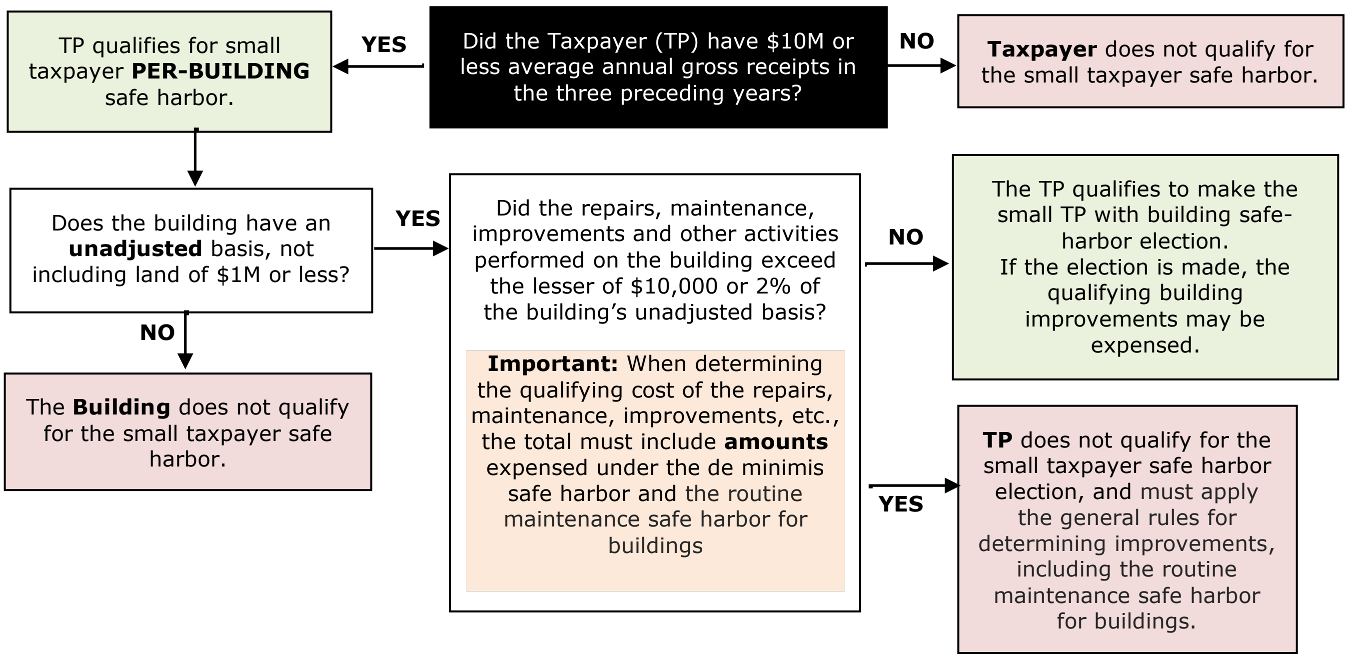
Note: There are a total of 7 examples of adaptations in the regulations.

PER-BUILDING SAFE HARBOR FOR QUALIFYING SMALL TAXPAYERS - (Reg. Sec. 1.263(a)-3(h))

This safe harbor permits qualifying small taxpayers (those with **$10 million or less average annual gross receipts in the three preceding tax years**) to elect not to treat as capitalized expenses - in other words, to currently deduct - improvements made to an eligible building property (one with an **unadjusted basis of $1 million or less, not including land value**). This safe harbor election applies only if the total amount paid during the tax year for repairs, maintenance, improvements, and similar activities performed on the eligible building **does not exceed the lesser of $10,000 or 2% of the building's unadjusted basis**.

This safe-harbor rule applies to tax years beginning on or after January 1, 2014. However, a taxpayer may choose to apply the safe harbor to tax years beginning on or after January 1, 2012.

Under this safe harbor, qualifying small taxpayers include amounts expensed (not capitalized) under the *de minimis* safe harbor election and under the routine maintenance safe harbor for buildings to determine the annual amount paid for repairs, maintenance, improvements, and similar activities performed on the building. If the amount paid for repairs, maintenance, improvements, and similar activities performed on a building unit of property exceeds the per-eligible-building threshold **(lesser of $10,000 or 2% of unadjusted basis)** for a tax year, then the safe harbor doesn't apply to any amounts spent during the tax year. In such cases the taxpayer must apply the general rules for determining improvements, including the routine maintenance safe harbor for buildings.



Example (Regulations Example #1) - Safe harbor applies *- Albert is a qualifying taxpayer (his 3-year average of gross receipts is less than $10 million) that owns an office building in which he provides consulting services. Albert's building has an unadjusted basis of $750,000, not counting the basis of the land. Albert pays $5,500 for repairs, maintenance, improvements and similar activities to the office building. Because Albert's building unit of property has an unadjusted basis of $1,000,000 or less, his building constitutes eligible building property. The aggregate amount paid by Albert for repairs, maintenance, improvements and similar activities on this eligible building property does not exceed the lesser of $15,000 (2% of the building's unadjusted basis of $750,000) or $10,000. Therefore, Albert may elect to not apply the capitalization rule to the amounts paid for repair, maintenance, improvements, etc., and can expense them.*

Example (Regulations Example #2) - Safe harbor does not apply *- Assume the same facts as in Example 1, except that Albert pays $10,500 for repairs, maintenance, improvements, and similar activities performed on his office building during the year. Because this amount exceeds $10,000 (the lesser of $15,000 (2% x $750K) or $10,000, Albert may not apply the safe harbor for small taxpayers to the total amounts paid for repairs, maintenance, improvements, and similar activities performed on the building. He will need to capitalize (depreciate) the improvements, but can deduct the expenses for repairs and maintenance under the usual rules.*

New Business – For new businesses, the average annual gross receipts are determined using the average gross receipts for the number of taxable years that the taxpayer or predecessor has been in existence. For short years, the gross receipts are annualized.

Gross Receipts – For this purpose, gross receipts include the taxpayer's receipts for the taxable year that are properly recognized under the taxpayer's methods of accounting used for Federal income tax purposes for the taxable year. Included are total sales (net of returns and allowances) and all amounts received for services. In addition, gross receipts include any income from investments and from incidental or outside sources, such as interest (including original issue discount and tax-exempt interest), dividends, rents, royalties, and annuities, regardless of whether such amounts are derived in the ordinary course of the taxpayer's trade of business. For sales of capital assets or sales of property used in a trade or business, gross receipts are reduced by the taxpayer's adjusted basis in such property. See Reg. Sec. 1.263(a)-3(h)(e)(iv) for additional information on the definition of gross receipts.

Unadjusted Basis:

- **Owned property** is the cost of the building not reduced by depreciation. Land cost is not included.
- **Leased property** is the total amount of undiscounted rent over the entire period of the lease, including reasonably anticipated renewals.

Condominiums and coops - Treated as individual building properties.

Making the Election:

- The election is an annual election, and irrevocable for the year once made.
- For partnerships and S-corporations the election is made at the entity level, not by the partner or shareholder.
- The election statement should be titled "Section 1.263(a)-3(h) Safe Harbor Election for Small Taxpayers and include the taxpayer's name, address, tax ID number and a description of each eligible building property for which the taxpayer is making the election.

Accounting Method Change – None required.

ELECTION TO CAPITALIZE REPAIR AND MAINTENANCE EXPENDITURES - Reg. Sec. 1.263(a)-3(n)(1)

This provision of the regulations will generally be applied by larger businesses that wish to reduce the administrative burden of maintaining two separate accounting systems. A taxpayer choosing this option may elect to treat repair and maintenance expenditures (only those defined under Reg. Sec. 1.162-4 - Repairs) as depreciable capital expenditures if the taxpayer:

- Incurs these amounts in carrying on the taxpayer's trade or business, and
- Treats these amounts as capital expenditures on its books and records regularly used in computing income.

A taxpayer that makes this election must apply it to all amounts paid for repair and maintenance to tangible property that it treats as capital expenditures on its books and records in that taxable year. Any amounts for which this election is made shall not be treated as amounts paid for repair or maintenance under §1.162-4.

Caution – This election is limited to repairs and maintenance included in Reg. Sec. 1.162-4. Items expensed under other provisions of the Regulations are not covered by the election.

Time and manner of election – The election is made by attaching a statement to the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year.

The election statement must be titled "Section 1.263(a)-3(n) Election" and include the taxpayer's name, address, taxpayer identification number, and a statement that the taxpayer is making the election to capitalize repair and maintenance costs under §1.263(a)-3(n). In the case of a consolidated group filing a consolidated income tax return, the election is made for each member of the consolidated group by the common parent, and the statement must also include the names and taxpayer identification numbers of each member for which the election is made. In the case of an S Corporation or partnership the election is made at the entity level.

Accounting Method Change - No accounting method change is required to exercise this election

PARTIAL DISPOSITION ELECTION — Reg. Sec. 1.168(i)-8(d)

A taxpayer may make an election under this provision to report the gain or loss on the replacement, retirement or other disposition of a partial asset. However, if the taxpayer makes this election the taxpayer **must**:

- Capitalize the replacement portion under the same asset class as the disposed portion, and
- The asset must be within the asset classes 00.11 through 00.4 of Rev. Proc. 87-56 (described below).

This election does not apply to betterments or an adaptation of the asset to a new or different use.

What does a partial disposition election accomplish? – It allows taxpayers to elect gain or loss on the replacement, retirement or other disposition of a partial asset. A good example of that would be replacing the roof on a building that is not completely depreciated. Prior to the release of the new regulations the old roof would have to remain on the books as part of the whole asset and if not already depreciated to zero, continue to be depreciated.

Example – Rental Roof: *Mel owns a residential rental property that needs a new roof. Mel determines the retiring roof has an unadjusted basis of $25,000 (27.5-year MACRS life, straight line) on which he has taken $16,817 in depreciation, leaving it with a remaining undepreciated basis of $8,183. If Mel elects a partial disposition for the roof, it will result in an ordinary loss of $8,183. However, he will have to capitalize the replacement roof and depreciate it over 27.5 years and forego any option to expense the roof under any other provision.*

Which Part of the Roof?

When it comes to the requirement to capitalize or expense a roof one has to consider which part of the roof they are dealing with. For taxes, the roof is generally broken down into two elements, the structural component (for example the underlying plywood) and the membrane (shingles, asphalt covering, tar paper, etc.). Thus, if a taxpayer replaced only the membrane that would be repair, whereas replacing the underlying roof plywood would be a capital betterment. If the underlying roof plywood were replaced then the entire cost of replacing the roof, including the membrane, would have to be capitalized.

CAUTION: The final regulations allow partial dispositions of assets held in single or multiple asset accounts but dramatically limited the availability of this election for those taxpayers who have the assets in general asset accounts (GAA). GAAs are not covered in this material.

Asset Classes

00.11	Office furniture, fixtures and equipment
00.12	Information systems (computers and peripheral equipment)
00.13	Typewriters, calculators, adding and accounting machines, copiers, duplicating equipment
00.21	Airplanes (not used in commercial or contract carrying of passengers or freight) and all helicopters
00.22	Automobiles, taxis
00.23	Buses
00.241	Light general-purpose trucks
00.242	Heavy general-purpose trucks
00.25	Railroad cars and locomotives
00.26	Tractor units for use over-the-road
00.27	Trailers and trailer-mounted-containers
00.28	Vessels, barges, tugs and similar water transportation equipment
00.3	Land improvements directly added to land whether such improvements are Sec 1245 or Sec 1250 property, e.g., sidewalks, roads, canals, waterways, drainage facilities, sewers, wharves/docks, bridges, fences, landscaping, shrubbery, radio/televisions transmitting towers
00.4	Industrial steam and electric generation and/or distribution systems

Example (based on Regulations Example #1) – Partial Disposition NOT elected *- Alicia owns an office building with four elevators. She replaces one of the elevators. The elevator is a structural component of the office building. In accordance with Reg. §1.168(i)-8(c)(4)(ii)(A), the office building, including its structural components, is the asset for disposition purposes. Alicia does not make the partial disposition election provided under Reg. §1.168(i)-8(d)(2) for the elevator. Thus, the retirement of the replaced elevator is not a disposition. As a result, depreciation continues for the cost of the building, including the cost of the retired elevator and the building's other structural components, and Alicia does not recognize a loss for this retired elevator. If Alicia must capitalize the amount paid for the replacement elevator pursuant to §1.263(a)-3, the replacement elevator is a separate asset for disposition purposes pursuant to Reg §1.168(i)-8(c)(4)(ii)(D) and for depreciation purposes pursuant to section 168(i)(6).*

Example (based on Regulations Example #2) – Treated As Separate Asset *- The facts are the same as in Example 1, except Alicia accounts for each structural component of the office building as a separate asset in her fixed asset system. Although Alicia treats each structural component as a separate asset in her business' records, the office building, including its structural components, is the asset for disposition purposes in accordance with Reg §1.168(i)-8(c)(4)(ii)(A). Accordingly, the result is the same as in Example 1.*

Example (based on Regulations Example #3) – Partial Disposition Election Made - *The facts are the same as in Example 1, except Alicia makes the partial disposition election for the elevator. Although the office building, including its structural components, is the asset for disposition purposes, the result of Alicia making the partial disposition election for the elevator is that the retirement of the replaced elevator is a disposition. Thus, depreciation for the retired elevator ceases at the time of its retirement, and Alicia recognizes a loss upon this retirement. Further, Alicia must capitalize the amount paid for the replacement elevator, and the replacement elevator is a separate asset for disposition and depreciation purposes pursuant to section 168(i)(6).*

<u>*Asset*</u> – Solely for the purposes of the partial election the term asset or a portion of an asset is limited to an asset in asset classes 00.11 though 00.4 (See previous table).

<u>*Determining the unadjusted basis of an asset included in a multiple asset account*</u> – The taxpayer can use any reasonable method to determine what portion of the entire asset basis is assigned to the partial disposition. Although the regulations say “any reasonable method,” they also provide three examples of reasonable methods:

A. Discounting the cost of the replacement asset to its placed-in-service year cost using the Producer Price Index for Finished Goods or its successor, the Producer Price Index for Final Demand, or any other index designated by guidance in the Internal Revenue Bulletin;
B. A pro rata allocation of the unadjusted depreciable basis of the multiple asset account or pool based on the replacement cost of the disposed asset and the replacement cost of all of the assets in the multiple asset account or pool; and
C. A study allocating the cost of the asset to its individual components.

CAUTION – Making this election may not provide the best outcome for the taxpayer since the taxpayer must capitalize rather than expense the replacement asset.

Example – Compare Partial Asset Sale to Repair – *Assume an apartment building has 20 window AC units that originally cost $750 each. One of those units failed and needs to be replaced. The AC units are being depreciated over a class life of 27.5 years. The replacement AC unit cost $1,200 and the labor to install was $100. The old unit was taken out of service, and the new unit was placed in service, in June.*

	Elect Partial	*Treat as Disposition*	*Repairs*
Unadjusted basis of the retired AC unit:	*750*		
Prior depreciation of AC unit:	*<273>*		
Adjusted basis of retired AC unit:	*477*	*477*	
Current Year depreciation for retired AC unit:	*27*	*13*	*27*
Cost of replacement AC unit:	*1,200*		*1,200*
Labor to install replacement AC unit:	*100*		*100*
Current Year depreciation for new AC unit:	*24*	*24*	*0*
CURRENT YEAR’S LOSS/DEDUCTIONS		***524***	***1,327***

<u>*Partial disposition election after IRS disallows repair deduction*</u> – A taxpayer may make a delayed partial disposition election if the IRS disallows the taxpayer’s repair deduction and requires that amount to be capitalized. The delayed election is made by applying for a change in accounting method, Code 198. However, the asset for which the change is being made must have been owned by the taxpayer at the beginning of the change year.

<u>*Making the election*</u> – No formal election is required. The election is made by applying the partial disposition provisions for the taxable year in which the portion of an asset is disposed of by the taxpayer by reporting the gain, loss, or other deduction on the taxpayer's timely filed, including extensions, original Federal tax return for that taxable year. No accounting method change is needed or allowed to make this election.

<u>*Revoking the election*</u> – To revoke a partial disposition election, the taxpayer must do so via a request for a letter ruling.

CALIFORNIA DIFFERENCES

California follows the federal capitalization and repair regulations except California will only follow the de minimis safe harbor increases on a prospective basis only. Thus for CA purposes the increase from $500 to $2,500 will only apply to years beginning on or after 1/01/16. Because no retroactive increase is allowed for CA, the FTB will not follow the audit protection provisions of IRS Notice 2015-82 in excess of $500 for pre-2016 tax years.

NOTES

CANNABIS (Marijuana) BUSINESS ISSUES

Overview

Marijuana is classified as a Schedule I drug under the Controlled Substances Act (CSA) and as such is subject to IRC 280E, which denies a deduction for ordinary business expenses. Also according to federal law, banks and financial services companies cannot knowingly establish accounts with businesses that sell drugs that are illegal under federal law.

Does a Cannabis Business Qualify for the Sec 199A Pass Through Deduction?

TCJA

The IRS has not provided any specific guidance to that question. The big concern of course is the limitations imposed by Section 280E, which in part says "No deduction or credit shall be allowed for any **amount paid or incurred** during the taxable year in carrying on any trade or business…" Since the 199A deduction is not predicated on an "amount paid or incurred" the Sec 199A deduction might apply to cannabis trades and businesses. **However**, when the wage limit applies, the Sec 199A deduction takes into account wages paid by the business. Is that enough to kill the 199A deduction? Only time and the IRS' and courts' interpretations will tell. (The IRS passed on the opportunity to take a position in the final Sec 199A regulations released in February 2019.) Also, without being able to deduct business expenses, cannabis business's QBI is inflated, not something Congress intended. Also see a discussion of Altman vs Commissioner, TC Memo 2018-83, at the end of this chapter.

Sec 280E in its entirety*: "No deduction or credit shall be allowed for any amount paid or incurred during the taxable year in carrying on any trade or business if such trade or business (or the activities which comprise such trade or business) consists of trafficking in controlled substances (within the meaning of schedule I and II of the Controlled Substances Act) which is prohibited by Federal law or the law of any State in which such trade or business is conducted."*

The Details

As marijuana businesses have been legalized in over half of the states, the issues of how these businesses can report their income and pay their taxes are relevant to more tax practitioners than ever before.

Marijuana is classified as a Schedule I drug under the Controlled Substances Act (CSA), which is the statute prescribing federal U.S. drug policy. Under the CSA, the manufacture, importation, possession, use and distribution of certain substances is regulated. Thus, for federal purposes, the sale of marijuana is an illegal business. This position has been substantiated in the Tax Court and affirmed by the Ninth Circuit Court of Appeals (Olive, Martin, (2012) 139 TC 19, affd (2015, CA9)).

Business Expenses & Credits - For tax reporting purposes, the big stumbling block is IRC Sec 280E, which was passed in 1982 during the Reagan administration and which prohibits deductions or credits in connection with the trade or business of trafficking in illegal drugs. This prohibition applies even if the sale of marijuana is permitted under state law. Thus, taxpayers in the business of selling marijuana cannot reduce their taxable income through either related deductions or credits.

Cost of Goods Sold - However, while related business expenses, such as those otherwise allowed under Sec 162, are not deductible, cost of goods sold (COGS) is allowed. This is because IRC Sec 61(a)(3) provides that "**gross income**" includes net "**gains** derived from dealings in property," and this property includes controlled substances produced or acquired for resale. These "gains derived from dealings in property" refer to gross receipts less COGS, or the adjusted basis of merchandise sold during the taxable year. This result is necessary to conform to the language of the 16th Amendment to the US Constitution, which gave Congress the authority to tax "income" but not "gross receipts." When property is sold, only the gain from the sale is income. Gain is well recognized as gross receipts (gross sales price) less the basis (cost) of the property sold (see Section 1.61-3 (a) of the Income Tax Regulations; Sec 1001 (a), Sec 1011 (a), and Sec 1012 (a)); and S. REP. NO. 97-494 (Vol. I), at 309 (1982)). The Senate bill was adopted in conference (CONF. REP. NO. 97-760, at 598 (1982), 1982-2 C.B. 650).

For a business selling marijuana, COGS clearly includes the cost of the marijuana itself. What else might COGS include? Advice from the IRS Chief Counsel (20150411 (12/10/14)) provides some guidance for determining COGS in this situation, as summarized here:

When Sec 280E was enacted in 1982, an "inventoriable cost" was a cost capitalized to inventories under Sec 471 and its regulations. Thus, for example, a marijuana reseller in that era using an inventory method would have capitalized the invoice price of the marijuana purchased, less trade or other discounts, plus the costs of transportation and other necessary charges incurred in acquiring possession of the marijuana. Similarly, a marijuana producer using an inventory method would have capitalized direct material costs (e.g., marijuana seeds or plants), direct labor costs (e.g., those due to planting, cultivating, harvesting or sorting), indirect costs as listed in Category 1 of Reg Sec 1.471-11(c)(2)(i) and possibly Category 3 indirect costs as listed in Sec 1.471-11(c)(2)(iii).

Sec 263A was enacted 4 years after Sec 280E; it expanded the types of inventoriable costs compared to the rules under Sec 471. A reseller still is required to treat the acquisition costs of property as inventoriable. However, a reseller also is now required to capitalize purchasing, handling and storage expenses. In addition, both resellers and producers are required to capitalize a portion of their service costs, such as the costs associated with their payroll, legal and personnel functions. Thus, under Sec 263A, resellers and producers of property are required to treat some deductions as inventoriable costs. However, Sec 280E and the flush language at the end of Sec 263A(a)(2) prevent a taxpayer who is trafficking in a Schedule I (such as marijuana) or Schedule II controlled substance from obtaining a tax benefit by capitalizing disallowed deductions. If a taxpayer subject to Sec 280E were allowed to capitalize the additional Sec 263A costs, Sec 263A would no longer affect only timing and would become a provision that converted nondeductible expenses into capitalizable costs. Thus, the Chief Counsel's office concluded that a taxpayer trafficking in a Schedule I or Schedule II controlled substance is entitled to determine inventoriable costs using Sec 471's applicable inventory-costing regulations as they existed when Sec 280E was enacted.

Multiple Businesses – If a taxpayer selling marijuana is engaged in multiple trades or businesses, just one of which involves the sale of marijuana, only those expenses related to marijuana sales are disallowed under IRC Sec 280E (Californians Helping to Alleviate Medical Problems, Inc, (2007) 128 TC 173). However, sloppy bookkeeping practices can lead to problems in the event of an audit, so it is recommended that each business be operated separately, as the use of separate accounting for each can establish which expenses do not apply to the marijuana trade. Expenses that are shared by the businesses can be allocated by a reasonable method.

Excise Tax – Many states levy excise taxes on the sale of legal marijuana. According to a Chief Counsel Announcement (CCA 201531016), the taxpayer who pays state marijuana excise tax should treat that expenditure as a reduction in the amount realized on the sale of property under IRC Sec 164(a) – not as part of the inventoriable cost of that property or as a deduction from gross income. In addition, the CCA noted that IRC Sec. 280E doesn't preclude this treatment because, although it prohibits deductions and credits for marijuana-related businesses, this excise tax is neither a deduction from gross income nor a tax credit.

Seized Items – A taxpayer cannot include cash or the cost of controlled substances seized by law enforcement in his or her COGS (Beck, Jason R., (2015) TC Memo 2015-149).

Banking Issues – According to federal law, banks and financial services companies cannot knowingly establish accounts with businesses that sell illegal drugs. Banks that handle marijuana money can be charged with money laundering. Businesses restricted to cash are also "targets for assaults" that endanger the public. The lack of banking services can lead marijuana businesses to have problems making federal deposits using the required electronic funds transfer. The business has to make arrangements for its payroll service or another trusted third party to make electronic deposits on its behalf. Some credit unions and small banks that are chartered by their state, not the federal government, have tried to fill the void by offering basic banking services to the cannabis industry.

The IRS has established a payment option for individual taxpayers who need to pay their taxes with cash. In partnership with ACI Worldwide's OfficialPayments.com and the PayNearMe Company, individuals can now make a payment without the need of a bank account or credit card at certain retail establishments nationwide. There is a $1,000 limit and the number of deposits is limited by the type, generally only two per month. Details at: https://www.irs.gov/payments/pay-with-cash-at-a-retail-partner

Tax Return Preparers & Accountants – Another potential problem is that the Bank Holding Company Act treats accountants and tax-return preparers as financial institutions (16 CFR 313.3(i)(2)(h); 16 CFR 313.3(k)(2)(viii)) for purposes of information disclosure. Tax preparation and accounting firms are listed as financial activities, along with banks, insurance companies and financial firms, in 12 CFR 225.28(b)(6)(vi) and referenced in Sec 4(k)(4)(G) of the

Bank Holding Company Act. Does this fact, in conjunction with the banking issues discussed previously, preclude an accountant or tax return preparer from establishing a business relationship with a business that sells illegal drugs?

In the Q&A session at the end of the IRS webinar given 7/19/17 by OPR Director Stephen Whitlock, the question was asked whether it is OK for those covered by Cir 230 to prepare returns for clients who have marijuana businesses in states where selling marijuana is legal. The answer was that as long as the federal tax laws are applied, such as the deduction/credit prohibition of Sec 280E, the IRS won't have a problem with the preparer (i.e., won't consider the preparer as aiding and abetting an illegal activity).

Several State Boards of Accountancy have issued guidance generally agreeing that providing accounting services to a marijuana business is not in itself a discreditable act. The AICPA does not, at press time, have a standard regarding providing accounting services to marijuana businesses. However, there is a white paper available at www.aicpa.org discussing the issues. Search "marijuana" from the website.

Malpractice Insurance – All policies generally include exclusions for criminal acts. Since the sale of marijuana is still illegal for federal purposes, it would be wise to consult with your insurance carrier related to your coverage when providing services to marijuana businesses.

S Corporations and Reasonable Compensation – Working shareholders of S corporations are required to take reasonable compensation for their services in the form of W-2 wages. However, those wages fall into the category of a business deduction, which, except to the extent allocable to cost of goods sold, a cannabis business may not deduct. Not allowing the business deductions increases the K-1 flow through income. Thus the stockholder-employee will have to report the W-2 income and the pass through income, effectively causing his reasonable compensation to be taxed twice. This outcome was confirmed in a case that came before the Tax Court in 2018 (J.M. Loughman, TC Memo. 2018-85).

Altman vs Commissioner (TC Memo 2018-83) - In the Altman case the taxpayer was appealing a lower court's decision confirming IRS audit results for disallowing expenses under Sec 280E. What is interesting in the case was the taxpayer was allowed depreciation and Sec 179 deductions. However, the court did not provide an explanation as to why these expenses were deductible, and it appears the court did so based upon the original audit results, so it may have not been an issue before the court. So don't hang your hat on those results.

CALIFORNIA DIFFERENCES

FTB Exception to the No Cash Policy - The FTB has a "No Cash Policy" in all field offices. This was done to streamline processes, save costs, and reduce risk to customers and state employees. Although this policy achieved the intended goals, it creates a hardship for taxpayers who are unable to open bank accounts (for example, marijuana businesses). In order to address this concern, the FTB established an exemption to the "no cash" policy that was implemented on July 1, 2016. Effective that date:

- A taxpayer who needs to pay in cash must request an exemption to the "No Cash Policy" using the No Cash Policy Exemption Request form, FTB 3711 PC, available on the FTB web site at https://www.ftb.ca.gov/forms/misc/3711.pdf.
- To request an exemption, the taxpayer will need to provide an explanation for their inability to pay using the FTB's provided methods. The No Cash Policy Exemption Request form must be signed by the taxpayer, partner, corporate officer or POA.
- Submit the request at one of five FTB field offices, or scan and email it to FTBCashPayments@ftb.ca.gov, or fax it to 916.843.0262.
- The FTB will review the exemption request and mail a letter of determination to the taxpayer within two business days.
- If the exemption is approved, the taxpayer is responsible for contacting one of the five FTB field offices to make an appointment prior to making their cash payment. The addresses of the field offices are included in the Form 3711 instructions. However, no phone numbers are provided – so makes you wonder if they really want to provide an appointment.
- An approved exemption is good for all future transactions at any of the five FTB offices for the rest of the calendar year. The exemption request must be renewed each year, no later than December 31st.

If the taxpayer is required to make mandatory e-payments, it is recommended that they also complete and submit Form 4107, Mandatory e-Pay Election to Discontinue or Waiver Request for individuals, or Form 3816, Electronic Funds Transfer Election to Discontinue or Waiver Request for business entities, each time a cash payment is made.

Cannabis Taxation Electronic Funds Transfer

Governor Brown has signed into law AB 1741. The law temporarily exempts a person licensed to engage in commercial cannabis activity whose estimated tax liability under the act averages $20,000 or more per month, from a requirement to remit specified taxes under the Medicinal and Adult-Use Cannabis Regulation and Safety Act (MAUCRSA) by electronic funds transfer if the CDTFA deems it necessary to facilitate collection of amounts due. The temporary extension expires January 1, 2022. AB 1741 took effect immediately upon enactment on August 28, 2018.

California follows federal rules related to the Sec 280E restriction on the deductibility of expenses and allowance of tax credits, except in the case of C-Corporations, which are allowed the expenses and most state tax credits if otherwise eligible.

NOTES

REASONABLE COMPENSATION

Determining a reasonable shareholder salary for an S corporation is required and may be one of the most difficult tasks related to S corporation accounting and tax preparation.

S corporation shareholders enjoy tax advantages that other entity types don't offer. Only the portion of their cash distributions that is characterized as reasonable compensation (W-2 wages) is subject to payroll taxes while the profits passed through on the K-1 are not subject to SE tax. Compare that to a partnership where the entire profits are subject SE tax.

Note: if a partnership's "business" is rental of real estate, none of the profits would be subject to SE tax and limited partners don't pay SE tax on profits. But guaranteed payments would be subject to SE tax.

- Reasonable Compensation – Job Aid for IRS Valuation Professionals – An IRS Publication (see below) Link:

https://www.irs.gov/pub/irs-utl/Reasonable%20Compensation%20Job%20Aid%20for%20IRS%20Valuation%20Professionals.pdf

The Internal Revenue Code establishes that any officer of a corporation, including S corporations, is an employee of the corporation for federal employment tax purposes. S corporations should not attempt to avoid paying employment taxes by having their officers treat their compensation as cash distributions, payments of personal expenses, and/or loans rather than as wages.

WHO'S AN EMPLOYEE OF THE CORPORATION?

Generally, an officer of a corporation is an employee of the corporation. The fact that an officer is also a shareholder does not change the requirement that payments to the corporate officer be treated as wages. Courts have consistently held that S corporation officer/shareholders who provide more than minor services to their corporation and receive or are entitled to receive payment are employees whose compensation is subject to federal employment taxes.

The Treasury Regulations provide an exception for an officer of a corporation who does not perform any services or performs only minor services and who neither receives nor is entitled to receive, directly or indirectly, any remuneration. Such an officer would not be considered an employee.

WHAT'S A REASONABLE SALARY?

The instructions to the Form 1120S, U.S. Income Tax Return for an S Corporation, state:

"Distributions and other payments by an S corporation to a corporate officer must be treated as wages to the extent the amounts are reasonable compensation for services rendered to the corporation."

The amount of the compensation will never exceed the amount received by the shareholder either directly or indirectly. However, if cash or property or the right to receive cash and property did go to the shareholder, a salary amount must be determined and the level of salary must be reasonable and appropriate.

There are no specific guidelines for reasonable compensation in the Code or the Regulations. The various courts that have ruled on this issue have based their determinations on the facts and circumstances of each case.

SOME FACTORS CONSIDERED BY THE COURTS IN DETERMINING REASONABLE COMPENSATION:

- Training and experience
- Duties and responsibilities
- Time and effort devoted to the business
- Dividend history
- Payments to non-shareholder employees
- Timing and manner of paying bonuses to key people
- What comparable businesses pay for similar services
- Compensation agreements
- The use of a formula to determine compensation

The problem here, of course, is that it is easy for the IRS to list contributing factors used by the courts in determining reasonable compensation and leave it to the corporation to quantify these factors into a reasonable salary, and still have the ability to challenge the selected amount later if an auditor, off the top of their head, decides the compensation is unreasonable. The IRS has a long history of examining S corporation tax returns to ensure that reasonable compensation is being paid, particularly so if no compensation is shown being paid to employee-stockholders.

IRS PUBLICATION – REASONABLE COMPENSATION

The IRS, in 2014, released a 26-page publication titled "Reasonable Compensation – Job Aid for IRS Valuation Professionals." However, the publication specifically indicates that it is not an official pronouncement of law and like the Revenue Manual cannot be used, cited, or relied upon as such.

In the Publication's "Background" it States: The Reasonable Compensation issue usually involves a determination of whether the amount of compensation paid is reasonable so that it is deductible under section 162 of the Internal Revenue Code for income tax purposes. In some cases, the Reasonable Compensation issue comes up when the amount of compensation paid may be lower than reasonable to avoid the payment of employment taxes.[1] For tax-exempt entities, the issue involves the application of section 4958, taxes on excess benefit transactions, and reflects a concern that excessively high compensation may unduly enrich officers, directors, trustees or key employees of the tax-exempt entity at the expense of the qualified charitable purpose.

[1] According to Treas. Reg. § 1.162-7(a), "The test of deductibility in the case of compensation payments is whether they are reasonable and are in fact payments purely for services."

Valuation Approaches – The publication includes three approaches to determine reasonable compensation:

- **Market Approach** – How much compensation would be paid for this same position, held by a non-owner in an arms-length employment relationship, at a similar company.
- **Income Approach** - Is based on an "Independent Investor Test," which seeks to determine whether an independent investor would be satisfied with his/her return on investment when looking at the financial performance of the taxpayer's business in conjunction with the subject employee's level of compensation.
- **Cost Approach** – Is based on the hours spent by the employee down to the various duties performed, quantifies the amount of time devoted to the different responsibilities, and compares the employee's salary to market compensation for comparable positions.

The valuations approaches require access to local labor statistics and may be best left to professionals who provide reasonable compensation evaluation services.

IRC SEC 199A DEDUCTION

> *"Qualified business income (QBI) does not include any amount paid by an S corporation that is treated as reasonable compensation of the taxpayer. Similarly, qualified business income does not include any guaranteed payment for services rendered with respect to the trade or business, and to the extent provided in regulations, does not include any amount paid or incurred by a partnership to a partner who is acting other than in his or her capacity as a partner for services" (199A Committee Reports)*

The advent of the Sec 199A deduction beginning in 2018 adds an additional level of complexity to reasonable compensation for the following reasons.

- The S corporation's employee-stockholder's wages are NOT included in qualified business income (QBI) when computing the employee-stockholder's 199A deduction. Thus, the larger the wages the smaller the K-1 flow through income (QBI) and thus the smaller the 199A deduction, which is 20% of QBI (or 20% of the individual's adjusted taxable income if less). In this case it would be the tendency of an S corporation to pay the stockholder a smaller salary in order to maximize the flow through income and as a result the 199A deduction.

- Where married taxpayers filing a joint return have taxable income that exceeds a threshold amount of $321,400 ($160,725 for married filing separate and $160,700 for other statuses) for 2019 ($315,000 (other filing statuses $157,500) for 2018), the 199A deduction begins to be subject to a wage limitation, and once the taxable income for married taxpayers filing a joint return exceeds $421,400 ($210,725 for MFS and $210,700 for other statuses) for 2019 ($415,000 (other filing statuses $207,500) for 2018), the 199A deduction becomes the lesser of 20% of the QBI or the wage limitation. For these high-income taxpayers there is a tendency for the S corporation to pay stockholders less wage income in order to benefit from the Sec 199A deduction.
- Where an S corporation is a specified service trade or business (see chapter 3.24) the Sec 199A deduction phases out for married taxpayers filing a joint return with taxable income between $321,400 and $421,400 ($160,725 and $210,725 MFS, $160,700 and $210,700 other statuses) for 2019 ($315,000 and $415,000 (other filing statuses $157,500 and $207,500) for 2018). And, although the wage limitation is used in computing the phase out, once the taxpayer's taxable income exceeds $421,400 (MFS $210,725, other filing statuses $210,700) for 2019 ($415,000 MFJ and other filing statuses $207,500 for 2018), the taxpayer receives no benefit from the wage limitation and therefore would again want to minimize their reasonable compensation in order to minimize FICA taxes.

Of course, taxpayers cannot pick and choose a reasonable compensation to minimize taxes or maximize deductions. There-in lies a trap for tax practitioners who do not take into consideration the factors related to reasonable compensation. There are firms that have the data necessary to determine reasonable compensation, and in **JD & Associates, Ltd. v. United States,** the IRS used Risk Management Association (RMA), an expert in the field of reasonable compensation, for data to determine reasonable compensation.

COMMERCIAL SOURCES

We searched the Internet for services that provide the needed data in report form to determine reasonable compensation. A major source in the field seems to be RC Reports. **We have no experience with them so cannot vouch for them**, but they do have an impressive website with some high-powered references. https://rcreports.com/ They charge a membership fee.

TAX CUTS & JOBS ACT

Don't overlook the fact that in the early stages of tax reform (TCJA) the bill included a safe harbor definition of reasonable compensation of 70% compensation and 30% flow-through income. It also allowed a larger (more taxpayer favorable) allocation to flow through income where a taxpayer could prove investment in the business justified a larger allocation. That provision did not make the cut and was not included in the final bill, although it provides some insight into Congressional thinking on the subject.

GUARANTEED PAYMENTS (PARTNERSHIP)

There has been substantial concern in the tax industry after the passage of the TCJA that Congress might be trying to apply the rules of reasonable compensation to partnership guaranteed payments. This concern was prompted by the fact that guaranteed payments are excluded from a partnership's QBI for purposes of computing the Sec 199A deduction, the same as shareholders' wages (reasonable compensation) are excluded from the QBI of an S corporation, since there was not a modifier included in Sec 199(c)(4) that limits the application of reasonable compensation to S corporations. Here is that section of the Code:

> **199A(c)(4)** Treatment of reasonable compensation and guaranteed payments — Qualified business income shall not include—
>
> > **199A(c)(4)(A)** reasonable compensation paid to the taxpayer by any qualified trade or business of the taxpayer for services rendered with respect to the trade or business,
> >
> > **199A(c)(4)(B)** any guaranteed payment described in section 707(c) paid to a partner for services rendered with respect to the trade or business, and
> >
> > **199A(c)(4)(C)** to the extent provided in regulations, any payment described in section 707(a) to a partner for services rendered with respect to the trade or business.

However at an American Bar Association Section of Taxation meeting in San Diego on February 9, 2018, Dana Trier, Treasury deputy assistant secretary for tax policy, said the lack of a modifier to reasonable compensation has raised concerns that the government may broaden reasonable compensation to other entities. "From where I sit . . . that reference to reasonable compensation is not an indication to redo the law of reasonable compensation."

Despite those assurances, Trier noted that section 199A(c)(4) was "written as it's written," and Treasury has the power to issue guidance expanding reasonable compensation beyond subchapter S corporations. Treasury will exercise that power "if someone above me makes that decision," he said.

IRS REVENUE RULINGS & COURT CASES

IRS Revenue Ruling 74-44 – Dividends (dividends in this context means distributions) that two sole shareholders of an electing small business corporation arranged to receive instead of reasonable compensation in the same amounts for services they performed constituted "wages" for which the corporation was liable for the taxes imposed by the FICA and the FUTA and the withholding of income tax.

Spicer Accounting v. United States, 918 F.2d 90 – 66AFTR 2nd 90-5806 (1990) – Taxpayer accounting corporation sought a refund for FICA and FUTA taxes paid to the IRS on behalf of Mr. Spicer. Taxpayer contends that payments paid to Mr. Spicer were dividends, since payments made to stockholders in a subchapter S corporation are not wages. The court found that because payments received by Mr. Spicer were for substantial services rendered, these payments are "wages" subject to FICA and FUTA. Taxpayer asserts, in the alternative, that it was not liable for FICA and FUTA because Mr. Spicer was an independent contractor, not an employee. The Court denied Taxpayer's claim finding that there is no evidence that Mr. Spicer was an independent contractor. Finally, the Court held that Sec. 530 of the Revenue Act of 1978 does not relieve Taxpayer from FICA and FUTA liability for the years at issue (1981 and 1982), because Taxpayer's treatment of Mr. Spicer as a stockholder, not as an employee, was unreasonable. Therefore, the Court affirmed the district court's decision.

Watson v. U.S. 107 AFTR 2nd 2011-311 (DC IA) 12/23/2010 - The IRS recharacterized dividend and loan payments from David E. Watson, P.C. to its sole shareholder and employee, David E. Watson as wages. In light of this recharacterization, Watson was assessed additional employment taxes, interest and penalties for each of the eight calendar quarters in 2002 and 2003. He paid the fourth quarter 2002 assessment of $4,063.93 and filed a claim for refund of that amount on or about June 27, 2007 and the IRS subsequently denied his request for a refund.

Watson filed an action contending that the assessments were illegal, and requesting a refund of the amount paid. The IRS filed an Answer and Counterclaim resisting Watson's request for refund, and requesting Judgment against Watson in the amount of $44,457.39 for additional assessments, penalties, and interest for the seven additional quarters in 2002 and 2003 for which Watson did not make payment. Although Watson received a minor adjustment in the amount owed, the IRS prevailed.

CALIFORNIA DIFFERENCES

California conforms to federal treatment of reasonable compensation (but California does not conform to the Sec 199A deduction).

NOTES

PENSIONS AND ANNUITY DISTRIBUTIONS

Overview

When the Form 1099-R taxable amount is blank or when box 2b (taxable amount not determined) on the 1099-R is checked, the taxpayer's investment in the contract must be determined and the taxable portion of the pension or annuity determined under IRS rules in effect at the time the distribution begins. If there is no investment in the contract, all of the payments received during the year are taxable.

$$\text{Monthly excludable amount} = \frac{\text{After-Tax Investment in Contract}}{\text{\# Payments (Simplified General Rule)}}$$

Simplified General Rule after 1997:

Annuitant Age	**# Payments**
55 and under	360
56-60	310
61-65	260
66-70	210
71 and over	160

Annuitant & Beneficiary (Jt lives)

Age	**# Payments**
110 or under	410
111-120	360
121-130	310
131-140	260
141 or over	210

RAPID FINDER

The Details

DETERMINING TAXABLE AMOUNT

Generally, most pension plan trustees will include both the gross distribution amount and the taxable distribution amount on a 1099-R and no additional calculations are needed to determine the taxable amount.

However, when the taxable amount is blank or when box 2b (taxable amount not determined) on the 1099-R is checked, the taxpayer's investment in the contract must be determined and the taxable portion determined under one of the IRS specified methods. The method you must use is the method in effect the first year of the pension distribution. **The method currently in effect is the "Simplified General Rule."**

DEFINITIONS

Pension vs. annuity - A pension is a series of payments made to an individual at his/her retirement while an annuity is a series of payments under a contract (e.g., an insurance annuity).

Tax-sheltered annuity - A special kind of annuity contract purchased for a public school employee or the employee of a tax-exempt organization. This type of arrangement is also commonly referred to as a 403(b) plan.

Qualified employer plan - An employer's stock bonus, pension, or profit-sharing plan that meets Internal Revenue Code (IRC) requirements. A qualified plan gives its participants special tax benefits—e.g., tax deferral of contributions, rollover privileges, special 10-year averaging in some cases, etc.

Nonqualified employer plan - An employer's plan that doesn't meet IRC requirements; it doesn't receive most of the benefits afforded to a qualified employee plan.

TYPES OF PENSIONS/ANNUITIES

Fixed Period - Pays definite amounts regularly for a specific length of time.

Single Life - Pays definite amounts regularly for life with payments ending at the death of the annuitant.

Joint and Survivor - First annuitant receives certain amount regularly for life. After the first annuitant's death, second annuitant receives a definite amount regularly for life. What is paid to second annuitant may or may not be different than what the first annuitant received.

Variable - Payments may vary in amount for a definite period of time or for life. Amount received may be dependent on "variables" like profits earned by annuity plan or cost-of-living adjustments.

Disability - Made to an individual who is under retirement age, but receives payments because of his/her disability.

DECEDENT'S UNRECOVERED INVESTMENT IN PENSIONS

If a retired person dies before recovering the entire basis in a pension or annuity that started after 1986, the unrecovered portion is allowed as a Tier 1 (not subject to the 2% of AGI adjustment) miscellaneous itemized deduction on the retiree's final income tax return. *(Code Sec. 67(b)(10);Code Sec. 72(b)(3)(A))*

Thus, if the annuity is for the joint lives of a retiree and a designated beneficiary, the deduction would apply to the final return of the last to die. Otherwise, it would be allowed on the final return of the retiree decedent.

> ***Example -*** *Bill Smith, age 65, began receiving retirement benefits in 2019 under a joint and survivor annuity. Bill's annuity starting date is January 1, 2019. The benefits are to be paid for the joint lives of Bill and his wife Kathy, age 65. Bill had contributed $31,000 (post-tax) to a qualified plan and had received no distributions before the annuity starting date. Bill is to receive a retirement benefit of $1,200 a month, and Kathy is to receive a monthly survivor benefit of $600 upon Bill's death.*
>
> *Under the simplified method, Bill's tax-free monthly amount is $100 ($31,000 ÷ 310). Upon Bill's death, if Bill has not recovered the full $31,000 investment, Kathy will also exclude $100 from her $600 monthly payment. If Bill and Kathy die before 310 payments are made, a miscellaneous itemized deduction will be allowed for the unrecovered cost on the final income tax return of the last to die.*

MULTIPLE PLANS

An employee may receive benefits from more than one plan under a single trust of an employer. If this is true, the employee may have to treat each plan as a separate contract and may be considered to have received more than one pension or annuity, depending on the circumstances. The plan administrator should be able to tell an employee whether each contract needs to be treated separately.

QUALIFIED DOMESTIC RELATIONS ORDER (QDRO)

A QDRO is a judgment, decree, or order relating to payment of child support, alimony, or marital property rights to a spouse, former spouse, child or other dependent. The order has to contain certain specific information like the amount of the participant's benefits to be paid to each alternate payee.

Spouse or former spouse - If a spouse or former spouse receives retirement benefits from a participant's plan under a QDRO, the former spouse must report the payments just as though he/she were the plan participant. The early distribution penalty does not apply, regardless of the alternate payee's age. The taxability is computed by allocating the spouse/former spouse a share of the investment in the contract and figuring the taxable portion accordingly (see below for computing taxability when there is investment in the contract).

Child or dependent - If a child or dependent receives a distribution under a QDRO, the amount is taxed to the plan participant.

EX-SPOUSE'S MILITARY RETIREMENT PAY AWARDED IN CONNECTION WITH DIVORCE

A taxpayer who, in connection with a divorce, is awarded an ownership interest in his or her ex-spouse's military retirement pay, is treated as receiving pension payments (includible as pension income in the taxpayer's gross income under Code Sec. 61(a)(11)), even though the retirement pay was earned by the ex-spouse. Thus, where, in connection with a divorce, a taxpayer received a portion of her ex-spouse's military retirement pay as her share of community property, that portion was pension income to her under Code Sec. 61(a)(11). Similarly, where, in a non-community property state (VA), a taxpayer was awarded ownership of a portion of her ex-spouse's military retirement pay in connection with a divorce, that portion was taxable to her as pension income. This is because pension payments are gross income to the party who owns the right to those payments pursuant to a division of property in a divorce.

(Pfister, Gay M., (2002) TC Memo 2002-198) A district court in the Fifth Circuit came to the same conclusion. *(Chiarello, Emily D. v. IRS, (2006, DC TX))* The imposition of income tax withholding on the retiree does not prevent the amount paid to the former spouse from being included in gross income. *(Mitchell, Maria Antoinette Walton, (2004) TC Summary Opinion 2004-160)*

PUBLIC SAFETY OFFICERS EXCLUSION FOR HEALTH & LONG-TERM CARE INSURANCE

Eligible retired public safety officers (police, firefighters) may elect to exclude governmental retirement plan distributions that don't exceed their health or long-term care premiums, if the distributions are paid directly to insurers. The exclusion is limited to $3,000 per year. Any amount excluded isn't deductible as a medical expense for itemized deductions and isn't includible as health insurance for the self-employed heath insurance deduction (PPA § 845). See chapter 7.02 – Medical, for details.

PARTIAL ANNUITIZATION OF NON-QUALIFIED ANNUITIES

The partial annuitization of a nonqualified annuity, endowment, or life insurance contract is permitted.

Under this rule, if any amount is received as an annuity for a period of 10 years or more, or during one or more lives, under *any portion* of an annuity, endowment, or life insurance contract:

- that portion will be treated as a separate contract for annuity taxation purposes;
- the investment in the contract will be allocated pro rata between each portion of the contract from which amounts are received as an annuity, and the portion of the contract from which amounts are *not* received as an annuity, and
- a separate annuity starting date will be determined for each portion of the contract from which amounts are received as an annuity. (Code Sec. 72(a)(2))

Thus, holders of nonqualified annuities are allowed to elect to receive a portion of an annuity contract in the form of a stream of annuity payments, leaving the remainder of the contract to accumulate income on a tax-deferred basis.

Since "any portion" of an annuity contract is not defined, IRS guidance is needed to expand on this area of the partial annuitization rule.

The partial annuitization rule does not apply to the special rules for qualified employer retirement plans under Code Sec. 72(d).

DISABILITY RETIREMENT PAYMENTS (WORKERS' COMPENSATION)

Retirement payments are not taxable if they are received pursuant to a workers' compensation act or a statute in the nature of a workers' compensation act. However, such payments are not excludable to the extent they are determined by reference to the employee's age or length of service or prior contributions, even if the retirement occurs due to an occupational injury. (Reg. § 1.104-1(b)) The annual Form 1099-R issued by the former employer should reflect the portion of the retirement payments that is taxable.

Retirement Benefits Exceed Disability Benefits - The Court of Appeals for the Ninth Circuit has affirmed a Tax Court decision that a retired member of the Los Angeles County Sheriff's Department could not exclude from income the amount by which his retirement benefits exceeded the amounts that he was entitled to receive on account of his disability, finding that the excess was subject to tax under Reg. § 1.104-1(b) because it was calculated in reference to the taxpayer's length of service. The Court also rejected the taxpayer's challenge to the validity of that reg. (Sewards v. Comm., (CA 9 5/12/2015))

Payments to surviving spouse - The exclusion for workers' compensation applies to benefits paid under a workers' compensation act to the survivor or survivors of a deceased employee (Reg § 1.104-1(b) , or under a statute which is in the nature of a workers' compensation act to the survivors of a deceased employee (Rev Rul 80-44). A statute authorizing benefits for employees' survivors can qualify as a statute in the nature of a workers' compensation act if it requires as a prerequisite to payment a determination that the cause of the employee's death was service-related.

However, continuation benefits paid to the surviving spouse of a deceased firefighter under a statute that didn't distinguish between job related and non-job related disabilities weren't excludable. Although the benefits qualified as a continuation of the employee's benefits under Rev Rul 80-44, since the statute wasn't in the nature of a workers' compensation act, the spouse's benefits were a mere continuation of the deceased employee's taxable benefits and weren't excludable (IRS Letter Ruling 9445003).

See also "Sick Pay" in chapter 02.01.06.

PERIODIC PENSION/ANNUITY PAYMENTS

Generally, distributions from pensions and annuities are made in regular, periodic payments. Distributions are tax-free to the extent the participant has after-tax dollars in a plan ("investment in the contract") and the balance is taxable.

Information needed to figure annuity taxability - When determining the taxability of pensions, the following data should be available:

(1) Amount of both employer AND employee contributions to the plan.
(2) Amount of each annuity payment AND how often it is paid (e.g., monthly).
(3) "Starting date" of the annuity. This is the later of the first day of the first period for which a payment is received under the contract or the date when the obligation under the contract becomes certain.

Example - Determining Starting Date - *Frank completed all payments required by his annuity contract on 01/01/XX. The annuity provided for monthly payments beginning 08/01/XX. The 08/01 payment covered the period beginning 07/01/XX. Frank's annuity starting date is 07/01/XX.*

(4) Length of time the annuity payments will continue (e.g., for a set number of years, over the lifetime of the taxpayer only, over the lives of the taxpayer and spouse or other beneficiary).
(5) Guarantees of a specific minimum return (i.e., "refund feature").
(6) Age of the annuitant, spouse and other beneficiary.

A taxpayer's "investment in the contract" (cost) consists of:

- The taxpayer's own after-tax contribution to the plan, and
- Funds contributed by an employer and included in the taxpayer's taxable income.

However, certain items may have to be subtracted from the cost:

(a) Premium refunds, rebates, "dividends";
(b) Premiums paid for disability or health benefits;
(c) Value of the refund feature, but only if the taxable part of the annuity is computed under the General Rule, as described below. Regs describe how to compute the refund feature.

SIMPLIFIED GENERAL RULE TABLES

Table #1 Annuity Start Date	Before 11/19/96	After 11/18/96
Annuitant Age	# of Payments	# of Payments
55 or under	300	360
56-60	260	310
61-65	240	260
66-70	170	210
71 or over	120	160

Table #2 Annuity Start Date	Only for Annuities Starting After 1997
Combined Ages Of Annuitant And Beneficiary	# of Payments
110 or Under	410
110-120	360
121-130	310
131-140	260
141 or over	210

METHODS FOR TAXING PENSIONS

Fully Taxable Pensions **-** Annuity payments are 100% taxable if there is no investment in the contract. Most often these pensions consist of distributions from cash or deferred arrangements (401(k) plans), simplified employee pensions (SEPs), or tax-sheltered annuities.

Partially Taxable Pensions **–** For pensions that begin after 1986, the "Simplified General Rule" is used to compute the taxable portion of a pension when there is an investment in the contract. There are two "General Rules" - one effective for pensions that began after 11/18/1996 and those started before that date

To determine the taxable portion of a partially taxable pension using the general rule, use the Simplified General Rule tables and the worksheet below.

WORKSHEET - PENSIONS BEGINNING ON OR AFTER 7/1/1986

1. Enter the total pension or annuity payments received this year………………………..…………… ___________
2. Enter your cost in the plan (contract) at the annuity starting date…………………..…………… ___________
3. Enter the appropriate number from Table 1 above. But if your annuity starting date was after 1997 and the payments are for your life and that of your beneficiary, enter the appropriate number from Table 2 above………………….…………… ___________
4. Divide line 2 by the number on line 3 …………………………………………………….…………….. ___________
5. Multiply line 4 by the number of months for which this year's payments were made. If your annuity starting date was before 1987, enter this amount on line 8 below and skip lines 6, 7, 10, and 11. Otherwise, go to line 6……………..….…………… ___________
6. Enter any amount previously recovered tax-free in years after 1986……………..….…………… ___________
7. Subtract line 6 from line 2..………………………………………………………………..…..…………… ___________
8. Enter the smaller amount of line 5 or line 7………………………………………………..…..…………… ___________
9. Taxable amount for year. Subtract line 8 from line 1. Enter the result, but not less than zero. Note: If your Form 1099–R shows a larger taxable amount, use the amount on this line instead……………………………………………..…………………………… ___________
10. Add lines 6 and 8……………………………………………………………………………………….……………… ___________
11. Balance of cost to be recovered. Subtract line 10 from line 2..……….……………………..…. ___________

Example - Simplified General Rule - *Assume the following facts:*

Type of annuity:	*One life, 401(a) plan*
Starting date:	*01/01/19*
Investment in contract:	*$30,000*
Monthly annuity:	*$1,000*
Age of recipient:	*62*

The taxable portion of the payouts would look like the following:

1.	*TOTAL PAYMENTS RECEIVED this year*	*$12,000*
2.	*INVESTMENT IN THE CONTRACT*	*$30,000*

USING THE GENERAL OR SIMPLIFED GENERAL RULE

(1) ***Starting date after 1986 and before 11/19/1996:*** These annuitants must use the General Rule unless the Simplified General Rule is elected. However, the total amount of income that can be excluded as return of capital can't be more than the investment in the contract less the value of any refund feature. Thus, when the investment in the contract is used up, the annuity is fully taxable. Otherwise, computations are like those described above.

(2) ***Starting date after 07/01/86 and before 01/01/87****:* Recipients of such distributions must use the General Rule unless the Simplified General Rule, described above, is elected. Use the same procedures described in (1) above.

(3) ***Starting date before 07/02/86*****:** For such distributions, the General Rule applied when cost was not recovered within 36 months (the old Three-Year Rule). First-year calculation of these annuities determines the AMOUNT RECEIVED during the year AND the investment in the contract. The expected return is computed as follows:

(a) If the term for the annuity is fixed (e.g., $200 a month for 30 years), multiply the payment amount specified for each period by the number of months to be paid per the contract (e.g., $200 x 12 months x 30 years);

(b) If the annuity is for life (of the taxpayer, taxpayer and spouse, or taxpayer and other beneficiary), use IRS annuity tables. The annuity factors found in the tables equate with the number of years the annuity is expected to be received. Multiply the factor by 12 months and the result by the monthly annuity amount (or the annuity factor times the amount received yearly).

Portions of the annuity tables are reproduced in chapter 4.02, but Regs 1.72-9 and IRS Publication 939 contain the full text.

(c) Once you know the expected return, compute the EXCLUSION RATIO by dividing the investment in the contract by the expected return. This exclusion ratio (expressed as a percentage) is the tax-free amount. In later years, use the same exclusion ratio and apply it to the "annuity amount" (i.e., the original level of payments). Cost of living or other adjustments are fully taxable. The exclusion ratio doesn't change no matter how long the annuitant lives or how much is actually excluded.

NONPERIODIC PENSION PAYMENTS

Nonperiodic payments are also termed "amounts not received as an annuity." They include all payments other than periodic payments. The amount of such payments that are subject to tax depends on when the payments are made in relation to the annuity starting date. If they are made before the annuity starting date, their tax treatment depends on the type of contract or transaction from which they result.

Nonperiodic payments on or after annuity starting date - A plan participant who receives a nonperiodic payment from an annuity contract on or after the annuity starting date is generally fully taxable on the amount. A cost-of-living increase in a pension after the initial starting date is considered "an amount not received as an annuity"; thus, it is fully taxable.

Nonperiodic payments before annuity starting date - Such payments are only partially taxable because part of the payment is allocated to investment in the contract. To figure the nontaxable portion, use the following formula (determine "balance in the account" on the date the payment is received).

$$\textbf{Amount received} \times \frac{\textbf{Investment in the contract}}{\textbf{Balance in the account}}$$

For distributions from plans other than qualified retirement plans, generally the payment is only partially taxable. Allocate first to earnings to compute the taxable part, then to investment in the contract to figure the nontaxable part. This type of treatment generally applies to commercial annuity contracts purchased directly by the taxpayer. The taxable portion is the smaller of: (a) the nonperiodic distribution, or (b) the excess of the cash value of the contract (figure this without regard to any surrender charge) just before receipt of the distribution over the participant's investment in the contract at that time.

> ***Example - Taxability of an Insurance Annuity*** *- Will bought an annuity from an insurance company. Before the annuity starting date, he received a distribution of $7,000. The cash value of the annuity at that time was $16,000, and Will's investment in the contract was $10,000. Since the distribution is allocated first to earnings, Will must include $6,000 in income ($16,000 - $10,000). The remaining $1,000 is tax-free.*

RETIREMENT INCOME BY PARTNERSHIP TO A NONRESIDENT RETIRED PARTNER

States are prohibited from taxing the retirement income paid by a partnership to a nonresident retired partner under any written plan, program, or arrangement in effect immediately before retirement begins. Certain adjustments to retirement payments under pension or deferred compensation plans, including cost-of-living adjustments, do not disqualify such plans under the "substantially equal periodic payments" test. (Sec. 114(b)(1)(I))

LONGEVITY ANNUITIES BENEFIT FROM FINAL REGULATIONS

A longevity annuity is a deferred annuity that is scheduled to commence at an advanced age. Longevity annuities make it easier for retirees to use a limited portion of their savings to purchase guaranteed income for life starting at an advanced age, such as 80 or 85, to address the risk of outliving their assets. Once that risk is addressed, a retiree's task of generating income from his remaining assets would be more manageable because it would be limited to a fixed period of time.

However the required minimum distribution (RMD) rules had made it difficult for taxpayers to acquire longevity annuities with their retirement funds because the value of the longevity annuity would have to be included in the account balance used to determine the taxpayer's RMD for the year.

Final regulations (T.D. 9673) related to "qualified longevity annuity contracts" (QLACs) modify the required minimum distribution rules in order to facilitate the purchase of deferred annuities that begin at an advanced age. Highlights of the final regs:

- To qualify as a QLAC, distributions must begin no later than age 85.
- Prior to annuitization, the value of QLACs is excluded from the account balance used to determine required minimum distributions.
- The regulations permit a QLAC to be offered under a defined contribution plan but not a defined benefit plan.
- To qualify as a QLAC, the amount of the premiums paid for the contract cannot exceed the lesser of $125,000 (inflation-adjusted to $130,000 for 2019 and 2018) or 25 percent of the employee's account balance.
- If purchased for an IRA, the amount of the premiums paid for the contract under an IRA on a given date may not exceed $130,000 ($125,000 before 2018). If, on or before the date of a premium payment, an IRA owner has paid premiums for the same contract or for any other contract that is intended to be a QLAC under the IRA or under any other IRA, plan, or annuity, the $130,000 ($125,000 before 2018) limit is reduced by the amount of those other premium payments. Further, the amount of the premiums paid for the contract under an IRA on a given date generally may not exceed 25 percent of the sum of the account balances (as of December 31 of the calendar year before the calendar year in which a premium is paid) of the IRAs (other than Roth IRAs) that an individual holds as the IRA owner.
- The $125,000 limitation is subject to inflation adjustment in $10,000 multiples, effective after 2014.
- An annuity purchased under a Roth IRA cannot be treated as a QLAC.

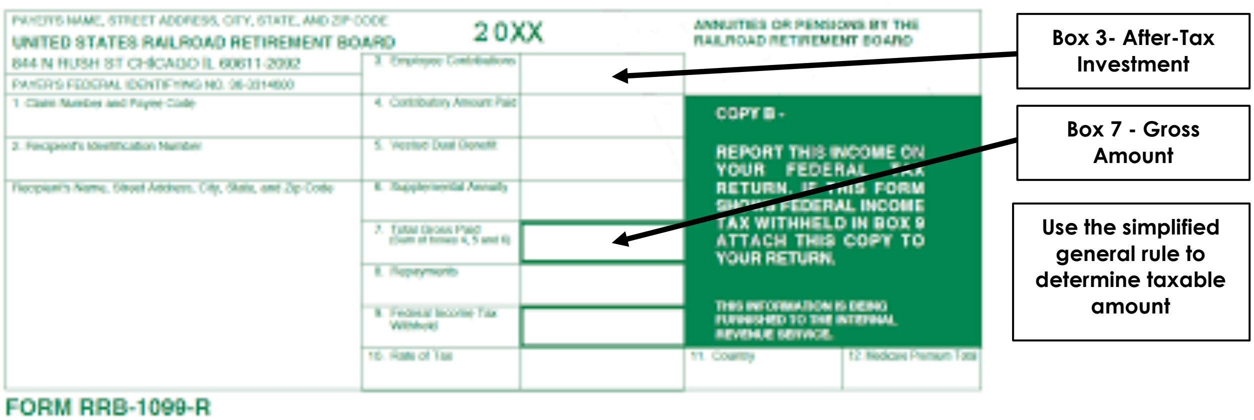
- If an annuity contract fails to be a QLAC solely because premiums for the contract exceed the premium limits, then the contract will not fail to be a QLAC if the excess premium is returned to the non-QLAC portion of the employee's account by the end of the calendar year following the calendar year in which the excess premium was paid.
- A QLAC may provide for a single-sum death benefit paid to a beneficiary in an amount equal to the excess of the premium payments made with respect to the QLAC over the payments made to the employee under the QLAC. If a QLAC is providing a life annuity to a surviving spouse (or will provide a life annuity to a surviving spouse), it may also provide a similar return of premium (ROP) benefit after the death of both the employee and the spouse.
- A QLAC may not include a variable contract, an equity-indexed contract, or a similar contract.
- If on or after July 2, 2014, an existing contract is exchanged for a contract that satisfies the requirements to be a QLAC, the new contract will be treated as purchased on the date of the exchange and therefore may qualify as a QLAC. In such a case the fair market value of the contract that is exchanged for a QLAC is treated as a premium that counts toward the QLAC limit.

Form 1098-Q – The IRS has created Form 1098-Q, Qualifying Longevity Annuity Contract Information, to be used to report the status of longevity annuity contracts held by defined contribution plans, IRAs, and eligible governmental plans, to participants and the IRS.

RAILROAD RETIREMENT

Pensions and annuities paid by the Railroad Retirement Board (RRB) are reported on Form RRB-1099-R, which is a green form, as opposed to the blue RRB-1099, which reports RR equivalent Social Security benefits. Box 7 of the RRB-1099-R shows the gross amount paid, without any reduction for taxpayer contributions. Box 3 shows the employee's after-tax investment in the contract – use the simplified general rule to determine the amount that reduces the taxable amount reported in Box 7. Box 8 shows any repayments. See chapter 9.05, Claim of Right, for how to deduct or take a tax credit for the repayment. For additional information on Railroad Retirement benefits, see IRS Pub 575, page 6 (2018).

Railroad Pension – RRB 1099-R



CANADIAN "IRA" EQUIVALENT PLANS

Residents of the U.S. and beneficiaries of one of the following Canadian plans:

- A registered retirement savings plan (RRSP),
- A registered retirement income fund (RRIF),
- A registered pension plan, or
- A deferred profit-sharing plan

Have been taxed on the accrued earnings from these plans unless they made the election under the US-Canada Tax Treaty Article XVIII(7).

IRS Rev. Proc. 2014-55 – simplified the reporting requirements. Previously Form 8891 was used to report contributions to, undistributed earnings of and distributions from the Canadian plans and to make the election under the US-Canada Tax Treaty Article XVIII(7) to defer taxation on undistributed earnings.

An eligible individual can make that election under the provisions of Rev Proc 2014-55. An "eligible individual" is a beneficiary of a Canadian retirement plan who:

A) Is or at any time was a U.S. citizen or resident while a beneficiary of the plan;
B) Has met his or her U.S filing requirements for all years during which the individual was a U.S. citizen or resident;
C) Has not previously reported undistributed accrued earnings from a plan during any taxable year in which the individual was a U.S. citizen or resident; and

D) Has reported any and all distributions received from the plan as if the individual had made an election under Article XVIII(7) for all years during which the individual was a U.S. citizen or resident.

Election Procedure for an Eligible Individual - An eligible individual (defined above) who did not previously make an election under Article XVIII(7) will be treated as having made the election in the first year in which the individual would have been entitled to elect the benefits under Article XVIII(7). No forms need to be filed for any year. Once an election is made pursuant to section 4.02 of Rev Proc 2014-55 with respect to a Canadian retirement plan, that election is in effect for all subsequent taxable years through the year in which a final distribution is made from the plan, unless the election is revoked with the consent of the Commissioner.

Effect on Prior Elections - A beneficiary who previously made an Article XVIII(7) election with respect to a Canadian plan on Form 8891 or under the procedures set forth in Revenue Procedure 2002-23 (or an eligible individual who is treated as having made the election per Rec Proc 2014-55) is not required to file Form 8891 or a similar statement for taxable years ending after December 31, 2012.

Effect on Other than an Eligible Individual - Beneficiaries who have reported on their U.S. Federal income tax return undistributed income that has accrued in a Canadian retirement plan during a taxable year are not "eligible individuals" and consequently are not eligible to make an election under Article XVIII(7). Undistributed income will remain currently taxable. If such a beneficiary desires to make an Article XVIII(7) election with respect to a Canadian retirement plan, the beneficiary must seek the consent of the Commissioner.

Note: Annuitants and beneficiaries of these Canadian plans are not required to file Form 3520 or 3520-A. However, beneficiaries may be required to file FinCen Form 114 (FBAR) related to foreign financial accounts and trusts valued at over $10,000.

OTHER ISSUES

Exchange – Inherited Annuities - According to PLR 201330016, a taxpayer who had elected to annuitize her inherited non-qualified annuities (elected to receive the payout over her lifetime) was allowed to exchange those annuities for annuities with higher payouts as provided by IRC Sec. 1035(a)(3). A PLR is non-binding and only applies to the taxpayer who made the request, but it also shows how the IRS regards a certain issue.

CALIFORNIA DIFFERENCES

California generally conforms to Federal treatment of pensions. However, foreign equivalents to Social Security are generally taxable to CA. See Chapter 2.03.

Taxation of Out-of-State Pensions - P.L. 104-95 prevents states from taxing the pensions of former residents of any state received after December 31, 1995 (R&TC 17952.5). Benefits received after 1995 from the following plans are not subject to out-of-state taxation:

- IRC Sec. 401(a) trusts exempt from taxation under IRC Sec. 501(a)
- **IRC Sec. 403(a) annuity plans**
- IRC Sec. 403(b) annuity contracts
- IRC Sec. 408(k) plans
- IRC Sec. 414(d) government plans
- IRC Sec. 457 deferred compensation plans
- IRC Sec. 501(c)(18) trusts
- IRC Sec. 7701(a)(37) individual retirement plans
- Pensions meeting the "substantially criteria" paid to partners. ***

> ***Example*** *– Tom was a CA resident from 7/1/08– 8/1/19, when he moved to Texas. He receives a pension of $1,000 per month from his former CA employer. The pension cannot be taxed by CA while he is a non-resident of CA.*

P.L. 104-95 also limits deferred compensation (including IRC Sec. 401(k) plans) and other distributions from two types of nonqualified plans from out-of-state taxation:

- IRC Sec. 3121(v)(2)(C) plans, if payments are made at least annually and spread over the actuarial life expectancy of the beneficiaries, or if they are spread over at least a 10-year period; and
- Plans that are trusts under IRC Sec. 401(a), but exceed limits laid down in IRC Sec. 401(a)(17) and IRC Sec. 415.

**** H.R. 4019 signed into law in 2006 specifically includes payments by partnerships to partners retroactive to pension payments received after 12/31/95. This bill was in response to a position taken by the State of New York that the provisions of Code Sec. 3121(v)(2)(C) apply only to employees, not partners, and the state was attempting to tax pension income of "out-of-state" partners.*

Taxation of Canadian RRSPs and RRIFs – These Canadian retirement plans do not qualify as IRAs under either federal or California law. California does not recognize the U.S.-Canada treaty provision allowing an election to defer taxation of the earnings of these plans until distributions are received. Thus, the interest, dividends or capital gains earned by these plans annually are taxed by California and are an adjustment on Schedule CA. The amount taxed becomes the taxpayer's basis in the plan for CA purposes and will not be taxed again when distributions are actually received.

Uniform Lifetime Table

Final Regulations §1.401(a)(9)-5

Generally, this table is used to determine the minimum required distribution from defined contribution plans. Also used by IRA owners. ***Exception:*** *If the taxpayer's spouse is the sole beneficiary, then the distribution period is the longer of the distribution period determined from this table or the Joint and Last Survivor Table.*

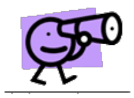
LUMP-SUM DISTRIBUTIONS



QUALIFICATIONS

- Only applies to plan participants **born before January 2, 1936 (Age 83 in 2018)**
- Only distributions from an employer's or self-employed individual's qualified plan: profit-sharing, stock purchase, pension or 403(a) annuity plan
- **Whole balance** must be **distributed**
- Uses **1986 Tax Rates**
- Can only be **used once after 1986**
- Distributions prior to 1986 must be included in computation
- Must have been in plan any part of **at least five years** (exception – beneficiary)
- Payment must be as a result of:
  1. **Separation from service**,
  2. **Death**, or
  3. **Disability** (applies to self-employed taxpayers only).

LUMP-SUM DISTRIBUTIONS

A "lump-sum distribution" is a special nonperiodic payment that can qualify for preferential tax treatment. It is a distribution (usually of cash and/or stock) from a qualified retirement plan, and it is generally made up of several parts:

- A taxpayer's after-tax contributions to the plan, which are tax-free at distribution;
- The taxable portion of the distribution attributable to pre-1974 active participation in the plan (this may qualify for long-term capital gain treatment as described below);
- The taxable part of the distribution, which is ordinary income (post-1973 additions to the plan).

QUALIFICATIONS

To qualify as a lump-sum distribution, the distribution must be **all** of the following:

1. A distribution from an employer's or self-employed individual's qualified plan--profit-sharing, stock purchase, pension or 403(a) annuity plan;
2. The whole balance credited to the recipient, excluding voluntary deductible employee contributions;
3. Payment within one tax year of the recipient (incidental payouts after the close of the tax year are permitted, but will be taxed as ordinary income). The entire payout does not need to occur in a specific year (e.g., the year the taxpayer retires), but it could take place years after a taxpayer's separation from company service;
4. Payment must be made because the employee: (a) "separated from service" (i.e., a common law employee retired, quit, was fired, or laid off from a job), or (b) reached age 59-1/2, or (c) died, or (d) became disabled (applies to self-employed taxpayers only). ***"Separation from service"*** means complete severance from all relationships between an employee and employer.
5. An employee must have a minimum of five years of plan participation before the distribution (waived if paid to a deceased employee's beneficiary). In *Robert Boyer, TC Memo 1988-220*, the Tax Court held that the 5-year requirement didn't mean 5 full years but "any part of at least 5 years."

10-YEAR AVERAGING

There is a special 10-year averaging computation for plan participants **born before January 2, 1936**. Generally, the only plans that qualify for the lump-sum averaging are Keogh, 401(k), and 403(a). SEPs, IRAs, 403(b) and

Nonqualified Deferred Comp plans are not allowed to use the lump sum averaging rules. For a large portion of the planning cases, the need to take a sizeable lump-sum distribution up front occurs very rarely.

Must include "all such amounts received during tax year." The Tax Court stated that an election to use 10-year averaging for a lump-sum distribution is available only if all lump-sum distributions received in a given year are included in the election ***(O. Fowler, 98 TC, No. 34)***.

Taxability options, regardless of the taxpayer's age:

A) **Rollover:** The taxable part of the distribution can be rolled over in whole or in part to an IRA (or other qualified plan). The part rolled over will not be currently taxed; the part not rolled over will be taxed as ordinary income.

B) **Ordinary income:** The whole distribution (taxable part) can be included as ordinary income on Schedule 1, Form 1040 (2018 draft), and taxed along with other income at regular rates.

AVERAGING OPTIONS AVAILABLE TO TAXPAYERS

If 10-year averaging is elected, 1986 tax rates are used to compute the tax on Form 4972. *Note: 10-Year averaging tax approximation table included at the end of this section.* ***Born before January 2, 1936*** – Two options available:

1) Treat the entire distribution (ordinary and capital gain) as ordinary income and compute the tax using the 10-year averaging on Form 4972.

2) Report the ordinary income portion of the distribution on Form 4972, using 10-year averaging to figure the tax. Report the capital gain portion of the distribution on Form 4972, using a flat 20% rate to compute the tax. ***(Note: this rate has not been reduced to reflect the current 0% and 15% maximum capital gains tax rates.)***

One-time option - If a taxpayer used either the 5-year (no longer available) or 10-year averaging methods for any lump-sum distribution received after 1986, a taxpayer can't use them for any other distribution received in a later year. However, if the beneficiary of a deceased plan participant makes the election to use one of these methods for an inherited lump sum, that election doesn't affect any election the beneficiary can make for his/her own qualified plan. A taxpayer can also make such an election as beneficiary of more than one qualifying person.

> ***Example - Beneficiary's Use of Special Averaging -*** *In 2019 Ethel's 86-year-old brother died. Ethel was the beneficiary of her brother's retirement plan and received a lump-sum distribution of the plan's proceeds. Because her brother was born before January 2, 1936, Ethel may elect either method (1) or (2) described above to compute the tax on the distribution. Ethel, who was born in 1935, plans to retire in 2020 and will be receiving a lump-sum distribution from her employer's 401(k) plan. The elections she makes regarding the tax treatment of her brother's distribution won't affect the elections she may make for the distribution from her own plan.*

TO COMPUTE THE AMOUNT OF A LUMP SUM THAT IS TAXABLE

(1) Begin with the total amount of the distribution (cash and stock).

(2) SUBTRACT nondeductible employee contributions not previously recovered.

(3) SUBTRACT "unrealized appreciation" of employer stock (i.e., the current value less cost of the stock to the trust) which is included in the distribution. Net unrealized appreciation on the securities is not taxable until the securities have been sold. However, a taxpayer may elect to include net unrealized appreciation in income in the year the distribution is received. The instructions to Form 4972 describe the procedure to use to make the election.

(4) THE RESULT is the taxable amount.

SPECIAL AVERAGING METHOD OR 20% CAPITAL GAIN ELECTION CAN'T BE USED FOR ANY OF THE FOLLOWING:

(1) U.S. Retirement Plan Bonds distributed with a lump sum.

(2) Any distribution made during the first 5 tax years that the employee was a participant in the plan, unless it was made because the employee died.

(3) The current actuarial value of an annuity contract included in a lump-sum distribution. (However, this value is used to figure tax on the ordinary income part of the distribution under the 10-year tax option method.)

(4) A distribution to a 5% owner that is subject to a penalty, because it exceeds the benefits provided under the plan formula.

(5) A distribution from an IRA.

(6) A distribution of the redemption proceeds of bonds rolled over tax-free to the plan from a qualified bond purchase plan.

(7) A distribution from a qualified plan if the plan participant or his or her surviving spouse previously received an eligible rollover distribution from the same plan (or another plan of the employer that must be combined with that plan for the lump-sum distribution rules), and the previous distribution was rolled over tax-free to another qualified plan or to an IRA.

(8) A corrective distribution of excess deferrals, excess contributions, excess aggregate contributions, or excess annual additions.

(9) A lump sum credit or payment from the Federal Civil Service Retirement System (or the Federal Employees Retirement System).

(10) A distribution from a Sec. 403(b) plan (tax-sheltered annuity).

(11) A distribution from a qualified plan, if any part of the distribution is rolled over tax-free to another qualified plan or IRA.

(12) A distribution from a privately purchased commercial annuity.

(13) A distribution from a Section 457 deferred compensation plan of a state or local government, or a tax-exempt organization.

(14) A distribution from a qualified plan that received a rollover after 2001 from an IRA (other than a conduit IRA), a Section 457 plan or a Section 403(b) tax sheltered annuity on behalf of the plan participant.

(15) A distribution from a qualified plan that received a rollover after 2001 from another qualified plan on behalf of that plan participant's surviving spouse.

(16) Any distribution if an earlier election to use either the 5- or 10-year averaging had been made after 1986 for the same plan participant.

FORM 1099-R

Lump sum distribution recipients should receive Form 1099-R showing the ordinary income and capital gain portions of the distribution. Net unrealized appreciation will also be shown if all or part of the distribution consists of appreciated employer securities. If 10-year averaging is not elected, or the taxpayer doesn't qualify to use it, the ordinary income portion of the distribution is reported as a fully taxable pension on Form 1040 unless it has been rolled over within 60 days of being received or was transferred directly to an IRA or another eligible plan in a trustee-to-trustee arrangement.

TEN-YEAR AVERAGING (FORM 4972) – Tax Approximations

TI	TAX	%	TI	TAX	%	TI	TAX	%

CALIFORNIA DIFFERENCES

California conforms to Federal treatment, including 10-year averaging based on the 1986 CA tax rates and a capital gain election – but only for participants born before January 2, 1936. The rate for the capital gain election is 5.5% instead of 20%. Use California Schedule G-1.

NOTES

ROLLOVERS

For IRA to Roth Rollovers (Conversions) See Chapter 4.06

Overview

- ***Rollover:*** *Tax-free withdrawal of cash or other assets from one retirement plan and its reinvestment in another retirement program where taxpayer receives the distribution and makes the reinvestment within the rollover period.*
- ***Rollover Period:*** *Generally within 60 days unless a waiver is granted or self-certification applies (120 days for a failed qualified first time homeowner withdrawal)*
- ***Eligible Rollover Distribution:*** *Generally from any qualified plan to any other qualified plan.*
- ***Withholding:*** *20% unless directly transferred.*
- ***Direct Rollovers:*** *Transfer is made directly by the trustee or custodian of one qualified retirement plan to the trustee/custodian of another qualified plan. Also termed a trustee-to-trustee transfer. Qualified plan to Roth IRAs allowed.*

The Details

A rollover is a tax-free withdrawal of cash or other assets from one retirement plan and its reinvestment in another retirement program. The amount transferred is excluded from gross income in the year of the transfer. A qualified plan generally must provide participants who receive distributions with the election to have an "eligible rollover distribution" paid directly to an "eligible retirement plan"--i.e., in a trustee-to-trustee transfer. This rule is in accord with the income tax withholding rules for "eligible rollover distributions."

WHO CAN ROLL OVER A RETIREMENT PLAN DISTRIBUTION?

The following taxpayers can qualify to roll over retirement plan distributions:

(1) The pension plan participant,
(2) Spouse of a deceased plan participant,
(3) Non-spouse beneficiary (Post-2006 and beneficiary RMD rules still apply), and
(4) An alternate payee **spouse** under a "qualified domestic relations order."

Surviving Spouse Could Not Roll Over Her Community Property Interest In IRA **-** In a situation where a deceased husband's IRA named the husband's son as sole beneficiary but the state court had assigned half of the IRA to the surviving spouse as community property, the surviving spouse was unable to roll over her portion of the IRA because she was not the named beneficiary. In a private letter ruling the IRS concluded that since community property interests must be disregarded under Code Sec. 408(g), she couldn't be treated as a payee of the inherited IRA for her son and therefore distribution rules must be applied without regard to community property laws, making the entire distribution taxable to the son. (**Private Letter Ruling 201623001**)

QUALIFIED PLAN TO IRA ROLLOVERS FOR NON-SPOUSE BENEFICIARIES

Direct rollovers of distributions from an eligible retirement plan (e.g., a qualified plan) of a deceased employee to a non-spouse beneficiary's IRA are allowed. If the non-spouse beneficiary receives a distribution from a plan, it is not eligible for rollover; the transfer must be trustee-to-trustee. The rollover is treated as an eligible rollover distribution and distributions from the beneficiary's IRA are subject to the RMD rules that apply to inherited IRAs of non-spouse beneficiaries: distributions must begin immediately; they cannot be delayed until the non-spouse beneficiary turns age 70 ½.

CAUTION

The distribution is subject to RMD rules for inherited IRAs. The account needs to be set up as an "inherited IRA" (aka "beneficiary IRA") with the decedent as the owner and the inheritor as the beneficiary (example: "Tom Smith as beneficiary of John Smith"). The beneficiary can get the funds transferred from the decedent's qualified plan into an account that he or she has more control over. There **IS NO** provision allowing postponement of the withdrawal until the beneficiary reaches age 70 1/2 as there is when a spouse inherits.

To the extent provided by IRS, the provision applies to benefits payable to a trust maintained for a designated beneficiary to the same extent it applies to the beneficiary. The IRA must be set up with the trust identified as the beneficiary (IRS Notice 2007-7, Q&A 16).

IRA TO QUALIFIED PLAN ROLLOVERS

When rollovers are discussed, it is generally assumed that the rollover is from a qualified employer plan to an IRA or from an IRA to another IRA. The IRA is generally assumed to be the ending depository of the funds. However, rollovers can be made from an IRA to a qualified plan, which can provide some interesting tax planning opportunities.

Caution

Qualified plans are permitted to receive IRA funds but they are not required by law to accept funds from them, so the plan administrator of the receiving plan should be consulted before attempting a rollover.

Caution

For an amount received by a qualified plan to be a lump-sum distribution eligible for capital gains or special averaging treatment for distributions to individuals born before Jan. 2, 1936, it must contain only funds that originally qualified for the capital gains or special averaging treatment. Thus, regular (non-rollover) contributions should not be made to a rollover IRA if the distributee of the original rollover contribution wants to preserve the chance to roll the original contribution into a qualified plan for purposes of preserving the availability of special averaging and capital gains treatment of distributions from the qualified plan.

Only the taxable amount can be rolled – Generally, only the taxable amount of an IRA may be rolled over to an eligible retirement plan. In other words, nondeductible contributions to an IRA may not be rolled over to an eligible retirement plan. *(Code Sec. 408(d)(3)(H))* In determining the maximum amount that may be rolled over, an IRA aggregation rule applies to avoid tracing problems. **Caution:** See "non-deductible contribution direct rollovers" later in this chapter.

- **Special aggregation rule for determining taxable amount -** An individual may have multiple IRAs and make nondeductible contributions to one or more of them. He does not have to limit a rollover from any of these IRAs to an eligible retirement plan to the actual taxable amount in that particular IRA. That's because, under Code Sec. 408(d)(3)(H)(ii)(II), the part being rolled over is considered to come from amounts in all IRAs other than nondeductible contributions. This is so notwithstanding Code Sec. 408(d)(2)(A), which normally requires basis to be recovered pro rata when amounts are withdrawn from an IRA and the IRA owner has made nondeductible contributions to any IRA. Code Sec. 408(d)(2)(A) achieves the pro-rata recovery rule by treating all IRAs as one IRA in applying the annuity rules of Code Sec. 72 to tax IRA distributions. Code Sec. 408(d)(3)(H)(ii) provides an exception to the usual application of the annuity rules to achieve the result indicated above.

ADVANTAGES OF ROLLOVERS

(1) They postpone the payment of tax until the funds are withdrawn from the new plan;
(2) They provide a taxpayer with the opportunity of being in a lower tax bracket when the funds are withdrawn from the rollover account;
(3) Funds can continue to accumulate in the new plan on a tax-deferred basis.

DISADVANTAGES OF ROLLOVERS

(1) Amounts can't generally be withdrawn prior to age 59-1/2 without penalty;
(2) If the rollover was into an IRA (or a qualified plan that received a post-2001 rollover from an IRA, Sec. 457 or 403(b) plan), withdrawals are ordinary income and don't get any benefit of 10-year averaging.

DIRECT ROLLOVERS - QUALIFIED RETIREMENT PLANS TO ROTH IRAS

Distributions can be rolled over directly into a Roth IRA from:

- Qualified retirement plans,
- Tax-sheltered annuities, and
- Governmental Code Sec. 457 plans.

The rollover, however, is still subject to the usual rules that apply to rollovers from a traditional IRA into a Roth IRA:

- Includible in gross income (except to the extent it represents a return of after-tax contributions), and
- The 10% early distribution tax does not apply

For more information on rollovers (conversions) to Roth IRAs, see Course CPE406 or Chapter 4.06.

DEFINITIONS

"Eligible Rollover Distribution" - Any payout to an employee of all or any portion of the balance to the credit of the employee in a qualified trust. However, it does not include:

(1) Any distribution, which is one of a series of substantially equal periodic payments;
(2) A minimum required distribution;
(3) Returns of excess 401(k) elective deferrals;
(4) The nontaxable portion of the distribution;
(5) Loans treated as distributions, because they didn't meet certain requirements at the time they were made or later (e.g., default) unless a participant's accrued benefits are reduced to repay the loan;
(6) Dividends on employer securities;
(7) Cost of life insurance coverage;
(8) Hardship distributions.

A single sum payment not substantially equal to a periodic payment made before, with or after start of periodic payments is eligible for rollover treatment.

"Eligible Retirement Plans" - Eligible rollover distributions from a qualified retirement plan, IRA, Sec. 403(b) annuity, or Sec. 457 deferred compensation plan may be rolled over to an *eligible retirement plan*, defined as:

- Sec 408(a) Individual Retirement Accounts
- Sec 408(b) Individual Retirement Annuities
- Sec 401(a) Qualified Plans
- Sec 403(b) Qualified Annuities
- Sec 403(b) Tax Sheltered Annuities or
- Sec 457 Governmental plans (deferred compensation plans of state and local governments and tax-exempt organizations).

In other words, an eligible rollover distribution from any type of eligible retirement plan can be rolled into any other eligible retirement plan, provided the new plan agrees to accept the rollover amount.

NON-DEDUCTIBLE CONTRIBUTION DIRECT ROLLOVERS

Generally rollovers only include the taxable amount of a distribution with certain exceptions for:

- Distributions of employer securities with net unrealized appreciation (See below)
- Rollovers that meet the following specific requirements (must provide for separate non-taxable contribution accounting). Thus non–taxable amounts can be rolled over to:
  (1) An IRA (Code Sec. 402(c)(2)(B)), or
  (2) A Code Sec. 401(a) qualified plan (whether or not a defined contribution plan) or a 403(b) annuity contract—
    (a) In a direct trustee-to-trustee transfer,
    (b) That provides, for the amounts rolled over, and the earnings on these amounts, separate accounting for (i) the portion which was includible in income (if not for the rollover exclusion), and (ii) the portion that was not includible in income (determined without regard to the rollover exclusion). Code Sec. 402(c)(2)(A)

After-tax contributions can be rolled over from a qualified retirement plan to:

(1) Another qualified retirement plan (either a defined contribution or a defined benefit plan); or
(2) A tax-sheltered annuity.

The transfer must be made via direct rollover, and the receiving plan must separately account for after-tax contributions and their earnings.

DISBURSEMENTS FROM DESIGNATED ROTH ACCOUNTS TO MULTIPLE QUALIFIED PLANS

The IRS has released the rules, effective January 1, 2016, for disbursements from a "designated Roth account" that is directly rolled over to qualified plans established under section 401(a), section 403(b), or section 457(b). Under these rules, if disbursements are made from a taxpayer's designated Roth account to the taxpayer and also to the taxpayer's Roth IRA or designated Roth account in a direct rollover, **then pretax amounts will be allocated first to the direct rollover, rather than being allocated pro rata to each destination.** Also, a taxpayer will be able to direct the allocation of pretax and after-tax amounts that are included in disbursements from a designated Roth account that are directly rolled over to multiple destinations, applying the same allocation rules to distributions from designated Roth accounts that apply to distributions from other types of accounts as discussed next (T.D. 9769, IRB 2016-23, 6/6/16).

ALLOCATING PRE- AND POST-TAX DISTRIBUTIONS TO MULTIPLE DESTINATIONS

If a distribution on or after January 1, 2015 goes to multiple destinations (for example, part to a direct rollover and part to the employee who makes a rollover within 60 days), after-tax and pre-tax amounts may be assigned to each destination under rules set out in Notice 2014-54, describing proposed amendments to Reg § 1.402A-1. The following summarizes these rules:

Pre-tax Amount Equals or Exceeds Distribution Amount that is directly rolled over to one or more eligible retirement plans: the pre-tax amount is assigned to the portion of the distribution that is directly rolled over, up to the amount of the direct rollover. Thus each direct rollover consists entirely of pretax amounts.

Any Remaining Pre-tax Amount: This amount is assigned to rollovers that aren't direct rollovers (i.e., those done under the 60-day rollover rule), up to the amount of the 60-day rollovers.

Any Additional Remaining Pre-tax Amount, if it is less than the amount rolled over in 60-day rollovers: the recipient can select how the pretax amount is allocated among the plans that receive 60-day rollovers.

Still More Remaining Pre-tax Amount: That amount is includible in the distributee's gross income.

> ***Example – partial direct rollover plus 60-day rollover:*** Clara participates in her employer's qualified plan that does not contain a designated Roth account. Clara's $250,000 account balance consists of $200,000 of pretax amounts and $50,000 of after-tax amounts. She separates from service and is entitled to, and requests, a distribution of $100,000. Under §72(e)(8), the pretax amount with respect to the distribution is $80,000 ($100,000 x $200,000/$250,000). Clara specifies that $70,000 is to be directly rolled over to her new employer's qualified plan and that $30,000 is to be paid to her. Because the pretax amount exceeds the amount directly rolled over, the amount directly rolled over to the new plan consists entirely of pretax amounts. The amount paid to Clara (prior to application of withholding) consists of $10,000 in pretax amounts and $20,000 in after-tax amounts. Prior to the 60th day after the distribution, Clara chooses to roll over $12,000 to an IRA. Because the amount rolled over in the 60-day rollover exceeds the remaining pretax amounts, the amount rolled over to the IRA consists of $10,000 of pretax amounts and $2,000 of after-tax amounts.
>
> ***Example – direct rollovers to traditional and Roth IRAs:*** The facts are the same as in the prior example, except that Clara chooses to make a direct rollover of $80,000 to a traditional IRA and $20,000 to a Roth IRA. She is permitted to allocate the $80,000 that consists entirely of pretax amounts to the traditional IRA so that the $20,000 rolled over to the Roth IRA consists entirely of after-tax amounts.

If the amount rolled over to an eligible retirement plan exceeds the portion of the pre-tax amount assigned or allocated to the plan, the excess is an after-tax amount.

Multiple 1099-Rs - According to Notice 2014-54, if one distribution results in multiple disbursements, each disbursement may be required to be reported on a separate Form 1099-R, in accordance with the instructions to Form 1099-R.

EMPLOYER SECURITIES, NET UNREALIZED APPRECIATION AND ROLLOVERS

When the taxpayer sells or exchanges employer securities received as a distribution from a qualified plan, the "basis" in the stock is the price paid for the stock by the plan. Any increase in stock value prior to distribution is referred to as "net unrealized appreciation" and is not included in the taxable amount of the distribution. If the taxpayer were to take a taxable distribution, the taxpayer would therefore only be taxed on the stock "basis." If the taxpayer then sold the stock, the following would apply:

1. Any gain up to the amount of the "net unrealized appreciation" would be taxed as *long-term* capital gain. *(Reg § 1.402(a)-1(b)(1)(i))*
2. Any part of the gain that is more than the net unrealized appreciation at the time of distribution is a long-term or short-term capital gain, depending on how long the taxpayer held the securities from the date they were distributed to the taxpayer. *(Reg § 1.402(a)-1(b)(1)(i); Notice 98-24 , 1998-17 IRB 5)*

With maximum capital gains rates ranging from 0% to 20%, being taxed currently on the distribution might be a better option than rolling the distribution over to where it would be taxed at ordinary rates when ultimately distributed in a later year. If a taxpayer is under age 59-1/2, the premature distribution penalty will also have to be considered before making a decision.

WITHHOLDING

"Eligible rollover distributions" are subject to a 20% withholding requirement. The requirement can be avoided only if a taxpayer arranges for the distribution to be transferred directly to another retirement plan or IRA.

> ***Example - Withholding on "Eligible Rollover Distributions" -*** *Gray, age 62, retired from ABC Enterprises. His retirement plan at ABC contained $102,000 (pre-tax dollars), which was eligible for rollover. Gray requested that the distribution of the entire amount in the plan be made to him personally; he then intended to roll over the proceeds to an IRA. Because Gray received the retirement plan payout directly, the plan administrator was required to withhold $20,400 ($102,000 x 20%). The net distribution to Gray is $81,600 ($102,000 - $20,400).*
>
> *Gray rolled $81,600 to an IRA within the allotted 60-day period. Six months later, he contacted his tax preparer for tax planning. When he explained the details of the distribution, his tax preparer realized that Gray would owe additional tax on $20,400 ($102,000 - $81,600), because he failed to roll over the entire $102,000. It was too late for Gray to fully fund the rollover IRA by adding $20,400 of other money because the 60-day rollover period had expired.*

AVOIDING WITHHOLDING

Using an IRA to receive a direct transfer of an eligible rollover distribution may help a taxpayer overcome these withholding rules, because IRA distributions are not subject to the 20% withholding requirement.

If a retirement plan recipient elects to have only a portion of an eligible rollover distribution paid directly to another plan, and elects to receive the remainder, the mandatory 20% withholding applies only to the portion not directly transferred. For distributions of less than $200, no withholding is required (aggregate all eligible distributions received within one tax year to determine whether the $200 limit is reached). If the plan administrator doesn't know at the time of the first distribution whether there will be other eligible distributions during the year that would reach the $200 floor, no tax need be withheld on the first distribution.

> ***Example - Partial Trustee-To-Trustee Transfer -*** *Linda, age 60, is to receive a $45,000 cash lump sum distribution. She had contributed $7,000 (post-tax) to the plan. She instructs the plan administrator to transfer $30,000 of the distribution to an IRA and the balance to her.* ***RESULT:*** *The $30,000 IRA deposit is a tax-free rollover. Of the remaining $15,000, $8,000 is taxable as ordinary income and $7,000 is nontaxable recovery of Linda's post-tax contributions to the plan. Linda's employer will withhold 20% ($1,600) of the $8,000 ordinary income amount.*

PARTIAL ROLLOVERS

As indicated above, an employee doesn't have to roll over an entire "eligible rollover distribution." However, the part not rolled is ordinary income and 10-year averaging and/or capital gain treatment, where applicable, can't be used. In addition, net unrealized appreciation in employer securities attributable to nondeductible employee contributions is immediately taxable. If the employee is under age 59-1/2, the portion of the distribution not rolled over generally will be subject to the 10% early distribution penalty.

ROLLOVERS AFTER AGE 70-1/2

Rollovers can be made even after the year a taxpayer reaches age 70-1/2. However, the requirements for IRA "minimum distributions" after age 70-1/2 continue to apply. Amounts required to be distributed at age 70-1/2 cannot be rolled over (TRA '86).

ROLLOVER OF NONCASH DISTRIBUTION

Distributions of property other than cash present special tax problems, but they do qualify for rollover treatment as long as the property is not prohibited by the IRA rules (e.g., investment in certain "collectibles" is prohibited for IRA purposes). The actual noncash property distributed must be rolled over in order to qualify for tax-free treatment. However, the recipient is allowed to sell the property and roll the proceeds. Employees who get a property distribution can't keep the property and roll over its cash equivalent.

Gains and losses on a sale of the distributed property are not recognized if all the proceeds are rolled over. Any increase in the FMV between the time of distribution and the time of rollover is treated as part of the distribution (assuming rollover of the entire distribution). *Code Sec. 402(c)(6)(D)*

> ***Example - Retention of Property in a Rollover -*** *Claire received a payout from her employer's profit-sharing plan. The distribution consisted of $12,000 in cash and $14,000 of other property. Within the sixty-day window, Claire contributed $26,000 in cash to an IRA and kept the property she had received as part of the distribution. Under these circumstances, only $12,000 of Claire's IRA contribution qualifies as a tax-free rollover.*

> ***Example - Sale of Property Before Rollover -*** *Jim received a lump sum distribution of $105,000 ($40,000 was stock and the remaining $65,000 was cash). Within sixty days, Jim sold the stock for $50,000. The maximum Jim may roll over is $115,000 ($65,000 cash plus $50,000 stock proceeds).*

> ***Example - Sale of Distributed Property at a Loss -*** *Assume the same facts as in the previous example, except Jim sold the stock for $25,000. In this case, his maximum rollover is $90,000 ($65,000 cash plus $25,000 stock proceeds). He recognizes no gain or loss on the sale to the extent he rolls over the entire distribution. Neither will he recognize any taxable income from the lump sum distribution. The instructions for the 1040 provide no special instructions for reporting such a non-taxable rollover. Presumably, the entire distribution (in this case $105,000) would be reported as rolled over.*

> ***Example – Sale of Distributed Property at a Loss with Partial Rollover*** *– Maria received an eligible rollover distribution from her employer's noncontributory qualified employee plan of $80,000 in non-employer stock on October 1. Within the same year she sold the stock on November 1 for $70,000 and on November 10, she rolled over $55,000 of the $70,000 sale proceeds. The $15,000 she didn't roll over includes part of the loss from the stock sale. She reports a capital loss of $2,143 ($10,000/$70,000 x $15,000) and ordinary income of $17,143 ($80,000/$70,000 x $15,000)*

THE 60-DAY ROLLOVER PERIOD

In general, the 60-day period for making rollover contributions is not extended for any reason. The period begins to run on the date the check is received, not the date on the check. Certain distributions that become "frozen deposits" during the 60-day rollover period do get a special extension of the 60-day time frame. The time the amount is a frozen deposit doesn't count as part of the 60-day period. After the funds are "unfrozen," the period begins to run again, but it doesn't end until at least 10 days after funds are released. A "frozen deposit" is any deposit which can't be withdrawn because of: (1) bankruptcy or insolvency of a financial institution, or (2) any state requirement imposed because of a financial institution's bankruptcy.

60 Day Deadline Doesn't Apply to Direct Rollover via Check – IRS has ruled that the 60-day deadline on retirement plan rollovers doesn't apply to direct rollovers made by way of a properly drawn check. In this instance the distribution check was given to the taxpayer, but made out to the new employer "for benefit of" the taxpayer; thus the check was not payable to the taxpayer – in effect the taxpayer never received a distribution that was subject to the 60 day rule. The fact that the taxpayer held onto the check drawn by the transferor plan for more than 60 days didn't convert the rollover into a taxable transfer. **PLR 201005057**

120-Day Rollover Period – If funds are withdrawn to purchase a home and the buyer(s) qualifies as a first time homebuyer(s) and the purchase cannot be completed within the 120-day time period, the taxpayer may re-contribute the funds to the IRA account as long as 120 days have not passed since the withdrawal. In other words for first time homebuyers the 60-day rollover period is replaced with 120 days. For this purpose a first-time homebuyer is one who had no present interest in a main home during the 2-year period ending on the date of acquisition of the home, which the distribution is being used to buy, build or rebuild. If married, the spouse also must meet the no-ownership requirement.

Extension of 60-Day Period Due to Certain Disasters – The IRS will postpone certain retirement plan and IRA deadlines, including the 60-day rollover period, for taxpayers affected by a presidentially declared disaster. (Rev Proc 2007-56)

WAIVER OF 60-DAY ROLLOVER RULE

Rev Proc 2003-16, 2003-4 IRB - In this revenue procedure, IRS says it will automatically waive the 60-day rule for qualified plan and IRA rollovers if financial institution error caused the rollover to be untimely and several other conditions are met. Otherwise, taxpayers must apply for a private letter ruling to obtain a hardship waiver (but see "Self-Certifying," below).

Criteria for automatic waiver - The 60-day rule is waived automatically if a financial institution's error caused the rollover to be untimely. The automatic waiver is granted only if ALL of the following apply:

- The financial institution received the funds on behalf of the taxpayer before the 60-day rollover period expires;
- The taxpayer followed all of the financial institution's procedures for depositing the funds into an eligible retirement plan within the 60-day period (including giving instructions to deposit the funds into an eligible retirement plan);
- Solely due to the financial institution's error, the funds are not deposited into an eligible retirement plan within the 60-day rollover period;
- There *would* have been a valid rollover, if the financial institution had deposited the funds as instructed; and
- The funds are actually deposited into an eligible retirement plan within one year from the beginning of the 60-day rollover period. (Rev Proc 2003-16, Sec. 3.03)

Criteria for waiver based on facts and circumstances - If the taxpayer does not meet the criteria for automatic waiver, but still believes that he or she meets the requirements due to the facts and circumstances of his or her situation, the taxpayer can apply for a hardship exception to the 60-day rollover requirement using the procedures outlined in Rev. Proc.2018-4 for letter rulings, accompanied by the required user fee.

Private letter ruling process for obtaining waiver of the 60-day rule - Taxpayers who don't qualify for an automatic waiver of the 60-day rule may be able to obtain a waiver by applying for a private letter ruling. See Rev. Procs. 2003-16 and 2019-4, Appendix D, where the sample letter ruling request in Appendix A can be followed. There is an IRS user fee for this type of private letter ruling.

Effective February 1, 2016, the fee is **$10,000**. (Rev Proc 2016-8 Sec. 6.01(4)) Previously the fee ranged between $500 and $3,000 depending upon the amount of the rollover.

Affected plans - The 60-day waiver rules apply to distributions from an IRA, individual retirement annuity, a qualified plan under Code Sec. 401(a), a Code Sec. 403(b) tax-sheltered annuity, and a Code Sec. 457 eligible governmental plan. (Rev Proc 2016-8)

SELF-CERTIFYING LATE 60-DAY ROLLOVER

A recipient of a retirement plan or IRA distribution who inadvertently misses the 60-day time limit for properly rolling the amount into another retirement plan or IRA now may make a written certification to a plan administrator or an IRA trustee that a contribution satisfies the conditions listed below, and therefore, will be eligible for a waiver of the 60-day rule. Taxpayers may make the certification by using the model IRS letter illustrated below on a word-for-word basis or by using a letter that is substantially similar in all material respects. A copy of the certification should be kept in the taxpayer's files and be available if requested on audit. (Rev. Proc. 2016-47) Use of the self-certification method by eligible taxpayers will generally eliminate the need for the expensive private letter ruling discussed above to request a waiver.

Conditions for self-certification - No prior denial by the IRS - The IRS must not have previously denied a waiver request with respect to a rollover of all or part of the distribution to which the contribution relates.

Reason for missing 60-day deadline - The taxpayer must have missed the 60-day deadline because of the taxpayer's inability to complete a rollover due to one or more of the following reasons:

(a) an error was committed by the financial institution receiving the contribution or making the distribution to which the contribution relates;
(b) the distribution, having been made in the form of a check, was misplaced and never cashed;
(c) the distribution was deposited into and remained in an account that the taxpayer mistakenly thought was an eligible retirement plan;
(d) the taxpayer's principal residence was severely damaged;
(e) a member of the taxpayer's family died;
(f) the taxpayer or a member of the taxpayer's family was seriously ill;
(g) the taxpayer was incarcerated;
(h) restrictions were imposed by a foreign country;
(i) a postal error occurred;
(j) the distribution was made on account of a levy under § 6331 and the proceeds of the levy have been returned to the taxpayer; or
(k) the party making the distribution to which the rollover relates delayed providing information that the receiving plan or IRA required to complete the rollover despite the taxpayer's reasonable efforts to obtain the information.

Up to 30 days allowed to make the contribution – The contribution must be made to the plan or IRA as soon as practicable after the reason or reasons listed above no longer prevent the taxpayer from making the contribution. This requirement is deemed to be satisfied if the contribution is made within 30 days after the reason or reasons no longer prevent the taxpayer from making the contribution.

Effective date – This revenue procedure is effective August 24, 2016

Certification for Late Rollover Contribution

[Name]
[Address]
[City, State, ZIP Code]
[Date]

[Plan Administrator/Financial Institution]
[Address]
[City, State, ZIP Code]

Dear Sir or Madam:

Pursuant to Internal Revenue Service Revenue Procedure 2016-47, I certify that my contribution of $ [*ENTER AMOUNT*] missed the 60-day rollover deadline for the reason(s) listed below under Reasons for Late Contribution. I am making this contribution as soon as practicable after the reason or reasons listed below no longer prevent me from making the contribution. I understand that this certification concerns only the 60-day requirement for a rollover and that, to complete the rollover, I must comply with all other tax law requirements for a valid rollover and with your rollover procedures.

Pursuant to Revenue Procedure 2016-47, unless you have actual knowledge to the contrary, you may rely on this certification to show that I have satisfied the conditions for a waiver of the 60-day rollover requirement for the amount identified above. You may not rely on this certification in determining whether the contribution satisfies other requirements for a valid rollover.

Reasons for Late Contribution

I intended to make the rollover within 60 days after receiving the distribution but was unable to do so for the following reason(s) (check all that apply):

___ An error was committed by the financial institution making the distribution or receiving the contribution.

___ The distribution was in the form of a check and the check was misplaced and never cashed.

___ The distribution was deposited into and remained in an account that I mistakenly thought was a retirement plan or IRA.

___ My principal residence was severely damaged.

___ One of my family members died.

___ I or one of my family members was seriously ill.

___ I was incarcerated.

___ Restrictions were imposed by a foreign country.

___ A postal error occurred

___ The distribution was made on account of an IRS levy and the proceeds of the levy have been returned to me.

___ The party making the distribution delayed providing information that the receiving plan or IRA required to complete the rollover despite my reasonable efforts to obtain the information.

Signature

I declare that the representations made in this document are true and that the IRS has not previously denied a request for a waiver of the 60-day rollover requirement with respect to a rollover of all or part of the distribution to which this contribution relates. I understand that in the event I am audited and the IRS does not grant a waiver for this contribution, I may be subject to income and excise taxes, interest, and penalties. If the contribution is made to an IRA, I understand you will be required to report the contribution to the IRS. I also understand that I should retain a copy of this signed certification with my tax records.

Signature: ______________________________

DISTRIBUTIONS PAID IN INSTALLMENTS

Letter Ruling 7802035 states that where a distribution from an employer's qualified pension plan is received in more than one installment, each installment may be rolled over within 60 days after receipt, as long as the total distribution is received within the same taxable year, and as long as the final installment is rolled over on or before the sixtieth day after the day on which it is received.

ELECTING OR REVOKING A ROLLOVER

A taxpayer's election to roll over a distribution (total or partial) to another plan is irrevocable. The election must be made in writing to the new plan trustee, stating that the contribution is a rollover contribution. *(Temp. Reg. l.402 (a)(5)-1T*

IRA-TO-IRA ROLLOVER WAITING PERIOD

The IRS in Announcement 2014-15 has cautioned that the Service will adopt the Tax Court position in *Bobrow v. Commissioner (TC Memo 2014-21)* that the once-per-year IRA rollover limitation applies on an aggregate basis, meaning that an individual could not make an IRA-to-IRA rollover if he or she had made such a rollover involving any of the individual's IRAs in the preceding 1-year period. The one year period is measured based on the date a distribution is received. If the second distribution is received before the same date one year later, it occurs within the period barred by the one-year limit (IRC Sec. 408(d)(3)(B)).

> ***Example –*** *Jack takes a distribution from his IRA on June 30 of year one and subsequently rolls over the distribution within the 60-day rollover period. Jack must wait until June 30 of year two before another distribution is eligible for a rollover. Any additional distributions taken during the one-year waiting period would be taxable.*

This is contrary to IRS Proposed Regulation § 1.408-4(b)(4)(ii) and pre-January 2015 editions of IRS Publication 590, Individual Retirement Arrangements (IRAs), which provided that this limitation is was applied on an IRA-by-IRA basis. Consequently, the IRS has withdrawn paragraph (b)(4)(ii) of §1.408-4 of the proposed regulation and revised Publication 590 (now Pub 590-A) to the extent needed to follow the *Bobrow* interpretation.

These actions by the IRS will not affect the ability of an IRA owner to transfer funds from one IRA trustee directly to another, because such a transfer is not a rollover and, therefore, is not subject to the one-rollover-per-year limitation of § 408(d)(3)(B). See Rev. Rul. 78-406, 1978-2 C.B. 157.

Transitional Relief **–** The IRS will not apply the *Bobrow* interpretation of § 408(d)(3)(B) to any rollover that involves an IRA distribution occurring before January 1, 2015.

Roth IRAs - A rollover from a traditional IRA to a Roth IRA (a "conversion") is not subject to the one-rollover-per-year limitation, and such a rollover is disregarded in applying the one-rollover-per-year limitation to other rollovers. **However, a rollover between an individual's Roth IRAs would preclude a separate rollover within the 1-year period between the individual's traditional IRAs, and vice versa.**

SEPs & SIMPLES - In Announcement 2014-32 the IRS clarified that the once per 12-month period rollover limitation also applies to SEPs and SIMPLE plans, but not qualified plans.

Rollovers Initiated in 2014 - The announcement also clarified that a distribution taken in 2014 and rolled over in 2015 (within the 60-day limit) will not count towards the rollover limit in 2015.

Employee Plans - The once-a-year limit on IRA-to-IRA rollovers does not apply to eligible rollover distributions from an employer plan.

ROLLOVER CHART

Roll From \ Roll To	Roth IRA	IRA (traditional)	SIMPLE IRA	SEP-IRA	457(b) (government)	Qualified Plan [1] (pre-tax)	403(b) (pre-tax)	Designated Roth Account (401(k), 403(b) or 457(b)[2])
Roth IRA	YES	NO	NO	NO	NO	NO	NO	NO
IRA (traditional)	YES[3]	YES	NO	YES	YES[4]	YES	YES	NO
SIMPLE IRA	YES,[3] after two years	YES, after two years	YES	YES, after two years	YES,[4] after two years	YES, after two years	YES, after two years	NO
SEP-IRA	YES[3]	YES	NO	YES	YES[4]	YES	YES	NO
457(b) (government)	YES[3]	YES	NO	YES	YES	YES	YES	YES,[3,5] after 12/31/10
Qualified Plan[1] (pre-tax)	YES[3]	YES	NO	YES	YES[4]	YES	YES	YES,[3,5] after 9/27/10
403(b) (pre-tax)	YES[3]	YES	NO	YES	YES[4]	YES	YES	YES,[3,5] after 9/27/10
Designated Roth Account (401(k), 403(b) or 457(b)[2])	YES	NO	NO	NO	NO	NO	NO	Yes, if a direct trustee to trustee transfer

[1]Qualified plans include, for example, profit-sharing, 401(k), money purchase, and defined benefit plans
[2]Governmental 457(b) plans, after December 31, 2010
[3]Must include in income
[4]Must have separate accounts
[5]Must be an in-plan rollover
For more information regarding retirement plans and rollovers, visit Tax Information for Retirement Plans Community.

CALIFORNIA DIFFERENCES

In addition to the general rollover rules, California does conform to the following changes made in recent years: allowing rollover of qualified plan distributions to a non-spouse beneficiary; rollover of after-tax amounts from one qualified plan to another qualified plan or tax-sheltered annuity; and direct rollover from a qualified plan to a Roth.

NOTES

TRADITIONAL IRAs

Overview

Age Contribution Limit: 70-1/2
Annual Contribution Limits 2019: $6,000 ($7,000 age 50+)
Income Limits: Limited to 100% of compensation
Timing: Contribution by the return due date (without extensions)
Types: Deductible and Nondeductible
AGI Based Deduction Phase-Out - Active Participants in an Employer Plan **(2019):**

- Unmarried: 64 to 74,000
- Joint: 103 to 123,000
- MS: 0 to 10,000
- Spousal IRA: 193,000 to 203,000

Inflation Adjusted: Future Years

Pubs Forms

Related IRC and IRS Publications and Forms

- **Form 5329** – Additional Taxes on Qualified Plans
- **Form 8606** – Nondeductible IRAs
- **Form 8888 –** Direct Deposit of Refund
- **Form 990-T** – Unrelated Business Income
- **Pub 590-A –** Contributions to IRAs
- **Pub 590-B** – Distributions from IRAs
- **IRC Sections 219, 408, 511**

The Details

Nearly everyone under 70-1/2 years of age who receives compensation, either as an employee or as a self-employed individual, can contribute annually the smaller of the annual contribution limit or 100% of "compensation" to a Traditional IRA. The contributed amount may or may not be deductible, depending on the taxpayer's income level and participation in other retirement plans or if so elected by the taxpayer.

RAPID FINDER

IRA CONTRIBUTION LIMITS

YEAR	UNDER AGE 50	AGE 50 AND OVER
Through 2001	2,000	2,000
2002 through 2004	3,000	3,500
2005	4,000	4,500
2006 through 2007	4,000	5,000
2008 – 2012	5,000	6,000
2013 – 2018	5,500	6,500
2019	6,000	7,000
2020	6,000	7,000

Future years: inflation-adjusted in $500 increments; catch-up contribution fixed at $1,000

DEFINITION OF "COMPENSATION" FOR IRA PURPOSES

In order to have an IRA, an individual must receive "compensation." Compensation includes:

- Wages, Tips, Bonuses, Professional fees, Commissions,
- Alimony received (only if taxable),
- Net income from self-employment (reduced by the sole proprietor's own contribution to a Keogh and the above-the-line deduction allowed for part of self-employment tax). **NOTE:** Do not net self-employment losses against wages to determine total compensation, and
- Non-taxable combat pay.

Compensation does not include rents, interest, dividends, nontaxable alimony, pensions, deferred compensation or disability payments.

NO CONTRIBUTIONS AFTER AGE 70-1/2

Contributions cannot be made to a Traditional IRA for the year in which the taxpayer reaches age 70-1/2 or for any later year. Age 70-1/2 is attained on the date that is 6 calendar months after the 70th anniversary of the taxpayer's birth. Thus, individuals born on or before June 30, 949 turn 70-1/2 on or before December 30, 2019 and cannot contribute for 2019 or any later year. However, a 2018 contribution made in 2019 no later than the April due date for the 2018 return, would have been allowed.

PHASE OUT OF IRA DEDUCTIONS FOR ACTIVE PARTICIPANTS

A. Active participants in qualified plans must limit their IRA deductions when their AGI reaches certain "threshold levels."

B. If AGI is below the "threshold," even an active participant may deduct an IRA contribution within the IRA limits described above. The phase-out threshold levels for active participants are shown in the accompanying table: ***(Note: All values are in thousands.)***

Filing Status	2016	2017	2018	2019	2020
Single, HH	61	62	63	64	65
Joint, SS	98	99	101	103	104
Married Separate	0	0	0	0	0
Delta - Single	10	10	10	10	10
Delta - Married	20	20	20	20	20

C. If a taxpayer's AGI exceeds the above thresholds by less than the "Delta Amount", the IRA deduction will be limited; if it exceeds the thresholds by the "Delta Amount" or more, no IRA deduction is allowed.

D. Use the following formula to compute the phase out:

$$\textit{Deduction limit} = \frac{\textbf{(Delta Amount - AGI amount over threshold)}}{\textbf{Delta Amount}} \times \textit{Maximum Deduction}$$

The result is rounded to the next higher $10. If the deduction limit turns out to be $1-$200, the deductible contribution can be as much as $200.

WHAT IS ACTIVE PARTICIPATION IN ANOTHER PLAN?

An individual is an **"active participant"** for a taxable year if either the individual or his/her spouse (with whom the individual files a joint return) participates in any of the following:

Plans That Create "Active Participation":

- A qualified annuity plan;
- A tax-sheltered annuity;
- A simplified employee pension (SEP);
- An employer-sponsored qualified pension, profit-sharing or stock bonus plan;
- A plan established by a governmental agency for its employees, other than an unfunded deferred compensation plan for employees of state and local governments or exempt organizations (§ 457 plan);
- An employee-only contributory plan exempt from tax under *§ 501(c)(18).*

Special rules allow certain members of the Armed Forces reserves and certain volunteer firefighters not to be treated as active participants. *(§ 219(g)(6))*

Special Situations

A. Determination of active participation is made without regard to whether an individual's rights under a retirement plan are vested. ***Notice 87-16, IRB 1987-5*** states that retired taxpayers who are receiving pension benefits ARE NOT active participants in the paying plan.

B. An individual is an active participant in a ***defined benefit plan*** if the individual is eligible to participate, even if he/she elects not to participate. For a ***defined contribution plan***, an individual generally is an active participant if employer or employee contributions or forfeitures are allocated to the employee's account for a plan year ending within the individual's tax year.

C. ***Special rule for a nonactive participant spouse -*** The maximum deductible IRA contribution for an individual who is not an active participant but whose spouse is an active participant, is phased out for the non-active participant based upon their combined AGI. See the AGI phase-out limits in the table to the right.

Year	Phase-out Range
2014	181,000 – 191,000
2015	183,000 - 193,000
2016	184,000 – 194,000
2017	186,000 – 196,000
2018	189,000 – 199,000
2019	193,000 – 203,000
2020	196,000 – 206,000

Example - Phase Out for Joint Taxpayers - *Sandra actively participates in a retirement plan at work, but her husband, Tim, is not involved in any plan. The couple has a combined AGI of $205,000 for 2019.*

Result: Sandra: *No Traditional IRA deduction due to her active participation in another plan and AGI is over $123,000.* ***Tim:*** *No Traditional IRA deduction because combined AGI is over $203,000.*

Assume that the couple's combined AGI was only $125,000.
Result: Sandra: *No Traditional IRA deduction due to her active participation in another plan and AGI is over $123,000.* ***Tim:*** *No active participation & AGI under $193,000; thus he would be allowed a deductible Traditional IRA.*

IRA PHASE OUT MODIFIED AGI

To compute the IRA phase out, AGI is calculated without regard to the IRA deduction, exclusion for savings bond proceeds, adoption expenses reimbursement exclusion, student loan interest deduction, qualified higher education expenses deduction (in years the deduction is applicable), domestic production activities deduction, foreign earned income and/or housing exclusion, or foreign housing deduction, but with regard to taxable social security benefits and the passive loss limitations. This is called modified AGI (MAGI). However, computation of taxable social security is dependent on the IRA deduction, presenting a calculation dilemma. IRS *Announcement 88-38, 1988-10 IRB* provided guidelines for calculating the IRA limitations when a taxpayer has social security income. Tax software uses these guidelines to compute the allowable IRA deduction and taxable Social Security income.

(3)

2019 TRADITION IRA DEDUCTION DETERMINATION TABLE								
Modified AGI Phase-Out Amount	ALLOWABLE TAXPAYER DEDUCTION							
	TP Covered By Retirement Plan			TP **NOT** Covered By a Retirement Plan				
	S/HH	J/SS	MS(2)	J-SP Covered	J-SP Not Covered	S/HH	SS	MS(3)
0-9,999	Full	Full	Part	Full	Full	Full	Full	Part
10,000-63,999	Full	Full	None	Full	Full	Full	Full	None
64,000-73,999	Part	Full	None	Full	Full	Full	Full	None
74,000-102,999	None	Full	None	Full	Full	Full	Full	None
103,000-122,999	None	Part	None	Full	Full	Full	Full	None
123,000-192,999	None	None	None	Full	Full	Full	Full	None
193,000-202,999	None	None	None	Part	Full	Full	Full	None

(1) Modified AGI is regular AGI (before any IRA deductions) increased by any excluded savings bond interest, foreign earned income or housing exclusions, foreign housing deduction, student loan interest deductions, adoption expenses reimbursement exclusion, qualified higher education expenses deduction (in years applicable), and domestic production activities deduction (in years applicable).

(2) If a taxpayer did not live with his/her spouse at any time during the year, filing status for this purpose is considered Single. Determine the IRA deduction from the Single column.

(3) A taxpayer is entitled to the full deduction if he/she did not live with his/her spouse at any time during the year.

NONDEDUCTIBLE TRADITIONAL IRA CONTRIBUTIONS

Individuals may make nondeductible IRA contributions if they:

- Are ineligible for IRA deductions due to active participation and income limits, or
- Elect to treat otherwise deductible contributions as nondeductible.

Election to treat as nondeductible - Calculation/designation of nondeductible IRA contributions is made on *Form **8606*** on the original return. However, it can also be done on an amended tax return filed within the statute of limitations for the year of the original return *(Notice 87-16, 1987-1 CB446).* There is a $100 penalty for overstating the amount of nondeductible contributions and a $50 penalty for not filing Form 8606 when required. The penalties can be waived with reasonable cause.

Taxpayers who make nondeductible contributions to their Traditional IRAs are creating a basis in the IRA, and when they take IRA distributions in the future, a prorated amount of the distribution will be nontaxable. Copies of the Forms 8606 that were filed will substantiate the amount of the basis. Therefore, clients who make nondeductible IRA contributions should be advised to keep copies of the 8606s indefinitely.

> ***Example - Nondeductible IRA Contribution -*** *In 2019, Harry is single and participates in an employer pension plan; he contributes $6,000 to an IRA. His AGI, before an IRA deduction, was $75,000. Since Harry's AGI was over $74,000, he can't deduct any part of the Traditional IRA contribution, but he may designate the contribution as a nondeductible contribution. (In this situation, Harry should consider making a Roth IRA contribution instead of contributing to the traditional IRA.)*

SPOUSAL IRAs

Spousal IRAs are available for married taxpayers who file jointly. Where one spouse has no compensation, the deduction is limited to the smaller of 100% of the employed spouse's compensation or the combined annual limits.

A married couple with unequal compensation that files a joint return is limited on the deductible contributions to the IRA of the spouse with less compensation. The limit is the smaller of:

1. The annual contribution limit, or
2. The total compensation of both spouses, reduced by any deduction allowed for contributions to IRAs of the spouse with more compensation.

Contributions to spousal IRAs do not need to be divided equally between spouses, but neither spouse may make a contribution of more than the annual limit.

The deduction for contributions to both spouses' IRAs may be further limited if either spouse is covered by an employer's retirement plan.

> ***EXAMPLE - Spousal IRA Deduction -*** *Bill and Bonnie, both under age 50, file a joint return in 2019. Bill has $60,000 in wages, and Bonnie earned $225. Neither spouse participates in another retirement plan. The couple can deduct $12,000 in IRA contributions.*
>
> *Assume instead that Bill and Bonnie have an AGI of $113,000 ($10,000 above the phase-out threshold), all from Bill's wages, and Bill is an active participant in an employer plan. His deductible IRA contribution for 2019 is $3,000 (($20,000 - $10,000)/$20,000) x $6,000). Bonnie's spousal IRA deduction limit for 2019 is $6,000 -- she is not an active participant, and the couple's combined AGI is below the $193,000 threshold, thus allowing her a full deduction.*

TIME FOR MAKING CONTRIBUTIONS

A Traditional IRA contribution must be made by the due date (without extensions) of the tax return for the year of the deduction. The contribution can be made after a return is filed, but only if the contribution is made by the return due date.

A return can be amended to deduct an IRA contribution. The amended return does not have to be filed before the original return unextended due date, but the IRA contribution must have been made on or before that due date. IRA contributions mailed to a bank and postmarked no later than the tax return's original due date are considered timely contributions. *(LR 8536085)*

IRA REFUND DEPOSITS

Taxpayers who use direct deposit for their federal refunds can divide their refunds and make deposits into a maximum of three financial accounts including IRA accounts (Traditional, Roth and SEPs, but not SIMPLEs).

The split-refund program allows taxpayers to conveniently designate – at the time they file – and deposit their refunds with any U.S. financial institution as long as they provide valid routing and account numbers.

Taxpayers having their refunds deposited to two or three accounts must attach a Form 8888 to their returns indicating amount for each account and providing account information.

CAUTION - Special Rules for Refund Direct Deposits to IRA Accounts – Direct depositing a federal tax refund to an IRA requires a taxpayer to adhere to a special set of rules:

- *Pre-established Account* - A taxpayer must first establish an IRA account with a bank or other financial institution before a direct deposit can be directed to the account. Of course, the taxpayer must be qualified to make an IRA contribution for the particular year – for example, the taxpayer must have earned income, be younger than 70-1/2 years old for non-Roth IRAs, etc.

- *Trustee Notification* – IRA contributions can be designated for (1) the prior year, (2) the current year, and (3) a combination of years. Thus, a taxpayer must notify the trustee in advance how to allocate the direct deposit funds. If not notified, the trustee can assume the deposit is for the year during which the deposit is made. For example, the 2018 refund credited during 2019 would be assumed to be for 2019. There is lots of room for error and taxpayers must be very careful to make the correct allocation before the deposit is received by the financial institution.

- *Prior Year IRA Contributions* – Contribution for the prior year can only be made up to the un-extended deadline for filing the return for that prior year. If the deposit isn't made by that date, the law precludes the trustee from allocating the deposit to the prior year. This creates a potential hazard for taxpayers filing late in the season and the direct deposit is not made before the due date. The law puts the responsibility for the timely deposit directly on the taxpayer.

PENALTY FOR EXCESS CONTRIBUTIONS

Any contribution to an IRA (either deductible or nondeductible, but not including rollovers) that is more than allowed for the year is an excess contribution and subject to a ***6% penalty***.

<u>Post-70-1/2 Contributions</u> - Contributions made for the year a taxpayer turns age 70-1/2 (and later years) are considered excess contributions. The penalty is calculated on the excess contributed and on any interest it may have earned. The penalty can't be more than 6% of the value of the account and continues to apply each year the excess is allowed to remain in the account. Use ***Form 5329*** to calculate the penalty.

<u>Withdrawing an excess contribution before the return due date</u> **-** If the excess, including interest (or other earnings), is withdrawn by the extended due date of the return and no deduction was taken for the excess:

- No penalty is assessed on the excess or the interest.
- Include the interest on the excess in income in the year of excess contribution (or a taxpayer may return the interest or other earnings paid on the account).
- 10% premature distribution penalty may be charged on interest or other earnings, only if taxpayer is under 59-1/2 *(2018 IRS Publication 590-A, page 35).*

<u>Withdrawing excess contributions after the return due date</u> - If total contributions for the year were not more than the annual contribution limit amount (including excess contributions) AND the taxpayer did not claim any deduction for the excess, a taxpayer may withdraw the excess after the extended due date of the return, without having to include the withdrawal in income. A taxpayer who timely filed their return for the year the excess contribution was made, but who didn't withdraw the excess before filing the return, may make a withdrawal of the excess within 6 months of the original due date of the return and then file an amended return to (1) exclude the deductions for the excess contribution and (2) include the earnings on the excess. On the top of the amended return, write "Filed pursuant to section 301.9100-2" *(2018 IRS Publication 590-A, page 35).*

Excess cannot be applied to an earlier year - A taxpayer cannot avoid an excess contribution penalty by applying the excess against an earlier year in which he/she claimed less than the maximum amount allowable.

Excess applied to later year - The excess amount can be applied to a later year's contribution. While this allows the taxpayer to avoid a withdrawal from the IRA account, it does not avoid the 6% penalty on excess contributions that might remain in the taxpayer's account at the end of the year.

> ***Example - Excess IRA Contribution -*** *Jan's* 2018 *compensation was $1,000, and her* 2018 *compensation was $15,000. She made a $1,400 IRA contribution in '18 ($400 more than the amount she was allowed) and wants to make a $1,500 contribution for '19. The extra $400 Jan put into the 2018 IRA is subject to the 6% excess contribution penalty. However, she would not have to pay that penalty if the excess (including earnings) was withdrawn before the extended due date of her '18 return. Jan can correct the excess contribution problem by withdrawing the $400. However, she could also make the correction by leaving the $400 in the account to apply to her 2019 IRA contribution. If she does the latter, she will make a cash deposit of $1,100 for her 2019 contribution. Her '19 IRA deduction will be $1,500 ($400 applied from '18 and $1,100 in cash).*

Excess contributions due to erroneous rollover information - If a taxpayer received incorrect information from a pension plan administrator and, as a result, rolls over an erroneous amount to an IRA, the taxpayer is allowed to withdraw the excess contribution. No amended return is necessary to show the change; the corrective withdrawal does not need to be included in the taxpayer's income.

<u>CONTRIBUTIONS COUNT FOR SAVER'S CREDIT</u>

Contributions to Traditional IRAs, whether deductible or nondeductible, are eligible contributions for the Retirement Savings Contribution Credit (also called Saver's Credit) available to certain lower-income taxpayers. See Chapter 9.07 for more information on this nonrefundable credit.

<u>IRA DISTRIBUTIONS</u>

Generally, payments from Traditional IRA accounts are currently taxable under the annuity rules of IRC Sec. 72 and must be included as ordinary income in the year received. Neither special averaging nor capital gain treatment is available for the distributions. The annuity rules require the following for IRA distributions when both deductible and nondeductible contributions have been made to the IRA:

Note: *IRS Pub 590-B says to compute RMD for each IRA separately (which makes sense because there could be different beneficiaries that would cause different life expectancy tables to be used – for example if beneficiary spouse's age was +10 years different than IRA owner's age and a non-spouse was beneficiary of another IRA). The "one contract" and "treat all distributions as one" only applies when figuring the taxable and nontaxable portions of a distribution – Sec 408(d)(2).*

- All IRAs are treated as one contract;
- All distributions in a tax year are treated as one distribution; and
- Value of the contract, income on the contract, and investment in the contract are computed as of the close of the calendar year in which the tax year begins.
- The value of the contract must be increased by the amount of any distributions that occurred during the calendar year.

No Nondeductible Contributions - Where a taxpayer has made no nondeductible contributions to the IRA, there is no investment in the contract. 100% of the distribution is taxable. Alternatively, where both deductible and nondeductible contributions have been made, a portion of the distribution is nontaxable (see "Effect of Nondeductible Contributions" below).

Distributions After Death - Distributions after the IRA owner's death to beneficiaries are taxable to the beneficiaries as income in respect of a decedent (IRD). Nondeductible contributions made by the decedent are taken into account in determining taxability (just as they would have been for the decedent). A beneficiary who is taxed on IRA IRD is allowed a Tier 1 itemized deduction for estate tax attributable to the IRD.

Tax-Free IRA Distributions - The following IRA distributions are 100% tax-free:

- Trustee-to-trustee transfers from one Traditional IRA to another;
- Distribution that is rolled over to another Traditional IRA within 60 days of receiving the distribution (see Chapter 4.04, Rollovers, regarding the one IRA rollover each 12 months limitation);
- Transfer of the account to a spouse or former spouse under a divorce decree;
- Contributions withdrawn by the extended due date of the year to which they apply (provided no deduction is taken for the contribution, and the distribution includes the income earned on the contribution). The income earned on the contribution is, however, taxable and a premature withdrawal penalty may apply.

Acquiring Certain Collectibles - Acquiring certain collectibles in a Traditional IRA is treated as a distribution equal to the cost of the collectible. Collectibles to be avoided are works of art, rugs, antiques, metals or gems, stamps or coins, alcoholic beverages, etc. Certain gold coins are not considered collectibles.

Delayed Check Cashing **–** Rev Rul 2019-19 concludes that an individual's failure to cash a qualified plan or IRA distribution plan distribution check does not permit the individual to exclude the amount of the designated distribution from gross income and does not alter the employer's withholding obligations or Form 1099-R reporting obligations, Thus the distribution is taxable in the year of the distribution. This rule applies if the individual *could* have cashed the check and would apply whether or not the individual keeps the check, sends it back, destroys it, or cashes it in a later tax year.

EFFECT OF NONDEDUCTIBLE CONTRIBUTIONS

Amounts withdrawn from Traditional IRAs containing both deductible and nondeductible contributions are includible in income using the same rules applicable for many pension plans. The nondeductible contributions are considered investment in the contract (i.e., basis). Pub 590-B includes a worksheet to determine the taxable portion of an IRA distribution, where nondeductible contributions have been made to the plan.

DEDUCTING IRA LOSSES

When a Traditional IRA has been **totally** distributed and amounts received are less than the individual's unrecovered basis in the account, a loss is recognized.

The IRA loss recognition rule applies separately to each kind of IRA, and a similar rule applies to Roth IRAs. Thus, to recognize a loss in a Traditional IRA, all amounts must be distributed from all Traditional IRAs (but not Roth IRAs) owned by the taxpayer, and to recognize a loss in a Roth IRA, all amounts must be distributed from all of the Roth IRAs owned by the taxpayer (but not traditional IRAs).

An IRA loss may be claimed as a miscellaneous itemized deduction, subject to the 2%-of-adjusted-gross-income limit that applies to certain miscellaneous itemized deductions on Schedule A, Form 1040. (*Notice 89-25, Q&A 7, 1989-1 CB 662)* The TCJA suspended deduction of Tier 2 miscellaneous deductions for years 2018 through 2025 so an IRA loss will not be deductible during this period.

> ***Example - Loss on a Traditional IRA Distribution Recognized -*** *A mutual fund IRA, funded with 6 annual nondeductible contributions of $2,000, has a basis of $12,000 ($2,000 x 6). It is the taxpayer's only IRA. The mutual fund lost money, and the account contained only $10,000. The account owner withdrew the entire amount in 2017 and recognized a $2,000 loss in that year.*

BANKRUPTCY EXCLUSION

IRA accounts up to the exemption amount are protected from creditors in bankruptcy. The amount is inflation-indexed every three years. As of April 1, 2019, the exemption is increased to $1,362,800 (*Federal Register, Vol 84, Number 29, Feb. 12, 2019*). The next increase won't be until 2022. However, the Supreme Court ruled unanimously in *Clark v. Rameker, SCt., June 12, 2014, 2014-1 USTC ¶50,317* that an inherited IRA is not exempt from credit claims in bankruptcy.

TAXATION OF PENSIONS BY FORMER RESIDENT STATES

Congress in 1995 passed P.L. 104-95 (H.R. 394) that prevents states from taxing the pensions of **former** residents of any state received after December 31, 1995. This also applies to IRA distributions received by a nonresident beneficiary of an estate or trust.

IRA UNRELATED BUSINESS INCOME

Generally an IRA is exempt from all income taxes. An exception to that is tax on unrelated business income (UBI), which the IRA received from activities that are not substantially related to the functions for which the IRA is allowed an exemption from income tax, such as engaging in a business normally carried on for profit.

The taxation of UBI applies to all exempt entities, and besides Traditional IRAs, includes Roth, SEP, Simple, Coverdell, Archer MSA and HSA Accounts.

A specific exemption of $1,000 applies to UBI, so where the UBI is $1,000 or less, no return need be filed. Where the UBI exceeds the $1,000 exemption, Form 990-T is used to pay the UBI tax. The UBI tax is determined by using a graduated rate schedule (same as for trusts for IRAs or other exempt entities) – 10% – 37% for years after 2017.

The due date of the 990-T is the same as for 1040s and Form 8868 can be used to apply for an extension.

QUALIFIED PLAN PORTABILITY

The law generally allows any **pre-tax** IRA funds to be rolled into any other type of retirement plan, such as a qualified plan, 403(b) annuity, or Section 457 plan maintained by a state or other political subdivision.

Funds in various qualified arrangements — such as qualified plans, 403(b) arrangements and Section 457 plans — can be rolled into any other type of arrangement, rather than merely IRAs. Section 457 arrangements of state governments can accept rollover contributions, and distributions from such arrangements as well as after-tax employee contributions to qualified plans and 403(b)s can be rolled over.

Although the rules for rollover contributions are liberal, rollovers are not possible if the individual cannot receive a distribution from the plan or if the recipient plan does not authorize acceptance of the rollover contribution. See Chapter 4.04 for details on rollovers.

PREMATURE DISTRIBUTIONS: A 10% penalty applies to the taxable portion of a Traditional IRA distribution taken before the IRA owner turns age 59-1/2. The penalty is computed using ***Form 5329.*** However, certain exceptions provide relief from the penalty. See chapter 4.10 for the various exceptions.

REQUIRED MINIMUM DISTRIBUTIONS: A Traditional IRA is subject to the required minimum distribution rules for qualified plans – See Chapter 4.17.

CALIFORNIA DIFFERENCES

For tax years 2007 through 2009 California did not conform to the federal inflation adjusted AGI phase-outs for traditional IRAs. For tax years beginning on or after January 1, 2010, California DOES conform to the federal modified AGI indexed amounts.

2007 – 2009 MAGI* Phase-out for Individuals Who Are Not Active Participants			
Filing Status	Unmarried	Joint	Joint – Spouse Active
MAGI Phase-Out Range	50,000 – 60,000	80,000 – 100,000	150,000 – 160,000

**Use federal MAGI*

<u>*CA Basis May Have Been Created*</u> - If the deductible amount for California was less than it was for federal because of the phase-out difference, basis was created for California, so when distributions are made in the future, part of each one will be nontaxable for California. It is important that the nondeductible amount be tracked so that tax isn't paid on the basis portion of distributions.

HISTORICAL IRA LIMITATIONS: The table (below) summarizes the various limitations, changes and differences between Federal and California law since the inception of the Traditional IRA. For Federal tax purposes, a basis in an IRA could not be possible until the advent of the nondeductible IRA in 1987. However, because of the delayed conformity to Federal rules and different limitations, a California basis could have been established as early as 1975.

For tax years 1996 and after, California law is the same as federal law for IRA deductions – except California did not adopt the higher federal phaseout amounts applicable to qualified plan participants starting in 2007 and through 2009. For additional information on IRA deductions for years prior to 1996, refer to Pension and Annuity Guidelines, (FTB Pub. 1005).

HISTORICAL IRA LIMITATIONS (1975 – 2019)

	FEDERAL					CALIFORNIA

If amounts not shown, they were not available at publication.

NOTES

ROTH IRAS & QUALIFIED ROTH CONTRIBUTIONS

Taxpayer receives **no tax deduction** when contributions are made.

- **Qualified distributions are tax-free**, including the account earnings.
- **Contributions have the same annual limits as traditional IRAs** and deposits to a combination of Roth and Traditional IRAs cannot, combined, exceed the annual contribution limit. **Annual Contribution Limits 2019:** $6,000 ($7,000 age 50+)
- Qualifications needed to contribute to a Roth IRA:
  - The taxpayer **must have compensation** (same definition as for traditional IRAs).
  - **No age limit** for contributions – thus, contributions can be made after the age of 70½.
  - **Spousal Roth IRAs** are allowed.
  - **No qualified plan limits** - contributions can be made even if the taxpayer is a participant in a qualified plan.
  - **AGI Phase-out** limits apply. Amounts for **2019** are:
    - Married: 193 – 203K
    - MS: 0 – 10K
    - Others: 122 - 137K

But see how to circumvent the AGI phase-out on page 4.06.03.

- Traditional to Roth conversions allowed without AGI or filing status restrictions.
- Required minimum distributions (RMD)
  - **None at any age** while owner is living.
  - Generally same as for traditional IRAs after owner's death.
  - Designated Roth 401(k) and 403(b) are subject to the RMD rules.

TCJA CHANGES	**See Page**
Recharacterization Rule Repealed	4.06.05

With a Roth IRA, a taxpayer gets no tax deduction when contributions are made. However, what the taxpayer gets is tax-free accumulation, and at retirement, all distributions are tax-free, including the account earnings (if a required holding period is met). Congress provided the means for individuals to convert their existing Traditional IRA into a Roth IRA in the form of a taxable rollover. The rollover allows all future earnings to accumulate tax-free until retirement, but requires the tax on the current IRA to be paid in the year of conversion. Determination of whether it is beneficial for a taxpayer to elect this taxable rollover option generally requires careful tax planning.

CONTRIBUTIONS AND LIMITS

Qualifications - Qualifications needed to contribute to a Roth IRA:

1. Taxpayer must have ***compensation*** (the same definition that is used for Traditional IRAs).
2. Contributions are allowed ***regardless of the taxpayer's age***.
3. ***Spousal*** Roth IRAs are allowed.

4. The taxpayer's ***"modified AGI" must be within certain limits*** based on filing status whether or not participating in a qualified retirement plan.
5. Prior to 2010, MFS taxpayers were not allowed to convert.

Year	Under Age 50	Age 50 and Over
Through 2001	2,000	2,000
2002 - 2004	3,000	3,500
2005	4,000	4,500
2006 - 2007	4,000	5,000
2008 - 2012	5,000	6,000
2013 - 2018	5,500	6,500
2019 - 2020	6,000	7,000

Roth IRA Not Eligible to be S Corp Shareholder - Affirming the Tax Court, the Court of Appeals for the Ninth Circuit has found that a Roth IRA was not an eligible shareholder of an S corporation (*Taproot Administrative Services, Inc. v. Commissioner*, CA-9, 2012-1 USTC ¶50,256).

Roth Contribution Limit

1. If the taxpayer makes no Traditional IRA contribution, the maximum contribution a taxpayer may make to the Roth is the lesser of the annual contribution limit (see table, right), or the taxpayer's taxable compensation. The maximum is phased out, if the taxpayer's modified AGI is within the limits described in the second table below.
2. If a taxpayer contributes to both a Roth and a Traditional IRA, the contribution limit for the Roth is the lesser of the maximum contribution limit reduced by contributions to all Traditional IRAs (excluding SEPs or SIMPLE IRAs), OR the maximum contribution allowed because the taxpayer's modified AGI requires deduction phase out.

Roth Contribution AGI Phase Out

Year	*Joint*	*MS (Living With Spouse)*	*All Others*
2016	184,000 – 194,000	0 – 9,999	117,000 – 132,000
2017	186,000 – 196,000	0 – 9,999	118,000 – 133,000
2018	189,000 – 199,000	0 – 9,999	120,000 – 135,000
2019	193,000 – 203,000	0 – 9,999	122,000 - 137,000
2020	196,000 – 206,000	0 – 9,999	124,000 – 139,000

Modified AGI - means regular AGI:

- Less income from conversion of a Traditional IRA to a Roth account.
- Less minimum required distributions from IRAs.
- Plus Traditional IRA deduction, student loan interest deduction, foreign earned income exclusion, foreign housing exclusion, qualified savings bond interest exclusion, higher education tuition and fees deduction (for years when applicable), domestic production activities deduction (for years when applicable) and adoption expense exclusion.

Computing Roth IRA Phase Out (Using 2019 Rates for Example)

1. Figure MODIFIED AGI.
2. Subtract from the amount in (1):
   - $193,000 if taxpayer files joint return,
   - $0 if taxpayer files MS and lived with his/her spouse at any time during year, or
   - $122,000 for all other taxpayers.
3. Divide result in (2) by $15,000 ($10,000 if filing married joint or married separate).
4. Multiply the contributions limit (before reduction by this adjustment and before reduction for any contributions to a Traditional IRA) by the result in (3).
5. Subtract the result in (4) from the taxpayer's contribution limit before this reduction. This is the reduced contribution limit. Round up to the nearest $10. If the reduced contribution limit is more than $0 but less than $200, increase the limit to $200.

Example – Phase Out of Roth Contribution – *In 2019, JT Loner is single, under age 50, and earned wages of $124,000 and had modified AGI of $124,210. He wants to make the maximum contribution possible to his Roth IRA. He made no Traditional IRA contribution. Since JT's modified AGI is above $122,000, his maximum Roth contribution will be limited as follows:*

1. Modified AGI	*$124,210*		
2. Less phase out threshold		*<$122,000>*	*$2,210*
3. Line (2) divided by $15,000		*.147*	
4. Maximum contribution limit ($6,000) x Line (3)		*$882*	
5. Subtract Line 4 from maximum contribution limit		*$5,118 ($6,000 - 882 = $5,118)*	
6. Maximum Roth contribution (line 5 rounded up to nearest $10)		*$5,120*	

Back Door ROTH IRA - Circumventing the Contribution AGI Phase-Out Limitation - A taxpayer can contribute to a traditional IRA and then convert that traditional IRA to a Roth IRA. This also gives rise to an opportunity to defer income from one year to another by making a deductible IRA contribution in one year and converting it to a Roth IRA in a subsequent year. Options:

1. Make a designated non-deductible Traditional IRA contribution and then convert it into a Roth IRA in a subsequent year. The only tax when converted would be on the earnings. **Caution:** This strategy may not work or work as well if the taxpayer already has other IRA accounts. Remember when a taxpayer has made both deductible and nondeductible IRA contributions all Traditional IRA are treated as one, and for the taxpayer who has other IRA accounts a conversion will be treated as coming ratably from all of them, which may include taxable conversions.

2. Make a deductible Traditional IRA contribution, AGI permitting, and then convert it into a Roth IRA in a subsequent year. This would effectively defer the income from the contribution year to the conversion year.

CONTRIBUTIONS DUE DATE

Contributions to a Roth must be made by the ***unextended* due date** of the taxpayer's return – essentially by the April due date of the tax return.

SAVER'S CREDIT QUALIFICATION

Even though contributions to Roth IRAs are not deductible, they are eligible contributions for the Retirement Savings Contribution Credit (also called Saver's Credit) available to certain lower-income taxpayers. See Chapter 9.07 for more information on this nonrefundable credit.

EXCESS CONTRIBUTIONS PENALTY

A taxpayer who contributes more to a Roth IRA than the year's contribution limit is subject to a 6% excise tax (Form 5329 penalty) on the excess amount. Excess contribution to a Roth IRA for a year is the sum of:

1. That year's contributions (other than rollover contributions) that are more than the contribution limit for the year, plus
2. Any excess contributions for the preceding year, reduced by the total of:
   a. Any distributions out of the Roth IRA for the year, plus
   b. The contribution limit for the year minus the total of all IRA contributions for the year.

Under this formula, excess contributions are reduced as a deemed Roth IRA contribution for each subsequent taxable year to the extent the Roth IRA owner does not actually make a regular IRA contribution in those years (Reg. § 1.408A-3, Q&A-7).

Exceptions to the Penalty – If the excess contributions, plus any earnings, are withdrawn on or before the extended due date of the return, the excess contributions penalty won't apply. The earnings are treated as earned and received in the year the excess contribution was made. Another way to avoid the 6% penalty is to apply the excess contribution to a later year's contribution, provided the contributions for that later year are less than the maximum allowed for that year.

ONLY ONE IRA ROLLOVER ALLOWED EVERY 12 MONTHS

Beginning in 2015, an individual can make only one rollover from an IRA to another (or the same) IRA in any 12-month period, regardless of the number of IRAs the individual owns. The limit applies by aggregating all of an individual's IRAs, including SEP and SIMPLE IRAs as well as traditional and Roth IRAs, effectively treating them as one IRA for purposes of the limit. However, trustee-to-trustee transfers between IRAs and ***rollovers from traditional to Roth IRAs ("conversions") are not limited***. (IRS Announcement 2014-15) See Chapter 4.04 for additional details.

CONVERSIONS TO ROTH IRA ACCOUNTS

An individual (any age) can roll over into a Roth IRA all or part of an eligible rollover distribution they receive from their (or their deceased spouse's):

- Individual Retirement or Annuity Account (except RMD),
- Employer's qualified pension, profit-sharing or stock bonus plan (including a 401(k) plan),
- Annuity plan,
- Tax-sheltered annuity plan (section 403(b) plan), or
- Governmental deferred compensation plan (Section 457 plan).

Roth Conversions for Retirement Plans **-** Under current law, a deferral plan under section 401(k) (including the Thrift Savings Plan), 403(b) or 457(b) governmental plan can have Roth accounts that allow participants to save on a Roth basis. That is, they can make after-tax contributions to the plan and all the principal and earnings are tax-free when distributed.

Plans have allowed participants to convert their pre-tax accounts to Roth accounts, but only with respect to money they have a right to take out of the plan, usually because they have reached age 59½ or separated from service. The American Taxpayer Relief Act (ATRA) allows any amount in a non-Roth account to be converted to a Roth account in the same plan, whether or not the amount is distributable. The amount converted would be subject to regular income tax.

Strategy - Segregating Deductible & Non-deductible Traditional IRA Contributions – Generally, rollovers are thought of as transfers from a qualified plan to an IRA or from one IRA to another IRA. However, a taxpayer may roll assets from a Traditional IRA to other qualified plans including 401(k) plans, 403(a) and 403(b) annuities and 457 governmental retirement plans (assuming the plan will accept the IRA funds).

However, the law only allows the taxable portion of the IRA to be moved to qualified plans (Code Sec. 408(d)(3)(A)(ii)). For taxpayers who have mixed IRAs (including both deductible and nondeductible contributions), this provides a means to segregating the taxable and nontaxable amounts and then later converting the nontaxable portion without paying any conversion tax (except on any interim earnings). Thus, the taxable portion can be rolled into a qualified plan, leaving the nontaxable portion in the IRA where it can be converted to the Roth IRA.

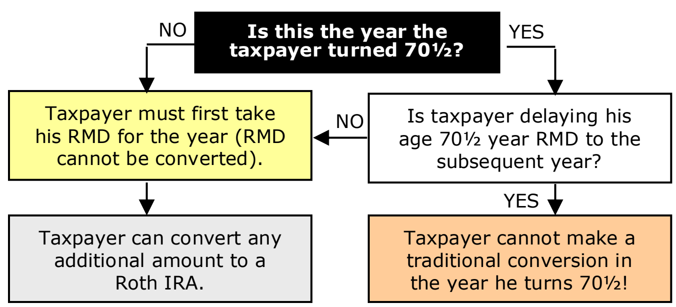
Taxability of a Conversion **-** A Traditional IRA may include some post-tax contributions if a taxpayer made nondeductible contributions to the IRA. These post-tax contributions are treated as a nontaxable basis in the IRA and are not taxed in the conversion to a Roth IRA. The balance of the IRA funds is taxed in the year of the rollover as additional income. All of the taxpayer's traditional IRAs, SEP-IRAs and SIMPLE IRAs are aggregated when determining the amount taxable at conversion. Unless 100% of all of the IRAs are converted to a Roth IRA, not all of the nontaxable basis is excluded from tax at conversion.

> ***Example – Taxable Amount at Conversion of Mixed IRAs****: In earlier years, Irene had made deductible SEP-IRA contributions of $25,000. In 2015 through 2019 she only made nondeductible contributions to a regular IRA of $14,000. In 2019, the SEP's value is $32,000 and the IRA's value is $16,000. Irene converts the regular IRA to a Roth IRA in 2019. Although Irene's basis in her IRAs is $14,000, she can only use $4,084 of the basis in the conversion ($14,000/$48,000 = 29.17% x $14,000 = $4,084), leaving $11,916 of the $16,000 she converted as taxable.*

Converting Simple IRAs **–**Although a SIMPLE IRA can also be converted to a Roth IRA under the same rules described above, a taxpayer can't convert any amount distributed from the SIMPLE during the 2-year period that begins with the date of first participation in the SIMPLE.

Paying the Tax on a Conversion **-** Where does the money come from to pay this tax liability on a conversion to a Roth? The taxpayer can pay the liability from other funds or from IRA funds. However, if the tax is paid from IRA funds, those funds are not part of the rollover and therefore are subject to early withdrawal penalties if the taxpayer is under 59½ at the time of the withdrawal.

Conversions After Reaching Age 70½ - IRA owners are permitted to make Traditional to Roth conversions after reaching age 70½, provided that they first take the RMD for the year; the RMD amount cannot be converted (Code Sec. 408(d)(3)). Thus, if the taxpayer, in the year he turns 70½, wishes to delay the RMD until the subsequent year, he would not be able to also make a conversion in that year (Preamble to TD 8816, 2/3/1999).



IS A 529 PLAN THE RIGHT CALL?

Historically the Sec 529 plan has been the most popular way to save for college. There are an estimated 13 million accounts with assets exceeding $275 billion. The cost of a traditional college education keeps going up and up, but today's on-line education costs are just a fraction of the expense of a traditional college education. On-line classes may come to be the standard in the years to come. The Sec 529 plans may not be suitable as the education savings mechanism of the future, as they lock up huge sums of money that can be applied penalty-free only to pay for the high costs of a traditional school.

With technology evolving at such a rapid rate the Internet may be the solution to the high cost of college education, and huge sums may not be needed to pay for college expenses. Parents and grandparents, who are the ones that usually fund a child's education, need to think about their retirement as well, since there are no grants, scholarships, loans or tax credits to help individuals with retirement well into their 80s.

One possible alternative is a Roth IRA where, like a Sec 529 plan, the earnings accumulate tax-free and there is no penalty if the funds withdrawn are qualified distributions or a return of contributions. Funds not withdrawn for education can be used for retirement. Of course, to contribute to a Roth IRA, the account owner must have earned income but AGI cannot exceed the top of the AGI-based threshold range for the year, and annual contributions are limited to the overall IRA contribution limitations.

RECHARACTERIZATION RULE REPEALED

TCJA The Act repeals the special rule that allows a traditional IRA to Roth IRA **conversions** to be later unwound. Thus, for example, under the provision, a **conversion** contribution to a Roth IRA during a taxable year can no longer be recharacterized as a contribution to a traditional IRA (thereby unwinding the conversion). The provision is effective for taxable years beginning after December 31, 2017. (IRC Sec. 408A(d)(6)(B)(iii) as amended by TCJA Sec. 13611(a).

However, recharacterization is still permitted with respect to *contributions*. For example, an individual may make a contribution for a year to a Roth IRA and, before the due date for the individual's income tax return for that year, recharacterize it as a contribution to a traditional IRA (Conference Report). Thus, if an individual makes a Roth IRA contribution the contribution can be converted to a traditional IRA contribution, or vice versa, provided the conversion is accomplished before the unextended due date for the return (IRA contribution must be made by the April return due date).

Note: This rule applies for conversions from a traditional IRA, SEP or SIMPLE to a Roth IRA. The new law also prohibits recharacterizing amounts rolled over to a Roth IRA from other retirement plans, such as 401(k) or 403(b) plans (IRS FAQ).

Special Rule For Conversions Made in 2017 - A Roth IRA conversion made in 2017 may be recharacterized as a contribution to a traditional IRA if the recharacterization is made by October 15, 2018. A Roth IRA conversion made on or after January 1, 2018, cannot be recharacterized (IRS FAQ)

> ***Commentary****: This change can be a problem for individuals whose retirement funds are invested, for example, in a stock fund and the fund declines in value after the conversion and the converted amount can no longer be recharacterized to avoid the tax on the declined value.*

CONVERSION IMPACT ON OTHER TAX CONSEQUENCES

When considering whether or not to convert to a Roth IRA, the impact on various tax benefits due to increasing AGI by the taxable conversion amount must be carefully considered. For instance, a conversion may cause the taxpayer to lose part or all of certain tax benefits, like:

- American Oppty/Lifetime Learning Credits
- Earned Income Tax Credit (EIC)
- Child Tax Credit
- Saver's Credit
- Adoption Credit
- Higher Education Interest Deduction
- Medicare B & D Premiums – 2 Years Later
- Tuition and Fees Deduction (applicable yrs.)
- Medical Itemized Deductions
- Miscellaneous Itemized Deductions (applicable yrs)
- Nontaxable Social Security
- Favorable Tax Brackets
- Capital Gains Rates
- Special Loss Allowance for Rental Real Estate

Higher-income taxpayers face a potential additional tax related to the Affordable Care Act (health care) provisions: the 3.8% net investment income surtax applies when modified AGI exceeds certain thresholds. A higher AGI due to a Roth conversion could push the taxpayer over the threshold. Also, the additional income from a conversion could negatively impact taxpayers who might otherwise be eligible for credits for health care insurance premiums.

FACTORS IMPACTING THE CONVERSION ANALYSIS

The following are considerations that could have the most impact on the result of a conversion to a Roth.

After-Tax Cost of Traditional IRAs - Any analysis will need to factor in whether the taxpayer intends to continue contributing to the IRA. As part of that consideration, taxpayers of lesser means may not be able to afford to make the maximum annual contribution to an IRA if it is not deductible. Therefore, affordability of a nondeductible IRA contribution currently may have more influence over the decision than future benefits. Consider that taxpayers with a combined state and Federal tax rate of 37% can fund a deductible $6,000 Traditional IRA with $3,780 after-tax dollars, whereas they would need a full $6,000 for the equivalent Roth contribution.

Payment of the Roth IRA Conversion Tax - The monies used to pay the rollover tax will reduce the capital available for investment earnings, whether the conversion tax is paid from IRA funds or other available funds. Therefore, the benefits of the Roth IRA will need to be reduced by the tax and penalties (if any) AND the resulting loss of earnings over the lifetime of the IRA.

Tax Benefits of a Traditional IRA - If a taxpayer has the option of having a Deductible IRA or a Roth IRA, the tax savings produced by the Deductible IRA need to be included on the plus side for the Traditional IRA. These savings will produce investment accumulation which can be as much or more than the original savings.

Impact On Social Security Taxability and Medicare Premiums - During retirement years, some taxpayers will find that distributions from their IRA accounts will impact the taxability of their social security benefits. If this is a planning consideration, the conversion to a Roth IRA before retirement will produce tax-free distributions during retirement and could reduce or eliminate the taxability of the social security benefits. Individuals participating in Medicare who have modified AGI over $85,000 ($170,000 if filing jointly) pay higher Medicare B and D premiums. Qualified distributions from Roth IRAs are not included in MAGI, so converting a Traditional IRA to a Roth for these individuals before they enroll in Medicare may be beneficial.

IMPACT ON ESTATE TAXES AND BENEFICIARIES

Both Traditional and Roth IRAs will be includible in a decedent's estate and taxed if the estate is large enough. Traditional IRAs are included in an estate and are also taxable to the beneficiary. Roth IRAs will be includible in the estate, but qualified distributions are not taxable to the beneficiary. This can be a significant benefit to taxpayers with large estates and may be reason enough to convert.

ROTH DISTRIBUTIONS:

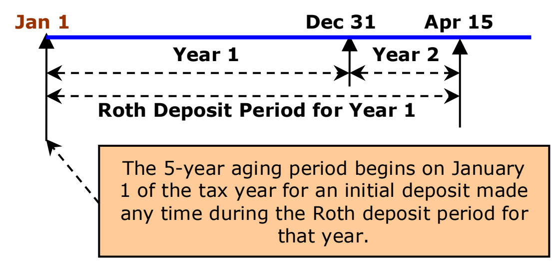
Qualified Distribution - Distributions from a Roth are nontaxable only if they are "*qualified distributions.*"
Qualified Distribution Definition - A qualified distribution is generally any payment or distribution from a Roth IRA:

1. That meets the five-year aging requirement discussed below (Sec 408(d)(2)(B)), **AND**
2. That meets one of the following conditions (Sec 408(d)(2)(A)):
   - The distribution is made after the IRA owner reaches the age of 59-1/2,
   - The distribution is made after death of the individual,
   - The distribution is made on account of the owner becoming disabled, **OR**
   - The distribution is for first-time homebuyer expenses, as detailed in chapter 4.10 on Early Withdrawal Penalty Exceptions.

Other distributions are non-qualifying, and earnings on the IRA are taxed when distributed.

Five-Year Qualifying Period - The five-tax-year period (that determines whether a Roth distribution is a "qualified distribution") begins with the first tax year for which the individual made a contribution to a Roth IRA established for the individual (Code Sec 408A(d)(2)(B)). That is, the five-tax-year holding period:

- **Begins** on the earlier of:
  (a) The first day of the individual's tax year *for which* the first regular (i.e., non-rollover) contribution is made to any of the individual's Roth IRAs or
  (b) The first day of the individual's tax year *in which* the first conversion contribution is made to any of the individual's Roth IRAs; and
- **Ends** on the last day of the individual's fifth consecutive tax year beginning with the tax year described above (Reg § 1.408A-6, Q&A 2).



Thus, if an individual whose tax year is the calendar year makes a first-time regular Roth IRA contribution for Year 1 any time between Jan. 1 of Year 1 and the April due date of Year 2, the five-tax-year period begins on Jan. 1 of Year 1. See illustration above.

Converted IRAs - A conversion of a regular IRA into a Roth IRA after the five-tax-year period has begun will not start the running of a *new* five-year period. (S Rept No. 105-174 (PL 105-206) p. 144)

Initial Deposit Starts Five-Tax-Year Holding Period For All Subsequent Deposits
Thus, once the five-tax-year holding period has been met, any distribution from the Roth IRA, even one allocable to contributions made *within five years* before the distribution, may be excludable as a qualified distribution **except as noted below for**:

- Corrective distributions,
- Rollovers from a "Designated Roth Account", and
- Beneficiaries.

Corrective Distribution Exceptions - The initial contribution to a Roth IRA does *not* start the five-tax-year holding period if that initial contribution is:

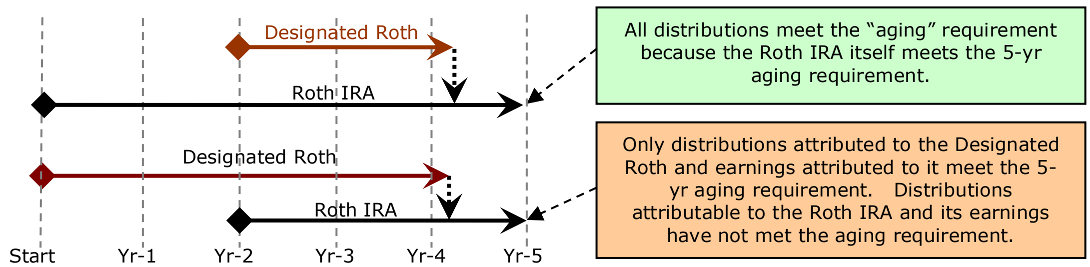
(1) Distributed as a corrective distribution. Any amount distributed as a corrective distribution is treated as if it was never contributed (Reg § 1.408A-6, Q&A 2);
(2) Revoked within seven days under Reg § 1.408-6(d)(4)(ii)(A), or
(3) Recharacterized (Preamble to TD 8816, 2/3/1999).

Beneficiaries – The following special rules apply to inherited Roth IRAs:

- General Rule - The five-tax-year holding period for a Roth IRA held by an individual as a beneficiary of a deceased Roth IRA owner **is determined independently** of the five-tax-year period for the beneficiary's own Roth IRA. (Reg § 1.408A-6, Q&A 7(b))

- Surviving Spouse - if a surviving spouse treats the Roth IRA that was owned by the decedent spouse as his or her own, the five-tax-year period for any of the surviving spouse's Roth IRAs (including the one that the surviving spouse treats as his or her own) ends at the earlier of the end of either (Reg § 1.408A-6, Ex 7(b)):
  - (1) The five-tax-year period for the decedent's Roth IRA, or
  - (2) The five-tax-year period for the spouse's own Roth IRAs.

Designated Roth Account - The five-tax-year holding period for determining a qualified distribution from a Roth IRA is determined independently of the five-tax-year holding period for determining a qualified distribution from a "designated Roth account" (discussed later in this chapter). Thus, an individual cannot count the tax years that he has had a designated Roth account towards the five-tax-year holding period for Roth IRAs, even if he rolls over an amount from the designated Roth account to the Roth IRA (Preamble to TD 9324, 4/27/2007).



NONQUALIFIED DISTRIBUTION PENALTY

If, within the 5-year period starting with the year of a *conversion* contribution, any part of a withdrawal from a Roth IRA that is from the taxable part of an amount converted, may be subject to the **10% additional tax on premature distributions**, unless one of the Sec. 72(t) exceptions applies. The 10% penalty applies **only** to the part of the conversion contribution that is included in income. Moreover, it applies as though the amount is includible in gross income in the year of the withdrawal, even if no conversion income is includible. Unless an exception applies, the taxable part of other Roth IRA distributions that are not qualified distributions is subject to the 10% penalty on premature distributions. The following early withdrawal exceptions apply to IRAs (codes refer to Form 5329, line 2, identifiers):

- Unreimbursed Medical Expenses (in excess of 7.5% or 10% (depending on year) of AGI whether or not itemizing) (**Code 05**)
- Permanent Disability (**Code 03**) or Death (**Code 04)**
- Beneficiary Exception (**Code 04 – "Death"**)
- Annuity or "Substantially Equal Payments" Exception (**Code 02**)
- Distribution as result of an IRS Levy (**Code 10**)
- Qualified Reservist Distributions – At Least 180 Days on Active Duty (**Code 11**)
- Contributions Returned Before the Due Date (**Code 12 – "Other"**)
- Medical Insurance – Receiving Unemployment Benefits (**Code 07**)
- Higher Education Expense (**Code 08**)
- First-time Homebuyer – Maximum $10,000 per taxpayer from their respective accounts (**Code 09**)
- Rollover to Health Savings Account

Note: Where an IRA account contains both Roth contributions and conversion amounts, the early withdrawal penalty can be avoided if the distributions are limited to an amount equal to the Roth contributions or less. That is because the distribution ordering rules (discussed later) specify that the distribution amounts are first allocated to Roth Contributions and then followed by conversion contributions.

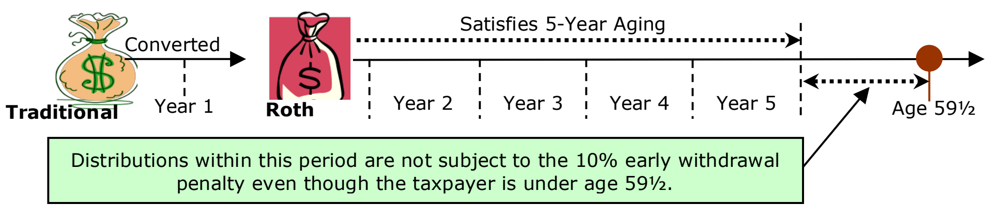
Example: *A Roth IRA contains $21,000 attributable as follows:*

• *Roth contribution for 2015*	*$5,000*
• *Roth contribution for 2016*	*$5,000*
• *Traditional IRA converted to a Roth IRA in 2015*	*$3,000*
• *Traditional IRA converted to a Roth IRA in 2016*	*$7,000*
• *Earnings*	*$1,000*

- **Scenario #1** – In 2019, the taxpayer, age 50, withdraws $10,000 from the Roth IRA. The distribution is tax- and penalty-free since, per the withdrawal ordering rules, the distribution comes first from Roth contributions.

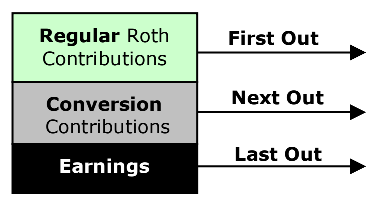
- **Scenario #2** – In 2019, the taxpayer, age 50, withdraws $15,000 from the Roth IRA. The $15,000 is allocated first to the Roth contributions, making the first $10,000 tax- and penalty-free. The remaining $5,000 is attributable to the conversion and, although it is not taxable (because it was already taxed when converted), the $5,000 is subject to the 10% early distribution penalty because it had not been in the IRA for the required five years, resulting in a $500 penalty tax. No penalty exceptions apply!
- **Scenario #3** – In 2019, the taxpayer, age 50, withdraws the entire balance of $21,000 from the Roth IRA. As with the previous examples, the first $10,000 is tax- and penalty-free. The next $10,000 is attributable to the conversion and is tax-free but subject to the 10% early withdrawal penalty because it had not been in the IRA for the required five years, resulting in a penalty tax of $1,000. The remaining $1,000 is attributable to earnings; since it had not met the 5-year aging requirement, it is subject to taxation <u>and</u> the 10% penalty, resulting in a $100 tax penalty plus the tax on the $1,000. No penalty exceptions apply!
- **Scenario #4** – In 2020, the taxpayer, age 51, withdraws the entire account balance. Let's assume the earnings amount is unchanged. The taxpayer's first conversion ($3,000) has now met its 5-year aging requirement so that the first $13,000 withdrawn is not subject to tax or penalty. However, the next $7,000 of converted funds has not met the 5-year aging requirement and, although it is tax-free, it is subject to the 10% penalty. Although the Roth account has met the 5-year aging requirement, it is still not a qualified distribution because the taxpayer is under the age of 59½ and, as a result, the $1,000 earnings are subject to both tax and the 10% penalty. No penalty exceptions apply!

Converted Amounts After 5 Years But Before Age 59½: An individual who would not reach age 59½ (or satisfy any other exception to the 10% early withdrawal tax) in five years, can nonetheless convert a traditional IRA to a Roth IRA, and receive distribution of the contribution *after* five tax years, without being subject to the 10% tax, even though the same distribution from the unconverted IRA would have been subject to the 10% tax.



<u>ORDERING RULES FOR WITHDRAWALS</u>

In determining the taxable amount of Roth IRA distributions that are not qualified distributions, distributions are treated as made in the following order (determined as of the end of the tax year and exhausting each category before moving on to the following category):



(1) From contributions and qualified rollover contributions other than from a traditional IRA. Thus, this category includes:

 (a) **Regular Roth IRA contributions**,

 (b) **Rollover contributions** from other Roth IRAs (not from traditional IRAs), and

 (c) **Rollover contributions from a designated Roth** account (Code Sec. 408A(d)(4)(B)(ii)(I)).

(2) From "**conversion contributions**," i.e., qualified rollover contributions ***other than*** **from a Roth IRA or a designated Roth account**, starting with the amounts first converted, on a **first-in, first-out basis**. (Code Sec. 408A(d)(4)(B)(ii)(II)) Distributions allocated to a conversion contribution are treated as coming first from the *taxable portion* of the contribution (Code Sec. 408A(d)(4)(B)); and

(3) From **earnings**. (Reg § 1.408A-6, Q&A 8(a)(3))

Aggregation Rules (grouping and adding rules) **-** To determine the taxable amounts distributed, distributions, and contributions by grouping and adding them together as follows.

- All withdrawals from all the taxpayer's Roth IRAs during the year are added together.
- All regular contributions made during and for the tax year are added together (including those made by the April 15 due date of the return).
- All conversion contributions made during the year are added together.

RECHARACTERIZED CONTRIBUTIONS

- Any recharacterized contributions that end up in a Roth IRA are added to the appropriate contribution group for the year that the original contribution would have been taken into account if it had been made directly to the Roth IRA.
- Any recharacterized contribution that ends up in a Traditional IRA is disregarded for the purposes of grouping both contributions and distributions. Any amount withdrawn to correct an excess contribution (including the earnings withdrawn) is also disregarded for this purpose.

MINIMUM REQUIRED DISTRIBUTIONS

Roth IRA Owners - no minimum distributions from a Roth IRA have to be made while the Roth IRA owner is alive. This means that those who don't need to utilize their Roth IRA to meet expenses during retirement can leave it untapped for heirs. **Exception:** Designated Roth 401(k) and 403(b) plans (discussed later) are subject to the RMD rules.

Beneficiaries – The post-death minimum distribution rules, with the exception of the "at-least-as-rapidly" rule, which apply to traditional IRAs also apply to Roth IRAs. Thus, the entire Roth IRA must generally be distributed (Reg § 1.408A-6) (Code Sec. 408A(c)(5)):

- Within five years of the owner's death **or**
- Over the life expectancy of a designated beneficiary, and distributions commence prior to the end of the calendar year following the year of the owner's death **or**
- Where the sole beneficiary of a Roth IRA is the Roth IRA owner's surviving spouse:
  - The spouse may delay distributions until the Roth IRA owner would have reached age 70½ or
  - May treat the Roth IRA as his or her own. This is commonly referred to as a Beneficial IRA which is left in the decedent's name and distributions are not subject to premature distribution penalties. The spouse must begin taking distributions over his or her life expectancy using the Single Life Table in the year following the owner's death (or if earlier, the year in which the IRA owner would have reached age 70-1/2).

FORM 8606

In the year an amount is converted from a traditional, SEP or SIMPLE IRA to a Roth IRA, or a nonqualified distribution is received from a Roth IRA (see 8606 instructions), Form 8606 must be filed. This form need not be filed solely to report a contribution to a Roth IRA or for rollovers from qualified retirement plans.

ROTH IRA LOSS RECOGNITION

The IRA loss recognition rule applies separately to each kind of IRA, including Roth IRAs. Thus, to recognize a loss in a Roth IRA, all amounts must be distributed from all Roth IRAs (but not traditional IRAs) owned by the taxpayer, and to recognize a loss in a traditional IRA, all amounts must be distributed from all of the traditional IRAs owned by the taxpayer (but not Roth IRAs).

If a Roth IRA loss may be claimed, it is as a miscellaneous itemized deduction, subject to the 2%-of-adjusted-gross-income limit that applies to certain miscellaneous itemized deductions on Schedule A, Form 1040. Per the TCJA, deduction of Tier 2 expenses is suspended for years 2018 through 2025, so no Roth IRA loss is deductible during this period.

QUALIFIED ROTH CONTRIBUTION PROGRAM (aka Designated Roth Account)

Code Section 402A allows employers to create a type of elective deferral program, referred to as a "Qualified Roth Contribution Program," "Designated Roth Account," "Roth 401(k)" or "Roth 403(b)." Under these plans, participants contributing to a 401(k) plan or a 403(b) (tax-sheltered annuity) program may irrevocably designate a portion of their contributions as Roth contributions.

The employee's contributions to the Roth 401(k) or Roth 403(b) are on an after-tax basis, but at retirement the earnings and pay-outs of the employee's contributions are tax-free. In many respects, the decision whether to designate a portion of elective deferrals as Roth contributions is similar to the decision of whether to make a regular deductible contribution to an IRA or a nondeductible contribution to a Roth IRA, although more individuals will be in a position to make the decision.

- Available **only if the employer's plan offers** the Qualified Roth option.
- Can **designate part or all** of the contribution to the Qualified Roth option.
- The election once made is **irrevocable**.
- Not subject to the regular Roth AGI contribution limits.
- Designated Qualified Roth amount **cannot exceed the annual limit for elective deferral** contributions, \$19,000 (\$25,000 if age 50 or over) for 2019.
- **Subject to the required minimum distribution (RMD) rules** at age 70½. However, the RMD can be avoided if the Qualified Roth is rolled into a Roth IRA before reaching the age of 70½.

- **5-year qualifying period** determined separately from a Roth IRA (See page 04.06.08).
- **Qualified distributions** are tax-free (See qualified distributions page 04.06.08).
- **Employer's matching contributions** cannot be designated as to the Qualified Roth and will be taxed when distributed.
- **Rollover** to a Roth IRA is permitted.
- The employer (plan sponsor) must maintain separate Roth accounts and keep **separate records for each Roth** account from the time the initial designated Roth contribution is made.
- **Distributions** from Roth 401(k) and Roth 403(b) accounts **may be rolled over**, but only to other Roth accounts in a 401(k) plan or 403(b) arrangement, or to a Roth IRA.
- Under the general rules of **elective deferrals, distributions** from Roth 401(k) accounts are permitted only when the participant terminates employment, dies, becomes disabled, reaches age 59½, or due to hardship (if allowed by the plan).
- Unlike Roth IRAs, distributions of Roth 401(k) contributions are not permitted for the purpose of the **first-time purchase of a home**. However, the work-around for this is to make a trustee-to-trustee transfer from the Roth 401(k) to a Roth IRA and then take a distribution from the Roth IRA to use for first-time home purchase expenses.

Excess Deferrals – In general, when a 401(k) or 403(b) plan participant has excess deferrals (i.e., more than the annual limit is contributed), the excess must be distributed and included in income. However, if Roth 401(k)/403(b) contributions are distributed as excess deferrals no later than April 15 of the year following the contribution year, they will not be subject to tax (because they were after-tax contributions), but the earnings on the excess Roth 401(k) or 403(b) contributions will be taxed when distributed.

If the plan doesn't distribute the excess Roth 401(k)/403(b) contributions by April 15, the Roth 401(k)/403(b) contributions will be taxed twice. The first time was when the contribution was made. The second time will be upon distribution, at which time the earnings on the excess contributions will also be taxed.

Taxation of Distributions – Like Roth IRA contributions, Roth 401(k)/403(b) contributions and related earnings are generally not included in gross income when distributed, if they are "qualified distributions," meaning the distribution was made:

1. After the participant reached age 59-1/2, died or became disabled, ***AND***
2. More than 5 years after the first Roth 401(k) or Roth 403(b) contribution to the plan or a predecessor Roth 401(k)/403(b) plan. (See 5-year qualifying period on page 04.06.08.)

Retirement Funds Can Be Converted to a Designated Roth Account – A participant in a 401(k), 403(b) and 457 retirement plan that also includes a Designated Roth account may, in a qualified distribution, roll over the portion of the plan that is not in a Designated Roth account into the Designated Roth account. The IRS terms this action an "in-plan rollover." The rollover does not count towards the maximum limit on elective deferrals for the year.

The rollover, if elected by the employee (or surviving spouse), is made by direct transfer within the plan. Rollovers from other plans are not permitted. Once the rollover is made, future distributions from the designated Roth account conform to the rules for Designated (Qualified) Roth Accounts discussed above.

CAUTION: A plan that includes a Designated Roth program is permitted, but *not required,* to allow rollover contributions (described above) to a designated Roth account. (Com Rept)

Plans have allowed participants to convert their pre-tax accounts to Roth accounts, but only with respect to money they have a right to take out of the plan, usually because they have reached age 59½ or separated from service. The American Taxpayer Relief Act (ATRA) allows any amount in a non-Roth account to be converted to a Roth account in the same plan, whether or not the amount is distributable.

This is, however, not a tax-free rollover. The rollover amount is included in the taxpayer's gross income for the year.

CAUTION: Although the rollover generally is not subject to the 10% early withdrawal penalty, future distributions of funds that are in the Designated Roth account that are attributable to rollovers that have not met the 5-year aging rule would be subject to the 10% penalty. (For more on the 5-year aging rule see page 04.06.08).

A plan participant who elects an in-plan Roth rollover cannot later recharacterize the rollover, as could be done with rollovers to Roth IRAs prior to 2018. (IRS Notice 2010-84)

Government 457 Plans & Designated Roth IRA Accounts - Governmental section 457 plans are "applicable retirement plans" that can offer a qualified Roth contribution program, effective beginning in 2011. (Code Sec. 457(e)(1)(C))

Thus, a section 457 plan maintained by a state, its political subdivision, agency, or instrumentality, or the state subdivision's agency or instrumentality, can include a qualified Roth contribution program. This provision does not apply to plans of nonprofit organizations.

UNRELATED BUSINESS INCOME: See chapter 4.05

CALIFORNIA DIFFERENCES

California conforms to the Federal Roth IRA rules, including the federal phase-out amounts for Roth IRA contributions. Thus, for California purposes, taxpayers may use the same elections for state purposes as they use on their Federal returns.

California conforms to the federal Roth conversion rules.

DEFINITIONS

Basis: Previously taxed funds

Earned Income (E.I.): Generally income subject to social security taxes, non-taxable combat pay and taxable alimony.

Annuity Rules: Payment over the lifetime of the IRA owner and (if applicable) the IRA owner's beneficiary. Nontaxable portion is distributed ratably with taxable portion under the usual rules.

NOTES

EARLY WITHDRAWAL PENALTY EXCEPTIONS

- **Early withdrawal penalty**: 10%
- **Applies to:** Taxable Distributions to taxpayers under the age of 59½

- **Pub 530 –** First Time Homebuyers
- **Pub 575 –** Pension and Annuity Income
- **Pub 590-B –**Distributions from Individual Retirement Plans (IRAs)
- **Sec 72(t)(2)**

Generally, if a taxpayer is under age 59-1/2 and withdraws assets (money or other property) from a qualified plan including Traditional IRAs, the taxpayer must pay a 10% additional tax, commonly referred to as a penalty (IRC Sec. 72(t)). This tax is 10% of the part of the distribution that the taxpayer was required to include in gross income the year of the distribution.

Caution – Delayed Check Cashing – Rev Rul 2019-19 concludes that an individual's failure to cash a qualified plan or IRA distribution plan distribution check does not permit the individual to exclude the amount of the designated distribution from gross income and does not alter the employer's withholding obligations or Form 1099-R reporting obligations, Thus the distribution is taxable in the year of the distribution. This rule applies if the individual *could* have cashed the check, and would apply whether or not the individual keeps the check, sends it back, destroys it, or cashes it in a later tax year

A number of exceptions provide relief from the early withdrawal penalty, as explained below.

EXCEPTIONS THAT APPLY TO ALL QUALIFIED PLANS:

Some exceptions apply to all qualified plans, while some apply only to Traditional IRAs. Those listed in this section apply to all qualified plans, unless otherwise noted.

60-Day Rollover To Another Qualified Plan – A taxpayer can avoid both the income tax and the penalty on an early distribution if the distribution is rolled over into an eligible retirement plan within 60-days of receipt (Code Sec. 402(c)(1)). The IRS may waive the 60-day rollover period for equitable reasons, including cases of casualty, disaster, or other events beyond an individual's control such as bank error, if certain conditions are met. (Code Sec. 402(c)(3)) Taxpayers, as of August 24, 2016, may provide written certification to a plan administrator or an IRA trustee that he or she missed the 60-day deadline because of not being able to complete a rollover due to one or more of 11 situations provided for in Rev Proc 2016-47. See page 04.04.07 for details.

Some taxpayers use the 60-day rollover provision as a source for a short-term loan. However, there are built-in hazards for the 60-day rule:

One rollover per 12 months rule - Code Sec 408(d)(3)(B) limits the number of IRA rollovers to one per one-year period. The IRS historically interpreted the one rollover per year to mean one rollover from each of the taxpayer's IRAs, and this position had been published in IRS Publication 590 for 2013. However, the tax court in *Bobrow v.*

Commissioner (TC Memo 2014-21) reached the conclusion that the once-per-year IRA rollover limitation applies on an aggregate basis, meaning that an individual could not make an IRA-to-IRA rollover if he or she had made such a rollover involving **any** of the individual's IRAs in the preceding 1-year period.

The IRS has adopted the Tax Court position but provided transitional relief by not applying the court's interpretation to IRA rollovers occurring before January 1, 2015. (Ann. 2014-15) See Chapter 4.04 for additional information.

Twenty percent withholding rule – Another barrier to completing a 60-day rollover is the mandatory 20% withholding of federal income tax requirement when a qualified plan distribution isn't transferred trustee-to-trustee. Because 20% of the distribution went to withholding tax, the taxpayer only received 80% of the funds and cannot recoup the withholding until filing time. Thus they would have to make up the 20% from other sources to complete a 100% rollover.

Direct transfers - A distribution from a qualified retirement plan or IRA that is transferred directly by the trustee of the plan to the trustee of another qualified plan or to another IRA does not count as a rollover and does not trigger the once-per-year rollover limitation; direct transfers are not subject to withholding.

Unreimbursed Medical Expenses Exception - Amounts withdrawn to pay unreimbused medical expenses that would be deductible on Schedule A during the year and that for 2017 or 2018 exceed 7.5% of the taxpayer's AGI are exempt from penalty. The percentage increases to 10% starting in 2019. This is true even if the taxpayer does not itemize.

Enter 10% (or 7.5% when applicable) of the taxpayer's AGI for the year….........	<___________>
Penalty exempt amount…………………………………………………………………………………….	___________

Disabled Exception - If a taxpayer becomes disabled before reaching age 59-1/2, any amounts withdrawn because of the disability are not subject to the 10% additional tax. A taxpayer is considered disabled if the taxpayer can furnish proof that he/she cannot perform any substantial gainful activity because of the physical or mental condition. A physician must determine that the taxpayer's condition:

- ❑ Can be expected to result in death, **or**
- ❑ Is expected to be of a long, continued and indefinite duration.

In determining whether an individual's impairment makes him unable to engage in any substantial gainful activity, the regulations provide that the primary consideration is to be given to the nature and severity of the impairment, but other factors, such as the individual's education, training, and work experience, must also be considered. Substantial gainful activity is the activity, or a comparable activity, in which the individual customarily engaged prior to becoming disabled or prior to retirement if the individual was retired at the time the disability arose. Whether or not the impairment in a particular case constitutes a disability is to be determined with reference to all the facts in the case. (Reg. 1.72-17A(f))

The following are examples of impairments that would ordinarily be considered as preventing substantial gainful activity:

- Loss of use of two limbs;
- Certain progressive diseases which have resulted in the physical loss or atrophy of a limb, such as diabetes, multiple sclerosis, or Buerger's disease;
- Diseases of the heart, lungs, or blood vessels which have resulted in major loss of heart or lung reserve as evidenced by X-ray, electrocardiogram, or other objective findings, so that despite medical treatment breathlessness, pain, or fatigue is produced on slight exertion, such as walking several blocks, using public transportation, or doing small chores;
- Cancer which is inoperable and progressive;
- Damage to the brain or brain abnormality which has resulted in severe loss of judgment, intellect, orientation, or memory;
- Mental diseases (e.g. psychosis or severe psychoneurosis) requiring continued institutionalization or constant supervision of the individual;
- Loss or diminution of vision to the extent that the affected individual has a central visual acuity of no better than 20/200 in the better eye after best correction, or has a limitation in the fields of vision such that the widest diameter of the visual fields subtends an angle no greater than 20 degrees;
- Permanent and total loss of speech;
- Total deafness uncorrectible by a hearing aid.

The existence of one or more of the impairments described above will not, in and of itself always permit a finding that an individual is disabled as defined in Sec 72(m)(7). Any impairment, whether of lesser or greater severity, must be evaluated in terms of whether it does in fact prevent the individual from engaging in his customary or any comparable substantial gainful activity.

AIDS did not constitute disability (West, TCS) - The Tax Court noted that the taxpayer did not qualify as disabled, because he had been able to engage in substantial gainful activity during the year at issue.

Depression constituted disability - Tax Court has held that a former postal employee's depression qualified her for the disability exception to the 10% premature withdrawal penalty tax on qualified plans. Her psychologist's conclusion that there was a fair prospect of her eventual return to work in some capacity didn't mean that her condition was not indefinite. *(Mary L. Coleman-Stephens, TC Summary Opinion 2003-91)*

In contrast, and more typical of the outcome of cases involving mental illness, in an earlier 2003 case *(Keeley v. Commissioner, TC Summary Opinion 2003-53)*, the Tax Court held that the taxpayer's depression was not a qualified disability for the 10% penalty exception. In the Court's opinion the taxpayer's condition was remediable, and it did not require him to be institutionalized or put under constant supervision, conditions noted in the regulations for a mental illness to be a disability.

Beneficiary Exception - If a taxpayer dies, the benefits distributed to a taxpayer's beneficiary or estate are exempt from the early withdrawal penalty. ***Caution:*** If a decedent's spouse chooses to treat the distribution as his/her own and later receives a distribution before reaching age 59-1/2, it may be subject to the penalty.

Annuity or "Substantially Equal Payments" Exception - This exception essentially allows a taxpayer to retire early and take withdrawals before reaching age 59-1/2. For qualified plans, this exception applies only for distributions that begin after the taxpayer separates from service. To qualify for this exception, the payments:

- ❑ Must be part of a series of substantially equal payments over the taxpayer's life, or the joint life expectancies of the taxpayer and the taxpayer's beneficiary, **and**
- ❑ Payments under this exception must continue for at least 5 years, or until the taxpayer reaches age 59-1/2, whichever is the longer period. This 5-year rule does not apply if a change from an approved distribution method is made because of the death or disability of the IRA owner.

Example*: Dan began taking eligible payments at age 56 on December 1, 2014. He may not take a different distribution or alter the amount of the payment until December 1, 2019, even though his fifth payment was taken on Dec. 1, 2018.*

Example*: Sue began taking substantially equal periodic payments on Dec. 1, 2012. She turns 59½ on July 1, 2019. She may not take a different distribution or alter the amount of the payment until July 1, 2019.*

Methods - Code Section 72(t) does not include a specific method of computing the payments. In **Notice 89-25, 1989-1 CB 662,** modified by **Rev. Rul. 2002-62**, the IRS suggests three methods that might be used in computing the payments. Several letter rulings have also been issued approving other methods.

The following summarizes the methods outlined in Rev. Rul. 2002-62. Methods 1 through 3, explained below, are applicable for any series of payments starting on or after January 1, 2003, but could have been used for distributions starting in 2002. As the examples for Methods 1 through 3 show, the amount of the annual payment varies significantly with the method chosen.

- ***Method 1, Required Minimum Distribution (RMD) Method (RR 2002-62) –*** The annual payment for each year is determined by dividing the account balance for that year by the number from the chosen life expectancy table for that year. Under this method, the account balance, the number from the chosen life expectancy table and the resulting annual payments are redetermined for each year. If this method is chosen, no modification in the series of substantially equal periodic payments will be deemed made, even if the amount of payments changes from year to year, provided there isn't a change to another method of determining the payments.

Example: *Taxpayer is age 55, spouse is age 50; qualified retirement plan account balance is $303,000; taxpayer's first distribution is in 2019. Generally, the Uniform Lifetime Table would be used, unless (1) there is no designated beneficiary, in which case the Single Life Expectancy Table is used, or (2) the distribution is from a Joint and Last Survivor annuity for which the Joint and Last Survivor Table is used.*

	Factor	Annual Distribution
Single Life	29.6	$10,236
Uniform Lifetime	41.6	$ 7,284
Joint and Last Survivor	38.3	$ 7,911

CAUTION:
The RMD Method may not allow an affected taxpayer to withdraw enough from their IRA to meet their current financial obligations while they wait for their Social Security or other retirement plan payments to kick in.

- ***Method No. 2, Fixed Amortization Method (RR 2002-62) –*** The annual payment for each year is determined by amortizing in level amounts the account balance over a specified number of years determined using the chosen life expectancy table and the chosen interest rate (defined below). Once calculated, the annual payment would not change, and the same amount would be distributed in later years.

Example: *Same facts as above, plus the chosen interest rate is 3.5% (for the purpose of these examples, assume that this is an eligible rate). The annual distribution would be as follows depending on the Life Expectancy Table used:*

	Factor	Annual Distribution
Single Life	29.6	$16,602
Uniform Lifetime	41.6	$13,936
Joint and Last Survivor	38.3	$14,483

- ***Method No. 3, Fixed Annuitization Method (RR 2002-62) –*** Divide the account balance by an annuity factor that is the present value of an annuity of $1 per year beginning at the taxpayer's age and continuing for the life of the taxpayer (or the joint lives of the individual and beneficiary). The annuity factor is derived using the mortality table in Appendix B of Rev. Rul. 2002-62 and using the chosen interest rate (defined below). Under this method, the annual payment determined for the first distribution year remains the same amount in each succeeding year.

  Example: *Under the fixed annuitization method, using the facts as in the example just above, the single life annuity factor would be 18.336 and the annual distribution $16,525 ($303,000/18.336). For a joint life expectancy, the annuity factor is 21.485 and the distribution would be $14,103 ($303,000/21.485).*

Rules and definitions for Methods 1 – 3:

- **Life Expectancy Tables** – that can be used are:
  1. Uniform Lifetime Table from Appendix A of Rev Rul 2002-62 (shown at 4.02.1), **or**
  2. The Single Life Expectancy Table (partially illustrated at 4.02.2; complete table in Reg. 1.401(a)(9)-9, Q&A 1), **or**
  3. Joint and Last Survivor Table (partially illustrated at 4.02.4; table in Reg. 1.401(a)(9)-9, Q&A Use the number from the chosen table for the distribution year that is for the employee's (or IRA owner's) age on his or her birthday in that year. If the Joint and Last Survivor Table is used, the age of the beneficiary on the beneficiary's birthday in the year is also used. For Method 1, the same life expectancy table used for the first distribution year must be used in each following year.

     If the Joint and Last Survivor table is used, the survivor must be the actual beneficiary of the account for the year of the distribution, determined for the year on January 1, and without regard to changes in the beneficiary during that or prior years. If there is more than one beneficiary, the identity and age of the beneficiary used for Methods 1 – 3 is determined as explained in chapter 4.17 at "Determine Beneficiaries' Life – Multiple Beneficiaries." Essentially use the oldest beneficiary's life expectancy. If, in any year there is no beneficiary, use the Single Life Table for that year.

- **Interest Rates** - The interest rate that may be used is any rate that is not more than 120% of the federal mid-term rate for either of the two months immediately preceding the month in which the distributions begin. The revenue rulings that contain the applicable federal mid-term rates are available on the IRS web site by searching for "applicable federal rate".
- **Account Balance** – The account balance used to determine payments must be determined in a reasonable manner based on the facts and circumstances.

  Example: *An IRA with daily valuations made its first distribution on 07/15/19. According to the regulations, when using Method 1, it would be reasonable to determine the yearly account balance based on the value of the IRA from 12/31/18 to 07/15/19. In subsequent years, using the same method, it would be reasonable to use the value either on 12/31 of the prior year or on a date within a reasonable period before that year's distribution.*

- **Modifications to Payments** - Under all three methods, IRS will consider that there is a modification to the series of payments if, after the first valuation date, there is:
  1. Any addition to the account balance other than gains or losses,
  2. Any nontaxable transfer of a portion of the account balance to another retirement plan, or
  3. A rollover by the taxpayer of the amount received resulting in such amount not being taxable.

CAUTION - Payers of qualified "substantially equal" payments will prepare Form 1099-R with a code 2 (early distribution, known exception) in Box 7. However, the Form 1099-R instructions tell payers to use code "1" (early distribution, no known exception) if they don't know if the taxpayer meets the requirements for the "substantially equal" exception. This could happen if the taxpayer transfers his IRA or qualified plan account from the custodian who was originally involved when the payment plan was set up to a different custodian or trustee (for example, from one brokerage to another), even if the payments have not been modified. In this event, Form 5329 (Part I) will need to be prepared and included with the taxpayer's income tax return to justify why no penalty has been included in the return. Any transfer of accounts should be done trustee-to-trustee to avoid the possibility that the taxpayer would be considered to have received an additional payment (even if it is rolled over timely) and then be disqualified from the "substantially equal" exception.

Distribution as result of an IRS Levy - The 10% penalty tax on early withdrawals (under Code Sec. 72(t)) does not apply to withdrawals from a qualified plan or IRA made on account of a levy under Code Sec. 6331 on the plan or IRA. (§ 72(t)(2)(A)(vii))

This exception applies to distributions only if the qualified plan or IRA is actually levied on. The 10% penalty tax still applies if the taxpayer withdraws amounts from a qualified plan or IRA to pay taxes in the absence of a levy, or even if the taxpayer makes a plan or IRA withdrawal in order to cause the IRS to release a levy on a separate property interest of the taxpayer.

> ***Example – IRS Levy –*** *Taxpayer, age 40, has $15,000 in his IRA, including $5,000 in nondeductible (after-tax) contributions. IRS issues a notice of levy to the IRA custodian for the collection of taxes owed by the taxpayer, and levies on the entire $15,000 in his IRA in Year 1. On his Year 1 income tax return, the taxpayer must report taxable income of $10,000 ($15,000 withdrawal less $5,000 nondeductible contributions). However, under Code Sec. 72(t)(2)(A)(vii), the taxpayer is not subject to the 10% early withdrawal tax on the distribution. But if the taxpayer had withdrawn the money to pay taxes in the absence of a levy, the 10% penalty would apply, and the additional tax would be $1,000.*

Pension Plan Garnishment - IRS has privately ruled that qualified retirement plans won't be disqualified for paying some participants' and beneficiaries' benefits to satisfy their criminal fines under garnishment orders relating to federal criminal statutes. IRS also concluded that the distributions would not be subject to the 10% early withdrawal penalty tax, mandatory withholding or written notice requirements. PLR 200426027

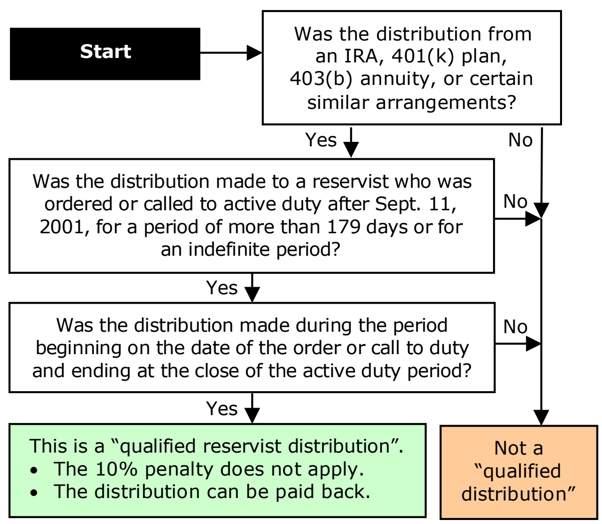
In another ruling, IRS privately held that a federal court seeking to collect a fine in an individual's criminal case would not violate the anti-alienation rule by garnishing the individual's Code Sec. 401(k) plan account balance. However, that ruling did not address the 10% additional tax, or whether the payments would be subject to mandatory withholding. See PLR 200342007.

Qualified Reservist Distributions - The 10% early withdrawal penalty tax does not apply (retroactively) to a "qualified reservist distribution." A qualified distribution is:

(1) From an IRA or attributable to elective deferrals under a 401(k) plan, 403(b) annuity, or certain similar arrangements;

(2) Made to individuals who (because of their being members of a reserve component) are ordered or called to active duty after Sept. 11, 2001, for a period of more than 179 days or for an indefinite period; and

(3) Made during the period beginning on the date of the order or call to duty and ending at the close of the active duty period.



Pay-Back Option - Those who receive a qualified reservist distribution may, at any time during the two-year period beginning on the day after the end of the active duty period, make one or more contributions to their IRAs in an aggregate amount not to exceed the amount of the distribution (i.e., they may make "pay back" contributions).

Original Distribution Taxability - No provision is made to allow the taxpayer to amend the return on which the original distribution was reported to recover the regular tax that was paid on the amount that is paid back. Since the amount that is paid back is not deductible, it may be appropriate for the taxpayer to contribute the pay-back to a Roth IRA; there the earnings on the repayment will grow tax-free and distributions will be tax-free (if the age and holding period requirements are satisfied). If the nondeductible pay-back is made into a Traditional IRA, when the funds are distributed at retirement, they will be partially tax-exempt based on the ratio of nondeductible contributions to total contributions. In the year the distribution is paid back, the taxpayer is required to file Form 8606 to report the nondeductible contribution.

EXCEPTIONS THAT APPLY TO QUALIFIED PLANS OTHER THAN AN IRA

Qualified Domestic Relations Order (QDRO) - A QDRO is a judgment, decree, or order relating to payment of child support, alimony, or marital property rights to a spouse, former spouse, child or other dependent. The order has to contain certain specific information like the amount of the participant's benefits to be paid to each alternate payee.

<u>Spouse or former spouse</u> - If a spouse or former spouse receives retirement benefits from a participant's plan under a QDRO, the former spouse must report the payments just as though he/she were the plan participant. **The early distribution penalty does not apply**, regardless of the alternate payee's age. The taxability is computed by allocating the spouse/former spouse a share of the investment in the contract and figuring the taxable portion accordingly. If the recipient spouse rolls over the distribution to an IRA, or there is a direct trustee-to-trustee transfer, the recipient spouse will not be taxed currently on the plan benefits received under the QDRO, but distributions from the IRA before that spouse is age 59½ will be taxed and subject to the 10% penalty unless one of the other exceptions applies.

<u>IRAs</u> - The QDRO exception to the 10% penalty does not apply to distributions from IRAs, but Code Sec. 408(d)(6) provides that the transfer of an individual's interest in an IRA to his spouse or former spouse incident to divorce is not a taxable transfer and that the transferred amount is to be treated as the IRA of the transferee spouse. Thus, the tax on early distributions does not apply.

Separation from Service - Distributions from a qualified retirement plan after separation from service in or after the year the taxpayer reached age 55 (see below for a special rule for certain public safety employees). ***Note:*** Distributions of this type are rarely coded on Form 1099-R as an early distribution.

This exception applies only where the taxpayer separates from employment after reaching age 55. The Tax Court ruled the exception did not apply in the case of a taxpayer who retired from his job when he was age 53 but who waited until after he turned 55 to make a withdrawal from his qualified retirement plan (*Williams v. Commissioner, T.C. Summary 2008-53, 5/19/08*). A taxpayer must be age 55 or older, and then separate from employment, for an early distribution to be excepted from the 10% penalty.

EXCEPTIONS THAT APPLY TO IRA ACCOUNTS ONLY

Contributions Returned Before the Due Date - If the taxpayer made an IRA contribution for the tax year, it can be withdrawn tax-free by the extended due date of the tax return provided:

1. Taxpayer did not take a deduction for the contributions withdrawn, **and**
2. The taxpayer also withdraws any interest or other income earned on the contributions, **and**
3. The taxpayer includes in income, for the year in which the withdrawal was made, any earnings on the contributions withdrawn.

Medical Insurance Exception - This exception allows taxpayers that qualify to make penalty-free withdrawals to pay for medical insurance. The amount that is exempt from penalty cannot be more than the amount the taxpayer paid during the year for medical insurance for taxpayer, spouse, and dependents. To qualify for this exception, the taxpayer:

1. Must have lost his/her job,
2. Received unemployment compensation for 12 consecutive weeks,
3. Made IRA withdrawals during the year he/she received unemployment **or** in the following year, and
4. Made the withdrawals no later than 60 days after being reemployed.

Higher Education Expense Exception - Withdrawals made during the year for qualified higher education expenses for the taxpayer, spouse or children or grandchildren of the taxpayer or spouse are exempt from the early withdrawal penalty. The part not subject to the tax is generally the amount that is not more than the qualified higher education expenses for the year at an eligible educational institution. To compute the qualified higher education expenses, use the worksheet below.

1. Enter tuition, fees, books, supplies, and equipment…………….________
2. If student is at least ½ time, enter room & board expenses ________
3. **Total expenses (1 + 2)**…………………………………………………………………………...__________ **(A)**
4. Distributions from a Coverdell Education Savings Acct………..________
5. Scholarships, such as a Pell grant………………………………………..________
6. Employer-provided educational assistance……………………………________
7. Any tax-free payment (See note.)………………………………………..________
8. Total tax-free funds (4 thru 7) (Don't include a gift, bequest, or devise.)…<__________> **(B)**
9. **Qualified Higher Education Expenses (A) – (B)** ………………..………………..._________

Note: Refers to any tax-free payment (other than a gift, bequest, or devise) due to enrollment at an eligible educational institution.

For this exception to apply, the qualifying expenses and distribution from the IRA must occur in the ***same*** tax year. A pre-age 59-1/2 IRA distribution used to pay down credit card debt that had been incurred to pay qualified higher education expenses in the two years prior to the distribution year did not qualify for exception from the penalty (*L.L. Lodder-Beckert, T.C. Memo 2005-162*).

A Tax Court case concluded that amounts paid for a computer, housewares, appliances, furniture, bedding, and books in connection with the taxpayers' daughter's enrollment at a university did not qualify for the education expense exception to the IRA early withdrawal penalty because they weren't shown to be required for her education. *(Gorski, TC Summary Opinion 2005-112)*

First-Time Homebuyer Exception - To qualify for treatment as a first-time homebuyer distribution, the distribution must meet *all* the following requirements:

1. It must be used to pay qualified acquisition costs before the close of the 120th day after the day the distribution was received.
2. It must be used to pay qualified acquisition costs for the main home of a first-time homebuyer (defined later) who is any of the following:
   a. Taxpayer, taxpayer's spouse
   b. Taxpayer or spouse's child or grandchild
   c. Taxpayer or spouse's parent or other ancestor
3. When added to all the taxpayer's prior qualified first-time homebuyer distributions, if any, the total distributions cannot be more than $10,000. A husband and wife meeting the definition of first-time homebuyers and purchasing an eligible home together *can* each withdraw up to $10,000 from each of their respective IRAs without incurring any penalty for early withdrawal.

<u>*First-Time Homebuyer*</u> **-** Generally, the taxpayer is a first-time homebuyer if the taxpayer had no present interest in a main home during the 2-year period ending on the date of acquisition of the home for which the distribution is being used to buy, build, or rebuild. If the taxpayer is married, the taxpayer's spouse must also meet this no-ownership requirement.

<u>*Date of Acquisition*</u> **-**The date of acquisition is the date that a taxpayer:

- Entered into a binding contract to buy the main home for which the distribution is being used, **or**
- Began building or rebuilding the main home for which the distribution is being used.

<u>*Failed Purchase*</u> – If the purchase cannot be completed within the 120-day time period the taxpayer may re-contribute the funds to the IRA account as long as 120 days have not passed since the withdrawal. In other words, for first time homebuyers the 60-day rollover period is replaced with 120 days. In addition, the rollover is disregarded for purposes of the one rollover every year limitation. (Section 72(t)(8)(E))

Strategies

Strategies - Navigating the First-Time Homebuyer Quirks - Except for some special exceptions, when a taxpayer withdraws funds from an IRA or a Qualified Plan before attaining the age of 59½, the taxpayer will incur a 10% early withdrawal penalty in addition to paying tax on the distribution. One of the exceptions allows each taxpayer who qualifies as a "First-Time Homebuyer" to make a $10,000 penalty-free withdrawal from an IRA to purchase a home. (§72(t)(2)(F)) At first glance, one would assume the exception (1) only applies to the first home a taxpayer ever purchased, (2) the funds cannot come from another qualified plan such as a 401(k) plan, and (3) the home purchased must be for the taxpayer(s). One who made such assumptions would be in error.

Although this penalty exception applies to IRA withdrawals only, there is nothing to prevent a taxpayer from transferring or rolling over funds from a qualified plan, such as a 401(k) plan, self-employment plan, SEP, 403(b), etc., into an IRA and then taking the distribution from the IRA to achieve a penalty-free distribution.

Since the legislation was designed to assist individuals to get into the housing market, one would assume that a taxpayer's "first home" means just that. However, that is not the case as the tax code is far more liberal. A first-time homebuyer is a taxpayer (and spouse, if married) that has no ownership interest in a main home in the two-year period preceding the acquisition of the home.

In fact, the home does not even need to be the taxpayer's own home, since the taxpayer is permitted to use this special exclusion for the purchase of a first-time home for the taxpayer's or spouse's child, grandchild, parent or other ancestor so long as the home meets the definition of "first home" for the relative. Thus, the exclusion permits a taxpayer to use the exclusion to help a qualified relative.

If married, this exception applies to both spouses separately; thus, each could withdraw up to $10,000 ($20,000 combined) from their individual IRA accounts and avoid the early withdrawal exception. This is, however, a lifetime exclusion so when added to all the taxpayer's prior qualified first-time homebuyer distributions, if any, the total distributions cannot be more than $10,000.

CAUTION!

Even though a first-time homebuyer withdrawal might be penalty-free, it is still taxable. In addition, the distribution must be made within the 120-day period preceding the home's acquisition.

EXCEPTIONS THAT APPLY TO GOVERNMENT PLANS ONLY

Public Safety Employees (Age 50+) Not Subject to 10% Penalty Tax (§ 72(t)(10)).

The 10% early withdrawal tax does not apply to distributions from a governmental defined benefit pension plan to a qualified public safety employee who separates from service after age 50. A qualified public safety employee is:

(1) Any employee of a State or political subdivision of a State who provides police protection, firefighting services, or emergency medical services for any area within the jurisdiction of such State or political subdivision, or

(2) Effective after December 31, 2014, any Federal law enforcement officer, Federal customs and border protection officer, Federal firefighter, or any air traffic controller. Added by the ''Defending Public Safety Employees' Retirement Act'' of 2015.

Applies to Original Distribution Only - this exception applies only to the original distribution from the government plan. If the employee rolls the funds into an IRA or defined contribution plan, any subsequent distribution is subject to the 10% penalty. (Notice 2007-7 Q9)

1099-R Coding - A payer is permitted to use distribution code 2 (early distribution, exception applies) in box 7 of Form 1099-R. However, a payer is also permitted to use distribution code 1 (early distribution, no known exception) if the payer does not know whether the exception under § 72(t)(10) applies. (Notice 2007-7 Q10). If the 1099R shows code 1, but the taxpayer qualifies for the exception and is not subject to the 10% penalty, use Code 01 on Form 5329.

Exception for Federal Workers' Phased Retirement

H.R. 4348, the Moving Ahead for Progress in the 21st Century Act (aka MAP-21) was signed by the President on July 6, 2012. The bill includes a provision of phased retirement for federal employees, effective after the Office of Personnel Management issues implementing regulations, which they did on November 6, 2014, and the various agencies decide whether to and how to implement the program. Media reports indicate that very few government employees have applied to participate in this program so far, with most retirement-age employees who leave government service either retiring fully or going to work in the private sector. Some departments have indicated they won't be adopting the phased retirement program any time soon.

This provision allows certain federal employees to phase into retirement at the end of their careers. Phased retirees would work part-time while receiving proportionately reduced pensions. At full retirement, the phased retiree will receive a composite retirement annuity that also includes the portion of the employee's retirement annuity attributable to the reduced work schedule.

Payments under a phased retirement annuity and a composite retirement annuity received by an employee participating in this new program are exempt from the early distribution penalty. (Code Sec. 72(t)(2)(A)(viii), as amended by Act Sec. 100121(c).

CALIFORNIA DIFFERENCES

The California penalty rate for early retirement plan or IRA distributions is 2.5%. The amount of the early distributions included in income for California purposes may differ from the amount reported on the federal return if the amount of contributions deducted for California was different than the federal amount (for example, because California and federal maximum contribution amounts were not the same in some years). The California penalty applies to the amount of the early distribution taxable on the California return.

California generally conforms to the exceptions allowable under Federal law. If the FTB levies the plan to pay delinquent state taxes, the distribution will be subject to federal penalty but exempt from penalty by CA. Legislation will be needed before California conforms to the exception for federal workers' phased retirement payments.

California does not penalize a taxpayer who fails to make their required minimum distribution.

NOTES

SELF-EMPLOYED RETIREMENT PLANS

(Keogh Plans)

RAPID FINDER

- **Contribution Due Date: Extended Due Date**
- **Plan Existence:** Plan must be **set up before year-end**
- **Defined Benefit Contribution $ Limit For 2019:** Amount contributed can't create an annual benefit in excess of the larger of **$225,000** or 100% of participant's average compensation for highest 3 years
- **Defined Contribution $ Limit For 2019: $56,000**
- **Defined Contribution % Limit**:
  - Profit Sharing: **25% (20% of the net) –** (contributions **discretionary**)
  - Money Purchase: **15% (13.141%) -** (contributions **mandatory**)
- **Minimum Funding Standards for Under-funded Plans–** Paid during year in quarterly installments:
  (1) 90% of the current plan year's required contribution, or
  (2) 100% of the required contribution for the preceding plan year.

Combo Self-Employment and 401(k) Plans

Self-employed taxpayers can combine 401(k) plans with Keogh and SEP plans to increase the deductible annual contribution. For more information on the combo plans and examples, see Course CPE 418 or Chapter 4.18 "Solo 401(k) Plans." Also see Chapter 9.09 for discussion of the pension start-up credit available for small businesses.

KEOGH PLANS

Retirement plans for self-employed individuals are often referred to as Keogh plans, even though the distinction between qualified plans of corporate employers and self-employed retirement plans generally was eliminated many years ago. A Keogh plan can only be established by an employer, so a sole proprietor or partnership (not an individual partner) can set up a plan. In general, Keogh plans may be divided into two categories:

DEFINED BENEFIT PLANS - are those where annual contributions are set by determining the amount necessary to provide a SPECIFIC retirement benefit to the plan participant. The formula for figuring contribution amounts is not based on current earnings but on actuarial assumptions and computations. These plans are more costly to administer than defined contribution plans (below), but can yield greater tax benefits, especially for the taxpayer who starts a plan later in life. The maximum annual benefit for this kind of plan is shown in the table that follows.

Maximum Benefit – Defined Benefit Plans

Year	2014	2015	2016	2017	2018	2019	2020
Max Annual Benefit	210,000	210,000	210,000	215,000	220,000	225,000	
IRS Notice	2013-73	2014-70	2015-75	2016-62	2017-64	2018-83	

If amount not shown, it was not available at publication date.

DEFINED CONTRIBUTION PLANS - establish an individual account for each person in the plan and plan benefits are based on the amount contributed to each account, plus earnings. Keogh plans in this category are divided into two types:

(a) **Profit-sharing plans** base contributions on a proportion of company profits. The contributions are discretionary, so a taxpayer does not have to make a contribution every year.

(b) **Money purchase plans** are those where contributions are not based on company profits but rather are mandatory each year at a fixed percentage of compensation. A penalty is assessed for failure to make a required contribution to a money purchase plan (use ***Form 5330***).

The information in this chapter provides basic guidance for defined contribution Keoghs of sole proprietors who have no employees.

Keoghs and SE Income **-** Keogh plans are available only for taxpayers with ***Self-Employment (SE) Income;*** contribution limits are based on net SE income. Plan contributions cannot be made on the basis of SE income from a ***partnership except at the partnership level***. The self-employed individual's deduction of plan contributions made on his/her own behalf is an adjustment to income on Form 1040, specifically on Schedule 1, line 15 (draft 2019); contributions on behalf of employees are deducted on Schedule C.

IRAs and Keogh Plans - A self-employed taxpayer can deduct contributions to BOTH an IRA and a Keogh plan (subject to the IRA active-participation rules). The IRA contribution is computed based on compensation and SE income less the Keogh contribution and the deduction allowed for 50% of self-employment tax.

Figuring the SE tax **–** Before one can calculate a Self-Employment retirement contribution the SE Tax must be determined. For purposes of computing the SE tax, the law provides a deduction equal to 7.65% of net SE earnings. Thus the net earnings for determining the SE tax is the regular net earnings from self employment multiplied by .9235 (100% less 7.65%). **CAUTION:** If the taxpayer is receiving a premium assistance credit under the Affordable Care Act the following calculation will require several iterations in conjunction with calculation for the credit until the difference is within $1.

The computation does not include the additional 0.9 percent Medicare tax on the self-employment income of certain high-income taxpayers. (Code Sec. 1402(a)(12))

Example *– For 2019, the SE tax rate is 15.3%. Peter has 2019 self-employment income of $75,000. His SE tax would be $10,597 ($75,000 x .9235 x .153). For 2019 50% of the SE tax is allowed as a deduction arriving at AGI (Sec. 164(f) deduction).*

Figuring the maximum Contribution – The maximum contribution is 25% of SE Income (net profit from the business under which the plan is established) minus the SE tax deduction allowed by Sec 164(f) and the retirement contribution itself. Using some math (see box on right) we find that actually equates to 20% of SE Income.

Where: X = SE Retirement Contribution.
Y = SE Income net of 50% deduction

$X = .25\,(Y - X)$

$X = .25Y - .25X$

$1.25X = .25Y$

$X = .25Y/1.25$

$X = .2Y$

Max Contribution = 20% of SE Income

Example – *Continuing the example from above, Peter's maximum contribution for the year would be determined as follows:*

Net SE Income		*75,000*
Net SE Income x .9235	*69,263*	
SE Tax (69,263 x .153)	*10,597*	
SE Tax times 50%		*< 5,299>*
Net		*69,701*
Max Contribution (.2 x 69,701)		*13,940*

Proof:

Net SE Income	*75,000*
§164(f) SE Tax deduction	*<5,299>*
Contribution	*<13,940>*
Net	*55,761*
Max. Contribution Rate	*x .25*
Max. Contribution	*13,940*

Common Law Employees - For purposes of a Keogh plan, a self-employed individual is both an "employer" and an "employee." A "common law employee" performs services for an employer who has the right to control and direct both the results of the work and how it is done. For Keogh plan purposes, common law employees are not self-employed with respect to income from their work, even if that income is self-employment income for social security purposes. Thus, such common law employees as ***ministers, members of religious orders, and full-time insurance sales people*** may not establish Keogh plans with respect to their earnings from those sources.

Limits on Contributions to Defined Contribution Plans - The limits are inflation-adjusted in $1,000 increments. The maximum annual Keogh contribution to a defined contribution plan is ***the smaller of "25% of compensation"*** or:

Maximum Contribution – Defined Contribution Plans

2014	2015-16	2017	2018	2019	2020
$52,000	$53,000	$54,000	$55,000	$56,000	

If amount not shown, it was not available at publication date.

The maximum annual compensation that can be taken into account for qualified retirement plan purposes is inflation-adjusted in $5,000 increments.

Maximum Compensation Considered when Computing Deduction

2014	2015-16	2017	2018	2019	2020
$260,000	$265,000	$270,000	$275,000	$280,000	

If amount not shown, it was not available at publication date.

Profit-Sharing Plan: A profit-sharing plan contribution is limited to ***25% of compensation***. Annual contributions are discretionary.

Money Purchase Plan: A money purchase plan has a 25% contribution limit. **Annual contributions are mandatory.**

Profit-Sharing Plans are Generally the Best Option

With a contribution limit at 25%, Profit-Sharing Plans have the same contribution limit as Money Purchase Plans without the mandatory contribution requirement. Prior to 2001 profit sharing plans (PS) were limited to 15% and they were combined with money purchase plans (MP) to attain the 25% limit, 15% of the contribution being discretionary. The current 25% limit virtually makes stacked plans (15% PS and 10% MP) obsolete. However, older plans may still be in existence and must be funded correctly. Stacked plans still in existence should be converted to 25% profit sharing plans or 25% SEP plans.

TIMING OF KEOGH CONTRIBUTIONS: Contributions must be made by the ***EXTENDED DUE DATE*** of the return to which the contribution applies; the plan must be set up ***BEFORE YEAR-END*** of the year to which the contribution applies.

COVERAGE REQUIREMENTS: In general, an employee must be allowed to participate in a Keogh when:

(1) The employee reaches age 21, and

(2) The employee completes one year of service [two years of service if a plan provides 100% vesting (i.e., the right to an accrued benefit is completely nonforfeitable) after two years of service]. Sole proprietors who consider setting up Keogh plans which cover employees should be advised to consult a knowledgeable pension administrator.

REQUIRED DISTRIBUTIONS: If retirement occurs prior to age 70-1/2, distributions from a Keogh plan must begin by April 1 of the year after the participant turns 70-1/2. A Keogh participant who is still employed after age 70-1/2 must begin distributions by April 1 of the year that follows the year in which he/she *retires*, if allowed by the terms of the plan. However, for a five-percent owner the required beginning date is April 1 of the year following the year in which the individual reaches age 70-1/2, even if still working.

> *Definition of 5%-owner* - An employee of a corporation is a five-percent owner when the employee owns more than five percent of the employer's outstanding stock or stock possessing more than five percent of the total combined voting power of all of the employer's stock. When the employer is not a corporation, a five-percent owner is any employee who owns more than five percent of the capital or profits interest in the employer.

Thus, a non-corporate sole proprietor with a Keogh plan must begin distributions from the plan by April 1 of the year after he/she turns 70-1/2.

AGE LIMIT FOR CONTRIBUTIONS: Unlike an IRA there is no age limit for contributing to a Keogh account. Contributions can be made even if the taxpayer has reached age 70-1/2 and is taking required minimum distributions.

RETURNS AND REPORTING: The Keogh plan administrator or employer must file an annual return by the last day of the seventh month following the end of the plan year (July 31 for calendar year plans). Plans can easily obtain a 2-1/2 month extension by filing Form 5558, Application of Extension of Time to File Certain Employee Plan Returns. A one-participant SEP is not required to report under this requirement. ***Generally, self-employed plans will file a 5500 EZ (See Chapter 4.12).***

DIRECTOR FEES - KEOGH DENIED TO SHAREHOLDER-EMPLOYEE

A self-employed individual is one who has net earnings from self-employment. "Net earnings from self-employment" means gross income from any trade or business, less deductions which are attributable to such trade or business. But a "trade or business" for this purpose excludes "the performance of services by an individual as an employee" (Code Sec. 1402(c)(2)).

Directors' fees are self-employment income (Rev Rul 72-86). Thus, since directors' fees are self-employment income, a corporate director may establish a Keogh plan based on directors' fees.

An officer of a corporation who performs more than minor services and receives remuneration for such services is a considered an employee. A director of a corporation in his capacity as such is not an employee of the corporation (Code Sec. 3121(d)(1)) (Reg § 31.3121(d)-1(b)).

The Tax Court has held that director fees paid by a company to its president, sole shareholder, and sole director were actually wages paid for his day-to-day involvement in running the business. Since the fees were wages, he had no self- employment income and thus couldn't deduct contributions he made to a self- employed Keogh-type pension plan. Burbach, TC Memo 2019-17

CALIFORNIA DIFFERENCES

California conforms to Federal treatment but has no annual return filing requirement.

NOTES

ANNUAL RETURN – ONE PARTICIPANT PENSION PLANS

Due Date: **July 31st** (calendar year plans)
Form: Generally Form **5500-EZ**
Extension: 2-1/2 Months – Form 5558
Filing Required if:

- Assets of all related plans **exceed $250,000**, or
- It is the final year of the plan.
- Certain foreign plans – see 5500-EZ instructions

Late filing penalties - **$25 per day** up to $15,000 maximum

RAPID FINDER

Penalty Relief	4.12.02

Related IRS Publications and Forms

- **Form 5500-EZ** – Annual Return of A One Participant Plan (Owners/Partners and Their Spouses) Retirement Plan or A Foreign Plan
- **Form 5558** – Application for Extension to Time to File Certain Employee Plan Returns

One-participant plans with assets of $250,000 or less as of the close of the plan year do not have to file a return for that year. For example, a calendar year plan with assets of $265,000 on Dec. 31, 2018 had a 2018 filing requirement, but if the same plan's assets were $240,000 on Dec. 31, 2019, no filing is required for 2019.

ABOUT RETURNS AND REPORTING:

The Keogh plan administrator or employer must file an annual return by the last day of the seventh month following the end of the plan year (July 31 for calendar year plans). Plans can easily obtain a 2-1/2 month extension by filing Form 5558, Application of Extension of Time to File Certain Employee Plan Returns. One participant SEP is not required to report under this requirement. ***Generally, self-employed plans will file a 5500-EZ.***

Mandatory Electronic Filing of Form 5500 Annual Return/Reports (but not 5500-EZ) - Under the Department of Labor's Final Rule on Annual Reporting and Disclosure, Form 5500 Annual Returns/Reports must be filed electronically. The all-electronic EFAST2 system allows the public to submit and access filings online at www.efast.dol.gov.

Filers and preparers can register for an account, complete the required forms and schedules online (in multiple sessions), print a copy for their records and submit it at no cost.

CAUTION
The Form 5500-EZ cannot be submitted electronically. A "one-participant" plan (see the instructions for the Form 5500-SF) that is eligible to file Form 5500-EZ and is not required to file under Title I of ERISA may elect to file Form 5500-SF electronically with EFAST2 rather than filing a Form 5500-EZ on paper with the IRS. Such a "one-participant plan" that is not eligible to file Form 5500-SF must file Form 5500-EZ on paper with the IRS. For more information on filing the Form 5500-EZ, see the instructions for Form 5500-EZ.

QUALIFICATIONS FOR USING THE 5500-EZ:

To use the EZ form, the plan must be a defined benefit pension plan or a defined contribution profit-sharing or money purchase pension plan, other than an Employee Stock Ownership Plan (ESOP), that meets the following requirements:

(1) The plan covers: (a) only the taxpayer and the taxpayer's spouse, and the business (whether incorporated or unincorporated) is wholly owned by the taxpayer, or the taxpayer and his spouse, or (b) only partners in a business partnership, or the partners and their spouses;
(2) The plan meets the Code Sec. 410(b) minimum coverage requirements without being combined with any other plan that covers other employees of the same business;
(3) The plan does not provide benefits for anyone but the owner, the owner and his spouse, or one or more partners and their spouses;
(4) The plan does not cover a business that is a member of an affiliated service group, a controlled group of corporations, or a group of businesses under common control; and
(5) The plan does not cover a business that leases employees.

If the plan is ineligible to use Form 5500-EZ, then Form 5500, and detailed schedules, must be used.

WHO MUST FILE FORM 5500-EZ

If the above requirements are met and the plan had more than $250,000 in assets at the end of the plan year, Form 5500-EZ must be filed. Note: A taxpayer who has more than one one-participant plan must combine the plans' assets for purposes of the $250,000 test.

Final plan year - All one-participant plans should file the Form 5500-EZ for their final plan year indicating that all assets have been distributed. The final plan year is the year in which distribution of all plan assets is completed. Check the "final return" box at the top of Form 5500-EZ if all assets under the plan(s) (including insurance/annuity contracts) have been distributed to the participants and beneficiaries or distributed to another plan.

FILING DUE DATE: Form 5500-EZ must be filed by the last day of the seventh month following the end of the plan year (e.g., July 31 for calendar year plans) unless an extension is granted. If the filing due date is a Saturday, Sunday, or legal holiday, the return may be filed on the next day that is not a Saturday, Sunday, or legal holiday.

EXTENSION: A one-time extension to file Form 5500-EZ of up to 2-1/2 months may be obtained by filing Form 5558. A copy of Form 5558 must be retained with the plan's records. One-participant plans automatically receive an extension of time to file Form 5500-EZ (without filing a Form 5558) if the following conditions are met:

- The plan year and the employer's tax year are the same;
- The employer has been granted an extension to file its Federal income tax return to a date later than the normal due date for filing the Form 5500-EZ; and
- A copy of the IRS extension to file the income tax return is retained with the plan's records.

Caution: *If the filing deadline for any plan is extended automatically, it cannot be extended further by filing a Form 5558 after the original due date.*

LATE FILING PENALTIES: The Internal Revenue Code imposes a penalty of $25 a day (up to $15,000) for not filing returns in connection with pension, profit-sharing, etc., plans by the required due date. Experience has shown the penalties will be abated for reasonable cause.

LATE FILER PENALTY RELIEF: The IRS provides penalty relief for one-participant plans (owner-spouse) including partnerships. The relief is available to the plan administrator or plan sponsor of: (1) certain small business (owner-spouse) plans and plans of business partnerships, and (2) certain foreign plans. Under the program, no penalty is required to be paid for late filing. To participate in the relief, the taxpayer:

- Must include a Form 14704, Transmittal Schedule – Form 5500-EZ Delinquent Filer Penalty Relief Program, with each submission.
- Must submit the delinquent return on the Form 5500-EZ that applied for the plan year for which the return was delinquent. However, for plan years prior to 1990, the current year form may be used.
- Must file the returns manually; they cannot be filed through the Department of Labors EFAST2 filing system.
- Must mark in red letters in the top margin of the first page of the return (above the title of the form): "Delinquent Return Submitted under Rev. Proc. 2015-32, Eligible for Penalty Relief."
- Each submission must be accompanied with a payment of $500 for each year's return, up to a maximum of $1,500 per plan.

Send submissions to Internal Revenue Service, 1973 North Rulon White Blvd., Ogden, UT 84404-0020.

For additional information on the penalty relief program, see Rev Proc 2015-32, which can be found at https://www.irs.gov/irb/2015-24_IRB.

USE FILLABLE FORM: Form 5500-EZ is a scannable form. Although a manually prepared form can be submitted, it is best practice to download the fillable form from the IRS website, complete it on your computer, and then print, sign and mail it.

Paid Preparer Information Optional - While Treasury regulations require all paid tax return preparers to obtain a Paid Preparer Tax Identification Number (PTIN) and put the PTIN on all tax forms, currently the Form 5500 series does not provide an entry field for a preparer's PTIN.

WHERE TO FILE:

Paper filed returns - The plan administrator or the employer (owner) must sign and date the return. The Form 5500-EZ is filed with IRS at Ogden, Utah 84201-0020.

Electronically filed returns - One-participant plans may satisfy their filing obligation under the Code by filing Form 5500-SF (short-form) electronically under EFAST2 (in place of Form 5500-EZ), provided that the plan covered fewer than 100 participants at the beginning of the plan year. Form 5500-SF must be used and filed electronically instead of filing a paper Form 5500-EZ if the filer is required to file at least 250 returns of any type with the IRS, including Forms W-2 and 1099, income tax returns, employment tax returns, and excise tax returns, during the calendar year that includes the first day of the applicable plan year. Eligible one-participant plans need complete only the following questions on the Form 5500-SF:

Part I, lines A, B, and C;	Part II, lines 1a–5b, 5d(1) & (2), 5e;	Part III, lines 7a–c and 8a;
Part IV, line 9a;	Part V, line 10g; and	Part VI, lines 11–12e

The EFAST2 filing system and additional instructions are available at: www.efast.dol.gov.

California has no similar filing requirement.

SIMPLIFIED EMPLOYEE PENSION PLANS

Overview

- **Contribution Due Date: Extended Due Date**
- **Plan Establishment**: Plan may be set up and funded before the expiration of the extended due date for the taxpayer's return.
- **Contribution $ Limit (2019): $56,000**
- **Contribution % Limit**: **25% (20% of the net)**
- **Contributions are allowed after age 70.5** (Code Sec. 219(b)(2))

The Details

A Simplified Employee Pension (SEP) is an alternative to a Keogh plan, designed to be easily administered to meet the needs of a small business. The limit on SEP contributions is similar to that of the Keogh profit-sharing plan.

A sole proprietor who has a Keogh plan can terminate the plan and roll over the funds to a SEP (***LR 8033090***). Unlike the Keogh, a SEP can be set up after the end of the plan year. A 5500-series return is not required to be filed for a SEP covering only one person. However, if employees are covered, certain notifications are required.

IMPORTANT NOTES

(1) A SEP plan is a qualified plan and the amount contributed to a SEP plan is **NOT** treated as an IRA contribution for purposes of limiting traditional and Roth IRA contributions where the taxpayer would otherwise qualify for traditional or Roth IRA contributions. However, due to the "active participation" rules, deductions of contributions to a traditional IRA by a SEP participant may be limited depending on the individual's AGI.

(2) When figuring the taxable and non-taxable portions of an IRA distribution or conversion, the SEP IS treated as an IRA and is included in the rule where "all IRAs are treated as one."

(3) A SEP plan is considered an IRA for purposes of limiting IRA rollovers to one rollover per 12-month period. See Chapter 4.04.

SELF-EMPLOYED INDIVIDUALS: An individual in business for himself or herself, and whose business isn't incorporated, is self-employed. Sole proprietors and partners are self-employed. For retirement plan purposes, sole proprietors are treated as both an employer and an employee. (Pub 560, pg 5).

NET EARNINGS FROM SELF-EMPLOYMENT: Net earnings include a partner's distributive share of partnership income or loss (other than separately stated items, such as capital gains and losses). **It doesn't include income passed through to shareholders of S corporations**. (Pub 560, pg 5).

EMPLOYEE PARTICIPATION AND VESTING: An employer (this can be a self-employed person) can contribute to a retirement account established for each employee who:

(1) Is at least 21 years of age;
(2) Has worked for the employer in at least three of the immediately preceding five calendar years;
(3) Has received at least the minimum compensation (see table) in the calendar year.

	2009-2014	2015+
Minimum Compensation	$550	$600

All eligible employees must participate in the plan, but nonresident aliens with no U.S. earned income and employees covered by collective bargaining units are not required to be covered. The SEP plan must be written, and contributions must be 100% vested when made (i.e., nonforfeitable). A SEP cannot discriminate in favor of officers, shareholders, self-employed individuals, or highly-compensated employees.

An employee participating in a SEP can be allowed a deduction for his/her own contributions to an IRA subject to the limitations on AGI for active participants (a SEP is a qualified plan under the IRA active-participation rules).

CONTRIBUTION LIMITS: The maximum annual contribution to a SEP plan is ***the lesser of "25% of compensation"*** (20% of net profit after deducting the SEP contribution for the self-employed proprietor's contribution) or:

2013	2014	2015-16	2017	2018	2019	2020
$51,000	$52,000	$53,000	$54,000	$55,000	$56,000	

If amount not shown, it was not available at publication date.

SEP contributions on behalf of an owner-employee are computed in the same manner as for a profit-sharing Keogh.

Computing the maximum contribution – The maximum contribution for a self-employed individual is determined in the same manner as a SE Retirement (Keogh) plan. For examples see page 4.11.02.

No catch-up contribution - The catch-up contribution allowed for age 50 and over participants of Traditional and Roth IRAs is not allowed for SEP-IRAs.

EXCESS CONTRIBUTIONS: An employee may avoid the 6% excise tax on excess SEP contributions, and the 10% early distribution tax on the early withdrawal of the excess contributions, by *withdrawing* excess contributions from his SEP-IRA *on or before* the due date (including extensions) for filing the employee's income tax return for the tax year for which the contributions were made (Code Sec. 408(d)(4)).

EFFECT OF SIMPLE IRA CONTRIBUTIONS ON SEP CONTRIBUTION LIMITS: Contribution limits of SIMPLE and SEP plans are separate, and therefore, an employee participating in a SIMPLE-IRA who is also self-employed with a SEP for the business can make the maximum allowed salary deferral of $13,000 for 2019 ($12,500 2015 - 2018) plus a $3,000 (2015 - 2019) catch-up contribution for the SIMPLE-IRA; the employer must also contribute to the SIMPLE plan. The contributions to the SEP plan (that is not a SARSEP) are not reduced by the contributions of either the employee or the employer to the SIMPLE IRA plan. Thus for 2019 the individual can make up to a $56,000 SEP contribution. If the business sponsors another defined contribution plan in addition to the SEP, the individual's contributions for himself to all of the business's plans would be limited to 25% of net SE earnings, up to $56,000 for 2019.

ELECTIVE DEFERRAL SEP CONTRIBUTIONS (SARSEP): An employer currently is not allowed to establish a SARSEP. However, those participating (including new participants--i.e., employees hired after '96) in a plan established pre-1997 can continue to contribute. The allowable deferral amounts are inflation adjusted for years after 2006 in $500 increments.

SARSEP Elective Deferral Contribution Limits

Year	2013-14	2015-17	2018	2019	2020
Under Age 50	17,500	18,000	18,500	19,000	
Age 50 and over	23,000	24,000	24,500	25,000	

If amounts not shown, they were not available at publication date.

Elective deferrals are available only if:

(1) At least 50% of the employees eligible to participate in the SEP elected deferral contributions.
(2) The employer had no more than 25 employees who were eligible to participate in the SEP at any time during the preceding year.
(3) The average deferral percentage for highly-compensated employees wasn't more than 125% of the average deferral percentage of all other employees who were eligible to participate.

TIME FOR MAKING CONTRIBUTIONS: SEP contributions are timely if made by the extended due date of the employer's tax return. A self-employed individual has until his extended return due date both to establish and to make deductible contributions to a Simplified Employee Pension (SEP). (Code Sec. 404(h)(1)(B))

WHERE TO DEDUCT: SEP contributions made on behalf of employees are deducted by a sole proprietor as an expense on Schedule C. The sole proprietor's own contribution to the SEP is deducted as an adjustment to income on Form 1040, Schedule 1, line 15 (draft 2019).

DISTRIBUTIONS: Distributions from SEPs are taxed in much the same way as IRA distributions. SEP distributions are not eligible for special averaging techniques (i.e., 10-year averaging for lump sums received by employees born before 1/2/1936). The early withdrawal penalty applies to distributions prior to a participant's reaching age 59-1/2.

CONTRIBUTIONS AFTER AGE 70.5: SEPs are IRAs, rather than defined contribution plans, and thus Code Sec. 411(b)(2)(A)'s requirement that benefits continue to accrue to an employee's account regardless of the employee's age does not apply. The general rule for IRAs is that no deduction for an IRA contribution is allowed for a beneficiary who has reached age 70-1/2. However, for an employer contribution to a SEP, this rule does not apply (Code Sec. 219(b)(2)).

Thus, employers must make contributions to the account of employees who are 70-1/2 or older under the same participation rules used for other employees, despite the fact that these employees are receiving required minimum distributions from the SEP. A self-employed individual age 70-1/2 or over can also make SEP contributions for himself or herself, but must take required minimum distributions. (Pub 560, Chp 2, Pg 6)

UNRELATED BUSINESS INCOME: See chapter 4.05

CALIFORNIA DIFFERENCES

California conforms to Federal treatment.

401(k) PLANS

Overview

Type of Plan: Employer
2019 Contribution Limits: $19,000 ($25,000 if age 50 and over)
Special Provisions: Loans and hardship distributions
Premature Distribution Penalty: Yes

Cash or deferred arrangements (CODAs), popularly known as "401(k)" plans (referring to the code section that covers such plans) allow an employee to choose whether the employer should pay a certain amount directly to the employee in cash, or instead pay that amount on the employee's behalf into a qualified trust as a means for the employee to save for retirement. However, the amount an employee can elect to defer for a tax year is capped (see table below).

Pubs Forms

Related IRS Publications and Forms

- **Pub 575** – Pension and Annuity Income
- **Pub 4222** - 401(k) Plans for Small Businesses
- **Form 5329** - Additional Taxes on Qualified Plans

The Details

401(k) PLAN CONTRIBUTION LIMITS

In a "cash or deferred arrangement" (CODA) eligible employees are entitled to elect to receive part of their compensation from their employer in cash or have it contributed to the plan on a pre-tax basis. This type of arrangement is often referred to as a 401(k) plan;

401(k) is the IRC section that permits such plans. There is an annual limit to the amount of deferred compensation that each employee may contribute to the 401(k) plan.

401(k) Contribution Limits

Year	2015-17	2018	2019	2020
Under Age 50	18,000	18,500	19,000	
Age 50 and over	24,000	24,500	25,000	

If amounts not shown, they were not available at publication date.

Catch-Up Contributions - Individuals age 50 and over can make additional annual "catch-up" contributions to salary reduction plans including 401(k) plans, provided the plan permits catch-up contributions. The allowable "catch-up" amount is indexed for inflation in $500 increments.

Catch-Up Contributions Exempt from Regular Limits - Catch-up contributions are exempt from the regular dollar limits on deferrals. Provided that all 401(k) plan participants are permitted to make catch-up contributions, they are exempt from nondiscrimination rules.

Additional Limits

Year	2017	2018		2019	2020
Deferral Limit	54,000	55,000		56,000	
Compensation Limit	270,000	275,000		280,000	

If amounts not shown, they were not available at publication date.

Additional limits – In addition to the limit on elective deferrals, annual contributions to all of an employee's retirement accounts – including elective deferrals, employee contributions, employer matching and discretionary contributions and allocations of forfeitures to the accounts - may not exceed the lesser of 100% of the employee's compensation or the amounts shown in the table. Also, the amount of compensation that can be taken into account when determining employer and employee contributions is limited to the amounts indicated in the table.

MULTIPLE 401(k) PLAN CONTRIBUTION LIMITS

It is not uncommon for individuals to have multiple employers, each with a 401(k) plan. This can possibly create a situation where the employee makes an excess elective deferred compensation contribution. The maximum annual contribution for 2019 is 19,000 ($25,000 if age 50 and over).

The limit does not just apply to each 401(k) plan to which the employee makes elective deferrals, but instead applies to the aggregate amount of all the elective deferrals made by the employee for the year to all plans which permit such contributions, including:

- Code Sec. 401(k) deferred compensation plans,
- Code Sec. 408(k) SEP IRAs,
- Code Sec. 408(p)(2) SIMPLE Plans, and

- Code Sec. 403(b) annuity plans (TSAs)

However, Code Sec. 457 plans (government plans) are not included in the overall deferral limitations

> ***Example -*** *Sam is a 45-year-old individual who participates in employer Y's qualified cash or deferred arrangement. For January through July Sam deferred $13,800 into Y's qualified cash or deferred arrangement. Sam subsequently leaves employer Y's employment and begins working for employer Z. During the remainder of 2019, Sam defers an additional $6,000 under Z's qualified cash or deferred arrangement. Sam's elective deferral contributions for 2019 total $19,800. Since Sam is under age 50, Sam's maximum allowable contribution for 2019 is $19,000 and he has $800 in excess contributions.*

To the extent taxable, the distribution of the excess deferral is taxable in the year distributed (Reg. Sec. 1.402(g)-1(e)(8)(i)). Thus, an excess deferral for 2019 distributed in 2020 would be taxable in 2020. Such a distribution would appear on a 1099-R for 2020 with a code 8. It is not subject to the early distribution penalty of Sec 72(t).

Correcting Excess Contributions - After the close of the tax year, but not later than April 15 (or earlier as specified in the plan), the taxpayer may notify each plan under which elective deferral contributions were received by the plan for the year. The notification must also identify the extent, if any, the contribution consisted of designated Roth contributions (Reg. Sec. 1.402(g)-1(e)(2)(i)). No later than April 15 after the close of the taxable year, the plan may distribute the excess and any earnings associated with the excess contribution to the taxpayer (Reg. Sec. 1.402(g)-1(e)(2)(ii)).

CAUTION

Here is the result of not correcting an excess 401(k) contribution before April 15 of the subsequent year.

- The excess is taxable in the year of the excess contribution (but not subject to the premature distribution penalty).
- Whenever the excess is withdrawn it is taxable again (i.e. no basis is established by virtue of the excess being taxed).

PLAN QUALIFICATION

A 401(k) plan must meet all of the normal tax qualifications rules, nondiscrimination rules and in addition, all of the following requirements:

(1) Amounts must not be distributed except by reason of:
  - (a) Retirement, death, disability, or other separation from service,
  - (b) Hardship,
  - (c) Attaining the age of 59-1/2 for profit-sharing or stock bonus plans,
  - (d) In a lump sum upon termination of the plan, or
  - (e) In a lump sum upon the employer's disposition of (i) substantially all of its trade or business assets, or (ii) subsidiary.

(2) Employee's elected contributions must be nonforfeitable.
(3) Employee must be able to elect the employer's contribution be paid (a) in cash, or (b) as plan contribution.
(4) Elective deferral cannot exceed the inflation-adjusted annual limit (see chart above).
(5) Meet certain special nondiscrimination rules for actual deferral percentage tests, so highly compensated employees can't elect a disproportionately higher amount of their salary.

REQUIRED MINIMUM DISTRIBUTIONS (RMD)

In general, distributions from a qualified plan must begin no later than April 1 of the year following the year in which the employee attains age 70 1/2 or (except in the case of a 5-percent owner), if later, retires. This date is called the required beginning date. (Code Section 401(a)(9)).

HARDSHIP DISTRIBUTIONS

If the particular plan permits, participants are allowed to take a "hardship" distribution from the plan. Generally a "hardship" distribution is described as cash withdrawal to satisfy an immediate and heavy financial need of the employee (plan participant) and is necessary to satisfy the financial need. Tax regulation 1.401(k)-(1)(d)(3)(iii)(B) specifies the following as distributions on account of an immediate and heavy financial need:

(1) Expenses for (or necessary to obtain) medical care that would be deductible under the Code Sec. 213(d) (which includes expenses for the care of a spouse, dependent or primary beneficiary under the plan);
(2) Costs directly related to the purchase of a principal residence for the employee (excluding mortgage payments);

(3) Payment of tuition, related educational fees, and room and board expenses, for up to the next 12 months of post-secondary education for the employee, or the employee's spouse, children, dependents, or primary beneficiary under the plan;
(4) Payments necessary to prevent the eviction of the employee from the employee's principal residence, or foreclosure on the mortgage on that residence;
(5) Payments for burial or funeral expenses for the employee's deceased parent, spouse, children, dependents or primary beneficiary under the plan; or
(6) Expenses for the repair of damage to the employee's principal residence that would qualify for the casualty deduction.

Proposed Reg. 1.401(k)-(1)(d)(3)(iii)(B) applies to distributions made in plan years beginning after December 31, 2018 says that a distribution is not treated as necessary to satisfy an immediate and heavy financial need of an employee unless the employee has obtained all other currently available distributions (including distributions of ESOP dividends under section 404(k), but not hardship distributions) under the plan and all other plans of deferred compensation, whether qualified or nonqualified, maintained by the employer. In addition, for a distribution that is made on or after January 1, 2020, the employee must represent (in writing, by an electronic medium, or in such other form as may be prescribed by the Commissioner) that he or she has insufficient cash or other liquid assets to satisfy the need. The plan administrator may rely on the employee's representation unless the plan administrator has actual knowledge to the contrary.

Caution: Even though hardship withdrawals are allowed, they are still taxable distributions, and unless they meet certain exceptions, are also subject to the early withdrawal penalty. Other rules include the following:

(1) For plan years beginning before 2019, an employee is barred for 6 months from making elective and employee contributions in order to qualify as a hardship distribution. This provision was removed in the Bipartisan Budget Act of 2018 (P.L. 115-123), effective for plan years beginning after 2018.
(2) No hardship distributions will be eligible for rollovers. The 20% federal withholding tax requirement does not apply to hardship distributions.

Disaster Areas – In some cases an individual who took a hardship distribution to buy or build a principal residence in a designated disaster area, and the residence wasn't purchased or constructed due to the disaster, is allowed to recontribute the amount as a rollover contribution to an eligible retirement plan. Thus, the distribution that is rolled over would not be taxable. The hardship distribution and recontribution must fall within certain dates as shown in the table below for the California wildfires and 2017 Hurricanes Harvey, Irma and Maria. (Bipartisan Budget Act of 2018, Act Secs 20101 and 20102(b) and Disaster Tax Relief and Airport and Airway Extension Act of 2017, Act Secs. 501 and 502(b))

Designated Disaster	Distribution Received	Recontribution Date
California Wildfires	After 3/31/17 and Before 1/15/18	10/8/17 - 6/30/18
Hurricanes Harvey, Irma or Maria	After 2/28/17 and Before 9/21/17	8/23/17 - 2/28/18

EMPLOYEE PLAN LOANS

A loan from a qualified plan isn't treated as a taxable distribution if it is:
(1) Repaid within five years (except for certain home loans), and
(2) Does not exceed the lesser of:
  a. $50,000, or
  b. The greater of:
    i. ½ of the nonforfeitable accrued benefit in the plan, or
    ii. $10,000

The plan loan must be amortized in substantially level payments, at least quarterly, over the term of the loan. The level amortization requirement does not apply while an employee is on leave without pay for up to one year. (Code Sec 72(p)(2))

Disaster Areas– In some cases, not all, the maximum loan amount is increased to $100,000 and the payback period extended in federally declared disaster areas. Be sure to double check for special provisions in these cases.

CAUTION – CLIENT ALERT!

401(k) loans typically don't survive a change of employment. When the client leaves their employment, most plans require the loan to be repaid or treat the borrowed amount as a taxable distribution from the plan. This is further complicated if the client is under age 59-1/2, when the distribution is treated as a premature distribution subject to the premature distribution penalty. Caution your clients if an employment change is in their future and they cannot repay the loan. They should carefully consider the tax impact before switching jobs.

ROTH CONTRIBUTION PROGRAM

Employers are allowed to create a type of elective deferral program, referred to as a "Qualified Roth Contribution Program," under which participants contributing to a 401(k) plan designate a portion of their contributions as Roth contributions. (See Chapter 4.06 for details.)

ROTH CONVERSIONS

A deferral plan under section 401(k) (including the Thrift Savings Plan), 403(b) or 457(b) governmental plan can have Roth accounts that allow participants to save on a Roth basis. That is, they can make after-tax contributions to the plan and all the principal and earnings are tax-free when distributed. Plans have been able to allow participants to convert their pre-tax accounts to Roth accounts, but only with respect to money they have a right to take out of the plan, usually because they have reached age 59½ or separated from service.

The American Taxpayer Relief Act (ATRA) of 2012 allows any amount in a non-Roth account to be converted to a Roth account in the same plan, whether or not the amount is distributable. The amount converted would be subject to regular income tax. This provision was put in the law as a money-raiser, with over $12 billion of additional tax projected to be collected from taxpayers taking advantage of the liberalized conversion rules in the 10 years after enactment.

INVOLUNTARY CASHOUTS

"Default Option" for distributions from qualified plans (Code Sec 401(a)(31)) - The plan administrator must provide for a default rollover of any involuntary distributions from a qualified plan, unless the participant specifically makes another election. *To remain qualified, plans must provide that if:*

(1) *A distribution of a nonforfeitable accrued benefit of less than $5,000 but more than $1,000 is made, and*

(2) *The distributee does not make an election to have the distribution paid directly to another qualified plan or IRA, and does not elect to receive the distribution directly, the plan administrator will make the transfer to an IRA and notify the employee.*

ADVANTAGES OF 401(k) PLANS

In several important ways, 401(k) plans are superior savings vehicles to IRAs:

- **Employer Matching** - Most employers match part of their workers' 401(k) contributions, resulting in potentially greater build-up of savings in a 401(k) plan than in an IRA.
- **Tax-Free Loans** - Participants in 401(k) plans can take tax-free loans from their account, which is not permitted for IRAs. (Individuals have unlimited ability, subject to a 10 percent penalty tax, to withdraw funds from an IRA, while 401(k) withdrawals prior to retirement or change of employer typically require a demonstration of hardship.) Although extensive borrowing can negate the tax-deferred build-up of savings, the 401(k)-loan feature is highly prized by employees who want the security of knowing they have access to at least some of their plan savings.
- **Automatic Deduction** - The payroll reduction feature of the 401(k) results in gradual forced saving of money that the employee does not have the chance to spend. Brokerage houses have automatic deposit programs for IRAs, but they are far less commonly used.
- **Higher Contribution Limits** – The most obvious difference is that the annual maximum contribution to a 401(k) plan is more than three times the IRA limit for participants under age 50 and even more for those 50 and older.

401(K) ESCALATOR FEATURES

As part of the "Savings Initiative" guidance (Rev Rul 2009-30), employers may modify their automatic 401(k) enrollment plans to include a default escalator feature that will automatically periodically increase an employee's 401(k) contribution without the employee's affirmative election. Default contributions are treated as elective contributions. The ruling clarifies that (1) an automatic increase in a default contribution percentage may be based in part on increases in an employee's plan compensation, and (2) the default contribution percentage for all eligible employees may be increased on other than the first day of the plan year. These situations were illustrated as follows in the Revenue Ruling:

Plan A – Default first plan year contribution is 4%. (Note: The maximum default contribution can never exceed 11%). Each subsequent plan year the contribution is increased by the greater of:

(1) One percentage point, or
(2) A number of percentage points calculated as 30% of the percentage increase in the eligible employee's base pay for such first pay period over the eligible employee's base pay for the immediately preceding pay period (rounded to the nearest whole percentage).

> ***Example*** *– Base pay at start of period was $3,000 per month and the base pay for the period immediately preceding the adjustment is $3,300. The percentage increase is 10%. 30% of the increase is 3% (30% of 10%). Thus the employee's 401(k) contribution will automatically be increased by 3 percentage points, but not to exceed a contribution rate of 11%. Had this been the employee's second year, the contribution percentage would have increased to 7% (4% plus 3%).*

Plan B – Default first year contribution is 3%. (Note: The maximum default contribution under this plan can never exceed 10%). Each subsequent year the contribution is increased by 1 percentage point until the maximum of 10% is reached. The increase is effective the first pay period after April 1. This type of plan is permitted even though the default contribution percentage increases on a date other than the first day of the plan year.

Employee may elect out - Any eligible employee may elect at any time not to make elective contributions (including not to make default contributions) or to have the employer contribute a different percentage of plan compensation.

UNUSED PAID TIME OFF RETIREMENT PLAN CONTRIBUTIONS

As part of the "Savings Initiative," guidance (Rev Rul 2009-31 and Rev Rul 2009-32) provides that qualified retirement plans (401(k) and profit-sharing plans) can be modified to allow annual contributions of an employee's unused paid time off (PTO). One ruling covers the contribution of unused PTO, determined as of the end of the plan year, and the other deals with post-severance contribution of accumulated and unused PTO.

Annual Unused PTO – The company's PTO and Profit-Sharing Plan is amended to provide that unused PTO cannot be carried over to a subsequent year. The dollar equivalent of the PTO is contributed to the profit-sharing plan, not to exceed the annual contribution limits (or less if the employee so elects). Any excess is paid to the employee by February 28 of the subsequent year. (Rev Rul 2009-31)

Unused PTO, Terminated Employment – The company's PTO and Profit Sharing Plan is amended to provide that unused PTO is allocated to the terminated employee's profit sharing account, not to exceed the annual contribution limits (or less if the employee so elects), and any excess is paid to the employee within 60 days of termination. (Rev Rul 2009-32)

CALIFORNIA DIFFERENCES

California conforms to the Federal treatment of 401(k) plans.

NOTES

TAX-SHELTERED ANNUITIES

- **Contribution Limits**: **$19,000 (2019)** for Elective Deferrals
- **Age 50+** Make-Up Contributions**: $6,000 (2015 - 2019)**
- **15-Year Employment** Service: **$3,000 Additional** Contribution
- **Premature Pension Distribution Penalty**: Applies
- **RMD Rules:** Generally Apply

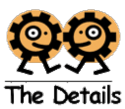
- **Pub 571** – Tax-Sheltered Annuity Programs for Employee of Public Schools and Certain Tax-Exempt Organizations
- **Pub 575 –** Pension and Annuity Income
- **Form 5329** - Additional Taxes on Qualified Plans
- **Sec 403(b)**



Employees of tax-exempt educational, charitable and religious organizations or public schools get special tax advantages from annuities bought for them, or contributions made to custodial accounts, by the exempt employer. These plans are most frequently encountered when dealing with public school teachers.

CONTRIBUTION LIMITS

Contributions to 403(b) accounts are limited to the **lesser** of:

(1) the ***limit on annual additions,*** which is the lesser of 100% of the employee's compensation or $56,000 for 2019 or

(2) the ***limit on elective deferrals*** (see table below).

If the only contributions were elective deferrals made under a salary reduction agreement, the maximum amount that can be contributed is the lesser of the annual additions limit or the elective deferrals limit.

If only nonelective contributions were made, the annual additions limit applies. Nonelective contributions are employer contributions that are not made under a salary reduction agreement, and include matching contributions, discretionary contributions, and mandatory contributions from the employer.

If contributions included a combination of elective deferrals and employer's nonelective contributions, the maximum that can be contributed is the limit on annual additions.

The elective deferral limits are the same as for other defined contribution plans, such as the 401(k), including allowing individuals age 50 and over to make additional contributions.

403(b) Elective Deferral Contribution Limits [(1)]

Year	2013	2014	2015-17	2018	2019	2020
Under Age 50	17,500	17,500	18,000	18,500	19,000	
Age 50 and over	23,000	23,000	24,000	24,500	25,000	

[(1)] *Employees with 15 years or more of service with a public school, hospital, home health service agency, health and welfare service agency, church or association of churches are eligible for an additional amount ($3,000 in most cases, but see IRC § 402(g)(7)).*

Worksheets are available in IRS Pub 571 to assist in determining the contribution limits.

CAUTION – AGGREGATE CONTRIBUTION LIMITS

The contribution limits to 403(b) TSA plans, 408(p)(2) SIMPLE plans, 408(k) SEP IRAs and 401(k) plans apply on an aggregate basis. That is the total to all four plans cannot exceed the annual limit. See chapter 4.14 for corrective distributions.

PREMATURE DISTRIBUTION

403(b) plans are subject to the premature distribution penalty rules.

EMPLOYEE PLAN LOANS

A loan from a qualified plan isn't treated as a taxable distribution if it is:

(1) Repaid within five years (except for certain home loans), and
(2) Does not exceed the lesser of:
   a. $50,000, or
   b. The greater of:
      i. ½ of the nonforfeitable accrued benefit in the plan, or
      ii. $10,000.

The plan loan must be amortized in substantially level payments, at least quarterly, over the term of the loan. The level amortization requirement does not apply while an employee is on leave without pay for up to one year. (Code Sec 72(p)(2))

MINIMUM DISTRIBUTIONS

CAUTION!
Distributions from Tax-Sheltered Annuities (Code Sec. 403(b) accounts) do not satisfy the distribution requirements from IRAs and distributions from IRAs will not satisfy the distribution requirements from Section 403(b) contracts or accounts.

403(b) plans generally follow the same RMD requirements as other qualified plans. However, there are some exceptions:

- **IRS Letter Ruling 9345044 – Age 75** - IRS has privately ruled that participants in a tax-sheltered annuity plan maintained for teachers and other employees as authorized by a city's administrative code may defer distributions of their account balances until the earlier of age 75 or retirement.

  IRS said that a participant's required beginning date under the plan would be April 1 of the year following the later of the calendar year in which the participant attains age 70-1/2 or the calendar year in which the participant retires under Code Sec. 401(a)(9)(C). Therefore, deferral of distributions of an individual's account balance until the earlier of attainment of age 75 or the April 1 following the year of the participant's retirement satisfied the required beginning date requirements.

- **IRS Letter Ruling 8632058 – Pre-July 27, '87 Distributions** - In a private letter ruling that applied pre-July 27, '87 distribution rules, IRS approved a Code Sec. 403(b) annuity that permitted distributions beginning no later than age 75, in the form of a joint and 100% spousal survivor annuity.

ROTH CONVERSIONS

A deferral plan under section 401(k) (including the Thrift Savings Plan), 403(b) or 457(b) governmental plan can have Roth accounts that allow participants to save on a Roth basis. That is, they can make after-tax contributions to the plan and all the principal and earnings are tax-free when distributed. Plans have been able to allow participants to convert their pre-tax accounts to Roth accounts, but only with respect to money they had a right to take out of the plan, usually because they reached age 59½ or separated from service.

The American Taxpayer Relief Act (ATRA) of 2012 allows any amount in a non-Roth account to be converted to a Roth account in the same plan, whether or not the amount is distributable. The amount converted would be subject to regular income tax.

CALIFORNIA DIFFERENCES

California follows Federal Law, so no adjustment to federal adjusted gross income is required.

REQUIRED MINIMUM DISTRIBUTIONS

Age 70-1/2 and Beneficiary Minimum Distribution Rules

RAPID FINDER

Required Minimum Distribution (RMD):

- Beginning date is generally later of the following:
  - Year in which the taxpayer reaches age 70-1/2, or
  - In the case of qualified plans the year of retirement.
- Can wait until April 1st of the following year – but must take two distributions in that year
- Generally, use the Uniform Lifetime Table (except when spouse is more than 10 yrs younger)
- Annual RMD = (Account Balance 12/31 of Prior Year)/(Life Expectancy from IRS table)

Spouse as <u>Sole</u> Beneficiary:

- Roll into his or her own – then follow rules as if he or she had originally funded the IRA, or
- Distribute within five years of death, or
- Leave as is – decedent's name – begin distributions by later of 12/31 of subsequent year or 12/31 of the year the decedent would have turned 70-1/2 - avoids 10% penalty.

Other Beneficiaries:

- Distribute within five years of death, or
- Roll over (trustee-to-trustee) and take RMD for beneficiaries.
- Lifetime pay out based on oldest beneficiary
  - Can split IRA if split by the end of the year following the year of the decedent's death - then distribute over individual lifetimes

Penalty – 50% of the amount that should have been withdrawn and wasn't
Penalty Abatement – Possible with reasonable cause and corrective distributions
Delayed Check Cashing – Rev Rul 2019-19 – See chapter 4.10

SEE FLOW CHART ON PAGE 04.17.09

<u>REQUIRED MINIMUM DISTRIBUTIONS (RMDs)</u>: To prevent an individual from investing in tax-deferred retirement plans, including Traditional IRAs, but never withdrawing from the plans, the account owner is REQUIRED to take a MINIMUM (as calculated per regulations) DISTRIBUTION (RMD) beginning in the year the IRA owner reaches age 70.5 (unless he or she qualifies for the first year exception explained below). (Code Sec 401(a)(9)) In the case of a qualified plan, the first distribution must be taken no later than April 1 of the year following reaching age 70.5 (but see "Qualified Plan Required Beginning Date" below for exception). Failing to take the correct amount of minimum distribution (also known as excess accumulation) results in a penalty of 50% of the difference of what should have been withdrawn and what was withdrawn–but see page 04.17.02 for how a waiver of the penalty may be obtained.

<u>Uniform Distribution Method for Lifetime Payouts</u> **-** In general, the required minimum distribution for each year is determined by dividing the account balance as of the end of the preceding year by the age-based factor from the Uniform Lifetime Table (Reg § 1.401(a)(9)-5). This table is used regardless of the identity of the beneficiary or age differential between account owner and designated beneficiary, unless the account owner's spouse is the sole beneficiary and is more than 10 years younger than the account owner (see exception when spouse is more than 10 years younger than the owner later).

Uniform Lifetime Table

Age	Distrib Period	Age	Distrib Period	Age	Distrib Period	Age	Distrib Period	Age	Distrib Period	Age	Distrib Period
70	27.4	77	21.2	84	15.5	91	10.8	98	7.1	105	4.5
71	26.5	78	20.3	85	14.8	92	10.2	99	6.7	106	4.2
72	25.6	79	19.5	86	14.1	93	9.6	100	6.3	107	3.9
73	24.7	84	15.5	87	13.4	94	9.1	101	5.9	108	3.7
74	23.8	80	18.7	88	12.7	95	8.6	102	5.5	109	3.4
75	22.9	82	17.1	89	12.0	96	8.1	103	5.2	110	3.1
76	22.0	83	16.3	90	11.4	97	7.6	104	4.9	111	2.9

$$\frac{\textbf{TOTAL VALUE}^{(1)}}{\textbf{DISTRIBUTION PERIOD}^{(2)}} = \textbf{MINIMUM DISTRIBUTION}$$

(1) ***Determining Total Value:*** *The total value is based on the account's value at the end of the business day on December 31st of the* ***PRIOR*** *year. Although the RMD for the year can be taken from any one or a number of the taxpayer's IRA accounts (Reg §1.408-8, Q&A 9), the minimum distribution amount must be figured separately for each account, and then totaled to determine the RMD. The 12/31 value is not reduced by the first-time RMD taken between January 1 and April 1 in the year following the end of the year the taxpayer turns 70½.*

(2) ***Determining the Distribution Period:*** *The IRS provides two tables for use in determining the IRA owner's life expectancy (referred to as "distribution period" by the IRS). Generally, IRA owners will use the "Uniform Lifetime Table", illustrated above, to determine their "distribution period."*

If the IRA owner's spouse is the sole beneficiary (on all the IRA accounts), the Joint and Last Survivor Table may be used (available in IRS Publication 590-B). However, the Uniform Lifetime Table will always produce the smallest minimum distribution, unless the spouse is more than 10 years younger than the IRA account owner. The Preamble to the final regulations provides that for lifetime distributions, the marital status of the IRA owner (or employee, if RMDs are made from a qualified plan account) is determined on January 1 each year (Reg. § 1.401(a)(9)-9, Q&A 3, PLR 200250037).

Determining Age: *Use the owner's oldest attained age for the year of the distribution.*

RMD in Year of Owner's Death **-** Often the question arises related to the need for a required minimum distribution (RMD) in the year of the IRA owner's death. Information on this requirement is sketchy at best. The following has been gleaned from the regulations and IRS Publication 590-B.

Died before required beginning date – If the IRA owner passed away before his or her distribution required beginning date, then there is no RMD for the year of death. Where an IRA owner dies after reaching age 70.5, but before April 1 of the next year, no minimum distribution is required because death occurred before the required beginning date. (Pub 590-B, 2018)

Died after required beginning date – An RMD is required if the owner died on or after the required beginning date (Reg § 1.401(a)(9)-5, Q&A 4(a)). The IRA beneficiaries are responsible for figuring and distributing the owner's required minimum distribution in the year of death. (2018 Pub 590-B, Pg. 8).

Where an IRA owner dies before receiving his or her entire RMD in the year of death, the unpaid amount must be distributed to the named beneficiaries or, if none, the decedent's estate (Reg. § 1.401(a)(9)-5, Q&A 4(a)). Presumably, the amounts received before death would be taxed on the decedent's final return and the remaining amount paid after death would be taxed to the beneficiary or estate (but see spouse beneficiary below). It would also appear the RMD amounts not distributed in the year of death would be subject to the 50% excess accumulation penalty. However, that penalty can be waived for reasonable cause if a corrective distribution is taken later and the spouse (if filing jointly with the decedent on the decedent's final return) or estate executor requests penalty relief per the instructions for Form 5329.

Spouse Beneficiary - Where the spouse of the deceased owner becomes the owner of the IRA in the year of death, the spouse is required to take a distribution based upon the decedent's age and thereby satisfy the decedent's RMD requirements (2018 Pub 590-B, Pg. 8). It is *assumed* that if the spouse fails to do so, the spouse will be subject to the 50% excess accumulation penalty but see the penalty waiver above.

First Year IRA RMD Exception – If a taxpayer so chooses, he or she can delay an IRA RMD for the first year until the second year, thus making the distribution includible in the second year's tax return. This is sometimes desirable if the taxpayer has substantial wages or other income in the year age 70.5 is reached and expects less income the next year. In this situation, by delaying the distribution to the second year the tax bracket could be substantially lower. If the taxpayer chooses that option, then:

- The first year RMD must be taken by April 1 of the following year, and
- The taxpayer must also take the second year RMD distribution by December 31 of year two, thus doubling up the distributions in year two.

Qualified Plan Required Beginning Date – In general, distributions from a qualified plan must begin no later than April 1 of the year following the year in which the employee attains age 70 1/2 or (except in the case of a 5-percent owner), if later, retires. This date is called the required beginning date. (Code Section 401(a)(9)). This "retirement, if later" exception does not apply to IRAs.

Penalty for Not Taking an RMD - The penalty for failing to take the required minimum amount is 50% of the amount that should have been withdrawn but wasn't. However, the IRS in Pub 17, Pub 575 and the instructions for Form 5329, provides a very liberal policy for waiving the penalty. Generally, you must show that the failure to take the required distribution was due to reasonable cause and that steps are being taken to remedy the shortfall.

The instructions indicate that the taxpayer must file Form 5329, and request relief in a statement attached to the return. The statement should include: a reason for the under-distribution and the steps taken to remedy the under-distribution. On Form 5329, Part IX, complete lines 52 (minimum required distribution) and 53 (actual amount distributed). Enter "RC" and the amount to be waived in parentheses on the dotted line next to line 52. Then subtract this amount from the total shortfall figured without regard to the waiver amount and enter the result on line 54. If line 54 is greater than zero, multiply the amount by 50% and enter the result on line 55. This is the excess accumulation penalty to be included on Form 1040, Schedule 2, line 6 (draft 2019). The IRS says that they will review the information provided and decide whether to grant the request for a waiver.

The return should not be e-filed because the electronic return originator (ERO) may submit to IRS with Form 8453 only certain forms or their attachments, and the Form 5329 attachment is not one of these. Instead, the ERO retains the 5329 penalty-waiver statement, and thus IRS would not see the waiver request if the return were e-filed.

IRA BENEFICIARY ISSUES

Qualified Plan to IRA Rollovers for Non-spouse Beneficiaries - Direct transfers (trustee-to-trustee) of distributions from an eligible retirement plan (e.g., a qualified plan) of a deceased employee to a non-spouse beneficiary's IRA are permitted. The transfer is treated as an eligible rollover distribution and distributions from the beneficiary's rollover IRA (don't combine with the beneficiary's existing IRA) are subject to the RMD rules that apply to inherited IRAs of non-spouse beneficiaries.

This provision applies to amounts payable to a beneficiary under a:

- Qualified retirement plan or
- Code Sec. 403(b) (Tax Sheltered Annuity) annuity or
- A governmental Code Sec. 457 plan (deferred compensation plans of state and local governments and tax-exempt organizations).

To the extent provided by IRS, the rule described above applies to benefits payable to a trust maintained for a designated beneficiary to the same extent it applies to the beneficiary.

BENEFICIARY DISTRIBUTIONS AFTER RMDs HAVE BEGUN:

When an IRA owner dies ***after beginning*** the required distributions and the beneficiary is an individual, the beneficiary must begin taking distributions the year after the IRA owner's death as follows:

Spouse as Sole Beneficiary **-** The IRS permits a sole beneficiary spouse far more options than it does other beneficiates. When the spouse is the sole beneficiary, the spouse has the options listed below. ***Caution:*** *The sole beneficiary requirement is not met if the beneficiary is a trust, even if the spouse is the sole beneficiary of the trust.*

- **Spouse Under 70-1/2 -** Convert the IRA to his or her own account, thereby delaying additional mandatory distributions until he or she reaches age 70-1/2. ***Caution***, if spouse is under the age of 59.5, after the conversion the distributions would be subject to the premature distribution penalty until the spouse turns 59-1/2.
- **Spouse 70-1/2 or Older -** Convert the IRA to his or her own account and begin taking RMD based on the surviving spouse's attained age using the Uniform Distribution Table.
- **Treat as own** - Elect to treat the IRA as the spouse's own IRA (commonly referred to as a Beneficial IRA) – IRA is left in the decedent's name and distributions are not subject to premature distribution penalties. The spouse must begin taking distributions over his or her life expectancy using the Single Life Table in the year

- following the owner's death (or if earlier, the year in which the IRA owner would have reached age 70-1/2). Later, after the spouse is no longer subject to the premature distribution penalty, the IRA can be converted to his or her own, and the choice can be made to stop taking distributions until age 70-1/2.
- **5-Year Option** - May elect to take the entire account by the end of the fifth year following the year of the owner's death. If this election is made, no distribution is required for any year before that fifth year. A distribution under the 5-year option is not subject to early withdrawal penalties.

Other Individual Beneficiaries - If the beneficiary or beneficiaries (including the spouse) include individuals other than the spouse, then the first required distribution is in the calendar year following the year of the IRA owner's death. These distributions are not subject to the premature distribution penalty. Using the Single Life Table, the post-death distribution period used to determine the RMD is the **longer** of:

- **The remaining life expectancy of the deceased IRA owner** using the deceased's attained age in the year of death and subtracting one for each subsequent year after the date of death.
- **The remaining life expectancy of the IRA beneficiary** using the beneficiary's attained age in the year of death and subtracting one for each subsequent year after the date of death.

However, in lieu of the two options above, any beneficiary who is an individual may elect to take the entire account at any time before the end of the fifth year, following the year of the owner's death. If this election is made, no distribution is required for any year before that fifth year.

DISTRIBUTIONS WHERE OWNER DIES BEFORE RMDs HAVE BEGUN:

When an IRA owner dies ***before*** the required distributions beginning date (generally, April 1 following the year in which the owner attains age 70-1/2), the beneficiary has the following choices:

If the Sole Beneficiary is the Owner's Spouse **-** The spouse may choose one of the following options, or if not used, the rules for non-spouse beneficiaries apply.

- **Rollover** - The spouse can roll over the decedent's IRA into his or her own IRA. Once rolled into the spouse's IRA, any future withdrawals would be treated as his or her own, and if the spouse is under 59-1/2 at the time of the distribution, the premature distribution penalty will apply.
- **Treat as own** - Elect to treat the IRA as the spouse's own IRA. This is commonly referred to as a Beneficial IRA – IRA is left in the decedent's name and distributions are not subject to premature distribution penalties. The spouse must begin taking distributions over his or her life expectancy using the Single Life Table in the year following the owner's death (or if earlier, the year in which the IRA owner would have reached age 70-1/2). Later, after the spouse is no longer subject to the premature distribution penalty, the IRA can be converted to his or her own, and if desired, distributions may cease until age 70-1/2.

If a Non-Spouse Beneficiary is Designated - A non-spouse beneficiary may roll over an inherited IRA if the plan allows it, and the distribution is made directly from one trustee to another. The account balance will be distributed by one of the methods described below. The determination of whether the five-year or lifetime payout rule applies depends on the provisions of the IRA. It may be silent as to which rule (5-year or lifetime payout) applies (see "IRA Silent" below), specify which rule applies, or it may allow the owner (or beneficiary) to elect which rule applies. *(Reg. § 1.401(a)(9)-3, Q&A 4)*

- **For the Five-Year Payout** - May be entirely distributed at any time before five years after the IRA owner's death and the total can be taken in multiple distributions during the five year period *(Code Sec. 401(a)(9)(B)(ii)).* A non-spouse beneficiary is permitted to directly roll over the beneficiary's entire benefit until the end of the fourth year, but as of January 1 of the fifth year following the year the plan owner died, no amount payable to the beneficiary is eligible for rollover *(IRS Notice 2007-7, Q&A 17).* If the 5-year rule applied to the non-spouse beneficiary under the plan making the direct rollover, the 5-year rule also applies for the purpose of determining RMDs under the IRA to which the rollover contribution is made *(IRS Notice 2007-7, Q&A 19).*
- **For the Lifetime Payout** - May be distributed to (or for the benefit of) the designated beneficiary, over his life or over a period that doesn't extend beyond his life expectancy *(Code Sec. 401(a)(9)(B)(iii); Code Sec. 408(a)(6)*). If this method is used, distributions must begin no later than Dec. 31 of the calendar year immediately following the calendar year in which the IRA owner died *(Reg. § 1.401(a)(9)-3, Q&A 3(a)).*

Example: *The IRA owner dies March 12th, and the designated beneficiary of his IRA is a nephew. If the lifetime payout option is chosen, payments from the IRA must begin by Dec. 31 of the following year.*

IRA is Silent as to the Distribution Method

- **The lifetime payout rule applies** if the beneficiary is the decedent's spouse, and the IRA:
  (1) Does not contain provisions specifying the methods of distribution after an IRA owner's death, or allowing the choice to be made by an IRA owner or beneficiary, or
  (2) Allows a choice to be made, but the choice is not exercised and the IRA doesn't specify the payout method, or
  (3) Allows a choice to be made and the lifetime payout method is chosen, or
  (4) Specifies that the lifetime payout method is to be used.
- **The five-year payout rule applies** if the IRA provides for only this method, or it provides a choice between five-year and lifetime payouts, and the IRA owner chose or the surviving-spouse beneficiary chooses the five-year method. (Reg. § 1.401(a)(9)-3, Q&A 4)

DETERMINING BENEFICIARIES' DISTRIBUTION PERIOD – MULTIPLE BENEFICIARIES:

If more than one beneficiary is designated on the date on which the designated beneficiary is determined (generally, as of Sept. 30 of the year following the year of the IRA owner's death), then the IRA is paid out over the oldest beneficiary's life expectancy.

The beneficiaries' remaining life expectancy is determined using the:

- Oldest beneficiary's age as of his or her birthday in the calendar year immediately following the IRA owner's death, or
- For those accounts that were separated by the end of the year after the year after death, the age of each beneficiary.
- Where the beneficiaries include the spouse, account separation must be completed by September 30th instead of year-end to take advantage of the spouse sole beneficiary provisions.

Sub-IRAs OK'd Where Estate Was Named IRA Beneficiary – A Private Ruling (PLR 201128036) permitted an IRA with an estate named as the beneficiary to be divided up into sub-IRAs set up for the beneficiaries of the estate. Although the move allowed each beneficiary to separately invest his or her share of the IRA, they were still locked into a short payout period (based on the decedent's age at death). With better tax planning on the IRA owner's part, however, they could have qualified for a much longer tax-deferred payout period.

OTHER INHERITED IRA ISSUES

Dividing (Separating) an Inherited IRA - Generally, except for nondeductible contributions, Inherited Traditional IRA accounts are taxable to beneficiaries, and the tax laws provide for certain mandatory beneficiary payouts.

Where there are multiple beneficiaries to an IRA, conflicting interests can arise. One beneficiary may want the money all up front, while another one wants to spread it out over time. There can also be conflicting investment strategies. In addition, the distribution period is determined using the oldest beneficiary's age, which accelerates the payout.

These conflicts can be avoided by dividing the accounts. The law allows an IRA to be divided into separate accounts for each beneficiary, thus giving each the opportunity to select the option that best suits their particular circumstances.

CAUTION: For the separate or "subaccount" IRA to be treated as a separate account for required minimum distribution (RMD) purposes, **it must be established no later than the last day of the year following the year of the IRA owner's death**. (Reg. § 1.401(a)(9)-8, Q&A 2(a)(2))

Additionally, a separate accounting must allocate all post-death investment gains and losses for the period before the separate accounts are established on a pro rata basis in a reasonable and consistent manner among the separate accounts. However, once the separate accounts are actually established, separate accounting can provide for separate investments for each separate account under which gains and losses from the investment of the account are only allocated to that account. Alternatively, investment gain or losses can continue to be allocated among the separate accounts on a pro rata basis. A separate accounting must allocate any post-death distribution to the separate account of the beneficiary receiving that distribution. (Reg. § 1.401(a)(9)-8, Q&A 3)

Disclaiming an Inherited IRA – The law allows a designated beneficiary to disclaim an inherited IRA and permits the naming of a new beneficiary by the executor of the estate. A beneficiary can also be eliminated by distribution of the benefits. The IRS ruled in ***Rev. Rul. 2005-36*** that a qualified disclaimer is valid even after the beneficiary disclaiming the IRA has received a required minimum distribution from the IRA for the year of the decedent's death. Disclaimed amounts cannot include the RMD amount or the income attributable to it. The disclaimed amount and the post-death earnings on it either can be:

- Paid outright to the successor beneficiary (taxable at that time to the successor beneficiary), or
- Segregated and kept in a separate IRA account with the successor heir named as beneficiary (thus allowing lifetime withdrawal and retention of the IRA tax-deferral benefits).

Lack of Designated Beneficiary - A designated beneficiary need not be specified in the name of the plan in order to be a designated beneficiary as long as the individual is identifiable under the plan. If an individual is not designated as a beneficiary (for example, when someone's estate is named as the beneficiary), the employee or IRA owner is treated as having no designated beneficiary. However, an exception applies to trust beneficiaries, who may be treated as designated beneficiaries if:

1. The trust is valid under state law (or would be, except for the fact that there is no corpus),
2. The trust is irrevocable or will become irrevocable, by its terms, on the employee or IRA owner's death,
3. The beneficiaries with respect to the trust's interest in the employee's or IRA owner's benefit are identifiable from the trust instrument, and
4. Relevant documentation has been timely provided to the plan administrator (Reg. § 1.104(a)(9)-4,Q&A-5).

Q&A-4 of the regulation provides that in order to be a designated beneficiary, an individual must be a beneficiary as of the date of the employee's death.

CAUTION!

Distributions from Qualified Plans and Tax-Sheltered Annuities (Code Sec. 403(b) accounts) do not satisfy the distribution requirements from IRAs. And distributions from IRAs will not satisfy the distribution requirements from Section 403(b) contracts, accounts or qualified plans.

Similarly, distributions from Roth IRAs will not satisfy the distribution requirements applicable to IRAs or Section 403(b) accounts or contracts, and distributions from IRAs, Section 403(b) contracts, or qualified plans will not satisfy the distribution requirements from Roth IRAs.

Required minimum distributions from inherited IRAs must be determined separately from distributions required to be made from IRAs of which the taxpayer (beneficiary) is the owner, and vice versa.

RMD INFORMATION REPORTING REQUIREMENT:

With regard to information reporting of RMDs (required minimum distributions), trustees, custodians, and issuers of IRAs must do the following (Reg 1.408-8, Q&A 10; Notices 2002-27, 2003-34, 2009-9):

- Identify to IRS on Form 5498 (IRA Contribution Information) for the immediately preceding year each IRA for which a minimum distribution is required to be made to an IRA owner. The amount of the required distribution need not be reported to IRS.
- Provide, by January 31st of the year **in which the RMD must be made, one of two types of information statements to the IRA owner required to** receive a RMD:
  (1) A report of the amount of the annual RMD distribution for the calendar year and the date by which it must be made. The amount can be based on simplified assumptions. For example, it can be assumed that the regular life expectancy table for IRA owners applies (i.e., the IRA beneficiary is assumed not to be a spouse who is more than 10 years younger than the IRA owner).
  (2) A statement informing the IRA owner that he must take a minimum distribution with respect to the IRA for the calendar year and the date by which the distribution must be made, and including an offer to furnish him, upon request, with a calculation of the amount of the RMD for the IRA for that calendar year.

  The information must be reported to IRA owners by Jan. 31 of the year in which the RMD must be made.

QUALIFIED CHARITABLE DISTRIBUTION (QCD) - Tax-Free IRA Distributions for Charitable Purposes

This provision (Code Sec 408(d)(8)) originated in 2006 and after multiple temporary extensions was made permanent by the Protecting Americans from Tax Hikes Act of 2015.

To constitute a qualified charitable distribution (QCD), the distribution must be made:

(1) Directly by the IRA trustee to a Code Sec. 170(b)(1)(A) charitable organization (other than an organization (private foundations) described in Code Sec. 509(a)(3)) or a donor-advised fund (as defined in Code Sec. 4966(d)(2)); and

(2) On or after the date the IRA owner attains age 70-1/2.

Substantiation - The taxpayer must have the same type of acknowledgment of their contribution that would be needed to claim a deduction for a charitable contribution. See Chapter 07.08.

Maximum Contribution – No more than $100,000 per year of IRA distributions made directly to charitable organizations can be excluded from the IRA owner's gross income. If filing a joint return and both spouses have an IRA, each spouse can have a qualified charitable distribution and each can exclude up to $100,000 from income per year.

No Charitable Contribution **–** Amounts excluded as a QCD, up to the $100,000 limit, cannot be used as charitable contributions on Schedule A.

Charitable AGI Limitations – QCDs are not subject to the charitable contribution percentage limits since they are not included in gross income and are not claimed as a charitable contribution.

Excess Contributions - Amounts in excess of the $100,000 limit cannot be carried over. The excess would be treated as (1) an IRA distribution and (2) a charitable contribution subject to the usual percentage-of-AGI limits.

Required Minimum Distribution (RMD) – The amount of a QCD is treated as being part of the taxpayer's RMD for the tax year.

Regular IRAs (Traditional or Roth) Only - The exclusion does not apply to distributions made from "ongoing" simplified employee pensions (SEPs), or "ongoing" SIMPLE IRAs. The term "ongoing" means the plan is maintained under an employer arrangement under which an employer contribution is made for the plan year in which the QCD is made. However, the exclusion would apply to SEPs and SIMPLEs where the taxpayer is retired and the employer will not contribute to the account during the year. (Notice 2007-7, Q&A 36).

Caution - Direct Transfer Requirement – A QCD must be made *directly by the IRA trustee* to a charitable organization. Thus, a distribution made to an individual, and then rolled over to a charitable organization, would not be excludible from gross income. The result would be a separate IRA distribution and charitable contribution, both subject to the normal rules. A check from the IRA made payable to an eligible charitable organization that is delivered to the organization by the IRA owner will be considered to be made directly by the IRA trustee to the organization. (Notice 2007-7, Q&A 41)

Some IRA trustees provide the IRA owners with check writing privileges on their IRA accounts. If a taxpayer over age 70.5 writes a check from his IRA account and delivers it to a qualified charitable organization, will that count as a direct transfer to charity? The IRS provides no specific guidance on the issue, other than Notice 2007-7, Q&A 41 cited above. However, it would appear that a check written by the taxpayer from the IRA account to a qualified charity **MAY** meet the requirements of Q&A 41, since the funds are transferred directly to the charity through normal banking channels and the taxpayer has no access to the funds during the transfer process.

Distribution Allocation for Non-Deductible Contribution Amounts - The distribution is treated as consisting of income first, up to the aggregate amount that would be includible in gross income (but for the provision) if the aggregate balance of all IRAs having the same owner were distributed during the same year. Proper adjustments must be made in applying the Code Sec. 72 annuity rules to other distributions made in that and later tax years to reflect the amount treated as a qualified charitable distribution under this special rule.

> ***Example:*** *Ira Owner is over age 70-1/2 and has a traditional IRA with a balance of $100,000 consisting of $20,000 of nondeductible contributions and the balance attributable to deductible contributions and earnings. He has no other IRA accounts. He makes a direct distribution of $80,000 to a qualified charitable organization. By the special rule, the contribution is treated as coming from the income first. The remaining $20,000 consists only of nondeductible contributions and will not be taxable on distribution.*

Reporting QCDs – The total of all IRA distributions are included on line 4a of 2019 draft 1040. Then subtract the amount of the QCD and any Form 8606 adjustments from the line 4a amount and enter the result on line 4b. Also enter "QCD" in the margin for line 4b. See the instructions for Form 8606 Line 7 and 1040 Lines 4a and 4b.

QUALIFIED LONGEVITY ANNUITY CONTRACTS

IRS Regulations 1.401(a)(9)-6, finalized in 2014, provide some relief for individuals who want to stretch out their retirement funds by generally allowing taxpayers to use up to the lesser of 25% or $125,000 of their retirement account to purchase a qualified longevity annuity contract (QLAC) within the account. The $125,000 limit is adjusted for inflation and for years 2018 and 2019 is $130,000. The amount used to purchase the QLAC is subtracted from the account balance and would thus reduce the RMD from the retirement account each year until a specified time in the future when distributions must begin from the annuity.

Although not a perfect solution to not taking distributions, a QLAC can in effect delay the distributions associated with funds used to purchase the QLAC until as late as the pre-determined date for the start of the annuity payments, but no later than age 85.

> ***Example:*** *Dan, who is age 72, has a traditional IRA account with a balance of $700,000. From the IRS annuity table, for age 72, Dan has an expected distribution period (life expectancy) of 25.6 years, and his RMD for the year would be $27,344 ($700,000/25.6). However, Dan could have purchased a QLAC in the amount of $130,000 (the lesser of 25% of $700,000, which is $175,000, or $130,000) with IRA funds prior to the end of the year, thus reducing his IRA account balance currently subject to mandatory distribution to $570,000. As a result, his RMD for the year would be $22,266. In addition, his QLAC would begin distributions at whatever date Dan selected for the start date, but at least by age 85.*

Since Social Security (SS) income becomes taxable when one-half the taxpayer's SS benefits plus the taxpayer's other income, including non-taxable interest income, exceeds $25,000 ($32,000 for married taxpayers filing jointly), using a QLAC to reduce a taxpayer's RMD income could actually reduce the tax on the taxpayer's SS income.

QLACs do not apply to Roth IRAs since there are no RMD requirements and the income is generally tax-free.

See page 04.01.06 for additional information about QLACs.

IRD INCOME

When a client comes in with a 1099-R or Schedule K-1 with income from an inherited individual retirement account (IRA), ask two very important questions:

(1) Was there a Form 706 filed for the estate?

(2) If so, was there a tax liability on the 706?

If the answer to both questions is yes, then your client is eligible for a Tier 1 miscellaneous (not subject to the reduction by 2% of adjusted gross income) itemized deduction (See Chapter 1.05 – Death of a Taxpayer for additional details).

STILL WORKING RULE TO DELAY RMDS

Generally, taxpayers that are participants is qualified retirement plans are required to start taking required minimum distributions (RMDs) from the plan no later than April 1 of the year after which they turn 70½.

Still Working Exception - However, there is an exception that applies to certain plan participants who are still working. An employee's RBD (required beginning date) for receiving distributions from a qualified plan is April 1 of the year **following the later** of the calendar year the employee:

- Reaches age 70 1/2 or
- The calendar year in which they retire from employment with the employer maintaining the plan.

> **CAUTION:** The employer's plan may require the retirement plan participant to begin RMDs under the normal rules, in which case the taxpayer cannot take advantage of the "still working "exception.

> **CAUTION:** The above rule does not apply to distributions from IRAs (including those established in conjunction with a SEP or SIMPLE IRA plan) and distributions from qualified plans to more-than-5% owners.

When Does Retirement Begin? – A taxpayer retires in a given calendar year unless he works at least one day in the following year! A taxpayer who is older than 70½, who is laid off in a given year by the employer, must begin RMDs from that employer's retirement plan in the next calendar year.

Only Applies to Current Employer – The "still working" exception only applies to retirement plans of the taxpayer's current employer. RMDs from other plans and IRAs cannot be delayed under the "still working" exception.

Part-Time Employment – The IRS has taken no official position on this issue of what constitutes part-time employment for this purpose. So, it seems that if a person is considered to be an employee under the Code, that person is "still working" for the purpose of the still-working exception (even if the ongoing work is part time).

Possible Strategy - Where the employer's qualified plan permits, the employee could roll other taxable qualified pension amounts and IRAs into the employer's qualified plan, thus potentially delaying the RMDs from these other plans also. HOWEVER, the rollover must be completed in a year before the employee reaches age 70½ – otherwise the regular RMD requirements will kick in for those accounts.

Only pretax dollars can be rolled into an employer's plan so care must be taken not to roll non-deductible contributions into the employer's plan. However, any non-deductible contributions left behind can be withdrawn without any taxability or converted to a Roth IRA with little or no tax liability and avoid any RMD requirements on those funds as well.

Final Word – Care should be taken to review the provisions of the employer's plan to ensure there are no detrimental provisions related to the "still working" provision, the treatment of rollover funds and the accessibility to funds in case of an unexpected need.

Also keep in mind the taxpayer will have larger RMDs the longer the distributions are delayed, which could mean higher tax brackets or more of their Social Security benefits becoming taxable, just to mention a couple of the potential disadvantages.

FLOW CHART NEXT PAGE

CALIFORNIA DIFFERENCES

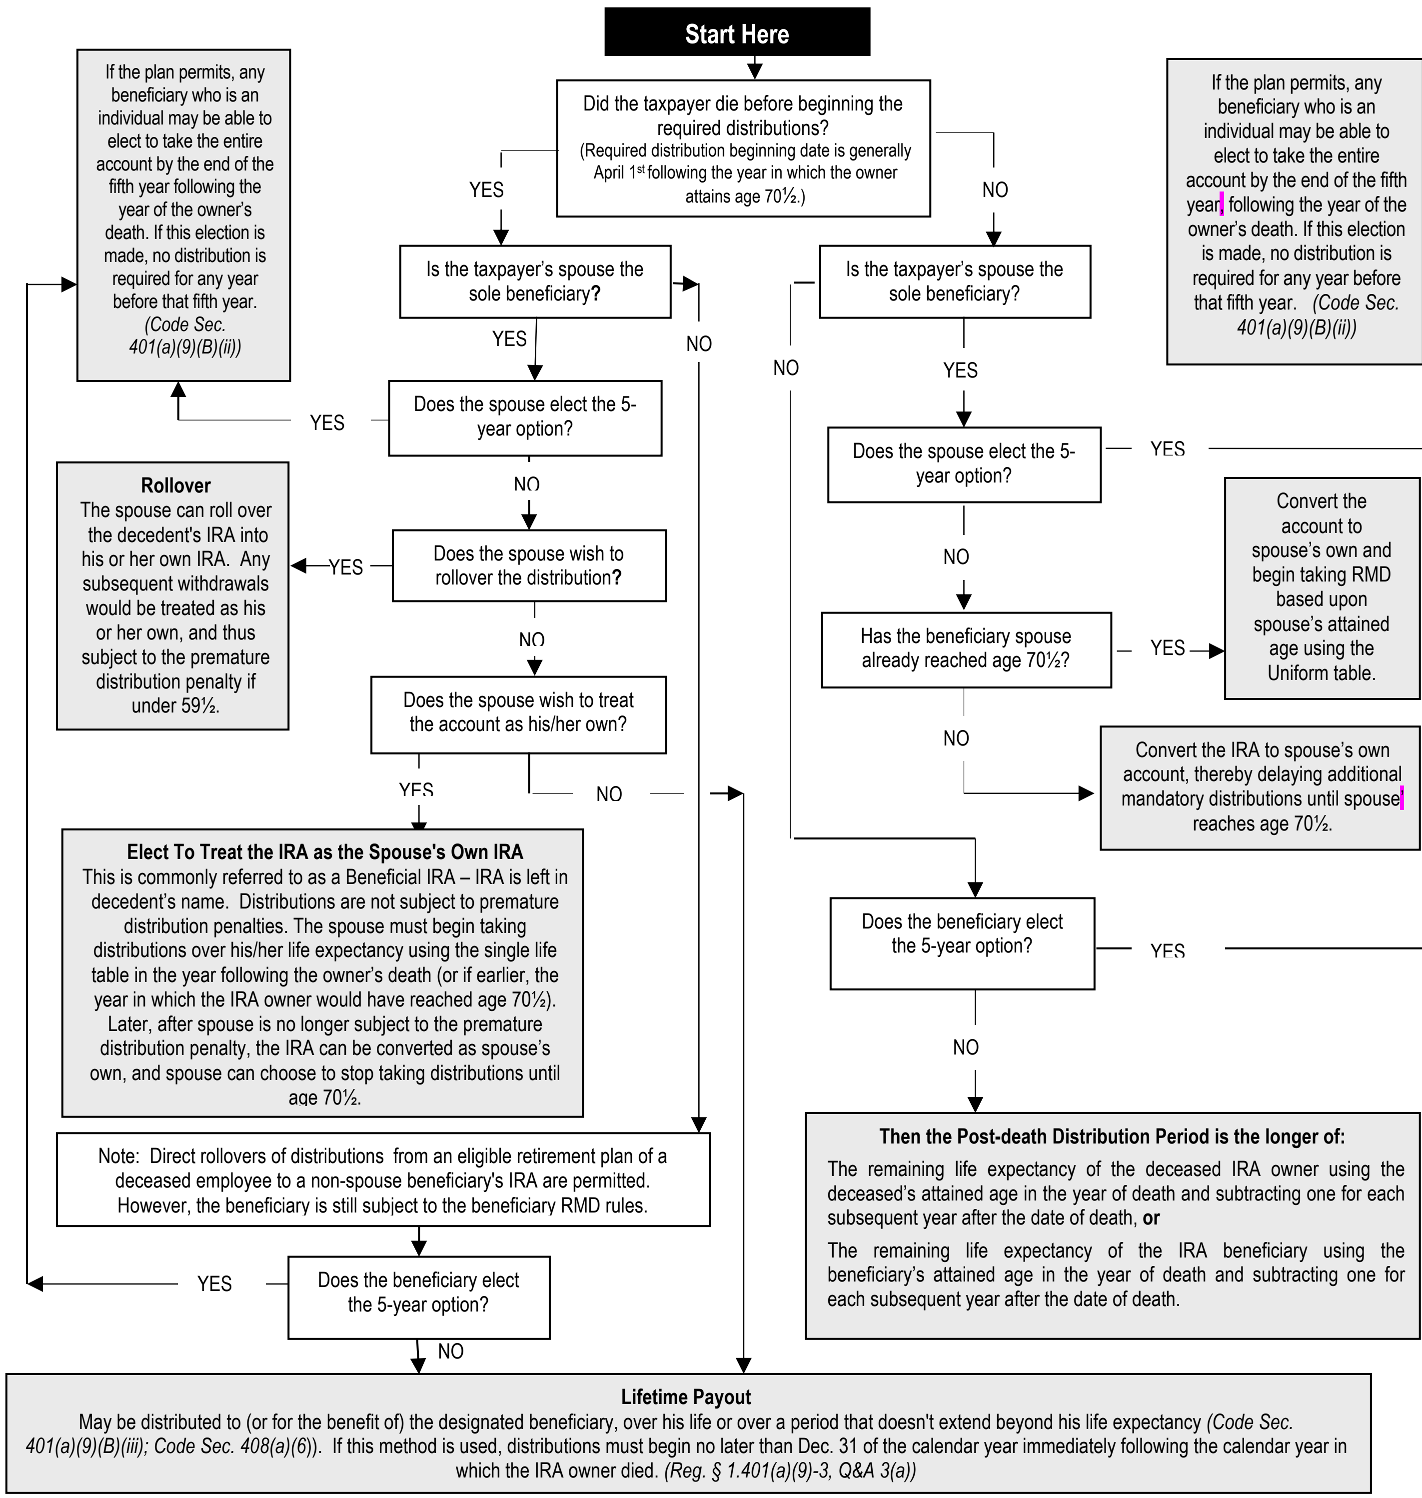
California generally conforms to Federal treatment, including qualified charitable distributions from IRAs. However, California does not have a penalty for excess accumulation in a qualified retirement plan or IRA, i.e., California does not penalize a taxpayer who fails to make their required minimum distribution.

NOTES

POST-DEATH (NON-ANNUITY)

REQUIRED MINIMUM IRA DISTRIBUTIONS

CAUTION: This is an abbreviated summary of the post-death RMD rules for Traditional IRAs and may not cover all of the possible situations or options.



SOLO (Mini) 401(k)

Overview

What is a Solo 401(k)? A Solo 401(k) (also called an Individual 401(k) Plan) is a retirement plan designed specifically for self-employed individuals who have no full-time employees other than themselves and/or their spouse. Key benefits of the Solo 401(k):

- Allows the taxpayer to manage their own account directly without any brokers, banks, or trust companies being the middleman.
- Contribute amounts approximately equal to the 401(k) and profit-sharing amounts combined.
- Legally avoid the UBIT tax that would apply to certain self-directed IRA transactions.
- Participate in Roth contributions to the 401(k) element (not the profit-sharing part) of the plan regardless of the AGI limitations that apply to regular Roth contributions.
- Transfer existing retirement funds into the Solo 401(k).
- Taxpayer can direct his or her investments with absolutely no restrictions on investment choices (including real estate, private companies, foreign assets, precious metals, etc.).

The Details

Eligibility – A Solo 401(k) plan is not a different kind of 401(k) plan — it merely takes advantage of relaxed rules that apply when the only plan participant is the owner (or the owner and his or her spouse). The Solo 401(k) is available to self-employed individuals and business owners with no full time W-2 employees other than themselves or a spouse. (A self-employed individual who has employees would generally be required to make contributions for those other employees and follow strict nondiscrimination and administrative rules of the 401(k) plan.) Employing independent contractors (1099 workers) would not necessarily disqualify a self-employed individual from a Solo 401(k). Sole proprietorships, partnerships, LLCs and corporations (including both subchapter S and C corporations) would qualify. (Code Sec. 401(a)(35)(E)(iv))

Federal law generally allows plans to be designed to exclude the following types of employees:

- Employees under age 21.
- Employees with less than one year of service.
- W-2 employees who work less than 1,000 hours per year.
- Certain union employees.
- Certain nonresident alien employees.

Contribution Limits - The annual maximum Solo 401(k) contribution is limited to the dollar amounts listed in the table below, but not exceeding 100% of compensation.

Maximum Contribution

2014	2015-16	2017	2018	2019	2020
$52,000	$53,000	$54,000	$55,000	$56,000	

If amount not shown, it was not available at publication date.

The Solo 401(k) contribution consists of two parts: the salary deferral contribution and the profit sharing contribution. For 2019, the salary deferral contribution (same as the 401(k)) permits as much as 100% of the first $19,000 ($25,000) if age 50 or over) of compensation as a tax-deductible contribution. In addition, a profit sharing contribution is permitted equal to 20% of net self-employment income for unincorporated businesses or 25% of W-2 income for incorporated businesses.

Given sufficient income, a self-employed individual and spouse (assuming the spouse is employed in the same business) may contribute, for 2019, up to $112,000 combined. Because of the way the contribution is calculated a larger contribution usually can be made into a Solo 401(k) than to a Keogh or SEP IRA at the same income level.

CAUTION – 401(k) LIMIT

The $19,000 limit on salary deferral contributions to a 401(k) plan applies on a per person, rather than a per plan basis. So, any elective deferral contribution made to a 401(k) plan outside of the Solo 401(k) plan would reduce the otherwise allowable $19,000 deductible contribution amount to the "solo" 401(k).

Discretionary Funding - Each year the funding of the Solo 401(k) plan is completely discretionary and flexible. Funding can be increased, decreased, or skipped entirely if necessary.

Where Deducted - Subchapter S and C corporations or LLCs electing to be taxed as a corporation can generally deduct the salary deferral contribution from personal W-2 earnings and the profit-sharing contribution as a business expense.

For a sole proprietorship, partnership or an LLC taxed as a sole proprietorship, the owner's salary deferral and profit-sharing contributions are deductible only from personal income (i.e., on Schedule 1 (draft 2019) of Form 1040 as an adjustment to gross income), not as an expense of the business. (Contributions to a qualified retirement plan on behalf of employees are deductible business expenses.)

Deadlines:

Establishing the Plan - The deadline for establishing a Solo 401(k) is December 31st for an individual or fiscal year end for corporations.

Contributions - For unincorporated businesses the deadline is the tax filing date of April 15 of the next year plus extensions. For incorporated businesses the deadline is 15 days after the close of the fiscal year.

Roth Contributions – Solo 401(k) designated Roth contributions fall under the rules for "Qualified Roth Contributions" that are covered in chapter 4.06 of this text. Provided the plan document permits Roth contributions, participants in a Solo 401(k) can elect to make after-tax or Roth contributions with the salary deferral portion of the Solo 401k. The annual maximum salary deferral contribution is $19,000 or $25,000 if age 50 or older for 2019.

Caution

Designated Roth contributions in a Solo 401(k) plan are subject to the age 70½ required minimum distributions (RMD). However Roth IRAs are not subject to the RMD rules and the Roth contribution can be rolled into a Roth IRA before reaching the mandatory distribution age to avoid the mandatory distributions.

Roth Aging Element - Designated Roth contributions to a Solo 401(k) plan are subject to the normal 5-year aging rules to avoid distribution penalties.

Plan Administrator Responsibilities – The self-employed individual can act as his or her own plan administrator. Responsibilities include making timely payments according to the loan amortization schedule if a loan has been taken, and filing Form 5500 if plan assets exceed $250,000.

Plan Loans - Another important distinction between the Solo 401(k) plan versus other self-employed retirement plans is that it permits (if so stated in the plan documents) the small business owner to borrow 1/2 of the funds in the 401(k) ($50,000 maximum) for any reason at any time, tax free and penalty free. The loan generally must be repaid as follows:

- To be repaid over an amortization schedule (established before taking the loan) of 5 years or less, although a 10-15 year payback is allowable for the purchase of a home.
- Regular payments no less frequently than quarterly.
- At a reasonable rate of interest… generally interpreted as prime rate + 1%

There are no tax consequences if loans are repaid on schedule.

Strategy

Using rollover provisions (see below) a Solo 401(k) owner can consolidate his or her other plans and IRAs into the 401(k) plan, making them eligible for the loan provisions.

Rollover Provisions - The Solo 401(k) is a qualified plan and rollovers that meet the normal rollover requirements can be made to and from a Solo 401(k). This includes IRA, Rollover IRA, 401k, SEP IRA, Keogh Plans (including Profit Sharing and Money Purchase), Defined Benefit Plans and 403b Plans.

Strategy

The maximum amount of a traditional IRA distribution that can be rolled over to an eligible retirement plan may not exceed the part of the amount distributed that would be includible in gross income if it weren't rolled over (Code Sec. 408(d)(3)(A)(ii)). Thus, if a taxpayer has an IRA that includes non-deductible contributions, the taxpayer can roll over the taxable portion into the Solo 401(k) leaving the already taxed funds in the IRA that can then be converted into a Roth IRA. Note that there are no Roth conversion AGI limits.

Turnkey Plans – The Solo 401(k) plan is useful where a small employer has no non-highly compensated employees. The plan documents are generally drafted with the <u>assumption</u> that the goal is to maximize contributions and that there will not be any eligible non-highly compensated employees. In addition, most turnkey plans are established as low cost plans requiring little, if any, professional administration and without nondiscrimination testing.

CAUTION – Potential Employees in the Future

Care should be taken to provide for the potential that the business may grow and non-highly compensated employees may in fact one day become eligible to participate in the plan, at which time the employer may be obligated to make significant contributions for unanticipated participants.

Most financial firms offer turnkey plans. Consult a broker dealer or search “solo 401(k)” on the Internet.

CAUTION - Employer Aggregation Rules

An employer that is part of a controlled group of corporations, partnerships, proprietorships or affiliated service groups under Code Sec. 414(b), (c), or (m) must continue to take into consideration employees of those related entities for purposes of determining whether the Solo 401(k) satisfies the applicable qualification requirements, including the minimum coverage requirements.

<u>Example #1 – No Full-Time Employer Plan</u> **-** Kevin has full-time employment earning $70,000 a year. But he also works as an Internet programmer on the side, developing and designing websites for small businesses. For 2019, his net earnings from self-employment (Schedule C gross income minus related business expenses) is $10,000. If Kevin has a combined profit-sharing and 401(k) (cash-or-deferred) arrangement, he can put away and deduct nearly the entire $10,000 of net earnings, consisting of:

(1) Net Profit…………………………………………………………………………. $10,000
(2) Profit after SE tax Deduction ($10,000 – ($10,000 x .9235 x .153 x .5))…… $9,293
*(3) **Profit Sharing Contribution** (20% of $9,293)………………………………………………... **$1,859***
*(4) **401(k) arrangement** - the lesser of:*
- *(a) Net profit less profit-sharing contribution ($9,293 − $1,859) = **$7,434**;*
- *(b) Maximum Profit-sharing contribution less the allowable Contribution $56,000 - $1,859 = **$54,141;** or*
- *(c) The maximum regular deferral amount for the year* 2019 *of:* ***19,000**.*

*(5) The smaller of (a), (b) or (c) from (4) is……………………………………………..………………. **<u>$7,434</u>***
*(6) Total combined allowable contribution is…………………………………………………………..……..**$9,293***

*<u>Example #2 – Full-Time Employer Plan</u> **-** What if the taxpayer also had a 401(k) arrangement with his employer? The annual maximum applies to all plans of a taxpayer. Therefore, if Kevin makes an elective $17,000 contribution to his full-time employer’s plan, the maximum he can contribute to his own plan would be $2,000 ($19,000 - $17,000). Thus, in the example above, Kevin’s contribution to his own self-employed combo plans would be limited to $3,859 ($1,859 + $2,000).*

*<u>Example #3 – Taxpayer Age 50 or Older</u> **–** What if Kevin were age 50 or older? Taxpayers age 50 and older are allowed an additional catch-up contribution of $6,000 for* 2019*. In Example #2, he could make an additional deductible catch-up contribution of $6,000 for* 2019 *bringing his total contributions to $9,859 (1,859 + 2,000 + $6,000), which is more than his net SE income of $9,293, so his contributions are limited to net SE income. In Example #1 the additional catch up contribution amount will not benefit him since he is already contributing his entire net SE income and IRC § 414(v)(2)(A) caps total contribution at no more than “compensation,” the SE net income in this case.*

<u>Example #4 – Incorporated Business</u> **–** *Susan Lewis, age 49, is the sole employee of an incorporated business. Her earned income is $100,000 in 2019. Under the law, Susan can contribute $25,000 to a SEP-IRA ($100,000 x .25), $16,000 plus 3% of $100,000) to a Simple IRA or $25,000 to a profit sharing or money purchase plan. However, she can contribute $44,000 to a Solo 401(k) plan ($25,000 employer contribution plus $19,000 employee deferral), still under the $56,000 maximum for the year. If Susan were age 50 or over, she could also make a catch-up contribution of $6,000, increasing her Solo 401(k) contribution total to $50,000.*

<u>Note:</u> Generally, 401(k) plan contributions for an unincorporated business will be slightly lower than the above amounts. For unincorporated businesses, compensation is net profit minus the applicable percentage of self-employment taxes deductible as an adjustment on Form 1040 minus employer contributions.

Business Owner & Spouse - Although single-participant 401(k) plans are limited to the business owner and his or her spouse, business owners should note the added benefits of having his or her spouse as the business's only other employee. Having the spouse on the payroll gives the business owner the opportunity to shelter some or all of his or her income by having the spouse make an elective deferral to a 401(k) plan in addition to the business making a profit-sharing contribution. Although the spouse and the business would be responsible for their respective share of employment taxes on the salary, combined employer and employee contributions can be up to the lesser of $56,000 for 2019 or 100% of compensation. This limit applies separately to the business-owner and spouse, thus allowing a combined total of up to $112,000 for 2019. In addition, if age 50 or over, each individual could defer an additional $6,000 each year.

Comparative Example – Taxpayer Age 55 with $130,000 net profit from his business in 2019.

	Simple IRA	**SEP IRA**	**Solo 401(k)**
Net Profit: $130,000 Net times .9235: $120,055 SE Tax Deduction*: $9,184 Profit Sharing	0	24,163 (4)	24,163(4)
Deferral	13,000 (1)	0	19,000 (6)
Employer Contribution	3,602 (2)	0	
Catch Up Contribution	3,000 (3)	0 (8)	6,000 (5)
Tentative Contribution	19,602	24,163	49,163
Maximum Allowed	56,000(7).	56,000(7).	56,000(7)
Allowable Contribution	19,602	24,163	49,163
Percent of Compensation	15.08%	18.59%	37.82%

*(($120,055 x 12.4%) + ($120,055 x 2.9%)) x 50%

(1) 2019 Simple IRA maximum is: $13,000
(2) Assume the maximum 3% employer contribution ($120,055 x .03)
(3) 2019 Simple IRA catch-up limit is $3,000
(4) ($130,000 - $9,184) x .20
(5) The 401(k) age 50 and over catch-up contribution limit for 2019 is $6,000
(6) The 2019 401(k) contribution limit is $19,000
(7) $56,000 *is the maximum allowable total contribution for 2019.*
(8) Catch-up Contributions not permitted for SEPs.

NOTES

DEFERRED COMPENSATION PLANS – SEC 457

Maximum Contribution is the lesser of:

- Applicable Dollar Amount
- 100% of compensation

Applicable Dollar Amount:

- For 2019 - $19,000
- Double that amount in the last 3 years before retirement
- Age 50+ Catch-up Amount - $6,000 (2015 through 2019)
- Age 50 Catch-up and final 3-yr catch-up cannot be combined

- **Pub 575 –** Pension and Annuity Income
- **Form 5329** - Additional Taxes on Qualified Plans

Deferred compensation plans seldom have any consequence to the preparation of the actual tax return. However, an overview is provided here so you can respond to client inquiries.

Code Section 457 plans apply to deferred compensation plans of state and local governments and tax-exempt organizations.

Employees and independent contractors of state and local governments and tax-exempt organizations (except churches) can participate in an "eligible deferred compensation plan" that allows them to defer receipt of, and exclude each year from gross income, employer contributions made on their behalf to the plan up to the lesser of the applicable dollar limit or 100% of annual compensation. The amount in Form W-2, Box 1 (wages) already reflects the deferred and excluded wages, so no adjustment to income is required when preparing the employee's return.

ANNUAL COMPENSATION LIMIT

The maximum amount which may be deferred under the plan for a tax year may not exceed the lesser of:

(1) Applicable dollar amount, or

(2) 100% of annual compensation.

APPLICABLE DOLLAR AMOUNTS:

Year	2014	2015-17	2018	2019	2020
Amount	17,500	18,000	18,500	19,000	

If amount not shown, it was not available at publication date.

Inflation Adjustments - The applicable dollar amount is adjusted for cost-of-living increases. Any cost-of-living increase that is not a multiple of $500 will be rounded to the next lowest multiple of $500.

Special Catch-Up Rule – Under a special catch-up rule the limit will be twice the otherwise applicable dollar amount limits in the three years before retirement.

Age 50 Catch-Up Amounts

Year	2009-2014	2015-2019	2020
Amount	5,500	6,000	

Age-50 Catch-Up Contributions – An individual who will reach age 50 by the end of the year, and who has contributed the maximum amount to the Sec. 457 plan for the year, may contribute an additional amount. This amount is the lesser of the excess of that year's compensation over any other elective deferrals made by the participant, or the amount shown in the table. **CAUTION:** The age 50 catch-up rule and the final 3-year catch-up rule may not both be used in the same years.

PUBLIC SAFETY OFFICERS' EXCLUSION FOR HEALTH & LONG-TERM CARE INSURANCE

Eligible retired public safety officers (police, firefighters) may elect to exclude governmental retirement plan distributions that don't exceed their health or long-term care premiums, if the distributions are paid directly to insurers. The exclusion is limited to $3,000 per year. Any amount excluded isn't deductible as a medical expense for itemized deductions and isn't includible as health insurance for the self-employed health insurance deduction. (Code Sec 402(l)(7)) See chapter 7.02, Medical, for additional details.

QUALIFIED DOMESTIC RELATIONS ORDER (QDRO)

The QDRO rules applicable to governmental plans and church plans will apply to Section 457 plans for purposes of determining whether a distribution is made under a QDRO. *(Code Sec. 414(p)(11))*

Thus, where a spouse (or former spouse) of a participant in a Section 457 plan receives a distribution under the terms of a QDRO from the Section 457 plan, the spouse (or former spouse) will be treated as the distributee and taxed on the benefits received. Section 457 plan distributions made to an alternate payee other than a spouse (or former spouse) under a QDRO are taxable to the participant.

GOVERNMENT 457 PLANS & DESIGNATED ROTH IRA ACCOUNTS

A deferral plan under section 457(b) governmental plan can have Roth accounts that allow participants to save on a Roth basis. That is, they can make after-tax contributions to the plan and all the principal and earnings are tax-free when distributed. (Code Sec. 457(e)(1)(C)) Plans had been able to allow participants to convert their pre-tax accounts to Roth accounts, but only with respect to money they had a right to take out of the plan, usually because they reached age 59½ or separated from service.

The American Taxpayer Relief Act (ATRA) of 2012 allows any amount in a non-Roth account to be converted to a Roth account in the same plan, whether or not the amount is distributable. The amount converted is subject to regular income tax.

ROLLOVERS

An individual who receives a payment from a governmental Code Sec. 457 plan can roll it over tax-free to (a) an IRA, (b) a Code Sec. 401(a) qualified plan, (c) a Code Sec. 403(a) qualified annuity plan, or (d) a Code Sec. 403(b) tax-sheltered annuity plan as well as to another Code Sec. 457 plan.

EARLY WITHDRAWAL PENALTIES

For purposes of the additional tax on early distributions, an eligible governmental section 457 deferred compensation plan is treated as a qualified retirement plan, but only to the extent that a distribution is attributable to an amount transferred from a qualified retirement plan. Qualified retirement plans include: tax-sheltered annuities, qualified pension plans, profit-sharing plans, stock bonus plans, 401(k) plans, qualified annuities and IRAs.

Correctly Completing Form 5329, Part I - Enter the total distribution on line 1. On line 2, enter the amount of the distribution not subject to the additional tax. Also, on line 2, enter exception code 12. The result on line 3 is the amount of the distribution subject to the additional tax. On line 4, enter 10 percent of any amount on line 3.

CALIFORNIA DIFFERENCES

California conforms to Federal treatment.

SIMPLE PLANS

RAPID FINDER

Overview

Employers with 100 or fewer employees, each of whom received at least $5,000 in compensation for the preceding year, and with no other employer-sponsored retirement plans may adopt savings incentive match plans for employees (SIMPLE). A SIMPLE retirement account may take the form of an IRA or may be part of a §401(k) plan.

- Maximum employee elective contribution under age 50 (2019): $13,000
- Maximum employee elective contribution age 50 and over (2019): $16,000
- Required employer matching contribution:
  - **3%** of employee compensation or
  - **2%** of employee compensation **with $280,000 cap** (2019)
- Two year rollover waiting period

The Details

Employers with 100 or fewer employees, each of whom received at least $5,000 in compensation for the preceding year, and with no other employer-sponsored retirement plans, may adopt savings incentive match plans for employees (SIMPLE). A SIMPLE retirement account may take the form of an IRA (not a Roth) or may be part of a §401(k) plan.

As an IRA or as part of a 401(k) plan, SIMPLE retirement plans allow employees to make elective contributions up to the annual limit (see table below). Employers must match the contributions dollar-for-dollar up to 3% of the employee's compensation. The 3% may be lowered to not less than 1% for two out of every five plan years. Alternatively, for an IRA SIMPLE plan, an employer may make a 2% non-elective contribution for each eligible employee, taking into account no more than $280,000 (for 2019) in compensation for each employee.

SIMPLE IRA/401(k) Elective Contribution Limits

Year	2008	2009 -12	2013-14	2015-18	2019	2020
Under Age 50	10,500	11,500	12,000	12,500	13,000	
Age 50 and over	13,000	14,000	14,500	15,500	16,000	

If any amounts are not shown, they were not available at publication date
Employer matching contributions are not treated as elective contributions

<u>*Combination Plans Limitations*</u> – A SIMPLE Plan is classified a qualified employer salary reduction plan which has the following impact on other retirement plans:

(1) **Overall Salary Reduction Plan Limits** – If the employee participates in any other salary reduction contributions (elective deferrals) the salary reduction contributions under a SIMPLE IRA plan also count towards the overall annual limit of $19,000 for 2019.

CAUTION – AGGREGATE CONTRIBUTION LIMITS

The contribution limits to 403(b) TSA plans, 408(p)(2) SIMPLE plans, 408(k) SEP IRAs and 401(k) plans apply on an aggregate basis. That is, the total contributed to all four plans cannot exceed the annual limit. See chapter 4.14 for corrective distributions.

(2) **IRA Limits** – Since a SIMPLE plan is an employer plan, the contribution to the SIMPLE plan does not reduce the amount that can be contributed to an IRA

(3) **Traditional IRA Contributions** – SIMPLE plans are employer plans and thus trigger the AGI limitation for Traditional IRA contributions by plan participants.

(4) **SEP Limits** – If the employee who participates in a SIMPLE plan is also self-employed in his or her own business, contributions the individual makes to his or her own SEP plan (that is not a SARSEP) are not reduced by the contributions made to the employer's SIMPLE IRA plan by either the employee or the employer.

Employer Mandatory Matching Contributions – The employer must make either:

(1) A matching contribution equal to the amount the employee contributes, up to 3% of the employee's compensation for the year, (Code Sec. 408(p)(2)(C)(ii)(I)) **OR, electively**, as little as 1% in no more than two out of the previous five years, if the employer timely notifies the employees of the lower percentage (Code Sec. 408(p)(2)(C)(ii)(II)), or

(2) A non-elective contribution of 2% of compensation for each employee eligible to participate who has at least $5,000 of compensation from the employer for the year and taking into consideration no more than $280,000 of compensation (for 2019). See table below for other years. (Code Sec. 408(p)(2)(B)(i))

CAUTION: The elective reduced employer contribution does not apply to SIMPLE plans that are part of a 401(k) plan.

No other contribution can be made. Employer contributions must be made no more than 30 days after the month for which the contributions are to be made. Compensation is the same as wages for income tax withholding plus the amount of the employee's elective deferrals. For self-employed individuals compensation is net self-employed earnings without regard to the SIMPLE plan provisions. The definition of compensation includes wages paid to domestic workers, even though those amounts are not subject to income tax withholding.

Max. Compensation for Computing Non-Elective Employer Contribution

Year	2014	2015-16	2017	2018	2019	2020
Maximum	260,000	265,000	270,000	275,000	280,000	

If any amounts are not shown, they were not available at publication date

Employer matching contributions - The employer is generally required to match each employee's salary reduction contributions on a dollar-for-dollar basis up to 3% of the employee's compensation. This requirement does not apply if the employer makes non-elective contributions.

Example: *Employee, John, earns $25,000 and chooses to defer 5% of his salary. Dave, the employer, has net earnings from self-employment of $40,000, and chooses to contribute 10% of his earnings to the SIMPLE IRA. The employer makes 3% matching contributions.*

John's (the employee) contributions are determined as follows:

Salary reduction contributions ($25,000 x .05)	*$1,250*
Employer matching contribution ($25,000 x .03)	*750*
Total contributions	***$2,000***

Dave's (the employer) contributions are determined as follows:

Salary reduction contributions ($40,000 x .10)	*$4,000*
Employer matching contribution ($40,000 x .03)	*1,200*
Total contributions	***$5,200***

Employee Election - Each employee eligible to participate must be given the right to elect for a calendar year to (a) participate in the arrangement, or (b) modify the amounts subject to the arrangement:

- During the 60-day period immediately preceding the beginning of a calendar year (i.e., Nov. 2 through Dec. 31 of the preceding calendar year); or
- For the year during which an employee becomes eligible to elect to have salary reduction contributions made, the 60-day period that includes either the date the employee becomes eligible, or the day before that date.

A SIMPLE plan may provide additional or longer election periods for employees to enter into salary reduction agreements or modify prior agreements. For example, a SIMPLE plan can provide a 90-day election period instead of the 60-day period. Also, a SIMPLE plan can provide quarterly election periods during the 30 days before each calendar quarter, in addition to the 60-day period.

Contribution Timing – Employer contributions to SIMPLE accounts are deductible in the employer's tax year in the calendar year for which the contribution applies but can be made up to the extended due date of the employer's tax return.

Participation Termination - An employee must be able to elect to terminate participation in the arrangement at any time during the year (Code Sec. 408(p)(5)(B)).

Cash Election - An employee eligible to participate in a SIMPLE IRA plan is required to make an election between his employer paying him cash or making a contribution to a SIMPLE IRA on his behalf (Code Sec. 408(p)).

Employee Contributions - Salary reduction contributions for regular employees must generally be deposited not later than the close of the 30-day period following the last day of the month in which amounts otherwise would have been payable to the employee in cash.

Employer Subsequently Fails Qualifications - A qualifying employer that maintains a SIMPLE plan but later fails to qualify may continue to maintain the plan for two years after its last year of eligibility, subject to certain restrictions for acquisitions, dispositions and similar transactions.

Automatic Enrollment - SIMPLE plans may also incorporate an automatic contribution arrangement which permits an employer to make contributions to an employee's SIMPLE IRA without the employee having made an affirmative election to participate in the plan. The code does not require that the employee receive cash where he doesn't make an affirmative election to have that amount contributed to the SIMPLE IRA.

Employees Age 70½ and Over – Elective contributions can be made to SIMPLE IRAs by employees who have reached age 70½ even though IRA contributions are otherwise not permitted by individuals who have reached this age. (Code Sec. 219(b)(4))

Two-Year Period for Rollovers – Unlike participants in qualified plans, which are not allowed to take in-service distributions, participants in a SIMPLE are allowed to receive distributions subject to certain restrictions. Participants in a SIMPLE plan can transfer (trustee-to-trustee) the IRA to another SIMPLE plan in a tax and penalty free transfer. However, no other transfers are allowed within the two year period beginning with the date of participation in the SIMPLE plan without being taxable and subject to a 25% penalty.

> Those wishing to convert their SIMPLE IRA funds to a Roth IRA will need to meet the two-year requirement to avoid the 25% penalty.

One IRA Rollover Per 12 Months Limitation – An individual receiving an IRA distribution on or after January 1, 2015, cannot roll over any portion of the distribution into an IRA if the individual has received a distribution from any IRA, including a SIMPLE IRA, in the preceding 1-year period that was rolled over into an IRA. This rule does not apply to trustee-to-trustee transfers. (IRS Announcement 2014-32) See Chapter 4.04 for additional information.

FICA & FUTA - Matching and non-elective contributions to a SIMPLE account are excludable from an employee's income for FITW, FICA and FUTA purposes. But salary reduction contributions to a SIMPLE plan, while excludable from income and for income tax withholding, are subject to FICA (Social Security/Medicare) withholding and for FUTA purposes.

Saver's Credit – Contributions to SIMPLE plans qualify for the saver's credit that benefits lower-income taxpayers.

Small Business Start-up Credit – A SIMPLE plan qualifies for the Small Business Start-Up Credit (use Form 8881).

Only Plan Limitation – The SIMPLE plan can be the only plan offered by a qualified employer.

100-Employee Limitation - For purposes of applying the "100-employee limitation" and in determining whether an employee is eligible to participate in a SIMPLE IRA plan (i.e., whether the employee had $5,000 in compensation for any two preceding years), an employee's income includes the employee's elective deferrals under a 401(k) plan, a salary reduction SEP, and a 403(b) annuity contract.

401(k) Non-Discrimination Test – A 401(k) plan that meets the SIMPLE 401(k) plan requirements for the year is treated as meeting the non-discrimination test applicable to employee elective deferrals.

Top Heavy Rules - A SIMPLE 401(k) plan is not subject to the top-heavy rules for any year for which the SIMPLE 401(k) rules are met, *if* the plan allows only the contributions allowed under the SIMPLE 401(k) rules.

Rollovers Into Simple Plans - For contributions made after December 18, 2015, SIMPLE IRA owners may, after the plan has existed for two years, roll over amounts from a traditional IRA, SEP plan, 401(k) plan, 403-b plan, 457(b) plan and other qualified plans into their SIMPLE IRA. (IRC Sec 408(p)(1) as amended by the PATH Act of 2015, Division Q, Act §306(a))

Unrelated Business Income - See chapter 4.05

CALIFORNIA DIFFERENCES

California conforms to SIMPLE plans.

NOTES

HEALTH SAVINGS ACCOUNTS

Overview

- **Eligible Individual is:**
  - One covered by a high-deductible health plan (HDHP).
  - NOT one (generally) covered by any other non-.
  - NOT one covered by Medicare.
  - NOT one claimed as a dependent of another.

- High-deductible health plan (HDHP) definition (2019)

Annual	Self-Only	Family
Minimum Deductible	$1,350	$2,700
Max Out-Of-Pocket Expenses	$6,750	$13,500

- 2019 Monthly Contribution Limit:
  - **Self only** – **$291.67** (1/12 of the $3,500 annual cap)
  - **Family coverage - $583.33** (1/12 of the annual limit)
  - **Age 55 annual catch-up -** $83.33 **($1,000/12)**
- Above-the-line deduction
- Earnings accumulate tax-free and distributions are tax-free if for qualified medical expenses.

HSA AS A SUPPLEMENTAL RETIREMENT VEHICLE

Strategies

Establishing and contributing to an HSA can be more than just a way for individuals to save taxes and gain control over their medical care expenditures. It can also be a retirement vehicle, especially for taxpayers who are maxed out on their other retirement plan options or who can't contribute to an IRA because of the income limitations.

There is no requirement that medical expenses must be paid or reimbursed from the HSA, so a taxpayer can maximize tax-free growth in the account by using funds from other sources to pay routine medical costs. Later, distributions can be used tax-free to pay post-retirement medical expenses. Or, if used for non-medical purposes, a retiree age 65 or older will pay income tax, but not a penalty, on the distribution. Unlike IRAs, no minimum distributions are required to be made from HSAs at age 70½ or any other age.

RAPID FINDER

WHAT IS AN HSA?

The Details

Tax-favored HSAs can only be established by eligible individuals who are covered by a high-deductible health plan (HDHP) and not covered under any other health plan which is not an HDHP, unless the other coverage is permitted insurance or coverage for accidents, disability, dental care, vision care, or long-term care. Eligible individuals may, subject to statutory limits, make contributions to HSAs, and employers as well as other persons (e.g., family members) also may contribute on behalf of eligible individuals. (Code Sec. 106, Code Sec. 223)

An account holder gets the deduction for contributions to his HSA even if someone else (e.g., a family member) makes the contributions. (Code Sec. 62(a)(19)) Employer contributions to an HSA are excludable from the employee's income, and distributions for qualifying medical expenses are tax-free.

Contributions to HSAs are an above-the-line deduction, amounts in an HSA may be accumulated tax-free, and distributions are tax-free if used to pay or reimburse qualified medical expenses. Many of the rules related to HSAs are similar to rules that apply to IRAs and Archer Medical Savings Accounts.

An HSA is a tax-exempt trust or custodial account established exclusively for the purpose of paying qualified medical expenses of the account beneficiary who is covered under a high-deductible health plan (defined below). Coverage under a high-deductible health plan is looked at on a month-by-month basis.

Eligible Individual - To be eligible to establish an HSA, an individual, for any month:

1. Must be covered under a high-deductible health plan (HDHP) on the first day of the month;
2. Is not also covered by any other health plan that isn't an HDHP, except certain permitted coverage (see below);
3. Is not entitled to benefits under Medicare (i.e., generally individuals who haven't yet reached age 65); and
4. Is not claimed as a dependent on someone else's return.

Health Flexible Spending Accounts (FSA) & HSAs **-** A health FSA (Code Sec 213), offered by an employer, as part of the employer's qualified cafeteria plan, allows employees to contribute up to $2,700 (2019) in pre-tax dollars annually to be used by the individual to pay medical expenses of the individual, their spouse and dependents during year. Unused amounts are generally forfeited. However, the plan **either** can have a grace period of up to 2½ months after the end of the plan year in which to use up the unused amount **or** allow up to $500 of unused amounts from the end of the plan year to be used to pay or reimburse qualified medical expenses in the following year. Unused amounts in excess of the carryover amounts are forfeited (cannot be returned to the employee). The carryover amount does not reduce the maximum contribution amount allowed for the carryover year. There are two types of health FSA plans:

- **General Purpose Health FSA** – One that reimburses all qualified medical expenses without restriction that is classified as a "health plan that constitutes other coverage" and having such coverage would make the individual **ineligible to make contributions to an HSA.**
- **HSA-compatible Health FSA** – One that is a limited-purpose health FSA, a post-deductible health FSA, or a combination of the two.

FSA Carryover and HSA Eligibility - The impact of health FSA carryover from one year to the other on HSAs is dealt with in Chief Counsel Advice 201413005. The following is a synopsis of the Chief Counsel's advice where there is carryover from year 1 to year 2:

FSA Type Year One	FSA Type Year Two	HSA Qualified In Carryover Year?
Gen'l Purpose	Gen'l Purpose	NO – Entire Year
Gen'l Purpose	HSA Compatible*	Yes
Gen'l Purpose	None	Yes – Provided Carryover is Declined

** Assumes general purpose health FSA carryover rolled into HSA compatible health FSA.*

Medicare Coverage - IRS has interpreted being "entitled to benefits under Medicare" to mean both eligibility and enrollment in Medicare. An individual who is otherwise eligible, but who is not actually enrolled in Medicare Part A, may contribute to an HSA until the month actually enrolled in Medicare. *(IRS Notice 2004-50; IRS Notice 2008-59)* If an individual has delayed applying for Medicare, when they do apply, their enrollment may be back dated for up to 6 months. Thus, any contributions made to their HSA during the period of retroactive coverage will be considered excess contributions. (IRS Pub 969) Retroactive Medicare coverage can be for up to 6 months, so those with an HSA who plan to delay enrollment in Medicare should stop making contributions to their HSA at least 6 months before Medicare enrollment to avoid a tax penalty for excess contributions. See page 4.21.06 for more on excess contributions.

VA Coverage - An individual who is eligible to receive Department of Veterans Affairs (VA) medical benefits will be treated as an eligible individual if otherwise qualified and no VA medical benefits have been received during the preceding three months. The 3-month rule does not apply if the medical benefits consist solely of disregarded coverage (defined below) or preventive care ***(IRS Notice 2008-59)***.

Indian Health Service (IHS) - An individual who is eligible to receive medical services at an IHS facility, but who has not actually received such services during the previous three months, is an eligible individual within the meaning of § 223(c)(1) who may establish and make tax-free contributions to an HSA. However, an individual generally is not an eligible individual if the individual has received medical services at an IHS facility at any time during the previous three months. Notice 2004-2, Q&A-6, provides that the receipt of permitted coverage, such as dental and vision care, or the receipt of preventive care, such as well-baby visits, immunizations, weight-loss and tobacco cessation programs, does not affect an individual's eligibility. ***(IRS Notice 2012-14)***

Other Allowed Insurance – An individual will not be prevented from establishing an HSA if, in addition to an HDHP, the individual has coverage for benefits provided by "permitted insurance," under which substantially all the coverage provided relates to:

- Worker's compensation laws;
- Tort liabilities;
- Liabilities relating to ownership or use of property, such as automobile insurance;
- Insurance for a specific disease or illness, such as cancer insurance; and
- Insurance that pays a fixed amount per day (or other period) of hospitalization.

In addition, eligibility for an HSA will not be compromised merely because the individual also has coverage (whether provided through insurance or otherwise) for accidents, disability, dental care, vision care, or long-term care—collectively termed "disregarded coverage". Discount cards entitling the holder to discounts for health care services or products at managed care market rates will not disqualify the individual from being an eligible individual for HSA purposes, if the individual is required to pay the health care costs until the high-deductible health plan's deductible is satisfied.

State Required Coverage – Generally, if a state requires a health plan to provide certain benefits without a deductible or at a deductible that is less than the minimum annual deductible, the plan may not be an HDHP.

HIGH-DEDUCTIBLE HEALTH PLANS (HDHPs)

An HDHP is a health plan that satisfies certain requirements with respect to out-of-pocket expenses and annual deductibles based on whether the coverage is for "self-only" or "family." Family HDHP coverage is a health plan covering one eligible individual and at least one other person, whether or not that other person is an eligible individual.

The monetary requirements for an HDHP are:

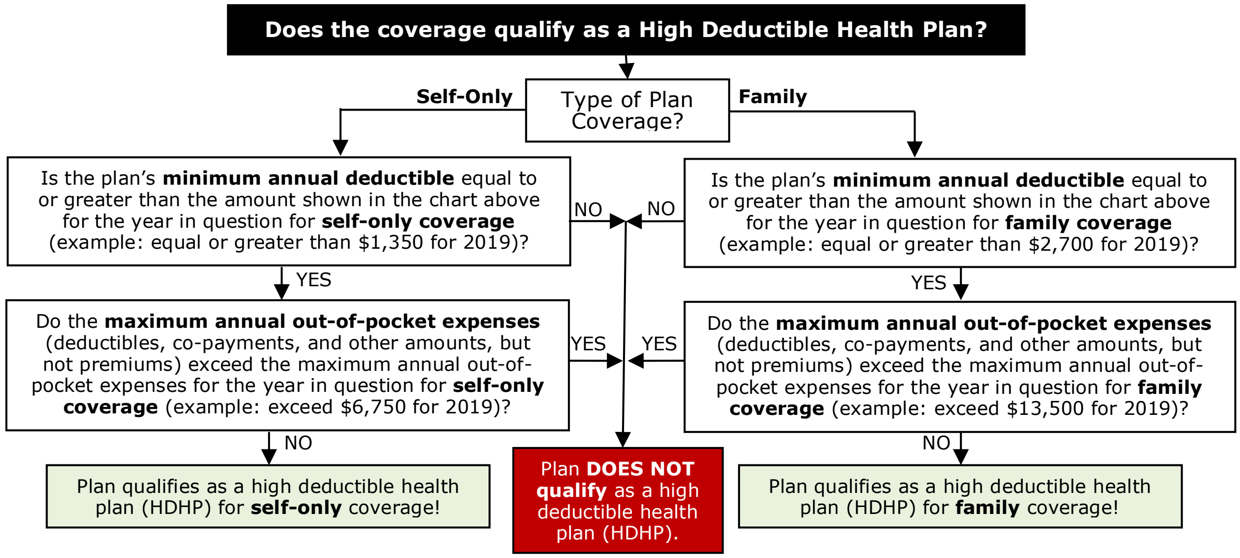
	Minimum Annual DEDUCTIBLE						Maximum Annual OUT-OF-POCKET EXPENSES					
Coverage	**2015**	**2016**	**2017**	**2018**	**2019**	**2020**	**2015**	**2016**	**2017**	**2018**	**2019**	**2020**
Self-only	1,300	1,300	1,300	1,350	1,350	1,400	6,450	6,550	6,550	6,650	6,750	6,900
Family	2,600	2,600	2,600	2,700	2,700	2,800	12,900	13,100	13,100	13,300	13,500	13,800

HSA Interaction with the ACA Deductible-Free Preventive Care Requirements

Generally, under section 223(c)(2)(A), an HDHP may not provide benefits for any year until the minimum deductible for that year is satisfied. However, section 223(c)(2)(C) provides a safe harbor for the absence of a deductible for preventive care. Therefore, an HDHP may provide preventive care benefits without a deductible or, in some cases with a deductible below the minimum annual deductible otherwise required. Notice 2004-23 clarifies that preventive care generally does not include any service or benefit intended to treat an existing illness, injury, or condition.

In response to a directive from Pres. Trump for the Secretary of the Treasury to issue guidance to expand the ability of patients to select HDHPs that can be used alongside an HSA, the IRS, in consultation with HHS, has determined that certain medical care services received and items purchased, including prescription drugs, for certain chronic conditions should be classified as preventive care for someone with that chronic condition, and thus won't disqualify participation in an HSA when the HDHP provides coverage for these items without a deductible. These medical services and items are limited to the specific medical care services or items listed below, but the IRS and HHS will periodically review and update the list. (Notice 2019-45)

Preventive Care for Specified Conditions	For Individuals Diagnosed with. . .
Angiotensin Converting Enzyme (ACE) inhibitors	Congestive heart failure, diabetes, and/or coronary artery disease
Anti-resorptive therapy	Osteoporosis and/or osteopenia
Beta-blockers	Congestive heart failure and/or coronary artery disease
Blood pressure monitor	Hypertension
Inhaled corticosteroids	Asthma
Insulin and other glucose lowering agents	Diabetes
Retinopathy screening	Diabetes
Peak flow meter	Asthma
Glucometer	Diabetes
Hemoglobin A1c testing	Diabetes
International Normalized Ratio (INR) testing	Liver disease and/or bleeding disorders
Low-density Lipoprotein (LDL) testing	Heart disease
Selective Serotonin Reuptake Inhibitors (SSRIs)	Depression
Statins	Heart disease and/or diabetes



Out-of-Pocket Expenses include deductibles, co-payments and other amounts, but not insurance premiums. A plan is not disqualified as an HDHP merely because it does not have a deductible (or has a small deductible) for preventive care. A family plan will qualify as an HDHP only if amounts are not payable from the HDHP until the family collectively has incurred medical expenses in excess of the minimum annual deductible.

> ***Example – Family Plan Does Not Qualify:*** *Joe has a medical insurance plan that provides coverage for himself and his family. The plan will pay covered medical expenses of any member of Joe's family if the family member has incurred covered medical expenses during the year of over $1,000, even if the family as a whole has not incurred medical expenses over $2,700 for 2019. So, if Joe's medical expenses were $1,500 during the year, the plan would pay $500. This plan would not qualify as an HDHP because it provides family coverage with an annual deductible of less than $2,700.*

> ***Example – Family Plan Qualifies:*** *If the coverage for Joe and his family from the example above was that the plan had a $5,000 family deductible and provided payments for covered medical expenses if any member of Joe's family incurred over $2,700 of expenses, the plan would qualify as an HDHP.*

> ***Example – Family Plan May Qualify:*** *An otherwise qualified HDHP provides family coverage in 2019 with a $2,700 deductible for each family member. Once a family member satisfies the $2,700 deductible, 100% of that person's covered benefits are covered by the plan. The plan has no express limit on out-of-pocket expenses. Because the limit on maximum out-of-pocket expenses for 2019 is $13,500, this plan will qualify as an HDHP only for a family with 2 to 4 covered individuals ($2,700 x 4 = $10,800), which is under the ceiling for 2019. This plan would not qualify for a family with over 5 covered individuals (6 x $2,700 = $16,200, which exceeds the $13,500 maximum for 2019).*

Deductible Period Over 12 Months - If a plan's deductible can be satisfied over a period longer than 12 months, the minimum annual deductible must be increased to take the longer period into account when determining if the plan satisfies the HDHP deductible requirement.

> ***Example – Deductible Period Exceeds 12 Months:*** *Fiona's self-only health plan takes into account medical expenses incurred in the last 3 months of 2018 to satisfy the deductible for calendar year 2019, a total deductible period of 15 months, and for that period the plan's deductible is $1,800. The calculation to determine if the deductible meets the HDHP minimum annual deductible requirement is: $1,350 x 15 months = 20,250/12 = $1,688, the minimum amount that the HDHP deductible must be for 15 months. Because the plan's deductible, $1,800, exceeds $1,688, the plan qualifies as an HDHP.*

HOW HSAs ARE ESTABLISHED

An eligible individual can establish an HSA (or multiple HSAs) with a qualified HSA trustee or custodian (insurance company, bank, or similar financial institution) in much the same way an IRA is established. No permission or authorization is required from IRS. There is no requirement that the individual have earned income. If employed, an eligible individual may establish an HSA with or without involvement of the employer. Joint HSAs between a husband and wife are not allowed; each spouse who is an eligible individual who wants to contribute to an HSA must have a separate HSA.

HSA funds may be invested in the same type of investments approved for IRAs. They may not invest in life insurance contracts or collectibles. Account beneficiaries are prohibited from entering into the same type of "prohibited transactions" as applicable to IRAs. Amounts treated as distributed because of a prohibited transaction are not considered used to pay for qualified medical expenses and must be included in gross income and are subject to an additional 20% penalty.

CONTRIBUTIONS TO HSAs

Any eligible individual, whether **employed, unemployed or self-employed, may contribute to an HSA**. Unlike IRAs, there is no requirement that the individual have compensation and there are **no phase-out rules** for high-income taxpayers. For an HSA established by an employer, the employee, the employer or both may contribute to the HSA. Family members or any other person may also make contributions to an HSA on behalf of an eligible individual. ***(Notice 2004-23; Notice 2004-50)*** If an individual has more than one HSA, the aggregate annual contributions to all the HSAs are subject to the limit.

Contributions to an HSA **must be made in cash** (no stock or other property). Payments to the HDHP and contributions to the HSA can be made through an employer's cafeteria plan.

Maximum Contribution – General Limitation – The maximum annual contribution to an HSA is the sum of the limits **determined separately for each month**, based on status, eligibility and health plan coverage as of the first day of the month.

The maximum annual monthly contribution is determined as follows:

- **Self-only** coverage (monthly) = 1/12 of the self-only dollar limit for the year.
- **Family** coverage (monthly) = 1/12 of the family coverage dollar limit for the year.

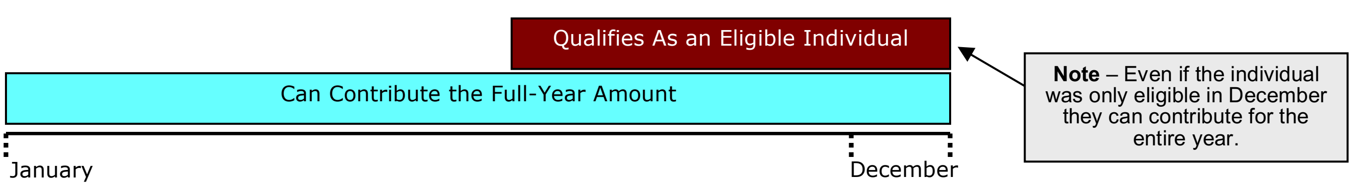
	MAXIMUM ANNUAL CONTRIBUTION					
	2015	**2016**	**2017**	**2018**	**2019**	**2020**
Self-only coverage:	$3,350	$3,350	3,400	3,450	3,500	3,550
Family coverage:	$6,650	$6,750	6,750	6,900*	7,000	7,100

*As a result of the TCJA change in how inflation adjustments are calculated, the IRS in Rev Proc 2018-18 revised the original 2018 maximum of $6,900 to $6,850, but then 2 months later in Rev Proc 2018-27 reinstated $6,900 as the 2018 family coverage contribution limit. Refer to Rev Proc 2018-27 for information and clarification on how to treat a distribution of an excess contribution (and earnings) that took place based on Rev Proc 2018-18.

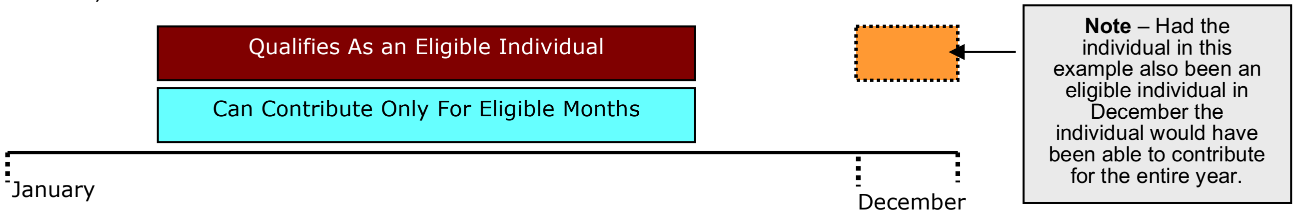
Additional Catch-up Contribution – Individuals (and their spouses covered under the HDHP), age 55 and older, who are not enrolled in Medicare are allowed to increase their HSA contribution. The catch-up contribution, like the annual contribution limit, is computed on a monthly basis. The annual amount has been $1,000 since 2009.

FIGURING THE CONTRIBUTIONS

Individuals Who Are Eligible on the Last Day of the Year– An eligible individual who establishes an HSA plan during the year and is still an eligible individual during the last month of the year (December) can contribute the full-year amount (does not need to prorate the contribution). *Notice 2008-52, 2008-25 IRB 1166*



Individuals Who Are NOT Eligible on the Last Day of the Year – An individual who was eligible during the year but not eligible during the last month of the year (December) must prorate their contributions for the year. *Notice 2008-52, 2008-25 IRB 1166*



Correcting Contributions Made for Ineligible Periods - When an individual's full-year contribution was based on the "last month" rule (i.e., when considered to be an eligible individual for the entire year if an eligible individual on the first day of the last month of the tax year – December 1 for most taxpayers), the individual must remain eligible during a "testing period." The testing period begins with the last month of the tax year and ends on the last day of the 12th month following that month. For example, the testing period for a calendar-year individual who became eligible on December 1, 2019 would be December 1, 2019 through December 31, 2020 If, at any time during a particular testing period the individual is *not* an "eligible individual", except by reason of death or a disability, then:

(a) The individual's gross income for the tax year that includes the first month in the testing period for which he is not an eligible individual is increased by the aggregate amount of all of his HSA contributions which could not have been made; and

(b) A 10% additional tax will be imposed for any tax year on the amount of the increase described in item (a), above. Code Sec. 223(b)(8)(B); Notice 2008-52, 2008-25 IRB 1166.

No Contributions After Enrollment in Medicare – After an individual has reached the Medicare eligibility age (generally 65), and has **actually enrolled** in Medicare, including Medicare D, no further contributions, including catch-up contributions, can be made to the individual's HSA.

Example – Computing Contribution in Year Enrolling in Medicare: *Becky's 65th birthday is in July 2019, at which time she enrolled in Medicare. Becky was participating in self-only coverage under an HDHP with an annual deductible of $1,350. She is not eligible to make HSA contributions after June 2019. Her monthly contribution limit is $370.83 (($3,450/12) + ($1,000/12)) and the maximum she may contribute for the year is $2,224.98 (6 x $370.83)) for coverage from January through June.*

Spouse with Family Coverage – Where a husband and wife each has family HDHP coverage, the general rule is that each spouse may set up a separate HSA and they may divide the HSA annual contribution limit between them as they wish. If each spouse has just self-only HDHP coverage, each spouse may contribute to their respective HSA. If either spouse of a married couple has family coverage, both are treated as having family coverage. If each spouse has family coverage under a separate health plan, both spouses are treated as covered under the plan amount divided equally between the spouses, unless they agree to a different division. Both spouses may make the catch-up contribution for individuals age 55 or over without exceeding the family coverage limit.

When Can Contributions Be Made? Contributions can be made in one or more payments at any time from January 1 of the tax year up to the unextended due date for filing the eligible individual's federal return for the tax year (usually April 15 for calendar year filers). Although the annual contribution is determined monthly, the maximum contribution may be made on the first day of the year. However, if the individual is later determined not to be eligible for the entire year, some or all of the contribution is treated as an excess contribution (see below).

TAX TREATMENT OF HSA CONTRIBUTIONS

Within the limits noted above, contributions to HSAs (including contributions by family members or other persons on behalf of an eligible individual) are deductible by the eligible individual in determining AGI, i.e., an **above-the-line deduction**. Contribution to the HSA may not be deducted as an itemized medical expense deduction.

Employer Contributions - If an eligible individual's employer contributes to the employee's HSA, the contributions (within the limits) are treated as employer-provided coverage for medical expenses under an accident or health plan and are **excludable from the employee's gross income**. They are not subject to income tax or FICA withholding (or FUTA tax). Contributions to an employee's HSA through a cafeteria plan are treated as employer contributions. An employee may not deduct the employer's HSA contributions as either an HSA contribution or a medical expense on his or her return.

Partnership and S Corp Contributions – If a partnership or S corporation contributes to a partner's or shareholder's HSA, the tax treatments are as follows:

- If Partnership treats the contribution as a guaranteed payment made for services - it is includible in the partner's gross income and treated as self-employment income. The partner, if otherwise qualified for an HSA, may deduct the contribution as an adjustment to gross income.
- If Partnership treats the contribution as a distribution to the partner under Section 731 - it is not deductible by the partnership, doesn't affect the distributive share of partnership income and deductions, and isn't includible by the partner as self-employment earnings. The HSA contribution is reported as a distribution of money on Schedule K-1(1065). (Under Sec 731, a partner includes the distribution of money as income only to the extent that the amount of money received exceeds the partner's adjusted basis in the partnership prior to the distribution; basis in the partnership is reduced, but not below zero, by the amount received.) The partner, if otherwise eligible, is allowed an above-the-line deduction for the HSA contribution.
- S Corp contributes to the HSA of a 2% shareholder who is an employee - the amount is treated as a guaranteed payment includible in the shareholder-employee's gross income. The contribution amount is deductible by the shareholder-employee as an above-the-line HSA contribution provided he or she is otherwise eligible under the HSA rules.

Excess Contributions – Contributions in excess of the limits noted above are not deductible. Contributions by an employer to an employee's HSA are included in the gross income of the employee to the extent they exceed the limits, or if they are made on behalf of an employee who is not an eligible individual. In addition, a **6% excise tax** for each tax year is imposed on the account beneficiary for excess individual and employer contributions, unless the excess contributions and the net income on the excess are paid to the account beneficiary by the due date (including extensions) of the return for the tax year. If the excess is **withdrawn timely**, then:

- Only the net income on the excess contributions is includible in the account beneficiary's gross income for the tax year of the distribution;
- The excise tax is not imposed; and
- The distribution of the excess contributions is not taxed.

TAX TREATMENT OF HSA DISTRIBUTIONS

Non-Qualified Distributions – Distributions from an HSA are permitted at any time, and if used exclusively to pay for qualified medical expenses of the account beneficiary, his or her spouse, or dependents, are excludable from gross income. Distributed amounts not used to pay for qualified medical expenses are includible in the account beneficiary's gross income and are subject to a 20% penalty tax. However, the penalty does not apply if the distribution is made on account of the beneficiary's:

- Death;
- Disability; or
- Attaining age 65.

Amounts withdrawn from an HSA to pay for the account's administration and maintenance fees are not treated as taxable distributions. (If these fees are paid directly by the account beneficiary or employer, they will not be considered contributions to the HSA, and therefore, won't count toward the annual maximum contribution limit.)

Qualified Medical Expenses – are unreimbursed expenses paid by the account beneficiary, his or her spouse, or dependents for medical care as defined in Code § 213(d), i.e., generally the same definition used for itemized-deduction medical expenses. Amounts paid for medicine or a drug are qualified medical expenses for HSA distribution purposes only if the medicine or drug is a prescribed drug (determined without regard to whether such drug is available without a prescription) or is insulin. The qualified medical expenses must be incurred only after the HSA has been established. Medical expenses paid or reimbursed by HSA distributions cannot also be claimed as a medical expense for itemized deduction purposes.

Generally, health insurance premiums are ***not*** qualified medical expenses for HSA purposes, except for the following:

1. Qualified long-term care insurance;
2. COBRA health care continuation coverage;
3. Health care coverage while receiving unemployment compensation; and
4. For individuals age 65 or over, premiums for Medicare A, B or D, Medicare HMO, and the employee share of premiums for employer-sponsored health insurance, including premiums for employer-sponsored retiree health insurance (but not Medigap policies).

HSA distributions to pay long-term care insurance premiums are excludable only up to the annual age-based limit that applies for deducting long-term care premiums as medical expenses.

> ***Example – Long-term Care Insurance Premiums:*** *Paula is age 41, and in* 2019*, pays a premium of $1,290 for a qualified long-term care insurance contract. For persons over age 40 and through age 50 in 2019, the limit for deducting long-term care premiums as a medical expense is $790 (See chapter 7.02). Paula's HSA can only reimburse her up to $790 tax-free for the long-term care premiums. But if Paula is reimbursed the entire $1,290 from the HSA, she will have to include $500 ($1,290 - $790) in gross income and pay a $100 penalty (20% x $500) because the additional $500 is not considered a qualified medical expense.*

The tax-free treatment of distributions from an HSA continues even if the account beneficiary is no longer an eligible individual (because of enrolling in Medicare or no longer having an HDHP), as long as the distributions are used exclusively to pay qualified medical expenses.

HSA trustees or custodians and employers who contribute to an employee's HSA are not required to determine whether HSA distributions are used for qualified medical expenses. Individuals who establish HSAs make that determination and should maintain records to substantiate that the distributions were used exclusively for qualified medical expenses.

There is ***no time limit*** on when a distribution from an HSA must be taken to pay or reimburse qualified medical expenses, but the HSA trustee may put reasonable restrictions on the frequency and minimum amount of distributions. To be excludable from the account beneficiary's gross income, he or she must keep records sufficient to later show that the distributions were exclusively to pay or reimburse qualified medical expenses, that the expenses weren't previously paid or reimbursed from another source, and that the medical expenses have not been taken as an itemized deduction in any prior tax year.

PROHIBITED TRANSACTIONS

If an HSA beneficiary engages in a prohibited transaction, the HSA ceases to be an HSA as of January 1 of the year that the forbidden activity occurs, and the fair market value of the account as of January 1 is deemed distributed but not treated as being used for payment of medical expenses. Thus, it is taxable, and subject to a 20% penalty. Examples of prohibited transactions include borrowing funds from the HSA or pledging the HSA as security for a loan; selling, exchanging or leasing property between the beneficiary and the HSA; furnishing goods or services between the beneficiary and the account; and transferring HSA assets to or for use by or benefit of the beneficiary. ***(IRS Notice 2008-59, Part V)***

RETURN AND INFORMATION REPORTING

IRS Form 8889, Health Savings Accounts (HSAs), must be filed with the individual's income tax return if during the tax year:

- A contribution was made to the HSA.
- A distribution was made from the HSA.
- Income is reportable because the individual became an ineligible individual due to failing the testing period.
- An HSA was inherited.

The following information returns are prepared by the employer or trustee of the HSA and provide some of the information necessary to complete Form 8889:

Form W-2: employer contributions to an HSA plus the amounts the employee has elected to contribute to the HSA through a Sec. 125 (cafeteria) plan must be reported on the employee's Form W-2, Box 12, Code W.

Form 1099-SA: distributions from an HSA are reported by the trustee.

Form 5498-SA: filed annually by the trustee, this form shows the amount of annual contributions to the HSA.

DEATH OF ACCOUNT BENEFICIARY

Any balance in the HSA at the account beneficiary's death becomes the property of the individual named in the HSA instrument as the beneficiary of the account. If that beneficiary is the **surviving spouse**, the HSA becomes the spouse's HSA, and the surviving spouse will be subject to income tax only to the extent distributions from the HSA are not used for qualified medical expenses.

Non-spouse beneficiary - If the beneficiary is other than the surviving spouse, the HSA ceases to be an HSA as of the date of the account beneficiary's death, and the heir is required to include in gross income the fair market value of the HSA assets as of the date of death. For that person (other than the decedent's estate), the includible amount is reduced by any payments from the HSA made for the decedent's qualified medical expenses, if paid within one year after death. Because the HSA is income in respect of a decedent, the non-spouse beneficiary is allowed an estate tax deduction with respect to the part of the estate tax attributable to the value of the HSA that he or she had to include in income.

UNRELATED BUSINESS INCOME: See chapter 4.05

CALIFORNIA DIFFERENCES

To date, California has not adopted health savings accounts. This means:

- Contributions to HSAs are not deductible or excludable from wages for California.
- If the HSA contributions were excluded from an employee's federal wages, the California wages will be higher by the amount of the HSA contribution. The "state wages" box of Form W-2 should reflect this higher amount. The difference between federal and California wages is an adjustment on Schedule CA.
- Earnings in an HSA are currently taxable to California. This amount will not appear on either Form 1099-SA or 5498-SA; generally the amount will be included on a year-end statement from the trustee. Or the taxpayer may have to request the information from the trustee or may be able to obtain it from his or her online HSA account.
- A California taxpayer will have a basis in the HSA equal to the amount contributed (and not deducted for California) plus the earnings previously taxed. Therefore, if a distribution is made from the HSA that is not used to pay for qualified medical expenses, it is taxable for federal purposes, but will not be taxable for California to the extent of California basis.
- An IRA, Archer MSA, HRA, or FSA distribution rolled into an HSA will be treated as a nonqualifying distribution, taxable and possibly subject to penalty, for California. However, the California basis of the HSA will be increased by the amount of the distribution from the other plans that is taxed.
- Medical expenses paid or reimbursed with HSA distributions that aren't deductible for federal purposes should be allowed as medical expenses for California itemized deductions (subject to the usual 7.5% of AGI reduction); adjustment is made on Schedule CA.

CALSAVERS RETIREMENT SAVINGS PROGRAM

Background – The state of California has been trying for a few years to set up a retirement savings program for employees who aren't covered by an employer's 401(k) or other retirement plan. The initial plan was called the California Secure Choice Retirement Program and was to be tied into the federal *my*IRA program. Due to lack of participation, *my*IRAs were discontinued. Then there was a court case, *Howard Jarvis Taxpayers Association v. The California Secure Choice Retirement Savings Program,* challenging whether the state's retirement savings program was legal under the federal ERISA law. The court ruled that it doesn't violate ERISA, but also allowed the plaintiff to file an amended complaint, so the case may not be over.

New program - California has created a new retirement savings program called CalSavers that is being implemented over a 3-year period. The law creating this program requires most California employers that don't offer an employer-sponsored retirement plan to participate. The program is administered by a private-sector financial services firm (Ascensus College Savings Recordkeeping Services, LLC) and overseen by the California Secure Choice Retirement Savings Investment Board (the Board) chaired by the State Treasurer.

Registration of employers opened July 1, 2019, and the state is encouraging eligible employers to join the program any time prior to their registration deadline. Employers can register on the CalSavers web site: https://www.calsavers.com. The staggered deadlines for registering with the state, based on employer size, are:

Number of Employees	Registration Deadline
More than 100	June 30, 2020
51 to 100	June 30, 2021
5 to 50	June 30, 2022

Employer's responsibility - Employers have a limited role in the program, mainly to sign up employees, disseminate information about CalSavers, and submit participating employees' contributions that come from payroll deductions. Employers cannot make contributions to the program and there are no fees for employers. Since CalSavers is not sponsored by the employer, the employer is not responsible for the program or liable as a program sponsor. Employers are not permitted to endorse the program or encourage or advise employees on whether to participate, how much (if any) to contribute or provide investment help.

Employees' accounts – Each participating employee's CalSavers account is an after-tax Roth IRA, and the employee is responsible for their investment choices, which initially include a money market fund, target retirement date funds, bond fund, global equity fund, and environmentally and socially conscious fund. If the employee hasn't made an investment selection, the first $1,000 contribution will go into the money market fund and thereafter contributions will be put into a Target Retirement Date Fund. Investments in CalSavers are not guaranteed or insured by the Board, the State of California, the Federal Deposit Insurance Corporation (FDIC), or any other organization. Depending on the investment selected by the employee, the annual asset-based fee ranges from 0.80% to 0.95%, according to the 48-page 2019 program disclosure booklet available online at: https://cdn.unite529.com/jcdn/files/CAER/pdfs/program_description.pdf

Eligible participants and contribution rates - To participate the employee must be at least 18 years old and have either an SSN or an ITIN. (A sole proprietor or partner in a partnership that is an eligible employer also qualifies to participate.) The default contribution rate for each employee is 5% of gross pay but employees can opt out of the program or change their contribution rate at any time. The minimum contribution rate is 1% and the maximum is 100% of available compensation up to the federal annual IRA contribution limits. An employee who doesn't opt out will be enrolled automatically after 30 days. The contribution percentage automatically increases by 1% each year starting January 1, 2020, up to a maximum contribution rate of 8%, but the employee can choose to opt out of automatic escalation.

Employees can join the program on their own if they do not have access to a retirement savings plan through their employer. Those who choose to self-enroll in CalSavers separate from an employer arrangement need to link their bank account to their CalSavers account through the CalSavers website.

Participating employees should be mindful of the AGI limitations for contributing to Roth IRAs and the annual IRA contribution limitations to avoid over-contributions that could result in tax and penalty liabilities.

NOTES

COVERDELL EDUCATION SAVINGS ACCOUNTS

A Coverdell Education Savings Account is a ***nondeductible*** education savings account. The investment earnings from these accounts accrue and are withdrawn tax-free, provided the proceeds are used to pay qualified higher education expenses of the account beneficiary.

- Contributions are **nondeductible.**
- Annual contribution is limited to **$2,000.**
- Contributions are subject to an **AGI Phase Out** (no annual Inflation adjustment).
    - Joint - 190,000 – 220,000
    - Others - 95,000 - 110,000
- Earnings are tax-free if used for qualified expenses.
- Expenses include **Kindergarten and above.**
- 6% excess contribution penalty
- 10% unqualified distribution penalty
- Can be rolled over or transferred to another qualified member of the taxpayer's family who is between the **ages 0 and 29**.
- Mandatory distributions prior to **age 30** except for special needs students.

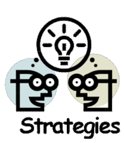
CONTRIBUTIONS

Contributions to a Coverdell Education Savings Account are limited per year and per beneficiary. The contributions can be made by anyone, including the beneficiary, providing the modified AGI of the contributor is less than the phase out limit. **Maximum contribution is $2,000**. *Contributions can be made to a qualified state tuition program and a Coverdell Education Savings Account in the same year.*

Coverdell or Section 529 Plan? Frequently, taxpayers will ask if it is better to contribute to a Coverdell Account or to a Section 529 Plan. Until the TCJA of 2017, Coverdell funds could be used for kindergarten and up, while Section 529 plans only applied to post-secondary education. This difference in the two arrangements was diminished for federal purposes as of 2018, when distributions from Section 529 plans of up to $10,000 per year per beneficiary became available to be used for grades K-12 also. ***Caution***: some states have not expanded the definition of eligible expenses for their Section 529 plans to include expenses incurred for schooling below college level.

The advantages of a Section 529 plan are control, larger contributions, and no AGI phase-out.



Strategy - It may be to a taxpayer's advantage to place the first $2,000 contributed toward a student's education fund in a Coverdell and then any additional amount can be set aside in a Section 529 plan.

GENERAL DIFFERENCES BETWEEN COVERDELL & SEC 529 PLANS		
	Coverdell	**Sec 529 Plan**
Maximum Annual Contribution	$2,000	$15,000/ Person(1)
AGI Phase Out Threshold Begins at	95K/190K	No Income Limitation
Use of Funds	Kindergarten thru Post-Secondary2)(3)	Kindergarten thru Post-Secondary(2)(3)

(1) The limit is based upon a combination of gift tax considerations and maximum plan contribution limits that vary from state to state. Generally, the maximum is around $250,000, although the limit may be much higher for some states, such as California where the cap is $529,000. Individuals can give five years' worth of gifts in one year under a special gift tax provision. The annual gift limit illustrated in the table is for 2019.
(2) K-12 expenses limited to $10,000 per beneficiary per year
(3)Some states only allow plan funds to be used for post-secondary expenses.

WHO CAN CONTRIBUTE

In addition to individuals, including the child, corporations and other entities (including tax-exempt organizations) are permitted to make contributions to Coverdell accounts.

MAGI PHASE OUT

The annual contribution per beneficiary is available in full only to an individual contributor with modified AGI below the phase out limits. These amounts are:

Filing Status	Modified AGI
Joint Filers	190,000 – 220,000
All Others	95,000 - 110,000

MAGI PHASE OUT DOES NOT APPLY TO CORPORATIONS OR OTHER ENTITIES

Corporations and other entities (including tax-exempt organizations) are permitted to make contributions to Coverdell Education Savings Accounts, regardless of the amount of the income of the corporation or entity during the year of the contribution. *(Com Rept. ¶ 5015)*

MODIFIED AGI

The contribution limit is phased out ratably for individual contributors with "modified AGI" between the initial and top modified AGI levels. "Modified AGI" is AGI increased by non-U.S. income excluded under the foreign provisions *(§ 911, 931, or 933)*. *The obvious solution to a contributor being limited by their AGI is for the contributor to gift the funds for the contribution to either the beneficiary or someone else whose modified AGI is low enough to allow the contribution on behalf of the beneficiary, or see paragraph immediately above.*

CONTRIBUTIONS

Contributions CANNOT be made that:

- Aren't made in cash;
- Are made after the accountholder reaches age 18 (special needs students discussed later), or
- Exceed the annual contribution limit (except for rollovers).

TIMING OF CONTRIBUTIONS

Contributions to a Coverdell account must be made by the due date (without extensions) of the contributor's tax return, i.e., April 15 most years for most individual taxpayers. *(Code Sec. 530(b)(4))*

EXCESS CONTRIBUTION PENALTY

A 6% excise tax applies to excess contributions to these accounts--i.e., any contribution over the annual limit. However, the excise tax won't apply:

- If excess contributions made during the year are distributed before the first day of the 6th month of the following tax year – generally June 1 for most individuals. (*Code Sec. 530(d)(4)(C))* The distribution must include any earnings attributable to the excess contribution.
- To rollover contributions. (*Code Sec. 4973(e)(2)(B))*

The 6% tax is imposed on the individual whose Coverdell ESA(s) received the excess contributions, i.e., the beneficiary. It is computed on Form 5329.

Excess contribution - An "excess contribution" to Coverdell ESAs maintained for any beneficiary for a year is the sum of:

(1) The amount by which the contributions to all Coverdell ESAs for the beneficiary in a year exceeds:

(a) $2,000, or

(b) if less, the maximum amount allowed under Code Sec. 530(c) (the contribution limit for each contributor). (*Code Sec. 4973(e)(1)(A*))

(2) The excess contribution for the preceding year, reduced by the sum of:

(a) Distributions from the Coverdell ESA during the current year (other than rollover distributions) (*Code Sec. 4973(e)(1)(B)(i))*, and

(b) The excess of: (i) the maximum amount which may be contributed to Coverdell ESAs for the current year, over (ii) the actual contribution for the current year. *(Code Sec. 4973(e)(1)(B)(ii))*

Example – Excess contribution *- Truman is five years old. Coverdell accounts were established for Truman by three of his relatives.*

	Contributed	*AGI Allowable*
Relative #1	*$1,000*	*-0-*
Relative #2	*$1,500*	*$500*
Relative #3	*$2,000*	*$1,000*
Total	*$4,500*	*$1,500*

Since AGI limited contributions are less than the $2,000 annual limit, the amount of the excess contributions to Truman's Coverdell account for the year is $3,000 ($4,500 – $1,500). Therefore, Truman is liable for a $180 penalty (6% × $3,000).

The 6% tax can be paid with funds withdrawn from one or more of the beneficiary's Coverdell accounts. However, if the withdrawal of contributions, plus earnings on these contributions, is not made by the due date (including extensions) of the beneficiary's return for the tax year in which the contributions were made, then the withdrawal would be subject to an additional 10% tax.

QUALIFIED EXPENSES

If a beneficiary's "qualified education expenses" in a year equal or exceed total Coverdell account distributions for the year, the distributions are 100% excluded from the beneficiary's gross income.

- **Definition –** In addition to POST SECONDARY education (same definition as for education credits), qualified expenses also include ELEMENTARY and SECONDARY school expenses. The term "school" for this definition includes any school which provides elementary or secondary education (Kindergarten through grade 12) as determined under state law *(IRC §530(b)(3)(B)).*

  Qualified elementary and secondary education expenses are defined *(Code Sec. 530(b)(3))* as—

  (a) Expenses for tuition, fees, academic tutoring, special needs services in the case of a "special needs beneficiary," books, supplies, and other equipment which are incurred in connection with the enrollment or attendance of the designated beneficiary of a Coverdell account's trust as an elementary or secondary school student at a public, private, or religious school. (*Code Sec. 530(b)(3)(A)(i))*

  (b) Expenses for room and board, uniforms, transportation, and supplementary items and services (including extended day programs) which are required or provided by a public, private, or religious school in connection with the enrollment or attendance of the designated beneficiary at the school. (*Code Sec. 530(b)(3)(A)(ii))*

  (c) Expenses for the purchase of any computer technology or equipment *(as defined in Code Sec. 170(e)(6)(F)(i)),* or for Internet access and related services if the technology, equipment, or services are to be used by the beneficiary and the beneficiary's family during any of the years that the beneficiary is in school. (*Code Sec. 530(b)(3)(iii))* But this will not include expenses for computer software designed for sports, games or hobbies, unless the software is educational in nature. (*Code Sec. 530(b)(3)(A))* Qualified higher education expenses also include amounts paid to buy tuition credits or certificates, or to make contributions to an account, under a qualified state tuition program for the beneficiary of the account (*Code Sec. 530(b)(2)(B)).*

- **Room and Board Expenses** - Room and board expenses qualify as higher education expenses only if the beneficiary is enrolled at an eligible educational institution for at least a half-time basis. For this purpose, room and board expenses generally are the school's posted room and board charge, or $2,500 per year for students living off-campus and not at home. *(Conf Rept No. 105-220 (PL 105-34) p. 363)*

COORDINATION WITH ED CREDITS & QUALIFIED STATE TUITION PROGRAMS

A taxpayer can claim an American Opportunity credit or a Lifetime Learning credit for a tax year and exclude from gross income amounts distributed (both the principal and the earnings portion) from a Coverdell account for the same student, as long as the distribution is not used for the same educational expenses for which a credit was claimed. *(Com Rept, see ¶ 5015)*

If for any individual - The aggregate distributions during the year from a Coverdell account and from a qualified state tuition program, exceed the total amount of qualified education expenses (after application of the rules coordinating distributions from Coverdell accounts with the American Opportunity and Lifetime Learning credits, discussed above), then the taxpayer will have to allocate those expenses among those distributions for purposes of determining the amount of the exclusion from income under the rules on distributions from Coverdell accounts and the rules on distributions from qualified state tuition programs*. (Code Sec. 530(d)(2)(C)(ii))*

DISTRIBUTIONS

Distributions are generally taxed under rules similar to those for annuities. Distributions will be considered made up of principal (under all circumstances excludable from gross income) and earnings (which may or may not be excludable from income).

Distributions used entirely to pay qualified expenses: The entire distribution is tax-exempt.

Distributions used partially (or not at all) to pay qualified expenses: When all or part of the distribution is used for other than qualified expenses, then all or a portion of the earnings are taxable as computed under the annuity rules.

Example: *The Coverdell account for Billy Smith contains $10,508 of which $7,000 was from contributions to the account and $3,508 is attributable to earnings. Billy withdraws $6,000 from the Coverdell account and uses $5,000 for qualified educational expenses and $1,000 for a down payment on a car. Under the annuity rules, 66.62% ($7,000/$10,508) of the distribution is treated as principal ($6,000 x .6662 = $3,997) and is excludable from taxation in all circumstances. The balance, $2,003, is allocated to earnings and is taxable unless used for qualified educational expenses. For Billy, 16.67% ($1,000/$6,000) of the distribution was used for other than qualified purposes. Therefore, 16.67% of the earnings, $334 ($2,003 x .1667), is subject to tax and a 10% penalty (see more on the penalty below).*

	Dollars	***Percent***
Coverdell Account Value..	*10,508*	*100.00*
Basis (Contributions)..	*< 7,000>*	*66.62*
Earnings (Taxable if not used for qual expenses)......	*3,508*	*33.38*
Withdrawal for Qualified Educational Expenses...	*5,000*	*83.33*
Withdrawal for Purchase of Car...........................	*1,000*	*16.67*
Total Withdrawal...	*6,000*	*100.00*
Portion of Distribution attributable to earnings..............	*6,000 x .3338 = $ 2,003*	
Taxable Portion (Not used for qualified expenses).........	*2,003 x .1667 = $ 334*	
Probable Tax and Penalty (12% +10%)..	*$73*	

Distributions due to the death of the beneficiary: At the death of the designated beneficiary, the account balance must be distributed within 30 days after the beneficiary's death to his/her estate.

Mandatory distributions prior to age 30: The funds must be withdrawn or rolled over to another qualified Coverdell account (see rollovers) prior to the beneficiary attaining the age of 30. Distributions that are not rolled over are taxable and subject to penalties under the same annuity rules that apply for distributions used partially to pay qualified expenses. We assume that if the funds are not distributed, they will be subject to an annual 6% (excise tax) excess contributions penalty.

Special needs students**:** Age limitations don't apply to "special needs beneficiaries." The definition of a "special needs student" will be determined under regulations issued by the IRS. Congress wants IRS regulations to define a "special needs beneficiary" as including an individual who because of a physical, mental, or emotional condition (including learning disability) requires additional time to complete his or her education. *(Com Rept)*

Thus, contributions may continue to be made to a Coverdell account for a special needs beneficiary after the beneficiary reaches age 18. In addition, in the case of a special needs beneficiary, a deemed distribution of any balance in a Coverdell account will not occur when the beneficiary reaches age 30. *(Com Rept)*

Beneficiaries Attending Military Academies**:** Coverdell education savings accounts and qualified tuition programs are allowed, without an additional penalty on the earnings portion of the withdrawals, for beneficiaries attending specified military academies.

Paid to another Coverdell account: Distributions aren't taxable to the extent the amount is paid to another Coverdell account for the beneficiary, or member of the beneficiary's family *(defined in §2032A(e)(2))* within 60 days of the distribution. In addition, just one distribution from a Coverdell account can be rolled over to another Coverdell account in a 12-month period.

ROLLOVERS

Like IRA accounts, the Coverdell account funds can only be rolled over once a year. They can be transferred at will for the benefit of the same beneficiary. However, unlike IRAs, a Coverdell account can also be rolled or transferred to another qualified member of the taxpayer's family (as defined in *§ 152(a), same as relationship test for dependents*) who is between the ages 0 and 29.

Military Death Gratuity May be Rolled to Coverdell Accounts - Military death gratuity and amount received under the Service members' Group Life Insurance (SGLI) program may be rolled over to a Roth IRA or Coverdell education savings account without regard to the Roth or Coverdell contribution limits that otherwise apply. (Code Sec. 408A(e) and Code Sec. 530(d)(9)).

The rollover must be made no later than one year after the date on which the military death gratuity or SGLI payment is received. The maximum amount that can be contributed to a Roth IRA or Coverdell Savings Account is limited to the sum of the military death gratuity and SGLI payments that the individual receives.

CHANGE OF BENEFICIARY (OWNERSHIP)

The beneficiary (owner) can be changed on the Coverdell account as long as the new beneficiary is a qualified member of the taxpayer's family (as defined in *§152(a))* who is between the ages 0 and 29.

OTHER REQUIREMENTS

- The account can't be invested in life insurance contracts,
- The account's assets can't be commingled except in common trust or investment funds, and
- The trustee must be a bank or other person who will administer the trust as required (to the IRS' satisfaction).

WITHDRAWAL PENALTY

A 10% withdrawal penalty, computed on Form 5329, applies to the TAXABLE PORTION of all distributions, unless the distribution is:

- Made after the death of the designated beneficiary,
- Attributable to the beneficiary's disability, or
- Made on account of a scholarship or other payment described in *§25A(g)(2)* [education credits] to the extent the amount of the distribution isn't more than the amount of *§25A(g)(2)* payment.
- Excess contributions (over the dollar limit for the year) and the excess is returned, along with income attributable to it on or before June 1 of the tax year following the calendar tax year in which the contribution was made and the net income is included in the account beneficiary's income in the year of the contribution.

Example - Excess Contributions to Coverdell Accounts and Corrections - *Bill and Jana, a married couple with a modified AGI of $225,000, contributed $2,000 to their 16-year-old daughter's Coverdell account in 2019. In 2020 (before the 2019 return due date), the couple realized that their modified AGI was too high for them to qualify for a 2019 contribution. As a result, the $2,050 in the Coverdell account ($2,000 contribution plus $50 of earnings) was distributed to their daughter. The daughter's 2019 gross income will include the $50 of earnings on the account. The daughter will also be subject to the 10% distribution penalty on the $50 of earnings.*

Daughter's Distribution......	*$ 2,050*	*Tax (Presumed to be 10%).......*	*$ 5*
Basis.............................	*<2,000>*	*10% Penalty...........................*	*$ 5*
Taxable Portion................	*$ 50*		

TRANSFERS BETWEEN SPOUSES

Transfer of a Coverdell account to a spouse or former spouse under a divorce decree isn't a taxable transfer. The transfer of a Coverdell account to a surviving spouse at the death of the beneficiary isn't a taxable transfer either. However, if the Coverdell account is transferred at the beneficiary's death to anyone other than the surviving spouse, the account stops being a Coverdell account as of the death of the Coverdell account beneficiary. In that case, the value of the account is taxable to the recipient.

LOSS OF COVERDELL ACCOUNT STATUS

A Coverdell account loses its status as a Coverdell account if the accountholder or his beneficiary engages in a prohibited transaction with the account. And an individual's use of a Coverdell account as security for a loan is treated as distribution of the amount used as security.

REPORTING REQUIREMENTS

A trustee of a Coverdell account must report to the IRS and the beneficiary on contributions, distributions, etc. Contributions and rollovers are included on Form 5498-ESA, Coverdell ESA Contribution Information. The trustee reports distributions and the amounts that represent earnings and basis on Form 1099-Q, Payments from Qualified Education Programs. A $50, $100 or $270 penalty, depending on when the delinquent form is filed, applies for each failure to report without reasonable cause. The $270 amount applies for 1099s required to be filed in 2019 (i.e., for 2018 forms) or 2020 (most likely 2019 forms).

DELAYED DISTRIBUTIONS

Even though contributions to the Coverdell account are not permitted past the age of 18, the funds can remain in the Coverdell account and continue to accrue investment earnings up to the mandatory distribution age (prior to age 30). The longer the income accrues tax-free in the account the greater the benefit derived by the recipient. To maximize the tax-free income, one would want to delay the distribution as long as possible and still be able to utilize all of the funds for qualified purposes. Interplay with the American Opportunity credit must also be considered because this credit applies only to the first four years of post-secondary education and since the same expenses cannot be utilized for both.

GROWTH FACTOR - ACCUMULATION PAST AGE 18

(ANNUALLY)		INVESTMENT RATE OF RETURN					
YRS	AGE	2%	4%	6%	8%	10%	12%
1	19	1.020	1.040	1.060	1.080	1.100	1.120
2	20	1.040	1.082	1.124	1.166	1.210	1.254
3	21	1.061	1.125	1.191	1.260	1.331	1.405
4	22	1.082	1.170	1.262	1.360	1.464	1.574
5	23	1.104	1.217	1.338	1.469	1.611	1.762
6	24	1.126	1.265	1.419	1.587	1.772	1.974
7	25	1.149	1.316	1.504	1.714	1.949	2.211
8	26	1.172	1.369	1.594	1.851	2.144	2.476
9	27	1.195	1.423	1.689	1.999	2.358	2.773
10	28	1.219	1.480	1.791	2.159	2.594	3.106
11	29	1.243	1.539	1.898	2.332	2.853	3.479

The table above assumes the Coverdell account is not immediately utilized and allowed to continue to accumulate during the period in which no contributions are allowed and up to the age at which mandatory distribution or qualified rollover is required.

UNRELATED BUSINESS INCOME: See chapter 4.05

CALIFORNIA DIFFERENCES

California conforms to Federal with respect to the Coverdell accounts, but California has no state education credits. Taxable distributions are subject to a 2-1/2% penalty, computed on FTB Form 3805-P.

EMPLOYER-PROVIDED EDUCATIONAL ASSISTANCE

Overview

- **Type of plans**:
  - Non-accountable – included in W-2 as income
  - Accountable - excluded
- **Maximum excluded amount per year**: $5,250
- **No double benefit**
- **Education**:
  - Need not be job-related
  - Games, hobbies, sports generally not allowed
- **Expenses**: Do not include meals, lodging or transportation

EXCLUDABLE EMPLOYER BENEFIT

The Details

An employee includes the value of educational benefits provided by an employer in income unless the benefit qualifies as an excludable employer benefit. To qualify as an excludable employer benefit, the benefit must be:
- A working condition fringe,
- Paid for by the employer under an accountable plan, or
- Provided under an educational assistance program of the employer.

***Working condition fringe benefits*:** Any employer-provided expense that an employer pays for an employee is excludable from the employee's income as a working condition fringe benefit if, had the employee paid for the benefit, the amount paid could have qualified as a deductible employee business expense (even if no deduction could be claimed because of the TCJA suspension of Tier 2 miscellaneous itemized deductions).

***Reimbursed education expenses*:** If an employer pays for an employee's education expenses, the payment is considered a payment under a reimbursement arrangement.

- If the payment is made under a "nonaccountable plan," the reimbursed amount is included in the employee's income.
- However, a payment under an employer's accountable plan is excludable from the employee's income. An accountable plan is one where the employee documents the expense to the employer. In addition, the expense reimbursed must be deductible by the employee if he/she had paid for it were it not for the TCJA suspension of Tier 2 deductions. Any excess reimbursement over the expense amount must be returned to the employer.

***Employer-provided educational assistance programs*:** An employee doesn't have to include in income amounts paid by the employer for educational assistance under a qualified educational assistance program. The maximum amount of educational assistance that can be excluded is $5,250 for any calendar year.

NOTE: Even if an educational benefit is not excludable under an assistance program, it may be excludable as a working condition fringe benefit. No American Opportunity or Lifetime Learning credit, or any other education-related tax benefits, may be claimed for amounts excludable under an educational assistance program.

***What expenses qualify for the educational assistance exclusion*?** Excludable assistance under a qualified plan includes: (1) The employer's payment of education expenses of an employee, including, among others, tuition, fees, books, supplies, and equipment; and (2) Employer-provided courses for the employee, including books, supplies, and equipment.

Educational assistance doesn't include tools or supplies (other than textbooks) that the employee may keep after the course of instruction ends. Nor does it include meals, lodging or transportation.

***Meaning of education*:** For the purpose of educational assistance, education is any training that improves an individual's capabilities, whether or not job-related or part of a degree program. Education may be furnished directly by the employer or through a third party (e.g., an educational institution). Education involving sports, games, or hobbies doesn't qualify for the exclusion, unless it is related to the business of the employer or is required for a degree program.

***Other Requirements*:**

Be sure to remember the following points:

(1) Retirees or laid-off employees are eligible for the exclusion,

(2) Self-employed individuals and partners who have qualified plans in place also qualify, and

(3) Educational assistance plans may not discriminate in favor of highly-compensated workers.

CALIFORNIA DIFFERENCES

California conforms to Federal law.

NOTES

EDUCATION CREDITS

Overview

American Opportunity Tax Credit (AOTC)

- Maximum annual credit per eligible student: **$2,500**
- Credit Based on: **100% of the 1st $2,000 & 25% of the next $2,000** of qualifying expenses.
- **40% refundable**
- **Phase-out Range** (no annual inflation adjustment)**:**

  Unmarried Filing Status: $ 80,000 – $ 90,000
  Joint Filing Status: $160,000 - $180,000
  Married Separate: No Credit Allowed

Lifetime Learning Credit

- Maximum annual credit per family: **$2,000**
- Credit based on: **20% of the first $10,000 of Qualified Expenses**
- **Phase-out Range (2019)** (inflation adjusted)**:**

  Unmarried Filing Status: $58,000 – $68,000
  Joint Filing Status: $116,000 – $136,000
  Married Separate: No Credit Allowed

Credit	AOTC	Lifetime
Number of post-secondary education years applicable	First 4	Any
Limited to students enrolled on at least a ***half-time basis***	Yes	No
Is allowed for a student ***taking only one course***	No	Yes
Is allowed for ***graduate level & professional degree courses***	No*	Yes
Is allowed for a course of instruction at an eligible educational institution to ***acquire or improve job skills***	No	Yes
Available to a student that has been convicted of a Federal or state ***felony drug offense***	No	Yes
Modified AGI Phase out	Yes	Yes
Refundable	Partially	No
AMT Deductible	Yes	Yes

*A student who was an undergraduate during the first part of the taxable year and (1) became a graduate student that same year, (2) has not completed the first 4 years of post-secondary education as of the beginning of the tax year, and (3) has not claimed the AOTC for more than 4 years, will qualify to claim the AOTC for qualified expenses during the entire tax year. (IRS AOTC FAQs #13)

AMERICAN OPPORTUNITY TAX CREDIT (AOTC)

The Details

Eligible Student - Generally, an eligible student for the AOTC can be the taxpayer and spouse and their dependents that are enrolled at an eligible educational institution for at least one academic period (semester, trimester, quarter) during the year.

The dependent is any person for whom the taxpayer claims a dependency exemption. It generally includes the taxpayer's qualified child who is under age 19 or who is a full-time student under age 24. The student must also meet ***all*** of the following requirements.

1) Had ***not completed the first 4 years*** of postsecondary education before the tax year of the credit.

2) For at least ***one academic period*** beginning in the tax year of the credit, was ***enrolled at least half-time*** in a program leading to a degree, certificate, or other recognized educational credential.
3) An eligible student is one that has no felony drug conviction. Having no felony drug conviction means the student has not been convicted of a Federal or state felony offense for possession or distribution of a controlled substance as of the end of the taxable year for which the credit is claimed.

Allowance Period - The AOTC is allowed with respect to qualified tuition and related (QT&R) expenses paid for **the first four years of the student's post-secondary education** in a degree or certificate program, if the student has not completed the first four years of post-secondary education before the beginning of the fourth tax year. And, for each eligible student, the AOTC may be claimed for four tax years (Code Sec 25A(i)(2)). **Note:** There is nothing in the law that limits the credit to just expenses incurred to obtain a bachelor's degree.

Credit Amount – Allowed on a per-eligible-student basis, the AOTC equals the sum of:
(a) 100% of the first $2,000 of each eligible student's QT&R expenses **plus**
(b) 25% of the next $2,000, of that student's QT&R expenses.

Proposed Regulations (effective for 2016)
Course materials for the AOTC include books, supplies and equipment required for enrollment or meaningful attendance in a course of study, whether or not the course materials are purchased from the institution.

Filing Status	Phase-Out Range
Unmarried Filing Status	$ 80,000 – $ 90,000
Joint Filing Status	$160,000 - $180,000
Married Separate	No Credit Allowed

Credit Phase-Out Provisions - For higher-income taxpayers, this credit begins to phase out for modified AGI (MAGI) in excess of $80,000 ($160,000 for married couples filing jointly). The phaseout amounts are not inflation indexed. MAGI is the taxpayer's regular AGI increased by: Foreign earned income and housing exclusion and housing deduction (§911), amounts excluded by taxpayer from sources in American Samoa (§931), and amounts excluded by taxpayer from sources in Puerto Rico (§933).

Portion of the Credit is Refundable - 40% of the AOTC (after application of the phase-out limitation) is refundable (Code Sec 25A(i)(5)). The <u>refundable provision</u> does not apply to:

- A taxpayer who is a child subject to the kiddie tax rules. (Generally any child under age 18 or any child under age 24 who is a student whose earned income is less than one-half of the child's support, who has at least one living parent, and does not file a joint return may be subject to the "kiddie tax," depending on the amount of the child's investment income). (Com Report; Chief Counsel Advice 201509030)
- Residents of a U.S. possession. However, the refundable portion may be claimed as credit in the possession in which they reside.

Any portion of the credit that isn't used to offset the taxpayer's regular tax or that isn't refundable is lost – it cannot be carried over or carried back to another year.

Example – Refundable Portion of AOTC*: Albert, who is not subject to the kiddie tax rules, is eligible for a $2,500 AOTC and his MAGI is below the phaseout threshold. The maximum refundable portion of Albert's AOTC is $1,000 ($2,500 x .4). His tax liability is $1,900. After first using the credit to offset his tax liability, he has $600 of credit remaining ($2,500 – 1,900). He is entitled to a refundable credit of $600, the lesser of the maximum portion of the credit that could be refunded ($1,000) or the balance of the credit left after reducing his regular tax to zero.*

If Albert's tax had been $1,300, he would have $1,200 of credit left after offsetting his tax ($2,500 – 1,300). But he could only claim a refund of $1,000 of the remaining credit.

Example – Refundable Portion of AOTC*: Bob and Carlene are married and file a joint return. They are eligible for a $2,500 AOTC, and their modified AGI is $170,000, which exceeds the phaseout threshold, so they must reduce their AOTC by 50% ((170,000 - $160,000)/$20,000) to $1,250. Therefore, the maximum refundable portion of their AOTC would be $500 ($1,250 x .4).*

AMT – The AOTC is allowed against the AMT (IRC Sec 25A(i)(5)).

Integrity Provisions - The PATH Act of 2015 added integrity provisions with regards to claiming the credit. These provisions prohibit:

- An individual from retroactively claiming the AOTC by amending a return for any prior year in which the individual, or a student for whom the credit is claimed, did not have a taxpayer identification number (Act Sec 206).
- The credit from being claimed for any year beginning after 2015 unless the taxpayer includes the employer identification number of any institution to which qualified tuition and related expenses were paid with respect to the individual (student) (Act Sec 211).

Preparer Due Diligence - The PATH Act of 2015 added preparer due diligence requirements similar to those imposed for the EITC. It includes a $530 (2019) ($520 (2018); $510 (2016 and 2017)), indexed for inflation, preparer penalty for not meeting the due diligence requirements. These requirements are effective for 2016 returns filed in 2017 (Act Sec 207). Starting with tax year 2016, Form 8867, Paid Preparer's Due Diligence Checklist, covers the due diligence requirements for the AOTC, EITC and child tax credits, with Head of Household filing status due diligence requirements added beginning for tax year 2018. The completed Form 8867 or successor form must be included with any return on which any of these tax benefits is claimed. The data entered on the Form 8867 must be based on information provided by the taxpayer or otherwise reasonably obtained by the preparer. The preparer must retain for the period described in the Form 8867 instructions copies of any documents provided by the taxpayer and on which the preparer relied in completing Form 8867 and, for the AOTC, the worksheet from Form 8863 instructions (or a comparable worksheet).

Taxpayer Disallowance Periods - The PATH Act of 2015 added disallowance periods for taxpayers who improperly claim the credit. Beginning for 2016 returns, where a taxpayer improperly claims the credit, a disallowance period applies where no credit is allowed. Where the improper claim is due to (Act Sec 208):

- Fraud - the disallowance period is 10 years.
- Reckless or intentional disregard of rules and regulations (not fraud) - the disallowance period is 2 years.

LIFETIME LEARNING CREDIT (LLC)

Eligible student - An eligible student can be the taxpayer and spouse and their dependents that are enrolled at an eligible educational institution for at least one academic period (semester, trimester, quarter) during the year. However, unlike the AOTC there is no "half-time student" requirement and single courses can qualify. The dependent is any person for whom the taxpayer claims a dependency exemption. It generally includes the taxpayer's qualified child who is under age 19 or who is a full-time student under age 24.

Credit Amount – The Lifetime Learning Credit is equal to 20% of up to $10,000 of qualified tuition and related expenses paid during the tax year. The maximum credit is $2,000 and it is not refundable.

Family Credit limit – Unlike the AOTC, which is allowed per student, the LLC is calculated on a per-family (i.e., per taxpayer return) basis with a maximum annual credit of $2,000.

Allowance Period – The Lifetime Learning credit is not limited to expenses incurred in the first four years – as is the case for the AOTC– of post-secondary education and may be claimed for an unlimited number of tax years.

Qualified Education – Unlike the AOTC where only the first four years of post-secondary education qualifies, the LLC can be used for graduate-level and professional degree courses and is allowed for a course of instruction at an eligible educational institution to acquire or improve job skills.

Modified AGI Phase Out - For purpose of the LLC, modified AGI is the taxpayer's regular AGI increased by: Foreign earned income and housing exclusion and housing deduction (§911), amounts excluded by taxpayer from sources in American Samoa (§931), and amounts excluded by taxpayer from sources in Puerto Rico (§933). The phase out thresholds are indexed for inflation.

LIFETIME LEARNING CREDIT MAGI PHASEOUT RANGES

Filing Status	2015	2016	2017	2018	2019	2020
Unmarried Filing Status	55K-65K	55K-65K	56K-66K	57K-67K	58K-68K

Married Separate	No Credit	No Credit	No Credit	No Credit	No Credit	

OTHER ISSUES THAT APPLY TO BOTH CREDITS (unless otherwise noted)

Who Pays and Who Gets the Tuition Credit - The regulations provide that solely for education credit purposes, if a third party (someone other than the taxpayer or a claimed dependent) makes a payment directly to an eligible educational institution for a student's qualified tuition and related expenses, the student is treated as receiving the payment from the third party, and, in turn, paying the qualified tuition and related expenses. Furthermore, qualified tuition and related expenses paid by a student are treated as paid by the taxpayer if the student is a claimed dependent of the taxpayer. *(Reg §1.25A-5(a), Reg §1.25A-5(b))*

> ***Example:*** *If one divorced parent pays qualified tuition to a college for a child, but the other parent has custody of the child (and is eligible to claim the child as a dependent), the custodial parent is treated as having paid the tuition directly to the college. (Reg § 1.25A-5(b)(Ex.3))*

> ***Example:*** *If a grandparent pays the qualified tuition directly to the institution, the parents, assuming they claim the student as a dependent, would be the ones qualified to claim the education credit.*

The regulations also provide that if a taxpayer is eligible to but does not claim a student as a dependent, only the student can claim the education credit for the student's qualified tuition and related expenses. *(Reg § 1.25A-1(f))*

***Example:** Connie has one dependent, her son Frank. Frank pays qualified tuition and related expenses to attend State University during the year. Although Connie is eligible to claim Frank as a dependent on her federal return, she does not do so. Frank is allowed to claim an education tax credit on his return, assuming he meets all other requirements for the credit. Connie cannot claim the credit for Frank's education expenses.*

The result is the same even if Connie had paid Frank's tuition and related expenses – if she doesn't claim Frank as a dependent, the credit can only be claimed by Frank.

Of course, the AGI phase-out is another factor that plays into education credit planning.

Eligible educational institution - Eligible institutions generally include any accredited public, nonprofit, or proprietary post-secondary institution eligible to participate in the student aid programs administered by the Department of Education.

Eligible Expenses – The following are defined as eligible expenses (Reg. § 1.25A- 2(d)):

- Tuition
- Fees required for the enrollment or attendance
- Student activity fees paid to the educational institution
- Course materials *(Reg. § 1.25A- 2(d))*
- Comprehensive university fees and bundled fees (required general fees) - ***must be allocated between qualified expenses and personal expenses.***

Proposed Regulations *(effective for 2016)*

The proposed rules clarify that for the **AOTC** the definition of qualified tuition and related expenses includes books, supplies and equipment required for enrollment or attendance at an eligible institution. For this purpose "required for enrollment or attendance" means that the course materials are needed for "meaningful attendance or enrollment" in a course of study, *whether or not the materials are purchased from the institution or an outside vendor*.

For the **Lifetime Learning Credit**, the amount paid for books, supplies and equipment is an eligible expense only if these items cannot be purchased from a vendor. That is, they will qualify if they must be *purchased from the educational institution as a condition of attendance*.

Do computers qualify? Computers are not specifically spelled out in the regulations as they are for Sec 529 expenses. According to the AOTC FAQs on the IRS web site (as of 2/8/19), and in answer to the question "Does a computer qualify for the AOTC?" the IRS says "It depends. The amount paid for the computer can qualify for the credit if you need the computer for attendance at the educational institution."

Expenses that DO NOT qualify - *WHETHER OR NOT paid directly to the educational institution:*

- Room(1)
- Board(1)
- Insurance
- Other similar Personal, Living, or Family Expenses
- Medical Expenses
- Transportation

(1) Even though these expenses do not qualify as expenses for the educational credits, these expenses could be qualified expenses paid from Coverdell accounts or Sec 529 plans.

***Example – Fees Paid Directly to Educational Institution** - University V offers a degree program in Dentistry. In addition to tuition, all students enrolled in the program are required to pay a fee to University V for the rental of dental equipment. Because the equipment rental fee must be paid to University V for enrollment and attendance, the tuition and the equipment rental fee are qualified tuition and related expenses (applies for both the AOTC and LLC).*

***Example – University Required Expenses** - First-year students at College W are required to obtain books and other reading materials used in its mandatory first-year curriculum. The books and other reading materials are not required to be purchased from College W and may be borrowed from other students or purchased from off-campus bookstores, as well as from College W's bookstore. College W bills students for any books and materials purchased from College W's bookstore. Under the proposed regulations:*

- ✓ *If the taxpayer claims the LLC - the expenses paid to College W for the first-year books and materials purchased at its bookstore are not qualified tuition and related expenses, because the books and materials are not required to be purchased from College W for enrollment or attendance at the institution.*
- ✓ *If the taxpayer claims the AOTC – the expenses paid to College W for the books and materials are qualified tuition and related expenses, provided they are needed for meaningful attendance in the student's course of study. (Prop Reg 1.25A-2(d)(7), Ex. 3)*

Treatment of a Comprehensive or Bundled Fee - If a student is required to pay a fee (such as a comprehensive or a bundled fee) to an eligible educational institution that combines charges for qualified tuition and related expenses with charges for personal expenses, the portion of the fee that is allocable to personal expenses is not included in qualified tuition and related expenses. The determination of what portion of the fee relates to qualified tuition and related expenses and what portion relates to personal expenses must be made by the institution using a reasonable method of allocation. *(Reg. § 1.25A-2(d)(4))*

> ***Example – Bundled Fees*** *- College Y requires all students to live on campus. It charges a single comprehensive fee to cover tuition, required fees, and room and board. Based on College Y's reasonable allocation, sixty percent of the comprehensive fee is allocable to tuition and other required fees not allocable to personal expenses, and the remaining forty percent of the comprehensive fee is allocable to charges for room and board and other personal expenses. Therefore, only sixty percent of College Y's comprehensive fee is a qualified tuition and related expense.*

Prepayment Rule - If qualified tuition and related **expenses** are paid by the taxpayer during one tax year for an **academic period** that begins during the **first three months** after that tax year, that **academic** period is treated as beginning during the tax year in which the payment is made. In other words, if qualified tuition and related **expenses** are paid during one tax year for an **academic period** that begins during the first three months of the taxpayer's next tax year (i.e., in January, February, or March of the next tax year for calendar year taxpayers), an education credit is allowed with respect to the qualified tuition and related expenses only in the tax year in which the expenses are paid. (Reg § 1.25A-5(e)(2)(i); Terrell, TC Memo. 2016-85, Dec. 60,599(M))

CAUTION: The opposite is not true. Tuition payments made in one year for the next year cannot be credited to the next year because of the cash basis taxpayer rules (McCarville, TC Summary Opinion 2016-14). This is a mistake your clients can easily make.

> ***Example – Prepayment Rule*** *– Alan, who is a calendar year taxpayer and not a dependent of another taxpayer, enrolls full-time at College Z, with the Spring 2018 his first semester of attendance. He continues at College Z through the Spring 2019 semester. The following recaps his tuition payments during that period:*

Amount Billed	*Date Bill Rec'd*	*Applies to Semester*	*Amount Paid*	*Date Paid*
$5,000	*Dec 2017*	*Spring 2018*	*$1,000*	*12/15/17*
			$4,000	*2/15/18*
$7,000	*Aug 2018*	*Fall 2018*	*$7,000*	*9/1/18*
$7,000	*Dec 2018*	*Spring 2019*	*$1,000*	*12/15/18*
			$6,000	*2/15/19*

> *He may claim an education tax credit on his 2017 return with respect to the $1,000 he paid to College Z on Dec. 15, 2017 for the 2018 spring semester. Alan may claim an education credit on his 2018 return with respect to the $12,000 he paid to College Z during 2018 ($4,000 + $7,000 + $1,000). On his 2019 return, he may claim an education credit with respect to the $6,000 he paid to College Z on Feb. 15, 2019. (Prop Reg 1.25A-5(e)(2)(ii))*

Hobby Courses - Qualified tuition and related expenses do not include expenses that relate to any course of instruction or other education that involves sports, games, hobbies, or any noncredit course, unless the course or other education is part of the student's degree program, or in the case of the Lifetime Learning Credit, the student takes the course to acquire or improve job skills. (Reg. § 1.25A- 2(d)(5))

> ***Example – Hobby Courses*** *- As a degree student at College Z, Student A is required to take a certain number of courses outside of her chosen major in Economics. To fulfill this requirement, Student A enrolls in a square dancing class offered by the Physical Education Department. Because Student A receives credit toward her degree program for the square dancing class, the tuition for the square dancing class is included in qualified tuition and related expenses.*

Half-Time Student Requirement - For purposes of the AOTC for at least ***one academic period during the year****,* the student must be enrolled for at least half of the normal full-time workload for his course of study. (Code Sec. 25A(b)(3)(B)) Form 1098-T has a check box for the institution to indicate if the student was a half-time student.

> ***Example – Less than Half-time Student for Part of a Year*** *- Emily graduates from high school in June 2018 and is enrolled in an undergraduate degree program at College for the 2018 fall semester on a full-time basis. For the 2019 spring semester, Emily again is enrolled at College on a full-time basis. For the 2019 fall semester, Emily is enrolled in less than half the normal full-time course work for her degree program.*

2018		***2019***	
Spring	*Fall*	*Spring*	*Fall*
Not Enrolled	***Full Time***	***Full Time***	*Less Than ½ Time*

Because Emily is enrolled in an undergraduate degree program on at least a half-time basis for at least one academic period that begins during 2018 and at least one academic period that begins during 2019, Emily is an eligible student for taxable years 2018 and 2019 (including the 2019 Fall semester when Emily enrolls at College on less than a half-time basis).

Proposed Regulations (effective for 2016)

Language is added to Reg 1.6050S-1(b)(2) to require the educational institution to include on Form 1098-T the number of months during the calendar that the student was enrolled for the normal full-time workload for the student's course of study at the institution. For this purpose, one day in a month is treated as an entire month. However, neither the 2018 nor 2019 Form 1098-T includes a box where this information would be reported – just the check-off box to indicate whether the student was at least a half-time student.

Credit Reduction for Scholarships - For education credit purposes, qualified tuition must be reduced by tax-free scholarship amounts (including fellowships) excluded from income under Code Sec. 117 except to the extent, by the terms of the scholarship, it may (or must) be applied to room and board AND THAT PORTION IS REPORTED AS TAXABLE INCOME if a tax return is required to be filed. (Reg. § 1.25A-5(c)(3))

***Example – Tax-free Scholarship** – Marty is a junior at College. His tuition for the year was $9,500 and his room and board expenses were $7,500. Marty received a tax-free scholarship payment during the year of $8,000. Marty's mother and father are separated and Marty is claimed by his mother as her dependent. Marty's father paid the $9,500 tuition. Since the scholarship was tax-free, the scholarship income must first offset Marty's tuition expense ($9,500 - $8,000), leaving $1,500 of the tuition payment that can be used towards the tuition credit. Therefore, if Marty's mother otherwise qualified, she would be entitled to an* AOTC *of $1,500 (100% of up to the first $2,000 of expenses) if he is enrolled on at least a half-time basis or a Lifetime Learning credit of $300 ($1,500 x 20%) if he is enrolled less than half time.*

Scholarships can be either tax-free or taxable. Often the question arises what happens if the scholarship amount in Box 5 (Scholarships or Grants) of the 1098-T is larger than the expenses in Box 1 (Payments *Received* for Qualified Tuition and Related Expenses)? Is the difference a taxable scholarship? It depends. The 1098-T instructions tell the form's preparer (the educational institution) to enter in Box 1 "the total amount of payments received for qualified tuition and related expenses from all sources during the calendar year" related to the student and that "the amount reported [in Box 1] is not reduced by scholarships and grants reported in box 5." The Form 8863 (Education Credits) instructions caution that the amount in Box 1 of the 1098-T may be different from the amount of education expenses that was paid (or treated as having been paid), and that when completing Form 8863, to use only the amounts actually paid (plus any amounts treated as having been paid), reduced as necessary by tax-free assistance including tax-free scholarships or fellowship grants.

A scholarship is tax free only if the student is a candidate for a degree at an eligible educational institution, and only to the extent it is used to pay for (a) tuition and fees required to enroll at or attend the institution and (b) course-related expenses such as books, supplies, fees and equipment required for the courses by the school for all students in the particular course of instruction. Expenses paid from a scholarship for room and board, travel, research, insurance and equipment or other expenses not required by the institution to enroll or attend don't qualify. So to the extent the scholarship is used for non-eligible expenses, it is taxable. Worksheet 1-1 in IRS Pub 970 can be used to determine how much of a scholarship is taxable.

Payments for Services - Scholarship or fellowship grants are taxable to the recipient if they are paid for teaching, research, or other services as a condition for receiving the grant, unless the payments are received under:

- The National Health Service Corps Scholarship Program,
- The Armed Forces Health Professions Scholarship and Financial Assistance Program, or
- A comprehensive student work-learning-service program (as defined in section 448(e) of the Higher Education Act of 1965) operated by a work college (as defined in that section).

When part of the scholarship is taxable because it was payment for services, i.e., wages, the scholarship provider should issue a Form W-2 for the taxable amount. It is possible that this amount may also be included in the Box 5 amount on Form 1098-T. Therefore, an analysis of the make-up of the Box 5 amount must be performed to ensure that there isn't duplicate reporting of income.

Third-Party Installment Plan **-** Where an outside company agrees to collect tuition payments over a period of time (usually 10 months) and remits the payments to the educational institution on a predetermined schedule, the date of the payment for purposes of computing the education credit is determined as follows:

- **Where the outside agent is an agent of the taxpayer**, the taxpayer is treated as having paid qualified expenses on the date the company pays the higher-education institution.
- **Where the outside company is an agent of the higher-education institution,** the taxpayer is treated as paying the qualified expenses on the date the taxpayer pays the outside company. (Reg. § 1.25A-5(e)(4))

Form 1098-T Mandatory - Beginning for the 2016 tax year, a taxpayer will not be allowed to claim the AOTC, the Lifetime Learning credit or, for years before 2018 or later years if extended by Congress, the higher education tuition deduction, unless the taxpayer has received a Form 1098-T from the educational institution (Trade Act Sec 804(a)(1)). Thus, taxpayers won't be able to file their returns on which they claim education tax benefits until they have received the Form 1098-T.

1098-T Received by a Dependent – 1098-Ts received by a dependent of the taxpayer are treated as received by the taxpayer (Trade Act Sec 804(a)(2)).

Proposed Regulations (effective for 2016)

An exception to the above requirement applies if the taxpayer (or taxpayer's dependent) has not received a Form 1098-T by the later of January 31 of the year following the year to which the education credit relates or the date the income tax return is filed. This exception applies only if the taxpayer (or taxpayer's dependent) (1) has requested the educational institution to provide a 1098-T after January 31 but before the return is filed, and (2) has cooperated fully with the educational institution's efforts to obtain the information necessary to furnish the statement. A further exception to the 1098-T requirement is that the educational institution is not required to provide a 1098-T for students who: took only non-credit courses; are nonresident aliens, unless the form is requested by a student; or had their qualified tuition and related expenses entirely waived or paid entirely with scholarships. The exception also applies for students for whom the school does not maintain a separate financial account and whose qualified tuition and related expenses are covered by a formal billing arrangement between an institution and the student's employer or a governmental entity, such as the Department of Veterans Affairs or the Department of Defense.

Until the proposed regs are finalized, if the institution is exempt from providing a 1098-T under current regulations, a taxpayer who doesn't receive a 1098-T may claim an education credit if the taxpayer is otherwise qualified, can demonstrate that the taxpayer (or taxpayer's dependent) was enrolled at an eligible educational institution, and can substantiate the payment of qualified tuition and related expenses.

CAUTION

Practitioners should avoid claiming the education credits or the higher education tuition deduction for clients that have not received a corresponding 1098-T.

An eligible educational institution will send the student a Form 1098-T, Tuition Statement, generally by January 31 of the year following the year of attendance. Starting with the 1098-Ts for 2018, institutions must report payments received in Box 1 and no longer have the option of reporting only amounts billed (Box 2), as was the case in prior years. However, either of these amounts may differ from what was actually paid, so the 1098-T amount cannot be relied on without further inquiry of the taxpayer to determine the amounts actually paid. The 1098-T also provides other information, such as adjustments made for prior years, the amount of scholarships or grants, reimbursements, or refunds, and whether the student was enrolled at least half-time or was a graduate student.

Expenses Not Included On The 1098-T - A taxpayer that substantiates payment of qualified tuition and **related expenses** that are not reported on Form 1098–T, ''Tuition Statement'', may include those expenses in computing the amount of the education tax credit allowable for the taxable year. (Prop Reg 125A-1(f))

Coordination with Coverdell ESAs & Qualified Tuition Programs - A taxpayer can claim an AOTC or LLC for a tax year and exclude from gross income amounts distributed (both the principal and the earnings portion) from a Coverdell Education Account for the same student, as long as the distribution is not used for the same educational expenses for which a credit was claimed.

Special Situations

- **Source of funds used to pay expenses:** The credits can be claimed for expenses paid with a student's earnings, loans, gifts, inheritances, and personal savings. However, if higher education expenses are paid with a tax-free scholarship, Pell grant, or employer-provided educational assistance, no credit is allowed for those amounts.
- **Credits not available for same student in one tax year:** For each eligible student, a taxpayer can elect for any tax year only one of the credits. For example, if the taxpayer elects to take the AOTC for a child, he/she can't, for that same child, also claim the LLC for that year.
- **AOTC vs. LLC:** A taxpayer can claim the AOTC for four years of a child's post-secondary education and claim the LLC for that same child in other tax years.
- **Multiple students in family:** If a taxpayer pays qualified expenses for more than one eligible student in the same year, he/she can choose to take credits on a per-student, per-year basis. This means that, for example, the taxpayer can claim the AOTC for one child and the LLC for another child in the same tax year.
- **Recapture of credits:** If a taxpayer receives a refund in a later year of an amount used to figure a higher education credit, the credit may have to be recaptured.
- **Nonresident alien taxpayers and dependents:** If a taxpayer or the taxpayer's spouse is a nonresident alien for any portion of the taxable year, no education tax credit is allowed unless the nonresident alien is treated as a resident alien by reason of an election under Section 6013(g) or (h). In addition, if a student is a nonresident alien, a taxpayer may not claim an education tax credit with respect to the qualified tuition and related expenses of the student unless the student is a claimed dependent (as defined in §1.25A-2(a)). A "claimed dependent" is a dependent the taxpayer can claim on their tax return. Among other requirements, a nonresident alien student must be a resident of a country contiguous to the United States in order to be treated as a dependent.

Strategies

Potential Gifting-Education Credit Strategy - Prior to the kiddie tax age being increased to include full time students through age 23, a commonly used tax strategy was to gift appreciated stock to a child and then have the child sell the stock at a lower tax rate and use the funds to pay for the child's education. Since there is no longer any tax benefit to gifting appreciated stock to a full time student under 24 to pay for education, what if the grandparents or other trusted relative or friend are in a lower tax bracket and....

The child's parents gift each grandparent or sets of grandparents enough appreciated stock that when sold would yield an after tax amount that the grandparent in turn uses to pay the child's tuition?

- Gifts used for education (only tuition) are not subject to gift tax so the grandparents would have no gift tax issues. **Caution** - grandparents (or whoever) would need to make tuition payments directly to the educational institution to avoid the gift tax issue if the amount gifted exceeds the annual gift exclusion.
- If the grandparents are retired their income might be such that they would be in the zero capital gains tax rate. **Caution** – Be careful that the additional income from including the gain upon sale of the stock doesn't cause the grandparents to have more taxable Social Security or have other detrimental effects on AGI-based limitations.
- Assuming the parents claim the child as a dependent, and their MAGI permits, they would be able to claim the education tax credit since the credit goes to the individual claiming the dependent even if they did not pay the tuition.

CAUTION - If the parents' MAGI causes the education credit to be phased out (or eliminated), it makes using this strategy less appealing – but if they would have sold the stock to pay for the education expenses anyway, transferring the gain to the grandparents would still be an appropriate strategy as it will reduce the parents' AGI for various phaseouts. It would help lower the parents' state tax, especially if the state doesn't have a capital gain tax rate but could increase the grandparents' state tax – so you'd need to run the actual numbers to see if there's an overall family savings.

CALIFORNIA DIFFERENCES

California has no equivalent credits.

NOTES

QUALIFIED TUITION PROGRAMS
Sec 529 Plans

RAPID FINDER

Qualified Tuition Plans (sometimes referred to as Section 529 Plans) are plans established to help families save and pay for education expenses in a tax-advantaged way and are available to everyone, regardless of income.

These plans, also known as qualified tuition programs (QTPs), allow taxpayers to gift large sums of money for a family member's elementary, high school and college education, while continuing to maintain control of the funds. The earnings from these accounts grow tax-deferred and are tax-free, if used to pay for qualified higher education expenses. Prior to 2018 only college education expenses were eligible expenses.

They can be used as an estate-planning tool as well, providing a means to transfer large amounts of money without gift tax. With all these tax benefits, 529 plans are an excellent vehicle for funding education.

TCJA Changes

- Kindergarten through Grade 12 Distributions – 5.05.04
- Recontribution of Refunded Tuition - 5.05.04
- Rollover to an ABLE Account - 5.05.05

Sec 529 Plan Distributions – Distributions from a qualified tuition program are excludable to the extent used to pay for qualified education expenses. A "qualified tuition program" includes prepaid educational service accounts (i.e., tuition credits or certifications) established and maintained by eligible educational institutions, rather than just state-sponsored QTPs.

- Distributions from a QTP are excludable from gross income to the extent used to pay for qualified education expenses. For years after 2017, distributions of up to $10,000 per year per plan beneficiary to pay for attendance at a public, private or religious elementary or secondary school are also excludable.
- "Qualified higher education expenses" include special needs services for special needs beneficiaries in connection with their enrollment at an eligible education institution.
- The room and board allowance included in qualified higher education expenses is limited to that for attendance under specified federal financial aid programs, or, for a student living in housing owned or operated by an eligible educational institution, the actual amount charged by the educational institution for room and board.
- A 10% penalty tax is imposed on the amount of a QTP distribution that is includible in income.
- Taxpayers are permitted to claim an American Opportunity or Lifetime Learning credit for college tuition and expenses and exclude amounts distributed from a QTP during the same tax year for the same student, but not with respect to the same expenses.
- Tax-free 60-day rollovers are permitted (not more than once in 12 months) from one QTP to another QTP with the same designated beneficiary.

- "Family member" for purposes of beneficiary changes and rollovers includes first cousins of the original beneficiary.
- A contribution to a qualified tuition account (or for a prepaid tuition contract) qualifies for annual gift tax exclusion ($15,000 for 2019) and, to the extent of the exclusions, is exempt from the generation-skipping transfer (GST) tax. A contributor may contribute in a single year up to 5 times the annual gift tax exclusion amount to a qualified tuition account and, for gift tax and GST tax purposes, treat the contribution as having been made ratably over the five-year period beginning with the calendar year in which the contribution is made. A distribution from a qualified tuition account or prepaid tuition contract generally is not subject to gift tax or GST tax. See also "Gift and Estate Tax Considerations" later in this chapter.
- QTP account balances or prepaid tuition benefits generally are excluded from the gross estate of any individual for estate tax purposes. Amounts distributed on account of the death of the designated beneficiary, however, are includible in his gross estate. If the contributor elected the special five-year allocation rule for the annual gift tax exclusion (described above), any amounts contributed that are allocable to the years within the five-year period remaining after the year of the contributor's death are includible in the contributor's gross estate.

TYPES OF PLANS

Section 529 Plans come in two types, allowing taxpayers to either save funds in a tax-free account to be used later for eligible education costs, or to prepay tuition for qualified universities.

College Savings Plans **–** Allow taxpayers to contribute after-tax dollars that are invested in some sort of savings vehicle – typically mutual funds. Many of these plans offer stock funds when a child is quite young, which will then be transferred to more conservative investments (like bond funds) as the child gets closer to college age. As with any investment, there are no guarantees of growth and the plans are subject to the normal investment risks, even though state governments sponsor them. A big plus for these plans is they are not geared towards in-state schools or a specific institution, but meant to be applied to whichever school a child chooses to attend.

Prepaid Tuition Plans - As the name implies, a Prepaid Tuition Plan allows parents to pay for college education at today's tuition rates. By locking in the tuition payments, worries about the increase of tuition costs in the future can be set aside. This gives the assurance that the child will have the money to attend college when that time comes. These plans sound very attractive; however, most of these plans guarantee that the taxpayer will be covered only if their child chooses to go to a public in-state college or university. Therefore, if the taxpayer's child decides to attend an out-of-state school, the taxpayer won't be fully covered, simply because these plans are not meant to fund the higher costs of private or out-of-state education. **However, prepaid tuition programs can be established and maintained by educational institutions, including private institutions.**

CONTROL

If the taxpayer makes sacrifices to save for a child's education, the taxpayer certainly wants to make sure those savings end up being used for education and not some other purpose. 529 Plans allow the taxpayer to keep control of the account. If the taxpayer saves money for college in a UGMA or UTMA (the name depends on the state in which the taxpayer lives and are essentially custodial accounts set up for minors), the account becomes the child's property once he or she reaches the age of majority — usually 18 or 21 — at which time the taxpayer loses control. So while the taxpayer's intent may have been to use the funds saved in the UGMA/UTMA for college expenses, the child may have other ideas how to spend the money. Unlike UGMA/UTMAs, Section 529 plans are not irrevocable gifts and the taxpayer retains control. Control stays in the hands of the adult responsible for the account. Generally, this is the same person who contributed the money, but it doesn't have to be the case. Someone else, for example, a grandparent, could make the donation but name the child's parent as the account owner. Money does not come out of the account without permission from the account owner. If the designated beneficiary of the plan decides not to go to school, then the account owner can simply change the beneficiary to someone else in the family.

Account Owner (AO) – The AO is the person who, under the terms of the QTP or any contract setting forth the terms under which contributions may be made to an account for the benefit of a designated beneficiary (DB), is entitled to select or change the DB of an account, to designate any person other than the DB to whom funds may be paid from the account, or to receive distributions from the account if no other person who is entitled to receive distributions is designated (Prop Reg § 1.529-1(c), under which taxpayers may rely).

TAX BENEFITS

There is no federal tax deduction for making contributions, but taxes on the earnings within a 529 Plan are tax-deferred while they are held in the account and are tax-free when withdrawn to pay for qualified education expenses. Distributions from plans of private institutions can qualify to be tax-free. This allows taxpayers to accumulate money for a child's education expenses at a much faster rate than if they had to pay tax on the investment gains and earnings.

To be tax-free when withdrawn, the funds must be used to pay for qualified schooling expenses such as tuition, room and board, books, supplies and equipment. However, room and board expenses do not qualify for elementary or secondary school students. The more time a taxpayer has until their child needs the money for education, the more significant this tax-free compounding becomes.

Information Reporting – If distribution has been taken from the plan, the plan administrator will issue a **Form 1099-Q**. The recipient's name and Social Security number on the 1099-Q will be the designated beneficiary's if the QTP distribution was made directly to the beneficiary or an educational institution. Otherwise, the account owner will be listed as the recipient. If the distribution exceeds the "adjusted qualified education expenses" – qualified education expenses reduced by any tax-free scholarships or fellowships, VA education assistance, Pell grants, and similar nontaxable payments – information on the 1099-Q will be used to determine what portion of the earnings may be taxable. If the distribution is totally nontaxable, no reporting of the distribution is required on the recipient's income tax return. Any taxable amount is included on the "other income" line of the recipient's Form 1040 (line 8 of 2019 draft Schedule 1).

Example: *Over several years Naomi's parents had contributed $18,000 to a qualified tuition plan they set up that is administered by their state government. During the tax year, Naomi enrolled in college and had $6,700 of qualified education expenses; some of the expenses were offset by a $3,100 tax-free scholarship. The balance was paid from a $3,700 withdrawal from the QTP, which had a balance of $27,000 when the distribution was made. Form 1099-Q issued to Naomi shows $1,200 of the distribution is earnings. Since the amount of the distribution exceeds the adjusted qualified education expenses Naomi had, part of the earnings included in the distribution is taxable.*

Total qualified education expenses	*6,700*
Less scholarship	*<3,100>*
Adjusted qualified education expenses.	*3,600*

1,200 x 3,600/3,700 = 1,168 (nontaxable part of earnings)
1,200 – 1,168 = 32 (taxable part of earnings)

HOW MUCH CAN BE CONTRIBUTED?

Unlike Coverdell Education Savings Accounts for which the annual contribution is limited to $2,000, Sec. 529 Plans allow taxpayers to put away larger amounts of money limited only by the contributor's gift tax concerns and the contribution limits of the intended state plan. There are no income or age limitations for the Sec. 529 Plans. The maximum amount that can be contributed per beneficiary is based on the projected cost of a college education and will vary between state plans. Some states base their maximum on an in-state four-year education, while others use the cost of the most expensive schools in the U.S., including graduate studies. Most have limits in excess of $200,000 with some topping $475,000. Generally, once an account reaches that level, additional contributions cannot be made, but that doesn't prevent the account from continuing to grow.

Contributions to a 529 education savings plan must, by Federal law, be made in cash and always consist of after-tax money. Most programs also have a minimum contribution that is within everyone's budget. Many have payroll or automatic withdrawal programs.

DISTRIBUTIONS

Distributions from a Sec 529 follow the Code Sec. 72 annuity rules meaning that distributions are treated as representing a pro-rata share of the principal (i.e., contributions) and accumulated earnings in the account. So, the part of the distribution representing the amount paid or contributed to the QTP doesn't have to be included in income, because that part is a return of the investment in the plan.

TCJA

Kindergarten through grade 12 - The limit for the post 2017 special allowance for kindergarten through grade 12 (high school) is $10,000 per beneficiary. See page 5.05.04 for more details

Computation of Earnings **-** Under prior law for purposes of applying section 72, all Sec 529 qualified tuition programs of which an individual was a designated beneficiary were treated as one program. The PATH Act eliminated the aggregation requirement for distributions after December 31, 2014.

Refunds & Recontribution of Funds - The PATH Act created a new Sec 529(c)(3)(D) to address situations in which Sec 529 qualified tuition program funds are distributed for a beneficiary's qualified higher education expenses, but some portion of those expenses subsequently are refunded to the beneficiary, for example, when the beneficiary drops a class mid-semester. Now the portion of a distribution refunded to a Sec 529 beneficiary is not subject to income tax to the extent that, within 60 days of the date of the refund, it is recontributed to a Sec 529 qualified tuition program of which the individual is a beneficiary.

DESIGNATED BENEFICIARY

A "designated beneficiary" in a qualified tuition program is:

1. The initially-named individual who receives benefits;
2. In the case of a change in beneficiaries within the same family, the new beneficiary, and
3. A scholarship recipient under a qualified state tuition program as part of a scholarship program operated by a state or local government or exempt organization. *(§501(c)(3))*

QUALIFIED EDUCATION EXPENSES

Qualified expenses under a Sec. 529 plan are the costs required for a beneficiary's enrollment at an eligible higher educational institution and include:

- *Higher Education Tuition*
- *Elementary and Secondary School Tuition Expenses* – TCJA adds withdrawals for elementary or secondary school tuition expenses but limits the annual withdrawal for each beneficiary to $10,000 (regardless of the number of 529 plans in the beneficiary's name)[1]. **Note: this special amount is for tuition only**. Elementary or secondary means kindergarten through grade 12 as determined under State law, consistent with the definition applicable for Coverdell education savings accounts. This special $10,000 amount applies for tuition paid to public, private or religious schools. [1] Per IRS Notice 2018-58.
- *Fees*,
- *Books,*
- *Supplies,*
- *Equipment*,
- *Computers* - Effective beginning in 2015, the PATH Act provides that Sec 529 qualified higher education expenses also include expenses for the purchase of computer or peripheral equipment (as defined in section 168(i)(2)(B)), computer software (as defined in section 197(e)(3)(B)), and Internet access and related services, if such equipment, software, or services are to be used primarily by the Sec 529 plan beneficiary during any of the years the beneficiary is enrolled at an eligible educational institution. Computer software designed for sports, games, or hobbies is qualified only when the software is predominantly educational in nature. (Amended Sec 529(e)(3)(A)(iii))
- *Reasonable room and board costs* by a student enrolled at least half-time (generally limited to the school's posted room and board charge, or $2,500* per year for a student living off-campus and not at home)**, and
- Expenses of a special needs beneficiary that is necessary in connection with his or her enrollment or attendance at the eligible educational institution.

**§472 of the Higher Education Act of 1965*

*** Code Sec 529(e)(3)(B) references Sec 25A(b)(3) in defining students whose room and board costs are eligible expenses, and Sec 25A(b)(3) says the student must meet certain requirements of the Higher Education Act of 1965; therefore, room and board expenses of elementary and secondary school students would not qualify.*

TIMING OF REIMBURSEMENTS

Apparently reimbursements can be made in a year other than the year of the expenses since the code and publications are all silent on the issue. However, the taxpayer had better have documentation to prove this is not a double benefit (reimbursing for expenses used as a deduction or credit in a prior year and not exceeding the annual $2,500 off-campus room and board expenses - tough documentation requirements should the distribution be challenged).

RECONTRIBUTION OF REFUNDED QUALIFIED HIGHER EDUCATION EXPENSES

When qualified higher education expenses are refunded (for example, when a student drops a class mid-term), the regs IRS plans to issue will:

- Permit the entire recontributed amount to be treated as principal, thus eliminating the need to determine the earnings portion, and allowing the entire refund to be tax-free if recontributed to the plan within 60 days of the refund;
- Provide that the recontributed amount won't count against the Sec 529(b)(6) limit on contributions on behalf of the designated beneficiary (related to contributions in excess of those necessary to provide for the qualified higher education expenses of the beneficiary); and

- Specify that the recontributed amount must be to the Sec 529 plan for the benefit of the beneficiary who received the refund but the recontribution doesn't have to be into the same plan from which the original distribution was made.

ROLLOVER FROM A QTP TO AN ABLE ACCOUNT

QTP distributions made Dec. 23, 2017 through Dec. 31, 2025, to the ABLE account of the designated beneficiary or a family member of the beneficiary won't be taxable if:

TCJA

(1) The distributed funds are contributed to the ABLE account within 60 days of the withdrawal from the QTP and

(2) That distribution plus all other contributions to the ABLE account for the year that are subject to the annual gift tax exclusion do not exceed that limitation.

A direct transfer or rollover that would result in the gift tax limitation being exceeded would be subject to income tax plus a 10% penalty, so the regs IRS plans to issue will require the QTP to prohibit the direct transfer amount.

This rollover provision is only available 2018 through 2025. The amount of the rollover is limited, when combined with other contributions, to the annual ABLE account maximum. See Chapter 5.06 for additional information.

HIGHER EDUCATION CREDITS

Taxpayers can claim an American Opportunity credit or Lifetime Learning credit for a taxable year and exclude from gross income amounts distributed (both the principal and the earnings portion) from a Sec. 529 Plan on behalf of the same student as long as the distribution is not used for the same expenses for which a credit was claimed.

PENALTIES

If the earnings from the 529 Plan are withdrawn and not used for qualified education expenses, the earnings withdrawn will be subject to both regular taxes and a 10% penalty. When applicable, the penalty is computed on Form 5329. Before becoming concerned, remember, had the taxpayer not utilized the tax deferral benefits of the Sec 529 Plan, they would have accumulated significantly less in the account that may more than offset the 10% penalty. Penalties can be avoided by making a tax and penalty-free rollover from one 529 Plan to another, and remember, a taxpayer can change beneficiaries to a 529 Plan without penalty.

IMPACT ON FINANCIAL AID

Predicting financial aid eligibility is no easy task since it is based on a myriad of factors, including income, the age of the parents, and the methodology used. A question that always arises when discussing the benefits of saving for college is the impact those savings will have on future financial aid. Investing in a college savings plan can affect financial aid eligibility to some degree, but 529 plans are typically viewed as a parental asset, rather than a child's and that means that a financial aid officer would count only a small portion of the assets toward the financial aid eligibility. If the account owner is not the parent or dependent student (perhaps a grandparent), eligibility for financial aid is not affected, but distributions from grandparent-owned plans will likely be attributed to the student.

LOSSES

If a contributor has a loss from his or her investment in a qualified tuition program (QTP), he or she can take the loss on his or her tax return, but only when all amounts from that account have been distributed and the total distributions are less than the contributor's unrecovered basis. The loss is claimed as a miscellaneous itemized deduction subject to the 2%-of-adjusted-gross-income limit.

TCJA

The TCJA suspended the 2%-of-AGI threshold category of deductions for 2018 through 2025, so in those years, no QTP loss is allowed.

GIFT & ESTATE CONSIDERATIONS

Normally, gift tax doesn't apply to amounts paid by one individual on behalf of another individual <u>directly</u> to a qualifying educational organization as tuition for that other individual. *(Code Sec. 2503(e))*. However, since contributions to qualified tuition programs are not paid directly, that exclusion does not apply.

Section 529 Plans are often promoted as an estate-planning device for wealthy grandparents, since making a large contribution to a 529 Plan reduces their taxable estate much quicker than the annual gift exclusion. But while the assets leave their estate, they don't leave their control.

<u>Completed Gifts</u> - Contributions to Section 529 Plans are considered completed gifts and are subject to the gift tax rules. Under these rules, individuals can annually give away (gift) up to the annual exclusion amount to another

individual (twice that amount for a married couple) without triggering gift taxes or reducing their lifetime gift and inheritance exclusion.

<u>Five-Year Option</u> – Where contributions exceed the annual exclusion amount, a donor may elect to take certain contributions to a QTP into account ratably over a five-year period in determining the amount of gifts made during the calendar year. The provision is applicable only with respect to contributions not in excess of five times the annual exclusion amount available in the calendar year of the contribution. Any excess may not be taken into account ratably and is treated as a taxable gift in the calendar year of the contribution. Thus an individual could contribute five times the annual exemption and a couple twice that amount. The gift would reduce the donor's estate by the full amount of the gift by the end of the five-year period. Should the donor die before the five-year period elapses, any amount in excess of the allowable annual exclusions would revert back to the donor's estate.

No additional gift could be given to the beneficiary of the Section 529 Plan for that entire five-year period without triggering a gift tax return filing requirement, and potentially gift tax, unless there is an increase in the annual exclusion amount.

<u>Annual Exemption Increases During Five Year Period</u> - If in any year after the first year of the five year period the amount of the annual exclusion is increased, the donor may make an additional contribution in any one or more of the four remaining years up to the difference between the exclusion amount as increased and the original exclusion amount for the year or years in which the original contribution was made (Prop. Reg. 1.529-5(b)(2)(iv)).

> ***Example -*** *In Year 1, when the annual gift exclusion is $10,000, Paul, who is divorced, makes a contribution of $60,000 to a QTP for the benefit of his child, Chris. Paul elects under section 529(c)(2)(B) to account for the gift ratably over a five year period beginning with the calendar year of contribution. Paul is treated as making an excludable gift of $10,000 in each of Years 1 through 5 and a taxable gift of $10,000 in Year 1. In Year 3, when the annual exclusion is increased to $12,000, Paul makes an additional contribution for the benefit of Chris in the amount of $8,000. Paul is treated as making an excludible gift of $2,000; the remaining $6,000 is a taxable gift in Year 3.*

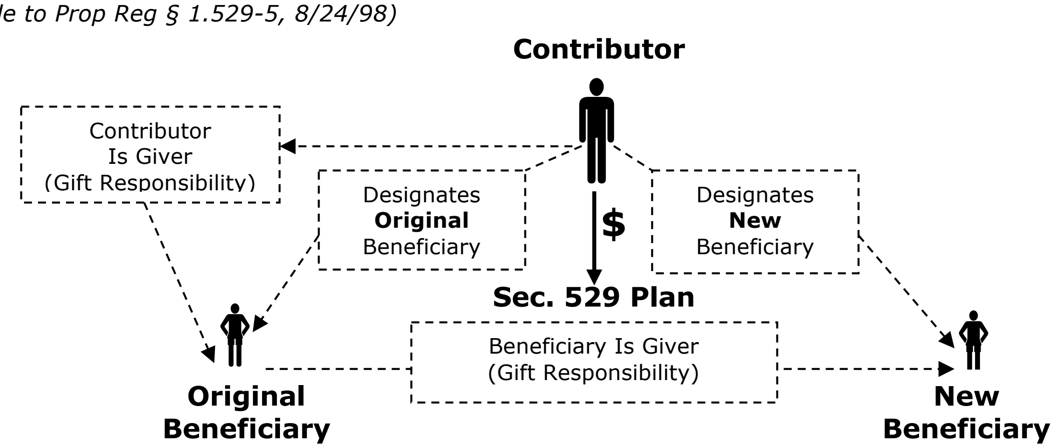
<u>Multiple Five-Year Options</u> – Although overlapping five-year periods are not allowed according to the provisions of Prop. Reg. 1.529-5(b)(2)(v), it would appear that additional five-year periods can be elected once the current five-year period has been completed.

<u>Gift Tax Return</u> - A gift tax return must be filed for the year of the contribution, if the gift exceeds the annual gift tax exclusion amount. If claiming the special five-year exemption, Form 709A cannot be used. Only the 709 includes the special box in Schedule A (line B) providing the election. The following is the text of that election:

> ☐ *Check here if you elect under Section 529(c)(2)(B) to treat any transfers made this year to a qualified state tuition program as made ratably over a five-year period beginning this year. See instructions. Attach explanation.*

The explanation must include the total amount contributed per individual beneficiary, the amount for which the election is being made, and the name of the individual for whom the contribution was made. Please see the instructions for Form 709 for additional information.

<u>Change of Beneficiary</u> - Contribution to a QTP is a completed gift from the contributor to the designated beneficiary. Therefore, any subsequent transfer occurring by reason of a change in the designated beneficiary or a rollover from the account of the original designated beneficiary to the account of another beneficiary is treated as a transfer from the original designated beneficiary to the new beneficiary. ***This is the result even though the change in beneficiary or the rollover is made at the direction of the contributor*** under the terms of the contract. *(Preamble to Prop Reg § 1.529-5, 8/24/98)*



Taxable Transfer? Such a transfer is not a taxable gift if the new beneficiary: *(Prop Reg § 1.529-5(b)(3)(ii) ["Taxpayers may rely," Prop Regs, 8/24/98]*

(1) Is a member of the family of the old beneficiary, **and**

(2) Is assigned to the same generation as the old beneficiary.

Generation-Skipping Tax - Under proposed regs, the portion of a contribution to a qualified tuition program that is excludible from taxable gifts under the gift tax annual exclusion also satisfies the requirements of Code Sec. 2642(c)(2), and therefore, is also excludible for purposes of the generation-skipping transfer (GST) tax. *Prop Reg § 1.529-5(b)(1) ["Taxpayers may rely," Prop Regs, 8/24/98].*

Death of a Beneficiary **-** No interest in a qualified tuition program is included in the estate of any person for estate tax purposes. However, amounts distributed on account of the beneficiary's death are included in the beneficiary's estate. Thus, if the beneficiary's interest is rolled over to another beneficiary, there are no transfer tax consequences if the beneficiaries are in the same generation. If the new beneficiary is in a lower generation than the deceased beneficiary, the five-year rule may be applied to exempt from the gift tax up to $75,000 of the transfer for 2019 (5 x $15,000, the current annual exemption).

SUPPORT - AN UNANSWERED QUESTION

To date the IRS has not provided any guidance related to whether a distribution from a Sec 529 plan constitutes support to the student provided by the account owner or the account beneficiary (the student). Some tax professionals take the position that the distributions are support provided by the beneficiary (student) since the contributions to Sec 529 Plans are considered to be completed gifts. This issue can have a significant impact when determining whether the beneficiary is a dependent of his or her parents or is self-supporting, and who claims the beneficiary's exemption, education credits, tuition deduction (in years when available), and other tax benefits.

PLAN SPONSORS

Originally, Section 529 Plans were only state-sponsored programs but now have been expanded to allow educational institutions, either public or private, to establish and operate prepaid tuition plans. For college savings plans and state-sponsored prepaid tuition plans, taxpayers are actually investing in a program authorized by the Federal government and run by the various states, or a state agency or instrumentality. To attract their own residents, some states offer tax deductions for contributions, while others will disregard the account balances when calculating state financial aid. **It is important to understand that taxpayers are not limited to establishing a plan with their resident state.** They should investigate the various state plans available and evaluate their performance, expenses, and investment options before selecting a plan.

CALIFORNIA DIFFERENCES

California's version of a Section 529 college savings plan, which was established in 1999, was renamed in 2017 to ScholarShare 529. The URL remains *www.scholarshare.com.*

- This savings plan program invests in special investment portfolios.
- For the taxpayer's beneficiaries, allocations are weighted more heavily towards equities, and as beneficiaries become older, allocations are weighted more heavily towards bonds and money market instruments.
- Other state's programs may be used by California residents & vice versa.
- Education is NOT LIMITED to California educational institutions.
- Account maximum is $529,000 as of July 2019.

New Law & Stuff

Conformity with Federal Changes - AB 91 (signed by the governor 6/27/2019) generally conforms to the changes relating to Sec 529 plans made by the TCJA and the Consolidated Appropriations Act of 2016, including the following:

- A distribution is not taxable, if, within 60 days of distribution, it is transferred to the credit of another beneficiary who is a "member of the family" as defined in IRC Sec 529(e)(2) or is rolled into an ABLE account for the same beneficiary or a family member.
- Refunded amounts re-contributed to the plan within 60 days will not be taxable.
- Distributions used to purchase computers, computer software, internet access and related services are qualified education expenses and thus not taxable.

Nonconformity with Federal Changes - California did not conform to the TCJA provision allowing tax-free distributions from 529 plans for amounts used to pay tuition expenses at a public, private or religious elementary, middle, or high school. Therefore, these distributions are taxable for California and subject to a 2.5% penalty. See table below.

SEC 529 PLAN COMPARISONS – FEDERAL/CALIFORNIA		
ACTION	**FEDERAL**	**CALIFORNIA**
Distribution to transfer funds to another family member's 529 plan within 60 days.	YES	YES
Distribution to transfer funds to an ABLE account within 60 days.	YES	YES
Refunded amounts re-contributed to the plan within 60 days will not be taxable.	YES	YES
Allows tax-free distributions from 529 plans for amounts used to pay Kindergarten through grade 12 tuition expenses.	YES	**NO**
Distribution to pay tuition expenses at a public, private or religious elementary, middle, or high school.	YES	**NO**
Distributions used to purchase computers, computer software, internet access and related services are qualified education expenses.	YES	YES

Direct Deposit of Refunds to ScholarShare Savings Plan – Income tax refunds can be directly deposited into the taxpayer's ScholarShare 529 College Savings Plan account. See Form 540 or 540-2EZ instructions.

Matching Grant – New ScholarShare accounts may be eligible to receive dollar-for-dollar matching contributions up to $225 into the account from ScholarShare 529. See the plan's website for additional information.

NOTES

ABLE ACCOUNTS

“Achieving a Better Life Experience” (ABLE) Accounts

RAPID FINDER

Overview

Qualified ABLE programs provide the means for individuals and families to contribute and save for the purpose of supporting individuals, blind or severely disabled before turning age 26, in maintaining their health, independence, and quality of life. The contribution and distribution rules are loosely modeled after Sec. 529 Plans.

New Law & Stuff

TCJA CHANGES	**See Page**
Additional Contributions by Beneficiaries	5.06.02
Saver’s Credit	5.06.03
Rollovers from Sec 529 Plans Now Allowed	5.06.03

The Details

Federal law enacted in 2014 authorizes States (or their agencies or an instrumentality) to establish and operate an ABLE program. Under the ABLE program, an ABLE account may be set up for any eligible state resident, which would generally be the only person who could take distributions from the account. ABLE accounts are very similar in function to Sec 529 plans. However, they should not be considered as estate planning devices, as is sometimes the case with 529 plans; the main purpose of ABLE accounts is to shelter assets from means testing required by government benefit programs. Individuals can contribute to ABLE accounts subject to Gift Tax limitations. Distributions to the disabled individual are tax free if the funds are used for qualified expenses of the disabled individual.

State Program - A state or state agency or instrumentality can establish an ABLE Program for a beneficiary who is a resident of either the state that maintains the program or of a contracting state that hasn't established an ABLE program but has entered into a contract with a program state to provide the contracting state's residents with access to the program state's ABLE program. Program limitations:

- Must provide a separate accounting for each designated beneficiary;
- Limits the designated beneficiary's investment direction to no more than two times in a calendar year;
- Prohibits the use of any interest or any portion of an interest in the program as security for a loan; and
- Provides adequate safeguards to prevent excess aggregate contributions.

Beneficiary Changes State Residency - A qualified ABLE program may permit a beneficiary to continue to maintain his or her ABLE account that was created in that state, even after the beneficiary is no longer a resident of that state. (Prop Reg §1.529A-2(o))

Eligible Beneficiary - Must be severely disabled before turning age 26, based on marked and severe functional limitation or receipt of benefits under the SSI or Disability Insurance (DI) programs. However, an individual does not need to receive SSI or DI to open or maintain an ABLE account, nor does the ownership of an account confer eligibility for those programs.

The designated beneficiary of an ABLE account is an eligible individual who established the account and is its owner. (Code Sec. 529A(e)(3))

An individual is an eligible individual for a tax year if, during that tax year:

- The individual is entitled to benefits based on blindness or disability under the Social Security disability insurance program (title II of the Social Security Act) or the SSI program (title XVI of the Social Security Act),
-

and that blindness or disability occurred before the date on which the individual reached age 26, (Code Sec. 529A(e)(1)(A)) or

- A disability certification for the individual has been filed with IRS for the tax year. (Code Sec. 529A(e)(1)(B))

A disability certification is one made by the eligible individual, or his parent or guardian, that certifies that:

1. The individual has a medically determinable physical or mental impairment, which results in marked and severe functional limitations, and that can be expected to result in death or that has lasted or can be expected to last for a continuous period of not less than 12 months, or is blind, within the meaning of Sec. 1614(a)(2) of the Social Security Act (Code Sec. 529A(e)(2)(A)(i)(I)), and
2. That blindness or disability occurred before the date on which the individual attained age 26. (Code Sec. 529A(e)(2)(A)(i)(II))

The certification must include a copy of the individual's diagnosis relating to the individual's relevant impairment(s), signed by a licensed physician meeting the criteria of Sec. 1861(r)(1) of the Social Security Act. (Code Sec. 529A(e)(2)(A))

Designated beneficiaries can open an ABLE account by certifying, under penalties of perjury, that (1) they meet the qualification standards, including their receipt of a signed physician's diagnosis (if necessary), and (2) they will retain that diagnosis and provide it to the program or the IRS on request. Eligible individuals with disabilities will not need to provide the written diagnosis when opening the ABLE account, and ABLE programs will not need to receive, retain, or evaluate detailed medical records (Notice 2015-81).

Annual Re-certification **-** A qualified ABLE program generally must require annual re-certifications that the beneficiary continues to satisfy the definition of an eligible individual. However, a qualified ABLE program may deem an annual re-certification to have been provided in appropriate circumstances. For example, a qualified ABLE program may permit certification by an individual that he or she has a permanent disability (Prop Reg § 1.529A-2(d)(2)).

Contributions - Eligible individuals will be limited to one ABLE account, and:

- *Total annual contributions*
  - **Prior to 2018** - Total annual contributions by all individuals (including the beneficiary) to any one ABLE account was lmited to no more than the gift tax exclusion amount, which is subject to annual inflation adjustment, and was $14,000 for 2017.
  - **Post 2017 –** The annual limit by all individuals (including the beneficiary) to any one ABLE account continues to be limited to no more than the gift tax exclusion amount, which is $15,000 for 2018 and 2019.

    TCJA

    However, beginning in 2018 and through 2025, TCJA added a provision allowing the beneficiary of the ABLE account to contribute a maximum additional amount equal to the lesser of:

    - The beneficiary's taxable compensation for the year, or
    - The prior year's poverty level for a one-person household.

    The 2018 poverty level for a one-person household was $12,140, which means for 2019, the beneficiary can contribute an additional amount equal to the smaller of the beneficiary's taxable compensation or $12,140.

  CAUTION: Even if a contributor limits his or her contributions to an ABLE account to no more than the annual gift tax exclusion amount, if the contributor has made other gifts (other than direct gifts to providers for medical or schooling) to the ABLE account beneficiary during the year, the gift tax return filing requirement will be triggered.

- *Aggregate contributions* - Aggregate contributions are subject to the State limit for education-related Section 529 accounts. The proposed regulations provide a safe harbor that permits a qualified ABLE program to satisfy the requirement regarding total cumulative contributions if the program prohibits any additional contributions to an account as soon as the account balance reaches the specified contribution limit under such state's program established under Code Sec. 529. Once the account balance falls below the prescribed limit, contributions may resume, subject to the same limitation. Note, however, that if the account balance exceeds $100,000, certain federal benefits will be adversely impacted – see "ABLE Accounts and Other Federal Programs" below.
- *Excess contribution penalty* - The proposed regulations provide that a qualified ABLE program must return contributions in excess of the annual gift tax exclusion (excess contributions) to the contributor(s), along with all net income attributable to those excess contributions. A failure to return excess contributions that exceed the annual gift tax exclusion within the allotted time period will result in the imposition on the designated beneficiary of a six-percent excise tax under Code Sec. 4973(a)(6) on the amount of excess contributions.

- *Contributions by other than the designated beneficiary* - The proposed regulations provide that contributions to an ABLE account by a person other than the designated beneficiary are treated as completed gifts to the designated beneficiary of the account, and that such gifts are neither gifts of a future interest nor a qualified transfer under Code Sec. 2503(e).
- *Contributors* - ABLE programs will not need to request the taxpayer identification numbers (TINs) of contributors to an ABLE account at the time the contribution is made, provided that the program has a system in place to reject contributions exceeding the annual limits. However, if an excess contribution is made into an ABLE account, the program will need to request the contributor's TIN (Notice 2015-81).
- TCJA **Saver's Credit –** For years 2018 though 2025 TCJA allows the beneficiary's additional contribution to qualify for the non-refundable saver's credit. The amount of credit depends on the beneficiary's actual income and can be 10%, 20% or even as much as 50% of up to the first $2,000 contributed, for a maximum credit of $1,000. See chapter 9.07 for additional details related to the saver's credit.

Comment: *The saver's credit is based in part on earned income of the taxpayer. For that reason, only the beneficiary's contribution up to the amount of additional contribution described above counts towards the saver's credit.*

- TCJA **Sec 529 Plan Rollovers** - The Act also provides that a distribution from a Sec 529 qualified tuition plan account is tax-free and penalty-free provided it, within 60 days, is rolled over to an ABLE account of the same designated beneficiary or a member of the designated beneficiary's family. This rollover provision is only available through 2025. The amount of the rollover is limited, when combined with other contributions, to the annual maximum.

For this purposes, a member of the family means, with respect to any designated beneficiary, the taxpayer's: (1) spouse; (2) child or descendant of a child; (3) brother, sister, stepbrother or stepsister; (4) father, mother or ancestor of either; (5) stepfather or stepmother; (6) niece or nephew; (7) aunt or uncle; (8) in-law; (9) the spouse of any individual described in (2)-(8); and (10) any first cousin of the designated beneficiary. (H.R. 1 [TCJA] Conference Committee Report)

Example: Bill, who finished school and graduated, still has $8,000 in his Sec 529 qualified tuition plan that his parents had set up to pay his college tuition. Bill will no longer have any education expenses, so Bill rolls the balance of his Sec 529 plan into his 14-year-old blind niece's ABLE account within the 60 days allowed. There is no tax or penalties on the rollover. However, since contributions to the ABLE account are limited to $15,000 (2019), others may only contribute an additional $7,000 ($15,000 - $8,000) to the niece's ABLE account.

ABLE Account Rollovers - ABLE accounts generally will be eligible to be rolled over only into another ABLE account for the same individual or into an ABLE account for a sibling who is also an eligible individual. Only one rollover per 12-month period is allowed.

Distributions - Distributions, including portions attributable to investment earnings generated by the account, to an eligible individual for qualified expenses are not taxable. Distributions used for non-qualified expenses are subject to income tax on the portion of such distributions attributable to earnings from the account, plus a ten percent penalty on the taxable portion (Prop Reg § 1.529A-3(a)).

Limitation on Number of Accounts - Except with respect to rollovers and program-to-program transfers, no designated beneficiary may have more than one ABLE account in existence at the same time. (Prop Reg § 1.529A-2(c)(2))

Signature Authority - A person other than the beneficiary with signature authority over the account of the beneficiary (for example, a parent or guardian or an individual holding a power of attorney) must not have, nor acquire, any beneficial interest in the account during the designated beneficiary's lifetime and must administer the account for the benefit of the beneficiary. (Prop Reg § 1.529A-2(c)(3))

Qualified Expenses - Proposed regulations provide that qualified disability expenses are expenses that relate to the designated beneficiary's blindness or disability and are for the benefit of that designated beneficiary in maintaining or improving his or her health, independence, or quality of life. (Code Sec. 529A(e)(5)). They include:

- Education,
- Housing,
- Transportation,
- Employment training and support,
- Assistive technology
- Personal support services,
- Health, prevention, and wellness,

- Financial management and admin services,
- Legal fees,
- Expenses for oversight and monitoring,
- Funeral and burial expenses, and
- Other expenses that are approved under IRS regs and consistent with the purposes of Code Sec. 529A(e)(5)

Safeguards - ABLE programs will not need to include safeguards to determine which distributions are for qualified disability expenses, nor will they be required to identify distributions that will be used for housing expenses (Notice 2015-81).

Change of Beneficiary - A change in the beneficiary of an interest in a qualified ABLE program during a tax year isn't treated as a taxable distribution if the new beneficiary is both an eligible individual for the tax year and a member of the family of the former beneficiary. (Code Sec. 529A(c)(1)(C)(ii)). Member of the family for this purpose means a sibling, whether by blood or by adoption, and includes a brother, sister, stepbrother, stepsister, half-brother, and half-sister. (Prop Reg § 1.529A-1(b)(13))

Death of the Beneficiary - Upon the death of an eligible individual, any amounts remaining in the account (after reimbursement, see below) would go to the deceased's estate or to a designated beneficiary and would be subject to income tax on investment earnings, but not on the principal.

Reimbursement (Transfer to State (Code Sec. 529A(f))) - Upon the designated beneficiary's death, any State may file a claim (either with the person with signature authority over the ABLE account or the executor of the designated beneficiary's estate as defined in section 2203) for the amount of the total medical assistance paid for the designated beneficiary under the State's Medicaid plan after the establishment of the ABLE account. The amount paid in satisfaction of such a claim is not a taxable distribution from the ABLE account. Further, the amount is to be paid only after the payment of all outstanding payments due for the qualified disability expenses of the designated beneficiary and is to be reduced by the amount of all premiums paid by or on behalf of the designated beneficiary to a Medicaid Buy-In program under that State's Medicaid plan.

Effective Date - The legislation creating ABLE Accounts is effective for tax years beginning after December 31, 2014.

ABLE Accounts and Other Federal Programs - An individual with an ABLE account can maintain eligibility for means-tested benefit programs such as SSI and Medicaid if his or her ABLE account balance is under $100,000. The first $100,000 in an ABLE account is not counted toward the SSI program's $2,000 individual resource limit; however, account distributions for housing expenses are counted as income for SSI purposes. Assuming the individual has no other assets, if the balance of an individual's ABLE account exceeds $102,000, the individual would be suspended from eligibility for SSI benefits but would remain eligible for Medicaid. States will be required to recoup certain expenses through Medicaid upon the death of the individual.

ABLE Accounts and Bankruptcy – Contributions to an ABLE account by a parent or grandparent of a designated beneficiary are protected in the case of bankruptcy. In order to be protected, ABLE account contributions must be made more than 365 days prior to the bankruptcy filing.

IRS Forms – The IRS has developed two forms that ABLE account programs will use to report relevant account information annually to designated beneficiaries and the IRS — Form 1099-QA for distributions and Form 5498-QA for contributions.

CALIFORNIA DIFFERENCES

ABLE accounts are state established programs authorized under Federal tax lawLegislation (SB 324) was passed by the California legislature and signed by the governor establishing the CalABLE program (new R&TC Section 17140.4). CalABLE accounts are effective January 1, 2016.

AB 91 (signed by the governor 6/27/2019) generally conforms CA law to the changes relating to qualified ABLE accounts made by the TCJA and the Consolidated Appropriations Act of 2016. Thus, California conforms to the TCJA provision allowing ABLE account beneficiaries to contribute their own earnings, up to an amount equal to the federal poverty level amount, to their own account.

New Law & Stuff

However, AB91 does not provide for a tax-free rollover from a 529 plan to an ABLE account.

The CalABLE website is: https://calable.ca.gov/

NOTES

MOVING EXPENSES

Overview

Distance Test: 50 Miles (Greater driving distance from old home)
Time Test:
- Employee: Full time **39 weeks of first 52 weeks.**
- Self-Employed: **39 weeks of first 52 weeks** plus **78 weeks of first 104 weeks.**
- Exceptions: Death, disability, layoff, or transfer.

2019 Mileage Rate: 20 cents per mile
Domestic Moving Deduction Suspended 2018 thru 2025 except active duty military pursuant to military order
Employer Reimbursement: Taxable 2018 - 2025

New Law & Stuff

TCJA CHANGES	**See Page**
Moving expenses suspended 2018-2025	6.01.01
Transitional relief 2017 expenses reimbursed in 2018	6.01.03
Employer moving reimbursement taxable 2018-2025	6.01.03

The Details

Before 2018 and after 2025, taxpayers who move because of a change of work location may deduct certain related expenses. The moving expense deduction is available for both employees and self-employed individuals if specific conditions are met; this includes taxpayers starting their first job. When moving expenses exceed reimbursements, the excess is an adjustment to gross income.

TCJA

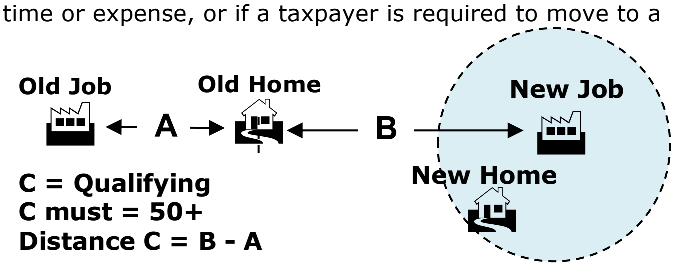
Exception: This provision continues to apply in 2018 through 2025 for moving expenses of members of the Armed Forces on active duty who move pursuant to a military order. (IRC Sec 217(k), added by TCJA)

DEDUCTION QUALIFICATIONS

(1) Generally, moving expenses must be incurred within a time frame which is closely related to the start of the new job. Expenses within ONE YEAR after starting work at the new location are generally acceptable. Rev Rul 78-200 allowed thirty months between job-start and family move because a child in the family was finishing a stage of his education.

(2) To qualify, the move should be to the VICINITY OF THE NEW JOB LOCATION. A taxpayer usually cannot meet this test if the distance to the new job from the new residence is farther than to the new job from the old residence. This test will not apply if the move reduces commuting time or expense, or if a taxpayer is required to move to a new home by an employer.

(3) **The distance requirement:** The distance to the new job from the old home must be at least 50 miles farther than to the old job from the old home. That is, if the taxpayer did not move, the new commute would be 50 miles longer than the old commute. If there was no previous job, measure the distance from the previous residence to the new job.



Example - Moving Distance Test Violated: *In 2017 Lance lived in Lakewood but commuted 60 miles to his job in Longview. He got a new job and moved to Lincoln, which is 90 miles from Lakewood. Since the difference between the old commute and the new commute is only 30 miles, the move is not qualified under the distance test.*

Example - Moving Distance Test Met: *In 2017 Rita lived in Reno and commuted each day to her job in Riverton, a distance of 30 miles. She got a new job and moved to Rapid City, which is 90 miles from Reno. The difference between the old 30-mile commute and the distance from the old home to the new job (90 miles) is 60 miles. This move qualifies under the distance test.*

(4) **The time test:** To meet this test,

- An **EMPLOYEE** must work in the area of the new job **FULL-TIME** for **39 weeks (9 months) out of the first 52 weeks.**
- A **SELF-EMPLOYED** person must work FULL TIME for **39 weeks in the first year** after the move **AND 78 Weeks in the first two years.**

Only one spouse must qualify, but the time test cannot be met by adding the weeks worked by one spouse to the weeks worked by the other spouse. It is not necessary to work for the same employer the whole time.

Exceptions to the time test: The moving expense deduction is allowed if the taxpayer could "reasonably have expected" to fulfill the time requirements but was prevented by:

- Death, Disability,
- Job lay-off, or
- Transfer by his/her employer.
- Allowances are also made for work missed:
  - Because of its SEASONAL NATURE, if the off-season is less than six months and is provided for in the employment agreement (for example, a teacher);
  - For INVOLUNTARY ABSENCES (illness, strike, etc.);
  - For TEMPORARY ABSENCES such as vacation.

If the time test requirement has not been completed when the return is due, the taxpayer can either go ahead and claim the deduction (and amend if the time test ends up not being met) OR can wait and amend the return after the requirement is met.

(5) **Armed forces:** There is no distance or time requirement on a permanent change of station (PCS). If a spouse and dependents of the taxpayer move to or from a different location than the military person, the two moves are treated as one.

(6) **Foreign Moves**

U.S. to a Foreign Country – The expenses of moving from the U.S. or its possessions to a new principal place of work outside the U.S. or its possessions include the reasonable expenses (no dollar ceiling) listed below, but **the expenses may be limited** if the employee also qualifies for the foreign earned income or foreign housing exclusions.

Moving expenses aren't deductible to the extent allocable to exempt foreign-source earned income. In the absence of evidence to the contrary, reimbursement of expenses to move to a foreign country is attributed to future services to be performed at the new place of work. (Reg § 1.911-3(e)(5)(i))

The reimbursement for a foreign move is considered earned solely in the year of the move if the taxpayer qualifies for the earned income exclusion for at least 120 days of the year of the move. If not, the reimbursement must be allocated between the first and second years. See IRS Pub 54 for details related to moving to a foreign country.

Foreign Country to U.S. – If an individual otherwise meets the moving requirements, a move from a foreign country to the U.S. is allowed. Moving expense reimbursement included in income is generally considered to be U.S. source income and the general moving rules will apply. However, if the employer by agreement or company policy provides reimbursement regardless of continued employment with the employer, the reimbursement is considered compensation for past services performed in the foreign country.

(7) **Strategy** - Moving expenses can be deducted in the year they were paid or incurred OR if reimbursed, in the year in which reimbursement is received (as long as the expense is paid before the extended due date of the return).

Strategies

This provides an opportunity to pick the best year for deducting the expenses. (Code Sec. 217(d)(2); Reg § 1.217-2(a)(2)) The taxpayer can also wait until the applicable condition is satisfied; then file an amended return claiming the deduction for the tax year the moving expense was paid or incurred. (Reg § 1.217-2(d))

DEDUCTIBLE EXPENSES AND OTHER LIMITATIONS

Direct expenses to move family and household goods have no dollar limit, but the move must be made by a direct route using the shortest usual time between the locations involved. Only moving expenses which are **reasonable** under the circumstances are deductible. Expenses of moving household goods from a place other than a taxpayer's former home are deductible up to the amount it would have cost to move them from the former home. "Family" includes the people who live with the taxpayer at both the old and the new residence, EXCEPT tenants or employees (unless they are the taxpayer's dependents). Expenses allowed are:

- Shipping,
- Moving Van,
- Truck rental,
- Travel (transportation and lodging, not meals),
- Packing,
- Insurance and in-transit storage,
- Moving pets,
- Passports, and
- Utility connection/disconnection charges.

Car Expenses - To deduct car expenses, use either the standard mileage rate for moving plus parking and tolls OR actual expenses for gas, oil, repairs, parking, tolls (no depreciation, casualties, or capital expenditures).

Standard Auto Rates

2014	2015	2016	2017	2018	2019
23.5	23.0	19.0	17.0	18.0	20.0

If an amount not shown it was not available at publication date.

In-Transit Storage Expenses – In-transit storage and insurance expenses are deductible if incurred within any consecutive 30-day period after removal of the goods and personal effects from the old residence and before delivery to the new residence. Storage costs other than for in-transit storage aren't deductible unless a foreign move is involved. For a foreign move, the cost of storing household goods and personal effects is allowed for all or part of the time while the new job location remains the taxpayer's main job location.

Nondeductible Expenses - Pre-move house hunting costs, temporary living expenses at the new location, loss on sale of a home, and expenses of sale or purchase or lease of a residence are not deductible. Other nondeductible expenses include the cost of a driver's license and car registration at the new location, security deposits, and losses of disposing of club memberships. (2018 Pub 521, pg 4)

MOVING EXPENSE REIMBURSEMENT

TCJA

Armed Forces members and other taxpayers before 2018 and after 2025

Reimbursements to employees or self-employed individuals which aren't for "qualified moving expenses" must be included in their gross income as compensation. A qualified moving expense reimbursement is one received for a **deductible** moving expense--such reimbursements do not have to be included in income. However, no deduction is allowed for any moving expenses for which nontaxable reimbursement is received.

Employer reimbursements for an employee's moving expenses are treated as fringe benefits excludable from an employee's gross income and wages if the:

- Expenses would be deductible by the employee if he or she had directly paid or incurred the expenses; and
- Employee did not deduct the expenses in a prior year.

Reimbursements should be made under rules similar to those relating to an accountable expense reimbursement plan.

As far as **W-2 reporting** goes, reimbursements that qualify as excludable from income are not reported in Box 1 of the W-2; they must, however, be reported in Box 12 for informational purposes. They should be coded "P" to identify them as nontaxable reimbursements.

Reporting the Taxpayer's Moving Expenses and Reimbursements
(Armed Forces members for all years and other taxpayers before 2018 & after 2025)

IF the Form W-2 shows...	AND the taxpayer has...	THEN...
Reimbursement is reported only in box 12 with code P	Moving expenses greater than the amount in box 12	file Form 3903 showing all allowable expenses and reimbursements.
Reimbursement is reported only in box 12 with code P	Moving expenses equal to the amount in box 12	do not file Form 3903.
Reimbursement is divided between box 12 and box 1	Moving expenses greater than the amount in box 12	file Form 3903 showing all allowable expenses, but only the reimbursements reported in box 12.
The entire reimbursement reported as wages in box 1	Moving expenses	file Form 3903 showing all allowable expenses, but no reimbursements.
No reimbursement	Moving expenses	file Form 3903 showing all allowable expenses

TCJA

Taxpayers other than Armed Forces Members for years 2018 through 2025

Employer reimbursement of qualified moving expenses is no longer tax-free; the reimbursements will be treated as taxable income. (Sec 132(g)(2), as amended by TCJA)

Transitional Relief - The IRS has provided transitional relief for employee moving reimbursements received in 2018 for moving expenses incurred prior to 2018. These reimbursements continue be excluded from employee income and deductible as a fringe benefit by the employer. (IR 2018-190)

CALIFORNIA DIFFERENCES

California conforms to the pre-TCJA Federal treatment of moving expenses as an adjustment to income.

Part-Year CA Residents - The following rules apply to part-year residents. If the taxpayer moved:

- *Into California* in connection with a new job, the moving expenses are deductible. When completing the Part-Year Resident Schedule CA for a military taxpayer, enter the amount from column A, line 26, in column E, line 26*. For non-military taxpayers prepare federal Form 3903, Moving Expenses, using California amounts. If there are excess moving expense reimbursements, enter the amount of moving expenses from line 3 of federal Form 3903 on Schedule CA (540NR), line 26, column C. If reimbursements are less than the moving expenses, enter the amount of moving expenses from line 5 of federal Form 3903 on Schedule CA (540NR), line 26, column C.
- *Out of California* in connection with a new job, the moving expenses are not deductible in CA. When completing the Part-Year Resident Schedule CA, enter zero on line 26*, column E.

  Exception: If the taxpayer moved out of California in connection with a new job and received compensation from that job attributable to a California source, the moving expense adjustment will be limited by the ratio of California source compensation from the new job to total compensation from the new job.

  ** 2018 version of Sch CA (540NR)*

A taxpayer moving into California who has taxable moving expense reimbursement will treat that income as California-source income, while a taxpayer moving out of California who is not a California resident after the move would treat any taxable moving expense reimbursement as non-California source income.

- **IRC Sec 221**

Strategies

Strategy - Within the AGI limits, up to $2,500 of interest on debt to finance higher education is deductible as an adjustment to AGI. Generally, taxpayers perceive this debt to be Government Student Loans. However, this is not the only debt whose interest will qualify for this deduction.

Thus, virtually any debt, including credit card (if used only for education expenses) and home equity debt may qualify (however, see "Home Equity Debt and the Unsecured Election" in this course). Counsel your clients who already have or are likely to borrow for higher education expenses on how debt other than Government Loans can qualify for the deduction. Don't overlook existing debt they have that qualifies.

The Details

MAXIMUM DEDUCTION:

An "above-the-line" deduction (i.e., a deduction for AGI) is allowed for interest payments due and paid on any "qualified student loan," regardless of when a taxpayer first incurred the loan. The maximum deduction per year is $2,500. This is a per return limit, not a per student limit.

QUALIFIED STUDENT LOAN:

A "qualified student loan" is generally one used to pay qualified higher education expenses, i.e., tuition, room and board, and related expenses for attending post-secondary educational institutions, including certain vocational schools, and certain institutions offering postgraduate training. In addition, the expenses must be:

- Incurred on behalf of the taxpayer, spouse, or any dependent of the taxpayer (at the time the loan is incurred), and
- Paid or incurred within a reasonable period of time before or after the debt is incurred, and
- Used for education when the recipient was an eligible student.

"Reasonable period of time" safe harbor - What constitutes a reasonable period of time generally is determined based on all the relevant facts and circumstances. However, qualified expenses are treated as paid or incurred within a reasonable period of time before or after the taxpayer incurs the debt if:

- The expenses are paid with proceeds of a loan from a federal postsecondary education loan program; or
- The expenses relate to a particular academic period and the loan proceeds used to pay the expenses are disbursed within a period that begins 90 days prior to the start of, and ends 90 days after the end of, that academic period. ***(Reg. § 1.221-1(e)(3)(ii))***

A qualified education loan includes a debt used solely to refinance a qualified education loan. Thus, if a qualified student loan is refinanced for more than the original loan, and the additional amount is used for any purpose other than qualified education expenses, none of the interest paid on the refinanced loan is deductible because it then becomes a mixed-use loan. A qualified education loan doesn't include any debt owed to a person who is related to the taxpayer within the meaning of ***§267(b)*** or ***§707(b)(1)*** (controlled partnerships). For example, any of the following loans would qualify so long as the proceeds were used **SOLELY** for the "qualified purpose" (i.e., **mixed use loans don't qualify**

Loans that would qualify:	**Loans that do not qualify:**
Government backed student loans	Loans from related parties
Home equity loans [1]	Pension plan loans
Credit card debt	**Loans that may not qualify**
Personal loans from unrelated parties	Life insurance loans
Private loans from banks or other institutions	

(1) But see "No Double Benefit" in this chapter

If a loan is not subsidized, guaranteed, financed, or is not otherwise treated as a student loan under a program of the Federal, state, or local government or an eligible educational institution, a payee (lender) must request a certification from the payor (borrower) that the loan will be used solely to pay for qualified higher education expenses. ***(Reg. 1.6050S-3(e)(2))*** Form W-9S, Request for Student's or Borrower's Social Security Number and Certification, is provided by IRS for this purpose.

Capitalized interest is deductible as qualified education loan interest. Capitalized interest, for purposes of § 221, means any accrued and unpaid interest on a qualified education loan that, per the terms of the loan, is added by the lender to the outstanding principal balance of the loan.

Loan origination fee – A one-time fee charged by the lender when the education loan is made is deductible as education loan interest but must be amortized over the term of the loan as payments are made. To qualify as education loan interest, the loan origination fee must be for the use of money and not for services such as processing the loan. The loan origination fee does not have to be reported on Form 1098-E for it to be deductible over the loan's term.

QUALIFIED EDUCATIONAL EXPENSES:

To qualify as an eligible loan, it must have been taken out solely to pay the costs of attending an eligible educational institution for an individual during a period in which the individual is a qualified student. Eligible costs include:

- Tuition
- Fees
- Other necessary expenses (including transportation)
- Room and board
- Books and equipment

Such expenses must be reduced by the following:

- Income excluded from ***employer-provided educational assistance***,
- Income excluded from ***U.S. savings bonds*** used to pay higher education expenses,
- Nontaxable distributions from ***Coverdell ESAs***, and
- ***Scholarships, allowances, or other payments*** (such as distributions from Sec. 529 plans) that are excludable from gross income.

Eligible educational institution....includes colleges, universities, and vocational schools eligible to participate in the Department of Education student aid programs (in other words, virtually all accredited public and private post-secondary schools). In addition, institutions conducting internship or residency programs leading to degrees or certificates awarded by an institution of higher education, a hospital, or a healthcare facility which offers postgraduate training also qualify.

Eligible student....is one enrolled in a degree or certificate program and who is at least a half-time student. What constitutes half the normal course load will be determined by the definition of the school being attended. Generally, a full-time student is one carrying at least 12 units.

MODIFIED AGI PHASE OUT: The phase out AGI is inflation adjusted in $5,000 increments.

Filing Status	2014-16	2017	2018	2019	2020
Unmarried Filing Status	65K – 80K	65K – 80K	65K – 80K	70K - 85K	70K - 85K
Joint Filing Status	130K–160K	135K–165K	135K-165K	140K-170K	140K-170K
Married Separate	Not Allowed	Not Allowed	Not Allowed	Not Allowed	Not Allowed
Dependent of Another	Not Allowed	Not Allowed	Not Allowed	Not Allowed	Not Allowed

Modified AGI means AGI determined <u>without regard</u> to: the deduction for qualified education loan interest (§221), the foreign earned income and foreign housing exclusions and foreign housing deduction (§911), the exclusion of income from U.S. possessions (§931), the exclusion of income from Puerto Rico (§933), the qualified higher education tuition and fees deduction (§222) (expired after 2017 but may be extended by Congress), and before 2018 the domestic production activities deduction (§199) (repealed for years after 2017).

The inclusion in income of social security and Tier 1 Railroad Retirement Benefits, with the deduction for qualified retirement contributions, and the limitations on passive activity losses and credits, are determined without regard to the deduction allowed for qualified education loan interest.

<u>WHO CLAIMS THE DEDUCTION:</u> A taxpayer must have a legal obligation to make the interest payments under the terms of the education loan to qualify to deduct the education interest ***(Reg. § 1.221-1(b)(1)).*** No education interest deduction is permitted to a taxpayer who is a dependent of someone else ***(Reg. § 1.221-1(b)(2)).***

> ***Example – Legal Obligation and Dependency:*** *Alice pays $750 of student loan interest during the tax year. Alice is the only person obligated to make the payments. Her parents claim her as a dependent on their return. Alice isn't able to deduct the student loan interest because she was claimed as a dependent by her parents; the parents can't deduct the interest because they are not legally liable for the debt.*

If a third party who is not legally obligated to make an interest payment on an education loan pays the interest on behalf of the borrower who is legally obligated to make the payment, then the borrower is treated as receiving the payment from the third party and, in turn, paying the interest ***(Reg. § 1.221-1(b)(4)).***

> ***Example – Legal Obligation and Not a Dependent:*** *If Alice from the prior example was not claimed as a dependent by her parents, she would be eligible to claim a deduction for the student loan interest she paid. Of course, if she had no income and wasn't required to file, or had to file but had no tax liability, Alice wouldn't get any benefit from the deduction.*

<u>NO DOUBLE BENEFIT</u>: No deduction is allowed under this provision for any amount for which a deduction is allowable under any other Code provision. *<u>If a deduction for interest on a loan for education expenses is allowable under another provision of the Code, apparently the taxpayer must claim the deduction under that provision even though it may be less advantageous to the taxpayer.</u>*

> ***Example – Home Equity Loan*** *- An example of a deduction allowable under another provision might be where a home equity loan is taken out to pay education expenses. However, if the election is made not to treat the loan as qualified home mortgage debt, and the home equity loan were taken out solely for the purpose of paying qualified education expenses, the interest on the loan should qualify for the student loan interest deduction. Note: For years 2018 through 2025 interest paid on home equity debt is generally not deductible for federal as Schedule A home mortgage interest unless the funds were used to make improvements to the home.*

If an individual takes out two separate education loans and the interest on one loan qualifies for deduction under Code § 221, while interest on the other loan qualifies for deduction under some other Code provision, presumably the individual can still take an above-the-line deduction for the maximum amount allowed by the higher education interest rules. The interest deductible under the other provision would not be taken into account in determining whether the maximum deduction allowed under § 221 rules is reached.

<u>NHSC LOAN REPAYMENT AWARDS ARE TAX EXEMPT</u>: The National Health Services Corps (NHSC) loan repayment program provides payment of student loans for participants who provide certain services in areas where shortages of these services exist. NHSC loan repayment awards are exempt from federal income taxes. Thus, individuals will qualify to exclude amounts they received to repay their student loans in exchange for two years serving in a NHSC approved service site.

<u>FORM 1098-E:</u> A financial institution, governmental unit, educational institution or any other person who, in the course of its trade or business, receives $600 or more of student loan interest during the year must file Form 1098-E with the IRS. A copy of it, or an acceptable substitute, must be provided to the borrower. Note, however, that the amount of the interest reported on Form 1098-E may not be fully deductible, or deductible at all.

Continue to next page for CA differences

CALIFORNIA DIFFERENCES

California conforms to the federal student interest deduction (with one exception for a spouse/RDP of a non-California domiciled military taxpayer residing in a community property state – see worksheet in the instructions to Schedule CA (540)).

New Law & Stuff

AB 91 (signed by the governor 6/27/2019) conforms California law to the TCJA provision that certain student loan debt cancelled upon the death or disability of the student is not taxable, effective for loans cancelled after December 31, 2018**. Note:** That means for 2018, CA did not conform.

California law (R&TC Sections 17131 and 17024.5) also exempts NHSC loan repayment awards from California income taxes.

NOTES

FOREIGN EARNED INCOME EXCLUSION

U.S. citizens or resident aliens of the United States who live abroad are taxed on their worldwide income. However, they may qualify under IRC § 911 to exclude from income foreign earnings not to exceed an annual maximum amount. In addition, taxpayers may be able to exclude or deduct certain foreign housing cost amounts.

- To qualify for this exclusion, a taxpayer must:
  - Have foreign earned income,
  - Have a "tax home" in a foreign country, and
  - Be one of the following:
    a. A U.S. citizen who is a ***bona fide resident*** of a foreign country for an uninterrupted period that includes an ***entire tax year***, or
    b. A U.S. resident alien who is a citizen or national of a country with which the United States has an income tax treaty in effect and who is a ***bona fide resident*** of a foreign country or countries for an uninterrupted period that includes an ***entire tax year***, or
    c. A U.S. citizen or a U.S. resident alien who is physically present in a foreign country or countries for at least ***330 full days during any period of 12 consecutive months***.
- **First/Last years** – Generally the first and last years qualify under the physically present rules.
- **Annual Exclusion Limit** – is inflation adjusted and is $105,900 for 2019.
- **Housing allowance limit** –The limit is the expense in excess of 16% of the exclusion amount for the year and capped at 30% of the taxpayer's exclusion amount for the year (higher cap if expenses incurred in designated high-cost location).
- **Taxpayer's other income** – taxed at marginal rates determined without the exclusion.
- **Earned income –** can be from a foreign or domestic company.
- **Spouse –** may qualify separately.
- **Credit Limitations –** Taxpayers that claim the foreign earned income exclusion are not eligible to claim the earned income tax credit (EITC) or the refundable part of the child tax credit.

Foreign Earned Income Exclusion — ClientWhys™

The Details

A U.S. citizen's or resident alien's worldwide income generally is subject to U.S. income tax regardless of where the taxpayer is living. However, taxpayers are allowed to exclude from their income a certain amount of foreign earned income and housing allowance if they meet certain requirements while living abroad. The following is a table of the annual limits for this exclusion for recent years followed by qualifications and exclusion computation details.

HISTORICAL EXCLUSION LIMITS

Tax Year	2015	2016	2017	2018	2019	2020
Maximum Exclusion	100,800	101,300	102,100	103,900	105,900	107,600
Housing Daily Base Amount	44.19	44.28(2)	44.76	45.55	46.42	47.04(2)
Housing Annual Base	16,128	16,208	16,336	16,624	16,944	17,216
Housing 30% Cap (1)	30,240	30,390	30,630	31,170	31,770	32,280
Max Housing Exclusion (3)	14,112	14,182	14,294	14,546	14,826	15,064
High Cost Area Listings – Notice #(3)	2015-33	2016-21	2017-21	2018-44	2019-24	

If any amount or Notice number is not shown, it is not available at publication date

The amounts shown (other than the Housing Daily Base Amt.) are for a full year. These amounts must be prorated by the day for taxpayers who only qualify for a partial year.

(1) The housing exclusion is capped at 30% of the earned income exclusion except in what is deemed to be high cost areas (see IRS tables found in the notices listed in the above table) in which case the cap is increased for the specific area. The base amount is equal to 16% of the annual exclusion amount.

(2) Leap Year (366 days)

(3) The IRS is authorized to adjust limitations for high cost areas. Please check the table in the applicable IRS notice before using the standard amounts listed above.

THE EXCLUSION AND MARGINAL TAX RATES

Prior to 2006, both the exclusion and the additional housing allowance where deducted off-the-top. In other words they were excluded at the taxpayer's top tax bracket. However beginning in 2006 the exclusion is taken off the bottom or at the taxpayer's lowest tax bracket leaving the taxpayer's other income to be taxed at the taxpayer's top marginal rates. Result: the taxpayer's "other" income is taxed at higher rates in post-2005 years. A worksheet for calculating the tax is provided in the current year instructions to Form 1040.

REQUIREMENTS TO CLAIM EXCLUSION/DEDUCTION

To claim the foreign earned income exclusion, the foreign housing exclusion, or the foreign housing deduction, a taxpayer must:

- Have foreign earned income,
- Have a "tax home" in a foreign country, and
- Be one of the following:
  a. A U.S. citizen who is a ***bona fide resident*** of a foreign country for an uninterrupted period that includes an ***entire tax year***, or
  b. A U.S. resident alien who is a citizen or national of a country with which the United States has an income tax treaty in effect and who is a ***bona fide resident*** of a foreign country or countries for an uninterrupted period that includes an ***entire tax year***, or
  c. A U.S. citizen or a U.S. resident alien who is physically present in a foreign country or countries for at least ***330 full days during any period of 12 consecutive months***.

TAX HOME

Tax home is the general area of a taxpayer's main place of work (as employee or self-employed), regardless of where the taxpayer maintains his/her family home. A taxpayer is not considered to have a tax home in a foreign country for any period in which his/her abode is in the U. S. "Abode" has been defined as one's home, habitation, residence, domicile, or place of dwelling. "Abode" has a domestic rather than a vocational meaning and does not mean the same thing as "tax home." The location of abode often depends on where a taxpayer has economic, family, and personal ties.

Example - Abode vs. Tax Home: *Ima Way is employed on an offshore oil rig in the territorial waters of a foreign country and works a 28-day on/28-day off schedule. She returns to her family home in the United States during off periods. Ima is considered to have an abode in the United States and does not satisfy the tax home test in the foreign country. She cannot claim either of the exclusions or the housing deduction.*

Exception **-** The Bipartisan Budget Act of 2018 changed the tax home requirement for contractors or employees of contractors supporting the U.S. Armed Forces in designated combat zones. These individuals may now qualify for the foreign earned income exclusion even if their "abode" is in the United States. The new law applies for tax year 2018 and subsequent years. See "Combat Zone Workers" below.

FOREIGN COUNTRY

The term foreign country usually means any territory (including the air space and territorial waters) under the sovereignty of a government other than that of the U. S. It doesn't include Puerto Rico, Guam, Commonwealth of the Northern Mariana Islands, Virgin Islands, or U.S. possessions such as American Samoa.

Cuba and Guantanamo Bay – Individuals working in Cuba in violation of U.S. travel restrictions are not eligible to exclude income earned in Cuba, housing expenses incurred in Cuba are not qualified housing expenses, and the time spent in Cuba cannot be used in determining if the bona fide residence or physical presence test is met. However, the IRS stated that the U.S. Naval Base at Guantanamo Bay is not located within a restricted country and that qualified individuals who are performing services at the U.S. Naval Base there are eligible for the income and housing exclusion under Code Sec. 911. *Notice 2006-84, 2006-41 IRB*

Seaman on Yacht - The Tax Court has concluded that taxpayers employed on a yacht that was operated primarily in foreign territorial waters met the foreign physical presence requirement and could claim the foreign earned income exclusion under Code Sec. 911 (Form 2555). (*Myron and Thelma Struck, TC Memo 2007-42)*

Workers in Antarctica – The Tax Court agreed with the IRS that for purposes of the Sec. 911 exclusion, Antarctica is not a foreign country *(Dave Arnett v Commissioner, 126 TC No. 5).* Even though Antarctica has been held to be a foreign country in cases involving tort action and labor laws, the Court said that the authority given by Congress to the Treasury secretary to issue regulations prevails for purposes of tax law. Reg. § 1.911-2(h) defines a foreign country for purposes of the foreign income exclusion as "any territory under the sovereignty of a government other than that of the United States." Antarctica operates under an international treaty to which the U.S. is a party. The Tax Court's decision was upheld by the U.S. Court of Appeals (*Arnett v. Comm'r*, 473 F.3d 790 (7th Cir. 2007)).

BONA FIDE RESIDENCE

Determine bona fide residence based on facts of each individual case. The IRS considers intent and nature of the trip and its length. The Tax Court has adopted a general set of factors, which are frequently used to help determine bona fide residency:

- Intention as to the duration of the foreign residence;
- Assimilation into the foreign country;
- Payment of foreign taxes;
- Status as resident of the foreign country;
- Establishment of a foreign home;
- Nature and extent of absences from the foreign country;
- Employer's view of taxpayer's status;
- Location of family;
- Good faith intentions of the taxpayer;
- Nontransient nature of stay in the foreign country.

The taxpayer must reside in a foreign country for an uninterrupted period that includes an entire tax year. However, once the taxpayer has met the uninterrupted period qualification, he/she will qualify as a bona fide resident for the period starting with the date actual residence began and ending with the date of abandonment of the foreign residence. Temporary trips to the U.S. are acceptable.

Waiver of Minimum Time Requirements - Minimum time requirement can be waived if a taxpayer must leave the foreign country due to war, civil unrest, or other adverse conditions. In the first quarter of each year the IRS provides a list of affected countries for the prior tax year and only countries included on that list qualify. In addition, the taxpayer must be residing in the country at the time the event occurs. Rev Proc 2019-15 includes the 2018 additions to the list of adverse-condition countries and supplements Rev Proc 2018-32, which supplemented Rev Proc 2017-26.

PHYSICAL PRESENCE TEST

Taxpayer must be physically present in a foreign country ***330 full days (a day being defined as a 24-hour period which begins at midnight, not counting time over international waters) during a consecutive 12-month period***. **Exception:** The full 330-day requirement is waived if the taxpayer must leave the country due to war, civil unrest or adverse conditions, as explained in the immediately preceding paragraph.

> ***Example:*** *Flying Hi left the U.S. on June 10, arriving in France at 9:00 a.m. on June 11. Hi's first full day in France is June 12.*

The 12-month period can start with any day of any calendar month, ending the day before the same calendar day 12 months later.

__Example:__ Tymand Munee worked in Germany over 20 months starting January 1, 2018 through August 31, 2019. He spends February 2018 and February 2019 on vacation with relatives in Dallas, Texas. Munee is present in Germany for the following two 12-month periods.

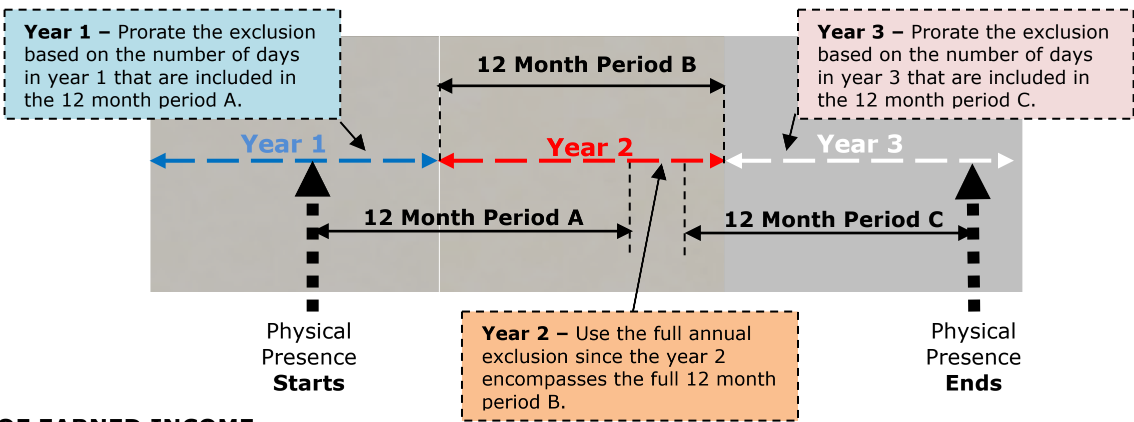
January 1, 2018 through December 31, 2018
September 1, 2018 through August 31, 2019

By overlapping the 12-month periods this way, Munee meets the physical presence test for his entire stay in Germany.

FIGURING THE 12-MONTH PERIOD

There are four rules to remember...

1. The 12-month period can begin with any day of the month. It ends the day before the same calendar day, 12 months later.
2. The 12-month period must be made up of consecutive months. ***Any*** 12-month period can be used if the 330 days in a foreign country fall within that period.
3. Choose the 12-month period that gives the greatest exclusion.
4. ***Any*** 12-month period can overlap another.



SOURCE OF EARNED INCOME

Earned income subject to exclusion includes salaries, wages, commissions, bonuses, professional fees and tips. Earned income also includes allowances or reimbursements for cost of living, overseas differential, family, education, home leave, quarters, and certain moving expenses. Income received for work in a foreign country, is considered as from a foreign source, even if it is paid by an employer located in the U.S.

Foreign earned income doesn't include:

1. Any amounts paid by the U.S. government or its agencies to its employees.
2. Previously excluded value of meals and lodging furnished for the convenience of the taxpayer's employer.
3. Pension or annuity payments, including social security benefits.
4. Amounts included in a taxpayer's income because of an employer's contributions to a nonexempt employee trust or to a nonqualified annuity contract.
5. Recaptured unallowable moving expenses.
6. Payments received after the end of the tax year following the tax year in which the services were performed to earn the income.

Both spouses have foreign earnings - If both taxpayer and spouse qualify, each can choose the foreign earned income exclusion. The maximum exclusion applies individually to the earnings of a husband and wife. Ignore any community property laws when figuring the limit on the exclusion.

Work in one year, paid in next year - If a taxpayer performs services one year but does not get paid for them until the following year, the income is generally considered earned in the year the services are performed. For cash basis taxpayers, report the income on the return for the year it is received.

PART-YEAR EXCLUSION ADJUSTMENT

If a taxpayer qualifies under either the bona fide residence test or the physical presence test for only part of the tax year, he/she must adjust the maximum limit based on the number of qualifying days in the tax year. The number of qualifying days is the number of days within the period in which the taxpayer both has a tax home in a foreign country and meets either test.

FOREIGN HOUSING EXCLUSION OR DEDUCTION

When a taxpayer qualifies for the foreign earned income exclusion under either the bona fide residence or physical presence tests, he/she can also claim an *exclusion or a deduction* from gross income for housing expenses.

The ***housing exclusion*** applies only to amounts considered paid for with employer-provided amounts. The ***housing deduction*** applies only to amounts paid for with self-employment earnings. With the exception of higher-cost locations (see "higher caps for high-cost locations" below), **the housing amount is the** *total of a taxpayer's housing expenses* **for the year** *minus a base amount*. **The base amount is:**

- 16% of the annual exclusion limitation amount.

Housing Exclusion Cap - The housing exclusion is limited to 30% of the taxpayer's earned income exclusion for the year less the base amount. Thus, for 2019, the maximum housing allowance exclusion is $14,826 ((105,900 x .30) – (105,900 x .16))

> ***Example:*** *Bill Howser qualified for the foreign earned income exclusion under the physical presence test for all of 2019. During the year, he spent $26,400 for housing. Bill's housing amount is the lesser of the deduction cap of $14,826 or $9,456 ($26,400 less 16,944*). Thus the deduction is $9,456.*
>
> **$16,944 = 105,900 x .16*

Higher Caps for High-Cost Locations – The Code allows the 30% cap amount to be replaced by higher amounts based on geographic differences in housing costs relative to housing costs in the U.S. Accordingly, Notice 2019-24 identifies locations within countries with high housing costs and provides an adjusted limitation on housing expenses to be used for these localities for tax year 2019. The annual notice and updated table is available on the IRS website; at: https://www.irs.gov/pub/irs-drop/n-19-24.pdf.

Housing expenses include - reasonable expenses paid or incurred for housing in a foreign country for taxpayer, spouse and dependents. These include rent, the fair rental value of housing provided in kind by an employer, and other expenses for housing. Other expenses include repairs, utilities (other than telephone charges), real and personal property insurance, nondeductible occupancy taxes, nonrefundable fees for securing a leasehold, rental (but not the purchase) of furniture and accessories, and residential parking.

Housing expenses ***do not*** include expenses that are lavish or extravagant under the circumstances. They also do not include deductible interest and taxes (including deductible interest and taxes of a tenant) or the costs of buying property, including principal payments on a mortgage. Nor do they include the cost of domestic labor (maids, gardeners, etc.), pay television subscriptions, improvements and other expenses.

> ***Caution!***
>
> ***No double benefit.*** *A taxpayer can't include in housing expenses any amounts that were excluded from gross income as meals or lodging for the convenience of an employer or that were deducted as moving expenses. Note: The TCJA removed the moving expense deduction other than for armed forces members as the move relates to a permanent change of station for years 2018-2025. Armed Forces members aren't eligible to claim a Sec 911 exclusion.*

Foreign Housing Exclusion - If a taxpayer has no self-employment income, the entire housing amount is considered paid for with employer-provided amounts. This means that it can be entirely excluded (up to the limits).

Employer-provided amounts include any amounts paid to a taxpayer by his/her employer that are taxable foreign earned income (without regard to the foreign earned income exclusion) for the tax year. This could include:

a. Salary,
b. Any reimbursement for housing expenses,
c. Amounts the employer pays to a third party for the employee's housing,
d. The fair rental value of company-owned housing furnished to the employee, unless that value is excluded from the employee's income because it is provided for the employer's convenience,
e. Amounts paid by the employer as part of a tax equalization plan, and
f. Amounts paid to the employee or a third party by the employer for the education of the employee's dependents.

If a taxpayer chooses the housing exclusion, he/she must figure it out before determining the foreign earned income exclusion. He/she cannot claim less than the full amount of the housing exclusion to which he/she is entitled.

> ***Caution!***
>
> *Once a taxpayer chooses to exclude either foreign earned income or foreign housing costs, he/she cannot take a foreign tax credit for taxes on income which is excluded.*

Foreign Housing Deduction **-** If a taxpayer has no self-employment income, he/she can't take a foreign housing deduction. How the housing deduction is figured depends on whether the taxpayer has only self-employment income or both self-employment income and employer-provided income. In either case, the amount to deduct is subject to these limits:

a. ***Self-employed -- no employer-provided amounts*** **-** If none of the housing amount includes employer-provided amounts, the housing amount, subject to the limit below, is deducted in figuring adjusted gross income. Claim the deduction by including it in the total on the appropriate line of Form 1040 (draft 2019 Schedule 1, line 22) and write "Form 2555" on the dotted line next to line 22.

b. ***Self-employed and employer-provided amounts*** **-** If a taxpayer is both an employee and a self-employed individual during the year, deduct part of the housing amount and exclude part of it. To find the part that qualifies as a housing exclusion, multiply the housing amount by the employer-provided amounts and then divide the result by the taxpayer's foreign earned income. The balance of the housing amount can be deducted (but the deduction can't be more than the taxpayer's foreign earned income less the total of: (1) The taxpayer's foreign earned income exclusion, plus (2) His/her housing exclusion, if any).

c. Carry over to the next year any part of the housing deduction that is not allowed because of the limits. Carryover is allowed to the next year only. If the taxpayer can't deduct it in the next year, it can't be carried over to any other year.

SPECIAL SITUATIONS

International Airspace — Flight Attendants - Married U.S. citizens/Taiwan residents were denied full Code Sec. 911 income exclusion for the total amount of wages the wife earned while working as an international flight attendant based out of Hong Kong International Airport: to the extent wages were attributable to time the wife was working in international airspace, they didn't qualify as foreign earned income eligible for Code Sec. 911 exclusion. The Tax Court recalculated the excludible amount, upholding with minor adjustments IRS's determination of wage percentage attributable to time the wife was working in or over foreign countries vs. international airspace.

Also, taxpayers were required to include pre-flight and post-flight service time and allocate sick and vacation leave between excludible and non-excludible portions of the wife's income. (William D. Rogers, et ux. v. Commissioner, (2009) TC Memo 2009-111; affirmed by CA Dist of Columbia 4/17/2015)

Combat Zone Workers - Certain U.S. citizens or resident aliens, specifically contractors or employees of contractors supporting the U.S. Armed Forces in designated combat zones, may now qualify for the foreign earned income exclusion. The Bipartisan Budget Act of 2018 changed the tax home requirement for eligible taxpayers, enabling them to claim the foreign earned income exclusion even if their "abode" is in the United States. Effective for tax year 2018 and subsequent years.

Under prior law, many otherwise eligible taxpayers who lived and worked in designated combat zones failed to qualify because they had an abode in the United States. The new law makes it clear that contractors or employees of contractors providing support to U.S. Armed Forces in designated combat zones are eligible to claim the foreign earned income exclusion if they otherwise qualify.
This means that these taxpayers, if eligible, will be able to claim the foreign earned income exclusion on their income tax return beginning in 2018 if they meet the bona fide residence test or the physical presence test. The rule that the foreign earned income exclusion is not available to federal employees or members of the military is unchanged by this law revision (see pages 13 and 14 of the 2018 Pub 54).

Also see Chief Counsel memorandum AM2009-003 - https://www.irs.gov/pub/irs-utl/am2009003.pdf

Married Couples Living Apart - Special rules apply if taxpayer and spouse live apart and maintain separate households. Both may be able to claim the foreign housing exclusion or the foreign housing deduction. This can be done if the spouses have different tax homes that are not within reasonable commuting distance of each other. Otherwise, one spouse only can exclude or deduct a housing amount.

Tax Credits Denied

EITC - Taxpayers that claim the benefit of the foreign earned income exclusion are not eligible to claim the earned income tax credit (EITC). (Sec 32(c)(1)(C))

Refundable Child Tax Credit - Effective for tax years beginning after December 31, 2014, a taxpayer who elects to exclude from gross income any amount of foreign earned income or foreign housing costs is prohibited for that year from claiming the refundable part of the child tax credit. (Sec 24(d)(5) as added by the Trade Preferences Extension Act)

IRA Contributions – A taxpayer who excludes foreign earned income from gross income under Sec 911 may not make an IRA contribution based upon the excluded compensation (Prop. Reg. §1.219(a)-1(b)(3)).

Reelection of IRC §911 exclusion allowed — Once revoked, the election may not be made again by a taxpayer until the sixth taxable year after the year in which the revocation was made (Sec 911(e)(2)). However, reelection may be made earlier than the sixth year if the taxpayer requests reelection via a letter-ruling request (Reg Sec 1.911-7(b)(2)). Relevant facts and circumstances to allow the reelection may include: a period of United States residence, a move from one foreign country to another foreign country with differing tax rates, a substantial change in tax laws of the foreign country of residence or physical presence, and a change of employer.

FORM 2555 Form 2555 is used to claim the foreign earned income exclusion plus the foreign housing exclusion or deduction, if applicable. The computed exclusion amount is carried from Form 2555 to the other income line of the tax return (draft 2019, line 8, Schedule 1) and entered as a negative amount. The IRS has phased out Form 2555-EZ, which is no longer available for use after 2018.

EXTENSION

If the bona fide residence or physical presence tests aren't met before the due date of a taxpayer's tax return, file *Form 2350* with the IRS at the address below by the due date (June 15 if both the tax home and abode are outside the U.S. and Puerto Rico on 4/15) for filing the return. This grants an extension to a date after the taxpayer expects to meet the time requirements. File the extension with:

Department of the Treasury
Internal Revenue Service Center,
Austin, TX 73301-0045

TREATMENT OF FOREIGN EARNINGS FOR SOCIAL SECURITY PURPOSES

Under international social security agreements, the general rule is that an employee who would otherwise be covered by both the U.S. and a foreign social security system is subject exclusively to the coverage laws of the country in which the employee is working. However, under an exception (called the "detached worker exception"), a person who is temporarily transferred to work for the same employer in another country remains covered only by the country from which he or she has been sent.

In U.S. agreements, this detached worker rule generally applies only if the employee's assignment to another country is expected to last 5 years or less. If the transferred employee works for a foreign affiliate of its U.S. employer, the U.S. employer may enter into a Code Sec. 3121(l) agreement with the U.S. Treasury Department with respect to the foreign affiliate to extend coverage of the U.S. Social Security system to services performed outside the U.S. by its U.S. citizen or resident employees. Under this voluntary agreement, the U.S. employer pays an amount equivalent to both the employee and employer's shares of FICA on the wages paid for services covered by the agreement.

However, in a Chief Counsel Advisory the IRS concluded that where a U.S. citizen was permanently transferred to work in a foreign country by his U.S. employer, the U.S. citizen's wages were only subject to the foreign social security taxes and should not be subject to U.S. social security taxes, even if a Code Sec. 3121(l) agreement was entered into with respect to the worker. The reasoning for this position is that the detached worker rule only applies if the employee was transferred to work in a foreign country for five years or less. (CCA 201214023)

CALIFORNIA DIFFERENCES

California does not have an equivalent to the Federal foreign income exclusion provision. Residents of California are taxed on ALL income, including income from sources outside California; the key is whether or not the taxpayer is a resident.

A safe harbor is available for certain individuals leaving California under employment-related contracts. The ***safe harbor*** provides that an individual domiciled in California who is ***outside California under an employment-related contract for at least 546 consecutive days (18 months) will be considered a nonresident*** unless:

- The individual has intangible income exceeding $200,000 in any taxable year during which the employment-related contract is in effect; or
- The principal purpose of the absence from California is to avoid personal income tax.

CAUTION: The safe harbor only applies to employment related income. Thus, other non-exempt CA source income would continue to be taxable to CA as a non-resident, except for CA source pension income, which is not taxable to CA when received by a non-resident (see page 4.01.08).

Spouse Issues: The spouse of the individual covered by this safe harbor rule will also be considered a nonresident while accompanying the individual outside California for at least 546 consecutive days. Return visits to California that in the aggregate do not exceed 45 days during any taxable year covered by the employment contract are considered temporary. However, if the spouse of the taxpayer who meets the safe harbor rule does not also meet the safe harbor rule (e.g., remains in California), then he or she would continue to be a California resident, and generally 50% of the taxpayer's income would not meet the safe harbor and would be taxable to CA. FTB Pub 1031, page 3 includes examples of this situation filing both jointly and separately.

Individuals not covered by this safe harbor must determine their residency status based on their facts and circumstances. The determination of residency status cannot be solely based on an individual's occupation, business, or vocation. Instead, all activities must be considered in the determination of residency status.

California Residents: Taxpayers, who by the facts and circumstances are determined to be California residents, may be able to deduct away-from-home business related travel expenses (for travel, meals, and lodging) on their California tax return while earning income in a foreign country.

NOTES

U.S. SAVINGS BONDS EDUCATION EXCLUSION

Overview

- **Issue:** Series EE or I Bonds issued after 1989
- **Purchaser:** Must be purchased by an individual over the age of 24
- **Exclusion =** $\dfrac{\text{Qualified expenses paid}}{\text{Total redemption proceeds}}$ X Interest
- **2019 AGI Phase-out**
  - **Joint:** $121,600 to $151,600
  - **Unmarried:** $81,100 to $96,100
- No Double Benefit
- Used for Expenses of Education for **Taxpayer, spouse or dependent** at the time the bonds are cashed.
- Applies to Post-Secondary Education Only

Pubs Forms

Related IRS IRC, Publications and Forms

- **Pub 970** – Tax Benefits for Education
- **Form 8815** - Exclusion of Interest From Series EE and I U.S. Savings Bonds Issued After 1989
- **Form 8818 –** Optional Form to Record Redemption of Series EE and I U.S. Savings Bonds Issued after 1989 (for Individual with Qualified Higher Education Expenses)
- **IRC Sec 135**

The Details

An individual who pays qualified higher education expenses with redemption proceeds from Series EE or I bonds issued after '89 can potentially exclude from income the bond interest. No exclusion is available to a taxpayer using the married filing separate filing status. Form 8815 is used to compute the exclusion. Form 8818 may be used to keep a record of such bonds.

If the taxpayer's total redemption proceeds (principal plus interest) for a tax year exceeds the qualified expenses paid in that year for the taxpayer, spouse or dependent, the amount of interest that is excludable is limited to a fraction of the otherwise excludable portion:

$$\frac{\textbf{Qualified expenses paid}}{\textbf{Total redemption proceeds}}$$

Example: *Greg redeemed $10,000 ($5,000 interest, $5,000 principal) and paid qualifying college expenses of $6,000. The fraction of expenses to redemption amounts is 60%. This means that $3,000 of the interest ($5,000 x .60) is excludable from income. Of course, the principal amount, $5,000, is also excludable.*

ALERT

You may want to advise clients who are depending on the proceeds from savings bonds to pay education expenses to plan well ahead for cashing in their paper-issued bonds as it may take longer than they expect to cash in the bonds. While it used to be common for banks to offer the service of cashing in paper U.S. savings bonds, fewer are doing so now. So clients planning to take their bonds to a local bank should check with the financial institution beforehand to see whether it redeems savings bonds. If it does, there could be a dollar limit per transaction (necessitating several trips to the bank), and the bank will likely require identification, so the client should find out what documents are needed. Some institutions require having an active account open for at least six months, plus proper identification. An alternative for those unable to find a local institution to cash the bonds is to mail them to the U.S. Treasury for redemption. See the treasurydirect.gov web site for further information and mailing instructions.

US Bonds Education Exclusion — ClientWhys™

QUALIFYING BONDS:

The bonds must meet the following requirements for the exclusion to apply:

- They must be purchased by an individual over age 24.
- The purchaser must be the sole owner (or joint owner with spouse).
- The owner may designate a beneficiary for the bonds without losing the exclusion.
- A phase out applies for a taxpayer with "modified AGI" that exceeds the amount shown in the following table.

Filing Status	2015	2016	2017	2018	2019	2020
Unmarried Filing Status (15K)						
Phase Out Begins	77,200	77,550	78,150	79,550	81,100	82,350
Totally Phased Out	92,200	92,550	93,150	94,550	96,100	97,350
Joint Filing Status (30K)						
Phase Out Begins	115,750	116,300	117,250	119,300	121,600	123,550
Totally Phased Out	145,750	146,300	147,250	149,300	151,600	153,550

If any amount is not shown, it is not available at publication date

MODIFIED AGI:

This is AGI determined without this savings bond interest exclusion or Code Sections 911, 931 and 933 exclusions (i.e., the foreign income and housing exclusions and possessions' income exclusions), the exclusion for employer provided adoption assistance, the deduction for qualified higher education tuition and fees (in years this deduction is available), the student loan interest deduction, the domestic production activities deduction (repealed for years after 2017), and after application of Code Section 86 (taxation of social security), Code Section 469 (limits on passive losses) and Code Section 219 (deduction for IRAs).

QUALIFYING EDUCATION EXPENSES:

Qualified higher education expenses for purposes of this exclusion include tuition and fees paid to a higher education institution and contributions to a Coverdell Education Savings Account or a Qualified Tuition Program (Sec 529 plans) for the taxpayer, spouse or dependent. Qualified expenses do not include expenses for room and board or courses involving sports, games, or hobbies that are not part of a degree or certificate granting program.

EXPENSE REDUCTION:

The amount of qualified higher education expenses used in determining the exclusion allowed under the rules for U.S. savings bonds for education must be reduced by:

- The amount of those expenses that are used in determining the American Opportunity and Lifetime Learning Credits;
- Scholarships and fellowships;
- The expenses used to figure the tax-free portion of distributions from a Coverdell ESA or a Qualified Tuition Plan;
- VA education benefits;
- Employer-provided education assistance payments; and
- Qualified tuition reduction amounts.

Reduction is **not** required for gifts and inheritances.

CALIFORNIA DIFFERENCES

California conforms to Federal treatment.

NOTES

WORKER'S COMPENSATION

- Exclusion from income is allowed for payments made under worker's compensation (WC) or a plan "in the nature of worker's compensation". *(IRC Sec 104(a)(1))*
- **Excludable or Not?**
  - Compensation for occupational personal injury or sickness - **YES**
  - Compensation based on employee's age or length of service - **NO**

Strategy - It is not uncommon for protective services personnel benefits to first be paid as retirement payments and then subsequently after board hearings, legal action, etc., be ruled as worker's compensation. Generally in those cases the retirement income is repaid and worker's compensation paid. The repayment of the retirement benefit paid in a prior year gives rise to a "claim of right" deduction or credit (see chapter 9.05).

To be excludable as worker's compensation (WC), the payments must be paid to compensate for occupational personal injury or sickness. However, if the payments are computed and paid using the employee's age or length of service, they <u>are not</u> excludable. Payments which compensate for medical expenses which had formerly been deducted must be included in gross income. Even WC payments made to the survivors of an employee can be excluded from income.

The exclusion doesn't apply to job-related payments that exceed the amounts provided in the applicable WC act. However, excess payments are excludable, if they are received under a special law providing for special payments supplemental to WC.

A "worker's compensation act" provides fixed awards to employees (or their dependents) for employment-related accidents or illness, regardless of fault. To qualify as "in the nature of WC" an act must pay benefits only for job-related injuries or sickness cases.

<u>DETERMINING WHICH PAYMENTS QUALIFY</u>

Certain payments may seem like WC, but in reality are not. For example, ***Morris, (1987) TC Memo 1987-7, 87007*** said that payments to a disabled worker while performing light duty were not excludable--they are considered regular salary. In another case ***(Blackburn, (1950) 15 TC 336),*** continuation of a highway patrolman's salary was compensation for the hazardous nature of his work, not for his injury--the compensation was taxable. ***Pagliano (1994) TC Memo 1994-506*** found that interest on a WC award to compensate for delay of payment was not excludable. However, in another case, ***(Brabson)*** a District Court (Colorado) ruled that prejudgment interest was tied to the concept of fault, and therefore, was excludable as part of damages. The Tenth Circuit Court of Appeals reversed this decision. ***(Brabson, (CA10 1/11/96))***

When benefits are computed based on an employee's length of service or age rather than on injury, they are not excludable. A firefighter's disability pension that converted to normal retirement benefits after 25 years of service lost its character as WC at the time of conversion. Reason: At that time, the payments were based on length of service and were considered retirement benefits. **(*Wiedmater* (1984) TC Memo 1987-540) and *Picard v. Comm. (CA9, 1/26/99) 83 AFTR 2d 99-616***

The Tax Court properly determined that disability retirement payments received by a former county sheriff's department employee who retired with "service-connected" disability didn't qualify for Code Sec. 104(a)(1) income exclusion to the extent the payments exceeded the amount he would have received based solely on disability. Although California's statute authorizing payments was in the nature of a workmen's compensation act, the amount in dispute/"additional amount" was determined by length of service and thus subject to tax under Reg. § 1.104-1(b)'s limitation. (Sewards v. Comm., CA 9, 115 AFTR 2d ¶2015-733)

QDRO Payments - In a private letter ruling (PLR), IRS has concluded that, where a plan for state employees qualifies as a workmen's compensation plan for federal tax purposes, a payment from the plan, that is made pursuant to a domestic relations order to the ex-spouse of a state employee who was disabled on the job, does not qualify for exclusion from gross income (PLR 201521009).

California conforms to the Federal treatment. Where the payments are made from the State Employees' Retirement System (PERS), no 1099R will be issued for the excludable amounts. Generally, if there is a 1099 issued, the income is taxable.

NONE

EDUCATOR'S ABOVE-THE-LINE DEDUCTION

Overview

- **Maximum Deduction**: $250 (2019)
- **Expenses:** Otherwise allowable trade or business expenses (Code Sec 162).
- **Qualified Teacher, Principal, Counselor, Aide:** Kindergarten through Grade 12
- **Minimum Annual Qualifying Hours:** 900
- **Employee Business Expense:** Page 6.07.02
- **Charitable Deduction:** Page 6.07.02

Pubs Forms

- **Related IRS Publications and Forms**
  - **Pub 970** – Tax Benefits for Education
  - **IRC Sec 62(a) and (d)**

RAPID FINDER

ABOVE THE LINE DEDUCTION

The Details

The deduction is limited to the amounts indicated in the table below (inflation adjusted after 2015).

Year	Years thru 2018	2019	2020
Maximum Allowed	$250	$250	$250

If amount not shown it was not available at press time

Qualified Expenses - Qualified expenses are generally otherwise allowable Code Sec. 162 trade or business expenses paid or incurred by the eligible educator that were not reimbursed. The following fall under that category:

- Books,
- Supplies (other than nonathletic supplies for courses of instruction in health or physical education),
- Computer equipment (including related software and services) and other equipment,
- Supplementary materials used by the eligible educator in the classroom, and
- Professional development expenses incurred after 2015 (added by the PATH Act of 2015). These courses must be related to the curriculum in which the educator provides instruction or to the students for which the educator provides instruction.

Eligible Educator - An eligible educator is, with respect to any tax year, an individual who is a kindergarten through grade 12:

- Teacher,
- Instructor,
- Counselor,
- Principal, or
- Aide

Who works in a school for ***at least 900 hours*** during a school year. For this purpose, a school is any school that provides elementary education or secondary education (kindergarten through grade 12), as determined under state law. ***Educators who retire mid-year, who start work in the fall term, or substitute teachers may not meet the 900 hours test.***

Example – *During the tax year, Mary, a 5th grade teacher, worked over 900 hours and spent $200 on classroom supplies that would otherwise be deductible as an employee business expense were it not for the TCJA suspension of tier 2 miscellaneous deductions in years 2018-2025. She received no reimbursement for the materials. Mary can take a $200 AGI deduction on her tax return.*

Example *– Pamela, a kindergarten teacher, retired at the end of the school year in June of the tax year. Pamela worked 8 hours per school day but after accounting for holidays and spring break vacation, she only worked 108 days, for a total of 864 hours during the tax year. She is not eligible to claim the above-the-line deduction for the $225 of classroom supplies she purchased. However, if Pamela retired in a year other than 2018 through 2025 and she itemizes deductions for that year, she may claim them as a business expense, subject to the 2%-of-AGI limitation.*

Example – *During the year, Jack, an 8th grade teacher, had unreimbursed expenses of $800, consisting of the following: $200 for books, and $600 for supplemental materials that were consumed by his class. He worked as a teacher for more than 900 hours. Jack can take a $250 AGI deduction on his tax return. Because Schedule A tier 2 miscellaneous deductions are suspended in 2018-2025, he cannot deduct the balance of the expenses as an itemized deduction. However, if Jack works for a public school and can get his principal to provide him with a contribution receipt, Jack may take the remainder as a noncash contribution to a Governmental Body.*

Limitation - The classroom expense deduction is allowed for expenses only to the extent the amount of those expenses exceeds the amount excludable for the tax year under:

- Higher Education Savings Bond Redemptions - Code Sec. 135
- Qualified State Tuition Program Distributions - Code Sec. 529(c)(1)
- Coverdell Education Savings Account Distribution - Code Sec. 530(d)(2)

OTHER OPTIONS

What are the options for teachers who spend more than $250 on classroom supplies or for teachers and other qualified individuals who do not meet the 900-hour test or other requirements to deduct the $250 above the line? When eligible, teachers should always claim the above-the-line deduction first; then, they should consider the following for the excess. This advice may also help their ineligible colleagues.

Employee Business Expense – One option for years before 2018 and after 2025 is to claim classroom supplies beyond the $250 deduction as employee business expenses on Form 2106. However, employee business expenses are tier 2 miscellaneous itemized deductions, so the expenses might get wiped out or substantially limited by the required reduction equal to 2% of AGI. If the taxpayer is subject to the AMT, employee business expenses are not allowed at all. **Caution:** Employee business expenses must be a condition of employment verified in writing by the employer; this may be difficult to obtain.

Charitable Contribution – Another option would be to claim the expenses as a charitable contribution.

Code Sec. 170(c)(1)) For the purposes of this section, the term "charitable contribution" means a contribution or gift to or for the use of a State, a possession of the United States, or any political subdivision of any of the foregoing, or the United States or the District of Columbia, but only if the contribution or gift is made for exclusively public purposes.

Since public schools are part of a political subdivision of a state, any contribution, whether cash or goods, to the school would be a charitable contribution.

Therefore, a teacher's classroom supplies, if the teacher properly documents them and the school provides a written acknowledgment, would qualify as a noncash charitable contribution. **Caution:** Supplies or equipment that the teacher retains would not be considered a completed gift, and their cost would not qualify as a charitable contribution. For example, if a science teacher purchases a microscope that students use in the classroom but keeps it for personal use when the school year ends, the cost of the microscope would not be deductible as a charitable contribution.

To meet the requirements for noncash contributions, the teacher claiming a contribution to the school must obtain and keep an acknowledgment from the school; the contents of this acknowledgement are based upon the value of the contribution claimed, as explained in chapter 7.08. The acknowledgment must be in the taxpayer's possession before filing the return for the year the contribution was made or before the due date, including extensions, for filing that return—whichever is earlier. See Chapter 7.08 for charitable documentation requirements.

CALIFORNIA DIFFERENCES

California has no similar above-the-line deduction so a Schedule CA adjustment for arriving at AGI is required. However, the amount California doesn't allow may qualify as an employee business expense (miscellaneous itemized deduction) for California, requiring a second adjustment on Sch CA.

NOTES

STANDARD DEDUCTION & PHASE-OUTS

STANDARD DEDUCTION: Except for years 2018 through 2025, to determine taxable income, taxpayers subtract itemized deductions – or a standard deduction, if not itemizing – and exemption allowances from AGI.

Taxable Income Redefined - For years 2018 through 2025 the TCJA substantially increased the standard deduction amounts but suspended the exemption deductions. The TCJA also added the Sec 199A deduction for flow-through businesses (see chapter 3.24), so taxable income for 2018 through 2025 is defined as AGI minus either the standard deduction or the itemized deductions and minus the 199A deduction.

Filing Requirements – TCJA's suspension of exemption allowances also altered the income-based filing requirement. For years 2018-2025 an individual is required to file a federal return if their gross income exceeds their standard deduction amount. ***Exception***: Taxpayers filing married separate status are required to file if their gross income is $5 or more.

The standard deduction consists of a filing status-based basic amount and additional amounts for elderly and blind filers (and their spouses). The additional amounts do not apply to dependents. The amounts are annually adjusted for inflation.

	Tax Year	2015	2016	2017	2018	2019	2020
Basic Amount	Joint & Surviving Spouse	12,600	12,600	12,700	24,000	24,400	24,800
	Head of Household	9,250	9,300	9,350	18,000	18,350	18,650
	Single	6,300	6,300	6,350	12,000	12,200	12,400
	Married Filing Separately	6,300	6,300	6,350	12,000	12,200	12,400
Additional	Joint & Surviving Spouse	1,250	1,250	1,250	1,300	1,300	1,300
	Others	1,550	1,550	1,550	1,600	1,650	1,650

If any amount is not shown, it is not available at publication date

ADDITIONAL STANDARD DEDUCTIONS

The additional standard deductions apply to both the taxpayer and the spouse, but not dependents. Thus, if both spouses were blind they would be entitled to twice the blind amount.

Blind - To claim the additional amount for blind, a taxpayer must be blind or partially blind on the last day of the year. Partial blindness is defined as:

1) Cannot see better than 20/200 in the better eye with glasses or contact lenses, or
2) A field of vision that is not more than 20 degrees.

Elderly **-** To claim the additional amount for elderly, a taxpayer must have attained the age of 65 on the last day of the tax year. **Note:** A taxpayer is considered 65 on the day before his/her 65th birthday. Therefore, if the taxpayer (spouse) was born on 1/1/1955, the elderly addition applies for 2019.

STANDARD DEDUCTION FOR DEPENDENTS

A dependent filing their own return uses the greater of the base amount, or their earned income plus an additional amount, but the total cannot exceed the regular standard deduction for the dependent's filing status.

Tax Year	2015	2016	2017	2018	2019	2020
Base Amount	1,050	1,050	1,050	1,050	1,100	1,100
Additional Amount	350	350	350	350	350	350

If any amount is not shown, it is not available at publication date

OTHER ISSUES

Zero Deductions - The following individual taxpayers have a standard deduction of zero:

- Taxpayers who are married, file MS returns, and either spouse itemizes deductions;
- Nonresident aliens (including dual status aliens, *Rev Rul 74-239, 1974-1 CB 372)*; and
- Taxpayers filing short-year returns because of a change in accounting period. (IRC 63(c)(6))

Election to Change - Taxpayers, who file returns using the standard deduction, may later change their minds and itemize their deductions and vice versa. Any change must be consistent with the rules for married separate taxpayers. Amended returns to claim a refund must be filed within the statute of limitations period.

Strategies

AMT and Itemizing - For AMT purposes, the standard deduction is not allowed. In such cases it may be appropriate to force itemized deductions, which are partially allowed for AMT. See chapter 8.00 for details of this tax saving strategy.

CALIFORNIA DIFFERENCES

Prior to 2018, a taxpayer who does not itemize deductions on the Federal income tax return may itemize deductions on their California return, but must first complete a Federal Schedule A, then make the appropriate adjustments on Schedule CA.

For 2018 through 2025 CA is not expected to conform to any of the federal changes for itemized deductions. At press time the CA legislature had passed and the Governor signed AB 91 conforming some mostly business provisions to TCJA. However, none of those changes impacted CA itemized deductions which continue as they were before TCJA.

California does not increase its standard deduction for elderly or blind taxpayers but does allow additional exemption credits for these situations (see chapter 1.03). For dependents of another, California follows Federal law.

CALIFORNIA STANDARD DEDUCTIONS						
Tax Year	**2014**	**2015**	**2016**	**2017**	**2018**	**2019**
Joint, HH and SS	7,984	8,088	8,258	8,472	8,802	
Single and MFS	3,992	4,044	4,129	4,326	4,401	
Dependent Minimum	1,000	1,050	1,050	1,050	1,050	

If any amount is not shown, it is not available at publication date.
CA does not publish the current year rates until in the fall of the year.

PHASE-OUT OF ITEMIZED DEDUCTIONS

(Pease Limitation)

Overview

High Income Itemized Deduction Phase-Out:

- **Reduction** – 3% of the AGI in excess of the AGI Phase-out threshold.
- **Maximum reduction** – 80%
- **AMT** – No reduction for the AMT computation

TCJA

This phase-out is **suspended** for tax years 2018 through 2025.

Pubs Forms

Related IRC and IRS Publications and Forms

- **Sec 68** – Overall limitation on itemized deductions.
- **Phaseout Worksheet** – 2017 Schedule A Instructions, Page A-14

The Details

The following information applies for years 2013 through 2017 and after 2025. Certain itemized deductions are subject to phase-out if the taxpayer's adjusted gross income (AGI) is more than the annual limit.

Subject to phase-out	NOT Subject to phase-out
• Taxes • Interest, except investment interest expense • Gifts to charity • Job expenses and most other miscellaneous deductions • Other miscellaneous deductions - excluding gambling and casualty or theft losses	• Medical and dental expenses • Investment interest expense • Casualty and theft losses from personal use property • Casualty and theft losses from income-producing property • Gambling losses

LIMIT ON PHASEOUT:

If the itemized deductions are subject to the limit, the total of all itemized deductions is reduced by the smaller of:

1) ***3%*** of the amount by which the ***AGI exceeds the annual threshold***, or
2) ***80%*** of the itemized deductions that are ***affected by the limit***.

FEDERAL ITEMIZED DEDUCTIONS PHASEOUT THRESHOLDS					
Tax Year	**2014**	**2015**	**2016**	**2017**	**2018-2025**
Single	254,200	258,250	259,400	261,500	NA
Head of Household	279,650	284,050	285,350	287,650	NA
Joint & Surviving Spouse	305,050	309,900	311,300	313,800	NA
Married Filing Separate	152,525	154,950	155,650	156,900	NA

If any amount is not shown, it is not available at publication date

CALIFORNIA DIFFERENCES

The California computation is similar to the Federal computation and utilizes the Federal AGI for the computation, but the phaseout amounts differ. One major difference is that the phase out percentage for California is 6% whereas for federal purposes it is 3%.

If the itemized deductions are subject to the limit, the total of the itemized deductions is reduced by the smaller of:

1) ***6%*** of the amount by which the ***federal AGI exceeds the annual CA limit***, or
2) ***80%*** of the itemized deductions that are ***affected by the limit***.

Computation Worksheet – See Schedule CA Instructions.

CALIFORNIA ITEMIZED DEDUCTIONS PHASEOUT THRESHOLDS					
Tax Year	**2015**	**2016**	**2017**	**2018**	**2019**
Single & Married Separate	178,706	182,459	187,203	194,504	
Head of Household	268,063	273,692	280,808	291,760	
Joint & Surviving Spouse	357,417	364,923	374,411	389,013	

If any amount is not shown, it is not available at publication date
CA does not release the current year's amount until year-end.

NOTES

MEDICAL DEDUCTIONS

Overview

- Medical expenses are the costs of **diagnosis, cure, mitigation, treatment, or prevention of disease**, and the costs for **treatments affecting any part or function of the body** including dental expenses.
- Costs of **equipment, supplies, and diagnostic devices** needed for these purposes are eligible.
- The expenses **include insurance;** including medical, hospital, dental, long-term care (limited), and Medicare B and Medicare D insurance premiums (insurance premiums paid through an ACA exchange allowed only net of the premium assistance credit).
- **Medicare B Premium** for 2019 is: generally, $135.50/**month** or $1,626/full year. CAUTION: Premium for high-income taxpayers will be more.
- Expenses that are merely beneficial to general health do not count
- **Medical Mileage 2019**: 20 cents per mile

Pubs Forms

Related IRC and IRS Forms & Publications

- **Pub 502** – Medical and Dental Expenses
- **Pub 525** – Taxable & Nontaxable Income (recovery worksheet)
- **IRC Sec 213** – Medical, Dental, Etc., Expenses
- **IRC Sec 7702B** – Qualified Long-Term Care Insurance

The Details

MEDICAL FLOOR

Medical deductions are only allowed to the extent total medical expenses exceed a percent of AGI. With the advent of the ACA, this deduction limitation was increased to 10% for most taxpayers, though kept at 7.5% for seniors through 2016. TCJA retroactively extended the 7.5% for all taxpayers, and for both regular tax and AMT, for 2017 and 2018, after which it will return to 10%.

Year	Pre-2013	2013-16	2017-18	Post-2018
Under age 65	7.5%	10%	7.5%	10%
Either Spouse 65 or over	7.5%	7.5%	7.5%	10%
AMT Threshold	10%	10%	7.5%	10%

DEDUCTIBLE MEDICAL EXPENSES CONSIDERATIONS

The following presents infrequent or unusual medical expenses and how they are treated for the medical expense deduction:

Acupuncture - Medical expenses include the amounts paid for acupuncture.

Alcoholism - Amounts paid by an inpatient for treatment at a therapeutic center for alcoholism, and for meals and lodging furnished as a necessary incident to the treatment (Rev. Rul. 72-226), are eligible medical expenses. Cost of transportation to meetings of the Alcoholics Anonymous are expenses "primarily for and essential to medical care" in the case of an alcoholic who attends such meetings (Rev. Rul. 63-273).

Adoption Expenses Paid by Adopting Parent - Medical expense payments made by an adopting parent for medical services rendered to a child even before the child was placed in the parent's home are deductible if:

- The child is a dependent of the adopting parent when services are rendered **or** paid; and
- The expenses are paid by the parent, or agent, for the medical care of the child; and
- They are not reimbursement for expenses by the adoption agency prior to adoption negotiations; and
- The expenses are shown to be directly attributable to the medical care of the child.

The adoptive parents ***cannot deduct the natural mother's childbirth expenses***. Kilpatrick, Benny, (1977) 68 TC 469

RAPID FINDER

Birth Control Pills – A taxpayer can include in medical expenses the amount paid for birth control pills provided they were prescribed by a doctor.

Body Scan - The amount paid for a full-body scan was an allowed expense even though the taxpayer who underwent the test was not experiencing symptoms of illness and had not obtained a physician's recommendation before undergoing the procedure. This procedure was for diagnosis, and since it did not have a non-medical function, it was allowed, in spite of its high cost or the possible existence of less expensive alternatives. Rev. Proc. 2007-72

Chiropractor - The amounts paid to chiropractors for medical care can be included in medical expenses.

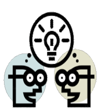
Christian Science Practitioner - The amounts paid to Christian Science practitioners for medical care can be included in medical expenses.

Cosmetic Surgery – This is defined as any procedure, which is directed at improving the patient's appearance and does not meaningfully promote the proper function of the body or prevent or treat illness or disease. Cosmetic surgery or other similar procedures can't be taken into account as a medical expense deduction, <u>unless the surgery or procedure is necessary to ameliorate a deformity arising from (or directly-related to) a (1) congenital abnormality, (2) personal injury resulting from an accident or trauma, or (3) disfiguring disease</u>. *Code Sec. 213(d)(9)(A)* IRS specifically ruled that breast reconstruction surgery paid for by a breast cancer patient who had a mastectomy as part of her cancer treatment was a deductible medical expense. *(Rev. Rul. 2003-57, 2003-22, IRB 959)*

IRS allowed the cost of **eye surgery** to correct defective vision, including laser procedures such as LASIK and radial keratotomy, since these procedures are performed to correct a dysfunction of the body. *(Rev. Rul. 2003-57, 2003-22, IRB 959)*

Payments to a dentist to perform a **teeth-whitening** procedure on a patient whose teeth had discolored as a result of age were not deductible because the discoloration was not a deformity, was not caused by a disfiguring disease or treatment, and was done so as to improve appearance. *(Rev. Rul. 2003-57, 2003-22, IRB 959)*

Decedent's Medical Expenses - Medical expenses of the decedent paid before death are claimed as an itemized deduction in the usual manner on the decedent's final return. Medical expenses paid after the decedent's death become the liability of the decedent's estate, and they are claimed on the estate tax return (Form 706) when one is required to be filed. However, expenses that were paid out of estate funds within one year after the day after death can be treated as if paid by the decedent and claimed on the decedent's final return instead. *(IRC §213(c)(1);Reg §1.213-1(d)(1))*



Strategies

Strategy – Consult with the executor. Assuming (a) the decedent will itemize, (b) total medical expenses will exceed the 7.5% or 10%, as applicable, of AGI floor and (c) no Form 706 is required, it is clear that making the election and deducting the medical expenses on the 1040 are appropriate. This also may require filing an extension or filing an original return and then later amending to take the additional medical expenses. If a 706 is being filed, but other expenses or allowed deductions reduce the gross estate to the point no tax is owed, it also makes sense to elect to claim the medical expenses on the decedent's final 1040. To make the election, file a statement in duplicate with the decedent's final return that the expenses are not being claimed on the estate tax return and that the estate waives the right to deduct the medical expenses at any time. The statement must be signed by the estate executor.

Diapers, Adult – See "Elderly Devices"

Disabled Dependent Care Expenses - Some disabled dependent care expenses may qualify as either medical expenses, or work-related expenses for purposes of taking a credit for child and dependent care. The expenses can be applied either way as long as the same expenses are not used to claim both a credit and a medical expense deduction.

DNA Collection Kit – DNA collection kits are used to provide an individual with ancestry data and in some cases for health reasons such as genotyping. Where both ancestry data and medical data are provided the cost of the kits must be allocated and only medical data portion is deductible as a medical expense and the taxpayer must use a reasonable method of allocation (PLR 01933005).

Drug Addiction - Amounts paid by a taxpayer to maintain a dependent in a therapeutic center for drug addicts, including the cost of the dependent's meals and lodging, are deductible medical expenses (Rev. Rul. 72-226).

Egg Donor Expenses - IRS has ruled privately (PLR 200318017) that a woman who can't conceive children using her own eggs may claim a medical expense deduction for the costs of obtaining an egg donor, including associated legal costs. IRS said that a procedure facilitating pregnancy by overcoming infertility similarly affects a structure or function of the body and also may be medical care. Expenses that prepare for and are directly related to a medical care procedure may also constitute medical care, IRS said. For example, Rev Rul 68-452, 1968-2 CB 111, holds that a kidney recipient who pays a kidney donor's surgical, hospital, and transportation expenses may deduct these costs as medical expenses. The ruling concludes that the costs of obtaining an egg donor, including the donor's expenses, are directly related and preparatory to her receiving the donated egg or embryo and may be deducted as medical expenses. IRS said that like other preparatory expenses, legal expenses may be deductible medical expenses if they bear a direct or proximate relationship to the provision of medical care to a taxpayer.

Elderly Devices - Questions frequently arise related to the deductibility of devices or supplies designed primarily for use by the elderly. A number of devices, such as specialized phones with big buttons, pictures in place of the numbers, amplifiers for the hard of hearing, etc., are available without prescription. There are also medical alert devices that the elderly or infirm can wear and get medical help should they fall or have another medical emergency. To be deductible, these devices must meet the definition of a medical expense. In some cases, to meet the definition of a medical device requires the device to be prescribed by a medical professional and sometimes not. For instance, an individual who is deaf would be able to deduct the cost of a text (TTY) phone whether actually prescribed by a doctor or not, while one who is not deaf would not be able to deduct the cost. However, in an examination, the IRS might require proof the individual is deaf. Another example is the purchase of prescription eye glasses, the cost of which would be deductible since they are prescribed, but the purchase of a magnifying glass at the drug store would not. However, where there is a question of whether the device is actually needed medically, a prescription from the doctor may be needed. Such would be the case for specialty phones, medical alert devices, adult diapers, etc.

Equipment and Supplies – IRS has ruled that the Sec. 213(b) prohibition against deductibility of nonprescription medicine or drugs does not apply to such items as crutches, bandages, and diagnostic devices (e.g., blood sugar kits used by diabetics). The costs of such equipment and supplies are deductible if they otherwise meet the general requirement of being paid for the diagnosis, cure, mitigation, treatment, or prevention of disease. *(Rev. Rul. 2003-58, 2003-22, IRB 959)*

Fertility Enhancement - Medical expenses include the cost of the following procedures to overcome an inability to have children (2018 IRS Pub 502, page 7).

- Procedures such as *in vitro* fertilization (including temporary storage of eggs or sperm).
- Surgery, including an operation to reverse prior surgery that prevented the person operated on from having children.

Gender Identity Disorder - IRS acquiesced to the U S Tax Court decision in *O'Donnabhain v Commissioner (134 T.C. 34 (2010)*) and no longer takes the position reflected in Letter Ruling 200603025. Thus, the costs of gender reassignment surgery and hormone replacement will be considered qualified medical expenses for persons with gender identity disorder. (Action on Decision 2011-03)

Guide Dog or Other Service Animal - The cost of a guide dog or other service animal to be used by a visually-impaired or hearing-impaired person, or a person with other physical disabilities, can be included in medical expenses. The amounts paid for the care of these specially trained animals are also medical expenses. *(Rev Rul 57-461; Rev Rul 68-295; IRS Pub 502)* Based on these citations, expenses related to "emotional support animals" would not qualify as a medical deduction.

Health Reimbursement Arrangements (HRA) Payments – Medical expenses paid by an HRA are not deductible since an HRA is a pre-tax plan funded by an employer.

Home Modifications – See "Impairment-Related Expenses."

Household Help as a Medical Expense - The cost of household help cannot be included in medical expenses, even if such help is recommended by a doctor. This is a personal expense that is not deductible. However, certain expenses paid to a person providing nursing-type services may be included. See "Nursing Services" below. Also, certain maintenance or personal care services provided for qualified long-term care can be included in medical expenses.

Insurance Premiums – Amounts paid for insurance including medical, hospital, dental, long-term care (limited), lost or damaged contact lenses, prescription drugs and insulin, and Medicare-B and Medicare-D insurance premiums (see Medicare premiums) are allowed. Premiums paid through an employer's flexible spending arrangement are not deductible because they are paid with pre-tax dollars. The deduction for insurance premiums for coverage acquired through a health exchange (Marketplace) is allowed net of the premium assistance credit. See also "Premium Tax Credit & Marketplace Insurance," later in this text.

Self-Employed Health Insurance Deduction - A self-employed individual (or a partner or a more-than-2%-shareholder of an S corporation) can deduct as an above-the-line expense 100% of the amount paid during the tax year for medical insurance on behalf of himself, his spouse and his dependents subject to the following requirements (Code Sec. 162(l)(1)(B)):

- The deduction cannot exceed the individual's net earnings from self-employment derived from the trade or business for which the plan providing the coverage is established.
- For a more-than-2% S corporation shareholder, that shareholder's wages from the S corporation are treated as his earned income.
- No deduction is available for any month in which the self-employed individual is eligible to participate in a "subsidized" health plan maintained by an employer of the taxpayer, the taxpayer's spouse, or any dependent, or any child of the taxpayer who hasn't attained age 27 as of the end of the tax year. This rule is applied separately to (1) plans that provide coverage for qualified long-term care services, or are qualified long-term care insurance contracts and (2) plans which don't include such coverage and aren't such contracts (Code Sec. 162(l)(2)(B)). Thus, an individual eligible for **employer-subsidized** health insurance may still be able to deduct long-term care insurance premiums, so long as he isn't eligible for employer-subsidized long-term care insurance.

IMPORTANT DEFINITION - The term "subsidized" means at least 50% of the cost of the coverage is paid by the employer (Sec 35(f)(1)).

The health insurance premiums claimed as an above-the-line SE health insurance expense cannot also be claimed as a Schedule A medical expense.

Impairment-Related Expenses - Capital Expenses - Amounts paid for special equipment installed in the home, or for improvements may be included in medical expenses, if their main purpose is medical care for the taxpayer, the spouse, or a dependent. The cost of permanent improvements that increase the value of the property may be partly included as a medical expense. The cost of the improvement is reduced by the increase in the value of the property. The difference is a medical expense. If the value of the property is not increased by the improvement, the entire cost is included as a medical expense.

Certain improvements made to accommodate a home to a taxpayer's disabled condition, or that of the spouse or dependents who live with the taxpayer, do not usually increase the value of the home and the cost can be included in full as medical expenses. These improvements include, but are not limited to, the following items:

- Constructing entrance or exit ramps for the home,
- Widening doorways at entrances or exits to the home,
- Widening or otherwise modifying hallways and interior doorways,
- Installing railings, support bars, or other modifications,
- Lowering or modifying kitchen cabinets and equipment,
- Moving or modifying electrical outlets and fixtures,
- Installing porch lifts and other forms of lifts but generally not elevators,
- Modifying fire alarms, smoke detectors, and other warning systems,
- Modifying stairways,
- Adding handrails or grab bars anywhere (whether or not in bathrooms),
- Modifying hardware on doors,
- Modifying areas in front of entrance and exit doorways, and
- Grading the ground to provide access to the residence. *Only reasonable costs to accommodate a home to a disabled condition are considered medical care. Additional costs for personal motives, such as for architectural or aesthetic reasons, are not medical expenses.*

***In vitro* Fertilization** - Although not specifically addressed in the Code, Regs, etc., it would appear that this procedure would be deductible if performed on the taxpayer claiming the expense. The code specifically allows procedures that affect the structure or function of the body. *(Code Sec 213(d)(1)(A))* It also would be allowed under discretionary surgery performed on the taxpayer. Discretionary medical costs are generally deductible where they are not illegal under Federal law. For example, abortions, vasectomies, and procedures to render the taxpayer incapable of getting pregnant have been held deductible. *(Rev Rul 97-9, 73-201 & 73-603)* According to IRS Pub. 502 (2018, page 7), the cost of procedures to overcome an inability to have children are qualified medical expenses. Such procedures include *in vitro* fertilization (including temporary storage of sperm or eggs) and surgery, including surgery to reverse a prior operation performed to prevent the person from having children.

In Vitro Fertilization Expenses Denied in Absence of Medical Condition **-** A taxpayer was denied a medical expense deduction for *in vitro* fertilization (IVF) expenses. He was a fertile man who used IVF for non-medical reasons. He had no physical or mental condition that prevented him from procreating without the use of IVF technologies. (*W. Magdalin, TC Memo. 2008-293, Dec. 57,629(M)*) Subsequently confirmed in appeals.

Lactation - The IRS in Announcement 2011-14 says that breast pumps and supplies that assist lactation are medical care under Code Sec. 213(d) because, like obstetric care, they are for the purpose of affecting a structure or function of the body of the lactating woman.

Lead-Based Paint Removal - The cost of removing lead-based paints from surfaces in a taxpayer's home to prevent a child who has or has had lead poisoning from eating the paint can be included in medical expenses. These surfaces must be in poor repair (peeling or cracking) or within the child's reach. The cost of repainting the scraped area is not a medical expense. If, instead of removing the paint, the area is covered with wallboard or paneling, treat these items as capital expenses. Do not include the cost of painting the wallboard as a medical expense. (2018IRS Publication 502, page 10)

Learning Disability (Special Education) - Tuition fees paid to a special school for a child who has severe learning disabilities caused by mental or physical impairments, including nervous system disorders can be included in medical expenses. A doctor must recommend that the child attend the school. See "Schools and Education – Special" (discussed later). Tutoring fees recommended by a doctor for the child's tutoring by a teacher who is specially trained and qualified to work with children who have severe learning disabilities may also be included. (2018 IRS Publication 502, page 13, Special Education)

Medical care includes the cost of attending a special school designed to compensate for or overcome a physical handicap, in order to qualify the individual for future normal education or for normal living. This includes a school for the teaching of Braille or lip reading. The principal reason for attending must be the special resources for alleviating the handicap. The cost of tuition for ordinary education that is incidental to the special services provided at the school, and the cost of meals and lodging supplied by the school also is included as a medical expense. The distinguishing characteristic of a special school is the substantive content of its curriculum, which may include some ordinary education, but only if the ordinary education is incidental to the school's primary purpose of enabling students to compensate for or overcome a handicap. (PLR 20052103)

The Tax Court has also held and IRS has privately ruled that, where a school attended by a student with a medical problem doesn't qualify as a special school because the ordinary education isn't incidental to the special services provided, the costs of the special program or special treatment (but not the entire tuition) may still be a deductible medical expense

Legal Fees – A taxpayer can include in medical expenses legal fees paid that are necessary to authorize treatment for mental illness. However, do not include in medical expenses fees for the management of a guardianship estate, fees for conducting the affairs of the person being treated, or other fees that are not necessary for medical care. (IRS Publication 502)

Long-Term Care Insurance – Amounts paid for long-term care services and certain premiums paid on long-term care insurance will be includible as medical expenses on Schedule A. Costs of care provided by a relative who is not a licensed professional or by a related corporation or partnership don't qualify. The maximum amount of long-term care premiums treated as medical expenses depends on the insured's age and is inflation-indexed annually. *(IRC Sec 213(d)(10))*

LTC DEDUCTION LIMITATIONS & PER DIEM CAPS						
Age	**2015**	**2016**	**2017**	**2018**	**2019**	**2020**
40 or less	380	390	410	420	420	430
41 to 50	710	730	770	780	790	810
51 to 60	1,430	1,460	1,530	1,560	1,580	1,630
61 to 70	3,800	3,900	4,090	4,160	4,220	4,350
71 & older	4,750	4,850	5,110	5,200	5,270	5,430
Per Diem	330	340	360	360	370	380

If any amount is not shown, it is not available at publication date.

Employees generally won't be taxed on the value of coverage under employer-provided long-term care plans. However, the exclusion doesn't apply if coverage is provided through a cafeteria plan. In addition, long-term care services can't be reimbursed tax-free under a flexible spending account.

"Long-term contract" is an insurance contract that provides only coverage of long-term care and meets certain other requirements. Some long-term care riders to life insurance will also qualify. Benefits under a long-term care policy (other than dividends or premium refunds) are generally tax-free. With per diem contracts that pay a flat-rate benefit without regard to actual long-term care expenses incurred, the exclusion is limited to $175 a day indexed for medical cost inflation (amount for 2019 is $370) except when long-term care costs incurred are more than the flat rate and are not otherwise compensated by some other means.

A contract isn't treated as a long-term care contract unless determination of chronically ill takes into account at least five activities of daily living--eating, toileting, transferring, bathing, dressing and continence. Although the contract must take into consideration at least five, the definition of chronically ill (below) only requires the individual to meet two of the five.

"Long-term care services" include necessary diagnostic, preventive, therapeutic, curing, treating, mitigating, and rehabilitative services, maintenance or personal care services prescribed by a licensed practitioner for the chronically ill. *(IRC Sec 7702B(c)(1))*

"Chronically ill person" is one who has been certified by a licensed health care practitioner within the previous 12 months as: (1) unable to perform at least two activities of daily living (eating, toileting, transferring, bathing, dressing, continence) without substantial assistance for a period of 90 days due to loss of functional capacity, (2) having a similar level of disability as determined in regulations, or (3) requiring substantial supervision to protect from threats to health and safety due to severe cognitive impairment. *(IRC Sec 7702B(c)(2))*

The requirement that a qualified long-term care insurance contract must base determination of whether an individual is chronically ill by taking into account five activities of daily living applies only to (1) above (being unable to perform at least two activities of daily living).

Payments made as a charge against the cash surrender value of a life insurance contract - No medical expense deduction is allowed for payment of long-term care coverage under a qualified long-term care insurance contract if the payment is made as a charge against the cash surrender value of a life insurance contract or the cash value of an annuity contract. *(Code Sec 7702B(e)(2))*

Reporting requirements: A taxpayer who receives long-term care benefit payments will receive a Form 1099-LTC from the payer. Refer to the flow chart included in the instructions for Form 8853 for whether or not there are reporting requirements and if there are, which sections of the Form 8853 must be completed.

Medical Reimbursement: Amounts (other than policyholder dividends or premium refunds) received under a qualified long-term care insurance contract are treated as amounts received for personal injuries and sickness and are treated as reimbursement for expenses actually incurred for medical care. (Sec 7702B(a)(2))

Registered Domestic Partners – In states that recognize RDP relationships, the long-term care insurance premiums paid for the domestic partner may also be deductible for state but not federal purposes.

Meals - Medical expenses may include the cost of meals at a hospital or similar institution if the main purpose for being there is to get medical care. The cost of meals that are not part of inpatient care may not be included.

Medical Alert – See "Elderly Devices"

Medical Conferences - IRS has ruled that a taxpayer may deduct the cost of attending a conference relating to a dependent's disease. *(Rev Rul 2000-24, 2000-19 IRB)* In this ruling, the taxpayer was allowed to deduct the cost of the conference registration fee and travel to the conference, because those costs were primarily for a dependent's medical care and the taxpayer's attendance was essential for that care. The cost of meals and lodging were not deductible, because the dependent did not receive medical care at a licensed facility (a prerequisite for medical deduction of meals and lodging).

Medical Marijuana (Controlled Substance) – As a controlled substance that is not recognized as legal by the federal government, the cost of marijuana, even if (1) prescribed by a physician to alleviate pain or other symptoms of an illness or (2) legal under state law, is not deductible for federal purposes. (2018 IRS Publication 520, page 15)

Medicare Premiums – *Medicare Part A* is generally paid through payroll taxes and is sometimes referred to as the hospital insurance (HI) portion of FICA and SE taxes. This amount is not a medical expense. However, a taxpayer not covered under Social Security (or who was not a government employee who paid Medicare tax) can voluntarily enroll in Medicare A. In that case, the Medicare A premiums paid are included as a medical expense. The 2019 Part A premium for these individuals is up to $437/month, an increase from $422 in 2018.

Medicare B and D – Both Medicare B (Medicare premiums) and Medicare D (Medicare prescription drug coverage) are treated and deducted as medical insurance premiums. The amounts paid or withheld from the individual's Social Security income is **based on the taxpayer's MAGI two years previously**. The following tables reflect the Medicare Part B monthly premiums and the Medicare Part D monthly supplement based upon a taxpayer's MAGI. To determine the amount paid, add together both the Part B and D amounts.

Modified AGI - The modified AGI for making the adjustment is the Federal AGI plus the following:

- Tax-exempt interest income;
- United States savings bonds interest used to pay higher education tuition and fees if the interest was excluded from income on Form 8815;
- Excluded foreign earned income and housing costs;
- Income derived from sources within Guam, American Samoa, or the Northern Mariana Islands; and
- Income from sources within Puerto Rico.

Medicare Part C – Under this coverage, also known as Medicare Advantage, the participant pays the monthly Medicare B premium and also pays an additional monthly premium to the insurance company providing the coverage, although in some cases there is no extra premium. Both the cost of Medicare B premiums and any additional Part C premiums qualify as medical insurance premiums.

MONTHLY MEDICARE B PREMIUMS					
Status	Modified AGI (2 YRS PRIOR)	2016	2017	2018	2019
Individuals Married Filing Joint*	$85,000 or less $170,000 or less	$121.80	$134.00	$134.00	$135.50
Individuals Married Filing Joint*	$85,001 - $107,000 $170,001 - $214,000	$170.50	$187.50	$187.50	$189.60

**These amounts represent the average amount, and the amount can vary based upon the insurance plan selected and the geographical area.*

***Supplement amount is for each spouse enrolled in Medicare D and is in addition to plan premium*

If any amount is not shown, it is not available at publication date

Amended AGI – If the taxpayer subsequently amends the tax return for the year on which the AGI adjustment is based and there is a significant reduction in AGI for that year, the taxpayer can submit a copy of the amended return and the premium will be retroactively adjusted.

Effect of Major Life-Changing Events – The Social Security Administration will use a more recent tax year's modified AGI, rather than the one of the second prior year, if the taxpayer experiences a major-life changing event, defined as:

- Death of a spouse;
- Taxpayer's marriage or divorce;
- Taxpayer or spouse stopping work or reducing the number of hours worked;
- Reduction in income from income-producing property due to certain casualties or disasters; and
- Reduction in income or loss of income from certain pensions, such as when a pension plan is terminated.

Married Couples – The monthly adjustment applies to each premium, so if both spouses are enrolled in Medicare, the couple will actually pay double the premium adjustment.

Moving – See travel page 07.02.13

Non-Hospital Institutions - The following are examples of when expenses for nonhospital institutions are deductible:

- All amounts paid by the taxpayer to maintain his mentally disabled son in a specially selected private home (which qualified as an "institution") in accordance with the recommendation of the psychiatrist in charge of the son's case, to help the son adjust to life in the community after living in a mental hospital. *(Rev Rul 69-499, 1969-2 CB 39)*
- Hotel meals and lodging, where taxpayer stayed in and received nursing service in the hotel, after getting appendicitis, having surgery in a hospital and being discharged from the hospital because it needed his hospital room. All of these events took place in New York, while taxpayer lived in Milwaukee. At the time of his discharge, the attending physician said taxpayer was too weak to travel home. *Kelly, Daniel v. Com., (1971, CA7)*
- Amounts paid to maintain a child at a halfway house, including room and board. Admission to the halfway house required the recommendation of a psychiatrist and continued psychiatric supervision during the stay. The house staff included a psychiatrist and mental health counselor. *(IRS Letter Ruling 7714016)*

Nursing Home - Medical expenses include amounts paid for the cost of inpatient care at a hospital or similar institution if the main reason for being there is to receive medical care. This includes amounts paid for meals and lodging.

Allocation of retirement residence fees to resident's medical expenses - Delbert L. Baker, (2004) 122 TC - The Tax Court has approved the use of the percentage method for determining what portion of monthly fees paid by a taxpayer to a continuing care retirement community qualified as deductible medical expenses. In doing so, the Tax Court rejected IRS's contention that the deductible amount had to be determined based on an actuarial analysis taking into account life expectancy and health care level expectancy. But no deduction was allowed for costs related to use of the pool and spa at the facility.

Nursing Services - Wages and other amounts paid for nursing services can be included in medical expenses. Services need not be performed by a nurse as long as the services are of a kind generally performed by a nurse. This includes services connected with caring for the patient's condition, such as giving medication or changing dressings, as well as bathing and grooming the patient. These services can be provided in the home or another care facility.

Generally, only the amount spent for nursing services is a medical expense. If the attendant also provides personal and household services, these amounts must be divided between the time spent performing household and personal services and the time spent for nursing services. However, certain maintenance or personal care services provided for qualified long-term care can be included in medical expenses.

Part of the amounts paid for that attendant's meals are also included in medical expenses. Divide the food expense among the household members to find the cost of the attendant's food. If additional amounts for household upkeep were paid because of the attendant, include the extra amounts with the medical expenses. This includes extra rent or utilities paid, because a larger apartment was needed to provide space for the attendant.

Additionally, certain expenses for household services or for the care of a qualifying individual incurred to allow the taxpayer to work may qualify for the child and dependent care credit. However, the same expense cannot be used for both the credit and the Schedule A medical deduction.

Over-the-Counter Drugs – The costs of over-the-counter drugs are not allowed as a medical deduction unless specifically prescribed by a health care professional; an exception applies for insulin. Over the counter drugs cannot be paid for from health care flexible spending accounts (FSAs) and health reimbursement arrangements (HRAs) unless they are purchased with a prescription. (Rev Rul 2010-23).

Organ Donor – The costs of medical expenses incurred as an organ donor or possible organ donor, including medical care in connection with donating a kidney or other organ and transportation, are deductible medical expenses of the donor. In addition, the organ recipient can deduct the cost of medical care in connection with the donating of the organ, including transportation. (2018 Publication 502, page 13, Transplants)

Phones – See "Telephone"

Physical Exam - The amount a taxpayer paid for an annual physical exam, even though the taxpayer was not experiencing any symptoms of illness, was allowed. It qualified because it was for diagnosis. (Rev. Proc. 2007-72)

Pregnancy Test - The cost of a self-administered pregnancy test was deductible even though its purpose was to test the healthy functioning of the body rather than to detect disease. (Rev. Proc. 2007-72)

Premium Tax Credit & Marketplace Insurance – The amount of health insurance paid through the marketplace that is a medical deduction on Schedule A or treated as self-employed health insurance is the cost of the insurance net of the PTC allowed. Use the following worksheet to determine the deductible amount. (2018 IRS Pub 502, Page 12).

Insurance Premiums	$________
Advance Premium Tax Credit (APTC)	<________ >
PTC Repaid	________
Additional PTC Received	<________ >
Medical Insurance Deduction	$________

<u>*Premium Tax Credit Repayments -*</u> Where a taxpayer repays the PTC, that repayment could increase their medical itemized deduction or their above-the-line self-employed health insurance deduction, depending upon the circumstances. However, contrary to the general rules for cash basis taxpayers, and based on the example in Pub 502, the deduction will go to the year of the credit and not the year in which the credit is repaid.

Example 1 *- Amy is under age 65 and unmarried. The cost of her health insurance premiums in 2019 is $8,700. Advance payments of the premium tax credit of $4,200 are made to the insurance company and Amy pays premiums of $4,500. On her 2019 tax return, Amy is allowed a premium tax credit of $3,600 and must repay $600 excess advance credit payments (which is less than the repayment limitation). Amy is treated as paying $5,100 ($8,700 less the allowed premium tax credit of $3,600) for health insurance premiums in 2019. Using the worksheet from above proves the result:*

Insurance Premiums	*$8,700*
Advance Premium Tax Credit (APTC)	*<4,200>*
PTC Repaid	*600*
Additional PTC Received	*< 0>*
Medical Insurance Deduction	*$5,100*

Example 2 *- The facts are the same as in Example 1, except Amy is allowed a premium tax credit of $4,900 on her tax return and receives a net premium tax credit of $700. Amy is treated as paying $3,800 ($8,700 less the allowed premium tax credit of $4,900) for health insurance premiums in 2019.*

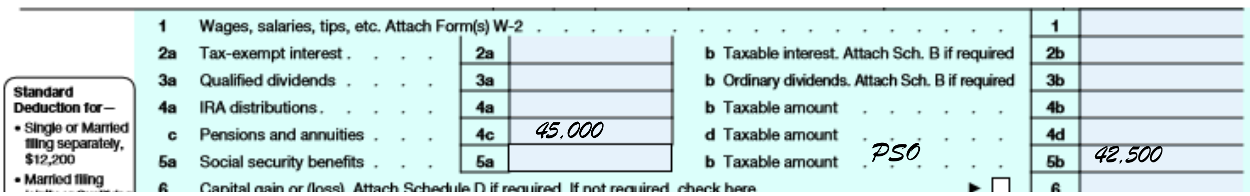
Public Safety Officers (Retired) - Eligible retired public safety officers (police officers, firefighters) may elect to exclude governmental retirement plan distributions that don't exceed their health or long-term care premiums, <u>if the distributions are paid directly to insurers</u>. The exclusion is limited to $3,000 per year. Any amount excluded isn't deductible as a medical expense for itemized deductions and isn't includible as health insurance for the self-employed health insurance deduction (PPA § 845). IRS Notice 2007-7 explains the exclusion for qualifying payouts to public safety officers:

- A public safety officer is an individual serving a public agency in an official capacity, <u>with or without compensation</u>, as a law enforcement officer, a firefighter, a chaplain, or as a member of a rescue squad or ambulance crew.
- The exclusion is available only to public safety officers who separate from service:
  (1) After attaining normal retirement age or
  (2) Due to disability. It is not available to surviving spouses or dependents after the public safety officer dies.
- The exclusion applies only if an eligible retired public safety officer elects to have an amount subtracted from his distributions from an eligible government plan (one described in Code Sec. 414(d) that is either a Code Sec. 403(a) or Code Sec. 403(b) plan, or an eligible governmental plan under Code Sec. 457(b)) and uses that amount to pay qualified health insurance premiums. <u>The employer sponsoring the eligible government plan is not required to offer such an election</u>.
- The <u>distribution must be paid directly to an accident or health insurance plan</u> that provides insurance issued by an insurance company regulated by a State (including a managed care organization that is treated as issuing insurance).
- Benefits attributable to service other than as a public safety officer are eligible for favorable tax treatment under Code Sec. 402(l), as long as the individual separates from service as a public safety officer, because of disability or after attaining normal retirement age, with the employer maintaining the eligible government plan.

Form 1040 Instructions - The amount shown in box 2a of Form 1099-R doesn't reflect the exclusion. Therefore enter the total distributions on line 4c and the taxable amount (after subtracting the excludable amount) on line 4d and enter "PSO" next to line 4d. (2018 1040 Instructions, Pg. 30; draft 2019 Form 1040)

If the taxpayer is retired on disability and reporting his or her disability pension on line 1, include only the taxable amount on that line and enter "PSO" and the amount excluded on the dotted line next to line 1.

Example*: Assume the retired PSO's 1099-R is for $45,000 and the retirement plan administrator made a direct distribution from the retirement plan to the provider of the accident or health plan or long-term care insurance contract in the amount of $2,500 (the maximum allowed is $3,000 per year). The entries on the 1040 would look like this:*



Standard Deduction for—
• Single or Married filing separately, $12,200
• Married filing

Schools and Education – Special – A taxpayer can include in medical expenses payments to a special school for a mentally impaired or physically disabled person if the main reason for using the school is its resources for relieving the disability. A taxpayer can include, for example, the cost of:

- Teaching Braille to a visually impaired child,
- Teaching lip reading to a hearing-impaired child, or
- Giving remedial language training to correct a condition caused by a birth defect. The cost of meals, lodging, and ordinary education supplied by a special school can be included in medical expenses only if the main reason for the child's being there is for the resources the school has to relieve the mental or physical disability.

Do not include in medical expenses the cost of sending a problem child to a special school for benefits the child may get from the course of study and the disciplinary methods.

Smoking-Cessation Programs - IRS has ruled that uncompensated amounts paid by taxpayers for participation in smoking-cessation programs and for prescribed drugs designed to alleviate nicotine withdrawal are eligible medical expenses. *(Rev Rul 99-28, 1999-25 IRB; IR-1999-55*) However, because of the Code Sec. 213(b) prohibition of deductions for most nonprescription drugs, no deductions are permitted for the costs of nonprescription nicotine gum and certain nicotine patches.

Social Security Taxes for Household Employees - If a domestic employee, such as a nurse, is paid cash wages of $2,100 or more in 2019, there will generally be withholding and social security and Medicare taxes that have to be paid. For more information, see Publication 926, Household Employer's Tax Guide.

Spouse - Prior or Current – A taxpayer can include medical expenses paid for a prior or current spouse provided the taxpayer was married to the spouse either at:

- The time the spouse received the medical services **or**
- At the time the taxpayer paid the medical expenses. (2018 Pub 502, page 3)

Stem Cell Therapy and Storage – Medical expenses are the costs of diagnosis, cure, mitigation, treatment, or prevention of disease, and the costs for treatments affecting any part or function of the body including dental expenses (IRC Sec. 213). Thus, it would seem that treatment of an ailment with stem cell therapy would qualify as a medical deduction.

Cord blood contains stem cells that doctors may use to treat disease. Thus, expenses for banking cord blood to treat an existing or imminently probable disease may qualify as deductible medical expenses. However, banking cord blood as a precaution to treat a disease that might possibly develop in the future does not satisfy the existing legal standard that at a minimum a disease must be imminently probable. (IRS Information Letter 2010-0017)

Sterilization - The cost of a legal sterilization (a legally performed operation to make a person unable to have children) can be included in medical expenses.

Surrogate Mother Expenses – (for the tax treatment by the surrogate see chapter 2.01 – Compensation Issues) As with *in vitro* fertilization, this issue is not specifically addressed in the Code, Regs, etc. The Code does tell us that medical expenses are only deductible for the taxpayer, spouse and dependents. The definition of a dependent for medical purposes ignores the gross income and joint return tests. Therefore, it appears that a surrogate mother's medical expenses can only be deducted if she qualifies as a "medical dependent." The unborn fetus is not a dependent until actually born.

<u>The office of Chief Counsel has provided some guidance on this issue in a letter to a taxpayer</u>: Section 213(a) of the Internal Revenue Code allows a taxpayer to deduct the expenses paid during the taxable year, not compensated for by insurance or otherwise, for medical care of the taxpayer, the taxpayer's spouse, or the taxpayer's dependents (as defined in § 152), to the extent the expenses exceed 7.5 percent [10% after 2018] *of adjusted gross income. Section 152(a)* [prior to amendment by the Working Families Tax Relief Act of 2004] *defines a dependent as (1) an individual listed in the section (2) for whom the taxpayer provided over half of the support for the taxable year.*

A surrogate mother is, of course, neither the taxpayer nor the taxpayer's spouse, and typically is not a dependent of the taxpayer. Nor is an unborn child a dependent. Cassman v. United States, 31 Fed. Cl. 121 (1994) Thus, medical expenses paid for a surrogate mother and her unborn child would not qualify for deduction under § 213(a).

Under very limited circumstances, legal fees may be allowable as medical care expenses. In Gerstacker v. Commissioner, 414 F.2d 448 (6th Cir. 1969), legal expenses incurred to create a guardianship in order to involuntarily hospitalize a medically ill taxpayer were held to be deductible medical expenses because the medical treatment could not otherwise have occurred. However, legal expenses incurred in connection with a surrogate mother are typically not in connection with otherwise-deductible medical care expenses. Thus, the legal expenses likewise would not be deductible under § 213(a). (Associate Chief Counsel Letter #INFO 2002-0291, 12/31/02, Index 213.02-00)

<u>Homosexual Discrimination</u> - The biological father was capable of producing and providing healthy sperm with or without the involvement of an egg donor or a gestational surrogate; [2]-Because the costs attributable to the identification, retention, compensation, and care of the egg donor and the surrogate weren't incurred for the purpose of affecting any function of the father's body, he could not deduct them as "medical care" expenses under; [3]-The father's asserted right to IVF-and-surrogacy-assisted reproduction was not a fundamental right subject to equal rights protection; [4]-There was no evidence that the IRS's actual decision makers engaged in any intentional discrimination because the father was a homosexual, and he had not been treated differently from similarly situated heterosexual taxpayers. (Morrissey vs U.S. 871 F.3d 1260, Appeal Court, 7th Circuit, 9/25/2017)

<u>Note</u>: The surrogacy fee paid to the *surrogate mother is taxable to her and may be subject to SE Tax. IRC Sec* 61 states that all income is taxable unless specifically exempt by another section of the code and since it is providing personal services it may also be subject to SE tax if the surrogate is performing the service as a trade or business. Unfortunately surrogate agencies tell their clients it is not taxable.

Telephone - Included in medical expenses is the cost of special telephone equipment that lets a person who is deaf, hard of hearing or has a speech disability communicate over a regular telephone. This includes teletypewriter (TTY) and telecommunications device for the deaf (TDD) equipment and the repair of the equipment.

Television – Included in medical expenses is the cost of equipment that displays the audio part of television programs as subtitles for persons with a hearing disability. This may be the cost of an adapter that attaches to a regular set. It also may be the part of the cost of a specially equipped television that exceeds the cost of the same model regular television set.

Transplants – See "Organ Donors"

Travel – See page 07.02.12

Weight-Loss Programs - The IRS has concluded that expenses for certain weight-loss programs may be deducted as a medical expense. To be deductible, the program must be undertaken as treatment for a specific disease or diseases (including obesity) diagnosed by a physician. The costs are not deductible by taxpayers who participate in weight-loss programs to improve their general health or appearance. Further, the cost of purchasing diet food items is not deductible. *Rev. Rul. 55-261, 1955-1 CB 307, and Rev. Rul. 79-151, 1979-1 CB 116, are distinguished.*

*<u>Caution</u>***:** IRS Publication 502 takes a restrictive view of this deduction. It says that "You can include in medical expenses amounts you pay to lose weight for a specific disease diagnosed by a physician (such as obesity, hypertension, or heart disease). This includes fees you pay to join a weight reduction group and attend periodic meetings. ***You cannot include membership dues in a gym, health club, or spa*** *but you can include separate fees charged there for weight loss activities***."**

Thus, IRS Publication 502 seems to be saying that no portion of membership dues paid to a gym, health club or spa qualifies as a deductible medical expense in any case—even if the individual joined on the advice of a physician to lose weight to combat a disease.

Wig – A taxpayer can include in medical expenses the cost of a wig purchased upon the advice of a physician for the mental health of a patient who has lost all of his or her hair from disease. (IRS Publication 502)

DEPENDENTS

Medical Dependents - Medical expenses paid for dependents may be deducted by a taxpayer. To claim these expenses, the person must have been a dependent (qualified child or qualifying relative) either at the time the medical services were provided or at the time the expenses were paid. For medical purposes, an individual may be a dependent **even if his gross income precludes a dependency exemption**. *(IRC § 213(a);Reg §1.213-1(a)(3)(i))*

> ***Example*** *– The taxpayers' adult son was seriously injured in a motorcycle accident and did not have medical insurance. His parents paid all of his medical expenses for the year. Their son meets all of the dependent qualifications except for the gross income test. However, under the exception, they can still deduct the medical expenses on their 1040.*

- **Even if the other parent claims the dependency** - A child of divorced parents is considered a dependent of both parents (so that each parent may deduct the medical expenses he or she pays for the child.) A person generally qualifies as a dependent for purposes of the medical expense deduction if that person was a U.S. citizen or national, or a resident of the U.S., Mexico or Canada, and is either a:
  - *Qualifying child*, defined as a child who:
    1) Is the taxpayer's son, daughter, stepchild, foster child, brother, sister, stepsibling, or a descendant of any of them;
    2) At the end of the year was under age 19, under age 24 and a full-time student, or permanently disabled, and is younger than the taxpayer;
    3) Lived with the taxpayer more than half of the year; and
    4) Did not provide his or her own support for the year. **OR**
  - *Qualifying relative*, defined as a person:
    1) Who is the taxpayer's son, daughter, stepchild, foster child (or one of their descendants); brother, sister (or son or daughter of either); father or mother (or ancestor or sibling of either); step-brother or step-sister, step-parent, son- or daughter-in-law, mother- or father-in-law, sister- or brother-in-law; or any other person (except spouse) who lived legally with the taxpayer all year as a member of the household;
    2) For whom the taxpayer provided over half of that person's total support for the calendar year; and
    3) Who is not a qualifying child.

Note that the requirements not to have (a) filed a joint return and (b) gross income in excess of the exemption amount (for a qualifying relative) are not part of the definition of a medical dependent.

Child of Divorced or Separated Parents **-** If either parent can claim a child as a dependent under the rules for divorced or separated parents, each parent can include the medical expenses he or she pays for the child. This is true even if the other parent claims the exemption for the child. *(IRC § 213(d)(5))*

> ***Example*** *– Bob and Jan are divorced and have two minor children. Jan claims the children as dependents and Bob pays their medical insurance and other medical expenses. Under the exception, because Jan claims them as dependents, Bob can claim the medical expenses he pays.*

Support Claimed Under a Multiple Support Agreement **-** A multiple support agreement is used when two or more people provide more than half of a person's support, but no one alone provides more than half. Whoever is considered to have provided more than half of a person's support under such an agreement can deduct medical expenses paid. Any medical expenses paid by others who joined in the agreement cannot be included as medical expenses by anyone.

TRAVEL

Auto Travel – When using a vehicle for medical reasons, deduction is allowed at a specified rate (cents) per mile (see table) or for actual cost of gas and oil (not repairs, maintenance, depreciation, lease fees, etc.).

STANDARD MEDICAL MILEAGE RATE (Cents per mile)						
Year	2015	2016	2017	2018	2019	2020
Rate	23.0	19.0	17.0	18.0	20.0	

If any amount is not shown, it is not available at publication date

Trips - Amounts paid for transportation to another city may be included in medical expenses, if the trip is primarily for, and essential to, receiving medical services. Up to $50 per night for lodging may be included. A trip or vacation taken merely for a change in environment, improvement of morale, or general improvement of health cannot be included in medical expenses, even if the trip is made on the advice of a doctor.

Lodging - The cost of meals and lodging at a hospital or similar institution may be included if the main reason for being there is to receive medical care. Medical expenses may also include the cost of lodging not provided in a hospital or similar institution. The cost of such lodging while away from home may be included if all of the following requirements are met:

1) The lodging is primarily for and essential to medical care.
2) The medical care is provided by a doctor in a licensed hospital or in a medical care facility related to, or the equivalent of, a licensed hospital.
3) The lodging is not lavish or extravagant under the circumstances.
4) There is no significant element of personal pleasure, recreation, or vacation in the travel away from home. The amount included in medical expenses for lodging cannot be more than $50 for each night for each person. Lodging is included for a person for whom transportation expenses are a medical expense, because that person is traveling with the person receiving the medical care. For example, if a parent is traveling with a sick child, up to $100 per night is included as a medical expense for lodging. Meals are not deductible.

Moving – Where a taxpayer is required to permanently relocate for medical reasons, only transportation costs related to the taxpayer are deductible, and the travel costs for the taxpayer's family are not deductible. Other typical moving expenses such as van and storage are not deductible.

In addition, the traditional moving expenses for a job-related move are suspended for years 2018 through 2025.

REIMBURSEMENT

Total medical expenses for the year must be reduced by all reimbursements for medical expenses that are received from insurance, Medicare payments and other sources during the year. Although a policy may provide reimbursement only for certain specific medical expenses, the amounts received from that policy must be used to reduce total medical expenses, including those it doesn't reimburse.

Reimbursement Received in a Later Year - If reimbursement is received in a later year for a medical expense deducted in an earlier year, report as income the amount received from insurance or other sources that is equal to, or less than, the amount previously deducted as medical expenses. However, do not report as income the amount of reimbursement received up to the amount of the medical deductions, which did not reduce taxes for the earlier year. IRS Pub 525 provides worksheets that are useful for figuring the amount of the medical reimbursement or other itemized deduction recoveries that may be taxable.

MEDICAL & AMT

For purposes of AMT, medical expenses are deductible to the extent they exceed 10% (7.5% for 2017 and 2018 per the TCJA) of the regular tax AGI.

CALIFORNIA DIFFERENCES

California generally conforms to Federal. However, CA does not conform to the 10% of AGI federal medical expense reduction. It is 7.5% for all age groups in CA (AB 154 – 2015). Thus, for CA there is a continued AMT adjustment for medical expenses.

NOTES

DEDUCTIBLE TAXES

Overview

- Deductible taxes generally **must be imposed on the taxpayer**
- Must be **paid during the tax year**
- Taxes are **NOT deductible for AMT purposes**

TCJA

Pre-TCJA tax deductions are retained, but limited to a maximum of $10,000, except foreign real property taxes cannot be included. Thus domestic real property tax, foreign income tax (if not claimed as a tax credit), state and local income tax or sales tax as an alternative to state and local income tax, and personal property taxes are still allowed subject to the $10,000 maximum (IRC Sec 164 as amended by TCJA §11042). The combination of these taxes is quite frequently referred to as SALT (state and local taxes) by the press.

IRS RELEASES FINAL SALT REGULATIONS RELATED TO LIMITATION

New Law & Stuff

The IRS has released final regulations related to the SALT limitation imposed by TCJA and the attempts by various states, most notably NY, NJ and CT, to skirt the $10,000 ($5,000 MFS) limitation on the deductibility of state and local taxes. The technique these states attempted to use to get around the limitation was by offering their residents the ability to make a charitable contribution in return for a credit against their state or local taxes, thus converting a limited tax deduction into a fully deductible charitable contribution.

Background for the IRS' Position:

- Section 170(a)(1) generally allows an itemized deduction for any "charitable contribution" paid within the taxable year to a qualified charity which, under Section 170(c), includes a State, a possession of the United States, or any political subdivision of the foregoing, including the District of Columbia.
- Section 164(a) allows a deduction for the payment of certain taxes, including state and local, and foreign, real property taxes, and state and local income or sales taxes and personal property taxes.
- TCJA limited, for years 2018 through 2025, the itemized deduction for state and local taxes to $10,000 ($5,000 MFS) and does not allow a deduction for foreign real estate taxes.
- In 1986 the Supreme Court held that where the taxpayer receives something in return (quid pro quo) for a contribution, the contribution was not tax deductible.

The IRS proposed regulations in August 2018 that generally require a taxpayer that makes a payment or transfers property to or for the use of an entity described in Sec 170(c) for which the taxpayer receives or expects to receive a state or local tax credit in return for such payment, to reduce their charitable contribution deduction by the credit amount because the arrangement created a quid pro quo benefit. However, if the taxpayer received a state and local tax deduction instead of a credit, this would not be a quid pro quo unless the deduction exceeded the amount of the donor's payment or transfer.

The proposed regs also included the following de minimis exception: a state or local tax credit is not treated as a quid pro quo if the credit does not exceed 15% of the taxpayer's payment or 15% of the fair market value of the property transferred by the taxpayer.

The final regulations 1.170A-1(h)(3), released in June 2019, generally follow the proposed regulations. However, regarding the 15% exception the final regulations added that it applies only if the sum of the taxpayer's state and local tax credits received, or expected to be received, does not exceed 15% of the taxpayer's payment or 15% of the fair market value of the property transferred by the taxpayer.

In the preamble to the final regulations, the Treasury and the IRS indicated their concern that the regulations could create unfair consequences for some individuals who itemize their deductions and made a charitable contribution in return for tax credits. Consequently, simultaneously with releasing the final regs, the IRS published Notice 2019-12 saying they intend to publish a proposed regulation amending Treasury Regulation § 1.164-3 to provide a safe harbor for certain individuals who make a charitable contribution in return for tax credits. Under the safe harbor, an individual may treat as a payment of state or local taxes for purposes of Sec. 164 the portion of a payment for which a charitable contribution deduction is or will be disallowed under Regs. Sec. 1.170A-1(h)(3). To qualify for the safe harbor, taxpayers must itemize deductions for federal tax purposes and their total state and local tax liability for the year must be less than $10,000. Until the proposed regulations are issued, taxpayers may rely on Notice 2019-12.

The following examples are based on those in Notice 2019-12.

Example #1 – The taxpayer makes a payment of $500 to a local or state-run charity and receives a dollar-for-dollar credit against the taxpayer's state income tax credit. The taxpayer's state tax liability is $500 or more. For federal purposes the $500 contribution can be treated as a tax payment subject to the $10,000 SALT limitation.

Example #2 – The taxpayer makes a payment of $7,000 to a local or state-run charity and receives a dollar-for-dollar credit against the taxpayer's state income tax. Under state law the credit may be carried forward for three taxable years. The taxpayer's state tax liability for year 1 is $5,000. The taxpayer applies $5,000 of the credit against the year 1 state tax liability and carries the balance forward to year 2 where it is used against the taxpayer's year 2 state tax liability. The taxpayer's year 2 state tax liability exceeds $2,000. For federal purposes the contribution is treated as a tax payment, with the $5,000 treated as a year 1 tax deduction and the $2,000 treated as a year 2 tax deduction. Both the $5,000 and $2,000 are subject to the $10,000 SALT limitation.

Example #3 – The taxpayer makes a payment of $7,000 to a local or state-run charity. In return for the contribution, the taxpayer receives a real property tax credit of $1,750, which is 25% of the contribution, and applies it to his $3,500 property tax bill. For federal purposes the $1,750 is treated as a property tax payment subject to the $10,000 SALT limitation. The balance of the contribution, $5,250, can be deducted as a charitable contribution.

TESTS TO DEDUCT ANY TAX

The Details

1) The tax must be imposed on the taxpayer (except where local law does not specify on whom the tax is imposed). *(Rev Rul 62-149, 1962-2 CB 66)*
2) The tax must be paid during the tax year.

DEDUCTIBLE TAXES

Generally, the following taxes are deductible:

- *Real Property Taxes* - Home and Investment (but not including foreign real property for years after 2018) – **CAUTION** – Generally taxes are only deductible if the taxpayer is on title to the property, and if so, the taxpayer can deduct the portion he or she paid. A frequently raised question relates to equitable or beneficial interest permitting a deduction. Courts have allowed it in very narrow and limited applications. See chapter 7.05 for details of equitable ownership and the deductibility of mortgage interest and taxes.
- *Personal Property Taxes* - This includes the personal property taxes on boats, aircraft, vehicles, etc. (Many of the taxes are combined with and must be separated from registration fees.)
- *Foreign Income Taxes Paid* (**Note:** It is generally always better to take the foreign tax credit.)
- *State and Local Income or Sales Tax* - Taxpayers have the option of deducting on Schedule A the LARGER of:
  (1) State and local *income* tax paid, or
  (2) State and local *sales* tax paid during the year.

- CA 2.5% Early (pre-age 59-1/2) Withdrawal Penalties for premature distributions from retirement plans (Chief Counsel Memo 20072201F)

CAUTION
The 2.5% Early Withdrawal Penalty is included in the state balance due and may have already been deducted as part of state income tax paid. Don't double up!

DETERMINING THE AMOUNT OF THE DEDUCTIBLE INCOME TAX

The state and local income tax that may be deducted on federal Schedule A is a combination of the amounts paid, withheld and applied from a prior year's overpayment of state and local income taxes during the tax year. More specifically, these amounts include state and/or local:

- Estimated tax paid - for example, the installments generally paid in April, June and September of the current year (the year for which the deductions are being itemized), plus the payment usually made in January of the current year for the prior tax year (but see "Required Allocation. . ." below for potential required offset);
- Overpayments from a prior year's return that are applied to the current year's tax;
- Tax paid in the current year with the filing of the prior year's return (including extension payments) or with an amended return (but not penalties for underpayment of estimated tax, late filing or payment, or interest paid);
- Tax withheld on Forms W-2 (including state benefit funds contributions – see below), W-2G, 1099R, SSA-1099, 1099-INT, 1099-DIV, 1099-B, 1099-MISC;
- Tax withheld on real estate transactions; and
- Tax withheld and passed to a beneficiary via the state version of Schedule K-1 (fiduciary).

Indian tribal government - An Indian tribal government that is recognized by the Secretary of the Treasury as performing substantial government functions will be treated as a state for this purpose. Income taxes, real estate taxes and personal property taxes imposed by that Indian tribal government (or by any of its subdivisions that are treated as political subdivisions of a state) are deductible.

State benefit funds - An employee can deduct mandatory contributions to state benefit funds that provide protection against loss of wages. Mandatory payments made to the following state benefit funds are deductible as state income taxes. (IRS Pub 17, 2018 edition)

- Alaska Unemployment Compensation Fund
- California Nonoccupational Disability Insurance (SDI)
- New Jersey Nonoccupational Benefit Fund
- New Jersey Unemployment Compensation Fund
- New York Nonoccupational Disability Benefit Fund
- Pennsylvania Unemployment Compensation Fund
- Rhode Island Temporary Disability Benefit Fund
- Washington State Supplemental Workmen's Compensation Fund

Caution: Even though VPDI (voluntary plan disability insurance) is included in the California computation of excess (refundable) SDI payments when a taxpayer has more than one employer, it is not deductible as a State Benefit Payment for federal itemized deduction purposes.

Estimated Tax Must Be Reasonably Based – To be able to deduct state and local estimated tax payments, there must be a reasonable basis for making them. For example, a taxpayer knew that a state estimated tax payment she made in December would be completely refunded, but made the estimated tax payment anyway. No deduction is allowed on her federal Schedule A for the December estimated payment because it was not made in good faith on a reasonable basis.

Required Allocation Reduces State Tax Deduction – When a state tax refund is received that is for amounts paid in two or more years, the refund is prorated between the years so as to determine the amount of the refund that may be taxable and the amount of state tax paid in the current year that may be deductible. Typically this situation arises when a taxpayer makes a payment in January of Year 2 for Year 1's state estimated tax and receives a refund in Year 2 based on Year 1's state tax return. It also comes up when an extension payment is made in Year 2 for Year 1's state return, and subsequently a refund from Year 1's return is received in Year 2. In both instances, a portion of the state overpayment is deemed attributable to the payment in Year 2 and isn't taxable, but the nontaxable portion reduces the amount of the Year 2 payment when determining how much of that payment is deductible.

Example – Allocating Refund and Estimated Payments: *Guy's state estimated tax for 2019 is $6,000 and he has no income tax withholding; he made an estimated state tax payment of $1,500 on each of April 15, June 15, and September 15 in 2019 and January 15, 2020. In 2020 he received a state tax refund of $500 from his 2019 return. Guy itemized deductions on his federal returns in both years. The refund must be allocated between 2019 and 2020. Since 75% ($4,500 ÷ $6,000) of the estimated tax was paid in 2019 (and deducted on that year's Schedule A), 75% of the refund, or $375, is potentially taxable on Guy 2020 return. The remaining $125 of the refund is deemed to be from the January 2020 payment, and reduces Guy's deduction for state and local income tax on his 2020 Schedule A to $1,375 ($1,500 - $125), plus any other state and local income tax payments he made or tax withheld in 2020.*

STATE TAX REFUND ALLOCATION WORKSHEET (2019)

1. *2018 allocable* state income tax payments made in *2019*[1]…. _________
2. Total *2018* state income tax payments……………………………… _________
3. Divide line 1 by line 2 ……………………………………………………………………….. _________%
4. *2018* state refund[2] received in *2019* ………………………………….. _________
5. Multiply line 4 by line 3 – this is the portion of the state tax refund deemed nontaxable on *2019* return……………………………………. _________
6. Total state and local income tax payments made in *2019*[3]………………….. _________
7. Line 6 less line 5 – net state and local income tax payments potentially deductible on *2019* Schedule A ………………………… _________

[1]*For example, 2018 estimate installment paid in Jan.''19 and/or extension payment made April '19.*
[2]*include overpayment applied to 2019 estimated tax, refunds by check or direct deposit, and amounts applied to prior years' delinquencies.*
[3]*Include withholding, estimated tax payments and overpayment applied from prior year.*

Foreign Income Taxes – Credit or Deduction - Generally, a taxpayer can either take a deduction or a credit for income taxes imposed by a foreign country or a U.S. possession. However, no deduction or credit is allowed for foreign income taxes paid on income that is exempt from U.S. tax under the foreign earned income exclusion or foreign housing exclusion. Generally, the foreign tax on dividends is 15% and after making all the adjustments on Form 1116, the actual tax credit will be less, typically around 12%.

Practice Tip - Tax treaties with most countries set the rates at 15%. When there is a foreign tax withheld but the gross amount of the dividends or interest is not stated, the gross foreign income can be estimated by dividing the tax by 0.15.

Example: Assume the tax withheld is $60. $60/.15 = $400 = Estimated gross foreign income

Strategies

Strategy - Which is better, tax credit or tax deduction? If used as a deduction, the benefit would only be, assuming 37% tax bracket, 5.55% (.37 x .15) as compared to about 12% when used as a credit. Therefore, it is generally better to take the tax credit.

TAXABILITY OF STATE INCOME TAX REFUND

One of the questions that the TCJA raised was how the $10,000 SALT limitation would affect taxability of state income tax refunds. Would the IRS apportion the $10,000 between the types of taxes deducted? Or would it require that the taxes deducted be considered in a specific order, say first state income tax, then real estate tax, then other property tax? Or just the reverse order? Or would the taxpayer be able to choose the order? Finally, in late March 2019, in Rev. Rul. 2019-11, the IRS revealed that the taxability of refunds from 2018 (and returns (and future returns as long as the SALT limitation is in effect) should be based on the tax benefit rule.

Section 111(a) excludes from gross income amounts attributable to the recovery during the taxable year of any amount deducted in any prior year to the extent the amount did not reduce the amount of tax imposed by Chapter 1 of the Code. Section 111 partially codifies the tax benefit rule, which generally requires a taxpayer to include in gross income recovered amounts that the taxpayer deducted in a prior taxable year to the extent those amounts reduced the taxpayer's tax liability in the prior year.

According to the IRS, a taxpayer whose state and local tax deduction was impacted by the TCJA limitation needs to determine how much, if any, of their state tax refund is taxable by recalculating their 2018 itemized deductions and reducing their income tax deduction by the amount of the refund. If the reduction reduces their overall itemized deductions, then the refund will be taxable. The following are examples based on those in Rev Rul 2019-11.

Facts for the examples – all taxpayers are single and all itemized on their 2018 returns:

Taxpayer's Name	*Real property taxes paid in 2018*	*State & local income taxes paid in 2018*	*Other itemized deductions*	*Total Itemized Deductions claimed*	*State tax refund received in 2019*
Angie	*$4,000*	*$5,000*	*$5,000*	*$14,000*	*$1,500*
Brad	*$5,000*	*$7,000*	*$5,000*	*$15,000*	*$750*
Carolyn	*$5,000*	*$6,000*	*$5,000*	*$15,000*	*$1,500*
Devon	*$4,250*	*$6,000*	*$2,500*	*$12,500*	*$1,000*

***Example 1 – State tax refund fully taxable**: Angie's state and local tax deduction was not limited by the SALT limitation because her $9,000 total of SALTs was below the $10,000 limit. Including other allowable itemized deductions, Angie claimed a total of $14,000 in itemized deductions on her 2018 federal return. Had Angie paid only the proper amount of state income tax in 2018 ($7,500), her state and local tax deduction would have been reduced from $9,000 to $7,500 and as a result, her itemized deductions would have been reduced from $14,000 to $12,500, a difference of $1,500. Angie received a tax benefit from the overpayment of $1,500 in state income tax in 2018. Thus, she is required to include the entire $1,500 state income tax refund in her 2019 gross income.*

***Example 2 – State income tax refund not includible**: Brad's SALT deduction was limited to $10,000, so he could not deduct $2,000 of the $12,000 state and local taxes he paid. Had Brad paid only $6,250 ($7,000 – $750), the proper amount of state income tax in 2018, his SALT deduction would still have been $10,000 and his total itemized deductions would have remained $15,000. Brad received no tax benefit from the overpayment of $750 in state income tax in 2018, and therefore, he is not required to include the $750 as income on his 2019 return.*

***Example 3 – State income tax refund partially taxable**: Carolyn was limited to claiming $10,000 as a SALT deduction, so she could not deduct $1,000 of the $11,000 state and local taxes she paid. Had she paid only the proper amount ($4,500) of state income tax in 2018, her SALT deduction would have been reduced from $10,000 to $9,500 and as a result, her itemized deductions would have been reduced from $15,000 to $14,500. Carolyn received a tax benefit from $500 of the overpayment of state income tax in 2018. Thus, $500 of her state income tax refund must be included in her 2019 gross income.*

***Example 4 – Standard Deduction**: Devon's state and local tax deduction was limited to $10,000, so he could not deduct $250 of the $10,250 state and local taxes paid. In 2019, Devon received a $1,000 refund of state income taxes paid in 2018. Had Devon paid only $5,000, the proper amount of state income tax in 2018, his SALT deduction would have been reduced from $10,000 to $9,250, and, as a result, his itemized deductions would have been reduced from $12,500 to $11,750, which is less than the standard deduction of $12,000 that he would have taken in 2018. The difference between Devon's claimed itemized deductions ($12,500) and the standard deduction he could have taken ($12,000) is $500. He received a tax benefit from $500 of the overpayment of state income tax in 2018. Thus, Devon is required to include $500 of his state income tax refund on his 2019 federal return.*

Generally, professional-level tax software will make the calculation of the amount of the state income tax refund that's taxable. However, before Rev Rul 2019-11 was released some software companies had made the assumption that the IRS would require an apportionment of the SALT taxes. Therefore, tax preparers should carefully review any amount of state income tax refund proformaed as taxable for 2019 to be sure the computation follows the revenue ruling method.

DETERMINING THE AMOUNT OF THE SALES TAX

The sales tax is the actual amount paid during the year, which can be determined by the larger of:

(1) Actual receipts for purchases, **OR**
(2) The amount from the IRS income-based table PLUS sales tax paid when purchasing motor vehicles, boats and other items specified by the IRS.

Using the Optional Tables - The optional sales tax tables provide an amount of sales taxes paid based on a taxpayer's:

- **State of residence** - the state where the taxpayer physically resides;
- **Total available income** - AGI plus amounts not reflected in AGI that increase spendable income; and
- **Number of exemptions** - the number included on the taxpayer's tax return subject to a special rule for joint filers living in different states (see below).

The table for each state is based on the state's sales tax rate plus, if applicable, a uniform local sales tax rate. Taxpayers residing in a jurisdiction that imposes an additional sales tax rate are allowed a proportional increase in the sales tax deduction amount found in the optional sales tax tables. See the instructions to Schedule A for the sales tax tables, a worksheet and further information.

Spendable Income - The tables provide an amount of sales taxes paid based on the taxpayer's state of residence, total available income, and number of exemptions. The state of residence is the state where the taxpayer physically resides. Total available income is adjusted gross income (AGI) plus amounts not reflected in AGI that increase spendable income, such as:

- Worker's compensation,
- Public assistance payments,
- Military compensation earned in a combat zone,
- Tax-exempt interest,
- The refundable portion of refundable tax credits,
- The nontaxable part of SS, veterans' or railroad retirement benefits, and
- The nontaxable part of IRA, pension or annuity distributions.

Residing in Multiple States - A taxpayer who uses the tables and lives in different states during the tax year must multiply the amount determined under the tables for each state of residence by a fraction. Its numerator is the number of days the taxpayer was physically a resident in the state and its denominator is the number of days in the year. This is illustrated in an example in Notice 2005-31.

Items that can be added to the table amount - In addition to the amount determined under the optional tables and amounts added for local general sales taxes, taxpayers may deduct allowable actual state and local general sales taxes paid on the purchase of:

- Motor vehicles, Boats, Aircraft,
- Homes (including mobile and prefabricated homes), and
- Materials to build a home.

Definition of motor vehicle for sales tax deduction purposes – A "motor vehicle" includes any of the following, which may be either purchased or leased:

- automobile
- motorcycle
- motor home
- recreational vehicle
- sport utility vehicle
- off-road vehicle
- van
- truck

Strategies

Sales Tax and State Tax Refund - Under the tax benefit rule, the recovery of an amount deducted or credited in an earlier tax year is included in a taxpayer's income in the current (recovery) year, except to the extent the deduction or credit didn't reduce federal income tax (or alternative minimum tax). *(IRC §111(a))* For example, if a taxpayer who used the standard deduction instead of itemizing on his 2018 federal return receives a refund in 2019 from his 2018 state income tax return, that refund is not taxable on his 2019 federal return because he did not deduct the state income tax on the 2018 federal return. While the state will likely issue a Form 1099-G reporting the refund, the taxpayer does not include any of the refund amount on his federal return in this situation.

The recovery (refund) of state income tax is the most common itemized deduction recovery, but taxpayers may also recover amounts for previously deducted medical expenses, real property taxes or mortgage interest. Only itemized deductions that are more than the standard deduction are subject to the recovery rule (unless the taxpayer was required to itemize deductions). If total deductions on the earlier year return were not more than the income for that year, the recovery amount to include on the return for the recovery year is the lesser of the recoveries or the amount by which itemized deductions exceeded the standard deduction.

Where taxpayers have the option to deduct as an itemized deduction either the state (and local) income tax paid during the year or state and local sales tax, on first examination one would assume that (1) if the client chooses to deduct state income tax and subsequently receives a refund from the state, then that refund is taxable, and (2) if they choose to deduct sales tax instead of state income tax and receive a state refund for that year, that refund is not taxable. **Actually the IRS has taken a much more liberal approach to this issue**. Their position is that for purposes of the tax benefit rule the amount of refund includable in income is limited to the excess of the tax the taxpayer chose to deduct over the tax they did not choose to deduct.

Example – *Assume the taxpayer can choose an $8,000 state income tax deduction or a $7,000 state general sales tax deduction. Since the state income tax deduction is the larger, he chooses to deduct the state income tax. In the subsequent year he receives a $2,500 state income tax refund. Using the IRS's more liberal approach the tax benefit derived from deducting the $8,000 state income tax was only $1,000 more than if the $7,000 sales tax deduction was used. Thus the taxpayer benefits from only $1,000 of the state tax deduction and as a result only $1,000 of the $2,500 refund is taxable the next year.*

Strategy – In order to benefit from the IRS' liberal tax benefit rule position you must be able to compute the difference between the sales tax deduction and the state income tax deduction. Thus it is important (when there is a state tax refund and the state income tax deduction exceeds the sales tax deduction) to determine the allowable sales tax deduction for the client and record it in your file. Otherwise there is no way of computing the tax benefit rule.

Be Sure To Look Back – And take advantage of this tax benefit rule.

REAL PROPERTY TAXES (aka REAL ESTATE TAXES)

Delinquent Taxes at Sale - Do not divide delinquent taxes between the buyer and seller if the taxes are for any real property tax year before the one in which the property is sold. Even if the buyer agrees to pay the delinquent taxes, the buyer cannot deduct them. The buyer must add them to the cost of the property. The seller can deduct these taxes paid by the buyer. However, the seller must include them in the selling price.

Minister and Military Personnel Housing Allowances - A minister or a member of the uniformed services who receives an excludable housing allowance can still deduct all (within the $10,000 limitation imposed by the TCJA) of the real estate taxes paid on his/her home.

Homeowner Association (HOA) Dues - Where the components of the HOA fee are itemized and a portion of the fee includes common area real estate taxes, the taxpayer's share of the tax portion can be deducted as real property taxes on Schedule A. This also applies to condominium association fees.

Taxes for Local Benefits or Specific Services - Deductible real estate taxes generally do not include taxes charged for local benefits and improvements that increase the value of property. Sometimes referred to as Mello Roos Taxes, these include assessments for streets, sidewalks, water mains, sewer lines, public parking facilities and similar improvements. The taxpayer should increase the basis of the property by the amount of the assessment. Itemized charges for services, such as a monthly fee for trash collection and a per unit charge for water service, are not deductible, even though assessed against a specific property or payable to the real estate taxing authority. Local benefit taxes are deductible only if they are for maintenance, repair, or interest charges related to those benefits. If only a part of the taxes is for maintenance, repair, or interest, the taxpayer must be able to show the amount of that part to claim the deduction. If the part of the tax that is for maintenance, repair, or interest cannot be determined, none of it is deductible.

Therefore, it will be necessary for the return preparer to review clients' tax bills to identify potentially nondeductible amounts included in the taxes paid by the clients.

<u>*Exception:*</u> Service charges used to maintain or improve services (such as trash collection or police and fire protection) are deductible as real estate taxes if (2018 Pub 17, Page 167):

- The fees or charges are imposed at a like rate against all property in the taxing jurisdiction,
- The funds collected are not earmarked; instead, they are commingled with general revenue funds, and
- Funds used to maintain or improve services are not limited to or determined by the amount of these fees or charges collected.

Real Property Tax Need Not Be Ad Valorem Tax - In CCA 2012-18, the IRS stated that, contrary to what some of its forms and publications said (at that time), "*there is no statutory or regulatory requirement that a real property tax be an ad valorem* [based on value] *tax to be deductible for federal income tax purposes. Assessments on real property owners, based other than on the assessed value of the property, may be deductible if they are levied for the general public welfare by a proper taxing authority at a like rate on owners of all properties in the taxing authority's jurisdiction, and if the assessments are not for local benefits (unless for maintenance or interest charges).*"

The IRS has updated their forms and publications to reflect the Chief Counsel's interpretation.

Deduct in Year Paid – Many jurisdictions use a fiscal year for real property tax purposes. For example, a tax bill may say that it is for the July 1, 2019 -June 30, 2020 period. Most jurisdictions allow taxpayers to pay their real property taxes in two or more installments without penalty if made timely. So, for example, the taxpayer may make one payment in 2019 for the 2019-2020 tax bill and a second payment in 2020 for the balance of the bill. During 2019 that same taxpayer may have paid the second installment of their 2018-2019 bill if they didn't pay 100% of the 2018-2019 bill in 2018. What's deductible? For cash basis taxpayers, which is the method used by most individuals, only the taxes actually paid in the tax year are deductible. But clients oftentimes are confused about the payments, and could inadvertently misstate the amount paid when completing the organizer or planner that you provide. Therefore, best practice is to see the tax bills and confirm with the client what amounts were actually paid during the tax year of the return you are preparing. Many jurisdictions now include real property tax payment information on their web sites, a useful resource if the client doesn't have the information readily at hand.

Nondeductible Real Estate-Related Payments – The following items related to holding real estate are not deductible as itemized deductions: homeowner or condominium association dues (but see above for a limited exception), transfer or stamp taxes paid when a personal residence is sold, and rent increases or surcharges as a result of the landlord having to pay higher real estate taxes.

HERO Program - The Home Energy Renovation Opportunity (HERO) Plan provides financing for high-cost energy related improvements, such as solar panels, air conditioning, roofing, windows, lighting controls, and landscape-related products, for a taxpayer's home with principal and interest payments added to the taxpayer's property tax bill for the year. It is sometimes referred to as PACE financing.

The fact that the loan payments are included with the property tax payments has led to considerable misunderstanding with many real estate agents and others claiming the entire payment is tax deductible, which is not true. Although included in the tax bill, the HERO payments are separately stated and not deductible as property tax. However, the interest portion of the payment may be deductible as home mortgage interest.

The HERO program originated in Southern California but has since spread to almost all counties in California, and even to Florida and Missouri (Wall Street Journal 7/26/19); ads for this program pop up frequently on the Internet. Some contractors actively promote this program to individuals as a convenient way to finance home improvements since the HERO program has very liberal qualifications, with no money down, fixed rates and variable terms of 5-20 years. However, compared to today's interest rates, those charged by the HERO program are quite high, generally in excess of 8%, and individuals should explore other avenues of financing first.

TAX DEDUCTIONS AND AMT

Taxes deductible on Schedule A for regular tax purposes are NOT ALLOWED as a deduction against the AMT. They are subtracted on line 2a of Form 6251 (2018). If the client is being taxed by the AMT and not receiving any benefit from the deduction, the following strategies might be considered (Caution: Since the long-term capital gain rate is based on the taxpayer's regular tax bracket, there are rare circumstances where an individual transitioning between the 12% and 22% tax bracket might benefit from paying the taxes anyway – see strategy below).

Strategies

Defer Regular Tax-Deductible Tax Payments - Since no tax including state income, property tax, etc., claimed on Sch. A is ever deductible for AMT purposes, conventional wisdom would dictate deferring or accelerating tax payments to the subsequent or prior year if taxed by the alternative method in the current year. When deferring, care should be exercised in regards to late payment penalties and interest on underpayments for certain taxes. For example, if a taxpayer puts off paying their state tax liability until the subsequent year, will the benefit exceed the underpayment penalty? When accelerating tax payment, don't overlook Rev Ruling 82-208 (where IRS ruled that when a taxpayer makes an estimated state tax payment with no reasonable basis for belief that he owes any additional state income taxes, a deduction will be denied for the year of the payment).

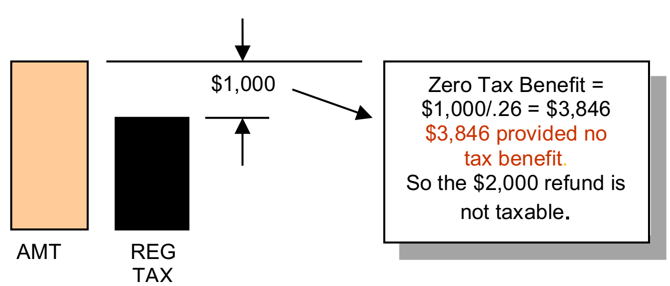
Strategies

Tax Benefit Rule – State Income Tax - When taxed by the AMT, part or none of the state income tax paid is allowed as a deduction. Therefore, to the extent the tentative AMT exceeds the regular taxable income, the taxpayer receives no benefit for the state tax deduction.

To the extent the taxpayer receives no benefit, the state income tax refund is not taxable for regular tax purposes in the subsequent year. Tax software may not make this computation, and the state's refund statement (Form 1099-G) absolutely does not take it into consideration. Therefore, if there is a state refund from the prior year and the taxpayer had some AMT tax, then part or all the refund is not taxable. *(IRC §111(a))*

Example: *In the prior tax year, the taxpayer itemized and his state income tax deduction* was *$5,000, his state tax refund was $2,000 and the AMT (add-on tax) was $1,000. Assuming he was in the 26% AMT bracket and his AMT tax was $1,000, he did not receive benefit from $3,846 ($1,000/.26) of the state income tax deduction. Therefore, any state tax refund up to that amount would not be taxable in the subsequent year. In this example, none of the $2,000 refund needs to be included into income the following year.*

Be Sure To Look Back – Was the taxpayer subject to the AMT on the prior year's return? If yes, apply the tax benefit rule and treat as taxable the amount of refund that reduced the regular tax taxable income below the alternative minimum taxable income (AMTI).



Schedule A Taxes Can Reduce AMT LTCG Tax - The LTCG 0%, 15% and 20% rates for AMT purposes are determined from the taxpayer's regular taxable income for the year (see chapter 2.04). Therefore, for 2019, to the extent a taxpayer's taxable income is at or below $39,375 (single or MFS), $52,750 (head of household), or $78,750 (married joint) – roughly the top of the 12% bracket – their LTCG will be taxed at 0% for **both** AMT and regular tax purposes. This makes the planning choices more difficult. The question being: is there more tax benefit maximizing the tax deduction or minimizing it through other strategies for taxes? Also see next strategy.

Capitalize Property Taxes for Unimproved & Unproductive Real Estate - Taxpayers who are affected by the AMT or who are simply taking the standard deduction can annually elect to capitalize the taxes that they paid on <u>unimproved and unproductive</u> real estate. This means forgoing the deduction and adding the amount of tax paid to the real property's cost basis (Reg Sec 1.266-1(b)(1)).

To make this election, the taxpayer must file a statement with the original return for the year of the election; this statement must specify the item(s) that the taxpayer has elected to capitalize (Reg Sec 1.266-1(c)(3)).

California does not allow a deduction for the following taxes:

- State Benefit Payments – SDI (or VPDI)
- State Early Withdrawal (2.5%) Penalty
- State Income Tax
- Sales Tax
- Foreign Income Taxes Paid (Foreign real property taxes <u>**are**</u> deductible.)

Foreign Property Tax – A frequent question this past tax season was the deductibility of foreign property tax for California purposes. Since California has not conformed to the TCJA itemized deductions changes, foreign property tax is still deductible for California purposes.

Nonconformity with TCJA – California has not conformed to the $10,000 limit for tax deductions for years 2018-2025 imposed by the TCJA. Therefore, if a taxpayer's real property and personal property taxes exceed $10,000, the taxpayer would be able to claim the full amount of the payments as a California itemized deduction.

CA Fire Prevention Fee – For several years, the California State Board of Equalization was required to charge an amount not to exceed $150 as a fire prevention fee (the fire fee) on each structure within a state responsibility area, i.e., an area of the state in which the financial responsibility of preventing and suppressing fires has been determined by the California Board of Forestry and Fire Protection to be primarily the responsibility of the state. This fee has not been deductible as a real property tax (IRS Chief Counsel Advice 201310029).

Effective July 1, 2017, through 2030, this fee is suspended, and as of January 1, 2031, the fee is repealed. (AB 398) These changes are part of the legislation extending the state's cap-and-trade program. It is the intent of the Legislature that moneys derived from the cap-and-trade program auctions or sales will replace the fire prevention fee to continue the funding of the fire prevention activities.

Use Tax Liability Takes Precedence – For purchases of tangible personal property made on or after January 1, 2015, in taxable years beginning on or after January 1, 2015, enacted Assembly Bill 2758 requires payments and credits on a California personal income tax, corporation franchise or income tax, partnership, limited liability company, estate or trust tax, or information return of a taxpayer that reports California use tax on the return to be applied first to satisfy the use tax liability, with any excess amount then being applied to the outstanding taxes, penalties, and interest owed to the Franchise Tax Board (FTB). Previously, the payments and credits had to be applied first to the income and corporate taxes, and associated penalties and interest, and then to the use tax liability.

Use Tax Payments – CA requires individuals who make out of state purchases, including in person, via the Internet by phone or mail order, to pay use tax on those purchases if California sales tax has not been collected by the seller of the item. Those not registered with the California Department of Tax and Fee Administration (CDTFA), formerly the Board of Equalization, can make the use tax payments on their CA income tax return. For those who have made out of state purchases and did not pay use tax, the CDTFA provides an optional use tax table, which is update yearly and included in the Form 540 instructions (see 2018 table below).

The intent of the table is to make it more convenient for taxpayers not registered with the BOE to comply with their use tax obligations by giving taxpayers the option to report their estimated use tax liabilities, determined from a use tax table, instead of calculating and reporting their actual unpaid use tax liabilities.

<u>Use Tax Entry Required</u> - A.B. 1593, signed by the governor October 7, 2017, requires taxpayers to enter a number – which can be a zero – on the use tax line of personal income tax returns beginning with 2017 returns. The act also requires taxpayers who enter a zero on the use tax line to check one of two boxes to validate they either already paid their use tax obligation directly to the CDTFA or that they do not owe use tax.

USE TAX WORKSHEET

1. Enter purchases from out-of-state sellers made without payment of California sales/use tax. If you are choosing the option to estimate the use tax due on individual, non-business items purchased for less than $1,000 each, only enter purchases of non-business items with a purchase price of $1,000 or more. ....$ __________
2. Enter the applicable sales and use tax rate.. __________
3. Multiply line 1 by the tax rate on line 2. Enter result here.........................$ __________
4. If you are choosing the option to estimate the use tax due on individual, non-business items purchased for less than $1,000 each, enter the use tax amount due from the Use TaxTable. If all of your purchases are included in line 1, enter zero.....................$__________
5. Add lines 3 and 4. This is your total use tax..$ __________
6. Enter any sales or use tax you paid to another state for purchases included on line 1

   See worksheet instructions below..$ __________
7. Subtract line 6 from line 5 but not less than zero. This is the total use tax due..........$ __________

   Enter the amount due on Form 540 line 91.

<u>Form Instructions</u>: Report purchases of items that would have been taxable if purchased from a California retailer. For example, include purchases of clothing, but not purchases of prescription medicine.

- *Include handling charges.*
- *Do not include any other state's sales or use tax paid on the purchases.*
- *Enter only purchases made during the year that correspond with the tax return you are filing.*
- *If you traveled to a foreign country and carried items back to California, generally the use tax is due on the purchase price of the goods you listed on your U.S. Customs Declaration less the $800 per-person exemption. This $800 exemption does not apply to goods sent or shipped to California by mail or other common carrier.*
- *If your filing status is "married/RDP filing separately," you may elect to report one-half of the use tax due or the entire amount on your income tax return. If you elect to report one-half, your spouse/RDP may report the remaining half on his or her income tax return or on the individual use tax return available from the California Department of Tax and Fee Administration (CDTFA).*

2018 ESTIMATED USE TAX LOOK-UP TABLE

(AGI)	USE TAX
less than $10,000	$2
$10,000 to $19,999	$7
$20,000 to $29,999	$11
$30,000 to $39,999	$16
$40,000 to $49,999	$21
$50,000 to $59,999	$25
$60,000 to $69,999	$30
$70,000 to $79,999	$34
$80,000 to $89,999	$39
$90,000 to $99,999	$44
$100,000 to $124,999	$52
$125,000 to $149,999	$63
$150,000 to $174,999	$75
$175,000 to $199,999	$86
More than $199,999	AGI by 0.046%

Note: *The 2019 Look-up Table was not available at publication date.*

STATE INCOME TAX DEDUCTION WORKSHEET – 2019

1. *2018* state estimated tax paid in January 2019 and/or state extension payment made in 2019 for 2018 return	__________
2. Offset for *2018* state tax refund (nontaxable) allocated to line 1 amount	<__________>
3. State income tax paid with *2018 return* filed in 2019 *	__________
4. Overpayment from *2018* state return applied to 2019 estimated tax	__________
5. 2019 state estimated tax paid during 2019	__________
6. State income tax w/h from 2019 W-2s	__________
7. SDI (not VPDI) w/h from 2019 W-2s	__________
8. Local income tax w/h from 2019 W-2s**	__________
9. State income tax w/h from 2019 Forms 1099-R and SSA-1099	__________
10. State income tax w/h from 2019 Forms W-2G and 1099-MISC	__________
11. State income tax w/h from 2019 Forms 1099-INT, 1099-DIV, 1099-B	__________
12. 2019 state income tax w/h on real estate sales (CA: Forms 592-B & 593)	__________
13. State income tax w/h passed through from trusts (2019 state Sch K-1)	__________
14. State income tax paid in 2019 for prior year original, amended, audited, and/or corrected returns*	__________
15. Other states income tax paid in 2019 not included above: __________________	__________
16. TOTAL 2019 – STATE INCOME TAX potentially deductible on Sch A – combine Lines 1 through 15	__________

*Do not deduct interest/penalty paid for late filing, late payment or underpayment of estimated tax, but do include any retirement plan 2-1/2% early distribution "penalty" included in the tax paid.
**On California W-2s, SDI may be shown in the "local w/h" box on Form W-2; do not duplicate entries with line 7.

NOTES

HOME MORTGAGE INTEREST

Overview

A deduction is allowed for interest paid on loans secured by a taxpayer's primary home and a second home. Loans are allocated to two categories: acquisition debt and home equity debt. Interest deductions are limited, depending on the category of the underlying debt.

- **Acquisition debt**
  - Debt incurred to purchase, construct or substantially improve principal or second home.
  - It must be secured by the home(s).
  - Initially limited, except for grandfathered debt, to: **$1,000,000** ($500,000 for MS) for loans made before December 16, 2017.
  - **$750,000** ($375,000 for MFS) for loans made after December 15, 2017.
  - Limit declines as mortgage is paid off.
  - Divorce - spouse buy-out debt is acquisition debt.
  - Term can be extended in refinance.
  - Deductible against both regular tax and the AMT.
- **Equity Debt After 2017**
  - No longer deductible as home mortgage interest regardless of when debt incurred.
  - May be traceable to other deductible uses.
- **Equity Debt Prior To 2018**
  - Can be used for any purpose.
  - Equity Debt of 1st and 2nd homes limited to **$100,000**
  - Limit remains at $100,000 even if paid down.
  - Deductible for regular tax but **NOT** AMT.
  - Generally cannot be allocated to other purposes.
- **Excess Debt**
  - Debt in excess of acquisition and equity debt limits.
  - Not deductible as home mortgage interest.
  - Excess debt can be traced to another deductible purpose.
- **Allocating debt**
  - Home mortgage interest cannot be allocated to other uses.
- **Unsecured election** - Treat secured debt as unsecured.
  - Interest allocated by using the general tracing rules.
  - Debt no longer secured by the home; thus none can be allocated back to the home.
  - Unnecessary 2018-2025
- **Home Under Construction -** Can be a qualified home during a construction period of up to 24 months.

New Law & Stuff

Mortgage Insurance Premiums – The 2018 Budget Bill extended this provision through 2017. Thus, unless extended again by Congress, no deduction is allowed for years after 2017. At press time there was little prospect of extenders getting passed.

TCJA

Acquisition Debt Limit Reduced - For years 2018 through 2025, the Act reduces the $1,000,000/$500,000 limit of home acquisition debt to $750,000 ($375,000 for married separate filers), except the lower limit won't apply to indebtedness incurred on or before December 15, 2017. That is, the $1,000,000/$500,000 cap continues to apply to acquisition mortgages on a primary and second residence already in existence prior to December 16, 2017. *(IRC Sec 163(h)(3)(F)(i)(II) as amended by TCJA §11043)*

Commentary: *The TCJA did not change the rule that interest on acquisition debt of the taxpayer's primary and a second residence is deductible. What changed was the lowered cap on the amount of acquisition debt for debt incurred after December 15, 2017.*

Example #1 - *In January 2019, Jim and Donna, who file a joint return, take out a $500,000 mortgage to purchase a main home. The loan is secured by the main home. In February 2019, they take out a $500,000 loan to purchase a vacation home. The loan is secured by the vacation home. Because the total amount of both mortgages exceeds $750,000, only 75% of the total interest paid is deductible.*

Pre-Dec. 15, 2017 Binding Contract Exception - Taxpayers who entered into a binding written contract before Dec. 15, 2017 to close on the purchase of a principal residence before January 1, 2018, and who purchase such residence before April 1, 2018 are not subject to the $750,000/$375,000 limitations and instead are subject to the $1,000,000/$500,000 limitations. *(IRC Sec 163(h)(3)(F)(i)(IV) as amended by TCJA §11043*

HOME ACQUISITION DEBT - Code Sec. 163(h)(3)(B)

The Details

Home acquisition debt is debt incurred to purchase, construct or substantially improve a taxpayer's principal home or second home. It must be secured by the home(s). *Combined home acquisition debt on the two homes can't be more than:*

- ***For Debt Incurred Before 12/16/18:*** *$1,000,000 ($500,000 for married separate).*
- ***For Debt Incurred After 12/15/2017:*** *$750,000 ($375,000 for married separate*).

***Home Debt Purchase Can Be Home Equity Debt As Well as Home Acquisition Debt* -** In a 2009 Chief Counsel Advice (CCA 200940030) the IRS made it clear that acquisition indebtedness that is incurred by a taxpayer to acquire, construct, or substantially improve a qualified residence can also qualify as home equity indebtedness under Code Sec. 163(h)(3)(C) to the extent it exceeds $1 million. As a result, a taxpayer can deduct interest paid on up to $1.1 million of the debt securing the purchase of his principal residence. This has been reinforced by Rev Ruling 2010-25. **However, this ruling has no effect for 2018 through 2025 when there is no deduction allowed for home equity debt.**

Refinanced debt can also qualify as home acquisition debt, if it doesn't exceed the amount of the old home acquisition debt just before the refinancing. Home acquisition debt is deductible against both the regular tax and the AMT.

HELOCs Can Be Home Acquisition Debt - Home equity lines of credit (HELOCs) can be home acquisition debt. The tax definition of home acquisition debt is debt to acquire, construct or substantially improve the taxpayer's home or second home. Just because the lender's title is equity debt does not preclude a HELOC from qualifying as a home acquisition debt.

Does $1 Mil of Acquisition Debt Limit Apply to Residence or Individual Co-Owners?

According to a Chief Counsel Advice (CCA 200911077) where two or more individuals own a residence with acquisition debt in excess of $1 Million dollars, the individuals jointly can only deduct the interest on the first $1 Million of acquisition debt.

An appeals court overturned an earlier Tax Court ruling (*C. J. Sophy, 138 TC No. 8, Dec. 58,965)* and took the same position the IRS put forward in the 2009 Chief Counsel Advice cited above. However. . .

The Ninth Circuit Court of Appeals reversed the Tax Court's decision and the IRS has announced its acquiescence with the Ninth Circuit's decision. Under this interpretation, unmarried co-owners are collectively limited to a deduction for interest paid on a maximum of $2.2 million, rather than $1.1 million, of acquisition and home equity indebtedness (Voss - IRB 2016-31, p. 193).

This can have significant implications for unmarried co-owners of a home.

TCJA It is presumed this will also apply to the new $750,000 acquisition debt limit.

<u>*Acquisition Debt Declines Over Time*</u> - Acquisition indebtedness is reduced as payments of principal (amortization) are made and cannot be increased by refinancing, except if indebtedness is incurred to substantially improve the residence. ***(H Rept No. 100-391, Part 2 (PL 100-203) p. 1033)*** Generally, acquisition debt will decline as illustrated in Figure #1. As shown, the original acquisition debt balance was $200,000, and it steadily declines over the term of the loan until it reaches zero at the end of the loan term (30 years). The amount and remaining term of the acquisition debt at any point in time always follows the curve of original acquisition debt.

> ***Example #2*** *- After 15 years, the acquisition debt in Figure #1 has declined to approximately $150,000 and only the interest on the $150,000 is treated as acquisition debt interest. After 30 years, the acquisition debt will have declined to zero, at which point there is no deduction for acquisition debt interest on the property.*

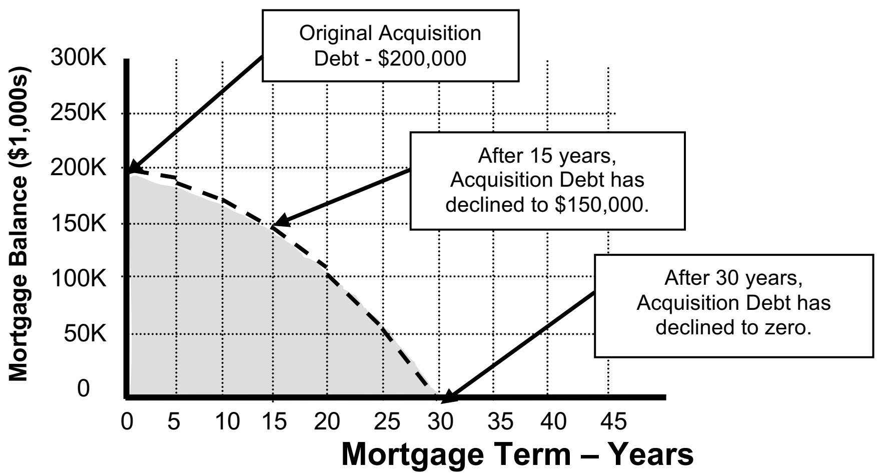

Figure #1

<u>Spousal Buy-Out Debt</u> ***- Notice 88-74, 1988-2 CB 385*** states that, in divorce situations, secured debt incurred to buy out a former spouse's interest in a home is acquisition debt. This rule is applied without regard to Code Section 1041, which treats certain transfers of property between spouses incident to divorce as nontaxable events.

<u>*Record of Original Loan Important*</u> **–** As illustrated in Figure #1, should a taxpayer refinance or add home equity debt, the only way to accurately determine the deductible amount of interest is by knowing the terms of the original acquisition debt. Therefore, it is important that clients retain that information and backup documents. A form for tracking home loans is included at the end of this chapter.

<u>Secured Debt</u> **-** *A* secured debt has three characteristics for purposes of the home mortgage interest rules:

1. It makes the taxpayer's interest in the home specific security for the loan;
2. If the taxpayer defaults on the loan, the home would provide satisfaction for the debt, as with a mortgage or deed of trust;
3. The debt must be recorded according to the applicable state law.

Refinancing Acquisition Debt - Prior to TCJA, taxpayers could refinance acquisition debt for the amount of the amortized balance with an unlimited extended term for the refinanced loan.

Pre-TCJA - Example #3: After 15 years, an original 30-year term acquisition debt of $200,000 has an assumed amortized balance of $150,000. Under law prior to TCJA, a homeowner could refinance that loan for $150,000 for any number of additional years and the debt continued to be acquisition debt.

Under TCJA, the $1,000,000/$500,000 limits continue to apply to refinances of acquisition debt incurred before 12/16/2017. However, TCJA only allows the refinanced acquisition debt to be treated as acquisition debt for the remainder of time left under the terms of the original loan (see exception below).

TCJA

Post-TCJA - Example #4: After 20 years, an original 30-year term acquisition debt of $200,000 has an assumed amortized balance of $100,000. The homeowner refinances the original loan for a new one with a balance of $150,000 and a term of 20 years. Because of TCJA's limits on loan terms, the refinanced loan will only be treated as acquisition debt for the first 10 years (30 years – 20 years) and the interest on the last 10 years of the refinanced loan will not be deductible.

If the principal of the original indebtedness was not amortized over its term, the loan's acquisition debt would continue to be treated as acquisition debt through the expiration of the term of the first refinancing of the indebtedness (or if earlier, the date that is 30 years after the date of the first refinancing). *(Code Sec. 163(h)(3)(F)(iii)(II)) as amended by TCJA §11043).*

Commentary: Where a home acquisition debt is refinanced for an amount more than the current amortized balance of the loan it will result in a loan that is part acquisition debt and part equity debt. When this occurs, you basically treat the debt as two loans, one being acquisition debt and the other equity debt. The interest is allocated, proportionally between the two debts, per Reg. Sec. 1.163-8T interest allocation rules, resulting in deductible acquisition debt interest and equity debt interest. See Chapter 215 – Interest Tracing Rules.

Example #5 – Post-2017 Refinance: *Married taxpayers have an acquisition debt loan with a balance of $175,000. They refinance that loan for $400,000 and do not use any of the proceeds to make improvements to the home. As a result the taxpayers have a mixed debt loan consisting of:*

Home Acquisition Debt…. $175,000
Home Equity Debt………… 225,000
Total Refinanced Debt……$400,000

The interest on the $175,000 portion of the debt is deductible as home acquisition debt interest. The balance of the refinanced debt, $225,000, is excess debt and the interest on this portion of the loan is deductible only if its use can be traced to another deductible use.

Increasing Acquisition Debt – If a home mortgage debt is refinanced, to the extent the new debt replaces the prior acquisition debt and any additional loan proceeds are used to substantially improve the residence, the new debt continues to be home acquisition debt so long as the $1 Million/$750,000 acquisition debt limits are not exceeded.

Refinanced Debt Loan Term – If the term of home acquisition debt is extended beyond its original term, the following rules apply:

- *Refinanced before December 16, 2017* – Where a home acquisition debt was refinanced **before** December 16, 2017, the loan continues to be home acquisition debt for the term of the refinanced loan.

Example #6: *In 2015, the taxpayer refinanced his home acquisition loan, which at the time had an unpaid balance of $835,000 and was amortized over a 25-year period ending in 2030. The new loan is amortized over a 30-year period ending in 2045. The interest on the loan continues to be qualified home mortgage interest until the loan is paid off in 2045.*

- *Refinanced after December 15, 2017* - Where a home acquisition debt was refinanced **after** December 15, 2017, the loan only continues to be home acquisition debt for the term of the original loan.

Example #7: *In 2019, the taxpayer refinanced his home acquisition loan, which at the time had an unpaid balance of $835,000 and was amortized over a 25-year period ending in 2030. The new loan is amortized over a 30-year period ending in 2049. However, the interest on the loan only continues to be qualified home mortgage interest until 2030, the date the original refinanced loan would have been paid off.*

HOME EQUITY DEBT - Code Sec. 163(h)(3)(C)

For Years Before 2018 - Home equity interest was deductible for debt secured by a taxpayer's principal or second home. *The total equity debt on the TWO HOMES couldn't be more than:*

- ***$100,000*** ($50,000 for married separate - Code Sec. 163(h)(3)(C)(ii)), or
- The difference between the acquisition debt on the home and the FMV of the home, if smaller.

There was generally no limitation on the use of home equity debt proceeds; the funds could have been used to purchase a car, pay personal debts, etc., and before 2018 the interest on the debt was still deductible on Schedule A within the limits above. ***Caution: Home equity debt was NOT deductible against the AMT*** (See home mortgage interest and AMT later in this chapter).

For years 2018 through 2025 - The deduction for home equity debt interest is suspended. This applies to both primary and second homes and includes home equity debt incurred prior to TCJA. *(IRC Sec 163(h)(3)(F)(i)(I) as amended by TCJA §11043)*

Commentary: *This law change can have an adverse impact on individuals who used their home as a piggy bank for personal expense purposes. Where the home loans have been refinanced and are partially acquisition debt and partially equity debt, tax preparers will still have to determine what part of the interest is attributable to the acquisition portion of the loan and which part is attributable to the now non-deductible equity portion.*

Commentary*: HERO (aka PACE) program loans are loans secured by the home via a property tax lien. The loans finance substantial energy-related improvements to the home and as such are acquisition debt, and thus the interest is acquisition debt interest, which continues to be deductible under TCJA up to the $1 Million/$750K acquisition debt limits. See also page 07.05.14.*

DETERMINING & TRACING EXCESS DEBT SECURED BY THE HOME

Interest on debt secured by the home must first be allocated to the home to the extent permitted, and any excess can be allocated to the use of the funds per the general tracing rules of Reg §1.163-8T (See Chapter 2.15 - Interest Tracing). Per the tracing rules, where the use of the loan funds can be traced to another purpose, the interest on the excess debt can be allocated to that use.

Example #8 – Allocating Refinanced Debt - *The original purchase money loan was refinanced with an average balance for the year of $300,000. The acquisition debt had declined to $150,000 at the time of the refinance and the interest on the refinanced debt was $10,000 for the year. The interest would be allocated as follows:*

	Debt	***% of Total***	***Interest Allocation***
1. Total Home Debt	*$ 300,000*	*100.00%*	*$10,000*
2. Allowable Acquisition Debt	*<150,000>*	*50.00%*	*$ 5,000*
3. Excess Debt	*$ 150,000*	*50.00%*	*$ 5,000*

The excess generally will not be deductible unless some portion of the loan proceeds could be traced to another tax-deductible purpose. If so, to the extent the proceeds can be traced to that other purpose, the excess can be allocated in accordance with the general interest tracing rule (See chapter 2.15). To illustrate how the interest on the excess debt might be allocated, consider the following situations:

Example 8(a) – ***Proceeds Used for Business*** *- Because the taxpayer could obtain a lower interest rate on a home loan, he refinanced his home loan to obtain the $150,000 needed to finance the startup of a Schedule C business. Since the entire debt is secured by the home, the interest on the refinanced debt must first be allocated to home acquisition and home equity debt. And, since for years 2018 through 2025 equity interest is not deductible as home mortgage interest, the traceable excess debt is $150,000 ($300,000 - $150,000) and can be traced to the taxpayer's Schedule C business.*

Example 8(b) – ***Proceeds Used for Mixed Uses –*** *Assume the taxpayer in example #8(a) used the additional $150,000 proceeds for the following purposes: $35,000 as a down payment on a rental property, $25,000 for his child's college tuition, $50,000 for a new car, and the balance placed in a savings account. The taxpayer could choose to allocate the excess debt of $150,000 in any manner he chooses (Reg §1.163-10T(e)(4)(iii)) between the rental, higher education or investment purposes to maximize his interest deduction; he needs to keep in mind the passive loss, AGI and net investment income limitations that could also further limit the allocated interest deduction.* ***Caution:*** *In this scenario, none of the amount allocated to higher education loan interest is deductible because mixed-use loans are not qualified as education loans. (Reg § 1.221-1(e)(4), EX (6)*

Any Reasonable Method OK In Determining Excess Debt **-** Although the current law limiting the deduction of mortgage interest has been on the books since enactment of the Tax Reform Act of 1986, as amended by the 1987 Omnibus Budget Reconciliation Act, the proposed and temporary regulations issued in 1987 became effective before the OBRA amendment and have not been updated since. According to the IRS in a Chief Counsel Advice, until regulations are issued, taxpayers may use any reasonable method of allocating debt in excess of the acquisition and/or home equity debt limitation. This includes methods described in Reg. § 1.163-10T

Also, using any of these methods does not require making the debt-not-secured-by-residence election of Reg. § 1.163-10T(o)(5), but if the "not secured by" election is made, it applies to the entire amount of the debt, not just a part. When the election isn't made, only the part of the debt in excess of the limitation is traced to how the debt proceeds are used. *(CCA 201201017)*

EFFECT OF HOME IMPROVEMENTS

Home acquisition debt includes debt incurred to purchase, construct or ***substantially improve*** a taxpayer's principal home or second home. Currently, there is no official explanation of the type or degree of work that's required for a substantial improvement. Presumably, the "improvement-versus-repair" rules would be relevant in determining whether there was a substantial improvement for purposes of the acquisition indebtedness rule.

Debt incurred to substantially improve the home will increase the acquisition debt. The home improvement debt can be:

- A separate loan secured by the home, or
- Part of a refinanced home acquisition debt. However, when the home improvement debt is part of a refinanced qualified home acquisition debt then the period of time for which the interest on the debt may be deductible is limited to the term of the original home acquisition debt. See Refinanced Debt Loan Term on page 7.05.04.

LOAN PROGRESS CHARTS

The following are abbreviated loan progress charts for both 30-year and 15-year loans by interest rate. These charts are for illustration purposes only. The balance of the loan is shown as a percentage of the original loan.

> ***Example #9*** *– A 30-year loan with an initial balance of $100,000 and a 7% interest rate will have a balance of $ 53,197 ($100,000 x .53197) at the end of 20 years.*

30-Year Loan Progress Chart

%	5	10	15	20	25	30
3	88.906	76.019	61.051	43.662	23.463	0
4	90.448	78.784	64.543	47.154	25.923	0
5	89.935	78.912	64.765	46.610	23.310	0
6	91.398	81.451	68.035	49.939	25.529	0
7	92.692	83.771	71.125	53.197	27.783	0
8	93.825	85.871	74.019	56.362	30.056	0
9	94.810	87.755	76.708	59.413	32.334	0
10	95.660	89.433	79.189	62.333	34.601	0

15-Year Loan Progress Chart

%	5	10	15
3	71.518	38.433	0
4	73.059	40.164	0
5	68.662	34.339	0
6	70.288	35.932	0
7	71.870	37.535	0
8	73.406	39.145	0
9	74.892	40.759	0
10	76.329	42.370	0

THE MODIFIED FORM 1098 IS A GAME CHANGER

Poorly educated tax professionals routinely enter into their tax return preparation program the entire amount reported on their clients' 1098 forms as fully deductible home mortgage interest, oblivious to or intentionally ignoring the fact that not all of the interest reported on the form may be deductible due to the acquisition and equity debt limitations. The IRS modified Form 1098 beginning in 2016 to ferret out homeowners who are deducting excess home mortgage interest.

New Information:

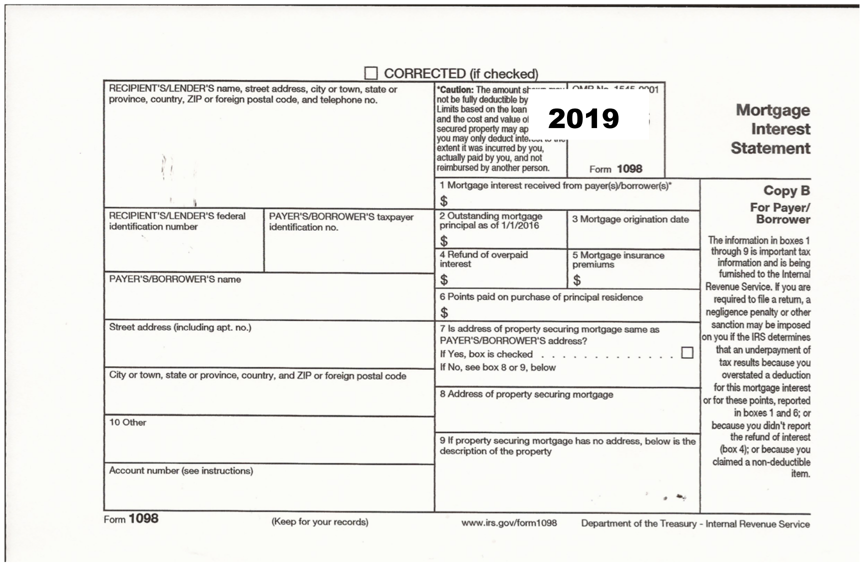
Box 2: – Outstanding Mortgage Principal - generally as of Jan. 1 of tax year or origination date if mortgage originated in tax year

Box 3: – Mortgage origination date

Box 5: – Mortgage Insurance Premiums (not deductible for 2018 or 2019 unless revived by Congress)

Boxes 7, 8, and 9: – Address information of property securing the mortgage.

This extra information will provide practitioners AND the IRS with additional tools to determine whether the loan is acquisition or equity debt, whether the loan balance exceeds the statutory home acquisition or equity debt limits, and whether the amount of interest deductible as home mortgage interest has been (or needs to be) limited. It will also help in figuring out whether the 1098 is associated with the home of the taxpayer.



CORRECTED (if checked)

RECIPIENT'S/LENDER'S name, street address, city or town, state or province, country, ZIP or foreign postal code, and telephone no.

*Caution: The amount sh... not be fully deductible by... Limits based on the loan and the cost and value o... secured property may ap... you may only deduct inte... extent it was incurred by you, actually paid by you, and not reimbursed by another person.

OMB No. 1545-0901 | 2019 | Form 1098

Mortgage Interest Statement

1 Mortgage interest received from payer(s)/borrower(s)* $

RECIPIENT'S/LENDER'S federal identification number | PAYER'S/BORROWER'S taxpayer identification no.

2 Outstanding mortgage principal as of 1/1/2016 $ | 3 Mortgage origination date

4 Refund of overpaid interest $ | 5 Mortgage insurance premiums $

PAYER'S/BORROWER'S name

6 Points paid on purchase of principal residence $

Street address (including apt. no.)

7 Is address of property securing mortgage same as PAYER'S/BORROWER'S address? If Yes, box is checked . . . . If No, see box 8 or 9, below

City or town, state or province, country, and ZIP or foreign postal code

8 Address of property securing mortgage

10 Other

9 If property securing mortgage has no address, below is the description of the property

Account number (see instructions)

Copy B For Payer/ Borrower

The information in boxes 1 through 9 is important tax information and is being furnished to the Internal Revenue Service. If you are required to file a return, a negligence penalty or other sanction may be imposed on you if the IRS determines that an underpayment of tax results because you overstated a deduction for this mortgage interest or for these points, reported in boxes 1 and 6; or because you didn't report the refund of interest (box 4); or because you claimed a non-deductible item.

Form **1098** (Keep for your records) www.irs.gov/form1098 Department of the Treasury - Internal Revenue Service

ALLOCATING HOME MORTGAGE INTEREST

Debt secured by a taxpayer's home is by definition home mortgage interest and **to the extent it is allowed as home mortgage interest,** it **CANNOT BE ALLOCATED.** However, the **EXCESS** (the amount not allowed as home mortgage interest), as discussed earlier, can be allocated to other uses per the general interest allocation rules. As an alternative, the taxpayer has the option to treat the mortgage as not secured by the home (see "Election to Treat Secured Debt as Unsecured" below.)

Office-in-home (Business use of home) - Where there is business use of a home, the acquisition debt is secured by both the home and the office in the same ratio as the home and business use and is not being allocated. Therefore, the interest paid on the portion of the loan secured by the office becomes home office interest, deductible on the same form or schedule on which the office is deducted, and is not treated as allocated interest secured by the home. On the other hand, <u>in years that allowed a home equity interest deduction</u>, no portion of any allowable interest on equity debt can be deducted as business interest and all of the allowable equity interest is only allowed on Schedule A.

Example #10 – Business Use of the Home – *Assume the taxpayer uses 10% of his home for business for his sole proprietorship. The interest for the year on his $200,000 acquisition debt is $12,000, and the interest on the home equity debt of $50,000 is $3,000. The proceeds of the equity debt were used to pay off credit cards and take a vacation.*

<u>For years other than 2018-2025</u>, the interest will be deductible as follows:

	Total	***Schedule A***	***Schedule C***
Acquisition Debt Interest	*$12,000*	*$10,800*	*$1,200*
Equity Debt Interest	*$ 3,000*	*$ 3,000*	

<u>For years 2018-2025 the breakdown is:</u>

	Total	***Schedule A***	***Schedule C***
Acquisition Debt Interest	*$12,000*	*$10,800*	*$1,200*
Equity Debt Interest	*$ 3,000*	*$ 0*	*$ 0*

Because the proceeds of the equity debt aren't traceable to the business, no part of the interest paid on that debt is deductible on Schedule C.

ELECTION TO TREAT SECURED DEBT AS UNSECURED

Taxpayers can elect to treat any secured debt as unsecured. *(Reg. 1.163-10T(o)(5))* The **election is irrevocable without IRS consent**. By making the election, the interest on the loan can be allocated to use of the proceeds by using the general tracing rules of Reg §1.163-8T.

Caution: By definition, home mortgage debt must be secured by the home. If this election is made, the debt is no longer treated as secured by the home. Therefore, if this election is made, no portion of the interest on the debt can be allocated back to the home.

Unsecured Election Serves No Purpose During 2018 -2025

This election was useful prior to tax reform when the interest on the first $100,000 of equity debt had to be deducted as home equity interest on Schedule A. Electing the debt to be unsecured permitted the tracing rules to be applied to the entire debt, allowing more home equity debt to be traced to another use. However, with the advent of tax reform it is unnecessary since any refinanced home acquisition debt continues to be home acquisition debt and any additional debt is traced to its use using the general tracing rules.

CAUTION: If before the passage of TCJA (before 2018) a taxpayer had utilized the unsecured election, that election is irrevocable without IRS consent and thus the loan continues to be treated as unsecured, and since home acquisition mortgage debt is defined as being secured by the home, none of the interest allocated to home acquisition mortgage debt is deductible on Schedule A or anywhere else.

DEFINITION OF A QUALIFIED RESIDENCE

A qualified residence is a taxpayer's principal home and one other residence. The homes can include a house, co-op apartment, condo, mobile home, house trailer, motor home, timeshare property or houseboat. Taxpayers with more than two homes can choose the property they want for a second home on a year-by-year basis, but for purposes of the mortgage interest rules they can't have more than one second home at any given point in time. A taxpayer does not have to occupy a second home in order for it to qualify. However, if the second home is rented, the vacation home use requirements must be met, i.e., the home qualifies as the taxpayer's home only if it is used by the taxpayer more than the greater of: (1) 14 days, or (2) 10% of the days rented.

NONCONVENTIONAL HOME

The term "nonconventional home" refers to homes that are used on a transient basis such as a motor home and boat. The interest, if otherwise qualifying for the home acquisition mortgage interest, is deductible on Schedule A. However for AMT purposes the following applies:

- *For years prior to 2018* – Per the instructions for the 6251, nonconventional home acquisition debt interest was not deductible for AMT purposes.
- *For years 2018 through 2025* – The instructions for the 6251 no longer make reference to "nonconventional home" interest and there isn't an adjustment line for it on the form. It is therefore assumed there is no longer a restriction for deducting nonconventional home acquisition debt interest.

HOME MORTGAGE INTEREST AND AMT

Home mortgage interest is reported by the lender on Form 1098 and includes all interest from debt secured by the taxpayers' home or homes. Lenders are not required, nor do they attempt, to classify interest as acquisition debt interest, home equity debt interest, nonconventional home, etc. That task is up to the taxpayer and his/her tax return preparer. Use the table below to determine where the home mortgage interest is deductible

Debt	Schedule A	AMT
Acquisition Debt	YES	YES
Acquisition Points	YES	YES
Home Equity Debt (2018 – 2025)	NO	NO
Amortized Refinance Points [1]	YES	YES
Nonconventional Home Interest (Years before 2018)	YES	NO

(1) *Not all amortized refinance points are deductible. If the refinance exceeds the sum of the acquisition debt and the home equity debt, then only the portion of the amortized points representing debt on which the interest is deductible may be used.*

REVERSE MORTGAGE INTEREST

A reverse mortgage is available to an individual age 62 and older. The reverse mortgage must be secured by a first trust deed. Thus, any existing loans have to be paid off with separate funds or with the proceeds from the reverse mortgage. The amount that can be borrowed is based upon age. The older the borrower, the greater amount that can be borrowed and the lower the interest rate. The rules are complicated and depend upon the type of current debt owed by the potential borrower. When a reverse mortgage is paid off, there is accrued interest to be paid along with the loan balance payoff and some of that interest may be deductible.

There are a number of factors to consider in determining whether accrued reverse mortgage interest is deductible and by whom. Under TCJA equity debt interest is not deductible during the years 2018 through 2025. However, if the reverse mortgage refinanced an existing home acquisition debt then when the reverse mortgage loan is paid off a prorated portion of the accrued interest will be deductible home acquisition debt interest.

We generally think of a reverse mortgage as providing for the living expenses of the taxpayers. As we have learned in taxes, always expect the unexpected. The tracing rules apply as with any debt and character of the debt is determined by the use of the funds. Making the assumption that the use is all personal and the interest non-deductible may not be correct. Who knows, the taxpayer may be using the proceeds for his business or investment.

The deductibility of reverse mortgage interest follows the same limits as conventional loans **except the deduction is limited to what would have been deductible each year if the borrower had paid it** and accrues until the loan is paid off, at which time it is deductible.

Debtor Pays Off the Mortgage - If the debtor pays off the reverse mortgage, the deductible accrued interest may be limited. In the case where none of the mortgage is considered acquisition debt, the interest on debt up to the $100,000 limit would be deductible as equity interest if paid before 2018. After 2017 and through 2025 equity interest is no longer deductible. The deductibility of any excess debt would be based upon the interest tracing rules (Temp Reg. Sec 1.163-8T). Generally, reverse mortgage payments are used for personal expenses of the borrower, and therefore the interest on the excess debt is generally not deductible.

> ***Example #11:*** *June, age 70, who owned her home free and clear, took out a reverse mortgage on her home. She subsequently came into a sizeable inheritance and decided to pay off the mortgage. The balance on the loan was $155,000, of which $45,000 was interest and $110,000 principal. Since the principal exceeded the $100K limit for equity debt, the interest will have to be allocated between equity debt interest and excess debt interest. In addition any equity interest paid after 2017 and before 2026 would not be deductible. Any excess debt interest may or may not be deductible depending upon the use of the funds by the borrower.*

A reverse mortgage interest after the decedent's death is allowable as a deduction in respect of a decedent (DRD), deductible under IRC §691(b) either by the estate or by the beneficiary. If the estate is not liable for the obligation then the person who inherits the property from the estate (subject to the obligation) is entitled to the deduction (IRC §691(b)(1)(B)). In either case the interest deduction is limited to what the decedent could have deducted, so the interest limitations apply and equity interest paid after 2017 and through 2025 would not be included.

The decedent's estate pays off the mortgage – Even though the interest accrued on the reverse mortgage before the borrower's death and was paid after the borrower's death, it qualifies as a deduction in respect to the decedent (DRD). Therefore, the estate can deduct the interest on its income tax return (Form 1041) as a DRD (Sec 691(b)(1)(B)). However the amount deductible by the estate is limited to the interest that would have been deductible in the year to which it was attributable based upon the character of the debt (Sec 163(b)(2)). And if the payoff occurs in 2018-2025, any portion of the accrued interest that would have been equity debt isn't deductible.

The beneficiary, who inherits the home, pays off the mortgage – Even though the interest accrued on the reverse mortgage before the borrower's death and was paid after the borrower's death, it qualifies as DRD (Sec 691(b)(1)(B)). Therefore, the beneficiary, if itemizing deductions, may deduct the interest on his or her 1040 income tax return as a DRD. However, the amount deductible by the beneficiary is limited to the interest that would have been deductible in the year to which it was attributable based upon the character of the debt (Sec 163(b)(2)) and the 2018 through 2025 suspension of equity debt.

A beneficiary who inherits a home (subject to a reverse mortgage) is required to either sell the home to satisfy the reverse mortgage debt or pay it off by some other means. If the beneficiary pays off the reverse mortgage by obtaining a new loan, to the extent the new loan is used to pay off the reverse mortgage, it would have the following treatment:

a. Qualified home acquisition debt if the beneficiary uses the home as a first or second home and the loan is secured by the property, ((Code Sec. 163(h)(3)(A); Reg. § 1.163-10T(j)(1)).

b. If not used as a home or second home determine treatment under the general tracing rules for the use of the funds (Reg. § 1.163-8T(a)(3), Reg. § 1.163-8T(c)(1)).

MULTIPLE OWNER-OBLIGOR

Paid From a Joint Checking Account – In Chief Counsel Advice 201451027, where home mortgage payments are made from a joint checking account, with two equal owners, the payments are presumed to be made equally by each owner without competent evidence to the contrary. The CCA uses as reference Rev Rul 59-66, which found that funds paid from a joint checking account of a husband and wife were presumed to have been paid equally by the spouses when a husband and wife file separate returns.

All Paid By One Owner-obligor - Chief Counsel Advice 201451027 concludes that a person who is jointly and severally liable on a home mortgage debt is entitled to deduct all the allowable interest on that debt, provided that person actually pays all the interest.

Death of an Owner-obligor – In determining the amount of interest deductible on the decedent's return, the general rules regarding payment from joint or separate accounts, and joint liability should apply. If the decedent paid interest from a joint account before death, his return should reflect one-half of the interest paid from the joint account before the time of death, in the absence of evidence that the interest was paid from the decedent's separate funds (CCA 201451027).

Multiple Taxpayers Liable on the Mortgage –Where both taxpayers are liable on the mortgage, both are entitled to claim the mortgage interest deduction to the extent of the mortgage interest paid by either taxpayer. If the mortgage interest is paid from separate funds, each taxpayer may claim the mortgage interest deduction paid from each one's separate funds. If the mortgage interest is paid from a joint bank account in which each has an equal interest, under Rev Rul 59-66, it would be presumed that each has paid an equal amount absent evidence to the contrary (CCA 201451027).

Co-owners - CCA201451027 concludes that if co-owners of a house are both liable on a mortgage, each one may take a deduction for the amount each one pays, subject to the limitations and requirements of deducting mortgage interest.

Interest Expense Deductions Related to Co-Owned Property - An interest expense deduction is available only to those who are primarily liable on an underlying debt. However, when two or more persons are jointly and severally liable for a debt, each is primarily liable for the debt; each is entitled to a deduction for the interest on that debt that he/she pays. When co-signers make a gift to another co-signer who paid the interest, this has no effect on the rule.

A father was allowed to deduct the interest he paid on a note which he co-signed with his son as evidence of a student loan to the son for tuition, fees, etc. ***(Rev Rul 71-179, 1971-1 CB 58).***

A father was allowed to deduct mortgage interest paid on a property held in common with his daughter. It didn't matter that he had temporarily conveyed legal title to his daughter to avoid creditors' claims ***(Conroy, Thomas, (1958) TC Memo 1958-6).***

Where mortgaged property is owned jointly, and joint owners are jointly liable on the mortgage, each owner is entitled to a deduction for the mortgage interest he/she actually pays out of his own funds.

However, when there isn't joint liability on the mortgage or where there is right to reimbursement, and one joint owner pays all or part of the mortgage interest, the deductibility is the same as under the rules for taxes (see Chapter 1.07).

Rev Rul 78-362, 1978-2 CB 248 - Are a joint tenant's monthly payments of a mortgage debt on property held jointly regarded as gifts to the other joint tenants?

> **FACTS:** An individual provided funds for the down payment for a purchase of real property and then conveyed two-thirds of the property to his two children; the property was held in joint tenancy. The individual subsequently made payments on the mortgage without expecting reimbursement from the children.
>
> **FINDING:** Transfer of the property was termed a gift to each child--after the transfer, the taxpayer and each of the children held a one-third interest in the property. The subsequent mortgage payments were also considered monthly gifts to each child, each equal to one-third of the mortgage payment. ***Amundson, Brent, (1990) TC Memo 1990-337***
>
> **FACTS:** A taxpayer's sister bought a home which she financed with a mortgage. She then agreed to sell one-half of the property to the taxpayer in return for the taxpayer paying the mortgage. The taxpayer made the mortgage payments, but didn't disclose his ownership or become directly obligated to the mortgagee (he didn't want to incur the fees required for refinancing). However, an unrecorded quitclaim was made on the property.
>
> **FINDING:** The taxpayer had an enforceable, interest-bearing debt to his sister. His payments to the mortgagee were, in effect, payments to his sister. Taxpayer gets an interest deduction for his payments.

MORTGAGE ASSISTANCE PAYMENTS

Payments received under the following programs are in the nature of general welfare (under the "general welfare exclusion") and aren't included in the recipient's gross income:

1. Mortgage assistance payments made by the Department of Housing and Urban Development (HUD) under Sec. 235 of the National Housing Act. The taxpayer-mortgagor doesn't get an interest deduction. IRS regs bar any interest deduction with respect to a taxpayer's indebtedness to the extent of assistance payments made by HUD under Sec. 235 of the National Housing Act (Reg § 1.163-1(d)).
2. Payments made on behalf of homeowners under Department of Treasury's and Department of Housing and Urban Development's (HUD) **Home Affordable Modification Program (HAMP)** to the mortgage holder, where the borrower is eligible for principal reduction of the outstanding balance of a qualifying mortgage pursuant to HAMP's Principal Reduction Alternative (PRA). For information on debt relief under HAMP, see Chapter 2.09.
3. Payments made to or on behalf of homeowners under state housing finance agency programs listed in Notice 2011-14, Appendix, and updated at www.treasury.gov/HHF, with funds allocated from the **Housing Finance Agency's (HFA's) Hardest Hit Fund**. For tax years 2010 through 2021 the safe harbor deduction for taxpayers who receive these payments is the lesser of:
    a. The amounts actually paid during the year to the mortgage servicer, HUD, or the State HFA on the home mortgage, or
    b. The sum of the amounts shown on Form 1098 as interest, real property tax, and, if deductible under Sec. 163(h)(3)(E), deductible mortgage insurance premiums. (Notice 2015-77, as amplified by Notice 2017-40) Note: the PATH Act of 2015 extended the deduction for mortgage insurance premiums only through 2016 and the Bipartisan Budget Act of 2018 further extended the deduction through 2017. While on the 2019 list for potential extension into 2018 and/or 2019, the probability of an extenders bill making it through Congress grows less likely as the legislative year progresses.

    This safe harbor rule applies for a tax year if the homeowner: (a) meets the requirements of Code Sec. 163 and Code Sec. 164 to deduct all of the mortgage interest on the loan and all of the real property taxes on the principal residence; and (b) participates in the EHLP, an SSSP, or a State Program described in the Appendix to Notice 2011-14, in which the program payments could be used to pay interest on the home mortgage.

    Modified Safe Harbor - Notice 2018-63 addresses homeowners who may be affected by the TCJA's $10,000 limitation on deductible property taxes as it relates to the Hardest Hit Fund safe harbor. Under the modified safe harbor, participating homeowners may allocate mortgage payments actually made first to deductible mortgage interest, and thereafter use any reasonable method to allocate the remaining balance of payments made to real property taxes, mortgage insurance premiums, home insurance premiums and principal.

4. Payments made on behalf of homeowners under the Department of Housing and Urban Development's (HUD's) **Emergency Homeowners' Loan Program (EHLP)** or from substantially similar state programs (SSSPs) receiving funding from EHLP. The safe harbor mortgage interest deduction for tax years 2010 through 2021 is the same as for #3 above.

Information reporting – IRS Form 1098-MA is used by the various governmental agencies to report Payments by State Housing Finance Agencies (HFAs) or the Department of Housing and Urban Development (HUD). The following are the box descriptions for that form:

- **Box 1 -** Shows the total amount of State HFA/HUD mortgage assistance payments and homeowner mortgage payments.
- **Box 2 -** Shows the amount of State HFA/HUD mortgage assistance payments.
- **Box 3 -** Shows the amount of homeowner mortgage payments.

SPECIAL CIRCUMSTANCES

Acquisition Debt Timing – Acquisition debt need not be obtained concurrently with the close of escrow. Notice 88-74 specifies that in the case of the acquisition of a residence, debt may be treated as incurred to acquire the residence to the extent of expenditures to acquire the residence made within 90 days before or after the date that the debt is incurred.

Home Under Construction - A home under construction may be treated as a qualified residence for a period of up to 24 months during the construction period, if the property actually becomes the taxpayer's first or second home when completed. Thus, the construction loan interest can be treated as qualified home mortgage interest during that 24-month period and need not be capitalized. Purchasing a lot, planning and designing the home aren't considered "construction." Amended returns are necessary if the taxpayer fails to make the completed home his residence after the construction.

***Example #12: - Deduction of Home Mortgage Interest on Home Under Construction** - Will owns a vacant lot in the mountains. On 05/01/15, he got a loan to begin construction of a vacation house on the lot. On 09/01/17, construction actually began, and the home was completed and occupied by Will on 12/01/19. Will may choose to treat the property under construction as his second home for purposes of deducting home mortgage interest for any 24 months during the period beginning 09/01/17 and ending 12/01/19.*

***Home Destroyed* -** A taxpayer may be able to continue treating their home as a qualified home even after it is destroyed in a fire, storm, tornado, earthquake or other casualty. This means the taxpayer can continue to deduct the interest subject to the normal limits for home mortgage interest. To continue treating a destroyed home as a qualified home, the taxpayer must do one of the following within a reasonable period of time after the home is destroyed:

1) Rebuild the destroyed home and move into it, or
2) Sell the land on which the home was located.

This rule applies whether the home is the main home or a second home that the taxpayer treats as a qualified home. Also, it applies whether or not the home is in a Federal disaster area.

***Converting a Home to a Rental* –** Occasionally, taxpayers will convert their existing home to a rental. The interest deduction for a rental is limited to the interest on the acquisition debt. Had the converted home been previously refinanced, the interest on any debt in excess of the acquisition debt for the property would not be deductible as rental interest. If the excess debt can be traced per the general tracing rules to a deductible use, then the excess interest would be deductible. Otherwise, the excess interest would no longer be deductible.

***Timesharing Arrangements* -** A taxpayer can treat a home owned under a time-sharing plan as a qualified home if it meets all the requirements.

Rental of timeshare**:** If a taxpayer rents out the timeshare, it qualifies as a second home only if the taxpayer also uses it as a home. To qualify as a home, the taxpayer must use the home the greater of: (1) 14 days, or (2) 10% of the days rented. To determine if the taxpayer meets that requirement, count the days of use and rental of the home only during the time the taxpayer had a right to use it.

***Equitable Ownership* –** Home mortgage interest deductions are not necessarily limited to the taxpayers whose name is on the title or mortgage. Rather, taxpayers with an "equitable ownership" in the property may be entitled to deduct the interest.

The general rule is that only the person(s) liable for the underlying debt are entitled to deduct the interest on that debt. However, regulations state: "Interest paid by the taxpayer on a mortgage upon real estate of which he is the legal or equitable owner, even though the taxpayer is not directly liable upon the bond or note secured by such mortgage, may be deducted as interest on his indebtedness" (Reg Sec 1.163-1(b)).

Therefore, it is possible for a taxpayer who is not directly liable for the mortgage to be the beneficial or equitable owner of the mortgaged property, and thus allowed a deduction for the interest on the mortgage payments he or she makes. To be the beneficial or equitable owner of a mortgaged property, the taxpayer must assume the burdens and benefits of ownership, often considered by the Tax Court to be whether the taxpayer:

- Has a right to possess the property and enjoy its use, rents or profits;
- Bears the property's risk of loss;
- Has a duty to maintain the property;
- Has a responsibility for insuring the property;
- Is obligated to pay the property taxes;
- May improve the property without consent of the owner; and
- Has the right to obtain legal title at any time by paying the balance of the purchase price.

Examples where taxpayers were equitable owners:

- Taxpayer entered into a binding contract to purchase a residence, and took possession of the residence under an "occupancy agreement" while financing was pending. The occupancy agreement made taxpayer responsible for utility payments and for getting liability and contents insurance on the property. Following a two-month transition period, it also made taxpayer liable for repairs to plumbing, heating, cooling, electrical equipment and appliances. The purchase contract and the occupancy agreement shifted sufficient burdens and benefits of ownership to taxpayer to give him equitable title to the property. (Uslu, Saffet, TC Memo 1997-551)
- Taxpayer's son was the legal owner of the property, but he didn't reside there. Taxpayer lived on the property and covered all expenses and taxes. When the property became rental property, taxpayer and not the son served as landlord, i.e., finding a tenant and providing all services related to the property. Taxpayer held the burden and benefit of ownership exclusively and so was the equitable owner. The son's name was used solely

to procure the mortgage when taxpayer was having financial difficulties. (Njenge, Ndile G., TC Summary Opinion 2008-84*)

- Neither title to the property nor the mortgage obligation was in the taxpayer's name, but taxpayer resided at the property, contributed a significant part of the downpayment, and agreed to be responsible for all mortgage payments. (Edosada, Conrad, TC Summary Opinion 2012-17*).

Examples where taxpayers WERE NOT equitable owners:

- Taxpayers' sons, who lived with their parents in a residence then owned jointly by their father and uncle, didn't prove they held a beneficial interest in the property under then applicable state (CA) law, entitling them to deduct mortgage interest they paid, where they didn't: (i) contribute to the down payment; (ii) show they made any payments for the residence for the 12 preceding years the family lived there; or (iii) show any agreement entered into with their father or uncle giving them an ownership interest. (Daya, Gabriel, TC Memo 2000-360)
- Taxpayer assumed no benefit or burden of ownership on a home legally owned by her brother. Although she made mortgage payments to help her brother, she couldn't establish that she had any right to possession or use of the property or any obligations for its maintenance. (Puentes, Lourdes, TC Memo 2013-277)

Under California law, the owner of legal title to property is presumed to be the owner of full beneficial title as well. This presumption may be rebutted only by clear and convincing proof. One way of overcoming the presumption is by showing that there exists an agreement or understanding between the parties evidencing an intent contrary to that which is reflected in the deed (Van Phan, TC Summary Opinion 2015-1*).

Caution –These cases have unique sets of circumstances and should only be relied upon in cases with the same sets of circumstances, but see * below.

*Pursuant to IRC Sec 7463(b), summary opinions may not be treated as precedent for any other case.

Late Payment Charge on Mortgage Payment **-** A taxpayer can deduct as home mortgage interest a late payment charge if it is not for a specific service performed by the mortgage holder.

Mortgage Prepayment Penalty **-** If a taxpayer pays off the home mortgage early and is charged a prepayment penalty by the lender, the prepayment penalty can be deducted as home mortgage interest.

Mortgage Interest Credit **-** The taxpayer may be able to claim a mortgage interest credit, if the taxpayer were issued a mortgage credit certificate (MCC) by a state or local government. Figure the credit on **Form 8396**, "Mortgage Interest Credit." If the taxpayer takes this credit, the mortgage interest deduction is reduced by the amount of the credit.

Minister and Military Housing Allowances **-** If the taxpayer is a minister or a member of the uniformed services and receives a housing allowance that is not taxable, the taxpayer can still deduct the home mortgage interest.

Mortgage Proceeds Invested in Tax-Exempt Securities **-** The home mortgage interest on home equity or excess mortgage debt is not deductible if the taxpayer used the proceeds of the mortgage to buy securities or certificates that produce tax-free income.

Capitalizing Mortgage Interest – Under certain circumstances taxpayers can elect to capitalize otherwise deductible mortgage interest, taxes and carrying charges on unimproved and unproductive real property in lieu of deducting these expenses. This rule **does not apply to any qualified residence interest**. (Code Sec. 263A(f)(2)(B))

Below Market (Gift) Loans **-** Occasionally when preparing tax returns, we encounter situations where there are loans between family members, or occasionally between employer and employee, with no interest being charged or the rate of interest is below market rates. IRC Sec. 7872 deals with issues related to below market loans including: creating interest income, interest payments, investment interest, gift consequences and certain exceptions to the Sec 7872 treatment. Sec 7872 covers a variety of circumstances; however this discussion deals only with its application to non-business loans between family members or between employer and employee.

Below-Market-Loan – A below-market loan (Sec 7872(a)(1)) is generally a gift or demand loan where the interest rate is less than the applicable federal rate (AFR). The code defines the term "gift loan" as any below-market loan where the forgoing of interest is in the nature of a gift, while a "demand loan" is any loan which is payable in full at any time on the demand of the lender. (Secs 7872(f)(3); 7872(f)(5)) The AFR is established by the Treasury Department and posted monthly. As an example, the AFR rates for March 2019 were:

Term	AFR (Annual) March 2019
3 years or less	2.55%
Over 3 years but not over 9 years	2.59%
Over 9 years	2.91%

A term loan (defined in the Code as any loan that isn't a demand loan) can also be a "below-market" loan if the amount loaned is more than the present value of all payments due under the loan (Code Sec. 7872(e)(1)(B)).

Tax Treatment – Generally, for income tax purposes:

Borrower – Is treated as paying interest at the AFR rate in effect when the loan was made and the interest is deductible for tax purposes if it otherwise qualifies. However, where the loan amount is $100,000 or less, the amount of the forgone interest deduction cannot exceed the borrower's net investment income for the year.

Lender – Is treated as gifting to the borrower the amount of the interest between the interest actually paid, if any, and the AFR rate. Both the interest actually paid and the forgone interest are treated as investment interest.

Exception - The below-market loan rules do not apply to gift loans directly between individuals where the loan amount is $10,000 or less. This exception does not apply to any gift loan directly attributable to the purchase or carrying of income-producing property. (Sec 7872(c)(2))

Employer and Employee - Loans between employer and employee, or independent contractor and the contracting person, are subject to the same rules except that the forgone or below market interest is treated as compensation to the employee or independent contractor. (Sec 7872(b)(1)(B))

MARRIED SEPARATE TAXPAYERS

Treat married separate taxpayers as though they were one taxpayer in applying the home mortgage interest rules. If they own two homes, each may deduct the interest on only one, unless both consent in writing that the deduction for both homes is to be taken by one spouse.

HERO LOANS (PACE FINANCING)

The Home Energy Renovation Opportunity (HERO) Plan provides financing for high-cost energy related improvements, such as solar panels, air conditioning, roofing, windows, lighting controls, and landscape-related products, for a taxpayer's home with principal and interest payments added to the taxpayer's property tax bill for the year. It is sometimes referred to as PACE financing.

Although included in the tax bill, the HERO payments are separately stated and not deductible as property tax. However, the portion of the HERO payment that represents interest is generally deductible as home mortgage interest. Although the interest portion is not spelled out on the property tax bill, the HERO program does supply each borrower with a loan amortization schedule that can be used to determine the amount of interest paid for the year and which may be deductible. With the HERO program no Form 1098 is issued and care must be taken on how the interest is deducted on the tax return to avoid receiving a letter from the IRS.

The HERO program originated in Southern California but has since spread to almost all counties in California, and even to Florida and Missouri (Wall Street Journal 7/26/19); ads for this program pop up frequently on the Internet. Some contractors actively promote this program to individuals as a convenient way to finance home improvements since the HERO program has very liberal qualifications, with no money down, fixed rates and variable terms of 5-20 years. However, compared to today's interest rates, those charged by the HERO program are quite high, generally in excess of 8%, and individuals should explore other avenues of financing first.

MORTGAGE INSURANCE PREMIUMS

For tax years 2007 through 2017 taxpayers could deduct as an itemized deduction the cost of premiums for mortgage insurance on a qualified personal residence. The premiums were deducted as home mortgage interest (line 13 on Schedule A). Unless extended again by Congress, this **deduction will no longer be available after 2017.** While on the 2019 list for potential extension into 2018 and/or 2019, the probability an extenders bill will be enacted is becoming unlikely.

CALIFORNIA DIFFERENCES

California conforms to the Federal treatment of home mortgage interest, except that:

(1) California has not conformed to the TCJA reduction in the acquisition debt limit to $750,000 and continues to follow the pre-TCJA acquisition debt limit of $1 Million.

(2) California has not conformed to the TCJA disallowance of equity interest and continues to follow the pre-TCJA rules allowing equity interest deduction on the first $100,000 of equity debt on the taxpayer's first and second homes.

(2) California does not have a mortgage interest credit (MIC). The amount of mortgage interest that is required to be reduced on the federal return when the MIC is claimed is deductible for state purposes. Restore the amount on Schedule CA.

(3) Mortgage insurance premiums are not deductible for California.

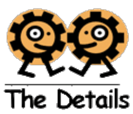
POINTS

- Points paid to purchase a home – deductible in the year of purchase.
- Points paid on a loan to substantially improve the home – deductible in the year paid.
- Generally all other points incurred must be amortized

RAPID FINDER

Related IRC and IRS Publications and Forms

- **Pub 936** – Home Mortgage Interest
- **Sec 461(g)(2)** – Exception to Amortization of Home Points



Cash method taxpayers must capitalize prepaid interest and deduct it over the life of the loan on which it is paid. This general rule for prepaid interest also applies to "points," i.e., the additional interest charge paid when a loan is incurred.

Points are a form of prepaid interest; one point is equal to 1% of a loan amount. Points are often labeled "loan origination fees," "premium charges," etc. At times, certain loan charges may be called points but are really amounts lenders charge for setting up a loan.

Such "service charge points" aren't normally deductible. The other costs, in excess of the pre-paid interest, are includable in the property's basis to the extent they were incurred to acquire or substantially improve the mortgaged property. They would not be deductible at all when the property is refinanced for other purposes. This discussion will involve points in the form of prepaid interest not only on home mortgage loans, but also on loans to buy other kinds of real properties.

WHAT ARE POINTS

Points are generally defined as fees paid to a lender solely for the use or forbearance of money and not for specific services that the lender performs in connection with the borrower's loan and are treated as pre-paid interest. Points are not always designated in the escrow points and frequently are referred to as any of the following:

- Loan origination fees
- Loan processing fees
- Maximum loan charges
- Premium charges, etc.

THE DEDUCTION FOR POINTS

Points, because they constitute prepaid interest, with the exception of the purchase of the taxpayer's primary residence, are deducted ratably over the term of the loan. The following are examples of how this rule applies:

Rental Property – Points paid for a purchase money TD, the refinance of an acquisition loan, or an improvement loan for rental property are not currently deductible and must be amortized over the life of the loan.

Investment Property – Points paid for a purchase money TD or the refinance of an acquisition loan are not currently deductible and must be amortized over the life of the loan. In addition, the annual amount would be treated as investment interest on Schedule A.

Principal Residence – Points, if otherwise deductible, may be currently deductible if (1) the "principal residence exclusion" described below applies, (2) the manner of payment qualifies, and (3) the "other requirements" are satisfied.

Second Home – Points, if otherwise deductible, must be amortized over the life of the loan.

PRINCIPAL RESIDENCE EXCEPTION

An exception to the rule requiring points to be amortized applies to taxpayers who pay points in connection with the purchase or improvement of their principal residence **(Sec 461(g)(2))**. Under this exception, a taxpayer is allowed a current deduction of the full amount of the points paid. To qualify for the exception, both of the following must also apply:

1. It must be established business practice to charge points in the geographic area where the loan is made;
2. The points charged cannot exceed the number of points usually charged in the area.

Option to amortize points on home purchase - **LR 199905033** states that a home buyer may amortize home loan points instead of treating them as currently deductible interest. This ruling is helpful for the home purchaser who finds that a deduction of the points in the year of purchase is of no tax benefit (e.g., the taxpayer didn't have enough deductions to itemize).

EFFECT OF MANNER OF PAYMENT ON DEDUCTIONS

When, in connection with purchasing or improving a principal residence, an individual pays points at the closing of a loan out of his/her own separate, unborrowed funds, the points are currently deductible as long as the statutory requirements are met. Where points are financed, or paid by the seller, different rules may apply for loans to buy a principal home than for loans to improve a principal home.

Loan to buy a principal residence - Points charged in connection with a loan to buy a principal home are considered to have been paid directly by the borrower, if the borrower provides cash at or before loan closing in an amount equal to the point charge. The cash can't have been borrowed as part of the loan transaction; it can come from a down-payment, escrow deposit, etc., applied at closing.

Points paid by the seller - Rev Proc 94-27, 1994-15 IRB 17 states that points paid by the seller (including points charged the seller), connected with the loan on a principal home for the buyer, are treated as paid directly by the buyer from unborrowed funds (the buyer subtracts seller-paid points from the purchase price of the home to compute its basis). **Note:** Even though the buyer gets to deduct seller-paid points, the seller can use the amount as a selling expense.

QUALIFIED RESIDENCE INTEREST LIMITATION

Where an original or refinanced primary or second home acquisition mortgage exceeds $750,000 ($1 Million acquisition debt and $100,000 equity debt for loans incurred before December 16, 2017), the prepaid interest (points) must be proportionately allocated between the allowable limitations and the excess debt in the same manner as home mortgage interest is limited. For married separate filers (MFS), the limitations are 50% of the amounts noted here.

OTHER REQUIREMENTS

The following additional requirements must be met in regard to points:

1. The transaction settlement statement (Form HUD-1) must clearly show the amounts incurred as points. For example, it should state "loan origination fee" or some other official designation.
2. The points should be computed as a percentage of the loan principal.
3. The loan can't be more than the amount that can be treated as acquisition debt (generally $750,000 ($375,000 MFS)).
4. The points can't be paid in lieu of other payments that are normally stated separately (e.g., appraisal, title, and legal fees).

Example - Home Residence Point Deductions - *Bob and Barbara Black bought a home for $170,000. To finance the transaction, they put down $30,000 cash and incurred a $140,000, 25-year loan. The lender charged 3 points ($4,200) as part of the deal; the contract called for the points to be financed. Thus, rather than a loan amount of $140,000, the Black's actual loan principal is $144,200 ($140,000 plus $4,200).*

Result: *Since the Blacks provided cash (the downpayment) at least equal to the amount of points, they may currently deduct the $4,200 points charge. Of course, they must meet all the statutory requirements detailed above.* ***Special Note:*** *Had the Blacks total itemized deductions not exceeded the standard deduction, they could opt to amortize the points rather than deduct them and thereby preserve a deduction for the future that would otherwise be lost.*

VA and FHA Loans - Amounts paid in connection with a VA or an FHA loan that would not be allowed if paid in connection with a conventional loan are not deductible points - an example is the VA Funding Fee. However, for years before 2018, this fee may be deductible as a mortgage insurance premium, subject to the AGI limitations of that deduction (IRS Pub 936). Note: At press time there was a bill in Congress to extend the deduction for mortgage insurance premium, but likelihood of passage is slim.

INFORMATION REPORTING FOR HOME MORTGAGE POINTS

Lenders must report points on a principal residence acquisition loan on Form 1098, box 6 (2019 version). The requirement doesn't apply to points paid in other types of transactions, such as refinanced loans. The borrower deducts allowable points on Schedule A along with other qualified home mortgage interest.

POINTS PAID AS PART OF A REFINANCE

Loan for Home Improvements Only - If a loan is incurred for solely the purpose of improving the taxpayer's principal home and does not include the refinance of an existing loan, the points would be currently deductible provided the points met the requirements included in "other requirements" above and the points are paid by the borrower from separate funds (see "Effect on manner of payment" above).

> ***Example – Loan for Home Improvements Only -*** *Emily and Jay's home is free and clear and they decide to make some major improvements and take out a loan for $100,000, with the proceeds of the loan being used for home improvements within a reasonable period of time. The lender charges them $2,000 in points that they pay from separate funds. The $2,000 is deductible as interest on their Schedule A. Had the points been added to the loan – bringing the loan balance up to $102,000 – the points would not be currently deductible and would have to be amortized over the life of the loan.*

Loan for Home Improvements & Refinance of the Existing Home Loan - If an existing acquisition debt loan is refinanced in order to obtain additional funds for home improvement, and the homeowners incur points as part of the transaction, the points must be proportionately allocated between the refinance of the home and the substantial home improvements. The portion allocated to refinancing the existing loan is amortized over the life of the loan while the home improvement portion is currently deductible. The points still must meet the general requirements for the deductibility of pre-paid interest for a primary residence.

> ***Example – Loan for Home Improvements & Refinance of the Existing Home Loan –*** *Instead of owning their home free and clear, Emily and Jay in our prior example have a $200,000 existing acquisition debt on the home. They refinance the existing loan into a new $300,000 primary loan and pay points in the amount of $6,000. Emily and Jay will use $100,000 to make substantial home improvements within a reasonable amount of time. 66.67% of the new loan was used to retire the old loan. Thus two thirds of the points ($4,000) must be amortized over the life of the loan. Since $100,000 was (or will be) used to make substantial home improvements, the balance of the points ($2,000) is currently deductible.*

Points Paid in Refinancing Deductible - A married couple who refinanced their mortgage, reduced their monthly mortgage payment, and then used the savings to improve their home could deduct the prepaid interest or "points" paid in the refinancing. The points were paid in connection with the improvement of their home under the broad construction of the phrase "in connection with." The couple presented evidence as to the number and cost of the home improvements and testified that the purpose of the refinancing was to obtain funds to make the improvements. Additionally, the improvements began nine days after the refinancing. Although the cost of the improvements exceeded the savings from the refinancing, the difference was not grossly disproportionate ***G.E. Hurley, T.C. Summary Opinion 2005-125***

BALANCE OF AMORTIZED POINTS

Refinance with different lender - When a mortgage is refinanced with a different lender or paid off, the balance of any points being amortized becomes fully deductible in the year the loan was retired.

> ***Example*** - Dan paid $3,000 in points and was amortizing them over the 15-year life of the mortgage, deducting $200 per year. Dan prepaid his mortgage in full this year. He had previously deducted $2,200 in amortized points. He can deduct the remaining $800 of the amortized points this year.

Refinance with same lender - IRS Pub 936 (2018), Page 8 indicates that if a mortgage is refinanced with the same lender the remaining unamortized balance of the points is not currently deductible. Instead, the remaining balance must be amortized over the life of the new loan. This position by the IRS is based upon the fact that a taxpayer must have unrestricted control over the funds in order to deduct the interest, which is very rarely the case. (Ferris v Commissioner, 1939 879 TC 751)

Some Refinancing Costs May Be Deductible - The IRS has issued a reminder to taxpayers that they may be eligible to deduct some costs associated with their home mortgages. Points paid solely to refinance a home mortgage usually must be deducted over the life of the loan. Other closing costs, such as appraisal fees and other non-interest fees, are generally not deductible. If refinancing for a second time, the unamortized balance of points paid for the first refinance may be deductible upon pay-off of the first refinanced loan. Taxpayers also should note that the amount of their adjusted gross income can affect the amount of deductions they can take because of the overall itemized deductions limitation (the overall limitation applies to years before 2018 and after 2025). ***(IR-2002-114)***

CALIFORNIA DIFFERENCES

California conforms to the Federal treatment of points.

NOTES

INVESTMENT INTEREST

Overview

- Is NOT a tier 2 Miscellaneous Deduction
- Interest expense deduction limited to net investment income (NII)
- Excess carried over indefinitely - AMT carryover can be different primarily due to Private Activity Bond Interest
- NII = Investment income less allowed investment expenses
  - Most investment expenses not allowed 2018-2025 because Tier 2 miscellaneous deductions are suspended
- AMT –Generally no AMT adjustment.

  - **Pub 550** – Investment Income
  - **IRC Sec 163**

Surtax on Unearned Income
Long-Range Planning

The Net Investment Income Tax imposes a surtax on high-income individuals, estates, and trusts. For individuals, the surtax (Sec. 1411) is 3.8% of the lesser of: (1) The taxpayer's net investment income or (2) The excess of modified adjusted gross income over the threshold amount ($250,000 for a joint return or surviving spouse, $125,000 for a married individual filing a separate return, and $200,000 for all others).

For surtax purposes, gross income doesn't include excluded items, such as interest on tax-exempt bonds, which gives taxpayers an opportunity to adjust their portfolios to mitigate or avoid this tax. The definition of investment income may not be the same for the surtax and the investment interest expense limitation. See Chapter 12.05 for details of the Net Investment Income Tax.

TCJA

The deduction for investment interest continues to be deductible (IRC Sec 163). However, the investment interest deduction is limited to net investment income (NII), which is investment income less investment expenses.

TCJA suspended tier 2 deductions, including investment expenses through 2025. Per Sec 163(d)(4)(C) for purposes of the NII limitation, the term "investment expenses" means the deductions **allowed** under this chapter (normal taxes and surtaxes). Thus the bottom line results seem to be:

On the positive side - Investment Interest deduction on Schedule A may be higher than in the past because Sch. A investment expenses will not be used in limiting NII, thus allowing a larger interest deduction.

On the negative side - Investment expenses will not reduce NII, thus possibly causing a larger surtax on NII (the 3.8% surtax).

The Details

Investment interest expense is deductible only to the extent of "net investment income." The amount disallowed because of this provision may be carried over indefinitely. Form 4952 is used to compute the investment interest limitations.

Rev Rul 95-16, 1995-8 IRB 4 states that carryover of excess investment interest to a later tax year isn't limited by a taxpayer's taxable income for the tax year in which the interest was paid or accrued.

DEFINITIONS

Investment interest expense - is all interest on debts used to carry or purchase investment property (e.g., stocks, bonds, or land held for appreciation). However, interest on loans used to buy investments which produce tax-exempt interest income is not deductible as investment interest expense. In fact, such interest is not deductible at all. In addition, interest taken into account in determining gain or loss from a passive activity is NOT investment interest.

Investment expenses - are expenses (other than interest) incurred to produce investment income and which are normally deductible as Tier 2 miscellaneous itemized deductions on Schedule A. **CAUTION:** Under TCJA Tier 2 miscellaneous itemized deductions are not deductible for years 2018 through 2025.

CAUTION

The term Investment Income has a different meaning when applied to the limitations on investment interest (IRC Sec 163) than it does for the Net Investment Income Tax, the 3.8% surtax on NII discussed at chapter 12.05 (IRC Sec 1411). IRC Sec 163(d)(4)(D) says: "Investment income and investment expenses shall not include any income or expenses taken into account under IRC Sec 469 in computing income or loss from a passive activity," whereas Sec 1411 requires that rental income and passive trade and business income be included as investment income.

Investment income for purposes of the investment interest expense includes gross income from:

- Interest, dividends, non-qualified annuities, and royalties, whether received directly or from a pass-thru entity, and not derived from a trade or business;
- Capital gains (other than derived from a trade or business) that are not elected to be taxed at the lower capital gains tax rates;
- Substantially non-depreciable property;
- Equity-financed lending activities;
- Acquisition of certain interests in a pass-through entity licensing intangible property. *(Temp. Reg. 1.469-2T(f)(10)).*

Cancellation of debt income - Cancellation of debt (COD) income can be investment income. In ***LR 9522008,*** the IRS held that discharge of debt on a loan traceable to investment property is investment income, but only to the extent the debt relief income isn't excludable from gross income.

Allocation - Whether a debt is allocable to investment property is to be determined under the interest allocation rules of ***Reg. 1.163-8T*** by tracing the use of the proceeds of the debt.

Strategy - Capital gains election – "Net capital gain" on investment property generally can't be included in investment income for purposes of computing net investment income for the investment interest limitations, unless a taxpayer elects to include all or any part of it as investment income. However, any net capital gain which the taxpayer includes as investment income under this election, <u>must be excluded from the gain that qualifies for the lower tax rates on capital gains</u>. This election will have no effect on the Net Investment Income Tax, the 3.8% surtax on NII computation discussed at chapter 12.05 (IRC Sec 1411), since all capital gains except those derived from a trade or business are included in investment income for purposes of that tax.

<u>**Net capital gain**</u>**:** "Net capital gain" is the excess of net long-term capital gain over net short-term capital losses. The rule doesn't affect the treatment of net short-term capital gain in the calculation of net investment income since short-term capital gain gets no tax rate break.

Example - Capital Gains and Net Investment Income - *Barry had the following capital transactions for the tax year:*

		"Net Capital Gains" Computation:	
Sale of land (LT)	*$50,000*	*Net LT capital gain*	*$50,000*
Stock sale (ST)	*25,000*	*Net ST capital loss*	*0*
Less: Stock loss (ST)	*-10,000*	*Net capital gain*	*$50,000*
Overall net gain	*$65,000*		

Barry can, when computing the investment interest expense:

1. Include $15,000 (the difference between his overall net gain over his net capital gain) in his investment income, or

2. Make the special election and include all or any part of the net capital gain in investment income. Since interest, not allowed because of the limitation, is carried over, it may be deductible in the following tax year or a later tax year. Taxpayers in the higher tax brackets should compare theeffects of postponing the interest deduction to a later year to that of losing the benefit of the capital gain tax ceiling.

Example - Effects of Treating LT Capital Gain as Investment Income - *Ramon's stock investments did well in 2019. He sold stock at a gain of $42,000 on 03/02/19 and is worried about his 2019 tax bill. Ramon is single, and he also paid margin interest this year. His 2019 income and deductions are:*

Income:		***Deductions:***	
Wages	*$ 88,750*	*Taxes $12,305 But Limited To:*	*$10,000*
Interest Income	*475*	*Home Mortgage Interest*	*15,800*
State Tax Refund	*985*	*Margin (Investment) Interest*	*13,248*
Net LT Capital Gain	*42,000*	*Contributions*	*200*
Total Income	*$132,210*	*Total Deductions*	*$39,248*

Ramon's tax liability is a good deal higher when he treats all of his LT capital gain in the usual manner on Schedule D than when he elects to treat $12,773 ($13,248 - $475) of the gain as investment income rather than long-term capital gain. ***REASON:*** *His itemized deductions are appreciably reduced, because he can only deduct $475 of the margin interest under the former scenario.*

Strategy - Dividend election – Qualified dividends (those that would be eligible for the 0%, 15% and 20% tax rates) are not included as investment income for the investment interest expense limitation calculation unless the taxpayer makes an election to treat them as investment income for this purpose. Dividends elected to be investment income are taxed at ordinary income rates and are not eligible for the 0%, 15% and 20% tax rates. This is similar to the capital gains election discussed above.

When and How to Make Election – The elections described above for treating net capital gain and qualified dividend income as investment income must be made on or before the extended due date of the return for the year the net capital gain is recognized, or the qualified dividend income is received. The election is made as part of the investment interest limitation calculation on Form 4952. ***(Reg § 1.163(d)-1(b))*** The elections are revocable with consent of the IRS Commissioner.

Small business stock gain - 50% of the gain on certain qualified **small business stock** (QSBS) held over 5 years is excluded from capital gains. Note: for the following periods, and provided the stock is held over 5 years, the exclusion is:

- 75% gain exclusion for stocks issued after 2/17/2009 and through 9/27/2010.
- 100% gain exclusion for stocks issued after September 27, 2010. The 100% exclusion rate was made permanent by the PATH Act of 2015. In addition, there is no AMT preference when the exclusion percentage is 100%.

Any gain excluded under this provision is not treated as investment income. See chapter 2.07 for details on QSBS.

Net investment income (Except for years 2018 through 2025) – is the excess of investment income over allowed investment expenses. To compute net investment income, use investment expenses AFTER applying the 2% floor on Schedule A. Consider Tier 2 expenses, WHICH ARE NOT INVESTMENT EXPENSES, as the first disallowed by the 2% reduction.

Example - Net Investment Income *- Rick and Rhonda had investment income of $4,000 during the tax year. Their AGI for that year was $55,000, and their Tier 2 miscellaneous itemized deductions were $2,000. Of the Tier 2 expense, $700 was for investment. Compute their net investment income as follows:*

(1) Total Tier 2 deductions	*$2,000*
(2) Less 2% of AGI	*-1,100*
(3) Net Tier 2 deductions	*900*
(4) Amount from (3) considered investment expense	*700*
(5) Net investment income ($4,000 less $700)	*$3,300*

Net investment income (2018 through 2025) – Since TCJA has suspended Tier 2 itemized deductions for years 2018 through 2025, net investment income is not adjusted by investment expenses that in years other than 2018-2025 would be allowed as a tier 2 miscellaneous deduction. So in most cases for 2018-2025 net investment income is simply the sum of investment income.

AMT Considerations – Investment interest is deductible for both regular and AMT purposes to the extent of net investment income. However, because the interest from private activity municipal bonds generally is taxable for AMT purposes, taxpayers with private activity bond income will have a higher net investment income and, therefore for AMT purposes, will be allowed to deduct more investment interest expense. This also creates two investment interest carryovers, one for regular tax and one for the AMT. Generally, most preparation software will make both carryover computations. *Line 2c on the 6251 (2018) compensates for the differences between the regular investment interest deduction and the AMT investment interest deduction*.

Strategies

AMT Strategy (For years other than 2018 through 2025 since investment expenses are not deductible for those years anyway) – Omit Investment Expenses - For both the regular tax and the AMT, the deductible investment interest expense is limited to net investment income (NII). NII is taxable investment income reduced by investment expenses. Investment expenses are reported on Schedule A as investment taxes or as miscellaneous investment expenses. Both of these categories are not deductible for AMT purposes. Therefore, if the taxpayer is taxed by the AMT method, omit investment taxes and expenses from Schedule A. You may wish to double check your software's computation to see if it makes this adjustment automatically. To be on the safe side, simply don't deduct it. **Caution:** This may adversely affect the 3.8% NII Tax (see Chapter 12.05) and the state and overall tax liability.

CALIFORNIA DIFFERENCES

California conforms to the Federal treatment for investment interest, although the amount deductible may be different because of differences in tax-exempt interest and deductible expenses (California does not conform to the TCJA suspension of Tier 2 miscellaneous deductions). Also, since California does not have preferential tax rates for capital gains or dividend income, it may be advantageous to make a separate election to treat net capital gains and/or dividends as investment income when the election has not been made for federal purposes.

NOTES

CHARITABLE CONTRIBUTIONS

- Made by taxpayers to "qualified charitable organizations"
- **Must itemize** to get benefit
- **No AMT** adjustment
- **All cash** - must be documented with either a bank record or written verification from the charity.
- **Non-Cash** – See documentation requirement details in chapter.
- **Use of Assets** – No deduction
- **Foreign charities** generally not allowed except for Canada, Mexico and in some cases Israel

AGI Contribution Limits

- **50% limit (60% 2018-2025) –** This category includes churches and other houses of worship; tax-exempt educational institutions and hospitals; Federal, state, and local governmental units.
- **30% limit –** Generally all other groups other than 50%-limit organizations including fraternal organizations, public cemeteries, and private non-operating foundations.
- **20% limit -** This applies to gifts of capital gain property made to all qualified organizations other than 50% limit organizations.
- **Carryovers** – 5 years

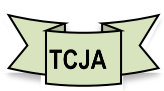
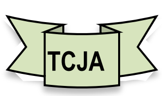
- **Form 8282** – Donee Information Return
- **Form 8283** – Noncash Charitable Contributions



Percentage of AGI Limitation – For cash contributions made in years 2018-2025, the 50% of AGI limit is increased to 60%.



Rights to Purchase College Athletic Tickets – A charitable contribution is no longer allowed when a taxpayer makes a payment to a college or university and receives the right to purchase tickets to an athletic event.

Final Regulation Changes (T.D. 9836):

Blank Pledge Card **-** Because a blank pledge card provided by the donee organization to a donor does not show the information required under Code Sec. 170(f)(17) (name of the organization, the date of the contribution, and the amount of the contribution) it is not sufficient substantiation for a cash, check, or other monetary gift.

Reasonable Cause Exception – Proposed regs provided a reasonable cause exception to various non-cash substantiation and reporting rules. However, the final regulations do not provide a standard for the exception and must be determined on a case-by-case basis.

RAPID FINDER

Form 8283 **-** The Preamble to the final regs provides that only Section B, part IV of Form 8283, which is completed for property valued at over $5,000, is a donee acknowledgment, and this acknowledgment only contains some of the information required by Code Sec. 170(f)(8)(B). Accordingly, even a fully-completed Form 8283 does not satisfy the requirements of Code Sec. 170(f)(8) .

Appraisals & Appraisers – Provides qualifications for appraisers (see beginning on page 7.08.08 for details)

QUALIFIED ORGANIZATIONS & AGI CONTRIBUTION LIMITS

IRS Publication 78, available at IRS.gov, lists qualified organizations in a searchable format. Start at this link: https://www.irs.gov/charities-non-profits/tax-exempt-organization-search. For contributions to be deductible, the recipient organization must fit into one or more of the following categories of organizations:

AGI CONTRIBUTION LIMITS	CATEGORIES OF CHARITY ORGANIZATIONS
50%* without any reduction for net operating loss carrybacks *60% 2018-2025 (cash contributions only)	Generally churches, synagogues, mosques, etc.; tax-exempt educational institutions and hospitals; Federal, state, and local governmental units, if the contribution is used for public purposes; publicly supported corporations, trusts, funds, foundations or community chests organized and operated only for charitable, religious, educational, scientific or literary purposes, or to prevent cruelty to children or animals, or to foster certain national or international amateur sports competitions; certain private operating foundations and certain agricultural research organizations.
30%	Generally all other groups other than 50%-limit organizations including fraternal organizations, public cemeteries, and private non-operating foundations. And Gifts of capital gain property to 50%-limit organizations that are deducted at FMV.
20%	Applies to gifts of capital gain property made to all qualified organizations other than 50% limit organizations

DEDUCTION & CARRYOVERS

Contributions in excess of the deduction limits may be carried forward for five years. An amount can be carried over even though an individual does not itemize in the year of the contribution (carryover then equals excess over 50% (or 60% in 2018-2025) of AGI).

Calculating The Deduction And Carryover: Substitute 60% for 50% in 2018-2025

Where:

A = Contributions Subject to the 50% Limit   AA = the lesser of 50% of AGI or A
B = Contributions Subject to the 30% Limit   BB = the lesser of (30% of AGI – AA) or B
C = Contributions Subject to the 20% Limit   CC = the lesser of ((50% of AGI – AA) + (30% of AGI – BB)) or C

Allowable Contribution = AA + BB + CC
Carryover = A + B + C – (AA + BB + CC)

For each category of contributions, deduct first the contributions in that category made in the current year, then the carryover amount (starting with the earliest year). IRS Pub. 526 includes a worksheet that can be used to apply the deduction limits.

FOREIGN CHARITIES

Generally, contributions to foreign charities are not permitted. However, do not mistake U.S. Charities that do charitable work in foreign countries as foreign charities. Certain foreign charities, however, may qualify. These are:

Canadian Charities **-** Donations to certain Canadian charitable organizations covered under an income tax treaty with Canada are deductible. In order to deduct the contribution, the taxpayer generally must have income from sources in Canada. See the United States/Canada Income Tax Treaty for information on how to figure the deduction.

Mexican Charities **-** Donations to certain Mexican charitable organizations covered under an income tax treaty with Mexico are deductible. The organization must meet tests that are essentially the same as the tests that qualify U.S. organizations to receive deductible contributions. To deduct a contribution to a Mexican charity, the taxpayer must have income from sources in Mexico. See the tax treaty between Mexico and US.

Israeli Charities **-** Contributions to certain Israeli charities organized under an income tax treaty with Israel may be deductible. The organization must be created and recognized as a charitable organization under Israeli law. The amount deductible is the amount that would normally be allowed under U.S. rules, but not more than 25% of AGI from Israeli sources.

CLOTHING AND HOUSEHOLD CONTRIBUTIONS:

No deduction is allowed for a charitable contribution of clothing or household items unless the clothing or household item is in:

- Good used condition, or
- Better.

In addition, IRS may deny a deduction for any item with minimal monetary value, such as used socks or undergarments.

The Secretary, in consultation with affected charities, will exercise assiduously the authority to disallow a deduction for some items of low value, consistent with the goals of improving tax administration and ensure that donated clothing and households items are of meaningful use to charitable organizations.

Items not in good or better condition - A deduction may be allowed for a charitable contribution of an item of clothing or a household item not in good used condition or better if the amount claimed for the item is:

- More than $500, and
- The taxpayer includes with the taxpayer's return a qualified appraisal with respect to the property.

Household items - Includes furniture, furnishings, electronics, appliances, linens, and other similar items. Food, paintings, antiques, and other objects of art, jewelry and gems, and collections are excluded from the provision.

GIFTS TO INDIVIDUALS

No charitable deduction is allowed when a gift is made to private individuals, either directly or within a charitable organization. An individual cannot deduct contributions made directly to a foreign organization (except under certain treaties as noted above).

GIFTS IN LIEU OF SUPPORT

In ***Letter Ruling 9405003,*** the IRS barred a deduction for contributions made by parents to a tax-exempt organization; the gifts were earmarked and actually used to support their son's student ministry.

PERSONAL BENEFITS (Also see Quid Pro Quo Contributions)

Givers may deduct contributions of cash or property, but only to the extent they received no personal benefit from the donation. Often, the IRS attributes at least some (if not total) personal benefit to amounts expended for items like dinner tickets, church school tuition, YMCA dues, raffles, etc. To determine contribution amount, subtract the FMV of the "personal benefit" item from the cost and deduct the remainder. Most charities now allocate the deductible, nondeductible portions.

Personal Benefit Forfeited **-** *Urbauer, TC Memo 1992-170* discusses the issue of whether an unused benefit ticket can produce a contribution. The Urbauers had purchased tickets to their daughter's school music recital. They did not attend and then claimed the entire expense as a contribution. The Tax Court indicated their failure to attend does NOT increase their contribution. Acceptance of the ticket "creates an expectation that taxpayer will attend and assert the right to be seated." The school is then obligated to prepare for this attendance. The Court said: "Taxpayer receives a material benefit merely by having the right to decide whether or not to attend."

Car Washes, Pancake Breakfasts, etc. **-** Taxpayers often want to take deductions for amounts paid for benefit football games, youth-group car washes, parish pancake breakfasts, school plays, etc. The taxpayers have no intention of attending these events, but incur the expense as a direct contribution to the institution. Extending the logic of the *Urbauer* case to some of these expenses may mean that the IRS would not allow them. On the other hand, if the taxpayer returns the ticket to the organization for resale and does not receive a refund of the cost of the ticket, the entire amount paid for the ticket is deductible. *(Rev. Rul. 67-246, distinguished by Rev. Rul. 74-348)*

Moral of this story is to take the cash rebates and then contribute the funds to the favorite charity with a bank record as verification or obtain the appropriate written documentation from the donee organization.

QUID PRO QUO CONTRIBUTIONS

Charitable organizations are required to inform donors that "quid pro quo" contributions over $75 are deductible only to the extent that the gift exceeds the FMV of the goods or services provided by the organization. Quid pro quo contributions are payments made partly as contribution and partly as payment for goods or services. Such contributions don't include any payment made to an organization organized exclusively for religious purposes, in return for which a taxpayer receives solely an intangible religious benefit that generally isn't sold in a commercial transaction.

Charities are required to provide a written statement in conjunction with quid pro quo donations. The statement must give the donor a good-faith estimate of the value of the goods or services included with the "gift." Charities who fail to do this are subject to a $10 per contribution penalty (but capped at $5,000 per fundraising event), unless reasonable cause can be shown. These amounts are not subject to inflation adjustment. (IRC Sec 6714)

College Athletic Event Seating Rights - Prior to the TCJA, if a taxpayer made a payment to a college or university that would be allowable as a charitable deduction except that the taxpayer receives either a direct or indirect right to purchase tickets for seating at an athletic event in the school's athletic stadium, 80% of the payment is treated as a charitable contribution.

The TCJA prohibits any portion of such a payment made in 2018 or later to be treated as a charitable deduction. Thus, the charitable deduction for amounts paid for college athletic seating rights has been effectively repealed.

USE OF AN ASSET FOR CHARITABLE PURPOSES

Granting a charity permission to use or occupy property does not represent payment made to or for the use of the organization. Such an arrangement does not constitute a gift of property. It is merely the granting of a privilege for which no charge is made (Rev Rul 70-477). Thus granting a charity the use of property does not constitute a charitable gift.

> ***Example - Purchase of asset for charity*** - A taxpayer who buys an asset and uses it while performing volunteer services for a charity can't deduct its cost if he retains ownership of it. That's true even if the asset is used exclusively for charitable purposes. *(McCollum, Charles, (1978) TC Memo 1978-435, PH TCM ¶78435, 37 CCH TCM 1817; PLR 8440082)*

> ***Example – Timeshare*** – *Suppose a taxpayer contributes his or her timeshare week to a charity auction. There is no deductible charitable contribution since ownership of the timeshare unit was not given, only the use of the timeshare. Even the cleaning fee paid for the maid service when the winning bidder uses the unit would not be deductible since only expenses associated with services personally rendered by the taxpayer are deductible (Regulation 1.170A-1(g)).*

Cost of maintaining an asset - A taxpayer may deduct the cost of maintaining a personally owned asset to the extent its use relates to providing services for a charity. Thus, for example, a taxpayer was allowed to deduct the fuel, maintenance and repair costs (but not depreciation or the fair rental value) of piloting his plane in connection with volunteer activities for the Civil Air Patrol. *(Rev Rul 58-279, 1958-1 CB 145)* Similarly, a taxpayer who participated in a mounted posse that was a civilian reserve unit of the county sheriff's office could deduct the cost of maintaining a horse (shoeing and stabling). *(Hahn, Eugene, (1979) TC Memo 1979-429, PH TCM ¶79429, 39 CCH TCM 372)*

***Depreciation of Capital Assets* -** No deduction is allowed for the depreciation of a capital asset as a charitable deduction. This includes vehicles (that's why there is no imputed depreciation in the mileage rate), computers, etc.

> ***Example:*** *Kathy volunteers as a member of the sheriff's mounted search and rescue team. As part of volunteering, Kathy is required to provide a horse. Kathy is not allowed to deduct the cost of purchasing or to depreciate her horse. She can, however, deduct uniforms, travel, and other out-of-pocket expenses associated with the volunteer work.*

POSSIBLE RECAPTURE FOR CERTAIN TANGIBLE PROPERTY

A taxpayer must recapture part of a charitable contribution deduction if all of the following statements apply:

1. The taxpayer donated tangible personal property with a claimed value of more than $5,000, and the amount deducted is more than the taxpayer's basis in the property.
2. After the year of the contribution, but within 3 years of the contribution date, the charitable organization sells, trades or otherwise disposes of the property.
3. The organization does not provide a written statement, such as on Form 8282, Part IV, that either certifies (a) its use of the property was substantial and related to the organization's purpose, or (b) its intended use of the property became impossible. An officer of the organization must sign the statement under penalty of perjury.

If all of the above statements are true, the taxpayer must include in income (Form 1040, other income line) the difference between the deduction that was claimed for the property and the taxpayer's basis in the property when the contribution was made. The recapture is included on the return for the year that the organization disposes of the asset.

OTHER ISSUES

TCJA

Business Expenses of Some Public Employees May Qualify as Charitable Contributions **-** Except for years 2018-2025 when tier 2 itemized deductions are suspended by the TCJA of 2017, employee business expenses normally are deducted as a miscellaneous itemized deduction. However, miscellaneous deductions are limited to those expenses that exceed 2% of a taxpayer's Adjusted Gross Income. As a result, these deductions may be reduced or eliminated altogether. Further, they are not deductible for AMT purposes.

However, taxpayers such as teachers, who work for the public school system, can treat their expenses as a charitable contribution, thus eliminating the 2% of AGI limitation. IRS instructions specifically allow contributions of cash or goods to the US Government or state agencies including political subdivisions such as school districts, police departments, etc. The usual substantiation rules for noncash contributions apply.

Entertaining for Charity - A taxpayer may deduct the cost of entertaining others on behalf of a charity (e.g., wining and dining potential large contributors), but the cost of his own entertainment (or meal) is not deductible. *(Louis, Francois, (1966) TC Memo 1966-204, PH TCM ¶66204, 25 CCH TCM 1047)* The meals or entertainment on behalf of a charity may be provided in the taxpayer's home. *(PLR 812107; Rev Rul 69-473, 1969-2 CB 37; Rev Rul 66-10, 1966-1 CB 47)*

Uniforms - The cost of uniforms required to be worn when providing services to a charity are deductible as long as the uniforms have no general utility. The cost of cleaning the uniform also may be deducted. *(Reg. § 1.170A-1(g))* Treat these out-of-pocket expenses as "cash" donations rather than "property" donations.

Charitable Away-From-Home Travel - Volunteers often pay their own way when they travel away from home overnight in connection with charitable work. A volunteer who travels away from home overnight, including to foreign locations, to do charitable work for a qualified organization may generally deduct the same types of expenses that may be claimed by a taxpayer who makes a similar trip for business purposes. (The foreign travel limitations (see Chapter 3.13) that apply to business trips apparently do not apply when doing charitable work overseas.) These out-of-pocket costs are deductible, if they are properly substantiated non-lobbying expenses, they are reasonable in amount, and there is no significant element of personal pleasure, recreation, or vacation in the travel. *(Code Sec. 170(f)(6), Code Sec. 170(j), Reg. § 1.170A-1(g))* Deductible expenses include the taxpayer's out-of-pocket roundtrip travel cost, taxi fares and other costs of transportation between the airport or station and the hotel, lodging and meals. *(IRS Publication 526, 2018 edition, pg. 5,)*

> ***Meals*** - A volunteer traveling away from home overnight for charity may deduct meal costs—under Code Sec. 274(f). ***Note:*** *otherwise allowable charitable meal deductions are not subject to the 50% reduction that applies to business meals.*
>
> ***First-Class Accommodations*** - Tax Court has held that such costs are deductible if they are "reasonable" under the facts and circumstances, using criteria similar to those that would apply if the traveler were on a business trip. *(Cavalaris, TC Memo 1996-308)*
>
> ***Significant Element of Personal Pleasure*** - Any "significant element of personal pleasure" negates a deduction (i.e., not even partial deduction is allowed). Apparently, significant personal pleasure is assumed, if the taxpayer has only minor duties and is not required to perform any duties for the charity for major portions of the away-from-home stay.

Vehicle Travel - A taxpayer may choose between actual expenses and using the charitable mileage rate for the charitable use of their vehicle. Parking fees and tolls are additionally deductible (either method).

> ***Actual method*** - A taxpayer can deduct the cost of gas and oil, but not depreciation, insurance or repairs.
>
> ***Mileage rate*** – The charitable mileage rate, unlike the business, moving and medical mileage rates, is not adjusted annually for inflation as it is fixed statutorily. It changes only when Congress revises the rate, which has been 14 cents since 1998.

Students in Home - *T*axpayers who have a written agreement with a qualified sponsoring organization can deduct up to $50 per month for unreimbursed expenses of keeping a high school (or lower grade level) student in their homes, e.g., exchange student programs. To qualify, the student cannot be the taxpayer's relative or dependent. The following items must be filed with the tax return when this deduction is claimed: a copy of the agreement with the sponsoring organization that placed the student in the taxpayer's home, a summary of the various items paid to maintain the student, and a statement with the date the student became a member of the taxpayer's household, the dates of the student's full-time school attendance, and the name and location of the school. (IRS Pub. 526, 2018, page 21)

S Corp Contributions - The PATH Act makes permanent a provision that a shareholder's basis reduction in S stock when a charitable contribution is made by the corporation is equal to his pro rata share of the adjusted basis of the contributed property (Code Sec. 1367(a)(2), as amended by Act Sec. 307 of Division C).

<u>*Credit Card Rebates*</u> - Rebates from purchases made by credit card companies are not income but instead are an adjustment to the purchase price paid for the item or items purchased (Rev Rul 2005-28). The IRS privately ruled (PLR 201027015) that an individual would qualify for charitable deductions for rebates he designates to be paid to charities under a program offered by the credit card company. However, the IRS also concluded the written acknowledgment format proposed by the taxpayer to be used by the charitable organization does not satisfy the Code Sec. 170(f)(17) record keeping requirements.

<u>*Business Advertising Expense or Charitable Contribution*</u> - A taxpayer engaged in a trade or business who attempts to deduct without limitation payments to various organizations as "goodwill advertising" must be prepared to show their nature as ordinary and necessary business expenses or that the recipients aren't organizations qualifying as charities.

Strategies

<u>Charitable Giving Through Donor-Advised Funds</u> - Contribution to a donor advised fund is a way to warehouse funds in a year in which the donor has an unusually high income (and can benefit from a large charitable deduction) to satisfy the donor's social obligations to make charitable contributions in future years, without incurring the expense of setting up a private foundation and satisfying annual filing and other private foundation requirements.

Donor-advised funds, though they may bear the donor's name, are not separate entities, but are mere bookkeeping entries. They are components of a qualified charitable organization. A contribution to a charity's donor-advised fund may be deductible in the year it is made if it isn't considered earmarked for a particular distributee. The charity must fully own the funds and have ultimate control over their distribution. To document the contribution, the taxpayer must get a written acknowledgement from the fund's sponsoring organization[1] that it has exclusive legal control over the assets contributed (Code Sec. 170(f)(18)(A)). Though the donor can advise the charity, which generally will follow the donor's recommendations, the donor cannot have power to select distributees or decide the timing or amounts of distributions. The charity must also ensure that all distributions from the fund are arm's-length and do not directly or indirectly benefit the donor.

[1] The sponsoring organization cannot be listed in Code Sec. 170(f)(18)(A) (e.g., a war veteran's organization or domestic fraternal lodge).

<u>SUBSTANTIATION RULES</u>

<u>*Cash Contributions*</u> **-** Cash contributions include those paid by cash, check, electronic funds transfer, or credit card. (See special requirements for payroll cash contributions.) Taxpayers cannot deduct a cash contribution, regardless of the amount, unless they can document the contribution in one of the following ways:

1. A bank record that shows the name of the qualified organization, the date of the contribution, and the amount of the contribution. Bank records may include:
   a. A canceled check,
   b. A bank or credit union statement, or
   c. A credit card statement.
2. A receipt (or a letter or other written communication) from the qualified organization showing the name of the organization, the date of the contribution, and the amount of the contribution.
3. Payroll deduction records described below.

<u>*Blank Pledge Card*</u> **-** Because a blank pledge card provided by the donee organization to a donor does not show the information required under Code Sec. 170(f)(17) (name of the organization, the date of the contribution, and the amount of the contribution), it is not sufficient substantiation for a cash, check, or other monetary gift.

<u>Payroll contributions</u> **–** The guidance provided by the IRS (IR-2006-186; Notice 2006-110) for charitable contributions made by payroll deductions became obsolete June 30, 2018 when regulations incorporating the recordkeeping requirements of Code Sec. 170(f)(17) that were issued in 2008 became final.

For contributions by payroll deduction, a taxpayer must keep:

1. A pay stub, Form W-2, or other document furnished by the employer that shows the date and amount of the contribution, and
2. A pledge card or other document prepared by or for the qualified organization that shows the name of the organization. If the employer withheld $250 or more from a single paycheck, the pledge card or other document must state that the organization does not provide goods or services in return for any contribution made to it by payroll deduction. (Existing Reg. Sec. 1.170A-13(f)(11)(i)) (Note: This language is not included in Reg. 1.170A-15(d)(1), which simply says that the pledge card or other document prepared by or at the direction of the donee must show the name of the donee.) A single pledge card may be kept for all contributions made by payroll deduction regardless of amount as long as it contains all the required information. (Reg. Sec. 1.170A-13(f)(11)(ii))

If the pay stub, Form W-2, pledge card, or other document does not show the date of the contribution, the taxpayer must also have another document that does show the date of the contribution. If the pay stub, Form W-2, pledge card, or other document does show the date of the contribution, the taxpayer need not have any other records except those described in (1) and (2).

Cash contributions of $250 or more – To claim a deduction for a contribution of $250 or more, the taxpayer **must** have a written acknowledgment of the contribution from the qualified organization that includes the following details:

- The amount of cash contributed;
- Whether the qualified organization gave the taxpayer goods or services (other than certain token items and membership benefits) as a result of the contribution, and a description and good faith estimate of the value of any goods or services that were provided (other than intangible religious benefits); and
- A statement that the only benefit received was an intangible religious benefit, if that was the case.

If the acknowledgment does not show the date of the contribution, then the taxpayer must have one of the bank records described above that does show the contribution date. If the acknowledgement includes the contribution date and meets the other tests, it is not necessary to also have other records.

The acknowledgment **must** be in the taxpayer's hands before the **earlier** of the date the return for the year the contribution was made is filed, or the due date, including extensions, for filing the return.

Non-cash Contributions

Reasonable Cause Exception

The proposed regulations provided a reasonable cause exception to various non-cash substantiation and reporting rules. The final regulations removed that proposed reg and do not provide a standard for the exception. However, the Preamble indicates that reasonable cause may be determined on a case-by-case basis. Use caution in assuming your client's reasonable cause will be acceptable.

Deductions of Less Than $250 - A taxpayer claiming a non-cash contribution must get and keep a receipt from the charitable organization showing:

1. The name of the charitable organization,
2. The date and location of the charitable contribution, and
3. A reasonably detailed description of the property.

Note: The taxpayer is not required to have a receipt where it is impractical to get one (for example, if the property was left at a charity's unattended drop site).

Deductions of At Least $250 But Not More Than $500 - If a taxpayer claims a deduction of at least $250 but not more than $500 for a non-cash charitable contribution, he or she must have and keep an acknowledgment of the contribution from the qualified organization. If the contributions were made by more than one contribution of $250 or more, the taxpayer must have either a separate acknowledgment for each or one acknowledgment that shows the total contribution. The acknowledgment(s) must be written and include:

1. The name of the charitable organization,
2. The date and location of the charitable contribution,
3. A reasonably detailed description (but not necessarily the value) of any property contributed,
4. Whether or not the qualified organization gave the taxpayer any goods or services as a result of the contribution (other than certain token items and membership benefits), and
5. If goods and or services were provided to the taxpayer the acknowledgement must include a description and good faith estimate of the value of those goods or services. If the only benefit received was an intangible religious benefit (such as admission to a religious ceremony) that generally is not sold in a commercial transaction outside the donative context, the acknowledgment must say so and does not need to describe or estimate the value of the benefit.

Contribution Acknowledgment Letter – The IRS denied a taxpayer a substantial deduction for contributions because the acknowledgement letter from the taxpayer's church lacked the "no goods or services provided" statement. A second letter that included the required statement was not acceptable because it was not received contemporaneously. The Tax Court agreed with the IRS. This case shows the importance of scrutinizing an acknowledgement letter to be certain all of the required elements are included, and if something is omitted, the taxpayer needs to request a replacement letter before filing their return. *(Durden v. Commissioner, Dec. 59,061(M), TC Memo 2012-140)*

Doorknob Hangers Insufficient Proof **–** A married couple's charitable contribution deductions were denied because they did not provide to the IRS or the Court a "contemporaneous written acknowledgment" from any of four charitable organizations to which they'd donated noncash items. The Tax Court said, "They produced no acknowledgment of any kind from the Church or Goodwill. And the doorknob hangers left by the truck drivers from Vietnam Veterans and Purple Heart clearly do not satisfy the regulatory requirements. These doorknob hangers are undated; they are not specific to petitioners; they do not describe the property contributed; and they contain none of the other required information." The taxpayers had also claimed over $5,000 of clothing donations during the year with no appraisals that were also denied. (Kunkel v. Commissioner T.C. Memo. 2015-71)

Deductions Over $500 But Not Over $5,000 - If a taxpayer claims a deduction over $500 but not over $5,000 for a non-cash charitable contribution, they must have the same acknowledgement and written records as for contributions of at least $250 but not more than $500 described above. In addition, the records must also include:

- How the property was obtained. For example, by purchase, gift, bequest, inheritance, or exchange.
- The approximate date the property was obtained or, if created, produced, or manufactured by the taxpayer, the approximate date the property was substantially completed.
- The cost or other basis, and any adjustments to the basis, of property held less than 12 months and, if available, the cost or other basis of property held 12 months or more. This requirement, however, does not apply to publicly traded securities. If the taxpayer is not able to provide information on either the date the property was obtained or the cost basis of the property and there is reasonable cause for not being able to provide this information, attach a statement of explanation to the return.

Deductions Over $5,000 - If the taxpayer claims a deduction of over $5,000 for a charitable contribution of one property item or a group of similar property items, they must obtain acknowledgement from the charitable organization. In determining whether the deduction is over $5,000, combine the deductions for all similar items donated to any charitable organization during the year.

Generally, the taxpayer must also obtain a qualified written appraisal of the donated property from a qualified appraiser. For more details on contributions of $5,000 or more, see IRS Pub 561.

- ***Deduction Over $5,000 for One Item -*** When the contribution exceeds $5,000 for one item, Section B of Form 8283 must be completed for each item or group of items for which the taxpayer claimed a deduction of over $5,000. ***Exception:*** This rule does not apply to publicly traded securities that are reported in Section A of the 8283.

TCJA

- ***Appraisal Fees -*** Fees paid to find the fair market value of donated property are not deductible as contributions. They must be claimed as miscellaneous deductions on Schedule A, subject to the 2% of AGI limit. Therefore, for years 2018-2025, because the TCJA of 2017 suspended tier 2 miscellaneous deductions, the cost of the appraisal is not deductible.

CAUTION

The Preamble to the final regulations provides that only Section B, part IV of Form 8283, which is completed for property valued at over $5,000, is a donee acknowledgment, and this acknowledgment only contains some of the information required by Code Sec. 170(f)(8)(B). Accordingly, even a fully-completed Form 8283 does not satisfy the requirements of Code Sec. 170(f)(8).

If a copy of the appraisal must be attached to the tax year of the contribution then it must also be attached to all carryover years.

Aggregate Contributions Over $5,000 - Frequently taxpayers make multiple charitable contributions during the year and if the total of those contributions exceeds $5,000, is a qualified appraisal required?
In determining whether the $5,000 limitation has been exceeded, property and all similar items of property (see below) donated to one or more donees are treated as one property (Code Sec. 170(f)(11)(F)). This rule applies even if the similar items are donated to two or more different charitable donees (Reg § 1.170A-13(c)(1)(i); Reg § 1.170A-16(f)(5)(ii)).

Example: *Jay and Emily made three donations of used clothing during the year, $2,500 worth to the Salvation Army, $1,500 worth to the Vietnam Veterans and $2,000 to Goodwill for a total of $6,000. Because the items were all similar in nature (clothing), and because the total exceeded $5,000, Jay and Emily will need to obtain a qualified appraisal.*

Similar Items of Property - Similar items of property means property of the same generic category or type, such as stamp collections (including philatelic supplies and books on stamp collecting), coin collections (including numismatic supplies and books on coin collecting), lithographs, paintings, photographs, books, nonpublicly traded stock, nonpublicly traded securities other than nonpublicly traded stock, land, buildings, clothing, jewelry, furniture, electronic equipment, household appliances, toys, everyday kitchenware, china, crystal, or silver (Reg § 1.170A-13(c)(7)(iii)).

Exceptions to the $5,000 Limitation - Reduced requirements apply to contributions of non-publicly traded stock for which the claimed deduction is more than $5,000 but not more than $10,000 and additional requirements apply where a deduction of more than $500,000 is claimed. No appraisal is required for contributions of publicly-traded securities for which there are readily available market quotations.

Qualified Appraisal – A qualified appraisal of any property means an appraisal that's treated as a qualified appraisal under IRS regs or other guidance; and conducted by a qualified appraiser in accordance with generally accepted appraisal standards and any regulations or other prescribed guidance (Code Sec. 170(f)(11)(E)(i)(I)).

Qualified Appraiser – A qualified appraiser is an individual who meets all the following requirements. The individual:

1. Either (a) has earned an appraisal designation from a recognized professional appraiser organization for demonstrated competency in valuing the type of property being appraised, or (b) has met certain minimum education and experience requirements.
2. Regularly prepares appraisals for which he or she is paid.
3. Must have verifiable education and experience in valuing the type of property subject to the appraisal. An individual is treated as having education and experience in valuing the type of property if, as of the date the individual signs the appraisal, the individual has successfully completed (for example, received a passing grade on a final examination) professional or college-level coursework in valuing the type of property, and has two or more years of experience in valuing the type of property. The Preamble to the regs provides that the reference to a passing grade on a final examination in Reg § 1.170A-17(b)(2)(i)(A) is merely an example of what is considered successful completion of professional or college-level coursework, and other evidence of successful completion may be sufficient. However, mere attendance at a training event is not sufficient, and evidence of successful completion of coursework is necessary. The regs provide that coursework must be obtained from professional or college-level educational institutions, appraisal organizations, employer educational programs, or recognized professional trade organizations.
4. Has not been prohibited from practicing before the IRS under section 330(c) of title 31 of the United States Code at any time during the 3-year period ending on the date of the appraisal.

Final regulation 1.170A-17 related to qualified appraisals and qualified appraisers applies to contributions made on or after January 1, 2019, but taxpayers may rely on the rules of this section for appraisals prepared for returns or submissions filed after August 17, 2006.

The appraiser must complete Part III of Form 8283. See IRC Section 170(f)(11)(E), Notice 2006-96, and Regulations section 1.170A-13(c)(5) for details.

Appraisal Timing – Made not earlier than 60 days before the appraisal property's contribution date and no later than the due date (including extensions) of the return on which the charitable contribution deduction's first claimed for the donated property or, if the deduction's first claimed or reported on an amended return, the date the amended return is filed.

TCJA

Appraisal Fees – Appraisal fees are generally not included as part of the charitable contribution; however, they may be deductible as a tier 2 miscellaneous itemized deduction as an expense paid in connection with determining tax liability (Rev Rul 67-461). The TCJA of 2017 suspended the deduction of tier 2 miscellaneous deductions for years 2018 through 2025. Therefore, taxpayers get no tax deduction in those years for costs of appraising donated property.

Form 8283 – Thorough completion of Form 8283, Section B, is a necessity when claiming noncash contributions that require appraisal. In addition to the declaration and signature of the appraiser in Part III, the details of the item(s) donated must be completed in Part I, and Part IV must be completed and signed by a representative of the donee (charitable organization). Generally it is not necessary to attach a copy of the appraisal, but one exception is if the donated property is art valued at $20,000 or more. See the instructions to the 8283 for other times when the appraisal is to be attached.

Caution - Easily Audited

Since written verification or a bank record is required for most contributions, the IRS can easily audit charitable contributions by correspondence. Practitioners should be prudent in accepting their client's word for cash and goods contributions since they may end up as adjustments in the future and any pattern of promoting unverified contributions will be easily identified.

USED CAR, BOAT, PLANE AND OTHER MOTOR VEHICLE DONATIONS

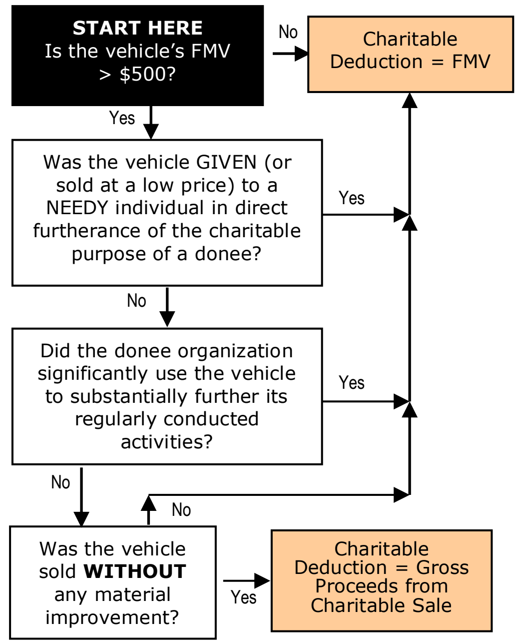
Used Vehicle Donations Severely Restricted - (Code Sec. 170(f)(12), as amended by 2004 Act. Sec. 884(a)) The deduction is limited for motor vehicles (as well as for boats and airplanes) contributed to charity for which the claimed value exceeds $500 by making it dependent upon the charity's use of the vehicle and imposing higher substantiation requirements.

Vehicle Sold Without Significant Intervening Use - If the charity sells the vehicle without any "significant intervening use" (actual, significant use of the vehicle to substantially further the organization's regularly conducted activities) or "material improvement" (e.g., major repairs), the donor's charitable deduction can't exceed the gross proceeds from the charity's sale.

Significant Intervening Use **-** This occurs only if the donee organization actually uses the vehicle to substantially further its regularly conducted activities, and the use is significant. Use includes providing transportation on a regular basis for a significant period of time or significant use directly related to instruction in vehicle repair, but does not include use of the vehicle to provide training in general business skills, such as marketing and sales. Examples of qualifying significant intervening use are delivery of meals every day for a year, or driving 10,000 miles during a one-year period while delivering meals. (Notice 2005-44, Sec. 7.01)

Material Improvement - This includes a major repair or improvement that improves the vehicle's condition in a way that significantly increases its value. Cleaning, minor repairs and routine maintenance aren't enough, nor are: painting, rustproofing or waxing; removal of dents and scratches; cleaning or repair of upholstery; or installation of theft deterrent devices. (Notice 2005-44, Sec. 7.02)

Deductible Vehicle Contribution Flow Chart
Assuming Correct Documentation



Exception for Autos Given (or sold at low price) to Needy Individuals - The gross proceeds limitation on a donor's auto contribution deduction doesn't apply if the charity sells it at a price significantly below FMV (or gives it away) to a needy individual. This nonstatutory exception applies only if supplying a vehicle to a needy individual is in direct furtherance of the charitable purpose of a donee of relieving the poor and distressed or the underprivileged who are in need of a means of transportation. (Notice 2005-44, Sec. 3.02(3), Notice 2005-44, Sec. 7.03)

FMV Defined - The gross proceeds limit doesn't apply if there is significant intervening use or material improvement of the vehicle, or if it is given (or sold at a low price) to a needy individual under the rules explained above. Here, under long-standing rules, the donor's contribution cannot exceed the vehicle's FMV. Under Notice 2005-44, Sec. 5, FMV of a vehicle may be determined by using an established used vehicle pricing guide (i.e., a "blue-book" type reference), but only if it lists a sales price for a vehicle that is the same make, model, and year, sold in the same area, in the same condition, with the same or substantially similar options or accessories, and with the same or substantially similar warranties or guarantees, as the vehicle in question. Dealer retail value can't be used.

Contemporaneous Written Acknowledgement – Additionally, a deduction for donated vehicles whose claimed value exceeds $500 is not allowed unless the taxpayer substantiates the contribution by a contemporaneous written acknowledgement from the donee. To be contemporaneous, the acknowledgment must be obtained within 30 days of either: (1) the contribution or (2) the disposition of the vehicle by the donee organization. The donor must include a copy of the acknowledgment with the tax return on which the deduction is claimed. The acknowledgement must contain:

- The name of the donor,
- Taxpayer identification number of the donor, and
- The vehicle identification number (or similar number) of the vehicle.
- If the charity (donee) sells the vehicle without performing a significant intervening use or material improvement of such vehicle, the acknowledgement must say that the vehicle was sold in an arm's length transaction between unrelated parties, and state the gross proceeds from the sale and that the deductible amount may not exceed the gross proceeds.
- Acknowledgement by the donee organization which includes whether the donee organization provided any goods or services in consideration of the vehicle, and a description and good faith estimate of the value of any such goods or services, or, if the goods or services consist solely of intangible religious benefits, a statement to that effect.

Form 1098-C – Form 1098-C incorporates all of the required acknowledgement elements for the donee (charitable organization) to complete. The donor is required to attach copy B of the 1098-C to his or her federal tax return when claiming a deduction for contribution of a motor vehicle, boat or airplane.

CHARITY EASEMENTS

In ***Notice 2004-41***, 2004-28 IRB; IR2004-85, the IRS takes a restrictive view on contributions of partial interests in property that they refer to as "easements" in the notice. The notice and related news release warn taxpayers that the IRS cautions that it will disallow improper charitable contribution deductions for transfers of easements:

(1) On real property to charities, and

(2) In connection with purchases of real property from charities.

In addition, IRS may impose accuracy-related penalties on taxpayers claiming such deductions and excise taxes and other penalties on non-taxpayer participants in these transactions (e.g., promoters, appraisers and charitable organization managers).

Substantial restrictions apply to charitable contributions of partial interests in property, which often render them nondeductible. (§170(f)(3)) These restrictions don't apply, however, and charitable deductions are allowed, for qualified conservation contributions. (§170(f)(3)(B)(iii))

A qualified conservation contribution is a contribution of a qualified real property interest to a qualified organization exclusively for a conservation purpose enumerated in Code Sec. 170(h). A qualified real property interest includes a restriction (granted in perpetuity) on the use that may be made of the real property. (Code Sec. 170(h)(2)(C)) Such qualified real property interests are referred to as conservation easements in Notice 2004-41.

One of the permitted conservation purposes is the protection of a relatively natural habitat of fish, wildlife or plants, or similar ecosystem. (Code Sec. 170(h)(4)(A)(ii)). Another is the preservation of open space, including farmland and forest land, for the scenic enjoyment of the general public or pursuant to a clearly delineated governmental conservation policy. However, if the public benefit of an open space easement is not significant, the charitable contribution deduction will be disallowed. (Code Sec. 170(h)(4)(A)(iii))

The amount of the deduction may not exceed the FMV of the contributed property (i.e., the contributed easement) on the date of the contribution (reduced by the FMV of any consideration received by the taxpayer). (Reg. § 1.170A-1(c)(1)) No deduction is allowable if the: (1) donor (or a related person) reasonably can expect to receive financial or economic benefits greater than those that will inure to the general public as a result of the donation of a conservation easement, or (2) the donation of a conservation easement has no material effect on the value of real property, or enhances rather than reduces the value of real property. (Reg. § 1.170A-14(h)(3))

QUALIFIED CONSERVATION CONTRIBUTIONS (EASEMENTS)

The Protecting Americans from Tax Hikes Act of 2015 made this provision permanent. The 30% of AGI limitation that generally applies to contributions of capital gain property is raised to 50% of AGI for qualified conservation contributions (easements), and the carryover period is increased to 15 years if the conservation easement contribution exceeds the 50% limitation.

Further, if the donor is a qualified farmer or rancher, the 50% limitation is increased to 100%. However, for any contribution of property made after August 17, 2006, that is used or available for use in agriculture or livestock production, the 100% limitation applies only if the contribution is subject to a restriction that the property remain available for agriculture or livestock production. If there is no such restriction, the 50% limitation applies. For this purpose a qualified farmer or rancher is a taxpayer with gross farming or ranching business income that is greater than 50% of total gross income for the year. See IRS Notice 2007-50 for further details.

Example – Non-farmer Donor: *In 2017 taxpayer who is not a farmer or rancher contributes $60,000 to his church (qualifies for the 50% limitation) and in the same year makes a qualified conservation easement donation with a fair market value of $80,000. His AGI is $100,000. He is allowed to deduct $50,000 of the cash contributions, with the unused $10,000 carried forward for up to 5 years. None of the qualified conservation contribution is deductible in the donation year because contributions other than the conservation easement must be used first toward the 50% limitation, but the entire $80,000 qualified conservation contribution is carried forward for up to 15 years.*

Example – Farmer Donor: *Using the same facts as in the example above, except that the donor is a qualified farmer, the deduction in the donation year will be $100,000: $50,000 of the qualified conservation contribution plus $50,000 of the cash contributions. The unused $10,000 of the cash contributions carries forward for up to 5 years and the unused $30,000 of the qualified conservation contribution is carried forward for up to 15 years.*

GIFTS OF APPRECIATED LONG-TERM CAPITAL GAIN PROPERTY

A taxpayer may deduct an amount equal to the FMV for property donated to 50% charities, but limited to 30% of AGI, if that property would have been subject to long-term capital gains rates if sold. At the election of the taxpayer, the donation deduction can be reduced to the taxpayer's basis in the property and the donation will then be eligible for the 50% of AGI limitation. The five-year contribution carryover rules apply to any excess over the 50% and 30% of AGI limitations for the current year.

FORM 8283

This form must be included with the taxpayer's return when noncash contributions of more than $500 are made in a single tax year. The instructions to the form state that failure to file it can result in the loss of the charitable deduction. Form 8283 also asks for information regarding the donated property. If the value of the property (other than publicly-traded securities) exceeds $5,000, an appraisal summary must be completed, including the donee's signature verifying receipt of the gift and an appraiser's signature certifying the worth of the gift. This applies to single gifts valued at over $5,000 and to gifts of similar items (gems, books or whatever) that aggregate over $5,000.

CALIFORNIA DIFFERENCES

California generally conforms to the Federal rules for charitable contributions. However, some areas of nonconformity include the following and adjustment for them is made on Schedule CA, Part II, generally on line 11 or 12 (2018):

- **Qualified Charitable Contributions –** California limits the amount of the charitable deduction to 50% of the taxpayer's federal adjusted gross income. The state has not conformed to the limit increase to 60% for 2018-2025 enacted in the TCJA. Thus, there could be some differences between the amount allowed using federal law and the amount allowed using California law.
- **College Athletic Seating Rights** – TCJA disallows a charitable deduction for college athletic seating rights for years 2018 through 2025. California has not conformed to that disallowance and the deduction is still allowed for California purposes.
- **Charitable Contribution Carryover Deduction** – There may be a difference between the California carryover and the Federal carryover. The adjustment is made on the Schedule CA, lPart II, line 13.
- **College Access Credit** – California allows a credit for contributions made to the College Access Fund. For 2018 the credit is 50% of the amount contributed (see Chapter 9.50 for specifics). When the College Access Credit is claimed on the California return, the taxpayer may claim a deduction for the contribution to the fund on their federal Schedule A, but under Proposed Regulations 1.170A-1(h)(3) the amount deductible will be limited to 50% of the contribution for contributions made after Aug. 27, 2018; contributions prior to that date are 100% deductible. Whatever amount of the College Access Fund contribution is claimed as an itemized deduction on federal Schedule A will need to be entered on Schedule CA, Part II, line 11, column B, as it is not deductible on the state return.

NOTES

MISCELLANEOUS DEDUCTIONS

- **Tier 1** – **Not Subject to the 2%** of AGI reduction
  - Amortizable bond premium
  - Federal estate tax deduction
  - Gambling losses
  - Impairment related work expenses
  - Unrecovered investment in pensions
  - Claim of right deduction (>$3,000)
  - **Tier 2** – **Subject to 2%** of AGI reduction
    SUSPENDED 2018-2025
    - Employee business expenses
    - Home office (employee)
    - Education
    - Legal Fees
    - Investment Expenses
    - Tax Preparation Fees

- **1040, Schedule A –** Itemized Deductions

TIER 1 EXPENSES

Tier 1 expenses are fully deductible on Schedule A (not subject to the 2% of AGI limitation) and are deductible against the AMT. These include impairment-related work expenses for handicapped individuals, Federal estate tax on income in respect of a decedent, repayments of more than $3,000 under claim of right, amortizable premium on taxable bonds, gambling losses to extent of winnings, and unrecovered investment in the contract of the pension of a decedent.

- ***Amortizable Bond Premium -*** Bond premium is the amount paid for a bond that exceeds its face value. A taxpayer can elect to amortize the premium on taxable bonds acquired prior to 10/23/86, and deduct the amortization as a Tier 1 itemized deduction. For bonds purchased after 10/22/86 and before 01/01/88, amortization of the premium is investment interest expense, unless a taxpayer elects to offset the interest income on the bond with the amortized portion of the premium. For bonds acquired after 1987, the amortization of the premium can only offset the interest income on the bond--no Schedule A deduction is available.

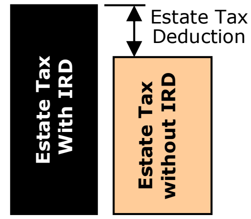
- ***Federal Estate Tax on Income in Respect of a Decedent -*** A taxpayer can deduct the Federal estate tax attributable to income in respect of a decedent that the taxpayer as beneficiary must include in gross income. This is a frequently overlooked deduction, since it is generally up to a beneficiary's preparer to recognize that the deduction exists and calculate the deduction.

When a client comes in with a 1099R or K-1 with income from an inherited IRA, do you ask two very important questions?

(1) Was there a 706 filed for the estate?

(2) If so, was there a tax liability on the 706?

If the answer to both questions is yes, then your client is eligible for a Tier 1 miscellaneous (not subject to the 2% of AGI reduction) itemized deduction. However, with the TCJA's increase in the estate tax exclusion amount to $10 million – adjusted for inflation to $11.4 million for 2019 – fewer estates will be subject to an estate tax so it is more likely than ever that the answers to these questions will be no. Even so, you should be on the lookout for this situation.



Background - Income in Respect of a Decedent (IRD) is included in the decedent's gross estate AND is subject to income tax. To make up for this inequity, a deduction for estate tax is allowed to the ultimate recipient of the income. If the recipient is an individual, it is claimed as a miscellaneous itemized deduction, not subject to the 2% limitation. If the estate receives the income, the deduction is claimed on Form 1041. *(IRC § 691(c)(1)(A);Reg § 1.691(c)-1(a))*

Amount Deductible - The amount of estate tax that is deductible is the part representing the net value of all items in the estate, which are IRD.

Example A: *Sergei, a lawyer, was a cash-basis taxpayer when he died two years ago. At the time he was entitled to $12,000 from clients in payment for services. He had also accrued $8,000 in bond interest at the time of his death. He owed $5,000 in expenses for which his estate became liable. The income and expenses were reported on Sergei's estate tax return. After credits, the estate owed $9,460 in tax. The net value of items included as IRD is $15,000 ($20,000 income less $5,000 expense). The estate tax determined without including the $15,000 is $4,840. The estate tax that qualifies for the deduction is $4,620 ($9,460 minus $4,840).*

Example B: *Assume Diane inherited Sergei's estate (Example A). She collected the $12,000 from the clients this year and will include that amount in income on her current year return. She itemizes deductions and will claim a miscellaneous deduction of $2,772, figured as follows: $12,000/$20,000 x $4,620 = $2,772.*

Caution - This has been an often overlooked tax deduction. The primary reason? There is no IRS form associated with the 706 providing the beneficiaries with the information needed to determine the deduction. Therefore, it is the responsibility of the practitioner to recognize the potential for this deduction when a taxpayer has inherited taxable income.

- ***Gambling Losses to Extent of Winnings*** (Also see Chapter 7.12– Gambling Losses) **–** A taxpayer may deduct gambling losses to the extent of winnings included in total income on Form 1040. In order to verify the losses, a taxpayer should have a record, which includes the following information:
  - The date and specific type of wager;
  - The name and address or location of the gambling establishment;
  - The names of other people present with the taxpayer at the establishment; and
  - The amount won or lost. In addition, documentation like wagering tickets, canceled checks, credit card records, bank withdrawals, etc., should also be available.

- ***Impairment-Related Work Expenses -*** Taxpayers having a physical or mental disability that limits their activities can deduct impairment-related work expenses. For example, an allowable expense would be for the cost of attendant care at the place of the taxpayer's work.

- ***Unrecovered Investment in Pensions -*** If a retired person dies before recovering the entire basis in a pension or annuity (that started after 1986), the unrecovered portion is allowed as a deduction on the retiree's final return. If the annuity is for the joint lives of a retiree and a designated beneficiary, the deduction would apply to the final return of the last to die. Otherwise, it would be allowed on the final return of the retiree decedent. *(Code Sec. 67(b)(10);Code Sec. 72(b)(3)(A))*

  Strategy – If a decedent was drawing a pension and that pension was only partially taxable, then there will be some remaining unrecovered basis. See the example below that shows how to determine the amount of the unrecovered basis.

Example - *Bill Smith, age 65, began receiving retirement benefits in 2017 under a joint and survivor annuity. Bill's annuity starting date is January 1, 2017 The benefits are to be paid for the joint lives of Bill and his wife Kathy, age 65. Bill had contributed $31,000 to a qualified plan and had received no distributions before the annuity starting date. Bill is to receive a retirement benefit of $1,200 a month, and Kathy is to receive a monthly survivor benefit of $600 upon Bill's death.*

Under the simplified method, Bill's tax-free monthly amount is $100 ($31,000 ÷ 310). Upon Bill's death, if Bill has not recovered the full $31,000 investment, Kathy will also exclude $100 from her $600 monthly payment. If Bill and Kathy die before 310 payments are made, a miscellaneous itemized deduction will be allowed for the un-recovered cost on the final income tax return of the last to die.

- ***Claim of Right Doctrine*** (Also see Chapter 9.05 – Claim of Right) **–** Code Section 1341 describes the Claim of Right doctrine which offers benefits to taxpayers who have included an amount in income in one tax year, but have had to repay all or part of it in a later year.

- **For Repayments over $3,000** - Taxpayers can choose between a Tier 1 miscellaneous itemized deduction ***OR*** a tax credit based on the difference in tax with or without the repaid income in the year the income was originally reported. Make both computations and select the one that provides the greater benefit.
- **Repayments of $3,000 or less** - are claimed as Tier 2 miscellaneous itemized deductions.

- ***Excess Deductions on Trust Termination -*** There has been some confusion related to the deductibility of excess deductions flowing through to beneficiaries from a trust on Form 1041-K1 upon termination of the trust. Prior to the passage of the TCJA excess deductions on the termination of a trust were included as part of the beneficiary's tier 2 (subject to the 2% of AGI limitation) miscellaneous itemized deductions. However, TCJA suspended the deduction for tier 2 deductions for years 2018 through 2025, leading many to believe (1) that the pass-through expenses at termination were no longer deductible by the beneficiary and (2) they were no longer deductible on the 1041.

  The IRS subsequently issued Notice 2018-61 notifying taxpayers that the IRS intended to issue regulations dealing with the issue and in the meantime the taxpayers could rely on guidance included in Notice 2018-61, which provides the following:

  - Excess deductions on termination of a 1041 flowing through to beneficiaries from a trust 1041-K1 are deductible on Schedule A. Enter the amount on line 16 – Other Deductions.

  See also the beneficiary instructions to 2018 Form1041-K1, box 11, which also direct that the beneficiary's share of Code A excess deductions are deductible on line 16 of the beneficiary's Schedule A.

CAUTION:
The draft instructions for the 2019 1040 make no mention of the excess deductions on trust termination being deductible on line 16 and draft 1041 instructions had not been issued when this text was completed. We are not sure whether the IRS may have changed its mind for 2019.

TIER 2 EXPENSES

NOTE: All Tier 2 Miscellaneous Itemized Deductions are suspended (not deductible) for the tax years 2018 through 2025.

Tier 2 expenses must be reduced by 2% of AGI before they are deducted on Schedule A and they are not allowed at all for AMT computation purposes. They include such expenses as professional dues, qualified job-related educational expenses, malpractice insurance premiums, job-seeking expenses, employee office-in-home expenses, professional periodical subscriptions, uniforms, union dues, the deductible portion of unreimbursed business meals, expenses related to the production of income, tax preparation fees, and appraisal fees related to property given to charity or involved in a casualty loss.

- ***Tax Preparation Fees*** – For years before 2018 and after 2025, generally tax preparation fees, including the costs of electronic filing, paid by the taxpayer are deductible as Tier 2 expenses. This would also include the purchase of tax preparation software, guides, and instructions. If the taxpayer is self-employed or has rental income property an allocated amount of the tax preparation fees may be deductible on those schedules in lieu of Schedule A. Such allocation continues to be allowed during the 2018-2025 suspension period.

CAUTION (1) - If allocated amounts of tax preparation fees are deducted on Schedule C, E, or F, and those amounts are $600 or more, the taxpayer may need to issue a Form 1099-MISC to the individual or firm who provided those services.

CAUTION (2) – If your return preparation software transfers the fee you charged the client for the prior year return as a pro forma amount for Schedule A miscellaneous deductions, be sure to adjust that amount for the preparation fees allocated to other schedules.

- ***Credit and Debit Card Fees Related to Tax Payment are Deductible -*** Credit or debit card convenience fees charged for paying federal individual income taxes electronically are deductible as a Tier 2 itemized deduction for years before 2018 and after 2025. (IR-2009-37)
- ***Legal Expenses*** (Also see Chapter 7.10 – Legal Expenses) **–** Other than for years 2018-2025, an individual can usually deduct legal expenses incurred in attempting to produce or collect taxable income or paid in connection with the determination, collection, or refund of any tax. The following legal expenses are also deductible:

1) Related to either doing or keeping the taxpayer's job, including expenses paid to defend the taxpayer against criminal charges arising out of his/her trade or business,
2) For tax advice related to a divorce, if the bill specifies how much is for tax advice and it is determined in a reasonable way, or
3) To collect taxable alimony.

- ***Work Clothes and Uniforms –*** For years other than 2018-2025, the cost and upkeep of work clothing is deductible if the following two requirements are met.
    1) They are worn as a condition of employment.
    2) The clothing is not suitable for everyday wear. It is not enough that the clothing be distinctive, it must be specifically required by the taxpayer's employer. Nor is it enough that the taxpayer does not, in fact, wear the work clothes away from work. The clothing must not be suitable for taking the place of the taxpayer's regular clothing.

  Examples of workers who may be able to deduct the cost and upkeep of work clothes are: delivery workers, firefighters, health care workers, law enforcement officers, letter carriers, professional athletes, and transportation workers (air, rail, bus, etc.). Musicians and entertainers can deduct the cost of theatrical clothing and accessories if they are not suitable for everyday wear. IRS contends that white bib overalls and standard shoes, such as a painter might wear, are not distinctive in character or in the nature of a uniform.

  Tax Court Case - The Tax Court has held that a salesman for Ralph Lauren who was required to purchase and wear the designer's apparel while representing the company couldn't deduct the cost of such clothing as unreimbursed employee expenses. The Court found that the clothing was clearly suitable for regular wear and upheld IRS's imposition of an accuracy-related penalty with respect to the related portion of the underpayment. **(Barnes, TC Memo 2016-79)**

  The costs of ***protective clothing*** required for work, such as safety shoes or boots, safety glasses, hard hats and work gloves, are deductible. Examples of workers who may require safety items include carpenters, chemical workers, machinists, oil field workers, pipe fitters, and truck drivers.

- ***Military Uniforms -*** Taxpayers generally cannot deduct the cost of uniforms if they are on full-time active duty in the armed forces. However, armed forces reservists can deduct the unreimbursed cost of uniforms if military regulations restrict the taxpayers from wearing it except while on duty as a reservist. A student at an armed forces academy cannot deduct the cost of uniforms if they replace regular clothing. However, the cost of insignia, shoulder boards, and related items are deductible. Civilian faculty and staff members of a military school can deduct the cost of uniforms. Deductions related to military uniforms are suspended for 2018-2025.

- ***Gift Expenses –*** Only gifts given in the course of a trade or business are deductible and then they are generally limited to $25 per year per person (recipient). (IRC Sec 274(b); Reg. 1.274-3) These expenses would be deducted on Schedule C, E or F, as appropriate. For employees, these are Tier 2 expenses that are suspended for 2018-2025.

    - Married Taxpayers - If the taxpayer and spouse both give gifts, both are treated as one taxpayer. It does not matter whether they have separate businesses, are separately employed, or whether each has an independent connection with the recipient. If a partnership gives gifts, the partnership and the partners are treated as one taxpayer.

    - Incidental Costs **-** Incidental costs, such as engraving on jewelry, or packaging, insuring, and mailing, are generally not included in determining the cost of a gift for purposes of the $25 limit. A cost is incidental only if it does not add substantial value to the gift.

    - Exceptions **-** The following items are not considered gifts for purposes of the $25 limit.
        1) An item that costs $4 or less, and
            a) Has the taxpayer's name clearly and permanently imprinted on the gift, and
            b) Is one of a number of identical items that the taxpayer widely distributes, such as pens, desk sets, and plastic bags and cases.
        2) Signs, display racks, or other promotional material to be used on the business premises of the recipient.

- ***Gift versus Entertainment -*** Any item that might be considered either a gift or entertainment generally will be considered entertainment. However, if the taxpayer gives a customer packaged food or beverages that he intends the customer to use at a later date, treat it as a gift. Entertainment expenses are not deductible after December 31, 2017, per the TCJA. An employee expense of a job-related gift is not deductible for years 2018-2025. See chapter 3.10, Meals and Entertainment.

- ***Car Expenses -*** If an employee uses his car for business purposes in years other than 2018-2025, he may be able to deduct car expenses as a Tier 2 itemized deduction. Generally he can use one of the two following methods to figure his deductible expenses.
    - Actual car expenses.
    - Standard mileage rate.

  Details and options relating to the deduction for the business use of the taxpayer's vehicle is complicated and covered separately in chapter 3.11 (Course CPE 311).

Strategy - Employee Vehicle Deductions - the AMT & 2% Rule

In years other than 2018-2025, the unreimbursed business expenses of an employee can only be deducted as miscellaneous itemized deductions subject to the 2% of AGI reduction. Thus, those who take the standard deduction receive no tax benefit for those expenses. Even when itemizing, taxpayers encounter two additional limitations:

a. For regular tax purposes, the employee business expenses when combined with other expenses in the same category are first reduced by 2% of a taxpayer's income (AGI) and then only the excess is deductible.

b. If the employee is taxed by the AMT, then none of the business expenses are allowed at all.

As a result, many taxpayers are unable to deduct their employee business expenses. However, there are two possible strategies that may help an employee recover some or all of these expenses.

The simplest way is for the employee to negotiate an accountable reimbursement plan with his or her employer. This will allow the employer to provide the employee with nontaxable reimbursement for the expenses. Depending upon the employer's attitude, the employee might need to accept a pay reduction approximately equal to the expense reimbursement.

Another possible strategy involves business assets that must be depreciated. By minimizing the depreciation deductions each year, when the business assets are sold or scrapped, the business basis will be higher than it would be if accelerated depreciation or Sec. 179 deductions were claimed. As a result, a potential deductible business loss has been created. Since the gain or loss from the sale of business assets is treated as income or loss on the face of the tax return, there is no need to itemize to benefit from a loss from the sale of the business asset.

The business asset most likely to fall into this category is the business-use portion of the employee's vehicle. To gain any benefit, the sale must result in a loss. The benefit will vary depending on three variables unique to each situation: the cost of the vehicle, how much depreciation was allowed or allowable for its business use, and the vehicle's sale price.

Example - *A vehicle costing $40,000 was driven a total of 100,000 miles (of which 25,000 miles were for business use), and the vehicle was sold for $12,000. Thus, the vehicle is used 25% as a business vehicle and the loss is determined as follows:*

Sales Price (25% of $12,000)		*$3,000*
Cost (25% of $ 40,000)	*10,000*	
25,000 Business Miles @ $.24/Mile	*<6,000>*	
Basis		*<4,000>*
Net Deductible Loss		*<1,000>*

In the example, the standard mileage rate was used with an imputed depreciation rate of 24 cents per mile (see Chapter 3.11 for a table of actual recent year rates). Using the standard mileage rate minimizes the taxpayer's recordkeeping and produces a low depreciation component. The taxpayer must account for depreciation when selling the vehicle, even though no benefit was derived. The tax benefit rule does not apply to depreciation. (Reg § 1.111-1(a))

- ***Hobby Expenses*** - **Other than for years 2018-2025**, if a taxpayer does not carry on an activity for profit (in other words, it is a hobby), the taxpayer may deduct their hobby expenses, up to the amount of any hobby income, as a tier 2 itemized deduction. Thus hobby income is reported on their 1040 (via Schedule 1, line 8 on the 2019 draft), and, except for years 2018-2025, any expenses, not exceeding the hobby income, are deductible as miscellaneous itemized deductions on Schedule A, assuming the taxpayer is not claiming the standard deduction, in which case they would be reporting income but not deducting the expenses. For 2018-2025, none of the hobby expenses are deductible, so all of the hobby income will be taxable. See Chapter 3.02 for information on "Profit Motive."

- ***Job-Search Expenses*** – Expenses looking for a new job in the taxpayer's current occupation are deductible (**other than for years 2018-2025**), even if a new job is not obtained. To be deductible, the expenses cannot be to look for a job in a new occupation or for a first job. If there is a substantial time gap between the taxpayer's last job and when he or she looks for a new job, the expenses are not allowed.

  The types of expenses that are deductible if looking for a new job in the same occupation include:
    - Fees paid by the taxpayer to employment and outplacement agencies and for career counseling.

- Resume preparation costs, such as typing, printing and mailing.
- Travel and transportation expenses if the trip is primarily to look for a new job. Even if the travel expenses to an area aren't deductible because job search wasn't the taxpayer's primary reason for the trip, the expenses looking for work in the area are allowed.

- ***Investment Fees and Expenses -*** Investment fees, custodial fees, trust administration fees (for revocable trusts), and other expenses paid for managing investments that produce taxable income are deductible in years **other than 2018-2025**. However, the fees are only deductible for the production of taxable income and are not deductible for the production on non-taxable investment income. Where the expenses are for the production of both taxable and nontaxable income, an allocation must be made.

Example – Allocating expenses in years other than 2018-2025 *– Joe Lewis has ABC Financial manage his investment portfolio and ABC charges Joe an annual management fee of one half of one percent of his portfolio value. For the tax year that management fee was $3,700. Joe's portfolio produced a total of $35,000 of taxable and non-taxable income for the year. Of that $35,000, $15,000 was from interest on tax free municipal bonds and the balance, $20,000, was from taxable interest and dividends. Therefore only $2,114 ($3,700 x ($20,000/35,000)) of the management fee is deductible.*

CAUTION – When investment expenses are allowed as a Tier 2 itemized deduction (i.e., in years other than 2018-2025), they must also be taken into account when computing the net investment income for purposes of determining how much investment interest is deductible. Most tax software includes a single entry point for the total of all investment expenses. Attempting to itemize those expenses on a separate line of the return will defeat the software computation.

Strategy (only for years other than 2018-2025) – Where the 2% of AGI will reduce or eliminate an investment expense and the taxpayer has investment interest carryover, consider not deducting the investment expenses so as to maximize the investment interest expense deduction. However, utilizing this strategy will prevent deduction of the investment expenses when determining the net investment income for purposes of the 3.8% net investment income surtax, so the effect on the surtax must also be considered.

- ***Special Rules for Performing Artists -*** Some performing artists are allowed to deduct their employment-related expenses as an adjustment to gross income, thus avoiding the 2%-of-AGI reduction on these expenses. This above-the-line deduction is unchanged by the TCJA. In order for these taxpayers to qualify for this special rule, all of the following must be met:
  (1) They must have ***two or more employers in the performing arts field*** during the tax year (don't count nominal employers who pay less than $200);
  (2) Their business expenses must be ***more than 10%*** of the gross income earned as a performing artist;
  (3) ***AGI (before performance-related expenses) can't be more than $16,000***. Married performers must file joint returns (unless they lived apart all year). The two-employer requirement and 10%-of-gross-income requirement are applied to each spouse separately. However, the $16,000-AGI requirement applies to married performers' joint income.

  Performing arts related expenses are not deducted on Schedule A; they are transferred from Form 2106 to Form 1040, Schedule 1, line 11 (draft 2019).

- ***State and local government officials get "above-the-line" deduction*** *(unchanged by TCJA)* **-** Employee business expenses of an official of a state or local government are deductible ***in computing AGI***, if the official is compensated in whole or in part on a fee basis. The officials for whom this provision is intended are those who provide certain services to the government, and who hire employees and incur expenses in connection with their official duties. Since these expenses are deductions "above-the-line," they are also deductible for AMT purposes.

- ***Firefighter Meals*** – See Chapter 3.10 – Meals & Entertainment

- ***Home Office*** (Also see Chapter 3.15 – Home Office) **–** If an employee uses a part of his home regularly and exclusively for business purposes, in years **other than 2018-2025**, he may be able to deduct a part of the operating expenses and depreciation of the home, or $5 per business-use square foot, up to 300 square feet, if using the simplified method. He can claim this deduction for the business use of a part of the home only if that part of the home is used ***regularly*** and ***exclusively:***
  1) As the taxpayer's principal place of business for any trade or business,
  2) As a place to meet or deal with patients, clients, or customers in the normal course of a trade or business, or
  3) In the case of a separate structure not attached to the taxpayer's home, in connection with the taxpayer's trade or business.

The regular and exclusive business use must be ***for the convenience of the taxpayer's employer*** and not just appropriate and helpful in the taxpayer's job.

CAUTION
The home office deduction can produce some negative effects when and if the home containing the office is sold. Unless the simplified method was used for all years when a home office deduction was claimed, there will be a certain amount of depreciation recapture that cannot be excluded under the home sale rules. If the home office is a separate structure the entire gain from the office portion of the home will not qualify for the exclusion of home gain.

- ***Education Expenses* -** Job-related educational expenditures are deductible by an employee as Tier 2 miscellaneous deductions (in years other than 2018-2025) or on Schedule C for a self-employed individual. Some job-related education expenses may qualify for the American Opportunity Credit or Lifetime Learning credits. The same expense, however, cannot be used for more than one tax benefit.

ADDITIONAL CONSIDERATIONS
If the taxpayer(s) meet certain requirements, some or all of the education expenses discussed here may qualify for a more beneficial tax treatment such as a credit, AGI adjustment (for years available) or, in the case of a self-employed individual, a Schedule C deduction.

  - *Qualifying Education Expenses* **-**To be deductible on Schedule A (for years before 2018 and after 2025), educational expenses must be closely related to the taxpayer's present job. Temporary absence from work, however, will not automatically cause a problem if that absence is a year or less and the taxpayer returns to the same type of work. The specific requirements state that the education must either:
    (a) Maintain or improve skills required in the taxpayer's present job, OR
    (b) Be required by the employer to retain the taxpayer's position.
    NOTE: Educators are allowed to deduct expenses for classes on a new subject they will teach or for training for a school counseling or administrative job. For teachers, this is all considered one line of work.
  - *Nonqualifying Education Expenses* **-** No deduction is allowed for education that:
    (a) Is being completed as part of meeting a minimum requirement for getting a job,
    (b) Is of a general or personal nature, or
    (c) Leads to qualification for a new trade.
  - *New Trade or Business Cases:*
    (1) A software engineer worked as a project manager. The Tax Court ruled she was not entitled to deduct education expenses related to obtaining her executive masters of business administration (EMBA) degree because the education qualified her for a new trade or business. Her employment was largely unrelated to her EMBA coursework, and although she continued to be qualified to manage people as a project manager, she also became qualified to perform many other tasks of business, management, finance and marketing that she was not qualified to perform before enrolling in the EMBA program. (*M.Z. Creigh, TC Summary Opinion 2017-26*)

    (2) This case is also about EMBA program expenses. Here the taxpayer was a finance and accounting professional. Among the issues raised by the IRS when they denied the education expenses were that the EMBA degree was a general degree that did not maintain or improve specific skills required for his employment and that the degree qualified him for a new trade or business. The taxpayer was a well-established finance and accounting business manager at an airport hotel before beginning his EMBA program, and he took courses that improved his managerial and leadership skills in his position as a business manager. Although hired by another company soon after graduating, the taxpayer performed duties that were substantially similar to those of his former job, the degree was not a prerequisite for the job, and considering the courses he took, the taxpayer was not qualified to perform new tasks or activities with the conferral of his degree. Therefore, the expenses qualified. *(A. Kopaigora, TC Summary Opinion 2016-35)*
  - *Deductible Educational Costs Include* **-** Transportation, travel, tuition, books, fees, supplies, etc. For qualified transportation, actual expenses of a car may be deducted, or the taxpayer may use the standard mileage rate.

    Education expenses of a regularly employed individual who goes from work to school on a strictly "temporary basis" can also include the costs of returning from school to home. Roundtrip mileage is also deductible for those who travel from home to school on a temporary basis, regardless of distance or whether the taxpayer attends school on nonworking days. If attendance at school:

(a) Is realistically expected to last (and does in fact last) for one year or less, and facts and circumstances don't indicate otherwise, the temporary basis standard is met.

(b) Is realistically expected to last for more than 1 year or if there is no realistic expectation that the attendance will last for 1 year or less, the attendance is not temporary, regardless of whether it actually lasts for more than 1 year.

(c) Initially is realistically expected to last for 1 year or less, but at some later date the attendance is realistically expected to last more than 1 year, that attendance will be treated as temporary, absent facts and circumstances to indicate otherwise, until the taxpayer's expectation changes. It will not be treated as temporary after the date the taxpayer determines it will last more than 1 year.

If the "temporary basis" test is not met, transportation costs from home to school do not count, but if the employee goes directly from work to school, the one-way costs of transportation qualify. If a taxpayer in this situation goes home before attending school, and the distance from home to school is greater than the mileage from work to school, only the work-to-school distance is deductible.

Example 1 – Educational Transportation to Temporary Location – Going Home Before Class - *Ron works regularly in a nearby town and goes directly from work to home. He also attends school every work night for 3 months to take a course improving his job skills. Since Ron is attending school on a temporary basis, he can deduct the daily roundtrip transportation expenses in going between his home and school, regardless of the distance traveled.*

Example 2** - **Educational Transportation to Temporary Location – Classes on Non-work Days - *Jean attended job-related classes for six consecutive Saturdays; she does not normally work on Saturdays. Since Jean is going to school on a temporary basis, she will be able to deduct the costs of her roundtrip mileage between home and school.*

Example 3** - **Educational Transportation to Non-temporary Location - *Assume that Jean attended job-related classes twice a week for an 18-month period. When Jean began the course of instruction, she knew it was to be for 18 months. On school nights, she drove from work to school and from school to home. Because Jean's school attendance is not temporary, she may deduct only the transportation costs of travel between work and school. If she went home before attending school, and the distance from home to school was greater than the mileage from work to school, only the work-to-school distance is deductible.*

Example 4** - **Educational Transportation Outside Area - *Tim, a stockbroker, works in Washington, D.C. and enrolls in an investment class in Baltimore, Maryland that he realistically expects to last for 1 year or less. He actually attended three nights a week for 3 months. He may deduct his roundtrip transportation expenses between Washington and Baltimore, because he meets the temporary basis test. The distance Tim travels is not relevant.*

The **recordkeeping requirements** are the same for education as for other employee business expenses. The kind of records necessary depends on the nature of the expense (local, away-from-home, etc.).

To the extent a **VA (Veterans Affairs) allowance** represents "subsistence" payments, it is not taxable AND does not reduce expenses. Any VA allowance intended to offset actual educational expenses reduces the expense deduction. ***Rev Rul 83-3*** states that VA benefits paid under 38 USC Section 1677 (1976) are direct reimbursements of education expenses, and benefits under 38 USC Section 1681 (1979) are half for subsistence and half to reimburse expenses.

Example** - **Educational VA Benefits - *Sean, a veteran, paid deductible education expenses in the amount of $1,200 in 2019. He received payments of $810 from the Dept. of Veterans Affairs under 38 USC Section 1681 as reimbursement for his expense. One-half of the reimbursement is for living expense and one-half for education. If it weren't that the TCJA effectively disallows employee business expenses, Sean would have been able to deduct $795 ($1,200 less 1/2 of $810) for his educational expenses before considering the 2% of AGI reduction.*

- <u>Travel as a Form of Education</u> **-** Generally, the IRS has taken the position that "Travel as a Form of Education" for teachers and educators is not an allowable education expense. However, in the court case ***Jorgenson, TC Memo 2000-138***, a high school English teacher was allowed foreign travel as an educational expense when that travel was part of a structured course offered by an education institution. In this particular case, the taxpayer enrolled in courses offered by UC Berkeley and UC Extension. One course entitled "Legendary Greece" involved extensive travel in Greece and another entitled "Southeast Asia, Sacred Places" involved travel to Thailand, Cambodia and Indonesia. The IRS took the position the education was travel as a form of education and therefore not deductible. The court disagreed and determined the courses were academic courses that:

1. Maintained or improved her skills, and
2. Were ordinary and necessary.

Thus, a distinction must be made between travel itself being a form of education (expenses not deductible) and when an individual travels away from home primarily to obtain education (education expenses are deductible). In the latter case the individual's expenditures for travel, meals, and lodging while away from home are deductible.

- *Strategy - Variable Annuity Losses* - Variable annuities typically invest in a variety of stock funds, money market accounts, etc. After the original investment, the annuity may have declined in value and will be worth less today than its original cost.

If the annuity is a non-qualified annuity and is surrendered in a cash-out transaction in a year other than 2018-2025, the loss from the annuity can be claimed as a miscellaneous deduction subject to the 2%-of-adjusted-gross-income limit. (2017 IRS Pub 575, pg. 22)

AMT & MISCELLANEOUS DEDUCTIONS

Miscellaneous deductions are segregated into two categories, Tier 1 or Tier 2 expenses.

- **Tier 1** – Tier 1 expenses are deductible against both the regular tax and the AMT.
- **Tier 2** – Tier 2 expenses are all of the other miscellaneous expenses not included in the Tier 1 group. For regular tax purposes, these expenses are deductible to the extent they exceed 2% of AGI. ***For AMT purposes, they are not deductible at all.*** For years 2018-2025, the TCJA suspends the regular tax deduction of Tier2 expenses. Thus, during the suspension period these expenses won't be deductible for either regular tax or AMT.

Strategies to minimize the effects of AMT for years other than 2018-2025:

Strategy - Have IRA/Pension Fees Deducted from the Pension Accounts* - Some taxpayers who wish to maximize their IRA and other pension accounts will pay the expenses of maintaining those accounts directly (not have them deducted from the pension account). These individuals can then include those expenses in their miscellaneous Tier 2 itemized deductions. However, if they are subject to the AMT, they gain no benefit from those deductions and should consider having the fees deducted from the pension accounts. This strategy also applies to taxpayers who lose the benefit of the deduction because of the AGI limitation and those who take the standard deduction.

Strategy - Negotiate Accountable Reimbursement Plans with Employer* - Taxpayers who have significant employee business expenses should attempt to negotiate an "accountable" reimbursement plan with their employer which would eliminate the need to claim the expenses as a miscellaneous deduction and essentially allow the expenses to be deducted from gross income.

Strategy - Allocate Tax Fees to Other Schedules* - Where possible, allocate the tax preparation fees to other Schedules such as C, E and F. Caution: Don't overlook the 1099 filing requirement if $600 or more is allocated to business schedules.

Strategy - Accelerate or Defer Expenses to Non-AMT Tax Years - Where possible, accelerate or defer the Tier 2 deduction to a tax year where the taxpayer is not subject to the AMT.

*These strategies also have merit for tax years 2018-2025 when the Tier 2 deductions are suspended.

GAMBLING LOSSES – See separate chapter on "Gambling Losses – Chapter 7.12."

TRAVEL EXPENSE - See separate chapter on "Travel Expenses – Chapter 3.12."

MEALS AND ENTERTAINMENT - See separate chapter on "Meals and Entertainment - Chapter 3.10."

TRAVEL OUTSIDE THE UNITED STATES - See separate chapter on "Travel Outside the United States – Ch 3.13."

California generally conforms to the federal rules for the types of expenses classified as miscellaneous deductions. However, significantly, California has not conformed to the TCJA suspension of Tier 2 deductions for years 2018-2025. Therefore, some taxpayers may be able to deduct their employee business expenses or other Tier 2 expenses for state purposes but not for federal. The FTB has modified Schedule CA to accommodate the expanded list of items that differ from the federal Schedule A. Other miscellaneous deduction differences include:

- The federal estate tax in respect of a decedent is not deductible for California.
- The amount of investment expenses could be different for California if the amount of nontaxable income against which the expenses are incurred is different for federal and California. This is illustrated in the following example.

Example – Allocating expenses *– Joe Lewis has ABC Financial manage his investment portfolio and ABC charges Joe an annual management fee of one half of one percent of his portfolio value. For 2019 that management fee was $3,700. Joe's portfolio produced a total of $35,000 of taxable and non-taxable income for the year. Of that $35,000, $15,000 was from tax free municipal bonds and the balance, $20,000, was from taxable interest and dividends. Therefore for federal purposes, if the TCJA suspension of the Tier 2 deductions didn't apply, only $2,114 ($3,700 x ($20,000/35,000)) of the management fee would be deductible. But since it does apply, none of the management fee is deductible. Of the $15,000 muni bond interest, $10,000 was derived from state of California obligations and $5,000 from other states' obligations. California taxes the $5,000 of interest from out-of-state obligations, so the associated investment expense is deductible, and $2,643 ($3,700 x ($25,000/35,000)) of the management fee is deductible for California and will be an adjustment on Sch CA.*

NOTES

LEGAL EXPENSES

Overview

Deductions for legal expenses can be controversial at best and case law indicates many arguments with the IRS over the issue. The Supreme Court has ruled that ***the origin and character of the claim*** determines whether or not legal fees are deductible. The following looks at various types of taxpayer circumstances in which legal expenses (and attorney fees) are likely to occur and discusses probable deductibility (or nondeductibility).

RAPID FINDER

TCJA

Prior to 2018, legal expenses to produce taxable income unrelated to a trade or business or required to be capitalized generally were deductible as a miscellaneous itemized deduction subject to the 2% of AGI reduction (Tier 2 expenses). For years 2018 through 2025, deducting Tier 2 expenses is suspended by the TCJA. This will have a significant impact on recipients of taxable damage awards where the entire award must be reported as income and legal fees taken from the award are no longer deductible.

The Details

ACQUIRING INCOME

In conducting business - Legal fees incurred by a taxpayer in the course of a trade or business are deductible, if they are ordinary and necessary expenses. In ***Harvey (1953) TC Memo 53376***, reasonable legal fees were currently deductible by a businessman even though paid to a relative.

- Legal fees were allowed as a deduction for a corporate officer who was responsible for filing the corporation's Federal tax return. The fees were incurred in relation to his defending an indictment for evasion of the corporation's income tax. His defense was unsuccessful. ***Rev Rul 68-662, 1968-2 CB 69***
- ***Bankruptcy*** – Legal fees connected with a business bankruptcy are deductible. If personal bankruptcy is primarily caused by the failure of a business activity, the legal fees related to the bankruptcy proceedings are partially deductible as a business expense. The courts have used a proration of the fees based on the ratio of business creditor claims to total creditor claims. ***Cox v. Commissioner, Dec. 38,294(M), TC Memo 1981-552***
- Legal expenses related to an involuntary bankruptcy proceeding brought against the taxpayer were allowed. ***Suckow Borax Mines Consolidated Inc., (1953) TC Memo 53244***
- No deduction was allowed, however, for a taxpayer whose business went bankrupt and was later sued for fraudulent transfer of assets to a family trust. The Court held that the origin of the expenses was personal in nature. The Court rejected a lower court judgment that there would have been no bankruptcy, except for the taxpayer's business creditors and a settlement payment would benefit those creditors. The settlement payment made by the taxpayer was, in fact, no more than his personal payment to the trustee to get dismissal of the suit against his family trust. ***Collins, Ralph (1994, CA11) 74 AFTR 2d 94-5336***

***In producing or collecting income*:** Legal expenses (including attorney fees, court costs, etc.) are deductible if incurred in the production or collection of income.

- The reduction of a ***personal expense*** isn't the same thing as the production of income.
- There must be a reasonably close connection between the legal expense and the production or collection of ***taxable*** income.

Example - Legal Expense Deductibility and Nature of Property - *Tara incurred legal expenses to defend herself in an injury suit brought against her by Jim who had slipped on the sidewalk in front of a property she owned. Tara won the case. The deductibility of Tara's expenses depends on the type of property involved in the accident. If the property was a rental, the expenses are deductible. If the property involved was Tara's personal home, no deduction is allowed.*

Cases:

- Legal expense deduction allowed an Army retiree who contested rank and rate of retirement pay at which he retired. ***Rev Rul 72-169, 1972-1 CB 43***
- Deduction allowed for a trip to Ireland with an attorney to collect winnings in Irish Sweepstakes. $1,000 attorney fee allowed. Extortion payment to attorney not allowed. ***Kanelos (1943) TC Memo 43429***
- Deduction allowed for an unemployed engineer in an action to collect unemployment compensation. The action was unsuccessful. ***Mohiuddin (1996) TC Memo 1996-442***
- Legal expense deduction allowed when expenses were incurred to "consider ways" to collect fees for services the taxpayer performed. The Court evidently was not concerned with whether there was, in fact, any action to actually collect the fees. ***Barnes, Thomas (1992) TC Memo 1992-720***

Managing, conserving or maintaining income-producing property - Many cases in this area, covering a great variety of income-producing property types, have seen legal expenses allowed. However, just because a taxpayer may have to sell income-producing property to satisfy a possible adverse judgment doesn't mean he/she can deduct the cost of defending the suit. Examples are:

- Fees paid by a labor union official to successfully defend against Racketeer Influenced and Corrupt Organizations (RICO) charges weren't deductible as expenses incurred to conserve/maintain income-producing property, specifically the taxpayer's certificates of deposit. The CDs weren't acquired from racketeering or through use of proceeds from racketeering. Thus, they weren't forfeitable under RICO. Even the possibility that the taxpayer might have to use the CDs to pay an adverse RICO judgment wasn't enough to permit deductibility on grounds of conservation of the CDs. ***Accardo v. Com., (1991, CA7) 68 AFTR 2d 91-5418***
- Legal expenses to defend a suit for breach of promise to marry were ***nondeductible*** personal expenses, even though satisfaction of an adverse judgment would require sale of income-producing securities. ***Rockwell, Henry (1961) 37 TC 246***

Related to title to property:

- Legal expenses related to acquire, perfect, defend, or clear title to property are capital expenditures and can't be deducted currently as business or investment expenses. However, even though legal expenses may not be immediately deductible, their cost may be recovered through depreciation, depletion, or cost recovery.
- Legal expenses paid to recover property (other than investment property and amount of income that, if and when recovered, must be included as gross income) are part of the cost of the property and not deductible. Such recovery refers to times where ownership of property was lost but has been restored.
- Expenses to acquire, perfect, or defend a leasehold interest generally aren't currently deductible.
- Legal costs related to the disposition of a property are considered a reduction in the amount realized on the sale (expense of sale).
- Fees related to blocking a condemnation are capital in nature.
- Legal fees connected with gifts are generally nondeductible. Making a gift of income-producing property is neither conserving nor managing the property.
- Legal fees for setting up an irrevocable trust were not deductible by a taxpayer who set up the trust for his children to which he transferred a reversionary interest in an existing trust. The legal fees paid to establish the trust were a nondeductible personal expense, not a business expense. ***Mathews, (1973) 61 TC 12***

Opt-out Class Action Lawsuits - IRS has ruled privately that attorney fees paid in an opt-out class action lawsuit weren't includible in class members' or class representatives' gross income, because no contractual obligation for a fee existed between them and litigating counsel. (PLR 200906010)

<u>ALLOCATING LEGAL EXPENSES</u>

Sometimes legal expenses are incurred for multiple purposes-- e.g., both to perfect or defend title and to gain the right to income. In that case, an allocable portion of the expenses relating to income is deductible and the remainder is nondeductible. Where a taxpayer pays attorney fees in a suit to quiet title to land and also to collect rent, the part of the fees allocable to services related to collecting rents would be deductible. ***(Reg §1.212-1(k))***

Suit terms usually control - In deciding whether a legal expense is nondeductible because it relates to title, the nature of the relief asked for in the suit is the controlling factor in determining deductibility. The relief actually granted does not control. Case in point is ***Kelly (1955) 23 TC 682.*** This was a suit to gain title to property. The fact that the judgment awarded only income items did not make all of the legal expenses deductible.

Partially taxable income - Legal fees incurred to collect partially taxable income are deductible to the extent allocable to amounts included in gross income. Examples include social security income (conceivably partly taxable), payments which include both interest (taxable) and principal (reduction of amount realized), damage awards (could be only partially taxable), etc.

> ***Example – Deduction of Legal Fees Connected with Partially Taxable Income (Social Security) -*** *Single taxpayer, Bob, earned income of $31,000, had a short-term capital loss of $2,000, and received $7,000 in social security disability in 2017. $3,500 of the social security was taxable. Bob paid legal fees of $1,000 in connection with his right to receive the social security benefits. He was able to deduct $500 (one-half) of the legal expense as a miscellaneous Tier 2 itemized deduction.* ***Reason:*** *His deduction is allowed in the same proportion as his social security is taxable. Since one-half of his social security income was taxable, one-half of his legal expense is deductible. If this situation occurred in years 2018 – 2025, Bob would have no legal fees deduction because of the TCJA-imposed suspension of Tier 2 deductions.*

Other methods of allocating legal fees:

- **Based on time spent on each issue of the case -** A taxpayer sued to prevent two business associates from terminating his employment and buying his stock at an unreasonably low price. He was allowed to allocate and deduct a larger amount of legal expenses to the employment claim since it involved more work. This was true even though he received $3,168,375 on the stock and only $200,000 for the breach of employment contract. About 29% of the legal fees were determined to be part of stock basis; the remainder were related to the employment and currently deductible. The deductible portion of the legal fees was over $200,000. ***McKeague v. U.S. (1986, Cl Ct) 59 AFTR 2d 87-347***
- **Based on the value of property - In *Nickel, (1989) TC Memo 1989-458,*** the court found that part of a legal fee was deductible even though no income was recovered. The allocation took into account all income recovered at the end of the action. It was based on the total value of stock where the taxpayer's case involved trying to recover stock value and option price. The value of certain bank stock on which the options had expired was weighed less heavily in the allocation ratio than the value of bank stock.

Damage Suits – Legal fees for defending and filing damage suits in a taxpayer's business or in employment are deductible. Those that would be a Schedule A itemized deduction will not be deductible in years 2018-2025. Examples are:

- Defending suit for wrongfully taking property.
- Corporation's defense of its position before the National Labor Relations Board related to liability for compensatory damages to employees.
- Settlement of damage suit in business that could help avoid adverse publicity and controversy.
- Getting a judgment for damages to rental real estate.
- Teacher's action of sex discrimination against a university.

Damages for personal injury or sickness - To the extent a taxpayer can't exclude from income a portion of an otherwise tax-free personal damage award--e.g. due to payment of interest accruing on the settlement funds-- the legal costs are deductible (in years when miscellaneous deductions aren't suspended).

Relating to insurance proceeds - Legal fees to collect on a claim related to a taxpayer's business are deductible. In one case, a taxpayer's building was partially damaged by a fire; his legal expense in gaining recovery was an ordinary and necessary business expense. However, legal fees related to fire destruction of a taxpayer's personal home weren't deductible--they were capital expenses.

Criminal cases

- Legal fees incurred to defend against criminal charges related to a taxpayer's trade or business are deductible. ***(LR 7734004 and several other cases)*** This is true even if the taxpayer is convicted of the crime. ***(Com. v. Terrlier, (1966, S. Ct) 17 AFTR 2d 633)***
- Legal expenses of defending an individual charged with a crime are personal and ordinarily can't be deductible by an employer who paid them. However, the Tax Court held that a corporation could deduct the legal fees it incurred to successfully defend its vice president against a criminal charge ***(Union Investment Co., (1954) 21 TC 659).*** The IRS acquiesced to the Union case.

Corporate business

- **Stockholder matters:** If a stockholder brings a suit that benefits a corporation and its stockholders, the corporation (though a nominal defendant) can deduct legal expenses related to the matters (to the extent the expenses would be otherwise deductible).
- **Valuing of stock:** Generally, legal expense related to appraisals and value of stock is capital in nature and not currently deductible.
- **Pre-incorporation expenses:** Ordinarily corporations can't deduct legal fees related to pre-incorporation matters. Such fees could, perhaps, qualify as start-up expenses.

Fiduciaries and estates

- **When deductible:** Legal expense deduction in this area has been allowed for a trust beneficiary who claimed rights to taxable trust income, for recovery of trust property embezzled by the trustee, and for advice in handling estate corpus (even though income from it was payable to another beneficiary).
- **Right to trust or estate property:** Generally, if legal expenses are incurred to protect an heir's right to property, the expenses aren't deductible. The expenses must be capitalized. Likewise, protecting rights to trust property are normally not deductible.
- **Wills:** Legal expense deductions have been denied for probating a will, contesting a will, and will contests**.**
- **Administration of estate, trust:** Reasonable legal costs of administering an estate or trust are deductible on the fiduciary return, unless the costs are related to tax-exempt income. However, the same expense cannot be deducted on both the estate tax return (Form 706) and the fiduciary income tax return (Form 1041).

Divorce, separations, etc. - Legal costs connected with divorce, separation or support are non-deductible personal expenses. Nondeductibility extends to legal fees incurred in disputes over money claims.

Taxable Alimony – For years other than 2018-2025, the part of legal fees attributable to producing taxable alimony is deductible by the recipient of the alimony. Attorney should stipulate what part of fee relates to alimony to ensure deduction for alimony recipient. See chapter 1.04 for changes to alimony taxability/deductibility created by the TCJA.

Personal matters - No deduction allowed when the case involved the following:

a) Defending drunk driving charge;
b) Invasion of privacy suit;
c) Resisting deportation;
d) Preparing a will;
e) Release from mental hospital;
f) Prosecuting malpractice suits.

WHERE TO DEDUCT LEGAL EXPENSES

- **Tier 2 treatment:** Generally, for years other than 2018-2025, nonbusiness legal expenses are deducted on Schedule A as Tier 2 miscellaneous itemized deductions if paid in relation to the production of taxable income.
- **Related to business:** If related to the taxpayer's: (1) self-employed business, deduct expenses on Schedule C (or Schedule F if farm activity); (2) real estate rental, deduct on Schedule E.
- **Related to capital items:** If the expenses must be added to basis, sale of the related property would be reported on Form 8949 (Schedule D) or Form 4797.
- **Taxable damage awards paid partially to attorney:** When a taxpayer wins a taxable damage award, the following questions come up: is the whole award taxable to the taxpayer even though part of it is paid to an attorney? YES, unless the award is one of the types listed in the next two bullet items. Does the part paid to the attorney come off the top of the judgment and the taxpayer pays tax on only the net? NO. For years 2018-2025, due to the suspension of Tier 2 deductions, none of the attorney fees that would otherwise be reported as miscellaneous itemized deductions will be deductible. For other years, the issue plays an important part in the tax treatment:
  (1) When taken as an itemized deduction, the attorney's fee deduction is limited by the 2% of AGI rule.
  (2) If the taxpayer doesn't itemize, he/she could lose benefit of the deduction.
  (3) If the award is large enough, the taxpayer may be subject to AMT and lose the benefit since miscellaneous deductions are not allowed against AMT.
- **Unlawful discrimination:** A taxpayer may deduct attorney fees and court costs paid in connection with any actions involving a claim of "unlawful discrimination," which includes a number of specific federal statutes (see Code Sec. 62(e)) and any federal, state, or local law regulating any aspect of the employment relationship or prohibiting the discharge of an employee as an adjustment to income (**above-the-line**). *(*Code Sec. 62(a)(20)). The amount of the deduction can be no more than the amount of the award includible in gross income. Note: Because the provision allows an above-the-line deduction as opposed to an itemized deduction, the deduction effectively is allowed for AMT purposes as well.
- **Whistleblower awards:** Attorney's fees and court costs paid in connection with a whistleblower award paid for providing information about tax law violations are deductible above-the-line. (Code Sec 62(a)(21)) However, the deduction is limited to the amount includible in gross income as a result of the reward. For 2018 and later years, this above-the-line deduction is also available to whistleblowers receiving awards under the SEC and Commodity Future Trading Commission whistleblower programs, as well as the State false claims acts.

SUPREME COURT AND CONTINGENT ATTORNEY FEES

The Supreme Court has resolved a conflict among the Federal Circuit Courts of Appeal by holding that contingent fees paid to an attorney out of a taxable damage award or settlement are not excludible from the client's gross income (as a few circuits had held) but rather are includible in the client's gross income and deductible only as miscellaneous itemized deductions (as most courts had held). Specifically, the Court reversed pro-taxpayer decisions in the Sixth and Ninth Circuits. As a result, the portions of the taxpayers' wrongful discharge and employment termination settlements paid to their respective attorneys as contingent fees were includable in their gross income. The Supreme Court said that contingent fees are includible in the client's gross income in cases like this whether or not the attorney-client contracts or respective state laws confer any special rights or protections on the attorneys. ***Commissioner v. Banks (S Ct 1/24/2005) 95 AFTR 2d ¶2005-404, rev'g* John W. Banks, II, *(CA 6 9/30/2003), and rev'g* Banaitis, *(CA 9 8/27/2003)***

WITHHOLDING ISSUES WHEN LEGAL FEES INCLUDED IN BACK PAY AWARDS

Legal fees and interest awarded with back pay should be treated as follows for income tax withholding purposes according to ***Rev Rul 80-364, 1980-2 CB 294:***

- When a court allocated $8,000 as back pay, along with interest amounting to $1,000 plus a $1,000 attorney fee, only the $8,000 in back pay was subject to withholding.
- An individual sued his employer for $15,000 in back pay and, under court order, received $10,000. The court order didn't allocate what portion of the award was attorney fees or interest. The employee paid $1,000 for attorney fees. In this case, the whole $10,000 was subject to withholding.
- A union and company made a settlement agreement that the company would pay the union $40,000 in full settlement of claims. The union paid $6,000 in attorney fees and returned $34,000 to the employees for back pay. Only the $34,000 actually paid to the employees was subject to withholding.

CALIFORNIA DIFFERENCES

Non-Conformity - California has not conformed to the TCJA suspension of Tier 2 miscellaneous deductions for 2018-2025. Therefore, legal expenses that aren't deductible on the federal return because of the TCJA provision will be deductible as an itemized deduction for California, subject to the 2% of federal AGI reduction.

Non-Conformity - California does not conform to the federal change that expands the deduction for attorney's fee related to awards to whistleblowers. (FTB Summary of Federal Income Tax Changes 2018)

NOTES

CASUALTY LOSSES

WHAT IS A CASUALTY LOSS?

A loss caused by a sudden, unexpected event like a fire or storm can be tax deductible. To qualify, actual physical damage to property must occur, not simply a temporary decline in the value of property. The loss can be on any kind of property, either business or personal and generally only property belonging to the taxpayer will qualify.

Rev Rul 73-41, 1973-1 CB 74 states that if a taxpayer leases real property and the terms of the lease say that the taxpayer is responsible for the damage, he/she (lessee) can also qualify for a casualty loss deduction.

GENERALLY ONLY DISASTER LOSSES ALLOWED 2018 THROUGH 2025

An itemized deduction for personal casualty losses is limited in years 2018 through 2025 to losses attributable to federally declared disasters, although a taxpayer may still claim personal casualty losses not attributable to federally declared disasters to the extent of personal casualty gains during this period.

- **Personal Losses** (does not apply to business losses)
  - **Per-Casualty Loss Floor:** $100
    - **10%-of-AGI Limitation -** Does not apply to losses from criminal fraud or embezzlement
- **Net Operating Loss:** Casualty loss can create an NOL
  - Can carry NOL forward if incurred after 2017
  - 3-year carryback allowed for pre-2018 NOLs due to casualty
- **Frozen Bank Deposits – Options**
  - Nonbusiness bad debt
  - Casualty or theft loss
  - Limited Schedule A Loss (see text)
- **Losses from criminal fraud or embezzlement**
  - Are deducted as a casualty loss
  - Are not subject to the $100 limitation
  - Are not subject to the 10% of AGI limitation
- **"Ponzi" Scheme Safe Harbor Deduction – Where loss not readily determinable**
  - 95 percent, for a qualified investor that does not pursue any potential third-party recovery; or
  - 75 percent, for a qualified investor that is pursuing or intends to pursue any potential third-party recovery; Less actual recovery and/or insurance proceeds

RAPID FINDER

- **Rev. Proc. 2018-08** – This procedure provides safe harbor methods for individuals to use in determining the fair market value of property destroyed or damaged in certain casualties in order to compute the amount of their casualty and theft losses for their homes and personal belongings. Details in chapter.
- **Rev. Proc. 2018-09** – This procedure provides a Cost Indexes Safe Harbor Method for individuals to use to determine the amount of their casualty losses to their personal residences as a result Hurricanes Harvey, Irma and Maria in hurricane disaster areas after August 22, 2017 (not discussed in this text).

UNEXPECTED, IDENTIFIABLE EVENT

A casualty loss occurs when there is property damage from a sudden, unanticipated event, NOT FROM GRADUAL, PROGRESSIVE DAMAGE. The following are examples of qualifying events but keep in mind that for years 2018-2025 no deduction for personal casualty losses is allowed except for those attributable to federally declared disasters:

1. Acts of Nature like hurricanes, tornadoes, floods, storms, and volcanic eruptions.
2. Shipwrecks, sonic booms.
3. Vandalism.
4. Fires (except if set by the taxpayer). Smog, but only if caused by a sudden event, e.g., the escape of highly unusual toxic fumes that cause damage to paint on a taxpayer's home, auto, etc. (Rev Rul 71-560).
5. Insolvency of a bank: Taxpayers can elect to treat lost deposits as EITHER casualties OR bad debts. The election is not available to the insolvent bank officers, owners (owning 1% or more), or certain relatives of these owners. The loss may be recognized in the year it can be reasonably estimated, OR it can be claimed in a later year when it is determined no recovery is possible.
6. Car and other accidents (but not if due to willful negligence of taxpayer or if due to breakage under normal conditions).
7. Theft, including burglary, embezzlement and other unlawful acts. Merely losing property is not considered theft; but if the disappearance of the property accompanies an unexpected event, a casualty could result.
8. Damage from insects or drought will normally NOT qualify. But IRS says that a sudden, unexpected, or unusual infestation by beetles or other insects may result in a casualty loss. (Pub. 17, Your Federal Income Tax, 2018 edition, page 185)
9. Terrorist attacks.

CASUALTIES ON PERSONAL USE PROPERTY

The loss for each event is the smaller of the adjusted basis of the property prior to the casualty or the decrease in fair market value. Subtract from this the amount of insurance coverage or other reimbursement received (or expected to be received). Personal property must be valued on an "item-by-item" basis; but for real property, figure the decline in value of the property as a whole, including buildings, plants, trees, etc. The cost of repair is not deductible per se, but it can help measure the change in FMV if restoration does not put the property in better condition than before the casualty.

Repairs may not be used to determine the decrease in FMV unless they:

1. Bring the property back to its condition prior to the casualty.
2. Are not excessive in amount.
3. Repair only actual damage.
4. Do not increase the value of the property.

***Example - Amount of Casualty, Low Basis, High FMV -** Al purchased his home many years ago for $25,000 and made no improvements; it was worth $300,000 before it burned down in 2017. His casualty loss is limited to his basis, $25,000. Al's replacement value insurance paid him $300,000 on the loss. He has a gain of $275,000 as a result of this transaction.*

***Example - Amount of Casualty, FMV Drop -** Assume that Al's home (previous example) had a basis of $80,000 and only the garage portion of his home was burned. The FMV of the property before the fire was $300,000 and $277,000 after. Al's loss is limited to $23,000, the drop in FMV.*

INSURANCE COVERAGE AND REIMBURSEMENT

Taxpayers cannot deduct casualty losses for personal use property damage unless they make a timely claim for the insurance reimbursement (if the property is covered by insurance). This rule does not apply to the "deductible" portion of the coverage.

Other "reimbursement": Although insurance is the most common form of reimbursement for casualties, other types of "reimbursement" also can reduce the amount of loss. These include:

- Federal disaster loan forgiveness.
- Repairs made to rental property by a lessee.
- Damages received in court settlement (after legal fees and expenses).
- Repairs, etc., by relief agencies.
- Grants, gifts, or other payments designated to repair or replace property. However, if there are **no conditions** attached to the funds, they are not considered reimbursement.

REIMBURSEMENT FOR LIVING EXPENSES

An exclusion from gross income is allowed for insurance proceeds received for the temporary increase in living expenses due to a casualty loss of a principal home. The exclusion amount is limited to the increased "actual", reasonable and necessary living expenses as compared to the "normal" living expenses that would be incurred by the taxpayer to maintain his/her customary living standard during the loss period. Living expenses include temporary housing, utilities, meals, transportation and miscellaneous items like laundry, etc. For this purpose, mortgage interest is not considered a living expense.

Example - Reimbursement of Living Expenses - *When fire damaged their home, Greg and Gretchen moved to a motel for a short time, then moved to a rented house. They stayed at the rental for about one month while they were having their home repaired. They incurred the following expenses during this period, compared to their normal household expenditures:*

Description of Expense	***Actual Exp***	***Normal Living Exp***	***Inc/Dec. Due to Casualty***
Rent	*$ 900*	*$ 0*	*$ 900*
Motel costs	*1,000*	*0*	*1,000*
Food	*800*	*500*	*300*
Laundry and cleaning	*50*	*20*	*30*
Utilities	*0*	*75*	*-75*
Transportation costs	*240*	*420*	*-180*
Total	*$2,990*	*$1,015*	*$1,975*

Greg and Gretchen received $2,990 in reimbursement from the insurance company. Of that amount, $1,975 is excludable from their income. Assume that Greg and Gretchen had been renters rather than homeowners. They paid rent of $850 per month prior to the fire. While their landlord does repairs, they owe no rent. Since the couple's actual rent exceeds the normal rent by only $50, they may exclude from income only $1,125 ($1,975 minus $850).

Note: The cost of living expenses incurred as the result of a casualty loss are not included in the deduction for a casualty loss. However, when the taxpayer receives reimbursement from their insurance company, the reimbursement is excludable to the extent that it covers increased "actual", reasonable and necessary living expenses as compared to the "normal" living expenses that would be incurred by the taxpayer to maintain his/her customary living standard during the loss period.

PER EVENT & AGI LIMITATIONS

1. Reduce the casualty amount by $100 for each event ($500 if a 2017 Hurricane disaster loss or a loss in a 2016 disaster area).
2. After combining all personal casualty occurrences for the year, reduce the total by 10% of adjusted gross income (no AGI-based reduction required if a 2017 Hurricane disaster loss or a loss in a 2016 disaster area).

Example - Personal Casualty Loss Computation *- Andy's car (which cost $5,000) was totaled in an accident in 2017. The fair market value at the time of the accident was $3,500. Andy had no collision insurance and his AGI for the year was $25,000.*

Loss (decrease in FMV)	*$3,500*
Less $100 per event	*-100*
Minus 10% of AGI	*-2,500*
Casualty loss deduction	*$900*

If Any's accident had occurred in a year in the 2018 through 2025 period, the $900 loss would not be deductible.

PERSONAL CASUALTY GAINS

Although the TCJA suspended the deduction for most personal casualty losses, an exception to the suspension rule is where a taxpayer has personal casualty gains for the tax year (Sec 165(h)(5)(B)). In such cases, a taxpayer may deduct the portion of the personal casualty loss not attributable to a federally declared disaster (a "nonfederal casualty loss") to the extent the loss doesn't exceed the personal casualty gains (Code Sec. 165(h)(5)(B)(i)). Personal casualty gains occur where the taxpayer receives insurance or other proceeds in excess of the adjusted basis of the destroyed, damaged, or stolen property.

EXAMPLE - Although it is highly unlikely you will encounter taxpayers with three different casualty types for the year, we provide this example to show how non-deductible personal casualty losses can be used to offset casualty gains. *Jack and Sally have an AGI of $100,000 for the current tax year, and the following casualties for the year.*

- *Nonfederal (non-deductible personal) Casualty Loss: $30,000. After the $100 floor: $29,900*
- *Federal Disaster Loss: $40,000. After the $100 floor: $39,900*
- *Personal Casualty Gains: $40,000*

First the nonfederal loss, $29,900, is used to offset the personal casualty gain, $40,000. Any remaining gain, in this case $10,100, is used to reduce the federal disaster loss of $39,900, resulting in a net loss of $29,800, which is now reduced by 10% of the taxpayers' AGI, and the deductible federal disaster loss becomes $19,800.

EXPENSING DEBRIS REMOVAL & DEMOLITION EXPENSES

Generally, deductions are not allowed for the costs of demolishing structures, and the costs are, instead, charged to the capital account of the underlying land. The treatment of the cost of debris removal depends on the nature of the costs incurred. Sometimes the cost of debris removal is an ordinary and necessary business expense which is deductible in the year paid or incurred. However, if the debris removal costs are in the nature of replacement of part of the property that was damaged, the costs are capitalized and added to the taxpayer's basis in the property.

CASUALTIES ON BUSINESS PROPERTY For partial losses (damage), the loss is the smaller of basis or decline in fair market value. For thefts or total losses, the loss is the adjusted basis of the property, regardless of FMV. A reduction must be made for insurance or other recovery, **but there is no $100-per-event or 10%-of-AGI reduction**. Casualty losses for business and income-producing property that are not related to a federally-declared disaster continue to be deductible. Business casualty losses are claimed on Form 4797, while losses from income-producing property not used in a business are deductible on Schedule A, line 16.

Because individuals can't claim miscellaneous deductions for employee expenses for 2018 - 2025, business casualty and theft losses of property used in performing services as an employee cannot be deducted nor applied in the netting process to offset gains. (2018 Form 4684 instructions, page 5)

INVENTORY LOSSES

Theft and other types of inventory casualties are accounted for through the cost of goods sold. There is no separate casualty deduction when there is no reimbursement. If a taxpayer is reimbursed for lost inventory in the year of the loss, the taxpayer may include the reimbursement in income, and adjust the closing inventory accordingly.

NOTE - Inventory and Disaster Loss Election

For income tax purposes, a taxpayer can elect to deduct a casualty loss sustained in an area the President declares to be a disaster area either in the year the loss is sustained or in the preceding year. If the loss is attributable to self-employment income, the deduction must be taken into account for self-employment tax purposes in the same year the taxpayer elects to deduct it for income tax purposes. Thus, where a self-employed individual incurred a casualty loss from damage to inventory in a disaster area and elected to deduct the loss in the previous year, the deduction must also be taken into account in the previous year in figuring the self-employment tax. (Rev Rul 77-94, 1977-1 CB 265)

Example *-* ***Inventory Lost in Casualty -*** *Ward is the sole proprietor of a dress shop. Dresses costing $1,500 were stolen from his shop. Ward's gross Schedule C income for the year was $50,000. His beginning inventory was $10,000 and additional inventory purchased during the year was $14,000. On December 31, his ending inventory was $8,000 (it would have been $9,500 if the theft had not occurred). CALCULATION OF GROSS PROFIT:*

	WITHOUT THEFT	***WITH THEFT***
Beginning inventory	*$10,000*	*$10,000*
Plus purchases	*14,000*	*14,000*
Less ending inventory	*9,500*	*8,000*
Cost of goods sold	*14,500*	*16,000*
Gross receipts	*50,000*	*50,000*
Less COGS	*14,500*	*16,000*
Gross profit	*$35,500*	*$34,000*

Example - Comparison of Results of Personal vs. Business Casualties *– Uninsured auto with cost of $6,000 and FMV of $3,000 was a total loss due to an accident in 2019. Taxpayer's AGI was $25,000. Use was 100% for business*

	IF PERSONAL	*IF BUSINESS*
Cost	*$6,000*	*$6,000*
Depreciation	*0*	*2,000*
Adjusted basis	*6,000*	*4,000*
FMV	*3,000*	*3,000*
Initial limit on loss	*3,000*	*4,000*
Less per-event floor	*100*	*N/A*
Less 10% of AGI	*2,500*	*N/A*
Net amount	*400*	*4,000*
Allowed loss deduction	*$ 0*	*$4,000*

LOSSES FROM INVESTMENT PROPERTY

Losses from income-producing property are deducted as miscellaneous itemized deductions, subject to the 2% of AGI limitation (Tier 2 deductions) The amount of loss must also be shown on page 2, Form 4684. They are not subject to the $100-per-event or 10%-of-AGI limits. For years 2018-2025, the TCJA suspends the deduction for Tier 2 deductions so income-producing losses are not deductible.

The decline in value of stock acquired on the open market after disclosure of accounting fraud or other illegal misconduct of the corporation's officers or directors is not a theft loss. The decline in value is not deductible as a casualty loss ***(IRS Notice 2004-27)***. However, if the stock becomes wholly worthless, a capital loss may be claimed.

CORROSIVE DRYWALL – SAFE HARBOR CASUALTY LOSS (NOT APPLICABLE 2018-2025)

The safe harbor applies to a casualty loss deduction to any individual who pays to repair damage to his or her personal residence or household appliances that results from corrosive drywall (Rev. Proc. 2010-36). For this purpose "corrosive drywall" means drywall that is identified as problem drywall under the two-step identification method published by the Consumer Product Safety Commission (CPSC) and the Department of Housing and Urban Development in their interim guidance dated January 28, 2010. Refer to the CPSC Drywall Information Center at https://www.cpsc.gov for further information.

- *Not Pursuing reimbursement* - Taxpayers who are not pursuing reimbursement, and who do not intend to pursue reimbursement, may claim all unreimbursed amounts paid during the taxable year to repair damage to the taxpayer's personal residence and household appliances as a casualty loss.
- *Taxpayers who are pursuing reimbursement* - or who intend to pursue reimbursement, may claim 75% of the unreimbursed amounts paid during the taxable year to repair damage to the taxpayer's personal residence and household appliances as a casualty loss. These taxpayers may have income or an additional deduction in subsequent taxable years depending on the actual reimbursement amount received.

Losses claimed for the replacement of household appliances are limited to the lesser of the current cost to replace the appliance or the basis of the appliance.

WHEN TO DEDUCT CASUALTY LOSSES

Personal casualty losses that do not result from a federally declared disaster are not deductible in years 2018-2025. (Sec 165(h)(5)(A) as added by the TCJA) To the extent the following information applies to personal casualty losses, it applies to years before 2018 and after 2025.

The loss is ordinarily claimed in the year it occurs, even though out-of-pocket expense for repairs may be incurred in a later year. For thefts, the loss is claimed in the year of discovery. If there is a good prospect that insurance (or other) reimbursement will be received, subtract the expected reimbursement in figuring the loss, then deduct the unreimbursed portion in the loss year. If actual reimbursement is more or less than expected, report additional income or deduction in the year of reimbursement.

Example - Accounting for Casualty Loss Reimbursement *- Art's personal use vehicle was stolen in Year 1. He had paid $12,000 for the car, but it had a FMV of $8,000 at the time of the theft. At the time of the casualty, Art filed a claim with his insurance company for reimbursement of the $8,000, but he had received nothing by December 31 of Year 1. Actual insurance reimbursement received in November of Year 2 was $6,500.*

Total loss	*$8,000*
Probable insurance reimbursement	*8,000*
Loss for Year 1	*0*
Loss for Year 2 (before $100 and 10% reductions)	*$1,500*

Example - Casualty Reimbursement/No Tax Benefit - *James lost a boat during a severe storm in Year 1. The loss was $4,500, but he expected to be reimbursed $3,500. He was not able to itemize his deductions in Year 1, so he got no tax benefit from the loss. In Year 2, James received a $4,500 reimbursement from his insurance company. None of the insurance proceeds is reportable as income in Year 2, because he got no tax benefit from the loss in the year it occurred.*

INVOLUNTARY CONVERSIONS

Reminders – No gain is recognized when property is compulsorily or involuntarily converted into property similar or related in service or use. Where property is involuntarily converted into money or into property that isn't similar or related in service or use, a taxpayer can defer tax on any gain, if he so elects and he buys property that's similar or related in service or use. The cost of the replacement property must be equal to or more than the net proceeds from the converted property, and the replacement must generally be made within two years after the close of the first tax year in which any part of the gain is realized (IRC Sec. 1033(a)(1)). Gain is recognized only to the extent the amount realized on the conversion exceeds the cost of the replacement property (Code Sec. 1033(a)(2)(A)). The basis of the converted property carries over to the replacement property. (Code Sec 1033(b)(1))

Special rules apply regarding a taxpayer's principal residence, or any of the residence's contents, that is compulsorily or involuntarily converted because of a disaster. See next item.

DISASTER LOSSES

Federally Declared Disaster – This is a disaster that occurred in an area declared by the President to be eligible for federal assistance under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. A list of the designated areas is available on the Federal Emergency Management Agency (FEMA) web site: *www.fema.gov*. Taxpayers in these areas are eligible for special tax breaks as well as non-tax related assistance.

Taxpayer's Principal Residence - If a taxpayer's principal residence, or any of the residence's contents, is compulsorily or involuntarily converted because of a disaster:

- Gain isn't recognized from the receipt of insurance proceeds for contents of the residence that was unscheduled personal property for insurance purposes.
- Insurance proceeds for the residence or any of its contents other than unscheduled personal property are treated as if received for a single item of property. Property that is similar or related in service or use to the converted residence or its contents is treated as property similar or related in service or use to this single item of property.

The rules apply to a taxpayer's principal residence or any of its contents if it **is located in a disaster area and is compulsorily or involuntarily converted as a result of a federally declared disaster**. (Code Sec. 1033(h)(1))

Qualified Disaster Relief Payments - Certain "qualified disaster relief payments" received by an individual are excluded from gross income.

Disaster Losses in General - Special rules apply to losses which occur in areas the President of the United States declares eligible for Federal disaster assistance. The losses must result from the disaster. The FEMA web site noted above lists the designated disaster areas. Taxpayers may elect to claim the loss:

1. In the year it occurs, or
2. On the preceding year's return (either original or amended).

Disaster Losses Offer Special Options - When to take the loss depends upon a number of factors and should be carefully analyzed to determine which year is the most beneficial for the taxpayer. Some of the factors to consider include:

- **The tax brackets for each year** – From purely a tax standpoint, each year should be carefully examined as to which will provide the greatest overall tax benefit and without wasting other tax benefits.
- **The need for immediate cash** – The primary purpose of the special rules allowing the casualty loss to be claimed on the prior year's return is to provide taxpayers access to a tax refund without the need to wait – often many months - to file their return for the year of the loss.
- **Self-Employment tax** – Self-employed taxpayers will also need to consider whether to take a business casualty loss that affects inventory in the current or prior year since the loss can offset self-employment tax as well as income taxes (also see "Note" in "Inventory Losses" section above).
- **Whether the loss will be used up** – If the casualty loss is not fully used up in the year it is first deducted, it can create a net operating loss (NOL).

Making the Election to Claim the Disaster Loss on Preceding Year's Return

The election must be made in writing no later than six months after the due date of the taxpayer's federal income tax return for the disaster year, without regard to any extension of time to file ((Reg Sec. 1.165-11T(f)); Rev Proc 2016-53).

> ***Example:*** *A Federally-declared disaster occurred in Year 2. A calendar-year taxpayer who incurred a loss in that disaster can claim their casualty loss on either their Year 2 return or their Year 1 return. If the prior year (Year 1) return has already been filed, it can be amended by filing a Form 1040X. Either the original or amended prior year return must be filed no later than 6 months after the original due date of the Year 2 return. Thus, the due date will usually be October 15 of Year 3.*

A taxpayer makes a § 165(i) election by deducting the disaster loss on either an original or amended federal tax return for the preceding year. An election statement indicating the taxpayer is making a §165(i) election must be included with the original or amended return. The election statement must contain the following information:

(1) The name or a description of the disaster and date or dates of the disaster which gave rise to the loss.

(2) The address, including the city, town, county, parish, State, and zip code, where the damaged or destroyed property was located at the time of the disaster.

For an election made on an original federal tax return, a taxpayer must provide the above information on Lines 1 or 19 (as applicable) of Form 4684. A taxpayer filing an original return electronically may attach a statement as a PDF document if there is insufficient space on Lines 1 or 19 of the Form 4684 to provide the required information. For an election made on an amended return, a taxpayer may provide the information required by any reasonable means, such as writing the name or a description of the disaster, the State in which the damaged or destroyed property was located at the time of the disaster, and "Section 165(i) Election" on the top of the Form 4684 and providing the rest of the information as required in (1) and (2) above in either the Explanation of Changes on Form 1040X, or directly on the Form 4684, attaching a statement if there is insufficient room on the form.

A sample of a disaster loss election follows:

Election to Claim Early Disaster Loss under Code Sec. 165(i)

Name	**Social Security Numbers**
James & Judy Foster	111-11-1111 & 222-22-2222

The above-named taxpayers elect to claim a disaster loss deduction for the calendar year 2018 pursuant to Code Section 165(i). The disaster that destroyed our house consisted of flooding that occurred during the period May 3, 2019 through June 8, 2019. The house was located at 101 Second St., Beckley, Raleigh County, West Virginia 25801.

[James' signature] [date] [Judy's signature] [date]

When completing Form 4684 (2018 and draft 2019), and the casualty or theft loss is attributable to a federally declared disaster, above line 1 check the box and enter the associated FEMA disaster declaration number, which can be found at https://www.fema.gov/Disasters.

Revoking the Election - The election can be revoked up to ninety (90) days after the due date for making the election.

ADDITIONAL BENEFITS FOR CERTAIN DISASTER LOSSES

Forced Relocation or Demolition – Taxpayers who are forced to relocate or demolish a residence (not necessarily a principal residence), which is in a disaster area, may claim a casualty for the property, regardless of whether a casualty occurred to the residence, if the:

1. Area was declared a Federal disaster area,
2. Taxpayer was ordered by state or local officials to demolish or relocate the residence,
3. Order was made no later than 120 days after the date of the President's disaster declaration, and
4. Residence was determined to be unsafe because of (as a "proximate result of") surrounding conditions *(Sec 165(k)).*

Insurance Proceeds - A taxpayer whose principal residence (or its contents) is damaged in a disaster can qualify for special tax treatment regarding certain insurance proceeds received as a result of the casualty. To qualify, the locale of the residence must be in a Presidential-declared disaster area. The rules stipulate that no gain is recognized on the receipt of insurance proceeds for personal property that was part of the residence's contents, if such property was not scheduled under the insurance policy (scheduled property is property such as jewelry which is covered by a rider under the insurance policy).

Other insurance proceeds received for the residence or its contents may be treated as a common pool of funds. If those funds are used to purchase property similar to the property lost, a taxpayer will need to recognize the gain only to the extent that the pool is more than the cost of the replacement property.

The replacement period for the damaged or lost property is extended to four years after the close of the first taxable year in which any part of the gain on the involuntary conversion is realized.

These rules are extended to renters as well. Renters who receive insurance proceeds related to disaster damage to their property in a rented principal residence also qualify for the disaster loss relief.

Rev Rul 95-22, 1995-12 IRB explains when gain doesn't have to be recognized on the receipt of insurance proceeds for the destruction of a principal home (or contents) in a disaster area. The ruling clarifies that gain recognition is avoided if the proceeds received for the residence and scheduled property are reinvested in a replacement residence and/or any kind of replacement contents, whether separately scheduled or not.

Example: *Earl's home and its contents were destroyed in an earthquake. The contents included furniture and appliances (not "scheduled" separately for insurance purposes). Also destroyed was jewelry and sterling silverware which were each separately scheduled for insurance purposes. Earl's adjusted bases at the time of the loss were: $250,000 – residence, $5,000 – jewelry and $2,000 – silverware. Earl has insufficient records to establish the cost basis for most of the general household items.*

Earl got the following from his insurance company as a result of his loss:

Loss on home	*$300,000*
Jewelry, silverware	*10,000*
Furniture & unsched prop.	*35,000*
Total	*$345,000*

In the following year, Earl spent the following:

Rebuild home	*$300,000*
Home furnishings, etc.	*40,000*
A painting hung in living room	*10,000 (scheduled prop. for insurance purposes)*
Total	*$350,000*

Earl didn't replace the jewelry and silver. Because of the IRS ruling, Earl recognizes no gain on the conversion of the furniture and unscheduled contents; this is true regardless of whether he bought any replacement property. Earl can defer gain recognition on the $310,000 (the common pool of funds) he received as reimbursement for loss of the home, jewelry and silver. This is due to the fact that he spent $350,000 to rebuild and refurnish the home and this exceeds $310,000.

Extended Deadlines - The IRS has the authority to postpone for up to one year certain tax deadlines of taxpayers affected by a federally declared disaster. Examples of deadlines the IRS will postpone in disaster areas are those for filing income, excise and employment tax returns; paying income, excise and employment taxes; and contributing to IRAs. See the IRS web site – www.irs.gov – for news releases and other announcements of covered disaster areas.

Interest Abatement - When the IRS extends the due date for filing and paying tax and waives related penalties (late filing and payment), for a taxpayer in a Presidential-declared disaster zone, it must also abate assessment of underpayment interest for the period of the extension.

PASSIVE LOSS CARRYOVERS

What happens to passive losses on a rental property that is destroyed in a disaster area when it is unlikely that the property would be replaced?

Passive losses are released **upon a total disposition of the property in a fully taxable event** (IRC Sec 469(g)). Thus, to release the passive loss carryovers a taxpayer needs to dispose of the land. Otherwise, the passive loss carryover continues to be attached to the property and can only be used to offset other passive income.

INVENTORYING THE DAMAGE

Personal property should be carefully inventoried for insurance, according to the Federal Emergency Management Agency and the Small Business Administrations. Include the following in the inventory listing:

1. How and when was the property acquired? If purchased, what was the cost? If inherited, what was the value at date of decedent's death?
2. Property value *before and after* the casualty.
3. Cost to replace the property (for insurance purposes).
4. Estimate of repair cost.
5. Separate appraisals are needed for scheduled property (jewelry, artwork, antiques, etc.)

HOME DESTROYED

When a home is destroyed in a casualty the outcome can be quite different than expected by taxpayers. The reason being that their loss is measured from the **lesser** of the home's adjusted basis or the FMV at the time of the loss. Since real property generally appreciates in value, for tax purposes a home that's destroyed will generally result in a casualty gain as opposed to a casualty loss once insurance payment is considered. However, the gain can be excluded under Sec 121 if the taxpayer qualifies and any remaining gain (up to the basis of a replacement home acquired generally within 2 years after the close of the first taxable year in which any part of the gain upon the conversion is realized) can be deferred under the involuntary conversion rules of Sec 1033. This is best explained by example.

Example – A wildfire in a disaster area destroys Phil's home which had an adjusted basis of $125,000. Phil is single and has owned and used the home for over 10 years before it was destroyed. Phil's insurance company pays Phil $400,000 for the house. A tax loss is different from a financial loss in that a tax loss is measured from the **lesser** of the home's adjusted basis or the FMV at the time of the loss. So, in this case Phil does not have a tax loss, he has a gain.

The destruction of Phil's home is treated as a sale for tax purposes and since Phil meets the 2 out of 5 years ownership and use tests, the Sec 121 gain exclusion will apply. In addition, any gain in excess of the amount excluded can be deferred under Sec 1033. Here is how it all plays out for Phil…

Insurance company payment	$400,000
Phil's adjusted basis in the home	<125,000>
Realized Gain	275,000
Sec 121 Gain Exclusion	<250,000>*
Remaining Gain	25,000
Phil **elects** to defer gain into replacement	<25,000>**
Net taxable gain	0

* Since the casualty was treated as a sale, presumably Phil would be qualified for another $250,000 Sec 121 exclusion after owning and using the replacement property for two years.

** This amount reduces the basis of Phil's replacement home. This is an election and Phil could instead choose to pay the tax on the gain instead of deferring it. In addition, the deferral cannot reduce the basis of the replacement property below zero; thus, any amount not deferred would be taxable.

PROVING LOSSES

Taxpayers will need to show evidence of the cost of the lost property, evidence of the event causing the loss (e.g., it is very difficult to defend a theft loss without a police report), and evidence of the amount of the loss. It is helpful to have photos of the property before and after the casualty, notes describing the casualty and the property damaged, appraisals, and news clips describing the event. Blue Book values can be helpful in casualties that involve cars.

A qualified appraiser should be used to determine FMV of real property and scheduled personal property. The appraisal should cite values just before and after the casualty. In a disaster, it may be difficult to get an appraiser to "commit" to FMV until prices stabilize. Absent an appraisal, a possible alternative may be to get the written opinion of a real estate broker.

The question how to value trees, plants, etc., often comes up in casualty situations. For example, to value a mature tree, appraisers will often use historical data and estimate the overall loss of FMV in the property. A landscape firm could perhaps determine the cost of bringing landscaping back to its original state--this is a case where cost of repair work may be a good indicator of the amount of loss.

Use of estimates of repair - Where the taxpayer relies on the cost of repairs, and not a competent appraisal, to measure the amount of a casualty loss, the repairs and associated expenditures must actually be made (*Abrams, Paul, (1981) TC Memo 1981-231).* Thus, a taxpayer couldn't use the estimated costs of repairs where no repairs were in fact made (*Farber, Jack, (1972) 57 TC 714)* or where taxpayer did part of the repair work himself and had a contractor do some of the work (*Wheeler, Elvin, (1984) TC Memo 1984-42).* If the taxpayer doesn't intend to have the repairs done, he should get a competent appraisal of the property which shows the decline in the value of the property as a result of the casualty. However, see "Safe harbor methods" below for situations where estimates of repairs will suffice.

But, where a taxpayer uses a competent appraiser to establish the decrease in fair market value of the property resulting from the casualty, the appraiser is entitled to take into account the probable costs of repairing the damaged property, even though the repairs to the property are not, in fact, ever actually made. In computing the probable cost of repairs, however, the cost of repair immediately after the casualty is the relevant figure.

Safe Harbor Methods – The IRS recognizes that taxpayers often have difficulty determining casualty losses based on the decline in fair market value which has frequently resulted in time-consuming and expensive litigation. So to provide certainty to both taxpayers and the IRS, in Rev Proc 2018-08, effective December 13, 2017, the IRS provides safe harbor methods, that a taxpayer may choose to use in determining the decrease in FMV of personal-use residential real property (which we sometimes shorten to "residence" in this discussion) and for personal belongings in lieu of the actual reduction in FMV.

> **CAUTION:** Rev. Proc. 2018-8 can be quite misleading. The "purpose," part of the Rev. Proc. leads the reader to believe that the Rev. Proc. provides an alternate and more taxpayer-beneficial way of determining a casualty loss. The problem is the purpose of the Rev. Proc. is to provide safe harbors to determine fair market value of a property for casualty loss purposes, **NOT** the casualty loss itself. A casualty loss is still the lesser of the adjusted cost basis or the fair market value on the date of the casualty reduced by any insurance reimbursement.

Definitions for this purpose:

- <u>*Personal-use residential real property*</u> – is real property, including improvements (such as buildings and ornamental trees and shrubbery), that is owned by the individual who suffered a casualty loss and that contains at least one personal residence, which can be a single family residence, or a single unit within a contiguous group of attached residential units (for example, a townhouse or duplex), and any structures attached to the residence or single unit. <u>*Ineligible*</u> property includes:
  - a condominium unit or cooperative unit,
  - mobile home or trailer,
  - property of which the taxpayer owns a fractional interest or no interest in the structural components, and

  - a personal residence where part is used as rental property or a home office used in a trade or business or transaction entered into for profit.

- _Personal belonging_ - is an item of tangible personal property that is owned by the individual who suffered a casualty or theft loss and that is not used in a trade or business or in a transaction entered into for profit, and _does not_ include a boat, aircraft, mobile home, trailer, or vehicle, or an antique or other asset that maintains or increases its value over time.

- _No-cost repairs_ – these are repairs made for a de minimis or token cost, donation or gratuity, such as the repair or rebuilding of an individual's residence by volunteers.

Estimated repair cost safe harbor method for residence casualty losses of $20,000 or less – To determine the decrease in the FMV of the personal-use residential real property, the lesser of two repair estimates prepared by two separate and independent contractors, licensed or registered in accordance with state or local regulations, may be used, provided the costs to restore the residence to pre-casualty condition are itemized. Costs that improve or increase the value of the residence above pre-casualty value must be excluded from the estimate. This safe harbor only applies if the loss is $20,000 or less before applying the per-casualty and percentage of AGI reductions.

De minimis safe harbor method for residence casualty losses of $5,000 or less – Under the de minimis method, the cost of repairs required to restore the residence to pre-casualty condition may be estimated by the taxpayer. Costs that improve or increase the value of the residence above pre-casualty value must be excluded from the estimate. The estimate must be done in good faith, and the individual must maintain records detailing the methodology used for estimating the loss. This safe harbor only applies if the loss is $5,000 or less before applying the per-casualty and percentage of AGI reductions.

Insurance safe harbor method for residence casualty - To determine the FMV decrease of the individual's residence, the estimated loss determined in reports prepared by the individual's homeowners' or flood insurance company may be used.

Contractor safe harbor method (Federally declared disasters only) – The contract price for the repairs specified in a contract prepared by an independent and licensed contractor (or one registered in accordance with state or local regulations) may be used if the contract itemizes the costs to restore the residence to the condition existing prior to the disaster. Costs that improve or increase the value of the residence above pre-casualty value must be excluded from the contract price for purposes of this safe harbor. To use the Contractor Safe Harbor Method, the contract must be a binding contract signed by the individual and the contractor.

Disaster loan appraisal safe harbor method (Federally declared disasters only) – Under this method, to determine the decrease in FMV of the individual's residence, an appraisal prepared for the purpose of obtaining a loan of Federal funds or a loan guarantee from the Federal Government may be used. The appraisal should include the estimated loss the individual sustained as a result of the damage to or destruction of their residence from the Federally declared disaster.

De minimis safe harbor method for casualties or thefts of $5,000 or less of personal belongings – The rev proc allows an individual to make a good faith estimate of the decrease in the FMV of the individual's personal belongings, provided the individual maintains records describing the personal belongings affected and detailing the methodology used for estimating the loss. This safe harbor only applies if the loss is $5,000 or less before applying the per-casualty and percentage of AGI reductions.

Replacement cost safe harbor method for personal belongings in Federally declared disasters – This method may be used to determine FMV of most personal belongings located in a disaster area immediately before the disaster in order to compute the casualty or theft loss. If used, this method must be applied to all eligible personal belongings for which a casualty loss is claimed. This method may **not** be used for the following: boats, aircraft, mobile homes, trailers, vehicles, and antiques or other assets that maintain or increase in value over time.

Under this method, first determine the current cost to replace the personal belonging with a new one and reduce that amount by 10% for each year the personal belonging was owned, using the percentages in the Personal Belongings Valuation Table below. A personal belonging owned by the individual for nine or more years, will have a pre-disaster FMV of 10% of the current replacement cost.

Continue to next page

Personal Belongings Valuation Table	
Year	Percentage of Replacement Cost to Use
1	90%
2	80%
3	70%
4	60%
5	50%
6	40%
7	30%
8	20%
9+	10%

Example: *Joe's uninsured furniture was destroyed in a hurricane. He purchased his couch 4 years prior to the hurricane for $800. It would cost $1,100 to replace it. Using the replacement cost safe harbor method, the fair market value of the couch just before the storm would be $660 ($1,100 x 60%). Since the couch was destroyed, its FMV after the hurricane is $0, so the decrease in FMV is $660, which is less than his basis of $800. Therefore, Joe's casualty loss for the couch is $660.*

Effect of no-cost repairs – If any of the safe harbor methods provided in Rev Proc 2018-08 are used to determine the fair market value of or the amount of loss of an individual's residence or personal belongings, the loss must be reduced by the *value* of any no-cost repairs.

NET OPERATING LOSSES

All allowed casualty losses are treated as "business" losses for purposes of computing NOLs. An NOL arising in a year **before 2018** from a casualty loss can be carried back 3 years or carried forward for up to 20 future years and used as a deduction on the carryback or carry-forward returns. For NOLs arising in years ending **after 2017**, the TCJA generally repeals NOL carrybacks, except for certain farm losses, and provides that the carryover is no longer limited to 20 years and is indefinite until it is used up. (IRC Sec. 172(b)(1)(A) amended by TCJA Sec. 13302(b)(1)) Effective for NOLs arising in years beginning after 2017, the NOL deduction can be no more than 80% of the taxable income computed without regard to the NOL deduction for the year. (IRC Sec. 172(a) amended by TCJA Sec. 13302(a)(1)) (See Chapter 3.16 for more on "Net Operating Losses").

GAINS FROM CASUALTY LOSS RECOVERIES AND REPLACEMENT PROPERTY

Where insurance or other recovery is more than the basis of the property, taxpayers will generally have a taxable gain. However, the taxpayer can ELECT TO DEFER THE GAIN by buying a replacement property (this applies to condemned property as well as casualties). The REPLACEMENT PROPERTY generally must be "similar or related in service or use" to the lost property. This is stricter than the "like-kind" rule used in tax-deferred exchanges, and it means that the replacement property must function the same as the lost property. EXCEPTION: Certain real estate replacements need only satisfy the "like-kind" rules. This exception DOES NOT APPLY TO replacement of a taxpayer's condemned residence or to replacement of involuntarily converted realty which is part of the "inventory" of a dealer in real estate.

The replacement period begins on the date of the damage or condemnation and ends two years from the end of the first year in which the taxpayer received insurance proceeds (or a condemnation award or other conversion proceeds). For condemned real estate, the replacement period is three years from the condemnation date. The replacement period may be extended by requesting permission from the IRS. Do this by sending a written request to the Internal Revenue Service Center where the return is filed. The request showing reasonable cause should be filed well before the expiration date of the regular replacement period. If there is reasonable cause, it is possible to file the statement after the end of the replacement period and still have permission granted to extend.

The basis of property acquired through an involuntary conversion is the same as the property lost **plus** any gain recognized **less** any loss recognized. In ***Rev Rul 73-18, 1973-1 CB,*** the IRS said that the basis of acquired property must be allocated between building and the land in the same proportion as was used on the property converted.

FORMS TO USE TO REPORT A CASUALTY LOSS

Compute casualty gain or loss on IRS Form 4684. Carry the result to Form 4797 if a business casualty and/or Schedule A for other allowed casualties. Appraisal fees related to establishing the value of property lost in a casualty are deductible as Tier 2 expenses on Schedule A, so for years 2018-2025 when the TCJA suspends the deduction of Tier 2 expenses, none of the appraisal fees will be deductible.

BASIS ADJUSTMENTS REQUIRED

The basis of the property affected by a casualty must be adjusted, as follows:

- **Decrease basis** by insurance or other reimbursement received and any deductible loss.
- **Increase basis** by the amount spent on repairs to restore the property to pre-casualty condition, but do not include "disaster mitigation payments," which are payments to property owners to be used to reduce the risk of future damage to the property.

INVOLUNTARY CONVERSION NONRECOGNITION WHEN RELATED PARTIES INVOLVED

Nonrecognition of gain under the involuntary conversion rules is not allowed if a taxpayer purchases replacement property from a related party if, for the property involuntarily converted, the total of the amount of realized gain on the property on which there is realized gain is over $100,000. This makes individuals (not just business entities) involved in involuntary conversions subject to the same rules regarding acquisition of replacement property from a related party as are other taxpayers. Since the $100,000 limit is based on "realized gain on the property on which there is a realized gain," a taxpayer can't offset his/her gains with any losses sustained as a result of the involuntary conversion for purposes of determining whether gain exceeds the limitation.

TAX TREATMENT OF BANK DEPOSIT LOSSES

If a "qualified individual" (other than the institution's officers, 1% owners, or those related to either) has a loss on a deposit in a bankrupt or insolvent qualified financial institution, and that loss may be reasonably estimated, the loss may be treated, at taxpayer's election as:

(1) A nonbusiness bad debt (Short-term Form 8949 (Schedule D) loss), **OR**

(2) A casualty or theft loss (reported on Form 4684) deductible under rules that closely follow those for casualty losses, including the $100 and 10%-of-AGI floors. On line 1, of the 4684 show the name of the financial institution and write "Insolvent Financial Institution." Skip lines 2 through 9. Enter the amount of the loss on line 10, and complete the rest of Section A of the form. Include the calculation of the reasonably estimated loss claimed. Code Sec. 165(l)(1) However, since the itemized deduction for personal casualty losses is limited in years 2018 through 2025 to casualties in federally-declared disasters, no bank deposit casualty losses would be deductible in those years.

(3) **If the financial institution was not insured under Federal law** the taxpayer can elect to treat the loss as an ordinary loss deductible on Schedule A (subject to the 2% floor) limited to $20,000 ($10,000 for MS). Any loss in excess of the amount deducted on Schedule A can be deducted as a nonbusiness bad debt. Code Sec. 165(l)(5)(A). As with option (2), no loss would be deductible for 2018-2025 due to the TCJA suspension of tier 2 miscellaneous deductions.

The election is made by claiming the loss (casualty or ordinary) on the return (or timely amended return) for the tax year in which a reasonable estimate of the loss can be made.

PONZI SCHEME LOSSES

Form 4684 includes Section C to compute the loss based upon the Rev. Proc. 2009-20 safe harbor procedures for computing a Ponzi loss.

Revenue Procedure 2009-20 provides an optional safe harbor treatment for taxpayers that experienced losses in certain investment arrangements discovered to be criminally fraudulent. The revenue procedure also describes how the IRS will treat a return that claims a deduction for such a loss and does not use the safe harbor treatment described in the revenue procedure:

- These returns are subject to examination by the service.
- A taxpayer who claims a theft loss deduction without following the safe harbor treatment must (1) establish that the loss was from theft and that the theft was discovered in the year the deduction is claimed, (2) have sufficient documentation to establish the amount of the claimed loss, and (3) be able to prove that no claim for reimbursement for any part of the loss exists for which there is a reasonable prospect of recovery in the tax year of the claimed loss.

- Additional requirements apply if the taxpayer files or amends a return to exclude previously reported investment income that was not actually or constructively received.

Phantom Income - IRS has provided guidance (Program Manager Technical Advice 2013-003) to persons who do not or cannot use the safe harbor procedures provided in Rev Proc 2009-20 and who have "phantom income." This guidance pertains to:

1. Recharacterizing prior withdrawals as a return of capital - While taxpayers generally bear the burden to prove the legitimacy of amounts included in income, amounts that a taxpayer included in income on a return filed in a closed year should be includible in the taxpayer's basis not only for purposes of computing the amount of a theft loss deduction under Code Sec. 165 , but also for purposes of recharacterizing income in open years under Code Sec. 61, and that this treatment applies whether or not the closed-year income was genuine, fictitious, or a combination of both.
2. Treating phantom income as constructively received - In addressing the question as to whether the IRS may assert the doctrine of constructive receipt to claim that a taxpayer has income from a fraudulent investment scheme that can't be recharacterized, the IRS considered the theory that the taxpayer could have withdrawn the taxpayer's entire investment in the scheme. IRS cited cases on both sides of the issue and then concluded, "Under this case law and given the factual nature of the issue, [IRS] has some discretion to determine when to assert the doctrine of constructive receipt in the recomputation of Ponzi income."

Safe Harbor - Under the safe harbor provisions of Rev Proc 2009-20 if a qualified investor follows the procedures prescribed, the IRS will not challenge the following treatment by the qualified investor of a qualified loss—

(1) The loss is deducted as a theft loss;
(2) The taxable year in which the theft was discovered within the meaning of § 165(e) is the discovery year described in section 4.04 of the revenue procedure; and
(3) The amount of the deduction is the amount specified in section 5.02 ("Amount to be Deducted" below) of the revenue procedure.

Amount to be Deducted - The amount specified in section 5.02 is calculated as follows—

(1) Multiply the amount of the qualified investment by—
  (a) 95 percent, for a qualified investor that does not pursue any potential third-party recovery; or
  (b) 75 percent, for a qualified investor that is pursuing or intends to pursue any potential third-party recovery; and
(2) Subtract from this product the sum of any actual recovery and any potential insurance/SIPC recovery. The amount of the deduction calculated under this section 5.02 method is not further reduced by potential direct recovery or potential third-party recovery.

Future Recoveries - The qualified investor may have income or an additional deduction in a year subsequent to the discovery year, depending on the actual amount of the loss that is eventually recovered. See § 1.165-1(d); Rev. Rul. 2009-9.

Statement - By executing the statement provided in Section C of Form 4684 the taxpayer agrees—

(1) Not to deduct in the discovery year any amount of the theft loss in excess of the deduction permitted by section 5 of Rev. Proc 2009-20;
(2) Not to file returns or amended returns to exclude or recharacterize income reported with respect to the investment arrangement in taxable years preceding the discovery year;
(3) Not to apply the alternative computation in § 1341 with respect to the theft loss deduction allowed by Rev. Proc 2009-20; and
(4) Not to apply the doctrine of equitable recoupment or the mitigation provisions in §§ 1311-1314 with respect to income from the investment arrangement that was reported in taxable years that are otherwise barred by the period of limitations on filing a claim for refund under § 6511.

Definitions - The following definitions apply solely for purposes of Revenue Procedure 2009-20.

- **Specified fraudulent arrangement** - A specified fraudulent arrangement is an arrangement in which a party (the lead figure) receives cash or property from investors; purports to earn income for the investors; reports income amounts to the investors that are partially or wholly fictitious; makes payments, if any, of purported income or principal to some investors from amounts that other investors invested in the fraudulent arrangement; and appropriates some or all of the investors' cash or property. For example, the fraudulent investment arrangement described in Rev. Rul. 2009-9 is a specified fraudulent arrangement.
- **Qualified loss** - A qualified loss is a loss resulting from a specified fraudulent arrangement in which, as a result of the conduct that caused the loss—

  (1) The lead figure (or one of the lead figures, if more than one) was charged by indictment or information (not withdrawn or dismissed) under state or federal law with the commission of fraud,

embezzlement or a similar crime that, if proven, would meet the definition of theft for purposes of § 165 of the Internal Revenue Code and § 1.165-8(d) of the Income Tax Regulations, under the law of the jurisdiction in which the theft occurred; or

(2) The lead figure was the subject of a state or federal criminal complaint (not withdrawn or dismissed) alleging the commission of a crime described in section 4.02(1) of Revenue Procedure 2009-20, and either –
(a) The complaint alleged an admission by the lead figure, or the execution of an affidavit by that person admitting the crime; or
(b) A receiver or trustee was appointed with respect to the arrangement or assets of the arrangement were frozen.

In Rev. Proc. 2011-58 the IRS has broadened this definition in two ways:

- By including schemes in which a **civil** complaint is brought against the lead figure (or an associate entity involved in the fraudulent arrangement) by a state or federal authority that has not been withdrawn, and
- By making an exception for the non-withdrawal requirement for indictments or complaints withdrawn due to the lead figure's death.

- **Qualified investor** - A qualified investor means a United States person, as defined in § 7701(a)(30) --
  (1) That generally qualifies to deduct theft losses under § 165 and § 1.165-8;
  (2) That did not have actual knowledge of the fraudulent nature of the investment arrangement prior to it becoming known to the general public;
  (3) With respect to which the specified fraudulent arrangement is not a tax shelter, as defined in § 6662(d)(2)(C)(ii); and
  (4) That transferred cash or property to a specified fraudulent arrangement. A qualified investor does not include a person that invested solely in a fund or other entity (separate from the investor for federal income tax purposes) that invested in the specified fraudulent arrangement. However, the fund or entity itself may be a qualified investor within the scope of this revenue procedure.
- **Discovery year** - A qualified investor's discovery year is the taxable year of the investor in which the indictment, information, or complaint described in section 4.02 of the revenue procedure is filed. Rev. Proc. 2011-58 expanded this definition to include arrangements involving a civil complaint.
- **Responsible group** - Responsible group means, for any specified fraudulent arrangement, one or more of the following:
  (1) The individual or individuals (including the lead figure) who conducted the specified fraudulent arrangement;
  (2) Any investment vehicle or other entity that conducted the specified fraudulent arrangement, and employees, officers or directors of that entity or entities;
  (3) A liquidation, receivership, bankruptcy or similar estate established with respect to individuals or entities who conducted the specified fraudulent arrangement, in order to recover assets for the benefit of investors and creditors; or
  (4) Parties that are subject to claims brought by a trustee, receiver, or other fiduciary on behalf of the liquidation, receivership, bankruptcy or similar estate described in section 4.05(3) of the revenue procedure.

- **Qualified investment.**
  (1) Qualified investment means the excess, if any, of --
    (a) The sum of --
      (i) The total amount of cash, or the basis of property, that the qualified investor invested in the arrangement in all years; plus
      (ii) The total amount of net income with respect to the specified fraudulent arrangement that, consistent with information received from the specified fraudulent arrangement, the qualified investor included in income for federal tax purposes for all taxable years prior to the discovery year, including taxable years for which a refund is barred by the statute of limitations; over
    (b) The total amount of cash or property that the qualified investor withdrew in all years from the specified fraudulent arrangement (whether designated as income or principal).
  (2) Qualified investment does not include any of the following—
    (a) Amounts borrowed from the responsible group and invested in the specified fraudulent arrangement, to the extent the borrowed amounts were not repaid at the time the theft was discovered;

(b) Amounts such as fees that were paid to the responsible group and deducted for federal income tax purposes;

(c) Amounts reported to the qualified investor as taxable income that were not included in gross income on the investor's federal income tax returns; or

(d) Cash or property that the qualified investor invested in a fund or other entity (separate from the qualified investor for federal income tax purposes) that invested in a specified fraudulent arrangement.

- **Actual recovery** - Actual recovery means any amount a qualified investor actually receives in the discovery year from any source as reimbursement or recovery for the qualified loss.
- **Potential insurance/SIPC recovery** - Potential insurance/SIPC recovery means the sum of the amounts of all actual or potential claims for reimbursement for a qualified loss that, as of the last day of the discovery year, are attributable to--
  (1) Insurance policies in the name of the qualified investor;
  (2) Contractual arrangements other than insurance that guaranteed or otherwise protected against loss of the qualified investment; or
  (3) Amounts payable from the Securities Investor Protection Corporation (SIPC), as advances for customer claims under 15 U.S.C. § 78fff-3(a) (the Securities Investor Protection Act of 1970*),* or by a similar entity under a similar provision.
- **Potential direct recovery** - Potential direct recovery means the amount of all actual or potential claims for recovery for a qualified loss, as of the last day of the discovery year, against the responsible group.
- **Potential third-party recovery** - Potential third-party recovery means the amount of all actual or potential claims for recovery for a qualified loss, as of the last day of the discovery year, that are not described in section 4.08 or 4.09 of this revenue procedure.

CALIFORNIA DIFFERENCES

Generally, California law conforms to federal law regarding the treatment of casualty and disaster losses, including the safe harbor treatment for Ponzi schemes, with the following exceptions:

Tax Reform Changes – California has not conformed to the changes in the TCJA related to casualty losses but has belatedly and partially conformed to the NOL changes. Thus, for California:

- To be deductible, casualty losses do not have to be disaster-related.
- A casualty loss occurring prior to 2019 that results in a NOL can be carried back 2 years and any balance remaining can be carried forward for 20 years, or an election to forego the carryback can be made. The election to waive the carryback can be made separately for California and federal. For NOLS occurring in taxable years beginning after December 31, 2018, AB 91(signed by the governor 6/27/2019) repeals the 2-year carryback period. California continues to allow a 20-year carryover period and has not adopted the federal rule limiting the NOL deduction to 80% of the carryover year's taxable income. Thus, 100% of the unused CA NOL is carried over.

California Disaster Losses – SB-35, signed into law 9/1/15, allows the Governor to declare a state of emergency (disaster) for California purposes without action by the state legislature. Special legislation is no longer needed. For California purposes, a casualty loss becomes a disaster loss depending upon who declares a disaster:

- **President -** If the U.S. President declares a disaster the disaster loss rules apply for both the state and federal tax returns.
- **Governor -** If the Governor of CA declares a state of emergency, and the President does not, the governor's action only allows disaster treatment on the California return.

A Disaster Loss is Allowed If:

- The loss is sustained in an area declared a disaster for either state purposes or state and federal purposes, and.
- The loss occurs because of the declared disaster.

List of CA Disasters - A complete list of all California disasters declared by the President and/or the Governor is included in the instructions to FTB Form 3805-V. The list covers the disasters through the tax year of the form. A current list is also available on the FTB web site at:

https://www.ftb.ca.gov/file/business/deductions/distaster-codes.html

When to Claim a Disaster Loss - A disaster loss can be claimed on California returns in either the tax year in which the disaster occurs or in the tax year immediately before the disaster took place (same as federal). The time for making the election will be the same for federal and California - no later than six months after the due date of the taxpayer's tax return for the disaster year, without regard to any extension of time to file. Therefore, in most cases the election will need to be made by October 15 of the disaster year.

California Disaster Loss Carryovers & Carrybacks – While disaster losses incurred prior to 2013 cannot be used to compute a California net operating loss (NOL), they are eligible to be carried over and deducted in future years. Generally, for years 2004 through 2012, 100% of excess disaster losses can be carried over for up to five years. If subsequent California legislation identified the disaster for special carryover treatment, excess losses may be carried over for up to 15 years. If disaster losses in 2013 through 2018 result in an NOL the NOL can be carried back 2 years, but the amount of carryback allowed for specific years varies (see Chapter 3.16). SB 35 (discussed above) provides that any law that suspends, defers, reduces, or otherwise diminishes the deduction of an NOL, other than those variations already imposed in existing law, shall not apply to an NOL attributable to these specified disaster losses. The 2-year carryback period for NOLs is repealed, effective for losses beginning in years after December 31, 2018, and the loss can only be carried forward and for a maximum of 20 years.

Use FTB Form 3805V, Net Operating Loss (NOL) Computation and NOL and Disaster Loss Limitations, for the year of the loss to compute the carryover. Even when the federal and California losses stem from the same casualty or disaster event, adjustments may be needed to account for differences in federal and California laws. If the taxpayer has both disaster loss carryovers and NOL carryovers, they are used in the order they were incurred. Disaster loss carryovers are not subject to the California NOL suspensions for years 2008 – 2011.

Postponement Periods – California automatically follows the federal postponement periods announced by the IRS with respect to tax deadlines for taxpayers affected by Presidentially declared disasters. This applies to taxpayers with a California tax-filing requirement even if the disaster occurred outside of California if the taxpayer meets the qualifications to claim a disaster loss anywhere within the U.S.

Documentation – In addition to completing FTB Form 3805V and attaching it to their return on which the loss is claimed, individuals must attach copies of completed federal Form 4684 (using California amounts, if different) and a copy of their federal return (1040 or 1040X), and must attach a written statement that indicates the date and location of the disaster, and if applicable, the election to deduct the loss on the return of the year prior to the loss year.

Disaster Replacement Property Tax Base Year Value Carryover – The CA R&T Code, Sec 69 and 69.3 permit individuals to carry over their property tax base in certain circumstances when there is a disaster loss.

- *Where the replacement property is in the same county* – Where the replacement property is in the same county as the original, the R&TC requires the county to carry over the tax basis to a replacement property so long as the replacement is the same type of property as the property lost in the disaster (R&TC 69).
- *Where the replacement property is in a different county* - Where the replacement property is in a different county than the original, then the R&TC Sec 69.3 only applies to personal residences of the taxpayer. In addition, this provision is available only for counties who adopt the resolution permitting such a transfer of tax basis (R&TC Sec 69.3). Those counties that have adopted such a resolution are:

Contra Costa	Orange	Solano	Ventura
Los Angeles	San Francisco	Sonoma	
Modoc	Santa Clara	Sutter	

For purposes of **R&TC Sec 69.3 (transfer to another County)** the following definitions apply:

- *Substantially damaged or destroyed* - means property where either the land or the improvements sustain physical damage amounting to more than 50% of either the land's or the improvement's full cash value immediately prior to the disaster. Damage includes a diminution in the value of property as a result of restricted access to the property where the restricted access was caused by the disaster and is permanent in nature.
- *Original property* - means a building, structure, or other shelter constituting a place of abode, whether real property or personal property, that is owned and occupied by a claimant as his or her principal place of residence, and any land owned by the claimant on which the building, structure, or other shelter is situated, that has been substantially damaged or destroyed by a disaster.

- *Owner or owners* – means an individual or individuals, but does not include any firm, partnership, association, corporation, company, or other legal entity or organization of any kind.
- *Replacement property* - means a building, structure, or other shelter constituting a place of abode, whether real property or personal property, that is owned and occupied by a claimant as his or her principal place of residence, and any land owned by the claimant on which the building, structure, or other shelter is situated. "Replacement property" does not include any property, including land or improvements, if the claimant owned any portion of that property prior to the date of the disaster that damaged or destroyed the original property.
- *Equal or lesser value* - means that the amount of the full cash value of the replacement property does not exceed one of the following:

  (A) 105% of the amount of the full cash value of the original property if the replacement property is purchased or newly constructed within the first year following the date of the damage or destruction of the original property.

  (B) 110% of the amount of the full cash value of the original property if the replacement property is purchased or newly constructed within the second year following the date of the damage or destruction of the original property.

  (C) 115% of the amount of the full cash value of the original property if the replacement property is purchased or newly constructed within the third year following the date of the damage or destruction of the original property.

Caution:
The foregoing is a short synopsis of R&TC Sec 69. Before advising clients it is strongly recommended that you read the entire text for additional details, requirements and restrictions not included here. In addition, consult the website of any affected county to ensure the county is still participating.

Go to http://leginfo.legislature.ca.gov/faces/codes.xhtml to search for the California code.

Watch Out for Clients with On-Line Gambling Accounts

A tax court case (Hom (DC CA 6/4/2014)) held that an on-line gambler was required to file an FBAR for on-line gaming accounts with out-of-the-country on-line casinos. He was fined for not making an FBAR reporting of his online accounts and the tax court sided with the government. The Appeals Court (9th Cir), however, found that only some of the accounts were foreign financial accounts that would require FBARs. (J.C. Hom, CA-9, 2016-2). Also see page 01.13.06.

The Details

When dealing with gambling winnings and losses there are three general categories:

1. Casual recreational gambler who maintains gambling session records,
2. Casual recreational gambler who keeps no records, and
3. Professional gamblers

CASUAL RECREATIONAL GAMBLER WHO MAINTAINS GAMBLING SESSION RECORDS

Chief Counsel Advice Memorandum (CCAM 2008-011) introduced the concept of "gambling sessions". The CCAM, provided the following analysis:

- It noted that Code Sec. 165(d) uses the words "gains" and "losses" from wagering transactions without ascribing a technical meaning to the terms. In ordinary parlance, it notes that a wagering "gain" means the amount won in excess of the amount bet (basis). The term wagering "loss" means the amount of the wager (basis) lost.
- Does transaction mean every individual single play or a series of plays? The wording of Sec 165(d) uses the plural form "transactions" and Courts considering that reading have found it unduly burdensome and unreasonable to require record keeping for each individual wager (Green, 66 TC 538 (1976); Szkirscak, TC Memo 1980-129).

Thus the CCAM develops a bright-line test. The taxpayer's "accession to wealth" (i.e. wagering gain or loss) is determined when the taxpayer stops gambling, and the CCAM came up with the concept of gambling sessions. The following examples of gambling sessions are used in the CCAM:

***Example** - A casual gambler who enters a casino with $100 and redeems his or her tokens for $300 after playing the slot machines has a wagering gain of $200 ($300 - $100). This is true even though the taxpayer may have had $1,000 in winning spins and $700 in losing spins during the course of play.*

***Example** - A casual gambler who enters a casino with $100 and loses the entire amount after playing the slot machines has a wagering loss of $100, even though he may have had winning spins of $1,000 and losing spins of $1,100 during the course of play.*

Gambling Session – A gambling session is very limited in scope. It must be the same type of uninterrupted wagering during a specific uninterrupted period of time at a specific location. Thus if a taxpayer entered a casino and played slots for an hour, and then switched to craps for the next hour, that would be two separate gambling sessions. If a taxpayer entered Casino #1 and played slots for an hour and then went to Casino #2 and continued to play slots, that would be two separate gambling activities since two locations were involved.

PROPOSED SLOT MACHINE SAFE HARBOR SESSIONS

Notice 2015-21 provides a proposed revenue procedure that, if finalized, will provide an optional safe harbor method for individual taxpayers to determine a wagering gain or loss from certain slot machine play.

CAUTION - The proposed revenue procedure announced in Notice 2015-21 **IS NOT FINAL** and the details of the proposed revenue procedure are provided to illustrate the IRS' thinking related to electronically tracked gambling sessions.

The proposed revenue procedure is based on use of electronically tracked slot machine play which the IRS intended to require of gambling establishments when it proposed regulation § 1.6041-10 (related to information return reporting requirements), issued at the same time as the proposed revenue procedure. Reg. § 1.6041-10 has since been finalized without a requirement for electronically tracking slot machine play and with a rule allowing payers to use an optional aggregate reporting method that is based on an "information reporting period" instead of a "session." The IRS explained in the preamble to the new regulation that they "are still considering the income tax reporting rules in this area" and changed the terminology to avoid confusion.
At publication date of this text the proposed revenue procedure had not been finalized.

Per the proposed revenue procedure a taxpayer determines a wagering gain or loss from **electronically tracked slot machine play** at the end of a single session of play as follows:

(1) A taxpayer **recognizes a wagering gain** if, at the end of a single session of play, the total dollar amount of payouts from electronically tracked slot machine play during that session exceeds the total dollar amount of wagers placed by the taxpayer on electronically tracked slot machine play during that session;

(2) A taxpayer **recognizes a wagering loss** if, at the end of a single session of play, the total dollar amount of wagers placed by the taxpayer on electronically tracked slot machine play exceeds the total dollar amount of payouts from electronically tracked slot machine play during that session.

A taxpayer must use the same session of play if the taxpayer stops and then resumes electronically tracked slot machine play within a single gaming establishment during the same calendar day. If a taxpayer uses the definition of a session of play set forth in section 3.04 of the proposed revenue procedure, for any day in a calendar year at a particular gaming establishment, the taxpayer must use that definition for all electronically tracked slot machine play during the taxable year at that same gaming establishment.

Safe Harbor Electronically Tracked Gambling Session – (Sec 3.04 of the proposed revenue procedure) - If, after engaging in slot machine play at one gaming establishment, a taxpayer leaves that establishment and begins electronically tracked slot machine play at another gaming establishment, a separate session of play begins at the second establishment, even if played within the same calendar day as the first.

Example 1- *A taxpayer engages in electronically tracked slot machine play at X, a casino, by using a player's card. On January 1, the taxpayer plays slot machines at X, for the first time that day, from 3:00 p.m. to 5:00 p.m. At 6:00 p.m., the taxpayer leaves X for dinner. Later that day, the taxpayer returns to X and plays slot machines from 10:00 p.m. to 11:59 p.m. The play at X from 3:00 p.m. to 5:00 p.m. and from 10:00 p.m. to 11:59 p.m. is a single session of play on January 1.*

Example 2 *- Assume the same facts as in Example 1, except that the taxpayer plays from 10 p.m. to 2 a.m. The play from 3 p.m. to 5 p.m. and the play from 10 p.m. through 11:59 p.m. constitute a single session of play. The play from 12:00 midnight to 2 a.m. is another session of play on January 2nd.*

Example 3 *- Assume the same facts as in Example 1, except that the taxpayer goes to another casino, Y, to engage in electronically tracked slot machine play from 7:00 p.m. to 8:00 p.m. The taxpayer has 2 separate sessions of play on January 1: (1) one session of play from 3:00 p.m. to 5:00 p.m. and 10:00 p.m. to 11:59 p.m. at X, and (2) another session of play from 7:00 p.m. to 8:00 p.m. at Y.*

Example 4 *- On January 1, at 3:00 p.m., the taxpayer starts electronically tracked slot machine play at X for the first time that day. At 5:00 p.m., the taxpayer finishes slot machine play for that day and has payouts in excess of wagers of $300. For the single session of play on January 1, the taxpayer has gambling winnings of $300.*

Example 5 *- Assume the same facts as in Example 4, except that at 5:00 p.m., the taxpayer leaves the premises of X to eat dinner at a nearby restaurant. At 8:00 p.m., the taxpayer returns to the premises of X for more slot machine play. The taxpayer places wagers until 11:00 p.m. During the period from 8:00 p.m. until 11:00 p.m., the taxpayer's wagers placed on electronically tracked slot machine play exceeded the total dollar amount of payouts from electronically tracked slot machine play earned by the taxpayer by $75. The taxpayer's wagering gain for the single session of play at X is $225, the extent to which his payouts from electronically tracked slot machine play during that session exceeds the dollar amount of wagers from electronically tracked slot machine play.*

Example 6 *- Assume the same facts as in Example 4, except the taxpayer goes to another area of X and from 5:15 p.m. to 7:00 p.m., engages in additional slot machine play that is not electronically tracked. This revenue procedure applies only to electronically tracked slot machine play (the session from 3:00 p.m. to 5:00 p.m.). Therefore, the taxpayer cannot include the slot machine play from 5:15 p.m. to 7:00 p.m. in the session of play for January 1.*

If and when this Revenue Procedure is finalized, taxpayers using the procedure would have to enter "Revenue Procedure 2015-X" on the "other income" line of the 1040, which, based on the 2019 draft, would be line 8 of Schedule 1.

Reporting Winnings and Losses - Generally, a taxpayer must report the full amount of their gambling winnings for the year as income on their 1040 return. A taxpayer may not reduce their gambling winnings by their gambling losses and report the difference. Instead, gambling winnings are reported in full as income and the losses (subject to limitation as discussed below) are deducted on Schedule A. Therefore, if a taxpayer does not itemize, they are unable to deduct gambling losses.

Form W-2G – This form is issued by a casino or other payer to some winners with a copy going to the IRS. Generally, only winners of the following types of gambling activities will be issued a W-2G:

Bingo - $1,200 or more from one bingo game, without reduction for the amount wagered. All winnings received from all wagers made during one bingo game are combined. (Reg. § 1.6041-10(a))

Keno - $1,500 or more from one keno game reduced by the amount wagered on the same keno game. All winnings received from all wagers made during one keno game are combined. For example, all winnings from all "ways" on a multi-way keno ticket are combined. (Reg. § 1.6041-10(b)(1)(i)(B))

Slot Machines - $1,200 or more from one slot machine play, without reduction for the amount wagered. (Reg. § 1.6041-10(b)(1)(i)(C))

Poker Tournament - Poker tournament players winning $5,000 or more.

If federal income tax has been withheld on the winnings, a W-2G will be issued regardless of the type of gambling activity. Generally, the withholding rate is 24% of the gambling winnings but when withholding is required varies depending on the type of wagering activity. The rate could be 31.58% of the fair market value of noncash payments (e.g., a car won in a sweepstakes) if the payer pays the withholding tax. See instructions to Form W2-G for details.

Frequently, taxpayers with winnings will expect to report only those winnings included on Form W-2G. However, those winnings reported on W-2G forms generally do not include all winnings for the year, and the tax code requires all winnings to be reported. All winnings from gambling activities must be included when computing the deductible gambling losses, which is generally always an issue in a gambling loss audit.

Losses Limited to Gains - An individual not engaged in the gambling business may deduct as a miscellaneous itemized deduction (not subject to the 2% limitation) gambling losses suffered in the tax year, but only to the extent of that year's gambling gains. *(Code Sec. 165(d))*

Gains - "Gains" include "comps" (complimentary goods and services the taxpayer may receive from a casino).

Losses - Losses from one kind of gambling are deductible against gains from another kind. IRS has ruled that transportation, meal and lodging expenses incurred while engaged in gambling activities are nondeductible personal expenses[1] which cannot be deducted against gambling winnings. *(TAM 9808002)*

[1] ***Court Case*** *- Shiosaki, James, (1971) TC Memo 1971-24 - Travel expenses to Las Vegas for gambling were held to be personal and nondeductible. Taxpayer was an engineer*

TCJA

For 2018 through 2025, the TCJA clarifies that "losses from wagering transactions" include any deduction otherwise allowable in calculating federal income tax incurred in carrying on any wagering transaction. For example, this would include the transportation costs traveling to and from a casino. But this also means that taxpayers are prohibited from separately deducting other expenses incurred while gambling. While applying to recreational gamblers and professional gamblers, this provision was aimed at the latter. Congress inserted it because some courts (see "Gambling as a Trade or Business" below) have allowed individuals in the trade or business of gambling to deduct reasonable business expenses which created a business loss that was then not subject to the limitation that gambling losses can't exceed gambling winnings. With TCJA's revised definition of gambling losses, separate deductions for these expenses are eliminated for 2018 through 2025. (IRC Sec 165(d) as amended by the TCJA section 11050(a))

Comps - Gambling casinos often provide their customers with complimentary goods and services ("comps") to encourage future patronage. IRS says that extraordinary comps, such as autos and jewelry, are taxable income. But it reserved the question of whether "normal comps," such as food, drink, lodging and entertainment, can be excluded from income as purchase price adjustments. *(Field Service Advice 1999-519, Vaughn No. 917)*

Libutti, (1996) TC Memo 1996-108 *- Most casinos offer patrons some form of complimentary goods and services, or "comps," as a means of generating business. The Tax Court has allowed one high roller who received over $2.5 Million in comps from a single casino, which issued 1099-MISCs for the amount of the comps, over a three-year period to deduct his gambling losses to the extent of these comps. The deductions were allowed - The Tax Court observed that neither the Code nor the regulations define gains from wagering transactions. The common dictionary meaning of "gain" is "an increase in "wealth" and "from" means "derived or coming out of." Thus, the comps fit within the plain meaning of the statutory text. The Court said that assuming for purposes of Code Sec. 165(d) that the comps are gross income, they increased the taxpayer's wealth and were delivered out of his betting transactions. He would not have received them, but for the fact that he gambled extensively at the casino. The Court noted that receipt of the comps did not directly hinge on the success or failure of the taxpayer's wagers but held that they nonetheless were sufficiently related for purposes of the deduction for gambling losses.*

<u>Netting Specific Wagers</u> - The amount of income from a winning bet or wager is the full amount of the winnings less the cost of placing that specific winning bet or wager. Thus, the winner of a sweepstakes includes as income the amount by which the prize money exceeds the ticket price, and the winner of a horse race includes as income the amount of prize money less the cost of the winning race ticket. *(Hochman v. Commissioner T.C. Memo. 1986-24)* In computing the amount of income from winnings, the cost of losing tickets (or other forms of wager) is <u>not</u> netted against the winnings.

<u>Proving Gambling Losses</u> - An accurate diary or similar record regularly maintained by the taxpayer, supplemented by verifiable documentation will usually be acceptable evidence for substantiation of wagering winnings and losses. In general, the diary should contain at least the following information *(Rev Proc 77-29, 1977-2 CB 538):*

(1) Date and type of specific wager or wagering activity;
(2) Name of gambling establishment;
(3) Address or location of gambling establishment;
(4) Names of other persons (if any) present with taxpayer at gambling establishment; and
(5) Amounts won or lost.

Verifiable documentation includes wagering tickets, cancelled checks and credit records. Where possible, IRS says the documentation should be backed up by other documentation of the activity or visit to a gambling establishment, e.g., hotel bills, airline tickets, etc. Affidavits from "responsible gambling officials" (not further defined) regarding gambling activities can also be used. *(Rev Proc 77-29, 1977-2 CB 538)*

<u>Loss claims based primarily on ticket stubs</u> - The *Cohan* rule doesn't apply if the taxpayer doesn't lay the proper foundation by establishing gambling income and the relation of gambling losses to that income. Racetrack tickets alone, to support the taxpayer's testimony of gambling losses, are of little weight without supporting evidence of their purchase by the taxpayer. The tickets could be the discarded stubs of bettors who lost *(Norgaard, Preben, (1989) TC Memo 1989-390)* or could be winning tickets.

The Tax Court treated as unreliable and gave no weight to an unsigned letter to a taxpayer from Caesar's Palace Casino in Las Vegas that estimated the taxpayer had a net loss of $60,480 during the tax year. *(Mayer, Solomon, (2000) TC Memo 2000-295)*

<u>Other supporting documentation</u> - Winnings and losses may be further supported by the following items *(Rev Proc 77-29, 1977-2 CB 538):*

- ***Keno*** — Copies of keno tickets purchased by the taxpayer and validated by the gambling establishment.
- ***Slot Machines*** — A record of all winnings by date and time that the machine was played.
- ***Table Games*** — Twenty-One (Blackjack), Craps, Poker, Baccarat, Roulette, Wheel of Fortune, etc. The number of the table at which the taxpayer was playing. Casino credit card data indicating whether credit was issued in the pit or at the cashier's cage.
- ***Bingo*** — A record of the number of games played, cost of tickets purchased and amounts collected on winning tickets.
- ***Racing*** — *Horse, Harness, Dog, etc.* — A record of the races, entries, amounts of wagers and amounts collected on winning tickets and amounts lost on losing tickets. Supplemental records include unredeemed tickets and payment records from the racetrack.
- ***Lotteries*** — A record of ticket purchase dates, winnings and losses. Supplemental records include unredeemed tickets, payment slips and winnings statement. Winnings from lotteries and raffles are gambling and therefore are included in gross income. In addition to cash winnings, the taxpayer must include in income bonds, cars, houses, and other noncash prizes at fair market value. If a state lottery prize is payable in installments, the annual payments and amounts designated as interest on the unpaid balance must be included in gross income.

Court Cases:

Gambling losses were allowed in full where - The taxpayer kept a pocket notebook that showed the date a bet was made, the type of bet or name of the player and the amount won or lost. *Presley, Sam Sr., (1979) TC Memo 1979-339*

Gambling losses were allowed in part where - Taxpayer's monthly diary accurately reflected the taxpayer's winnings and losses from the race tracks. *Faulkner, Leon, (1980) TC Memo 1980-90*

Gambling losses were allowed in part where - Cancelled checks issued to pay for gambling losses were offered into evidence. Checks were supported by statements of witnesses, etc. *Jacoby, Oswald, (1970) TC Memo 1970-244*

Gambling losses were disallowed in their entirety where – The taxpayer offered records indicating that he had been extended credit by a casino, but offered nothing to support the assertion that the use of the proceeds resulted ultimately in losses. The Tax Court noted that it was perfectly possible that the use of the credit line resulted in net winnings or in net losses in an amount less than, but not all of, the entire line of credit.

Gambling losses were disallowed in their entirety where – Taxpayers kept no records of losses on their slot machine play. They relied on two undated letters, on a casino's letterhead, estimating the taxpayers' net winnings and losses. But the letters, besides stating they were "for marketing purposes only" and carrying other disclaimers, failed to reflect slot machine winnings and losses. The casino didn't track slot machine winnings and losses unless the patron used a player's club card and the taxpayers admitted they didn't use their cards.

Form 5754 - Use Form 5754 if the gambling winnings belong to someone else or belong to a group of two or more people sharing the winnings, such as by sharing the same winning ticket, and provide to the payer. This enables the payer of the winnings to prepare Form W-2G, Certain Gambling Winnings, for each winner to show the winnings taxable to each.

Lottery payments

Ordinary Income or Capital Gain? - A District Court has held that a state lottery winner realized ordinary income on the sale of his right to receive payments due in the future and not capital gain as he had contended. (*Maginnis, (DC OR 5/28/2002) 89 AFTR 2d 2002-3028)*

Offsetting Current Year Losses – Often, lottery winnings will be payable over a period of several years, similar to an annuity. IRS has ruled that the annual lottery payments retain their character as wagering winnings for purposes of deducting losses from other wagering activities. *(TAM 9808002; Rusnak, TC Memo 1987-249)*

Supreme Court Stance - The Supreme Court has declined to review the holding by the Court of Appeals for the Third Circuit that a lump-sum payment given to a married couple in exchange for the right to their future lottery payments was taxable as ordinary income and not as capital gain. *(George Lattera, (CA 3 1/9/2006) denied 2/20/2007)*

Transfer of Lottery Winnings a Taxable Gift – A waitress received a lottery ticket as a tip from a customer that, unbeknownst to the customer, was a big winner - $5 million (over $10 million if paid out as an annuity over 30 years). The taxpayer decided to share her good fortune with family members. Her attorney prepared incorporation papers for an S corp in which the taxpayer had a 49% interest and her family a 51% interest (17% each to her mother and two siblings), and she then signed over her interest in the winning lottery ticket to the corporation.

The Tax Court held that the transfer resulted in a taxable gift because there was no enforceable contract to share the lottery winnings with her family. Although the family members had made offhand statements through the years about taking care of one another if someone came into money, there had been no prior written agreement by the family members to share winnings, no pattern of buying lottery tickets or pooling of money, and no predetermined sharing percentages. Thus there was no proof that there was a family partnership that owned the ticket. While the court held that there was a taxable gift, it did allow a discounted value for gift tax purposes due to a claim that had been made by a co-worker of the taxpayer that she was obligated to share the winnings with her co-workers. ***(Dickerson, TC Memo 2012-60)***

Raffles - Amounts paid for chances to participate in raffles, lotteries, or similar drawings or to participate in puzzle or other contests for valuable prizes conducted by a charity are not gifts and therefore do not qualify as charitable contributions. (***Rev. Rul. 67-246, Example 5***) These activities would be treated as wagering, and thus the costs would be includible when determining the amount of gambling losses for the year.

GAMBLING AS TRADE OR BUSINESS

Losses Exceeding Winnings - The excess of gambling losses over gambling gains isn't deductible even by a person in the business of gambling and even though gambling is legal where the losses are sustained. Therefore, a professional gambler's losses are limited to his winnings. (*Skeeles, Anna v. U.S., (1951, Ct Cl), Offutt, Roy, (1951) 16 TC 1214)*

Gambling Related Business Expenses – ***CAUTION:*** *The amendment of Sec 165(d) by the TCJA overrides the results of this court case for years 2018-2025.* IRS has issued an action on decision (AOD 2011-06, 12/20/2011) announcing its acquiescence with the Tax Court's decision in *Mayo, (2011) 136 TC*, that the business expenses of a taxpayer engaged in the trade or business of gambling are not subject to Code Sec. 165(d). While, as the Tax Court also held in *Mayo*, Code Sec. 165(d) limits the deduction for gambling losses of a taxpayer engaged in the trade or business of gambling to the taxpayer's gains from wagering transactions, the Court made it clear, and IRS now agrees, that Code Sec. 165(d) does not limit deductions for expenses incurred to engage in the trade or business of gambling. Those business expenses are deductible under Code Sec. 162.

Tournament Poker - The Tax Court has held that tournament poker was a wagering activity subject to the Code Sec. 165(d) loss limits. Thus, the taxpayer, a professional tournament poker player, could only deduct her tournament losses to the extent of her tournament income. *(George E. and Gloria Tschetschot, TC Memo 2007-38)*

Gloria claimed a net loss of $29,933 from her "professional gambler" activity in 2000 on her Schedule C, Profit or Loss From Business. IRS said that Code Sec. 165(d) limited Gloria's losses to her winnings. Gloria contended that her professional tournament poker playing activity was more properly classified as "entertainment and professional sports" than professional gambling and, as a result, her net loss should not be limited by the Code Sec. 165(d) limit on losses from wagering activities.

The Tax Court said that while it was clear that there are differences between tournament poker and other types of poker, none rise to the level of meaningful, substantive differences that would warrant different tax treatment under the Code. It held that betting is so intrinsic to poker that it is nearly impossible to avoid using a word that implies gambling in any way when discussing the topic.

In another case involving a tournament poker player, the Tax Court determined that, as a gambling professional, the player was entitled to deduct from his gross gambling income amounts he paid to enter poker tournaments he did not win and buy-in fees, which were a direct cost of his tournament participation. The same individual was allowed to deduct as a business expense tournament-related hotel costs substantiated with hotel invoices, but was not allowed to include extras such as charges for in-room movies, spa services and alcoholic beverages from the in-room mini-bar, which the court said were nondeductible personal expenditures that did not have a business purpose. *(E. Alabsi, TC Summary Opinion 2017-5)* ***CAUTION:*** *Under the amendment to Sec 165(d) made by the TCJA, the hotel expenses allowed by the Court in this case would not be separately deductible for years 2018-2025.*

Goods & Services - The Supreme Court has held that a full-time gambler is engaged in a trade or business for purposes of Code Sec. 162(a). A taxpayer does not have to offer goods or services to the public in order to qualify his activity as being a trade or business. Where the taxpayer devotes his full-time activity to gambling and it is his intended source of livelihood, basic concepts of fairness demand that his activity be regarded as a trade or business just as any other readily accepted activity, such as being a retail store proprietor, a casino operator or an active trader on the exchanges. *(Com. v. Groetzinger, Robert, (1987, S Ct) 59 AFTR 2d 87-532)*

Amount of Time Spent – Full-Time - A taxpayer who devoted approximately 35 hours per week to horse racing, attended various tracks 175 days out of the 200-day season, gambled at Atlantic City and consistently bought lottery tickets was engaged in the trade or business of gambling. He could deduct the losses incurred from income items (including taxable unemployment compensation and an annual installment from a state lottery win) in computing his adjusted gross income. Taxpayer's activities—attending the track, studying racing forms, interviewing horse owners and riders, placing bets, plus keeping a daily log—showed that he was not pursuing a mere hobby. Employment as a machine operator for two weeks in January did not preclude his status as a "full-time" gambler during the remainder of the year. There is no requirement that an endeavor must begin Jan. 1 to be considered full-time. *(Rusnak, Charles, (1987) TC Memo 1987-249)*

Amount of Time Spent – Part-Time - The Tax Court stated that the aggregate amount of time spent in a gambling activity wasn't as determinative as the fact that the taxpayer had little continuity or regularity to his gambling. Thus, even though he argued that he averaged 20 hours per week gambling, a taxpayer wasn't engaged in the trade or business of gambling where his visits to a casino throughout the year were sporadic, sometimes 3 times a month, sometimes 17 times a month. The semi-retired taxpayer received substantial income from sources other than gambling and did not rely on gambling for his livelihood. *(Erbs, Eldron U., (2001) TC Summary Opinion 2001-85)*

CALIFORNIA DIFFERENCES

California follows Federal law, except that California Lottery winnings are not taxable to California. Therefore, an itemized deduction adjustment is required on Sch. CA if losses are used on the Federal Schedule A to offset the Lottery income on the Federal return. In 2000, California enacted SB 2173 (Ch.00-180), which provided that proceeds from the sale of California Lottery winnings to a third party are exempt from California income tax. *(Gov't Code §8880.68)*

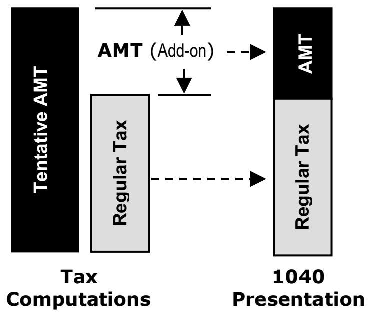
NOTES

AVOIDING OR MITIGATING THE EFFECTS OF AMT

Overview

When Congress originated the AMT and the IRS implemented it, instead of treating it as a separate tax computation and having taxpayers pay the higher of the two computations, they adopted a confusing approach of treating the AMT computation as a series of adjustments to the regular tax. Thus, the AMT as we know it is the add-on delta tax between the full alternative computation known as the tentative alternative minimum tax and the regular tax.



There are numerous differences that must be taken into account when computing the AMT. However, many of those differences apply to big businesses and are seldom, if ever, encountered by individual taxpayers and are only briefly discussed in this material.

OVERVIEW OF THE COMPUTATIONS

The forms below illustrate the difference between the regular tax computation and the tentative AMT computation and differences between the itemized deductions for the regular tax and the AMT. This chapter will look at these differences in detail and explore strategies that can be used to avoid or mitigate the adverse effects of the AMT.

Income Overview

	REGULAR TAX	TENTATIVE AMT
Regular Tax Adjusted Gross Income		
Add Back Regular Tax NOL		Plus
Deduct AMT NOL		Minus
State Tax Refund (Tax Benefit Rule)		Minus
ISO Tax Preference Income		Plus
AMT Depreciation Adjustment		Plus
Private Activity Bond Income		Plus
AMT Adj Gain or Loss (Based on AMT Depreciation)		Plus
Other AMT Preferences and Adjustments		Plus/Minus
Personal Exemptions (suspended 2018 – 2025)	Minus	
Standard Deduction	One or the other	
Itemized Deductions		Ltd
AMT Exemption		Minus
Tax		
Tax on Capital Gains (Based on Regular Tax)	Plus	Plus
Total Tax		

Deductions Overview

	REGULAR TAX	TENTATIVE AMT
Medical		
Medical AGI Adjustment (1)	–	–
Taxes		
Acquisition Debt Interest		
Equity Debt Interest (2)		
Nonconventional Home Interest (6)		
Regular Tax Investment Interest		
AMT Investment Interest (PAB Adj)		
Charitable Contributions		
Tier 1 Miscellaneous		
Casualty Loss (3)		
Tier 2 Misc (Net after 2% AGI Adj) (4)		
Itemized Deduction Phase-Out (5)		
Total Deductions		

(1) *Beginning in 2017 the medical AGI adjustment is the same for regular tax and AMT, effectively eliminating the medical adjustment.*
(2) *Equity debt interest is not deductible 2018 through 2025*
(3) *Only disaster losses are allowed 2018 through 2025*
(4) *Tier 2 miscellaneous deductions are suspended for years 2018 through 2025.*
(5) *The itemized deduction phase-out (Pease limitation) is suspended for years 2018 through 2025.*
(6) *Form 6251 does not limit this deduction for AMT after 2017 although there's been no law change.*

Although Congress did eliminate the Corporate AMT, and even though they had also vowed to eliminate the individual AMT, when the final TCJA was released it was still there. But they did increase the exemption amounts and the exemption amount phase-out thresholds. In addition, TCJA made a number of regular tax changes eliminating certain itemized deductions that caused the AMT in the past. These are:

- Suspension of the equity debt interest deduction for 2018 through 2025,
- Limiting state and local tax deductions to $10,000 for 2018 through 2025,
- Suspending tier 2 (2% of AGI) miscellaneous deductions for 2018 through 2025, and
- Suspending the Pease limitation for 2018 through 2025.

These changes, coupled with the higher AMT exemption amounts, will eliminate the AMT for the vast majority of taxpayers that have been affected by it in the past.

- **Related IRC and IRS Publications and Forms**
  - **Form 6251** – Alternative Minimum Tax
  - **Form 8801** – Credit for Prior Year Minimum Tax
  - **IRC Sec 55**

Note: As complicated as this subject is, there is no specific IRS publication dealing with the AMT. The instructions for Forms 6251 and 8801 do provide some guidance.

Tax Brackets - Where the regular tax currently has seven brackets (10%, 12%, 22%, 24%, 32%, 35% and 37%), the AMT only has two:

Alternative Minimum Tax Rates

AMT Tax Rate		26%	28%
Alternative MinimumTaxable Income (AMTI)	2017	$187,800* or Less	Greater than $187,800*
	2018	$191,100* or Less	Greater than $191,100*
	2019	$194,800* or Less	Greater than $194,800*
	2020	$197,900* or Less	Greater than $197,900*

** For married separate returns, use ½ the amount shown.*

When to Accelerate Income – Take Advantage of the Lower AMT Rates.

As illustrated in the overview, both the regular taxable income and the tentative alternative taxable income begin with the same adjusted gross income before the exemptions, deductions, and AMT adjustments. This creates a situation for high income taxpayers where the regular marginal tax rate is actually higher than the effective AMT tax rate. When this occurs it may be appropriate to accelerate income to take advantage of the lower AMT tax rate. 1.56

Example (2019) *– Subject to AMT with Regular Marginal Tax Rate Higher than the AMT Tax Rate – Single filing status*

	Reg Tax	*AMT*
Regular Tax AGI	*900,000*	*900,000*
ISO Preference Income		*200,000*
Home Mortgage Interest Ded	*<50,000>*	*<50,000>*
State Income Tax Deduction	*<10,000>*	
AMT Exemption		*<71,700>*
AMT Exemptions Phase Out		*71,700*
Taxable Income	*840,000*	*1,050,000*
Marginal Rate	***37%***	***28%***
*Tax**	***275,788***	***290,104***

**Does not include any health care reform surtaxes which are additional when applicable*

Thus, this single taxpayer could accelerate income and enjoy a tax rate of 28%. How much income? The amount that can be added to income is the amount that is added to AGI to bring the AMT tax and regular tax to the same amounts. Because of various AGI limitations, phase-outs etc, the amount is determined using a tax program; keep adjusting the income until the taxes are equal.

AMT Exemptions – For regular tax before 2018 and after 2025, a personal exemption deduction is allowed for the taxpayer, spouse and each claimed dependent. For the AMT, taxpayers are allowed a single exemption (see table) based upon the taxpayer's filing status. In both cases, the exemptions are phased-out for higher income taxpayers. However, for tax years 2018 through 2025, the regular tax exemption deduction is $0 and thus for regular tax purposes there is no phase-out of the exemption allowance.

AMT Exemption

Filing Status	2017	2018	2019	2020
Joint, SS	84,500	109,400	111,700	113,400
Single, HH	54,300	70,300	71,700	72,900
MS	42,250	54,700	55,850	56,700

AMT Exemption Phase Out

Filing Status	Single & HH	Joint & SS	Married Separate
Threshold			
2017	120,700	160,900	80,450
2018	500,000	1,000,000	500,000
2019	510,300	1,020,600	510,300
2020	518,000	1,036,800	518,000
Full Phase Out			
2017	337,900	498,900	249,450
2018	781,200	1,437,600	718,800
2019	797,100	1,467,400	733,700
2020	810,000	1,490,400	745,200
Phase Out	25%	25%	25%

Example - Computing AMT and Exemption Phase out – *Art and Minnie, joint taxpayers, had alternative minimum taxable income of 1,124,100 in 2019. Their AMT is computed as follows:*

(1) Alternative minimum taxable income			*1,124,100*
(2) Tentative Exemption		*111,700*	
(3) Phase-out Threshold	*1,020,600*		
(4) (1) less (3)	*103,500*		
(5) (4) x .25		*<25,875>*	
(6) Allowable Exemption			*<85,825>*
(7) Net Taxable			*1,038,275*
(8) First tier (AMT tax bracket)			*194,800 @ 26% = 50,648*
(9) Second tier (LN7 – LN8) x (AMT tax bracket)			*843,475 @ 28% = 236,173*
(10) Tentative Alternative Minimum Tax (LN8 + LN9)			*286,821*[1]

[1] *Rather than computing the Regular tax and the Alternative Tax and using the larger of the two, the Form 6251 instead computes a tentative AMT and then treats any amount by which the tentative AMT exceeds the regular tax as the AMT (an add-on tax to the regular tax). Although this method calls attention to the additional tax created by the AMT, it tends to add to taxpayer confusion in understanding how the AMT is derived.*

NON-REFUNDABLE PERSONAL CREDITS

Effective for tax years beginning after 2011, the American Taxpayer Relief Act permanently allows an individual to offset his entire regular tax liability and AMT liability by the nonrefundable personal credits.

DIFFERENCES BETWEEN REGULAR AND ALTERNATIVE MINIMUM TAX

This course will explore the difference between the regular tax computation and the tentative AMT computation to facilitate the understanding of the various factors that can create an AMT and the steps that can be taken to avoid or minimize the AMT. The course explanations generally follow the sequence of the Form 6251. The AMT calculation on Form 6251 starts with the regular taxable income amount to which is added or subtracted the AMT adjustments.

References below to the Form 6251-line numbers are from the 2018 Form 6251. The draft 2019 form looks like it will use the same line numbers, but some of the references to 1040 line numbers are different because of changes to the 1040 and Schedule 1 line numbers.

- *Regular Tax Exemptions* **–** Note: regular tax exemptions are suspended for years 2018 through 2025 and thus they no longer create an AMT difference. In prior years, for AMT purposes, the regular personal exemptions are not allowed

- *Itemized Deductions* **-** For AMT purposes, medical is no longer a preference item since the 10% of AGI floor applies to both regular tax and AMT computations. Other deductions allowed for AMT are acquisition debt interest, investment interest, charitable deductions, personal casualty losses (only disaster losses in 2018-2025), and tier 1 miscellaneous deductions.

  For AMT Purposes the Standard Deduction is Not Allowed - In *TCM 2003-23 D.M. Marx*, the Tax Court ruled that the taxpayer cannot take the standard deduction for regular tax purposes and itemize for the AMT. Thus, the same deductions must be used for both computations. This creates sort of a dilemma for those who don't have enough to itemize for regular tax purposes but do have substantial itemized deductions that can be used to offset the AMT.

  Strategies

  Strategy - Taxpayers can elect to itemize - even if the deductions are less than the standard deduction. Schedule A has a specific box to check if this election is being made; see line 18 of the 2018 Schedule A. However, by forcing itemized deductions, the regular tax will be increased and at the same time, the AMT tax will be reduced. This presents a complicated moving target for the tax practitioner.

  Ideally, the itemized deductions should be an amount that will make the regular tax and the tentative AMT the same, thereby bringing the AMT add-on tax to "zero." This can be accomplished by trial and error on your tax program or those with good algebra skills can calculate the ideal amount by keeping in mind the AMT is moving down at 26% or 28%, while the regular tax is increasing at the taxpayer's marginal rate. **Bottom line -** Utilizing this strategy may possibly save a considerable amount of money for taxpayers who are subject to the AMT but whose itemized deductions are somewhat less than the standard allowance.

- *Medical Deductions* **–**The medical AGI reduction percentage has been since 2017 the same for regular tax and AMT, and will continue to be in the foreseeable future as a result of TCJA. Therefore, the medical deduction is no longer an AMT issue.

- *Tax Deductions* – (Form 6251 – 2a) – The taxes claimed as part of regular tax itemized deductions are **NOT ALLOWED** as a deduction against the AMT. They are added back on line 2a of Form 6251. **The effect of not allowing a deduction for taxes is minimized by the $10,000 limit on the deduction for taxes imposed by TCJA for years 2018 through 2015.**

Strategies

Strategy #1 - Defer Regular Tax-Deductible Tax Payments - No itemized tax deduction including state income, sales tax, property tax, etc., is ever deductible for AMT purposes. Conventional wisdom would dictate deferring, where possible, tax payments to the subsequent year if taxed by the alternative method. When deferring, care should be exercised in regards to late payment penalties and interest on underpayments for certain taxes. For example, if a taxpayer puts off paying their state tax liability until the subsequent year, will the benefit exceed the underpayment penalty?

Strategies

Strategy #2 - Prepay Regular Tax-Deductible Tax Payments - Another way to avoid losing the benefit of a tax deduction to the AMT would be to prepay already assessed taxes being paid in installments or estimated tax payments in the prior year if not subject to the AMT. Sometimes planning in advance for a specific event will bring attention to the possibility of the AMT in the subsequent year. If that is the case, then paying as many taxes as legally possible (up to the TCJA limit of $10,000) in advance of the AMT-taxed year without throwing that year into the AMT should be considered.

Caution - In Rev Ruling 82-208, the IRS ruled that when a taxpayer makes an estimated state tax payment with no reasonable basis for belief that he owes any additional state income taxes, a deduction will be denied for the year of the payment.

Strategies

Strategy #3 - Capitalize Property Taxes for Unimproved & Unproductive Real Estate – A taxpayer can annually elect to capitalize property taxes with respect to unimproved and unproductive real estate. Reg § 1.266-1(b)(1)

Strategies

Strategy #4 - Don't Deduct Investment Property Taxes - Investment interest is deductible for AMT purposes. Investment interest expense is limited to net investment income. Net investment income is equal to investment income less investment expenses. Thus, deducting investment expenses for regular tax purposes will only limit the available investment interest expense deduction. The result may be a negative benefit from deducting taxes and investment expenses. ***Note:*** For years 2018 through 2025, the TCJA suspends the miscellaneous deductions that are subject to the 2% of AGI reduction (Tier 2 expenses), so in these years Tier 2 investment expenses won't be deductible anyway. Property taxes aren't part of Tier 2 expenses but are included in the taxes for which a deduction is capped at $10,000 per year by the TCJA.

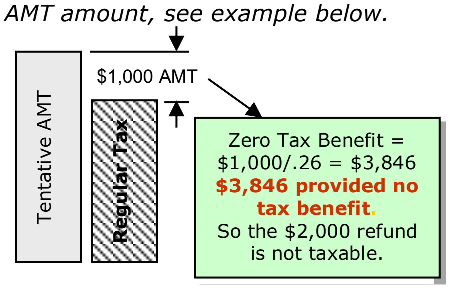
However, the taxpayer may only be marginally in the AMT and it may be appropriate to only limit part of the deductions. The best way to determine the optimal amount is by trying various scenarios using your tax software. Some of the more sophisticated programs may do this analysis automatically. When limiting deductions, you should also consider what the effect will be on the taxpayer's state return. Does state law allow deductions only if they have been claimed on the federal return? You may need to look at the combined federal and state tax liabilities before deciding not to deduct investment taxes and other expenses as a strategy to minimize federal AMT.

Another element to consider is the 3.8% net investment income tax (NIIT) on higher-income individuals. To be able to offset gross investment income by investment expenses for purposes of this tax, the expense must be claimed when figuring regular tax. So, when trying various scenarios to determine whether to limit the investment expense as a way to reduce AMT, be sure to also take the 3.8% NII tax into account. But the investment expenses not allowed as a miscellaneous deduction due to the TCJA suspension won't be deductible for the 3.8% NIIT calculation either.

Strategy #5 - Tax Benefit Rule – State Income Tax – When taxed by the AMT, part or none of the state income tax paid is allowed as a deduction. Therefore, to the extent the tentative AMT income exceeds the regular taxable income, the taxpayer receives no benefit for the state tax deduction. To the extent the taxpayer receives no benefit, the state income tax refund is not taxable for regular tax purposes in the subsequent year. Some tax software makes this computation, some don't.

For sure they do not for a new client that had AMT in the prior year. A state's refund statement (Form 1099-G) absolutely does not take the AMT into consideration. Therefore, if there is a state refund from the prior year and the taxpayer had some amount of alternative minimum tax in the prior year, then part or all the refund may not be taxable. *(IRC §111(a)) The no tax benefit can generally be determined from the AMT amount, see example below.*

***Example – Extrapolating the No Benefit Amount -** In the prior tax year, the taxpayer itemized and his state income tax deduction was $5,000, his state tax refund was $2,000 and the AMT (add-on tax) was $1,000. Assuming he was in the 26% AMT bracket and his AMT tax was $1,000, he did not receive benefit from $3,846 ($1,000/.26) of the state income tax deduction. Therefore, any state tax refund up to that amount would not be taxable in the subsequent year. In this example, none of the $2,000 refund needs to be included into income the following year.*



Be Sure to Look Back – To see if the taxpayer was subject to the AMT on the prior year's return. If they were, apply the tax benefit rule and treat as taxable the amount of refund that reduced the regular tax taxable income below the alternative minimum taxable income (AMTI).

Strategy #6 - Schedule A Taxes Can Reduce AMT LTCG Tax - The LTCG rates for AMT purposes are determined from the taxpayer's regular taxable income for the year. Therefore, to the extent a taxpayer's regular taxable income for 2019 is below $39,376 single, $52,751 head of household, $78, 751 married joint, or $$39,376 married separate, their LTCG will be taxed at 0% for **both** AMT and regular tax purposes. This makes the planning choices more difficult. The question being: is there more tax benefit maximizing the tax deduction or minimizing it through other strategies for taxes?

✸ <u>Home Mortgage Interest</u> –Below is a review of the home mortgage interest limitations.

- **Acquisition Debt** (Code Sec. 163(h)(3)(B)) - Is debt incurred to purchase, construct, or substantially improve a taxpayer's principal home or second home and must be secured by the home. Acquisition debt interest is deductible for AMT purposes. Combined acquisition debt on the two homes can't be more than:
  - $1,000,000 ($500,000 for married separate) for acquisition debts incurred on or before December 15, 2017.
  - $750,000 for acquisition debts incurred after 12/15/2017
  - Refinanced debt can also qualify as acquisition debt, if it doesn't exceed the amount of the acquisition debt just before the refinancing.
- **Home Equity Debt** (Code Sec. 163(h)(3)(C)) - is debt that is not acquisition debt and is secured by a taxpayer's principal or second home. For years other than 2018-2025, for regular tax purposes, the equity debt on the two homes can't be more than $100,000 ($50,000 for married separate), or the difference between the acquisition debt on the home and the FMV of the home, if smaller. **Equity debt interest is NOT deductible for AMT purposes. Note: For years 2018 through 2025 TCJA suspended the deduction of equity debt interest for regular tax purposes, so for those years there is no AMT adjustment for equity interest.**
  - **Nonconventional Home Debt** – Prior to TCJA the 6251 instructions did not allow a deduction for nonconventional home interest as qualified home mortgage interest. The term nonconventional home refers to homes that are used on a transient basis, such as a motor home and boat. However, nonconventional home debt interest no longer appears in the 6251 instructions or on the form itself, and

the presumption is it is now deductible as home mortgage interest to the extent it is acquisition debt interest that's allowed on Schedule A for regular tax purposes. However, we can find no change to IRC Sec 56(e)(2) that says a "qualified dwelling unit" for purposes of the "qualified housing interest" deductible for AMT purposes is a house, apartment, condominium, or mobile home not used on a transient basis. So we don't know on what grounds the IRS has removed as an AMT adjustment the nonconventional home debt interest adjustment.

- _Charitable Contributions_ – The same charitable contributions that are allowed for regular tax purposes are allowed for AMT (with a rare exception – see 6251 instructions page 8). Thus, generally there is no adjustment for charitable contributions on Form 6251.

- _Miscellaneous Deductions_ –Miscellaneous deductions are segregated into two categories, Tier 1 or Tier 2 expenses. Prior to 2018, Tier 1 miscellaneous deductions were allowed for AMT purposes but not Tier 2. **With the advent of TCJA Tier 2 deductions are suspended for years 2018 through 2025. Thus, there is no longer an AMT adjustment for miscellaneous deductions**.

- _Phase-out of itemized deductions_ – Subtract the regular tax overall itemized deduction phase out amount for high-income taxpayers, if any, since it does not apply to AMT tax. Thus, itemized deductions allowed in computing alternative minimum taxable income aren't reduced for high-income taxpayers in computing the AMT. **However, for 2018 through 2025, this is not an issue since TCJA suspended the PEASE phase-out.**

- _Tax Refund_ – (Form 6251 – Line 2b) – For AMT purposes, the taxable refunds of state and local taxes are not included in the AMT computation. A state income tax refund should be an automatic adjustment by your software for prior year clients, but make sure the refund is not taxed for AMT for new clients. Include any refund from Form 1040 Schedule 1, line 10 (2018) (Sch 1, line 1, draft 2019), that is attributable to state or local income taxes. Although rare, this exclusion also applies to refunds of local taxes, real property taxes, personal property tax, foreign income tax and foreign real property tax that are treated as income because they were included as an itemized deduction on a prior year return, and the income cannot be excluded for regular tax purposes on the current return under the tax benefit rules.

- _Investment Interest Expense_ – (Form 6251 – Line 2c) – Investment interest is deductible for both regular and AMT purposes to the extent of net investment income (Note: investment expenses are part of the Tier 2 miscellaneous itemized deductions and therefore not used in the computation of net investment income for years 2018 through 2025). However, investment taxes if allowed as part of the $10,000 cap on taxes would be since that is an investment expense. Because the interest from most private activity municipal bonds is taxable for AMT purposes, taxpayers with private activity bond income will have a higher net investment income and, therefore for AMT purposes, will be allowed to deduct more investment interest expense. This also creates two investment interest carryovers, one for regular tax and one for the AMT. Generally, most preparation software will make both carryover computations. *Line 2c on the 6251 compensates for the differences between the regular investment interest deduction and the AMT investment interest deduction*.

Strategy - Utilize the Capital Gains Election - Income that is subject to the long-term capital gains rates is not investment income for purposes of computing the net investment interest limitation. However, the election to tax LTCG at ordinary rates and include that LTCG income as investment income applies to both the regular tax and the AMT. This will allow a larger deduction for investment interest for both the regular tax and the AMT. This adjustment is generally automatic in most tax preparation software. Therefore, if there is a planning reason not to utilize this election, the software will need to be overridden.

- _Depletion Adjustments_ – (Form 6251 – Line 2d) – The depletion deduction has limits based upon income from an activity and asset basis limitations. This adjustment is the excess of percentage depletion over cost basis. Except with respect to depletion taken by independent oil and gas producers and royalty owners, the excess of the allowable depletion on each depletable asset over the adjusted basis (before considering the current year's depletion) of the property at the end of the year is a preference item. This adjustment is rarely encountered for individual purposes except via pass through entities.

- _Net Operating Loss Adjustments_ – (Form 6251 – Lines 2e and 2f) – The NOL deduction for regular tax purposes is replaced in the AMT tax computation with the NOL computed based upon AMT income and deductions.

Watch out! Frequently when carrying back an NOL to a prior year the AMT NOL is overlooked and not also carried back. When the carryback year is subject to the AMT, failure to include the AMT NOL will reduce or eliminate the benefit of the NOL carryback. It will also generate correspondence from the IRS if filed without the AMT NOL. For NOLs occurring in 2018 and later, the loss is not carried back, but only forward. There is an exception for certain farm losses. See chapter 3.16 for details.

- *Private Activity Bond Interest* - (Form 6251 – Line 2g) – Tax-exempt interest and tax-exempt interest dividends on certain private activity bonds issued after 8/07/86 is a tax preference item (after 9/01/86, for bonds considered governmental bonds by pre-TRA '86 definition). Private activity bonds include those that finance mass-transit facilities, sewage and solid waste disposal facilities and certain multi-family dwellings. Taxpayers may invest in these bonds individually or through holdings in mutual funds that invest in government obligations ("muni bonds"). Tax-exempt interest and the portion of it that is private activity interest is required to be reported by the payer on Form 1099-INT, boxes 8 and 9, respectively. On Form 1099-DIV, the amount of exempt-interest dividends is shown in box 11 and private activity bond interest dividends appear in box 12. The tax preference amount is the private activity interest and dividend income reduced by the related expenses not allowed for regular tax purposes because the income is nontaxable.

  NOTE: The interest on the following bonds that are otherwise considered private activity bonds is not a tax preference: (1) certain mortgage bonds, qualified Veterans' mortgage bonds, and bonds related to residential rental projects issued after July 30, 2008, and (2) bonds issued in 2009 and 2010.

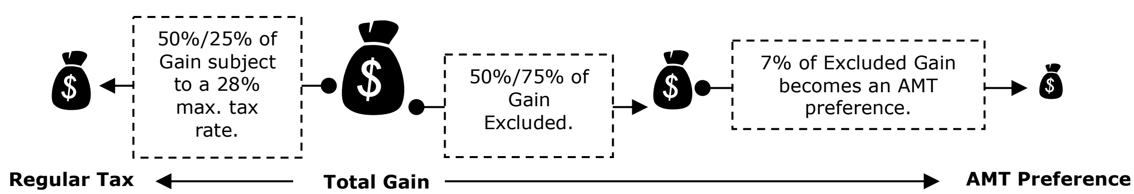
Strategy - Eliminate Investments in Private Activity Bonds – Taxpayers invest in lower yielding muni bonds because they provide tax-free income. However, when a taxpayer is subject to the AMT the tax-free benefit for private activity muni bonds is lost. Therefore, taxpayers who are regularly subject to the AMT should avoid investing in Private Activity Bonds or mutual funds that invest in such bonds (but see "Note" just above). Taxpayers who already have these bonds in their portfolio should consider divesting themselves of these investment vehicles if it makes financial sense.

- *Excluded Qualified Small Business Stock Gain* – (Form 6251 – Line 2h) – Current tax law dictates that non-corporate taxpayers exclude 50%, 75% or 100% of any gain realized on the sale or exchange of "qualified small business stock" held more than 5 years***.*** The exclusion percentage depends on when the stock was issued:

  - 50% gain exclusion for stocks issued after 8/10/1993 and before 2/18/2009.
  - 75% gain exclusion for stocks issued after 2/17/2009 and through 9/27/2010**.**
  - 100% gain exclusion for stocks issued after September 27, 2010.

  Gain from the sale of Sec 1202 stock does not benefit from the special 0%, 15% and 20% capital gains rates. But the gain that isn't excluded will be taxed at a maximum of 28% for regular tax. For AMT, 7% of the excluded Sec 1202 gain is treated as a tax preference, unless the 100% exclusion applies, in which case, none of the gain is considered a tax preference item.

  When the entire preference is subject to the highest AMT rate (28%), the effective rate on the Sec. 1202 gains for AMT purposes is actually 14.98%.



Example – *Assume a taxpayer has a gain of $100,000 from the sale of QSBS originally issued in 2008. If the taxpayer is being taxed by the AMT method at the highest rate, the tax on the QSBS can be estimated as follows:*

CG Tax = ($100,000 x .50 x .28) =	*$ 14,000*
AMT Tax = ($100,000 x .50 x .07 x .28) =	*$ 980*
TOTAL TAX =	***$14,980***

14.98% Overall Tax Rate

- *Incentive Stock Option Preference Income* - (Form 6251 – Line 2i) – If an option is a qualified option (also known as an incentive stock option), then for regular tax purposes, no amount of income is included in income either at the time the option is granted or at the time it is exercised. Income or loss is recognized when the stock is sold. However, to qualify for this treatment, the stock acquired under the option must be held for:

  - ***More than 1 year after*** the stock option was ***exercised***, ***AND***
  - ***More than 2 years after*** the option was ***granted***.

The gain or loss from the sale of ISO stock is generally a capital gain or loss. The gain for regular tax purposes will be the difference between the exercise price and the sales price. If the stock is sold prior to the required holding period, the income to the extent of the bargain element will be treated as ordinary income (wages).

For AMT purposes, taxpayers recognize alternative minimum taxable income (AMT preference income) equal to the excess of the fair market value of the stock on the exercise date over the exercise price. This creates three effects for AMT purposes:

- Preference income in the exercise year, and
- A different stock basis for AMT gain or loss (AMT basis = Exercise price and REG tax basis equals grant price), and
- Since the ISO preference is a deferral item of preference, an Alternative Minimum Tax Credit carryover may also be generated (see AMT credit later).

Example – Exercising an ISO *– In January 2013, Victor is granted an option to purchase up to 20,000 shares of XYZ, Inc. On March 30, 2018, Victor exercises the option and pays $20,000 to acquire 20,000 shares of stock with a FMV of $200,000. The results for 2018 are:*

- ***Regular tax****: No taxable income, Stock Basis of $20,000*
- ***AMT:*** *$180,000 Preference Income ($200,000 - $20,000) and a stock basis of $200,000.*

Example – Results from exercising ISO Stock *– Now look at the steps that need to be taken when the exercised stock is sold and the resulting AMT implications. In this example, Victor disposes of his stock in two transactions during 2019 as follows:*

				Regular Tax		***AMT***	
	Date	*Shares*	*Proceeds*	*Basis*	*Gain/Loss*	*Basis*	*Gain/Loss*
1	*1/20/19*	*100*	*75,000*	*10,000*	*65,000*	*100,000*	*-25,000*
2	*6/05/19*	*100*	*60,000*	*10,000*	*50,000*	*100,000*	*-40,000*

Transaction#1 *– Disqualified disposition, since he sold the stock before meeting the one-year ISO holding requirement. It results in the following tax treatment:*

Regular Tax: *Ordinary Income of $65,000 (NOT a Form 8949/Schedule D transaction)*

AMT: *Short-Term Capital Loss of $25,000*

Transaction #2 *– Since he met the ISO holding period requirements, this transaction results in a qualified disposition with the following tax treatment:*

Regular Tax: *Long-term capital gain of $50,000*

AMT: *Long-term capital loss of $40,000*

Since the Schedule D is computed separately for the regular and AMT tax, the result of the two transactions is a $65,000 AMT Schedule D loss. However, the loss is limited to $3,000 (this produces a separate AMT capital loss carryover). For regular tax purposes, we have a $65,000 ordinary income and $50,000 long-term capital gain. Therefore, the difference between regular tax income and AMTI for this example is $118,000 ($65,000 + $50,000 - <3,000>).

CAUTION: Victor's Schedule D will also need to be refigured for AMT purposes.

Strategy #1 - Exercise ISO in Amounts to Avoid AMT - Taxpayers who are under the AMT threshold might consider developing a multi-year plan to exercise the options in smaller amounts to avoid or minimize AMT.

Strategy #2 - Sell Early and Treat as Nonqualified Option - Taxpayers who will be subject to the AMT in the exercise year should consider exercising and selling in the same year, thus creating a disqualifying disposition and thereby eliminating the preference income.

Strategy #3 - Utilize the AMT Tax Credit - Where a taxpayer will not be subject to the AMT in a subsequent year and has an AMT credit carryover, the taxpayer might consider subjecting themselves to the ISO AMT preference and then recover part or all of the AMT add-on tax in a subsequent year when the AMT credit can be utilized. AMT tax credit is discussed later in this course.

✸ Disposition of Property - *(Form 6251 – Line 2k)* - Difference between Regular and AMT gain or loss. This adjustment is made if property is sold during the year. The gain or loss must be refigured for AMT purposes using the AMT basis for the property. The difference between the gain or loss reported for regular tax and the recomputed AMT gain or loss is the adjustment. This can be a negative amount for property where depreciation, circulation expenses, research and experimental expenses, mining exploration expenses, or pollution control expenses have been different for AMT purposes than for regular tax purposes.

- **Real Property Differences** – prior to 1999 real property had a preference adjustment equal to the difference between the 27.5, 31- or 39.5-year life and the 40-year straight line depreciation. After 1998 there is no preference adjustment for real property. Thus, if a property is sold that was in service before 1999 there will be a favorable difference between the AMT and regular tax gain or loss.
- **Personal Property Differences** – after 1998, personal property depreciated at the 200% MACRS rates had a preference adjustment in the amount of the difference between the 200% and the 150% MACRS rate. Thus, for personal property not fully depreciated there will be a favorable difference between the AMT and regular tax gain or loss.

These differences will result in a favorable AMT adjustment when the asset is ultimately sold. This is true whether or not the taxpayer was subject to AMT in any of the prior years.

However, the first-year **bonus depreciation** allowance applies for both regular tax and AMT and for property on which the bonus allowance is claimed, there is no preference adjustment. If the election was made not to claim bonus depreciation on eligible property put in service before 2016, the property may be subject to a preference adjustment. A provision of the PATH Act of 2015 eliminates the preference adjustment for all property placed into service after 2015 and eligible for bonus depreciation, whether or not the special allowance was elected. (2016 Form 6252 instructions, page 6)

Strategy #1- Differences between Regular and AMT Depreciation Rates

Don't overlook Form 4797 gain or loss differences for the AMT as a result of AMT depreciation, even if the client was not taxed by the AMT in the year the depreciation was taken. The AMT depreciation rate is lower than the regular rate, which could result in a smaller AMT gain and thus reduce the AMTI.

✸ *Depreciation of Property after 1986* - (Form 6251 – Line 2L) – Adjustment for the difference between regular and AMT depreciation. Generally, the taxpayer must refigure depreciation for the AMT, including depreciation allocable to inventory costs, for property that is depreciated for the regular tax using the 200% declining balance method (generally 3-, 5-, 7-, or 10-year property under the modified accelerated cost recovery system (MACRS)). The preference is the difference between the 200% and the 150% MACRS rate. But see "bonus depreciation" in box just above.

Strategy #1 - Use AMT Depreciation Rates - Taxpayers who are regularly subject to the AMT should consider using the 150% declining balance method of depreciation for regular tax and thus avoid the AMT adjustment between the 200% and 150% declining balance methods.

Strategy #2 - Use the Section 179 Deduction - The Section 179 expense deduction is NOT a preference adjustment for AMT. Therefore, the 179 deduction can be used in place of the MACRS depreciation to avoid an AMT adjustment. If there is a limit on the 179 deduction or the taxpayer's circumstances dictate a slower write-off, a partial 179 deduction can be combined with the 150% declining balance method to avoid AMT.

What Depreciation Is NOT Refigured for the AMT? Do not refigure depreciation for the AMT for:

- Property for which an election was made to use the alternative depreciation system (ADS) of Section 168(g) for the regular tax.
- Property placed in service after 1998 that is depreciated for the regular tax using the 150% declining balance method or the straight-line method, including Section 1250 property (generally residential rental and nonresidential real property).
- Any part of the cost of any property for which the election was made under Section 179 to treat the cost of the property as a deductible expense. The reduction to the depreciable basis of Section 179 property by the amount of the Section 179 expense deduction is the same for the regular tax and the AMT.
- Motion picture films, videotapes, or sound recordings.
- Property depreciated under the unit-of-production method or any other method not expressed in a term of years.
- Qualified Indian reservation property.
- Property on which a first year bonus depreciation allowance was claimed if the depreciable basis for the property is the same for the AMT as it is for the regular tax; property eligible for bonus depreciation that is placed in service after 2015 whether or not the bonus allowance is claimed.

OTHER INFREQUENTLY ENCOUNTERED AMT ADJUSTMENT & PREFERENCE INCOME

The following are the other items that will impact the AMT. However they are usually attributable to pass through entities generally out of the control of the individual taxpayer. Thus, there are no strategies associated with the pass-through items.

- **Estates and Trusts K-1 (1041) Adjustments** – (Form 6251 – Line 2j) – This line accommodates flow through AMT adjustments from estates and trusts. The K-1 (on line 12j) should also indicate how much of the AMT preferences and adjustments is from exclusion items. This information is used in computing the AMT credit on the following year's Form 8801. See "Alternative Minimum Tax Credit" discussion below.

- **Passive Activities** – (Form 6251 – Line 2m) – Difference between regular and AMT income or loss. The same rules that apply for limiting deductions of passive losses for regular tax purposes also apply for AMT purposes. Indefinite carryover of disallowed losses is also allowed and full deduction is allowed in the year of a complete disposition of the activity. However, there was no phase in of the passive loss rule for AMT purposes. Just as with passive farm losses, the AMT adjustment may be reduced by the amount of a taxpayer's insolvency at the end of the year. AMT adjustment and tax preference items related to a passive loss activity should be accounted for when recomputing the passive activity loss and should be reflected on the passive activity loss lines of the AMT forms.

  When refiguring a possible loss activity for AMT, only items that are allowed for AMT should be deducted. For example, the passive loss is recomputed using straight-line depreciation. **Caution:** Those same adjustments and preference items should not be accounted for again on other lines of the AMT forms.

- **Loss Limitations** – (Form 6251 – Line 2n) – Difference between AMT and regular tax income or loss refigured for activities for which the taxpayer is not at risk or basis limitations are applicable. Generally applies to partnerships and S corporations. The difference takes into account all AMT adjustments and preferences that apply.

- **Circulation Costs** - (Form 6251 – Line 2o) – These are expenses of establishing, maintaining or increasing the circulation of newspapers and periodicals. They can be deducted in the year paid or incurred for regular tax purposes. The AMT adjustment is the difference between the amount allowed for regular purposes over the amount allowed by amortizing the costs ratably over a three-year period. If a taxpayer elects three-year, straight-line amortization of the costs for regular tax purposes, there is no AMT adjustment. This adjustment is rarely encountered for individual purposes except via pass through entities.

- **Long-Term Contracts** - (Form 6251 – Line 2p) – For purposes of computing alternative minimum taxable income, taxpayers must use the percentage-of-completion method of accounting for long-term contracts. For small construction contracts, under Code Sec. 460(e)(1), the percentage of the contract completed is determined by using the simplified method for allocating costs in Code Sec. 460(b)(3). This adjustment is rarely encountered for individual purposes except via pass through entities.

- **Mining Costs** – (Form 6251 – Line 2q) – Mining exploration and development costs are adjusted for AMT purposes. The following deduction is allowed: the amount that results from capitalizing mine exploration and development expenditures without regard to the Code Sec. 291(b)(1) 30% cutback and amortizing them on a straight-line basis over ten years. This adjustment is rarely encountered for individual purposes except via pass through entities.

- **Research and Experimental Costs** – (Form 6251 – Line 2r) – For regular tax purposes, research and experimental expenses may be deducted in the year paid or incurred, or they may be amortized on a straight-line basis over 10 years. If they are currently deducted, the AMT adjustment is the difference between that deduction and the ten-year amortization amount. This adjustment is rarely encountered for individual purposes except via pass through entities.

- **Income from Certain Installment Sales before 1987** - (Form 6251 – Line 2s) – The installment method does not apply for the AMT to any non-dealer disposition of property after August 16, 1986, but before January 1, 1987, if the "proportionate disallowance rule" applied to the installment sale. Under the proportionate disallowance rule that applied to certain pre-'88 installment sales, a portion of the taxpayer's outstanding indebtedness was treated as a constructive payment on the installment (receivables) obligation that the taxpayer held. This is an extremely rare adjustment that will generally only be encountered via pass through entities.

- **Intangible Drilling Costs Preference** – (Form 6251 – Line 2t) – This is the excess of the annual allowable expense deduction for intangible drilling and development costs in connection with oil, gas and geothermal wells, over the amount that would have been allowable had the costs been capitalized and straight-line recovery of intangibles used with respect to them. This adjustment is rarely encountered for individual purposes except via pass through entities.

- **Other Adjustments –** (Form 6251 – Line 3) – This is the catch-all entry for other rarely encountered adjustments not handled on other lines of the 6251 related to: depreciation figured using pre-1987 rules, patron's adjustment, pollution control facilities, tax shelter farm activities, charitable contributions of certain property, excess business loss limitation, business interest limitation, biofuel producer credit and biodiesel and renewable diesel fuels credit, net qualified disaster loss, large partnerships, and related adjustments. See Form 6251 instructions for details.

ALTERNATIVE MINUMUM TAX CREDIT

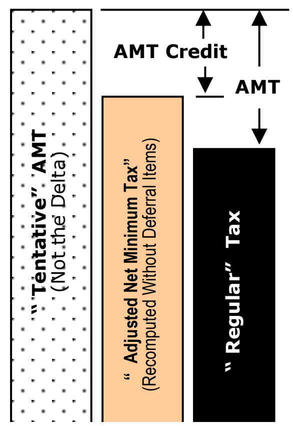
Overview

The Alternative Minimum Tax Credit is a frequently misunderstood and overlooked tax credit. Oversimplified, the alternative minimum tax credit is the result of incurring an alternative minimum tax in a prior year, which generates a credit that can be used to offset the excess of the taxpayer's regular tax over the alternative minimum tax in a subsequent year, with unused credit carried forward to future years.

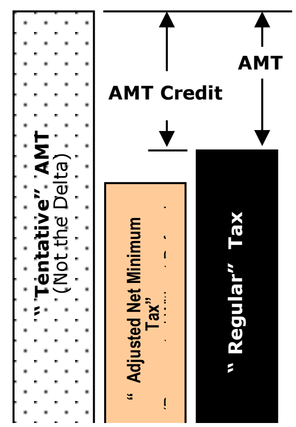
- The credit is generally a credit against regular tax, NOT the alternative minimum tax.
- The credit is computed in the year following a year in which there was an alternative minimum tax (or AMT credit carryover from some previous year).
- The AMT credit is computed on Form 8801 in the current year using data from the prior year 6251 and current year 1040.
- The amount of the credit is generally the excess of the AMT computed with deferral items of preference over the AMT computed without the deferral items of preference for the prior tax year.

AMT Credit - The AMT credit is the difference between the tentative AMT and adjusted net minimum tax (ANMT) but not exceeding the AMT itself. The ANMT is generally the AMT recomputed without deferral items of preference, which for most individuals means the AMT recomputed without the Incentive Stock Option (ISO) preference.

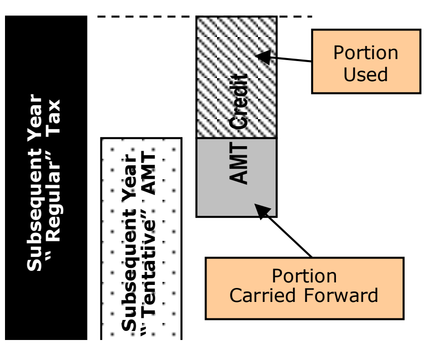
Adjusted Net Minimum Tax (ANMT) - For a non-corporate taxpayer, the ANMT for a tax year equals: (a) the alternative minimum tax (AMT) paid for that year; *less* (b) the amount of AMT that would have arisen if the only applicable preferences and AMT adjustments were "exclusion preferences" *plus* (c) the amount of any qualified electric vehicles credit not allowed solely by reason of the limitation on that credit that is a function of the taxpayer's tentative minimum tax.



Minimum Tax Credit
(Where ANMT is **Greater** Than the Regular Tax)



Minimum Tax Credit
(Where ANMT is **Less** Than the Regular Tax)



Using the Credit in a Subsequent Year
(Where the Regular Tax is **Greater** Than the Tentative AMT)

The two illustrations graphically illustrate how the AMT credit is determined where the ANMT is both greater than and less than the AMT.

Subsequent Year - Once the AMT Credit is determined, it is carried forward to subsequent tax years until used up. IRS Form 8801 – Credit for Prior Year Minimum Tax – is used to carry the credit forward.

DEFERRAL items of preference that can create an AMT Credit include:

- Qualified small business stock
- Incentive stock option preference
- Large partnerships adjustments
- Adjusted gain or loss
- Post-1986 depreciation adjustments
- Passive activities
- Loss limitations
- Circulation expenses differences
- Long-term contract preferences
- Mining cost differences
- Research and experimental costs
- Installment sales (pre-1987)
- Intangible drilling costs preferences
- Depreciation (pre-1987)

Strategies

Avoid AMT in a Subsequent Year - Since the AMT tax credit can only be used to reduce the regular tax to the AMT, it can never be used in a year where the taxpayer has an AMT. Therefore, the only way to obtain any benefit from this credit is to have a regular tax that is larger than the AMT. Where a taxpayer is marginally in the AMT or where transactions are creating an AMT, a taxpayer may be able to plan their income and deductions in such a way as to avoid the AMT in intervening years and take advantage of this credit.

Carryover & Preparation Software - Since the carryover credit is computed on Form 8801 for the year to which it is carried, it is frequently overlooked or lost in the transition and not continuously proformaed from year-to-year by preparation software. Some will only proforma the 8801 data from the immediately past year and not the information from other prior years. Therefore, it may be necessary to refer to Forms 8801 going back several years to make sure no credit is lost.

CALIFORNIA DIFFERENCES

With all the changes brought about by TCJA and the increases in the federal AMT exemption amounts combined with substantially higher income levels at which the exemption phases out, it is more likely taxpayers will incur a state AMT before incurring it on their federal return, which is the opposite of the situation before 2018. California's AMT calculation, done on **Schedule P (540),** is similar to the federal computation, with generally the same categories of adjustments and preferences, but often using different amounts that result from the frequent lack of conformity between federal and California law. Refer to the instructions to Schedule P for details about these differences. **The California AMT Tax rate has been 7% since 2011.**

AMTI Exclusion - The most significant difference between the federal and California AMT calculation—and a reason fewer taxpayers have been subject to California AMT—is that for California purposes a "qualified taxpayer" must exclude income, positive or negative adjustments, and preference items attributable to any trade or business when figuring AMTI.

Qualified Taxpayer - A "qualified taxpayer" is an owner of a trade or business with aggregate gross receipts, less returns and allowances, for the year of *less than $1 million from all of the taxpayer's trades or businesses*. If the taxpayer's ownership interest for any business is less than 100%, such as a partnership, then only the taxpayer's proportionate share of gross receipts for that business are included for the $1 million test. The threshold is not based on filing status, so it does not become $2 million for married taxpayers filing jointly.

If a qualified taxpayer's net trade or business income is a loss, the amount of the exclusion is zero.

AMT Exemptions and Phaseout – The California AMT exemption and the AMTI at which the exemption begins to phase out is adjusted annually for inflation. The adjacent tables show the exemption amounts and the phaseout start and end points for the current and prior several years.

CA AMT Exemptions

Filing Status	2016	2017	2018	2019
Joint & SS	87,627	91,793	95,373	
Single & HH	67,101	68,846	71,531	
MS	44,732	45,895	47,685	

CA AMT Exemptions Phaseout

Year	Single & HH	Joint & SS	MS
2019 Threshold			
Full Phase-out			
2018 Threshold	$268,237	$357,650	$178,822
Full Phase-out	$554,361	$739,142	$369,562
2017 Threshold	$258,168	$344,225	$172,110
Full Phase-out	$533,552	$711,397	$355,690
2016 Threshold	$251,626	$335,502	$167,749
Full Phase-out	$520,030	$693,370	$346,677

If any fields are blank, amounts were not available at publication date.
Full phase-out amounts equal exemption amount x 4 plus beginning phase-out amount.

KIDDIE TAX

Applies to child required to file a return who has unearned income over $2,200 (2019), if:

- **Under the age of 19 or**
- **Full Time Student over age 18 and under the age of 24**

Prior to 2018 and after 2025:

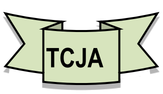
- Generally the child will be taxed on unearned income in excess of $2,100 (2017) at higher of own or parent's marginal tax rate.
- Instead may elect to include child's investment income on parent's return – depends on type of income

2018 through 2025:

- Generally, the child's unearned income in excess of $2,200 (2019) will be **taxed using the income tax rates for trusts and estates**.
- Child's taxable income attributable to earned income taxed using single rates for individuals.
- Tax computation not tied to parent's return (2018-2025)
- Instead may elect to include child's investment income on parent's return – depends on type of income

ALL YEARS:

- The basic **standard deduction** for a child, or any individual, who is or could be claimed as a dependent by another taxpayer, is limited to the **greater of the following two amounts** but not to exceed the regular standard deduction for the year ($12,200 for 2019).
    - The "**base amount**" which is $1,100 for 2019, or
    - The **dependent's earned income plus the "extra" amount** ($350 for 2019).
- If **neither parent is alive** on the last day of the year, the child's tax is at his/her own rate.
- If the child is **married and files JT**, child is taxed at his/her own rate.



The Act changes the way the "kiddie tax" is calculated for years 2018 through 2025, and removes from the computation any reference to the child's parent's return.

Related IRC and IRS Publications and Forms

- **Form 8814 -** Parents' Election To Report Child's Interest and Dividends
- **Form 8615 -** Tax for Certain Children Who Have Unearned Income
- **Pub 929** – Tax Rules for Children and Dependents
- **IRC Sec 1(g)**

<u>BASIC STANDARD DEDUCTION FOR CHILDREN (AND OTHER DEPENDENTS)</u>

The basic standard deduction for a child, or any individual, who is or could be claimed, as a dependent by another taxpayer is limited to the ***greater of:***

- The **"Base Amount"** (see table below), or
- The sum of the dependent's **Earned Income plus the "Extra" Amount** [(1)].

Note: Both the "base" and "extra" amounts are inflation-adjusted – see table below. Ignore the "earned income limit" column in the table for this calculation.

[(1)] However, the standard deduction can't be more than the regular standard deduction amount (including add-ons if age 65+ and/or blind) for the individual for whom it is computed.

Table 1

Year	Base Amount Sec 63(c)(5)(A)	Earned Income Limit	Earned Income Extra Amount
2016	1,050	2,100	350
2017	1,050	2,100	350
2018	1,050	2,100	350
2019	1,100	2,200	350
2020	1,100	2,200	350

If amount not shown it was not available at date of publication

KIDDIE TAX APPLIES TO

- Children **under Age 18**
- Children **Age 18 at end of Year** *(with Earned Income less than ½ of Support)*
- Full Time **Student over Age 18 and under Age 24** *(with Earned Income less than ½ of Support)*

Special rules apply for computing the tax on certain unearned income of a ***child meeting one of the age parameters listed above:***

1. Child's interest, dividends, and other unearned income total the "earned income limit" (see Table 1 above) or less: The child's income is taxed at the child's tax rates.

2. Child's interest, dividends, and other unearned income total more than the "earned income limit" (see Table 1 above): For years **before 2018 and after 2025**, part of that income may be taxed at the parent's tax rate instead of the child's tax rate. The computation of that tax is done on a return filed for the child.

   For years **2018 through 2025**, on the child's return the child's tax on the unearned income (investment income) will be taxed using the tax rates for estates and trusts (fiduciary) – shown below – both as to ordinary rates and capital gains rates. The child's taxable income attributable to earned income will be taxed at the single rates for individuals. The child's parent's tax rate will not affect the child's return.

3. Election by parents: A child's parent(s) may be able to choose to include the child's interest and dividend income (including capital gain distributions) on the parent's return rather than file a return for the child. If the child has income other than interest, dividends and capital gain distributions, this election is not allowed. See page 08.02.04 for the pros and cons of making the election.

CAUTION

If a child meets these requirements, the child is subject to the Kiddie Tax regardless of whether or not he/she qualifies as a dependent. A child can be a legally adopted child and a stepchild. If neither parent is alive on the last day of the child's tax year, the child's tax is determined at his/her own rate and the Kiddie Tax rules don't apply.

2019 Federal Tax Rate Schedule – Estates & Trusts

If your taxable Income is: Over -	But not over ---	the tax is:	of the amount over ---
$0	$2,600	10%	$0
2,600	9,300	$260.00 + 24%	2,600
9,300	12,750	1,868.00 + 35%	9,300
12,750		3,075.50 + 37%	12,750

2020 Federal Tax Rate Schedule – Estates & Trusts

If your taxable Income is: Over -	But not over ---	the tax is:	of the amount over ---
$0	$2,600	10%	$0
2,600	9,450	$260.00 + 24%	2,600
9,450	12,950	1,904.00 + 35%	9,450
12,950		3,129.00 + 37%	12,950

2018 through 2025:

- Generally, the child's unearned income in excess of $2,200 (2019) will be **taxed using the income tax rates for trusts and estates**.

Example – Kiddie Tax: *In 2019 Junior, age 10, has interest income of $3,000 from a bank account set up by his grandparents. He has no earned income and is a dependent of his father. Junior is subject to the kiddie tax because his unearned income exceeds $2,200. Junior's tax is determined as follows:*

- *Interest Income: $3,000*
- *Less Income Limit <2,200>*
- *Net taxable: $800*
- *The net is taxed at fiduciary rates = $80 ($800 x 10%)*

AMT EXEMPTION

The AMT exemption for 2019 for a child subject to the kiddie tax will be the lesser of (1) $7,750 (2019) plus the child's earned income, or (2) the regular 2019 AMT exemption for a single person of $71,700.

DEFINITIONS

Child - The term "child" includes a legally adopted child and a stepchild. The rules apply whether or not the child is a dependent. However, the rules don't apply if:

1. The child isn't required to file a tax return, or
2. Neither of the child's parents were living at the end of the tax year.

Unearned Income - For purposes of the Kiddie Tax, unearned income is generally all income other than salaries, wages, and other amounts received as pay for work actually done. It includes taxable interest (reduced by any penalty for early withdrawal of savings), dividends (including capital gain distributions), capital gains and losses, rents, royalties, etc. It also includes the taxable part of social security benefits, pension and annuity payments, taxable scholarship and fellowship grants not reported on Form W-2, unemployment compensation, taxable alimony, and income (other than earned income) received as the beneficiary of a trust.

Income subject to the kiddie tax includes amounts produced by assets the child obtained with earned income (such as interest on a savings account into which the child deposited wages).

Nontaxable unearned income, such as tax-exempt interest and the nontaxable part of social security and pension payments, is not included as unearned income. However, a child's unearned income includes income produced by property given as a gift to the child. This includes gifts to the child from grandparents or any other person and gifts made under the Uniform Gift to Minors Act.

Exception for income from qualified disability trusts – If a child is the beneficiary of a qualified disability trust (as defined in Code Sec. 642(b)(2)(C)(ii)), any amount distributed from the trust that is includible in the child's income is considered earned income for purposes of the Kiddie Tax computation.

Net Unearned Income – If the child is not itemizing deductions, subtract $2,200 (for 2019) from unearned income to figure net unearned income for purposes of the Kiddie Tax. If the child itemizes, the amount to subtract is the larger of $2,200, or $1,100 plus the portion of Schedule A deductions that are directly connected with producing the unearned income.

Itemized Deductions: For this computation, itemized deductions directly connected with the production of unearned income include expenses paid to produce or collect taxable income or to manage, conserve, or maintain property held for producing unearned income. These expenses also could include custodian fees and service charges on bank or brokerage accounts, service fees to collect taxable interest and dividends, and certain investment counsel fees. These expenses are claimed as Schedule A Tier 2 miscellaneous deductions subject to reduction by 2% of AGI. The deduction for these expenses is suspended for years 2018 through 2025, so it is highly unlikely that a child subject to the Kiddie Tax rules will be itemizing during this period.

PARENT'S ELECTION TO REPORT CHILD'S INTEREST AND DIVIDENDS

Parents may elect to include their child's interest and dividend income (including capital gain distributions) on their own tax return instead of the child filing a return of his/her own. If the child has other types of income, either earned or unearned, this election cannot be made. This provision was unchanged by the TCJA.

> **CAUTION:** This is an irrevocable election (Reg Sec. 301.9100-8(a)(4)(i)) and the child is treated as having no gross income and the child's income becomes the parent's income.

Child's Income Limit to File with Parent's Return – Table 2

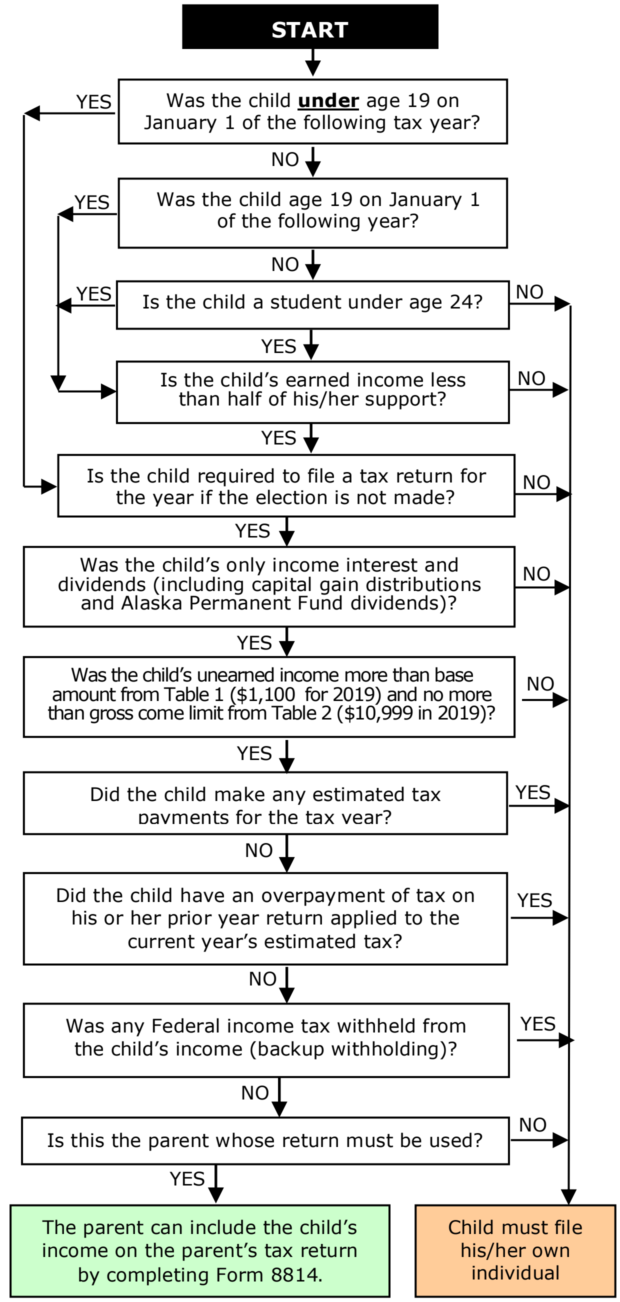
Year	2014	2015	2016	2017	2018	2019	2020
Limit(1)	9,999	10,499	10,499	10,499	10,499	10,999	10,999

(1) If the child's unearned income for any year is 10 times or more of the "base" amount (see Table 1) for that year, the child's income may not be included on the parent's return.

If amount not shown it was not available at date of publication.

Continue to next page.

Which Parent's Return? – When the parents aren't filing a joint return, it may not be readily apparent on which parent's return to make the election to include the child's interest and dividend income. Use the nearby flow chart and the following information to determine which return to use.



<u>Parents are married</u>: If the child's parents file separate returns, use the return of the parent with the greater taxable income.

<u>Parents not living together</u>: If a child's parents are married to each other but not living together, and the parent with whom the child lives (the custodial parent) is considered unmarried, use the return of the custodial parent. If the custodial parent is not considered unmarried, use the return of the parent with the greater taxable income.

<u>Parents divorced:</u> If a child's parents are divorced or legally separated, and the parent who had custody of the child for the greater part of the year (the custodial parent) has not remarried, use the return of the custodial parent.

<u>Custodial parent remarried</u>***:*** If the custodial parent has remarried, the stepparent (rather than the noncustodial parent) is treated as the child's other parent. Therefore, if the custodial parent and the stepparent file a joint return, use that joint return. Do not use the return of the noncustodial parent. If the custodial parent is a widow or widower who has remarried, the new spouse is treated as the child's other parent.

If the custodial parent and the stepparent are married, but file separate returns, use the return of the one with the greater taxable income. If the custodial parent and the stepparent are married but not living together, use the rule noted under "Parents not living together" previously.

<u>Parents never married</u>: If a child's parents did not marry each other, but lived together all year, use the return of the parent with the greater taxable income. If the parents did not live together all year, the rules explained under "parents divorced" (previously) apply.

How to make the election - Make the election to include the child's investment income on the parent's return by attaching Form 8814 to the parent's return. Attach a separate 8814 for each child for whom the election is made. *<u>The same election does not have to be made for all affected children</u>.*

Advantages and disadvantages of the election - Making the election can have certain advantages and disadvantages:

<u>Disadvantages</u>:

- ***Rates may be higher -*** By using Form 8814, the child's income may be taxed at a higher rate on the parent's return than it would be on the child's own return. Including the child's income could increase the parent's income to the point that it bumps the parents into the next higher tax bracket.
- ***Deductions lost -*** By making the Form 8814 election, parents can't take certain deductions the child would be entitled to on his or her return. For instance, the parents can't. . . .
  (1) Take the higher standard deduction if the child is blind,
  (2) Get a deduction for an interest forfeiture penalty on early withdrawal from the child's savings accounts, and
  (3) Deduct certain itemized deductions (such as the child's investment expenses (in years when Tier 2 miscellaneous deductions aren't suspended) or charitable contributions).
- ***Alternative Minimum Tax -*** If the child received tax-exempt interest from a private activity bond that is a tax preference item for alternative minimum tax (AMT) purposes, the parents must include it with their own tax preference items when figuring their AMT.

- ***3.8% Surtax on Net Investment Income (NII)*** – Electing to include the child's investment income on the parents' return could push the parents' modified AGI over the threshold at which the NII tax applies. If the parents are already subject to the NII tax, adding the child's investment income may increase the amount of NII tax the parents will pay.
- ***Reduced Deductions or Credits -*** The parent's increased adjusted gross income due to the child's income may reduce certain deductions or credits on their return, including:
  (1) IRA deductions;
  (2) Itemized deductions for medical expenses, casualty losses (only those in federally declared disaster areas for 2018-2025 are allowed), and in years when not suspended, certain miscellaneous expenses,
  (3) Total itemized deductions (in years when the overall itemized deduction phaseout applies),
  (4) Credit for child and dependent care expenses,
  (5) Saver's credit,
  (6) Child tax credit,
  (7) Personal exemptions (in years when exemption allowances are deductible and the amount must be phased due to "high" income), and
  (8) The earned income credit.

<u>Possible Advantages</u>:

- ***Deductible Investment Interest -*** If Form 8814 is used, a child's investment income is considered the parent's investment income. To figure the parent's limit on deductible investment interest expense, add the child's investment income to the parent's. However, if the child received capital gain distributions or Alaska Permanent Fund dividends, that income doesn't count as investment income.
- ***Simplification and Cost Savings –*** Including the child's income on the parent's return eliminates the need to file a separate return for the child, and may result in less overall tax preparation fees to the family.

FILING CHILD'S OWN RETURN WITH FORM 8615 (TAX YEARS 2018 THROUGH 2025)

With the decoupling of the parent's and child's returns, the Form 8615 has slimmed down from 18 lines on the 2017 version to 7 lines on the 2018 form. However, there is a 26-line computation worksheet in the instructions and special directions for the Schedule D Worksheet or Qualified Dividends and Capital Gain Tax Worksheet when one of them is being used. Fortunately, with accurate input, your tax program should make the computations for you.

FILING CHILD'S OWN RETURN WITH FORM 8615 (TAX YEARS BEFORE 2018 AND AFTER 2025)

If a parent does not or cannot choose to include their child's income on their return, and the child falls into the age or student categories noted above, the child's tax is figured using Form 8615 on the child's own return. The Form 8615 is necessary for 2017 only when the child's unearned income exceeds $2,100. To complete Form 8615 for the child, use the following steps:

- Figure the child's "net unearned income" (defined later).
- Figure the tentative tax on the net unearned income based on the parent's tax rate.
- Figure the child's tax.

Obtaining parent's information – In some situations, the information required for the parent's information may not be readily available.

<u>Using estimated information</u>: If the information needed from the parent's return is not known by the time the child's return is due, the return can be prepared using a reasonable estimate. Considered reasonable is using information from the previous year's return. However, if estimated amounts are used on Form 8615, write "Estimated" on the line next to the amount.

NOTE: When the correct information becomes available, an amended return must be filed for the child (provided the estimates are incorrect).

<u>Parent's return information not available</u>: If a child cannot get the required information about the parent's tax return, the child (or the child's legal representative) can request the necessary information from the IRS. Make the request with a signed, written request for the information sent to the Internal Revenue Service Center where the parent's return will be filed. The request needs to contain ALL of the following:

- A statement that the request is being made to comply with Section 1(g) of the Internal Revenue Code and that attempts have been made to get the information from the parent.
- Proof of the child's age - for example, a copy of the child's birth certificate.
- Evidence the child's unearned income exceeds the "earned income limit" amount (see Table 1) for the year (for example, a copy of the child's prior year tax return or copies of Forms 1099 for the current year).

- The name, address, social security number (if known), and filing status (if known) of the parent whose information is to be shown on Form 8615.

A child's legal representative making the request should include a copy of his or her Power of Attorney, such as Form 2848, or proof of legal guardianship.

The IRS cannot process the request before the end of the tax year. In fact, consider getting an extension of time to file the child's return, because there may be a delay in getting the information.

OTHER ISSUES

Deferring Income to Avoid the Kiddie Tax – A few years ago Congress raised the kiddie tax age from 14 to 18 (19 to 23 if a student) to prevent parents from transferring appreciated assets to their children to take advantage of the lower capital gains rates and especially the 0% rate.

Given the current age rule, a parent may want to reconsider any planned transfers of income-generating stocks, bonds, and other investments to children age 18, or those age 19-23 who are full-time students. However, placing or moving a child's funds into investments such as the following that produce little or no current taxable income, can help avoid the Kiddie Tax, at least in the years until the investments need to be sold or redeemed to pay for education expenses:

- **U.S savings bonds** – Interest can be deferred until the bonds are cashed.
- **Tax-deferred annuities** - Interest can be deferred until the annuity is surrendered.
- **Municipal bonds** – Generally produce tax-free interest income (may be taxable to the state).
- **Growth stocks** - Stocks that focus more on capital appreciation than current income.
- **Unimproved real estate** – That provides appreciation without current income.
- **Family employment** - If the family has a business, that family business could employ the child. The child's earned income is not subject to Kiddie Tax and will generate a deduction for the family business (assuming the wages are reasonable for work actually performed). The child's earned income can offset the standard deduction for a dependent and the excess income will be taxed at the child's rate (not the trust/estate tax rate). In addition, the child would also qualify for an IRA, which provides additional income shelter.

California conforms to the federal rules that children through age 18 and full-time students age 19 through 23 with the requisite amount of investment income are subject to the Kiddie Tax. However, California has not decoupled the child's and parent's returns. Use Form FTB 3800 for the tax computation of a child subject to Kiddie Tax.

California taxes the child's investment income over the limit (over $2,200 for 2019) at the parent's rate, if it is higher than the child's rate. In most cases, this income subject to the Kiddie Tax will be the same as the amount entered on federal Form 8615, line 1 (unearned income), except only income taxable by California should be included. Also include investment income that was not taxed on the child's federal tax return but is taxable under California law (for example, municipal bond interest from another state). California hasn't suspended the Tier 2 miscellaneous itemized deductions on Schedule A, so it is possible that a child with investment expenses could be using those itemized deductions in the computation of net investment income for calculating the state Kiddie Tax.

If the parents elect to report the child's income on their return, Form FTB 3803 is used; the computation parallels the federal, but the California tax rate is 1% on up to $1,100 (2019) of the child's first $2,200 of interest and dividend income instead of 10% as in the federal computation. Separate federal and state elections may be made.

Because California has no special capital gains rates, no special computations similar to the Federal Schedule D worksheets are necessary for the state.

NOTES

SELF-EMPLOYMENT TAX

RAPID FINDER

- Generally, income from self-employment is subject to SE Tax.
- **2019 Cap is $132,900 $16,479.60)** maximum tax @ **12.4%).**
- **$132,900** Cap is reduced for any FICA wages.
- Medicare element is **2.9%** with No Cap.
- Additional **0.9%** Medicare tax if SE income exceeds $200K/$250K/$125K threshold
- **$400** SE Income Threshold (no tax charges if total SE income is under $433 ($433 x 92.35% = $400)).
- **Self-Employment Income Generally Includes:**
  - Schedule C Income
  - Schedule F Income
  - SE Income from a Partnership K-1
  - Miscellaneous Income from a Regularly Conducted Trade or Business
  - Excluded Foreign Earned Income of self-employed person
  - Back Pay – At rates for year of payment
  - Professional Fiduciary
  - Agricultural Co-op Payments to Retired Farmers
  - Fishing Crew Member
- **Self-Employment Income Generally Does Not Include:**
  - Rental Income from Schedule E
  - Sub-chapter S K-1 Income (Taxpayer is supposed to take a reasonable wage on which FICA would be withheld.)
  - Miscellaneous Income from an Occasional Act or Transaction
  - Services performed as Notary Public
  - Non-Professional Fiduciary
  - Limited Partners' Share of Income
  - Newspaper Vendors under age 18
  - Termination Payments of Former Insurance Salespeople
  - Taxpayer's Child Employee under age 18
- **Non-Farm Optional Method**
  - Gross $8,160 or less (2019)
  - SE Net is less than $5,440 (2019)

ACTIVITIES THAT CAN GENERATE SELF-EMPLOYMENT INCOME: Most taxpayers are considered self-employed if they are independent contractors or general partners in a partnership. A part-time business pursued in addition to a taxpayer's regular employment can generate self-employment income. Thus, a taxpayer with a Schedule C, Schedule F, and a partnership on Schedule E, could be subject to self-employment tax.

Note that IRS instructions to Form 1040 specify that self-employment income is not to be reported on the miscellaneous income line of the 1040; instead, the taxpayer must use Schedule C or F, as applicable, even if there are no expenses related to the income. See Chapter 3.09 for information on independent contractors.

TAX RATES

Lest we forget!

Tax Year	1990	2015★	2016★	2017★	2018★	2019★	2020★
SE Tax Rate	12.4	12.4	12.4	12.4	12.4	12.4	12.4
Inc Subject to Tax	51,300	118,500	118,500	127,200	128,400	132,900	
Maximum Tax	6,361.20	14,694.00	14,694.00	15,772.80	15,921.60	16,479.60	
Medicare Tax Rate	2.9	2.9	2.9	2.9	2.9	2.9	2.9

If values not shown they were not available ay publication date.
★Additional 0.9% (figured separately) applies if SE income exceeds thresholds – see below and Chapter 12.06

NET SELF-EMPLOYMENT INCOME: Net self-employment income includes all business income less business deductions related to that income. If a taxpayer has more than one trade or business which generates self-employed income, the income from all those sources is combined to determine the net; SE tax is computed using this net figure. (Even though all businesses are combined to compute net SE income, the taxpayer should be cautioned to keep separate records for each entity and report each non-farm sole proprietorship on a separate Schedule C. Also, the SE incomes and losses of spouses may not be combined for figuring SE tax of either spouse.) The Sec 199A deduction available in years 2018-2025 does NOT reduced self-employment income for the SE tax computation.

Example - Computing Net SE Income *- Jane owned a business from which the following data was obtained:*

Gross profit from sales	*$87,500*	*Miscellaneous expenses*	*1,900*
Salary paid to employees	*30,000*	*Gain on sale of equipment*	*350*
Rent	*6,000*	*Fire loss on store*	*1,200*
Utilities	*2,400*	*NOL carryover*	*1,000*

Jane's net self-employment income is computed as follows:

Gross profit from sales		*$87,500*
Expenses:		
Salaries	*$30,000*	
Rent	*6,000*	
Utilities	*2,400*	
Miscellaneous expenses	*1,900*	
Total expenses		*40,300*
Net profit from operations		*$47,200*

Jane's net SE earnings are $47,200; the equipment sale, fire loss, and NOL are not included in the calculation of net SE earnings.

FIGURING SE TAX: The SE tax rate is made up of two elements, the social security element and the Medicare Part A hospital insurance element. The Social Security tax rate has been 12.4% for a number of years (except for the 2011 and 2012 reduction to 10.4%). The tax has an annual cap based on a maximum wage subject to the tax (see the table above). The Medicare tax rate also has been stable at 2.90% for over 25 years. However, there is no cap on the Medicare portion of the SE tax.

SE TAX COMPUTATION DEDUCTION: 50% of the Social Security and Medicare taxes for employees are paid by the employer, while a self-employed person must pay both the employee and the employer portions. To compensate for this, tax law provides a deduction equal to 7.65% of net SE earnings. This deduction is allowed only for the purpose of figuring SE tax; the deduction is computed by multiplying net SE earnings by .9235 (100% less 7.65%) on Schedule SE. The computation does not include the additional 0.9 percent Medicare tax on the self-employment income of certain high-income taxpayers. (Code Sec. 1402(a)(12))

AFFORDABLE CARE ACT INCREASES SE TAX RATE FOR SOME

The effective rate of self-employment tax is 16.2% (12.4% + 3.8%) on any SE income above the following thresholds: $250,000 married joint, $125,000 married separate and $200,000 all others. The 3.8% rate is made up of the long-standing 2.9% (Medicare) Hospital Insurance (HI) tax plus an additional 0.9% enacted as part of the Affordable Care Act.

The SE tax computation deduction described just above does not include the 0.9% additional HI tax. The SE income in excess of the threshold amount that is subject to the 0.9% additional SE tax rate is reduced by the amount of wages, if any, that were also subject to the additional 0.9% tax for FICA purposes. Additional Medicare Tax, the computation for the additional 0.9% HI tax, is done on Form 8959 and not on Sch. SE. See Chapter 12.06 for details.

ADJUSTMENT FOR FICA AND MEDICARE TAXES PAID THROUGH WAGES: If a self-employed individual has both wages subject to FICA and SE income, the maximum amount subject to the Social Security portion of the SE tax is reduced by the wages subject to FICA. There is no adjustment for Medicare tax since there is ~~a~~ no cap.

FISCAL YEAR TAXPAYERS: Fiscal year taxpayers must use the SE tax rate and maximum income limit in effect at the beginning of their tax year, even if the rate and limit change during the tax year.

METHODS OF COMPUTING SE TAX: There are three methods a taxpayer may use to figure net SE earnings and SE tax: (a) the regular method; (b) the farm optional method; (c) the nonfarm optional method. All methods use Schedule SE for the computation. A taxpayer must have $433.13 or more of net SE earnings (before reduction by the 7.65% deduction) to be subject to the tax (.9235 x $433.13 = $400). No Schedule SE is required if net SE income is below the $433.13 amount (unless (b) or (c) above applies).

The Regular Method - Schedule SE allows the regular method computation of SE tax in either of two ways--use the Short Schedule SE (page 1 of the form) or the Long Schedule SE (page 2 of the form). Most taxpayers qualify to use the "short" method. Taxpayers required to use the "long" method are:

(a) Individuals whose total wages and tips subject to social security tax plus net SE earnings are more than "maximum subject to tax for the year";

(b) Ministers, members of religious orders, and Christian Science practitioners, who, by IRS consent, pay no SE tax on earnings from these sources but who owe SE tax on earnings from other sources;

(c) Employees receiving wages reported on Form W-2 of $108.28 (.9235 x $108.28 = $100) or more while working for a church electing out of social security taxes;

(d) Taxpayers with tip income subject to social security and Medicare tax that wasn't reported to their employers (the social security tax on this is computed on Form 4137), and

(e) Those who use one of the optional methods to figure SE tax.

Example - SE Tax Under the Regular Method - *Tom received $110,000 net SE income in 2019; he also received $10,000 in wages, which were subject to social security and Medicare taxes. Tom's SE tax is computed as follows:*

(1) Net SE income	*$110,000*	
(2) .9235 x LN1	*$101,585*	
(3) 2019 SS wage base	*132,900*	
(4) Wages	*10,000*	
(5) LN3 minus LN4	*122,900*	
(6) Lesser of LN2 or LN5	*101,585*	
(7) LN6 x .124 (social security portion of tax)		*12,596.54*
(8) LN2 x .029 (Medicare portion of tax)		*2,945.97*
Tom's total SE tax (ln 7 + ln 8) for 2019 is	*$15,542.51*	

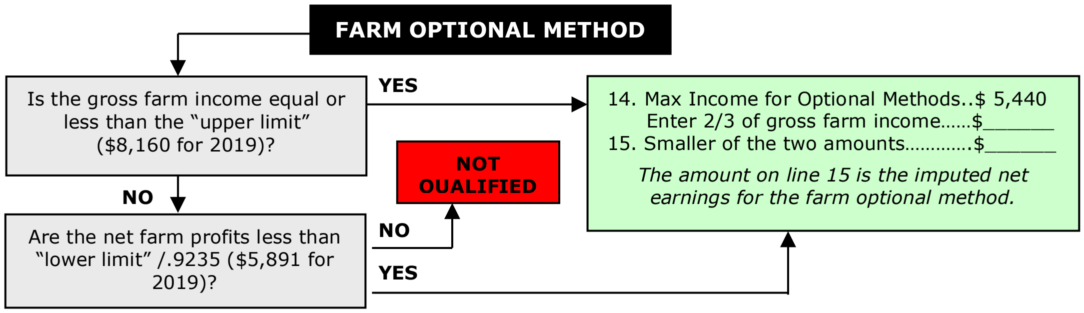
Farm and nonfarm optional methods - Use of these methods allows a taxpayer to continue SE tax coverage even in years when profits are small (or even when there is a loss). A taxpayer who uses one of the optional methods for figuring SE tax also uses the resulting imputed income when calculating the credit for child and dependent care expenses and the earned income tax credit. The "lower limit" and the "upper limit" for the optional methods are shown to the right:

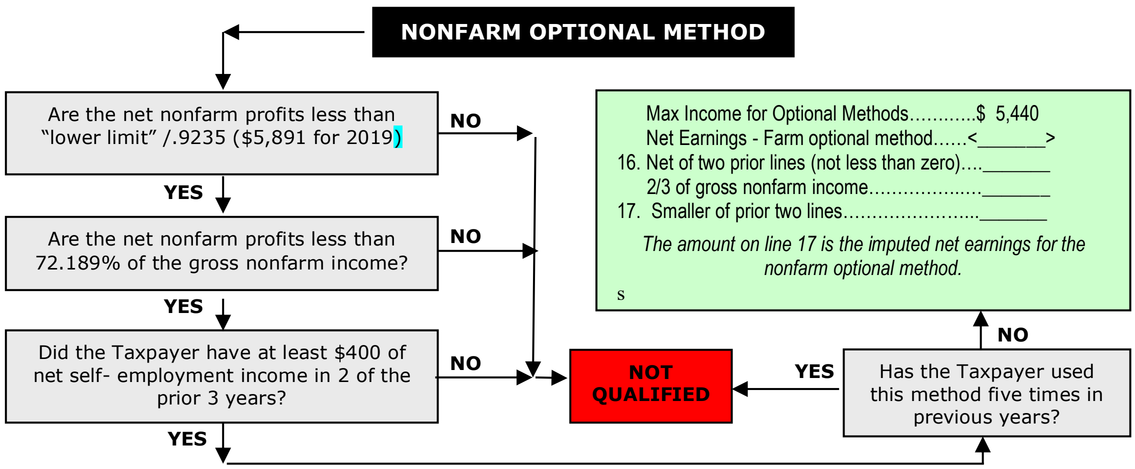
Year	2017	2018	2019	2020
Lower Limit	$5,200	$5,280	$5,440	
Upper Limit	$7,800	$7,920	$8,160	

If values not shown they were not available at publication date.

Note: *The lower limit is determined by multiplying the minimum earnings for a quarter's Social Security coverage (see chapter 2.03) by four. Thus for 2019 the lower limit is $5,440 ($1360 x 4). The upper limit is determined by multiplying the lower limit by 1.5 resulting in an upper limit for 2019 of $8,160 ($5,440 x 1.5).*

The following flow charts detail the qualifications for each method and the computations for both. The two optional methods can be applied in unison.





<u>SE TAX DEDUCTION</u>: A taxpayer can deduct one-half of the SE tax computed on Schedule SE for the year as a business expense that is deducted as an adjustment to gross income on Form 1040, Schedule 1, part II, line 14 of draft 2019 form. This deduction has no effect on the computation of net SE income or on the computation of SE tax.

Example: *Joshua's net self-employment income for 2019 is $130,000. He has no wage income. His combined SE and Medicare taxes total $18,369, and he is entitled to an above-the-line SE Tax deduction of $9,185, computed as follows:*

1. SE Income $130,000			
2. Line 1 times 92.35%	*120,055*		
3. Medicare tax Ln2 x 2.9%		*$ 3,482*	
4. Max. income for SE tax	*132,900*		
5. Smaller of Ln2 or Ln 4	*120,055*		
6. Line 5 times 12.4%		*<u>14,887</u>*	
7. Total SE & Medicare tax		*18,369*	
8. Line 7 times 50% = above-the-line SE Tax deduction			*$9,185*

<u>SPECIFIC SE ISSUES</u>

- ***Miscellaneous Income from an occasional act or transaction*** – Income from an occasional act or transaction, absent proof of efforts to continue those acts or transactions on a regular basis, isn't income from self-employment subject to the SE tax. (Rev Rul 58-112, 1958-1 CB 323; Rev Rul 55-431, 1955-2 CB 312; Rev Rul 55-258, 1955-1 CB 433) Regularity of activity, frequency of transactions, and the production of income are key elements in determining whether an activity will be considered a trade or business for SE tax purposes. Income from an occasional act or transaction, without proof of efforts to continue on a regular basis, may not be income from self-employment. In ***Langford, TC Memo 1988-300,*** an assistant professor who co-authored a textbook without any obligation to work on later revisions was found not to have trade or business income from the activity. Even though the professor did ultimately revise the book, he was not subject to SE tax.

- ***Notary public -*** The fees for the services of a ***notary public are exempt from the self-employment tax.*** However, the taxpayer has to prove the income came from notary public services. Merely having a notary seal isn't enough; the taxpayer must produce records of his or her notary public business or other evidence to show he or she isn't subject to the self-employment tax.

- ***Nonresident aliens and SE tax*** - Nonresident aliens don't pay self-employment tax. Residents of the Virgin Islands, Puerto Rico, Guam, or American Samoa, however, are subject to the tax. Nonresident and resident aliens employed in the U.S. by an international organization, a foreign government, or a wholly-owned instrumentality of a foreign government are not subject to SE tax. See also Chapter 6.03.

- ***Executors and administrators (fiduciaries)*** - A person who administers the estate of a deceased person (i.e., the fiduciary) is subject to SE tax if: (a) the person is a professional fiduciary; (b) the person is a nonprofessional fiduciary who manages an estate that includes an active trade or business. Nonprofessional fiduciaries are generally not treated as receiving income from a trade or business unless all of the following are met:
  - There is a trade or business among the assets of the estate.
  - The fiduciary actively participates in the operation of this trade or business.
  - The fees of the fiduciary are related to the operation of the trade or business.

  Example – Nonprofessional Executor - *Taxpayer, a nonprofessional fiduciary, is co-executor of an estate that includes a trade or business and is totally unfamiliar with the operation of the business and leaves the management of the business entirely in the hands of his co-executor. The fees received by the taxpayer aren't earnings from self-employment. (Rev Rul 58-5, 1958-1 CB 322)*

  Example – Managing a business - *A nonprofessional fiduciary receives a fee of $10,000 for acting as executor of an estate. The estate includes a business that the taxpayer manages during the period of administration. Under local law, an executor is entitled to a commission based on a percentage of the value of the assets. Based on the statutory allowance, the taxpayer would have been entitled to a commission of $7,500. However, the probate court allowed, and the taxpayer was paid, a commission of $10,000.*

  Since the statutory commission of $7,500 was attributable to the normal fiduciary duties, it isn't treated as income from a trade or business. The remaining $2,500 is treated as attributable to the operation of the estate's business and thus treated as self-employment income. (Rev Rul 58-5, 1958-1 CB 322)

  Example – Conservator nonbusiness assets *- A surviving spouse, on the death of her husband, was appointed successor conservator of the estate of a friend who was unable to manage her financial affairs. The estate consists solely of a residence occupied by the friend and income producing stocks, bonds, and depository cash accounts. IRS privately ruled that since the services provided by the surviving spouse as conservator didn't relate to any trade or business of the estate, a monthly allowance paid to the taxpayer-conservator wasn't self-employment income. (IRS Letter Ruling 8928030)*

  Example – Executor and Beneficiary *- A surviving spouse who operated a community property oil and gas lease as executrix of her husband's estate wasn't liable for self-employment tax on any part of the income from the lease, since she was the sole beneficiary of the estate. Beneficiaries don't realize self-employment income on business carried on by the estate. (Huval, Louisa, (1985) TC Memo 1985-568, PH TCM ¶85568, 50 CCH TCM 1452)*

- **Fiduciary of an estate on an isolated basis** - Those who serve in the capacity of fiduciary of an estate on an isolated basis (e.g., a friend or relative of the decedent) are not generally subject to SE tax on the fees they receive for their services.

- **Commissions allowed by the probate court** - Commissions allowed by the probate court under local law aren't considered self-employment earnings, but any excess is, on the ground that it represents a special payment for operating the business. *Rev Rul 58-5, 1958-1 CB 322*

- ***Limited Partners -*** A limited partner's share of partnership income is not subject to SE tax. IRS proposed regs define who are considered limited partners. The regs apply to all entities classified as partnerships for Federal tax purposes. Generally, an individual partner is treated as a limited partner unless he/she:
  - Has personal liability as a partner for debts of the partnership or claims against it;
  - Has authority to contract on the partnership's behalf under the law which the partnership is recognized; or
  - Participates in the partnership's trade or business for more than 500 hours during the tax year. If the partnership involved is a service partnership, anyone who provides more than de minimis amount of service isn't a limited partner.

- ***Newspaper vendors*** - The income newspaper vendors receive for selling newspapers directly to customers for a profit is not SE income if the vendor is under age 18; for those age 18 and over, it is SE income.

- ***Conservation Reserve Program Payments*** - Excluded from self-employment income are any Conservation Reserve Program payments made to individuals who are receiving Social Security retirement or disability payments.

- ***Corporate payments*** - Fees received for performances of services as a director of a corporation, including director meeting attendance, are SE income. A shareholder's portion of an S corporation's taxable income is not SE income.

- ***Partners*** - If a taxpayer is a member of a partnership that carries on a trade or business, his/her distributive share of the partnership's income is SE income. Guaranteed payments from the partnership should be included in net earnings from self-employment (in addition to the pass-through income for the year, if the partner is a general partner).

- ***Religious exemptions*** - Ministers, Christian Science practitioners, and members of religious orders who haven't taken a vow of poverty may get an exemption from self-employment tax on their earnings if certain requirements are met. To get the exemption, Form 4361 must be filed.

- ***Spouses May Elect Out of Partnership Rules -*** A husband and wife who file a joint return may elect out of the partnership rules. Thus, a joint venture between them is not treated as a partnership for tax purposes. ***(Code Sec. 761(f); Code Sec. 1402(a)(17))*** When this election is made, each spouse then files a Schedule C with their portion of the business' income and expenses, and each would be subject to SE tax. For more detail see Chapter 3.00.

- ***SE tax for termination payments of former insurance salespeople -*** The law provides that net earnings from self-employment don't include any amounts received from an insurance company for services performed by an individual as an insurance salesperson for the company if:
    1. The amount is received after the individual's agreement to perform services for the company ends;
    2. The person performs no services for the company after the agreement terminates and before the end of the tax year,
    3. A condition of the payments is that the salesperson does not compete with the company for at least one year after the end of the agreement, and
    4. The amount of the payment depends primarily on:
        - Policies sold by (or credited to the account of) the salesperson during the last year of the agreement, and/or
        - The extent to which the policies remain in force for some period after the agreement ends.

    The amount of payment can't depend on the length of service or overall earnings from services performed for the company. However, eligibility for payment can depend on length of service and/or overall earnings.

- ***Agricultural co-op payments to retired farmers*** – Although retired from daily farming activities, taxpayers who are still contractually obligated to supply an agricultural commodity to the agricultural cooperative of which they remain members are considered to be in a trade or business of producing, marketing, processing and selling the commodity. The "value-added" payments received from the co-op are subject to self-employment tax ***(Richard J. Bot, CA 8, 12/22/2003 92 AFTR 2d 2003-7385).***

- ***Rents paid in crop shares*** - are not subject to SE tax unless paid under an arrangement where the landowner (or tenant) materially participates in crop production or controls and directs the farming operation and pays the farmer at a fixed rate as his employee ***(Reg § 1.1402(a)-4(b))***.

- ***Real estate rental income*** – Rent from real estate and personal property leased with that real estate is not SE income if no services are provided with the rental. Rents received from a hotel or motel are considered SE income because services (e.g., maid service) are generally provided for the occupants. If substantial services are provided, the income is subject to SE tax. "Substantial" means that part of the rent is actually payment for services. For example, hotels, boarding houses, apartments which furnish hotel services, tourist homes or storage garages. ***(Reg 1.1402(a)-4(c)(2))***

- ***Trailer Park Owner - Rev Rule 83-139, CB 1983-2 150 -*** Monthly income of a trailer park owner who provided ***insubstantial services*** for tenants was not subject to SE tax. Provided were lots, a laundry facility, city sewer, and roadway to park. Owner cleaned and maintained premises daily and furnished hot water in the laundry. However, the ruling points out that an owner who provides additional services like a recreation hall, card area, pool room, kitchen, auditorium, stage and library would be subject to SE tax on income.

- *Fishing Crew Member - (Anderson, TC)* - In a case of first impression, the Tax Court held that a member of a fishing boat crew was self-employed because he was compensated solely from the proceeds of the sale of the boat's catch, even though operating expenses were subtracted from the proceeds before the crew's compensation was determined.

The taxpayer argued that the subtraction of the owner's expenses cause him to be classified as an employee due to the requirement in Reg. §31.3121(b)(20)-1(a) that a self-employed crew member's compensation must depend "solely" on the sales proceeds. However, Code Sec. 3121(b)(20) and its accompanying regulations reflected the tradition of compensating crew members with share of the profits from the sale of the catch. The history of the fishing industry, the relevant legislative history, the preamble and example contained in the regulation, and a logical and practical interpretation of the statute all indicated that "proceeds" refers to net proceeds after the subtraction of operating expenses, rather than the gross proceeds from the sale. A crew member qualifies as an employee only if the member is compensated with something other than a share of the catch, such as an hourly wage or a flat fee in excess of $100 for certain types of work.

- ***Income excluded under the foreign earned income exclusion*** - Even if excluded, if the income is for a self-employed person, it is subject to SE tax.
- ***Earnings passed through from an S corporation shareholder*** – This is not considered self-employment income. However, one case upheld the IRS assertion that dividends were subject to payroll taxes because the attorneys who owned the S corp. didn't take salaries. **IMPORTANT:** Active shareholders need to take a "reasonable salary," which of course, would be subject to FICA withholding. See Chapter 3.29 for more on reasonable compensation.
- ***Statutory Employees*** - Income received as an employee or statutory employee is not considered self-employed income.
- ***Taxpayer's Child Employee*** - A child under the age of 18, employed in their parent's unincorporated business, is not subject to FICA/Medicare payroll taxes and is not considered self-employed for purposes of SE tax (no social security tax is owed).

  A similar exemption applies for FUTA, which exempts earnings paid to a child under age 21 while employed by his or her parent.

  Note that there is no FICA or FUTA exemption for employing a child if the business is incorporated or a partnership that includes nonparent partners.

- **Misclassified as an independent contractor** – Where taxpayers feel they were incorrectly treated as independent contractors instead of employees and find themselves subject to a significant SE tax, they can file the Form SS-8 – "Determination of Worker Status for Purposes of Federal Employment Taxes and Income Tax Withholding" – and see if they can get a determination letter from the IRS stating they are employees. (Of course, filing the SS-8 will not make the employer very happy.)

  Until a determination is made in their favor, they still have to pay the SE tax and amend for a refund when and if they receive a favorable opinion. Once the determination letter is in hand, a taxpayer can file an amended return to add Form 8919 (and the employee's share of the FICA taxes) and delete Schedule SE and the SE tax, resulting in a net refund equal to the employer's share of the SE tax. **Caution:** The client should file the SS-8 promptly as it does not extend the statute of limitations, and should the statute expire before the determination, there is no other recourse. The client should also be aware that filing the SS-8, especially if the IRS determines employee status, could result in "burning a bridge" with that employer.

- **Short Term Rentals & SE Tax –** Profit from a rental activity that is reported on Schedule E is not subject to self-employment (SE) tax. But what about short-term rentals reported on Schedule C – are they subject to SE tax? Even though Pub 527, Page 12, indicates taxpayers "may" have to pay self-employment tax on short-term rental income, the "may" applies to real estate dealers. To quote Pub 334, "You are a real estate dealer if you are engaged in the business of selling real estate to customers with the purpose of making a profit from those sales. Rent you receive from real estate held for sale to customers is subject to SE tax. However, rent you receive from real estate held for speculation or investment is not subject to SE tax." (IRC Sec 1402(a)(1))

CALIFORNIA DIFFERENCES

California has no equivalent tax. Nonetheless, California allows 50% of the SE tax to be claimed as an adjustment to gross income.

NOTES

MARGINAL TAX RATES

FEDERAL BRACKETS: The federal marginal tax brackets are annually adjusted for inflation. The historical table below indicates the end value for each bracket.

Filing Status		Single	HH	Joint	MS
2020	10.0%	9,875	14,100	19,750	9,975

Strategy – To avoid the additional 1% Mental Health tax! Married taxpayers filing separately have the same threshold ($1,000,000) for the application of the 1% additional tax as any other filing status. Thus, a married couple with a taxable income in excess of $1,000,000 could file separately and eliminate or reduce this extra tax. **CAUTION** – Prepare and compare the results of the married separate and joint returns before making a final decision. There are other factors pertaining to married separate returns that could outweigh the savings. Generally, to file MFS for California, the MFS status also must be used for federal.

FARMERS & FISHERMEN INCOME AVERAGING

- Shift **current year's** farm or fishing income **to three prior (base) years**.
- Need not have been in the farming or fishing business in any of the "base" years
- **Includes all income**, gains, losses, and deductions **attributable to any farming or fishing business**
- All of the taxable income from farming or fishing need not be included
- Different filing status in different years OK.

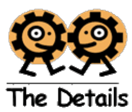
Related IRC and IRS Publications and Forms
- **Pub 225** – Farmer's Tax Guide
- **Schedule J (1040)** – Income Averaging for Farmers and Fishermen
- **IRC Sec 1301**



A taxpayer engaged in a farming or fishing business may be able to average all or some of the current year's farm or fishing income by shifting it to the 3 prior years (base years).

<u>WHO CAN USE FARM OR FISHING INCOME AVERAGING</u>:

A taxpayer can elect to use farm or fishing income averaging if, in the year of the election, they are engaged in a farming or fishing business as an individual, a partner in a partnership, or a shareholder in an S corporation. They do not need to have been engaged in a farming or fishing business in any base year. Corporations, partnerships, S corporations, estates, and trusts cannot use this averaging method.

<u>DEFINITIONS:</u>

Farming Business - A farming business is the trade or business of cultivating land or raising or harvesting any agricultural or horticultural commodity. A farming business **INCLUDES**:
- Operating a nursery or sod farm;
- Raising or harvesting of trees bearing fruits, nuts, or other crops;
- Raising ornamental trees (but not evergreen trees that are more than 6 years old when severed from the roots);
- Raising, shearing, feeding, caring for, training, and managing animals; and
- Leasing land to a tenant engaged in a farming business, but only if the lease payments are based on a share of the tenant's production and not on a fixed amount.

A farming business **DOES NOT INCLUDE**:
- Contract harvesting of an agricultural or horticultural commodity grown or raised by another, or
- Merely buying or reselling plants or animals grown or raised by another.

Fishing Business - Fishing business is defined in section 1301(b)(4) as the conduct of commercial fishing as defined in section 3 of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1802. The Magnuson-Stevens Act defines commercial fishing as fishing in which the fish harvested are intended to or do enter commerce through sale, barter, or trade. 16 U.S.C. 1802(4). Fishing is defined as the catching, taking, or harvesting of fish; the attempted catching, taking, or harvesting of fish; activities that reasonably can be expected to result in the catching, taking, or harvesting of fish; or any operations at sea in support of, or in preparation for, the catching, taking, or harvesting of fish. Fishing does not include any scientific research activity conducted by a scientific research vessel.

- **Fish** - is defined as: finfish, mollusks, crustaceans, and all other forms of marine animal and plant life, other than marine mammals and birds.

<u>OTHER ISSUES:</u>

AMT - The farm or fishing averaging cannot reduce the tax below the alternative minimum tax.

Farming Rental Income - The rental income of a landlord that is based on a share of a tenant's production is subject to fluctuations in the farm economy to the same extent as that of a farmer. Therefore, a landlord is engaged in a farming business if this arrangement is established in a written agreement before the tenant begins significant activities on the land.

Lessor of a Vessel - Regulations provide that a lessor of a vessel is engaged in a fishing business within the meaning of section 1301(b)(4) if the payment due to the lessor under the lease is based on a share of the lessee's catch (or a share of the proceeds from the sale of the catch) and the lease is a written agreement entered into before the lessee begins significant fishing activities resulting in the shared catch. A fixed lease payment is not eligible for income averaging.

Crewmembers - The income of crewmembers on vessels engaged in fishing also is subject to fluctuations in the fishing economy if the crewmembers' compensation is based on a share of the vessel's catch of fish or a share of the proceeds from the sale of the catch. Accordingly, the regulations provide that these crewmembers are engaged in a fishing business, whether or not they are treated as employees for employment tax purposes.

Taxable income from farming or fishing - Includes all income, gains, losses, and deductions attributable to any farming or fishing business. However, it does not include gain from the sale or other disposition of land. A taxpayer engaged in both a farming business and a fishing business must combine income, gains, deductions, and losses from both the farming and the fishing businesses to determine the maximum amount of income that is eligible for averaging. Generally, farm or fishing income, gains, losses, and deductions are reported on: Form 1040, line 1 (draft 2019), to the extent of wages and other compensation received as a shareholder in an S corporation engaged in a farming business; Schedule C; Schedule D; Schedule E, Part II**;** Schedule F; Form 4797; and Form 4835 – see Schedule J instructions for other potential income.

Not all income need be included - The elected farm or fishing income (EFI) is the amount of the taxable income from farming or fishing that the taxpayer elects to include. All of the taxable income from farming or fishing need not be included. It may be to the taxpayer’s advantage to include less than the full amount, depending on how the amount included affects the tax bracket for the current and prior 3 tax years.

Additional limitations

- The elected farm or fishing income cannot exceed the taxable income.
- The portion of the elected farm or fishing income treated as a net capital gain cannot exceed the **smaller** of the total net capital gain or the net capital gain attributable to farming or fishing business.
- If the elected farm or fishing income includes net capital gain, the taxpayer must allocate an equal portion of the net capital gain to each of the base years.
- If, for any base year, the taxpayer had a capital loss that resulted in a capital loss carryover to the next tax year, do not reduce the elected farm or fishing income allocated to that base year by any part of the carryover.

FILING STATUS:

Taxpayers are not prohibited from making a farm or fishing income averaging election solely because their filing status is not the same in an election year and the base years.

Example, if the taxpayer is married filing jointly in the election year, but filed as single in all of the base years, he or she may still elect to average farm or fishing income.

GAINS FROM THE SALE OR OTHER DISPOSITION OF FARM OR FISHING PROPERTY:

Gains from the sale or other disposition of farm or fishing property, other than land, can be designated as EFI if the taxpayer (or his/her partnership or S corporation) uses the property regularly for a substantial period in a farming or fishing business. Whether the property has been regularly used for a substantial period depends on all the facts and circumstances.

LIQUIDATION OF A FARMING OR FISHING BUSINESS:

If the taxpayer (or his/her partnership or S corporation) liquidates the farming or fishing business, gains on property sold within a reasonable time after operations cease can be designated as EFI. A period of one year after ceasing operations will be treated as a reasonable time. After that, what is “a reasonable time” depends on the facts and circumstances.

CALIFORNIA DIFFERENCES

California does not have an equivalent computation.

GENERAL BUSINESS CREDIT

Overview

Certain business incentive credits are combined into one "general business credit" for purposes of determining each credit's allowance limitation for the tax year. The general business credit generally is only allowed against the income tax (excluding the tax on self-employment income) for a particular tax year and is subject to an annual limitation based on tax liabilities. However, a taxpayer may use certain specified credits to offset all or part of the alternative minimum tax (AMT). See chapter for appropriate credit. A general business credit may generally be carried back one year and forward twenty years. "Carrying back" means, in most instances, amending the return of the year to which the credit is carried; if a return for that year had not been filed, then the carryback credit would be claimed on an original late-filed return for that year.

Over 40 different credits make up the general business credit. However, for small businesses, the 2019 general business credit is generally made up the following credits:

- Employer-provided child care facilities/services credit under Code Sec. 45F
- Alternative motor vehicles credit (business portion) covered by Code Sec. 30B(g)(1)
- New Qualified plug-in electric drive motor vehicles credit (business portion) NQPEDMVs Code Sec 30D
- 2-wheeled plug-in electric vehicles credit (business portion, carryforward only) QPEVs under Code Sec 30D
- The energy efficient home credit determined under Code Sec. 45L
- Employer social security credit under Code Sec. 45B(a)
- Indian employment credit under Code Sec. 45A
- Employee retention credit for employers affected by various hurricanes and disasters (carryforward only)
- Differential wage payment credit (for compensation paid to active duty military personnel)
- Small employer pension plan startup cost credit under Code Sec. 45E
- Small employer health insurance credit under Code Sec. 45R
- Building rehabilitation investment credit under Code Sec. 46
- Business energy investment credit for solar, geothermal, etc., under Code Sec. 46
- Work opportunity credit under Code Sec. 51(a)
- Research Credit Code Sec 41
- Disabled Access Credit Sec 44
- Family and Medical Leave Credit under Sec 45S

TCJA

Family and Medical Leave Credit (FAMLC) – Added by the TCJA, the FAMLC is available to eligible employers only for years 2018 and 2019. See chapter 9.17 for details.

- **Instructions for Form 3800**, General Business Credit

The Details

Limitation on general business credit based on tax liability - The general business credit (except for certain specified credits and the amount attributable to the sum of current year, carryforward and carryback credit amounts) for any tax year is subject to a limitation that is based on the taxpayer's tax liability. The credit must not exceed the excess (if any) of the taxpayer's "net income tax" (generally, the taxpayer's regular income tax and alternative minimum tax (AMT), reduced by most non-refundable credits other than the general business credit) over the greater of: (a) the taxpayer's "tentative minimum tax" for the tax year or (b) 25% of so much of the taxpayer's "net regular tax liability" as exceeds $25,000 ($12,500 for taxpayers filing married separate).

General carryback and carryover provisions – Unused credits can be carried back 1 year and forward 20 years.

Refer to Section 9 in the text for details related to each credit.

CREDITS MUST BE USED IN A SPECIFIC ORDER

When relevant, the components of the general business credit reported on Form 3800 arising in a single tax year are used in the following order.

- Investment credit (in the following order—
  - Rehabilitation credit,
  - Energy credit,
  - Qualifying advanced coal project credit,
  - Qualifying gasification project credit, and
  - Qualifying advanced energy project credit) (Form 3468).
- Qualifying therapeutic discovery project credit (carryforward only).
- Work opportunity credit (Form 5884).
- Biofuel producer credit (Form 6478).
- Credit for increasing research activities (Form 6765).
- Low-income housing credit (Form 8586, Part I only).
- Enhanced oil recovery credit (Form 8830).
- Disabled access credit (Form 8826).
- Renewable electricity, refined coal, and Indian coal production credit (Form 8835).
- Empowerment zone employment credit (Form 8844).
- Renewal community employment credit (carryforward only).
- Indian employment credit (Form 8845).
- Employer social security and Medicare taxes paid on certain employee tips (Form 8846).
- Orphan drug credit (Form 8820).
- New markets credit (Form 8874).
- Credit for small employer pension plan startup costs (Form 8881).
- Credit for employer-provided child care facilities and services (Form 8882).
- Qualified railroad track maintenance credit (Form 8900).
- Biodiesel and renewable diesel fuels credit (Form 8864)
- Low sulfur diesel fuel production credit (Form 8896).
- Credit for oil and gas production from marginal wells (Form 8904).
- Distilled spirits credit (Form 8906).
- Nonconventional source fuel credit (carryforward only).
- Energy efficient home credit (Form 8908).
- Energy efficient appliance credit (carryforward only).
- Alternative motor vehicle credit (Form 8910).
- Alternative fuel vehicle refueling property credit (Form 8911).
- Mine rescue team training credit (Form 8923).
- Agricultural chemicals security credit (carryforward only).
- Credit for employer differential wage payments (Form 8932).
- Carbon oxide sequestration credit (Form 8933).
- Qualified plug-in electric drive motor vehicle credit (Form 8936).
- Qualified plug-in electric vehicle credit (carryforward only).
- Credit for small employer health insurance premiums (Form 8941).
- Employee retention credit (Form 5884-A).
- Employer credit for paid family and medical leave (Form 8994).
- General credits from an electing large partnership (Schedule K-1 (Form 1065-B))

CALIFORNIA DIFFERENCES

The general business credits discussed in this chapter do not apply to California. See chapter 9.50 for a discussion of California Credits.

NOTES

CHILD & DEPENDENT CARE

- **Maximum Expense Limit** - $3,000 for one and $6,000 for two or more qualifiers.
- **Earned Income Limit –** Expenses limited to earned income.
- **Disabled or Full Time Student Monthly Imputed Income -** $250 for one; $500 for two or more qualifiers.
- **AGI Limitation –** 35% to 20% credit (see table)
- **AGI over $43,000 –** credit percentage equals 20%
- **Employer dependent care plans –** reduces qualified expenses
- **Married taxpayers must file jointly**
- **Qualifier**
  - Child under 13 (i.e., take credit for expenses up to date child turns 13);
  - A spouse or person - physically or mentally disabled lived with the taxpayer more than half the year (see details for more qualification rules);
- **Non-refundable, No carryover**
- **School Expenses** – under kindergarten
- **Day camps** – generally ok
- **Absences or part time employment** – prorate expenses.

RAPID FINDER

Related IRC and IRS Publications and Forms

- **Pub 503** – Child and Dependent Care Expenses
- **Form 2441** - Child and Dependent Care Expenses
- **Form W-10** – Dependent Care Provider's ID and Certification
- **IRC Sec 21** - Expenses for Household and Dependent Care Services Necessary for Gainful Employment
- **IRC Sec 129 –** Dependent Care Assistance Programs

A nonrefundable tax credit is available to some taxpayers for the expenses they incur for the care of a child, spouse, or other dependent while the taxpayer is gainfully employed (or is job seeking). In addition, employer dependent care assistance programs allow employees to exclude from income certain payments expended for child and dependent care. Tax return reporting is done on Form 2441, Child and Dependent Care Expenses.

EARNED INCOME LIMIT – The expenses allowable in computing the credit are limited to earned income. Generally, only taxable compensation is included in earned income. A taxpayer can elect to include nontaxable combat pay in earned income for dependent care credit purposes even if he chooses not to include it in earned income for purposes of the earned income credit or the exclusion for dependent care benefits. For taxpayers who file joint returns, the expense is limited to the EARNED INCOME of the lower paid spouse. Self-employed taxpayers use NET EARNINGS on Schedule C as earned income, even if the net is less than $400. Self-employed individuals who choose the optional method to figure self-employment tax may use the imputed income figured for the optional method as the amount of earned income.

Split Schedule C Strategy - When both spouses in a married couple are involved in the operation of an unincorporated business, it is fairly common – but incorrect – for all of that business's income to be reported on one spouse's Schedule C. In this case, the spouse not filing a Schedule C loses out on the chance to accumulate his or her own eligibility for Social Security benefits. In addition, to claim a child care credit, both spouses on a joint return must have earned income (or imputed income if one of the spouses is a full-time student or is disabled), so unless the non-Schedule C spouse has another source of earned income, the couple will not be allowed a child care credit.

There are ways to remedy this situation, however. One option is to file a partnership return for the activity, with each spouse receiving a K-1 for his or her share of the net profit. An approach that is probably less complicated is a qualified joint-venture election in which each spouse elects to file a separate Schedule C for his or her respective share of the business, giving them both self-employed income for the purposes of the self-employment tax and for claiming the child care credit.

A qualified joint venture refers to any joint venture involving the conduct of a trade or business if:

(1) The only members of the joint venture are husband and wife,
(2) Both spouses materially participate in the trade or business, and
(3) Both spouses elect to apply this rule.

Generally, to meet the material participation requirement, each spouse will have to participate in the activity for 500 hours or more during the tax year (Code Section 761(f)(2)(B)).

OBSERVATION: If the net income from the business exceeds the annual cap on income subject to the Social Security tax, the combined self-employment tax for the spouses with split Schedule Cs will exceed what a single spouse would have paid if he or she had filed a single Schedule C. In addition, when filing split Schedule Cs, be aware of the different allocation of income for purposes of retirement plans and the opportunity for both spouses to participate in IRAs and SE Retirement Plans.

THE COMPUTATION AND CREDIT LIMITS - The maximum expense limit is:

For one qualified person	$3,000
For two OR MORE qualified people	$6,000

- ***Limitation May Be in Unequal Proportions*** - The total amount of employment-related expenses that do not exceed the annual dollar limitation may be taken into account although the amount of employment-related expenses attributable to one qualifying individual exceeds 50 percent of the limitation. For example, a taxpayer with expenses of $4,000 for one qualifying individual and $1,500 for a second qualifying individual may take into account the full $5,500. *(Reg. 1.21-2(a)(3), IRS 2018 Form 2441, Instructions Page 3)*

  What comes as a surprise to many is that when there are 2 or more qualifying children, the $6,000 cap will apply to the expenses of all the qualifying children as a whole even if the expenses exceed $3,000 for any one of them.

  If you have been unaware of the application of the $6,000 expense limit in the past, as many are, and arbitrarily only entered expenses up to $3,000 for any one child or failed to enter a qualifying child simply because that child did not have any care expenses, you may have incorrectly limited your client's child care credit. If so, you may wish to review your returns that included child care credits to see if amended tax returns are in order.
- **Limit reduced by employer-provided dependent care assistance plans** - The limit must be reduced by the amount a taxpayer excludes from gross income under an employer-provided dependent care assistance plan (see more on this later in the chapter).
- **Tax year of credit -** Regardless of the taxpayer's method of accounting, the credit is allowable only in the tax year the services are provided or the tax year the expenses are paid, whichever is later.

AGI Adjusted Applicable Percentage

AGI Over	But Not Over	Applicable Percent	AGI Over	But Not Over	Applicable Percent
0	15,000	35	29,000	31,000	27
15,000	17,000	34	31,000	33,000	26
17,000	19,000	33	33,000	35,000	25
19,000	21,000	32	35,000	37,000	24
21,000	23,000	31	37,000	39,000	23
23,000	25,000	30	39,000	41,000	22
25,000	27,000	29	41,000	43,000	21
27,000	29,000	28	43,000	No Limit	20

REQUIREMENTS FOR THE CREDIT

- **Principal Place of Abode** - A qualifying individual must have the same principal place of abode as the taxpayer for more than half of the tax year.
- **Qualifying Individual** - A "qualifying individual" can be any of the following:
  1. A qualifying child who is the taxpayer's ***dependent and who is under age 13*** when care is provided;
  2. The taxpayer's spouse who was physically or mentally not able to care for himself or herself and lived with the taxpayer for more than half the year;
  3. A person who was physically or mentally not able to care for himself or herself, lived with the taxpayer for more than half the year, and either:
     a. Was the taxpayer's dependent, or
     b. Would have been the taxpayer's dependent except that:
        i. He or she received gross income of $4,200 (2019) or more,
        ii. He or she filed a joint return, or
        iii. The taxpayer, or the taxpayer's spouse if filing jointly, could be claimed as a dependent on someone else's return.
  4. The qualifying individual's name and social security number are required to be shown on Form 2441.
- **Special rule for children of separated or divorced parents** - In the case of a child of divorced or separated parents, only the custodial parent may claim the credit, even if the non-custodial parent may claim

the dependency for that child under Code Sec. 152(e). This is the case even if the custodial parent has waived the child's dependency to the non-custodial parent. Even if the child resides with the non-custodial parent for part of the year, the non-custodial parent is not eligible for any child care credit. Regulations define a custodial parent as the parent with whom a child shares the same principal place of abode for the greater portion of the calendar year. *(Reg. Sec. 1.21-1(b)(5)(ii))*

- **Definition of marital status -** The credit is not allowed for taxpayers who are married unless they file a joint return. Taxpayers who are separated under a decree of divorce or separate maintenance are not married for purposes of the child care credit.

QUALIFYING EXPENSES

Expenses are employment-related only if they are incurred to enable the taxpayer to be gainfully employed, or actively searching for gainful employment, and the expenses are for household services or for the care of a qualifying individual.

- **School Expenses** – Only school expenses for a child **below the level of kindergarten** are for the care of a qualifying individual, and may be employment-related.
- **Day Camp** - Expenses for day camp may be for the care of a qualifying individual, even if the camp specializes in a particular activity. Additionally, the cost of transportation provided by a dependent care provider may be an employment-related expense.
- **Part-Time Employment** - Taxpayers who work part-time must allocate expenses between days worked and days not worked. However, if a taxpayer who works part-time is required to pay for dependent care on a periodic basis that includes days worked and days not worked, the taxpayer is not required to allocate the expenses.
- **Payments to related individuals** - *A* credit is not allowed for any amount paid by the taxpayer to the taxpayer's spouse or the parent of the taxpayer's child who is a qualifying individual.
- **Agency and Application Fees** - The regulations clarify that indirect expenses such as application and agency fees may be employment-related expenses if the taxpayer is required to pay the expenses to obtain the care. Forfeited deposits do not qualify. *(Reg. Sec. 1.21-1(d)(11))*

SPECIAL SITUATIONS

- **Summer School, Tutoring, Day Camp**
    - Costs of summer school and tutoring programs are not qualifying employment-related expenses because they are educational in nature.
    - The rule that a dependent care center must comply with applicable state and local laws also applies to a day camp where more than six persons are cared for in return for a fee.
    - A day camp or similar program may constitute a qualifying employment-related expense, even though the camp specializes in a particular activity, such as soccer or computers.
        - The full amount paid for an education day camp that focuses on reading, math, writing, and study skills may be a qualifying expense.
        - No portion of the cost of an overnight camp is an employment-related expense.
- **Care Centers for Sick Children –** The IRS declined, in final regulations, to specify that payments to sick care centers were a qualifying expense. Instead, the matter is to be determined on a case by case basis as whether the expenses would be employment qualifying or a medical expense.
- **Absence from Work -** Generally, a taxpayer must allocate the cost of care on a daily basis if expenses are paid during a period in which a taxpayer is not employed or in active search of employment, but there is an exception for short, temporary absences. The final regulations eliminate the requirement that the temporary absence exception only applies to taxpayers who pay for care on a weekly, monthly, or annual basis.
    - Only those costs that a taxpayer is required to pay during the absence (e.g., while ill or on vacation) qualify for the exception.
    - A safe harbor for a short temporary absence is an absence of no more than two consecutive calendar weeks.
    - Cost of care while a taxpayer is on short- or long-term disability leave under the Family Medical Leave Act, paid medical leave, or paid maternity leave are not employment-related expenses.
- **Shift Workers** - Costs of overnight care and day care for parents who work at night and sleep during the day may be qualifying expenses.
- **Kindergarten Expenses -** Kindergarten is considered a non-qualifying educational cost regardless of whether a child attends part-time or full-time. Similarly, qualifying expenses do not include the cost of sending a child to a private school even though the taxpayer lives overseas in a place where public education is unavailable.

- **Live-In Caregivers –** The increase in the cost of utilities attributable to providing room and board to a caregiver may constitute a qualifying expense.
- **Care Outside the Home** - Costs for care outside the taxpayer's household of a qualifying individual who is a dependent or spouse incapable of self-care who regularly spends at least eight hours each day in the taxpayer's household may qualify for the credit.

DISABLED OR FULL-TIME STUDENT SPOUSE

The expenses allowable in computing the credit are limited to earned income of the lower paid spouse. For a disabled or full-time student spouse there is a special "imputed earned income" allowances of $250 per month. Thus, if the spouse qualified for the full 12 months of the year the earned income limit would be $3,000 (12 x $250) months if care is needed for 1 qualifying person and $6,000 (12 x $500) for the care if 2 or more qualifying persons. Any part of a month is treated as a whole month.

Example: *Joyce is a full-time student for 10 months of the year and in order for her to attend college she incurs child care expenses of $5,000 for the care of her dependent daughter. Her husband works full time and has earned income of $60,000. Joyce's dependent care credit is based upon the income of the lower earning spouse and since Joyce does not work and is a full-time student, she must use the imputed income of $250 per month for 10 months or $2,500. Her child care expenses were $5,000 but they are limited to $3,000 for one child. However, in her case the credit is based upon the lesser of the earned income (or imputed income) or the care expenses, which for one child are limited to $3,000. Since the imputed income of $2,500 is less than the $3,000 expense maximum, Joyce's dependent care credit is $500 ($2,500 x .2). The .2 was determine from the table on page 9.01.02 based on the couple's AGI.*

Both Spouses Disabled or a Full-time Student - If both spouses were full-time students or disabled (and not working) in any given month, then only one can be considered to have the imputed income for that month. A part of a month is treated as a whole month.

IMPUTED INCOME FOR DISABLED OR FULL-TIME STUDENT SPOUSE		
Qualifying Persons	One	Two
Imputed Income	$250	$500

Students at On-Line Institutions – In the case of a married taxpayer student the cost of child care while studying on-line at home is NOT a qualified expense for purposes of the deemed income rule. The statute requires that the educational organization have students in attendance at the place where its educational activities are regularly carried on. However, an individual who takes online courses at a school that has traditional classroom instruction as well as on-line course may be a student for purposes of the deemed earned income rule.

CAUTION - FOR CARE IN THE TAXPAYER'S HOME

The "sitter" is considered the taxpayer's EMPLOYEE. The taxpayer may need to pay FICA and file payroll returns; it's possible the IRS will check on this if auditing the credit. Of course, the payroll taxes paid by the taxpayer would qualify as child care expenses if the compensation paid to the provider is a qualified expense.

PROVIDER INFORMATION

Taxpayers claiming this credit must provide the name, address, and identification number of the child or dependent care provider unless the provider is a tax-exempt organization (e.g., a church). If the latter, the notation "tax-exempt" is made on the return instead of the ID number. The IRS may deny the credit when this information is not included on a return. ***Failure of a child or dependent care provider to furnish an ID number to a taxpayer without reasonable cause is subject to a $50 penalty. (Code Section 6109(a))***

Failure to provide the required information on a return can be excused if the taxpayer showed "due diligence." Due diligence is shown by keeping on file a copy of a provider's social security card, driver's license, provider's letterhead or invoice, IRS Form W-10 (Dependent Care Provider's Identification and Certification), Form W-4 (if provider is a household employee), or a statement of employer's dependent care assistance program.

DEPENDENT CARE BENEFITS

Employer Programs - Dependent care assistance programs are those that employers establish by a written plan to provide dependent care assistance for the exclusive benefit of employees. The payments received under the plan and used by employees to pay dependent care expenses are excludable from employees' income up to the lower of:

1. The employee's earned income (for married employees, this is the earned income of the lower paid spouse), or
2. $5,000 ($2,500 for married separate).

Dependent care assistance which exceeds the limits must be included in an employee's income in the year the dependent care is provided even though it is not paid to the employee until later.

Other Rules:

1. Compute the earned income limitation of a spouse who is incapacitated or a full-time student in the same manner as is done under the child care credit rules.
2. When dependent care is provided in-kind on the employer's premises at a facility maintained by the employer, employees using the facility exclude from income the value of the services provided.
3. There is no dependent care assistance exclusion where the care provider is the employee's dependent and/or child under age 19.

Who Is An Employee - For purposes of the exclusion, the term employee includes self-employed individuals (as defined in Code Section 401(c)(1)).

Self-employed individuals as "employees" eligible for the dependent care assistance exclusion - An "employee," for purposes of the dependent care assistance exclusion, includes a self-employed individual who can be covered under a self-employed retirement plan under Code Sec. 401(c)(1).

An advantage of a self-employed individual receiving dependent care assistance as a participant in a dependent care assistance program is that he would be able to deduct the cost of providing this benefit as a business expense. Also, if a self-employed individual provides dependent care facilities under a dependent care assistance program, he would be able to participate without disqualifying the program.

<u>However, if the self-employed individual participates in a dependent care assistance program, he will be taken into account in applying the nondiscrimination tests</u>.

Other Plan Requirements - A dependent care assistance plan must meet various requirements to be effective:

1. No more than 25% of the assistance the plan provides during the year may be paid on behalf of owners (including spouses and dependents) of more than 5% interest in the employer's business;
2. Employers must inform eligible employees about the availability of the plan;
3. Employees must receive a written statement of benefits they received during the year – usually provided on Form W-2;
4. The program cannot discriminate in favor of "highly-compensated" employees or their dependents.

W-2 Reporting of Dependent Care Exclusion Amounts - Form W-2, Box 10 shows the amount of dependent care benefits paid by the employer. The amount should not be included in Box 1 (Wages).

Example of Child Care Credit Computation - *Wage earners Dave and Danielle Drake filed a joint return. Their son, Derrick, and daughter, Darlene, lived with them all year and were their dependents. The children were ages 4 and 11, respectively. Mrs. Drake, an avid jogger, was injured during her morning run in mid-year; she required constant nursing care during July and August because of her injury. She was absent from her employment for that entire period. Other facts are:*

Dave's wages		*$26,200*
Danielle's wages		*3,900*
Dependent care assistance (Dave's employer)		*400*
The Drakes' AGI		*32,200*
Paid:	*Dropout Day Nursery (Derrick)*	*1,170*
	Dellie Duforth, part-time housekeeper (Oct.-Dec.)	*600*
	Donna Drew (Danielle's nurse)	*1,400*

Computation of the Drake's Childcare Credit*:*

1.	*Total dependent care benefits received*		*$ 400*	
2.	*Qualified expenses ($1,170 + $600 + $1,400)*		*3,170*	
3.	*Dave's earnings*	*26,200*		
4.	*Danielle's earnings ($3,900 +($500 x 2 months incapacitated))*	*4,900*		
5.	*Lesser of LN3 or LN4*		*4,900*	
6.	*Excluded benefit – Lesser of LN5 or LN1*		*400*	
7.	*Qualified expenses – LN2 less LN1*		*2,770*	
8.	*Limitation (2 or more people qualifying for care)*	*6,000*		
9.	*Excluded benefits from LN1*	*400*		
10.	*Subtract LN9 from LN8*		*5,600*	
11.	*Smallest of LN3, LN4, LN7 or LN10*		*2,770*	
12.	*Child Care Credit (LN11 x applicable % (26%))*			*$720*

SIMPLIFIED MEAL DEDUCTION FOR FAMILY DAY CARE PROVIDERS

Taxpayers that are in the business of providing family day care may deduct the ordinary and necessary expenses of their business, including the cost of providing meals and snacks to children in their care. (Code Sec. 162)

Because family day care providers often buy food for their own families and for their family day care business, they may have difficulty substantiating the family day care portion of their food costs. It's also burdensome for these taxpayers to keep receipts for all food bought during the year for both family day care and their own family's personal use.

Simplified Meal Deduction – Family Care Providers

Year	States	Breakfast	Lunch	Dinner	Snack
2016	Contiguous States	$1.32	$2.48	$2.48	$0.74
	Alaska	$2.11	$4.02	$4.02	$1.20
	Hawaii	$1.54	$2.90	$2.90	$0.86
2017	Contiguous States	$1.31	$2.46	$2.46	$0.73
	Alaska	$2.09	$3.99	$3.99	$1.19
	Hawaii	$1.53	$2.88	$2.88	$0.86
2018	Contiguous States	$1.31	$2.46	$2.46	$0.73
	Alaska	$2.09	$3.99	$3.99	$1.19
	Hawaii	$1.52	$2.88	$2.88	$0.85
2019	Contiguous States	$1.31	$2.46	$2.46	$0.73
	Alaska	$2.09	$3.99	$3.99	$1.19
	Hawaii	$1.53	$2.88	$2.88	$0.86
2020	Contiguous States	$1.33	$2.49	$2.49	$0.74
	Alaska	$2.12	$4.04	$4.04	$1.20
	Hawaii	$1.54	$2.92	$2.92	$0.87

If an amount not shown it was not available at publication date

To minimize disputes with family care providers about the amount of their meal deduction and the quality of their substantiation, IRS will allow them to use standard meal and snack rates to compute the deductible cost of food instead of deducting actual costs. Recordkeeping also is simplified if standard rates are used. (Rev Proc 2003-22)

The simplified deduction for each meal and snack bought and served to an eligible child during day care is equal to the US Department of Agriculture's Tier I Child and Adult Food Care Program (CAFCP) reimbursement rates for meals and snacks served in day care homes. The rates for each tax year are those Tier I rates in effect on the preceding Dec. 31.

The rates do not include the cost of nonfood supplies (e.g., utensils), which may be deducted separately. The number of meals per day per child is limited to a maximum of:

	Rate	2019 Max (contiguous states)
• One breakfast,	$1.31	$1.31
• One lunch,	$2.46	$2.46
• One dinner, and	$2.46	$2.46
• Three snacks	$0.73	$2.19
2019 Daily Max per qualified child		**$8.42**

If the provider receives some form of reimbursement or subsidy, they deduct only the part of the simplified rate that exceeds the reimbursed amount.

The rates may be used only by taxpayers (whether or not licensed, registered, or otherwise regulated) providing care in their homes to unemancipated children, and only with respect to children they are paid to care for and who don't reside in the home. (Rev Proc 2003-22, Sec. 3; Rev Proc 2003-22, Sec. 4)

Consistent Treatment - Family day care providers that use the simplified rates must use them to deduct meals and snacks for the entire tax year, but they can switch to deducting actual substantiated amounts in another tax year. *(Rev Proc 2003-22, Sec. 5.02)*

Substantiation - Family day care providers using the standard rates must keep records substantiating their computation of the total deductible amount. The records should include the name of each eligible child, dates and hours of attendance in the family day care and the type and quantity of meals and snacks served. Appendix to Rev Proc 2003-22 includes a suggested record Log. Users of this log will be treated as having met the substantiation requirements. (Rev Proc 2003-22, Sec. 5.03)

CALIFORNIA DIFFERENCES

The California child and dependent care credit is non-refundable based on the Federal credit. The credit is phased out for higher income taxpayers: The credit isn't available for taxpayers with Federal AGI over $100,000. Only care provided in California qualifies. The California credit may apply even if no federal credit is claimed, such as when federal tax liability is zero. The credit, calculated on FTB Form 3506, is based on a credit figured using the federal rules multiplied times the following factor:

If Federal AGI is:	Percent of Federal Credit:
$40,000 or less	50%
Over $40,000 but Not over $70,000	43%
Over $70,000 but Not over $100,000	34%
Over $100,000	0%

California allows a custodial parent who never married the child's other parent, and who doesn't qualify to claim the child as a dependent, to qualify for the child care credit. For purposes of the earned income limit when figuring this credit, "earned income" is limited to earned income (as defined under the federal credit provision) that is subject to California personal income taxation and includes compensation, other than pensions or retirement pay, received by a member of the armed forces for active services as a member of the armed forces, whether or not the member is domiciled in California.

Substantiation Requirements – Taxpayers must retain adequate records to prove entitlement to claim the credit, including documents that establish (1) the identity and age of the qualifying child/dependent, (2) the identity and taxpayer identification number of the care provider, and (3) the physical location of where the care was provided. If applicable, medical records that demonstrate the physical or mental incapacity of the qualifying child/dependent must be retained. The taxpayer must also retain proof of payment for the child/dependent care expenses. These substantiation requirements apply to tax years beginning on or after January 1, 2013.

DOCUMENTS THAT ESTABLISH IDENTITY
- U.S. Passport or Card
- U.S Driver's License
- Green Card
- Form I-551
- Foreign Passport w/I-551 Stamp
- Temp I-551 notation on Mach Readable Visa
- Form I-766*
- U.S. State Issued ID*
- School ID*
- Native American Tribal Document

DOCUMENTS THAT ESTABLISH TAXPAYER ID
- Social Security Card
- ITIN Card

DOCUMENTS THAT ESTABLISH PHYSICAL LOCATION
- California Driver's Lic.
- California ID
- Utility Bill

NOTES

CHILD & DEPENDENT TAX CREDIT

- **Maximum Credit** - $2,000 (2018 – 2025) per child
- **Qualifying Child**
  - Under age 17 at end of year
  - Meets relationship test
  - Is not self-supporting
  - Lived with taxpayer over ½ of the year
  - Claimed as the taxpayer's dependent
  - Has SSN before return due date
- **Dependent Credit (2018-2025)**
  - $500 per dependent not a qualifying child
  - Not for filer or spouse
  - Nonrefundable
  - SSN or ITIN acceptable
- **Phase-Out Thresholds (2018 – 2025) are:**
  - $400,000 for taxpayer filing married joint;
  - $200,000 for all others.
  - Not inflation-indexed.
- **Generally nonrefundable except for:**
  - Add'l child credit computation based on excess earned income
    - Excess Threshold: $$2,500
    - Excess EI %: 15%
  - Additional credit computation - 3 or more qualifying children
  - Maximum refundable: $1,400 per child
- **Offsets AMT** – The nonrefundable portion of the credit offsets AMT

TCJA CHANGES	See Page
Maximum Credit Increased	9.02.01
Higher Phase-out Thresholds	9.02.03
New Dependent Credit	9.02.02
SSN Requirement for Child	9.02.02
Lower Earned Income Threshold	9.02.03

The child tax credit (CTC) is made up of two credits, either or both of which may be claimed by a qualifying taxpayer. The two components include nonrefundable and refundable portions.

- The child tax credit (nonrefundable)
- The child tax credit – refundable portion computed using either:
  (1) A method based on earned income, or
  (2) The additional child credit for taxpayers with 3 or more children (Form 8812).

A new nonrefundable credit of $500 per dependent not qualifying for the child tax credit is available for years 2018 through 2025.

MAXIMUM CHILD TAX CREDIT

The maximum CTC amount per qualifying child in years 2018 through 2025 is **$2,000** (an increase from the pre-2018 maximum of $1,000). (IRC Sec 24(h)(2)) Up to $1,400 is refundable, and the $1,400 amount is subject to inflation-adjustment after 2018 but was unchanged for 2019. (IRC Sec 24(h)(5)) This higher CTC amount is designed by Congress to assist families that lost the suspended (repealed) exemption allowance for qualifying children as part of the TCJA changes.

QUALIFYING CHILD - A qualifying child for purposes of the child tax credit is a child who:

(1) Is the taxpayer's son, daughter, stepchild, foster child, brother, sister, stepbrother, stepsister, or a descendant of any of them (for example, a grandchild),
(2) Was under age 17 at the end of the tax year,
(3) Did not provide over half of his or her own support for the tax year,
(4) Lived with the taxpayer for more than half of the tax year,
(5) Was a U.S. citizen, a U.S. national, or a resident of the United States,
(6) Was claimed as the taxpayer's dependent, and

TCJA (7) After 2017, has a Social Security number.

Adopted child **-** An adopted child is always treated as the taxpayer's own child. An adopted child includes a child lawfully placed with the taxpayer for legal adoption. If the taxpayer is a U.S. citizen or U.S. national and the adopted child lived with the taxpayer all year as a member of the taxpayer's household during the tax year, that child meets condition (5) above to be a qualifying child for the child tax credit.

Exceptions to "time lived with the taxpayer" condition **-** A child is considered to have lived with the taxpayer for all of the tax year if the child was born or died during the year and the taxpayer's home was this child's home for the entire time he or she was alive. Temporary absences for special circumstances, such as for school, vacation, medical care, military service, or business, also count as time lived with the taxpayer. There are also special rules for kidnapped and missing children.

Identification requirement **-** In order to claim the child tax credit, the taxpayer must include the qualifying child's name and, beginning with tax year 2018, the child's Social Security number on the tax return. The SSN must have been issued by the Social Security Administration prior to the return's due date. (IRC Sec 24(h)(7)) The SSN requirement applies only to the child; a taxpayer with an ITIN can qualify for the credit as long as the qualifying child has a SSN.

Birthdate on January 1 - For this credit, a child attains a given age on the anniversary of the date that the child was born ***(Rev. Rul. 2003-72)***. For example, a child born on January 1, 2002 attains age 17 on January 1, 2019 and would be a qualifying child for the child tax credit for 2018 but not for 2019.

Kidnapped child - If a taxpayer's child is presumed by law enforcement authorities to have been kidnapped by someone other than a family member, the taxpayer, if otherwise qualified can take the child into account in determining the taxpayer's eligibility for head of household or qualifying widow(er) filing status, the pre-2018 deduction for dependents, child tax credit, and the earned income credit (EIC).

Children of divorced or separated parents – Only one parent can claim the child tax credit with respect to a qualifying child, and that would be the parent who claims the child as a dependent. Most often this is the custodial parent unless the custodial parent has waived the dependency to the noncustodial parent. See Chapter 1.01 for the waiver rules.

Foreign Earned Income or Foreign Housing Costs Limitation - Effective for tax years beginning after December 31, 2014, a taxpayer who elects to exclude from gross income any amount of foreign earned income or foreign housing costs is prohibited for that year from claiming the refundable part of the child tax credit. (Trade Preferences Extension Act; IRC Sec 24(d)(5))

DEPENDENT CREDIT - NEW (IRC Sec 24(h)(4))

TCJA In conjunction with the increased CTC, for years 2018 through 2025 Congress added a new nonrefundable credit of $500 for each dependent who is not a qualifying child for the CTC. A dependent child who does not have an SSN, and therefore doesn't qualify for the CTC, but who has an IRS individual taxpayer identification number (ITIN) or IRS-issued ATIN (Adoption Taxpayer Identification Number) will be eligible for the nonrefundable $500 credit. This credit will also be available for a dependent child who reaches age 17 before the end of the tax year, as well as non-child dependents such as a parent.

Early versions of the proposal that eventually became the TCJA identified the $500 credit as a "family credit" and would have allowed it for the taxpayer and spouse, as well as other dependents, but the final bill did not include the taxpayer and spouse as qualifying for the credit.

PHASE OUT

The credit phases out for taxpayers with "modified adjusted gross income" above certain non-indexed thresholds, and applies to the child tax credit and the new dependent credit. The TCJA significantly increased the threshold amounts, which are not inflation-indexed and are shown below (IRC Sec 24(h)(3)):

Child & Dependent Tax Credits Phaseout Thresholds

Filing Status	Pre-TCJA Threshold	Threshold 2018 - 2025
Married joint	$110,000	$400,000
Married separate	$55,000	$200,000
All others	$75,000	$200,000

Phase-out computation: The credit is reduced by $50 for each $1,000 (or fraction of $1,000) of modified AGI over the thresholds.

*Modified AGI***:** "Modified AGI" is AGI increased by amounts excluded from gross income under Code Sections 911, 931, or 933 (the foreign exclusions).

Example – Phase Out of Regular Child Tax Credit - *Don and Mallory, a married couple, have an AGI of $402,001. They had no foreign income exclusions. They have one child eligible for the child credit.*

Modified AGI	*$402,001*
Threshold, Married Joint Taxpayers	*400,000*
Net Difference	*$ 2,001*
Divide Net Difference by $1,000 (Round up to next whole number)	*3 (A)*
Maximum credit per child	*$ 2,000 (B)*
Multiply (A) by $50	*$ 150 (C)*
Subtract (C) from (B)	*$ 1,850*

Don and Mallory get a maximum $1,850 child tax credit. Notice that modified AGI just $1 above an even $1,000 mark caused this couple to pay $50 additional tax.

CREDIT LIMITED TO TAX LIABILITY

In addition to being limited due to the AGI phase out, the child tax credit is also limited for most taxpayers by the taxpayer's total tax liability (both regular and AMT). However, when the credit is limited by the amount of tax liability, a portion of the credit may be refundable for certain taxpayers (see below). The child tax credit can be used to offset AMT.

REFUNDABLE CHILD TAX CREDIT

A taxpayer, who is unable to claim the full amount of the child tax credit because income tax liability is less than the credit amount, is allowed to take up to $1,400 of the tax credit as a refundable credit, referred to as the additional child tax credit. Form 8812 is used to claim the refundable child tax credit. The combined nonrefundable and refundable credits can't exceed the credit as computed after taking into account the adjustment for the modified AGI limitation. The $1,400 amount will be inflation-indexed in $100 increments after 2018. The amount remains $1,400 for 2019. (IRC Sec. 24(h)(5))

The amount of the refundable credit is based on an earned income computation. Taxpayers with 3 or more qualifying children also take into consideration the amount of Social Security and Medicare taxes they paid. Further, the additional child tax credit for these taxpayers will be limited by any earned income credit claimed by the taxpayer.

Combat Pay - Excluded combat zone pay of military taxpayers is treated as earned income for this computation.

Taxpayers with 1 or 2 Qualifying Children – The refundable child tax credit is the lesser of the balance of the child credit the taxpayer is otherwise entitled to or a percentage of taxable earned income (defined the same as for the earned income credit) in excess of a threshold amount. (IRC Sec 24(h)(6))

- The threshold amount is: **$2,500** ($3,000 before 2018)
- The percentage amount is: **15%**

Example – Refundable Child Credit – *Bob and Sara Scott file a married joint return for 2019 and claim their 9-year-old son as a dependent. The Scotts' AGI of $30,000 consists solely of Bob's wages (no modifications). Their income tax is $560 and child credit is $2,000. The first $560 of the credit is used to offset the tax to zero. The balance, $1,440 is greater than the maximum allowed of $1,400, so their refundable credit is limited to $1,400; it is less than the result using the earned income formula ((30,000 – 2,500) x 15% = $4,125).*

If, instead of $30,000 of wages, the Scotts' only income had been $30,000 of interest from investments, none of the child credit would be refundable. It would be limited to $560, the amount of their tax.

Worksheet – Child Credit – 2019
Refundable Computation if 1 or 2 Qualifying Children

1. Number of qualifying children…………………..…….. _________
2. Maximum credit per child …………………………..…. ____2,000
3. Total child credit (Line 1 times Line 2)*……………..……………… _________
4. Nonrefundable child credit claimed……………………………………… _________
5. Portion of credit available to be refunded (Line 3 less Line 4) _________
6. Enter taxpayer(s) earned income……………………………….……… _________
7. Taxpayer(s) earned income threshold ………..……………………. ____2,500
8. Subtract line 7 from line 6 (not less than zero)…………………... _________
9. Applicable percentage ……………..………….…... _____0.15
10. Limitation (Line 8 times Line 9)…………………..…. _________
11. **Refundable child credit** (smaller of Line 5 or Line 10)…..... _________

**But enter no more than the maximum credit available after adjusting for modified AGI phase out.*

Taxpayers with 3 or More Qualifying Children – The refundable child credit for a taxpayer with 3 or more qualifying children is limited to: the lesser of (a) the balance of the child credit the taxpayer is unable to claim as a nonrefundable credit or (b) the greater of:

- The earned income computation as explained above for taxpayers with fewer than 3 qualifying children, or
- The excess of the taxpayer's Social Security and Medicare taxes (including an amount equal to the above-the-line deduction of self-employment tax paid) over any earned income credit allowed.

> ***Example (6.2% FICA Rate)– Refundable Child Credit, 3 or More Children:*** *Rita has 3 qualifying children, wages of $50,020, $200 of interest income, and a total tax liability of $3,547. She was not eligible for any earned income credit. Rita paid $3,827 of Social Security and Medicare taxes. Her child credit based on 3 children x $2,000 would be $6,000 (no phase out for modified AGI required), but the nonrefundable credit is limited to her tax liability of $3,547. Rita can claim an additional, refundable, child credit of $2,453. It is the lesser of the credit she wasn't otherwise able to claim ($6,000 - $3,547 = $2,453) or the greater of her Social Security/Medicare taxes over EIC ($3,827 – $0 = $3,827) or her earned income in excess of $2,500 times 15% ($50,020 - $2,500 = $47,520 x 15% = $7,128). The $2,453 is also less than the refundable maximum of $1,400 per child (3 x $1,400 = $4,200).*

CHILD CREDIT AND THE FOREIGN TAX CREDIT LIMITATION

When computing the foreign tax credit limitation, the child credit is treated as not reducing the taxpayer's tax liability for purposes of computing the limitation.

INTEGRITY PROVISIONS

The PATH Act of 2015 added program integrity provisions, which in the case of the child tax credit prohibits an individual from retroactively claiming the child credit by amending a return, or filing an original return if he failed to file, for any prior year in which the individual or a child for whom the credit is claimed did not have a taxpayer identification number (PATH Act Sec 205).

DUE DILIGENCE REQUIREMENTS

Beginning with 2016 tax returns, the PATH Act of 2015 (Act Sec 207) adds the child tax credit in the paid preparer due diligence requirements that apply to the EITC, including the $500 due diligence penalty (indexed for inflation to $530 for 2019*). Form 8867 provides a 2-page due diligence checklist for EITC, AOTC and Child Tax Credit and the head of household filing status and must be completed by the paid preparer if the taxpayer claims any one of the credits or the taxpayer files as head of household. Form 8867 must be filed with the taxpayer's return. Of importance here is understanding that the $530 penalty applies to each credit and the H of H status, so if the taxpayer claims all three credits and H of H and the preparer has not met the due diligence requirements, the preparer's 2019* penalty could be as high as $2,120. *Returns filed in 2019 or 2020

Specific questions on Form 8867 relating to the child, additional child, and other dependent credit that the preparer needs to answer are whether the preparer:

a. Determined that each qualifying person for these credits is the taxpayer's dependent who is a citizen, national or resident of the U.S. (yes or no)

b. Explained to the taxpayer that the credit may not be claimed if the taxpayer didn't live with the child for over half the year, even if the taxpayer supported the child, unless the custodial parent released their claim to the child's exemption. (yes, no or not applicable)

c. Explained to the taxpayer the rules about claiming the credit for a child of divorced or separated parents, or parents who live apart, including the requirements to attach Form 8332 or similar statement to the return. (yes, no or not applicable)

TAXPAYER DISALLOWANCE PERIODS

Beginning with 2016 tax returns, the PATH Act of 2015 (Act Sec 208; IRC Sec 24(g)) adds a provision that where a taxpayer improperly claims the child tax credit (fraudulently or recklessly), a disallowance period applies during which no child credit is allowed. Where the improper claim is due to:

- Fraud - the disallowance period is 10 years.
- Reckless or intentional disregard of rules and regulations (not fraud) - the disallowance period is 2 years.

As part of these rules, the definition of underpayment has been modified to create a negative tax for when the underpayment is caused by a refundable credit. (IRC Sec 6664(a)). Consequently an underpayment amount for purposes of the underpayment penalty calculation is created. In addition, the standard for the reasonableness exception to imposition of the underpayment penalty has been increased from "reasonable basis" to "reasonable cause." (IRC Sec 6676(a)).

RECERTIFICATION OF CREDIT

Also added by the PATH Act, and applicable to tax years beginning after 2015, is that no child credit is allowed for any tax year after any tax year a taxpayer is denied the child credit as a result of deficiency procedures of the Code, unless the taxpayer provides information that IRS may require to demonstrate eligibility for the credit. That is, a taxpayer who has been denied the child credit as a result of deficiency procedures is ineligible to claim the credit in later years, unless the taxpayer provides evidence of eligibility that meets evidence requirements established by the IRS.

CALIFORNIA DIFFERENCES

California Exemption Credit - California continues to allow exemption credits for filer, spouse and each dependent even though TCJA suspended the federal exemption deductions for 2018 through 2025 – see Chapter 1.03 for details.

New Law & Stuff

Young Child Tax Credit - AB 91 (signed by the governor 6/27/2019) adds new R&TC Sec 17052.1 that, effective for years beginning on or after January 1, 2019, allows a refundable "young child tax credit." The credit is per taxpayer, not per child, and is $1,176 times the EITC adjustment factor, which is 85% for 2019. However, the credit cannot be greater than $1,000 for any year. Thus, the maximum credit for 2019 is $1,000 ($1,176 x .85 = $999.60 = $1,000).

The credit phases out when the taxpayer's earned income exceeds a threshold amount of $25,000. The phaseout rate is $20 per $100 or fraction thereof that the taxpayer's earned income exceeds $25,000. Therefore, the credit is fully phased out once earned income reaches $30,000 ($30,000 – $25,000 = $5,000/$100 = 50 x $20 = $1,000). The threshold amount will be annually adjusted beginning in the year after the year the minimum wage is set at $15 per hour, which is scheduled to be 2022 unless the scheduled increases are suspended by the governor (Labor Code Sec 1182.12).

To be eligible for the young child tax credit, the taxpayer must also be eligible for the CA EITC, have at least one qualifying child as defined for the EITC, and the child must be younger than 6 years old at the end of the tax year.

NOTES

EARNED INCOME CREDIT

The EIC is a refundable credit allowed to certain low-income workers.

Overview

# of Qual. Children:	None	One	Two	Three
Max Credit (2019)	$529	$3,526	$5,828	$6,557
Totally Phased Out				
Joint (2019)	$21,370	$46,884	$52,493	$55,952
Others (2019)	$15,570	$41,094	$46,703	$50,162

Disqualifying Income (2019) - $3,600

The Details

Effect of Welfare Payments - The IRS has said that the credit has no effect on certain welfare benefits. The credit that a taxpayer receives isn't used to determine eligibility and amounts from such benefit programs as:

- Temporary assistance for needy families.
- Medicaid and supplemental security income (SSI).
- Food stamps and low-income housing.

EARNED INCOME REQUIREMENT

An "eligible individual" can get an EIC in an amount equal to the credit percentage (see below) of the part of the taxpayer's "earned income" for the tax year that isn't more than the specified earned income amount. Thus, a taxpayer who has no earned income can't get an EIC. However, the credit phases out for taxpayers whose adjusted gross income or "earned income" exceeds a phase-out limit. In addition, no credit is allowed if the taxpayer's "disqualified income" for the tax year exceeds a certain inflation-indexed dollar amount.

Year	Qualifying Children	Credit %	Earned Income	Maximum Credit
2017	None	7.65	6,670	510
	1	34.00	10,000	3,400
	2	40.00	14,040	5,616
	3	45.00	14,040	6,318
2018	None	7.65	6,780	519
	1	34.00	10,180	3,461
	2	40.00	14,290	5,716
	3	45.00	14,290	6,431
2019	None	7.65	6,920	529
	1	34.00	10,370	3,526
	2	40.00	14,570	5,828
	3	45.00	14,570	6,557
2020	None	7.65	7,030	538
	1	34.00	10,540	3,584
	2	40.00	14,800	5,920
	3	45.00	14,800	6,660

If amounts not shown they were not available at publication date.

RAPID FINDER

CREDIT RATES

The credit percentage, the earned income amount, and the maximum earned income credit depend on the number of "qualifying children" a taxpayer has (see table at left).

Rather than using formulas, the credit is actually determined under IRS tables that reflect the dollar amounts at which phase out begins and ends. The instructions to Form 1040 contain the tables and an earned income credit worksheet for determining the amounts to use with the tables. Alternatively, a taxpayer can have IRS figure the credit.

PHASE OUT OF THE CREDIT

The EIC can't exceed the excess (if any) of:

(a) The credit percentage times the earned income amount over

(b) The phase-out percentage times the amount by which the taxpayer's modified AGI (or, if greater, the taxpayer's earned income) exceeds the phase-out amount.

Phase-Out Percentage - The phase-out percentage, phase-out amount and completed phase-out level (level where the credit is totally phased out) depends on the number of "qualifying children" the taxpayer has. The amounts are shown in the adjacent table.

Credit Treated as Overpayment - If the amount allowable as an earned income credit exceeds the tax, the excess is considered an overpayment. Thus, a taxpayer eligible for the credit can get a refund that is actually more than the amount of tax withheld.

Year	Qualifying Children	Phase-out Percentage	Phase-out Threshold	Phase-out Complete
2017	None	7.65	13,930 – Joint 8,340 - Others	20,600 15,010
	1	15.98	23,930 – Joint 18,340 – Others	45,207 39,617
	2	21.06	23,930 – Joint 18,340 - Others	50,597 45,007
	3	21.06	23,930 – Joint 18,340 - Others	53,930 48,340
2018	None	7.65	14,170– Joint 8,490 - Others	20,950 15,270
	1	15.98	24,350– Joint 18,660 – Others	46,010 40,320
	2	21.06	24,350 – Joint 18,660 – Others	51,492 45,802
	3	21.06	24,350 – Joint 18,660 – Others	54,884 49,194
2019	None	7.65	14,450– Joint 8,650 - Others	21,370 15,570
	1	15.98	24,820– Joint 19,030 – Others	46,884 41,094
	2	21.06	24,820– Joint 19,030 – Others	52,493 46,703
	3	21.06	24,820– Joint 19,030 – Others	55,952 50,162
2020	None	7.65	14,680– Joint 8,790 - Others	21,713 15,832
	1	15.98	25,220– Joint 19,330 – Others	47,648 41,758
	2	21.06	25,220– Joint 19,330 – Others	53,330 47,440
	3	21.06	25,220– Joint 19,330 – Others	56,844 50,954

If amounts not shown they were not available at publication date.

Example – EIC Refundable - *Bill has no income tax liability but had $100 in Federal income tax withheld from wages. He qualifies for an earned income credit of $740. Bill's refund for the tax year is $840.*

CREDIT DISALLOWANCE - The credit is disallowed under certain circumstances:

Disqualifying Income: The credit isn't available to individuals when their "disqualified income" (i.e., investment income as defined below) is more than the amount in the adjacent table.

Year	2016	2017	2018	2019	2020
Disqualifying Income	3,400	3,450	3,500	3,600	3,650

If an amount is not shown it was not available at publication

Foreign Income Exclusion - If the taxpayer claims either the foreign earned income or foreign housing exclusion, they will not qualify for the earned income credit for the year.

Fraud or Reckless Disregard of Rules & Regulations - The credit is disallowed for 10 years for those who claimed it in an earlier year due to fraud or for 2 years due to reckless or intentional disregard of rules and regulations. These restrictions are in addition to any other penalty imposed, such as the accuracy-related penalty or the fraud penalty. In addition, no credit is allowed where the credit was denied in an earlier year because of IRS deficiency assessment procedures, unless the taxpayer is re-certified by IRS (see more below).

FEDERAL OFFSETS

The amount of any earned income credit otherwise refundable to a taxpayer may be reduced by that person's federal offsets. All or part of the overpayment shown on Form 1040 may be used (offset) to pay past-due federal offsets. Offsets for federal taxes are made by the IRS and all other offsets are made by the Treasury Department's Financial Management Service (FMS). The following are examples of offsets and the agencies that collect them:

- Back Taxes (IRS)
- Child Support (FMS)
- Spousal Support (FMS)
- Student Loans (FMS)

DEFINITIONS

Qualifying child – A qualifying child must be a qualifying child under the uniform definition of a child as it relates to the rules on personal exemptions, meaning the following tests must be met:

1. Relationship Test**:** The child must be the taxpayer's:
   - Son, daughter, stepson, or stepdaughter (or descendant of such individual);
   - Brother, sister, stepbrother, or stepsister (or descendant of any of these individuals – e.g., a niece or nephew);
   - Eligible foster child (an individual placed with the taxpayer by an authorized placement agency or by court order);
   - Adopted child who is legally adopted or lawfully placed with the taxpayer by an authorized placement agency for legal adoption by the taxpayer. ***Caution:*** A child with only an ATIN won't qualify - see "Identification Requirement" below.
2. Residency test**:** A qualifying child must live with the taxpayer in the U.S. for more than half the year. Temporary absence from home (such as to attend school) can still qualify as time spent at home. A child who was born or died during the taxable year is treated as having lived with the taxpayer the entire year if the taxpayer's home was the child's home the entire time he or she was alive during the year.
3. Age Test**:** The child must be under age 19 at the end of the tax year or be a full-time student under age 24 at the end of the tax year. The age test does not apply to a child who is permanently and totally disabled.
   - ***Full-time student*** - A full-time student is a student who is enrolled for the number of hours or courses a school considers full-time attendance during some part of each of 5 calendar months during the calendar year. The 5 calendar months need not be consecutive.
   - ***School -*** The term *"school"* includes elementary schools, junior and senior high schools, colleges, universities, and technical, trade and mechanical schools. It does not include on-the-job training courses, correspondence schools and night schools (see night school below).
   - ***Vocational high school students*** - Students who work on "co-op" jobs in private industry as a part of a school's prescribed course of classroom and practical training are considered full-time students.
   - ***Night school*** - A child is not a full-time student while attending school only at night. However, full-time attendance at a school may include some attendance at night as part of a full-time course of study.
   - ***Permanently and totally disabled*** - A child is permanently and totally disabled if both the following apply:
     1) He or she cannot engage in any substantial gainful activity because of a physical or mental condition, and
     2) A doctor determines the condition has lasted or can be expected to last continuously for at least a year or can lead to death.
4. Additional Requirements**:**
   - **Joint Return** - The child will not be a qualifying child if he or she files a joint return, unless the return is filed solely to claim a refund.
   - **Younger than Credit Claimant** - A qualifying child must be younger than the taxpayer who is claiming the EIC. This means, for example, that a taxpayer cannot claim the credit for an older brother or sister.

Adjusted Gross Income **–** Use the regular AGI without modification.

Disqualified Income ***-*** means interest or dividends to the extent includible in gross income for the tax year plus the following income:

(1) Tax-exempt interest received or accrued during the tax year. Tax-exempt interest is defined by the rules requiring disclosure of the amount of tax-exempt interest on the return;

(2) The excess (if any) of gross income from nonbusiness rents or royalties over the sum of:
  * The noninterest deductions that are clearly and directly allocable to that gross income, and
  * The interest deductions properly allocable to the gross income;

(3) Capital gain net income (as defined in Code Section 1222) of the taxpayer for the year; and

(4) The excess, if any, of the aggregate income from all passive activities for the year (determined without regard to any amount otherwise included in earned income under Code Sec. 32(c)(2), or the other disqualified income described above) over the aggregate losses from all passive activities for the tax year. For purposes of this rule, "passive activity" has the same meaning as under the Code Section 469 passive activity rules.

Disqualified income doesn't include other unearned income such as social security benefits and pension income. Those items affect the right to the earned income credit only to the extent they increase the amount of adjusted gross income used to calculate the amount of the credit that's phased out.

CUSTODIAL PARENT RELEASES EXEMPTION

If a custodial parent releases a qualifying child's exemption to the non-custodial parent, the custodial parent still qualifies for the EIC if otherwise qualified to claim it.

TWO OR MORE INDIVIDUALS WITH THE SAME QUALIFYING CHILD

If an individual can be claimed as a qualifying child by two or more taxpayers for a tax year beginning in the same calendar year, that individual will be treated as the qualifying child of the taxpayer who is:

(1) A parent of the individual.

(2) If (1) does not apply, the taxpayer with the highest adjusted gross income for that tax year.

If the parents claiming the credit with respect to any qualifying child do not file a joint return together, that child will be treated as the qualifying child of:

(1) The parent with whom the child resided for the longest period of time during the tax year, or

(2) If the child resides with both parents for the same amount of time during that tax year, the parent with the highest adjusted gross income.

If a parent can claim the child as a qualifying child but does not do so, the child is treated as the qualifying child of the person who had the highest AGI for the year, but only if that person's AGI is higher than the highest AGI of any parent of the child.

Note: This is the same tie-breaker rule that applies under the uniform definition of a child for the purpose of the dependency exemption.

> ***Example – Unmarried parents living together –*** Where the unmarried parents of a qualifying child live together, the child would be the qualified child of the parent with the higher AGI and that parent would be the one to claim the EIC if otherwise qualified.

EARNED INCOME

A taxpayer must, of course, have earned income to qualify for the earned income credit. Earned income for purposes of the EIC includes only taxable earned income (items included in gross income). Nontaxable earned income items are not included as earned income for the EIC.

> ***NOTE:*** *If a taxpayer is married, filing as head of household (under the special rule for divorced or separated parents), and lives in a state that has community property laws, earned income for the credit does not include any amount earned by the taxpayer's spouse that is treated as belonging to the taxpayer under community property laws. That amount is not earned income for the credit, even though a taxpayer must include it in gross income on his/her tax return.*

The table indicates various types of earned and unearned income for purposes of the credit:

Earned Income Includes:	Earned Income Does NOT Include:
TAXABLE EARNED INCOME	Social security and railroad retirement benefits
Wages, salaries, tips	Pensions or annuities
Union strike benefits	Veterans' benefits (including VA rehab. pay)
Long-term disability benefits prior to minimum retirement age	Worker's compensation
Earnings from self-employment	Alimony
	Interest/Dividends
NONTAXABLE EARNED INCOME	Welfare
Housing allowance or rental value of a parsonage for the clergy	Child support
Excludable dependent care benefits	Unemployment
Voluntary salary reductions such as under a cafeteria plan	Taxable scholarship or fellowship grants that are not reported on Form W-2
Voluntary salary deferrals (e.g.: 401(K) or Gov. thrift plan)	Variable housing allowance for the military
Anything else of value received from someone for services even if it is not taxable	Earnings for work performed while an inmate at a penal institution
Combat zone excluded pay	Medicaid waiver payment excluded from income **But see Chp 2.01 regarding the *Feigh* case**
Basic quarters & subsistence allowances and in-kind quarters and subsistence for U.S. Military	Nontaxable disability benefits
Value of meals/lodging for convenience of employer	

AWARENESS

The IRS estimates that up to 1.5 million people who are receiving long-term disability retirement benefits are missing out on claiming the EITC. For those that qualify and missed the credit in prior years, they can still amend their past three years of tax returns if the amendment is filed within three years of the original April due date for the return.

SPECIAL RULES REGARDING EARNED INCOME

Household Employees - If a taxpayer was a household employee but did not receive Form W-2 because an employer paid less than $2,100 (2019), the EIC may still be available. Include the amount paid on the "wages, salaries, tips, etc." line of Form 1040 (line 1 on the draft 2019 version). Print "HSH" and the amount not reported on Form W-2 on the dotted line next to that entry.

Combat Pay Election - A taxpayer may elect to treat combat pay that is otherwise excluded from gross income as earned income for purposes of the EIC. Making this election for EIC purposes may or may not be advantageous.

If the taxpayer has earned income below the maximum amount of earned income on which the credit is calculated, including the combat pay will increase the credit amount. On the other hand, if the taxpayer's earned income is already in the phase-out range, electing to include combat pay as earned income will decrease the amount of credit that can be claimed.

Disability Benefits - If a taxpayer retired on disability, benefits received under an employer's disability retirement plan are considered earned income until the taxpayer reaches minimum retirement age. Minimum retirement age generally is the earliest age at which a taxpayer could have received a pension or annuity if he/she were not disabled. Beginning on the day after reaching minimum retirement age, payments a taxpayer receives are taxable as pensions and are not considered earned income. ***Note:*** Nontaxable disability income attributable to premiums paid by an employee is not "earned income" for purposes of the EIC. (Chief Counsel Advice 199916041; Eva B. Vellai-Palotay v. The United States, U.S. Court of Federal Claims; I6-125T, July 13, 2016.)

Taxpayer or Qualifying Child Dies During Tax Year - The fact that the taxpayer dies during the year, or that the dependent dies during the year, will not necessarily preclude the deceased taxpayer from claiming the EIC. The Service's position has long been that, if the child fails the more than half the year rule because the child died or was born during the year, the child will meet that rule if the child lived with the taxpayer for the entire time the child was alive for the year, including temporary absences (Pub 596). As for the death of the taxpayer, Section 32(e) provides as follows: taxable year must be a full taxable year - Except in the case of a taxable year closed by the reason of the death of the taxpayer. (PMTA 2007-01190)

Voluntary Salary Reductions Under Cafeteria Plans - A cafeteria plan is a benefit plan that allows choosing among two or more benefits consisting of cash and benefits that aren't taxed. If a taxpayer chooses a benefit that isn't taxed (such as accident and health insurance), the amount of the voluntary salary reduction is **NOT** earned income when figuring this credit.

Birth of a Qualifying Child During the Year - if the child fails the more than half the year rule because the child was born during the year, the child will meet that rule if the child lived with the taxpayer for the entire time the child was alive for the year, including temporary absences. (Pub 596)

Earnings While an Inmate - Amounts paid to inmates in penal institutions for their work are not earned income when figuring the earned income credit (IRC Sec 32(c)(2)(B)(iv)).

Earnings from Self-Employment - Earnings from self-employment are considered earned income for purposes of the credit.

* <u>Statutory employee's earnings</u>: If a taxpayer is a statutory employee, self-employment earnings is the amount on line 1 of Schedule C.

* <u>Other earnings</u>: Earnings from self-employment for services as a minister or member of a religious order, is earned income for the credit. Taxpayer must include these earnings in earned income even if net earnings are less than $400.

* <u>Losses from self-employment</u>: A loss from self-employment must be subtracted from other earned income.

* <u>Schedule SE</u>: Using the optional methods to figure SE tax on net earnings from self-employment may qualify a taxpayer for the earned income credit or give a larger credit if net earnings (determined without using the optional methods) are less than the year's "lower limit" (see Chapter 8.03). If a taxpayer uses the optional method, use the imputed income from the optional SE method calculation in lieu of the actual SE earnings, reduced by the SE tax deduction claimed as an adjustment to gross income on Form 1040 (line 14 of draft of 2019 Schedule 1).

  If Schedule SE isn't required (for example, because net earnings from self-employment are less than $400), and the optional method isn't used, earnings (or loss) from self-employment is the net profit or loss from self-employment activities. This is the amount that must be used to figure the EIC.

  If a taxpayer has an approved Form 4361 (exemption from Social Security tax for ministers), amounts received for performing ministerial duties as an employee are earned income. This includes wages, salaries, tips and other employee compensation. Other employee compensation includes nontaxable compensation such as housing allowances or the rental value of a parsonage that is received as part of pay for services as an employee. Amounts received from ministerial duties, but not as an employee, are not earned income. Examples include fees for performing marriages and honoraria for delivering speeches.

EIC ELIGIBILITY WITHOUT A QUALIFYING CHILD

A taxpayer without a qualifying child can qualify for EIC if all of the following are met:

* The individual's principal home is in the U.S.
* The individual (or spouse) must be 25 or over but under 65 before the end of the year.
* The individual (or spouse) must not be someone else's dependent.

DEFICIENCY PROCEDURES

If the IRS questions eligibility of the EIC for reasons other than a mathematical or clerical error, the IRS may send correspondence asking the taxpayer to provide information about eligibility for the credit. If they receive no response, or the information provided doesn't indicate that the taxpayer qualifies for the credit, the IRS may send a "notice of deficiency" (90-day letter) by certified or registered mail denying the credit.

INTEGRITY PROVISIONS

An individual is prohibited from retroactively claiming the EITC by amending a return or filing an original return if he or she failed to file, for any prior year in which the individual did not have a taxpayer identification number. (PATH Act Sec 206)

DENIAL OF EIC FOR FRAUD OR INTENTIONAL DISREGARD OF RULES

A taxpayer who fraudulently claims the EIC is ineligible to claim the credit for a later period of 10 years; a taxpayer who erroneously claims the credit due to recklessness or intentional disregard of rules or regulations is ineligible to claim the credit for a later period of 2 years. Specifically, no earned income credit is allowed for any tax year during a disallowance period. The disallowance period is:

1. The 10-tax-year period after the most recent tax year for which there was a final determination that the taxpayer's claim of the earned income credit was due to fraud, and
2. The 2-tax-year period after the most recent tax year for which there was a final determination that the taxpayer's claim of the earned income credit was due to reckless or intentional disregard of rules and regulations (but not due to fraud).

The disallowance period begins in the year after the year in which the credit was claimed improperly, even if the final determination isn't made until a later year.

> ***Example - Disallowance of EIC -*** *Bobbi claimed the EIC for each of Years 1 to 5. During Year 5, a court determines that Bobbi's claiming the credit for Years 1 and 2 was due to a reckless or intentional disregard of rules and regs. Her credit for Year 3 and Year 4 is disallowed retroactively.*

IRS AUTHORITY TO TREAT EIC CLAIM ON NONCUSTODIAL PARENT'S RETURN AS MATH ERROR

A mathematical or clerical error includes an entry on a return claiming the earned income credit with respect to a child if, according to the Health and Human Services' Federal Case Registry of Child Support Orders established under Section 453(h) of the Social Security Act, the taxpayer is a noncustodial parent of such child. *(Code Sec. 6213(g)(2)(M) as amended by 2001 Act §303(g))*

The IRS is authorized to use its math error authority to deny the earned income credit, if the Federal Case Registry of Child Support Orders indicates that the taxpayer is the noncustodial parent of the child with respect to whom the credit is claimed. *(Com Rept, see ¶5013)*

RECERTIFICATION OF THE CREDIT

No earned income credit is allowed for any tax year after any tax year a taxpayer is denied the earned income credit as a result of deficiency procedures of the Code, unless the taxpayer provides information that IRS may require to demonstrate eligibility for the credit. That is, a taxpayer who has been denied the EIC as a result of deficiency procedures is ineligible to claim the credit in later years, unless the taxpayer provides evidence of eligibility that meets evidence requirements established by the IRS.

> ***Example - Recertification of EIC -*** *Annie claimed the earned income credit for Year 1 and Year 2. IRS sent her a 90-day letter denying the credit for those years. She didn't file a Tax Court petition and didn't otherwise respond to the statutory notice. Therefore, IRS made the assessment and denied the credit. Annie can't claim an EIC for any year after Year 2, unless she provides the information required by IRS to recertify the credit.*

The recertification procedures can apply if a taxpayer is subject to the 2- or 10-year disallowance periods. However, recertification isn't required if IRS disallows all or part of the credit because of a mathematical or clerical error (such as claiming the credit based on self-employment earnings without paying the correct self-employment tax or claiming the credit after a previous denial as the result of deficiency procedures without becoming recertified). Recertification also isn't required if IRS denies the credit through the deficiency procedures, but the Tax Court (or an appellate court reviewing the Tax Court) decides the taxpayer is eligible to claim the credit.

IRS will send the taxpayer information about how to become recertified. If the taxpayer claims the credit without first being recertified, the claim will be automatically denied. Ineligibility for the earned income credit under the above rules is ***subject to review by the courts***.

FORM 8862

No EIC is allowed to a taxpayer who has lost the credit due to the deficiency procedures described above unless the taxpayer:

* Attaches Form 8862 showing they are again eligible for the credit.
* Is otherwise eligible for the credit.

Form 8862 asks a series of questions so that the IRS can determine whether or not the taxpayer is eligible for the credit. A taxpayer will be treated as ineligible for the credit if the form isn't complete (or if the form shows an inconsistency with an item on the taxpayer's return).

The expectation is that the IRS may require the taxpayer to provide documentary evidence in addition to Form 8862. Once a taxpayer shows that he/she is eligible for the credit, he/she doesn't have to submit Form 8862 with later returns unless deficiency procedures again occur.

If a taxpayer doesn't submit Form 8862 as required, the IRS can deny the credit based on mathematical or clerical error procedures. If an EIC is denied based on these procedures, the taxpayer must attach Form 8862 to the next return on which the EIC is claimed.

IDENTIFICATION REQUIREMENT

No credit is allowed to an individual who doesn't include his/her own ID number (and that of spouse if married) on the tax return. In addition, if basing the credit on one or more qualifying children, each qualifying child's name, age, and ID number must be included on the return. What is a taxpayer identification number for EIC rules?

The term "taxpayer identification number" is specially defined for purposes of:

* Code Section 32(c)(1)(E), which requires an individual claiming the earned income credit to include on the return the individual's, and if married the individual's spouse's, taxpayer identification number, and
* Code Section 32(c)(3)(D), which relates to the identification requirement for a qualifying child.

Solely for these purposes, a taxpayer identification number means a **Social Security number (SSN)**, other than one issued to an individual applying for or receiving Federally-funded benefits. Thus, the following numbers and designations are **not** acceptable for the above purposes:

1. Adoption taxpayer identification numbers (ATINs),
2. Individual taxpayer identification numbers (ITINs),
3. Temporary numbers, and
4. 'Applied for' or other designations.

The SSN must be issued by the Social Security Administration to a U.S. citizen or to a person who has permission from the Dept. of Homeland Security/U.S. Citizenship and Immigration Service (aka Immigration and Naturalization Service) to work in the U.S. The effect of requiring an individual's (and, if married, the individual's spouse's) SSN to be shown on the return is to bar individuals who haven't been authorized to work legally in the U.S. from claiming the earned income credit.

For returns (or amendments) filed after December 18, 2015, the SSN of the taxpayer, taxpayer's spouse and qualifying child or children must have been issued on or before the due date of the return or the credit will be denied. (IRC Sec 32(m)) The IRS says the due date for obtaining the SSN is the extended due date of the return (2018 Pub 17, page 222). An exception applies for original returns filed for tax years that include December 18, 2015, provided the return is timely filed. Some taxpayers may encounter legitimate difficulties in getting a taxpayer identification number within the time necessary for filing a tax return (e.g., where a child is being adopted). IRS says if the filing deadline is approaching and the taxpayer doesn't have an SSN, the taxpayer may request an automatic extension of time to file.

DUE DILIGENCE – PAID PREPARERS

Paid preparers of returns on which an earned income credit is claimed are expected to exercise due diligence in getting accurate information to determine eligibility and correctly computing the amount. **Failing to do so could result in a preparer penalty of $530 for a return or refund claim filed in 2020** ($520 for 2019 filings, $510 for tax years beginning in 2016 or 2017)**.** This penalty is inflation adjusted annually.

IRS due diligence requirements that preparers of returns and refund claims involving the earned income credit must meet to avoid imposition of this penalty are as follows (Reg § 1.6695-2(b)):

1. **Complete, submit and retain a copy of Form 8867** (or other such form as prescribed by the IRS), "Paid Preparer's Due Diligence Checklist." The completed Form 8867 or successor form must be included in the return that is filed. The data entered on the Form 8867 must be based on information provided by the taxpayer or otherwise reasonably obtained by the preparer. The preparer must retain for the period described in the Form 8867 instructions copies of any documents provided by the taxpayer and on which the preparer relied in completing Form 8867 and the EIC worksheet (described next).

IMPORTANT

The Form 8867 also includes the due diligence requirements for the Child Tax Credit/Additional Child Tax Credit/Other Dependent Credit, the American Opportunity Tax Credit, and starting with 2018 returns, the Head of Household filing status. The due diligence penalty applies to each credit and the H of H status. Thus if a Head of Household return was filed in 2019 and included EITC, AOTC and CTC, and the due diligence requirements were not met for all of these tax benefits, the penalty could be $2,080 (4 x $520). MAKE SURE YOU COMPLETE THE 8867.

2. **Complete and retain a copy of the EIC worksheet** (or other form and information prescribed by the IRS) or otherwise record in one or more documents in the tax return preparer's paper or electronic files the tax return preparer's EIC computation, including the method and information used to make that computation. All documents must be based on information provided by the taxpayer or otherwise reasonably obtained by the preparer.
3. The preparer **must not know, or have reason to know, that any information used by the tax return preparer in determining the taxpayer's eligibility for, or the amount of, the EIC is incorrect**.
4. The tax return **preparer may not ignore the implications of information furnished** to, or known by, the tax return preparer, and must make reasonable inquiries if the information furnished to the tax return preparer appears to be incorrect, inconsistent, or incomplete.
5. A tax return **preparer must make reasonable inquiries** if a reasonable and well-informed tax return preparer knowledgeable in the law would conclude that the information furnished to the tax return preparer appears to be incorrect, inconsistent, or incomplete.
6. The tax return preparer must also **contemporaneously document in the files the reasonable inquiries made** and the responses to these inquiries.

Thus, if the preparer receives conflicting information from two different taxpayers, the return preparer has an affirmative duty to request verification from both taxpayers to determine which information is correct and only file a return with the information the return preparer does not know or have reason to know is incorrect.

Example 1*: Lindsey is age 22. She tells her tax return preparer that she wants to claim two daughters, ages 10 and 11, as qualifying children for the EIC. The preparer must make additional reasonable inquiries regarding the relationship between Lindsey and the children because Lindsey's age appears inconsistent with the children's ages.*

Example 2*: Walter tells his tax return preparer that he has two children, has a Schedule C business in which he grossed $10,000 and had no expenses, and wants to claim the EIC. This information appears incomplete because it is very unlikely that a self-employed individual has no business expenses. The preparer must make additional reasonable inquiries regarding Walter's business to determine whether the information regarding both income and expenses is correct.*

Example 3: *Sara, an 18 year-old female taxpayer with an infant has $3,000 in earned income and states that she lives with her parents. Taxpayer wants to claim the infant as a qualifying child for the EIC. This information appears incomplete and inconsistent because the taxpayer lives with her parents and earns very little income. The preparer must make additional reasonable inquires to determine if the taxpayer (Sara) is the qualifying child of her parents and, therefore, ineligible to claim the EIC.*

CALIFORNIA DIFFERENCES

California initiated a refundable EITC in 2015. California and at least 29 other states plus the District of Columbia now offer an EITC. In the majority of these states, the credit is refundable. Most states set their EITC as a portion of the federal EITC, and most states conform to the federal EITC program in other aspects such as eligibility requirements and income levels.

The California EITC will only apply for taxable years for which an adjustment factor (see below) is specified in the state's annual Budget Act and if the Budget Act authorizes resources for the Franchise Tax Board (FTB) to oversee and audit returns associated with the EITC.

Overview

The California EITC will generally follow the eligibility requirements of the federal EITC. Additionally, the earned income limitations for the California EITC (the amount where the CA EITC will be fully phased-out) will be lower than those for the federal EITC.

Beginning for tax year 2017, the limitation of only allowing EITC for wage earners has been lifted and self-employment income will be allowed. This includes domestic workers whose income is not subject to withholding. The phase-out ranges also were substantially increased. It is estimated this change will more than double the number of individuals qualifying for California EITC. (SB 106)

2018 EITC TABLE				
Number of Children	**Credit Rate**	**Phaseout Starts**	**Phaseout Complete**	**Maximum Credit**
None	7.65%	$3,580	16,751	$232
One	34%	$5,376	$24,951	$1,554
Two	40%	$7,547	$24,951	$2,559
Three +	45%	$7,547	$24,951	$2,879

Eligible Individual Age Requirement – Beginning with tax year 2018, an individual (or if married, either the individual or their spouse) who does not have a qualifying child will be eligible for the California EITC if age 18 or older at the end of tax year. Previously, California followed the federal requirement that individuals without a qualifying child be age 25 through 64. (R&TC § 17052(c)(2), as amended by SB 855)

New Law & Stuff

As of 2020, if a taxpayer's earned income is $30,000 or more, the phaseout will reduce the California EITC to zero. (AB 91, signed by the governor 6/27/2019) The bill also makes other changes in the phaseout calculation, which will be reflected in the table provided by the FTB in the Form 540 instructions.

COMPARISONS

Credit Rates – The CA credit rates are the same as the federal: 7.65% without a qualifying child, 34% with one qualifying child, 40% with 2 qualifying children and 45% with three or more.

Earned Income – The maximum earned income amounts to which the credit rates apply for CA are less than the federal amounts, thus resulting in a lower credit amount for CA.

Phase Out – CA phases out in a manner similar to the federal, but at substantially lower AGI's.

Qualifications – To qualify for the California credit:

Taxpayer cannot have investment income in excess of $3,699 for 2018 (2019 amount not available at press date) – this is not the same amount as for the federal EITC;

- Cannot file as married filing separate;
- Cannot be a dependent of another;
- Have a qualifying child, or if no qualifying child, then for years before 2018, be age 25 or older, but under the age of 65 at the end of the year, or for 2018 or later years, be age 18 or older at year's end; and both the eligible individual and qualifying child must have their principal abode in CA for more than half the year.

Annual Adjustment Factor – CA has built a factor into it's computation that permits the state to limit the CA credit while still following the federal computation. For 2015 through 2019, that factor is 85%. Thus, a tentative credit is computed in the same fashion as the federal and then that amount is multiplied by the factor to determine the actual credit awarded. The EITC adjustment factor is set by the legislature in the annual Budget Act.

FTB Form – Form FTB 3514 is to be attached to the California return when claiming the California EITC. The instructions to the form include EITC Tables and worksheets. The form warns taxpayers "If you claim the EITC even though you know you are not eligible; you may not be allowed to take the credit for up to 10 years."

Preparer Due Diligence - A $500 penalty, in conformity with federal law except not adjusted for inflation, for failure to be diligent in determining eligibility for the earned income tax credit may be assessed by the state against the return preparer. (R&TC Sec 19167(f))

Underpayment of Estimated Tax - A waiver of the underpayment of estimated tax penalty will apply if the underpayment was attributable to the EITC adjustment factor for the year being less than the adjustment factor for the preceding year and applies to penalties imposed on or after January 1, 2016.

SB 106 also authorizes the FTB to prescribe regulations necessary or appropriate to carry out the purposes of this section, including regulations to prevent improper claims from being filed or improper payments from being made with respect to net earnings from self-employment. The FTB is considering a number of methods to ensure compliance, including requiring self-employed individuals to have business licenses or other documentation to support a claim of self-employment. Another possibility is to require the business to have been in existence in the prior two years and an expanded Form 3514 CA EITC due diligence form. Still another would require the taxpayer to prove they paid federal SE tax on the income.

Questionable Claims - According to the November 2017 *FTB Tax News*, if the FTB suspects the self-employment income on a return claiming the EITC could be fraudulent, they may need additional documentation to verify the business and related income or losses before issuing a refund. To obtain the additional information, the FTB will send a request to the taxpayer within 30 days of the tax return being filed and will need this information back before they can allow the credit and issue the refund. The request will come on form FTB 4502, Additional Documentation Required — Refund Pending. Items that the taxpayer may need to provide include:

- A profit and loss statement or schedule used to determine the business income and expenses reported on the tax return.
- Business bank statements and credit card statements supporting the business income (covering at least 2 months).
- Any certification, license, permit, or registration required for the business (taxicab, cosmetology, food service, contractor, vendor, etc.).
- Any federal Schedule K-1 (Form 1065), Partner's Share of Income, Deductions, Credits, etc., if partnership income is reported.
- If the taxpayer has claimed qualifying children, the FTB more than likely will also ask for documentation regarding these individuals.

PRIOR TO 2017 – Prior to 2017, because of the high federal EITC fraud rates (estimated to be in excess of 30%) and primarily attributable to phony self-employment income, California only allowed EITC for earned income subject to California withholding, including:

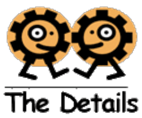
- W-2 wages,
- Salaries,
- Tips,
- Other employee compensation, and
- By election, the nontaxable military combat pay of the taxpayer (and/or the spouse/RDP if filing jointly), whether or not this election was made for federal purposes.

Not Included in Earned Income **–** Because of the requirement that the earned income for CA purposes be subject to withholding.

- **Self-Employment income** is not eligible.
- **Household employee income** is not specifically addressed by the FTB. However, generally it will not qualify for CA EITC. However, if the employee and employer have entered into a voluntary agreement to subject the employee's income to withholding as per CA Regulations, then the income would qualify for the EITC.
- **IHSS Payments** – Medicaid waiver payments, In Home Support Services (IHSS) payments and IHSS supplemental payments that are excluded for federal but included in CA wages are specifically excluded.

CLAIM OF RIGHT

Overview of Claim of Right – Cash basis taxpayers include amounts in gross income in the tax year received. If they must pay back the income amount in a later tax year, a deduction OR a tax credit may be allowed in the year of repayment--thus, the return for the year the income was originally claimed is not amended. However, return data from that previous tax year may be needed in order to compute the repayment year deduction or tax credit (whether to claim a deduction or credit, or for years 2018-2025 if certain deductions can be claimed, depends on which method produces the lower tax AND the amount of the repayment).

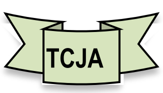


CLAIM OF RIGHT DOCTRINE: Code Section 1341 describes the Claim of Right doctrine which offers benefits to taxpayers who have included an amount in income in one tax year, but have had to repay all or part of it in a later year.

TRANSACTIONS COVERED BY THE DOCTRINE*:* The doctrine can apply to most any type of transaction in which a taxpayer receives income, other than one involving sale of inventory. Thus, required repayments of wages, commissions, alimony, social security, capital gain income, etc., can all be covered by the claim of right provisions.

DEDUCTION VS. TAX CREDIT IN THE REPAYMENT YEAR

- **Repayments of $3,000 or less** – If the amount repaid is $3,000 or less, deduct it from the taxpayer's income in the year the taxpayer repaid it. The repayment is generally deducted on the same form or schedule on which the income was previously reported. For example, if it was reported as self-employment income, deduct it as a business expense on Schedule C or Schedule C-EZ (Form 1040) or Schedule F (Form 1040). If reported as a capital gain, deduct it as a capital loss on Form 8949 (1040 Schedule D). If reported as wages, unemployment compensation, or other non-business income, it as a Schedule A Tier 2 miscellaneous itemized deduction. However, see below!



Years 2018-2025 – Tier 2 miscellaneous itemized deductions (those subject to the 2% of AGI reduction) are suspended by the TCJA starting with 2018 and through 2025. Therefore, during this period taxpayers making repayments of $3,000 or less that aren't related to a business or capital transaction are effectively prohibited from deducting these payments.

- **Repayments over $3,000** (no change by TCJA) - If the amount repaid was more than $3,000, the taxpayer can deduct the repayment as explained above (except as a Tier 1 (no 2% of AGI reduction) miscellaneous deduction if itemizing deductions) ***OR*** as a tax credit based on the difference in tax with or without the repaid income in the year the income was originally reported. Make both computations and select the one that provides the greater benefit.

THE CALCULATIONS FOR REPAYMENTS OVER $3,000

A. ***Computation - Repayment Year***

  - **Step I:** Compute the tax for the year in the usual manner without considering the repayment.
  - **Step II:** Deduct the repayment as a Tier 1 (not a Tier 2) itemized deduction and recompute the tax.
  - **Step III:** Subtract the tax computed in Step II from tax computed in Step I; the difference is the potential tax savings using the current-year deduction.

B. ***Computation - Year the income was originally reported -*** In this step, determine how much tax would have been saved if the repayment amount had never been included in income in the first place. To do this, recompute the tax for the year of income receipt without including the repaid amount. Subtract the result from the tax as originally reported. The difference is the amount of allowable tax credit potentially available in the repayment year.

C. ***Compare the results of (A) and (B).*** Determine which results in the lesser tax in the repayment year, claiming the deduction or the credit. There is no government form with which to make the computation or claim the credit, but when claiming the credit it should be claimed as part of payments made on Schedule 5 (2018) – the instructions to Schedule 5 say if claiming a credit for repayment of amounts you included in your income in an earlier year, include the credit on line 74. Check box d and enter "I.R.C. 1341" in the space next to that box. Based on drafts of the 2019 forms, the IRS is consolidating some of the 1040 schedules, with refundable credits now on Schedule 3. So instead of including the credit on line 74, it appears it would go to line 13 of Schedule 3.

Example - Claim of Right Computation - In 2019, James, a single taxpayer, was required to repay $5,000 he had reported as wages under claim of right in 2017. The following schedule compares his 2017 and 2019 tax liabilities, both with and without the repaid wages.

2017:	***With Wages***	***Without Wages***
Taxable Income	*$15,000*	*$10,000*
*Tax Liability **	*1,788*	*1,038*
Tax Savings (Credit Method)..	*$ 750*	

2019:	***Without Deduction***	***With Deduction***
Taxable Income	*$49,950*	*$44,950*
*Tax Liability **	*6,934*	*5,834*
Tax Savings (Deduction Method)....................................	*$ 1,100*	

** Using the Tax Tables for 2017 and the Tax Table for 2018 (because 2019 Tables not available at publication date)*

James was in the 15% tax bracket in 2017 and the 22% bracket in 2019. Thus, the deduction method, based on '19 rates, exceeds the credit method based on '17 rates. He will pay less tax by claiming a Tier 1 miscellaneous deduction for the repaid wages on his '19 return; the following worksheet shows James' computation.

Original Reporting Year: *2017*
Restoration Year: 2019

SECTION I - DEDUCTION METHOD - RESTORATION YEAR COMPUTATION *(Complete only if itemizing.)*

1. *Taxable income (w/o deduction) 49,950*
2. *Claim of right deduction .... <5,000>*
3. *Taxable income (with deduction) 44,950*
4. *Tax based on the amount of line 1.. 6,934*
5. *Tax based on the amount of line 3.. <5,834>*
6. *Tax savings this method (line 4 less line 5).. 1,100*

SECTION II - TAX CREDIT METHOD *- (Line 8 must exceed $3,000.)*

7. *Taxable income (as filed) 15,000*
8. *Claim of right adjustment... <5,000>*
9. *Modified taxable income (if negative, treat as zero) 10,000*
10. *Tax based on line 7 .... 1,788*
11. *Tax based on line 9 .... <1,038>*
12. *Tax savings this method (ln 10 less ln 11) 750*
    Line 12 is a refundable credit in the year of restoration if credit method is used
13. *Best tax savings (larger of ln 6 or ln 12).. 1,100*

METHOD USED: [X] Deduction Method [ ] Credit Method

Note: if a client is not itemizing, automatically use the credit method. But for 2018-2025, if repayment of non-business or non-investment income is $3,000 or less, neither a deduction nor a credit is available.

CALIFORNIA DIFFERENCES

California conforms to the provisions of Code Section 1341. No deduction or credit is allowed unless the repaid amount was previously taxed by California. Either the deduction or credit method is allowed, whichever creates the greater benefit. Deductions of $3,000 or less are subject to the 2% of federal AGI limit.

If claiming the credit for the repayment on the federal return, but deducting the repayment for California, enter the allowable deduction on Schedule CA, Part II, line 16, col. C (2018). If taking the credit instead of the deduction for California, enter the amount of the federal deduction on Part II, line 16, column B and add the credit amount on the total payment line of Form 540, and to the left of the total write "IRC 1341" and the amount of the credit.

SAVER'S CREDIT

Overview

- A credit for contributions made by eligible low income taxpayers to a qualified plan (IRAs and elective deferrals).
- **Eligible Individual** – 18 Years of age or older except:
  - (1) Dependent of Another.
  - (2) Full-time Student.
- **Amount of Credit** – Applicable % x (up to first $2,000 of contribution)
- **Eligible Contributions** – must be reduced by certain distributions made during 2 year, 9.5 months testing period
- **Joint Return** - Credit Available to both spouses.
- **Applicable %** - Based on AGI and can be 50%, 20% or 10%
- **2019 AGI Limits:** Jt = $64,000, HH = $48,000, and Others = $32,000
- **Credit** – Non-refundable.
- **AMT** – Allowed against AMT

WHO IS ELIGIBLE FOR CREDIT

The term "eligible individual" will mean any individual who has reached age 18 as of the close of the tax year *(Code Sec. 25B(c)(1)*, except an individual in either of the following situations:

The Details

- **Dependent of Another** - an individual with respect to whom a dependency is allowed to another taxpayer for a tax year beginning in the calendar year in which the individual's tax year begins *(Code Sec. 25B(c)(2)(A)).*
- **Full-Time Student** - a student, as defined in *Code Sec. 151(c)(4) (Code Sec. 25B(c)(2)(B))* (generally, a full-time student during each of 5 months in the tax year at an educational organization or an individual pursuing a full-time course of institutional on-farm training).

AMOUNT OF CREDIT

In the case of an eligible individual (defined above), a tax credit is allowed equal to the applicable percentage (below) of up to the first $2,000 of the individual's qualified retirement savings contributions (defined below). *(Code Sec. 25B(a))* In the case of married taxpayers, each can qualify for the full credit. The applicable percentage is determined under the following table: (*Code Sec. 25B(b))*

2017 Phase-outs

Modified Adjusted Gross Income						Applicable percentage
Joint return		Head of household		Others		
Over	Not over	Over	Not over	Over	Not over	
$ 0	$37,000	$ 0	$27,750	$ 0	$18,500	50
37,000	40,000	27,750	30,000	18,500	20,000	20
40,000	62,000	30,000	46,500	20,000	31,000	10
62,000		46,500		31,000		0

2018 Phase-outs

Modified Adjusted Gross Income						Applicable percentage
Joint return		Head of household		Others		
Over	Not over	Over	Not over	Over	Not over	
$ 0	$38,000	$ 0	28,500	$ 0	19,000	50
38,000	41,000	28,500	30,750	19,000	20,500	20
41,000	63,000	30,750	47,250	20,500	31,500	10
63,000		47,250		31,500		0

2019 Phase-outs

Modified Adjusted Gross Income						Applicable percentage
Joint return		Head of household		Others		
Over	Not over	Over	Not over	Over	Not over	
$ 0	$38,500	$ 0	$28,875	$ 0	$19,250	50
38,500	41,500	28,875	31,125	19,250	20,750	20
41,500	64,000	31,125	48,000	20,750	32,000	10
64,000		48,000		32,000		0

2020 Phase-outs

Modified Adjusted Gross Income						Applicable percentage
Joint return		Head of household		Others		
Over	Not over	Over	Not over	Over	Not over	
$ 0	$39,000	$ 0	$29,250	$ 0	$19,500	50
39,000	42,500	29,250	31,875	19,500	21,250	20
42,500	65,000	31,875	48,875	21,250	32,500	10
65,000		48,750		32,500		0

If amounts are not shown, they were not available at publication date.

Modified AGI - Adjusted gross income will be determined without regard to Code Sec. 911 (foreign earned income exclusion and foreign housing exclusion or deduction), Code Sec. 931 (exclusion of income from American Samoa, Guam, or the Northern Mariana Islands), and Code Sec. 933 (exclusion of income from Puerto Rico). *(Code Sec. 25B(e))*

CREDIT IS NONREFUNDABLE; OFFSETS MINIMUM TAX

The credit will be nonrefundable and will offset alternative minimum tax liability as well as regular tax liability.

> ***Example*** *– Eric and Heather are married, both age 25, and filing a joint return. Eric contributed $3,000 through his 401(k) plan at work, and Heather contributed $500 to her IRA account. Their modified AGI for 2019 was $28,000. The credit is computed as follows:*
> *Eric's 401(k) contribution was $3,000, but only the first $2,000 can be used $2,000*
> *Heather's IRA contribution was $500, so it can all be used…………………………. 500*
> *Total Qualifying contributions……………………………………………………………….. $2,500*
> *Credit percentage for a Jt AGI of $28,000 from the table……………………………. X .50*
> ***Saver's credit****……………………………………………………………………………….. **$1,250***

CONTRIBUTIONS QUALIFYING FOR THE CREDIT

Subject to the reduction for distributions (discussed below), "qualified retirement savings contributions" will equal the sum of elective contributions to a:

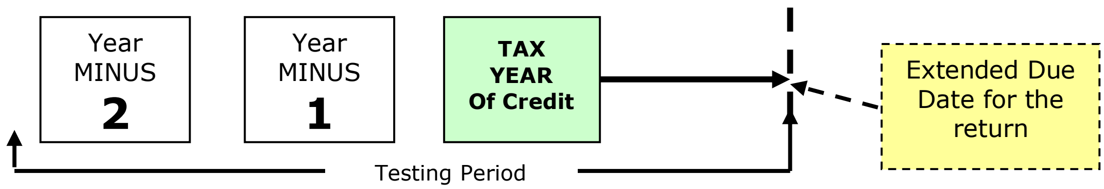
- Code Sec. 401(k) plan,
- Code Sec. 403(b) annuity (TSA), or eligible deferred compensation arrangement of a state or local government (a "Code Sec. 457 plan"),
- Tax-exempt employee-funded pension plan (typically a union plan),
- SIMPLE IRA or salary reduction SEP,
- Traditional or Roth IRA, and
- Voluntary after-tax employee contributions to a qualified retirement plan.

CERTAIN DISTRIBUTIONS WILL REDUCE AMOUNT ELIGIBLE FOR CREDIT

With the exceptions listed below, an individual's qualified retirement savings contributions eligible for the credit will have to be reduced (but not below zero) by the sum of:

- Any taxable distribution from any of the types of plans for which eligible contributions could be made (see list above) received by the individual during the testing period (defined below), and *(Code Sec. 25B(d)(2)(A).*
- Any distribution from a Roth IRA or a Roth account, received by the individual during the testing period that isn't a qualified rollover contribution (as defined in Code Sec. 408A(e)) to a Roth IRA or a rollover (under Code Sec. 408A(c)(8)(B)) to a Roth account. *(Code Sec. 25B(d)(2)(A))*

Testing period - The "testing period" will include the tax year for which the credit is claimed, the two preceding tax years, and the period after the tax year and before the due date (including extensions) for filing the taxpayer's return for that tax year. *(Code Sec. 25B(d)(2)(B))*



Pension Distributions during the Testing Period can be Costly!
Distributions taken from qualified plans by taxpayers who are eligible for the credit are potentially very costly. Not only may the distribution itself be taxable, but it may also cause the loss of a tax credit worth 10, 20, or even 50 cents on the dollar. Further, the credit may be lost not only in the current year, but for the next two years as well.

Distributions received by spouse - Distributions received by an individual's spouse will be treated as received by the individual, if the individual and spouse filed a joint return both in the tax year for which the credit is claimed and the tax year during which the spouse received the distribution. *(Code Sec. 25B(d)(2)(D))*

Strategies

***Example – Plan Ahead to Avoid the Testing Period** - Mary will turn age 70 on June 26, 2020 and thus becomes age 70.5 on December 26, 2020. She cannot contribute to an IRA in the year she turns 70.5, so 2019 is the last year that she could contribute to her IRA. If Mary will qualify for the saver's credit for 2019, she should be sure that she doesn't take her 2020 required minimum distribution from her IRA until after the extended due date of her 2019 return (generally Oct. 15, 2020). Otherwise, if she withdraws her IRA distribution prior to that date, the distribution will be within the testing period for her 2019 return, and depending on the amount of the distribution, the worst case is she won't be allowed any saver's credit for 2019, and the best case is that only part of the credit will be lost.*

DISTRIBUTIONS THAT DON'T REDUCE THE CREDIT

The following distributions won't reduce the amount of qualified retirement savings contributions:

- Loans to a plan participant or beneficiary from a qualified employer plan that are treated as distributions under Code Sec. 72(p);
- Distributions of excess contributions to a cash or deferred arrangement (401(k) plan) under Code Sec. 401(k)(8);
- Distributions of excess aggregate contributions under Code Sec. 401(m)(6);
- Distributions of excess deferrals under Code Sec. 402(g)(2);
- Dividends paid on employer securities under Code Sec. 404(k);
- Distributions of IRA contributions returned before the due date of the taxpayer's return under Code Sec. 408(d)(4) *(Code Sec. 25B(d)(2)(C)(i))*; and
- Rollovers from a Traditional IRA to a Roth IRA to which Code Sec. 408A(d)(3) applies. *(Code Sec. 25B(d)(2)(C)(ii)*

CREDIT IN ADDITION TO ANY PENSION DEDUCTION

The credit is in addition to any deduction or exclusion that would otherwise apply for a contribution and offsets AMT as well as regular tax liability.

CALIFORNIA DIFFERENCES

California has no comparable credit.

NOTES

ADOPTION EXPENSE CREDIT

RAPID FINDER

Overview

- **"Eligible child"** is:
  - either a person **under the age of 18** or
  - a person **physically or mentally incapable of self-care**
- **Maximum Credit Amount** – 2019 = $14,080
- **Special Needs Child** – Full credit without expenses.
- **Foreign adoption** - Credit only in the year the adoption is final.
- **Phase-out (2019)** – all filing statuses
  - Threshold $211,160
  - Complete $251,160
- **AMT** – Allowed against AMT
- **Carryover**
  - Years after 2011 (non-refundable) – 5-year carryover

Pubs Forms

Related IRC and IRS Publications and Forms

- **Form 8839** – Qualified Adoption Expenses
- **Instructions** – Form 8839
- **Form 1040** – Cannot use 1040A (pre-2018)
- **IRC Sec 23**

The Details

ELIGIBLE CHILD

An "eligible child" is either a person under the age of 18 at the time a qualified adoption expense is paid or incurred, or a person physically or mentally incapable of taking care of himself or herself. ***(Code Sec 23(d)(2)(A) and (B))***

A child who turned 18 during the year is an eligible child for the part of the year he or she was under age 18. A child attains a given age on the anniversary of the date the child was born. ***(Rev Rul 2003-72, 2003-33 IRB)***

Child Born Jan 1 - *A child born on Jan. 1, 2001 attains the age of 18 on Jan. 1, 2019.*

CREDIT AMOUNT

An individual is allowed an income tax credit for qualified adoption expenses. ***(Code Sec. 23(a)(1))*** The total expenses that can be taken as a credit for all tax years with respect to an adoption of a child is an annually inflation adjusted amount as illustrated in the table below.

Special Needs Child - In the case of an adoption of a child with special needs, the full credit limit will be allowed for the tax year in which the adoption becomes final, regardless of whether the taxpayer has qualified adoption expenses. ***(Code Sec.23(a)(3))***

Year	2017	2018	2019	2020
Max Credit	$13,570	$13,810	$14,080	$14,300
Phase-out:				
Threshold	$203,540	$207,140	$211,160	$214,250
Complete	$243,540	$247,140	$251,160	$254,250
If values not shown, not available at publication date				

In the case of a taxpayer adopting a U.S. child with special needs, the taxpayer may be able to exclude up to $14,080 (2019) and claim a credit for additional expenses up to $14,080 (minus any qualified adoption expenses claimed for the same child in a prior year). The exclusion may be available, even if the taxpayer or the taxpayer's employer didn't pay any qualified adoption expenses, provided the employer has a written qualified adoption assistance program (for further details and the definition of a special needs child, see the instructions for Form 8839).

PHASE OUT

The credit is phased out if the taxpayer's adjusted gross income (as computed without the foreign income exclusions of Code Sections 911, 931 and 933) exceeds the inflation adjusted threshold amount and is fully eliminated when AGI reaches the threshold cap. The table above includes both beginning and ending phase out amounts. ***(Code Sec. 23(b)(2))*** Note that the phase-out range is the same for all filing statuses.

QUALIFIED ADOPTION EXPENSES

Reasonable and necessary adoption fees, court costs, attorney fees, expenses required by a state as a condition of adoption, and other expenses that are directly related to and the principal purpose of which is the taxpayer's legal adoption of an eligible child are qualified adoption expenses. ***(Code Sec. 23(d)(1)(A))*** Expenses that violate state or federal laws, are incurred while carrying out a surrogate parenting arrangement, or those related to adoption of a spouse's child are not eligible. ***(Code Sec. 23(d)(1)(B); 23(d)(1)(D))***

When Expenses Are Paid

- Paid in a year before adoption is final **-** The credit for an expense paid or incurred before the tax year in which the adoption becomes final is allowed for the tax year following the tax year during which it is paid or incurred. ***(Code Sec. 23(a)(2)(A))***
- Paid in the year the adoption is final - For an expense paid or incurred during the tax year in which the adoption becomes final, the credit is allowed for the tax year in which it's paid or incurred. ***(Code Sec. 23(a)(2)(B))***
- Paid in a year after the adoption is final - For an expense paid or incurred after the tax year in which the adoption becomes final, the credit is allowed for the tax year in which it's paid or incurred. ***(Code Sec. 23(a)(2)(B))***

  Example *- A taxpayer pays or incurs $2,000 of qualified adoption expenses in Year 1, $1,000 in Year 2, nothing in Year 3 when the adoption becomes final, and $4,000 in Year 4, the year after the adoption becomes final. The $2,000 of expenses paid or incurred in Year 1 would be allowed in Year 2. The $1,000 of expenses paid or incurred in Year 2 would be allowed in Year 3. The $4,000 paid or incurred in Year 4, would be allowed in Year 4, the year in which paid or incurred, for a total of $7,000.*

Failed Adoption of a U.S. Child - Qualified adoption expenses paid or incurred in an unsuccessful attempt to adopt an eligible U.S. child before successfully finalizing the adoption of another eligible child are eligible for the credit. The unsuccessful/successful adoptions are treated as one effort for each eligible child for purposes of the dollar limit on the credit. Even expenses paid in connection with an unsuccessful attempt to adopt a U.S. child where no later adoption is successful are eligible; treat them the same way as expenses paid for adoptions that aren't final by the end of year. (IRS 2018 Form 8839 Instructions, pages 3 and 6)

FOREIGN ADOPTION

For a foreign adoption, the credit is allowed only in the year the adoption becomes final ***(Code Sec. 23(e)(2)),*** and no credit is allowed if the adoption doesn't become final. ***(Code Sec. 23(e)(1))*** However for expenses paid or incurred in a tax year after the adoption becomes final, the credit may be taken in the year the expenses are paid or incurred.

- **Safe Harbor – Finality – Foreign Adoptions** – **Revenue Procedure 2010-31** provides safe harbors for determining when foreign adoptions are final for purposes of the adoption credit and the exclusion of employer reimbursements for qualifying adoption expenses with respect to adoptions covered by the Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoptions ("Convention"). The safe harbors are:
  - The IRS will not challenge the taxpayer's treatment of an adoption that is finalized in another country that is party to the Convention (the sending country) as final if the sending country enters a final decree of adoption, or the U.S. Secretary of State issues a Hague Adoption Certificate (IHAC).
  - If the adoption is finalized in the U.S., the IRS won't challenge the taxpayer's treatment of an adoption of a child who has entered the U.S. for the purpose of adoption as final in the taxable year that a state court enters a final decree of adoption if the Secretary of State has issued a Hague Custody Certificate (IHCC).

    General information about foreign adoptions and the Convention can be accessed through the Department of State website at http://www.adoption.state.gov. Determining finality of foreign adoptions from countries not party to the Hague Convention is covered in Rev. Proc. 2005-31, 2005-1 C.B. 1374.
- **IR visa** - is a visa issued to an orphan if (1) a simple adoption occurs in the foreign-sending country, or (2) the competent authority of the foreign-sending country grants legal guardianship or custody either to the prospective adoptive parent or parents or to an individual or agency acting on behalf of the prospective adoptive parent or parents.

SUBSTANTIATION REQUIREMENTS

Taxpayers claiming the adoption credit for 2012 or later years are not required to attach a copy of substantiating documentation to their returns. Instead, the documentation should be retained by the taxpayer. The following documents are the types of documents that an adopting taxpayer should retain in case of IRS inquiry:

For domestic and foreign adoptions that have been finalized:

- If finalized in the United States, an adoption order or decree.
- For a foreign adoption governed by the Hague Convention and finalized in another country, (1) a Hague Adoption Certificate (Immigrating Child), (2) an IH-3 visa, or (3) a foreign adoption decree, translated into English.
- For a foreign adoption from a country that is not party to the Hague Convention, (1) a foreign adoption decree (translated into English), or (2) an IR-2 or IR-3 visa.

Information to be included – An order or decree should include information that establishes that the taxpayer's adoption of the eligible child has been finalized and the date finalized. Redaction of sensitive personal information is permitted, but the IRS may require an unredacted copy of the document if needed to substantiate the claim for the credit.

Adoptions of special needs children – In addition to the documentation listed above, a taxpayer adopting a special needs child should retain a copy of the state determination of special needs for that child. Redaction is permitted but IRS may still require an unredacted copy.

For domestic adoptions that are not final – one of the following:

1. An adoption taxpayer identification number (ATIN), obtained by the taxpayer for the child, included on the taxpayer's return,
2. A home study completed by an authorized placement agency,
3. A placement agreement with an authorized placement agency,
4. A document signed by a hospital official authorizing the release of a newborn child from the hospital to the taxpayer for legal adoption,
5. A court document ordering or approving the placement of a child with the taxpayer for legal adoption, or
6. An original affidavit or notarized statement signed under penalties of perjury from an adoption attorney, government official or other person, stating that the signor (a) placed or is placing a child with the taxpayer for legal adoption, or (b) is facilitating the adoption process for the taxpayer in an official capacity, summarizing the facilitation.

OTHER ISSUES

- ***Re-adoption expenses as QAE***.- Many adoptive parents pay or incur expenses in connection with home state re-adoptions of their foreign-born children for practical reasons, such as obtaining a birth certificate issued in English, rather than because re-adoption is required by law. Otherwise qualified expenses paid or incurred in connection with a re-adoption do not fail the requirement that QAE must be "reasonable and necessary."
- ***Employer-reimbursed expenses*** - A taxpayer can't claim a credit for any employer-reimbursed adoption expense. ***(Code Sec. 23(b)(3)(A))***
- ***Adoptive child ID number*** - The taxpayer must include (if known) the name, age and taxpayer identification number (TIN) of the child on the return. ***(Code Sec. 23(f)((2)(A))*** Prospective adoptive parents who have had a child placed in their household by an "authorized placement agency" and meet certain other requirements may apply (use Form W-7A) for a temporary (two-year) adoption taxpayer identification number (ATIN) for the child (unless the child is an alien eligible to get an ITIN) to satisfy filing requirements, but not for earned income credit. ***(Reg § 301.6109-3)*** For a taxpayer to be eligible for the earned income credit and child tax credit/additional child tax credit, the qualifying child must have a Social Security number issued before the extended due date of the return for the year for which the credit is being claimed. However, an ATIN is an acceptable number for claiming the "other dependent credit" that was created as part of the TCJA. (Pub 972, 2018, page 2)

MARRIED TAXPAYERS

To get the credit, married individuals must file jointly (except as noted below) ***(Code Sec 23(f)(1))***

Married Persons Filing Separate Returns **–** A married individual filing a separate return is able to take the credit or exclusion if all of the following apply (per 2018 Form 8839 Instructions page 2).

- Their modified AGI is less than the top of the phaseout threshold for the year or they have a qualifying adoption credit from a prior year.
- They report the required information about the eligible child.
- They lived apart from their spouse during the last 6 months of the year.
- The eligible child lived in their home more than half of the year.
- They provided over half the cost of keeping up their home.

ALTERNATIVE MINIMUM TAX

The adoption credit is not subject to the §26(a) limitation. Thus, the post-2011 credits are allowed against the alternative minimum tax.

CREDIT CARRYOVER

> **Note:** There can be no carryovers from a year prior to 2012 since credit for 2010 and carryover from prior years were refundable in the 2010 return, and the credit for 2011 was also fully refundable.

Post-2011 Carryovers – If the adoption credit allowable for the tax year exceeds the limitation in effect for that year, the excess credit can be carried to the next tax year and added to the adoption credit allowable for that year.

But no adoption credit can be carried forward to any tax year following the fifth tax year after the tax year in which the credit arose. For purposes of this five-year limit, credits are treated as used on a first-in, first-out (FIFO) basis.

Credit amounts carried forward from a previous tax year are not subject to the income phaseout rules in subsequent tax years. However, a carryforward amount is still subject to the carryforward year's dollar limitation and the limitation that the credit taken cannot exceed the taxpayer's tax liability for the year. (***Code Sec. 23(b)(2)(A***))

EFFECT OF ADOPTION CREDIT ON FOREIGN TAX CREDIT LIMITATION:

The total amount of the foreign tax credit that a taxpayer may claim is limited based in part on the amount of U.S. tax against which the credit is taken. For individuals, this amount is reduced by any allowable nonrefundable personal credits for the tax year.

CALIFORNIA DIFFERENCES

California Credit for Child Adoption Costs — Credit Code 197
For the year in which an order of adoption is entered, the taxpayer may claim a credit for 50% of the cost of adopting a child who is a citizen or legal resident of the United States and who was in the custody of a California public agency or a California political subdivision. Include the following costs if directly related to the adoption process:

- Fees of the Department of Social Services or a licensed adoption agency;
- Medical expenses not reimbursed by insurance; and
- Travel expenses for the adoptive family.

Qualifying costs that were paid or incurred in any year prior to the year in which the order of adoption is entered may be included in determining the credit for the year the credit is allowed.

This credit does not apply when a child is adopted from another country or another state, or was not in the custody of a California public agency or a California political subdivision.

Note: Any deduction for the expenses used to claim this credit must be reduced by the amount of the child adoption costs credit claimed. Use the worksheet to figure this credit. If more than one adoption qualifies for this credit, complete a separate worksheet for each adoption. The maximum credit is limited to $2,500 per minor child. California does not have a separate adoption credit form.

CA ADOPTION WORKSHEET

1. Enter qualifying costs for the child.......................... __________
2. Credit percentage — 50%.. .50
3. Credit amount. Multiply Line 1 by Line 2.
   Do not enter more than $2,500................................ __________

Carryover: The allowable credit is limited for a tax year to $2,500 per minor child. The excess credit can be carried over to future years until the credit is used up.

CA RDP Issues – See chapter 1.12 for Federal and Adoption credit issues related to RDPs.

PENSION PLAN START-UP COSTS CREDIT

- **Credit amount – 50%** of administrative and retirement-education expenses for a new plan.
- **Credit Limit** - $500 per year (3 years)
- **Eligible Employer** – Employs **100 or fewer employees** who received in excess of **$5,000** in compensation in prior year.
- **Three Year Look Back** – No plans established
- **Non-Highly Compensated Employee** – At least one
- **General Business Credit** – Credit is part of the General Business Credit. Thus, unused credit can be carried back one year and any excess then carried forward 20 years.

Three-Year Look-back	9.09.01

Related IRC and IRS Publications and Forms

- **Form 8881** - Credit for Small Employer Pension Plan Startup Costs*
- **Form 3800** – General Business Credit
- **IRC Sec 45E**

*An individual whose only source of this credit is from a partnership or S corporation is not required to complete Form 8881. Instead, the credit is reported directly on Form 3800.

Sec 45E provides for a nonrefundable income tax credit for 50% of the administrative and retirement-education expenses for any small business that adopts a new qualified defined benefit or defined contribution plan (including a Code Sec. 401(k) plan), SIMPLE plan, or simplified employee pension ("SEP")).

ELIGIBLE EMPLOYER

An "eligible employer" will have the same meaning as that term has in *Code Sec. 408(p)(2)(C)(i)* which defines the types of employers that are eligible to adopt SIMPLE IRA plans (i.e., an employer that employs 100 or fewer employees who received in excess of $5,000 of "compensation" from the employer for the preceding year).

THREE YEAR LOOK-BACK

An employer won't be eligible for the credit if, during the three-tax year period immediately preceding the first tax year for which the small employer pension plan start-up costs credit is otherwise allowable for a qualified employer plan of the employer, the employer or any member of any controlled group including the employer (or any predecessor of either) established or maintained a qualified employer plan with respect to which contributions were made, or benefits were accrued, for substantially the same employees that are in the qualified employer plan. *(Code Sec. 45E(c)(2))*

QUALIFIED START-UP COSTS DEFINED

For purposes of the credit, qualified start-up costs mean any ordinary and necessary expenses of an eligible employer which are paid or incurred in connection with: *(Code Sec. 45E(d)(1)(A))*

- The establishment or administration of an eligible employer plan (defined below), or *(Code Sec. 45E(d)(1)(A)(i))*
- The retirement-related education of employees with respect to the eligible employer plan. *(Code Sec. 45E(d)(1)(A)(ii))*

Examples of eligible expenses include consulting fees, set-up fees for the investments into which the plan's funds are deposited, and costs to modify payroll systems.

At least one non-highly compensated participant - Qualified start-up costs won't include any expense in connection with a plan that doesn't have at least one employee eligible to participate who is not a highly-compensated employee. The code does not define a highly compensated employee, but presumably refers to the definition included in the anti-discrimination rules of IRC § 414(q) which states:

414(q)(1) In general - The term "highly-compensated employee" means any employee who:

(A) Was a 5-percent owner at any time during the year or the preceding year, or

(B) For the preceding year:

(i) Had compensation from the employer in excess of $80,000*, and

(ii) If the employer elects the application of this clause for such preceding year, was in the top-paid group of employees for such preceding year.

** The $80,000 amount is inflation-indexed and for 2019 it is $125,000 (up from 120,000 for years 2015 through 2018).*

Also, if the credit is for the cost of a payroll deduction IRA arrangement, the arrangement must be made available to all employees of the employer who have worked with the employer for at least three months.

ELIGIBLE EMPLOYER PLAN DEFINED

For purposes of the credit, an eligible employer plan will include:

- Any qualified pension, profit-sharing, or stock bonus plan which includes an exempt trust,
- A qualified annuity plan,
- A simplified employee pension, and
- Any simple retirement account (i.e., any SIMPLE IRA).

$500 LIMITATION

The amount of the credit for any tax year can't exceed:

- $500 for the first credit year and each of the two tax years immediately following the first credit year (defined below), and *(Code Sec. 45E(b)(1)).*
- Zero for any other tax year. (*Code Sec. 45E(b)(2))*

Thus, the credit will apply to 50% of the first $1,000 in administrative and retirement-education expenses for the plan for each of the first three years of the plan. *(Com Rept.)*

FIRST CREDIT YEAR DEFINED

For purposes of the dollar limitation, the "first credit year" is:

(1) The tax year which includes the date that the eligible employer plan (defined above) to which the qualified start-up costs relate becomes effective, or *(Code Sec. 45E(d)(3)(A)).*

(2) At the election of the eligible employer (defined above), the tax year preceding the tax year referred to in (1) above. *(Code Sec. 45E(d)(3)(B))*

DISALLOWANCE OF DEDUCTION IF THE CREDIT CLAIMED

No deduction will be allowed for that portion of the qualified start-up costs paid or incurred for the tax year which is equal to the small employer pension plan start-up cost credit. *(Code Sec. 45E(e)(2))*

ELECTION OUT OF THE CREDIT

The credit will not apply to a taxpayer for any tax year if the taxpayer elects to have the credit not apply for that tax year. *(Code Sec. 45E(e)(3))* The election out of the credit is done simply by not filing Form 8881 with the employer's return.

In most cases, it will be advantageous for employers to claim the credit (rather than electing out of the credit). But, a taxpayer subject to the alternative minimum tax (AMT) might reduce his overall tax liability by electing out of the credit, because the credit will be part of the general business credit and can't be used against the AMT.

CREDIT IS PART OF THE GENERAL BUSINESS CREDIT

In the case of an eligible employer (as defined above), the small employer pension plan start-up costs credit will be part of and subject to the general business credit rules, including carryback and carryforward of unused credit when tax liability is less than the credit amount. See chapter 9.00 for details of the general business credit.

CALIFORNIA DIFFERENCES California has no equivalent credit.

HOMEOWNER SOLAR ENERGY CREDIT

Overview

NOTE: Residential Energy Property Credit – Sec 25C – Expired after 2017 after being extended by the Tax Technical Corrections Act of 2018 (P.L. 115-141). This was the $500 (lifetime) home energy efficient credit.

Residential Energy Efficient Property Credit (REEP credit)– Sec 25(D)

- Taxpayer's Main or Second Home (Except for Fuel Cell)
- Credit Percentages (no limit on credit amount):
  - Qualified **Solar Electric and Solar Water Heating Systems** 30% through 2019
    - 26% for 2020
    - 22% for 2021
- **Non-refundable Personal Credit –** The energy credits offset AMT. Carryover available.

RAPID FINDER

SOLAR CREDIT (Sec 25D)

This is a personal tax credit available for the purchase of residential energy efficient property that uses solar power, to create electricity. Other types of alternative energy property eligible for the Sec 25D credit are listed below but not otherwise covered in this material.

Effective Dates:

- Qualified **Solar Electric and Solar Water Heating Systems –** The PATH Act extended this credit through 2021 and phased it out. There is no annual dollar cap on the credit for these systems. The credit percentages are:
  - Through 2019: 30%
  - 2020: 26%
  - 2021: 22%
- Qualified **Fuel Cell** Property (Expires after Dec. 31, 2021*)
- Qualified **Small Wind Energy Property** (Expires after Dec. 31, 2021*)
- Qualified **Geothermal Heat Pumps** (Expires after Dec. 31, 2021*)

  *Extended by the Bipartisan Budget Act of 2018 (P.L. 115-123)

Definitions:

- **Qualifying solar water heating property –** Qualifies if used in a dwelling unit located in the U.S. that is used by the taxpayer as a main or second residence where at least half of the energy used by the property for such purpose is derived from the sun. Heating water for swimming pools or hot tubs does not qualify for the credit. The property must be certified for performance by the Solar Rating Certification Corporation or a comparable entity endorsed by the state government where the property is installed.
- **Qualified solar electric property -** is property that uses solar energy to generate electricity for use in a dwelling unit located in the U.S. and used as a main or second residence by the taxpayer.

Other aspects of the credit:

- **Limited Carryover** - the credit is subject to Code Sec. 26, which limits the amount of various nonrefundable personal credits that are allowed in a tax year. However, the portion of the credit that is not allowed because of this limitation may be carried to the next tax year and added to the credit allowable under Code Sec. 25D for that year. (Code Sec. 25D(c))

  Caution: The code infers that any credit carryover can be added to the Sec 25D credit allowed in the subsequent year. However, what is unclear is whether any carryover will be allowed to 2022 once the credit expires at the end of 2021.
- **Installation Costs** - expenditures for labor costs allocable to onsite preparation, assembly, or original installation of property eligible for the credit, and for piping or wiring connecting the property to the residence, are expenditures that qualify for the credit. (Code Sec. 25D(e)(1))

  Roof - Expenditures relating to a solar panel or other property installed as a roof (or portion thereof) are treated as installation costs even though it constitutes a structural component of the structure on which it is installed (Sec 25D(e)(2)).

  Ground-mounted – IRS Notice 2013-70 (Sec. 5.02, Q&A 25) states that the Sec 25D credit may be claimed for solar panels that are not directly located on the taxpayer's home if they are used to generate electricity for the home. Although there is no specific IRS guidance related to onsite preparation and structural components for ground-mounted solar arrays, it would appear that those costs would qualify as installation costs for the credit (IRS Letter Ruling 201536017).
- **Swimming Pool** - expenditures that are properly allocable to a swimming pool, hot tub, or any other energy storage medium having a function other than the function of such storage are **NOT** taken into account for purposes of the credit. (Code Sec. 25D(e)(3))

SPECIAL ISSUES:

Basis Adjustment - The basis of the property is increased by the amount of the expenditure and reduced by the amount of the credit. (Code Sec. 1016(a)(34); Code Sec. 1016(a)(35)). This will generally create a different basis for federal and state purposes where the state does not provide a credit or it differs from the federal credit amount.

Association or Cooperative Costs – A taxpayer who is a member of a condominium management association for a condominium he or she owns, or a tenant-stockholder in a cooperative housing corporation, is treated as having paid his or her proportionate share of any qualifying costs of such association or corporation.

Mixed-Use Property - If less than 80% of the property is used for non-business purposes, only that portion of expenditures that is used for non-business purposes is taken into account. (Code Sec. 25C(e)(1); Code Sec. 25D(d)(7)) Thus, if the business use of a dwelling unit is 20% or less, the full amount of the expenditures is eligible for the credit.

NOTE: The 80% rule would come into play with residences that have a home office or other business use.

Timing and Treatment of Expenditures - The expenditures are treated as made when the original installation is completed, except that expenditures in connection with the construction or reconstruction of a structure are treated as made when the taxpayer's original use of the constructed or reconstructed structure begins. (Code Sec. 25C(e)(1); Code Sec. 25D(e)(8))

Multiple Installations – The credit is available for multiple installations. For instance, after the initial installation, if a taxpayer adds additional panels to increase capacity or adds batteries for storing electricity, these would be treated as original installations and the credit would apply. On the other hand, if a taxpayer had to replace damaged panels, inoperative batteries or perform other maintenance on the system, these items would not be an original system and their costs would not qualify for the credit.

Who Gets the Credit – The taxpayer need not own the property to qualify for the credit, as the taxpayer need only be a "resident" of the home. For the Residential Energy Efficient Property Credit, the code does not specify that an individual has to own the home, only that it is the taxpayer's residence.

IRC Sec. 25D(b)(2) - Qualified solar electric property expenditure - *The term "qualified solar electric property expenditure" means an expenditure for property which uses solar energy to generate electricity for use in a dwelling unit located in the United States and used as a residence by the taxpayer*.

Example*: Son lives with his mother who owns the home. Son pays to have the solar system installed. The son gets the credit.*

Newly Constructed Homes – Sec 25D credits can be taken for newly constructed homes if the costs of the residential energy efficient property can be separated from the home construction and the required certification documents are available (Sec 25D(e)(8)(B)).

Second Home - A taxpayer may claim a Sec 25D credit for other qualifying properties described in §25D that are not fuel cell properties installed in or on a dwelling unit used as a second home or a vacation home by the taxpayer. But a taxpayer may not claim the §25D credit for expenditures for improvements made to an investment property, such as rental property, that is not also used as a residence by the taxpayer. Thus, presumably if a taxpayer has multiple second homes the credit will apply to all of them as long they are located in the United States and used as a residence by the taxpayer.

HERO Program Financing and Deductions - The HERO program originated in Riverside County in Southern California – the purpose being to provide financing for energy related improvements to a taxpayer's home with principal and interest payments added to the taxpayer's property tax bill for the year. The HERO program has since spread to almost all counties in CA and even some areas outside of California.

The HERO loans – sometimes referred to as PACE (Property Assessed Clean Energy) loans – are used primarily to finance high cost energy improvements such as home solar energy property. The complication here is that the annual loan payments are added to the home's property tax bill leading many to believe the payments are deductible as property taxes. This includes a number of real estate agents with websites making this claim.

The truth of the matter is the payments are loan payments and NOT deducible as property tax. The interest portion of the separately stated payments is deductible as home acquisition debt interest and the principal portion is not deductible at all. The principal portion, however, may add to the home's basis to the extent not used to determine an energy related credit.

The HERO program will have provided your client with a loan amortization statement, which allows you to determine what portion of the payment is home acquisition debt interest. As an additional minor complication, the loan amortization schedule provided by the HERO program administrator is on a fiscal year, and the income tax reporting is on a calendar year, requiring you to make an adjustment. Generally, you can approximate the interest for the calendar year by adding the interest amounts for the two fiscal years including the calendar and dividing by 2.

In addition, the interest is not being reported on a 1098 so there will be mismatch with IRS's computer.

Comment: If you are providing clients with guidance in financing their home energy improvements, be sure to make them aware of the very high interest rates associated with HERO loans, in excess of 8%. Other sources of funds should be explored first, although the HERO loan qualifications are very liberal.

Residential Rentals – Although a tax credit for installation of solar equipment on a residential rental isn't allowed under Sec 25D, a credit may be available under Sec 48 – Energy Credit as part of the general business credit of Sec 38. Property eligible for the general business credit is tangible property for which depreciation is allowed, and this would include solar equipment installed in a residential rental property. (Sec 48(a)(5)(D)) The solar system must be used to generate electricity or to heat or cool a structure, but not for heating a swimming pool. (Sec 48(a)(3)(A)(i)) While Sec 50(b)(2) generally prohibits a business credit for property used primarily to furnish lodging, this prohibition doesn't apply to "any energy property". (Sec. 50(b)(2)(D)) The same credit rates and phaseouts apply under Sec 48 as under Sec 25D.

CALIFORNIA DIFFERENCES

California has no equivalent credit. Therefore, the basis of property on which the federal credit is claimed will be different for federal and California.

NOTES

BUSINESS ENERGY CREDITS

One of the credits that is included in the business investment credit component of the general business credit is a credit for investments in alternative energy sources. Although the credit includes a wide range of energy sources, many of them apply to big businesses and are not covered here. This chapter is an overview of the credits that might apply to small trades or businesses.

- **Form 3468 –** Investment Credit
- **Form 3800 –** General Business Credit
- **Form 8582-CR** – Passive Activity Credit Limitations
- **Form 8810** – Corporate Passive Loss and Credit Limitations.
- **IRC Sec 48**

A taxpayer can claim (on Form 3468) the following energy credits (in each case, the percentage applies to the basis of eligible energy property placed in service during the year). The results from Form 3468 – Investment Credit are transferred to Form 3800 – General Business Credit (see chapter 3.00)

- *Solar Energy Property* - (Form 3468-Line 12b) This credit is for solar energy property (i.e., equipment that uses solar energy to generate electricity, to heat or cool (or provide hot water for) a structure, or to provide solar process heat, but not for heating a swimming pool), the construction of which begins before Jan. 1, 2022 subject to the phaseouts below. (Code Sec. 48(a)(3)(A)(i))

SOLAR ENERGY PROPERTY PHASE-OUT		
Date Construction Begins	Placed in Service	Credit
Before 1/1/2020	Before 1/1/2024	30%
1/1/20 - 12/31/20	Before 1/1/24	26%
1/1/21 - 12/31/21	Before 1/1/24	22%
Before 1/1/22	On or after 1/1/24	10%
On or after 1/1/22	Any	10%

- *Fiber-Optic Solar Energy Property* - (Form 3468-Line 12b) This credit is for fiber-optic solar energy equipment which uses solar energy to illuminate the inside of a structure using fiber-optic distributed sunlight, the construction of which begins before Jan. 1, 2022 subject to the phaseouts below. (Code Sec. 48(a)(3)(A)(ii))

FIBER-OPTIC SOLAR ENERGY PROPERTY PHASE-OUT		
Date Construction Begins	Placed in Service	Credit
Before 1/1/2020	Before 1/1/2024	30%
1/1/20 - 12/31/20	Before 1/1/24	26%
1/1/21 - 12/31/21	Before 1/1/24	22%
Before 1/1/22	On or after 1/1/24	0%
On or after 1/1/22	Not Applicable	0%

- *Small Wind Energy Property* - This is a credit for qualified small wind energy property the construction of which begins before 2022, subject to the phaseouts below. (Code Sec. 48(a)(3)(A)(vi))

SMALL WIND ENERGY PROPERTY PHASE-OUT		
Date Construction Begins	Placed in Services	Credit
Before 1/1/2020	Before 1/1/2024	30%
1/1/20 - 12/31/20	Before 1/1/24	26%
1/1/21 - 12/31/21	Before 1/1/24	22%
Before 1/1/22	On or after 1/1/24	0%
On or after 1/1/22	Not Applicable	0%

- *Fuel Cell Property* – (Form 3469–Line 12c) This is a credit for qualified fuel cell property, the construction of which begins before Jan. 1, 2022, subject to the phaseouts below. The credit is not to exceed an amount equal to $1,500 for each 0.5 KW of capacity. (Code Sec. 48(a)(2)(A)(i)(I))

FUEL CELL ENERGY PROPERTY PHASE-OUT		
Date Construction Begins	Placed in Service	Credit
Before 1/1/2020	Before 1/1/2024	30%
1/1/20 - 12/31/20	Before 1/1/24	26%
1/1/21 - 12/31/21	Before 1/1/24	22%
Before 1/1/22	On or after 1/1/24	0%
On or after 1/1/22	Not Applicable	0%

QUALIFICATIONS:

1. Meet the performance and quality standards, if any, that have been prescribed by regulations and are in effect at the time the property is acquired;
2. Be property for which depreciation (or amortization in lieu of depreciation) is allowable; and
3. Be property either:
   a. The construction, reconstruction, or erection of which is completed by the taxpayer; or
   b. Acquired by the taxpayer if the original use of such property commences with the taxpayer. Energy property doesn't include any property acquired before February 14, 2008, or to the extent of basis attributable to construction, reconstruction, or erection before February 14, 2008, that is public utility property, as defined by section 46(f)(5) (as in effect on November 4, 1990), and related regulations.

OTHER REQUIREMENTS:

- The basis of energy property must be reduced by 50% of the energy credit determined.
- The basis of energy property used for figuring the credit must be reduced by any amount attributable to qualified rehabilitation expenditures.
- Energy property that qualifies for a grant under section 1603 of the American Recovery and Reinvestment Tax Act of 2009 isn't eligible for the energy credit for the tax year that the grant is made or any subsequent tax year.

WHAT ABOUT RENTALS?

Property that is eligible for the general business credit is tangible property for which depreciation is allowable (Sec. 48(a)(5)(D)). Solar panels installed on a residential rental would meet that requirement.

But, as noted in the Form 3468 instructions and per the code, business credits are generally not available for property that is used predominantly to furnish lodging (Sec. 50(b)(2)). However, there is an exception: Sec. 50(b)(2)(D) provides the restriction to property used predominantly to furnishing lodging does not apply to the energy credit. Thus, rental property would qualify.

One more hurdle: because rentals are considered passive activities for purposes of the Sec 48 energy credits, before the credit from the 3468 can pass onto the Form 3800, the credit must first pass through Form 8582-CR – Passive Activity Credit Limitations or Form 8810 – Corporate Passive Loss and Credit Limitations.

CALIFORNIA DIFFERENCES

CA has no equivalent credit but these repealed California energy credits have carryover provisions:

- Commercial Solar Energy – Credit Code 181
- Energy Conservation – Credit Code 182
- Solar Energy – Credit Code 180

The Details

CREDIT AMOUNT

Employers may elect to claim a WOTC for 40% of first-year wages, up to $6,000 (more for certain targeted groups) per employee, for hiring workers from one of several targeted groups. Thus except for those targeted groups with higher allowable creditable wages, the maximum credit is $2,400 (40% of $6,000). First-year wages are wages paid during the tax year for work performed during the one-year period beginning on the date the target group member begins work for the employer.

For the full credit (40%), the targeted employee must work for a minimum of 400 hours in the first year. For those that work between 120 and 399 hours the credit percentage is reduced to 25%.

Targeted groups after 2015 include:

- **Veterans** - A qualified veteran is a veteran who is certified by the designated local agency as falling within one of the following categories:
  - *Veteran Who is a Member of a Family Receiving Food Stamps for at least Three Months* - The individual is a member of a family receiving assistance under a food stamp program under the Food and Nutrition Act of 2008 for at least three months, all or part of which is during the 12-month period ending on the hiring date. The maximum qualifying first-year wage taken into account is $6,000. **Thus the maximum WOTC is $2,400 (.4 x $6,000)** (*Code Sec. 51(d)(3)(A)(i)*)
  - *Veteran Entitled to Compensation for a Service-Connected Disability Hired Within First Year after Separation from Service* - The veteran must be entitled to compensation for a service-connected disability and have a hire date that isn't more than one year after having been discharged or released from active duty. The maximum qualifying first-year wage taken into account is $12,000. **Thus, the maximum WOTC is $4,800 (.4 x $12,000)** *(Code Sec. 51(d)(3)(A)(ii)(I))*
  - *Veteran Entitled to Compensation for a Service-Connected Disability with Six Months of Unemployment in the Year Preceding the Hire Date* - The veteran has aggregate periods of unemployment during the 1-year period ending on the hiring date that equal or exceed six months. The maximum qualifying first-year wage taken into account is $24,000. **Thus the maximum WOTC is $9,600 (.4 x $24,000)** *(Code Sec. 51(d)(3)(A)(ii)(II))*

- *Veteran Has Aggregate Periods of Unemployment Exceeding Four Weeks in the year Preceding the Hire Date* - The veteran has aggregate periods of unemployment during the 1-year period ending on the hiring date which equal or exceed four weeks (but less than six months). The maximum qualifying first-year wage taken into account is $6,000. Thus, the **maximum WOTC is $2,400 (.4 x $6,000)** *(Code Sec. 51(d)(3)(A)(iii))*
- *Veteran Has Aggregate Periods of Unemployment Exceeding Six Months in the Year Preceding the Hire Date* - The veteran has aggregate periods of unemployment during the 1-year period ending on the hiring date which equal or exceed six months. The maximum qualifying first-year wage taken into account is $14,000. Thus, the **maximum WOTC is $5,600 (.4 x $14,000)** *(Code Sec. 51(d)(3)(A)(iv))*

- **Recipients of Temporary Assistance for Needy Families** (TANF) program – The assistance must be received for any 9 months during the 18-month period ending on the hiring date. The maximum qualifying first-year wage taken into account is $6,000, and thus the **maximum WOTC is $2,400 (.4 x $6,000)**.
- **Long-Term Family Assistance (TANF) Recipients** - The first-year wages considered for this group is $10,000 with a maximum credit of $4,000 per employee. In addition, this group qualifies for second year credit equal to 50% of up to $10,000 of the second-year wages. A qualified individual is one who is a member of a family that:
  - Has received temporary assistance for needy families (TANF) payments for at least 18 consecutive months ending on the hiring date, or
  - Receives TANF payments for any 18 months (whether or not consecutive) beginning after August 5, 1997, and the earliest 18-month period beginning after August 5, 1997, ended during the past 2 years, or
  - Stopped being eligible for TANF payments because federal or state law limits the maximum period such assistance is payable, and the individual is hired not more than 2 years after such eligibility ended.

For the following groups, unless noted otherwise the maximum qualifying first-year wage taken into account is $6,000, and thus the maximum WOTC is $2,400 (.4 x $6,000):

- **Long-term unemployed individuals** (unemployed 27 consecutive weeks) hired after 2015.
- **Qualified ex-felon -** An individual who has been convicted of a felony under any federal or state law and is hired not more than 1 year after the conviction or release from prison for that felony.
- **Vocational rehabilitation referral -** An individual who has a physical or mental disability resulting in a substantial handicap to employment and who was referred to the employer upon completion of (or while receiving) rehabilitation services by a rehabilitation agency approved by the state, an employment network under the Ticket to Work program, or the Department of Veterans Affairs.
- **Summer youth employee -** An individual who:
  - Performs services for the employer between May 1 and September 15,
  - Is age 16 but not yet age 18 on the hiring date (or if later, on May 1),
  - Has never worked for the employer before, and
  - Lives within an empowerment zone.

  The maximum amount of qualified first-year wages that may be taken into account for a summer youth employee is $3,000, and thus the maximum WOTC is $1,200 if the employee works 400 hours or more.
- **Supplemental Nutrition Assistance Program (SNAP) recipient.** An individual who:
  - Is at least age 18 but not yet age 40 on the hiring date, and
  - Is a member of a family that—
    a. Has received SNAP benefits for the 6-month period ending on the hiring date or
    b. Is no longer eligible for such assistance under section 6(o) of the Food and Nutrition Act of 2008, but the family received SNAP benefits for at least 3 months of the 5-month period ending on the hiring date.
- **SSI recipient -** An individual who is receiving supplemental security income benefits under title XVI of the Social Security Act (including benefits of the type described in section 1616 of the Social Security Act or section 212 of Public Law 93-66) for any month ending during the 60-day period ending on the hiring date.
- **Designated community residents** - These are individuals certified by the designated local agency as having attained age 18 but not age 40 on the hiring date, and as having their principal place of abode within an empowerment zone, enterprise zone, renewal community or rural renewal county. Wages that qualify for the WOTC don't include wages paid or incurred for services performed while the individual's principal place of abode is outside an empowerment zone or rural renewal county. Code Sec. 51(d)(1) and Code Sec. 51(d)(5))

Qualified Zones, Communities and Counties - Refer to the list of designated areas available in the instructions to IRS Form 8850 or go to: https://www.hud.gov/program_offices/comm_planning/economicdevelopment/programs/rc/tour.

Certification Process - To be eligible to claim a WOTC, an employer files Form 8850 (Pre-Screening Notice and Certification Request for the Work Opportunity Credit) with the State Workforce Agency (SWA) **no later than the 28th day after the potentially eligible employee begins work**. Then, after the worker is state-certified as being a member of a targeted group and puts in sufficient hours, the employer claims the WOTC on Form 5884 (Work Opportunity Credit).

Fast-tracked Certification For Veterans **-** A veteran will be treated as certified by the designated local agency as having aggregate periods of unemployment meeting the requirements of:

- Code Sec. 51(d)(3)(A)(ii)(II) or Code Sec. 51(d)(3)(A)(iv), if he or she is certified by the local agency as being in receipt of unemployment compensation under State or Federal law for not less than six months during the 1-year period ending on the hiring date.
- Code Sec. 51(d)(3)(A)(iii), if he or she is certified by the local agency as being in receipt of unemployment compensation under State or Federal law for not less than four weeks (but less than six months) during the 1-year period ending on the hiring date.

Other Issues:

- No credit is allowed for an employee who is related to the employer or to certain owners of the employer, or who is a dependent of the employer.
- Claiming the WOTC may also impact the availability of certain other employment related tax credits.
- The credit is generally not available for employment of prior employees or replacements for employees on strike or locked out and employees who are receiving federally funded on-the-job-training.
- This credit is part of the general business credit and subject to its limitations and carryover provisions. See chapter 9.00 for details of the general business credit

Tax-exempt employers qualify for the credit - A tax-exempt employer may claim a credit for the WOTC it could claim for hiring qualified veterans if it were not tax-exempt. The credit is claimed by completing Form 5884-C, Work Opportunity Credit for Qualified Tax-Exempt Organizations Hiring Qualified Veterans, filed separately from any other return.

- *Credit Limited To OASDI* - The credit is allowed against the OASDI (Social Security) tax that the exempt employer would otherwise have to pay on the wages of *all* its employees during the one-year period beginning with the day he or she goes to work for the tax-exempt organization and cannot exceed the OASDI tax for that one year period.
- *Other limits applicable to tax-exempt employers*:
    - The general credit percentage of qualifying first-year wages is 26% (instead of 40%).
    - The credit percentage of qualifying wages is 16.25% (instead of 25%) for a qualified veteran who has completed at least 120, but less than 400, hours of service for the employer.
    - The tax-exempt employer may only take into account wages paid to a qualified veteran for services in furtherance of the activities related to the purposes or function constituting the basis of the organization's Sec. 501 exemption.

CALIFORNIA DIFFERENCES

While California does not conform to the federal WOTC, the state does have its own version of hiring incentives that are explained in Chapter 9.50.

NOTES

2008 FIRST-TIME HOMEBUYER CREDIT RECAPTURE

CREDIT RECAPTURE RULES – HOMES PURCHASED IN 2008

The Details

Regular recapture rule - The credit for new homebuyers is recaptured ratably over fifteen years, with no interest charge, beginning in 2010 and continuing through 2024. For each tax year of the 15-year recapture period, the credit is recaptured as an additional income tax amount equal to 6 2/3% of the amount of the credit, using IRS Form 5405. (Code Sec. 36(f)(1); Code Sec. 36(f)(7))

Example: *Frank and Mary Smith, eligible taxpayers with modified AGI below the phaseout limits, bought a $200,000 principal residence in August of 2008. They claimed a first-time homebuyer credit of $7,500 on their 2008 income tax return (lesser of $20,000 (10% of the $200,000 cost of the home) or $7,500). On their income tax return for 2010 the Smiths paid an additional income tax amount equal to $500 (6 2/3% of $7,500). They also will pay an additional income tax of $500 on their income tax returns for each tax year 2011 through 2024 (assuming they own the home and use it as a principal residence for that period).*

Accelerated recapture rule - If a taxpayer who claimed the credit for new homebuyers sells the home (or he or his spouse no longer uses it as a principal residence) before complete repayment of the credit, any remaining credit repayment amount is paid with the tax return for the year in which the home is sold (or ceases to be used as the principal residence).

SERVICE MEMBERS SPECIAL EXTENSION AND RECAPTURE WAIVER

Recapture Waiver – In the case of a disposition of a principal residence by an individual (or a cessation of use of the residence that otherwise would cause recapture) after Dec. 31, 2008, in connection with Government orders received by the individual (or the individual's spouse) for qualified official extended duty service, no recapture applies by reason of the disposition of the residence, and any 15-year recapture with respect to a home acquired before Jan. 1, 2009, ceases to apply in the tax year of the disposition. (Code Sec. 36(f)(4)(E))

OTHER DETAILS:

- **Taxpayer's Death** - Neither the regular nor the accelerated recapture rules apply to any tax year ending after the taxpayer's death.
- **Involuntary Conversion** - If the home is involuntarily converted (e.g., it's destroyed in a storm), and the taxpayer buys a new principal residence within a two year period beginning on the date of the disposition or the date the home ceases to be the principal residence, (1) the accelerated recapture rule does not apply, but (2) the regular recapture rule applies to the replacement principal residence during the recapture period in the same way as if the replacement principal residence were the converted residence. (Code Sec. 36(f)(4)(B))
- **Divorce** - In the case of a transfer of the residence to a spouse or to a former spouse incident to divorce, the accelerated recapture rule won't apply to the transfer, but both the regular and accelerated recapture rules will apply to the transferee spouse (and not the transferor spouse) who will be responsible for any future recapture.
- **Bankruptcy** – Courts have ruled that credit debt is pre-petition debt for bankruptcy purposes, so it qualified for discharge. (Betancourt, BK court, MO)
- **Credit Recapture Limited to Gain** - The credit repayment amount can't exceed the gain from the sale of the residence to an **UNRELATED** person. For this purpose, gain is determined by reducing the home's basis by the amount of the credit to the extent not previously recaptured. (Code Sec. 36(f)(2), Code Sec. 36(f)(3))
- **Joint Returns** – If the credit was allowed on a joint return, half of the credit is treated as having been allowed to each individual filing the return for recapture purposes. (Code Sec. 36(f)(5))

IRS LOOK-UP TOOL

IRS has a tool at IRS.gov that will allow taxpayers to look up information about their original first-time homebuyer credit amount, annual repayment amount, amount already repaid and balance owed. To use the tool, a taxpayer needs their Social Security number, date of birth and complete address.
www.irs.gov/Individuals/First-Time-Homebuyer-Credit-Account-Look-up

CALIFORNIA DIFFERENCES

A California credit was available for certain homes purchased May 1, 2010 through April 30 2011. The circumstances under which such credit would need to be recaptured have expired.

NOTES

ELECTRIC VEHICLE CREDIT

This credit is allocated by qualifying vehicle and only the first 200,000 vehicles sold per manufacturer qualify for the credit. To find out what amount of credit a vehicle qualifies for, visit the following website page: http://www.irs.gov/Businesses/Qualified-Vehicles-Acquired-after-12-31-2009

- **Four Wheeled Electric Drive Vehicles** (QPEDMV)
  - Credit: $2,500 + $417 (if battery capacity not less than 5 KWH) + $417 per KWH in excess of 5 KWH Maximum Credit: KWH component limited to $5,000; overall limit $7,500
  - Qualifying Vehicle: 4-Wheel highway vehicle that draws propulsion using a rechargeable battery with at least 4 kilowatt hours of capacity. Must have a gross weight of less than 14,000 pounds
  - Effective: **2010 through 200,000 vehicle sales phase-out process**
- **The following are expired after 12/31/2017:**
  - Qualified Fuel Cell Motor Vehicle Credit
  - 2-Wheeled (Motorcycle) Vehicle Credit (QPEV)
  - Alternative Fuel Vehicle Refueling Property Credit

*Extended by the Bipartisan Budget Act of 2018 (P.L. 115-123)

RAPID FINDER

Related IRC and IRS Forms & Publications

- **Form 8936 –** Qualified Plug-in Electric Drive Motor Vehicle Credit
- **Form 3800** – General Business Credit
- **Instructions 3800** – Instructions for General Business Credit
- **IRC Sec 30D**

4-WHEELED PLUG-IN ELECTRIC VEHICLE CREDIT (Code Sec 30D)

These vehicles are also referred to as "Qualified Plug-in Electric Drive Motor Vehicles" (QPEDMV).

The Credit Amount – The <u>per-vehicle</u> credit will be the sum of the following: (Code Sec. 30D(b)(1))

(1) $2,500; plus

(2) for a vehicle which draws propulsion energy from a battery with not less than 5 kilowatt hours of capacity, $417, plus an additional $417 for each kilowatt hour of capacity in excess of 5 kilowatt hours, but not in excess of $5,000. For this purpose, battery capacity, with respect to any battery is the quantity of electricity that the battery is capable of storing, expressed in kilowatt hours, as measured from a 100% state of charge to a zero percent state of charge.

Thus, the maximum credit is $7,500.

Important – In case you missed the underline above, this credit is a per vehicle credit not a per taxpayer credit. Thus, if a taxpayer purchases multiple electric vehicles the taxpayer is entitled to the credit for all of the vehicles subject to the non-refundable provisions for the personal credit and subject to the general business credit provisions for the business portion of the credit.

Credit Phase-Out – The credit phases out beginning in the second calendar quarter following that in which a manufacturer sells its 200,000th plug-in electric drive motor vehicle for use in the U.S. The applicable percentage phase-out is:

- 50% for the first two calendar quarters of the phaseout period,
- 25% for the third and fourth calendar quarters of the phaseout period, and
- 0% for each later calendar quarter.

YOU MUST GO TO THE IRS WEBSITE TO DETERMINE IF THE CREDIT IS PHASING OUT FOR A PARTICULAR VEHICLE

The IRS is tracking the cumulative sales by manufacturer on its web site:]https://www.irs.gov/businesses/irc-30d-new-qualified-plug-in-electric-drive-motor-vehicle-credit

VEHICLES BEGINING PHASEOUT IN 2019							
Date Acquired >>> VEHICLE	**Before 2019**	**Jan - Mar 2019**	**Apr - June 2019**	**July - Sept 2019**	**Oct – Dec 2019**	**Jan – Mar 2020**	**Apr – June 2020**
Tesla (all qualifying models)	$7,500	$3,750	$3,750	$1,875	$1,875	$0	$0
Chevrolet (all qualifying models)	$7,500	$7,500	$3,750	$3,750	$1,875	$1,875	$0
Cadillac (all qualifying models)	$7,500	$7,500	$3,750	$3,750	$1,875	$1,875	$0

Credit Sunset – There is **no specific sunset date for this credit** other than the per manufacturer quantity phase-out.

"Motor Vehicle" Definition - A "motor vehicle" is any vehicle manufactured primarily for use on public streets, roads and highways (not including a vehicle operated exclusively on a rail or rails) and that has at least four wheels.

"Qualified plug-in electric drive motor vehicle" (QPEDMV) defined - A "qualified plug-in electric drive motor vehicle" (QPEDMV) is a "motor vehicle" that satisfies the requirements listed below:

(1) The original use of the vehicle begins with the taxpayer.

(2) The vehicle is acquired for use or lease by the taxpayer and not for resale. "Acquired" is defined as the date on which title to the vehicle passes under state law (*Notice 2009-89*).

(3) The vehicle is made by a "manufacturer" (defined below).

(4) The vehicle is treated as a motor vehicle for purposes of title II of the Clean Air Act.

(5) The vehicle has a gross vehicle weight rating of less than 14,000 pounds.

(6) The vehicle is propelled to a significant extent by an electric motor that draws electricity from a battery that has a capacity of at least 4 kilowatt hours and is capable of being recharged from an external source of electricity.

(7) The vehicle is in compliance with the provisions of the Clean Air Act (or state law in certain cases) applicable for the make and model year of the vehicle and motor vehicle safety provisions of sections 30101 – 30169 of title 49, US Code.

Certification - A taxpayer may rely on a manufacturer's certification concerning the vehicle and the amount of the credit allowable for the vehicle (including in cases in which the certification is received after the purchase of the vehicle) provided the taxpayer meets the other requirements for the credit. (IRS Notice 2009-58). The IRS web site includes a list of certified vehicles and the amount of the available credit – search "Plug-in Electric Vehicle Credit (IRC 30D)" on the IRS web site.

Other Issues:

Allocation Between Business and Personal Use – The credit is allocated between a personal credit (personal use) and general business credit (business use).

- **Personal Credit** – The personal portion of the credit is a non-refundable personal credit that will off-set the AMT. Thus, any excess not used in the year of purchase is lost.
- **Business Credit** – The business use portion of the credit becomes part of the general business credit (Form 3800) with its normal carryback and carryforward provisions.
- **Basis** – Both the personal and **depreciable basis of the vehicle** must be reduced dollar for dollar for the amount of the credit claimed for the purchase of the vehicle. No credit is allowed for any portion of the vehicle expensed under Sec 179.

Foreign Use Property **–** The credit is not allowed to foreign use property.

Elect Out **-** The credit for QPEDMVs won't be allowed for a vehicle if the taxpayer elects to not have the credit apply to that vehicle (an election out).

Manufacturer **–** The term manufacturer for purposes of these credits has the same meaning as in regulations prescribed by the Administrator of the Environmental Protection Agency for purposes of administering title II of the Clean Air Act (42 U.S.C. 7521 et seq).

Recapture - IRS is required to issue regulations that provide for recapturing the benefit of any credit allowable for QPEDMVs with respect to any property that stops being property eligible for the credit.

Who Gets the Credit **–** The purchaser or lessee of the vehicle that originally places the vehicle in service claims the credit!

Off-Road Vehicles & Golf Carts - Vehicles manufactured primarily for off-road use, such as for use on a golf course, do not qualify for the credit.

CALIFORNIA DIFFERENCES

California has no equivalent tax credit. **Caution:** business vehicles where the credit is taken for federal purposes will have a different CA basis since there is a federal basis adjustment in the amount of the credit but no CA basis adjustment

California Clean Vehicle Rebate Project (CVRP) - The Clean Vehicle Rebate Project (CVRP) California created by Assembly Bill 118 establishes rebates available for the purchase or lease of a qualified plug-in electric vehicle or a zero emissions vehicle. The program is dependent on annual funding by the Legislature. More information is available at the following web site: https://cleanvehiclerebate.org/eng.

NOTE:
This rebate has nothing to do with the preparation of clients' tax returns. It is all handled through the sales transaction and online.

NOTES

RESEARCH CREDIT

Caution – This chapter is an overview (awareness) of what can be a very complex tax credit and generally only includes information related to small businesses.

Overview

The Internal Revenue Code (Sec 41) provides a tax credit of up to 20% of qualified expenditures for businesses that develop, design or improve products, processes, techniques, formulas or software and similar activities. The credit has been made permanent and modified by the PATH Act of 2015.

The credit is calculated on the basis of increases in research activities and expenditures. Its purpose is to reward businesses that pursue innovation by continually increasing investment. Even so, an alternative simplified method allows taxpayers to claim research credits if research costs remain the same or even decline when compared with prior years.

RAPID FINDER

Pubs Forms

Related IRC and IRS Publications and Forms

- **Form 6765** – Research Credit
- **Form 8975** - Qualified Small Business Payroll Tax Credit for Increasing Research Activities
- **Form 3800** – General Business Credit
- **Instructions for Form 3800**, General Business Credit
- **IRC Sec 41**
- **IRC SEC 38 –General Business Credit**
- **IRC SEC 52(c)(2) – Tax-Exempts Employing Vets**
- **IRC Sec 3111(f) – Payroll Credit Election**

The Details

The research credit equals the sum of: (1) 20% of the excess (if any) of the qualified research expenses for the tax year over a base amount (unless the taxpayer elected an alternative simplified research credit); (2) the university basic research credit (i.e., 20% of the basic research payments); and (3) 20% of the taxpayer's expenditures on qualified energy research undertaken by an energy research consortium.

For years after December 31, 2015:

- Small businesses (average of $50 Million or less in gross receipts in the prior three years) can claim the credit against the alternative minimum tax (PATH Act Sec 121(b)). **Note:** The TCJA repealed the AMT for corporations, effective for tax years beginning after December 31, 2017.
- For years after December 31, 2015, small businesses (less than $5 Million in gross receipts for the year the credit is being claimed and no gross receipts for any taxable year before the 5-taxable-year period ending with the taxable year) can claim up to $250,000 per year of the credit against their employer FICA tax liability (PATH Act Sec 121(c)). See details beginning on page 9.16.02

Computation Methods - The two methods used to compute the credit are the regular method that provides for the 20% credit, or the simplified method which is easier to document but results in reduced credit amounts.

- *Regular Method* - Under the regular research credit method, the credit equals 20% of qualified research expenditures for a tax year over a base amount established by the taxpayer in 1984–1988 or by another method for companies that started up subsequently. This method may be best for companies that can document a low base amount.
- *Simplified Method* - The alternative simplified method credit equals 14% (12% for years prior to 2009) of qualified research expenses over 50% of the average annual qualified research expenses in the three immediately preceding tax years. If the taxpayer has no qualified research expenses in any of the three preceding tax years, the alternative simplified method credit may be 6% of the tax year’s qualified research expenses. This method may be the best choice for taxpayers with incomplete records from the mid-1980s, those complicated by mergers and acquisitions, or taxpayers with a high base amount from that period.

Base Amount - The base amount is a fixed-base percentage of taxpayer's average annual gross receipts from a U.S. trade or business (including any foreign sub's gross receipts), net of returns and allowances, for the 4 tax years before the credit year, and can't be less than 50% of the year's qualified research expenses. The fixed base percentage for a non-startup company is the percentage (not exceeding 16%) that taxpayer's total qualified research expenses is of total gross receipts for tax years beginning after '83 and before '89. (Code Sec. 42(c))

Except when a taxpayer elects the alternative simplified research credit the Code assigns a fixed-base percentage of 3% in making the base amount computation for each of its first 5 tax years in which a "startup company" has qualified research expenses. (Code Sec. 41(c)(3)(B)(ii)(I)) For the second 5 tax years, the fixed-base percentage is a specified amount of the ratio or percentage that is increased annually during this second 5 year period and is determined by dividing qualified research expenses by gross receipts.

Qualified Research - The term "qualified research" means research which is undertaken for the purpose of discovering information which is technological in nature, and the application of which is intended to be useful in the development of a new or improved business component of the taxpayer, and relates to:

- A new or improved function,
- Performance, or
- Reliability or quality.

Certain purposes that are not qualified include style, taste, cosmetic, or seasonal design factors. The definition is relatively broad and encompasses such activities as:

- Developing new or improved products, processes or formulas;
- Developing prototypes or models; Developing or applying for patents;
- Certification testing; Developing new technology;
- Environmental testing; Developing or improving software technologies;
- Building or improving manufacturing facilities; and Streamlining internal processes.

Qualified research expenses (QREs) - are amounts the taxpayer pays or incurs during the tax year "in carrying on any trade or business" (including certain start-up costs) of the taxpayer for: in-house research expenses, which consist of certain wages and supplies, and contract research expenses, i.e., 65% of amounts paid to certain nonemployees, and 100% of the taxpayer's expenditures to eligible small businesses, universities, and federal laboratories for qualified energy research. (Code Sec. 41(b); Reg § 1.41-2)

Note: No deduction is allowed for that portion of the qualified research expenses or basic research expenses otherwise allowable as a deduction for the tax year, which is equal to the amount of the research credit determined for the tax year (Code Sec. 280C(c)(1)). In other words, a taxpayer must reduce his deduction for research or experimental expenditures (or qualified research expenses or basic research payments) by 100% of the amount of the research credit determined for the year.

Similarly, if the taxpayer capitalizes, rather than deducts the expenditures, the amount chargeable to the capital account is reduced by 100% of the amount of the credit for the tax year over the amount allowable as a deduction for qualified research expenses or basic research expenses (determined without regard to the reduced deduction, discussed above).

> **Example:** X has in the current year credit-eligible research expenditures totaling $100,000. Assume that the allowable credit is $8,000. The amount X must deduct, amortize or capitalize may not exceed $92,000 (i.e., $100,000 – $8,000).

Taxpayers may make an annual irrevocable election to claim a reduced research credit and avoid having to reduce their research expense deductions or capital expenditures. (Code Sec. 280C(c)(3)(A)) Under the election, the amount of the research credit is reduced by the product of the research credit computed in the regular manner and the maximum corporate tax rate. The election must be made on an original return filed not later than the extended due date of the election-year's return. Effective for tax years ending on or after July 27, 2011, the election is made on Form 6765.

TCJA

Research and experimental expenditures paid or incurred in tax years beginning after December 31, 2021, generally must be amortized over five years (15 years for research expenditures outside the U.S.), beginning at the mid-point of the tax year when the expenditures are paid or incurred (June 30 for calendar year taxpayers). (IRC Sec. 174, as amended by the TCJA, §13206(a)). This means the provision allowing taxpayers to currently deduct research and experimental expenditures is eliminated after 2021. The amount capitalized and otherwise eligible for amortization must be reduced by the excess (if any) of the research credit allowed for the tax year and the amount allowable as a deduction for the tax year as qualified research expenses or basic research expenses. (IRC Sec. 280C(c), as amended by the TCJA, §13206(a)).

Limitations - The R&D credit is also subject to limitations of the general business credit. Its total and others included in the general business credit are limited to 25% of the taxpayer's net tax liability over $25,000. To the extent that a research credit is not available for use in the current year or immediate prior year, unused credits have a 20-year carry forward.

QUALIFIED SMALL BUSINESS PAYROLL ELECTION

Beginning for tax years after December 31, 2015, a qualified small business may elect to apply a portion of its research credit, but no more than $250,000, against the employer's share of the employees' FICA withholding requirement (the 6.2 percent payroll tax).

Qualified Small Business - A qualified small business (QSB) for this purpose is a C corporation, S corporation or a partnership provided:

- It does not have gross receipts in any year before the fourth preceding year (Code Sec. 41(h)(3)(A)(i)(II)). However this rule does not require a taxpayer to be in existence for five years. Thus the payroll credit can only be taken in the first 5 years of the entity's existence,
- The gross receipts of the entity for the year the credit is elected are less than $5 million as determined under Code Sec. 448(c)(3), and
- It is not a tax-exempt organization.

Any person (other than a corporation or partnership) is a qualified small business if the person meets the requirements of the first 2 bullets above taking into account the person's aggregate gross receipts received in carrying on **all** the person's trades or businesses. (Notice 2017-23, Section 3.02)

> ***Example*** *- The taxpayer is a calendar year individual with one business that operates as a sole proprietorship. The taxpayer has gross receipts of $4 million in 2019. For years 2015, 2016, 2017 and 2018, the taxpayer had gross receipts of $1 million, $7 million, $4 million, and $3 million and did not have any gross receipts for any taxable year prior to 2015. The taxpayer is a qualified small business for 2019 because he has less than $5,000,000 in gross receipts for 2019 and did not have gross receipts before 2015 (before the 5-taxable-year period ending with 2019). The taxpayer's gross receipts in years 2015-2018 are not relevant in determining whether he is a qualified small business in taxable year 2019. Because the taxpayer had gross receipts in 2015, the taxpayer is not a qualified small business for 2020, regardless of his gross receipts in 2020.*

Payroll Tax Portion of the R&D Credit - The payroll tax portion of the research credit is equal to the smallest of the following:

1. The amount specified by the taxpayer in its election to claim the credit, but not exceeding the $250,000 maximum;
2. The research credit determined for the tax year (determined without regard to the payroll tax election made for the tax year); or
3. In the case of a qualified small business other than a partnership or S corporation, the amount of the business credit carryforward for the tax year of the election (determined without regard to the payroll tax election made for the tax year).

Note: Determining the amount of the #3 limitation is quite complicated! Since the R&D credit is part of the general business credit, it must first be added to the general business credit for the year and used to offset any regular tax liability and any AMT liability. Then, the general business credit must be carried back one year. Any excess after the carryback is carried forward to the year after the year for which the credit was computed. The payroll credit is limited to the amount of the business credit carryover. See the steps outlined below:

Current Year:
1. Determine the R&D credit
2. Add the R&D Credit to the General Business Credit (GBC)
3. Offset any current regular or AMT tax with the GBC
4. Carry any excess back to preceding year

Preceding Year:
5. Offset any preceding year taxes
6. Determine credit remaining that could be carried over if payroll credit wasn't claimed

Current Year:
7. The payroll credit is limited to carryover from the preceding year.

Next Year:
8. Adjust the R & D credit carryforward by the amount of the payroll tax credit claimed

Example *– Taxpayer, operating as a Schedule C sole proprietor, has a $35,000 general business credit in 2018 2019, which includes a $25,000 research credit computed without regard to the payroll tax credit. The taxpayer's regular and AMT tax liability in 2019 is $15,000. The taxpayer's 2018 regular and AMT tax liability was $5,000. After offsetting 2019 and 2018 tax liabilities, the taxpayer has a $15,000 general business credit carryforward to 2020 without regard to the election to claim a payroll tax credit. The maximum payroll tax credit that may be claimed in 2019 is $15,000 since this amount is less than the $250,000 maximum and the $25,000 research credit determined for the year of election without regard to the payroll tax credit. The taxpayer elected to use all of the $15,000 as a 2019 payroll tax credit, and therefore will have only $10,000 of the $25,000 R&D credit to carry forward to 2020.*

Electing the Payroll Tax Credit – Complete Section D of Form 6765 – Credit for Increasing Research Activities to make the election to claim the payroll credit. Then complete Form 8974 - Qualified Small Business Payroll Tax Credit for Increasing Research Activities and attach it to each quarterly payroll tax return (generally Form 941) until the credit is used up. See the Form 8974 instructions for additional guidance.

CAUTION: The election cannot be made if the taxpayer made an election for five or more preceding years. Code Sec. 41(h)(4)(B)

CALIFORNIA RESEARCH CREDIT

The California version of the research credit for increasing the research activities of a trade or business is claimed on Form FTB 3523, Research Credit, which is also used to claim pass-through research credits from S corps, partnerships, limited liability companies and trusts. The credit is nonrefundable but unused credit may be carried forward.

The California credit is 15% of the excess of qualified research expenses for the taxable year over the base period research expenses. Corporations are allowed the 15% credit amount plus credit for 24% of the basic research payments.

- Taxpayers may elect the alternative incremental credit in which taxpayers are assigned a smaller three-tiered fixed-base percentage and a reduced three-tiered credit rate (1.49%, 1.98%, and 2.48%).
- The CA credit can be claimed whether or not the federal research credit is claimed.
- California conforms to the federal definition for qualified research expenses under IRC Section 41(b).
- Qualified research expenses do not include any amounts paid for tangible personal property eligible for the exemption from sales or use tax under R&TC Section 6378. The eligible property is tangible personal property used primarily for the following:
    1. In teleproduction or other postproduction services.
    2. To maintain, repair, measure, or test any property described in item 1.
- The basic and qualified research must have been conducted within California.
- For business conducted both within and outside of California, for purposes of determining the base amount, gross receipts are the receipts from the sale of property that is held primarily for sale to customers (in the ordinary course of a trade or business) and that is delivered or shipped to customers in California.
- If a taxpayer owns an interest in a disregarded business entity [a Single Member Limited Liability Company (SMLLC) not recognized (disregarded) by California and for tax purposes is treated as a sole proprietorship owned by an individual or a branch owned by a corporation], the amount of the credit that can be utilized is limited to the difference between the taxpayer's regular tax computed with the income of the disregarded entity, and the taxpayer's regular tax computed without the income of the disregarded entity. If the disregarded entity reports a loss, the taxpayer may not claim the credit for the loss year but can carry over the credit amount received from the disregarded entity. For more information on disregarded business entities, get Form 568, Limited Liability Company Tax Booklet.
- The credit cannot reduce the minimum franchise tax (corporations and S corporations), annual tax (partnerships and QSub), alternative minimum tax (corporations , exempt organizations, individuals, and fiduciaries), built-in gains tax (S corporations), or excess net passive income tax (S corporations).
- This credit can reduce regular tax below tentative minimum tax (TMT). Get Schedule P (100, 100W, 540, 540NR, or 541), Alternative Minimum Tax and Credit Limitations, for more information.

NOTES

CREDIT FOR PAID FAMILY AND MEDICAL LEAVE

For two years, 2018 and 2019, TCJA added a provision that allows employers a general business credit for wages paid to employees while they are on paid family or medical leave. The credit is variable and only applies where the leave wages are at least 50% of what is normally paid to the individual. The credit percentage is 12.5% and increases by 0.25%, up to a maximum of 25%, for each percentage point that the rate of payment exceeds 50%.

Related IRC and IRS Publications and Forms

- **Code Sec 45S(a)**
- **Form 8994** - Employer Credit for Paid Family and Medical Leave
- **Instructions - Form 8994**
- **General Business Credit** – Chapter 9.00
- **Notice 2018-71 –** Guidance on Sec 45S in Q&A format

The Credit - For wages paid in tax years beginning after 2017 and before 2020, a general business credit may be claimed equal to 12.5% of the amount of wages paid to a qualifying employee during any period in which the employee is on family and medical leave if the rate of payment is at least 50% of the wages normally paid to the employee, for up to a maximum of 12 weeks of leave with respect to any employee for the tax year. (Sec. 45S(b)(3)) The credit is increased by 0.25 percentage points (but not above 25%) for each percentage point by which the rate of payment exceeds 50%.

Example: *ABC, Inc. has a qualifying written policy to pay an employee 70% of their normal wage while on family or medical leave. 70% is 20 percentage points above the 50% credit threshold. The credit is increased by 5 percentage points (.25 x 20) which when added to the base credit of 12.5% results in a credit percentage of 17.5%. Assuming the leave wages paid for the year were $15,000, the credit would be $2,625 (.175 x $15,000).*

Leave that is paid by a state or local government or is required by state or local law is not included in the amount of paid family and medical leave provided by the employer.

Qualifying Employer - To qualify for the credit, an employer must have a written policy containing certain requirements, and all "qualifying" full-time employees must be given at least two weeks of annual paid family and medical leave (all less-than-full-time qualifying employees must be given a commensurate amount of leave on a pro rata basis).

Qualifying Employee – To be a qualifying employee, the individual must have been employed by the employer for one year or more, and, for the preceding year, had compensation not in excess of an amount equal to 60% of the "highly compensated employee" threshold. $120,000 is the "highly compensated" amount for years 2015 through 2018, and $125,000 is the inflation-adjusted amount for 2019. Thus, to be a qualifying employee in 2018 or 2019, an employee must have earned no more than $72,000 (60% of $120,000) in compensation in the *preceding year*.

Credit or Deduction – The employer can't take both a credit and a deduction for amounts for which the paid family and medical leave credit is claimed. Claiming the credit is an election.

Employer Policy - The employer's policy, at a minimum, must provide

(A) that:

1. A qualifying employee who is **not a part-time employee**, generally one who works 30 hours or more a week is provided no less than two weeks of annual paid family and medical leave, and
2. A qualifying employee who **is a part-time employee**, generally one who works less than 30 hours a week, is provided an amount of annual paid family and medical leave that is not less than an amount which bears the same ratio to the amount of annual paid family and medical leave that is provided to a qualifying employee who is not part time (works 30 or more hours a week) as
    a. The number of hours the employee is expected to work during any week, bears to
    b. The number of hours an employee who is not a part time is expected to work during the week.

(B) The policy requires that the rate of payment under the program is not less than 50% of the wages normally paid to that employee for services performed for the employer.

Form 8994 – The IRS developed Form 8994 to be used when claiming the paid family and medical leave credit. The instructions to Form 8994 provide details as to eligible employers, qualifying employees, what constitutes family and medical leave, minimum paid leave requirements, the applicable percentage, and how to compute the credit, including worksheets. Preparers are encouraged to read the instructions carefully before claiming the credit on a client's return and to make sure the various requirements noted in the instructions for the employer's written policy have been satisfied.

CALIFORNIA DIFFERENCES

California does not have a similar credit.

RAPID FINDER

NONREFUNDABLE RENTER'S CREDIT

This nonrefundable credit is:

- $120 for Joint, HH and SS filers, and
- $60 for all others.

AGI Limit

Filing Status	2016	2017	2018	2019
Joint, HH and SS	78,125	80,156	83,282	
Others	39,062	40,078	41,641	

If blank, the amounts are not available at publication date

Qualifications - To claim renter's credit, a taxpayer must meet the following conditions:

- Be a resident of California for the entire year.
- AGI must be below annual limit. Use California AGI for this test.
- Must pay rent for at least half of the tax year on property (including a mobile home that the taxpayer owned on rented land) in CA that was the taxpayer's principal residence.
- The rented property is not exempt from property taxes.
- For not more than half the year, the taxpayer did not live with, or was not a minor under the care of a parent, foster parent, or legal guardian who claimed the taxpayer as a dependent.

  (1) Military personnel *- A military person, who is not a legal resident of California, does not qualify for this credit. However, the military person's spouse may claim this credit if he or she was a California resident, did not live in military housing, and is otherwise qualified.*

  (2) Form 540NR – *Some 540NR filers may qualify if they were residents of California at least six months during the tax year.*

EMPLOYER CHILD CARE CONTRIBUTION CREDIT

This credit is not available after 2011. However, any unused credit can be carried over until used up.

CREDIT FOR SENIOR HEAD OF HOUSEHOLD

A taxpayer can claim this credit (without qualifying as head of household in the current year) if they:

- Were 65 years of age or older on December 31 of the tax year;
- Qualified as head of household in one of the two preceding tax years by providing a household for a qualifying individual who died during one of the two preceding tax years; and
- Did not have adjusted gross income over annually inflation adjusted AGI limit (see adjacent table).

AGI & Credit Limits

Tax Year	2016	2017	2018	2019
AGI	71,370	73,226	76,082	
Max Credit	1,345	1,380	1,434	

If blank, the amounts were not available at publication date

The credit is the lesser of:

- 2% of the taxpayer's California taxable income for the year, or
- The credit limit for the year (see adjacent table).

CREDIT FOR JOINT CUSTODY HEAD OF HOUSEHOLD

This credit IS NOT available to taxpayers filing as head of household or qualifying widow(er). The credit IS available to taxpayers who:

- Are unmarried at the end of the tax year, or
- If married, lived apart from their spouse for the entire tax year and are filing as married filing separate, and
- Furnished more than one-half the household expenses for a home that also served as the home of the taxpayer's child, stepchild, or grandchild for at ***least 146 days but not more than 219 days (between 40% and 60%)*** of the taxable year. If the child is married, the taxpayer must be entitled to claim a dependent exemption credit for the child.

The custody arrangement for the child must be part of a decree of dissolution or separate maintenance or must be part of a written agreement between the parents where the proceedings have been initiated, but a decree of dissolution or separate maintenance has not yet been issued.

The credit is the lesser of:

- 30% of the tax (less the tax on accumulation trusts) less exemptions credits but before credits and AMT.
- The credit limit for the year (see table).

Tax Year	2016	2017	2018	2019
Max Credit	440	451	469	

If blank, the amount was not available at publication date

CREDIT FOR DEPENDENT PARENT: This credit is available to taxpayers who:

- Were married at the end of the tax year and used the married filing separate filing status;
- The taxpayer's spouse was not a member of the household during the last six months of the year; and
- The taxpayer furnished over one-half the household expenses for a dependent mother's or father's home, whether or not they lived in the taxpayer's home.

The credit is computed in the same manner as the Joint Custody Head of Household credit.

The credit is the lesser of:

- 30% of the tax (less the tax on accumulation trusts) less exemption credits but before other credits and AMT.
- The credit limit for the year (see table).

Tax Year	2016	2017	2018	2019
Max Credit	440	451	469	

If blank, the amount was not available at publication date

NATURAL HERITAGE PRESERVATION CREDIT – FUNDED 1/1/10 – 6/30/20

Funding for the Natural Heritage Preservation Credit is available beginning January 1, 2010, until June 30, 2020. FTB Form 3503 is used to claim this credit. In 2014, Senate Bill No. 355 was passed by the Legislature and approved by the Governor. The bill extended the period for when a qualified contribution is made for which a tax credit would be allowed to June 30, 2020. The bill also extended the carryover period to 15 years for a qualified contribution made on or after January 1, 2015. All other aspects of the Program remain unchanged.

The credit is:

- ***55% of the appraised fair market value*** of pre-qualified land (fee title or conservation easement) and/or water or water rights contributed to state/local governments or nonprofit organizations. Application for approval of the contribution must be made to the California Wildlife Conservation Board.
- ***Not refundable but available for carryforward*** until exhausted, but for no more than **8 years** (15 years for post-2014 contributions), if the credit exceeds net tax.
- ***In lieu of any other state tax credit or deduction*** the taxpayer may otherwise claim for the donated property.

Eligibility Criteria - To be considered by the Board to be an eligible donation, the property must meet one or more of the following criteria (*Public Resources Code § 37015*):

a. The property will help meet the goals of a habitat, multispecies or natural community conservation plan, or any other subsequently statutorily authorized similar plan designed to benefit native species of plants, including, but not limited to, protecting forests, old growth trees, or oak woodlands, and animals and development.

b. The property will provide corridors or reserves for native plants and wildlife that will help improve the recovery possibilities of listed species or will help avoid the listing of species as endangered, or protect wetlands, waterfowl habitat, or river or stream corridors, or promote the biological viability of important California species.

c. The property interest is a perpetual conservation easement over agricultural land, or is a permanent contribution of agricultural land, that is threatened by development and is located in an unincorporated area that is zoned for agricultural use by the county.

d. The property interest is a water right, or land with an associated water right, and the contribution of the property:
   - Will help improve the recovery chances of a listed species,
   - Will reduce the likelihood that any species of fish or other aquatic organism will be listed,
   - Will improve the protection of listed species, or
   - Will improve the viability and health of fish species of economic importance to the state.

   The donee receiving the water right, or land with an associated water right, must ensure that it will retain title to the water right, and that the water is used to fulfill the intended purposes for which it is being accepted. Assurances must be made that no harm will result to any legal user of the water if a water right includes a diversion or place of use change.

e. The property will be used as a park or open space or will augment public access to or enjoyment of existing regional or local park, beach, or open-space facilities, or will preserve archaeological resources.

In addition to meeting one or more of the above criteria, the proposed donation must satisfy the requirements for a "qualified contribution" of IRC § 170. If only a portion of a proposed conveyance of property satisfies the requirements for a "qualified contribution," or if the property is sold for less than fair market value, only that portion, or the amount representing the difference between the amount paid by the donee and the fair market value, is eligible for the tax credit. The donor must not receive any other valuable consideration for the donation of property subject to the tax credit.

A donation will **not** qualify if it is proposed to satisfy a condition imposed upon the donor by any lease, permit, license, certificate, or other entitlement for use issued by a public agency, including mitigating significant effects on the environment of a project per an approved environmental impact report.

For additional information on qualifying donations and the mechanics of obtaining approval by the Wildlife Conservation Board, see the Board's Website at www.wcb.ca.gov.

FILM CREDITS

Section 17053.85 of the Revenue and Taxation Code provides a nonrefundable income tax credit to a qualified taxpayer for qualified expenditures attributable to the production of a qualified motion picture, independent film, television show, etc., in California that is allocated and certified by the California Film Commission (CFC). Annually, the CFC is required to provide the FTB with a list of qualified taxpayers and the tax credit amounts allocated to each qualified taxpayer by the CFC. The original program was revised and extended five years by legislation (AB 1839) approved by the governor in September 2014. New R&TC 17053.95 covers the revised rules and is effective January 1, 2016 through June 30, 2020. Among the changes are increased funding of the program from $100 million to $330 million per fiscal year; expanded eligibility to big-budget feature films, 1-hr TV series (for any distribution outlet) and TV pilots; elimination of budget caps for studio and independent films; and use of a ranking system based on jobs and other criteria rather than a lottery system to select recipients of the credits. Below is a summary of the credit amounts under the law that's effective through June 30, 2020 (the California Film & Television Tax Credit Program 2.0):

Eligible for 20% Non-Transferable Tax Credit (plus 5% Uplift*):
- Feature Films: $1 million minimum budget; credit allocation applies only to the first $100 million in qualified expenditures.
- Movies-of-the-Week and Miniseries: $500,000 minimum budget
- New television Series for any distribution outlet; $1 million minimum budget per episode (at least 40 minutes per episode, scripted only)
- TV Pilots: $1 million minimum budget (at least 40 minutes)

Eligible for 25% Transferable Tax Credit (maximum credit is 25%, uplifts do not apply):
- Independent Projects: $1 million minimum budget; credits apply only to the first $10 million of qualified expenditures. (Only independent projects may sell their tax credits.)
- Relocating TV Series, any episode length, that filmed its most recent season outside California; $1 million minimum budget. (Additional seasons are eligible for 20%.)

5% Credit Uplift (bonus credit):
- Filming outside the Los Angeles 30-mile zone + 5%
- Music Scoring and music track recording expenditures + 5%
- Visual Effects expenditures (minimum spend required) + 5%

*Note: The above uplifts cannot be combined. The maximum credit a production can earn is 25%.

Form FTB 3541 is used to claim the credit (file separate Forms 3541 to report the old and new credits). Any credit unused in a taxable year because it is in excess of the taxpayer's tax liability can be carried over for six taxable years. The credit may not be used to reduce any CA AMT liabilities.

Qualified taxpayers may elect to split the credits and apply a portion to their income tax liability and a portion to their sales & use taxes. However, only one Credit Certificate will be issued to the taxpayer. Under the new program, which began July 1, 2016, the certificate numbering will begin with 5000.

For credits attributable to an independent film with a qualified expenditure budget of $10 million or less, the qualified taxpayer is permitted to sell a credit to an unrelated party. Proceeds from selling the credit are includible in income.

Productions interested in applying for the tax credits should refer to the CFC's website for the available application dates and application submission procedures: http://www.film.ca.gov/incentives.htm.
The FTB web site includes Q&As about the credit: http://film.ca.gov/tax-credit/faqs/

Credit Code Numbers:
- New Credit: 237
- Old Credit: 223

Film Credit Extension - SB 871, signed by the governor on June 27, 2018, establishes film credits similar to those currently allowed, effective for taxable years beginning on or after January 1, 2020, to be allocated by the California Film Commission on or after July 1, 2020, and before July 1, 2025. This is the so-called California Film & Television Tax Credit Program 3.0. The credit will be 20% or 25% of qualified expenditures for the production of a qualified motion picture in CA, with additional credit amounts allowed, including for amounts equal to specified qualified expenditures and qualified wages relating to original photography outside the Los Angeles zone. The aggregate amount of these new credits to be allocated in each fiscal year is limited to $330,000,000 plus additional specified amounts. Subject to a computation and ranking of applicants based on a jobs ratio, the California Film Commission will be required to allocate credit amounts subject to specified categories of qualified motion pictures in 2 or more allocation periods per fiscal year beginning on or after July 1, 2020, and issue credit certificates. Applicants for the credit will be required to include in their application their written policy against unlawful harassment and a summary of the applicant's voluntary programs to increase the representation of minorities and women in certain job classifications. As under current law, the newest version of the credit also will allow the credit amount to be applied against qualified state sales and use taxes in lieu of being used as an income tax credit. Highlights of other changes:

- Creates a pilot program for training Californians from under-served communities for careers in the skilled craft occupations in motion picture and television productions. Program is funded by a fee accessed on approved applicants.
- Reduces proportion of credits for the relocating TV category (from 20% to 17%), increases the amount of credits for the independent film category (from 5% to 8%), and splits the independent film "pot" into two categories – under $10 million and over $10 million budgets.
- Allows an additional 5% credit on wages paid to individuals who live and work on qualified productions outside the Los Angeles 30-mile zone.
- Requires applicants to provide statistics on the gender, racial, and ethnic status of individuals whose wages are not qualified (directors, producers, writers, actors).
- Eliminates "facility" (sound stage) from bonus point consideration.
- Eliminates the additional 5% credit for music scoring wages; includes music wages as a bonus point factor.
- Extends the date by which principal photography must begin from 180 days to 240 days for projects with budgets over $100M qualified spend.
- Jobs Ratio overstatement penalty threshold of independent productions has been reduced to match non-independent productions.

NEW EMPLOYMENT CREDIT IN CERTAIN AREAS (SB 90)

Effective January 1, 2014 and through 2025 (extended from 2020 by SB 855, signed into law 6/27/2018), a New Employment Credit (NEC) will be available to qualified businesses located in (1) a former enterprise zone (EZ) or former local agency military base recovery area (LAMBRA), (2) a newly created Designated Census Tract, and (3) designated areas of high unemployment. These areas are collectively referred to as designated geographic areas (DGA). Pilot areas are areas within the DGA that have been designated by the Governor's Office of Business and Economic Development (GO-Biz). Up to five pilot areas may be designated for a period of four calendar years. On April 24, 2014, GO-Biz designated 3 pilot areas:

- Fresno Pilot Area, consisting of the former Fresno City Enterprise Zone, except within census tracts with the lowest unemployment and poverty;
- Merced Pilot Area that includes the former Merced Enterprise Zone, except within census tracts with the lowest unemployment and poverty; and
- Riverside Pilot Area made up of Census tracts 303, 401.01, 402.03, 429.04, and 467 in Riverside County.

These pilot area designations expired December 31, 2017. Although the pilot area designation may be extended for an additional period of up to three calendar years by GO-Biz, no extensions were given to the above areas.

The special tax benefits that have been available in the following types of economic development areas have been eliminated after December 31, 2013: EZs, targeted tax areas (TTAs), manufacturing enhancement areas (MEAs), and LAMBRAs. However, employers who are eligible for credits for hiring qualified employees under prior law will continue to receive credits for 60 months, and carryover periods for prior credits will remain.

Ineligible Businesses - The following types of businesses are **not** allowed to claim the NEC unless they meet the definition of a small business: Food service, retail, casinos, temporary employment agencies, bars and adult live entertainment (such as night clubs and strip clubs). A qualified small business is a trade or business that has aggregate gross receipts, less returns and allowances reportable to California, of less than two million dollars ($2,000,000) during the previous taxable year. However, a small business that is involved in a sexually oriented business is ineligible for the credit.

Qualifying Employees - The credit factors in the net increase in jobs not including replacements for current employees. Eligible hires, who generally must be hired for full-time work and paid at least 150% but not over 350% of minimum wage, include: individuals who have been unemployed for at least 6 months, veterans separated from the service within 12 months of the hire date, individuals receiving the federal earned income credit for the previous tax year, ex-felons, and recipients of CalWORKs or general assistance (welfare).

Credit Amount and Annual Certification - For eligible employers, who must make a tentative credit reservation with the FTB within 30 days of the date the Employment Development Department's new-hire reporting requirements are met, the credit is 35% of qualified wages. Unused credits can be carried over for 5 years.

Employers must annually certify continued employment of the qualified employees and their wages (by March 15 for calendar year businesses). The credit may only be claimed on an original, timely filed return, and the employer's name, amount of credit claimed, and number of new jobs created by the employer will be published on the FTB's web site. The annual certification is done online at the FTB web site:

https://www.ftb.ca.gov/file/business/credits/new-employment-credit/annual-certification.asp

Form 3554 is used to calculate the credit.
See the Franchise Tax Board's web site for additional information:

- https://www.ftb.ca.gov/file/business/credits/new-employment-credit/index.html
- Map look-up for Designated Geographic Areas: http://maps.gis.ca.gov/gobiz/dga/default.aspx

THE CALIFORNIA COMPETES TAX CREDIT

Available for tax years beginning on and after January 1, 2014, and before January 1, 2030 (was 1/1/2025 prior to extension by SB 855, signed into law 6/27/2018), this is an income or franchise tax credit available to businesses that come to California or stay and grow in California. Tax credit agreements will be negotiated by the Governor's Office of Business and Economic Development (GO-Biz) and approved by a statutorily created "California Competes Tax Credit Committee." The committee consists of:

- Director of GO-Biz (Chair).
- State Treasurer.
- Director of the Department of Finance.
- One appointee each by the Speaker of the Assembly and Senate Committee on Rules.

The California Competes Credit only applies to state income or franchise tax. Taxpayers awarded a contract by the committee will claim the credit on their income or franchise tax returns using credit code 233. The credit can reduce tax below tentative minimum tax (TMT). Any credits not used in the taxable year may be carried forward up to six years.

Since 2014, $1 Billion of the California Competes Tax Credits have been allocated to 1,029 companies, projected to create more than 100,000 new jobs and make $19.5 billion in new investments. (GO-Biz News Release, July 20, 2019) SB 855 set the amount to be allocated to the credit at $180 million in each fiscal year from 2018-19 to 2022-23, inclusive.

For fiscal year 2018-19, GO-Biz will accept applications for the California Competes Tax Credit during the following periods:

- July 29, 2019, through August 2019 $90 million available)
- January 6, 2020, through January 27, 2020 ($75 million available)

- March 9, 2020, through March 30, 2020 ($71.8 million plus any remaining unallocated amounts from the previous application periods)

Applications for the credit will be accepted at www.calcompetes.ca.gov. Go to **business.ca.gov** for more information on the California Competes Tax Credit.

THE CALIFORNIA COLLEGE ACCESS TAX CREDIT

For tax years beginning on or after January 1, 2014, and through 2022, a California credit is available for individuals and business entities, and for tax years 2017 through 2022 for insurance company entities also. The credit is allowed for cash contributions made to the College Access Tax Credit Fund ("Fund"), which is a specially created fund that will be used to provide additional Cal Grants to eligible students.

There is no explicit limit on the amount a taxpayer may contribute, but the contributions must be made in cash. "Cash" for this purpose means cashier's check, money order, or Electronic Fund Transfer. For business entities only, checks written on the business entity's business account will be considered as cash. Electronic Fund Transfer only includes wire transfer and Automated Clearing House.

Taxpayers who receive a certificate from the California Educational Facilities Authority (CEFA) may claim the credit on their income or franchise tax returns using credit code 235. The awardable credits are:

- For the 2014 taxable year, 60% of the amount contributed, as allocated and certified by the California Educational Facilities Authority ("CEFA").
- For the 2015 taxable year, 55% of the amount contributed, as allocated and certified by CEFA.
- For the 2016 through 2022 taxable years, 50% of the amount contributed, as allocated and certified by CEFA.

https://www.ftb.ca.gov/file/personal/credits/college-access-tax-credit.html

Carryovers: Any unused credit is carried forward for up to six years.

Charitable Deduction: No deduction will be allowed on the state tax return for amounts taken into account in calculating the credit. However, the taxpayer is entitled to take a federal charitable deduction if itemizing on their federal return.

IRS Regs Reduce Deduction - The IRS issued final regulations in June 2019 that are aimed at overcoming the credit programs some states developed that were meant to be work-arounds to the TCJA itemized deduction limitation of $10,000 that applies to state and local taxes. (See page 7.04.01 for details.) These regulations also apply to contributions made after August 27, 2018 to pre-existing *quid pro quo* programs when the credit claimed on the state return is greater than 15% of the contribution. The California College Access Tax Credit Fund is such a program.

> ***Example:*** *Alyssia makes a payment of $1,000 to the California College Access Fund on October 1, 2019. In exchange for the payment, she receives or expects to receive a state tax credit of 50% of the contribution. Under the regulations, Alyssia's federal charitable contribution deduction is reduced by $500 (50% x $1,000). Thus, Alyssia's federal charitable contribution deduction for the $1,000 payment is $500.*

Credit Must Be Applied For: The maximum aggregate amount of tax credits that can be allocated and certified for each calendar year 2014-2016 is $500 million in addition to the amount of any unallocated and uncertified tax credits in the previous calendar year. The cumulative amount of credits allocated and certified for 2014 through 2018 was just over $25.5 million. For 2018 and 2019, the yearly maximum amount of credits that can be allocated and certified is $500 million (per SB 81, signed into law June 24, 2015). The California Educational Facilities Authority's (CEFA) deadline for applications for credits for 2019 is 5:00 p.m. January 2, 2020. The application can be downloaded at: https://www.treasurer.ca.gov/cefa/catc/index.asp. The completed application can be faxed to 916-653-2179 or mailed to **CEFA**, **915 Capitol Mall, Room 435, Sacramento, CA 95814, Attention: Operations Manager**.

CA AMT – SB81 passed in 2015 allows the credit to be used against the California AMT. The legislation is also retroactive to 2014, and allows CA taxpayers who were approved for the credit, claimed the credit on their 2014 tax return and had the credit limited by the AMT to amend the 2014 return and claim the credit against the AMT.

OTHER CURRENT CREDITS NOT SPECIFICALLY COVERED ELSEWHERE IN THE TEXT

Credit	Code	Abbreviated Description
AMT (prior year) Credit – FTB 3510	188	Determined in a manor similar to the Federal AMT credit; reduces regular tax; not refundable.
Disabled Access for Eligible Small Businesses FTB Form3548	205	Similar to the Federal credit but limited to $125 based on 50% of qualified expenditures that do not exceed $250.
Donated Agricultural Products Transportation FTB Form 3547	204	50% of the costs paid or incurred for the transportation of agricultural products donated to nonprofit charitable orgs.
Enhanced Oil Recovery – FTB 3546	203	One third of the similar Federal credit and limited to qualified enhanced oil recovery projects located in CA.
Low-Income Housing – FTB 3521	172	Similar to the Federal credit but limited to low-income housing in California.
New Donated Fresh Fruits or Vegetables - FTB 3814	238	15% of the qualified value of the donated item, based on weighted average wholesale price for contributions to CA food banks 2017-2021; unused credit carried forward 7 years.
Prison Inmate Labor - FTB 3507	162	10% of wages paid to prison inmates.

CREDIT REFERENCE TABLE

Targeted Tax Area Sales or Use Tax	210
Water Conservation	178
Young Infant	161

NOTES

FEDERAL TAX PENALTIES

Overview

Late filing: 4-1/2 % per month; 22-1/2% max

- **Late paying:** 1/2% per month; 25% max. (combined with late filing 1st 5 mo.)
- **Late filing minimum:** smaller of $330 (2020) or 100% of tax due
- **Failure to report tips:** 50% of the SS tax on tips
- **Dishonored payment:**
    - Less than $1,250 – lesser of $25 or the amount of the check
    - $1,250 or more – 2% of the check amount
- **Excessive Claim Penalty:** 20% of the excessive amount
- **Fraud:** 75% of the unpaid tax due to fraud
- **Negligence** (accuracy related)**:** 20% of the underpayment, 40% if attributable to undisclosed foreign financial asset
- **Paying late:**
    - Each month – ½ %
    - After notice to levy – 1% per month
    - Maximum 25%
    - If paying in installments – ¼% per month
- **Missing ID Number:** $50 each
- **Late filing because of fraud:** 15% per month
    - Maximum 75%
- **Failure to report foreign gifts:** 25% (See chapter 1.13)
- **Failure to report ownership of or transactions with foreign trusts**: Greater of $10,000 or 35% (See chapter 1.13)
- **Failure to report foreign assets (Form 8938):** $10,000 for 1st 90 days and $10,000 for each subsequent 30 days (See chapter 1.13)
- **Failure to report Foreign Accounts (FBAR):** $10,000 (non-willful), $100,000 or 50% of account balance if willful (See chapter 1.13)

RAPID FINDER

New Law & Stuff

CHANGES MADE BY THE TAXPAYER FIRST ACT OF 2019

Penalty for Failure to File - Effective for returns required to be filed after Dec. 31, 2019, the late filing minimum penalty is increased to $330 (adjusted for inflation after 2020) and is substituted for the inflation-adjusted $215 penalty that was to apply to returns required to be filed in 2020. (Code Sec. 6651(a) and Code Sec. 6651(j), as amended by the Taxpayer First Act - Sec. 3201)

The Details

PENALTIES - The following is a listing of the penalties that are most commonly assessed by the IRS. The codes which the IRS uses on its penalty notices are also included.

Filing and Paying Late (Code 01) - These penalties are assessed because a taxpayer did not timely file and did not pay the tax owed. The combined penalty is 5% of the unpaid tax for each month or part of a month the return is late, but not for more than 5 months. The late filing penalty is reduced by the late payment penalty. Thus, the 5% includes a 4 1/2% penalty for filing late and a 1/2% penalty for paying late. (IRC 6651).

The 25% combined maximum penalty includes 22 1/2% for filing late and 2 1/2% for paying late. The 1/2 % penalty for paying late is not limited to 5 months. This penalty will continue to increase to a maximum of 25% until the taxpayer pays the tax in full. The maximum 25% penalty for paying late is in addition to the maximum 22 1/2% late filing penalty for a total penalty of 47 1/2%.

If a taxpayer didn't file a return within 60 days of the due date, the minimum penalty is the lesser of 100% of the tax due or $330 for returns required to be filed 2020 (Taxpayer First Act). Historical penalties shown in the table below.

Year	Before 2009	2009-2015	2016	2017-2018	2019*
Penalty	$100	$135	$205	$210	$330

If amount not shown it was not available at publication date.
**Technically, applies for returns required to be filed in 2020, which generally would be 2019 returns*

Extensions – IRM 20.1.2.2.3.1.1 (03-19-2019) – Extension of Time to File Not Found - provides guidance to IRS employees when a taxpayer claims to have filed an extension, but the extension has not been posted on the IRS system. It requires the IRS agent to check if the extension filed was erroneously posted to another account. It also requires the IRS to examine the facts of each case and apply the more likely than not criteria. The following is an excerpt from the Revenue Manual:

> *. . . if all the known facts would lead a reasonable person to presume that it is more likely than not, that a valid, and timely, extension request was submitted, then the* ***more likely than not*** *criteria has been met. Examples would include a certified mail receipt along with a copy of the extension; or a list of extensions filed by a tax professional where most extensions on the list have been received and posted; or a payment posted to the account that was mailed with the extension request. (This list is not all-inclusive.)*
>
> *A history of approved extensions alone, a mere statement that an extension request was filed, or even a copy of the extension request that was* allegedly *filed, are not in and of themselves* evidence of filing *an extension for the current year. However, collectively with other facts, such as the reason the taxpayer would have had for filing an extension, the earlier mentioned facts could be sufficient to meet the* more likely than not *criteria. Additionally, Facts can be used collectively to show that it was reasonable for the taxpayer to* believe *that an extension had been requested and approved. For example, a list of extensions allegedly filed by a tax professional, where most extensions on the list have not been received and processed, still may be used to show that it was reasonable for the taxpayer to* believe *that an extension of time to file had been requested and approved.*

Extension Precautions

Many practitioners take filing extensions far too lightly and are unaware of, or ignore, the nuances of properly completing an extension and the potential penalties. Properly and timely filing the Form 4868 extends the individual income tax return filing due date for a calendar-year filer to October 15 (or the next business day if October 15 falls on a weekend or holiday) and avoids the 5% per month (or part of a month) failure-to-file penalty.

Properly Estimate the Tax Liability – The 4868 instructions clearly indicate that to have a valid extension, a taxpayer must:

(1) Properly estimate their tax liability using the information available to them, and
(2) Enter their total tax liability on line 4 of the 4868 and
(3) File the extension by the regular due date for their return.

This requirement was reinforced in Tax Court (*Laidlaw v. Commissioner*) where the court determined the extension was invalid because the taxpayer (through their tax preparer) did not make a bona fide and reasonable estimate of their tax liability or attempt to secure the information necessary to complete a valid estimate. They had merely entered a zero for the estimated tax liability without making a proper estimate of the liability.

Underpayment of Estimated Tax (Code 02) - If a taxpayer owes tax of $1000 or more for the tax year, the taxpayer must prepay the tax by having tax withheld or by making estimated tax payments. Failure to do so will result in the taxpayer being subject to the current published interest rates for underpayment of estimated taxes. See chapter 10.03 on estimated taxes and safe harbor rules. (IRC Sections 6654, 6621)

Dishonored Check Payment (Code 04) - A penalty is charged if a taxpayer's payment is dishonored and returned from a financial institution. The penalty is the greater of $25 or 2% of the payment amount. For checks of less than $1,250, the penalty is the lesser of $25 or the amount of the check. (IRC Section 6657)

Fraud (Code 05) - This penalty is 75% of the tax unpaid due to fraud. (IRC Section 6663)

Negligence (Code 06) - This "accuracy-related" penalty is 20% of the tax underpayment that is due to negligence or tax valuation misstatements (IRC Section 6662(a)). Substantial understatement is the greater of 10% (5% if the Sec 199A deduction is claimed) of the tax shown on the return or $5,000. (IRC Section 6662(d)(1)) A 40% accuracy-related penalty is imposed for underpayment of tax that is attributable to an undisclosed foreign financial asset understatement (IRC Sec. 6662(j)).

Paying Late (Code 07) - The penalty is 1/2% of the unpaid tax for each month or part of a month the tax is unpaid. If the IRS issues a Notice of Intent to Levy and the taxpayer doesn't pay the balance within 10 days, the penalty increases to 1% per month. The penalty can't be more than 25% of the tax paid late. The late payment penalty is reduced to 1/4% per month for those paying in installments. (IRC Section 6651)

Missing ID Number (Code 08) - This penalty is $50 for each missing number. This penalty is charged when a taxpayer doesn't provide a social security number (SSN) for self, dependent, or another person or doesn't provide his/her SSN to another person when required. The penalty can't exceed $100,000 in any calendar year. (IRC Section 6723)

Penalty on Tips (Code 27) - This penalty is charged if a taxpayer didn't report tips to his/her employer. It equals 50% of the social security tax on the unreported tips. (IRC Section 6652(b))

"Excessive" Claim Penalty - If a claim for refund or credit for income tax (other than a claim for refund or credit relating to the earned income credit that was made prior to December 16, 2015) is made for an "excessive amount," the person making the claim is liable for a penalty equal to 20% of the excessive amount. (Code Sec. 6676(a), as amended by the PATH Act of 2015) The "excessive amount" is the amount by which the amount of a person's claim for refund or credit for any tax year exceeds the amount of the claim allowable under the Code for that tax year. (Code Sec. 6676(b))

The penalty doesn't apply if it is shown that the claim for the excessive amount is made with reasonable cause. For claims filed on or before December 18, 2015, the penalty applies to claims filed without a reasonable *basis*. (Code Sec. 6676(a)) The penalty also does not apply if any portion of the excessive amount or credit is subject to an accuracy-related penalty imposed under Code Sec. 6662 or Code Sec. 6662A or under the Code Sec. 6663 fraud penalty. (Code Sec. 6676(c))

Frivolous return - In addition to any other penalties, the law imposes a penalty of $5,000 for filing a frivolous return. A frivolous return is one that does not contain information needed to figure the correct tax or shows a substantially incorrect tax because the taxpayer takes a frivolous position or desire to delay or interfere with the tax laws. This includes altering or striking out the preprinted language above the space where the taxpayer signs. For a list of positions identified as frivolous, see Notice 2010-33, I.R.B. 2010-17, April 7, 2010, which modifies and supersedes Notice 2008-14, 2008-4, IRB 310, both of which are available at: www.irs.gov/irb. (Code Sec 6702) Under limited circumstances the IRS may reduce the penalty from $5,000 to $500; see Rev. Proc. 2012-43, 2012-49 IRB 643 for details.

Minimum Penalty for Failure to Report on Foreign Trust - For notices and returns required to be filed after Dec. 31, 2009, the initial penalty for failing to report under Code Sec. 6048 is the greater of $10,000 or 35% of the gross reportable amount (5% for U.S. persons treated as owners of the trust). (Code Sec. 6677(a)) Thus, an initial penalty of $10,000 is imposed even where IRS has insufficient information to determine the gross reportable amount. The additional $10,000 penalty for every additional 30 days of delinquency continues to apply. The penalty applies if the required information or return is not filed by the due date, does not include all required information or includes incorrect information.

Failure to File Information Returns –A payer who, without reasonable cause, fails to timely file a required information return in the required manner, or fails to include all of the information required to be shown on the return, or includes incorrect information, is subject to a penalty of $100 for each return required to be filed on or before December 31, 2015, with a maximum penalty of $1.5 million for each calendar year. For a correct information return filed late, but on or before 30 days after the required filing date, the penalty amounts are reduced to $30/$250,000; returns filed after the 30th day after the due date but on or before August 1 have a reduced penalty of $60/$500,000. The maximum penalty is reduced to $75,000 (corrected within 30 days) or $200,000 (corrected by Aug. 1) if average gross receipts is $5 million or less. For tax years beginning in 2015, the penalty amounts are increased and inflation-adjusted (see tables below). Income is determined by averaging the gross annual receipts of the most recent three tax years. (Code Sec 6721)

	Year	Penalty Per Return	Calendar Year Maximum Average Gross Receipts $5 Million or Less	Calendar Year Maximum Average Gross Receipts More Than $5 Million
General Rule	2018 2019* 2020	$270 $270 $280	$1,091,500 $1,113,000 $1,130,500	$3,275,500 $3,339,000 $3,392,000
Corrected by 30th day after due date	2018 2019* 2020	$50 $50 $50	$191,000 $194,500 $197,500	$545,500 $556,500 $565,000
Corrected after 30th day but on or before August 1	2018 2019* 2020	$100 $110 $110	$545,500 $556,500 $565,000	$1,637,500 $1,669,500 $1,696,000
Per Rev Proc	2018 2019* 2020	2018-18 2018-57		

*Return required to be filed in 2020

De Minimis Failures - An otherwise correctly filed information return required to be filed **after 2016** that has one or more incorrect dollar amounts does not need to be corrected in some cases. It is treated as having been filed or provided with all correct required information, if no single incorrect dollar amount differs from the correct amount by more than $100; and no single amount reported for tax withheld on any information return differs from the correct amount by more than $25. (Code Sec. 6721(c)(3)) However, if the person receiving the payee statement elects out of the exception, and elects to receive a corrected payee statement, this safe-harbor rule won't apply.

Restitution Collection - The IRS is allowed to assess and collect the amount of restitution under an order made pursuant to title 18 USC § 3556 for failure to pay any tax imposed under the Code, in the same manner as if the restitution amount were the tax itself (Code Sec. 6201(a)(4)(A)). In other words, IRS can assess and collect restitution owed by defendants in criminal tax cases as if it were a tax. An assessment of such a court-ordered restitution amount won't be made before all appeals of the order are concluded and the right to make all those appeals has expired. (Code Sec. 6201(a)(4)(B))

W-4 Falsification – A penalty of $500 may be assessed if excessive allowances are claimed to reduce the withholding and there is no reasonable basis for doing so. There is also a $1,000 criminal penalty or one year of imprisonment, or both, if convicted of willfully providing fraudulent information in order to reduce withholding. (Code Section 6682)

Overstatement of Non-Deductible IRA Contributions - $100 for each overstatement unless due to reasonable cause.

Failure to file Form 8606 – Non-Deductible IRA - $50 unless due to reasonable cause. (Form 8606 Instructions)

Failure to Provide TIN to Payer of Alimony - $50 (IRS Pub 504).

Penalty Relief Application Chart

Reproduction of IRM Exhibit 20.1.1-1 (07/2019)

IRC Section	Type of Penalty	Reasonable Cause Relief	Other Relief
6039E	Failure to Provide Information Concerning Resident Status	Yes	Yes
6651(a)(1)	Failure to File Tax Return	Yes	Yes
6651(a)(2)	Failure to Pay Tax When Due	Yes	Yes
6651(a)(3)	Failure to Pay Within 10 Days of Notice of Additional Tax Due (notices issued prior to 1/1/1997)	Yes	Yes
6651(a)(3)	Failure to Pay Within 21 Days of Notice of Additional Tax Due (10 business days if amount is $100,000 or more) (notices issued after 12/31/1996)	Yes	Yes
6651(f)	Fraudulent Failure to File	No	No
6652(a)(1)	Failure to File Certain Information Returns	Yes	Yes
6652(c)(1)	Failure to File Annual Return by Exempt Organization	Yes	Yes
6652(c)(2)	Failure to File Returns Under IRC 6034 or IRC 6043(b))	Yes	Yes
6652(d)(2)	Notification of Change in Status of a Plan	Yes	Yes
6652(e)	Information Required in Connection With Certain Plans of Deferred Compensation—Form 5500	Yes	Yes
6652(h)	Failure to Give Notice to Recipients of Certain Pension, Etc., Distributions	Yes	Yes
6652(i)	Failure to Give Written Explanation to Recipients of Certain Qualifying Rollover Distributions	Yes	Yes
6652(j)	Failure to File Certification With Respect to Certain Residential Rental Projects	Yes	Yes
6654	Estimated Tax Penalty on Individuals	No	Yes
6655	Estimated Tax Penalty on Corporations	No	No
6656(a)	Failure to Deposit	Yes	Yes
6657	Bad Checks	Yes	Yes
6662	Accuracy-Related Penalty on Underpayments	Yes*	Yes
6662A	Accuracy-Related Penalty on Understatements With Respect to Reportable Transactions	Yes*	Yes
6663	Fraud	No	No
6676	Erroneous Claim for Refund or Credit	Yes	No
6692	Failure to File Actuarial Report	Yes	Yes
6698	Failure to File Partnership Return	Yes	Yes
6699	Failure to File S Corporation Return	Yes	Yes
6721	Failure to File Correct Information Reporting Returns	Yes	Yes
6722	Failure to Furnish Correct Payee Statements	Yes	Yes
6723	Failure to Comply With other Information Reporting Requirements	Yes	Yes
	* Reasonable cause does not apply to any portion of the underpayment (IRC 6662) or understatement (IRC 6662A) attributable to an IRC 6662(b)(6) transaction (transactions lacking economic substance within the meaning of IRC 7701(o), or failing to meet the requirements of any similar rule of law).		

REASONABLE CAUSE FOR PENALTY REMOVAL

The penalties described in this chapter may generally be reduced or removed if a taxpayer shows reasonable cause.

What Constitutes "Reasonable Cause"?

- The IRS Penalty Handbook defines reasonable cause as ***those reasons deemed administratively acceptable*** to the Service for justifying the nonassertion or abatement of applicable penalties against taxpayers. "Reasonable cause relief is generally granted when the taxpayer exercises ordinary business care

and prudence in determining their tax obligations but is unable to comply with those obligations." The Handbook also says, "Each case must be judged individually based on the facts and circumstances at hand."

CFR Section 301.6651 requires a written statement containing a declaration that is made under penalty of perjury and signed by the taxpayer or a representative having power of attorney. A request from a taxpayer's representative is considered a request by the taxpayer if:

a. The taxpayer's representative is an attorney, certified public accountant, enrolled agent, or any person permitted to represent the taxpayer before the IRS; and
b. The representative has been given a properly signed power of attorney.

- The Internal Revenue Manual contains this recommendation of the documentary evidence to support a reasonable cause request: "Taxpayers should be advised to submit documentation supporting the claim. Supporting documentation might include death certificates, doctor's statements, insurance statements, or other objective evidence."
- **Internal Revenue Code Section and Regulations References**
  1. Neither the accuracy-related penalty nor the fraud penalty is imposed with respect to any portion of an underpayment if it is shown that the taxpayer had reasonable cause for an underpayment and acted in good faith. *(Code Sec. 6664(c))*
  2. This standardized reasonable cause exception was designed to provide greater scope for judicial review of IRS penalty determinations.
  3. For example, under the former waiver provision, the Tax Court held that it could overturn an IRS determination of the substantial understatement penalty on reasonable cause and good faith grounds only if it found that the IRS abused its discretion in asserting the penalty.
  4. Code Sec. 6664(c) was intended to apply the same standard of review to the accuracy-related penalty as applies to the review of additional taxes assessed by the IRS (House Committee Report, Revenue Reconciliation Act of 1989). Frivolous challenges to the regulations remain subject to the penalty.
  5. The meanings of the terms "reasonable cause" and "good faith" are unchanged from those applicable under the former penalty structure. Whether a taxpayer has reasonable cause and good faith is a facts and circumstances determination made on a case-by-case basis. The most important factor is the extent of the taxpayer's effort to assess proper tax liability. *(Reg. §1.6664-4(b))*
- **Guidance for IRS employees in evaluating reasonable cause request, summarized from the Internal Revenue Manual, Section 20, Penalty Handbook**
  1. The burden of proof to establish reasonable cause is generally upon the taxpayer.
  2. Each reasonable cause request must be evaluated on its own merit.
  3. The merits should be determined based on the events or parties involved and whether or not the taxpayer exercised ordinary business care and prudence, but due to circumstances or events beyond the taxpayer's control, he/she was unable to meet the tax requirement.
  4. Determine if the taxpayer's reason addresses the penalty imposed. To show reasonable cause, the dates and explanations should clearly correspond with events on which the penalties are based.
  5. In determining whether or not ordinary business care and prudence were used, review available IRS information. Check previous periods for payment patterns and penalty history. The same penalty previously assessed may indicate that the taxpayer is not exercising ordinary business care to meet tax obligations.
  6. Consider the length of time between the event cited as a reason for the noncompliance and subsequent compliance.
  7. Consider whether or not the taxpayer could have anticipated the event that caused the noncompliance.

PROVING REASONABLE CAUSE

Reasonable cause has been defined as that which would prompt an ordinarily intelligent person to act under similar circumstances as did the taxpayer. The following have been used as grounds for reasonable cause in requesting penalty removal (they may or may not be favorable grounds):

(1) Reliance on IRS advice or publications;
(2) Expert tax advice;
(3) Delegating filing of tax return to attorney or accountant;
(4) Oversight of the taxpayer or an employee;
(5) Ignorance or misunderstanding of law by a nonexpert;
(6) Missing information;
(7) Unavailability of books and records;
(8) Essential parties to the situation unavailable;
(9) Overwork, stress, or health problems of the taxpayer;
(10) Unresolved dispute with IRS or other litigation;
(11) Disputes or misunderstandings between spouses;
(12) Financial hardship;
(13) Problems with U.S. postal service;
(14) Normal business practice.

Reasonable cause requests for nonassessment or abatement of penalties:

1. The law allows IRS to remove, reduce, or not assess penalties for late filing and/or late payment if the taxpayer is able to show "reasonable cause". IRS procedures require that in most cases where the penalty is being asserted, reasonable cause criteria should be discussed.
2. Appeals has jurisdiction to hear penalty cases prior to full payment.

Reasonable cause not established - If the taxpayer's request does not establish reasonable cause, the IRS will determine whether additional information is needed to evaluate the request. If the request is then rejected, the IRS will provide written notification to the taxpayer of the denial and of the taxpayer's appeal rights. The notice should include a complete explanation for the denial, instructions on how to submit a written protest and power of attorney information.

FIRST TIME ABATEMENT (FTA) PENALTY RELIEF

The Internal Revenue Manual (IRM 20.1.1.3.3.2.1 (11-21-2017) provides a one-time administrative abatement of **late filing** and **late payment** penalties where the taxpayer has:

- Not previously been granted relief under this provision, and
- Has been compliant in the three prior years.

The IRS is supposed to automatically apply this relief but frequently does not. If the taxpayer qualifies for the relief, a call to taxpayer services will usually trigger the relief. If the penalty has already been paid, file Form 843.

<u>Note</u>: where the taxpayer also qualifies for some other form of penalty relief, the IRM requires the FTA to be applied first.

According to IRS policy, the FTA penalty relief option does not apply if the taxpayer has not filed all returns and paid, or arranged to pay, all tax currently due. For example, the taxpayer is considered current if they have an open installment agreement and are current with their installment payments.

The FTA relief only applies to a single tax period for a taxpayer. For example, if a request for penalty relief is being considered for two or more periods of a taxpayer, and the earliest period meets the FTA criteria, FTA would apply only to the earliest period, and not for all periods.

Penalty relief under the first-time abatement provision does not apply to returns with an event-based filing requirement, such as Form 706, 709, 1120 or 1120S (not an all-inclusive list). For the S Corporation if, in the prior three years, at least one Form 1120S was filed late but not penalized, penalty relief under FTA will not apply.

The IRS said it would base decisions on removing any future failure to file, failure to pay or failure to deposit penalties on any information taxpayers provide that meets reasonable cause criteria.

Taxpayers who have been billed for penalty charges who feel they have reasonable cause, should send their explanations with their bill to their service center or call the IRS at (800) 829-1040 for assistance. Taxpayers may also use Form 843, Claim for Refund and Request for Abatement.

RELIANCE ON INFORMAL IRS ADVICE

Informal advice does not represent an official ruling. While it is usually most helpful in indicating the IRS viewpoint on a question, the taxpayer relies on it "at his peril" (United Block Co v. Helvering, (1941, CA2) 28 AFTR 399).

PENALTIES AND ADDITIONS TO TAX ATTRIBUTABLE TO RELIANCE ON ERRONEOUS WRITTEN ADVICE OF IRS

IRS must abate any portion of any penalty or addition to tax that is attributable to erroneous written advice furnished by an officer or employee of IRS (acting in an official capacity) to a taxpayer. (Code Sec. 6404(f); Reg. § 301.6404-3(a)) The abatement applies only if:

(1) The written advice was reasonably relied upon by the taxpayer,

(2) The written advice was in response to a specific written request of the taxpayer (Code Sec. 6404(f)(2)(A)), and,

(3) The portion of the penalty or addition to tax did not result from a failure by the taxpayer to provide adequate or accurate information. Thus, no abatement is allowed with respect to any portion of any penalty or addition to tax that resulted because the taxpayer requesting the advice did not provide IRS with adequate and accurate information. IRS need not verify or correct information that the taxpayer submits.

To have the penalty removed because of erroneous written advice from the IRS, a taxpayer should complete Form 843, Claim for Refund and Request for Abatement. Attach a copy of the taxpayer's written request for advice from the IRS. Also attach a copy of the IRS reply and the notice assessing the penalty.

HOW TO REQUEST ABATEMENT OF CIVIL PENALTIES FOR RESONABLE CAUSE

Taxpayers have the right to challenge the assertion or assessment of a penalty, and generally may do so at any stage in the penalty process. Taxpayers may request:

- A review of the penalty prior to assessment (e.g. deficiency procedures),
- A penalty abatement after it is assessed and either before or after it is paid (post-assessment review), or
- An abatement and refund after payment - claim for refund Form 843. Taxpayers may indicate their disagreement with IRS verbally, in writing, or if paid, by filing a claim for refund (IRS Form 843) or credit.

If agreement cannot be reached at the district or service center, the taxpayer may request a conference with the employee's immediate manager or in most cases the taxpayer may request that the case be forwarded to Appeals. Taxpayers should provide a written request for consideration by Appeals.

The taxpayer may also file suit in court. Depending on the procedural circumstances of the taxpayer's case, the taxpayer may petition the Tax Court or file a complaint with either the district court having jurisdiction or the Court of Federal Claims, as appropriate. ***(Internal Revenue Manual)***

To request abatement of a penalty after assessment, the taxpayer must submit a written request to IRS. ***(Internal Revenue Manual)***

Appeals officers have the authority to resolve appeals of assessed penalties. In order to expedite processing, each service center has a penalty appeal coordinator. Appeals officers should generally dispose of small penalty cases (resources permitting) within 90 days of receipt of the written protest and file from the service center or district office. Large penalty cases, or cases with more complex issues, could take additional time to complete. ***(Internal Revenue Manual)***

Internet access to the Internal Revenue Manual is: **http://www.irs.gov/irm**

STATUTE OF LIMITATIONS

- Section 6501(a)-The general statute of limitation within which the IRS must assess is 3 years from the due date of the return or the date the return is actually filed (state of California is 4 years);
- Section 6501(e) – contains the 6-year statute for the underreporting of income of more than 25%

Section 6501(c)(1), (2), & (3) provides for an unlimited statute for fraud, attempt to evade,and failure to file.

CALIFORNIA DIFFERENCES

CALIFORNIA PENALTIES OVERVIEW

- **Late filing**: 25% of the tax due if filed after the Oct 15 due date
- **Late filing Minimum**: Lesser of $135 or 100% of the refund.
- **Late paying**: 5% of the tax due plus 1/2% per month

UNDERPAYMENT OF ESTIMATED TAXES – See chapter 10.03

MANDATORY E-FILE E-PAY PENALTY – See chapter 10.03

LATE FILING OF RETURN

The maximum total penalty is 25% of the tax not paid if the tax return is filed after October 15. The minimum penalty for filing a tax return more than 60 days late is $135 or 100% of the balance due, whichever is less.

LATE PAYMENT OF TAX

If the total tax liability is not paid by the original due date, generally April 15 of the year following the tax year, a taxpayer will incur a late payment penalty plus interest. If at least 90% of the tax shown on the return is paid by the original due date of the tax return, the FTB will waive the penalty based on reasonable cause. However, the imposition of interest is mandatory. The penalty is 5% of the tax not paid when due plus 1/2% for each month, or part of a month, the tax remains unpaid.

MINIMUM LATE PAYMENT PENALTY

California amount is $135 (FTB Pub 1140, internet version updated as of 6/26/19).

INTEREST:

Interest will be charged on any late filing or late payment penalty from the original due date of the return to the date paid. In addition, if other penalties are not paid within 15 days, interest will be charged from the date of the billing notice until the date of payment. Interest compounds daily and the interest rate is adjusted twice a year. The FTB website has a chart of interest rates in effect since 1976. For the current and historical interest rates go to: https://www.ftb.ca.gov/pay/penalties-and-interest/interest-and-estimate-penalty-rates.html.

COST RECOVERY FEES:

The FTB charges cost recovery fees if they must take collection action to resolve a taxpayer's filing and payment delinquencies. Cost recovery fees may include a filing enforcement fee, a collection fee, a lien fee, and fees to cover the cost of seizing and selling property. Enforcement fees vary from year to year based on legislation and are set for a fiscal year July 1 through the following June 30. (R&TC Sections 19254, 19209, 19221, 19233, and 19234)

Fiscal Year:	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20
Individual, LLC, Partnership, LLP							
Enforcement Fee	$78	$76	$79	$81	$84	$88	$85
Collection Fee	$170	$194	$226	$226	$287	$317	$317
Corporation, LLC Treated as a Corp							
Enforcement Fee	$96	$96	$92	$100	$85	$81	$93
Collection Fee	$278	$310	$334	$365	$374	$382	$355

If the taxpayer's financial institution does not honor a payment to the Franchise Tax board that the taxpayer made by check, money order, or electronic funds transfer, a penalty of 2% of the payment amount is assessed. However, if the payment is less than $1,250 the penalty is $25 or the payment amount, whichever is less.

DEMAND TO FILE PENALTY

If the Franchise Tax Board issues a demand to file an income tax return or to provide information, and the taxpayer does not comply, the FTB will impose a penalty of 25% of the tax on the assessment, without reduction of payments and credits. This may result in a taxpayer owing penalties and interest even if the return shows a refund due.

NEST PENALTY

California's non-economic substance transaction understatement penalty (NEST), imposes a **20 percent penalty** for understatements attributable to non-economic substance transactions (Revenue and Taxation Code (R&TC) Section 19774). The penalty increases to **40 percent for transactions that are not adequately disclosed.**

A transaction lacks economic substance either because:

1. It lacks an economic benefit or,
2. There is no bona fide, non-tax California business purpose for entering into the transaction.

In cases where the taxpayer has received a final federal audit report, the FTB may assess the NEST penalty in lieu of the accuracy-related penalty assessed on the audit report if both of these criteria are met:

- The federal adjustment was from a transaction lacking economic substance.
- Tax benefits from this same transaction were reported on the California tax return.

This penalty is imposed on a Notice of Proposed Assessment. To dispute the NEST penalty, the taxpayer should file a protest of the penalty within the required 60-day time period (R&TC Section 19041), and also file a request for Chief Counsel to Relieve Penalties (form FTB 626).

The factors relating to whether the penalty was properly imposed will be developed during the protest process. The Chief Counsel relief process (R&TC Section 19774(d)) is the mechanism for determining whether to withdraw or reduce the NEST penalty. The Chief Counsel's determination will consider all grounds raised in the dispute of the penalty, including substantive arguments concerning economic substance and business purpose.

The Chief Counsel will issue a determination on the Request for Penalty Relief. The taxpayer cannot appeal or challenge the Chief Counsel's refusal to compromise the penalty before the Office of Tax Appeals or in court. A Notice of Action will be issued on the remaining issues which are the subject of the protest.

The taxpayer may also contest the penalty after paying the full amount and filing a claim for refund with FTB, and may appeal to the Office of Tax Appeals or file an action in court after the refund claim is denied or deemed denied.

FRIVOLOUS SUBMISSION PENALTY

The Franchise Tax Board (FTB) will begin imposing a penalty of $5,000 on or after July 20, 2009 for specified frivolous submissions as provided for in R&TC Section 19179. The penalty will not apply if the person withdraws the submission in writing within 30 days of FTB's notice that states the submission is a "specified frivolous submission." The FTB has adopted the list of frivolous positions in IRS Notice 2008-14. A "specified frivolous submission" is a submission that includes material that meets either of the following definitions:

- Is based on a position FTB identifies as frivolous.
- Reflects a desire to delay or impede the administration of federal income tax laws determined by the IRS, or California income or franchise tax laws determined by FTB.

Relief Available - Either or both of the following methods may be used to contest the frivolous submission penalty:

- Request relief from the penalty by submitting form FTB 626, Request for Chief Counsel to Relieve Penalties.
- After paying the penalty in full, the taxpayer can also file a claim for refund within the statute of limitations (R&TC Section 19306).

FRIVOLOUS RETURN PENALTY

A penalty applies for filing a frivolous return and is determined in accordance with Section 6702 of the Internal Revenue Code, except as otherwise provided. (R&TC Section 19179) The frivolous return penalty is $5,000 for California and is imposed if all of the following apply:

• The taxpayer submits what is purported to be a required return.
• The purported return does not contain sufficient information to judge the substantial correctness of the self-assessment or contains information that, on its face, indicates that the self-assessment is substantially incorrect.
• The purported return is based on a frivolous position or reflects an attempt to delay or impede administration of the tax laws.

Relief from Frivolous Return Penalty – The same methods apply as those for relief from the frivolous submission penalty. FTB's penalty reference chart: http://www.ftb.ca.gov/forms/misc/1024.pdf or https://www.ftb.ca.gov/forms/misc/1024.html

FIRST TIME ABATEMENT PENALTY RELIEF

California DOES NOT have a first-time abatement penalty relief provision similar to the IRS. The FTB maintains that it does not have administrative authority to abate penalties, but may abate certain penalties if reasonable cause is proven. The fact that the IRS abated a penalty under the FTA policy, or that the taxpayer has a good compliance history with the state, is not by itself sufficient to establish reasonable cause.

PENALTIES AND REASONABLE CAUSE RELIEF

Some of these penalties may be abated if a taxpayer can demonstrate reasonable cause. "Reasonable cause" in the context of penalties means that the taxpayers exercised ordinary business care and prudence in meeting their tax obligations but nevertheless failed to comply. Taxpayers may go to ftb.ca.gov and search for "reasonable cause" for law summaries which describe the circumstances that generally constitute reasonable cause.

Penalties imposed on taxpayers that can be abated for "reasonable cause" include:

- Delinquent/Late Filing Penalty - R&TC Section 19131.
- Late Payment Penalty - R&TC Section 19132.
- Notice and Demand/Failure to Furnish Information Penalty - R&TC Section 19133.
- Accuracy-Related Penalty - R&TC Section 19164.
- Electronic Fund Transfer (EFT) Penalty - R&TC Section 19011.
- Dishonored Payment Penalty - R&TC Section 19134.
- Withholding Liability for Tax and Withholding Penalties - R&TC Section 18668.
- Partnership/S-Corporation late filing penalties - R&TC Sections 19172 and 19172.5.

Reasonable Cause Abatement Request Forms - The FTB has two forms with instructions regarding reasonable cause and statute of limitations:

- FTB 2917, Reasonable Cause – Individual and Fiduciary Claim for Refund
- FTB 2924, Reasonable Cause – Business Entity Claim for Refund

The FTB recommends using these two forms for a quicker response but will continue to accept and process handwritten reasonable cause abatement requests.

NOTES

PREPARER PENALTIES

Overview

- Greater of $1,000 or 50% of the Preparation Fee – **Unreasonable position**
- Greater of $5,000 or 75% (50% prior to 2016) of the Preparation Fee – **Willful or Reckless Conduct**
- $530* – Per check - **Negotiating a refund check**
- $250/$1,000– Each - **Improper return information disclosure**
- $530* – Each failure to comply with **Head of Household**, **EIC, Child Tax Credit & AOTC due diligence**.
- $50 – Each failure ($26,500* max) to…
  - Furnish a completed **copy of the return**.
  - **Keep a copy of the return** (or keep list).
  - Reflect **preparer's ID number on return**.
  - **Sign a return**.
  - **File correct information returns**
  - Retain and make available a record of preparers employed, plus $50 for each failure to include a required item in that record.

*Amount applies to returns or refund claims filed in 2020 (i.e., generally 2019 returns)

Did Not Sign Return	10.02.03

TCJA

Head of Household Due Diligence – Effective with 2018 returns, a paid preparer is subject to due diligence requirements in determining a client's eligibility for the head of household filing status. (IRC Sec 695(g), as amended by Sec 11001(b) of the TCJA) For returns filed in 2020, the penalty for failing to exercise due diligence with respect to the head of household status is $530 ($520 for filings in 2019). IRS has revised Form 8867, Paid Preparer's Due Diligence Checklist, to add a section for this new requirement.

New Law & Stuff

CHANGES MADE BY THE TAXPAYER FIRST ACT OF 2019

Improper Disclosure by Return Preparers - Effective with respect to disclosures or uses made on or after the date of enactment, the Act increases the civil penalty for the unauthorized disclosure or use of information by tax return preparers from $250 to $1,000 for cases in which the disclosure or use is made in connection with a crime relating to the misappropriation of another person's taxpayer identity ("taxpayer identity theft"). The Act also increases the calendar year limitation from $10,000 to $50,000 in identity theft situations. The calendar year limitation is applied separately with respect to disclosures or uses made in connection with taxpayer identity theft. (Code Sec. 6713(b), as amended by Act Sec. 2009(a)(2))

The Act also increases the criminal penalty for knowing or reckless conduct to $100,000 in the case of disclosures or uses in connection with taxpayer identity theft. (Code Sec. 7216(a), as amended by Act Sec. 2009(b))

The Details

DEFINITION OF A TAX RETURN PREPARER

The definition of a tax preparer includes preparers of income, estate, gift, employment, excise tax, and exempt organization returns. (Code Sec. 7701(a)(36)

DUTIES OF A RETURN PREPARER TO RETAIN RETURN COPIES

- Return must contain ***preparer's full address***.
- Copy of completed return must be ***furnished to taxpayer*** at time of preparation completion.
- A return preparer must either keep a ***copy of the return*** on file or keep a list including name and taxpayer ID number of each return prepared. The record should indicate the type of return prepared. If multiple

preparers are in an office, the name of the preparer needs to also be in the record. This record information must be kept on file for ***3 years*** after close of the return period during which the return was given to the taxpayer (or 3 years from the return's due date if it is due (including extensions) after the return period in which it was presented for signature). The return period for this purpose is the 12-month period ending July 1 of each calendar year. *(Sec. 6107(d))*

- The ***IRS has jurisdiction*** to request the preparer's list or copies of returns without violating the preparer's rights.
- In an employment arrangement, only the ***employer has the obligation*** to retain return copies or a list.
- A ***computerized service*** is excused from retaining copies--e.g., a service bureau.
- When a ***preparer sells a business***, he/she retains the obligation to keep copies of returns. However, the preparer can transfer the retained returns to the buyer under an arrangement that recognized the record-retention requirement; the seller remains liable should the buyer fail to keep the records. **Note:** The seller should retain a list of the clients sold--this meets the IRS requirement for record retention.

FAILURE TO E-FILE (MAGNETIC MEDIA): Sec 6011(e)(3) requires a "specified" tax return preparer who prepares and files any individual, trust or estate return to file it by magnetic media (e-file). "Specified" tax return preparers are all preparers except an individual who reasonably expects to file 10 or fewer individual income tax returns in a calendar year. **There is no monetary penalty for not e-filing**, but Circular 230, Sec 10.51 states that willful disregard of e-filing rules is classified as disreputable conduct.

UNREASONABLE POSITION - A tax return preparer who prepares a return or refund claim for which any part of a tax liability understatement is due to an "unreasonable position" (defined below) must pay a penalty for each return or claim equal to the **greater** of:

- **$1,000** or
- **50% of the income derived** (or to be derived) by the tax return preparer for preparing the return or claim (Code Sec. 6694(a)(1))

A position is "unreasonable" if:

- The tax return preparer knew (or reasonably should have known) of the position,
- There was not a reasonable belief that the position would more likely than not be sustained on its merits, and
- The position was not disclosed as provided in Code Sec. 6662(d)(2)(B)(ii), or if the position was disclosed, there was no reasonable basis for the position. (Code Sec. 6694(a)(2))

WILLFUL OR RECKLESS CONDUCT - A tax return preparer who prepares a return or refund claim for which any part of a tax liability understatement is due to an "unreasonable position" (defined below) must pay a penalty for each return or claim equal to the **greater** of:

- **$5,000** or
- **75% of the income derived** (or to be derived) by the tax return preparer for preparing the return or claim (Code Sec. 6694(a)(1)). The 75% component of the penalty calculation was increased from **50%**, in effect for returns prepared for years before December 18, 2015.
- If the unreasonable position penalty was also imposed, the willful or reckless conduct penalty is reduced by the unreasonable position penalty.

"Willful or reckless conduct" is conduct by the tax return preparer which is a:

- Willful attempt to understate the tax liability on the return or claim, or
- Reckless or intentional disregard of rules or regulations. (Code Sec. 6694(b)(2))

Limitation Periods for Assessing & Refunding Sec 6694 Penalties – In Chief Counsel Advice Memorandum 201514008, the IRS said:

1. The limitation period for making an assessment of the return preparer penalty under Sec 6694 for preparing a return or claim for refund with an understatement of tax liability must be within 3 years of the date the underlying tax return or claim for refund is filed.
2. Any claim for refund of an overpayment of a penalty assessed under Sec 6694(a) must be filed within 3 years of the date the penalty was paid to the IRS.

Sec 6694 Penalties when Return Not Signed, Not Filed or Filed Late - For purposes of the penalties under Code Sec. 6694, a return or claim for refund is deemed prepared on the date it is signed by the tax return preparer, but if a signing tax return preparer (as defined in Reg. § 301.7701-15(b)(1)) fails to sign the return, the return or claim for refund is deemed prepared on the date the return or claim is filed. Chief Counsel Advice 201519029 concludes that Sec 6694 penalties apply where an amended return was signed by the preparer and never filed, and if an amended return was filed but IRS disallowed the refund. On the other hand, the Chief Counsel ruled that this penalty, as well as the penalties for understatement of tax and aiding or abetting an understatement of tax, is not to be assessed if the preparer made and filed a claim for refund after the period for claiming a refund had expired.

WHAT IS ADEQUATE DISCLOSURE? Disclosure under Sec. 6694(a) with regard to the unreasonable position penalty is adequate if made on a Form 8275, Disclosure Statement, or Form 8275-R, Regulation Disclosure Statement, attached to the return, amended return or refund claim, or pursuant to the annual revenue procedure (see, for example, Rev Proc 2019-9, which applies to any income tax return filed on 2018 tax forms for a tax year beginning in 2018 and to any income tax return filed in 2019 on 2018 tax forms for short taxable years beginning in 2019). For similar revenue procedures for other recent years see Rev Procs 2018-11, 2016-13, 2015-16, 2014-15, 2012-51, and 2012-15). The $1,000/50% of preparation income penalty will not be imposed if it is shown that there is reasonable cause for the understatement and the tax return preparer acted in good faith.

PREPARER PENALTIES: In addition to the penalties described above, the following penalties may be assessed against return preparers (amounts apply to returns or refund claims filed in 2020 unless otherwise noted):

- **$530 ($505** for tax years beginning in 2015, **$510** for tax years 2016 and 2017, $520 for filings in 2018) (per check) if the preparer endorses or ***negotiates any income tax check*** issued to the taxpayer.
- **$250** for each improper disclosure of return information, i.e., where the information is used for a purpose other than preparation of the return or **$1,000** for cases in which the disclosure or use is made in connection with a crime relating to the misappropriation of another person's taxpayer identity ("taxpayer identity theft"). The calendar year limitation is $10,000 ($50,000 for instances related to taxpayer identity theft). The calendar year limitation is applied separately with respect to disclosures or uses made in connection with taxpayer identity theft. (Code Sec. 6713(b)) The monetary penalty increases relating to a taxpayer identity theft crime apply to disclosures or uses on or after June 1, 2019, the date of the enactment of the Taxpayer First Act.
- Additionally, a criminal penalty of up to $1,000 ($100,000 in the case of a disclosure or use that involves taxpayer identity theft) and/or imprisonment of up to one year may be imposed.
- **$530 ($505** for tax years beginning in 2015, **$510** for tax years 2016 and 2017, $520 for 2018 filings) for each failure to comply with due diligence requirements in determining ***eligibility for the Head of Household filing status, EITC, Child Credit, and AOTC (child credit and AOTC effective for returns filed after 12/31/2016); HoH effective for tax years beginning after 12/31/2017).***
- In addition, the following **$50** penalties can be assessed unless reasonable cause is shown:
    - Each failure to furnish a ***completed copy*** of the return.
    - Each failure to keep a ***copy of the return*** (or keep list).
    - Each failure to reflect preparer's ***ID number*** on return.
    - Each failure to ***sign a return***.
    - Failure to retain and make available a record of preparers employed (the name, taxpayer identification number, and principal place of work during the return period of each preparer employed), plus $50 for each failure to include a required item in that record. (IRC Sec 6695(e); Sec 6060; Reg. 1.6060-1)

PREPARER NOT LIABLE WHERE HE DID NOT SIGN OR HELP PREPARE RETURNS: A district court has determined on summary judgment that a return preparer who owned a tax preparation business was not liable for Code Sec. 6694 penalties (understatement of taxpayer's liability by return preparer) with respect to returns that he didn't sign or help prepare. The court found that IRS failed to show that the preparer had any involvement with those returns or that liability could nonetheless be imposed on the basis that he employed the preparers. However, the court denied the preparer's motion for summary judgment with respect to the returns signed by him, stating that whether he acted willfully under Code Sec. 6694 was a factual issue to be decided by a jury. Lowery v. U.S., (DC NC 9/26/2018)

REPORTING FRAUDULENT PREPARERS: If you encounter work performed by another preparer that is clearly fraudulent, and you feel the need to report the practitioner's violations of Circular 230 provisions or tax law to the IRS, Form 14157 and its companion Form 14157-A are used for this purpose.

CALIFORNIA DIFFERENCES

California Preparer Penalties include the following:

- **$50 penalties** - California preparers are subject to a $50 per failure penalty for:
  - Not furnishing a completed copy of a return or claim. *R&TC 19167(a).*
  - Not including the identifying number of the preparer, employer or both on the return or claim. *R&TC 19167(b)*
  - Not retaining a completed copy of the return for 3 years (or keeping a list). *R&TC 19167(c)*
  - Failing to file returns electronically if subject to R&TC Sec. 18621.9. *R&TC 19170*
- **Negotiating taxpayer's check -** $250 for each endorsement or negotiation of a check. *R&TC 19169, 20645.7*
- **Penalty for not registering with CTEC** (California Tax Education Council) when required - $2,500 for first failure to register; $5,000 for other than first failure. *R&TC 19167(d)(1) and (2)*
- **Understatement of a taxpayer's liability by a tax preparer:**
  - Willful or reckless conduct - The greater of $5,000 or 50% (75%, effective for returns prepared for years ending after December 18, 2015) of the income derived (or to be derived) for each return or claim. *R&TC 19166(a)*
  - Unreasonable position – Greater of $250 or 50% of the income derived (or to be derived) for each return or claim. Applies if the taxpayer's understatement is due to a position for which there was not reasonable belief that the tax treatment was more likely than not the proper treatment, the preparer knew or should have known of the position, and the position was not disclosed or there was no reasonable basis for the tax treatment of that item. *R&TC 19166(a)*

See FTB penalty chart at https://www.ftb.ca.gov/forms/misc/1024.pdf for more details about penalties.

NOTES

UNDERPAYMENT OF ESTIMATED TAXES

- **De minimis Tax Due Amount**: $1,000
- **Safe Harbors**
  - **General rule**
    - 90% of the current year's tax, or
    - 100% of the previous year's tax.
  - **High income** – AGI prior year over $150,000 ($75,000 MS)
    - 90% of the current year's tax, or
    - 110% of the previous year's tax.
  - **Farmers & Fishermen**
    - 66 2/3% (.6667) of their total tax for the year, or
    - 100% of the total tax shown on the prior full year.

CAUTION
When preparing estimates don't overlook the 3.8% surtax on net investment income for higher income taxpayers!

2020 DRAFT W-4 RELEASED (A reproduction of the 2020 W-4 appears at the end of this chapter)

The Internal Revenue Service has released a draft of their proposed 2020 Form W-4 that is supposed to make accurate withholding easier for employees starting for 2020. The revised form implements changes made by the TCJA. and no longer uses the concept of withholding allowances, which was previously tied to the amount of the personal exemption.

The 2020 draft Form W-4 supposedly reflects important feedback from the payroll community and others in the tax community. The primary goals of the new design are to provide simplicity, accuracy and privacy for employees while minimizing burden for employers and payroll processors.

The IRS expects to release a near-final draft of the 2020 Form W-4 later in 2019 to give employers and payroll processors the tools they need to update systems before the final version of the form is released in November.

The IRS has also released early drafts of new Publication 15-T, Federal Income Tax Withholding Methods, for tax year 2020 with the related instructions for employers and instructions for Form W-4 for employees completing the new form. The instructions are about 10 pages and include worksheets for deductions, credits and multiple job situations. The IRS encourages the use of its online withholding calculator, which is supposed to be "easier and more accurate."

The new Form W-4 is not for current use but is a draft of the form to be used starting in 2020. For 2019, taxpayers should continue using the current Form W-4 (PDF).

There are several avenues available to avoid interest penalties for underpayment of estimated taxes.

DE MINIMIS EXCEPTION: The de minimis exception applies when the tax liability less withholding is less than **$1,000**.

ESTIMATED TAX SAFE HARBOR - ***General rule -*** To avoid an underpayment penalty, individuals whose annual tax obligation won't be met through income tax withholding must make timely payments (generally four equal payments) of estimated tax. The general rule requires annual payments of the lesser of:

- 90% of the current year's tax, or
- 100% of the previous year's tax.

High income safe harbor: If AGI for the previous year is over $150,000 ($75,000 if filing married separate), the required payment is the smaller of:

- 90% of the current year's tax, or
- 110% of the previous year's tax.

Amended return – The tax amount to use for the safe harbor test when the prior year return is amended depends on when the amendment is filed. Use the tax amount shown on the:

- Amended return if it is filed by the due date of the original return.
- Original return if the amended return is filed after the original return's due date. (*Exception:* if spouses originally filed timely separate returns and then file a joint return after the due date to replace the separate returns, use the tax on the joint return to figure the required estimated tax payments.)

Special Exceptions - Farmers and Fishermen - If at least two-thirds of the taxpayer's gross income for the prior year or the current year is from farming or fishing, the following special exceptions and rules apply:

- The estimated tax underpayment penalty won't apply if the tax return of the farmer or fisherman is filed, and all tax due is paid, by March 1 (calendar year filers).
- Any penalty owed is figured from the January 15 installment date.
- The taxpayer's required annual payment is the smaller of:
  1) 66-2/3% (.6667) of their total tax for the year, or
  2) 100% of the total tax shown on the prior year provided the prior year was for a full 12 months.

Separate Returns – Separate Estimates - If the taxpayer and spouse made separate estimated tax payments for the year and file separate returns, they can take credit only for their own payments.

Separate Returns – Joint Estimates - If the taxpayers made joint estimated tax payments, they must decide how to divide the payments between the returns. One can claim all of the estimated tax paid and the other none, or they can divide it in any other way they agree on.

If they cannot agree, they must divide the payments in proportion to each spouse's individual tax as shown on their separate returns for the year.

> ***Example -*** *James and Evelyn Brown made joint estimated tax payments totaling $3,000. They file separate returns and cannot agree on how to divide estimates. James' tax is $4,000 and Evelyn's is $1,000.*
> *James' share = 4,000/5,000 x 3,000 = $2,400*
> *Evelyn's share = 1,000/5000 x 3,000 =$ 600*

Divorced Taxpayers - If the taxpayers made joint estimated tax payments for the year and were divorced during the year, either spouse can claim all the payments or they each can claim part of them. If the taxpayers cannot agree on how to divide the payments, they must divide them in proportion to each spouse's individual tax as shown on their separate returns for the year.

NO TAX LIABILITY LAST YEAR - The taxpayer is exempt from the underpayment penalty if they had no tax liability in the prior year and they were a U.S. citizen or resident for the whole year. For this rule to apply, the tax year must have included all 12 months of the year.

2018 SPECIAL UNDERPAYMENT WAIVERS

The changes brought about by TCJA and the ensuing W-4 debacle and concerns that taxpayers may have under- withheld or under-prepaid estimated tax through no fault of their own prompted several members of Congress to apply pressure on the IRS to provide special relief from the penalty for underpayment of estimated taxes for 2018.

The IRS capitulated and initially provided an 85% safe harbor. This safe harbor, unlike the 90% quarterly statutory safe harbor only required that the taxpayer had made payments at any time during the year to satisfy the 85% requirement. However, because of the lateness of TCJA, the 2018 Form 2210 was already released and did not provide for the special 85% safe harbor. As a result, the IRS issued special instructions to check Box A in Part II of the 2210 and write "85% Waiver" next to Box A, and file page 1 of Form 2210 with the tax return to request the waiver.

However, after doing all this several Congressional leaders did not believe 85% was sufficient relief and urged the IRS to further reduce the safe harbor. The IRS subsequently, towards the end of February, reduced the safe harbor to 80% (Notice 2019-25).

> ***Example****: Susan's 2018 tax liability is $10,000; She had paid estimated tax installments totaling $8,100; no tax withheld. Thus, Susan was under paid by $1,900, so the $1,000* de minimis exception did not apply. *However, she had paid in 81% ($8,100/$10,000) of her tax liability, and since she prepaid more than 80% but less than 90%, the taxpayer is eligible for the penalty waiver due to tax reform. Had the taxpayer's ES payments been only $$7,900 (79% of $10,000), neither the 90% safe harbor nor the 80% tax reform waiver would apply, and the taxpayer would be subject to a Form 2210 penalty.*

Bottom line is some taxpayers, depending upon when they filed their return may have paid too high of an underpayment penalty and are due a refund.

Automatic Penalty Refund - In mid-August 2019 the IRS announced that it is automatically waiving the estimated tax penalty for the more than 400,000 eligible taxpayers who already filed their 2018 federal income tax returns but did not claim the waiver. The IRS will apply this waiver to tax accounts of all eligible taxpayers, so there is no need to contact the IRS to apply for or request the waiver. The IRS will be sending out CP21 notices advising taxpayers that they qualify for the waiver, followed by a refund check about three weeks after the CP21 is sent. The whole process could take several months. (IR-2019-144)

Refund Not Received - If you later determine your client is due a refund of some part or all of the penalty and did not receive an automatic refund, they can claim a refund of estimated tax penalties paid by filing Form 843, Claim for Refund and Request for Abatement. Most of the lines of the form are self-explanatory with the exception of the following:

- **Line 3** – Check "income" tax
- **Line 4** - Enter IRC Sec 6654
- **Line 5** – Leave blank
- **Line 7** – Include the statement "80% Waiver of estimated tax penalty" on line 7 and if the entire penalty is not refundable explain the circumstances.

Form 843 can't be filed electronically.

Special Waiver for Farmers and Fishermen – Anticipating that tax reform changes that affect farmers and fishermen would mean that some farmers and fishermen would have difficulty accurately determining and paying their 2018 tax liability by March 1, 2019 (see "Special Exceptions - Farmers and Fishermen" above), the IRS provided relief to individual taxpayers who are farmers or fishermen by waiving the underpayment of estimated tax penalty for any qualifying farmer or fisherman if their 2018 income tax return was filed and tax due was fully paid by April 15, 2019 (April 17, 2019 for those living in Maine or Massachusetts) and Form 2210-F was attached to the return with box A in Part I checked.

WAIVER OF PENALTY - The IRS will, under certain circumstances, waive the underpayment penalty. The following are the conditions and procedures for penalty waiver.

Conditions - The IRS can waive the penalty for the following circumstances:

1. The taxpayer retired (after reaching age 62) or became disabled in the year previous to the computation year or the computation year and both the following requirements are met.
   a. The taxpayer had a reasonable cause for not making the payment, and
   b. The underpayment was not due to willful neglect.
2. The taxpayer did not make payment because of one of the following situations and it would be inequitable to impose the penalty:
   a. Casualty
   b. Disaster, or
   c. Other unusual circumstance

Procedure - To request a waiver, complete Form 2210 and write the requested waiver amount next to line 17 (or the last line of Part IV if using the regular method).

a. **Requesting waiver of the entire penalty**
   i. Check ***Box A*** of ***Part II*** of the 2210
   ii. Attach a statement with an explanation and verification documentation.

b. **Requesting a partial waiver**
   i. Check ***Box B*** of ***Part II*** of the 2210
   ii. Complete Form 2210 through:
      1. Line 16 if using the short method or
      2. The next to last line of Part IV if using the long method.
      3. Subtract the amount being requested to be waived from the penalty calculated as if no waiver was requested and enter the balance on line 17 (short method) or the last line of Part IV (long method).
   iii. Attach a statement with an explanation and verification documentation

Verification –

a. **Retirement or Disability** - If the taxpayer is requesting a waiver due to retirement or disability, attach documentation that shows the taxpayer's retirement date and age on that date or the date the taxpayer became disabled.
b. **Casualty, Disability or Unusual Circumstances** - If the taxpayer is requesting a waiver due to a casualty, disaster, or other unusual circumstance attach documentation such as copies of police and insurance company reports.

ANNUALIZED INCOME EXCEPTION (REGULAR METHOD): If the de minimis and the safe harbor exceptions do not apply, use IRS Form 2210 to compute the underpayment penalty using the annualized method.

The worksheet annualizes the tax at the end of each period based on actual income, deductions, and other items relating to events that occurred since the beginning of the tax year through the end of the period. If this exception is used, Form 2210 must be attached to the tax return.

Strategies

WITHHOLDING STRATEGY: Wage withholding is considered paid evenly throughout the year regardless of when during the year it was withheld. Thus where a taxpayer's withholding and estimated tax payments are less than what is required to avoid a penalty, the taxpayer can increase his or her withholding at any time during the year and make up for the shortfall from earlier in the year.

CALIFORNIA DIFFERENCES

California estimated tax installment rules front load the estimate installments by requiring the payments to be 30%, 40%, 0% and 30%, respectively, of the annual payment due.

New Law & Stuff

2018 Penalty Waivers – California does not conform to the lowered safe harbor percentage for 2018 returns because the FTB felt the TCJA had no general impact to the amount of state income tax an individual would owe and thus it wasn't necessary for California to provide relief similar to the special federal waiver. However, California will waive the estimated tax penalty for farmers and fishermen who were unable to file and pay their 2018 taxes by March 1, 2019, if they filed and paid their 2018 taxes by April 15, 2019. For details see the FTB web site at:
https://www.ftb.ca.gov/about-ftb/newsroom/public-service-bulletins/2019-09-farmers-and-fishermen-relief.html

California and Federal estimated tax payment requirements are different. Use Form 5805 (5805F for farmers/fishermen) for the California computation of the underpayment penalty.

De minimis exception - The de minimis exception applies when the current or prior year's California tax liability (including AMT and the mental health services tax but excluding lump-sum distribution tax) less withholding and credits is less than **$500 ($250 if MS)**.

Annualized Exception – California law deems that a taxpayer's withholding is allocated in the same manner as the estimated payments. Thus, the withholding would be allocated as 30% paid in the 1st quarter, 40% in the second, none in quarter three and 30% in the last quarter.

General rule – The same as the Federal rule - Individuals must make timely payments of estimated tax. The general rule requires annual payments of the lesser of: (1) 90% of the current year's tax or (2) 100% of the prior year's tax.

High income safe harbor – The same as the Federal rule for most filers **-** If California AGI for the **previous year** is over $150,000 ($75,000 if filing married separate), the required payment (does not apply to farmers or fishermen) is the lesser of: (1) 90% of their current year's tax, or (2) 110% of the prior year's tax liability.

> *Exception for Extra-High-Income Taxpayers* – The prior-year-tax safe harbor cannot be used by taxpayers with an AGI of $1 million or more ($500,000 married separate). Instead, to avoid an underpayment of estimated tax penalty for California, these taxpayers' estimated payments must be at least 90% of their expected current year tax.

Farmers and fishermen - with at least two-thirds of their gross income for the prior year or the current year from farming or fishing, they may:

- Pay all of their estimated tax by Jan 15th (4th quarter due date); or
- File their tax return on or before March 1st and pay the total tax due.

The required estimated tax payment for farmers and fishermen is the lesser of 66 2/3% of the current year's tax or 100% of the prior year's tax.

General Exceptions - Underestimated penalties are not assessed by California if:

- 90% or more of the current year's tax will be paid by withholding; or
- There was no tax liability for the prior year and the prior year's return was for a full 12 months, or would have been if the taxpayer had been required to file; or
- The taxpayer's tax for the prior year (after subtracting withholding and credits) was less than the *de minimis* amount.

Law change exception – The underpayment of estimated tax penalty does not apply for California to the extent the underpayment of an installment was created or increased by any provision of law that is enacted during and operative for the tax year of the underpayment. (This exception does not apply to federal law changes that may create a state tax underpayment.) Request a waiver of the penalty on Form 5805 (Form 5805F for farmers and fishermen).

Mandatory e-pay required for high-income individual taxpayers - Beginning January 1, 2011 personal income taxpayers must send the payment electronically if either of the following conditions exists:

- **Tax liability is greater than $80,000**, or
- An **estimated tax or extension payment that exceeds $20,000** is made.

Once either of the above conditions is met, all payments regardless of type, amount, or tax year must be remitted electronically.

> ***Example*** *– On April 15, 2019, a taxpayer makes an estimated tax payment of $25,000 by paper check. Any payment made after that (for example, a bill payment from a previous year, the second quarter estimated tax payment or payments for future years) must be made electronically.*

Electronic payment methods include: (1) Electronic Withdrawal (EFW) when e-filing a return, (2) WebPay (at ftb.ca.gov), or (3) credit card (call 800.272.9829). There is a fee for using a credit card. There is also a pay-by-phone option but the taxpayer must register in advance to use this method by completing Form FTB 4073, *Mandatory e-pay Pay-by-Phone Authorization Agreement for Individuals*, and submitting it to the FTB. See the FTB web site for more details.

A payment made using a bank's online bill payment system is not an electronic payment because the bank mails a paper check to FTB, which does not meet the requirement to pay electronically.

While a taxpayer must make tax payments electronically if the e-pay criterion is met, there is no requirement that the tax return must be e-filed.

If required payments are not remitted electronically, there is a **one percent penalty** of the amount paid, unless the failure to pay electronically was for reasonable cause and not willful neglect. Taxpayers whose tax thresholds subsequently fall below the mandatory e-pay amounts may request to discontinue making electronic payments by using FTB Form 4107, *Mandatory e-pay Election to Discontinue or Waiver Request*.

Form **W-4**

Department of the Treasury
Internal Revenue Service

Employee's Withholding Allowance Certificate

▶ **Complete Form W-4 so that your employer can withhold the correct federal income tax from your pay.**
▶ **Give Form W-4 to your employer.**
▶ **Your withholding is subject to review by the IRS.**

OMB No. 1545-0074

2020

Step 1: Enter Personal Information

1a First name and middle initial | Last name | **1b Social security number**

Home address (number and street)

City or town, state, and ZIP code

▶ **Does your name match the name on your social security card?** If not, to ensure you get credit for your earnings, contact SSA at 800-772-1213 or go to *www.ssa.gov*.

1c ☐ **Single or Married filing separately** ☐ **Married filing jointly**
☐ **Head of household** (Check only if you're unmarried and pay more than half the costs of keeping up a home for yourself and a qualifying individual.)

Complete Steps 2 through 4 if they apply to you; otherwise, skip to Step 5. See instructions on page 2.

Step 2: Account for Multiple Jobs

Caution: The correct amount of withholding depends on income earned from all jobs in the household. If you:
- Hold more than one job at a time, or
- Are married filing jointly and both you and your spouse work,

account for this below or you may owe additional tax when filing your tax return.
(If you and/or your spouse have income from self-employment, see page 2.)

2 **Multiple jobs.** Do **only one** of the following.
- Use the calculator at *www.irs.gov/W4App* for most accurate withholding; **or**
- Use Worksheet 1 on page 3 and enter the result on line 4c below for roughly accurate withholding; **or**
- If there are only two jobs in your household, you may check here. Do the same on Form W-4 for the other job. With this option, more tax than necessary may be withheld from your wages, but you generally won't have too little tax withheld . . . . ▶ ☐

Complete lines 3 through 4b on Form W-4 for only one job in the household. (Your withholding will be most accurate if you do this on the Form W-4 for the highest paying job.)

Step 3: Claim Dependents

3 **Dependents.** If your income will be $200,000 or less ($400,000 or less if married filing jointly) (see instructions):
- Multiply the number of qualifying children under age 17 by $2,000 ▶ $
- Multiply the number of other dependents by $500 . . . . . ▶ $

Add the amounts above and enter the total here . . . . **3** $

Step 4: Other Adjustments (optional)

4a **Other income.** If you want tax withheld for other income you expect this year that will not have withholding, enter the amount of other income here. This may include interest, dividends, and retirement income. You should not include income from any jobs . . **4a** $

b **Deductions.** If you expect to claim deductions other than the standard deduction and want to reduce your withholding, use Worksheet 2 on page 3 and enter the result here **4b** $

c Enter any additional amount you want withheld each **pay period** . . . . **4c** $

d **Exemption.** You can claim exemption from withholding for 2020 if:
- For 2019, you had **no** federal income tax liability; **and**
- For 2020, you expect to have **no** federal income tax liability.

If you meet both of these conditions, certify by writing "Exempt" here . . . . . ▶ **4d**

Step 5: Sign Here

Under penalties of perjury, I declare that this certificate, to the best of my knowledge and belief, is true, correct, and complete.

▶ **Employee's signature** (This form is not valid unless you sign it.) ▶ **Date**

Employers Only

5 Employer's name and address | **6** First date of employment | **7** Employer identification number (EIN)

For Privacy Act and Paperwork Reduction Act Notice, see page 2. Cat. No. 10220Q Form **W-4** (2020)

NOTES

INJURED SPOUSE RELIEF

Overview

- **Definition**
  - Share of refund used to pay spouse's separate past debts:
    - Federal taxes
    - Child and spousal support
    - Student loans
- **Qualifications**
  - Injured spouse not liable for the past due amounts
  - Injured spouse received and reported income on a joint return
  - The joint return had withholding, estimated tax paid, or credits attributable to the injured spouse
- **Community Property States**
  - Application of community property law may negate injured spouse claims

DEFINITION OF INJURED SPOUSE

The Details

Don't confuse joint taxpayer relief ***(innocent spouse)*** with an ***injured spouse claim.*** The two are very different. The innocent spouse rules are covered in Chapter 11.02. A taxpayer is an injured spouse if his/her share of a refund on a joint return was (or may be) applied against his/her spouse's legally enforceable separate ***past-due debts*** such as:

- Federal and/or state income taxes,
- State unemployment compensation,
- Child or spousal support payments, or
- Student loans.

ELIMINATE THE RISK

Where appropriate, clients might consider filing separate returns so that the non-liable spouse's refund is protected, and therefore that spouse would no longer be "injured."

CONDITIONS FOR INJURED SPOUSE RELIEF

Injured spouse relief is available if all three of the following apply:

1. Taxpayer (injured spouse) isn't required to pay the past due amount.
2. The injured spouse received and reported income on the joint return.
3. The joint return had withholding, estimated tax, or a refundable credit (e.g., EIC) attributable to the injured spouse.

COMMUNITY PROPERTY STATES

Important for Community Property States - If the injured spouse resides in a community property state, Form 8379 may be filed if only Item 1 above applies. Community property states are Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas, Washington and Wisconsin***.*** Overpayments involving community property states are allocated by the IRS according to state law of the state of residence.

In a series of revenue rulings, the IRS explains how the amount of an overpayment reported on a joint return may be applied against a spouse's separate tax liability for taxpayers domiciled in community property states. These rulings make assumptions about the operation of state community property laws, which are highly dependent on facts and circumstances. Therefore, check current law and apply it to the particular facts of a specific taxpayer after reviewing the applicable revenue ruling. These rulings and the states they cover are:

State of Domicile	Revenue Ruling
Arizona, Wisconsin	2004-71
California, Idaho, Louisiana	2004-72
Nevada, New Mexico, Washington	2004-73
Texas	2004-74

Each of these rulings explains a 5-step process for determining how much of a joint overpayment the IRS can use to offset the separate tax liability of one spouse. The five steps are:

- **Step 1**: Identify the underlying source of the overpayment (i.e., income tax withholding, estimated tax payments and other credits). Note: If earned income credit is a source of the overpayment, see Rev. Rul. 87-52.
- **Step 2**: Characterize the underlying source of the overpayment as either separate or community property or a combination of separate and community property. An overpayment will be characterized in the same manner as the source of the overpayment.
- **Step 3**: Offset the liable spouse's share of the joint overpayment from a community property source against the liable spouse's separate tax liability.
- **Step 4**: Determine whether, under state law, the IRS may reach the non-liable spouse's share of the overpayment from a community property source.
- **Step 5**: Determine whether the IRS may, under state law, reach a portion of the overpayment from a separate property source of the liable spouse or the non-liable spouse.

Example – Determining Offset if Domiciled in California: *In 2017 Larry Smith is single and incurs a tax liability of $20,000, which he does not pay. In 2018 Larry marries Nancy. In 2020 they file a joint return for 2019, reporting an overpayment of $1,000 that results from Larry and Nancy's wages in 2019. They are domiciled in California for all relevant years. The IRS determines that the entire $1,000 overpayment may be used to offset part of Larry's 2017 tax liability, and thus Nancy would have no injured spouse claim. The IRS's analysis is as follows:*

Step 1: *The overpayment is from income taxes withheld in 2019 from Larry's and Nancy's wages.*

Step 2: *California law presumes that all property acquired during marriage by either spouse or both spouses, including wages, is community property. The overpayment results from income tax withholding from the Smiths' wages, so the entire overpayment is assumed to be from a community property source.*

Step 3: *Under California law, each spouse has an equal interest in all community property, so the IRS may offset Larry's $500 share of the overpayment, which is from a community property source, against his separate tax liability.*

Step 4: *Under California law, a creditor may reach all of the community property to satisfy a debt incurred by a spouse before or during marriage. Therefore, the IRS may offset the remaining $500 of the overpayment.*

Step 5: *Under California law, a creditor may reach all of Larry's separate property to satisfy his separate tax liability, but a creditor may not reach any of Nancy's separate property to satisfy Larry's separate tax liability. Since no part of the overpayment is a separate property source, there is no separate property that the IRS may offset against Larry's separate tax liability.*

FORM 8379: Injured spouses may be entitled to refunds for their own share of the tax on a joint return. Form 8379, Injured Spouse Allocation, is used to request this refund.

- Filing Form 8379 separate from Form 1040: If a taxpayer has already filed a joint return, either a paper or electronic version, Form 8379 is mailed by itself to the IRS Service Center for the taxpayer's residence at the time the return was originally filed. With the form, include copies of all W-2s and W-2Gs (for both spouses) and Forms 1099-R or other 1099 series forms that show tax withheld.
- Filing Form 8379 with Form 1040 (paper version): If a taxpayer is filing Form 8379 with his/her joint return, simply attach the form with the return in the order of its sequence number. Write "Injured Spouse" in the upper left corner of the return. **NOTE:** A taxpayer filing Form 8379 can't ask for a direct deposit of a refund into more than one account *(Form 8888 Instructions).*

CALIFORNIA DIFFERENCES

California does not have an "injured" spouse provision (Form FTB 705 instructions).

"INNOCENT SPOUSE" RULES

Tax Liability Relief for Joint Filers

Overview

When married taxpayers file jointly, they become JOINTLY AND INDIVIDUALLY responsible (often referred to as ***"jointly and severally liable"***) for the tax and interest or penalty due on their returns. <u>This is true even if they later divorce</u>.

Joint filers remain ***"jointly and severally liable"*** even if a divorce decree states that a former spouse is responsible for any amounts due on previously filed joint returns. One spouse may be held responsible for all the tax due, even if all the income was earned by the other spouse. However, a spouse may in certain cases be relieved of responsibility for tax, interest, and penalties on a joint return under special relief rules. Fairly recent tax law changes make it easier for a taxpayer to qualify for such relief.

The Details

<u>INNOCENT SPOUSE VS. INJURED SPOUSE</u>:

Don't confuse the label "innocent spouse" with "injured spouse". The two are very different. ***Innocent spouse*** refers to the possible relief for one spouse from joint and individual tax liability on a jointly filed return. On the other hand, a spouse may become an ***injured spouse*** when he/she marries someone owing a debt for taxes, child support, student loans, etc., incurred prior to the marriage. The injured spouse rules are covered in Chapter 11.01.

<u>USE FORM 8857 TO REQUEST JOINT TAX LIABILITY RELIEF</u>:

A spouse can be relieved of unpaid tax, interest, and penalties on a joint tax return. The request is made on **Form 8857**, **Request for Innocent Spouse Relief**.

The ***"innocent spouse"*** files **Form 8857** after becoming aware of a tax liability he/she believes belongs only to the other spouse. This could occur due to an audit or because of an IRS notice. Send the form to: **Internal Revenue Service, P.O. Box 120053, Covington, KY 41012** – send it to this address even if prior communications have occurred with the IRS because of an examination, appeal or collection action. Alternatively, the form and attachments can be faxed to the IRS at 855-233-8558.

Time Limitations for Requesting Relief - The IRS, in Notice 2011-70 and proposed regulations in Notice 2012-8 provide that equitable relief requests must be filed before the expiration of the period of limitation for collection of tax (generally 10 years from the time tax is assessed), or if applicable, the period of limitation for credit or refund. If the taxpayer has received an IRS notice of deficiency, a petition should be filed with the Tax Court within 90 days, and innocent spouse relief should be raised as a defense for the deficiency in the petition so as to preserve the taxpayer's rights in case the IRS doesn't process the request before the end of the 90-day period.

Rev Proc 2013-34 notes that if the requesting spouse is applying for relief from a liability or a portion of a liability that remains unpaid, the request for relief must be made on or before the Collection Statute Expiration Date, or the date the period of limitation on collection of the income tax liability expires, as provided in section 6502. "Generally, that period expires 10 years after the assessment of tax, but it may be extended by other provisions of the Internal Revenue Code."

Abused Spouse Requesting Relief - Rev Proc 2013-34 also provides that if the nonrequesting spouse abused the spouse who is requesting relief from the IRS, or maintained control over the household finances by restricting the requesting spouse's access to financial information, and because of the abuse or financial control, the requesting spouse was not able to challenge the treatment of any items on the joint return, or to question the payment of the taxes reported as due on the joint return or challenge the nonrequesting spouse's assurance regarding payment of the taxes, for fear of the nonrequesting spouse's retaliation, then the abuse or financial control will result in satisfying the factor needed for a streamlined determination even if the requesting spouse knew or had reason to know of the items giving rise to the understatement or deficiency, or knew or had reason to know that the nonrequesting spouse would not pay the tax liability

Note that under ***Rev. Rul. 2003-36 (2003-18 IRB 849),*** an ***estate executor*** can file **Form 8857** on behalf of a deceased ***"innocent spouse"*** as long as the decedent had satisfied the applicable requirements while alive. The ruling also concluded that if a spouse made a claim before death, an executor may pursue the claim following that spouse's death.

RELIEF FROM JOINT AND SEVERAL TAX LIABILITY:

Three types of relief are available:

- Innocent spouse relief
- Separation of liability
- Equitable relief

Table Comparing the 3 Relief Types (further discussion later in the chapter)

Factor	If innocent spouse relief	If separation of liability relief	If equitable relief
Type of liability	Must have filed joint return that had "understatement" of tax due to an erroneous item of non-innocent spouse.	Must have filed joint return with an "understatement" of tax liability due in part to an item of non-innocent spouse.	Must have filed a joint return that has either "understatement" or "underpayment" of tax.
Marital status		Must be no longer married, legally separated, or have not lived with spouse for whole year before filing for relief.	
Knowledge	Must show that at the time joint return was filed did not know, and had no reason to know, that there was an "understatement" of tax.	If IRS shows that taxpayer actually knew of the item causing the understatement, taxpayer isn't entitled to relief to extent of the actual knowledge (except where domestic abuse existed).	
Other qualifications			(1) Available where taxpayer doesn't qualify for innocent spouse relief or separation of liability. (2) No fraud involved.
Unfairness	The standard of unfairness may be applied in granting relief.		The standard of unfairness may be applied in granting relief.
Refunds	Request can generate a refund.	Relief available only for unpaid liabilities resulting from "understatement" of tax; refunds not authorized.	May be entitled to this relief in form of a refund in limited cases (Notice 2012-8).

INNOCENT SPOUSE RELIEF

To qualify for innocent spouse relief, a taxpayer:

1) Must have filed a joint return with an ***"understatement of tax"*** (i.e., the difference between the amount of tax that should have shown on a return vs. the tax actually shown) that was due to ***"erroneous items"*** of his/her spouse;
2) Must establish that at the time he/she signed the joint return, he/she ***didn't know*** (and had no reason to know) that there was an understatement; and
3) Accounting for all the facts and circumstances, it would be ***unfair*** (i.e., inequitable) to hold the taxpayer liable for the understatement of tax.

"Erroneous Items" are either:

- Unreported income that was received by the non-innocent spouse and isn't reported on the return.
- Incorrect deductions, credits, or basis claimed by the non-innocent spouse which are improper or for which there is no basis in fact or law.

The following are examples of erroneous items:

a. ***Deducted amount was never paid -*** *Delta's spouse claimed $10,000 for advertising expense on Schedule C, but never paid for advertising.*
b. ***Deducted expense does not qualify -*** *Sheri claimed a business fee of $10,000 that actually was for the payment of a nondeductible state penalty.*
c. ***No factual argument to support deduction*** *- Mac claimed $4,000 for security costs related to a home office. The costs were for veterinary fees and food costs for Buster, the family dog.*

"Indicators of Unfairness" are determined based on the facts and circumstances of each individual case. To decide unfairness, the IRS checks factors like these:

- ✓ Whether the "innocent spouse" received ***significant direct or indirect benefit*** from the understatement of tax. A significant benefit is one which is excessive in terms of normal support.

  Example—Significant Benefit: *In March 2019, Jenna received $20,000 from Terence, her spouse of 10 years. The funds were traced to Terence's lottery winnings in 2017. No winnings were reported on the couple's joint 2017 federal return. The couple's normal monthly household operating budget was around $4,000. More than likely, the IRS would rule that Jenna had received a significant benefit due to the $20,000 gift, even though it was received in a year other than the one in which the unreported income occurred.*

- ✓ ***Desertion*** of the innocent spouse by the non-innocent spouse.
- ✓ ***Divorce or separation*** of the spouses.
- ✓ Innocent spouse received a ***benefit on the return*** from the understatement.

RELIEF BY SEPARATION OF LIABILITY: To file a claim for this type of relief the understatement of a joint tax liability (including interest and penalty) must be allocated (separated) between spouses (or former spouses). Since this form of relief is for ***unpaid liabilities*** resulting from understatements of tax, **the relief doesn't generate refunds**.

To request relief by separation a taxpayer must have filed a joint return and meet either of the following when ***Form 8857*** is filed:

- ***Be divorced or legally separated*** from the spouse with whom the joint return was filed (***widowed*** counts the same as divorced or legally separated), OR
- ***Not be a member of the same household*** as the spouse with whom the joint return was filed during the 12-month period ending on the date Form 8857 is filed. **Note:** The reason for living apart must be due to estrangement, not temporary absence.

Limitations For Relief By Separation - Innocent spouse relief by separation won't be granted in these situations:

1. IRS proves that the spouses transferred assets to each other ***fraudulently***.
2. IRS shows that the "innocent spouse" had ***actual knowledge*** of erroneous items at the time of signing the joint return. **NOTE:** A victim of domestic abuse who had actual knowledge of errors may still qualify for relief if the abuse happened before signing the joint return and fear prevented the abused spouse from challenging treatment of return items.
3. The "non-innocent" spouse transfers property to the "innocent" spouse to ***avoid taxes***. A transfer to avoid tax is presumed if made within 1 year before the date on which the IRS sent its ***first letter*** of proposed deficiency. However, this presumption doesn't apply if the transfer is made under a divorce decree or separate maintenance agreement nor does it apply where a taxpayer can establish that the main purpose of the transfer was not tax avoidance.

EQUITABLE RELIEF: If a taxpayer doesn't qualify for the two other forms of innocent spouse relief, the IRS will ***automatically*** consider whether equitable relief is suitable to the situation.

A taxpayer may qualify for ***equitable relief*** if all of the following are met:

1. The taxpayer ***doesn't qualify under one of the other forms*** of relief (e.g., separation of liability);
2. The spouses ***didn't transfer assets*** to each other fraudulently or for the purpose of avoiding tax payment;
3. The taxpayers' return ***wasn't fraudulently filed***;

4. The taxpayer ***did not pay the tax owed*** (although a refund may be available for the taxpayer's portion of the joint overpayment from another tax year that was applied to the joint tax liability to the extent the taxpayer establishes providing funds for the overpayment (Notice 2012-8));
5. The taxpayer can establish that it would be ***unfair (inequitable)*** to hold him/her responsible for the tax liability;
6. The income ***tax*** from which the taxpayer seeks relief ***is attributable to the "non-innocent" spouse,*** unless one of the following exceptions applies:
   a. The item is partly or totally attributable to the taxpayer under community law.
   b. An item titled in the taxpayer's name is attributable to the taxpayer unless rebutted by facts and circumstances.
   c. The taxpayer had no knowledge, or reason to know, that the "non-innocent" spouse misappropriated the funds that were intended to pay the tax.
   d. The taxpayer establishes being an abuse victim before signing the return, and because of prior abuse, didn't challenge the treatment of items on the return for fear of retaliation by the spouse.

UNDERPAYMENT OF TAX VS. UNDERSTATEMENT OF TAX: Unlike limitations in innocent spouse or separation of liability relief situations, with equitable relief, a taxpayer can be entitled to either relief from an ***underpayment*** or ***understatement*** of tax. ***Definitions:***

Understatement of tax - This is generally the difference between the total tax that should have been shown on a return and the amount of tax actually shown on the return. This difference is due to erroneous items on the return.

> ***Example -*** *A joint return shows a tax liability of $5,000, all of which was paid. When the return is audited, the IRS finds that $10,000 of one spouse's income was unreported. The additional tax on this income is $1,500 for a total tax liability of $6,500. The understatement of tax is $1,500.*

Underpayment of tax - This is the amount of tax reported on the taxpayer's return but which hasn't been paid. For instance, if spouses file jointly owing a total tax liability of $6,000 and they pay only $4,000 with their return, their underpayment of tax is $2,000.

INDICATORS OF UNFAIRNESS

The IRS considers all facts and circumstances to determine if it is unfair to hold the innocent spouse responsible for an underpayment or understatement of tax. The degree of importance of each factor varies depending on the requesting spouse's circumstances and the factual context of the marriage. The factors are designed to be guides, and no one factor or a majority of factors necessarily determines the outcome. *(Notice 2012-8)* Examples of factors considered include:

Favorable Factors:

- ***Separation or divorce*** of the involved spouses.
- ***Economic hardship***
- ***Abuse***
- ***Lack of knowledge*** of the innocent spouse
- Non-innocent spouse's ***obligation under a divorce decree*** to pay the tax.
- The ***tax owed is attributed to the non-innocent spouse***.

Unfavorable Factors:

- ✓ Innocent spouse had ***knowledge*** of the understated items.
- ✓ Innocent spouse received ***significant benefit*** from the unpaid tax.
- ✓ ***Lack of good faith effort to comply with tax law*** by the innocent spouse.
- ✓ ***Innocent spouse has obligation to pay*** the tax under a divorce decree.
- ✓ ***Tax*** for which relief request is made is ***attributable to the innocent spouse***.

> ***Example—Applying the Unfairness Factors:*** *Nathan and his spouse Rae filed a joint 2019 return which showed a tax liability of $10,000. Nathan wanted to pay half the liability with funds he had saved prior to marriage and the other half with loan proceeds of $5,000. He made the necessary financial arrangements for these transactions and received two $5,000 checks which he gave to Rae to pay the 2019 taxes. However, unknown to Nathan, Rae paid only $5,000 with the tax return and used the $5,000 loan proceeds to go on a shopping spree for herself at Saks Fifth Avenue. The IRS later billed for the unpaid $5,000 and flabbergasted Nathan hurried to his accountant for advice. His accountant recommended seeking relief from the tax liability due under the innocent spouse rules so Nathan filed Form 8857.*

<u>Economic Hardship</u> – The IRS, in Rev. Proc. 2013-34, has set out criteria for quantifying this factor by providing minimum standards based on income, expenses, and assets, for determining whether the requesting spouse would suffer economic hardship if relief is not granted. An economic hardship exists if satisfaction of the tax liability in whole or in part will cause the requesting spouse to be unable to pay reasonable basic living expenses, taking into consideration the requesting spouse's current income and expenses and the requesting spouse's assets. The Service will compare the requesting spouse's income to the Federal poverty guidelines for the requesting spouse's family size and will determine by how much, if at all, the requesting spouse's monthly income exceeds the requesting spouse's reasonable basic monthly living expenses. For example, this factor will weigh in favor of relief if the requesting spouse's income is below 250% of the Federal poverty guidelines, unless there are assets from which the requesting spouse can make payments towards the tax liability and still adequately meet reasonable basic living expenses. The lack of a finding of economic hardship does not weigh against relief, as it did under Rev. Proc. 2003-61, and instead will be neutral.

Worksheet for Allocating the Understatement of Tax

(Not to be filed with the IRS. Keep with the taxpayer's records.)

			(a) Innocent Spouse Items	**(b) Joint Items**
1.	Enter the <u>net</u> income and deductions (1) taken into account in computing the understatement of tax **AND** (2) allocated to taxpayer or allocated jointly to taxpayer and spouse.		1.____________	1.____________
1.	Enter net amount of all income & deductions taken into account in computing understatement of tax.*	2.__________		
2.	Divide line 1 by line 2. Enter the result as a decimal rounded to at least 3 places.		3.____________	3.____________
3.	Enter the understatement of tax.*	4.__________		
4.	Enter the credits & other taxes taken into account to compute the understatement of tax.**	5.__________		
6.	Subtract line 5 from line 4.	6.__________		
7.	Multiply line 6 by line 3.		7.____________	7.____________
8.	Enter the credits & other taxes (1) taken into account in computing the understatement of tax & (2) allocated jointly to the spouses.***		8.____________	8.____________
9.	Add lines 7 & 8. The total of columns (a) and (b) is the understatement of tax the innocent spouse is responsible for.		9.____________	9.____________

NOTE: Subtract total from line 4 to get the understatement of tax that qualifies for relief.

* This should be shown on the IRS notice or audit report.

** Enter the part of the understatement of tax that came from an adjustment to a credit. Also include adjustments to alternative minimum tax, household employment taxes, self-employment taxes, penalties on IRA or pension distributions, among other taxes.

*** Enter in column (b) credits & other taxes allocated jointly to the spouses. Don't enter them in column (a). Such items could include a child's liability reported on the joint return or household employment taxes.

<u>ALLOCATING AN UNDERSTATEMENT OF TAX</u>

Once a taxpayer files Form 8857, the IRS will figure the part of the tax, interest, and penalty that belongs to each spouse. Alternatively, the allocation can be made for the taxpayer using the worksheet above.

<u>NOTES ON THE ALLOCATION WORKSHEET:</u>

Important Reminder: Community property laws aren't taken into account to determine whether an item belongs to the innocent or non-innocent spouse.

LINE 1, Column (a)

1. Allocate income and deductions to compute understatement of tax in the same manner that would have been used if separate returns had been filed.
2. Generally, enter items allocable to the innocent spouse in column (a).
3. Allocate wages to the spouse who performed the underlying services. Business income should be allocated to the spouse who owned the business. This rule also applies to capital gains. If spouses own property together, allocate according to each one's ownership interest.

4. To allocate items subject to different tax rates, first separate erroneous items into categories according to tax rate. Then use a separate worksheet for each category.

EXAMPLE—Allocating Items Subject to Differing Tax Rates: *Dan and Holly filed a joint tax return in 2017 but were divorced in 2018. In 2019, the IRS audited the 2017 return and found that the couple owed $4,780 additional income tax. Of that amount, $1,500 was tax on an unreported net capital gain of $10,000 (15% tax rate). The remaining $3,280 was assessed due to unreported interest and nonqualified dividend income of $10,000 (33% tax rate). This is the breakdown of the erroneous items attributable to each spouse.*

	15% RATE	**33% RATE**
Dan	Capital gain--$4,000	Interest--$7,000
Holly	Capital gain--$6,000	NQ Dividends--$3,000

Holly decides to ask for relief by separation of liability. She will complete 2 worksheets, one for each different tax rate. On the first worksheet (for 15% rate items) on line 1, she will enter $6,000 in column (a); $10,000 on line 2; .60 on line 3, column (a); and $1,500 on line 4. The remainder of the worksheet will be completed as appropriate.

On the second worksheet (for 33% rate items) on line 1, column (a), she will enter $3,000; $10,000 on line 2; .30 on line 3 column (a); and $3,280 on line 4. The remainder of the worksheet will be completed as appropriate.

5. If there is income subject to special limits on separate returns (like social security), figure the income on a joint return basis and allocate it between the spouses.

EXAMPLE—Allocating Income with Special Separate Return Limits: *Belle and Riordon filed their 2019 return jointly. Riordon received social security income in that year but it was not taxable because the couple's total income was under the base amount of $32,000 for joint filers. Eventually, the couple received an IRS notice advising them that they hadn't reported certain interest income. The notice recomputed their 2019 tax based on this increased income and also showed that half of Riordon's social security was taxable because total income was over the $32,000 base amount. Had Riordon filed a separate return for 2019, 85% of his social security would have been taxable. When figuring his separation of liability, Riordon allocates only half of the social security. This is true even though 85% would have been taxable had he and Belle filed separately.*

LINE 1, Column (b) - Income and deductions allocated jointly to the spouses need to be entered in Column (b), including items of the non-innocent spouse which created a tax benefit for the innocent spouse and erroneous items the innocent spouse knew about.

EXAMPLE—Tax Benefit Items Allocated to Innocent Spouse: *Terry's joint return shows his wages of $50,000 and $15,000 gross self-employment income allocated to his spouse. An audit disallowed $20,000 in expenses of the self-employed spouse. Only $15,000 of the disallowed expense offset the spouse's income. The remaining $5,000 must be allocated to Terry because the amount offset his income.*

LINE 5 - Enter the part of the understatement of tax that came from an adjustment to a credit. In addition, enter adjustments to a child's tax that the taxpayer chose to report on a joint return and any tax other than income tax. Examples of the latter could be:

a) Alternative minimum tax,
b) Net investment income tax,
c) Household employment taxes,
d) Recapture of investment, low-income housing, qualified electric vehicle, Indian employment, or new markets credits,
e) Recapture of federal mortgage subsidy,
f) Self-employment tax,
g) Social security and Medicare tax on unreported tips,
h) Premature retirement account distribution penalties,
i) Additional taxes on Coverdell education savings accounts,
j) Tax on excess contributions to IRAs, education savings accounts, or Archer MSAs,
k) Tax on golden parachute payments,
l) Tax on accumulation distribution of trusts, and
m) Uncollected social security and Medicare or RRTA tax on tips or group-term life insurance.

LINE 8, Column (a) - Generally, allocate credits and other taxes in the same manner as if the spouses had filed separate returns.

> ***EXAMPLE—Allocating Credits, Taxes, Etc., to the Innocent Spouse:*** *Alice reported $800 in self-employment tax on her return. In an audit, the IRS concluded that she owed $1,200 in self-employment tax. Since all of this tax applies to Alice, she would enter the increase in self-employment tax of $400 ($1,200 less $800) in column (a) of the worksheet.*

If a ***child's tax liability*** is reported on the joint return (using Form 8814), include the tax attributable to the child's income in Column (a) only if the child is the innocent spouse's and hasn't been legally adopted by the non-innocent spouse.

In addition, enter the innocent spouse's share of ***alternative minimum tax*** in Column (a) using the following formula to figure it:

$$\frac{\text{Innocent spouse's share of alternative minimum taxable income (AMTI) as recomputed by the IRS}}{\text{Total AMTI as recomputed by IRS}} \times \text{Understatement of tax due to AMT}$$

Credits that wouldn't be allowed had the innocent spouse filed separately should be figured as on a joint return and then allocated between the spouses. Examples of this might be child and dependent care credits, adoption or education credits and the EIC.

> ***EXAMPLE—Allocating Credits between Spouses:*** *Fred and Alta claimed an $860 child care credit on their joint tax return. However, $360 of the credit was disallowed in audit. Had the couple filed separate tax returns, none of the credit would have been allowed. However, they are entitled to $500 for purposes of figuring separation of tax liability. The amount allocated between Fred and Alta on the Worksheet is actually the $360 disallowed portion.*

Line 8, Column (b) - Credits and other taxes allocated jointly to the spouses need to be entered in Column (b) on this line. They should not be entered in Column (a). The following are examples of items to be listed in Column (b):

- ***Credits*** allocable to the non-innocent spouse that created a tax benefit for the innocent spouse;
- ***Erroneous items*** the innocent spouse was aware of;
- ***A child's tax liability*** reported by filing Form 8814. However, if one spouse is the child's step-parent, enter this liability in Column (b) only if the step-parent legally adopted the child;
- ***Household employment taxes***.

FILLED IN ALLOCATION WORKSHEET EXAMPLE

FACTS - Denise and William filed jointly in 2016, but they were divorced in 2018. On April 30, 2019, the IRS issued a collection notice to the couple in regard to their 2016 tax return. The notice cited four adjustment items:

- An unreported 1099-MISC for William showing $2,400 non-employee compensation from Showtime Consulting;
- $339 assessed for self-employment tax on the $2,400 1099-MISC;
- An adjustment to income of $170 for half of the $339 self-employment tax;
- An unreported 1099-INT from Bank of New York for Denise in the amount of $600.

After consulting with her accountant, Denise decided to file Form 8857 to request relief under separation of liability provisions. With her accountant's help, she fills out an allocation worksheet. The following table shows the allocated items:

Items to Allocate	Denise	William
1099-MISC		$2,400
1099-INT	$600	
½ self-employment tax adj		$170
Self-employment tax		$339

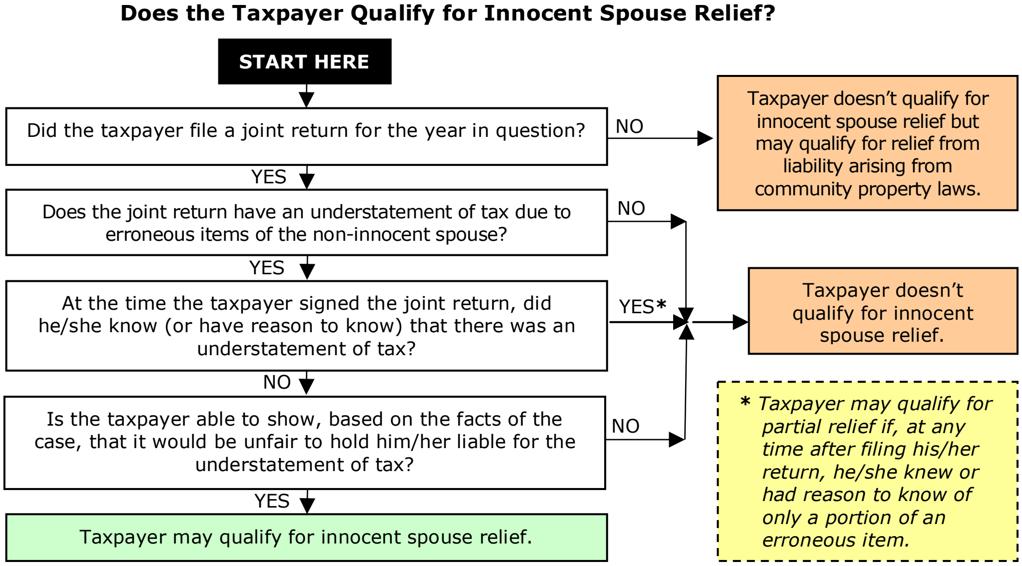
Continue to next page for worksheet

Worksheet for Allocating the Understatement of Tax
(Not to be filed with the IRS. Keep with the taxpayer's records.)

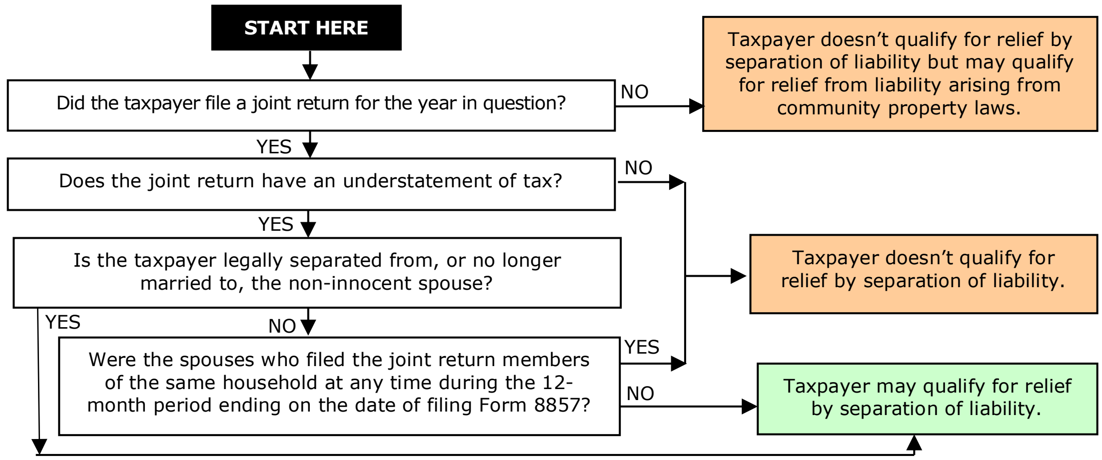
			(a) Innocent Spouse Items	(b) Joint Items
1.	Enter the <u>net</u> income and deductions (1) taken into account in computing the understatement of tax **AND** (2) allocated to taxpayer or allocated jointly to taxpayer and spouse.		1. 600	1. ____
2.	Enter net amount of all income & deductions taken into account in computing understatement of tax.*	2. 2,830	(2,400 + 600 – 170)	
3.	Divide line 1 by line 2. Enter the result as a decimal rounded to at least 3 places.		3. .212	3. -0-
4.	Enter the understatement of tax.*	4. 750	(from IRS notice)	
5.	Enter the credits & other taxes taken into account to compute the understatement of tax.**	5. 339		
6.	Subtract line 5 from line 4.	6. 411		
7.	Multiply line 6 by line 3.		7. 87	7. -0-
8.	Enter the credits & other taxes (1) taken into account in computing the understatement of tax & (2) allocated jointly to the spouses.***		8. -0-	8. -0-
9.	Add lines 7 & 8. The total of columns (a) and (b) is the understatement of tax the innocent spouse is responsible for.		9. 87	9. -0-

NOTE: Subtract total from line 4 to get the understatement of tax that qualifies for relief.

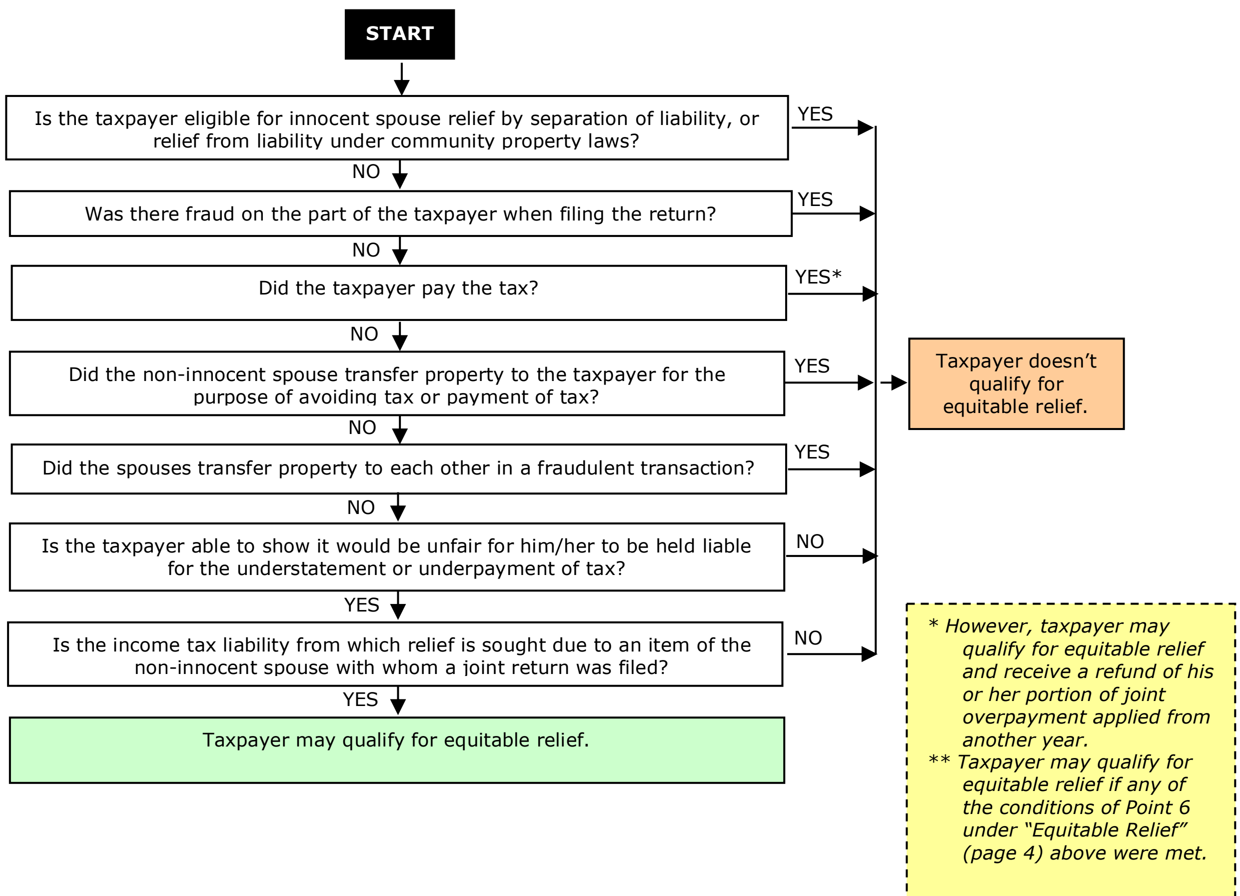
Does the Taxpayer Qualify for Innocent Spouse Relief?



Does the Taxpayer Qualify for Relief by Separation of Liability?



Determine If a Taxpayer May Qualify for Equitable Relief



TAX PLANNING CONSIDERATIONS

Meeting the time limits to request relief. A spouse, other than one requesting equitable relief, must request relief generally within 10 years from the time tax is assessed, or if applicable, the period of limitation for credit or refund.

A ***request for relief can be made before start of collection activity -*** For example, it can be made in connection with an audit. However, NO REQUEST CAN BE MADE BEFORE RECEIPT OF AN AUDIT OR OTHER NOTICE FROM THE IRS WHICH INDICATES THERE MAY BE AN OUTSTANDING TAX LIABILITY FOR A GIVEN YEAR.

What type of relief should a taxpayer request? When making a request for relief from joint tax liability on Form 8857, the request should not be made only for "equitable relief." The reason for this is that the IRS won't grant relief under the other provisions if only equitable relief is originally requested and not granted (i.e., no "innocent spouse relief" or "relief by separation of liability" will be available). However, if Form 8857 requests either "innocent spouse relief" or "relief by separation of liability" and the IRS finds that the requesting spouse might qualify for relief under one of these provisions, they will give the requester an opportunity to amend his/her original claim to request relief under an additional provision.

Suspension of the Statute of Limitations - A request for "innocent spouse relief" or "relief by separation of liability" results in the suspension of the Statute on collection. This is not so with "equitable relief."

Effect of Offer-in-Compromise - A spouse can't get joint tax liability relief for any tax year for which he/she has entered into an Offer-in-Compromise.

In Divorce Situations - Tax preparers may be asked to review tax allocations of estranged spouses as part of divorce proceedings. Of course, such allocations can be closely related to the innocent spouse rules and the possibility that one spouse may be considering requesting relief from a joint tax liability. For that reason, preparers may want to discuss the following questions and other specifics for consideration of the divorcing spouses:

- Have the parties specified how tax liabilities and refunds are to be allocated in their separation or divorce agreement? Remember that the parties' allocation agreement isn't enforceable on the IRS. Therefore, the agreement should provide for how the spouses are to proceed if the IRS allocates a tax liability contrary to the couple's agreement.
- Are there net operating losses being carried forward? How will they be shared between the spouses?
- In case of tax audits that occur in later years, what procedures are in place for selection of a representative and payment of professional fees?

OTHER RELATED ISSUES:

Joint return election: The election to file a joint tax return may be revoked only before the due date of a return, including extension. However, an executor may revoke a joint return election made by a surviving spouse within one year of the due date of the return including extension.

Validity of joint returns signed under duress: A signature made involuntarily or under duress is not a valid signature. Thus, if a spouse claims he/she signed a joint return under duress, the election to file a joint return may not be valid and the person claiming duress may not be held jointly or severally liable for the tax on the return. This circumstance, in effect, makes the relief provisions of ***§6015*** inapplicable. To establish that a return is signed under duress, the ***Internal Revenue Manual (IRM) 25.15.1.2.3 (06-26-2017)*** states that a taxpayer must show that he/she:

- Was unable to resist demands to sign the return; and
- Would not have signed the return except for the constraint applied by the other party.

If one spouse is able to prove duress, the IRS is instructed to adjust the return to reflect married separate returns being filed by both spouses. ***Question***—Will the taxpayer who proves duress save tax dollars? Much depends on the income of each spouse on the joint return, the use of certain credits not available on married separate returns, etc. Number crunching with married separate calculations should be part of the planning procedure. The IRM states that a requesting spouse who raises the issue of duress and later determines more tax would be owed if he or she filed separately, may choose not to pursue the issue of duress.

Forged Signatures: Where a spouse establishes forgery of his/her signature on a joint return (and there was no implied consent by that spouse to the return as filed), the joint return election is invalid. As with signature under duress, the relief provisions of ***§6015*** don't apply. The return will be adjusted to a married separate filing status. A married separate return may also be needed for the spouse claiming the forgery, depending on whether that spouse had income. The ***IRM 25.15.1.2.4 (06-26-2017)*** advises IRS auditors to consider referring the individual who forged the signature to the Criminal Investigation Division. Professional legal help should be advised.

EFFECTS OF RELIEF PROVISIONS ON THE "NON-INNOCENT SPOUSE"

Once a spouse (the requesting spouse) asks for innocent spouse relief, the other spouse (the non-requesting spouse) must be given the chance to participate in the proceedings ***(King v. Comm, 115 T.C. 118 (2000))***. In ***Corson v. Comm, 114 T.C. 354 (2000)***, for example, the IRS and the requesting spouse had reached an agreement, but the Court denied relief until the non-requesting spouse had the chance to participate in the proceedings.

The non-requesting spouse is entitled to file a written protest and receive an Appeals conference in regard to the IRS' decision to grant relief to a requesting spouse ***(Rev. Proc. 2003-19, 2003-5 IRB 371).*** Note, however, that the non-requesting spouse isn't entitled to file an independent petition with the Tax Court ***(Maier v. Comm, 119 T.X. 267 (2002), aff'd, No. 03-4509 (2d Cir., 02/26/04). Also see "Rev. Proc. 2003-19" below.***

To ensure that the non-requesting spouse gets the opportunity to participate in proceedings, the IRS must send notice to that spouse's last known address. In addition, information provided by one spouse may be shared with the other at the request of either spouse.

Rev. Proc. 2003-19 does not grant the non-requesting spouse the right to appeal to the Tax Court a decision by IRS to grant or deny relief to the requesting spouse. Thus, the non-requesting spouse generally has no recourse once IRS makes a final innocent spouse determination. If a spouse requesting innocent spouse relief petitions the Tax Court, however, the Court's rules allow the non-requesting spouse to become a party to the proceeding.

Procedures:

1) The non-requesting spouse must request an Appeals conference, in writing, within 30 calendar days of the mailing date of the notification letter. Such a request suspends further processing of the requesting spouse's claim for relief pending its outcome.
2) If only the non-requesting spouse files a written protest requesting an Appeals conference, IRS will notify the requesting spouse of the non-requesting spouse's request. If after the Appeals conference with the non-requesting spouse IRS proposes to change the preliminary determination, the requesting spouse will have an opportunity to request an Appeals conference before the final determination.
3) If only the requesting spouse files a written protest requesting an Appeals conference, IRS will notify the non-requesting spouse of the requesting spouse's protest and hold an Appeals conference with the requesting spouse. If Appeals proposes to increase the relief recommended, the non-requesting spouse will have an opportunity to request an Appeals conference.
4) If both spouses file written protests requesting Appeals conferences, IRS will notify each of the other's request and hold separate Appeals conferences with each spouse, with both spouses permitted to submit information. However, IRS may hold a joint Appeals conference instead of separate ones.

TIMEFRAME FOR PROCESSING FORM 8857

Form 8857 claims may move slowly through the IRS system due to the following:

- ✓ The taxpayer's account must be researched, administrative files retrieved and additional information secured from the taxpayer.
- ✓ The legal requirement to notify the non-innocent party of the claim. This party is given a "reasonable time" to respond. The IRS considers 60 days reasonable time.
- ✓ Denied claims, 30-day appeal letters, and 90-day determination letters slow down the process. IRS may use ***Form 870 IS, Waiver of Collection Restrictions in Innocent Spouse Cases*** to help reduce the time needed to resolve these matters.

All in all, it could take 8 months to complete processing in optimal circumstances.

California's innocent spouse relief provisions are in conformity with the comparable Federal income tax provisions in ***IRC §6015***. To this end, any Federal regulations interpreting IRC ***§6015*** are applicable for California purposes so long as there is no conflict with state law or regulations. **NOTE:** Except for cross-references and agency names, it largely repeats the language of IRC ***§6015*** word-for-word. The California rules also apply to registered domestic partners.

Ways to Qualify for State (CA) Innocent Spouse Relief

Basic Requirements - To qualify, a taxpayer must meet these three tests. First, he/she must have filed a joint tax return for any year that he/she is seeking relief. Second, the taxpayer must prove eligibility for relief based on one of the methods described below. Third, the taxpayer must request the relief in writing. The written request should include taxpayer's name, address, social security number, the years in question, a statement explaining why the taxpayer believes that he/she qualifies for relief, and if applicable, a copy of his/her court order.

Form FTB 705, Request for Innocent Spouse Relief, is the California equivalent to ***IRS Form 8857*** for making the request and can be found on the FTB web site at: https://www.ftb.ca.gov/forms/misc/705.pdf. The FTB has a short brochure on this topic, available on their web site at: https://www.ftb.ca.gov/forms/misc/714.html
The FTB web site has other information on this topic, which can be accessed at:
https://www.ftb.ca.gov/file/personal/filing-situations/tax-debt-relief-for-spouse.html

Submit requests for innocent spouse relief to:

State of California
Innocent Spouse Unit MS A452
Franchise Tax Board
P.O. Box 2966
Rancho Cordova, CA 95741-2966
Telephone: (916) 845-7072

Relief by Court Order - Revenue and Taxation Code Section 19006(b) – As part of a divorce/termination of registered domestic partnership from a spouse/RDP, the court may have issued an order relieving the taxpayer of unpaid tax due from a joint liability. For a court order to be effective, **ALL** the following requirements must be met:

- The court order must have been entered after January 1, 1977.
- The court order must specify which California income tax years the taxpayer has been relieved from paying.
- The tax due on the income that the taxpayer earned, managed, or controlled is paid.
- The tax due for which the taxpayer is requesting relief is **not** already paid. (If it is already paid, there is nothing of which to be relieved.)
- The Franchise Tax Board issued a Tax Revision Clearance Certificate* if, for the tax years of requested relief:
  -The taxpayer's joint gross income was more than $150,000[(1)], or
  -The taxpayers jointly owe more than $7,500[(1)] in state tax.

***** *A Tax Revision Clearance Certificate, Form FTB 2572, can be obtained from the Franchise Tax Board upon written request. Once issued, the Certificate must be filed with the court and incorporated into the taxpayer's court order for divorce. A confirmed copy of the certificate and decree must be returned to the Franchise Tax Board to obtain relief.*

[(1)] *For divorce court orders issued before 1/1/2003, the amounts were $50,000 and $2,500, respectively.*

Relief Automatic if Federal Relief Granted - SB 1065 enacted Sept. 27, 2010, requires that the FTB grant innocent spouse relief when the IRS has granted relief under the same facts and circumstances. This law is effective on January 1, 2011, and applies to requests for state relief that are based on an IRS request for similar relief made on or after January 1, 2009 and for requests for equitable relief received by the FTB on or after January 1, 2011. *(R&TC § 18533)* Copies of notices and correspondence from the IRS should be included with FTB 705 when requesting relief.

General Statute of Limitations for Refunds Applies - Assembly Bill 1748, enacted October 8, 2007, amends existing law (R&TC § 18533) to more closely conform to federal law by **applying the general statute of limitations for claims for refund** to *complete/partial relief* and by **disallowing any claims for refund** for *separate allocation relief*. Thus, such claims for relief made after the statute of limitations would be disallowed for claims for refunds to *complete/partial relief*. This act is effective January 1, 2008, and applies to requests for relief filed on or after that date.

NOTES

OFFER IN COMPROMISE

Overview

Our U.S. tax system is built on the premise that all taxpayers are expected to report their tax liabilities accurately and pay them on time. However, the Internal Revenue Code ***(§7122)*** gives the IRS the authority to "compromise" (i.e., settle based on a taxpayer's adverse economic circumstances) a tax liability for less than its stated amount at certain times when:

- Doubt exists as to the liability;
- Doubt exists as to the liability's collectibility; or
- It would advance effective tax administration to settle the liability.

Note: Although the IRS may compromise any civil or criminal case arising under the Internal Revenue Code, once IRS sends a case to the Department of Justice, the latter gains jurisdiction over its outcome.

According to ***IRS Policy Statement P-5-100*** goals of the OIC program are:

1) The IRS will accept an offer in compromise when it is unlikely that the tax can be collected in full and the amount offered reasonably reflects the collection that is probable.
2) An offer in compromise is a justifiable alternative to declaring a case currently not collectible or making it the subject of a long, drawn-out installment agreement. The goal is to achieve collection of what is potentially collectible at the earliest possible time and at the least cost to the government.
3) In cases where an offer appears to be a possible solution to a tax delinquency, IRS personnel assigned to the case will discuss the compromise alternative with the taxpayer and assist as needed in preparing the required forms. The taxpayer is held responsible for starting the first specific proposal for compromise.
4) Ensuring success of the compromise program requires: (a) taxpayers to make adequate compromise proposals consistent with their ability to pay along with reasonable documentation to verify this ability, ***AND*** (b) the IRS to make prompt and reasonable decisions in compromise cases.
5) The ultimate goal of the program is a compromise that is in the best interest of both the taxpayer and the government. Acceptance of an adequate offer is meant to result in a fresh start for the taxpayer to comply with future filing and payment requirements.

New Law & Stuff

The Taxpayer First Act signed into law on July 1, 2019, amends IRC Sec 7122(c) by waiving the offer-in-compromise application fee for an individual with AGI for the most recent tax year for which information is available that doesn't exceed 250% of the applicable poverty level.

The amendment applies to offers-in-compromise submitted after July 1, 2019, the date of enactment of the Act. It appears that the IRS has built in this provision in the Low-Income Certification portion of Form 656 with revision date of August 2019.

RAPID FINDER

Fresh Start Initiative - The IRS expanded its "Fresh Start" initiative to offer more flexible terms in its Offer-in-Compromise (OIC) program (IR-2012-53). This enables a larger number of financially distressed taxpayers to clear up their tax problems faster than in the past. While resolving tax problems might previously have taken four or five years, taxpayers may now be able to resolve their problems in as little as two years. Changes incorporated by the IRS affect how the taxpayer's future income is calculated, allow taxpayers to repay their student loans, allow taxpayers to pay state and local delinquent taxes, and expand the allowable living expense allowance category and amount.

The IRS determines a taxpayer's reasonable collection potential, based on the taxpayer's income and assets, to determine if the liability can be paid in full as a lump sum or through a payment agreement. When calculating this potential, the IRS now looks at only one year of future income for OICs paid in five or fewer months, and two years of future income for OICs paid in six to 24 months. Form 656, Offer in Compromise, and Form 656-B (revised August 2019), Offer in Compromise booklet, reflect the most up-to-date computations and recovery periods.

When conducting financial analysis to evaluate a taxpayer's ability to pay, the IRS applies allowable living expense standards that incorporate average expenditures for basic necessities for people in similar geographic areas. These standards are used when evaluating installment agreements and OIC requests. The miscellaneous allowance portion of the standards includes items such as credit card payments and bank fees and charges. The IRS has clarified that it will allow payments for student loans for post-high school education, if the loans are guaranteed by the federal government. Further, payments for delinquent state and local taxes may be allowed based on a percentage basis of tax owed to the state and the IRS.

USE PRE-QUALIFIER TO TEST FOR ELIGIBILITY

The IRS encourages taxpayers to use the Offer in Compromise Pre-Qualifier on the IRS' web site at http://irs.treasury.gov/oic_pre_qualifier/ to confirm eligibility to make an offer and prepare a preliminary proposal.

ALL REQUIRED RETURNS MUST BE FILED FIRST

OIC applications received by the IRS on or after March 27, 2017 will be returned without being considered by the IRS if the taxpayer has not filed all required tax returns. In such cases, the application fee will be returned but any required initial payment submitted with the Offer will be applied to outstanding tax debt. This policy doesn't apply to current year tax returns if there is a valid extension on file.

APPLICATION FEE

Offers require a $186 application fee. EXCEPTION: If the applicant is an individual or is operating as a sole proprietorship and their household gross income meets the low income (as defined below under "waivers") guidelines, the application fee is not required to be paid.

PARTIAL PAYMENTS REQUIRED WITH OFFER SUBMISSIONS

The IRS has adopted some tough procedures associated with the submission of an offer-in-compromise (OIC) - IR 2006-106; Fact Sheet 2006-22.

Taxpayers submitting offers must make a nonrefundable, up-front payment to IRS while the service considers the merits of the offer. According to the instructions in the Form 656-B (August 2019) booklet, the payment options are:

- **For Lump-sum Offers** – 20% paid with the offer and the balance paid in five or fewer installments within 5 or fewer months of the offer's acceptance.
- **For Periodic Payment Offers** – Requires the first payment with the offer and the remaining balance paid, within 6 to 24 months, in accordance with the proposed offer terms. Under this option, the taxpayer must continue to make monthly payments while the IRS is evaluating the offer. If these payments aren't made, the IRS will return the offer. There is no appeal. Total payments must equal the total offer amount.

Individuals meeting the Low-Income Certification guidelines will not be required to send the initial payment or make the required monthly payments while their offer is being considered.

Failure to submit up-front payments - will produce the following actions:

- **For lump-sum offers** – where no up-front payment is submitted the offer will be returned to the taxpayer as being unprocessable. If less than the 20% up-front payment is submitted, the IRS will ask the taxpayer to pay the remaining balance in order to avoid having the offer returned. If it isn't paid, IRS will return the offer and retain the $186 application fee.
- **For periodic payment offers** – failure to submit the first proposed installment with the offer will result in the offer being returned to the taxpayer as being unprocessable.

Application of the up-front payments – The up-front payments are not refundable and are considered payments on tax. Thus, if the offer is rejected the up-front payments will be applied to the taxpayer's liability. A taxpayer can specify the application of any payment made under the above rules to the assessed tax or to other amounts at the submission of the offer. If a taxpayer fails to specify then the IRS will apply the payments in the best interest of the government. However, the applicant may make a deposit (see Form 656, Section 5), which may be returned. If the offer is accepted, the payments made during the offer process, including any money designated as a deposit, will be applied to the offer amount.

Specification Strategy - The application of any partial payment won't matter if the offer is accepted, but it might if the offer is rejected. To prepare for that possibility, if the offer is being made with respect to more than one tax year, the taxpayer should consider applying any payments made under the offer to more recent years, rather than to those nearing the expiration of the limitation period for collection. This will avoid having the payments credited to a tax liability that might be rendered uncollectible by the running of the statute of limitations.

Up-front Payment Waivers Possible - Taxpayers qualifying as low-income or filing an offer based solely on doubt as to liability can receive a waiver of the partial payment requirements.

- ***Low-income taxpayer Offers*** *- A low-income taxpayer is an individual whose income falls below poverty levels based on guidelines established by the U.S. Department of Health and Human Services. Taxpayers claiming the low-income exception should use the worksheet and low-income guidelines in the Form 656-B booklet to determine if they qualify.*
- ***Doubt as to Liability Offers*** *- An offer is considered to be submitted solely on the basis of doubt as to liability if the taxpayer submits the offer on Form 656-L, Offer in Compromise (Doubt as to Liability), or if the offer is submitted on Form 656, Offer in Compromise, it is clear on the face of the form that the only basis on which the taxpayer relies in making the offer is doubt as to liability.*

Offers are submitted using Form 656, Offers in Compromise. Form 656-B, Offer in Compromise Booklet, provides detailed instructions for completing the offer and includes all of the necessary financial forms and worksheets. When submitting Form 656, taxpayers must include an application fee unless they qualify for the low-income exemption or are filing a doubt-as-to liability offer. The application fee will be applied to the assessed tax or other amounts due.

Deemed Acceptance - If an offer is not withdrawn, returned or rejected within 24 months of the date received by IRS, it is deemed to be accepted. Time periods during which a liability included in the offer is the subject of a dispute in court proceedings will be disregarded by the IRS when calculating the 24-month time frame. **(Code Sec 7122(f)**)

DEFINING THE 3 OIC FUNDAMENTAL CONCEPTS

1) ***"Doubt as to liability"***—Doubt as to liability exists when there is ***a real dispute about the existence or amount of the correct tax liability of a taxpayer***.

   Such doubt doesn't exist, though, if the liability has been settled by a final court decision or judgment concerning the genuineness or amount of the liability. But an offer under the "doubt as to liability" category can't be rejected just because the IRS can't locate the taxpayer's return or information to verify the liability **(IRC 7122(d)(3)(B))**. The IRS indicates it will consider an offer based on doubt as to liability if it reasonably reflects the amount the IRS could expect to get by going to court. Since trying to predict the outcome of a court case is far from an exact science, the IRS relies on "discretion" in determining what it will consider as a reasonable offer **(Rev. Proc. 2003-71, 2003-2 C.B. 517)**.

2) ***"Doubt as to collectibility"***—Doubt as to collectibility may be present in any case when a taxpayer's assets and income are less than the full amount of the assessed liability. To determine doubt as to collectibility, the IRS considers the ***taxpayer's ability to pay***. In settling such a case, the taxpayer must be allowed to preserve sufficient funds to pay for his/her basic living expenses. To determine settlement, IRS considers expenses only to the extent they are necessary for health and welfare of the taxpayer and family or are needed to produce income **(Rev. Proc. 2003-71)**.

   In general, the IRS won't consider an offer based on doubt as to collectibility if the ability of the government to collect the tax is not in doubt. This kind of offer is considered appropriate when liquidation of assets or maximum levy of income isn't enough to pay the tax. The assets of a non-liable spouse generally aren't considered to determine a taxpayer's ability to pay unless those assets have been conveyed to the spouse in order to defraud creditors (or unless state law makes the spouse's assets available to creditors, such as in community property states). However, action against the spouse's assets must be weighed against how such action will affect the standard of living of the taxpayer and family.

   The IRS publishes schedules of national and local living expense standards to help evaluate family needs **(Publication 1854, How to Prepare a Collection Information Statement (Form 433-A))** - https://www.irs.gov/pub/irs-pdf/p1854.pdf. They use these standards based on the individual facts and circumstances of each individual case. The standards aren't used if the amounts they prescribe would deprive a taxpayer of adequate support for basic living needs. Be sure to use the most recent version (February 2019) of the publication and form to ensure the current amount is used for living expense standards. The IRS has detailed discussions about the various standards and the current amounts on its web site– enter "living expense standards" in the search box.

3) ***"To promote effective tax administration"***—If the IRS finds no grounds to compromise based on the two previously described categories, they may enter into a compromise to promote effective tax administration.

This could happen when collection of a full tax liability creates economic hardship. Alternatively, it could result where detrimental public policy or unfairness to the taxpayer provide basis for a compromise. Although acceptance of a compromise under this standard may occur where full collection would undermine public confidence in the tax law, a compromise would not be accepted if it would undermine compliance with the tax laws by taxpayers.

Congressional intent with this provision was that the IRS would take into account factors like equity, hardship, and public policy in the tax administration process. Factors that may be considered in determining hardship might include serious illness that depletes a family's financial resources ***(Reg. Section 301.7122-1(c)(3)(i)(A))***. On the other hand, a compromise of a tax shelter liability would be one that could undermine rather than promote compliance within the tax system.

OIC PROCEDURES AND REQUIRED FORMS

IRS' authority to compromise a tax liability is established by ***Code Section 7122***. The IRS' authority to enter a valid agreement exists only when the statute is carefully and strictly administered. A very old case states that without such administration a compromise agreement is not binding on either the IRS or the taxpayer ***(Botany Worsted Mills v. U.S., 278 U.S. 282 (1929))***. However, just because an Offer is made doesn't mean the IRS will accept it. For example, during FY 2016 taxpayers proposed 63,000 OICs but the IRS accepted only 27,000 of the Offers., an acceptance rate of 42.86% (IRS 2016 Data Book), while the acceptance rate for FY 2017 went down to 40.52% (IRS 2017 Data Book). For FY 2018 taxpayers submitted 59,000 offers and the IRS accepted 24,000 of them yielding and acceptance rate of 40.6%, slightly down from 2017.

The procedures for submitting an offer in compromise are outlined in ***Rev. Proc. 2003-71***. This procedure applies to all offers to compromise a civil or criminal liability submitted to the IRS, except for those offers going directly to Appeals. In addition, it doesn't apply to offers that have been referred to the Department of Justice.

Submit offers (based on other than doubt as to liability) on ***Form 656, Offer in Compromise***. **NOTE:** The latest version of the form available (August 2019 at this writing) MUST ALWAYS be used and none of the standard language of the form may be stricken or altered. The form needs to be signed under penalty of perjury.

The offer should include:

- All tax liabilities to be covered by the compromise;
- The legal grounds for the compromise;
- The amount the taxpayer is proposing to pay: and
- The payment terms (including amounts and due dates of payments).

The taxpayer needs to submit ***Form 433-A, Collection Information Statement for Wage Earners and Self-Employed Individuals,*** or ***Form 433-B, Collection Information Statement for Businesses***, along with any other backup information as required by the IRS. The information sent to the IRS must be current, reflecting the taxpayer's financial situation for the 3 months just before the date of submitting the offer. **Forms 433-A and 433-B must be filled out COMPLETELY. This means that items that don't apply to the taxpayer should be notated with N/A (not applicable).**

If the basis of an offer is ***doubt as to liability***, the taxpayer should submit ***Form 656-L*** (latest version when this material was updated is dated January 2018)***,*** which includes a detailed description of why the taxpayer believes he/she doesn't owe the tax liability.

Taxpayers submitting offers on Form 656 must make a nonrefundable, up-front payment to IRS (in addition to the application fee) while the service considers the merits of the offer, unless waived because the taxpayer meets the low-income exception noted above. (See "Partial Payments Required with Offer Submissions" above for amounts.) The up-front payments are not refundable and are considered payments of tax. Thus, if the offer is rejected the up-front payments will be applied to the taxpayer's liability. A taxpayer can specify the application of any payment made under the above rules to the assessed tax or to other amounts at the submission of the offer. If a taxpayer fails to specify then the IRS will apply the payments in the best interest of the government.

If an offer is accepted under the "effective tax administration" or "doubt as to collectibility" categories and collection of an amount more than that offered would create economic hardship, then the taxpayer may ask for the user fee to either be refunded or applied against the offer amount. The IRS ***won't refund the fee*** to the taxpayer if the offer is accepted, rejected, withdrawn, or returned as non-processable after acceptance for processing. However, they won't charge an additional fee if a taxpayer resubmits an offer the IRS determines it has rejected in error or returned in error after acceptance for processing ***(Reg. Section 300.3(b))***. Other limitations on submitting the fee include:

- If making an offer on a liability owed jointly with another person, only one Form 656 is needed and one application fee.
- If making an offer individually (e.g., for employment tax liability) and for other liabilities with another person (e.g., income tax), but only one of the individuals is submitting an offer, all liabilities are listed on Form 656 and one application fee is submitted.
- If a taxpayer makes an offer individually and another jointly, then the taxpayer shows all tax liabilities on Form 656 and submits one application fee. The other joint filer files Form 656 showing only the joint tax liability but must also submit an application fee.

The following table shows the number of Forms 656 and application fees needed in specific OIC filing situations:

Type of Situation	**# of Forms 656 Needed**	**# of Application Fees Needed**
Taxpayer & spouse submitting 1 offer for same joint liability.	1	1
Taxpayer & spouse submitting separate offers for same joint liability (including divorced, separated, or living apart).	2	2
Divorced, separated or spouses living apart submitting offer on a joint liability.	1	1
Married couple owing 1 joint liability plus one spouse owes another individual (non-joint) liability.	2	2
Married couple owing a joint liability, plus one spouse owes an individual year liability with a prior spouse and a business liability. Other spouse also owes another individual year liability with a prior spouse.	2*	2*
An individual owes tax and also owes a partnership debt as a general partner (or a corporate debt from a closely held corporation).	2	2

One spouse will file one offer listing the joint income tax, the individual year tax and the business liability. The other spouse will file an offer listing the joint income tax liability and the individual year liability. Each will attach a single application fee with their offer.* ***Note:* *It does not matter that the joint liability appears on both offers.*

<u>OIC PROCESSING PROCEDURES:</u>

When the IRS receives an OIC, if all required returns have been filed, an offer examiner evaluates the offer and, if necessary, requests additional documentation to verify the taxpayer's financial and other information. The examiner will then make a decision on whether to accept or reject the offer, or whether a larger offer amount is needed to justify acceptance of the offer. If the latter is the case, the taxpayer gets an opportunity to amend the offer. When a compromise is under consideration, the IRS:

- Usually defers collection proceedings provided the government's interests aren't in jeopardy due to the delay;
- Is prohibited from collecting the tax by levy (but may file a Notice of Federal Tax Lien); and
- Is prohibited from collecting the tax by levy during the 30 days after rejection of an offer where an appeal of the rejection is being considered.

Note that an offer in compromise isn't under consideration just because it is received. It must be ***accepted for processing*** by the IRS. In fact, an offer is considered accepted for processing by the IRS only when the taxpayer receives acceptance notification from the IRS **IN WRITING**. According to ***Rev. Proc. 2003-71***, acceptance for processing occurs when the IRS finds that:

- An offer has been submitted with the correct Form 656 version;

- The most current version of Form 433-A and/or Form 433-B has been submitted, as appropriate to the situation;
- The taxpayer isn't in a bankruptcy situation (the courts and the IRS differ on the issue of whether the IRS should accept offers for processing from taxpayers in bankruptcy proceedings);
- The taxpayer has complied with all filing and payment requirements;
- The application fee has been paid, if required; and
- The offer meets any other minimum requirements the IRS establishes.

If it turns out that the taxpayer has not filed all tax returns that were legally required to be filed, the IRS will apply any initial payment sent with the offer to the tax debt and return both the offer and application fee to the taxpayer. This decision cannot be appealed.

Barriers to offer processability that may cause its return to a taxpayer include:

1. The offer doesn't meet the minimum requirements;
2. Insufficient information is sent with the offer so that it can't be evaluated effectively;
3. The taxpayer didn't supply additional data requested by the IRS within a reasonable time frame;
4. The offer by the taxpayer was submitted simply to delay collection;
5. The taxpayer failed to file a return or pay a liability;
6. The taxpayer filed for bankruptcy;
7. The offer was accepted for processing in error in the first place.

An offer won't be completely processed if the taxpayer's estimated tax payments for the current year aren't paid up to date. If the IRS finds that estimated payments for the current year aren't up to date, the taxpayer will get a single opportunity to make the required payments before the offer is returned. If an offer is returned because estimates aren't made, the application fee is forfeited.

To avoid a breakdown of the compromise process, a taxpayer should respond promptly to IRS requests for additional information during the period an offer is being evaluated.

Keep in mind that the return of an offer in compromise isn't a rejection; the taxpayer doesn't have the right to appeal it. But if the IRS begins collection activity after the offer is returned, the taxpayer can appeal under the collection due process rules.

The IRS may require extension of the statute of limitations on assessment as a condition of their accepting an offer in compromise. They must, however, let the taxpayer know of the right to refuse to extend or to limit the extension to particular issues or time periods.

What happens when an offer is withdrawn or determined non-processable?

- It will be returned to the taxpayer.
- Any amounts the taxpayer paid when making the offer including the up-front payments are not refundable and are considered payments on tax. Thus, if the offer is rejected the up-front payments will be applied to the taxpayer's liability. A taxpayer can specify the application of any payment made under the above rules to the assessed tax or to other amounts at the submission of the offer. If a taxpayer fails to specify then the IRS will apply the payments in the best interest of the government.
- The application fee of $186 generally won't be refunded unless the offer was accepted for processing through error.

Procedures for Withdrawing an Offer in Compromise

- A taxpayer may withdraw an OIC at any time before its acceptance.
- The withdrawal request may be made in person or by mail. In such cases, the withdrawal becomes effective when the IRS receives it.
- A withdrawal request may also be made by fax or telephone. In such case the withdrawal request becomes effective when the IRS mails (or personally delivers) acknowledgement of the request.
- Once an offer is withdrawn, collection activities can proceed.

Notes Regarding Rejected/Accepted Offers:

Rejected offers

- An OIC isn't considered rejected until the IRS issues written notice of the rejection ***(Rev. Proc. 2003-71)***. Written notice to the taxpayer must be "prompt."
- An offer can't be rejected until an independent administrative review of the proposed rejection is complete.

- The taxpayer can ask for a meeting to discuss acceptable alternative solutions with the office handling a rejected offer. If no agreement is reached at this meeting, the taxpayer has 30 days to file a protest with Appeals.
- In rejecting an offer, the IRS will also notify the taxpayer by mail, giving the taxpayer a reason for the rejection. They will not return the application fee. However, the taxpayer has a right to appeal the rejection or submit another offer (and another application fee).

NOTE: The statute of limitations is suspended during the period an OIC is pending, during the 30 days following a rejection of an offer, and during the time of any appeal of an offer's rejection.

Accepted Offers

- If the IRS accepts the taxpayer's offer, they send written notice of this decision by mail. Prompt payment and compliance with offer terms by the taxpayer are needed to prevent default on the offer. Once the payment terms are met by the taxpayer, the IRS will release all Notices of Federal Tax Lien against the taxpayer.
- If an offer involving more than $50,000 is accepted, a written opinion of the IRS Chief Counsel is required. The opinion includes the reason for acceptance, the amount of tax, interest, and penalties assessed, and the amount to be paid according to the terms of the compromise.
- Accepted offers in compromise become public information.
- If an offer is not withdrawn, returned or rejected within 24 months of the submission date, it is deemed to be accepted. Time periods during which a liability included in the offer is the subject of a dispute in court proceedings will be disregarded by the IRS when calculating the 24-month time frame.

Which IRS Personnel Handle Offers in Compromise?

IRS Collections has the responsibility for processing the following OICs:

- All offers based on doubt as to collectibility, including proposed liabilities still subject to settlement in Audit or Appeals;
- All offers based on effective tax administration;
- All offers under doubt as to liability for either trust funds recovery penalty (employment taxes) or personal liability for excise tax assessment.

Examination (Audit) has responsibility for processing these functions related to OICs:

- Processing and investigation of offers based on doubt as to liability (except those cited above under IRS Collections);
- Backup to Collections for recommendations on offers based on effective tax administration with public policy/equity issues.

Appeals handles OICs as necessary from both Collection and Audit cases.

Expedited Processing (IRM 5.8.4.26 (07-18-2017): Taxpayers may ask that their OIC be expedited due to an emergency situation. Such situations might be:

a. A taxpayer's time-sensitive contract that requires resolution of a tax liability as a condition of agreement;
b. Availability of funding for the offer is time-sensitive; or
c. A taxpayer's terminal illness affecting ability to complete payment terms.

Offers requesting expedited processing are referred to IRS management personnel for decisions on the requests. The **Form 656** should be clearly labeled "Emergency Processing Requested". Target for completed processing of these requests is 90 days from receipt.

FILLING OUT FORMS 656/433-A/433-B:

For joint filers, if only one spouse has tax liability, but both have income, only the spouse responsible for the tax debt needs to prepare the forms. In this case, the responsible spouse should include only his/her assets and liabilities when filling out the forms. **Important:** The income and expenses of the whole household are required, including income of spouse, domestic partner, significant other, children and others that may contribute to the household.

In community property states, the forms are required from both spouses.

When completing forms, remember that offers based on doubt as to collectibility or effective tax administration must include all unpaid tax liabilities and periods for which the taxpayer is liable. For instance, if a taxpayer submits an offer to compromise income tax liabilities, but also owes business liabilities for his/her sole proprietorship, both the income tax and business liabilities must be included in the taxpayer's offer. On the other hand, doubt as to liability offers should only include the tax year in question, and other tax periods that the taxpayer owes on shouldn't be included in the offer ***(IRM 5.8.1.7 (01-01-2016))***.

Coverage of Offers: A compromise is effective for a taxpayer's assessed liability for tax, penalties and interest for the years or periods covered by the offer. When a compromise is accepted, all questions of tax liability for the years covered by the agreement are settled. Neither the taxpayer nor the IRS can reopen a compromised tax year unless there was falsification of documents or some other concealment or mutual mistake in the case.

The following table gives an overview of acceptable amounts and documents needed for OICs:

Type of Offer	**Documents/Fees Required**	**Acceptable Offer Amt**	**Special Circumstances**
Doubt as to Collectability	Form 656, Form 433-A and/or 433-B. $186 Application Fee unless low income guidelines met.	Must be equal to or more than t/p's reasonable collection potential amt (RCP)*.	Offer of less than RCP will be considered when based on t/p's unusual circumstances such as life-threatening illness, advanced age, or other. *
Doubt as to Liability	Form 656-L including explanation showing why tax is not owed. No application fees.	Taxpayer's corrected computation of tax, penalty and interest amounts.	N/A
Effective Tax Administration	Form 656, Form 433-A and/or 433-B. $186 Application Fee unless low income guidelines met	No specific guidelines.	T/p must give Explanation of Circumstances to show tax payment would cause economic hardship or be unfair to t/p if req'd to be paid. Attach documents of support for exceptional circumstances.

*RCP equals the net equity of a taxpayer's assets (asset current value less unpaid loan amounts) plus the amount that could be collected from his/her future income.

OIC Definitions (useful in preparing offers based on "doubt as to collectibility" or "effective tax administration"):

Current value of assets is the amount a person could reasonably expect to get from the sale of an asset at a given point in time. In filling out OIC forms, determine current value of various assets by checking, for example, with realtors, used car dealers, newspaper advertisements, etc.

With the ups and downs of the housing market, the IRS recognizes that the real estate valuations used to assess ability to pay may not be accurate. So, in instances where the accuracy of local real estate valuations is in question or other unusual hardships exist, the IRS will do a second review of the information to determine if accepting an offer is appropriate. ***(IR-2009-2, Jan. 6, 2009)***

California RDP's Assets Considered in OIC - The IRS Chief Counsel's Office has determined that in considering the reasonable collection potential of a California taxpayer who files an offer in compromise (OIC), the IRS may consider the community property assets owned by the taxpayer's registered domestic partner. This is so even though the RDPs are not allowed to file a joint federal return.

In community property states, of which California is one, the IRS' position is that the assets of both owners of community property (the owner submitting the offer and the non-offering owner) should be considered in the offer.

The Internal Revenue Manual (Section 25.18.4.4 06-05-2017) provides that if under applicable state law, all or part of the non-offering owner's share of community property and community property income would be available to satisfy the tax liability at issue, these items should be considered in the offer in compromise. Since California registered domestic partners share an equal interest and liability in community property in the State of California, the Chief Counsel concluded that the IRS can consider the assets of the taxpayer's RDP in determining whether to accept the taxpayer's OIC. *(CCA 201021049)*

Future income is the amount the IRS figures they could collect by subtracting a taxpayer's necessary living expenses from his/her monthly income over a set period of time.

Necessary expenses are payments a person makes to support the health and welfare of himself/herself and his/her family. Necessary expenses can also be those for items used in the production of income for the taxpayer.

IRS to be More Flexible with OICs from Unemployed Taxpayers - The IRS announced that its employees will be permitted to consider a taxpayer's current income and potential for future income when negotiating an offer in compromise. Normally, the standard practice is to judge an offer amount on a taxpayer's earnings in prior years. This new step provides greater flexibility when considering offers in compromise from the unemployed.

The IRS may also require that a taxpayer entering into such an offer in compromise agree to pay more if the taxpayer's financial situation improves significantly. *(IR-2010-29, 3/9/2010)* Note: Commenting on this change, the National Taxpayer Advocate raised concerns that "procedures do not clearly instruct IRS employees to apply flexibility and good judgment when calculating future income." (*Taxpayer Advocate Service, Fiscal Year 2011 Objectives* report to Congress, page 22)

Living expenses generally NOT allowed by IRS as "necessary expenses" include school (including college) tuition, charitable gifts, voluntary retirement contributions, cable TV charges and the like. Such expenses can only be claimed as necessary when the taxpayer shows they are vital to the health and welfare of his/her family or needed for the production of income. The IRS in IR-2012-53 has revised their necessary expenses to include payments on federally guaranteed student loans for post-secondary education.

Quick Sale Value (QSV) is the amount a person can reasonably expect from the sale of an asset if it had to be sold in 90 days or less.

Realizable Value is QSV less any amount owed to a secured creditor on the asset.

POSSIBLE PAYMENT PLANS AVAILABLE FOR AN OIC:

Doubt as to collectability -

- ***Lump Sum Cash payment*** - 20% of the lump sum cash offer must be paid with the offer and the remaining balance paid in 5 or fewer installments within 5 or fewer months of the date the offer is accepted.
- ***Periodic payment*** - The first payment must be made with the offer and the remaining balance paid monthly starting the month after the offer is submitted and fully paid off within 6 to 24 months, in accordance with the proposed offer terms. Under this option, the taxpayer must continue to make monthly payments while the IRS is evaluating the offer. If these payments aren't made, the IRS will return the offer. There is no appeal. Total payments must equal the total offer amount.

  NOTE: A Notice of Federal Tax Lien (lien) gives the IRS a legal claim to the taxpayer's property as security for payment of their tax debt. The IRS may file a Notice of Federal Tax Lien during the offer investigation. However, unless a jeopardy situation exists, a request for a Notice of Federal Tax Lien will usually not be made until a final determination has been made on the offer. IRS will not file a lien on any individual shared responsibility payment debt (i.e., the penalty for failing to have health insurance). *(Form 656-B rev 8-2019)*

Doubt as to liability - The offer must be $1.00 or more and payable within 90 days of the notification of acceptance, unless an alternative term is approved at the time the offer is accepted. *(Form 656-L rev 1-2018)*

Note: The IRS may file a Notice of Federal Tax Lien to protect the Government's interest during the offer investigation. If the offer is accepted, the tax lien will be released when the terms of the offer agreement are satisfied.

WHERE TO FILE AN OIC:

For residents of: Alabama, Arkansas, Florida, Georgia, Hawaii, Idaho, Kentucky, Louisiana, Mississippi, Nevada, New Mexico, North Carolina, Oklahoma, Oregon, Tennessee, Texas, Washington, or Wisconsin:

Memphis IRS Center COIC Unit
PO Box 30803, AMC
Memphis, TN 38130-0803

For residents of: Alaska, Arizona, California, Colorado, Connecticut, Delaware, District of Columbia, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, South Dakota, Utah, Vermont, Virginia, West Virginia, Wyoming, or have a foreign address:

Brookhaven IRS Center COIC Unit
PO Box 9007
Holtsville, NY 11742-9007

GUIDELINES FOR IRS FINANCIAL ANALYSIS OF A TAXPAYER'S OFFER

As outlined in the ***Internal Revenue Manual 5.8***: In processing an OIC, the IRS will perform a detailed analysis of the submitting taxpayer's financial condition. The taxpayer submits financial information on ***Form 433-A, Collection Information Statement for Wage-earners and Self-employed Individuals,*** or ***Form 433-B, Collection Information Statement for Businesses.***

The IRS primarily uses National and Local Standards as their guideline in determining the necessary expense levels to be allowed in finalizing an offer. The standard amounts are designed to account for the basic living expenses of the taxpayer according to income level. Sometimes, based on a taxpayer's circumstances or possible economic hardship, the Service may diverge from the standard amounts in determining basic expense levels. A taxpayer must provide reasonable substantiation of all expenses that exceed the standard amounts, including bank statements, canceled checks, credit card receipts, rent/lease receipts and agreements, payment coupons, court orders, contracts, future events that may increase expenses (e.g., birth of a child).

Auditors are instructed that analysis and verification of the Forms 433-A or -B should take place shortly after the forms are received. The ability to pay determination based on the analysis should be given to the taxpayer within "a reasonable amount time." The forms the taxpayer submits should reflect data no older than the prior 6 months. If, during the IRS investigation time, the data becomes older than 12 months, the personnel working the case will ask for updated information. At times, they may even request a new ***Form 433.***

A face-to-face conference with the taxpayer (and/or his/her representative) is the IRS preferred method for reviewing the ***Form 433*** information. Telephone and mail contact may be used to secure some information.

The expectation of the IRS in coming to an agreeable compromise amount is this: The taxpayer is expected to be able to pay a tax liability equal to that over and above necessary (or not allowable conditional) expenses.

IRS Analysis of a Taxpayer's Financial Information: The goal of the IRS analysis is, of course, to determine the amount of disposable income (gross income less all allowable expenses) available to apply to the tax liability.

Allowable expenses include those expenses that meet a **necessary expense test**. This necessary expense test defines expenses that are essential to provide for a taxpayer's and his/her family's health and welfare and/or for production of income. The expenses must be reasonable. The total of the necessary expenses will establish the minimum a taxpayer and family needs to live.

The guidelines use 3 standards for determining necessary expense based on a taxpayer's income level:
- **National standards**
- **Local standards**
- **Other**

See the IRS web site for links to the most current standards: https://www.irs.gov/businesses/small-businesses-self-employed/collection-financial-standards

National Standards: These expense standards come from the Bureau of Labor Statistics Consumer Expenditure Survey. They establish standards for what are considered reasonable amounts for five types of expenses. The expenses include:

1. Food (all meals, home and away),
2. Housekeeping supplies (including laundry and cleaning supplies, other household products, paper products, lawn and garden supplies, postage, stationary, and miscellaneous supplies),
3. Apparel and services (including shoes, clothing, laundry, dry cleaning, shoe repair),
4. Personal care products and services (including hair care costs, barber and beautician services, oral hygiene products, shaving needs, cosmetics, perfume bath preparations, deodorants, feminine hygiene products, electric personal care appliances, personal care services, and repair of personal care appliance),
5. Miscellaneous (a discretionary amount established by the IRS rather than Labor Statistics).

Local Standards: Local standards apply to 2 types of expenses:

A. Housing (all utilities [including gas, electricity, water, fuel, oil, other fuels, trash collection, telephone, cell phone, cable television and internet services], mortgage/rent, property taxes, interest, parking, maintenance, home insurance, homeowner dues),

B. Transportation (vehicle insurance, vehicle payments and repairs, fuel, vehicle registration, parking, tolls, driver's license, public transportation). Transportation costs not required to produce income or ensure health of taxpayer and family aren't considered necessary.

Taxpayers are allowed the lesser of: the local standard or the amount actually paid by the taxpayer. **Note:** The IRS has established a housing cost level for each county in the U.S.

Other: Other expenses than those cited under National and Local Standards may be allowed if they meet the necessary expense test. Such expenses must provide for the health and welfare of the taxpayer and family or be for the production of income and are based on the discretion of the IRS.

Conditional Expenses: These expenses don't meet the necessary expense test. However, they may be allowable as necessary if the tax liability, including projected accruals, can be fully paid within 5 years. In addition, under a 1-year rule, a taxpayer has up to one year to modify or eliminate excessive necessary or not allowable conditional expenses if the tax liability, including projected accruals, cannot be fully paid within 5 years.

Note: National and local expense standards are guidelines. If it is determined a standard amount is inadequate to provide a specific taxpayer's basic living expenses, the IRS is instructed to allow divergence from the standards.

> ***Example—Applying National Standards for Expenses:*** *Charlie had the following monthly expenses: Housekeeping supplies, $150; clothing $160; food, $600, miscellaneous, $400. In all, his total monthly expenses were $1,310. The Bureau of Labor Statistics National Standard for these expenses is $1,100, based on Charlie's income level. The taxpayer would be allowed $1,100 as his necessary expense amount unless he could substantiate and justify to the IRS's satisfaction the need for the additional amount.*

Worksheet – The worksheet included in the 656-B (booklet) can be completed using data from Form 433-A. It is useful in determining how much a taxpayer's Form 656 compromise offer should be.

CALIFORNIA OFFER IN COMPROMISE PROGRAM

California has an offer in compromise program for taxpayers who do not have the income, assets or means to fully pay their state tax liability currently or in the foreseeable future. However, the FTB will not accept a zero-dollar offer; the offer must represent the most the FTB can expect to collect over a reasonable period of time. The factors used by the FTB in considering the offer include the taxpayer's ability to pay, present and future income and expenses, the amount of equity in the taxpayer's assets, the potential for changed circumstances and whether the offer is in the best interest of the state.

Application Processing and Options - For the Franchise Tax Board to process an OIC application, the taxpayer must have:

- Filed all required tax returns.
- Fully completed the OIC application (***FTB 4905PIT*** for personal income tax, ***FTB 4905BE*** for business income tax) and provided all supporting documentation (see list in 4905 booklet). According to the FTB web site the booklet and forms are only available by request. By providing the FTB with an email address they will email the information to the requestor.
- Agreed with the FTB as to the amount of tax owed.
- Authorized the FTB to obtain the taxpayer's consumer credit report, and to investigate and verify the information provided on the application.

If an OIC was accepted by the IRS, it does not mean that the OIC made to the FTB will be accepted automatically. The FTB does a separate evaluation from the federal offer.

If the taxpayer owes tax to the Employment Development Department, California Department of Tax and Fee Administration, and Franchise Tax Board (or any one or combination of these agencies), ***Form DE 999CA***, OIC Multi-Agency Application, can be used instead of FTB 4905PIT or FTB 4905BE.

No Installment Payments – Unlike the federal OIC program which allows installment payments of the compromised tax amount, the FTB requires a lump sum payment of the offered amount, which must be submitted by cashiers check or money order. The offered funds should not be sent in with the application but should only be sent to the FTB after the offer is accepted and the taxpayer has been notified to send payment.

Collateral Agreement May be Required – If the offer is approved, the FTB may require a "collateral agreement" for a term of 5 years. A collateral agreement is a contractual agreement between the taxpayer and the Franchise Tax Board in which the taxpayer agrees to pay to the FTB a percentage of future income that exceeds an agreed upon threshold. Generally, if the taxpayer is on a fixed income or has limited potential for increased earnings, a collateral agreement will not be required.

NOTES

HOUSEHOLD EMPLOYEES

Overview

Not all individuals hired to work in a taxpayer's home are considered household employees. For example, a taxpayer may hire a self-employed gardener who handles the yard work for the taxpayer and others in the taxpayer's neighborhood.

RAPID FINDER

The gardener supplies all tools and brings in other helpers needed to do the job. Under these circumstances, the gardener isn't an employee and the person hiring him/her isn't responsible for paying employment taxes.

Whether a household worker is considered an employee depends a great deal on circumstances and the amount of control the person hiring has over the job and the hired person. Ordinarily, when someone has the last word about telling a worker what needs to be done and how the job should be done, then that worker is an employee. Having a right to discharge the worker and supplying tools and the place to perform a job are primary factors that show control.

Contrast the following example to the self-employed gardener described earlier: The Smith family hired Lynn to clean their home and care for their 3-year old daughter, Lori, while they are at work. Mrs. Smith gave Lynn instructions about the job to be done and how the various tasks should be done; she, rather than Lynn, had control over the job. Under these circumstances, Lynn is a household employee and the Smiths are responsible for withholding and paying certain employment taxes for her.

Pubs Forms

Related IRS Publications and Forms

- **Pub 926** - Household Employer
- **Form SS-4** – Application for EIN
- **Form W-9** – Request for Taxpayer ID Number
- **Schedule H** – Form 1040

Warning!

It is illegal to knowingly hire or to continue to employ an alien who is not legally eligible to work in the U.S. When hiring a household employee who works on a regular basis, Form I-9, Employment Eligibility Verification, must be completed by the employer and employee. The employer must examine documents presented by the employee that establish the employee's identity and employment eligibility. The employer retains the completed Form I-9; it is not submitted to IRS. Form I-9 is not an IRS form; it can be downloaded from the U.S. Customs and Immigration Services web site: https://www.uscis.gov/sites/default/files/files/form/i-9.pdf

The Details

Social Security and Medicare Taxes (FICA) - A household employer must withhold both social security and Medicare taxes from a household employee's cash wages if they equal or exceed the threshold for the year – see adjacent table.

Tax Year	2014-15	*2016-17*	2018-19	2020
Threshold	$1,900	$2,000	$2,100	

If no entry, amount not available at the date of publication

The employer must match from his/her own funds, the FICA amounts withheld from the employee's wages. Wages paid to a ***household employee, who is under age 18*** at any time during the year, are exempt from social security and Medicare taxes unless household work is the employee's principal occupation.

The value of food, lodging, clothing or other noncash items given to household employees isn't subject to FICA taxes. However, cash given in place of these items is subject to such taxes.

Income Tax Withholding - A household employer doesn't have to withhold income taxes on wages paid to a household employee, but if the employee requests such withholding, the employer can agree to it. If income taxes are to be withheld, the employer can have the employee complete Form W-4 and base the withholding amount on the data the employee provides. Circular E provides the federal income tax and FICA withholding tables.

Wages subject to withholding – This includes salary, vacation pay, bonuses, clothing and other noncash items, meals and lodging. Meals are not subject to income tax withholding if they are furnished for the employer's convenience and on the employer's premises. The same goes for lodging if one additional requirement applies--that the employee lives on the employer's premises. Reimbursement for (a) transit passes, up to $265 per month for 2019 used by the employee to commute to the employer's premises, or (b) commuting-related parking, up to $265 per month for 2019 are not counted as wages See chapter 2.01 other year rates.

In lieu of withholding the employee's share of FICA taxes from the employee's wages, some employers prefer to pay the employee's share themselves. In that case, the FICA taxes paid on behalf of the employee are treated as additional wages for income tax purposes.

Federal Unemployment Tax (FUTA) - A household employer who pays more than $1,000 in cash wages to household employees in any calendar quarter of either the current or the prior year, is liable for FUTA tax. There is a credit against this tax for payments made to a state unemployment fund.

Employer Identification Number – A household employer is required to have an employer identification number (not the same as a Social Security number). It is used on any employment tax forms required to be filed. Use Form SS-4, Application for Employer Identification Number, to request an EIN (or one can be obtained by completing an on-line application at the IRS' web site; enter "EIN" in the search box). A household employer who has had an EIN as the sole proprietor of a business should use that number.

Reporting and Paying Employment Taxes for Household Workers: Household employers will **generally** report and pay employment taxes on household employee wages as part of their Form 1040 filing. This includes social security, Medicare, withholding and FUTA taxes. Schedule H is used for this purpose and is attached to Form 1040 when paying the taxes. To avoid an underpayment of estimated tax penalty, the household employer should be sure that his or her own income tax withholding or estimated tax payments is sufficient to cover the Schedule H taxes as well as regular income tax.

If the employer runs a sole proprietorship with employees, the social security, Medicare, and income tax withholding for any household employees may be included on Form 941, Employer's Quarterly Federal Tax Return, filed for the business. In that event, FUTA tax for the household employees is included on the business' Form 940 or 940-EZ, Employer's Annual Federal Unemployment Tax Return. Some employers may be required to file Form 944, Employer's ANNUAL Federal Tax Return, instead of Form 941. ***Caution:*** when preparing the proprietor's Schedule C, care should be taken to make sure that the wages and related payroll taxes of the household employee aren't included as a business expense on the Schedule C.

Form W-2 and Form W-3 - Household employers must provide W-2s to their household employees for whom they paid social security and Medicare taxes. The W-2 is due in the employee's hands by January 31 of the year following the one in which the wages were paid (unless that date falls on a holiday or weekend; then it's extended to the next working day). Beginning in 2017, the W-2s and Form W-3 that are filed with the Social Security Administration are due by January 31 also. In past years the government's copies of the W-2s weren't due until the last day of February of the year following the payment of the wages.

> ***Example - Household Employees and Employment Taxes –*** *In 2019 Sherri hired Ruby White to clean her house once a week. Ruby is to receive a gross amount of $70 weekly. Sherri expects to pay Ruby an amount in excess of the tax threshold during the tax year, so she withholds social security and Medicare tax from each of Ruby's paychecks. Unfortunately, Ruby experienced family problems and was forced to resign her job. Up to that point, Sherri had paid Ruby $910 in gross wages and she had withheld social security and Medicare tax. Sherri must refund the withheld amounts to Ruby. She is not required to give Ruby a W-2.*
>
> *Sherri hired a new house cleaner, Kathy, to replace Ruby. Kathy worked the remainder of the year and received gross wages of $2,730 on which Sherri withheld $208.85 in social security and Medicare taxes. By Jan. 31, 2020 Sherri must give Kathy a W-2 showing the gross wages and the withheld tax amounts, and provide a copy of the W-2, along with transmittal Form W-3, to the government.*
>
> *Then when Sherri files her own tax return, she will include Schedule H with her 1040 and pay a total of $417.70 (Kathy's share and Sherri's employer share of social security and Medicare tax) in employment taxes on Kathy's behalf. (For 2019, the employee's rate and the employer's rate for Social Security tax is 6.2%; each pays 1.45% Medicare tax.) Sherri will owe no FUTA tax, because she did not pay $1,000 or more in cash wages to household employees in any calendar quarter during the tax year or in the previous year.*

Grossing up wages - Frequently a household employer will not withhold employment taxes from the household employee's payments. When this happens, the employer must then pay the taxes and include the taxes in the employee's wages (W-2). This is referred to as grossing up the wages. In other words, the payments to the employee are treated as if they were net payments after withholding the required amounts for FICA and, if applicable, state payroll payments.

<u>*Gross up with both federal and state payroll taxes*</u> - In this example we use California SDI payments. The gross-up calculation shown is for *2019*.

$$\text{Gross-Up Factor} = \frac{1}{(1 - .0765^{(1)} - 0.01^{(2)})}$$

$$= 1/0.9135.$$
$$= 1.09469$$

(1) The amount used here is the federal withholding rate for the year (6.2% FICA plus 1.45% HI).

(2) The amount used here is for a state payroll tax withholding. If not applicable enter zero or the amount applicable to the state. For this example, the California SDI rate of 1% for 2019 is used.

Example – Proof:

Net payment = $200 *Grossed up payment = $200 X* 1.09469 = 218.94

W-2 Wage =	218.94
FICA (.0765) =	*<16.75>*
SDI (.01) =	*< 2.19>*
Net Check =	*200.00*

<u>*Gross up with only federal payroll taxes*</u> –

$$\text{Gross-Up Factor} = \frac{1}{(1 - .0765)}$$

$$= 1/0.92350.$$
$$= 1.08283$$

Thus, for wages subject just to FICA and HI withholding, the Factor is 1.08283

Hiring Household Help through an Agency - Hiring household employees through an agency may be a way for a taxpayer to avoid becoming an employer for these purposes. When help is hired through an agency or service, the agency/service is considered the employer; the taxpayer pays the agency, which, in turn, pays the employee.

Nursing Services - Wages and other amounts, such as the employer's portion of employment taxes, paid for nursing services can be included in medical expenses. Services need not be performed by a nurse as long as the services are of a kind generally performed by a nurse. This includes services connected with caring for the patient's condition, such as giving medication or changing dressings, as well as bathing and grooming the patient. These services can be provided in the home or another care facility.

Generally, only the amount spent for nursing services is a medical expense. If the attendant also provides personal and household services, these amounts must be divided between the time spent performing household and personal services and the time spent for nursing services. However, certain maintenance or personal care services provided for qualified long-term care can be included in medical expenses.

Part of the amounts paid for that attendant's meals are also included in medical expenses. Divide the food expense among the household members to find the cost of the attendant's food. If additional amounts for household upkeep were paid because of the attendant, include the extra amounts with the medical expenses. This includes extra rent or utilities paid, because a larger apartment or house was needed to provide space for the attendant.

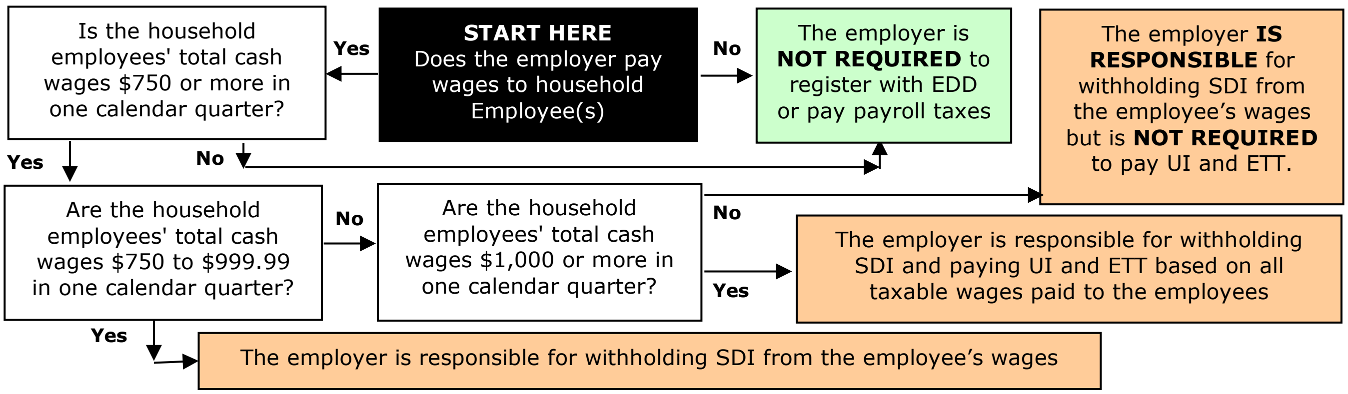
Additionally, certain expenses for household services or for the care of a qualifying individual incurred to allow the taxpayer to work may qualify for the child and dependent care credit – but the same expense can't be used both as a medical expense and for the child and dependent care credit. The employer's share of employment taxes paid on eligible expenses may be included when figuring the credit.

CALIFORNIA DIFFERENCES

California's employment taxes consist of unemployment insurance (UI) and employment training taxes (ETT) – paid by the employer – and state disability insurance (SDI) and state income taxes – paid by the employee through wage withholding. The California Employment Development Department (EDD) administers employment taxes. California does not allow household employers to pay their state employment taxes as part of their income tax filings. Instead, separate quarterly or annual employment tax returns and payments must be filed with the EDD. Household employers must register with the EDD when payments to one or more employees for household services reach $750 in cash wages in a calendar quarter.

Once $1,000 or more in cash is paid in a calendar quarter to household employees, the UI and EDD taxes apply to the current and following year. The threshold at which SDI withholding applies to domectic services in a private home is

$750 of cash wages paid in a calendar quarter for household services. California has the same rule as federal regarding income tax withholding (not required, but can be done if requested by the employee).
For information on the forms required to be filed, due dates and other details, please see EDD Pub. 8829 – 2019 Household Employer's Guide, available at: https://www.edd.ca.gov/pdf_pub_ctr/de8829.pdf



Meals and lodging - Cash wages include both checks and cash. Noncash wages, such as meals and lodging, are not included when calculating whether the $750-in-cash-wages threshold is met. Meals and lodging are included once the cash limit of $750 is reached. See examples on page 5 of the DE 8829 - Household Employer's Guide

E-File and E-Pay Requirement - California Assembly Bill (AB 1245) (Chapter 222, Statutes of 2015) requires all employers, including household employers, to electronically submit employment tax returns, wage reports, and payroll tax deposits to the EDD. Depending on the number of employees, the requirement is phased-in as follows:

- January 1, 2017 - Employers with 10 or more employees were required to electronically submit employment tax returns, wage reports, and payroll tax deposits.
- January 1, 2018 - All remaining employers are required to electronically file and pay.

Penalties - Filing paper returns instead of electronically filing when required will result in the following penalties for household employers:

- Employer of Household Worker(s) Annual Payroll Tax Return (DE 3HW) - $50 per return
- Employer of Household Worker(s) Quarterly Report of Wages and Withholdings DE (3BHW) - $20 per wage item
- Payroll Tax Deposit (DE 88) – 15% of the amount due.

Waiver - Employers may request a waiver from the electronic filing mandate due to:

- Lack of automation,
- Severe economic hardship,
- Current exemption from the federal government, or
- Other good cause.

The E-file and E-pay Mandate Waiver Request (DE 1245W) can be downloaded at: www.edd.ca.gov/pdf_pub_ctr/de1245w.pdf

Waiver requests, which cannot be filed retroactively, must be received by the final filing date of the quarter for which the taxpayer is requesting that the waiver begin. Requests received after the due date for the quarter requested will be processed for the subsequent quarter. An approved waiver will be valid for four consecutive quarters beginning with the effective quarter, and to avoid a non-compliance penalty when the waiver expires, an employer must start to electronically file and pay, or submit a new waiver request.

2019 California Payroll Tax Chart

Payroll Tax	Who Pays	Taxable Wages	Tax Rate	Maximum Tax
Unemployment Insurance (UI) For more Info., refer to Information Sheet: CA System of Experience Rating (DE 231Z) available online at www.edd.ca.gov/pdf_pub_ctr/de231z.pdf	**Employer**	First $7,000 of wages per employee, in a calendar year.	New employer tax rate is 3.4 percent (.034) for a period of two to three years. Following this period, the tax rate is calculated annually based on each employer's previous UI experience and the condition of the UI Fund.	$434 per employee, per year [calculated at the highest UI tax rate of 6.2 percent (.062)]. The maximum UI tax amount will be less if the UI rate is less than 6.2 percent.
Employment Training Tax (ETT)	**Employer**	First $7,000 of wages per employee, in a calendar year	Set by law at 0.1 percent (.001) of UI taxable wages for employers with positive UI reserve account balances.	$7 per employee, per year.
State Disability Insurance (SDI) Disability Insurance (DI) and Paid Family Leave (PFL) are components of the SDI Program and are included in the SDI employee contributions.	**Employee** Employer withholds SDI from employee wages; employers are responsible for SDI not withheld from employee wages. If the employer pays SDI for employee(s), those payments increase wages.	First $118,371 of wages per employee, in a calendar year.	The 2019 withholding rate is 1 percent (.01). Set by law, the SDI rate may change each year. The EDD notifies employers of the new rate each December.	$1,183.71 per employee, in a calendar year.
California Personal Income Tax (PIT)	**Employee**. Household employers are not required to withhold PIT from employee wages unless **both** the employer and employee agree to withhold the tax. However, the employee is still responsible for reporting wages and paying any PIT due to the FTB.	Normally, all PIT wages (cash and noncash)	PIT is withheld based on each *Employee's Withholding Allowance Certificate* (Form W-4 or DE 4) and the withholding schedules provided in the *California Employer's Guide* (DE 44)	No maximum

NOTES

GIFT PLANNING

Overview

- Annual Gift Tax Exclusion (2019): $15,000
- Lifetime Gift Tax Exclusion (2019): $11.40 Million
- Top Gift Tax Rate: 40%
- Estate Tax Exclusion (2019): $11.40 Million

RAPID FINDER

Foreign Gifts & Inheritances

The question frequently arises regarding reporting requirements for gifts or inheritances received from a foreign source. Gifts and inheritances are income-tax free to a U.S. citizen or resident alien. However, if the amount is received from a nonresident alien individual or foreign estate and is more than $100,000, the recipient must file Form 3520. Complete Page 1 and Part IV of Form 3520. The form is due on the same date as the taxpayer's tax return (including extensions). See form instructions for current filing address. Gifts valued at more than $16,388 (2019 amount, adjusted annually for inflation) from foreign corporations or foreign partnerships (including foreign persons related to the foreign corporations or foreign partnerships) also must be reported on Form 3520.

CAUTION – If the taxpayer has income from a foreign trust see the instructions for Form 3520, as there may be some tax liability. Also, if the beneficiary leaves the funds in the foreign country, he will have to comply with the reporting requirements for having a foreign financial (bank) account (FBAR).

See Chapter 1.13 for more detail related to foreign gift and accounts reporting.

The Details

Gift transactions are one of the primary techniques used to reduce estate taxes. In this section, we review the basics of gifts and how they are taxed.

GIFT & ESTATE EXCLUSION UNIFICATION

There is a single graduated rate schedule for both the estate and gift taxes, and the single lifetime exclusion can be used for gifts and/or bequests.

GIFT TAX RULES - Lifetime gifts currently are subject to a gift tax imposed at the same tax rates that apply for the value of estates at the time a taxpayer dies, with some exceptions, as explained next.

ANNUAL PER DONOR PER DONEE GIFT LIMIT (Without Tax Consequences)

Year	Prior to 2000	2002-05	2006-08	2009-12	2013-17	2018-20
Amount	$10,000	$11,000	$12,000	$13,000	$14,000	$15,000

If amount is not shown, it was not available at publication date.

Annual Exclusion **-** Gifts of up to the annual per donor per donee (recipient) per year limit amount may be made without tax consequences (Sec. 2503(b)). The gift must be a gift of a present interest. Direct gifts (including UGMA gifts) qualify, as do gifts to 2503(c) trusts and Crummey withdrawal trusts.

1. 2503(c) trusts are those that meet the following requirements:
   - The property and the income may be expended by or for the benefit of the donee before age 21.
   - To the extent the property is not so expended, it will pass to the donee at age 21.
   - If the donee dies before age 21, the property will be payable to the donee's estate or as the donee may appoint under a general power of appointment.

NOTE: *Many clients hesitate to use 2503(c) trusts, because they do not want the child to receive the trust at age 21.*

2. Crummey trusts take their name from the case of ***Crummey v. Comm, 397 F.2d 82 (9th Cir. 1968).*** In that case, a gift to a trust qualified as a present interest (and thus an annual exclusion), because the donee had a present (though short-term) right to withdraw the gift to the trust.

Tuition/Medical Exclusion **-** In addition to the annual exclusion, a donor may make gifts that are totally excluded from the gift tax in the following circumstances:

- Payments made **directly** (Sec 529 plans are not direct) to an educational institution for tuition. This includes college and private primary education. It does not include books or room and board.
- Payments made directly to any person or entity providing medical care for the donee.

In both cases, it is critical that the payments be made directly to the educational institution or health care provider. Reimbursement paid to the donee will not qualify. The tuition/medical exclusion is often overlooked, but these expenses can be quite significant. Parents and grandparents interested in estate reduction should strongly consider these gifts.

Gift Splitting **-** A husband and wife can each make annual exclusion gifts, thereby increasing the exclusion from *$15,000* to *$30,000* per year (2019 and 2018 amounts). However, only one of the spouses may have available property to give. Code Section 2513 allows the spouses to elect (on a Form 709) to treat a gift made by one spouse as being made by both spouses. Gift splitting can be used for annual exclusion gifts, lifetime exclusion gifts, and gifts above the lifetime exclusions.

Example - Gift Splitting - *John and Jane are married and have two children. In a year when the annual exclusion limit is $15,000, they would like to exclude $60,000 ($15,000 x 2 donors x 2 donees) in gifts. Jane received a large inheritance some years back; John has only a modest estate. Jane gives the children $30,000 each. Then the couple elects to gift split so that the $30,000 gift is treated as given one-half by Jane and one-half by John (or $15,000 each). The gifts all qualify for the annual exclusion.*

Even if both spouses have sufficient resources to make gifts, gift splitting is useful when the husband and wife have different estate planning goals.

Example - Gift Splitting Where Spouses Have Different Estate Planning Goals - *Steve has a large estate and a daughter, Ryan, from a prior marriage. He would like to make maximum annual exclusion gifts to her. Sharon, Steve's wife, can afford to make annual exclusion gifts to Steve's daughter, but is not inclined to do so, since she has other beneficiaries of her own to plan for. Steve gives $30,000 to Ryan in a year when the annual exclusion limit is $15,000. He and Sharon elect to gift split, so the gift is treated as given one-half by each. As long as the property given is properly valued and supportable on audit, the gift split helps Steve and Ryan, yet it costs Sharon nothing. Sharon's financial and tax ability to make gifts to others is not reduced by the gift split.*

For clients in community property states, if community property is given, gift splitting is not necessary. Regardless of who holds the record title, or who "makes" the gift, the property is owned one-half by each and is therefore given one-half by each.

Due Date for Gift Tax Returns (Form 709) **–** When required to be filed, gift tax returns generally are due by April 15 of the year following the gift. A calendar year taxpayer who requests an extension of time on Form 4868 for his or her income tax return also extends the due date of the gift tax return to the extended due date of the 1040. However, if the taxpayer will owe a gift tax, payment voucher Form 8892-V should be completed and sent with payment to the IRS by the original due date, since the extension is only for the time to file and not for paying the tax. If the donor isn't filing Form 4868, an automatic 6-month extension to file the gift tax return can be obtained by filing Form 8892 on or before the due date of the gift tax return.

Estate, Generation Skipping and Gift Tax Tables

Year	Estate Tax Exclusion	Top Estate Tax Rate	GST Exclusion	Top GST Tax Rate	Lifetime Gift Exclusion	Top Gift Tax Rate
2006	$2 Million	46%	$2 Million	46%	$1 Million	46%
2007	$2 Million	45%	$2 Million	45%	$1 Million	45%
2008	$2 Million	45%	$2 Million	45%	$1 Million	45%
2009	$3.5 Million	45%	$3.5 Million	45%	$1 Million	45%
2010	$5.0 Million	35%	$5.0 Million	0%/35%	$1 Million	35%
2011	$5.0 Million	35%	$5.0 Million	35%	$5 Million	35%
2012	$5.12 Million	35%	$5.12 Million	35%	$5.12 Million	35%
2013	$5.25 Million	40%	$5.25 Million	40%	$5.25 Million	40%
2014	$5.34 Million	40%	$5.34 Million	40%	$5.34 Million	40%
2015	$5.43 Million	40%	$5.43 Million	40%	$5.43 Million	40%
2016	$5.45 Million	40%	$5.45 Million	40%	$5.45 Million	40%
2017	$5.49 Million	40%	$5.49 Million	40%	$5.49 Million	40%
2018	$11.18 Million	40%	$11.18 Million	40%	$11.18 Million	40%
2019	$11.40 Million	40%	$11.40 Million	40%	$11.40 Million	40%
2020	$11.58 Million	40%	$11.58 Million	40%	$11.58 Million	40%

If amount is not shown, it was not available at publication date.

No Tax Deduction – The value of gifts made, other than those to charitable organizations, is not deductible by the donor.

Example - Gift Tax Computations - *Neil Moneybags, a single father, gives $5,505,000 to his daughter in 2019. Neil has not made previous taxable gifts. The gift tax is computed as follows:*

Value of gift	*$5,505,000*
Annual exclusion	*<15,000>*
Taxable gift	*$5,490,000*
Tax per rate schedule	*$2,141,800*
Unified credit used	*< 2,141,800>*
Tax due	*$ 0*

Of course, this gift may cause an increase in estate taxes upon Neil's death or a later gift. Neil's 2019 unified credit of $4,505,800 has been reduced to 2,364,000, which remains to be used against future taxable gifts and/or his estate tax when he dies. The available future unified credit amount may be more or less at his date of death depending whether he's made additional gifts in excess of the annual exclusion amount that used up more of the lifetime amount and what the lifetime exclusion (and unified credit) is for the year of his death.*

Post-2012 Gift & Estate Tax Rate Schedule

COLUMN A Taxable Amount over	COLUMN B Taxable Amount over	Tax on amount in Column A	Rate of tax on excess over amount in Column A
---------	$10,00	---------	18%
$10,000	$20,000	$1,800	20%
$20,000	$40,000	$3,800	22%
$40,000	$60,000	$8,200	24%
$60,000	$80,000	$13,000	26%
$80,000	$100,000	$18,200	28%
$100,000	$150,000	$23,800	30%
$150,000	$250,000	$38,800	32%
$250,000	$500,000	$70,800	34%
$500,000	$750,000	$155,800	37%
$750,000	$1,000,000	$248,300	39%
$1,000,000	---------	$345,800	40%

** The unified credit is determined by computing the tax on the $11.4 million exclusion for 2019.*

Gifts in Excess of Lifetime Exclusion - Once the annual exclusion and the lifetime exclusion are used up, any further gifts generate a gift tax.

HOW WILL THE TCJA-INCREASED GIFT TAX EXCLUSION AFFECT POST-2025 ESTATES?

The lifetime gift and estate tax exclusion, starting in 2018, was more than doubled by the TCJA and continues to increase each year with inflation adjustments. Barring Congressional action, the higher exclusion amount returns to its inflation adjusted former amount after 2025. This caused concerns related to what the tax consequences might be for post-2025 estates where the decedent, while alive, had made gifts during the 2018 through 2025 period utilizing the higher unified gift-estate exclusion. Would that cause a claw back due to the reduced exclusion? Fortunately, the IRS has proposed taxpayer-friendly regulations that address the issue.

Proposed Regulation 20.2010-1(c), which will be effective when the finalized regulation is published, provides a special rule that allows the estate to compute its estate tax credit using the higher of the basic exclusion amount applicable to gifts made during life or the basic exclusion amount applicable on the date of death. As a result, individuals planning to make large gifts before 2026 can do so without concern that they will lose the tax benefit of the higher exclusion level once it decreases after 2025. (IR 2018-229; NPRM REG-106706-18)

LIFE ESTATE

A frequently encountered issue is when an elderly parent turns the title of his or her home over to a child or other beneficiary and continues to reside in the home. This situation raises important questions: How is a future sale of the home treated if it is sold before the parent's death (will Sec 121 apply?), and is a gift tax return required? Or if the parent passes away while still residing in the home, does the beneficiary use a gift basis or the FMV on the date of death? What is the tax result if the parent moves out of the home?

Completed Gift or Life Estate? – Per Sec 2036, the value of a decedent's estate shall include the value of all property in which the decedent has transferred any interest (except for a *bona fide* sale) that the decedent has retained for his or her life or for any period not ascertainable without reference to his death or for any period which does not in fact end before his death. Thus, an individual who transfers a title and retains the right to live in a home for his or her lifetime has established a de facto life estate, and as such, when the individual dies, the value of the home is included in the decedent's estate and no gift tax return is applicable. As a result, the beneficiary's basis would be the FMV at the date of the decedent's death.

Even though a de facto life estate may be intended, without written documentation the giver takes the risk of having the home sold out from under him by the new titleholder.

On the other hand, if the elderly parent does not continue to reside in the home after transferring the title, a gift has occurred since no life estate has been established; a gift tax return would be required, and the child's (gift recipient's) basis would be the parent's adjusted basis in the home at the date of the gift. In addition, if the child were to sell the home, the Sec 121 home sale exclusion would not apply unless the child met the Section 121 qualifications.

Partial Interests - Section 121 applies to sales of partial interests, so if the parent has simply added the child's name to the title, retaining a partial interest, and the home is subsequently sold, the parent would be able to apply the Sec 121 exclusion to his or her portion of the gain provided he or she met the Sec 121 qualifications. A gift tax return would be required for the year the child's name was included on the title, and the child's basis would be the portion of the parent's adjusted basis transferred to the child. The Sec 121 exclusion would not apply to the child unless the child separately met the Sec 121 qualifications.

Although "parent" and "child" were used throughout this analysis, the same rules would apply to unrelated individuals.

PORTABILITY OF UNUSED ESTATE TAX EXCLUSION

The executor of a deceased spouse's estate may transfer any unused exclusion to the surviving spouse for estates of decedents dying after December 31, 2010. A Form 706 (Estate Tax Return) must be timely filed to obtain the portability. (Code Sec. 2010(c)(2)) **But see special extension of time to file Form 706, below, where the form is being filed for portability only and is not otherwise required to be filed.**

The applicable exclusion amount is the sum of:

(1) the "basic exclusion amount" and

(2) in the case of a surviving spouse, the "deceased spousal unused exclusion amount."

The basic exclusion amount is $11.4 million for deaths in 2019.

The "deceased spousal unused exclusion amount" is *the lesser of:*

(1) the basic exclusion amount, or

(2) the excess of the applicable exclusion amount of the last deceased spouse dying after Dec. 31, 2010, of the surviving spouse, over the amount on which the tentative tax on the estate of the deceased spouse is determined. (Code Sec. 2010(c)(4))

A surviving spouse (for convenience we'll assume it is the wife in this discussion) may use the deceased spousal unused exclusion amount in addition to her own basic exclusion for taxable transfers (i.e., gifts) made during life or her estate may use it on the estate tax return at her death.

> ***Example -*** *Husband dies in 2014, having made taxable transfers of $3 million and having no taxable estate. His unused exclusion amount in 2014 was $2.34 Million $5.34 million - $3 million). An election is made on his estate tax return to permit Wife to use his deceased spousal unused exclusion amount. Wife has made no taxable gifts in his year of death or later and has had no other husbands. Wife's applicable exclusion amount for 2019 is $13.74 million (her $11.40 million basic exclusion amount plus $2.34 million deceased spousal unused exclusion amount from Husband), which she may use for lifetime gifts or for transfers at death. (Committee Report)*

If a surviving spouse is predeceased by more than one spouse, the amount of unused exclusion that is available for use by the surviving spouse is limited to the lesser of the applicable exclusion amount (for example, *$11.40* million if the spouse died in *2019*) or the unused exclusion of the last deceased spouse. (Code Sec. 2010(c)(4))

For the surviving spouse or her estate to use the deceased spouse's unused exclusion amount, the predeceased spouse's estate must make an election – referred to as the portability election – on a timely filed estate tax return (Form 706) that includes a computation of the unused exclusion amount. To make the portability election, Form 706 must be filed even if the value of the gross estate is not enough to otherwise require filing an estate tax return. See regulations § 20.2010-2 for detailed rules and guidance on the portability election.

CAUTION – Possible Repercussions for Not Filing the Portability Election!
Where a surviving spouse's estate is expected to be valued at less than the estate tax exclusion amount when he or she passes, it may seem to be a waste of time, effort and money to file a 706 Estate Tax Return for the pre-deceased spouse. However, in making that decision, one should consider the possibilities of the surviving spouse receiving inheritances, hitting the lotto or for Congress to reduce the estate tax exemption some time in the future. Any of these potential events could result in substantial estate tax considering the current tax rate on taxable estates is 40%. **Who will get the blame? You the tax preparer of course! If the executor refuses to file the 706 then get a signed statement to that affect.**
SEE SUGGESTED STATEMENT FOR EXECUTOR SIGNATURE AT END OF CHAPTER

Special Extension for Portability Only – In Revenue Procedure 2017-34, IRS has provided a permanently available simplified method for estates to obtain an extension of time to make the estate tax portability election. The simplified method is only available to estates that are not required to file an estate tax return based on the value of the gross estate and is effective June 9, 2017. In order to qualify for the automatic extension, the following requirements must be met:

1. The taxpayer is the executor of the estate of a decedent who:
    a. has a surviving spouse;
    b. died after Dec. 31, 2010; and
    c. was a citizen or resident of the U.S. on the date of death;
2. The taxpayer is not required to file an estate tax return based on the value of the gross estate and adjusted taxable gifts, without regard to the need to file for portability purposes;
3. The taxpayer did not file an estate tax return within the time prescribed for filing an estate tax return required to elect portability;
4. The executor must file a complete and properly prepared Form 706 **on or before the later of Jan. 2, 2018, or the second annual anniversary of the decedent's date of death**;
5. The executor filing the Form 706 on behalf of the decedent's estate must state at the top of the Form 706 that the return is "FILED PURSUANT TO REV. PROC. 2017-34 TO ELECT PORTABILITY UNDER Code Sec. 2010(c)(5)(A)."

Thus, the Rev Proc allowed additional time to those who failed to previously file a Form 706 to elect portability as long as they did so by Jan. 2, 2018. In addition, executors of other estates that do not otherwise have a Form 706 filing obligation but need to file only to make the portability election, will have 2 years from the decedent's date of death to file for portability.

The simplified method of this revenue procedure is not available to the estate of a decedent whose executor already timely filed an estate tax return because the executor either will have elected portability on that return or will have affirmatively opted out of portability.

INCOME TAX BASIS

Lifetime Gifts: If property is given during a donor's lifetime, the donee (gift recipient) keeps the same basis as the donor for gain property. *Sec. 1015(a)* For loss property, the donee's basis is the fair market value *[Sec. 1015(a)]*, which prevents the donee receiving tax benefits from the economic losses which occurred while the donor owned the property. Basis is also increased by the amount of gift tax paid, if any. *Sec. 1015(c)*

Inherited Assets – see Chapter 11.07.

TAX BENEFITS OF GIFTS

Annual Exclusion Gifts - As covered earlier in this section, for 2019 a donor can make annual exclusion gifts of up to $15,000 per donor, per donee, per year. These gifts are totally exempt from estate and gift taxes, as well as all future income and appreciation on the property given. A $15,000 gift may not sound that impressive, but with multiple beneficiaries and multiple years, the estate reduction could be significant.

Example - Annual Exclusion on Gifts - *Bob and Millie have two children and two grandchildren. They make maximum annual exclusion gifts for 15 years.* ***Assume for this example that the annual exclusion was $15,000 and was not increased by inflation during this period****. During that time, the gifted property appreciates 5% per year. The results are impressive:*

Annual exclusion	$15,000
Donors (2) x Donees (4) x Years (15)	*x 120*
	$1,800,000
*5% compounded growth over 15 years**	*$789,428*
Value in hands of donees (and out of donor's estate)	*$2,589,428*

*The estate reduction is accomplished without any reduction in Bob and Millie's unified credit. They still can give away $11.40 million more each during their lifetimes (through 2019). *assumes gifts made at end of each year and does not account for any income tax paid on the earnings*

Lifetime Exclusion Gifts (Unified Credit Gifts) - A client may wish to make gifts beyond the annual exclusion. If so, the client begins using up the unified credit. Using up a part or all of the unified credit means that the portion so used will not be available to reduce estate tax. So, lifetime exclusion gifts do not have a current tax cost, but they will have a future tax cost.

Nevertheless, clients may still desire to make lifetime exclusion gifts because all of the future income and appreciation on the gifted property will not be included in their estate. Thus, they use up their lifetime exclusion at today's values rather than the values at date of death.

Gifts Beyond Lifetime Exclusion - A client may wish to make gifts beyond the annual and lifetime exclusions. These gifts are subject to current year gift tax. Even clients who can afford to part with the property may be reluctant to do anything that accelerates payment of transfer (gift or estate) taxes. However, it might be to their advantage to do so.

- First, all of the income and appreciation escapes the donor's estate taxes.
- Second, gift and estate taxes are computed differently. With estate taxes, the tax is computed on the gross estate, before payment of estate tax. Thus, in effect, a tax is paid on the tax.

With gift taxes, the tax is computed only on the amount the donee receives. So, the gift tax is really a lower tax.

DOs AND DON'Ts OF SELECTING ASSETS TO GIVE

A. Give assets producing higher taxable income rather than those with lower or no taxable income.
B. Give assets likely to grow in value.
C. Give high-basis rather than low-basis assets. This limits the impact of the tax on capital gains when the donee sells the asset and leaves the low-basis assets available for the step-up in basis at the time of the owner's death.
D. Don't give an asset with a value less than its basis. Don't hold until death either. In either case, the loss will be wasted.
E. Don't give to a trust, property subject to an encumbrance for which the donor is personally liable. This will cause grantor trust treatment and estate inclusion. See Regs Sec. 1.677(a)-1(d) and 20.2036-1(b)(2).
F. Don't give property with a debt in excess of basis. The excess will be realized income. See Regs Sec. 1.1001-2(B)(4)(iii).
G. Be careful in making gifts of business interest or of farm, ranch or business real estate. Doing so could result in a disqualification from the benefits of Secs. 303, 2032A or 6166.
H. Do make minority interest gifts to qualify for discounts.
I. Don't give installment obligations. This will cause acceleration of gain under Sec. 453B. Be careful in making gifts of S corporation stock so that the recipient is a permitted shareholder.

GIFT RECIPIENTS

Gifts can, of course, be given to individuals. However, for various reasons, a donor may not want the donee to own the gifted property outright. The donee may be a minor. The donee may be a young adult, legally competent but immature and not responsible. The donor may be reluctant to give up full control. The donor may want some of the protections afforded by other gift vehicles even for a mature and responsible donee.

UGMA/UTMA - All states have adopted some form of the Uniform Gifts to Minors Act or the Uniform Transfer to Minors Act. In general, these statutes allow for a simple method to create an informal trust-type arrangement with a custodian holding property for the minor.

Advantage: The chief advantage is that the transaction and set up is very simple and usually does not require an attorney. The transfer constitutes a completed present interest gift that qualifies for the annual exclusion. Income on the property is taxed to the minor (subject to the "kiddie tax").

Disadvantages:
a. The property must be distributed to the child when the child reaches the age provided for in the UGMA/UTMA statute, typically either 18 or 21.
b. The property will be includible in the donor's gross estate if the donor is acting as custodian at the time of the donor's death.
c. Depending on the state's law, some types of property may not be owned in UGMA/UTMA form.

Sec. 2503(c) Trusts - The advantage of these trusts is easy qualification for the annual exclusion. The disadvantage is that the property in trust passes to the donee at age 21.

Crummey Trusts

Advantage:
a. Qualifies for annual exclusion, though in a convoluted manner.
b. Trust does not have to end at age 21; it can last for the entire lifetime of the beneficiary and beyond.
c. Allows for generation-skipping.
d. Can probably qualify as a spendthrift trust and be exempt from the reach of some or all of the beneficiary's creditors.

Disadvantages:
a. Complexity.
b. Beneficiary has a right to withdraw trust property for some specified period of time.
c. The lapse of a withdrawal right has tax consequences to the beneficiary, e.g., income tax, Sec. 678(a), Sec. 2541(e) and estate tax, Sec. 2041(b)(2).

NonCrummey Trusts - Though not often used, a client could also draft a trust for adult beneficiaries that does not grant Crummey withdrawal rights. Gifts to the trust would not be eligible for the annual exclusion. Possible situations when such a trust might be appropriate:

1. Gifts of the lifetime exemption. (Of course, a Crummey withdrawal right could be granted and the gift made in the amount of the exemption amount plus the annual exclusion amount.) Similarly, gifts in excess of the lifetime exclusion might also be given to a non-Crummey trust.
2. The donor's annual exclusions are already being used up under some other portion of the estate plan (other trusts, FLPs, etc.)
3. The donor desires to avoid the tax consequences to the beneficiary arising from a lapse of a withdrawal right.

Generation-Skipping Trusts - If a client is forward-looking enough, he/she can achieve impressive results by structuring a trust through at least the next generation's lifetime (and often to the end of the third or fourth generation's lifetime).

Under a traditional plan, the parents would provide in the will or trust for assets not to be distributed to a child while the child is young. At some designated age, say 30 or 35, the trust would terminate, and the trust assets would be distributed to the child. As an alternative, the trust might provide for staggered distributions, say one-third at each of ages 25, 30 and 35, with total termination and distribution occurring at age 35.

Under a generation-skipping plan, the trust would not terminate at any given age. Instead, the trust will last for the entire lifetime of the beneficiary, and often beyond. The child (and often his or her children) will be the trust beneficiaries, usually with an objective distribution standard relating to health, education, maintenance and support in accordance with the beneficiaries' accustomed standard of living.

If the parents so desire, the child can be given the right to appoint himself or herself as the trustee after attaining a pre-set age or some other objective benchmark.

If a child is both the primary beneficiary and the trustee, and if the distribution standard is health, education, maintenance and support, the child is basically in the same position as a surviving spouse in a typical bypass trust.

The trust has the following advantages over an outright distribution to an adult beneficiary:

<u>Transfer Tax Savings:</u>

a. Unless a prior lapsed withdrawal right causes a portion of the trust to be included in the beneficiary's gross estate, the trust will probably not be subject to estate taxes on the beneficiary's death.
b. If sufficient GST exemption is allocated to the trust by the donor/decedent, the trust will also be exempt from the generation-skipping tax on the beneficiary's death.
c. The GST exemption for 2019 is $11.40 million ($22.8 million for a couple). Certain lifetime gifts may also be eligible for a $15,000 (2019) GST annual exclusion (under rules that are far more restrictive than the gift tax annual exclusion).

   Therefore, if a family plans properly, it is possible to exempt over $22 million of property (plus income and appreciation) from the U.S. transfer tax system (gift, estate and generation-skipping taxes) on the death of the second generation.

   If the trust extends through the lifetime of the third generation, the same result occurs at that generation's death.

   Contrast that result with an outright gift to a mature adult child. The child will own the property outright and will be able to transfer it to his or her children only by subjecting it to the estate and gift tax system. The likely result is that the property (which was already taxed at Mom and Dad's deaths) will be subject to estate tax all over again.
d. If generation-skipping is to be attempted, it is best to segregate GST exempt property and GST nonexempt property. This usually requires 2 sets of trusts. While being cumbersome, it structures the family wealth so that the trustees can maximize the benefit of the GST exemption. The trustee can simply make all distributions to the second generation out of nonexempt trusts and let the exempt trust grow in value.
e. Over 2 or 3 decades of managing the trusts in that manner, the growth of the exempt assets versus the nonexempt assets can be quite dramatic.
f. It is also a good idea to build a mechanism into the nonexempt trust to make sure that on the child's death, the trusts are subject to estate taxes if the estate tax rates are lower than the GST rate. An easy approach is to provide for generation-skipping trusts only up to the amount of the GST exemption. More sophisticated formula provisions are possible and are commonly used. Currently the top estate tax rate and the GST rate are the same, so this provision may no longer be appropriate.

<u>Creditor Protection</u>*:* The trust would usually include "spendthrift" provisions that would prevent most of the beneficiary's creditors from reaching the trust's assets. If the assets are distributed to the beneficiary outright they would be far more likely to be reached by a creditor. Many of our clients have a great concern over runaway damages and excessive lawsuits. Many of them take great pains to structure their own affairs to limit the reach of creditors. With the generation-skipping trust, they can easily do the same for their children and grandchildren.

<u>Divorces</u>*:* The spendthrift provisions and the general lack of the beneficiary's ownership of the trust assets will probably greatly reduce the chance of losing the property in a divorce. If the child owned the assets outright, the assets would be more reachable by the child's spouse.

Family Limited Partnership (FLP) - A family limited partnership (or LLC, or LLP) can be a means of giving property to children (limited partnership interest) in order to shift future appreciation to children, with the parent (as general partner) retaining control indefinitely. This type of arrangement can be viewed as a substitute for a transfer of property to an irrevocable trust for the benefit of the children. This technique's details are not included in this material.

Gifting encumbered property - When an individual makes a gift of encumbered property, the amount of the gift reported on Form 709 – U.S. Gift Tax Return is the FMV of the property less the amount of the encumbrance. The recipient of the gift assumes the giver's adjusted basis. When a mortgage on property exceeds the giver's basis, the giver recognizes a capital gain in an amount equal to the excess of the mortgage over basis.

Example: *Parents wish to gift an investment property to their son. The FMV of the property is $500,000, the mortgage on the property, which the son will be assuming, is $230,000. The parents' adjusted basis in the property is $200,000. Thus, the parents' gift amount is $270,000 ($500,000 - $230,000), the son assumes his parents' basis in the property of $200,000 and the parents have long-term capital gain equal to the excess of the mortgage over basis, which in this example is $30,000 ($230,000 - $200,000).*

CALIFORNIA DIFFERENCES

California does not have a gift, estate or inheritance tax. Because there is no longer a pick-up tax equal to the state death tax credit (since no such credit is now available on the federal Form 706), Form ET-1 is no longer required to be filed to the state of California.

STATEMENT
ESTATE PORTABILITY ELECTION

The executor of the estate of an individual who was married at the date of death ("deceased spouse") may transfer any unused estate tax exclusion to the surviving spouse for estates of decedents dying after December 31, 2010. (Code Sec. 2010(c)(2)) This provision is referred to as the portability election.

Example – *A spouse dies, having made taxable transfers (taxable gifts) and a taxable estate totaling $6 million. The unified gift and estate tax exclusion for the year is $11.40 million[1]. The executor of the estate can make an election whereby the unused portion of the deceased spouse's estate tax exclusion can be passed on to the surviving spouse for use in the future. So in this example $5.40 million ($11.40 million less $6 million) would be added to the surviving spouse's estate tax exemption when he or she dies, or during the surviving spouse's lifetime it can be applied to taxable gifts made by the surviving spouse.*

To make the portability election, a Form 706 (Estate Tax Return) must be timely filed. The Form 706 is a complicated and costly return to prepare.

Where the presumption is that the surviving spouse would never have the need for the unused estate tax exemption of the deceased spouse, and where there is no filing requirement, the estate executor may decide it is a waste of time, effort, and expense to file a 706 for the deceased spouse.

That decision can be costly in the future since any taxable estate of the surviving spouse can be taxed at rates as high as 40% [1]. The surviving spouse's estate could increase through inflation, inheritances, winnings and investments. Congress could also reduce the estate tax exemption in the future.

I have read and understand the foregoing and elect not to file a 706 and not to make the portability election for the estate of: ____

Estate Executor Date

[1] *Values shown are for 2019. Exclusion is annually inflation adjusted.*

BASIS

Overview

The "basis" of an asset can be thought of as the amount a taxpayer has invested in the property. Without knowing the basis, deductions for depreciation, casualties, or depletion, etc., could not be determined, and gains or losses on the disposition of assets could not be established.

Pubs Forms

Related IRS Publications and Forms

- **Pub 551** – Basis of Assets
- **Form 8594** – Asset Acquisition Statement

The Details

COST AND BASIS:

The basis of purchased property is usually its cost. The whole purchase price includes:

- Cash,
- Mortgages and other liabilities (new, assumed, "subject to," recourse and nonrecourse),
- The basis of property given in exchange for the property,
- Back taxes or interest that were the liability of the previous owner, but were paid by the present owner, and
- Freight and installation charges.

The basis DOES NOT include interest, other than described in the fourth item above.

BASIS OF GIFTS

A donee's original or unadjusted basis (that is, the basis before adjustments made while the donee owned it) for property the donee acquires by gift is the same as the property's adjusted basis in the hands of the donor, or in the hands of the last preceding owner who didn't acquire the property by gift. But if the property's fair market value (FMV) at the date of the gift is lower than that adjusted basis, then the property's basis for determining *loss* is its FMV on that date. (Code Sec. 1015(a))

PURCHASE OF SEVERAL ITEMS FOR ONE LUMP SUM

When several items are bought for one lump sum (e.g., a business, or real property along with personal property), the basis must be separated among the various properties.

Exception - If a taxpayer buys several assets to get just one, the whole price is allocated to the one.

> ***Example – multiple assets purchased to acquire one*** *- When a taxpayer who buys land and a building intending to tear down the building, the whole cost of the property goes to the land, none to the building.*

Real Property Purchases - Allocate to each item according to FMV, e.g., the basis of building A equals the FMV of A divided by the total FMV of all the assets, times total purchase price.

FAIR MARKET VALUE AS BASIS

In certain instances, basis is determined by the FMV of the property. Examples include:

- Property acquired in a taxable exchange.
- Property acquired from a decedent (except for deaths in 2010 in some cases). FMV is determined as of date of death (or estate alternate valuation date). This means that if the heirs sell inherited property soon after the decedent's death, the result will usually be little or no gain. FMV will be used to figure depreciation, as well as for figuring gain or loss on sale.

Valuation of inherited property is generally taken from the estate tax return (if any), and if FMV was used to determine the value for estate tax purposes, the same value must be used by the beneficiary. See "Basis of Assets Inherited," below. If there is no estate tax return, probate papers may provide an "inventory" showing values of items in the estate.

<u>Property acquired from a decedent</u> - Property acquired by bequest, devise, or inheritance which includes:

(1) Items required to be in the decedent's gross estate (whether or not an estate tax return is filed).

(2) Gifts from the decedent within three years of death, ONLY IF these items are required to be included in the estate tax return.

(3) It can include joint tenancy and community property. If COMMUNITY PROPERTY, the whole property is acquired by inheritance; if JOINT TENANCY, only the decedent's part that is required to be included in the gross estate is inherited property. However, if the joint tenancy is between spouses and the property would otherwise be community property, it may be possible to establish that the property is actually community property for this purpose.

However, it does not include:

(1) Appreciated property received as a gift by a decedent within one year of death, if the property passes back to the donor or spouse of the donor. Basis of this kind of property is the same as the decedent's basis immediately before death.

(2) Payments received by the heirs from sales of property which were reported on the installment basis by the decedent.

Property Jointly Owned with Spouse - Where the decedent jointly owned property with a spouse, basis of the inherited property will generally include the surviving spouse's share of the adjusted cost basis and the decedent's share at FMV (except for deaths in 2010 when the estate chose the "no tax" option, in which event the decedent's share would be adjusted basis unless the executor chose to increase the basis to FMV as part of the $1.3 million general or $3 million spousal adjustment). However, this might not be true if the property is held as community property. When held as community property, the basis of the entire property is adjusted.

Example – Spousal Joint Tenants: *Ross and Rachel, who are married to each other, own a rental property as joint tenants that they bought for $200,000. Ross contributed $120,000 (60%) to the purchase and Rachel paid $80,000 (40%). When Ross died, the property's FMV at his date of death was $300,000. Prior to Ross' death they had claimed depreciation of $70,000. After his death, Rachel's basis in the rental will be $215,000:*

50% of the original basis ($200,000 x 50%)	*$100,000*
Inherited basis from Ross ($300,000 x 50%)	*150,000*
Less 50% of depreciation of $70,000	*<u>< 35,000></u>*
Rachel's new basis	*$215,000*

Regardless of the amount of each spouse's contribution to the purchase price of the asset, 50% of the FMV of joint tenancy property held by a married couple is included in the gross estate of the first spouse to die.

Example – Community Property *– If Rachel and Ross had owned the rental as community property, Rachel's basis after Ross' death would be $300,000, the fair market value at his DOD. No adjustment is required for prior depreciation claimed.*

<u>Property Jointly Owned with Non-spouse</u> – In the case of unmarried joint tenants, when the first joint tenant dies, the presumption is that the entire value of a joint tenancy asset is included in the decedent's estate. However, if the surviving joint tenant can prove what amount he or she contributed toward purchasing the property, the surviving joint tenant's basis is stepped up by an amount equal to the amount included in the decedent's estate. Add the surviving tenant's original basis to the value of the property that was included in the decedent's estate and subtract any depreciation or depletion allowed to the surviving joint tenant.

Example – Non-Spouse Joint Tenants *– If Ross and Rachel from the prior example had not been married, and the value of the rental included in Ross' estate was $180,000 (60% of the FMV), Rachel's new basis would be $225,000, figured as follows:*

Rachel's original basis (40% of $200,000)	*$ 80,000*
Inherited from Ross (60% of $300,000)	*180,000*
Less 50% of depreciation (50% x $70,000)	*<u>< 35,000></u>*
Rachel's new basis	*$225,000*

EASEMENT BASIS ADJUSTMENT

Consideration received for the granting of an easement constitutes the proceeds from the sale of an interest in real property and should be applied as a reduction of the cost or other basis of the portion of the land subject to the easement. (Rev. Rul. 68-291 clarifying Rev. Rul. 59-121) If it is impossible or impractical to separate the basis of the part of the property on which the easement is granted, the basis of the whole property is reduced by the amount received. Any amount received that is more than the basis to be reduced is a taxable gain. IRS Pub 544, Pg 3.

CAUTION: If the easement is for a specific period of time, then it is generally treated as rental income. (Wineberg, William, (1961) TC Memo 1961-336), but see GCM 35492 (9/73) for a different outcome).

CARRYOVER (SUBSTITUTED) BASIS

Under the carryover basis rules, the BASIS OF THE OLD PROPERTY (with certain adjustments) is used for:

(1) Property acquired in a TAX-DEFERRED" EXCHANGE (Sec 1031).

(2) Vehicles acquired in a TRADE-IN transaction. Basis is the adjusted basis of the trade-in plus unrecognized loss or minus unrecognized gain, plus cash given. This can be complicated when accounting for part personal, part business use. ***Note:*** Effective with exchanges completed after 2017, only exchanges of real property will qualify for Sec 1031 treatment.

(3) Replacement property in an INVOLUNTARY CONVERSION (Sec. 1033).

(4) REPLACEMENT RESIDENCE (Sec. 1034). Code Sec 1034 was repealed, effective for sales and exchanges after 5/6/1997. Prior to repeal, it allowed the seller to postpone gain on the sale of a principal residence if a replacement residence was acquired within a specified time, and the new residence's cost was at least as much as the adjusted sales price of the old residence. The basis in the new residence was reduced by the amount of the postponed gain.

(5) PROPERTY ACQUIRED FROM A DECEDENT DYING IN 2010 (where the estate opts for the "no tax" method) that is not increased to FMV by the $1.3 million general adjustment or the $3 million spousal adjustment.

(6) GIFTS: The previous owner's adjusted basis (plus all or some of the gift tax paid – see #7 next) is generally used for gifts. BASIS FOR GAIN equals the donor's basis. BASIS FOR LOSS equals the smaller of the donor's basis or the FMV at the date of the gift. Notice, though, that the BASIS WILL BE THE FMV AT DATE OF DEATH if the gift was required to be included in the decedent's estate (may not be so for deaths in 2010).

(7) For gifts after 1976, only the gift tax attributable to the appreciation is added to basis. For gifts before 1977, the whole Federal gift tax is added. In either case, adding the gift tax cannot increase the total basis to more than the FMV.

EXAMPLE – Carryover Basis - *Stella received a gift of property from her mother. FMV at the time of the gift was $50,000, but her mother's adjusted basis was $20,000. Gift tax on the property was $9,000. Stella's basis is figured as follows:*

FMV		*$50,000*
Less: adjusted basis		*-20,000*
Appreciation		*30,000*
Gift tax	*9,000*	
Multiply by: ($30,000/$50,000)	*x 60%*	
Gift tax due to appreciation		*5,400*
Adjusted basis		*20,000*
Stella's basis		*$ 25,400*

Where there is carryover of basis, there is generally a carryover of holding period as well.

TRANSFERS BETWEEN SPOUSES

Property retains the same basis in the hands of the recipient that it had in the hands of the couple or other spouse.

MISCELLANEOUS TRANSACTIONS

(1) For property CONVERTED FROM PERSONAL USE to business use (e.g., a personal residence converted to a rental), basis is the LESSER OF COST OR FMV AT THE DATE OF CONVERSION. Generally, this will be cost for real estate (but real estate purchased at the peak of the early- and mid-2000s boom market may be an exception to the general rule, at least until the real estate market fully recovers). Figure the COST of land from the original tax bill, if possible. Add all building improvements to building cost for depreciation.

(2) STOCK basis is original cost or other basis and might be adjusted for items like TAX-FREE DISTRIBUTIONS (this reduces total basis), STOCK DIVIDENDS AND SPLITS (spreads out the current basis over the new number of shares, making no change in the total basis, but the basis per share is reduced), and REINVESTED

(3) DIVIDENDS (if the dividends are taxable, the amount included in income becomes the basis of the new shares; for pre-1986 excluded public utility dividends, basis of the new shares is zero).

(4) ASSESSMENTS FOR LOCAL IMPROVEMENTS (e.g., streets and sidewalks) are usually added to basis rather than deducted as taxes.

ADJUSTED BASIS

When there is a sale of property, it may be necessary to make various adjustments to the basis so that an accurate gain or loss can be determined. Some of the many possible additions and subtractions from basis:

INCREASES TO BASIS:

- Improvements made to the property after purchase
- Legal fees paid to protect property title
- Zoning costs
- Escrow costs
- Recapture of some credits

DECREASES TO BASIS:

- Depreciation, amortization, depletion, etc.
- Section 179 deductions
- Casualties
- Easements
- Energy, investment, and rehabilitation credits

BASIS OVERSTATEMENT AND THE STATUTE OF LIMITATIONS

A six-year, rather than three-year, statute of limitations for assessment of tax applies if a taxpayer omits from gross income an amount in excess of 25% of the gross income amount stated in the return. Controversy existed between the IRS and taxpayers, and various courts, as to whether overstatement of basis could result in a gross income omission that would extend the statute of limitations to six years, for example where gross income was understated as a result of an asset's sale where the basis was overstated. The Supreme Court resolved a split among federal appeals courts by concluding that an overstatement of basis does not result in an omission of income for statute of limitation purposes. *(United States v. Home Concrete & Supply, LLC, SCt, 2012-1 USTC ¶50,315)* **However,** Congress overrode the Supreme Court by providing a provision in the Surface Transportation and Veterans Health Care Choice Improvement Act of 2015 (H.R. 3236) that the 6-year limitation period applies where any overstatement of basis results in a substantial omission (over 25%) of gross income stated in the return. This legislation is effective for returns for which the normal assessment period was open on July 31, 2015 (date of enactment) and for all returns filed after July 31, 2015.

BASIS OF ASSETS INHERITED

Decedent Died in 2010 - Under the Tax Act of 2010, the estate tax was retroactively reinstated for 2010 with an exception for 2010 permitting an election to choose no estate tax and a modified carryover basis for inherited assets. If the no estate tax election was chosen, the basis of the inherited property will be determined by a complicated formula and the basis must be provided by the executor of the estate. Most likely, for estate's valued at less than $5 million, the executor will have opted for the estate tax and step-up/down basis rules rather than the modified carryover basis method. Consult the estate executor if in doubt. See chapter 1.05 for more information related to the modified carryover basis!

Decedent Died in Other than 2010 – Generally, a beneficiary who inherits an asset is allowed to use the asset's fair market value on the date the deceased owner died as his or her tax basis in the asset. This is commonly referred to as the "step-up or step down" basis. (Sometimes an alternate valuation, determined as of the date six months after the date of death, is used – but only if doing so reduces the total value of the estate and estate tax is paid.) Note: Basis adjustment does not apply to items that would have been taxable to the deceased as income such as Traditional IRAs, pensions, installment notes, etc.

Inherited Property Basis Consistency - The Surface Transportation and Veterans Health Care Choice Improvement Act of 2015 imposed a new basis consistency standard – in general, the basis of property received by reason of death under Code Sec. 1014 must equal the value of that property for estate tax purposes. This basis consistency rule only applies to a property whose inclusion in the decedent's estate increases the estate's federal estate tax liability (reduced by credits allowable against such tax). (Code Sec. 1014(f)(2)) It applies whenever the beneficiary reports to the IRS a taxable event with respect to the property and continues to apply until the property is sold, exchanged, or otherwise disposed of in one or more transactions that result in the recognition of gain or loss. (Prop. Reg. §1.1014-10(a)(1)) This provision does not apply to property that is disposed of prior to distribution to beneficiaries or income in respect of a decedent. (Prop. Reg. §1.6035-1(b))

Effective for property with respect to which an estate tax return is filed after July 31, 2015, the basis of any property to which Code Sec. 1014(a) applies (i.e., the rules for determining basis of property acquired from a decedent), can't exceed:

(A) In the case of property, the final value of which has been determined for purposes of the tax imposed by estate tax on the estate of the decedent, such value, and

(B) In the case of property not described in (A), above, and with respect to which a statement has been furnished under new Code Sec. 6035(a) (see basis reporting below) identifying the value of such property. (Code Sec. 1014(f)(1), as amended by Act Sec. 2004(a))

For purposes of Code Sec. 1014(f)(1), the basis of property has been determined for purposes of the estate tax if:

- The value of such property is shown on a return required under Code Sec. 6018 (i.e., an estate tax return filed on Form 706, 706-NA, or 706-A) and that value is not contested by IRS before the expiration of the time for assessing a tax under the estate tax rules;
- In a case not described in (A), above, the value is specified by IRS and that value is not timely contested by the executor of the estate; or
- The value is determined by a court or pursuant to a settlement agreement with IRS.

IRS may by regulations provide exceptions to the application of Code Sec. 1014(f).

Inherited Basis Information Reporting - The information reporting requirement is designed to ensure that the basis consistency standard is met.

Under the Act, effective for property with respect to which an estate tax return is filed after July 31, 2015, the following new information reporting requirements apply to inherited property (Code Sec. 6035(a), as added by Act Sec. 2004(b)(1)):

(1) The executor of any estate required to file a return under Code Sec. 6018(a) must furnish to IRS and to each person acquiring any interest in property included in the decedent's gross estate for Federal estate tax purposes a statement identifying the value of each interest in such property as reported on the estate tax return and such other information with respect to such interest as IRS may prescribe.

(2) Each person required to file a return under Code Sec. 6018(b) (returns by certain beneficiaries) must furnish to IRS and to each other person who holds a legal or beneficial interest in the property to which such return relates a statement identifying the information described in (1), above.

The statements required under (1) and (2), above, must be furnished as prescribed by IRS, but not later than the earlier of the date which is:

- 30 days after the date on which the estate tax return was required to be filed (including extensions, if any), or
- 30 days after the date the estate tax return is actually filed. (Code Sec. 6035(a)(3)(A))

Form 8971 - In proposed regulations, the IRS has designated Form 8971, Information Regarding Beneficiaries Acquiring Property From a Decedent, and its Schedule A, as the statement an executor is to use to satisfy the reporting requirements. Form 8971 is a separate filing requirement from the estate's Form 706, 706-NA, or 706-A, and should not be attached to the respective estate tax return. Where there is an adjustment to the information required to be included on the 8971 and/or Schedule A after it has been filed, a supplemental 8971 and Schedule A must be filed not later than the date which is 30 days after the adjustment is made (Code Sec. 6035(a)(3)(B)).

Schedule A of Form 8971 - All property acquired (or expected to be acquired) by a beneficiary must be listed on that beneficiary's Schedule A. If the executor has not determined which beneficiary is to receive an item of property as of the due date of the Form 8971 and Schedule(s) A, the executor must list all items of property that could be used, in whole or in part, to fund the beneficiary's distribution on that beneficiary's Schedule A. (This means that the same property may be reflected on more than one Schedule A.) A supplemental Form 8971 and corresponding Schedule(s) A should be filed once the distribution to each such beneficiary has been made.

Other issues associated with filing the Schedule A*:*

- Generally, any property that qualifies for a marital deduction or a charitable deduction will not generate estate tax, and "No" should be indicated in Column C of the Schedule A.
- A form or schedule filed with IRS without entries in each field will not be processed. A form with an answer of "unknown" will not be considered a complete return.

- The executor is to provide each beneficiary only with their own Schedule A, not those of other beneficiaries.
- Beneficiaries could conceivably receive revised Schedule As years after their original returns were filed if the IRS examines the estate tax return, does not agree with the FMV claimed on that return and the executor chooses to litigate the issue.

Since the executor of the estate must certify that copies have been provided to all beneficiaries it would be prudent for the executor to retain a proof of mailing, proof of delivery, acknowledgment of receipt, or other information relevant for the estate's records.

Failure to File Penalty - Failing to follow the information reporting requirements is subject to the failure-to-file penalty of $270 for returns required to be filed in 2020 or 2019, ($260 for years 2015-2018), per return (Code Sec. 6721(a)). The 8971 and the Schedule A are considered a single filing for purposes of the penalty.

Inconsistency Penalty - Beneficiaries who report basis in property that is inconsistent with the amount on the Schedule A may be liable for a 20% accuracy-related penalty under Code Sec 6662. However, adjustments to the basis of property post-death, such as capital improvements, will not cause a beneficiary to be subject to the accuracy-related penalty if the basis of property claimed on a return exceeds its final value as determined under Code Sec. 1014(f). (Prop. Reg. §1.1014-10(a)(2))

8971 Not Required if 706 Filed Just to Make Portability Election

Prop. Reg. 1.6035-1(a)(2) states that the Form 8971 filing requirement does not apply to estate tax returns filed solely for the purposes of making a portability election (or a generation-skipping transfer tax election or exemption allocation). When the proposed regs are published as final in the Federal Register, they will apply to property acquired from a decedent or by reason of the death of a decedent whose required estate tax return is filed after July 31, 2015. These rules may be relied on before the date of publication of the Treasury Decision adopting these rules as final in the Federal Register.

CALIFORNIA DIFFERENCES

California is a community property state and the method of establishing basis will depend in part upon how title was held at the time of the decedent's death.

Current law generally allows a married couple the following options to hold title:

- **Joint Tenancy** - The benefits of this status include a guarantee that the surviving spouse will inherit the property with little or no transfer cost. The survivor is also assured of inheriting the decedent's share, since a secret will cannot divest a joint tenancy interest. The survivor receives a step-up or step-down in basis of only 50 percent of the FMV at the time of the decedent's death. The remaining 50 percent retains the survivor's original (adjusted) basis.
- **Community Property** - This form of title provides a 100 percent step-up or step-down of the property's basis. In other words, both the decedent's and the survivor's halves get a new basis of the FMV upon the death of the first spouse. Unlike joint tenancy, each spouse can will his or her share of the community property to anyone at all. However, changing title when the first spouse dies requires a "spousal property petition" action that can require the survivor to incur legal expenses to remove the deceased spouse's name. This process can also take six to eight weeks.
- **General Presumption of Community Property** – There is a general presumption that all real property in California and all personal property wherever situated, that is acquired by a spouse during marriage, is community property (Family Code Sec 760). The presumption may be overcome (rebutted) by certain types of evidence to prove that the property is actually separate. Some property acquired during marriage is specifically excluded from the community property presumption (Family Code Sec. 802 and 803). The general community property assumption specifically applies to:
  - All real property (including leased) that is located in California and acquired during marriage by a spouse while domiciled in California (Family Code Sec 760).
  - All personal property, wherever located that is acquired during marriage by a person while domiciled in California (Family Code Sec 760).
  - All community property transferred by husband and wife to a trust pursuant to Family Code Sec 761.

- **Community Property with Right of Survivorship** Beginning July 1, 2001, a married couple may hold title as "Community Property with Right of Survivorship". Doing so will: Allow the double step-up or -down in basis; require that the surviving spouse inherit the property; and allow property to pass to the surviving spouse without court action.

Inherited Basis of Property of Decedent's Dying in 2010 – California does not conform to the federal inherited basis rules for 2010, so for California purposes, the inherited basis of assets of a decedent dying in 2010 is fair market value on the date of death (R&TC 18031, 18035.6). This is true even if, for federal purposes, the no estate election was made and the federal basis was determined by modified carryover basis.

INSTALLMENT AGREEMENTS

Overview

- **Simplified Method –** Pay full amount in 120 days – Arrange at 800-829-1040
- **Streamlined Approval Process**
  - Amount owed does not exceed $50,000 and Taxpayer will pay it off within 72 months
- **Terms**
  - Make all payments on time and in full
  - All required tax returns must have been filed
  - File all future tax returns on time
  - Have enough withholding or estimated tax payments so no tax is due with timely filed future returns
  - User Fee: Ranges from $31 to $225 depending on application and payment methods – see pg. 11.08.02
- **Guaranteed Installment Agreement**
  - Does not owe more than $10,000
  - During the prior five years
    - Filed and paid tax timely
    - Did not enter into an installment agreement
  - Cannot pay the tax in full when due
  - Agree to pay balance in three years
- **Interest** - Current rate compounded daily
- **Penalties** – Late payment reduced to 0.25% per month

RAPID FINDER

Pubs Forms

Related IRC and IRS Publications and Forms

- **Form 9465** – Installment Agreement (liability up to $50,000)
- **Form 433-A** – Collection Information Statement for Wage Earners and Self-Employed
- **Form 433-F** – Collection Information Statement
- **Form 2159** – Payroll Deduction Agreement
- **Form 13844** - Application for Reduced User Fee for Installment Agreements.
- **IRC Sec 6159**

The Details

Certain taxpayers who cannot pay the full tax due may qualify for an installment plan that permits monthly payments. A streamlined approval process is available if:

- **The amount due does not exceed $50,000*, and**
- **The taxpayer will pay it within a six-year (72 months) period.**

** Amounts over $50,000 do not qualify for the streamlined process. However, installment agreements can still be requested for amounts over $50,000 provided a Form 433-A or Form 433-F Collection statement is completed and submitted with the request.*

Individuals are eligible for the streamline process regardless of the type of tax owing. There are additional limits for businesses: (1) defunct businesses (other than sole proprietorships, which fall into the "individual" category) are limited to tax owed of no more than $25,000 (any type of tax) and (2) operating businesses (Form 1120) are limited to income tax liabilities of up to $25,000. A separate program is available for small businesses owing trust fund taxes – see details below.

TERMS

By requesting an installment agreement, a taxpayer agrees to:

- Make sure installment payments are made in full and on time.
- File all future tax returns on time.
- Have enough withholding or estimated tax payments so no tax is due with timely filed future returns.

Taxpayers with liability over $25,000 and up to $50,000 must enroll in a Direct Debit Installment Agreement.

USER FEE

Effective January 1, 2017, when setting up an installment agreement there is a $31 to $225 fee, with the amount dependent on the method used to apply for the installment plan and whether the taxpayer makes the payments by direct debit from a bank or other financial institution checking account (see table below). The fee is not to be included with the installment agreement request. The IRS will bill the taxpayer for the fee with the first payment. The IRS will generally respond within 30 days.

A taxpayer may be qualified for a fee at the low end of the range if their income is below a certain level, as shown in the accompanying table. If a taxpayer receives an installment agreement acceptance notice from the IRS but not a reduced user fee, even though they believe they should qualify for one, request a reduced fee by completing Form 13844. The qualifications depend upon family size and whether they reside in the continental US, Hawaii or Alaska.

Reduced Fee Income Table (Form 13844 rev. 7-2018*)

Family Size	Cont US	Alaska	Hawaii
One	$30,150	$37,650	$34,650
Each Additional Person	(1)	(2)	(3)

(1) Add $10,450 each for persons 2-7; $10,480 for person 8; $10,450 each for any additional
(2) Add $13,075 each for any additional persons
(3) Add $12,025 each for any additional persons
* Based on 2017 US Dept of Health & Human Services Poverty Guidelines, Federal Register, Document Citation 82 FR 8831, January 26, 2017, pp. 8831-8832. Also note that the reduced fee is supposed to be based upon 250% of poverty level, but the form, at date of publication has not been updated for the 2019 poverty rates. See user fee waivers and reimbursements below.

USER FEES EFFECTIVE JAN 1, 2017

Type of Agreement	User Fee
Regular installment agreement paid by check, money order, or credit card	$225
Regular direct debit installment agreement	$107
Online payment agreement	$149
Direct debit online payment agreement	$31
Restructured or reinstated installment agreement	$89
Low-income rate - AGI 250% or below of poverty rate	$43
Low-income rate – direct debit	$31

User Fee Waivers and Reimbursements – For installment agreements entered into **on or after April 10, 2018** by taxpayers whose AGI for the most recent year for which such information is available is at or below 250% of the federal poverty rate (low-income taxpayers), the IRS will waive the user fee if the low-income taxpayer agrees to make electronic payments through a debit instrument by entering into a direct debit installment agreement. For a low-income taxpayer who is unable to make electronic payments through a debit instrument by entering into a direct debit installment agreement, the IRS will reimburse the user fee that the taxpayer paid for the installment agreement upon completion of the installment agreement. (Form 9465 instructions, rev. Dec. 2018)

GUARANTEED INSTALLMENT AGREEMENT - A taxpayer's request for an installment agreement cannot be turned down if the tax they owe is not more than $10,000 and **all three** of the following apply.

1. During the past 5 tax years, the taxpayer (and spouse if making a request for a joint tax return) have timely filed all income tax returns and paid any income tax due and did not enter into an installment agreement for payment of income tax.
2. The IRS determines that the taxpayer cannot pay the tax owed in full when it is due, and the taxpayer provides the IRS any information needed to make that determination.
3. The taxpayer(s) agree to pay the full amount they owe within 3 years and to comply with the tax laws while the agreement is in effect.

SIMPLIFIED ARRANGEMENT FOR FULL PAYMENT – A taxpayer who may not have the funds to pay their tax liability when it is due, but who can pay the full amount owed within 120 days, may call the IRS at 1-800-829-1040, or apply online, to establish their request to pay in full. This avoids paying the fee to set up an installment payment plan. Interest and late payment penalties continue to apply until the entire balance is paid.

PAYMENTS BY PAYROLL DEDUCTION – A taxpayer who wishes to make the installment agreement payments by payroll deduction may indicate that on the completed Form 9465 but must also complete and attach a signed Form 2159, Payroll Deduction Agreement. The employer must also complete their portion of the 2159. The user fee for this payment method is $225 (but could be $43 if qualified for the reduced fee on Form 13844), and the taxpayer cannot file Form 9465 electronically.

IN-BUSINESS TRUST FUND EXPRESS INSTALLMENT AGREEMENTS

Small businesses that currently have employees can qualify for an In-Business Trust Fund Express Installment Agreement (IBTF-Express IA). These installment agreements generally do not require a financial statement or financial verification as part of the application process.

To qualify for an IBTF-Express IA:

- The taxpayer can owe no more than $25,000 at the time the agreement is established. If more than $25,000 is owed, the taxpayer may pay down the liability before entering into the agreement in order to qualify.
- The debt must be fully paid within 24-months or prior to the Collection Statute Expiration Date, whichever is earlier.
- The taxpayer must enroll in a Direct Debit installment agreement if the amount owed is between $10,000 and $25,000.
- The taxpayer must be compliant with all filing and payment requirements.

To Request an IBTF-Express IA call the phone number on the bill received from IRS or complete IRS Form 9465, Installment Agreement Request and send it to the address on the bill, or if the taxpayer does not have a bill, to the address in the 9465 instructions.

INTEREST

Taxpayers will also be charged interest at the current rate, compounded daily.

PENALTIES

The late payment penalty, usually 0.5% of the balance due per month, is reduced to 0.25% when the IRS approves the agreement for an individual taxpayer who timely filed the return and did not receive a levy notice.

PROCESS

- ***Automatic bank withdrawal*** – The bank statement becomes the record of payment. The IRS will provide a statement at the beginning of each year with the amount the taxpayer owes at the beginning of the year, all payments made during the year, and the amount at the end of the year.
- ***Manual payments*** – After each payment, the IRS will send the taxpayer a letter showing the remaining amount owed and the due date and amount of the next payment.

REFUNDS FROM FUTURE YEARS

Any refund due the taxpayer in a future year will be applied against the amount the taxpayer owes.

AGREEMENT DEFAULT

In making the agreement, a taxpayer agrees to keep all future years current. If the taxpayer does not make payments on time **OR** has an outstanding past due amount in a future year, they will be in default of their agreement and the IRS has the option of taking enforcement actions to collect the entire amount owed.

IMPACT ON THE 10-YEAR STATUTE FOR COLLECTIONS

Code Sec 6502 puts a 10-year limit on how long the IRS can pursue the collection of a tax debt. When an installment agreement is in effect and not in dispute, the statute of limitation is not tolled and continues to run.

WHERE TO FILE THE REQUEST

- ***1040 Just Being Filed*** - Attach Form 9465 to the front of the return to be filed.
- ***Already Filed*** - File Form 9465 by itself with the Internal Revenue Service Center where the taxpayer's 1040 is filed.

CALIFORNIA DIFFERENCES

California also provides installment agreements. The agreement terms are generally the same as the Federal with the following differences:

- CA only accepts electronic transfer payments (minimum $25 – no manual payments allowed).
- CA requestors use Form 3567, filed separately from the tax return, or apply online for balances of $25,000 or less that will be paid in full in 60 months. The payment period for a business is usually 12 months.
- There is no specified payment formula (except for online requests) - proposed payment amounts and duration are at the discretion of the FTB.
- If the tax liability owed exceeds $10,000, **or** the installment agreement period for payment exceeds 36 months, **or** both, then the taxpayer must certify that he or she has a financial hardship. (In cases of financial hardship, installment agreements are subject to periodic review.)
- Employees must confirm that the withholding rates for Forms DE-4 and W-4 on file with their employer is correct, or if incorrect, take steps to change the forms.
- The taxpayer cannot be subject to a current wage garnishment.
- There is a $34 charge for setting up an installment agreement for an individual, $50 for a business.
- Changes in installment amount can be requested by calling (800) 689-4776.
- A business that needs to request an installment payment plan should call the FTB at (888) 635-0494 to make arrangements.

Form FTB 3561C – The FTB developed FTB 3561C, Financial Statement (rev. 2-2018), to be used when required to provide current financial information necessary to help the FTB to determine how a taxpayer can satisfy an outstanding tax liability. If the taxpayer submitted an IRS Form 433-A or 433-F, dated within the previous 12 months, to the IRS, that form may be used in lieu of the FTB 3561.

Generally, a taxpayer will be required to complete a Financial Statement under the following circumstances (FTB Tax News, May 2018):

1. When the total balance is greater than $25,000; or
2. An Installment Agreement will not pay in full within 60 months; or
3. Taxpayer claims they do not have the ability to pay (financial hardship); or
4. To return/release of assets seized by Warrant; or
5. The taxpayer has a demonstrated history of non-compliance.

NOTES

PATIENT PROTECTION AND AFFORDABLE CARE ACT (ACA)

(An Overview)

Signed into law in March 2010, various pieces of legislation, often collectively referred to as Obamacare or the ACA, created fundamental reforms to the health care system of the United States. The success of the Health care plan is predicated on having everyone insured by one means or the other. Thus, the overall plan includes a variety of provisions, most of which are phased in over time and many that affect taxpayers' income tax returns. In addition, there have been modifications to the plan since its inception.

PROVISIONS

2009

- Med Student Loan COD Income Forgiveness
- Investment Credit For Therapeutic Discovery

2010

- Small Employer HC Credit
- Child Age 26 Excludable HC Benefits
- Child Age 26 SE Health Insurance
- Refundable Adoption Credit
- Tanning Services 10% Tax

2011

- Non-Qualifying Distribution Penalty Archer & MSA - 20%
- No Over-the-Counter Med Reimbursement from HRA, FSA, HSA and MSA Plans
- Simple Cafeteria Plans < 100 employees

2012

- Employer Provided HC Benefits Reported on W-2

2013

- Increased HI Tax (0.9% on earned income > than $200K ($250 MFJ) threshold.
- 3.8% surtax on Net Investment Income High Income Taxpayers AGI>$200K ($250 for MFJ)
- FSA Maximum Annual Medical Expense Limited to $2,700 (2019)
- Medical Itemized Deduction Threshold Raised to 10%*
- $2 per life Patient-Centered Outcomes Research Fee on Self-Insured Health Plans

2019

- Penalty for not being insured repealed

20202

- Excise Tax on High Cost Employer Plans

*Reduced to 7.5% for 2017, 2018

2014

- Premium Assistance Credit
- Individual Penalty for Not Being Insured
- Employee Notices Re: Insurance Exchanges Options

2015

- Large Employer (100 employees) HC Mandate Excise Tax
- Employer and Insurer Reporting Requirement

2016

- Midsize Employer (50-99 employees) HC Mandate Excise Tax

2017

- Small Employer HRA Less Than 50 EFT Employees. Avoids the Sec 4980D $100/day Penalty.

Related IRS Publications and Forms

- **Pub 5093** – Health Care Law On-Line Resources
- **Pub 5187** – Affordable Care Act: What You and Your Family Need to Know
- **IRS web site** – IRS.gov/aca

The various provisions are highlighted below and where appropriate covered in more detail, as noted, in separate sections (chapters) following this chapter.

2009

STUDENT LOAN FORGIVENESS FOR HEALTH PROFESSIONALS

The law was amended to include amounts received by an individual in tax years beginning after Dec. 31, 2008; the gross income exclusion for amounts received under the National Health Service Corps loan repayment program or certain State loan repayment programs is modified to include any amount received by an individual under any State loan repayment or loan forgiveness program that is intended to provide for the increased availability of health care services in underserved or health professional shortage areas as determined by the State. (Code Sec. 108(f)(4))

The Tax Cuts and Jobs Act (TCJA) of 2017 includes a provision that the discharge of an eligible student loan in 2018 through 2025 because of the student's death or total and permanent disability does not result in discharge of debt income. (Code Sec. 108(f)(5)(A))

2010

TANNING SERVICES EXCISE TAX

For indoor tanning services performed **on or after July 1, 2010**, a 10% excise tax is imposed on the amount paid for any indoor tanning service, whether paid for by insurance or otherwise. The tax is imposed on tanning service recipients, although the service provider is liable for the collection and payment of the tax; thus service providers are liable if they fail to collect the tax. (Code Sec. 5000B(a), as added by Health Care Act Sec. 10907(b)) Form 720 (IRS #140 in Part II) is used to compute the tax.

EXCLUDABLE MEDICAL REIMBURSEMENTS FOR OLDER CHILDREN

Effective **on Mar. 30, 2010**, the general exclusion for reimbursements for medical care expenses under an employer-provided accident or health plan is extended to any child of an employee who hasn't attained age 27 as of the end of the tax year (Code Sec. 105(b)). This change is also intended to apply to the exclusion for employer-provided coverage under an accident or health plan for injuries or sickness for such a child including health savings accounts (HSA), health flexible spending arrangements (FSA) and voluntary employees' beneficiary associations (VEBAs).

This change also applies to Sec 401(h) benefits for sickness, accident, hospitalization, and medical expenses of retired employees, their spouses and their dependents.

SELF-EMPLOYED HEALTH INSURANCE DEDUCTION

Effective **on March 30, 2010**, the older children provision of the health care reform law also applies to a self-employed individual's child under the age of 27 as of the end of the year. No other requirements apply so long as they meet the definition of a child and have not reached age 27 by the last day of the year. Even a married child is included by this definition! The child is not required to be a dependent.

TAX CREDITS FOR SMALL EMPLOYERS OFFERING HEALTH COVERAGE

A 35% (25% for non-profit organizations) credit was available for eligible small employers that provide nonelective health insurance to their employees and employ 25 or fewer equivalent full-time employees with average annual full-time wages of $50,000 or less. The credit increases to 50% (35% for non-profits) as of 2014, but the number of years the credit is available is limited to two. See chapter (section) 12.08 for further details.

2011

INCREASED TAX ON NONQUALIFYING HSA OR ARCHER MSA DISTRIBUTIONS

The additional tax for HSA withdrawals for other than qualified medical expenses before age 65 is increased from 10% to 20% (Code Sec. 223(f)(4)(A)), and the additional tax for Archer MSA withdrawals for other than qualified medical expenses is increased from 15% to 20% (Code Sec. 220(f)(4)(A)). Distributions after age 65 are not subject to the penalty.

OVER-THE-COUNTER MEDICATION RESTRICTION FOR EMPLOYER PLANS

Beginning in 2011, over-the-counter medications, except for doctor prescribed over-the-counter medication and insulin will no longer qualify for reimbursement. This restriction applies to health reimbursement accounts (HRAs), health flexible spending accounts (FSAs), health savings accounts (HSAs), and Archer medical savings accounts (MSAs).

SMALL EMPLOYER SIMPLE CAFETERIA PLANS

For years beginning after Dec. 31, 2010, small employers (average of 100 or fewer employees on business days during either of the two preceding years) may provide employees with a "simple cafeteria plan." (Code Sec. 125(j)) See chapter (section) 12.07 for details.

2012

EMPLOYER W-2 REPORTING RESPONSIBILITIES

Certain employers are required to disclose the aggregate cost of the benefit provided by them for employer-sponsored health insurance coverage on the employee's annual Form W-2. This amount is reported in Box 12 using code DD.

2013

ADDITIONAL HOSPITAL INSURANCE TAX – HIGH-INCOME TAXPAYERS

The Hospital Insurance (HI) tax rate (currently at 1.45%) is increased by 0.9 percentage points on individual taxpayer earnings (wages and self-employment income) in excess of compensation thresholds for the taxpayer's filing status. (Code Sec. 3101(b)(2)) See chapter (section) 12.06 for details.

NET INVESTMENT INCOME TAX (IRC Sec. 1411)

A new surtax called the Net Investment Income Tax is imposed on individuals, estates, and trusts. For individuals, the surtax is 3.8% of the lesser of (1) the taxpayer's net investment income or (2) the excess of modified adjusted gross income over a threshold amount ($250,000 for a joint return or surviving spouse, $125,000 for a married individual filing a separate return, and $200,000 for all others). Threshold amounts are not inflation-adjusted. See chapter (section) 12.05 for further details.

EMPLOYER HEALTH FLEX-SPENDING PLAN CONTRIBUTIONS LIMITED

In order for a health FSA to be a qualified benefit under a cafeteria plan, the maximum amount available for reimbursement of incurred medical expenses of an employee, the employee's dependents, and any other eligible beneficiaries with respect to the employee, under the health FSA for a plan year (or other 12-month coverage period) cannot exceed $2,500 (adjusted for inflation: $2,550 for 2015 and 2016, $2,600 for 2017, $2,650 for 2018 and $2,700 for 2019). (Code Sec. 125(i)) An employer has the decision to establish a cap less than $2,500 for employer's plan.

The limitation is on an employee-by-employee basis. That is, $2,700 is the maximum amount that an employee may contribute in 2019, regardless of the number of individuals (e.g., spouse or dependents) whose medical expenses may be reimbursed under the plan. However, if two people are married, and each has the opportunity to participate in a health FSA, whether through the same employer or through different employers, each may contribute up to the annual limit.

IRS Relaxes Use it or Lose it Rules - This modification permits § 125 cafeteria plans to be amended to allow up to $500 of unused amounts remaining at the end of a plan year in a health FSA to be paid or reimbursed to plan participants for qualified medical expenses incurred during the following plan year, provided that the plan does not also incorporate the grace period rule. (Notice 2013-71)

MEDICAL ITEMIZED DEDUCTIONS LIMITED

The itemized deduction for medical expenses is limited in the following manner (Code Sec. 213):

- *AGI Threshold* – The AGI threshold percentage for claiming medical expenses on a taxpayer's Schedule A is currently 10%, which is the same as the threshold percentage for alternative minimum tax (AMT) purposes. See accompanying table for the percentages for other years.

Year	Pre-2013	2013-16	2017-18	Post-2018
Under age 65	7.5%	10%	7.5%	10%
Either Spouse 65 or over	7.5%	7.5%	7.5%	10%
AMT Threshold	10%	10%	7.5%	10%

FEE ON SELF-INSURED HEALTH PLANS - PATIENT-CENTERED OUTCOMES RESEARCH FEE (PCORI)

Section 4376 imposes a fee (see below) multiplied by the average number of lives covered under the plan. The fee amount will be adjusted for inflation for policy and plan years beginning after September 30, 2015. The amount used to calculate the fee imposed for policy years and plan years that end on or after October 1, 2018 and before October 1, 2019 is $2.45, up from $2.39 for the 2017-2018 period. The fee is paid using Form 720, Quarterly Federal Excise Tax Return, which is due on July 31 of the year following the last day of the policy year or plan year. Payment is due at the time Form 720 is due. The PCORI fee is imposed on an issuer of a specified health insurance policy and a plan sponsor of an applicable self-insured health plan. Fees are based on the average number of lives covered under the policy or plan. Generally, plan sponsors of applicable self-insured health plans must use one of the following three alternative methods to determine the average number of lives covered under a plan for the plan year.

1. Actual count method.
2. Snapshot method.
3. Form 5500 method.

This excise tax (fee) is due for policy years or plan years ending after Sept. 30, 2012, and before Oct.1, 2019. **Thus, these fees don't apply to policy years ending after September 30, 2019.**

EMPLOYEE NOTICES

Beginning January 1, 2014 (October 1, 2013 for existing employees), certain employers must provide written notice to employees about health insurance coverage options available through the Marketplace (insurance exchanges).

- **Notices must be provided by employers** to whom the Fair Labor Standards Act applies. Generally, means an employer that employs one or more employees who are engaged in, or produce goods for, interstate commerce. For most firms, this rule doesn't apply if they have less than $500,000 in annual dollar volume of business.
- Employers must provide a notice **to each employee**, regardless of plan enrollment status (if applicable), or of part-time or full-time status. Employers do not have to provide a separate notice to dependents or other individuals who are, or may become, eligible for coverage under any available plan, but who are not employees.
- The notice must be provided in writing in a manner calculated to be understood by the average employee. The notice must include information regarding the existence of a new Marketplace, inform the employee that the employee may be eligible for a premium tax credit if the employee purchases a qualified health plan (QHP) through the Marketplace, and (2) include a statement informing the employee that if the employee purchases a QHP, the employee may lose the employer contribution (if any) to any health benefits plan offered by the employer, and that all or a portion of such contribution may be excludable from income for federal income tax purposes. Model language notices are available on the Department of labor's EBSA's website at https://www.dol.gov/agencies/ebsa/employers-and-advisers/plan-administration-and-compliance/health-plans (under "Plan Administration and Compliance" click on "health plans" and then expand the "model notices & disclosures" section to find one model for employers who do not offer a health plan, and another model for employers who offer a health plan to some or all employees).
- *Timing and delivery of notice.* Employers must provide the notice to each new employee at the time of hiring.

2014

AMERICAN HEALTH BENEFIT EXCHANGES (MARKETPLACES)

By 2014, each state was required to establish an exchange (also termed a Marketplace) to help individuals and small employers obtain coverage. Residents of a state that chose not to set up its own Marketplace used the Marketplace set up by the Federal government. Benefit options for policies offered through the Marketplace are in a standard format and a single enrollment form is used for all policies. Plans offered through an exchange must provide minimum essential health benefits, limit cost sharing (i.e., the amount that the insured pays for medical care), and provide specified accrual benefits (i.e., the percentage amount paid by the insurer). Out-of-pocket deductibles are limited to the same amounts as the caps for Health Savings Accounts and further limited in the small group market.

SHARED RESPONSIBILITY PAYMENT (Penalty For an Individual Not Being Insured) (Code Sec 5000A)

Nonexempt U.S. Citizens and legal resident taxpayers will be penalized for failing to maintain at the least the minimum essential health coverage. The penalty phased in beginning in 2014 and was fully implemented in 2016.

The Tax Cuts and Jobs Act of 2017 effectively repealed this penalty as of 2019 by setting the penalty percentage and fixed dollar amount penalty at 0% and $0, respectively. See Chapter (section) 12.03 for full details.

CALIFORNIA DIFFERENCES

NOTE: California has decided to pick up where the Feds left off with one intervening year. So, for 2019 neither CA nor the Federal return will include a penalty. But beginning in 2020 CA will begin imposing an individual mandate on Californians generally following the former Federal Guidelines. See Chapter 12.03 for details.

PREMIUM ASSISTANCE CREDIT (Code Sec. 36B)

Tax credits are available for lower-income individuals who purchase health insurance coverage with a qualified health plan (QHP) through an exchange (Marketplace). Generally, these are individuals whose household income is at least 100%, but not more than 400% of the federal poverty line and who don't receive health insurance under an employer plan, Medicaid, Medicare, or other acceptable coverage. See chapter (section) 12.02 for full details.

CALIFORNIA DIFFERENCES

SB 78, signed by the governor 6/27/2019, created a California Individual Market Assistance program that is authorized to provide health care coverage financial assistance, including advanced premium assistance subsidies, to California residents with household incomes below 600% of the federal poverty level. The program will run from 2020 through 2022, after which it is repealed and no new financial assistance or other subsidies are to be provided. See chapter 12.02 for details.

2015

LARGE EMPLOYER HEALTH COVERAGE EXCISE TAX

Large employers, generally those with 50 or more full-time employees in the prior calendar year, that:

- Do not offer coverage for all its full-time employees,
- Offer minimum essential coverage that is unaffordable (employee contribution is more than 9.5% (subject to inflation adjustment) of the employee's household income), or
- Offer minimum essential coverage where the plan's share of the total allowed cost of benefits is less than 60%, will be required to pay a penalty if any of its full-time employees were certified to the employer as having purchased health insurance through an individual Marketplace and qualified for either tax credits or a cost-sharing subsidy discussed previously. (Code Sec. 4980H(a))

Eligible employers with between 50 and 99 full-time employees were not subject to shared responsibility payment assessments for 2015. See eligibility requirements in the “2016” section below.

Final regulations provide a "phase-in" rule for applicable large employers (ALE) under which an employer won't owe a penalty for failing to offer health coverage so long as it offers coverage to at least 70% of its full-time employees in 2015, and 95% for 2016 and later years. See chapter (section) 12.09 for full details.

INSURER & EMPLOYER REPORTING

The Affordable Care Act (ACA) provides for mandatory employer and insurer reporting requirements. Under Sec. 6055(a) health insurers are required to file information returns reporting each individual for whom minimum essential coverage is provided. In addition, each employer is also required to provide information related to each employee covered under the employer’s plan and details about the employer’s plan that will allow the government to determine whether the employer offers minimum essential care or not and whether they are subject to large employer excise penalties for not providing minimum essential coverage.

The return must include, among other things:

- Certification that the employer offers its full-time employees and their dependents the opportunity to enroll in minimum essential coverage under an eligible employer-sponsored plan.
- The number of full-time employees of the employer for each month during the calendar year;
- The name, address, and taxpayer identification number of each full-time employee employed by the employer during the calendar year and the number of months, if any, during which the employee (and any dependents) was covered under a plan sponsored by the employer during the calendar year.

This reporting requirement was initially scheduled for 2014. However, it was delayed by the administration to give Treasury time to develop ways to simplify the new reporting requirements consistent with the law, and provide time to adapt health coverage and reporting systems. The first required filing was in 2016 covering 2015 information. IRS developed Forms 1095-B (Health Coverage) and 1095-C (Employer-Provided Health Insurance Offer and Coverage) to meet the reporting requirements.

2016

MID-SIZED EMPLOYER HEALTH COVERAGE EXCISE TAX

A mid-sized employer, generally with 50 to 99 full-time employees in the prior calendar year, that:

- Does not offer coverage for all its full-time employees,
- Offers minimum essential coverage that is unaffordable (employee contribution is more than 9.5% (subject to inflation adjustment) of the employee's household income), or
- Offers minimum essential coverage where the plan's share of the total allowed cost of benefits is less than 60%,

will be required to pay a penalty if any of its full-time employees were certified to the employer as having purchased health insurance through a government health exchange (marketplace) and qualified for either tax credits or a cost-sharing subsidy discussed previously. (Code Sec. 4980H(a)) Implementation of the tax was delayed until 2016 provided the mid-sized employer met certain requirements, summarized next.

No penalty applied for a mid-sized employer for any month during 2015, or for any month in 2016 where a non-calendar year plan began in 2015 for the months of the plan occurring in 2016, if the employer met the following conditions:

(a) The employer must employ on average at least 50 full-time employees (including full time equivalents (FTEs)), but fewer than 100 full-time employees (including FTEs) on business days during 2014.

(b) From February 9, 2014, through December 31, 2014, the employer had not reduced the size of its workforce or the overall hours of service of its employees in order to satisfy the workforce size condition set forth at (a) above.

(c) The employer did not eliminate or materially reduce the health coverage, if any, it offered as of February 9, 2014. There are exceptions to this rule.

(d) The employer certifies on a prescribed form that it meets the eligibility requirements set forth in paragraphs (a) through (c) above. **Without this certification, starting Jan. 1, 2015, the employer mandate will be imposed on businesses with 50 full-time employees in 2014.**

See chapter 12.09 - Large Employer Health Coverage Excise Tax.

2017

The "21st Century Cures Act" (H.R. 34), passed in late 2016, includes a provision allowing small employers to reimburse their employees under a health reimbursement arrangement (HRA) for medical expenses without being liable for a $100 per day draconian penalty (IRC Sec 4980D) for violating the Affordable Care Act (ACA)'s rules. See chapter 12.10 – Small Employer HRA

2019

The Tax Cuts and Jobs Act effectively repealed the individual shared responsibility payment (penalty for not being insured) by setting the penalty percentage and fixed dollar amount penalty at 0% and $0, respectively for years after 2018. See Chapter (section) 12.03 for full details.

2022

EXCISE TAX ON HIGH-COST EMPLOYER-SPONSORED HEALTH COVERAGE

Originally, beginning in tax year 2018, a 40% nondeductible excise tax on insurance companies and plan administrators was supposed to apply for any health coverage plan where the premiums exceed the amounts shown in the list that follows. However, the effective date was delayed to years after 2021 and the law was amended to permit employers to deduct the tax they pay. (Consolidated Appropriations Act, 2016, signed into law December 18, 2015)

Single Coverage:	$10,200
Single Coverage, high-risk employment or retired age 55 and older:	$11,850
Family coverage:	$27,500
Family coverage high-risk employment or retired age 55 and older:	$30,950

***Note:** these amounts will subsequently be adjusted for inflation when implemented in 2022.*

The tax will apply to self-insured plans and plans sold in the group market, but not to plans sold in the individual market (except for coverage eligible for the deduction for self-employed individuals). Stand-alone dental and vision plans would be disregarded in applying the tax. The dollar amount thresholds may be later adjusted for inflation.

There is considerable bipartisan support in Congress to repeal this tax before a penny of it is collected. In fact the House has overwhelmingly passed a bill to repeal it, and there's a chance the Senate will take it up in the fall of 2019.

CALIFORNIA DIFFERENCES

California developed its own marketplace, called "Covered California". Covered California announced in mid-July 2019 that the 2020 statewide weighted average change in premiums will be up by only 0.8%, down from 2019's increase of 8.7%. This is the lowest premium increase since 2014. Some parts of the state will see lower rates or no increase, and Californians who shop on the marketplace and switch to the lowest-cost plan in the same metal tier could lower their premiums. The average rate changes and potential savings by shopping and switching do not reflect the additional savings available from the new state subsidies that begin in 2020 (see Chapter 12.02). Covered California estimates 922,000 consumers will be eligible to receive the new subsidies. Covered California's 2020 Rate Booklet is available at: https://www.coveredca.com/pdfs/CoveredCA_2020_Plans_and_Rates.pdf

The open enrollment period for 2019 was October 15, 2018 and through January 15, 2019. (https://www.healthforcalifornia.com/covered-california-enrollment/open-enrollment). The open enrollment period for 2020 is not posted on the Covered California web site as of the date this chapter was updated.

https://www.coveredca.com/newsroom/news-releases/2019/07/19/covered-california-releases-regional-data-behind-record-low-0-8-percent-rate-change-for-the-individual-market-in-2020/

NOTES

PREMIUM TAX CREDIT

(Code Sec. 36B)

Overview

The 2010 Patient Protection and Affordable Care Act ("ACA") creates a refundable premium tax credit for eligible individuals and families to subsidize the purchase of health insurance through a government Marketplace.

Pubs Forms

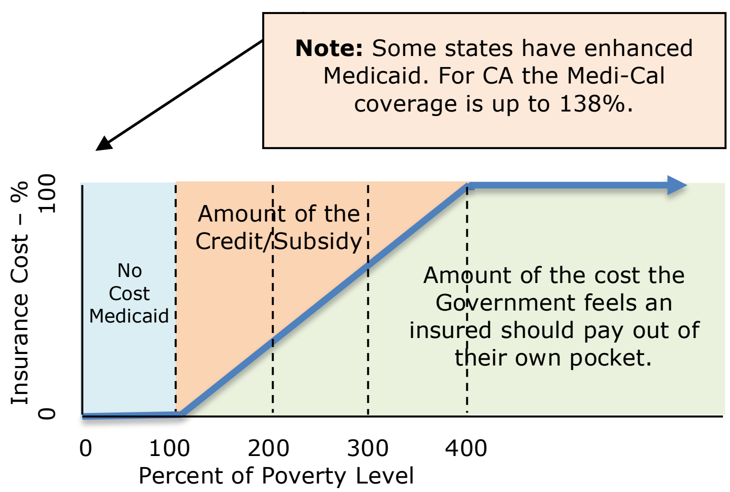
Related IRC and IRS Publications and Forms –

- **Form 8962** – Premium Tax Credit
- **Form 1095-A** – Health Insurance Marketplace Statement
- **Pub 974 – Premium Tax Credit**
- **IRC Sec 36B**

WHAT IS THE PREMIUM TAX CREDIT (PTC)?

The premium tax credit is a refundable credit available to lower income taxpayers to help them offset the cost of purchasing their health insurance. **It is only available to individuals who purchase their health insurance through a government insurance Marketplace and whose income is between 100 and 400 percent of the federal poverty level.** The credit, which is claimed on Form 1040, can also be claimed in advance to reduce current premiums.

If the taxpayer's advance premium tax credit (APTC) exceeds the PTC the taxpayer may be required to pay back part of the credit. On the other hand if the PTC exceeds the APTC, then the excess becomes a refundable credit.



Failure to Pay the Difference – When the advance premium tax credit used as a subsidy payment of the premium is not sufficient to cover the total premium, individuals who fail to pay all or part of the remaining premium amount will be given a mandatory **three-month grace period** before an involuntary termination of their participation in the plan.

ELIGIBLE INDIVIDUALS (Applicable Taxpayer)

The refundable premium tax credit is available to individuals:

RAPID FINDER

1. Whose household income for the taxable year is at least 100% (133% in states with expanded Medicaid) but not more than 400% of the federal poverty level ("FPL"),
2. Who purchase qualified health care insurance through a government-sponsored Marketplace (the insurance **MUST** be purchased through a Marketplace to qualify for the credit).
3. Who **CANNOT** be claimed as a dependent by another,
4. Who are **NOT** eligible for minimum essential coverage through Medicaid, Medicare, employer-sponsored insurance, or other acceptable types of coverage (Preamble to Prop Regs, 8/17/2011). Solely for purposes of determining whether an individual is eligible for government plans such as Children's Health Insurance Program (CHIP) or Medicaid, Notice 2013-41 provides the following guidance:
   - If an individual loses CHIP coverage and is locked out for a period of time (lockout period) due to failure to pay premiums, the individual is treated as eligible for CHIP and eligible for qualified health plan coverage subsidized by the premium tax credit during the lockout period.
   - An individual who may not enroll in CHIP during a pre-enrollment waiting period is treated as not eligible for CHIP coverage during the waiting period. Accordingly, the individual may be eligible for qualified health plan coverage subsidized by the premium tax credit during this period.
   - An individual who is terminated from Medicaid or CHIP for failure to pay premiums is treated as eligible for Medicaid or CHIP during any period for which the individual would be eligible for Medicaid or CHIP except for the failure to pay premiums.
5. Who, if married, must file a joint tax return (but see special rules for victims of domestic violence), and
6. Who are **NOT** employees that are offered minimum essential coverage under an employer-sponsored plan. An individual is eligible for employer-sponsored minimum essential coverage only if the employee's share of premiums is "affordable" (9.56% of household income in 2015, 9.66% in 2016, 9.69% in 2017, 9.56% in 2018, and 9.86% in 2019), and provides "minimum value".

IMPORTANT

How Does One Determine if the Employer Offered the Employee Affordable Minimum Essential Health Insurance? Well, all you need to do is look at the Form 1095-C, Part II, Line 14 codes. (See chapter 12.09 for a description of the offer codes 1A through 1H.) **For months they were offered coverage, they are not qualified for the premium tax credit.** Be sure to review the 1095-C before completing the return to avoid IRS notices.

SPECIAL SITUATIONS RELATED TO ELIGIBILITY

Post-employment coverage (COBRA) - A former employee (including a retiree), or an individual related to a former employee, who may enroll in eligible employer-sponsored coverage or in continuation coverage required under Federal law, or a State law that provides comparable continuation coverage, is eligible for minimum essential coverage under this coverage only for months that the former employee or related individual is enrolled in the coverage (Reg 1.36B-2(c)(3)(iv)). Thus if a former employee does not take the COBRA coverage and is otherwise qualified, he or she would be eligible for the PTC.

Individuals who are incarcerated or not lawfully present - Individuals who are not lawfully present in the United States or are incarcerated (other than pending disposition of charges, for example, awaiting trial) are not eligible to enroll in a qualified health plan through a Marketplace. However, these individuals may be applicable taxpayers and claim the PTC for the coverage of an individual in their tax family who is eligible to enroll in a qualified health plan.

Married taxpayers - A taxpayer who is married generally must file a joint return with their spouse to take the PTC. However, the taxpayer is treated as unmarried for federal income tax purposes if the taxpayer is divorced or legally separated according to state law under a decree of divorce or separate maintenance.

Married taxpayer filing as head of household – Where a married taxpayer qualifies to file as head of household, they can take the PTC if they otherwise qualify. A married taxpayer can file as head of household if he or she: (a) lived apart from their spouse at least the last six months of the year and (b) paid more than one-half of the cost of maintaining as his or her home a household which is the principal place of abode for more than one-half the year of a child, stepchild or eligible foster child for whom the taxpayer may claim a dependency exemption. (Nondependent child qualifies only if the taxpayer gave written consent to allow the dependency to the non-custodial parent, or the non-custodial parent has the right to claim the dependency under a pre-'85 divorce agreement).

Victims of Domestic Abuse or Spousal Abandonment **-** If the taxpayer is a victim of domestic abuse or spousal abandonment, they can take the PTC on a married filing separately return if they meet all of the following (Regs 1.36B-2(b)(2)(ii))

- They are living apart from their spouse at the time they file their tax return.
- They are unable to file a joint return because they are a victim of domestic abuse or spousal abandonment.
- They certify on their return that they meet the criteria for claiming the PTC using the married filing separate filing status.

A taxpayer is considered a victim of spousal abandonment for a tax year if, taking into account all facts and circumstances, the taxpayer is unable to locate his or her spouse after reasonable diligence. (Reg. § 1.36B-2(b)(2)(iv))

The taxpayer may claim this exception to the requirement that married taxpayers must file jointly to claim the PTC for no more than **three consecutive taxable years**. (Reg. § 1.36B-2(b)(2)(v))

Domestic abuse includes physical, psychological, sexual, or emotional abuse, including efforts to control, isolate, humiliate, and intimidate, or to undermine the victim's ability to reason independently. All the facts and circumstances are considered in determining whether an individual is abused, including the effects of alcohol or drug abuse by the victim's spouse. Depending on the facts and circumstances, abuse of the victim's child or other family member living in the household may constitute abuse of the victim. A taxpayer is a victim of spousal abandonment for a tax year if, taking into account all facts and circumstances, the taxpayer is unable to locate his or her spouse after reasonable diligence.

Taxpayers self-certify they qualify for an exception by checking the "Relief" box in the top right-hand corner of Form 8962. No documentation should be attached to the return but it should be kept with the taxpayer's tax return documents. For examples of what documentation to keep, see Pub. 974.

Married filing separately – Generally, a married taxpayer filing separately (MFS) who does not qualify as a victim of domestic abuse or spousal abandonment cannot take the premium tax credit (PTC) and thus must repay all advance premium tax credit (APTC) received (Sec 36B(c)(1)(C)). However, when an individual has obtained insurance through the marketplace, received APTC, and subsequently files as MFS, the amount of APTC that must be paid back may be limited based on the taxpayer's household income relative to the federal poverty level (Sec 36B(f)(2)(B)(i)). See page 12.02.10 for maximum paybacks based upon federal poverty level.

This exception effectively allows MFS taxpayers to obtain some amount of the PTC when they have obtained insurance through the marketplace and are not offered affordable insurance by their employers. In addition, MFS spouses are splitting their incomes by filing separately, thus reducing their individual household incomes and potentially dropping them into a lower poverty level. This, in turn, can reduce the amount of APTC they have to pay back.

ADVANCED PTC TO OFFSET PREMIUMS OR 1040 CREDIT?

The PTC can be:

- Taken in advance to supplement the monthly Marketplace insurance premiums,
- Claimed as a refundable credit on the 1040 tax return, or
- Some combination of both.

This points up the importance of cautioning clients about the significance of notifying the Marketplace of family and income changes to make sure the advance credit is not excessive and creating a future liability for those who can least afford it.

Taxpayers with the changes in circumstances such as the following should report them to the Marketplace:

- Changes in household income.
- Birth or adoption.
- Marriage or divorce.
- Move to a different address.
- Gaining or losing eligibility for other health care coverage.
- Changes to employment – new or additional job, loss of job, becoming self-employed, etc.

DETERMINING POVERTY LEVEL

The advance premium tax credit (APTC) provided to a family is dependent upon their poverty level as determined from the federal poverty guidelines. The lower their **family income** and corresponding percentage of the federal poverty guidelines, the greater their APTC will be. Families with income between 100% and 400% of the federal poverty level qualify for an APTC provided they purchase their insurance from a Marketplace. Families below 100% of the federal poverty level qualify for Medicaid. Note: Some states have enhanced Medicaid and individuals may qualify for Medicaid at higher percentages of the poverty level.

Poverty Guidelines - The Federal Poverty Guidelines are posted annually in the Federal Register and reflect the income representing 100% of the poverty level in the continental U.S., Alaska and Hawaii and an add-on amount for each additional individual in the tax family.

IMPORTANT NOTE
Because open enrollment on the Marketplaces begins in the year prior to the coverage, the prior year poverty guidelines are used in determining a taxpayer's poverty level. Thus for the 2019 year, the 2018 poverty guidelines are used.

Use for 2019

Year	Individuals	Continental U.S.	Alaska	Hawaii
2018 Poverty Levels USED **FOR PREPARING 2019 RETURNS** *Dept of Health & Human Services notice 2018-00814*	One.................... Each Additional	12,140 4,320	15,180 5,400	13,960 4,970
2017 Poverty Levels USED **FOR PREPARING 2018 RETURNS** *Dept of Health & Human Services notice 2017-02076*	One.................... Each Additional	12,060 4,180	15,060 5,230	13,860 4,810
2016 Poverty Levels USED **FOR PREPARING 2017 RETURNS** *Federal Register, January 25, 2016, pp. 4036-4037*	One.................... Each Additional	11,880 4,140	14,840 5,180	13,670 4,760
2015 Poverty Levels USED **FOR PREPARING 2016 RETURNS** *Federal Register, January 22, 2015, pp. 3236 -3237*	One.................... Each Additional	11,770 4,160	14,720 5,200	13,550 4,780

Example: *Suppose you wanted to determine the income that represented the 200% of the federal poverty level for a family size of four in the continental U.S for 2019. You would add $12,140 for the first individual and $4,320 for each of the 3 additional individuals for a total of $25,100 ($12,140 + (3 x $4,320)). The $25,100 represents 100% of the federal poverty level for a family size of 4, so to determine 200% of the federal poverty level for a family with 4 members, multiply $25,100 by 200%, which is $50,200.*

We have done the math, and developed the table below, which represents a variety of poverty levels and family sizes. However, this is for illustration purposes and the actual percent of poverty level must be computed using the values from the table above.

2018 Federal Poverty Guidelines by Family Size & Family Income

USED FOR PREPARING 2019 RETURNS

Family Size	100%	138%	150%	200%	250%	300%	400%
1	12,140	16,753	18,210	24,280	30,350	36,420	48,560
2	16,460	22,715	24,690	32,920	41,150	49,380	65,840
3	20,780	28,676	31,170	41,560	51,950	62,340	83,120
4	25,100	34,638	37,650	50,200	62,750	75,300	100,400

Determining the Family Poverty Level – When determining a family's percentage of the federal poverty level, the income level for 100% of the federal poverty level must be determined from the table above, based on family size, and then that income is divided into the family's household income to find the actual poverty level percentage (this computation is performed in Part 1 of Form 8962).

Family Size - The family size is the same as the number of individuals for which the taxpayer would have been allowed an exemption deduction for the tax year if the TCJA hadn't eliminated the deduction. Generally, this is the taxpayer, the taxpayer's spouse if filing jointly, and the taxpayer's dependents.

Household Income – The term household income includes the modified adjusted gross income (MAGI) of the taxpayer plus the sum of MAGIs of all individuals that were taken into account when determining the taxpayer's family size **and were required to file a tax return**. For this purpose, the determination of whether there is a filing requirement is based solely on the taxpayer's standard deduction (and prior to 2018 and after 2025, allowable filer exemption amounts).

> ***Example:*** *Qualifying child in 2019 has a part time job at a burger joint and makes $16,000. The child files his or her own return and since the earned income exceeds the standard deduction of $12,200 the child is required to file a return. The child's MAGI is included in household income for the PTC computation.*
>
> ***Example:*** *Same as the previous example but the child only made $3,000 at the burger joint. The child is not required to file a return. Therefore, the child's MAGI is not included in household income for purposes of the PTC.*
>
> ***Example:*** *In this example, the child has $3,000 of 1099-MISC income. The child is required for tax purposes to file a return and pay the SE tax on the $3,000. However, for purposes of computing household income the child is not required to file and the child's MAGI is excluded from household income for PTC purposes.*

Modified Adjusted Gross Income (MAGI) – The term MAGI for purposes of this credit means adjusted gross income increased by any foreign earned income exclusion, the excluded portion of Social Security and Railroad Retirement benefits, and tax-exempt interest income. (IRC Sec 36B(d)(2)(B))

> ***Example:*** *In 2019, Family of three lives in the continental U.S and has a household income of $34,000. From the table for 2018 poverty levels used for 2019 returns, we determine that 100% of the poverty level income is $12,140 plus $4,320 for each additional family member. Thus, for our example, the income at 100% of the poverty level would be $20,780 $12,140 + $4,320 + $4,320). The poverty level used for Form 8962 is then determined by dividing the family's household income of $34,000 by the income for their family size at 100% of the poverty level, $20,780, multiplied by 100 to convert to a percentage. Thus, the family's percentage of the federal poverty level is 164 (($34,000/$20,780) x 100), rounded to the nearest whole percentage.*

Special rounding rules – As if things are not complicated enough, the instructions to Form 8962 require that when computing the poverty level, if the result is less than 1.00 or more than 3.99, round the result as follows:

- For any amount less than 1.00, round **down** to the nearest whole percentage. For example, for .996, use 99.
- For any amount between 3.99 and 4.00, round **down** to 399.
- For any amount more than 4.00 but no more than 9.99 round up to the nearest whole percentage, for example for 4.004 use 401.
- For an amount more than 9.99 enter the result as 999. For example, for 10.456 use 999.

Gambling Winnings May Impact Health Insurance Costs

Gambling winnings, even if there's a net loss for the year, and game show winnings can increase the cost of health insurance premiums for low-income individuals or families who obtain their insurance through the Marketplace and, in some cases, those enrolled in Medicare coverage.

We all know that taxpayers, except under very special circumstances, cannot net their winnings and losses on their tax returns. The total gambling winnings are included in the adjusted gross income (AGI) for the year, while the losses are deducted as an itemized deduction and limited to an amount not exceeding the reported winnings for the year.

Thus, whether or not a taxpayer itemizes deductions and deducts their gambling losses, the full amount of the gambling winnings is included in their AGI; their AGI is used to determine their household income, which in turn is used to determine the amount of premium tax credit (PTC) to which the taxpayer is entitled. The higher the income, the lower the PTC, and the lower the PTC, the higher the insurance premiums. Similarly, if a taxpayer wins goods on a game show, the taxpayer may also receive a W-2G, adding to their AGI for the year. Even if they give some or all of the goods to charity, that would, like gambling losses, be an itemized deduction.

Although impacting very few, the scenario also applies to taxpayers on Medicare. An individual's Medicare B and D premiums are based on their AGI from two years prior. Thus, a taxpayer who had gambling winnings from two years back could see increases in both their monthly Medicare B premiums and supplement for the Medicare D (prescription drug coverage).

Spousal Issues Under an Employer Plan – The employer insurance mandate does not require an employer to provide insurance coverage to a spouse of the employee. However, in some cases employers do include spousal coverage.

- *Spousal Coverage Not Offered* – An unemployed spouse or spouse whose employer does not offer affordable coverage must obtain coverage elsewhere to avoid the penalty for not being insured. One of those options is the Marketplace and the spouse will qualify for the PTC if the spouse otherwise qualifies for the credit.
- *Spousal Coverage Offered* – If an employer offers coverage for both the employee and the employee's spouse, and the cost of the employee's coverage for 2019 does not exceed 9.86% (up from 9.56% in 2018) of the taxpayer's household income, then no matter the cost of the spouse's coverage the taxpayer will not be eligible for the PTC. This is because the affordability test is based upon the employee's self-only coverage premiums for purposes of the 9.86% (9.56% in 2018) of household income test, and if affordable for the employee then it is considered affordable for all members of the taxpayer's tax family offered coverage under the employer plan. If an individual's coverage offered by an employer is considered affordable then the taxpayer is not eligible for a PTC. (Example Reg 1.36B-2(c)(3)(v)(D)) This is commonly referred to as the "family glitch."

Child Under 26 Issues Under an Employer Plan - If a child under 26 can be covered under a parent's policy, can the child get lower costs on Marketplace insurance based on income if they apply themselves? It depends on whether the child is a dependent in the parent's tax household. (Q&A Healthcare.gov).

- *If the under-26 child is included as a dependent in the parent's tax household* - and if they have access to a parent's job-based coverage – they aren't eligible for lower costs on a Marketplace plan. This is because they have access to job-based coverage.
- *If the child files taxes themselves* - they may be eligible for lower costs on a Marketplace plan based on their income. This is true even if they have access to a parent's job-based coverage. But if the child is **enrolled** in a parent's job-based coverage, they aren't eligible for lower costs on a Marketplace plan.

Child Receiving Social Security Benefits – A child receiving SS benefits and no other income is likely not required to file a return. Thus, their MAGI that includes the non-taxable SS benefits is not required to be added to the family's household income. However, should the child have a part time job and make over the standard deduction amount, they would be required to file a return and their non-taxable SS benefits would have to be added to their MAGI and their MAGI added to the family's income.

Where a child has earned income, and the earned income puts them over the filing requirement, the child could contribute to a traditional IRA and possibly reduce their income below the required filing level (remember, for the PTC, filing requirement for 2019 is based solely on standard deduction).

A child providing over half of his/her own support, would not be a qualifying child for dependency purposes, so then the child would file their own return and the child's income wouldn't be considered with the parents' MAGI when figuring the PTC. However, the child would still need to have health care coverage or be subject to penalty, and if bought through a Marketplace, would be eligible for a PTC (unless below poverty level and Medicaid would kick in). Parents could still include the child on a policy purchased thru the employer but would not be eligible for the PTC because the plan was not bought thru the Marketplace.

DETERMINING THE CREDIT

Overview: The credit is actually the difference between what the government thinks a family should pay towards their own health insurance premiums, based upon their poverty level, and the cost of the insurance. A simplistic view without the details is:

The family's cost of insurance purchased through a Marketplace:	$ XXXX
What government thinks a family should pay towards own insurance:	< XXXX>
Premium Tax Credit:	$ XXXX

The cost of the insurance used for the determination is the second lowest cost of a Silver plan of insurance (SLCSP). It is also referred to as the benchmark premium. This cost is determined by the Marketplace and reported on Form 1095-A, a copy of which goes to the IRS and the insured.

What the government thinks the family should pay towards their insurance is a percentage of the family's household income based upon their poverty level. This percentage, referred to as the "applicable percentage" is determined from a table provided by the government based upon the family's poverty percentage.

Family's responsibility towards their insurance premiums – Below is a table showing the "applicable percentage" (termed "applicable figure" on line 7 of Form 8962) for various poverty levels. For example, the "applicable %" value of 0312 is actually 3.12%. This table is included in the Form 8962 instructions. **Note:** The table shown below is for 2018; the 2019 table was not available at publication date. Consult the Form 8962 instructions for 2019 for the 2019 table once it is released.

Applicable Percentage Table for 2018 Returns
(Percentage of Household Income That Must Be Paid Towards Own Insurance)

171	0.0500	214	0.0683	257	0.0830	300 thru 400	0.0956
172	0.0505	215	0.0687	258	0.0833		
173	0.0509	216	0.0690	259	0.0836		
174	0.0514	217	0.0694	260	0.0839		

Example: *Assume the family's poverty percentage is 167 and the family's income is $34,000. From the table above the percentage of their income that they should pay towards their own insurance is .0482 (4.82%). Thus, the amount the government expects them to pay towards their own insurance is $1,639 (.0482 x $34,000)*

Determining the premium tax credit – Depending upon whether the Marketplace reporting using Form 8962 is on an annual basis or a monthly basis, the credit will have to be computed in the same manner. For purposes of explaining how the computation works, the following explanation is based upon an annual computation.

1. Taxpayer's **family size –** (line 1 Form 8962); defined earlier in this chapter.
2. Taxpayer's **household income** (line 3 Form 8962); defined earlier in this chapter.
3. From the table determine the income that is equal to 100% of the federal poverty level based on the taxpayer's family size (line 4 Form 8962).
4. **Family's poverty level** - Divide the amount from line 2 by the amount determined at line 3, rounded to the nearest whole percentage (line 5 Form 8962), keeping in mind the special rounding rules noted above.
5. From the **applicable percentage** table determine the percentage of family income the taxpayer is expected to pay towards purchasing their own health insurance (line 7 Form 8962).
6. **Multiply line 5 times line 2**. This is the amount of health insurance premium the taxpayer is expected to pay towards their own health insurance (line 8a Form 8962).
7. Enter the annual premium for the **second lowest cost Silver plan** (SLCSP). The Marketplace provides this number on Form 1095-A (line 33A for annual computations).
8. Subtract Line 6 from line 7. This amount, not exceeding the cost of the insurance, is the premium tax credit.

Example*: Married couple with one child who live in the continental U.S. Couple has an AGI of $27,000. Child, a teenager, has a part time job and has an AGI of $7,000. Their **2018** premium tax credit is determined as follows.*

1. *Taxpayer's **family size: 3***
2. *Taxpayer's **household income: $34,000** ($27,000 + $7,000)*
3. *From the table of 2017 poverty levels used for 2018 returns, determine the income that is equal to 100% of the federal poverty level for the taxpayer (line 4 Form 8962): $20,420 (100% of poverty level for family of 3 = $12,060 plus $4,180 x 2)*
4. ***Family's poverty level -** Divide the amount from line 2 by the amount determined at line 3, rounded to the nearest whole percentage: **167%** (($34,000/$20,420) x 100)*
5. *From the **applicable percentage** table determine the percentage of family income the taxpayer is expected to pay towards their own health insurance: .0482 taken from the IRS table shown above based on the poverty level.*
6. ***Multiply line 5 times line 2**. This is the amount of health insurance premium the taxpayer is expected to pay towards their own health insurance: **$1,639 (.0482 x $34,000)***
7. *Enter the annual premium for the **second lowest cost Silver plan** (SLCSP). The Marketplace provides this number on Form 1095-A: **$6,310:** (Estimated by the author in order to provide this example).*
8. *Subtract Line 6 from line 7. This amount, <u>not exceeding the cost of the insurance</u>, is the premium tax credit: **$4,671 ($6,310- $1,639).***

Form 8962 – Premium Tax Credit (PTC) - is used to determine the premium assistance credit that the taxpayer is entitled to and to reconcile that credit with the advance credit paid through the insurance Marketplaces.

Example – Completing 8962 - Married couple with one teenage child who works part time with $7,000 of earned income. Parents' AGI is $27,000. Tax year 2019. Annual premium for the second lowest cost Silver plan is $6,348. Actual policy premium is $5,200. APTC paid is $5,016.

Line 1: Family size = 3
Line 2a: Taxpayer's AGI = $27,000
Line 2b: Child's AGI = $7,000
Line 3: $34,000 ($27,000 + $7,000)
Line 4: $20,780 (100% poverty level - family of 3)
Line 5: 164% (($34,000/$20,780) x 100)
Line 6: Yes
Line 7: .0468 is the applicable percent of income that the taxpayer is expected to pay towards own insurance. Taken from IRS table in Form 8962 instructions based on the value of line 5. *Caution: Value is from 2018 table; 2019 table not available at publication.*
Line 8: Taxpayer's annual contribution towards own insurance = $1,591 (.0468 x 34,000)
Line 9: Taxpayer's monthly contribution towards own insurance = $1,591/12 rounded up = $133.

Form 8962 – Part 1

Form **8962** — Department of the Treasury, Internal Revenue Service

Premium Tax Credit (PTC)

▶ Attach to Form 1040, 1040A, or 1040NR.
▶ Information about Form 8962 and its separate instructions is at *www.irs.gov/form8962*.

OMB No. 1545-0074 — 2019 — Attachment Sequence No. **73**

Name shown on your return | Your social security number | Relief (see instructions) ☐

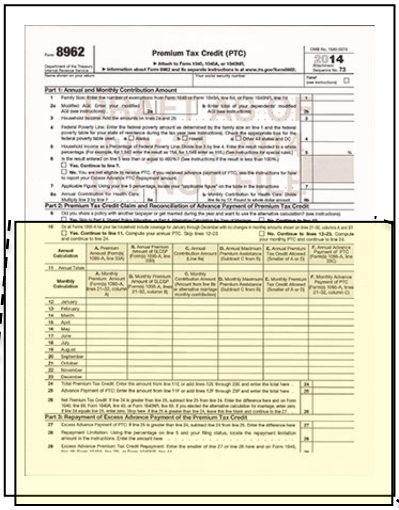
Part 1: Annual and Monthly Contribution Amount

1	Family Size: Enter the number of exemptions from Form 1040 or Form 1040A, line 6d, or Form 1040NR, line 7d	1	3
2a	Modified AGI: Enter your modified AGI (see instructions)	2a	27,000
b	Enter total of your dependents' modified AGI (see instructions)	2b	7,000
3	Household Income: Add the amounts on lines 2a and 2b	3	34,000
4	Federal Poverty Line: Enter the federal poverty amount as determined by the family size on line 1 and the federal poverty table for your state of residence during the tax year (see instructions). Check the appropriate box for the federal poverty table used. a ☐ Alaska b ☐ Hawaii c ☒ Other 48 states and DC	4	20,780
5	Household Income as a Percentage of Federal Poverty Line: Divide line 3 by line 4. Enter the result rounded to a whole percentage. (For example, for 1.542 enter the result as 154, for 1.549 enter as 155.) (See instructions for special rules.)	5	164 %
6	Did you enter 401% online 5? (See instructions if you entered less than 100%) ☒ **No.** Continue to line 7. ☐ **Yes**. You are not eligible to receive PTC. If advanced payment of the PTC was made, see the instructions ow or How to report your excess advance PTC repayment amount.		
7	Applicable Figure: Using your line 5 percentage, locate your "applicable figure" on the table in the instructions	7	.0468
8a	Annual Contribution for Health Care: Multiply line 3 by line 7	8a	1,591
b	Monthly Contribution for Health Care: Divide line 8a by 12. Round to whole dollar amount	8b	133

Part 2: Premium Tax Credit Claim and Reconciliation of Advance Payment of Premium Tax Credit

DRAFT AS OF JULY 24 2014 DO NOT FILE

Form 8962 – Part 2 & 3



EXAMPLE CONTINUED

Assuming all information was provided on an annual basis
11A = Cost of Insurance from **1095-A (33A)**
11B = Benchmark insurance cost from **1095-A (33B)**
11C = TP's Share of Insurance from **Part I, Line 8a**
11D = $4,757 (6,348 – 1,591)
11E = $4,757 (Smaller of $5,200 or $4,757)
11F = Amount of Advance PTC paid from Form **1095-A (33C)**
27 = 259 ($5,016 - $4,757)
28 = $600 (Amount from maximum repayment table - see Page 12.02.12)

Multiply line 3 by line 7 . . . . . 8a | line 8a by 12. Round to whole dollar amount 8b

Part 2: Premium Tax Credit Claim and Reconciliation of Advance Payment of Premium Tax Credit

9 Did you share a policy with another taxpayer or get married during the year and want to use the alternative calculation? (see instructions)
☐ **Yes.** Skip to Part 4, Shared Policy Allocation, or Part 5, Alternative Calculation for Year of Marriage. X☐ **No. Continue to line 10.**

10 Do all Forms 1095-A for your tax household include coverage for January through December with no changes in monthly amounts shown on lines 21–32, columns A and B?
X☐ **Yes. Continue to line 11.** Compute your annual PTC. Skip lines 12–23 and continue to line 24.
☐ **No. Continue to lines 12–23.** Compute your monthly PTC and continue to line 24.

Annual Calculation	**A.** Premium Amount (Form(s) 1095-A, line 33A)	**B.** Annual Premium Amount of SLCSP (Form(s) 1095-A, line 33B)	**C.** Annual Contribution Amount (Line 8a)	**D.** Annual Maximum Premium Assistance (Subtract C from B)	**E.** Annual Premium Tax Credit Allowed (Smaller of A or D)	**F.** Annual Advance Payment of PTC (Form(s) 1095-A, line 33C)
11 Annual Totals	5,200	6,348	1,591	4,757	4,757	5,016

Monthly Calculation	**A.** Monthly Premium Amount (Form(s) 1095-A, lines 21–32, column A)	**B.** Monthly Premium Amount of SLCSP (Form(s) 1095-A, lines 21–32, column B)	**C.** Monthly Contribution Amount (Amount from line 8b or alternative marriage monthly contribution)	**D.** Monthly Maximum Premium Assistance (Subtract C from B)	**E.** Monthly Premium Tax Credit Allowed (Smaller of A or D)	**F.** Monthly Advance Payment of PTC (Form(s) 1095-A, lines 21–32, column C)

24	Total Premium Tax Credit: Enter the amount from line 11E or add lines 12E through 23E and enter the total here .	24	4,757
25	Advance Payment of PTC: Enter the amount from line 11F or add lines 12F through 23F and enter the total here .	25	5,016
26	Net Premium Tax Credit: If line 24 is greater than line 25, subtract line 25 from line 24. Enter the difference here and on Form 1040, line 69; Form 1040A, line 45; or Form 1040NR, line 65. If you elected the alternative calculation for marriage, enter zero. If line 24 equals line 25, enter zero. Stop here. If line 25 is greater than line 24, leave this line blank and continue to line 27 .	26	

Part 3: Repayment of Excess Advance Payment of the Premium Tax Credit

27	Excess Advance Payment of PTC: If line 25 is greater than line 24, subtract line 24 from line 25. Enter the difference here	27	259
28	Repayment Limitation: Using the percentage on line 5 and your filing status, locate the repayment limitation amount in the instructions. Enter the amount here	28	600
29	Excess Advance Premium Tax Credit Repayment: Enter the smaller of line 27 or line 28 here and on Form 1040, line 46; Form 1040A, line 29; or Form 1040NR, line 44	29	259

For Paperwork Reduction Act Notice, see your tax return instructions. Cat. No. 37784Z Form **8962** (2014)

CAUTION: There will be occasions where one individual may have attested to the Marketplace that they would be the one claiming an exemption allowance for a spouse or dependent, and end up not claiming the exemption, and therefore not having the responsibility for that individual. In such cases the benchmark premium amount and the advance premium assistance credit attributable to that individual or individuals can be allocated to other taxpayers on page 2 of the 8962.

TAX RETURN RECONCILIATION

The law requires that any advance payment of the credit be made in the form of an advance payment that **is paid directly to the insurer**. When receiving the credit in the form of an advance payment, a taxpayer is required, when filing their individual income tax return, to reconcile the actual credit that he or she is due with the amount that has actually been subsidized by the government through a Marketplace. Form 8962, Premium Tax Credit, has been developed by the IRS for this purpose. A taxpayer who receives an advance premium tax credit is required to file a tax return so that the reconciliation can be done, even if the taxpayer otherwise would not be required to file.

Credit (PTC) Exceeds Advance Payments (ATPC) - If the calculated credit amount exceeds the advance premium tax credit amount made monthly to the insurer on the taxpayer's (and family's) behalf, **the excess is a refundable tax credit** for the taxpayer, and will be entered on Form 1040, Schedule 3, Part II, line 9 (draft 2019).

Example: *During the open enrollment period at the end of 2018, Jake enrolls in a qualified health plan through a Marketplace and determines his premium tax credit for the upcoming year (2019) is $3,500. He chooses not to have his premium reduced by the premium tax subsidy. Jake's 2019 tax liability, before application of the credit, is $3,000. The credit reduces his tax to zero. In addition, he will receive a $500 refund ($3,500 credit – $3,000 tax) when he files his 2019 return.*

Example: *Michael enrolls in a qualified health plan through a Marketplace and opts to have the premiums reduced by the estimated credit subsidy. During the year, $2,000 of subsidy is applied to reduce his insurance premiums. At the end of the year, and based on his family income and family size, Michael's actual premium tax credit is determined to be $3,500. On his 1040 for the year, reducing the computed credit by the subsidy, he will have a refundable credit balance of $1,500 ($3,500 - $2,000). If his tax liability for the year was $1,000, he would receive a refund of $500 ($1,500 – $1,000).*

Advance Payments (APTC) Exceed Credit (PTC) - If the advance premium tax credit used as monthly premium subsidies exceeds the credit computed on the individual's income tax return, the taxpayer is required to repay the excess as an additional tax on their tax return, **subject to a maximum liability** explained below. The amount of the repayment is entered on Form 1040, Schedule 2, Part I, line 2 (draft 2019).

While the Affordable Care Act prevents the IRS from using liens and levies to collect the individual shared responsibility payment (penalty for individuals who are uninsured that applied before 2019) from taxpayers, the same is not true for repaying the excess premium subsidy. The IRS can use all of the collection efforts in its arsenal for situations where a taxpayer's premium subsidy (advance premium tax credit) exceeds the actual credit and the resulting additional tax has not been paid, and the unpaid amount could be subject to penalty and interest charges as well.

Example: *Michael in the previous example computes his credit at the end of the year and determines it to be $1,250. Because his subsidy payments of $2,000 exceed his credit he will be liable for repayment of a portion of the credit, subject to the maximum liability discussed below.*

Information Reporting (1095-A) – The health insurance Marketplace where the taxpayers acquire their health insurance is required to provide them a Form 1095-A showing which family members were covered, and for which month(s), and the amount of subsidy received, providing the tax preparer with the information required to determine the taxpayer's actual credit amount. This information is used to determine if the taxpayer has a premium credit refund or must repay part of the subsidy.

COMPUTING THE MAXIMUM CREDIT REPAYMENT

If the advance premium tax credit provided by an insurance *Marketplace* exceeds the amount the taxpayer qualifies for, then the difference is reconciled on the taxpayer's return (Form 8962) for the year and the excess repaid on the tax return. However, for taxpayers with household income less than 400% of the poverty level, the maximum repayment is limited to the amount determined from the table below. The amounts are inflation adjusted in $50 increments. (IRC 36B(f)(2)(B)) There is no repayment limit for taxpayers whose household income is 400% or more of the poverty level.

Household Income (Expressed as a % of poverty line)	Maximum Repayment Amount			
	2019		2020	
Filing Status	Single	Other	Single	Other
Less than 200%	$300	$600	$325	$650
At least 200% but less than 300%	$800	$1,600	$800	$1,600
At least 300% but less than 400%	$1,325	$2,650	$1,350	$2,700
400% or more	Entire Amount of Excess			

***Example – Computing the Maximum Credit Repayment** – Jack is married with one child and the family's household income for 2019 is $56,000. Jack purchased his family's health insurance through his state's insurance Marketplace. Using his family's household income, we find from the poverty guideline chart that Jack is in the "at least 200% but less than 300%" category. Therefore, Jack's maximum repayment would be $1,660 for 2019. If the Marketplace credited Jack's insurance carrier with $2,000 more than Jack qualified for, then Jack, instead of having to repay the $2,000, would only be liable for $1,660 on his tax return.*

***Example – No Cap on Credit Repayment Amount** – Let's say that Jack from the previous example received a year-end bonus that caused his income to increase so that his actual household income for 2019 ended up at 405% of the poverty level. In this case Jack's repayment of the excess credit would be $2,000, since he does not benefit from the repayment limitation rule because his household income was 400% or more of the poverty level.*

CONTINUE TO NEXT PAGE

DEFINITIONS AND OTHER ISSUES:

Household income below 100% (133% in states that have enhanced Medicaid) of the Federal poverty line – If the computed Federal poverty level (line 5 of Form 8962) is less than 100%, the taxpayer will still qualify for the PTC if:

- The taxpayer or an individual in the taxpayer's tax family enrolled in a qualified health plan through a Marketplace;
- The Marketplace estimated at the time of enrollment that the household income would be between 100% and 400% of the Federal poverty line for the taxpayer's family size for the tax year;
- APTC is paid for the coverage for one or more months during the tax year; and
- The taxpayer otherwise qualifies as an applicable taxpayer (without taking into account the Federal poverty line percentage).

Alien lawfully present in the United States - Certain aliens with household income below 100% of the Federal poverty line are not eligible for Medicaid because of their immigration status. Such a taxpayer will qualify for the PTC even if their household income is less than 100% of the Federal poverty level if all of the following requirements are met.

- The taxpayer or an individual in the taxpayer's tax family enrolled in a qualified health plan through a Marketplace.
- The enrolled individual is lawfully present in the United States **and** is not eligible for Medicaid.
- The taxpayer otherwise qualifies as an applicable taxpayer (without taking into account the Federal poverty line percentage).

Household income above 400% of the Federal poverty line - If the computed Federal poverty level (line 5 of Form 8962) is more than 400, the taxpayer cannot take the PTC and must repay the APTC paid for all individuals in their tax family. This is so even if the Marketplace apparently provided incorrect information and allowed the taxpayer to purchase their insurance through the Marketplace using APTC to pay part of the premiums when their income exceeded 400% of the poverty line (Carol Sue Walker and Theodore Paul Walker v. Commissioner., U.S. Tax Court, T.C. Summary Opinion 2017-50).

Minimum essential health coverage - As currently defined by ACA, includes government sponsored programs, eligible employer sponsored plans, plans in the individual market, certain grandfathered group health plans and other coverage recognized by the Department of Health and Human Services (HHS). A taxpayer cannot claim the PTC for any individual in the taxpayer's tax family for any month when that individual is eligible for minimum essential coverage, except for coverage purchased through the individual market. Other types of minimum essential coverage include:

- Most government-sponsored programs (including comprehensive Medicaid, Medicare parts A or C, and the Children's Health Insurance Program (CHIP)).
- Most employer-sponsored coverage (if the premiums are affordable and the deductibles and co-pays are no more than a certain amount).
- Other health coverage the Department of Health and Human Services designates as minimum essential coverage.
- Coverage purchased in the individual market outside the Marketplace is minimum essential coverage, but it does not qualify for the PTC.

For more details on minimum essential coverage, see *Minimum essential coverage* in Pub. 974 or check *www.irs.gov/uac/Individual-Shared-Responsibility-Provision* for future updates about types of coverage that are recognized as minimum essential coverage.

Child born, adopted or placed with taxpayer for foster care during the month - If a taxpayer enrolls a newborn child (or a child newly adopted or placed for foster care) in a qualified health plan, the child is treated as enrolled as of the first day of the month the child was born, adopted, or placed for foster care. The child is included in the coverage family for the month of birth, adoption, or foster care placement.

Qualified health plan - For purposes of the PTC, a qualified health plan is a health insurance plan or policy purchased through a Marketplace at the Bronze, Silver, Gold, or Platinum level. Plans sold as "catastrophic" coverage and plans purchased through the Small Business Health Options Program (SHOP) do not qualify a taxpayer to take the PTC.

Enrollment premiums - The enrollment premiums are the total amount of the premiums for the month for one or more qualified health plans in which any individual in the taxpayer's tax family enrolled. Form 1095-A, Part III, Column A, reports the enrollment.

Failure to pay premiums – A taxpayer is not allowed a monthly credit amount for the month if the portion of the enrollment premium for that month has not been paid by the unextended due date of the taxpayer's tax return (Reg. §1.36B-3(c)(1)(ii)).

Failure to file a return – If a taxpayer qualified for APTC and does not file a return, then the taxpayer will not be qualified for APTC or cost-sharing reductions in subsequent years. Example: Does not file a 2018 return, not qualified for APTC in 2019 or future years. (IRS Q&A 23).

SLCSP – Refers to the "second lowest cost silver plan". The premiums for the SLCSP are used to calculate the PTC. See also "Determining the Proper SLCSP Premiums," below.

Form 8962 Must Be Filed – If:

- APTC was paid for the taxpayer or any member of the taxpayer's family.
- APTC was paid for an individual for whom the taxpayer told the Marketplace they would claim a personal exemption, if no one else claims a personal exemption for that individual.

SHARED POLICY ALLOCATION

Certain marital, custodial and family groupings can create situations where the PTC must be divided between multiple taxpayers, and thus requiring those taxpayers to allocate the APTC, SLCSP, and actual premiums reported by the Marketplace on Form 1095-A. This generally occurs when a taxpayer's family Marketplace health plan covers at least one individual that should not have been included in the taxpayer's tax family or the family has split up.

Situations requiring allocations include children leaving the nest, including someone on the Marketplace policy that is not a dependent, separated taxpayers not filing jointly, and divorced taxpayers.

FORM 8962 INSTRUCTIONS

The instructions for line 9 of Form 8962 include a table that guides you through a series of "if – then" steps to determine if a Shared Policy Allocation is required. The instructions to Part IV, Allocation of Policy Amounts, have a variety of examples for specific situations.

The following is an example where allocations are required using part 4 IV of Form 8962.

Example 1 – Divorced Couple **-** *Al and Janice were divorced in June and will not be filing jointly for the year. Both Al and Janice and their dependent son, Dan, are insured on their family policy with the Marketplace. They notified the Marketplace of their divorce and Marketplace provided separate policies for them beginning in July. The Marketplace will issue a 1095-A for the first six months that will have to be allocated, and Janice and Al will each receive a separate 1095-A for the last half of the year. They will combine their separately reported 1095-A information with the allocated amounts when reconciling the PTC on their own returns.*

When making an allocation and there are other family members on their policy, they must first do a per capita allocation for the family members based upon who is claiming the dependency for the family member. The remainder can be allocated in any way they can agree upon or if they cannot agree, 50-50.

Note: Although the allocations are referred to as percentages, the form instructions require that they be entered as decimals. For example, 67% would be entered as 0.67.

Form 8962 (2014) Page 2

Part 4: Shared Policy Allocation

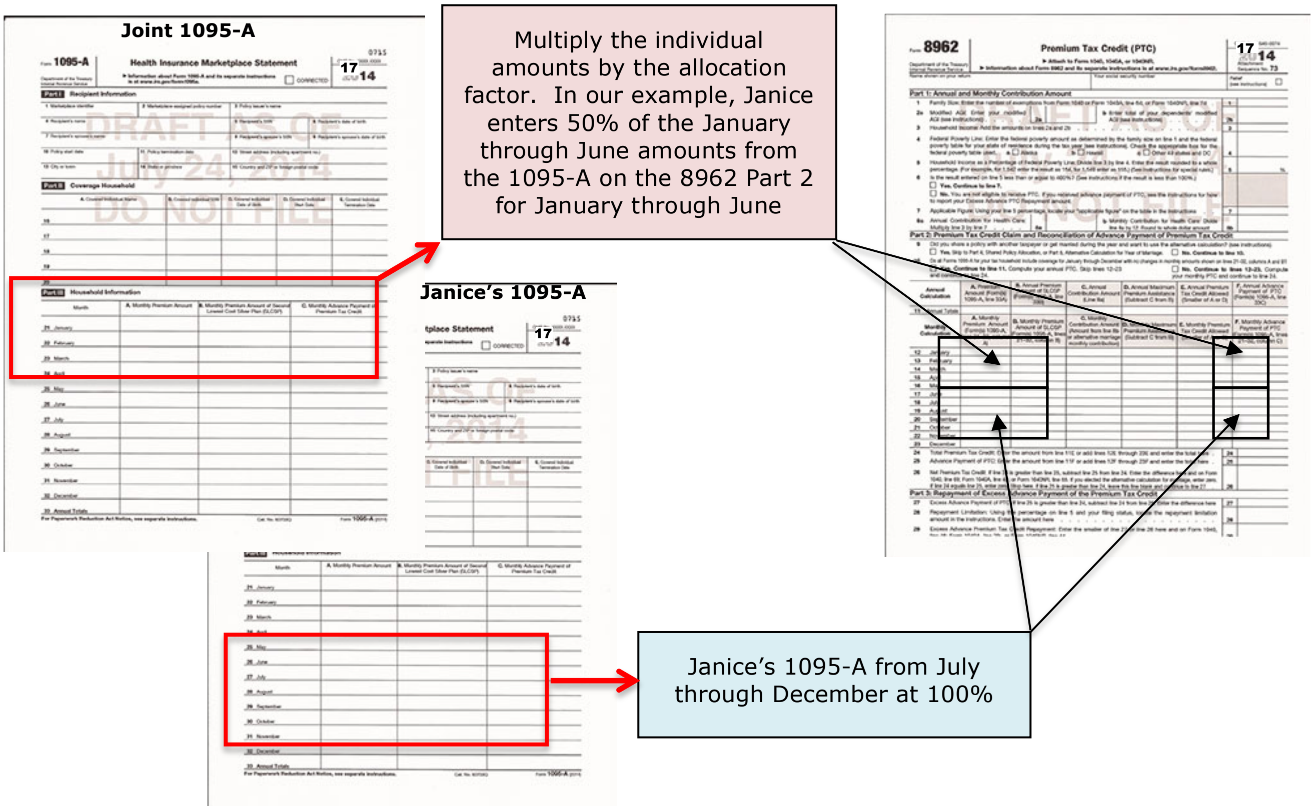
Complete the following information for up to four shared policy allocations. See instructions for allocation details.

Shared Policy Allocation 1

	a Policy Number (Form 1095-A, line 2)	b SSN of taxpayer sharing allocation	c Allocation start month	d Allocation stop month
30	ACA4236534	Appropriate SSN	January	June

Allocation percentage applied to monthly amounts	e. Premium Percentage	f. SLCSP Percentage	g. Advance Payment of the PTC Percentage
	0.50	0.50	0.50

Continuing with our example, we must now transfer the allocated 1095-A data to Part II of the 8962. We will use Janice's reporting for this example. Since they were divorced mid-year and reported that change in status to the Marketplace, they will receive a joint 1095-A for the part of the year they were married and individual 1095-As for the period of time after the divorce. Thus, they must allocate the APTC, SLCSP premiums, and actual premiums paid and reported on the joint 1095-A. They agreed to allocate 50% to each. Therefore, Janice will use 50% of APTC, SLCSP premiums, and actual premiums reported on the joint 1095-A and 100% of the ones on her 1095-A for the last half of the year. See illustration below.



The Form 8962 instructions include a large list of possible scenarios requiring Form 1095-A allocations. However, one need only remember the following rule to determine when allocations are required:

If the 1095-A includes APTC for individuals not included on the same tax return, allocations are required!

<u>Example 2 – Divorced Couple</u> **-** *Using Al and Janice from example 1, except that they failed to notify the Marketplace of their divorce and as a result the coverage continued as family coverage for the entire year including the last half of the year when they were divorced. When this occurs, there must be two allocations, one for the first half of the year as done in example 1 and another for the last half of the year using the rules for "**policy shared with an individual for whom another person claims a personal exemption**". Under those rules Al and Janice can allocate the 1095-A amounts for the last part of the year in any manner they can agree upon provided the APTC, SLCSP premiums, and actual premiums reported by the Marketplace are allocated proportionately. If they cannot agree, the allocation percentage is the number of exemptions claimed by the taxpayer divided by the total number enrolled in the policy. Thus, Al and Janice will do two separate allocations using different rules for the periods of the year they were married and the part they were divorced.*

<u>Example 3 - Taxpayers married at year end but filing separate returns</u> **-** *If the taxpayers are married at the end of the year but are filing separate returns, either or both may meet the qualifications to file as single* or head of household instead of married filing separately. If filing as single* or head of household, that taxpayer may qualify to take the PTC since they have separate tax families and are not filing as married separate. The total enrollment premiums and APTC (<u>but not the applicable SLCSP premiums</u>) are **allocated equally** between the spouses for the months when one qualified health plan covers at least one individual for each tax family, which may be any of the following.*

- *The policy covers both spouses.*
- *The policy covers the taxpayer and one or more dependents of the spouse.*
- *The policy covers one or more of the taxpayer's dependents and the spouse.*
- *The policy covers one or more dependents of both spouses.*

If none of the above applies, all enrollment premiums and APTC are allocated to the spouse whose tax family had one or more of the covered individuals.

If one or both spouses do not qualify to file as single or head of household then he or she must file as married filing separately and is not eligible to take the PTC. APTC allocated to this spouse must be repaid subject to the limitations described on page 12.02.12.*

**May apply only if filing Form 1040NR – see instructions to Form 1040NR for requirements*

CAUTION: *If a taxpayer in example 3 is able to file as single* or head of household as described, the coverage family may change, in which case a new applicable SLCSP premium will be needed to calculate the credit. If the Marketplace was not notified, the amount reported on Form 1095-A may not be correct. See Pub. 974 for information on determining the correct SLCSP premium needed to compute the credit.*

TIP: Keep in mind that community property (income) rules will apply when determining family income since it includes the taxpayer's MAGI.

Example 4 – Victim of domestic abuse or spousal abandonment* -** *If a taxpayer is married at the end of the year but is filing a return as married filing separately because the taxpayer is a victim of domestic abuse or spousal abandonment, the taxpayer may still qualify for the PTC. The total enrollment premiums and APTC (but not the applicable SLCSP) are* ***allocated equally between the spouses *for the months when at least one individual in each taxpayer's tax family is enrolled in the same qualified health plan, which may be any of the following.*

- *The policy covers both spouses.*
- *The policy covers the taxpayer and one or more dependents of the spouse.*
- *The policy covers one or more of the taxpayer's dependents and the spouse.*
- *The policy covers one or more dependents of both spouses.*

If none of the above applies, all enrollment premiums and APTC are allocated to the spouse whose tax family had one or more of the covered individuals. This will occur when only individuals in the taxpayer's family are included in the Marketplace policy and therefore no allocation is required.

Victims of domestic abuse must check the box at the top right of page 1 of the 8962.

Caution: *The taxpayer claiming to be the victim of domestic abuse or abandonment will generally have a change in family size and will have to use an applicable SLCSP premium different from the one reported on the 1095-A. See Pub 974 for information on determining the correct applicable SLCSP premium.*

***Example 5 – Policy shared with an individual for whom another taxpayer claims* -** *If the taxpayer or another person in the taxpayer's tax family was enrolled in a Marketplace qualified health plan with an individual (for example, the taxpayer's child) whom another taxpayer claims as a dependent (for example, a former spouse), an allocation of the APTC, insurance premiums and applicable SLCSP premium is required on Form 8962, Part IV. The taxpayer claiming the dependent may be able to take the PTC for the child's coverage. The taxpayer and the person claiming the dependent may agree on any allocation percentage between zero and one hundred percent. If they cannot agree on an allocation percentage, the allocation percentage is equal to the number of individuals enrolled by the taxpayer whom the other person claims as a for the tax year divided by the total number of individuals enrolled in the same policy as the individual. The allocation percentage is the percentage of the total that applies to the amounts the person claiming the must use to compute PTC and reconcile it with APTC. The taxpayer uses the remaining amounts to compute PTC and reconcile the APTC.*

***Example 6 - A taxpayer is credited with APTC for Marketplace qualified coverage for an individual whom no taxpayer claims as a* -** *The taxpayer is responsible for reporting and reconciling the APTC.*

Example 7 – Policy shared with two or more tax families - *If the taxpayer enrolled in a single qualified health plan with one or more other tax families and APTC was credited to the policy, the enrollment premiums may have to be allocated among the families. Each applicable taxpayer covered by the plan can claim the PTC, if otherwise allowable. Both taxpayers must each use the premium for the applicable SLCSP coverage for their family. Each must compute their respective contribution amounts using the Federal poverty line percentage for the household income and family size reported on their individual Form(s) 8962. The enrollment premiums are allocated in proportion to the premiums for the applicable SLCSP for each taxpayer's coverage family.*

- ***If no APTC is paid*** - for this qualified health plan, the Marketplace may furnish only one Form 1095-A. In this situation, the taxpayer receiving the Form 1095-A should provide a copy to the other taxpayers. The taxpayers must complete only column e on the appropriate line in Part IV to allocate the enrollment premiums to each family.
- ***If APTC was paid*** - for each tax family in a shared policy and no family had any unreported changes in their respective coverage family during the tax year, and each family received their own Form 1095-A, the taxpayer need not complete Part IV of this form. The Marketplace will allocate the enrollment premiums and APTC on Form 1095-A.

More Than Four Allocations Required – If more than four allocations are required for the taxpayer, check the "no" box at line 34 and attach a supplemental statement. Then follow the instructions for the yes box, but include the amounts from the supplemental statement.

Alternative Calculation for Year of Marriage - In the year of marriage, and in the months before marriage, one or both of the newlyweds may have been covered by a Marketplace policy. They may have had their own individual Marketplace policies or they may have been on their family's Marketplace policy. Whatever their pre-marriage circumstances, they will have to account for any APTC based upon their married status at the end of the year, which could result in them having excess APTC when they file since their family size is now at least two and their household income includes the incomes of both spouses. To compensate for that, an elective alternative calculation for the year of marriage is provided. Worksheets and detailed instructions are included in Pub. 974 under "Alternative Calculation for Year of Marriage."

Generally, the alternative calculation allows the couple to split the household income in half and use the appropriate family size to compute their individual PTCs. Family size would normally be one unless one of the couple has other dependents. However, when using this method, if the alternative method computation results in additional PTC as a consequence of the marriage, the PTC is capped at the amount computed using the regular method. Thus the alternative method can only reduce the amount owed, but cannot increase the refund.

CAUTION – The alternative method will only work if 50% of their combined household income is below the 400% poverty level. If over 400%, all the APTC must be repaid.

DETERMINING THE PROPER SLCSP PREMIUMS

When family situations change, and the 1095-A must be allocated, the SLCSP amounts included on the 1095-A may not apply to the changed family size. In those cases, the taxpayer needs to determine the SLCSP for their family circumstances.

Only the Marketplaces are able to provide SLCSP premiums. The Federally-facilitated Marketplace and most state Marketplaces have provided online SLCSP premium tools, which can be used to look up the SLCSP premium that applies to the taxpayer's coverage family for each month.

PREMIUM TAX CREDIT INTERACTION WITH MEDICAID

We have had several questions related to PTC and its interaction with Medicaid (Medi-Cal in California). In virtually all of the cases, a spouse, child or dependent applied for and received free Medicaid coverage. In order to do that they would have had to indicate they were not in another family or did not have another family member with household income that they neglected to include in the application. As a result they received free Medicaid coverage that they were not entitled to. What are the repercussions, if any?

Penalty For Not Being Insured – Section 5000A imposes a "shared responsibility payment" for anyone who is not "covered under minimum essential coverage" (Section 5000A(a) & (f)). Medicaid is a "qualified health plan" so if all the family members are covered by Medicaid and other qualified health insurance, there is no uninsured penalty. For years after 2018, the TCJA set the penalty at $0, so it is no longer an issue anyway.

Medicaid & Premium Tax Credit (PTC) – To qualify for the PTC, the health insurance must be insurance obtained through a government Marketplace. Thus, Medicaid does not qualify for PTC.

However, assume another member of the tax family obtained coverage through the Marketplace. Then that family member would qualify for the PTC. The amount of the PTC is dependent on family size and household income. The fact that some members of the tax family were on Medicaid makes no difference. If only one member of the tax family qualifies for the PTC it will be the same as if all members of the family qualified. **There is no adjustment needed or allowed**.

> ***Example -*** *Mother and daughter manage to get coverage through Medicaid. Mother files jointly with father and they claim daughter as a dependent. Father, using his correct household income (too high for Medicaid), obtains his insurance through the Marketplace. Since the family size is three, the family's federal poverty level percentage is lower, and thus the PTC is higher, even though the mother and daughter had insurance through Medicaid. FREE insurance and higher PTC…but that's the way it works out!*

Household Income Stated Above Medicaid Threshold **–** To avoid repayments of advance credit payments for taxpayers who experience an unforeseen decline in income, the existing regulations provide that if an Exchange (Marketplace) determines at enrollment that the taxpayer's household income will be at least 100% but will not exceed 400% of the applicable federal poverty level (FPL), the taxpayer will not lose his or her status as an applicable taxpayer (i.e., one who is eligible for the PTC) solely because household income for the year turns out to be below 100 percent of the applicable FPL. (Reg. Sec. 1.36B–2(b)(6))

The regulations provide that a taxpayer whose household income is below 100 percent of the FPL for the taxpayer's family size is **not treated as an applicable taxpayer** if the taxpayer provided incorrect information to an Exchange for the year of coverage with intentional or reckless disregard for the facts. A reckless disregard of the facts occurs if the taxpayer makes little or no effort to determine whether the information provided to the Exchange is accurate under circumstances that demonstrate a substantial deviation from the standard of conduct a reasonable person would observe. A disregard of the facts is intentional if the taxpayer knows the information provided to the Exchange is inaccurate. (Reg 1.36B-2(b)(6)(ii))

Exchange Determines Taxpayer Ineligibility for Medicaid or CHIP **-** Similar to the rule for taxpayers who received the benefit of advance credit payments but ended the taxable year with household income below 100 percent of the applicable FPL, the existing regulations do not require a repayment of advance credit payments for taxpayers with household income within the range for eligibility for certain government-sponsored programs if an Exchange determined or considered the taxpayer or a member of the taxpayer's family to be ineligible for those programs.

To reduce the likelihood those individuals who recklessly or intentionally provide inaccurate information to an Exchange will benefit from an Exchange determination, the regulations provide that:

1. A taxpayer whose household income is below 100 percent of the FPL for the taxpayer's family size is NOT treated as an applicable taxpayer if, the taxpayer intentionally or reckless disregarded the facts, and provided incorrect information to an Exchange for the year of coverage, and
2. An individual who was determined or considered by an Exchange to be ineligible for Medicaid, CHIP, or a similar program (such as a Basic Health Program) may be treated as eligible for those coverages and therefore ineligible for PTC if the individual (or a person claiming the individual as a dependent) provided incorrect information to the Exchange with intentional or reckless disregard for the facts (defined the same as above). (Reg 1.36B-2(c)(2)(v))

ELIGIBILITY FOR EMPLOYER-SPONSORED COVERAGE FOR MONTHS DURING A PLAN YEAR

The regulations under section 36B provide that an individual is eligible for minimum essential coverage through an eligible employer-sponsored plan if the individual had the opportunity to enroll in the plan and the plan is affordable and provides minimum value. The Treasury Department and the IRS are aware that in some instances individuals may not be allowed an annual opportunity to decide whether to enroll in eligible employer-sponsored coverage. This lack of an annual opportunity to enroll in employer-sponsored coverage should not limit an individual's annual choice from available coverage options through the Marketplace with the possibility of benefitting from the premium tax credit.

The regulations clarify that if an individual declines to enroll in employer-sponsored coverage for a plan year and does not have the opportunity to enroll in that coverage for one or more succeeding plan years, for purposes of section 36B, the individual is treated as ineligible for that coverage for the succeeding plan year or years for which there is no enrollment opportunity and as such would be eligible for Marketplace coverage and the PTC.

Note: In general, an applicable large employer will not be treated as having made an offer of coverage to a full-time employee for a plan year if the employee does not have an effective opportunity to elect to enroll in the coverage at least once with respect to the plan year. For this purpose, a plan year must be twelve consecutive months, unless a short plan year of less than twelve consecutive months is permitted for a valid business purpose.

EXCEPTED BENEFITS

The regulations clarify that for purposes of section 36B an individual is considered eligible for coverage under an eligible employer-sponsored plan only if that plan is minimum essential coverage. Accordingly, an individual enrolled in or offered a plan consisting solely of excepted benefits is not denied the premium tax credit by virtue of that excepted benefits offer or coverage.

INSURANCE OPT-OUT ARRANGEMENTS

Employers occasionally provide their employees with opt-out programs. An opt-out payment is a payment that:

(1) is available only if the employee declines coverage (which includes waiving coverage in which the employee would otherwise be enrolled) under the employer-sponsored plan, and

(2) cannot be used to pay for coverage under the employer-sponsored plan.

Proposed Regulations - Prop Reg 1.36B-2(c)(3)(v)(A)(7) defines an "eligible opt-out arrangement" as an arrangement under which the employee's right to receive the opt-out payment is conditioned on:

(1) The employee declining to enroll in the employer-sponsored coverage and

(2) The employee providing reasonable evidence that the employee and all other individuals that the employee reasonably expects to claim as a dependent for the tax year or years that begin or end in or with the employer's plan year to which the opt-out arrangement applies (employee's expected tax family) have or will have minimum essential coverage (other than coverage in the individual market, whether or not obtained through the Marketplace) during the period of coverage to which the opt-out arrangement applies. For example, if an employee's expected tax family consists of the employee, the employee's spouse, and two children, the employee would meet this requirement by providing reasonable evidence that the employee, the employee's spouse, and the two children, will have coverage under the group health plan of the spouse's employer for the period to which the opt-out arrangement applies.

CALIFORNIA DIFFERENCES

NOTE

The following does not take effect until 2020, so it is not something you need to be concerned about for over a year (i.e., for 2020 returns), and by that time the state should have the forms and procedures in place.

New Law & Stuff

Individual Market Assistance (Government Code Sec 100800-100825) - SB 78, signed by the governor 6/27/2019, created a California Individual Market Assistance program that is authorized to provide health care coverage financial assistance, including advanced premium assistance subsidies, to California residents with household incomes below 600% of the federal poverty level. The program will run from 2020 through 2022, after which it is repealed and no new financial assistance or other subsidies are to be provided. (Gov Code Sec 100825(b))

A California individual taking advantage of the advanced assistance from the state will be required to file a California income tax return, even if their income is below the income-based filing requirement, to reconcile the advances with the actual amount allowed based on household income, family size, etc., and to repay any excess advances (up to a limit to be determined by the program) or receive a refund if the actual subsidy allowed exceeds the advances.

To be eligible for a premium assistance subsidy from the California program, a California resident must be eligible for the federal premium tax credit authorized under IRC Sec 36B, except that premium assistance subsidy shall not be subject to the income requirements of Sec 36B.

It is the Legislature's intent that the regulations promulgated under IRC Section 36B as of January 1, 2019, shall apply to the extent that those regulations do not conflict with CA law or regulations issued by the Exchange (Covered California) or Franchise Tax Board.

NOTES

IMPORTANT

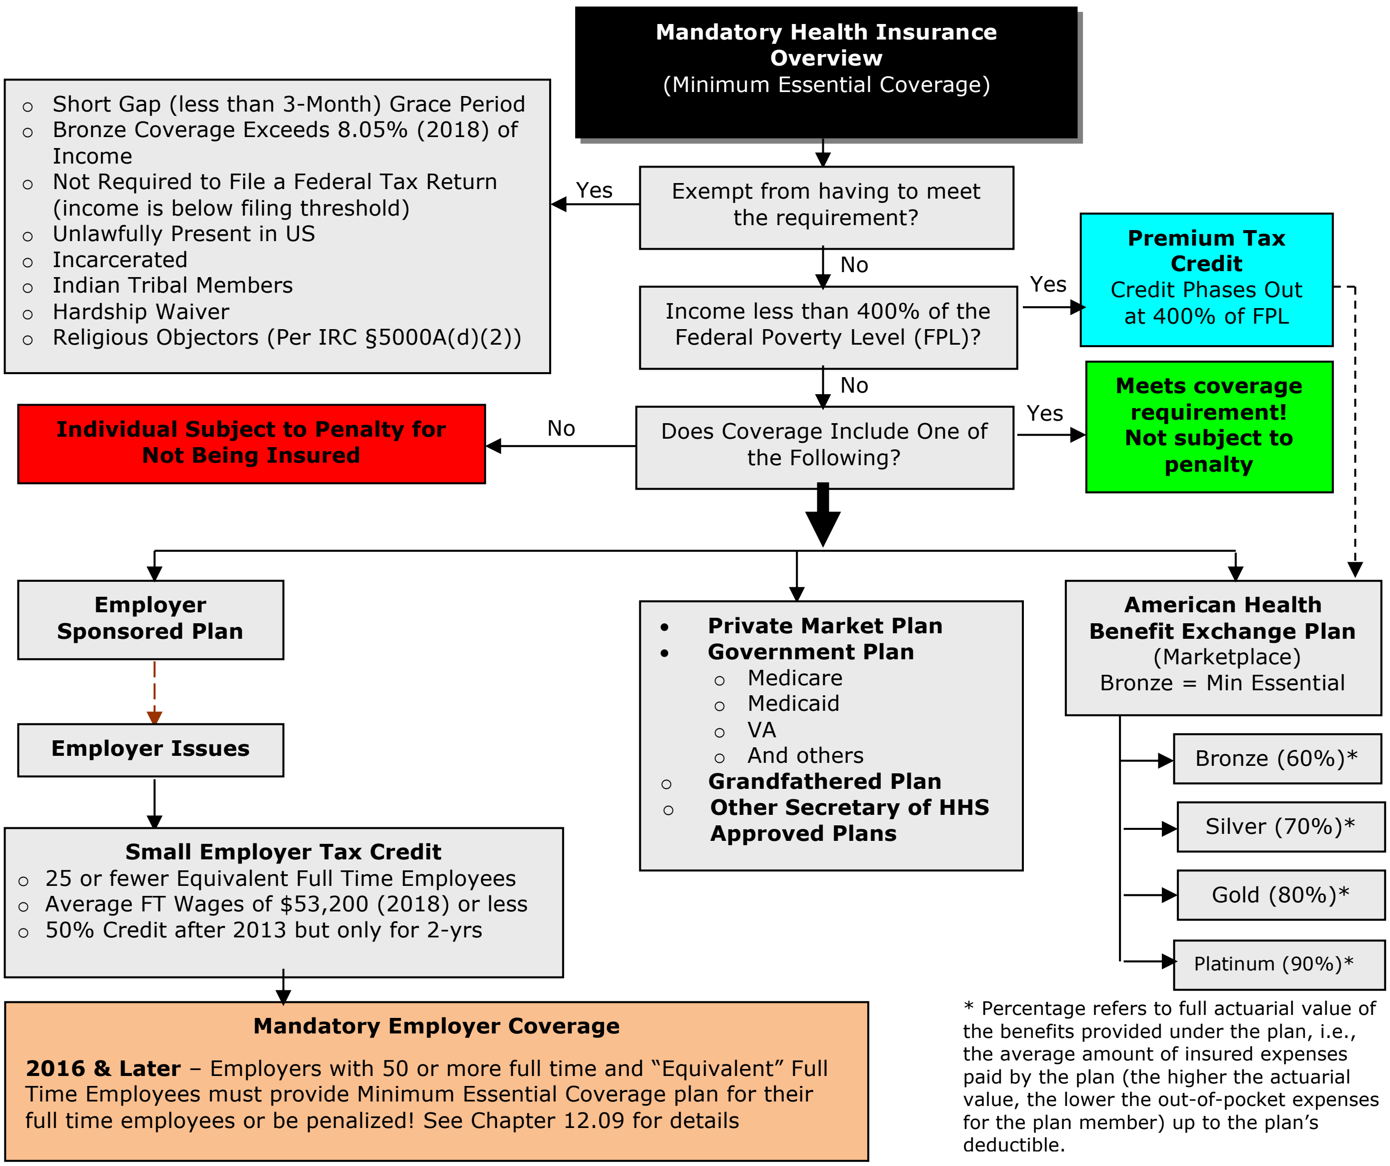
The federal "shared responsibility payment" (penalty for not being insured) **NO LONGER APPLIES after 2018**. However, this chapter is being retained to provide the information and exceptions for prior years. For **California preparers**, the state is reintroducing the penalty beginning for 2020 tax year and will generally following these federal rules, See details at the end of this chapter.

SHARED RESPONSIBILITY PAYMENT
(Penalty for Not Having Health Insurance)

Overview

Individuals are liable for a penalty tax under Code Sec. 5000A for not carrying health insurance. Rather than calling it a penalty, which it is, Congress chose the name "Shared Responsibility Payment", we assume, to gloss over the issue.

And who do you think gets to compute the penalty? You guessed it – you the tax preparer are becoming a part of the health care industry.



* Percentage refers to full actuarial value of the benefits provided under the plan, i.e., the average amount of insured expenses paid by the plan (the higher the actuarial value, the lower the out-of-pocket expenses for the plan member) up to the plan's deductible.

Related IRC and IRS Publications and Forms –

- **Form 8965 –** Health Coverage Exemptions
- **Form 1095-**A – Health Insurance Marketplace Statement
- **Form 1095-B** – Health Coverage
- **Form 1095-C** – Employer-Provided Health Insurance Offer and Coverage
- **IRC Sec 5000(A)** – Shared Responsibility Payment
- **Treas. Decision T.D. 9632** (Reg §§1.5000A-0 – 1.5000A-5)
- **Pub 5156** – Facts about the Individual Shared Responsibility Provision.
- **Pub 5172** – Facts about Health Coverage Exemptions

TCJA has eliminated the shared responsibility payment effective in 2019. Congress didn't *actually* repeal this penalty; instead, it *effectively* repealed it by tweaking the law so that the percentage of household income used in the penalty calculation is 0%, and the flat dollar amount is $0, which causes the amount of the penalty to be $0.

Affordability Exception to Penalty - For purposes of the affordability exception to the shared responsibility penalty, the IRS in Notice 2017-74, states that if an individual resides in a rating area served by a Marketplace that does not offer a bronze plan, the lowest cost metal-level plan available in the Marketplace serving the rating area in which the individual resides should be used. Applies for tax years ending after December 31, 2016.

SHARED RESPONSIBILITY PAYMENT

The Affordable Care Act (ACA) refers to the penalty for not being insured as the Shared Responsibility Payment, based on the legislation's premise that everyone should be insured. The Shared Responsibility Payment will be referred to as a penalty in this publication.

Nonexempt U.S. Citizens and legal resident taxpayers will be penalized for failing to maintain at the least the minimum essential health coverage, which includes:

- Government-sponsored programs (e.g., Medicare, Medicaid, Children's Health Insurance Program),
- Eligible employer-sponsored plans,
- Plans in the individual market, and
- Certain grandfathered group health plans and other coverage as recognized by Health and Human Services (HHS) in coordination with IRS.

The penalty was phased in beginning in 2014 and fully implemented in 2016 through 2018.

Penalty (Sec 5000A(c)) - The penalty for noncompliance is the **lesser** of:

(A) The sum of the **monthly penalty amounts** for months in the taxable year during which 1 or more such failures occurred, or

(B) An amount equal to the national average premium for qualified health plans which have a **bronze level of coverage**, provide coverage for the applicable family size involved, and are offered through Exchanges (Marketplaces) for plan years beginning in the calendar year with or within which the taxable year ends.

National Average Cost of Bronze Coverage

Family Size	1	2	3	4	5 or More
2016 Per Month	$223	$446	$669	$892	$1,115
Full Year	$2,676	$5,352	$8,028	$10,704	$13,380
2017 Per Month	$272	$544	$816	$1,088	$1,360
Full Year	$3,264	$6,528	$9.792	$13,056	$16,320
2018 Per Month	$283	$566	$849	$1,132	$1,415
Full Year	$3,396	$6,792	$10,188	$13,584	$16,980

Monthly Penalty Amounts **–** The monthly penalty amount is an amount equal to 1/12 of the **greater of** the following amounts:

Year	2014	2015	2016-18
Flat Dollar Amounts (annual)			
Adult……………………..	$95.00	$325.00	$695.00
Individual Under 18….	$47.50	$162.50	$347.50
Percentage of Income Rate:	1.0%	2.0%	2.5%

(A) Flat dollar amount – (See computation of the flat dollar amount below)

(B) Percentage of income - An amount equal to the applicable percentage for the year (see table) multiplied by the taxpayer's household income for the year exceeds the taxpayer's income tax filing threshold.

Flat Dollar Amount – The flat dollar amount is the **lesser of**:

1. The sum of the applicable dollar amounts (see table above) for all individuals who were not covered for the month *or*
2. 300% of the per adult penalty (maximum $2,085 in 2018).

Example - Unmarried taxpayer without minimum essential coverage *- In 2018, Gil is an unmarried individual, under age 65, with no dependents who doesn't have minimum essential coverage for any month in 2018. Gil's household income is $120,000 and his applicable filing threshold is $12,000. The annual national average bronze plan premium for Gil is $3,264 (Note: we are using the 2017 value since the 2018 value was not available at the time this chapter was updated.) For each month in 2018, from the table, Gil's applicable dollar amount is $695.*

- *Gil's flat dollar amount is* ***$695*** *(the lesser of $695 or $2,085 ($695 x 3)).*
- *Gil's percentage of excess household income amount is* ***$2,700*** *(($120,000-$12,000) x 0.025).*
- *The monthly penalty is 1/12 of the greater of foregoing amounts. Therefore, the monthly penalty amount is $225 ($2,700/12)). Of course the sum of the* ***monthly penalty amounts*** *is ($2,700, unless Gil qualifies for the short coverage gap grace period (explained later in this chapter).*
- *The penalty is the lesser of the sum of the monthly penalty amounts (($2,700) and the cost of the bronze coverage ($3,264). Thus the penalty is $2,700.*

Why Are Monthly Amounts & Annual Amounts Determined?

As you went through the example above you probably asked yourself, why do I compute an annual amount and then divide it by 12 and then turn around and multiply it by 12 again to get the annual amount? There is a logical reason. Even though the percentage of income calculation is based upon annual household income less the filing threshold amount times a fixed percentage, the flat dollar amount could change during the year due to marriage, death, children, etc. Thus if the dollar amount turns out to be the greater amount, the sum of those dollar amounts will be used and each month may be different.

If an applicable individual has not attained the age of 18 as of the beginning of a month, the "applicable dollar amount" for the month will be equal to one-half of the amount shown in the table divided by 12.

NOTE: The 1040 includes a check box, for example on line 61 on the 2017 form (1040-EZ, line 11; 1040-A, line 38) that indicates "Full Year" coverage. If that box is checked it is presumed that the taxpayer is not subject to a shared responsibility payment for the year and the penalty computation is not required.

Penalty Computation Form: The following is a reproduction of the shared responsibility payment (penalty) worksheet taken from the instructions for Form 8965. There is no penalty form that is included with the return. The penalty is computed on the worksheet and transferred directly to line 61 of the 1040

PENALTY EXEMPTIONS

The following table is based on the instructions for Form 8965. (See next page)

Coverage Exemption	Granted By Marketplace	Claimed On Return	Code For Exemption
Income below the filing threshold — Taxpayer's gross income or household income was less than the taxpayer's applicable minimum threshold for filing a tax return.		√	No Code
Coverage considered unaffordable — The minimum amount the taxpayer would have paid for premiums is more than 8.16% of the taxpayer's household income.		√	A
Short coverage gap — Taxpayer went without coverage for less than 3 consecutive months during the year.		√	B
Citizens living abroad and certain noncitizens — Taxpayer was: • A U.S. citizen or resident alien physically present in a foreign country or countries at least 330 full days during any period of 12 consecutive months; • A U.S. citizen who was a bona fide resident of a foreign country or U.S. territory for an uninterrupted period that includes an entire tax year; • A bona fide resident of a U.S. territory; • A resident alien who was a citizen or national of a foreign country with which the U.S. has an income tax treaty with a nondiscrimination clause, and was a bona fide resident of a foreign country for the entire tax year; • Not lawfully present in the U.S and not a U.S. citizen or U.S. national. For more information about who is treated as lawfully present for purposes of this coverage exemption, visit healthcare.gov; or • A nonresident alien, including (1) a dual-status alien in the first year of U.S. residency and (2) a nonresident alien or dual-status nonresident alien who elects to file a joint return with a U.S. spouse. This exemption not applicable for a nonresident alien who for the year met certain presence requirements and elected to be treated as, a resident alien. more information see Pub 519.		√	C
Members of a health care sharing ministry — The taxpayer was a member of a health care sharing ministry.		√	D
Members of Indian tribes — Taxpayer was either a member of a Federally recognized Indian tribe, including an Alaska Native Claims Settlement Act (ANCSA) Corporation Shareholder (regional or village), or was otherwise eligible for services through an Indian health care provider or the Indian Health Service.	*	√	E
Incarceration — The taxpayer was in a jail, prison, or similar penal institution or correctional facility after the disposition of charges.		√	F
Aggregate self-only coverage considered unaffordable — Two or more family members' aggregate cost of self-only employer sponsored coverage was more than 8.16% of household income, as was the cost of any available employer sponsored coverage for the entire family.		√	G
Resident of a state that did not expand Medicaid — The taxpayer's household income was below 138% of the federal poverty line based on family size and at any time in 2017 the taxpayer resided in a state that didn't participate in theedicaid expansion under the Affordable Care Act.		√	G
Member of tax household born or adopted during the year — The months before and including the month that an individual was added to the taxpayer's tax household by birth or adoption. Claim only if also claiming another exemption on Form 8965.		√	H
Member of tax household died during the year – The months after the month that a member of the tax household died during the year. Claim this exemption only if taxpayer is also claiming another exemption on Form 8965.		√	H
Members of certain religious sects — The Marketplace determined that the taxpayer is a member of a recognized religious sect.	√		ECN Required
Ineligible for Medicaid based on a state's decision not to expand Medicaid coverage — The Marketplace found that the taxpayer would have been determined ineligible for Medicaid solely because the state in which taxpayer resided didn't participate in Medicaid expansion under the ACA.	√		ECN Required
General hardship — Marketplace determined taxpayer experienced a hardship that prevented him/her from obtaining coverage under a qualified health plan.	√		ECN Required
Coverage considered unaffordable based on projected income — Marketplace determined taxpayer didn't have access to coverage that is considered affordable based on taxpayer's projected household income.	√		ECN Required
Certain Medicaid programs that are not minimum essential coverage —Marketplace determined taxpayer was (1) enrolled in Medicaid coverage provided to a pregnant woman that is not recognized as minimum essential coverage; (2) enrolled in Medicaid coverage provided to a medically needy individual (also known as Spend-down Medicaid or Share-of-Cost Medicaid) that is not recognized as minimum essential coverage; or (3) enrolled in Medicaid coverage provided to a medically needy individual, and was without coverage for other months because the spend-down had not been met.	√		ECN Required
The coverage exemptions for members of Indian tribes, is no longer granted by the Marketplace, except in Connecticut. See the instructions for Part 1, later, to claim the exemption.			

ADDITIONAL EXPLANATIONS FOR EXEMPTIONS

Line 7a Check Box – Household income below filing requirement - Taxpayers with household income below the income tax filing threshold are automatically exempt from the shared responsibility penalty. If the individual taxpayer qualifies under this exemption then everyone in the taxpayer's tax household is exempt for the entire year. If for some reason the taxpayer wishes to file a return, the 8965 must be attached and the "yes" box checked on line 7a. Of course the household gross income includes the taxpayer's MAGI and the MAGIs of all members of his or her tax family that are required to file a return.

2017 Filing Thresholds

Single <65:	$10,400	MFJ both under 65:	$20,800	SS <65:	$16,750
Single 65+:	$11,950	MFJ one 65+:	$22,050	SS 65+:	$$18,000
HH <65:	$13,400	MFJ both 65+:	$23,300		
HH 65+:	$14,950	MFS:	$4,050		

2018 Filing Thresholds

Single <65:	$12,000	MFJ both under 65:	$24,000	SS <65:	$24,000
Single 65+:	$13,600	MFJ one 65+:	$25,300	SS 65+:	$25,300
HH <65:	$18,000	MFJ both 65+:	$26,600	MFS <65:	$5
HH 65+:	$19,600			MFS 65+:	$5

Code A - Coverage considered unaffordable – For 2018 this exemption applies to individuals who cannot afford coverage because their required contribution for employer-sponsored coverage or the lowest cost "bronze plan" in the local Insurance Marketplace exceeds 8.05% (8.16% in 2017) of household income. If self-only coverage is affordable to an employee, but family coverage is unaffordable, the employee is subject to the penalty if he does not maintain minimum essential coverage. However, any individual eligible for employer coverage due to a relationship with an employee (e.g. spouse or child of employee) is exempt from the penalty if that individual does not maintain minimum essential coverage because family coverage is not affordable (i.e., exceeds 8.05% of household income). The final regulations provide that, when determining whether an individual is exempt based on inability to afford coverage, the taxpayer's household income is increased by the portion of the required contribution made through a salary reduction arrangement and excluded from gross income.

Code B - Short Coverage Gap Grace Period – No penalty is assessed for individuals who do not maintain health insurance for a continuous period of **less than three** full calendar months that is the first short coverage gap of the tax year. If an individual exceeds the gap limit during the taxable year, the penalty for the full duration of the gap during the year is applied. If there are multiple gaps in coverage during a calendar year, the exemption from penalty applies only to the first such gap in coverage.

> ***Example –*** *Della has minimum essential coverage in 2018 from Jan. 1 through March 2, when she quits her job and loses coverage under her employer's plan, and again beginning June 15 when she starts work with a new employer and has coverage under the new employer's plan. Thus Della has the required coverage for Jan., Feb., March and June through December. Her continuous period without coverage is two months, April and May, so she's eligible for penalty exemption under the short coverage gap exception. If Della's coverage with the new employer wasn't effective until July 1, she would have had a 3-month continuous period without coverage (April, May, June), which would not be considered a short gap in coverage and she would be subject to penalty for those 3 months. (based on Reg 1-5000A-3(j)(2) and (4), Examples 1 and 2)*

The following example illustrates the rule provided in Reg 1-5000A-3(j)(3) for gaps spanning two years:

> ***Example*** *- Fay, an unmarried individual with no dependents, has minimum essential coverage for the period January 1 through October 15, 2017. Fay is without coverage until enrolling in an eligible employer-sponsored plan effective February 15, 2018. She files her tax return for 2017 on March 10, 2018. Under the regulations, November and December of 2017 are treated as a short coverage gap. However, November and December of 2017 are included in the continuous period that includes January 2018. The continuous period for 2018 is not less than 3 months and, therefore, is not a short coverage gap.*

Code C – Citizens living abroad and certain noncitizens – No penalty is assessed on an individual who is a U.S. citizen or resident alien who was physically present in a foreign country or countries for at leas 330 full days during any period of 12 consecutive months or a U.S. Citizen who is a bona fide resident of a foreign country or U.S Territory or is neither a U.S. citizen or U.S. national nor an alien lawfully present in the U.S.

Code D – Members of a health care sharing ministry – IRC Sec. 5000A(d)(2) provides religious exemption from the penalty for being insured for members of health care sharing ministries. As defined in that section of the code, a "health care sharing ministry" is a 501(c)(3) organization that is exempt from taxation under section 501(a), and its members:

- Share a common set of ethical or religious beliefs,
- Share medical expenses among members in accordance with those beliefs and without regard to where a member resides or whether or not he or she is employed, and
- Retain membership even after they develop a medical condition.

Furthermore, the organization or a predecessor must have been in existence at all times since December 31, 1999; medical expenses of its members must have been shared continuously and without interruption since at least December 31, 1999; and an annual audit must be performed by an independent certified public accounting firm in accordance with generally accepted accounting principles and made available to the public upon request.

Christian Healthcare Ministry applied for and was granted an exemption in a letter issued January 14, 2014, from the Department of Health and Human Services (HHS) under 5000A. However, the letter also stated that although HHS was granting the exemption, it did not reflect any decision by the IRS as to Christian Healthcare Ministry's compliance with the Internal Revenue Code. So while they are technically not covered by health care insurance, participants in this health care cost-sharing program are eligible for exemption from the shared responsibility penalty.

For the penalty exception, use Code D in Part III of the Form 8965 for any month that the taxpayer and any member of the taxpayer's household were members of the Christian Healthcare Ministry's health care cost-sharing program. Enter the code in column (c), and identify the months to which the coverage exemption applies. For a full year, check Column (e). If not a full year, check the months covered in columns (d) through (p) (Form 8965 instructions). Part I and II of the 8965 would generally be left blank.

Code E – Members of Federally recognized Indian Tribes – Taxpayers that are members of a Federally recognized Indian Tribe are exempt and may have been provided an ECN by the Marketplace. If so, complete Part I of the 8965. If an ECN was not provided the exemption can still be claimed by completing Part III of the 8965.

Code F – Incarcerated Individuals - Taxpayers that are in a jail, prison, or similar penal institution or correctional facility after the disposition of charges are exempt The exemption can be claimed by completing Part III of the 8965.

Code G - Self-only employer-sponsored coverage is more than 8.05% in 2018 (DOWN from 8.16% in 2017) of household income - Two or more family members' aggregate cost of self-only employer-sponsored coverage is more than 8.05% of household income, as is the cost of any available employer-sponsored coverage for the entire family. Note this exception requires the completion of the *affordability worksheet* included in the instructions for the 8965.

Code G - Resident of a state that did not expand Medicaid — Taxpayer's household income was below 138% of the federal poverty line for the taxpayer's family size and at any time in 2018 the taxpayer resided in a state that didn't participate in the Medicaid expansion under the Affordable Care Act.

Code H - Member of tax household born, adopted, or died — During 2018 a child was added to the taxpayer's tax household by birth or adoption, or a member of the tax household died during the year and the full-year coverage checkbox on the tax return can't be checked. For births and adoptions, the exemption applies to the months before and including the birth or adoption, and for deaths, the exemption applies for the months after the month the family member died. These exemptions only apply if also claiming another exemption on the 8965.

ECN Number Required - Members of certain religious sects — In order for a taxpayer to claim an exemption as a member of a recognized religious sect he or she must obtain an exemptions certificate number (ECN) from the marketplace. A recognized religious sect is a religious sect in existence since December 31, 1950, that is recognized by the Social Security Administration as conscientiously opposed to accepting any insurance benefits, including Medicare and social security.

Part I – ECN Number Required – General hardship – See discussion below.

Part I – ECN Number Required – No access to coverage based on household income - Taxpayer does not have access to affordable coverage based on his or her projected household income. This exception requires completing Part I of the 8965 and requires an exemption certificate number (ECN).

Part I – ECN Number Required – Certain Medicaid programs that are not minimum essential coverage — Taxpayer was enrolled in:

(1) Medicaid coverage provided to a pregnant woman that is not recognized as minimum essential coverage;

(2) Medicaid coverage provided to a medically needy individual (also known as Spend-down Medicaid or Share-of-Cost Medicaid) that is not recognized as minimum essential coverage; or

(3) Medicaid, and received minimum essential coverage for one or more months of the year by meeting a spend-down, but not in other months because the spend-down had not been met.

APPLYING FOR EXEMPTIONS WHERE ECN NUMBERS ARE REQUIRED

Self-Certifying - As a result of President Trump's very first executive order, the Centers for Medicare & Medicaid Services (CMS) announced on September 12, 2018 that consumers can claim a hardship exemption for not purchasing health insurance and avoid the shared responsibility penalty (penalty for not being insured) by either:

- Obtaining an ECN through the existing application process, or
- Simply entering the hardship code on their federal income tax return (self-certify).

However, CMS cautioned that consumers should keep with their other tax records any documentation that demonstrates qualification for the hardship exemption.

Applying For An ECN - A number of exemptions require approval in the form of one or more exemption certificate numbers (ECN). ECNs are obtained by filing an application available at www.healthcare.gov. Here are the appropriate links:

Application Form: http://marketplace.cms.gov/applications-and-forms/hardship-exemption.pdf

Hardship Exemptions - The following is a full list of situations (for 2017) that qualify for a hardship exemption and the documentation required. (See next page)

Hardship Number	Category	Documentation Required
1	Homeless	None
2	Evicted in the past 6 months or were facing eviction or foreclosure.	Copy of eviction or foreclosure notice
3	Received a shut-off notice from a utility company	Copy of shut-off notice from a utility company
4	Recently experienced domestic violence.	None
5	Recently experienced the death of a close family member.	Copy of death certificate, copy of death notice from newspaper, or copy of other official notice of death
6	Experienced a fire, flood, or other natural human-caused disaster that caused substantial damage to taxpayer's property.	Copy of police or fire report, insurance claim, or other document from government agency, private entity, or news source documenting event
7	Filed for bankruptcy in the last 6 months	Copy of bankruptcy filing
8	Had medical expenses the taxpayer couldn't pay in the last 24 months.	Copies of medical bills
9	Experienced unexpected increases in necessary expenses due to caring for an ill, disabled, or aging family member.	Copies of receipts related to care
10	Expect to claim a child as a tax dependent who's been denied coverage in Medicaid and the Children's Health Insurance Program (CHIP) for 2017, and another person is required by court order to give medical support to the child. (Penalty for child is waived in this case.)	Copy of medical support order AND copies of eligibility notices for Medicaid and CHIP showing that the child has been denied coverage
11	As a result of an eligibility appeals decision, the taxpayer is eligible either for: 1) Enrollment in a qualified health plan (QHP) through the Marketplace, 2) Lower costs on your monthly premiums, or 3) Cost-sharing reductions for a time period when the taxpayer wasn't enrolled in a QHP through the Marketplace in 2016.	Copy of notice of appeals decision
12	Taxpayer was determined ineligible for Medicaid because his/her state didn't expand eligibility for Medicaid in 2017 under the Affordable Care Act.	Copy of notice of denial of eligibility for Medicaid
13	Taxpayer received a notice saying that his/her "grandfathered" individual health insurance plan (that taxpayer had since 3/23/2010 or before) was cancelled because it doesn't meet the ACA requirements, and taxpayer believes other Marketplace plans are unaffordable.	Copy of notice of cancellation
14	Taxpayer experienced another hardship in obtaining health insurance.	Please submit documentation if possible

Hardship exemptions usually cover the month before the hardship, the months of the hardship and the month after the hardship, but the Marketplace may provide for a longer exemption period, up to a full calendar year.

Family Glitch Issue

The term "family glitch" refers to how some low-to-moderate-income families may be locked out of receiving financial assistance to purchase health coverage through the health insurance Marketplaces. It is based on two facts:

(1) The term "affordable" is based solely on individual coverage and does not take into consideration cost of family coverage.

(2) If an employer offers affordable coverage to the employee, the affordable criteria has been met and thus the family is not qualified for the premium tax credit.

As a result, even though the insurance is affordable for the employee, the other members of the family cannot get an insurance subsidy through the Marketplace. If they do, it will have to be repaid when they file their return.
This situation does qualify for an exemption to the penalty, and if the family income is below 133% of the federal poverty level, the children should qualify for free or low cost CHIP coverage.

TRANSFERRING THE COVERAGE EXEMPTIONS TO THE PENALTY WORKSHEET

Where a family member has an exemption for the month or the year, **DO NOT** check the corresponding months for that individual on the penalty worksheet.

OTHER ISSUES & DEFINITIONS

Minimum Essential Coverage – The following are types of minimum essential coverage. Individuals could be enrolled in more than one type of coverage for the year, so it is important to consider all coverages when determining how many qualifying months of coverage an individual has:

Employer Sponsored Coverage:

- Group health insurance coverage for employees under—
  - A governmental plan, such as the Federal Employees Health Benefit program
  - A plan or coverage offered in the small or large group market within a state
  - A grandfathered health plan offered in a group market
- A self-insured health plan for employees

- COBRA coverage
- Retiree coverage
- Coverage under an expatriate health plan for employees

Individual Health Coverage:
- Insurance purchased directly from an insurance company
- Health insurance purchased through the Marketplace
- Health Insurance provided through a student health plan
- Catastrophic plans
- Coverage under an expatriate health plan for non-employees such as students and missionaries

Government Sponsored Plans:
- Medicare Part A coverage
- Medicare Advantage plans
- Most Medicaid coverage*
- Children's Health Insurance Program (CHIP)
- Most types of TRICARE coverage
- Comprehensive health care programs offered by the Department of Veterans Affairs
- Health coverage provided to Peace Corps volunteers
- Department of Defense Nonappropriated Fund Health Benefits Program
- Refugee Medical Assistance
- Coverage through a Basic Health Program (BHP) standard health plan

Other Minimum Essential Coverage: See list of plans whose coverage has been recognized as Minimum Essential Coverage (MEC) through the Centers for Medicare & Medicaid Services (CMS) application process at: https://www.cms.gov/CCIIO/Programs-and-Initiatives/Health-Insurance-Market-Reforms/Downloads/MEC_PublicList_for-508_FINAL_02-01-17.pdf

**Medicaid programs that provide limited benefits generally don't qualify as minimum essential coverage. However, a hardship exemption may be obtained from HHS for individuals with certain types of limited-benefit Medicare coverage.*

DEFINITIONS & OTHER ISSUES:

CHIP - is short for the Children's Health Insurance Program – free or low cost insurance to uninsured children and teens (up to age 19) of low-income families who are not eligible for or enrolled in Medical Assistance. Generally, eligibility for CHIP coverage applies for families with incomes up to 200% of the federal poverty level.

CHIP Buy-in Programs - In Notice 2015-37, the IRS has determined that individuals who qualify and enroll in Children's Health Insurance (CHIP) "buy-in" programs that HHS has designated as minimum essential coverage are treated as eligible for minimum essential coverage (and thus eligible for the premium tax credit and avoid the penalty for not having coverage).

In certain states, certain individuals in households with income exceeding eligibility levels for CHIP may enroll in coverage resembling coverage under the state's CHIP program. These programs, commonly called CHIP "buy-in" programs, generally require the payment of premiums with little or no government subsidy.

TRICARE - is a health benefit program for all seven uniformed services. Individuals must be listed by the Defense enrollment Eligibility Reporting System as being eligible for military health care benefits.

Definition of a Month for Coverage - For any calendar month, an individual is treated as having minimum essential coverage if the individual is enrolled in and entitled to receive benefits under a qualifying program or plan for at least one day. (Reg. § 1.5000A-1(b))

Liability for Dependent Coverage – Under Code Sec 5000A, nonexempt individuals are subject to the penalty for any dependent that **may** be claimed on their tax return not just those that they actually claim. The penalty applies regardless of whether or not the the potential dependent is claimed (Reg Sec 1.5000A-1(c)).

This will prove to be a problem in divorce situations where one parent has custody of a child and claims the child as a dependent, but the noncustodial parent is required by the divorce decree to pay for medical insurance, and has not done so or has purchased coverage that does not meet the minimum essential coverage requirement. The final IRS regulations make no exception for these circumstances and the custodial parent is liable for the penalty. However, Health and Human Services (HHS) has addressed this situation in guidance that permits Exchanges (Marketplaces) to grant a hardship exemption under 45 CFR 155.605(g)(1) to the custodial parent for a child in this situation if the child is ineligible for coverage under Medicaid or the Children's Health Insurance Program (CHIP). See HHS Center for Consumer Information & Insurance Oversight, Guidance on Hardship Exemption Criteria and Special Enrollment Periods (June 26, 2013). (T.D. 9632, Summary of Comments and Explanation of Revisions)

If an individual may be claimed as a dependent by more than one taxpayer in the same year, the taxpayer who properly claims the individual as a dependent is liable for the shared responsibility payment attributable to the individual. If more than one taxpayer may claim an individual as a dependent in the same year but no one claims the individual as a dependent, the taxpayer with priority under the dependency tie-breaker rules to claim the individual as a dependent is liable for the individual's shared responsibility payment. (Reg 1.5000A-1(c)(2))

Family Size - For computing a taxpayer's shared responsibility payment with respect to any nonexempt individual included in the taxpayer's shared responsibility family, the final regs clarify that the applicable family size involved for purposes of identifying the appropriate bronze level plan includes only the nonexempt members of the taxpayer's shared responsibility family who do not have minimum essential coverage. (Reg. § 1.5000A-4)

Household Income - Household income is the sum of the modified adjusted gross incomes (MAGIs) of the taxpayer and all individuals accounted for in the family required to file a tax return for that year. A taxpayer's family means the individuals for whom the taxpayer properly claims a deduction for a personal exemption under Sec 151 for the taxable year (this would only apply for years 2014 – 2017 since the TCJA suspended the exemption deduction for 2018). Modified AGI means AGI increased by all tax-exempt interest and excluded foreign earned income (Code Sec. 5000A(c)(4)). **Note:** Even though an individual is liable for the penalty for dependents they may claim (even if they don't), they are only required to include in household income the MAGI of the dependents they actually claimed.

Kiddie Tax - If a parent makes the election to include the child's income on their return, household income includes the child's gross income included on the parent's return and the child is treated as having no gross income (Reg. 1.5000A-1(d)(10)(ii)).

Drop Dependents? Based on the regulations, even if a dependent is not claimed, a taxpayer who could claim the exemption is still stuck with the penalty. However, under those same regulations, only the MAGI of a dependent actually claimed and who is required to file a return is counted in determining the penalty under the percentage of income method.

Before dropping a dependent, one must consider the tax benefits lost by not claiming a child, such as exemption amount (pre-2018), child credit, childcare deduction, EITC, etc. To make things further complicated, even if the benefits outweigh the additional penalty, the refund may be taken to pay the penalty.

Adopted Children - Special rules apply to individuals who are adopted or placed in foster care during a tax year. (Reg. § 1.5000A-1(c)(2)(ii)) In general, if a taxpayer legally adopts a child and is entitled to claim the child as a dependent for the tax year when the adoption occurs, the taxpayer is not liable for a shared responsibility payment attributable to the child for the month of the adoption and any preceding month. Conversely, if a taxpayer who is entitled to claim a child as a dependent for the tax year places the child for adoption during the year, the taxpayer is not liable for a shared responsibility payment attributable to the child for the month of the adoption and any following month.

Penalty Enforcement - For a joint return, the individual and spouse are jointly liable for any penalty payment. Under Sec 5000A(g) the penalty for failing to carry health insurance "shall be paid upon notice and demand by the Secretary, and shall be assessed and collected in the same manner as an assessable penalty" under Code Sec. 6671 through 6725. Thus the IRS will not be permitted to:

(i) file a notice of lien with respect to any property of a taxpayer by reason of any failure to pay the penalty, or

(ii) levy on any property of a taxpayer with respect to such a failure.

However, the authority to offset refunds or credits is not so limited. Noncompliance with the personal responsibility requirement to have health coverage is not subject to criminal or civil penalties under the Code and interest does not accrue for failure to pay such assessments in a timely manner. (Committee Report) Therefore enforcement is generally limited to seizing a refund.

CALIFORNIA DIFFERENCES

NOTE: California has decided to pick up where the Feds left off with one intervening year. So, for 2019 neither CA nor the Federal return will include a penalty. But beginning in 2020 CA will begin imposing an individual mandate on Californians generally following the former Federal Guidelines. See the details below.

INDIVIDUAL MANDATE

While the TCJA essentially repealed the federal requirement for individuals to have health insurance coverage or be penalized, effective 2019, California's legislature enacted SB 78 (signed by the governor 6/27/2019) that created new Title 24 in the Government Code (sections 100700 – 100725) imposing an individual mandate on Californians. For each month beginning on or after January 1, 2020, a California resident must be enrolled in and maintain minimum essential coverage for that month for him- or herself, spouse, and dependents except in the situations listed below:

(1) An individual who has in effect a certificate of exemption for hardship or religious conscience issued by the Exchange (Covered California) for that month.

(2) An individual who, for that month, is a member of a health care sharing ministry defined the same as in IRC Sec 5000A(d)(2)(B) on January 1, 2017.

(3) An individual who is incarcerated for that month, other than incarceration pending the disposition of charges.

(4) An individual who is not a citizen or national of the United States and is not lawfully present in the United States for that month.

(5) An individual who is a member of an Indian tribe, as defined in IRC Sec 45A(c)(6), during that month.

(6) An individual for whom that month occurs during a period when the individual's tax home is in a foreign country (i.e., meets either the bona fide resident or substantial presence test of IRC Sec 911).

(7) An individual who is a bona fide resident of a possession of the United States, as determined under IRC Sec 937(a), for that month.

(8) An individual who is a bona fide resident of another state for that month.

(9) An individual who is enrolled in limited or restricted scope coverage under the Medi-Cal program or another health care coverage program administered by and determined to be substantially similar to limited or restricted scope coverage by the State Department of Health Care Services for that month.

Individuals, other than those listed above who fail to have minimum essential coverage, or who qualify for one of the exceptions noted below, will be subject to an individual shared responsibility penalty (new R&TC Sec 61015), calculated in much the same way as the federal penalty was. The penalty is the lesser of:

(a) The sum of the monthly penalty amounts (defined below) for months in the taxable year during which one or more of the failures occurred, or

(b) An amount equal to one-twelfth of the state average premium for qualified health plans that have a bronze level of coverage for the applicable household size involved, and are offered through the Covered California for plan years beginning in the calendar year with or within which the taxable year ends, multiplied by the number of months in which a failure occurred.

The monthly penalty amount is one-twelfth of the greater of (1) or (2) below:

(1) An amount equal to the lesser of either of the following:

(a) The sum of the applicable dollar amounts for all applicable household members who failed to enroll in and maintain minimum essential coverage. The applicable dollar amount is $695 ($347.50 for individuals under age 18 as of the beginning of the month) and is subject to inflation adjustment.

(b) 300% of the applicable dollar amount determined for the calendar year during which the taxable year ends.

(2) An amount equal to 2.5% of the excess of the responsible individual's applicable household income for the taxable year over the amount of gross income that would trigger the responsible individual's requirement to file a state income tax return (the applicable filing threshold), for the taxable year.

If an individual who is subject to the state's shared responsibility penalty fails to timely pay it, the individual is not subject to a criminal prosecution or penalty with respect to that failure and the FTB may not place a lien on or levy any real property of the individual. (R&TC 61025(b)(1) and (2)) Otherwise, the individual would be subject to the usual FTB notice and collection actions.

Exceptions to the Penalty – No penalty applies if:

- The responsible individual's required contribution, determined on an annual basis, for coverage for the month exceeds 8.3% (as adjusted for inflation) of that responsible individual's applicable household income for the taxable year.
- The responsible individual's applicable household income for the taxable year containing the month is less than the amount of adjusted gross income or gross income specified for that taxable year for the return filing requirement.
- The last day of the month occurred during a period in which the applicable household member did not maintain minimum essential coverage for a continuous period of three months or less.

NOTES

CASE STUDIES

CASE STUDY #1 - (Married Couple – Employer Does or Does Not Offer Coverage) – 2019 Return

In this case we will look at the various possibilities for Jack, who is married to Jill, and works for ABC Manufacturing. Jill does not work. Here are the facts of Jack's situation:

- Jack & Jill's annual household income: **$31,930**
- Number in household is: **2**
- Poverty level (2018 poverty table used for **2019** returns; page 12.02.04) is: **194% ($31,930/(12,140 + 4,320))**
- Applicable percentage (table page 12.02.07 – using 2018 table since 2019 table not available) is: **.0606**
- Jack & Jill's monthly baseline premium is: **161.25** (($31,930 x .0606) /12).

> **161.25** is the monthly amount the government feels Jack and Jill should pay towards their own insurance.

Assume the cost of Jack & Jill's insurance, second lowest cost Silver *(SLCSP),* from an Exchange is: **$450 per month.**

- Then Jack and Jill's monthly Premium Tax Credit (or Advance PTC) is: **$288.75** (450 – 161.25).

> The credit (or subsidy) is the difference between the cost of the Silver *(SLCSP)* level of coverage, **$450** per month, less the amount that the government feels they should pay towards their own insurance, **161.25** per month, or **$288.75** per month.

- The national average premium for Bronze coverage for a couple (page 12.03.02) is: **$566 per month** (using the 2018 amount for this example since the 2019 amount wasn't available at publication time)
- If Jack & Jill are uninsured in 2019 there is no penalty since TCJA set the penalty amounts to zero**.**

Scenario A: - If **<u>ABC DOES NOT offer a health care plan OR does not offer an affordable plan:</u>**

(1) ***<u>Jack and Jill</u>*** may choose to purchase a health plan through an Insurance Exchange (Marketplace), and regardless of the level of coverage they select, they will qualify for the **$288.75** per month premium tax credit (PTC). The premiums for health insurance purchased through an exchange are based upon coverage, the insured's ages and location of residence. The credit can be taken as an advance premium tax credit (APTC), or as credit on their tax return, or some of both. But it will be reconciled on the tax return for the year and if the APTC exceeds the PTC, some portion of it must be paid back. For example if they chose the Silver coverage at $450 per month, and the APTC, Jack and Jill's monthly out-of-pocket **premium cost would be $161.25** ($450.00 - $288.75) .

(2) ***<u>Jack and Jill</u>*** could choose not to have the advance payment (subsidy) applied to their monthly premium and instead claim a tax credit of $3,465 ($288.75 x 12) when they file their 2019 return. The amount of the credit that exceeds their tax is refundable. Generally most taxpayers who are eligible utilize the advance payment to subsidize their premium and have less to pay each month for their insurance coverage.

(3) ***<u>Employer Consequences</u>*** –If Jack's employer, ABC, had fewer than 50 employees in the prior year there are no consequences for ABC.

- If ABC had 50 or more equivalent employees in the prior year, and Jack or another full-time employee is enrolled in and qualifies for the advance premium tax credit (subsidy), then the employer will be subject to the large employer excise tax for not offering affordable health care.

Scenario B: - **<u>ABC is a large employer and DOES offer an affordable health care plan:</u>**

(1) **Jack and Jill** can purchase their insurance through ABC's plan. Concerns: (1) If ABC offers affordable minimum essential coverage, Jack and Jill DO NOT qualify for the premium tax credit (PTC) or advance PTC. (2) Jack's employer may or may not supplement the cost of Jack's insurance. (3) The premiums paid by ABC

for Jack and Jill's health insurance are excludable from Jack's W-2. (4) To be classified as affordable only the portion of the premiums for Jack's coverage needs to meet the affordable criteria.

(2) If the premiums for Jack's coverage alone through ABC's plans meet the affordable criteria, then Jack is not qualified for the premium tax credit. This is true even if ABC's coverage for Jack and Jill together does not meet the affordable criteria. In such a case, Jack would not qualify for the PTC or APTC through an Exchange, but **Jack** could purchase his coverage through his employer's plan and benefit from any employer subsidy while **Jill** could purchase insurance through an Exchange and qualify for the PTC and could choose an advance PTC (subsidy).

> **PROBLEM:** In this case, Jack and Jill probably wish Jack's employer did not offer qualified affordable health care insurance, since that fact disqualifies Jack from the PTC and APTC and could actually make their insurance coverage more expensive.

(3) **Jack and Jill** can choose not to have insurance. The TCJA made the penalty $0 for individuals who don't have health insurance coverage, effective for 2019 and later years.

(4) ***Employer Consequences:***

a. If for 2019 ABC has 25 or fewer employees with an average wage of $54,200 or less and pays at least 50% of the cost of the employee's coverage, ABC would qualify for the small employer health insurance credit, provided ABC purchases the insurance through an Insurance Exchange and ABC hasn't claimed the credit in two prior years. These Exchanges are not the same ones that individuals will use to purchase health insurance. The Exchanges for small employers are covered under the Small Business Health Options Program (SHOP) – see Chapter (section) 12.08 and https://www.healthcare.gov/what-is-the-shop-marketplace/ for additional information.

b. If for 2019 ABC has fewer than 50 employees in the prior year and does not qualify for the small employer credit then there are no consequences.

c. If for 2019, ABC has fewer than 50 employees (under a provision of the "21st Century Cures Act" beginning for 2017) ABC may reimburse its employees under a health reimbursement arrangement (HRA) for medical expenses without being liable for a $100 per day draconian penalty (IRC Sec 4980D) for violating the Affordable Care Act (ACA)'s rules. See chapter 12.10.

d. If ABC has 50 or more employees in the prior year and provides affordable health care for all of its employees, there are no consequences.

e. If ABC has 50 or more employees and provides health care coverage, but has a wide range of pay scales, it is conceivable the coverage would meet the affordable criteria for some employees but not all. In those cases, should one or more of the employees go to an Exchange for insurance and qualify for a PTC/APTC the employer would be subject to the employer penalty.

CASE STUDY #2 - (Single Individual –Advance Credit-Payback) –

2019 Return - In this case we will look at the various possibilities for Mary who is employed at XYZ Industries. She is single with no dependents. Her employer does not offer health coverage. Here are the facts of Mary's situation for **2019:**

- Mary's estimated annual household income for 2019: **$34,500**
- Number in household is: **1**
- Her 2019 poverty level (from table on page 12.02.07) is: **284%** (($34,500/12,140) x 100)
- Her applicable percentage (Using 2018 amounts) is: **.0909**
- Mary's monthly baseline premium is: **$261.34** (($34,500 x .0909)/12)

> **$261.34** is the monthly amount the government feels Mary should pay towards her own insurance.

- Assume the cost of Mary's insurance (**Silver**) from an Exchange is: **$290 per month**
- Then Mary's monthly Advance Premium Tax Credit (or Subsidy) is: **$28.66** (290 – 261.34)

> The PTC is the difference between the cost of the Silver *(SLCSP)* level of coverage, **$290** per month, and the amount that the government feels Mary should pay towards her own insurance, **$261.34** per month, or **$28.66** per month.

If Mary is uninsured in 2019 there is no penalty since TCJA set the penalty amounts to zero**.**

Scenario A: Mary chooses to purchase a health plan through an Exchange, and regardless of the level of coverage she selects, and based upon her household income, she will qualify for a **$28.66** per month PTC. Mary chooses Silver coverage with a monthly premium of $290.00 per month. She also decides to take the PTC as an APTC so she pays a premium of **$261.34** (290.00 – $28.66) per month. When she has her tax return prepared her household income is the same as projected so she receives no additional premium tax credit nor does she have to repay any of the advance PTC (subsidy).

Scenario B: Same as scenario A, except Mary chooses not to utilize the advance premium tax credit so she pays a premium of $290.00 per month. When she has her tax return prepared her household income is the same as projected so she receives a premium tax credit of $343.92 ($28.66 x 12, rounded).

Scenario C: Same as scenario A, except Mary loses her job and doesn't notify the exchange of her change in income. Her actual household income for the year is only $23,340. That makes her estimated poverty level percentage 192% (($23,340/12,140) x 100). instead of the projected 290%. As a result, her applicable percentage (using 2018 values) is .0597. That changes her monthly baseline premium to $116.12 ((23,340 x .0597/12). Subtracting that from the cost of Silver coverage from the exchange we find that Mary's actual premium tax credit for the year is $2,086.56 ((290.00 – $116.12) x 12). She used $343.92 ($28.66 x 12) as an APTC, so she is entitled to the difference, $1,742.64 ($2,086.56 – $343.92), as a refundable credit on her tax return for the year.

Scenario D: Same as scenario A, except Mary receives a raise and a bonus that bring her household income for the year to $50,000. As a result Mary's income is above the 400% of poverty level limit, and she does not qualify for the PTC. Since she chose to utilize the APTC to offset her premiums based upon her projected household income and does not actually qualify for the credit based upon her actual household income, she must repay the APTC when she files her return for the year. Thus she would have to repay the full $344 APTC.

CASE STUDY #3 - (Divorced or Separated Parents) – **2019** Return

Marilee is divorced and has a child age 10. Her ex-husband, John, pays her taxable alimony of $2,000 a month and child support payments of $600 per month. She has no other income. She files as head of household in 2019.

- Marilee's annual household income for 2019: **$24,000** ($2,000 x 12)
- Number in household is: **2**
- Her poverty level from table on page 12.02.04 is: **146%** ((($24,000/(12,140 + 4,320)) x 100)
- Her applicable percentage (Using 2018 amounts) is: **.0379**
- Marilee's monthly baseline premium is: **75.80** (($24,000 x .0379)/12)
- Assume the cost of Marilee's insurance (**Silver**) from an Exchange is: **$310 per month**
- Then Marilee's monthly Premium Tax Credit (or APTC) is: **$234.20** (310 – 75.80)

If Marilee is uninsured in 2019, there is no penalty since TCJA set the penalty amounts to zero**.**

Scenario A: Marilee is unemployed and claims their child as a dependent. Since Marilee claims the child, Marilee is the one that may claim the premium tax credit for the health insurance premium she pays for her child (if the insurance is bought through an Exchange). The monthly cost of Silver coverage for her and her child is $310. Her premium tax credit is $234.20 (310 – 75.80) per month. So, Marilee's coverage will cost her 75.80 per month ($$909.60 per year), and she could lower that even further by selecting Bronze coverage instead of the Silver plan. However, under a Bronze plan her co-pays, the portion of the bills she has to pay for prescription drugs and hospital stays, plus the overall amount she could be out-of-pocket for the year generally will be higher than for a Silver plan. So Marilee will need to weigh the monthly savings of a Bronze plan against the potential extra total costs of the Bronze plan. There are no repercussions to John with respect to providing healthcare coverage for his child.

Scenario B: Same as scenario A except Marilee decides not to procure insurance. There is no penalty since TCJA set the penalty amounts to zero. There are no repercussions to John with respect to providing healthcare coverage for his child.

Scenario C: Same as scenario A, with Marilee purchasing insurance for her child through an Exchange, but pursuant to their divorce decree, John pays the premiums for the child's coverage. Because Marilee claims the child, and acquires the insurance through an Exchange, any premiums paid by John are treated as paid by Marilee and she gets the premium tax credit. Marilee could have the premiums reduced by using the APTC and only have John pay the difference. If by some chance, it turns out the APTC was excessive, then Marilee would be liable for any repayment. She could choose not to utilize the APTC and instead claim the premium tax credit on her tax return. Whether she would reimburse John for any of the credit would be at Marilee's discretion or by court order.

Scenario F: Same scenario as A except Marilee receives only $1,000 per month alimony and has no other income. Her annual Household income is $12,000 and for a family of two that is below 100% (138% in states with enhanced Medicaid) of the federal poverty level and Marilee does not qualify for the premium tax credit. Instead she qualifies for Medicaid (Medi-Cal in CA).

CASE STUDY #4 - (Young Adult – Student – Self-Supporting – Independent) – **2019 Return**

Susan, age 22, is a full-time student attending University in 2019.

Scenario A: She has no income and her parents pay all her education expenses. Because Susan is under the age of 24, is a full time student and is not self-supporting she would be a qualifying child of her parents. If her parents file a joint return, and provide minimum essential health insurance for Susan they may qualify for a premium tax credit and an APTC depending on the amount of their household income and what percentage of the poverty level it is. If they don't provide any insurance for Susan, there is no penalty for the parents or Susan since TCJA set the penalty amounts to zero.

Scenario B: Susan uses student loans to pay her tuition and school expenses and has part-time employment with an employer that does not have an affordable health care plan. Her household income consists of her employment income of $10,000. No one else contributes to Susan's support so she is self-supporting. Since her income is below 100% (138% in states with enhanced Medicaid) of the federal poverty level, Susan will not qualify for the premium tax credit. Susan would qualify for Medicaid (Medi-Cal in CA).

Scenario C: Same as scenario B except Susan makes $18,000 from her part-time employment. Her employer does not offer an affordable healthcare plan. Her income is 148% of the federal poverty level. As a result she qualifies for the PTC and APTC.

- 2019 poverty level is: **148%** ((18,000/12,140) x 100)
- Her applicable percentage (Using 2018 amounts, Page 12.02.07) is: **0.0391**
- Susan's monthly baseline premium is: **$58.65** (($18,000 x .0.0391)/12)
- Assume the cost of Susan's insurance (**Silver**) from an Exchange is: **$190 per month**
- Then Susan's monthly Premium Tax Credit (or APTC) is: **$131.35** (190 – **$58.65**)

Thus Susan' monthly insurance premium through an exchange is $58.65 for Silver coverage or less if she selects a **$175** per **month Bronze coverage**

If Susan does not buy the insurance there is no penalty since TCJA set the penalty amounts to zero**.**

Scenario D: Other things that could impact Susan's results would be non-qualified distributions from Sec 529 plans, non-qualified distributions from Coverdell accounts, and taxable scholarships which will add to her AGI and household income.

CASE STUDY #5 - (Retired Couple)

Charlie, age 66, and Joyce, age 60, are retired. The year is **2019.**

Scenario A: Charlie is covered under Medicare that qualifies as minimum essential coverage. Joyce is too young for Medicare. Charlie and Joyce's only income is $2,000 per month from Social Security. Their household income for the year is $24,000 (all of the SS is included in household income) For 2019 and later years there is no penalty if they choose not to have health insurance coverage for Joyce.

Scenario B: Same as scenario A, except Charlie takes a taxable distribution from his Traditional IRA account of $35,000. Thus $8,550 of the SS becomes taxable. The $35,000 taxable IRA distribution added to the $24,000 of SS income results in a household income of $59,000 for PTC purposes.

- **2019** poverty level is: **358%** (59,000/(12,140 + 4,320)) x 100
- Their applicable percentage (Using 2019 amounts, Page 12.02.07) is: **.0956**
- Joyce's baseline premium is: **470.03** (($59,000 x .0956)/12)
- Assume the cost of Joyce's insurance (**Silver**) from an Exchange is: **$325 per month**
- Then Joyce's monthly Premium Tax Credit (or APTC) is: **$0.00** (325 – **470.03**)

Thus Joyce's monthly insurance premium through an exchange is $325 for Silver coverage or less if she selects **Bronze coverage**. If Joyce does not buy the insurance there is no penalty since TCJA set the penalty amounts to zero.

CASE STUDY #6 - (Employee – With and Without Affordable Employer Plan)

Tricia, age 40, is self-supporting and works full time for an accounting firm. She has one 16-year-old daughter Carmen that she claims as a dependent and who qualifies Tricia to file as head of household. The daughter has a part-time job and earns $3,000. Tricia's AGI is $31,000. Because Carmen's income is below the filing threshold, Carmen's income is not included in Tricia's household income.

- Tricia's annual household income is: **$31,000**
- Number in the household: **2**
- 2019 poverty level is: **188%** (31,000/(12,140 + 4,320)) x 100
- Her applicable percentage (Using 2018 amounts, Page 12.02.07) is: **.0579**
- Tricia's monthly baseline premium is: **$149.58** (($31,000 x .0579)/12)
- Assume the monthly cost of Tricia's Silver coverage from the Exchange is: **$310**
- Then Tricia's monthly premium tax credit (or APTC) is: **$160.42** (310 – $149.58)

Scenario A: Tricia's employer does not provide a health care plan. Tricia purchases insurance for Carmen and herself through the Exchange and elects the APTC. **Her health insurance will cost her $160.42 per month $1,925 per year).** If she itemizes her deductions, she can include her out-of-pocket cost as part of her medical expenses. The premiums and the other medical expenses may end up not being deductible because of the 10% of AGI rule.

Scenario B: Tricia's employer does provide affordable health care insurance for Tricia and Carmen and supplements Tricia's premiums by $100 per month. Assuming Tricia's premiums under the employer plan are the same as in scenario A, but without APTC ($310 per month), the cost of **Tricia's health insurance is $210.00 ($310 minus the employer supplement of $100) per month ($2,520 per year).** Since Tricia's employer offers an affordable care plan Tricia does not qualify for the premium tax credit. Not considering the benefits and co-pays, Tricia's cost of insurance would be less if the employer did not have a plan and she was able to qualify for the PTC/APTC.

These comparisons show some inequities in the application of the premium tax credit, and why the government is trying to get individuals covered under employer plans by offering incentives for the small employers and penalties to large employers.

NOTES

NET INVESTMENT INCOME TAX

For Individuals the Surtax is **3.8%** of the **lesser of**:

- Taxpayer's net investment income, or
- Excess MAGI over the threshold amount.

Threshold Amounts for Individuals (not inflation adjusted):

- $125,000 for MFS
- $200,000 for S and HH
- $250,000 for MFJ and SS

For an estate or trust, the surtax is **3.8%** of the **lesser of:**

- Undistributed net investment income or
- The excess of AGI over the dollar amount at which the highest income tax bracket applicable to an estate or trust begins.

Related IRC and IRS Publications and Forms

- **Code Section 469** – Passive Activities
- **Code Section 1411 –** Net Investment Income Tax
- **Final Regulations** §1.1411-1 – §1.1411-10
- **Proposed Regulations** §1.1411-7
- **Publication 550** – Investment Income and Expense
- **Form 4952** – Investment Interest Expense Deduction
- **Form 8960**
- **Form 1040 Schedule A**

The surtax has come to be referred to as the "Net Investment Income (NII) Tax." Although passed as part of the Affordable Care Act, the tax goes to the government's general fund. This tax is imposed on individuals, estates and trusts.

For years 2018 through 2025, investment expenses are not deductible. Thus investment expenses are not deductible in determining NII for those years and not being able to deduct investment expenses in determining NII will essentially increase NII and as a result the surtax on NII.

TAX COMPUTATION

Individuals **-** For individuals, the surtax is 3.8% of the **lesser** of:

1. The taxpayer's **net** investment income or
2. The excess of modified adjusted gross income over the threshold amount ($250,000 for a joint return or surviving spouse, $125,000 for a married individual filing a separate return, and $200,000 for all others). Note: These amounts will **not** be indexed for inflation.

Example 1: *A single taxpayer has net investment income of $100,000 and MAGI of $220,000. The taxpayer would pay a NII tax only on the $20,000 amount by which his MAGI exceeds his threshold amount of $200,000, because that is less than his net investment income of $100,000. Thus, the taxpayer's NII tax would be $760 ($20,000 × 3.8%).*

Example 2: *Married taxpayers filing jointly have net investment income of $100,000, the husband has wages of $300,000, and their MAGI is $375,000. The taxpaying couple would pay a NII tax of $3,800 ($100,000 x 3.8%) since their MAGI exceeds the MAGI threshold by more than their net investment income ($375,000 – 250,000 = $125,000). Of special note: In addition to paying the net investment income tax of $3,800, the taxpayers would also pay an additional HI (Medicare) tax of $450 ($50,000 x 0.9%) on his wages in excess of $250,000 (as explained in chapter 12.06).*

Estates & Trusts **-** For an estate or trust, the surtax is 3.8% of the lesser of (Sec. 1411(a)(2)):

1. Undistributed net investment income or
2. The excess of AGI over the dollar amount at which the highest income tax bracket applicable to an estate or trust begins.

2019 TRUST & ESTATE INCOME TAX RATES

Over	Taxable Income But Not Over	Pay	Plus	Of the Amount Over
-0-	$2,600	-0-	10%	-0-
$2,600	$9,300	$260.00	24%	$2,600
$9,300	$12,750	$1,868.00	35%	$9,300
$12,750		$3,075.50	37%	$12,750

Highest Bracket Threshold

***Example 3:** In 2019 a trust has undistributed net investment income of $20,000. The highest tax bracket for a trust in 2019 begins at $12,750. The trust's AGI is $30,000. The excess of the AGI over the initiation point of the highest tax bracket is $17,250. Since $17,250 is less than the $20,000 of undistributed NII, the surtax will be $655.50 (3.8% of $17,250).*

Generally Won't Apply to Simple and Grantor Trusts
Simple trusts require all income to be distributed and don't provide for charitable contributions. Income from grantor trusts is taxable to the owner (grantor) of the trust.

Estates and trusts not subject to the Net Investment Income Tax - The following trusts are not subject to the Net Investment Income Tax:

- Trusts that are exempt from income taxes imposed by Subtitle A of the Internal Revenue Code (e.g., charitable trusts and qualified retirement plan trusts exempt from tax under section 501, and Charitable Remainder Trusts exempt from tax under section 664).
- A trust or decedent's estate in which all of the unexpired interests are devoted to one or more of the purposes described in section 170(c)(2)(B).
- Trusts that are classified as "grantor trusts" under sections 671-679.
- Trusts that are not classified as "trusts" for federal income tax purposes (e.g., Real Estate Investment Trusts and Common Trust Funds).
- Electing Alaska Native Settlement Trusts.
- Perpetual Care (Cemetery) Trusts.

DEFINITIONS

Modified Adjusted Gross Income (MAGI) - Is the taxpayer's adjusted gross income (AGI) - increased by the amount excluded from income as foreign earned income under Code Sec. 911(a)(1) (net of the deductions and exclusions disallowed for the foreign earned income). (Code Sec. 1411(d))

Net investment income - "Net" investment income (NII) is investment income reduced by investment expenses allowed which are allocable to the investment income.

Investment income – (Explained in more detail later in the chapter) Investment income includes gross income from:

- Interest, dividends, non-qualified annuities, and royalties,
- Rents (other than derived from a trade or business),
- Capital gains (other than derived from a trade or business),
- Trade or business income that is a passive activity with respect to the taxpayer, and
- Trade or business income with respect to trading financial instruments or commodities.
- Prorated state and local income tax refunds - *Since prorated taxes are allowed as a deduction against NII, then appropriate refund of those taxes must be allocated to NII in the year the refund is received.*

Exclusions from Gross Income - For surtax purposes, gross income doesn't include excluded items, such as **interest on tax-exempt bonds**, veterans' benefits, and excluded gain from the sale of a principal residence (Code Sec 1411(d)).

Investment Expenses – Expenses allowable in computing NII include deductions that are properly allocable to items of Gross Investment Income. Examples include (IRS Q&A 12):

- Investment interest expense[(1)],
- Investment advisory and brokerage fees[(1)],
- Expenses related to rental and royalty income, and
- State and local income taxes properly allocable to items included in Net Investment Income[(2)].

[(1)] *For years before 2018 and after 2025, these items are included in a taxpayer's itemized deductions. The amounts allowed are after the reduction of miscellaneous deduction by 2% of AGI and after the Pease limitation (phase out of itemized deductions) for Schedule A deductions for higher income taxpayers. If a taxpayer claims the standard deduction, investment income may **not** be reduced by these expenses when computing NII.*

[(2)]*State and local income taxes are deductible as an itemized deduction but are not part of the Tier 2 miscellaneous deductions.*

If a credit is claimed for foreign income taxes, those foreign taxes are not deductible in computing net investment income.

TCJA

CAUTION

Per TCJA, investment expenses includible as Tier 2 miscellaneous deductions are not deductible for years 2018 through 2025. Thus these investment expenses are not deductible in determining NII for those years.

Net Investment Income for Most Taxpayers

Thus, for taxpayers that don't engage in passive activities or a commodities trading business, net investment income will include non-business income from interest, dividends, annuities, rents, and capital gains less allowed deductions.

The surtax does not apply to (explained in more detail later in the chapter):

- Income from other trades or businesses conducted by a sole proprietor, partnership, or S corporation (Committee Report). However, income, gain, or loss on working capital isn't treated as derived from a trade or business and thus is subject to the tax (Code Sec. 1411(c)(3)).
- A nonresident alien,
- A trust of all the unexpired interests in which are devoted to charitable purposes,
- A trust that's tax-exempt under Code Sec. 501,
- A charitable remainder trust tax-exempt under Code Sec. 664 or
- Distributions from qualified retirement plans (qualified pension, stock bonus or profit sharing plans; qualified annuity plan; tax-sheltered annuity plan; traditional and Roth IRAs; Sec. 457(b) plans of state and local governments and tax-exempt organizations).
- Self-employment income for such taxable year on which the 0.9% HI surtax tax is imposed.

NET INVESTMENT INCOME

Net investment income is investment income less allowed investment expenses. Reg. Section 1.1411-4(a)(1) breaks the definition of "net investment income" into three subparagraphs:

(i) Gross income from interest, dividends, annuities, royalties, rents, substitute interest payments, and substitute dividend payments (as defined in Reg. Section 1.1411-1(d));

(ii) Other gross income derived from a trade or business described in Reg. Section 1.1411-5; and

(iii) Net gain attributable to the disposition of property (as described in Reg. Section 1.1411-4(d)).

The term that the tax community has begun to use in defining net investment income in the three categories above is "one little i income", "two little i income", and "three little i income."

Categories of Net Investment Income

ONE LITTLE I
Interest (including substitute)
Dividends (including substitute)
Annuities
Royalties
Rents

TWO LITTLE I
Gross income derived from a trade or business as described in Reg 1.1411-5.

THREE LITTLE I
Gain Attributable to the disposition of property.

ONE LITTLE I INCOME

This category includes income from interest, dividends, annuities, royalties, rents, substitute interest payments, and substitute dividend payments. In general, the definitions in this category are fairly straightforward with the following exceptions:

Gross income from dividends includes: corporate dividends; constructive dividends; amounts treated as distributions under Section 1248(a), relating to the gain from the sale of stock in a controlled foreign corporation; and amounts distributed by an S corporation that are treated as a dividend by virtue of the fact that the distribution is deemed to have come from earnings and profits accumulated in prior C corporation years. In the preamble to the proposed regulations, the IRS clarified that capital gain dividends from mutual funds and real estate investment trusts (REITs) are to be included as net gain "three little i income," not as dividend income.

Annuity income (other than from qualified plans) of any type, including from annuities purchased pre-2013, is subject to the tax. However, a deduction is allowed for the Code Sec 72(b)(3) unrecovered basis in a decedent's annuity (Reg. Section 1.1411-4(f)(3)(iv)).

Exceptions to being classified as investment income – there are four exceptions to being classified as investment income in this category:

1. Tax-exempt interest earned on state and local tax-exempt bonds.
2. Distributions from qualified pension plans.
3. Interest paid to an employee by an employer under a nonqualified deferred compensation plan.
4. Income earned in the ordinary course of a trade or business.

Example 4A: *Your client is in the mortgage loan business and earns interest on the loans. The interest income earned is income earned in the course of a trade or business and is* ***NOT*** *subject to the tax on investment income.*

Example 4B: *Your client is in the business of selling furniture. He also earns interest on the business' bank accounts. Since the client is not in the business of lending money, the interest income from the business accounts* ***IS*** *subject to the tax on investment income.*

Example 4C: *If your client in Example 4B also sold furniture on time and carried back the paper, then the interest earned on the notes would be income earned in the course of a trade or business and* ***IS NOT*** *subject to the tax on investment income.*

Rental Income as One Little I income – Before the proposed regulations for Sec 1411 were released many believed that qualifying as a real estate professional and materially participating in a rental activity would shield the rental income from the 3.8% unearned income tax. However, that is not enough. According to the preamble of the regulations, to be excluded **each** rental must meet the following criteria:

a) Is engaged in a trade or business under the meaning of the tax law (measured at the business level).

b) The income must be earned in the ordinary course of the trade or business (measured at the business level).

c) The income must not be passive to the individual owner (determined at the owner level).

Being a real estate professional satisfies requirements b) and c) but what about a), the requirement to be engaged in a trade or business?

Definition of a Trade or Business

There is no bright line definition of a trade or business in the over 70,000 pages of the tax code. The IRS in the final regulations relies in part on Sec 162 – Trade or Business Expenses – to help define a Trade or Business. The determination can be subjective and the regulations generally leave the determination to the taxpayer (or his preparer) to get it right. We will encounter this issue throughout the study of net investment income.

In order for a rental activity to rise to the level of a trade or business, the taxpayer's involvement in the activity must be regular, continuous, and substantial. Key factual elements that may be relevant in determining if the rental rises to the level of a trade or business include, but are not limited to, the following, according to the IRS in the preamble to the final regulations:

- Type of property (commercial real property versus a residential condominium versus personal property, for example);
- Number of properties rented;
- Day-to-day involvement of the owner or his agent;
- Type of rental (for example, a net lease versus a traditional lease, short-term versus long-term lease)

CAUTION

The IRS concedes in the preamble to the final regulations that a single rental could require **regular and continuous** involvement such that the rental activity is a trade or business under Sec 162. But the **IRS warns** that not every single property rises to the level of a trade or business as a matter of law. In addition, the IRS, in cases where other Code provisions use a trade or business standard that is the same or substantially similar to the Section 162 standard adopted in the final regulations, indicates they will closely scrutinize situations where taxpayers take the position that an activity is a trade or business for purposes of Section 1411, but not a trade or business for such other provisions. For example, if a taxpayer takes the position that a certain rental activity is a trade or business for purposes of Section 1411, the IRS will take into account the facts and circumstances surrounding the taxpayer's determination of a trade or business for other purposes, such as whether the taxpayer complies with any information reporting requirements for the rental activity imposed by section 6041.

Example 1 – Taxpayer rents a single-family residence and just collects a monthly rental check. That clearly does not rise to the level of a trade or business, and therefore the rents from that rental are subject to the 3.8% tax. But remember the tax is on the net investment income so you can deduct expenses.

Example 2 – Taxpayer owns a 20-tenant commercial rental that produces $1,000,000 in annual income. The taxpayer’s involvement in the activity is regular, continuous, and substantial. As a result, the rental activity is clearly a trade or business and not subject to the Sec 1411 tax.

Note: When the properties are sold, the gain from the property in example #1 will be subject to the 3.8% tax while the gain from the property in example #2 will not.

<u>*Limited Liability Company (LLC)*</u> – It is increasingly common for rental properties to be held in separate LLCs. The proposed regulations require that the determination of whether an activity rises to the level of a trade or business must be done at the *entity* level.

Example *– Jay owns 5 commercial properties through separate LLCs. He also owns two residential rental properties through separate LLCs. The trade or business determination must be made at the entity level, and for Sec 1411 purposes, the fact that Jay qualifies as a real estate professional and has grouped all the properties for purposes of the material participation test has no effect on the determination of whether the entity rises to the level of a trade or business. In Jay’s situation the commercial properties probably meet the trade or business requirement while the two residential rentals do not. Thus, the income from the commercial properties can be excluded from net investment income for purposes of the 3.8% surtax, while the income from the residential rentals cannot.*

Passive Income versus Trade or Business Income – Making the allocation between passive and trade or business activities in order to avoid the 3.8% tax can have some unexpected ramifications that should be carefully considered. The IRS failed to provide a bright line definition of a trade or business, and is relying on the provisions related to Sec 162 – Trade or Business Expenses.

- Because non-passive income cannot be offset by passive losses, treating profitable rental activities as a trade or business to avoid the tax on investment income will also deny them any offsetting passive losses from other passive rental activities and passive loss carryovers. It might be that passive losses will offset passive income and not create an investment tax problem in the first place.
- But treating rental activities that could be treated as a trade or business as passive in order to net passive gains and losses could have an unintended result when a rental is sold, since the gain from the sale of a passive activity is also subject to the 3.8% tax.

<u>TWO LITTLE I INCOME</u>

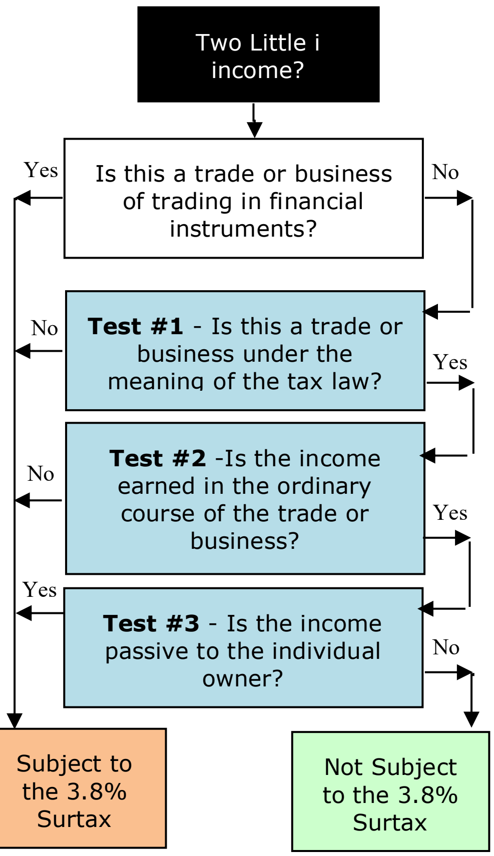
Subparagraph “two little i” of Reg. Section 1.1411-4(a)(1) operates by reference to Reg. Section 1.1411-5, stating that net investment income includes <u>all other gross income derived from a trade or business described within that regulation section which is:</u>

1. ***The trade or business of trading in financial instruments or commodities*** – this includes any and all income earned from the trading in financial instruments or commodities, regardless of whether the individual owner materially participates in the business. The regulations define “financial instruments” as stocks and other equity interests, evidences of indebtedness, options, forward or futures contracts, notional principal contracts, any other derivatives, or any evidence of an interest in any of these items, such as a short position or partial units of these items.

2. ***A passive activity*** - Under this provision, all of the income allocated to an individual owner from a business – even if the income represents normal, operating income rather than items that we normally associate with investment income, such as dividends and interest – will be included in net investment income if the activity is passive to the individual. Thus income from an S-Corporation, a partnership and a sole proprietorship will be treated as investment income unless all three of the following tests are met:
   a) The entity or sole proprietorship is engaged in a trade or business under the meaning of the tax law (measured at the business level).
   b) The income must be earned in the "ordinary course of the trade or business" (measured at the business level).
   c) The income must not be passive to the individual owner (determined at the <u>owner</u> level).

   In general, the regulations under Section 469 provide that an activity is passive to an individual unless that individual "materially participates" in the activity.

   Note: rental activities are treated as passive regardless of an individual's level of participation, unless the "real estate professional" standard is met.



<u>Material Participation</u> - The following tests determine material participation (only one test needs to be met to qualify a taxpayer as a material participant):

<u>Time Tests</u> **-** A taxpayer is a material participant in an activity if the taxpayer:

(1) Participates **500 HOURS** or more during the tax year;

(2) Provides "**SUBSTANTIALLY ALL THE PARTICIPATION"** in the activity;

(3) **SPENDS MORE THAN 100 HOURS** on the activity and nobody spends more time than this on the activity; or

(4) **SPENDS AGGREGATE TIME** over 500 hours on all "significant participation activities" (SPA's). A SPA is an activity in which the taxpayer spends over 100 hours during the year, but cannot meet one of the three other time tests.

<u>Prior participation tests</u> **-** A taxpayer may be a material participant based on prior participation rather than TIME. The taxpayer may meet either of these criteria:

(5) Participate in the activity "materially" **IN <u>ANY</u> 5 OF THE LAST 10 TAX YEARS**; or

(6) TAXPAYER is in a **PERSONAL SERVICE BUSINESS** and **WAS** a **MATERIAL PARTICIPANT IN ANY 3 PREVIOUS TAX YEARS**.

<u>SPECIAL RULE FOR LIMITED PARTNERS</u>
Limited partners are generally not treated as material participants. If a taxpayer wishes to rebut the presumption, only tests 1, 5, and 6 above may be used. The other tests are not available.

Example*: Jack and his son Junior each own 50% of the stock of an S corporation, a retail car dealership that has been in business for the last four years. Both Jack and Junior received wage income appropriate to the time and activities they performed for the S corporation. Jack is almost retired and only worked 100 hours during the year while his son Junior worked full time at the business putting in over 2,080* *hours during the year. The S corporation earns $800,000 from selling cars. Jack and Junior's respective K-1s each show $400,000 of ordinary income on line 1. The business certainly rises to the level of a trade or business so it passes test a) above and the income was earned from the conduct of the trade or business of selling cars so it passes test b). However, test c) provides different results for the father and son. For Jack the income is passive because he did not materially participate in the business, and as a result, his passive income is treated as investment income subject to the 3.8% tax. Junior, on the other hand, meets test c) since he materially participated, and so the $400,000 passed through on Junior's K-1 is not subject to the 3.8% tax.*

Grouping Activities to Meet the Material Participation Rules - Meeting the material participation requirements for one business may be quite simple, but what if the taxpayer owns an interest in several businesses and even though he or she works full time at all of them cannot meet the 500 hour requirement for each?

Regulation Section 1.469-4 allows individuals to "group" certain activities for purposes of passive activity rules. Unfortunately the regulations do not provide a bright line rule but rather provide subjective guidance to grouping activities. It suggests the greatest weight in determining whether activities can be grouped is based upon the following factors:

- Similarities and differences in types of trades or businesses;
- The extent of common control;
- The extent of common ownership;
- Geographical location; and
- Interdependencies between or among the activities (for example, the extent to which the activities purchase or sell goods between or among themselves, involve products or services that are normally provided together, have the same customers, have the same employees, or are accounted for with a single set of books and records).

The following examples are taken from the regulations:

Example (1) - Taxpayer C has a significant ownership interest in a bakery and a movie theater at a shopping mall in Baltimore and in a bakery and a movie theater in Philadelphia. In this case, after taking into account all the relevant facts and circumstances, there may be more than one reasonable method for grouping C's activities. For instance, depending on the relevant facts and circumstances, the following groupings may or may not be permissible: a single activity; a movie theater activity and a bakery activity; a Baltimore activity and a Philadelphia activity; or four separate activities.

Example (2) - Taxpayer B, an individual, is a partner in a business that sells non-food items to grocery stores (partnership L). B also is a partner in a partnership that owns and operates a trucking business (partnership Q). The two partnerships are under common control. The predominant portion of Q's business is transporting goods for L, and Q is the only trucking business in which B is involved. Under this section, B appropriately treats L's wholesale activity and Q's trucking activity as a single activity.

<u>*Grouping rental activity with a trade or business*</u> - A rental activity may not be grouped with a trade or business activity unless the activities being grouped together constitute an appropriate economic unit, and

- The rental activity is insubstantial in relation to the trade or business activity;
- The trade or business activity is insubstantial in relation to the rental activity; **or**
- Each owner of the trade or business activity has the same proportionate ownership interest in the rental activity, in which case <u>the portion of the rental activity that involves the rental of items of property for use in the trade or business activity</u> may be grouped with the trade or business activity.

Example (1) - H and W are married and file a joint return. H is the sole shareholder of an S corporation that conducts a grocery store trade or business activity. W is the sole shareholder of an S corporation that owns and rents out a building. Part of the building is rented to H's grocery store trade or business activity (the grocery store rental). The grocery store rental and the grocery store trade or business are not insubstantial in relation to each other.

However, because they file a joint return, H and W are treated as one taxpayer (§1.469-1T(j)). Therefore, the sole owner of the trade or business activity (taxpayer H-W) is also the sole owner of the rental activity. Consequently, each owner of the trade or business activity has the same proportionate ownership interest in the rental activity. Accordingly, the grocery store rental and the grocery store trade or business activity may be grouped together since the rental activity involves renting to the grocery trade or business.

Example (2) - Attorney D is a sole practitioner in town X. D also wholly owns residential real estate in town X that D rents to third parties. D's law practice is a trade or business activity. The residential real estate is a rental activity and is insubstantial in relation to D's law practice. Under the facts and circumstances, the law practice and the residential real estate do not constitute an appropriate economic unit. Therefore, D may not treat the law practice and the residential real estate as a single activity.

Prohibited Groupings – Certain groupings are prohibited:

- The grouping of real property rentals and personal property rentals is prohibited (Reg §1.469-4(d)(2)).
- Generally limited partner ownerships cannot be grouped with other activities. See Reg §1.469-4(d)(3) for exceptions.

Changing a Grouping - If an individual groups activities into appropriate economic units, the individual must continue using that grouping in subsequent taxable years unless a material change in the facts and circumstances makes it clearly inappropriate.

Grouping Fresh Start Allowed for Taxpayers Subject to the 3.8% Surtax

Because of the enactment of Sec 1411, the regulations include amendments to the Sec 469 regulations to permit taxpayers to elect to regroup their activities for passive activity loss purposes in the first taxable year that they become subject to the 3.8% surtax. (Reg. Section 1.469-11(b)(3)(iv)) Without permitting regroupings, taxpayers would be bound by their original grouping decisions – some of which may be more than two decades old. Any regrouping must comply with the disclosure and reporting requirements of Reg. 1.469-4(e) and Rev. Proc. 2010-13. A taxpayer may regroup activities only once under this provision, and the regrouping will apply to the taxable year for which the regrouping is done and all subsequent years.

Amending to Regroup **-** Taxpayers may regroup activities in the first year they are subject to the NII tax. Taxpayers who are not subject to the §1411 NII tax because they do not have *both* net investment income and MAGI in excess of the applicable threshold may not elect to regroup their activities. But, if the taxpayer, while the statute of limitations period is still open, subsequently amends a post-2012 return and, therefore, becomes subject to the NII tax (or an IRS adjustment creates NII tax), the taxpayer may use the regrouping election on the amended return.

THREE LITTLE I INCOME

Gains from the sale of property are covered separately under Reg. Section 1.1411-4(a)(1)(iii). Included in this category of income are long-term and short-term capital gain, Section 1231 gain, Section 1245 ordinary income recapture, and unrecaptured Section 1250 gain. Exempt from this category of income are gains derived from a trade or business.

Capital Gains – The final regulations allow the net Schedule D loss up to the amount of the **$3,000 ($1,500)** loss limitation to be deductible against NII. This includes losses incurred before the imposition of the NII tax (carryover losses). Except, losses attributable to a trade or business are not subject to the NII tax.

Because Sec. 1411(c)(1)(A)(iii) uses the term net gain (which contemplates a positive number), the regulations provide that the amount of net gain included in net investment income may not be less than zero. Although capital losses in excess of capital gains are not recognized for purposes of Sec. 1411, losses allowable under Sec. 1211(b)(1) and (2) are permitted to offset gain from the disposition of assets other than capital assets that are subject to Sec. 1411. (Sections 1211(b)(1) and (2) cover the annual loss limit deduction and carryover.)

Example 1 *– Fred has wages of $300,000, earned $5,000 of interest income and has a capital loss of $40,000 from the sale of XYZ stock and a capital gain of $10,000 from selling ABC stock. For regular tax purposes Fred has a capital loss of $30,000, of which he can deduct $3,000 against his other income and carry over the remaining $27,000 to future years. For purposes of Sec. 1411, his $10,000 capital gain is reduced by the $40,000 capital loss, so his net gain is zero. He may reduce the $5,000 investment income by the $3,000 of excess capital losses over capital gains and has a capital loss carryover of $27,000.*

Example 2 *– In Year 2, Fred has a $30,000 capital gain on the sale of PDQ stock. For income tax purposes, Fred can reduce the $30,000 gain by the Year 1 $27,000 capital loss carryover. For the Sec. 1411 surtax purposes, Fred's $30,000 gain may also be reduced by the $27,000 capital loss carryover from Year 1. Therefore, in Year 2, Fred has $3,000 net gain for both regular tax and the 3.8% surtax.*

Capital Loss Carryover can be used in subsequent years to offset gain and where applicable create an up to $3,000 ($1,500) loss that can be deducted against NII. Except, losses attributable to a trade or business not subject to the

NII Tax can't be used. Thus every year, whether or not the taxpayer is subject to the NII tax, the capital loss carryover will have to be divided and split between carryover that can be used against NII and that which cannot. This requires the additional computation annually.

Impact of home sales - Where there is a home sale gain, after taking the Sec 121 exclusion, the remaining gain is reported on Form 8949 (Schedule D) and will end up in the computation for net investment income. As a result, in cases where there is a taxable home sale gain and the taxpayer's MAGI exceeds the threshold amount, then some or all of the taxable home sale gain profit could be subject to this surtax. On the other hand, the entire gain from the sale of a second home or one held strictly for investment purposes would be included in the investment income computation.

> ***Example*** *- Jay & Emily sell their home that they have owned and lived in for 35 years for $900,000 (net of selling expenses). Their basis in the home is $200,000. Their gain from the sale is $700,000 and they are able to exclude $500,000 under Sec 121. That leaves them with a $200,000 taxable gain that will also be included in the computation of the net investment income for purposes of the 3.8% surtax.*

Exclusion for Certain Gains - Gain from the sale of property will *not* be included in net investment income, if:

1. The property was held in a "trade or business",
2. The trade or business is not the trade or business of trading in financial instruments, and
3. The trade or business is not passive to the taxpayer.

This exclusion has a dramatic effect on the owners of sole proprietorships, S corporations, or partnerships, as it may serve to remove a wide array of gains that otherwise would be included within net investment income:

> ***Example*** *- A owns 100% of S Co., an S corporation. S Co. is engaged in a trade or business that is not the trading of financial instruments, and A materially participates in the business. S Co. sells an asset used in its business, generating a $20,000 Section 1231 gain that is allocated to A on his Schedule K-1.*
>
> *Because the $20,000 gain allocated to A was held in a trade or business, the trade or business was not the trading of financial instruments or commodities, and the activity is not passive to A, A may exclude the $20,000 gain from his net investment income computation and tax.*

Intangibles & Goodwill - The regulations make it clear that this exclusion includes the gain from the sale of intangible assets, such as self-created goodwill, provided the goodwill was created by a trade or business that is neither the trading of financial instruments nor passive to the taxpayer. The 2013 Prop. Reg. Section 1.1411-4 contains information related to goodwill and partnership distributions. This issue was "reserved" in the final regulations.

Installment Sales - Gain deferred under the Sec 453 installment sale rules is not subject to the surtax in the year of the sale.

Tax Deferred Exchanges - Gain deferred under Sec 1031 is not subject to the surtax to the extent it is deferred into another property.

RENTALS & NII TAX

The intent behind the 3.8-percent net investment income (NII) tax was principally to impose surtax on unearned, passive-type income. However, the statutory language and lengthy regulations have unfortunately turned this straightforward goal into a complex maze of layered rules. Among the areas of particular concern that have developed has been the determination of when rental income is subject to the NII tax. Unfortunately, the final regulations did not provide a definitive bright line solution. **This means we have to navigate some very complex rules that in some cases will require you to make judgment calls.**

> **The basic rule is**: To be **exempt** from the 3.8% NII tax the rental activity must rise to the level of a trade or business and cannot be passive.

Rental Income in Trade or Business - Determining whether rental income or gain is derived in the ordinary course of a trade or business is a key element in determining whether rental income is subject to NII tax. If rental income or gain is not derived in the ordinary course of a trade or business, it is NII irrespective of the passive activity of the taxpayer.

- Direct case law or inferred guidance on the issue of what constitutes a trade or business within the context of rental real estate for NII tax purposes is vague at best. Field Service Advice Memorandum 200120036, in connection with an earned income credit issue, noted that, "Where it is clear from the facts that real estate is devoted to rental purposes, the courts have repeatedly held that such use constitutes use of property in a trade or business, regardless of whether or not it is the only property so used."

- In contrast, however, Example 1 of final Reg. §1.1411-5(b)(2) presents a rental activity of a single commercial building that does not involve the conduct of a trade or business under Code Sec. 162. However, case law holds that the rental of a single property may constitute a trade or business under various provisions of the Code. The IRS is clearly taking the position that the facts and circumstances of each situation will determine if the rental activity rises to the level of a trade or business.

Rental Income and Passive Activity Rules - With respect to rental income and its exposure to the NII tax by way of the passive activity loss (PAL) rules, two tests have been suggested:

- If the rents are not derived in the ordinary course of a trade or business, then the rents constitute NII (under Category (i)). Whether rents are derived in the ordinary course of a trade or business should be determined under applicable authority, including case law interpreting Code Sec. 162 – Trade or business expenses. (Why Sec. 162? According to the preamble of the Dec. 2012 proposed regulations, "the most established definition of trade or business is found under section 162(a), which permits a deduction for all the ordinary and necessary expenses paid or incurred in carrying on a trade or business." Thus, to facilitate administration of Sec. 1411, the regulations refer to Sec. 162 for purposes of determining whether an activity is a trade or business for Sec. 1411.)

- If the rents are derived in the ordinary course of a trade or business, then the rents constitute income from a passive activity included in NII unless Code Sec. 469 – Passive Activity Losses – excludes the rents from passive income.

  Code Sec. 469(c)(2) and (4) lay down the general rule that passive activity includes any rental activity without regard to whether the taxpayer materially participates in the activity. Code Sec. 469(c)(7) carves out exceptions to this general rule for real estate professionals.

Single Rental - A single rental could require **regular and continuous** involvement such that the rental activity is a trade or business under Sec 162. But the **IRS warns** that not every single property rises to the level of a trade or business as a matter of law.

Consistent Treatment – **From the Regulations' preamble** - In cases where other Code provisions use a trade or business standard that is the same or substantially similar to the Section 162 standard adopted in these final regulations, the IRS will closely scrutinize situations where taxpayers take the position that an activity is a trade or business for purposes of Section 1411, but not a trade or business for such other provisions. <u>For example, if a taxpayer takes the position that a certain rental activity is a trade or business for purposes of Section 1411, the IRS will take into account the facts and circumstances surrounding the taxpayer's determination of a trade or business for other purposes, such as whether the taxpayer complies with any information reporting requirements for the rental activity imposed by section 6041.</u>

Self-Rented Property Recharacterization - The self-rented property rule under Reg. §1.469-2(f)(6) recharacterizes from passive to non-passive a taxpayer's income from renting property to a trade or business activity in which the taxpayer materially participates. Under the self-rented rule, the taxpayer's net rental income from the rental of property for use in a trade or business in which the taxpayer materially participates is treated as not from a passive activity. How should this income be treated for the NII tax?

The final regulations provide that in the case of rental income that is treated as nonpassive by reason of Reg. §1.469-2(f)(6), or because the rental activity is properly grouped with a trade or business activity under §1.469-4(d)(1) and the grouped activity is a nonpassive activity, the gross rental income is deemed to be derived in the ordinary course of a trade or business. Thus, that rental income would escape the NII tax. Furthermore, in both of these instances, the final regulations provide that any gain or loss from the assets associated with that rental activity that are treated as nonpassive gain or loss will also be treated as gain or loss attributable to the disposition of property held in a nonpassive trade or business.

Developer's Recharacterization - The developer rule under Reg. §1.469-2(f)(5) similarly recharacterizes from passive to non-passive a taxpayer's gain from disposing of rented property if the taxpayer had materially or significantly participated in the trade or business activity of developing the property. If the taxpayer sold the property within 12 months after rental commenced, the gain is generally non-passive. §1.1411-5(b)(2) of the final regulations provides that, to the extent that income or gain from a trade or business is subject to a net income recharacterization rule described in §1.469-2(f)(5), the gross income or gain treated as "not from a passive activity" will be considered derived from a trade or business for purposes of the net investment income tax.

Real Estate Professionals Exception – A **safe harbor** test applies for a **real estate professional** (within the meaning of Sec. 469(c)(7)) who participates in one or more rental real estate activities for more than 500 hours per year (or 500 hours per year in 5 of the prior 10 years). In such cases, the rental income associated with that activity is deemed to be derived in the ordinary course of a trade or business, and not subject to the NII tax. Any "grouping" election (under §1.469-9) to aggregate all of a taxpayer's rental activities is respected for this 500-hour test. (Reg. 1.1411(4)(g)(7))

NET OPERATING LOSSES

NOL Deductions per the original proposed regulation were not deductible at all against the NII. The final regulation (§1.1411-4(f)(2)(iv) and (h)) allows a pro-rated deduction. However, no portion of an NOL incurred in a tax year beginning before 2013 is permitted to reduce net investment income.

Because NOLs are computed and carried over year-by-year, a separate ratio must be determined for each year. Thus, the final regulations provide that taxpayers may deduct a portion of an NOL deduction in determining their net investment income. The portion of an NOL deduction for a taxable year that may be deducted for section 1411 purposes is calculated by:

(A) First determining the applicable portion of the NOL for each loss year. The applicable portion of the NOL is the lesser of:

(1) the amount of the NOL for the loss year that the taxpayer would have incurred if only items of gross income that are used to determine net investment income and only properly allocable deductions were taken into account in determining the NOL in accordance with section 172(c) and (d), or

(2) the amount of the taxpayer's NOL for the loss year.

(B) Next, the amount of the NOL carried from each loss year and deducted in the taxable year is multiplied by a fraction. The numerator of this fraction is the applicable portion of the NOL for the loss year as determined above. The denominator of the fraction is the total NOL for the loss year. A separate fraction is determined for each loss year. The result of this multiplication is the amount of the NOL deduction from the loss year that is allowed as a deduction in the taxable year, referred to as the section 1411 NOL amount. The sum of the amounts for each NOL carried to and deducted in the taxable year, referred to as the total section 1411 NOL amount, is the amount of the NOL deduction for the taxable year that is properly allocable to net investment income.

The amount of the NOL deduction included in AGI, regardless of the year in which the NOL originated and whether any portion of the NOL is investment-income related, is allowed when determining modified AGI for the NIIT threshold test. For losses arising in years beginning after 2017, the TCJA limits the NOL deduction to 80% of the taxpayer's taxable income computed without the NOL. In this case, the limited NOL deduction amount would be the amount to use in (B) above for post-2017 NOLs.

ALLOCABLE ITEMIZED DEDUCTIONS

As noted earlier in this chapter, the three categories of investment income can be reduced by "properly allocable deductions" that were paid or incurred to produce the income and allowed as a deduction. These expenses include the deductions related to rental and royalty income, the early withdrawal of savings penalty, and ordinary and necessary trade or business deductions. In addition, certain itemized deductions, such as investment interest and taxes are allowed. However, investment expenses included as a Tier 2 miscellaneous itemized deduction are not allowed when computing NII for years 2018 through 2025.

OTHER ISSUES

Tax refunds – Since prorated taxes are allowed as a deduction against NII, then any subsequent refund of those taxes must be appropriately allocated to NII in the year the refund is received.

Self-charged interest - can be recharacterized as passive interest and offset by passive interest expense.

Guaranteed Payments to Partners (Section 707(c) payments) **–** If for services (subject to SE taxes), the payments are not subject to NII tax. Otherwise the IRS believes guaranteed payments for use of capital has the characteristic of interest and is subject to the NII tax.

Partner Liquidating Distributions (Sec 736 payments) – Sec 736 applies to distributions to a retiring or deceased partner's entire interest. The distributions must be segregated into those subject and not subject to the NII tax through some complicated Reg. Sec. 1.469-2(e)(2)(iii) allocations.

SE Income – Any income subject to self-employment tax will not be subject to the 3.8% tax. The same income cannot be subject to both taxes (Reg. Section 1.1411-9).

Kiddie Tax - The amounts of Net Investment Income that are included in a taxpayer's income by reason of Form 8814 are included in calculating the taxpayer's Net Investment Income for the surtax. But NII does not include (a) amounts excluded due to the threshold amounts on Form 8814 and (b) amounts attributable to Alaska Permanent Fund Dividends.

Common Trust Funds (CTF) **-** Proposed §1.1411-4(e)(3) includes a rule that provides income or loss from a CTF is net investment income or deduction to the extent that such amount would have been net investment income or deduction if the participant had made directly the investments of the CTF.

REMIC Residual Interests – A REMIC is not considered as being in a trade or business. The 2013 proposed regulations provide that a holder of a residual interest in a REMIC takes into account the daily portion of taxable income (or net loss) under section 860C in determining net investment income. (Proposed Regs 1.1411-4(g)(13)) This issue was "reserved" in the final regulations.

Working Capital Investment – Generally the working capital of a company is invested in short-term income producing assets. The NII rules reference the working capital rules in Code Sec. 469. Any income from the investment of working capital is treated as not derived in the ordinary course of a trade or business and is treated as investment income.

Hobby Loss and At Risk Rules are not considered when making the determination of a trade or business for purposes of the NII tax.

Disposition of Partnership or S-Corporation Interests – Proposed Reg §1.1411-7(b) ("reserved" in the final regulations) provides a calculation to determine how much of the gain or loss that must be recognized is investment gain or loss. This definition recognizes that the items of property inside the passthrough entity that constitute Section 1411 property might vary among transferors because a transferor may or may not be "passive" with respect to the property. The proposed regulations include two methods, the primary method and the optional simplified method for certain smaller dispositions.

- *Primary Method* – Requires a **materially participating** transferor to determine what part, if any, of the gain represents the sale of investment property and therefore subject to the NII tax. To determine what part of gain represents the sale of investment property, a deemed (hypothetical) sale of the investment assets at FMV must be computed and the lesser of the resulting deemed-sale gain or the amount of gain recognized for regular income tax purposes is subject to the NII tax. The balance of the sale is not subject to the NII Tax. Gain with respect to passive or trading activities would also be subject to the NII Tax.
- *Simplified Method* - The optional simplified method relies on historic distributive share amounts received by the transferor from the passthrough entity to extrapolate a percentage of the assets within the passthrough entity that are passive with respect to the transferor for purposes of section 1411(c)(4). Generally, to qualify under the simplified method:
  - A transferor's investment income is 5% or less of the total of all investment income allocated to the transferor during the Section 1411 Holding Period,(1) and the transferor's recognized gain is $5 million (including multiple dispositions) or less, **or**
  - A transferor's share of the gain is $250,000 (including multiple dispositions) or less.
  - There are several exceptions when the simplified method does not apply even if it otherwise qualifies, including:
    - If the transferor did not hold the interest for 12 months prior to the disposition.
    - If the transferor transferred Section 1411 Property to or received a distribution of property (other than Section 1411 Property) from the entity in the 12 month period prior to the disposition.
    - The entity's Section 1411 property increased or decreased more than 25% during the Section 1411 holding period.
    - If the S-Corporation was a C-Corporation during the Section 1411 holding period.

  (1) Section 1411 Holding Period is defined to mean the year of disposition and the transferor's two taxable years preceding the disposition or the time period the transferor held the interest, whichever is less.

Deferral or Disallowance Provisions - used in determining AGI to apply to the determination of NII, including:

- Limitation on investment interest (Sec 163(d)), or
- Passive activity loss limitations (Sec 469(b)).

A deduction carried over to a tax year under certain provisions and allowed for that year in determining AGI is also allowed for the determination of NII, whether or not the year from which the deduction is carried precedes the surtax effective date.

Individuals - the term "individual" for this surtax purpose is any natural person, except those who are nonresident aliens—in other words, any citizen or resident of the U.S.

U.S. Citizen Married to a Non-resident Alien:

- **Filing MS** - The U.S. Citizen or resident spouse will be subject to the $125,000 threshold and the non-resident alien is exempt.
- **Filing Joint** (Sec 6013(g) Election) – Couple is subject to the surtax on their combined worldwide income and use the $250,000 threshold.

Residents of U.S. Territories:

- Residents of **Guam, the Northern Mariana Islands, and the U.S. Virgin Islands** generally will not be subject to the surtax if they fully comply with their territory's tax laws.
- Residents of **American Samoa and Puerto Rico** may be subject to the surtax if they have U.S. reportable income that gives rise to both NII and MAGI exceeding the threshold amount. However, if the bona fide resident is also a nonresident alien individual with respect to the U.S, then the surtax doesn't apply.

Short Tax Years - The threshold amount generally isn't prorated in the case of an individual's short tax year, such as in the case of death. (Reg § 1.1411-2(d)(2)(i)) A special rule applies for individuals who have a short tax year resulting from a change of annual accounting period and who must annualize taxable income. For these taxpayers, the applicable threshold amount is prorated. (Reg § 1.1411-2(d)(2)(ii))

Grantor Trusts - Items of income, deduction, and credit attributed accordingly is taxed to the owner. Thus these amounts are taken into account in calculating the owner's NII. (Reg § 1.1411-3(b)(1)(v))

Charitable Remainder Trusts (CRTs) - CRTs are subject to special computational rules. The trust itself isn't subject to the surtax, but the annuity and unitrust distributions may constitute NII to a noncharitable recipient. (Reg § 1.1411-3(d))

Bankruptcy Estates - A bankruptcy estate of a debtor who is an individual is treated as an individual for purposes of the surtax. Under Code Sec. 1398, which provides the rules for the taxation of Chapter 7 and 11 bankruptcy estates where the debtor is an individual, the bankruptcy estate computes its tax in the same manner as an individual, and the rate is the same as that imposed on a married taxpayer filing separately. Accordingly, regardless of the debtor's actual marital status, the bankruptcy estate is treated as married filing separately for purposes of the thresholds and the $125,000 threshold applies. (Reg § 1.1411-2(a)(2)(v))

NIIT TAX PLANNING TECHNIQUES

MAGI Management – Since the net investment income tax (NIIT) only applies to individuals whose MAGI exceeds the taxation thresholds, careful management of MAGI becomes an important tool in minimizing the NIIT both in current and future years since, what you defer now will generally impact MAGI at a future date or to heirs.

Net Investment Income Management – Since NIIT is a function of both MAGI and net investment income (NII) careful management of investment income and strategies to recharacterize income as non-investment come into play.

Non-Dividend Paying Stocks - Higher-income taxpayers can minimize the NIIT by including in their investment portfolio non-dividend paying growth stocks, which do not **currently** increase MAGI or create investment income, but will affect MAGI and NII in the **future** when sold.

Tax-deferred Annuities - Tax-deferred annuities and related investments will also minimize **current** liability for the NIIT, but also consider what impact they might have in **future** years when the income is taken.

Tax-Exempt State and Local Obligations - Tax-exempt income is not included in either MAGI or NII, providing a way to avoid the NIIT altogether.

Tax Deferred Exchange – Section 1031 exchanges are a way of deferring **current** taxable NII to **future** years.

Installment Sales – Where allowed, installment sales provide a means of deferring and spreading investment income from investment capital gains over multiple years. Thus **current** year income can be reduced and **future** income spread over multiple years. Caution: Buyers may pay off the note early and defeat part of this strategy, plus there are the inherent risks of the obligor defaulting.

Retirement Plans - Because distributions from qualified retirement plans are not included in net investment income, the NIIT provides taxpayers with additional incentive to maximize retirement plan contributions to minimize current NIIT liability. However, distributions from these plans, including RMDs, will impact the MAGI in the future.

Roth IRAs – Roth IRAs generally provide no current protection from NIIT, but do not add to MAGI when distributions are taken in the future and not at all if left to heirs. Taxpayers whose future distributions from regular IRAs and qualified plans could cause their MAGI to exceed the threshold amount may want to consider conversions to Roth accounts before RMDs are required, but done over time so that current MAGI isn't bumped above the threshold amount.

Passive Activity Loss Planning - Passive income is investment income for purposes of the NIIT. Classifying income as passive is generally advantageous for taxpayers with sufficient passive losses to offset the passive income. For taxpayers with net passive income, however, the NIIT increases the tax rate on passive income.

Estate Planning - The NIIT provides higher-income taxpayers with an incentive to consider the use of family limited partnerships and related estate planning techniques. Investment income transferred from parents with significant MAGI and investment income to children with MAGI below the applicable threshold amount through the use of family limited partnerships will not be subject to the NIIT.

Tax Planning for Estates and Trusts - Estates and trusts with undistributed net investment income will be subject to the NIIT whenever their adjusted gross income exceeds the dollar amount at which the top marginal tax rate begins ($12,750 for 2019). Because the top marginal rate for estates and trusts begins at a relatively small amount of income, the NIIT is of particular concern to estates and trusts and should be considered in both distribution and investment decisions

Estimated Tax – The NIIT needs to be included when determining estimated tax payment requirements and the estimated tax penalty. (IRC Sec. 6654(f), as amended by the 2010 Reconciliation Act)

NET INVESTMENT INCOME TAX – FORM 8960

The draft of the 2019 Form 8960 has been released at press time, but not the draft of 2019 instructions. The instructions for the 2018 version are 20 pages long and include various worksheets. The instructions can be accessed at: https://www.irs.gov/pub/irs-pdf/i8960.pdf.

CALIFORNIA DIFFERENCES

California has no similar tax. Since Federal taxes are not deductible in computing the CA tax, this federal tax will have no impact on the CA tax computation.

NOTES

ADDITIONAL HOSPITAL INSURANCE TAX

Additional HI Tax: **0.9% (0.009)**
To Extent Wage/SE Income on a Return Exceeds:

- S and HH: $200,000
- JT and SS: $250,000
- MS: $125,000

Related IRC and IRS Publications and Forms

- **Sec 3101(b)**
- **Sec 1401(b)**
- **Form 8959** – Additional Medicare Tax
- **Instructions Form 8959**

RAPID FINDER

WITHHOLDING RATES:

The Hospital Insurance (HI) (aka Medicare) tax rate (currently at 1.45%) will be increased by 0.9 percentage points on individual taxpayer earnings (wage withholding and SE tax) in excess of compensation thresholds for the taxpayer's filing status; see table below. (Code Sec. 3101(b)(2))

All wages currently subject to Medicare tax will be subject to the additional Medicare tax, if they are paid in excess of the applicable threshold amount. The same is true of Railroad Retirement Tax Act (RRTA) compensation.

No special rules apply for nonresident aliens and U.S. citizens living abroad. Wages, other compensation, and self-employment income that are subject to Medicare tax will also be subject to additional Medicare tax after the threshold is reached.

Wage Withholding – An employer must withhold additional Medicare tax from wages it pays to an individual in excess of $200,000 in a calendar year, without regard to the individual's filing status or wages paid by another employer. Thus, an employee's wage withholding HI rate will be 1.45% on the first $200,000 of wages paid by his employer and 2.35% (1.45 + 0.9) on amounts in excess of $200,000. An individual may owe more than the amount withheld by the employer, depending on the individual's filing status, wages, compensation, and self-employment income.

SE Tax – The HI component of the SE tax rate will be 2.9% up to the income threshold and 3.8% (2.9 + 0.9) on amounts in excess of the threshold.

Additional Hospital Insurance Tax Compensation Thresholds	
Married Taxpayers Filing Jointly	$250,000
Married Taxpayers Filing Separately	$125,000
All Others	$200,000

These amounts are not adjusted for inflation

All Income Combined for Purposes of the Threshold
For purposes of determining the additional HI tax, all wage and self-employment income is combined. For married taxpayers, the spouses' wages and self-employment incomes are combined.

Married Taxpayers - Where both spouses work, their wages are combined for purposes of determining whether they as a couple filing a joint return are responsible for the additional HI tax.

Multiple Employers – Employers will not consider income from other employers when determining the amount to be withheld UNLESS the employers utilize a common paymaster. This will create under-withholding for employees with multiple employers whose wages from all employers exceed the filing status threshold.

Spouses Both Working – Where both spouses work, even though their wages must be combined for purposes of determining whether they as a couple are responsible for the additional HI tax, employers withhold only on the wages of the individual who is their employee. Even though a couple may work for the same employer, the wages of each spouse are considered separately by the employer.

Excess Medicare Withholding – If the employer over-withholds the Medicare tax, the excess can be claimed as additional income tax withholding when the taxpayer files his or her return. After completing Form 8959 and determining that the taxpayer's Medicare tax is over-withheld, the excess Medicare tax is combined with the taxpayer's income tax withholding for the year for entry on Form 1040, line 17 (draft 2019).

Employer Fails to Withhold Additional Amount - An employer that does not deduct and withhold Additional Medicare Tax as required is liable for the tax unless the tax that it failed to withhold from the employee's wages is paid by the employee. Even if not liable for the tax, an employer that does not meet its withholding, deposit, reporting, and payment responsibilities for additional Medicare tax may be subject to all applicable penalties.

Tips - To the extent that tips and other wages exceed $200,000, an employer applies the same withholding rules for additional Medicare tax as it does currently for Medicare tax. An employer withholds additional Medicare tax on the employee's reported tips from wages it pays to the employee.

Employer Matching - An employer is not required to make a matching contribution.

Self-Employment Income:

The following details pertain to payment of the additional HI SE tax:

- The self-employed taxpayer will be responsible for the additional 0.9% HI tax. And, like an employer, will not be liable for a matching amount.
- The SE tax computation deduction continues to be computed using half the sum of the OASDI tax rate and only the regular HI tax rate (i.e., 7.65%), without regard to the additional 0.9% HI tax. In other words, the 0.9% additional tax is not taken into account for purposes of the SE tax deduction. (Code Sec. 1402(a)(12)(B)

SE Income and Wages - Individuals with wages subject to FICA tax and self-employment income subject to self-employment tax calculate their liabilities for additional Medicare tax in three steps:

Step 1 - Calculate additional Medicare tax on any wages in excess of the applicable filing status-based threshold, without regard to whether any tax was withheld.

Step 2 - Reduce the applicable threshold for the filing status by the total amount of Medicare wages received, but not below zero.

Step 3 - Calculate additional Medicare tax on any self-employment income in excess of the reduced threshold.

> ***Example – Joint Filers***: Don and Etta are married and file jointly. Don has $150,000 in wages and Etta has $175,000 in self-employment income.
>
> 1. Don's wages are not in excess of the $250,000 threshold for joint filers, so they are not liable for additional Medicare tax on Don's wages.
>
> 2. Before calculating the additional Medicare tax on Etta's self-employment income, the $250,000 threshold for joint filers is reduced by Don's $150,000 in wages, resulting in a reduced SE income threshold of $100,000.
>
> 3. Don and Etta are liable for additional Medicare tax on $75,000 of self-employment income ($175,000 in self-employment income minus the reduced threshold of $100,000).

SE Income and Railroad Retirement Tax Act (RRTA) Wages - The Affordable Care Act, in which the additional Medicare tax was enacted, did not provide for a reduction in the self-employment income threshold amounts by the amount of any RRTA compensation taken into account in determining liability for the additional Medicare tax. Therefore, an individual who receives both RRTA compensation and SE income does not reduce the self-employment income threshold amounts by the amount of RRTA compensation taken into account in determining the additional Medicare tax liability. (Reg. 1.1401-1(d)(2))

Underpayment of Estimated Tax:

A taxpayer cannot request additional withholding specifically for the additional Medicare tax but can request that his or her employer withhold an additional amount of income tax. Estimated tax rules apply to the additional Medicare tax, but the individual need not identify the payments as being specifically for that tax.

CALIFORNIA DIFFERENCES

California has no equivalent tax. It does, however, allow 50% of the self-employment tax to be deducted as an adjustment to gross income, but since the 0.9% additional tax is not computed as part of the SE tax on 1040 Schedule SE, no part of the additional tax is deductible on the California (or federal) return.

SMALL EMPLOYER SIMPLE CAFETERIA PLANS

RAPID FINDER

Overview

Small employers (average of 100 or fewer employees on business days during either of the two preceding years) may provide employees with a "simple cafeteria plan." (Code Sec. 125(j))

Under such a plan, the employer is provided with a safe harbor from the nondiscrimination requirements for cafeteria plans as well as from the nondiscrimination requirements for specified qualified benefits offered under a cafeteria plan–

- including group term life insurance,
- benefits under a self-insured medical expense reimbursement plan, and
- benefits under a dependent care assistance program.

The Details

Once the Simple Cafeteria plans have been established, the employer is deemed as having met the small employer requirement until such time as the average number of employees exceeds 200 on business days during any year preceding any such subsequent year.

Simple Cafeteria Plan – For purposes of the provision, a simple cafeteria plan is a plan that:
(1) Is established and maintained by an eligible employer,
(2) Meets prescribed contribution requirements, and
(3) Meets prescribed eligibility and participation requirements.

Contribution Requirements – To create a simple cafeteria plan, the employer will have to make contributions to provide qualified benefits under the plan on behalf of each qualified employee (without regard to whether a qualified employee makes any salary reduction contribution) in an amount equal to:
(1) a uniform percentage (not less than 2%) of the employee's compensation for the plan year, or
(2) an amount which is not less than the lesser of
(a) 6% of the employee's compensation for the plan year, or
(b) twice the amount of the salary reduction contributions of each qualified employee.

The requirements of (2) above are not met if, under the plan, the rate of contributions with respect to any salary reduction contribution of a highly compensated or key employee at any rate of contribution is greater than that with respect to an employee who is not a highly compensated or key employee.

Qualified Employee – Does not include highly compensated or key employees.

Highly-Compensated Employee - is any employee who:
(1) was a five percent owner at any time during the year or the preceding year or,
(2) for the preceding year, received compensation from the employer in excess of $125,000 ($120,000 (for 2016, 2017, 2018), and, if the employer elects, was in the top-paid group of employees for the preceding year. The employer can make the election annually, without the consent of IRS. An employee is in the top-paid group of employees for any year if such employee is in the group consisting of the top 20 percent of the employees when ranked on the basis of compensation paid during such year (Code Sec. 414(q)(1)(B)(ii)).

Key Employee - In general, the term "key employee" (Sec 416(i)) means an employee who, at any time during the 2019 plan year, is an officer of the employer having an annual compensation greater than $180,000, or a 5-percent owner of the employer, or a 1-percent owner of the employer having annual compensation from the employer of more than $150,000.

Minimum Eligibility & Participation Requirements - The minimum eligibility and participation requirements will be met with respect to any year if, under the plan,

(a) all employees who have at **least 1,000 hours** of service for the preceding plan year are eligible to participate, and
(b) each employee eligible to participate in the plan may, subject to terms and conditions applicable to all participants, elect any benefit available under the plan.

However, an employer will be able to **elect to exclude** under the plan employees:

(1) who have not attained the age of 21 before the close of a plan year (plan may provide for a younger age),
(2) who have less than one year of service with the employer as of any day during the plan year (plan may provide for a shorter period of service),
(3) who are covered under an agreement which the Secretary of Labor finds to be a collective bargaining agreement, if there is evidence that the benefits covered under the cafeteria plan were the subject of good faith bargaining between employee representatives and the employer, or
(4) who are described in Code Sec. 410(b)(3)(C) (relating to nonresident aliens working outside the U.S.)

Employee Revoking Coverage - In Notice 2014-55, the IRS permits a Small Employer Cafeteria Plan to allow an employee, during a period of coverage, to revoke his or her election for coverage under the employer's group health plan (other than a flexible spending arrangement (FSA)) in order to purchase a qualified health plan through a competitive Marketplace established under the Patient Protection and Affordable Care Act (ACA). Revocation is allowed in two situations:

- **Reduction in hours of service -** The first situation involves a participating employee whose hours of service are reduced so that the employee is expected to average less than 30 hours of service per week, but for whom the reduction doesn't affect the eligibility for coverage under the employer's group health plan.
- **Enrollment in a qualified health plan -** The second situation involves an employee participating in an employer's group health plan who would like to cease coverage under the group health plan and purchase coverage through a Marketplace without that resulting either in a period of duplicate coverage under the employer's group health plan and the coverage purchased through a Marketplace or in a period of no coverage.

For details and qualifications refer to Notice 2014-55.

NOTES

SMALL BUSINESS HEALTH INSURANCE TAX CREDIT

Overview

- Only Available to Eligible Small Employers (ESEs) that provide nonelective health insurance to their employees and:
  - Employ **25 or fewer equivalent full-time employees** (FTEs)
  - With average annual full-time **wages** (AAEW) **of $54,200 (2019) or less**
  - Pay at least **50%** of the Insurance Costs
- Credit Percentage for 2014 and later is 50% (35% for non-profits) and is available for only two years.
- Credit (except for non-profits) is claimed on the 1040
- **Credit reduced** when:
  - Number of **FTEs exceeds 10** and
  - **AAEW exceeds $27,100 (2019)**

New Law & Stuff

IRS provides relief for employers that were unable to qualify for credit because the principal place of business is located in a county where a QHP through a SHOP Exchange isn't available. See Page 12.08.06 for details

The Details

The Affordable Care Act provides a tax credit for an eligible small employer (ESE) for nonelective contributions to purchase health insurance for its employees. (Code Sec. 45R)

NO DOUBLE BENEFIT

ESEs considering establishing a health plan for their employees need to understand that they can deduct the cost incurred for their plan as a business deduction or qualify for the credit. If they choose the credit they can still deduct the portion of the expenses not used in the computation or phased-out because of too many employees or too high of an average wage.

Tax Years after 2013 - An ESE is entitled to a deduction under Code Sec. 162 equal to the amount of the employer contribution minus the dollar amount of the credit.

EMPLOYER NONELECTIVE CONTRIBUTION

The term "nonelective contribution" means an employer contribution other than an employer contribution pursuant to a salary reduction arrangement.

An ESE is required to make a nonelective contribution on behalf of each employee who enrolls in a qualified health plan offered to employees by the employer in an amount equal to a uniform percentage **(not less than 50 percent)** of the premium cost of the qualified health plan.

CREDIT PERCENTAGES POST-2013

- Eligible Small Employers (ESE): **50%**
- Tax-Exempt 501(c) Organizations: **35%**

CAUTION
When counseling a client related to this credit, make sure the client understands this credit is for two years only.

CREDIT QUALIFICATION

For tax years after 2013, eligible small employers who purchase coverage through the Insurance Exchange may be eligible for a tax credit up to 50% (35% for tax-exempt ESEs) of the lesser of (1) the amount of nonelective contributions the employer made on behalf of its employees or (2) the amount the employer would have paid if the employees were enrolled in a qualified health plan with a premium equal to the average premium for the small group market in the rating area where the employee enrolls. The latter amount is referred to as the benchmark amount and will be determined by the Secretary of Health and Human Services. These premiums are listed by county in the Form 8941 Instructions for the year of the credit.

Note that:

- The insurance **MUST** be purchased through the state insurance Exchange, also referred to as the Small Business Health Options Program (SHOP). See Page 5 for information about SHOP.
- The coverage must be uniform and not less than 50% of the premium cost. (Committee Report)
- The credit is only available for a maximum coverage period of **two consecutive tax years** beginning with the first year in which the employer or any predecessor first offers one or more qualified plans to its employees through SHOP coverage offered by the Marketplace. (Sec 45R(e)(2)).

ELIGIBLE SMALL EMPLOYER (ESE)

An ESE generally is an employer with no more than 25 full-time equivalent employees (FTEs) employed during its tax year, and whose employees have annual full-time equivalent wages that average no more than (see upper line of table below), Code Sec. 45R(d).

The credit percentage that can be claimed varies with the number of employees and average wages. The full amount of the credit is available only to an employer with 10 or fewer FTEs and whose employees have average annual full-time equivalent wages (AAEW) from the employer of less than (see lower line of table below), (Code Sec. 45R(c)).

Average Full Time Equivalent Wages

Year	2015	2016	2017	2018	2019	2020
ESE is an employer with no more than:	$51,600	$51,800	$52,400	53,200	54,200	55,200
Full credit available with AAEW less than:	$25,800	$25,900	$26,200	26,600	27,100	27,600

CALCULATING THE CREDIT AMOUNT

The credit is equal to the **lesser of the following two amounts** multiplied by an applicable tax credit percentage and subject to the phase-outs discussed later:

(1) The amount of contributions the ESE made on behalf of the employees during the tax year for the qualifying health coverage.

(2) The amount of contributions that the employer would have made during the tax year if each employee had enrolled in coverage with a small business benchmark premium. (Code Sec. 45R(b)) Contributions under this method are determined by multiplying the benchmark premium by the number of employees enrolled in coverage and then multiplied by the uniform percentage that applies for calculating the level of coverage selected by the employer. (Committee Report)

COMPUTING THE CREDIT PHASE-OUT

The full credit is only available to ESEs with 10 or fewer full-time equivalent employees (FTEs) with an average annual full-time equivalent wage (AAEW) of $25,000 (adjusted for inflation after 2013 and shown in the table above) or less. If either or both of these thresholds are exceeded, then the credit is reduced.

There is no credit reduction if there are 10 or fewer FTEs with an AAEW of $27,100 (2019) or less.

There is no credit if the FTEs exceed 25 or the AAEW exceeds $54,200 (2019).

To figure the reduction of credit when the limits are exceeded, the number of the employer's full-time equivalent employees (FTE's) and average annual full-time equivalent wages (AAEW) for the year must be determined.

Figuring the number of FTEs - An employer's FTEs is determined by dividing the total hours the employer pays wages during the year (but not more than 2,080 hours per employee) by 2,080. (Code Sec. 45R(d)(2)) The result, if not a whole number, is then rounded down to the next lowest whole number if any. However, if the resulting number is less than one, round up to one FTE. (Prop. Reg. 1.45R-2(e)) Also see "Excluded Employees" below.

An employee's hours of service for a year include each hour for which an employee is paid, or entitled to payment, for (a) the performance of duties for the employer; and (b) for vacation, holiday, illness, incapacity (including disability), layoff, jury duty, military duty or leave of absence (except that no more than 160 hours of service are required to be counted for an employee on account of any single continuous period during which the employee performs no duties). (Notice 2010-44, Sec. II.C.) (Prop. Reg. 1.45R-2(d)(1))

In calculating the total number of hours of service that must be taken into account for an employee for the year, the employer may use any of three methods:

(1) Determine actual hours of service from records of hours worked and hours for which payment is made or due (payment is made or due for vacation, holiday, illness, incapacity, etc.);

(2) Use a days-worked equivalency where the employee is credited with 8 hours of service for each day for which he would be required to be credited with at least one hour of service under (1), above; or

(3) Use a weeks-worked equivalency where the employee is credited with 40 hours of service for each week for which he would be required to be credited with at least one hour of service under (1), above. (Notice 2010-44, Sec. II.C.) (Prop. Reg. 1.45R-2(d)(2))

$$\textbf{FTE} \text{ (rounded down to next whole number)} = \frac{\text{Total Hours for Year (but no more than 2,080 per employee)}}{2{,}080}$$

Calculating average annual wages (AAEW) - Average annual wages is determined by dividing the employer's total FICA wages (without regard to the wage base limitation) for the tax year by the number of the employer's FTEs for the year (rounded down to the nearest $1,000) (Code Sec. 45R(d)(3)(A); Prop. Reg. 1.45R-1(a)(22))

$$\textbf{AAEW} \text{ (rounded down to the nearest \$1,000 if need be)} = \frac{\text{Total FICA Wages (without regard for wage base limitations)}}{\textbf{FTE}}$$

Credit reduction - If the number of FTEs exceeds 10 **or** if AAW exceed $27,100 (2019), the amount of the credit is reduced (but not below zero). Both reductions can apply at the same time!

- **FTE Reduction** - If the number of FTEs exceeds 10, the reduction is determined as follows:

$$\textbf{FTE Reduction} = \frac{(\text{FTEs} - 10)}{15} \times \text{Tentative Credit}$$

- **AAEW Reduction** - If average annual wages exceed $27,100 (2019), the reduction is determined as follows:

$$\textbf{AAEW Reduction} = \frac{(\text{AAEW} - 27{,}100)}{27{,}100} \times \text{Tentative Credit}$$

Example *– Joe owns a small California wood working business and has 12 employees, not counting himself or family members. The total FICA wages (without regard for wage base limitations) for 2019 were $309,000 and total hours worked by his employees during the year were 24,400. None of his employees worked more than 2,080 hours during the year. Joe made non-elective contributions to purchase health insurance for his employees in the amount of $49,800 for the year. Joe's credit is determined as follows:*

- *Small Business Benchmark Premium (estimated for this example. In actual practice the benchmark premiums are included in the instructions for Form 8941) = 12 x 5,345 = $64,140*

- *Smaller of actual premium paid or Benchmark premium = $49,800*
- *Tentative credit = $49,800 x 0.50 = $24,900*
- *Full-time equivalent employees (FTEs) = 24,400/2080= 11.7 rounded down = 11*
- *Average annual full-time equivalent wages (AAEW) = 309,000/11 = $28,091 rounded down = $28,000*
- *FTE Reduction = ((11-10)/15) x $24,900 = $1,660*
- *AAEW Reduction = ((28,000-27,100)/27,100) x $24,900 = $827*
- ***Joe's health insurance tax credit** = $24,900 - $1,660 - $827 = **$22,413***

Other Issues:

- Aggregation rules apply in determining the employer. (Code Sec. 45R(b); Prop. Reg. 1-45R-2(b))
- The credit is available for a domestic (household) employee of a sole proprietor of a business, and there's a special rule to prevent sole proprietorships from receiving the credit for the owner and their family members. (IRS Notice 2010-82)
- The credit is available for tax liability under the alternative minimum tax. (Prop. Reg. 1-45R-5(b))

EXCLUDED EMPLOYEES

Owners, Shareholders, and Self-employed Individuals - Self-employed individuals, including partners and sole proprietors, 2% shareholders of an S corporation, and 5% owners of the employer are not treated as employees for purposes of the small employer health insurance credit. Thus, the wages and hours of these business owners and partners, and of their family members and dependent members of their household, are disregarded in determining full-time equivalent (FTE) employees and average annual wages, and the premiums paid on their behalf are not counted in determining the amount of the credit (Notice 2010-44) (Prop. Reg. 1-45R-1(a)(4)(iii)).

Ministers - A minister performing services in the exercise of his or her ministry is treated as self-employed for Social Security and Medicare tax purposes. However, for the small employer health insurance credit, whether a minister is an employee or self-employed is determined under the common law test for determining worker status (Notice 2010-82). Thus, under the common law test, a self-employed minister would not be taken into account for this credit. On the other hand, if under the test a minister is an employee, the minister would be taken into consideration. (Prop. Reg. 1-45R-1(a)(4)(v))

Leased Employees - A leased employee is an individual who is not an employee of the service recipient, but who provides services to the recipient under an agreement with a leasing organization. For purposes of the definition of a full-time equivalent (FTE) employee, the definition of an eligible small employer (ESE), and the phaseout rules that apply to the small employer health insurance credit, an employee includes a leased employee. However, no provision of Code Sec. 45R supports attributing to the service recipient the leasing organization's payment of premiums. Therefore, premiums for health insurance coverage paid by a leasing organization for a leased employee are not taken into account by the service recipient in computing the service recipient's credit (Code Sec. 45R(e)(1)(B)) and Notice 2010-82)

Seasonal Employees - The number of hours of service worked by, and wages paid to, a seasonal worker of an employer are not taken into account in determining the FTE employees and average annual wages of the employer unless the worker works for the employer on **more than 120 days** during the tax year (Code Sec. 45R(d)(5)(A)). Health insurance premiums paid on behalf of seasonal workers can be counted in determining the amount of the credit (Notice 2010-44). There is no minimum number of hours of service that a worker has to work in a day before that day is taken into account for purposes of the 120-day test.

GENERAL BUSINESS CREDIT

The credit is a general business credit, can be carried back for one year and carried forward for 20 years, and can offset alternative minimum tax. (Code Sec. 38(b), Code Sec. 39(a)), Code Sec. 38(c)(4)(B)(vi)) However, because an unused credit amount cannot be carried back to a year before the effective date of the credit, any unused credit amounts for taxable years beginning in 2010 can only be carried forward (Notice 2010-44). See chapter 9.00 for details of the general business credit.

WHERE TO CLAIM

IRS Form 8941 is used to calculate the credit by both small businesses and tax-exempt organizations. A small business will include the amount of the credit as part of the general business credit on its income tax return. Tax-exempt organizations will claim the small business health care tax credit on Form 990-T.

TAX EXEMPT ORGANIZATIONS AS QUALIFIED SMALL EMPLOYERS

Any organization described in section 501(c), which is exempt under section 501(a) that otherwise qualifies for the small business tax credit is eligible to receive the credit. However, for tax-exempt organizations, the applicable percentage for the credit, for taxable years beginning in years after 2013, is limited to 35 percent. The small business tax credit is otherwise calculated in the same manner for tax-exempt organizations that are qualified small employers as the tax credit is calculated for all other qualified small employers.

Tax-exempt organizations are eligible to apply the tax credit against the organization's liability as an employer for payroll taxes for the taxable year to the extent of: (1) the amount of income tax withheld from its employees under section 3401(a); (2) the amount of hospital insurance tax withheld from its employees under section 3101(b); and (3) the amount of the hospital tax imposed on the organization under section 3111(b). However, the organization is not eligible for a credit in excess of the amount of these payroll taxes.

SMALL BUSINESS HEALTH OPTIONS PROGRAM (SHOP)

The Marketplace provides a health insurance marketplace for small businesses, those with 50 or fewer full-time equivalent employees. The Small Business Health Options Program (SHOP), even though offered through the various state Exchanges, is a different program from the individual Exchanges. Starting with the 2014 tax year, to be eligible for the Small Business Health Insurance Credit, the insurance must be purchased through the SHOP.

- ***Application Process*** - SHOP offers a single universal online application form. Business owners can, on their own, or with the help of an agent, broker, or other assister, compare price, coverage, and quality of plans in a way that's easy to understand.
- ***Who Uses SHOP*** – Starting in 2016, an employer with at least 50 and fewer than 100 equivalent full-time employees **must offer** coverage to all **full-time** employees–generally those working 30 or more hours per week on average–or be subject to a penalty. For employers with fewer employees, coverage is not mandatory. Initially SHOP will not be available to employers who must offer coverage or be penalized. Employers eligible to use the SHOP marketplace generally will find more plans offered than if they don't use SHOP, thus providing more plan options for their employees. Employers who qualify for the Small Business Health Insurance Credit based on the number of employees and average wage criteria, **must purchase the insurance through the SHOP marketplace to be eligible for the credit starting in 2014**.
- ***Work Site*** – The employer must have an office or employee work site within the SHOP's service area to use that particular SHOP.
- ***Coverage*** – The employer can select the desired coverage and how much the employer will contribute to the employee premiums, if any. Employees can then select higher or lower cost plans, but the employer's cost will not change.
- ***Self-Employed Individuals Without Employees*** – Self-employed individuals with no employees (independent contractors are not considered employees for this purpose), are considered self-employed, but not an employer and cannot acquire insurance through SHOP. They must instead use the individual Marketplace.
- ***Self-Employed Individuals With Employees*** – Self-employed individuals who have employees (generally, workers whose income is reported on a W-2 at the end of the year) is considered an employer. In that case the self-employed individual can get coverage for himself or herself and the employees through the SHOP Marketplace.
- ***Enrollment*** – In many states at least 70% of the employees offered coverage must enroll in order to buy insurance through the SHOP.
    - Employees with coverage through another employer plan, Medicare, Medicaid, the military, or veterans' programs are **not** included in the calculation.
    - Employees with individual non-group private coverage **are** included in the calculation.

Example *– An employer has 14 full-time employees, and of them two have coverage through a spouse's employer, one is covered by Medicare and one is covered by TRICARE[1]. Thus 10 employees count toward the 70% requirement and at least 7 of the 10 employees must enroll.*

[1]TRICARE® is the health care program serving Uniformed Service members, retirees and their families worldwide.

Employees Are Not Eligible for Premium Tax Credit: Employees covered under an employer plan are not eligible for the premium assistance subsidy/credit even though they would otherwise be qualified. This is one of the catch-22 provisions of the premium assistance subsidy/credit. Thus, where an employer provides a plan but does not supplement the employee's cost, the employee is stuck with the cost of the employer plan even though his out-of-pocket insurance premiums may be substantially less through the individual Exchange if he qualified for the premium assistance subsidy/credit.

For more information go to these websites:

- California: https://www.healthcare.gov/marketplace/shop/#state=california
- Federal: https://www.healthcare.gov/contact-us/#

SHOP COVERAGE NOT AVAILABLE

IRS has provided relief for eligible small employers who properly claim Code Sec. 45R credit in any part of the 2016 tax year but then find they can't offer employees a qualified health plan (QHP) for any part of remaining two-year credit period because the principal place of business is located in a county where QHPs through the SHOP Exchange isn't available. Employers in this situation may calculate the Code Sec. 45R credit by treating health insurance coverage provided for a later health plan year as qualifying for credit, provided that such coverage would have qualified for credit under rules applicable before 1/1/2014. IRS also notes that guidance doesn't affect ad hoc transitional relief provided through earlier Notices. (Notice 2018-27)

QUALIFICATION DETERMINATION WORKSHEET (2019)
Credit for Small Employer Health Insurance Premiums

Determine the Number of Full Time Employees:

1. Enter the number of employees who worked 2,080 hours or more during the year……………………………………………………………………………………….. _______
2. Multiply Line 1 by 2,080 ……………………………………………………………………………. _______
3. Enter the total hours worked by all employees who worked less than 2,080 hours during the year……………………………………………………………………… _______
4. Enter the total of lines 2 and 3……………………………………………………………………… _______
5. Divide line 4 by 2,080……………….……………………………………………………………… _______
6. **Number of full time equivalent employees** (round down line 5 to the next whole number (if the number is less than one, enter 1)………………………..….… ☐

CAUTION: IF LINE 6 IS 25 OR MORE, STOP – CREDIT NOT AVAILABLE

Determine the Average Annual Wage:

7. Enter the total of all wages paid to employees during the tax year……………………... _______
8. Divide Line 7 by the number of equivalent full time employees (Line 6)……………….._______
9. **Average annual wage** (round down the amount on line 8 to the next lower $1,000)……. ☐

CAUTION: IF LINE 9 IS $54,200 OR MORE, STOP – CREDIT NOT AVAILABLE

If line 6 is less than 25 and line 9 is less than $54,200, the taxpayer qualifies for the credit!
Enter the amount from Line 6 on Line 2 of Form 8941 and
Enter the amount from Line 9 on Line 3 of Form 8941 and complete the form for the credit.

California has no equivalent credit.

LARGE EMPLOYER
HEALTH COVERAGE EXCISE TAX

Overview

All applicable large employers (ALE), must offer at least 95% of its full-time employees and their dependents (but not spouse) affordable minimum essential health care coverage or be subject to a penalty.

- An applicable large employer is one with 50 or more equivalent full time employees.
- Even though part-time employees can drive the equivalent full-time employee count above the 50 threshold, the employer need only offer affordable minimum essential coverage to its full-time employees.
- Excise tax (penalty) applies to those applicable large employers (ALEs), that:
  - Do not offer coverage for all its full-time employees (and their dependents),
  - Offer minimum essential coverage that is unaffordable (employee contribution for 2019 is more than 9.86%) (up from 9.56% in 2018) of the employee's household income), or
  - Offer minimum essential coverage where the plan's share of the total allowed cost of benefits is less than 60% (i.e. less than the bronze coverage)

- **Form 8928** - Return of Certain Excise Taxes

CAUTION

Who is an "employee" and who is an "Applicable Large Employer" (ALE) are governed by some very complex and lengthy regulations (Reg. § 54.4980H). The regulations include an abundant number of special rules. This material covers many of the more common situations **but not all**. Practitioners providing advice to their clients related to this excise tax are cautioned to review and familiarize themselves with the entire regulation before rendering any services. Full text of the regulations can be accessed in the Federal Register at: http://www.gpo.gov/fdsys/pkg/FR-2014-02-12/pdf/2014-03082.pdf

ACRONYMS - The following acronyms are used throughout this chapter:

ALE – Applicable Large Employer – those subject to the employee insurance mandate.
FTE – Full-time employees – generally those working 30 hours or more per week.
EFTE – The equivalent full-time employees taking into account the hours worked by part-time employees.
Small – Refers to employers with fewer than 50 EFTE
Large – Refers to employers with 50 or more EFTE

RAPID FINDER

DETERMINING IF AN EMPLOYER IS AN ALE

Generally an employer is a "large employer" if it employs 50 or more EFTEs during the preceding calendar year. Seems simple, right? Well it is not all that simple, because a number of issues come into play in determining what constitutes a FTE. What else would you expect? Consider this to be an overview of the issues that does not necessarily cover all the intricacies that apply.

Taxpayer Advocate Service Online Estimator

The IRS' Taxpayer Advocate Service has developed an Employer Shared Responsibility Provision (ESRP) Estimator to help employers determine the number of their full-time and full-time equivalent employees and make an estimate of the *maximum* amount of the potential liability for the employer shared responsibility payment that could apply if they fail to offer coverage to their full-time employees. The estimator can be accessed at: https://taxpayeradvocate.irs.gov/estimator/esrp/

Employee Categories Not Considered FTEs - The final regulations provide clarifications regarding whether employees of certain types or in certain occupations are considered full-time, including:

- *Volunteers:* Hours contributed by bona fide volunteers for a government or tax-exempt entity, such as volunteer firefighters and emergency responders, will not cause them to be considered FTEs.
- *Educational Employees:* Teachers and other educational employees will not be treated as part-time for the year simply because their school is closed or operating on a limited schedule during the summer.
- *Seasonal Employees:* Those in positions for which the customary annual employment is six months or less generally will not be considered FTEs.
- *Student Work-study Programs:* Service performed by students under federal or state-sponsored work-study programs will not be counted in determining whether they are FTEs.
- *Adjunct Faculty:* In general, employers of adjunct faculty are instructed to use a method of crediting hours of service for those employees that is reasonable in the circumstances and consistent with the employer responsibility provisions. For this purpose, the regulations specify that crediting an adjunct faculty member with 2.25 hours of service per week for each hour of teaching or classroom time is reasonable.
- *Work Performed Outside the U.S.:* In determining whether an employer is an ALE, an employer generally takes into account only work performed in the United States. Thus, employees working only abroad, whether or not U.S. citizens, generally will not be taken into account for purposes of determining whether an employer is an ALE.
- *Veterans:* Shall not be taken into account as a FTE for any month the individual has medical coverage under Tricare or the Veterans Administration (Transportation Act of 2015).

Methods of Determining FTE Status - An employer's number of FTE matters for purposes of whether the Employer Shared Responsibility provisions apply to the employer. An employer identifies its FTEs based on each employee's hours of service. An employee is a FTE for a calendar month if he or she averages at least 30 hours of service per week. Under the final regulations, for purposes of determining FTE status, 130 hours of service in a calendar month is treated as the monthly equivalent of at least 30 hours of service per week.

The final regulations provide two measurement methods for determining whether an employee has sufficient hours of service to be a FTE.

- *Monthly Measurement Method:* Under this method, an employer determines each employee's status as a FTE by counting the employee's hours of service for each month. For employees paid on an hourly basis, an employer is required to calculate actual hours of service from records of hours worked and hours for which payment is made or due. For employees paid on a non-hourly basis (e.g., salaried employees), an employer may calculate the actual hours of service using the same method as for hourly employees, or use a days-worked equivalency crediting the employee with eight hours of service for each day for which the employee would be required to be credited with at least one hour of service, or a weeks-worked equivalency under which an employee would be credited with 40 hours of service for each week for which the employee would be required to be credited with at least one hour of service (Reg. § 54.4980H-3(c))
- *Look-back Measurement Method:* Under this method, employers may determine the status of an employee as a FTE during a future period (referred to as the stability period), based upon the hours of service of the employee in a prior period (referred to as the measurement period). The stability period is a period selected by an ALE, that immediately follows, and is associated with, a standard measurement period or an initial measurement period (and, if elected by the employer, an administrative period of no longer than 90 days). The standard measurement period is a period of at least three months but not more than 12 months, as determined by the employer. The employer determines the months in which the standard measurement period starts and ends, provided that the determination is made on a uniform and consistent basis for all employees in the same category.

- ***CAUTION*** –The look-back measurement period of some employees may change because of situations in which an employee transfers from one position to another within the same ALE, and the employer uses a different measurement period for each position. Also there are special rules when an employer changes between the monthly and the look-back measurement methods. Refer to Notice 2014-49 for guidance in both situations.

Hours of Service - Generally, an hour of service means each hour for which an employee is paid, or entitled to payment, for the performance of duties for the employer, and each hour for which an employee is paid, or entitled to payment, for a period of time during which no duties are performed due to vacation, holiday, illness, incapacity (including disability), layoff, jury duty, military duty or leave of absence.

Under the final regulations, an hour of service does not include any hour of service performed as a bona fide volunteer, as part of a Federal Work-Study Program (or a substantially similar program of a State or political subdivision thereof) or to the extent the compensation for services performed constitutes income from sources without the United States.

In addition, until further guidance is issued, a religious order is permitted, for purposes of determining if an employee is a full-time employee for the Employer Shared Responsibility provisions, to not count as an hour of service any work performed by an individual who is subject to a vow of poverty as a member of that order when the work is in the performance of tasks usually required (and to the extent usually required) of an active member of the order.

Treasury and the IRS continue to consider additional rules for the determination of hours of service for certain categories of employees whose hours of service are particularly challenging to identify or track or for whom the general rules for determining hours of service may present special difficulties (including adjunct faculty, commissioned salespeople and airline employees) and certain categories of work hours associated with some positions of employment, including layover hours (for example for airline employees) and on-call hours. For this purpose, until further guidance is issued, employers are required to use a reasonable method of crediting hours of service that is consistent with section 4980H. The preamble to the final regulations includes examples of methods of crediting these hours that are reasonable and that are not reasonable, including a method that is considered reasonable for crediting hours of service for adjunct faculty members.

New Employer Issues – If the employer was not in existence during the preceding calendar year, the final regs include special rules for new employers establishing a group health plan in the first months of operation. (Reg. § 54.4980H-2(b)(3))

- *First Calendar Year of Operation* - The determination of whether a new employer is a large employer in its first calendar year of operation is based upon the employer's reasonable expectations at the time the business came into existence. This is true, even if the actual number of full-time employees exceeds that reasonable expectation.
- *Multiple Related Entities & The 30 Rule* - For purposes of Code Sec. 4980H(a) liability calculation, with respect to a calendar month, the number of FTE of an applicable large employer member (i.e., one of multiple related entities that, due to the application of the aggregation rules, make up an ALE) is reduced by that member's allocable share of 30. (Reg. § 54.4980H-4(e))
- *New Employee Waiting Period* - Under the look-back measurement method, if a new employee is reasonably expected to be a full-time employee and is otherwise eligible for coverage, and the employer offers coverage to the employee by the first day of the calendar month following the conclusion of the employee's initial three full calendar months of employment, the employer will not be subject to a penalty for those three months if the coverage offered provides minimum value. (Reg. § 54.4980H-3(d)(2)(iii))
- *Employee Start Date* - An employer is also not subject to a penalty with respect to an employee for the first calendar month of the employee's employment if the employee's start date is other than the first day of the calendar month. (Reg. § 54.4980H-4(c), Reg. § 54.4980H-5(c))
- *Employer Not in Existence in Prior Year* - In a case where an employer was not in existence during the preceding calendar year, the seasonal worker exception applies so that the employer will not be treated as an ALE if it reasonably expects: (1) its workforce to exceed 50 EFTE for 120 days or fewer during the current calendar year, and (2) the employees in excess of 50 employed during such 120-day period to be seasonal workers. (Reg. § 54.4980H-2(b)(2))

  An employer that was not in existence on any business day in the prior calendar year is considered an ALE in the current year if the employer is reasonably expected to employ an average of at least 50 EFTE on business days during the current calendar year and it actually employs an average of at least 50 EFTE on business days during the calendar year. In contrast, for the next year (the year after the first year the employer was in existence), the employer will determine its status as an ALE using the rules that generally apply (that is, based on the number of EFTEs that the employer employed in the preceding year).

Other Issues

- *Commonly Owned or Related Businesses* - If two or more companies have a common owner or are otherwise related, they are combined for purposes of determining whether they employ enough employees to be subject to the employer mandate. However, these rules for combining related employers do *not* apply for purposes of determining whether a particular company owes an employer shared responsibility payment or the amount of any payment. Rather, these determinations are made separately for each related company. (Q&A 6)
- *Types of Employers Subject to the Mandate* - In addition to for-profit businesses, non-profit and government entity (including federal, state, local, and Indian tribe) employers are subject to the employer mandate if they are ALEs. (Q&As 7 - 8)
- *Eligible for Health Care Coverage from Another Source* - For purposes of determining whether an employer is an ALE, all employees are counted (subject to a limited exception for certain seasonal workers), regardless of whether the employees are eligible for health coverage from another source, such as Medicare, Medicaid, or a spouse's employer. Thus, an ALE with full-time employees who are eligible for health coverage through another source, will be subject to the Employer Shared Responsibility provisions regardless of whether those employees are eligible for coverage from another source. But, employees who are eligible for Medicare or Medicaid are not eligible for a premium tax credit. If no full-time employee receives a premium tax credit (for example, because all of an employer's full-time employees are eligible for Medicare or Medicaid), the employer will not be subject to an Employer Shared Responsibility payment.

  The IRS has issued final regulations adopting an intentional or reckless disregard for the facts exception to the Code Sec. 36B eligibility safe harbors for household income below 100 percent of the Federal Poverty Level (FPL), government programs such as Medicaid, and employer-sponsored coverage. The final regulations generally apply for tax years beginning after December 31, 2016.

  However, if an ALE does not offer coverage to its FTEs (and their dependents) or offers coverage to fewer than 95% (beginning in 2016) of its FTE (and their dependents) and a FTE receives a premium tax credit, the employer will be liable for a penalty, which will be calculated based on the employer's number of FTEs. For this purpose, the number of FTEs includes FTEs who are eligible for coverage from another source.
- *Exempt Employees* - For purposes of determining whether an employer is an ALE, all employees are counted (subject to a limited exception for certain seasonal workers), regardless of whether they are exempt from the penalty. Thus, an ALE with FTEs who are exempt from the individual insurance provision will be subject to the Employer Shared Responsibility provision. Employees who are exempt from the penalty for having individual insurance may be eligible for a premium tax credit. If no FTE receives a premium tax credit, the employer will not be subject to a penalty. However, if an ALE does not offer coverage to its FTEs (and their dependents) and a FTE receives a premium tax credit, the employer will be liable for a penalty which will be calculated based on the employer's number of FTEs.
- *Waiting Period* - A group health plan or group health insurance issuer cannot impose, as a condition of eligibility for coverage under the plan, a waiting period that exceeds 90 days. In addition, a one-month orientation period can begin any day of a month (Reg. Sec. 54.9815-2708(c)(3)(iii)).

  Example - *An employee begins working full time for an employer on Oct. 16. The employer sponsors a group health plan, under which full-time employees are eligible for coverage after they have successfully completed a bona fide one-month orientation period. If the employee completes the orientation period on Nov. 15, health plan coverage for the employee must begin no later than Feb. 14, which is the 91st day after the end of the orientation period.*
- *Mandatory Electronic Filing* – All employers filing 250 or more Forms 1095-C must file Forms 1094-C (transmittal form) and 1095-C electronically. (Q&A 19)
- *1095-C Reporting Requirements* - All ALEs, regardless of whether the employer is a tax-exempt or government entity (including federal, state, local, and Indian tribal governments), are subject to the 1095-C reporting requirements. (Q&A 6) The due date for filing the 2019 1095-Cs is February 28*, 2020 (March 31* if filed electronically). (Reg Sec 301.6056-1(e)) A 1095-C for 2019 must be furnished to each full-time employee by January 31, 2020, which can be done electronically if the employee has consented to receive their copy electronically. (2019 Form 1095-C draft instructions) However, the IRS has provided an automatic 30-day extension in the past for furnishing the employee's copy, so watch for announcements for 2020. * *Regs specify 2/28 not last day of Feb so no adjustment for leap year*

  An ALE must report information with respect to all FTEs, even ones who are not offered coverage during the year. If an ALE does not offer coverage to any of its FTEs, the employer must file returns with IRS and furnish statements to each of its full-time employees to report information specifying that coverage was not offered. (Q&A 21)
- *Spouses* – Employer plans are not required to cover spouses.

- *Dependents* – Coverage must be included for an employee's child who is under the age of 26. Coverage must include the full month in which the child turned 26. The definition of a child for these purposes excludes step and foster children. Excluded from the definition are children who are not U.S. Citizens or nationals, except for those residing in Canada or Mexico or a child who is an adopted child that has the same principal place of abode as the taxpayer and is a member of the taxpayer's household.
- *Employees Outside the U.S.* - An employer generally takes into account only work performed in the U.S. in determining whether it is an ALE – so, a foreign employer with fewer than 50 EFTE in the U.S. generally won't be subject to the employer mandate. Similarly, a company that employs U.S. citizens working abroad would only be subject to the employer mandate if the company had at least 50 EFTE, determined by taking into account only work performed in the U.S. (Q&As 13 -14)
- *Seasonal Employees* - Under an exemption, an employer will not be considered to employ more than 50 EFTE if: (a) the employer's workforce exceeds 50 FTEs for 120 days, or fewer, during the calendar year; and (b) the employees in excess of 50 employed during that 120-day (or fewer) period were seasonal workers. Seasonal workers are workers who perform labor or services on a seasonal basis as defined by the Secretary of Labor, and retail workers employed exclusively during holiday seasons. For this purpose, employers may apply a reasonable, good faith interpretation of the term "seasonal worker." (IRS Q&A #4) Special rules apply to construction industry employers.
- *Full-time Employee* - A FTE is an employee who, for a calendar month, is employed an average of at least 30 hours of service per week with the employer. For this purpose, 130 service hours in a calendar month is treated as the monthly equivalent of at least 30 hours per week. (Regulations sections 54.4980H-1(a)(21) and 54.4980H-3 and Notice 2014-49, 2014-41 I.R.B. 66)
- *Part-Time Employees* - Solely for purposes of determining whether an employer is an ALE, an employer will also have to include for that month the number of FTEs determined by dividing (a) the aggregate number of hours of service of employees who are not FTEs for the month by (b) 120.

  Example – Equivalent Full-Time Employees *- For his business, John has 45 full-time employees plus he has 20 part-time employees. His part-time employees for the month of January worked 960 hours. That is the equivalent of 8 (960/120) full-time employees. Thus, the number of John's full-time employees for the month of January is 53 (45 + 8).*

- *Prior Employee* – A rehired prior employee cannot be treated as a new hire if the employee had one hour of work in the prior 13 weeks. Note: There is a "parity" rule that shortens the period to be classified as a new hire. That applies when the no work period plus 4 weeks exceeds the duration of the previous period of work.
- *Continuing Employee* – A continuing employee, one that does not meet the 13-week rule, is considered a full-time employee upon resumption of services (no waiting period).
- *Penalty Deductibility* – This excise tax penalty is nondeductible under the general rules for excise taxes. (Code Sec. 275(a)(6))
- *Rounding of Full-Time Employee Count* – The sum of the FTEs and EFTEs is determined, and then that number rounded down to the nearest whole number before determining if the employer meets the 50-employee threshold.

  Example: *The employer has 35 FTEs and his part time employees worked 1,750 hours. Thus his EFTEs are 14.58 (1,750/120). Adding the FTEs and the EFTEs together results in a total of 39.58 (35 + 14.58). That result is then rounded down to 39 before making the determination if the employer is an ALE.*

- *Benefit Hours* **–** The hours used to determine full-time status include both hours worked and benefit hours for which the employee was paid. Benefit hours include holiday, vacation, sick time, jury duty or any period of paid leave.

Interaction with Premium Credit

Generally, if an employee is offered affordable minimum essential coverage under an employer-sponsored plan, he is ineligible for a premium tax credit and cost-sharing reductions for health insurance purchased through a state or federal insurance Marketplace.

However, if the coverage is unaffordable (see below) or the plan's share of benefits is less than 60%, then he is eligible, but only if he declines to enroll in the coverage and purchases coverage through the Marketplace instead.

IRS has clarified that the fact that an employer doesn't employ enough employees to be subject to the employer mandate does not affect its employees' eligibility for a premium tax credit. (Q&A 44)

"AFFORDABLE" DETERMINATION SAFE HARBOR

For 2019, the law defines affordable coverage as **not** costing the employee more than 9.86% (up from 9.56% in 2018) of the employee's household income. **But how is an employer able to determine an employee's household income?** Under safe harbor rules in the final regulations, an employer can use the wages they pay, their employees' hourly rates, or the federal poverty level to determine whether the coverage is affordable. (Q&As 19 - 20)

Important Concept to Understand

An employer must offer, not provide, affordable minimum essential coverage. However, for an employer's lower paid employees the employer may have to pay part of the premium to make the insurance affordable.

Rate of pay safe harbor:

- *Hourly Employee* – The safe harbor for 2019, is satisfied for a calendar month if the employee's required contribution does not exceed 9.86% of an amount equal to 130 multiplied by the employee's hourly rate of pay as of the first day of the coverage period, generally the first day of the plan year.
- *Salaried Employee* – The safe harbor for 2019 is met if the employee's required contribution for the month does not exceed 9.86% of the employee's monthly salary as of the first day of the coverage period, generally the first day of the plan year. The employer is permitted to use any reasonable method for converting payroll periods to monthly salary.

Federal poverty line safe harbor:

- *All Employees* – To meet the safe harbor under this method, the employee's contribution must not exceed 9.86% of a monthly amount determined as the "Federal poverty line" (see poverty table under Premium Assistance Credit in Chapter 12.02) for a single individual for the applicable calendar year, divided by 12.

  Example: *For 2019, the poverty level for a single individual is $12,140. Thus, the monthly poverty line safe harbor amount is $99.75 (($12,140 x .0986)/12).*

Form W-2 safe harbor (post year safe harbor)

- *All Employees* – The safe harbor is satisfied if the employee's contribution toward the coverage for the calendar year does not exceed 9.86% of the employee's Form W-2 wages (Box 1 of the Form W-2) Wage and Tax Statement from the employer for the calendar year.

W-2 SAFE HARBOR			
Plan Year	Prior Year Poverty Level	Affordability Percentage	Maximum Monthly Contribution (Self-Coverage)
2020	$12,490	9.78%	101.7879
2019	$12,140	9.86%	$99.75
2018	$12,060	9.56%	$96.08
2017	$11,880	9.69%	$95.93
2016	$11,770	9.66%	$94.75
2015	$11,670	9.56%	$92.97

COMPUTING THE EXCISE TAX (PENALTY):

For 2019 (and for employers with non-calendar-year plans, any calendar months during the 2018 plan year that fall in 2019), an employer that was an ALE in 2018 (had at least 50 EFTE in 2018), will be liable for an Employer Shared Responsibility payment only if:

- The employer does not offer health coverage or offers coverage to fewer than 95% of its FTE and the dependents of those employees, **and** at least one of the full-time employees receives a premium tax credit to help pay for coverage on a Marketplace, **OR**
- The employer offers health coverage to at least 95% of its FTE and the dependents of those employees, but at least one full-time employee receives a premium tax credit to help pay for coverage on a Marketplace, which may occur because the employer did not offer coverage to that employee or because the coverage the employer offered that employee was either unaffordable to the employee or did not provide minimum value.

PREPARER TRAP

If an employer offers an employee affordable minimum essential insurance then that employee is not eligible for a PTC, and will have to repay the APTC for any month the employer offers the affordable minimum essential insurance coverage. In these cases the employer would not be subject to the penalty.

However, if an employee does obtain coverage from the Marketplace and does not tell the Marketplace that his employer offers affordable minimum essential care, the Marketplace will allow APTC and include it on the 1095-B. At the same time the employer will issue a 1095-C showing the employee was offered qualifying care, making the employee ineligible for the PTC, and thus the employee must repay any APTC received for the months the employer offered the employee affordable minimum essential insurance.

This is where preparers that don't review the 1095-C for offers of coverage may allow the PTC on the return. In which case, they will have to deal with the IRS PTC disallowance letter down the road.

ALE Offers No Coverage – For an employer who does not offer coverage or offers it to fewer than 95% of its full-time employees and their dependents, the excise tax penalty for any month in 2019 would be $208.33 ($2,500/12) times the number of full-time employees in excess of 30.

FAILURE TO OFFER COVERAGE PENALTY (4980H(a))		
Year	Annual Penalty	Monthly Penalty
2020	$2,570 (est.)	$214.16
2019	$2,500 (est.)	$208.33
2018	$2,320	$193.33
2017	$2,260	$188.33
2016	$2,160	$180.00
2015	$2,080	$173.33
2014	$2,000	$166.67

***Example – No Health Care Plan** – In January of 2019, an ALE with 120 employees does not offer a health care plan to its employees. The penalty is 208.33 times the number of full-time employees in excess of 30. Thus, the penalty for the month of January is $18,750 ((120-30) x $208.33).*

Employer Offers Coverage and One or More Employees Qualifies for Premium Assistance Credit – An ALE would be liable for the penalty (figured monthly) if the employer offers coverage, but the cost of the coverage is not affordable for one or more employees or the insurance does not provide minimum (60%) coverage.

(1) **Offers to 95% of its full-time employees** (and their dependents) the opportunity to enroll in "minimum essential coverage" under an "eligible employer-sponsored plan" for that month; **and**

(2) **At least one full-time employee** has been certified to the employer as having enrolled for that month in a qualified health plan for which a premium tax credit or cost-sharing reduction is allowed or paid with respect to the employee.

The excise tax penalty for any month in 2019 would be $312.50 $3,750/12) times the number of full-time employees that receive premium tax credit or cost-sharing reductions through an insurance Marketplace but not to exceed the penalty imposed had the employer not offered health care insurance.

OFFERS COVERAGE BUT ONE OR MORE QUALIFY FOR PTC		
Year	**Annual Penalty**	**Monthly Penalty**
2019	$3,750 est.	312.50 est.
2018	$3,480	290.00
2017	$3,390	282.50
2016	$3,240	270.00
2015	$3,120	260.00
2014	$3,000	250.00

***Example – Health Care Plan and Employees Qualify for Premium Tax Credit or Cost Sharing Reductions** – In January of 2019, an applicable large employer with 120 employees offers a health care plan to its employees, but the cost of the plan does not meet the affordable criteria (employee contribution is more than 9.86% of the employee's household income or the plan's share of the total allowed cost of benefits is less than 60%) and 20 of the employees sign up for health insurance through an insurance Marketplace and receive a Premium Tax Credit or Cost-Sharing Reductions. The employer's excise tax penalty is 312.50 times 20. Thus, the penalty for the month of January is $6,250, which is less than the $18,750 penalty that would apply if no coverage was offered.*

Effect of Employees Purchasing Other Coverage - If an employer offers health coverage that is affordable and that provides minimum value to its full-time employees and their dependents, the fact that some of the employees (or their spouses or dependents) either purchase health insurance through a Marketplace or enroll in Medicare or Medicaid, won't cause the employer to be subject to an employer shared responsibility payment. Liability for that payment is triggered by a full-time employee's receipt of a premium tax credit, and an employee who is offered affordable coverage that provides minimum value is ineligible for the credit. (Q&As 21 - 23)

Minimum Value (Minimum Essential Coverage) - If an employer fails to provide health care coverage that offers a minimum value (minimum essential coverage), and as a result employees become eligible for a Code Sec. 36B premium tax credit or cost-sharing reduction (see Chapter (section) 12.02), the employees' eligibility will, in turn, cause the employer to be subject to the penalty. Thus, knowing what minimum value means is important for both the employer and employee. The term minimum value (MV) is described in a number of ways:

- Under Code Sec. 36B(c)(2)(C)(ii), a plan fails to provide MV if the plan's share of the total allowed costs of benefits provided under the plan (as determined under Secretary of Health and Human Services (HHS) regs) is less than 60% of the costs. In addition, to qualify as providing minimum value, employer-sponsored health plan benefits must include substantial coverage of inpatient hospital and physician services.
- Under 36B(c)(2)(C)(i)(II), an employer-sponsored plan is not affordable if the employee's required contribution for 2019 with respect to the plan exceeds 9.86% of his household income for the tax year. When determining the applicable percentage of income, that **percentage is applied to the employee's coverage only**.

> ***Example:*** *Carl is married to Jane, and Carl's employer's plan requires Carl to contribute $5,300 for coverage for Carl and Jane for 2018, which reflects 11.3% of Carl's household income. However, because the portion of the contribution ($3,750) attributable to Carl's self-only coverage does not exceed 9.86% of Carl's household income, Carl's employer's plan is considered affordable for Carl and Jane. (Reg. § 1.36B-2(c)(3)(v)(D), Example 2)*

Proposed reliance regulations clarify the term minimum value (minimum essential coverage) and provide the following safe-harbor plans (however, as noted above health plans which don't offer substantial coverage for in-patient hospitalization services or physician services or both will not be considered to provide minimum value effective as of November 4, 2014, even if they would otherwise fit into one of the safe harbors):

(1) A plan with a $3,500 integrated medical and drug deductible, 80% plan cost-sharing, and a $6,000 maximum out-of-pocket limit for employee cost-sharing;

(2) A plan with a $4,500 integrated medical and drug deductible, 70% plan cost-sharing, a $6,400 maximum out-of-pocket limit, and a $500 employer contribution to an HSA; and

(3) A plan with a $3,500 medical deductible, $0 drug deductible, 60% plan medical expense cost-sharing, 75% plan drug cost-sharing, a $6,400 maximum out-of-pocket limit, and drug co-pays of $10/$20/$50 for the first, second and third prescription drug tiers, with 75% coinsurance for specialty drugs.

A minimum value calculator is available online at https://www.cms.gov/cciio/resources/regulations-and-guidance/index.html.

Who Computes the Employer Penalty - The employer is not required to calculate a payment with respect to Section 4980H or file returns submitting such a payment. Instead, after receiving the information returns filed by applicable large employers under § 6056 and the information about employees claiming the premium tax credit for any given calendar year, the Internal Revenue Service (IRS) will determine whether any of the employer's full-time employees received the premium tax credit and, if so, whether an assessable payment under § 4980H may be due. If the IRS concludes that an employer may owe such an assessable payment, it will contact the employer, and the employer will have an opportunity to respond to the information the IRS provides before a payment is assessed. (Notice 2013-45)

Penalty – Decision Tree – The flow chart below provides an overview of the large employer health care excise tax.

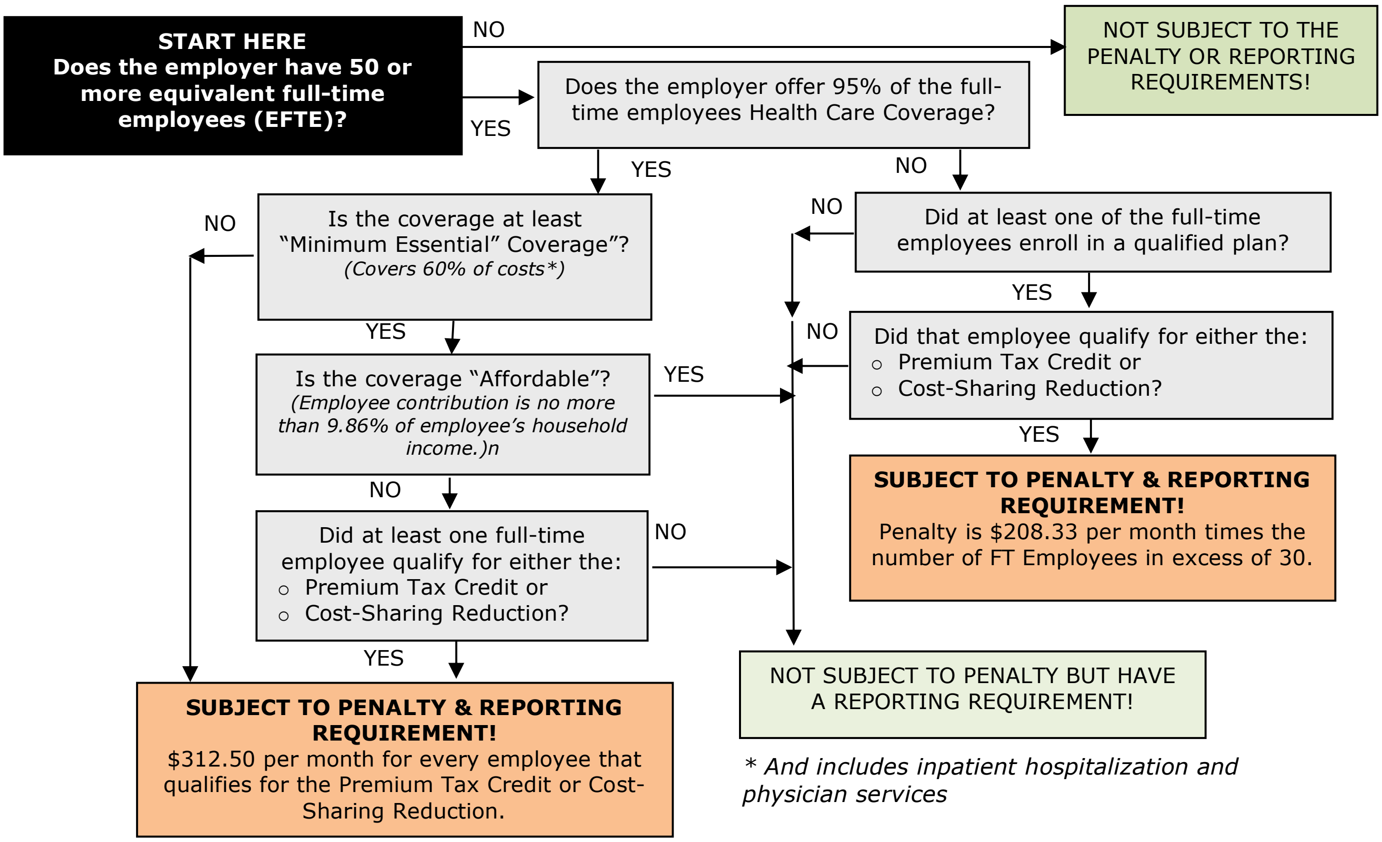
2019 Large Employer Health Coverage Excise Tax Decision Tree



** And includes inpatient hospitalization and physician services*

INFORMATION REPORTING:

POINT OF CLARIFICATION Generally unless the employer is self-insured, which usually would only apply to major businesses, an employer will only complete Part I and Part II of the 1095-C. The group insurance carrier will file a 1095-B for each employee providing the insured's names and the months of coverage. Therefore, Part III of Form 1095-C need only be completed by a self-insured employer since there is no insurance carrier to report that information.

Penalties – Penalties apply for failure to file a correct information return (Code Sec. 6721) and failure to furnish correct payee statements (Code Sec. 6722). However, these penalties may be waived if the failure was due to reasonable cause and not to willful neglect. (Code Sec. 6724(a)) See page 10.01.03 for details on the penalties.

Form 1095-C – Employer-provided health insurance offer and coverage - Form 1095-C is a multipurpose form. It is used to both determine if the employer is subject to the employer penalty for not providing insurance **and** to determine if the employee is qualified for the premium tax credit.

(1) Part I: Includes employer and employee information.

(2) Part II: Use to report information needed to determine if the employer is subject to the excise tax penalty for not making affordable minimum essential coverage available to their employees.

(3) Part III: Is only used by an employer that provides health coverage through an employer-sponsored **self-insured** health plan, typically larger corporations. The employer must complete Parts I and III, for any employee who enrolls in the health coverage, whether or not the employee is a full-time employee for any month of the calendar year. **For other than self-insured plans, the insurance company or plan sponsor will provide the information included in part III using Form 1095-B.**

WHO MUST FILE 1095-Cs FOR 2019

Applicable Large Employers (ALE), generally employers with 50 or more equivalent full-time employees (EFTEs) in the previous year, must file a Form 1095-C for each full-time (for any month of the year) employee (including a Form 1094-C Transmittal). Employers with fewer than 50 EFTEs do not have a 1095-C reporting requirement.

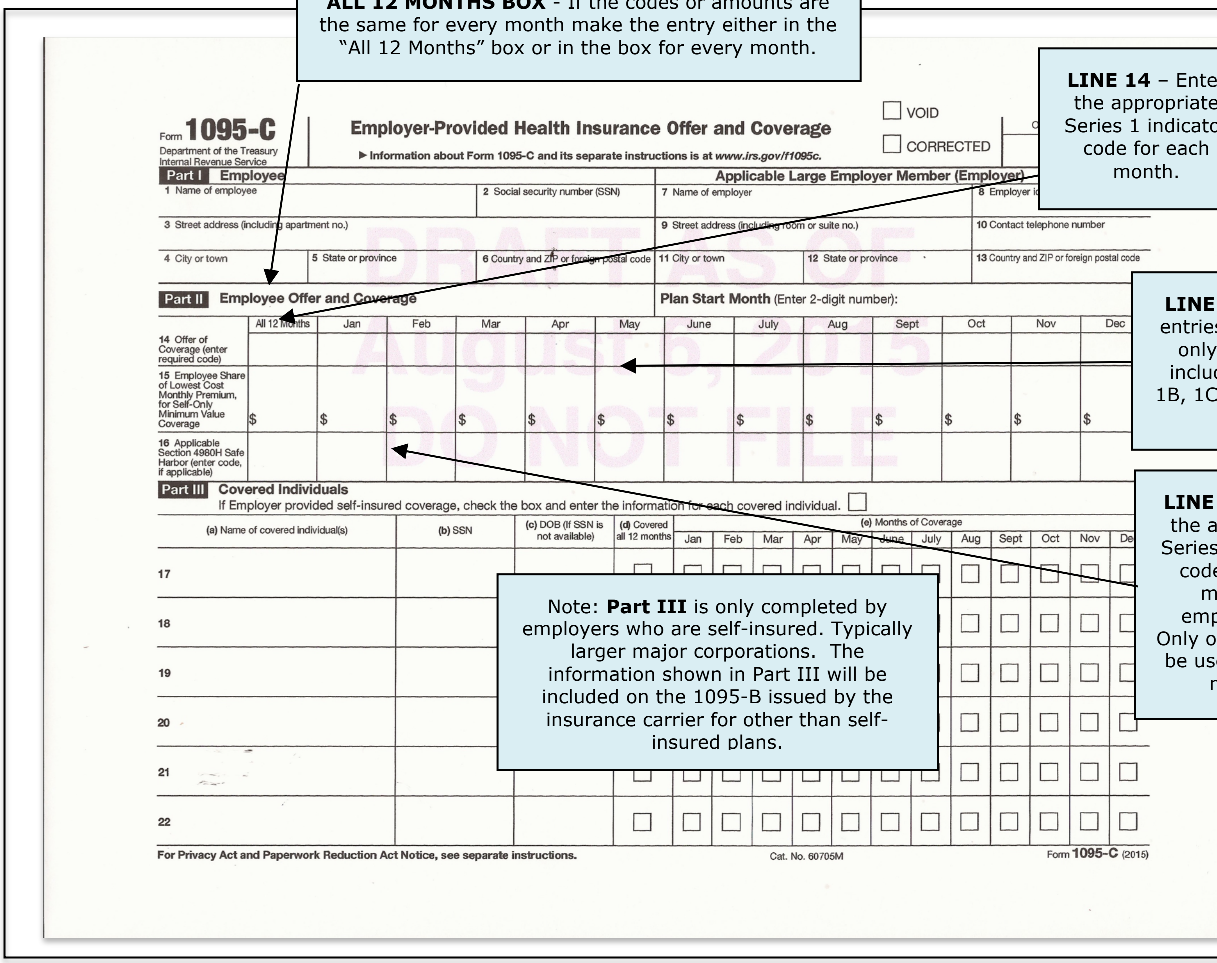
ALL 12 MONTHS BOX - If the codes or amounts are the same for every month make the entry either in the "All 12 Months" box or in the box for every month.

LINE 14 – Enter the appropriate Series 1 indicator code for each month.

LINE 15 - Make entries on line 15 only if line 14 includes codes: 1B, 1C, 1D, 1E, 1J or 1K

LINE 16 – Enter the appropriate Series 2 indicator code for each month of employment. Only one code can be used for each month.

Note: **Part III** is only completed by employers who are self-insured. Typically larger major corporations. The information shown in Part III will be included on the 1095-B issued by the insurance carrier for other than self-insured plans.



Form 1095-C
Department of the Treasury Internal Revenue Service
Employer-Provided Health Insurance Offer and Coverage

DRAFT AS OF August 6, 2015 DO NOT FILE

Line 14 Indicator Codes - Code Series 1 - If the type of coverage, if any, offered to an employee was the same for all 12 months in the calendar year, enter the Code Series 1 indicator code corresponding to the type of coverage offered in the "All 12 Months" box **or** in each of the 12 boxes for the applicable calendar months.

Code 1A - **Qualifying Offer** - Minimum essential coverage providing minimum value offered to full-time employee with employee contribution **for self-only coverage** equal to or less than 9.86% (2019) of the mainland single federal poverty line and at least minimum essential coverage offered to **spouse and dependent(s). Note:** When 1A is used then leave line 15 blank for all months for which code 1A was used.

Code 1B - **Qualifying Offer** - Minimum essential coverage providing minimum value offered to **employee only**.

Code 1C - **Qualifying Offer** - Minimum essential coverage providing minimum value offered to employee and at least minimum essential coverage offered to **dependent(s) (not spouse).**

Code 1D - **Qualifying Offer** - Minimum essential coverage providing minimum value offered to employee and at least minimum essential coverage offered to **spouse (not dependent(s))**.

Code 1E - **Qualifying Offer** - Minimum essential coverage providing minimum value offered to employee and at least minimum essential coverage offered to **dependent(s) and spouse**.

Code 1F – **Not a Qualifying Offer** - Minimum essential coverage NOT providing minimum value offered to employee; or employee and spouse or dependent(s); or employee, spouse and dependents.

Code 1G **– Not a Full Time Employee –** If an employer offers coverage through an employer self-insured plan and the employee is not full time, Code 1G is entered at Line 14 in the "All 12 Months" box or in each separate box. The employer must complete Parts I and III.

Code 1H **– No Offer Of Coverage** - Employee not offered any health coverage or employee offered coverage that is not minimum essential coverage, which may include one or more months in which the individual was not an employee.

Code 1J - Minimum essential coverage providing minimum value offered to employee; minimum essential coverage conditionally offered to employee's spouse; and minimum essential coverage NOT offered to employee's dependent(s).

Code 1K - Minimum essential coverage providing minimum value offered to employee; minimum essential coverage conditionally offered to employee's spouse; and minimum essential coverage offered to employee's dependent(s)

Line 16 Indicator Codes - Code Series 2 – For each month applicable, enter a Series 2 indicator code. These codes are used to indicate when the employer qualifies for one of the affordability safe harbors or other relief.

Code 2A – **Employee Not Employed During the Month** - Enter code 2A if the employee was **not employed on any day** of the calendar month.

Code 2B - **Employee Not a Full-time Employee** - Enter code 2B if the employee is not a full-time employee for the month and did not enroll in minimum essential coverage, if offered for the month.

Code 2B – **Full-Time Employee – Terminated Employment During Month – Coverage Would Have Continued** - Enter code 2B if the employee is a full-time employee for the month and whose offer of coverage (or coverage if the employee was enrolled) ended before the last day of the month solely because the employee terminated employment during the month (so that the offer of coverage or coverage would have continued if the employee had not terminated employment during the month).

Code 2C - **Employee Enrolled in Coverage Offered** - Enter code 2C for any month in which the employee enrolled in health coverage offered by the employer for each day of the month, regardless of whether any other code in Code Series 2 might also apply.

Code 2D - **Employee in a Limited Non-Assessment Period** - Enter code 2D for any month during which an employee is in a Limited Non-Assessment Period for section 4980H(b). If an employee is in an initial measurement period, enter code 2D (employee in a section 4980H(b) Limited Non-Assessment Period) for the month, and not code 2B (employee not a full-time employee). For an employee in a section 4980H(b) Limited Non-Assessment Period for whom the employer is also eligible for the multiemployer interim rule relief for the month, enter code 2E (multiemployer interim rule relief) and not code 2D (employee in a Limited Non-Assessment Period). See page 12.09.14 for details on limited non-assessment periods.

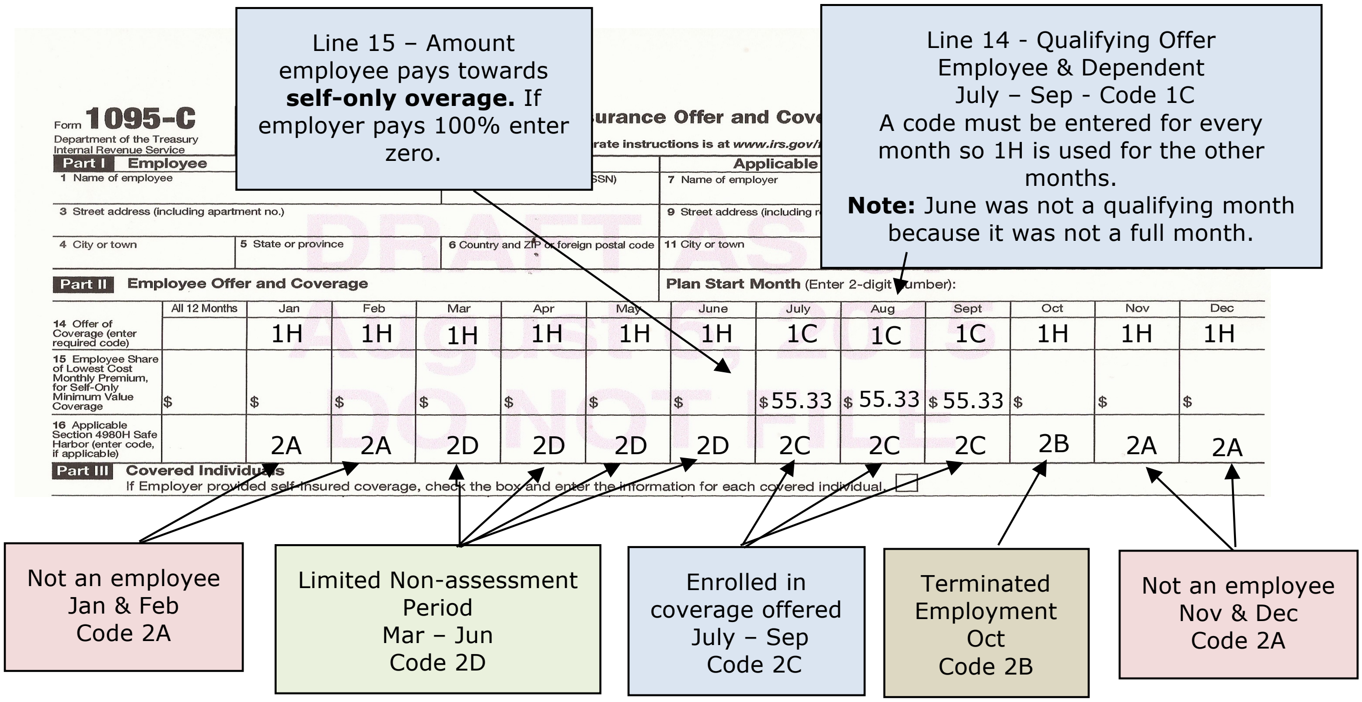
Code 2E - **Multiemployer Interim Rule Relief** - Enter code 2E for any month for which the multiemployer interim guidance applies for that employee. This relief is not covered in this material; refer to the instructions for Form 1095-C.

Code 2F - **Form W-2 Safe Harbor** - Enter code 2F if the employer used the section 4980H Form W-2 safe harbor to determine affordability for purposes of section 4980H(b) for this employee for the year. If an employer uses this safe harbor for an employee, it must be used for all months of the calendar year for which the employee is offered health coverage. See page 12.09.06 for details related to the W-2 safe harbor.

Code 2G - **Federal Poverty Line Safe Harbor** - Enter code 2G if the employer used the section 4980H federal poverty line safe harbor to determine affordability for purposes of section 4980H(b) for this employee for any month(s). See page 12.09.06 for details related to the affordability federal poverty line safe harbor.

Code 2H – **Rate of Pay Safe Harbor** - Enter code 2H if the employer used the section 4980H rate of pay safe harbor to determine affordability for purposes of section 4980H(b) for this employee for any month(s). See page 12.09.06 for details related to the rate of pay safe harbor.

Example: *ABC Inc. hired Kevin Haight on March 15, 2019. ABC has a 90-day probationary period for new employees before they offer health care insurance. On June 5, 2019 Kevin was offered insurance for himself and his dependents and enrolled in the coverage. Kevin subsequently terminated his employment October 1, 2019*



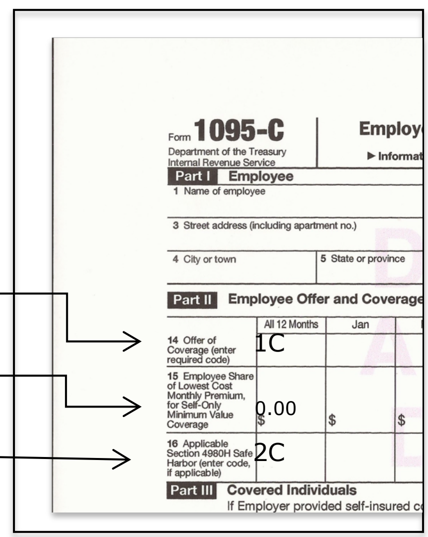
***Example:** Marty Lewis worked as a full-time employee for Carson Fabricators the entire year of 2019 and was offered insurance that provided minimum essential coverage for himself and his dependents for the entire year. The employer pays the entire premium for Marty. Marty was enrolled in coverage for the full year.*

In this situation only the "All 12 months" column need be completed.

Enrolled in coverage offered for the entire year. Code 1C

Employer paid 100% of premium so employee's cost is entered as 0.00

Enrolled in coverage offered for the entire year. Code 2C



1095-B – Health Coverage - Form 1095-B is used by providers of minimum essential health coverage, typically insurance companies, to report which months the individuals have minimum essential coverage. A simple check box is all that is needed since the insurance providers using this form only provide minimum essential coverage. Employers, including government employers, subject to the employer shared responsibility provisions that sponsor self-insured group health plans will report information about the coverage in Part III of Form 1095-C.

This information is used to determine if the individual(s) are subject to the shared responsibility payment (penalty for not being insured).

For Privacy Act and Paperwork Reduction Act Notice, see separate instructions. Cat. No. 60704B

NOTE

Large employers: An employer subject to the shared responsibility provisions will never complete a Form 1095-B; it is for insurance companies to report insurance coverage the insurance carrier provided to the employer's employees. Thus, unless the employer is self-insured, the employee will receive a 1095-C from the employer, with Parts I and II completed, and a Form 1095-B from the insurance carrier. If the employer is self-insured the employee will only receive a 1095-C, which will include Part III completed (in lieu of a 1095-B).

Small employers: An employer not subject to the shared responsibility provisions that sponsors a self-insured group health plan will use Form 1095-B to report information about covered employees.

Forms Due dates:

Copy to employees: by January 31

Filed with government: by February 28 (March 31 if filed electronically)

Definitions:

Month of Coverage – Means the employee was covered for every day of the month

Retirees **-** A retiree (meaning an individual who was not an employee during the applicable period) is not a full-time employee. However, if the retiree was a full-time employee for any month of the calendar year (for example, before retiring mid-year), the employer must complete information in Part II of Form 1095-C for all twelve months of the calendar year, using the appropriate codes.

Minimum Value - A plan provides minimum value if the plan pays at least 60 percent of the costs of benefits for a standard population and provides substantial coverage of inpatient hospitalization services and physician services. Report on Form 1095-C as not providing minimum value if a plan fails to provide substantial coverage of inpatient hospitalization and physician services.

Offer of Health Coverage – Employee **-** An employer makes an offer of coverage to an employee if:

- It provides the employee an effective opportunity to enroll in the health coverage (or to decline that coverage) at least once for each plan year.
- It continues the employee's election of coverage from a prior year but provides the employee an effective opportunity to opt out of the health coverage. See insurance opt-out arrangements below.
- The employer provides health coverage to an employee but does not provide the employee an effective opportunity to decline the coverage, the employer is treated as having made an offer of health coverage to the employee only if that health coverage provides minimum value and does not require an employee contribution for the coverage for any calendar month of more than 9.86% (2019) percent of a monthly amount determined as the mainland federal poverty line for a single individual for the applicable calendar year, divided by 12.
- It, or another employer in the Aggregated ALE Group, or a third party such as a multiemployer or single employer Taft-Hartley plan, a multiple employer welfare arrangement (MEWA), or, in certain cases, a staffing firm, offers health coverage on behalf of the employer.

Offer of Health Coverage – Spouse **-** For purposes of reporting, an offer to a spouse includes an offer to a spouse that is subject to a reasonable, objective condition, regardless of whether the spouse meets the reasonable, objective condition. For example, an offer of coverage that is available to a spouse only if the spouse certifies that the spouse does not have access to health coverage from another employer is treated as an offer of coverage to the spouse for reporting purposes. Note that this treatment is for reporting purposes only, and generally will not affect the spouse's eligibility for the premium tax credit if the spouse did not meet the condition and therefore did not have an actual offer of coverage.

Insurance Opt-Out Arrangements - Employers occasionally provide their employees with opt-out programs. An opt-out payment is a payment that:

(1) is available only if the employee declines coverage (which includes waiving coverage in which the employee would otherwise be enrolled) under the employer-sponsored plan, and

(2) cannot be used to pay for coverage under the employer-sponsored plan.

Proposed Regulations - Prop Reg 1.36B-2(c)(3)(v)(A)(7) defines an "eligible opt-out arrangement" as an arrangement under which the employee's right to receive the opt-out payment is conditioned on:

(1) The employee declining to enroll in the employer-sponsored coverage and

(2) The employee providing reasonable evidence that the employee and all other individuals for whom the employee reasonably expects to claim a personal exemption deduction* for the tax year or years that begin or end in or with the employer's plan year to which the opt-out arrangement applies (employee's expected tax family) have or will have minimum essential coverage (other than coverage in the individual market, whether or not obtained through the Marketplace) during the period of coverage to which the opt-out arrangement applies. For example, if an employee's expected tax family consists of the employee, the employee's spouse, and two children, the employee would meet this requirement by providing reasonable evidence that the employee, the employee's spouse, and the two children, will have coverage under the group health plan of the spouse's employer for the period to which the opt-out arrangement applies.

**For years 2018 through 2025, there is no exemption deduction per the TCJA. Nonetheless, those individuals who are the employee's dependents would presumably still be covered by this proposed regulation.*

The final regulations show "reserved" for opt-out arrangements at 1.36B-2(c)(3)(v)(A)(7).

Limited Non-assessment Period **-** The term limited non-assessment period refers to a period of time at the employee's beginning of employment where an employer will not be assessed the penalty. An example would be the employee's probationary period at the beginning of employment.

An ALE will not be subject to an assessable payment under section 4980H(a), and in certain cases section 4980H(b), for a full-time employee during limited non-assessment periods. The first five periods described below are Limited Non-Assessment Periods only if the employee is offered health coverage by the *first day of the first month following the end of the period*, and are Limited Non-Assessment Periods for section 4980H(b) only if the health coverage that is offered at the end of the period provides minimum value (Regulations section 54.4980H-1(a)(26)).

1. **First Year as ALE Period:** January through March of the first calendar year in which an employer is an ALE, but only for an employee who was not offered health coverage by the employer at any point during the prior calendar year. For this purpose, 2019 is not the first year an employer is an ALE, if that employer was an ALE in 2018.

2. **Waiting Period under the Monthly Measurement Method:** If an employer is using the monthly measurement method to determine whether an employee is a full-time employee, the period beginning with the first full calendar month in which the employee is first otherwise (but for completion of the waiting period) eligible for an offer of health coverage and ending no later than *two full calendar months after the end of that first calendar month*.
3. **Waiting Period under the Look-Back Measurement Method:** If an employer is using the look-back measurement method to determine whether an employee is a full-time employee and the employee is reasonably expected to be a full-time employee at his or her start date, the period beginning on the employee's start date and ending not later than the end of the employee's *third full calendar month of employment*.
4. **Initial Measurement Period and Associated Administrative Period under the Look-Back Measurement Method:** If an employer is using the look-back measurement method to determine whether a new employee is a full-time employee, and the employee is a variable hour employee, seasonal employee or part-time employee, the initial measurement period for that employee and the administrative period immediately following the end of that initial measurement period.
5. **Period Following Change in Status that Occurs During Initial Measurement Period Under the Look-Back Measurement Method:** If an employer is using the look-back measurement method to determine whether a new employee is a full-time employee, and, as of the employee's start date, the employee is a variable hour employee, seasonal employee or part-time employee, but, during the initial measurement period, the employee has a change in employment status such that, if the employee had begun employment in the new position or status, the employee would have reasonably been expected to be a full-time employee, the period beginning on the date of the employee's change in employment status and ending not later than the end of the third full calendar month following the change in employment status. If the employee is a full-time employee based on the initial measurement period and the associated stability period starts sooner than the end of the third full calendar month following the change in employment status, this Limited Non-Assessment Period ends on the day before the first day of that associated stability period.
6. **First Calendar Month of Employment:** If the employee's first day of employment is a day other than the first day of the calendar month, then the employee's first calendar month of employment is a Limited Non-Assessment Period.

TRANSMITTAL FORM 1094-C (PAGE 1)

A 1094-C transmittal form must be used when filing 1095-Cs. Multiple 1094-Cs can be filed for an employer where all of the 1095-Cs were not filed with a single transmittal form.

Authoritative Transmittal Form – An Authoritative Transmittal is one that includes all parts of the 1094-C completed. The reason for this is that multiple 1094-Cs can be filed, but one of them must have all required parts completed while the others only require Part I to be completed.

> ***Example:*** *The employer has two divisions and each division will be submitting the 1095-C for that division separately. However, one of those 1094-Cs must be the Authoritative Transmittal with the employer information for both divisions.*

Electronic Filing Requirement – An employer must file electronically if filing 250 or more 1095-Cs. The requirement has applied separately to each type of form. However, in June 2018 the IRS proposed regulations that would change the non-aggregation rule so that all information returns, regardless of type, would need to be counted when determining whether the 250-return threshold for required electronic filing is met. The new rules generally will be effective when the Treasury Decision adopting them as final is published in the Federal Register, but they will not apply to information returns required to be filed before January 1, 2019. The proposed regulations do not change the existing regulations allowing those who are required to electronically file returns to request a waiver of the electronic-filing requirement. (NPRM REG-102951-16)

> ***Example:*** *If the employer must file 500 Forms 1095-B and 100 Forms 1095-C in 2018, the employer must file Forms 1095-B electronically, but is not required to file Forms 1095-C electronically. If in 2019 and after the proposed regulations are final, the employer is filing the same number of 1095 forms as in 2018, the 1095-B and also the 1095-C forms would need to be filed electronically.*

Extension – Form 8809 must be filed by the due date of the 1094-C to obtain an automatic 30-day extension.

Electronic Filing Waiver - Form 8508, is used to request a waiver from filing information returns electronically. It must be filed at least 45 days before the due date of the returns.

Electronic Filing Penalty – Employers may be subject to a penalty up to $250 per return for failing to file electronically when required to do so. This amount is inflation-adjusted and is $260 for years beginning in 2015, 2016 or 2017. For returns required to be filed in 2020 andr 2019 (i.e., those reporting 2019 andr 2018 information), the penalty is $270. (Rev Procs 2018-18 and 2018-57)

Under penalties of perjury, I declare that I have examined this return and accompanying documents, and to the best of my knowledge and belief, they are true, correct, and complete.

Signature Title Date

For Privacy Act and Paperwork Reduction Act Notice, see separate instructions. Cat. No. 61571A Form **1094-C** (2015)

Definitions for Line 22 – Boxes A and D:

Qualifying Offer - A qualifying offer is an offer by an ALE of minimum essential coverage to one or more of its full-time employees for all months (not within a limited non-assessment period) of the year for which the employee was a full-time employee:

- Not costing more than 9.86% of the mainland single federal poverty line for the employee, and
- Minimum essential coverage to the employee's spouse and dependents.

If the employee does not have a spouse or dependent the employer is treated as if the employee did have a spouse or dependent for purposes of meeting the qualified offer.

Alternative Method of Completing Form 1095-C under the Qualifying Offer Method - If the employer reports using this method, it must not complete Form 1095-C, Part II, line 15, for any month for which a Qualifying Offer is made. Instead it must enter the Qualifying Offer code 1A on Form 1095-C, line 14, for any month for which the employee received a Qualifying Offer (or in the all 12 months box if the employee received a Qualifying Offer for all 12 months), and must leave line 15 blank for any month for which code 1A is entered on line 14.

An employer is not required to use the Qualifying Offer Method, even if it is eligible and instead may enter on line 14 the applicable offer code and then enter on line 15 the dollar amount required as an employee contribution for the lowest-cost employee-only coverage providing minimum value for that month. See the Form 1094-C instructions for additional details.

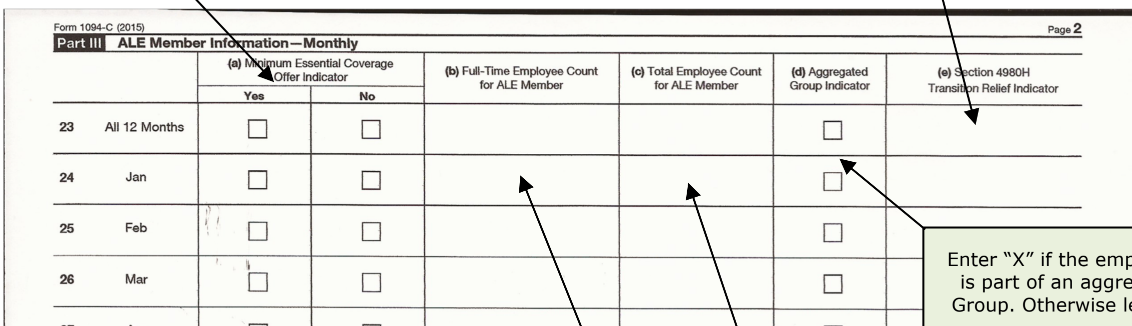
98% Offer Method - To be eligible for the 98% Offer Method, an employer must certify that the employer offered affordable (meets one of the Section 4980H safe harbors) coverage to 98% of its employees (not just full time) for all months of the year except for limited non-assessment periods (new employee waiting period) and offered dependent coverage.

To ensure compliance with the general reporting rules, an employer should confirm for any employee for whom it fails to file a Form 1095-C that the employee was not a full-time employee for any month of the calendar year.

TRANSMITTAL FORM 1094-C (PAGE 2)

An employer that offers coverage to at least 95% of its full time employees and their dependents may enter an "X" in the "Yes" checkbox either for "All 12 Months" or for the month(s) during which it met that 95% threshold. See form instructions for non-calendar year plans. Otherwise check "No".

Col E for 2018 was shaded out and titled Reserved



Form 1094-C (2015) Page 2

Part III ALE Member Information—Monthly

		(a) Minimum Essential Coverage Offer Indicator		(b) Full-Time Employee Count for ALE Member	(c) Total Employee Count for ALE Member	(d) Aggregated Group Indicator	(e) Section 4980H Transition Relief Indicator
		Yes	No				
23	All 12 Months	☐	☐			☐	
24	Jan	☐	☐			☐	
25	Feb	☐	☐			☐	
26	Mar	☐	☐			☐	

Enter "X" if the employer (ALE) is part of an aggregated ALE Group. Otherwise leave blank.

CAUTION: The full form is not displayed. Use line 23 if the information for all months is the same. Otherwise complete all the lines for Jan through Dec.

When determining the number of employees, the employer must choose one of the following days and use that day for the entire year.

- First day of the month
- Last day of the month
- 12th day of the month
- First day of the first payroll period for each month
- Last day of the first payroll period for each month

Enter the number of EFTE. Note: The number must also include EFTE within a limited non-assessment period.

Enter the number of FTE (don't include FTEs in a limited non-assessment period). Note: If the employer (ALE) certified it was for the 98% Offer method, column b need not be completed.

TRANSMITTAL FORM 1094-C (PAGE 3)

Page 3 of the form is used to report affiliated firms that must combine employees for purposes of the penalty and reporting.

Corrected Filings

- **1094-C (authoritative filing)** – File a standalone corrected 1094-C correcting the authoritative information filed on the original 1094-C and check the corrected box. Do not include any 1095-Cs with the corrected authoritative 1094-C.
- **1095-C** – Include the corrected 1095-C (with the corrected box checked) and file with 1094-C (**without** the corrected box checked) and only complete Part I of the 1094-C.

CALIFORNIA DIFFERENCES

California has no equivalent penalty.

NOTES

SMALL EMPLOYER HRA

Small Employer: **Fewer than 50 Full-Time Equivalent Employees**
Maximum Reimbursements:

- Single Individual: $5,150 (up from $5,050 in 2019)
- Family: $10,450 (up from $10,250 in 2018)

Reimbursements Excluded from income

MAXIMUM REIMBURSEMENTS			
Year	Period	Single	Family
2019	Annual	$5,150	$10,450
	Monthly	$429	$871
2018	Annual	$5,050	$10,250
	Monthly	$421	$854
2017	Annual	$4,950	$10,000
	Monthly	$413	$833

Pre-Regulations Q & As – The IRS issued Notice 2017-67 that provides guidance in question and answer format on the requirements for providing a qualified small employer health reimbursement arrangement (QSEHRA), the tax consequences of the arrangement, and the requirements for providing written notice of the arrangement to eligible employees. Topics covered include eligible employers, eligible employees, same terms requirement, the statutory dollar limit, written notice requirement, the minimum essential coverage requirement, reimbursements, reporting, and coordination with the premium tax credit and health saving account requirements. The IRS plans to issue future proposed regulations based on this guidance, which generally applies for plan years beginning on and after November 20, 2017.

Related IRC and IRS Publications and Forms

- **21ST Century Cures Act**
- **Sec 9831**

The "21st Century Cures Act" (H.R. 34), passed in late 2016, included a provision allowing small employers to reimburse their employees under a health reimbursement arrangement (HRA) for medical expenses without being liable for a $100 per day draconian penalty (IRC Sec 4980D) for violating the Affordable Care Act (ACA)'s rules.

Effective January 1, 2017, qualified small employers with an average of fewer than 50 full-time employees (including full-time equivalent employees) that maintain a qualified small employer HRA will be exempt from the penalty. Under the Act, a qualified small employer (as defied in IRC Sec 4980H(c)(2) is one that:

(1) Employs an average of fewer than 50 full-time employees (including full-time equivalent employees) and does not offer a group health plan to its employees (IRC Sec 9831(d)(3)(B)). The number of full-time equivalent employees is determined by adding up all the hours worked by part-time employees for a month and dividing by 120.

(2) Provides the HRA on the same terms to all eligible employees (IRC Sec 9831(d)(2)(A)(ii)). Eligible employees (IRC Sec 9831(d)(3)(A)) are any employees of the employer except:
   a. Those who have not completed 90 days of service.
   b. Those who have not attained the age of 25.
   c. Part-time workers (generally those working an average of less than 30 hours per week).
   d. Seasonal workers (generally those employed for 6 months or less during the year).
   e. Employees covered by a collective bargaining unit.
   f. Certain non-resident aliens.

(3) Entirely funds the HRA (no salary reduction contribution may be made under the HRA). (IRC Sec 9831(d)(2)(B)(i))

(4) Only reimburses the employees after being provided proof of their medical expenses before being reimbursed. (IRC Sec 9831(d)(2)(B)(ii))

(5) Limits reimbursements in 2018 to $5,050 ($10,050 where the plan includes family members) per year. Amounts are subject to inflation adjustments (IRC Sec 9831(d)(2)(B)(iii)). For employees who are covered for less than a full year the dollar limits are prorated (IRC Sec 9831(d)(2)(D)(i)).

Although this law is effective January 1, 2017, transitional relief is generally provided for any HRA plan beginning on or before December 31, 2016.

The medical expense reimbursements that an employee receives from a qualifying HRA are excluded from the employee's income.

CALIFORNIA DIFFERENCES

California has no similar excise penalty and does not conform to IRC section 9831, which provides for general exceptions to group health plan requirements (FTB's Summary of Federal Income Tax Changes 2016).

NOTES

GLOSSARY

Abstract fees - Expenses generally paid by a buyer to research the title of real property.

Academic Period – Schools and Universities generally conduct classes on either a semester or quarterly basis. Each quarter or semester is treated to as an academic period.

Accrual method – The accrual method of accounting requires that amounts are included in in gross income when they are earned, even though payment may be received in another year. Income is earned when: (1) all events have occurred that fix the right to receive the income, and (2) the amount to be received can be determined with reasonable accuracy. Expenses are claimed when a taxpayer becomes liable for them, whether or not they are actually paid in the same year.

Active conduct of a trade or business - Generally, for the section 179 deduction, a taxpayer is considered to conduct a trade or business actively if he or she meaningfully participates in the management or operations of the trade or business. A mere passive investor in a trade or business does not actively conduct the trade or business.

Acquisition Indebtedness - Acquisition indebtedness means indebtedness incurred or assumed to acquire, construct, reconstruct, or substantially improve such property.

Active appreciation - occurs when marital funds or marital efforts cause a spouse's separate property to increase in value during the marriage.

Actual auto expense method – A method of determining automobile operating expenses based on actual expenses plus a depreciation allowance. Used in lieu of the optional aato expense (standard mileage) method.

Adjusted basis: The original cost of property, plus certain additions and improvements, minus certain deductions such as depreciation allowed or allowable and casualty losses.

Adjusted Net Minimum Tax (ANMT) - For a non-corporate taxpayer, the ANMT for a tax year equals: (a) the alternative minimum tax (AMT) paid for that year; *less* (b) the amount of AMT that would have arisen if the only applicable preferences and AMT adjustments were "exclusion preferences" *plus* (c) the amount of any qualified electric vehicles credit not allowed solely by reason of the limitation on that credit that is a function of the taxpayer's tentative minimum tax.

Aggregate - An aggregate is a collection of items that are gathered together to form a total quantity.

Alien – An individual that is not a U.S. citizen. Aliens can be non-resident or resident aliens.

Alternative Minimum Taxable Income (AMTI) — Is the taxpayer's regular taxable income increased by certain items (exclusion preferences) and adjusted by treating certain items in a manner that negates the deferral of income resulting from their regular tax treatment (deferral adjustments).

Alternative minimum tax (AMT) – A tax imposed on individuals with certain large deductions and tax preferences. It is an add-on tax and is the difference between the regular tax and the tentative alternative minimum tax.

Amortization - A ratable deduction for the cost of intangible property over its useful life.

Amount realized - The total of all money received plus the fair market value of all property or services received from a sale or exchange. The amount realized also includes any liabilities assumed by the buyer and any liabilities to which the property transferred is subject, such as real estate taxes or a mortgage.

AMT Credit - The AMT credit is the difference between the tentative AMT and adjusted net minimum Tax (ANMT) but not exceeding the AMT itself. The ANMT is generally the AMT recomputed without deferral items of preference, which for most individual means the AMT recomputed without the Incentive Stock Option (ISO) preference.

AMT Exemptions – For regular tax, taxpayers are allowed to deduct a personal exemption for the taxpayer, spouse and each person that they can claim as a dependent. For the AMT, taxpayers are allowed a single exemption based upon the taxpayer's filing status. In both cases, the exemptions are phased-out for higher income taxpayers.

Annuity - In the United States an annuity contract is created when an insured party, usually an individual, pays a life insurance company a single premium that will later be distributed back to the insured party over time. Annuity contracts traditionally provide a guaranteed distribution of income over time, until the death of the person or persons named in the contract or until a final date, whichever comes first. However, the majority of modern annuity customers use annuities only to accumulate funds free of income and capital gains taxes and to later take lump-sum withdrawals without using the guaranteed-income-for-life feature.

Asset appreciation - appreciation of an asset is an increase in its value.

At-Risk - To take a deduction for an item on a tax return, a taxpayer must have either actually paid for the item or be responsible for paying it.

Basis - The "basis" of an asset can be thought of as the amount a taxpayer has invested in the property. Without knowing the basis, deductions for depreciation, casualties, or depletion, etc. could not be determined, and gains or losses on the disposition of assets could not be established.

Basis adjustment – an adjustment made to the tax basis of an asset. Gain or loss on the disposition of an asset is generally the difference between the tax basis and the sales price less sales expenses.

Beneficiary - A beneficiary in the broadest sense is a natural person or other legal entity that receives money or other benefits from a benefactor. For example: The beneficiary of a life insurance policy is the person who receives the payment of the amount of insurance after the death of the insured.

Bonus depreciation – This is depreciation that is allowed with considering the MACRS limits. Generally allowed in the property is place in service and computed before the normal MACRS allowance.

Boot - Is unlike property or cash given or received in an exchange.

Business/investment use - Usually, a percentage showing how much an item of property, such as an automobile, is used for business and investment purposes.

Business Meal – A meal consumed in the course of a business meeting or activity including meals while on business travel status.

Capitalized - Expended or treated as an item of a capital nature. A capitalized amount is not deductible as a current expense and must be included in the basis of property.

Capital Gain - A capital gain is essentially the difference between the purchase price (or other basis) and the price at which the asset is sold (or otherwise disposed of), where the purchase price is lower than the sales price.

Capital Loss - A capital loss is essentially the difference between the purchase price (or other basis) and the price at which the asset is sold (or otherwise disposed of), where the sale price is lower than the purchase price.

Carryover – When a deduction or credit is not used up it may be allowed to be carried over to a subsequent year and is referred to as a carryover.

Case law - is the set of reported judicial decisions of selected appellate courts and other courts of first instance that make new interpretations of the law and, therefore, can be cited as precedents.

Cash method – Is the short tile for "cash receipt and disbursement method." Under this accounting method, amounts received are included in gross income in the year of actual or constructive receipt, regardless of whether the income is earned in that year. Expenses are usually deducted in the year paid.

Chronically ill person - is one who has been certified by a licensed health care practitioner within the previous 12 months as: (1) unable to perform at least two activities of daily living (eating, toileting, transferring, bathing, dressing, continence) without substantial assistance for a period of 90 days due to loss of functional capacity, (2) having a similar level of disability as determined in regulations, or (3) requiring substantial supervision to protect from threats to health and safety due to severe cognitive impairment. The requirement that a qualified long-term care insurance contract must base determination of whether an individual is chronically ill by taking into account five activities of daily living applies only to (1) above (being unable to perform at least two activities of daily living).

Circumstantial evidence - Details or facts that indirectly point to other facts.

Class life - A number of years that establishes the property class and recovery period for most types of property under the General Depreciation System (GDS) and Alternative Depreciation System (ADS).

Closely Held Corporation – Is one for which no ready market exists for the trading of shares. Many such corporations are owned and managed by a small group of businesspeople or companies, although the size of such a corporation can be as vast as the largest public corporations.

Club Dues - Amounts paid or incurred for membership in any club organized for business, pleasure, recreation or other special purpose.

COD – The acronym for cancellation of debt.

Commercial Fishermen – Seaman who works on a fishing vessel that is in the business of catching and selling fish as a livelihood.

Commission - Remuneration for services rendered or products sold is a common way to reward sales people. Payments often will be calculated on the basis of a percentage of the goods sold.

Community income - is generally income from: Community property, salaries, wages, or pay for services while registered or married, real estate that is treated as community property under the laws of the state where the property is located.

Community Property – In states that have community property laws, community property considered to belong equally to both spouses, just as with all other property that is owned or acquired by either spouse during the marriage. AZ, CA, ID, LA, NV, NM, TX, WA and WI are community property states. Alaska, although not a community property state, does permit a married couple to identify property and income to be classified as community property by agreement or trust.

Commuting - Travel between a personal home and work or job site within the area of an individual's tax home.

Compensation – Compensation includes: Wages, Tips, Bonuses, Professional Fees, Commissions, Alimony received, and Net Income from self-employment.

Constructive receipt – Refers to income that hasn't actually been received by a taxpayer but is taxed as though it had been, if the following are true: (1) The amount is readily available to the taxpayer and (2) The taxpayer's actual receipt isn't subject to substantial restrictions

Consumer Interest – Interest paid on loans to acquire non-business assets and consumer goods. Consumer interest is generally not tax deductible.

Control – The power to influence or direct people's behavior or the course of events.

CONUS – An acronym for continental United States. Does not include Alaska or Hawaii.

Convenience of the employer means a business necessity—the use of the home must be a condition of employment. The employee needs a place to work, but the employer doesn't provide it (or the office provided by the employer is inadequate or unsafe). Usage by the employee for personal convenience is not enough.

Cost - Use actual cost of merchandise, less discounts plus freight and other handling charges.

Coverdell Education Savings Account - A nondeductible education savings account. The investment earnings from these accounts accrue and are withdrawn tax-free, provided the proceeds are used to pay qualified higher education expenses of the account beneficiary.

Day Care - is care of a child during the day by a person other than the child's legal guardians, typically performed by someone outside the child's immediate family. Day care is typically an ongoing service during specific periods, such as the parents' time at work.

Declining Balance Method - An accelerated method to depreciate property. The General Depreciation System (GDS) f MACRS uses the 150% and 200% declining balance methods for certain types of property. A depreciation rate (percentage) is determined by dividing the declining balance percentage by the recovery period for the property.

Definite Temporary Assignment - Employment of short and fixed duration away from a taxpayer's regular business location, tax home does not change.

Delayed Exchange – A delayed exchange is one that is not simultaneous and must be completed through a qualified intermediary. The property to be received in the exchange must be identified within 45 days. The taxpayer is allowed to designate a maximum of either: (a) Three replacement properties regardless of FMV; or (b) Any number of properties, as long as the total FMV isn't more than 200% of the total FMV of all properties given up. Receipt of the new property must be completed before the EARLIER of: (1) 180 days after the transfer of the property given, OR (2) The due date (including extensions) of the return for the year in which the property given was transferred.

Depreciable Period – For Sec 199A the purpose the term depreciable period means the period beginning on the date the taxpayer first puts the property in service and ending on the later of:

(a) 10 years after the placed-in-service date or

(b) The last day of the last full year of the applicable MACRS recovery periodof the property (Code Sec. 199A(b)(6)(B)).

Depreciation - The allocation of the cost of assets to periods in which the assets are used.

Depreciation Convention - A method established under the Modified Accelerated Cost Recovery System (MACRS) to determine the portion of the year to depreciate property both in the year the property is placed in service and in the year of disposition.

Disabled - A taxpayer is considered disabled if the taxpayer can furnish proof that he/she cannot perform any substantial gainful activity because of the physical or mental condition. A physician must determine that the taxpayer's condition: (a) can be expected to result in death, or (b) is expected to be of a long, continued and indefinite duration.

Direct Expenses (Home Office) - are the expenses that benefit only the business part of the home. They are deductible in full (subject to the home office gross-income limit, but they are not prorated by the business-use percentage). NOTE: Don't confuse direct expenses with expenses directly related to the business. Directly related expenses aren't subject to the limitation of §280A and are fully deductible as business expenses and include such items as office supplies, postage, advertising, etc. The basic charge of the first home telephone line in the home is nondeductible. However, toll calls on that lines related to the taxpayer's business are deductible (without limitation)—i.e., they are directly related expenses without limitation. The cost of a second telephone used only for the business is a directly related expense fully deductible without limitation.

Direct sellers are those in the business of selling consumer products to buyers at other than a permanent retail establishment.

Disposition: The permanent withdrawal from use in a trade or business or from the production of income.

De minimis - is a Latin expression meaning *about minimal things*

Documentary evidence: Written records that establish certain facts.

Employee - A worker who must comply with instructions about when, where and how to work is generally considered an employee.

Estate Tax - The estate tax is a tax imposed on the transfer of the "taxable estate" of a deceased person, whether such property is transferred via a will, according to the state laws of intestacy or otherwise made as an incident of the death of the owner, such as a transfer of property from an intestate estate or trust, or the payment of certain life insurance benefits or financial account sums to beneficiaries.

Excess Debt - Interest on debt secured by the home must first be allocated to the home to the extent permitted, and any excess (excess debt) can be allocated to the use of the funds per the general tracing rules of Reg §1.163-8T. Per the tracing rules, where the use of the loan funds can be traced to another purpose, the interest on the excess debt can be allocated to that use.

Exchange - To barter, swap, part with, give, or transfer property for other property or services.

Executor - An individual appointed to administrate the estate of a deceased person. The executor's main duty is to carry out the instructions and wishes of the deceased. The executor is appointed either by the testator of the will (the individual who makes the will) or by a court, in cases where there was no prior appointment.

Expertise - knowledge or ability based on research, experience, or occupation and in a particular area of study. Also extensive study in accepted business, economic, and scientific practices.

Fair Market Value – The fair market value is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts.

Fiduciary - The one who acts on be- half of another as a guardian, trustee, executor, administrator, receiver, or conservator.

First-Time Homebuyer - Generally, the taxpayer is a first-time homebuyer if the taxpayer had no present interest in a main home during the 2-year period ending on the date of acquisition of the home which the distribution is being used to buy, build, or rebuild. If the taxpayer is married, the taxpayer's spouse must also meet this no-ownership requirement.

FICA – Is the acronym for "Federal Insurance Contributions Act" and a term used to describe payroll tax withholding including Social Security and Medicare.

FIFO - stands for first-in, first-out, meaning that the oldest inventory items are recorded as sold first but do not necessarily mean that the exact oldest physical object has been tracked and sold; this is just an inventory technique.

Foreclosure - In a foreclosure, the lender has taken possession of the property through legal channels.

Foreign Tax Credit - A non-refundable tax credit for income taxes paid to a foreign government. The credit can only be claimed on income that is also subject to domestic taxation. For example, if some of the taxpayer's foreign income is taxable and some is exempt, then the taxpayer must be able to break down the taxes paid on the foreign income only, and only claim the credit for taxes paid on that foreign income.

Full-time – Full time refers to the status as full-time employee as opposed to being a part-time employee. The number of hours worked that constitutes full time can vary by employer and industry. The code frequently uses 2,080 hours per year to define a full time employee.

Garnishment - A garnishment is a means of collecting a monetary judgment against a defendant by ordering a third party (the garnishee) to pay money, otherwise owed to the defendant, directly to the plaintiff. In the case of collecting for taxes, the law of a jurisdiction may allow for collection without a judgment or other court order. The most common type of garnishment is the process of deducting money from an employee's monetary compensation (including salary), sometimes as a result of a court order. Wage garnishments continue until the entire debt is paid or arrangements are made to pay off the debt.

Gift Tax – Gift tax imposes a tax on transfers of property during a person's life; the gift tax prevents avoidance of the estate tax should a person want to give away his/her estate.

Goodwill - An intangible property such as the advantage or benefit received in property beyond its mere value. It is not confined to a name but can also be attached to a particular area where business is transacted, to a list of customers, or to other elements of value in business as a going concern.

Grandfathered Acquisition Debt - Debts existing before 10/14/87 are treated as acquisition debts, even if they total more than $1,000,000. But pre-10/14/87 debts decrease the amount of the $1,000,000 limitation available for acquisition debt incurred after 10/13/87. Pre-10/14/87 debt includes debt which is refinanced after 10/13/87, and which does not exceed the loan balance at the time of the refinance.

Grantor - The one who transfers property to another.

Head of Household - For a *single* individual to claim *head of household*, the taxpayer must be a U.S. citizen or resident AND must either: (a) Pay more than one-half of the cost of maintaining as his or her home a household which is the principal place of abode for more than one-half the year of for a qualified person. A qualified person generally includes a qualified child, or a relative for whom the taxpayer may claim a dependency exemption, or (b) Pay more than half the cost of maintaining a separate household that was the main home for a dependent parent for the entire year.

Health Savings Account (HAS) - Health savings accounts allows individuals under age 65 to make tax-deductible contributions to a special account tied to a high-deductible health insurance policy. Earnings inside the HSA are tax deferred. To be eligible to contribute to an HSA, an individual must have a qualified insurance policy that has specified deductible limits. The limits are inflation adjustable annually as are the contribution limits. Money from the HSA can be used tax- and penalty-free to pay the insurance policy deductible, co-payments and any other qualifying medical expenses. Money left in the account at the end of a year can be rolled over to the next year. The penalty for withdrawing HSA funds for non-qualifying purposes before age 65 is 20%. After reaching age 65, contributions to the HSA must cease, and non-qualifying withdrawals are taxed but not penalized.

HELOC – A **home equity line of credit** is a loan in which the lender agrees to lend a maximum amount within an agreed period, where the collateral is the borrower's equity in his/her house.

High-low per diem – Also referred to as the "simplified per diem method" rather than using actual per diems. Under this method there is one rate for designated high-cost areas within the continental United States (CONUS) and another per diem rate for all other areas within CONUS.

Higher Education Interest - Up to $2,500 of interest on debt to finance higher education is deductible as an adjustment to AGI. This debt can be secured by the home as long as it is not mixed-use. Therefore, a taxpayer who is using home equity to finance higher education and is subject to the AMT, can use the election to treat the mortgage as not secured by the home and convert home equity debt interest into deductible higher education interest by utilizing the election. ***Caution:*** (1) Debt must solely be for higher education purposes. (2) Before making the election, be sure the taxpayer's modified AGI doesn't exceed the top of the phase out range for deducting the student loan interest. (3) Unless Congress takes action, effective in 2013, the deduction will be limited to interest paid on a qualified loan during only the first 60 months in which the interest payments are required.

Home Acquisition Debt (Code Sec. 163(h)(3)(B)) **-** is debt incurred to purchase, construct, or substantially improve a taxpayer's principal home or second home and must be secured by the home. Combined acquisition debt on the two homes can't be more than $1,000,000 ($500,000 for married separate). Debts existing before 10/14/87 are treated as acquisition debts, even if they total more than $1,000,000. But pre-10/14/87 debts decrease the amount of the $1,000,000 limitation available for acquisition debt incurred after 10/13/87. Refinanced debt can also qualify as acquisition debt, if it doesn't exceed the amount of the acquisition debt just before the refinancing. Any excess refinanced debt would be treated as equity debt. Acquisition debt is deductible for AMT purposes.

Home Equity Debt (Code Sec. 163(h)(3)(C)) - is debt that is not acquisition debt and is secured by a taxpayer's principal or second home. For regular tax purposes, the equity debt on the two homes can't be more than $100,000 ($50,000 for married separate), or the difference between the acquisition debt on the home and the FMV of the home, if smaller. Equity debt is NOT deductible for AMT purposes.

Home Office Carryover – The home office carryover consists of two elements which must be segregated for carryover purposes: (1) Other direct and prorated indirect expenses of the home office (including excess mortgage interest for self-employed taxpayers) that were not deductible because of the gross income limitation and (2) Home depreciation that was not deductible because of the gross income limitation. In subsequent years these two elements of the carryover are combined with like expenses for the subsequent year and then the gross income limitation for that year is applied. If there is any excess the carryover to the next subsequent year is determined and that process continues year to year until the carryover is used up.

Home Office Gross Income - Gross income is defined as total income from the business less: a. The business portion of expenses deductible even if the home was not used for business (e.g., mortgage interest, taxes, casualties), plus b. The business expenses relating to the business, but not to the use of the home (e.g., supplies, advertising, etc.).

Home Mortgage Interest (Home Office) – Which is the amount of the interest that would be allowed on Schedule A taking into consideration the acquisition debt and equity debt limitations. However, do not include mortgage interest on a loan that did not benefit the home, such as an equity loan used to buy a car, pay tuition expenses, or pay off credit card debts.

Hours of service – Generally refers to the number of hours of employment. Also refers to the U.S. Department of Transportation "Hours-of-Service Regulations" that limit the number of hours long haul commercial drivers may drive**.**

Household employee – An individual that performs services in the taxpayer's home in the context of an employee.

Hybrid Method - The most common hybrid accounting method is a combination of cash and accrual. Generally, this combination is used when inventory is an income-producing factor. To simplify recordkeeping, a taxpayer accounts for inventory using accrual and uses the cash method for all other income and expense items. The hybrid method is primarily used by small businesses.

Improvement - An addition to or partial replacement of property that adds to its value, appreciably lengthens the time you can use it, or adapts it to a different use. Generally must be capitalized as opposed to being expensed like repairs.

Incentive stock option - An option that allows an employee to purchase stock of the employer below current market price. For regular income tax purposes, the bargain element (the difference between the price paid and market value of the stock) is not taxed when the option is exercised. Rather, it is taxed when the stock is sold. However, for alternative minimum tax (AMT) purposes, the spread is taxed in the year the option is exercised. This treatment creates two different tax bases, one for regular tax and one for AMT.

Incidental Expenses – Fees and tips to porters, bellhops, hotel maids and similar service providers, mailing costs of filing travel vouchers and paying employer-sponsored credit card billings and transportation between lodging or business sites and places where meals are taken, if suitable meals aren't available at the temporary work location.

Incidental materials or supplies – Refers to materials or supplies on hand for which no record of consumption is kept or of which physical inventories at the beginning and end of the year are not taken.

Income in Respect of a Decedent (IRD) - Includes income that is includable in the estate and also taxable to the beneficiary.

Independent Contractor – Is an individual who performs services under a contractual arrangement and is not an employee.

Indirect Expenses (Home Office) - The expenses of running the entire home such as general repairs, not directly traced to the business). Indirect expenses must be pro-rated in computing the home office deduction. This is normally done on the basis of space in the home office versus total space in the home.

Inherited Basis - Under the rule of Code § 1014(a), the basis of inherited property is ordinarily stepped-up (or down) to its fair market value as of the date of decedent's death or alternate valuation date. Such inherited property is MACRS property even if the decedent placed it in service before '87. The alternate valuation date is the date six months after decedent's death, or if within that six months the property has been distributed, then the date of the distribution. *Code Sec. 1014(a); Code Sec. 2032* (Caution: these rules do not apply to property inherited from an individual who died in 2010 if the “no estate tax” provision was elected by the executor).

If no Federal estate tax return is required, an appraisal as of the date of decedent's death for state inheritance or other transmission (e.g., legacy) taxes is used for basis purposes. In this situation, no alternate valuation date is used. These appraisals govern unless there is sufficient evidence of another value. *Reg § 1.1014-3(a)*

Insolvent – Having negative net assets – in other words, liabilities exceed assets. In reference to cancellation of debt, gthe term “insolvent” means the excess of liabilities over the fair market value (FMV) of assets determined with respect to the taxpayer's assets and liabilities immediately before the discharge.

Intangible property - Property that has value but cannot be seen or touched, such as goodwill, patents, copyrights, and computer software.

Investor – An individual who puts money into financial schemes, shares, property, or a commercial venture with the expectation of achieving a profit:

Investment - Putting money into something with the expectation of gain.

Investment limit – For purposes of the IRC Sec 179 the amount of the allowable expense deduction begins to phase out as the amount invested in qualifying property exceed the annual limit.

Investment expenses - are expenses (other than interest) incurred to produce investment income and which are normally deductible as Tier 2 miscellaneous itemized deductions on Schedule A.

Investment income - is gross income from property held for investment. It includes savings account interest, dividends from stock, net gains from sales of property held for investment, annuities and certain royalties. Net income from certain passive activities is also investment income: (1) Rental of substantially nondepreciable property; (2) Equity-financed lending activities; and (3) Acquisition of certain interests in a pass-through entity licensing intangible property. (Temp. Reg. 1.469-2T(f)(10)).

Investment interest expense - is all interest on debts used to carry or purchase investment property (e.g., stocks, bonds, or land held for appreciation). However, interest on loans used to buy investments which produce tax-exempt interest income is not deductible as investment interest expense. In fact, such interest is not deductible at all. In addition, interest taken into account in determining gain or loss from a passive activity is NOT investment interest.

IRD – Is the acronym for Income In Respect to the Decedent. Which include income that is includable in the estate and also taxable to the beneficiary.

Jointly and Severally Liable - Generally when taxpayers file joint returns each spouse is jointly and severally liable for the full amount of the tax, penalties (other than civil fraud), and interest arising out of their joint return, regardless of the amount of their is separate taxable income. Only the spouse committing fraud can be subjected to fraud penalties.

Lavish or extravagant - Sumptuously rich, elaborate, or luxurious. Is not defined in the Code or Regulations, although IRS indicates an expense that is “unreasonable” (also not defined) may be considered extravagant. Facts and circumstances determine.

Lease inclusion amount – Refers to income inclusion (expense add back) amounts that represent the luxury auto limitations for leased vehicles. The add backs amount is based upon the fair market value of a vehicle at the beginning of the lease term and are determined from IRS provided tables.

LEVY - A Tax levy, under United States Federal law, is an administrative action by the Internal Revenue Service (IRS) under statutory authority, without going to court, to seize property to satisfy a tax liability. The levy "includes the power of distraint and seizure by any means". The general rule is that no court permission is required for the IRS to execute a section 6331 levy. For taxpayers in serious debt to the IRS, the most feared weapon in the IRS arsenal is the tax levy. Using the powers granted to the IRS in the Internal Revenue Code, the IRS can levy upon wages, bank accounts, social security payments, accounts receivables, insurance proceeds, real property, and, in some cases, a personal residence. Under Internal Revenue Code section 6331, the Internal Revenue Service can “levy upon all property and rights to property” of a taxpayer who owes Federal tax. The IRS can levy upon assets that are in the possession of the taxpayer, called a seizure, or it can levy upon assets in the possession of a third party, a bank, a brokerage house, etc.

Life Estate - A life estate is a concept used in common law and statutory law to designate the ownership of land for the duration of a person's life. In legal terms it is an estate in real property that ends at death when there is a "reversion" to the original owner. The owner of a life estate is called a "life tenant". Although the ownership of a life estate is of limited duration because it ends at the death of the person who is the "measuring life", the owner has the right to enjoy the benefits of ownership of the property, including income derived from rent or other uses of the property, during his or her possession. Because a life estate ceases to exist at the death of the measuring person's life, this temporary ownership agreement cannot be left to heirs (intestate) or devisees (testate), and the life estate cannot normally be inherited. At death, the property involved in a life estate typically falls into the ownership of the remainderman named in the life estate agreement.

LIFO - Stands for last-in, first-out, meaning that the most recently produced items are recorded as sold first.

Like-Kind - Like-kind means similar in nature, but not necessarily of the same quality. Real estate must be exchanged for real estate. Real estate includes: residential, commercial, storage buildings, warehouses, land, manufacturing plants (improved or unimproved qualifies). Exchanges of animals of different sexes don't qualify. Depreciable tangible personal property must be exchanged for property of "like-kind or class" as outlined in Rev Proc 87-56, 1987-2 CB 674. Property NOT considered like-kind includes inventory, partnership interests, stocks & bonds and goodwill.

Listed property - Passenger automobiles; any other property used for transportation; property of a type generally used for entertainment, recreation or amusement; and computers and their peripheral equipment unless used only at a regular business establishment and owned or leased by the person operating the establishment.

Local Transportation - Transportation between a taxpayer's home and a temporary work location in the same trade or business WITHIN the metropolitan area where the taxpayer lives and normally works.

Long Term Insurance - is an insurance contract that provides only coverage of long-term care services including necessary diagnostic, preventive, therapeutic, curing, treating, mitigating, and rehabilitative services, maintenance or personal care services prescribed by a licensed practitioner for the chronically ill. Benefits under a long-term care policy (other than dividends or premium refunds) are generally tax-free. With per diem contracts that pay a flat-rate benefit without regard to actual long-term care expenses incurred, the exclusion is limited to $175 a day indexed for medical cost inflation (amount was $300 in 2011) except when long-term care costs incurred are more than the flat rate and are not otherwise compensated by some other means. A contract isn't treated as a qualified long-term care contract unless determination of chronically ill takes into account at least five activities of daily living--eating, toileting, transferring, bathing, dressing and continence.

Lower of Cost or Market – An inventory valuation method available for most taxpayers except those who use the Last-In-First-Out Method (LIFO) method. To use this method, each item in inventory must be valued at lower of cost or market value.

Luxury auto - Any four-wheeled vehicle manufactured primarily for use on public streets, roads, and highways, and having an unloaded gross vehicle weight of 6,000 pounds or less.

M&IE - Meal & incidental expenses.

MACRS – Modified Cost Recovery System - is the current tax depreciation system in the United States. Under this system, the capitalized cost (basis) of tangible property is recovered over a specified life by annual deductions for depreciation.

Market value - Is the price at which an asset would trade in a competitive auction setting.

Material participation – To invest substantial time in the operation of an activity. For purposes of a real estate professional material participation is determined by meeting either a time or prior participation test.

Medical Expenses - Medical expenses are the costs of diagnosis, cure, mitigation, treatment, or prevention of disease, and the costs for treatments affecting any part or function of the body including dental expenses. Costs of equipment, supplies, and diagnostic devices needed for these purposes. The care expenses must be primarily to alleviate or prevent a physical or mental defect or illness. The expenses include insurance including medical, hospital, dental, long-term care (limited), and Medicare-B and Medicare-D insurance premiums. They DO NOT include expenses that are merely beneficial to general health.

Mid-quarter convention – A reduced first-year MACRS allowance when more that 40% of assets are placed into service during the last quarter of the year.

Minimum Tax Credit - The alternative minimum tax credit is the result of incurring an alternative minimum tax in a <u>prior year,</u> which generates a credit that can be used to offset the excess of the taxpayer's regular tax over the alternative minimum tax in a <u>subsequent year</u> with unused credit carried forward to future years.

Misclassified Workers – Workers that are incorrectly classified as independent contractors when they should be classified as employees.

Mixed Use Property – In the context of this course, mixed use property refers to property where both the residential and nonresidential portions of the property are within the same dwelling unit

Necessary expense - A necessary expense that is helpful in the taxpayer's business; but it need not be indispensable.

Net investment income (NII) - NII is taxable investment income reduced by investment expenses.

Net Operating Loss (NOL) - A net operating loss **(IRC § 172)** results from a business loss or a personal casualty loss. In order to have an NOL, a taxpayer generally must have a NEGATIVE AGI, or a casualty loss as part of itemized deductions. However, a positive AGI which consists of positive nonbusiness income and a business loss may also create a net operating loss, if there are nonbusiness deductions to offset the nonbusiness income.

The net operating loss deduction is an exception to the general rule that computation of income tax for a given year is based on that year's income and deductions only. The reason for this is that when a net operating loss occurs, the loss is computed in the year of occurrence, but that loss is carried to the returns of other years and is used as a deduction in those years, resulting in a reduction of income tax (but not self-employment tax) for the other years. Carrybacks/carryovers of NOLs are explained in more detail later in this chapter.

Non-conventional Home Debt - The term non-conventional home refers to homes that are used on a transient basis, such as a motor home and boat. The interest on that debt, even if otherwise qualifying as acquisition debt for regular tax purposes, is only deductible on Schedule A and is NOT deductible against the AMT.

Nonresidential real property - Most real property other than residential rental property.

Not a Temporary Assignment - A taxpayer is deemed not on a temporary assignment if the stay away from home exceeds one year.

Off-the-Shelf Computer Software – Generally off-the-shelf software is software that is designed for general applications where customization is not provided. For example: software such as word-processing, spreadsheet, etc.

Optional auto expense method – A method of determining automobile operating expenses based on an IRS specified amount per mile as opposed to using the actual expenses. Also known as the standard mileage method.

Ordinary Expense – An expense that is customary and conventional for the taxpayer's line of business.

Parsonage Allowance - A minister's gross income doesn't include the rental value of a home (parsonage) provided, or the rental allowance paid, as part of compensation for ministerial services.

Passive Activity - Any trade or business activity in which the taxpayer "DOES NOT MATERIALLY PARTICIPATE" in actual OPERATIONS of the activity on a "REGULAR, CONTINUOUS, AND SUBSTANTIAL BASIS" is passive. This includes any limited partnership interest, which is always presumed passive. However, a taxpayer may rebut the assumption by showing he/she meets the material participation standards (see following paragraph). Generally a rental activity, whether or not the taxpayer materially participates in its operation, is a passive activity.

Personal services - Means any work performed by an individual in connection with a trade or business.

Per Diem - A daily allowance for expenses. Per diem reimbursement generally eliminates the need for employees to create expense reports documenting the amount spent while traveling on business for reimbursement.

Placed in service - Ready and avail- able for a specific use whether in a trade or business, the production of income, a tax-exempt activity, or a personal activity.

Predominant - To meet the "predominant" test, property received in the exchange must continue in the same use (i.e., foreign or domestic) for the 24 months immediately after the exchange. Alternatively, the property given in the exchange must have been in the same use (i.e., foreign or domestic) for the 24 months just before the exchange.

Premature distribution - Withdrawals from a qualified retirement plan prior to a certain age. Such payouts are generally subject to a 10% penalty for taxpayers under the age of 59 ½. There are a number of exceptions to the penalty.

Premises – A house or building, together with its land and outbuildings, occupied by a business

Presumption - A presumption of a particular fact can be made without the aid of proof in some situations.

Principal Place of Business - A home office qualifies as a principal place of business if: a. The office is used on an exclusive and regular basis for administrative or management activities of any trade or business of the taxpayer, and b. There is no fixed location of the business where the taxpayer conducts substantial administrative or management activities of the business. If a taxpayer conducts administrative activities at a fixed location outside the home, he/she is still eligible to claim a deduction as long as the administrative activities conducted at the outside location aren't substantial (e.g., a taxpayer may do minimal paperwork at another fixed location of the business).

Private Activity Bond – Private activity bonds include those that finance mass-transit facilities, sewage and solid waste disposal facilities and certain multi-family dwellings. Interest from private activity bods is generally tax-free for regular tax but taxable alternative minimum tax.

Profitability - is the difference between the revenues earned from and the costs associated with an activity in a specified period.

Profit motive - Is the concept in economics that refers to individuals being provided incentive to relinquish something (e.g. capital, expertise, labor) for deployment to a productive purpose.

Profit or loss – A term used to describe a business's revenues recognized for a specific period, less the costs and expenses charged against these revenues, including write-offs (e.g., depreciation and amortization of various assets and taxes.

Profitability - is the difference between the revenues earned from and the costs associated with an activity in a specified period.

Property class: A category for prop- erty under MACRS. It generally deter- mines the depreciation method, recovery period, and convention.

Prorating – Means proportion. The term is used in many legal and economic contexts and is taken from the Latin phrase pro rata.

Public safety officer – Generally refers to police officers, firefighters, EMTs, probation officers, etc.

Qualified Acquisition Indebtedness - qualified acquisition indebtedness means indebtedness incurred or assumed to acquire, construct, reconstruct, or substantially improve such property.

Qualified Domestic Relations Order (**QDRO)** - A Qualified domestic relations order or QDRO is a legal order subsequent to a divorce or legal separation that splits and changes ownership of a retirement plan to give the divorced spouse their share of the asset or pension plan. QDROs may grant ownership in the participant's (employee's) pension plan to an alternate payee, who must be a spouse, former spouse, child or other dependent of the participant. A QDRO may provide for marital or community property division between the participant and the alternate payee, or for the payment of alimony or child support to the alternate payee. QDROs apply only to employee benefit or pension plans subject to ERISA, the Employee Retirement Income Security Act, the American law governing private sector pensions. Comparable types of orders are available to divide military retirement pay and Federal civil service retirement plans, and for State, county and municipal retirement plans in most States. QDROs must first be entered by the State domestic relations court and then reviewed by the plan administrator for compliance with ERISA or other applicable law and the terms of the plan. The QDRO may be a separate document or it may be part of the divorce decree as long as it meets the standards for a *qualified* domestic relations order.

Qualified Farm Indebtedness - Indebtedness of a taxpayer is treated as qualified farm indebtedness (Code Sec. 108(g)(2)) if: (1) The indebtedness was incurred directly in connection with the operation by the taxpayer of the trade or business of farming, and (2) 50% or more of the aggregate gross receipts of the taxpayer for the three tax years before the tax year in which the discharge of the indebtedness occurs is attributable to the trade or business of farming.

Qualified Intermediary - Is one (can't be the taxpayer or a "disqualified party") who has a written agreement with the taxpayer, which calls for the intermediary to acquire and transfer both the property given and received in the exchange. Generally, the intermediary gets legal title to the property. A qualified intermediary can't be the taxpayer or a party related to the taxpayer (as defined in §267(b) or §707(b), but regarding controlling interests, substitute the words "more than 10%" wherever the words "more than 50%" appear).

Qualified Property

Qualified property is defined as meaning tangible, depreciable property which is **held by** and **available for use** in the qualified trade or business at the close of the tax year, which is **used at any point** during the tax year **in the production of** **qualified business income**, and the depreciable period for which has not ended
before the close of the tax year (Code Sec. 199A(b)(6)(A)).

Qualified Real Estate Agent - is a licensed real estate sales person.

Qualified Business Income (QBI) - QBI is generally the net amount of income, gain, deduction, and loss relating to any qualified trade or business of the taxpayer to the extent these items are effectively connected with the conduct of a trade or business within the U.S. and included or allowed in determining taxable income for the year.

Qualified Real Property (2010 & 2011) – For purposes of the IRC Sec 179 expense deduction for 2010 and 2011, the definition of qualified real property includes: qualified leasehold improvement property, qualified restaurant property, and qualified retail improvement property.

Qualified Real Property Business Indebtedness - Qualified Real Property Business Indebtedness is indebtedness (Code Sec 108(C)(3): (1) that was **incurred or assumed** by the taxpayer in connection with real property used in a trade or business; (2) that is **secured by the real property**, at the time the debt is incurred or assumed; (3) that is qualified acquisition indebtedness (including refinanced acquisition debt); and (4) which the taxpayer elects to treat as qualified real property business indebtedness.

Qualified Reservist – Is an individual who (because of their being members of a reserve component) are ordered or called to active duty after Sept. 11, 2001, for a period of more than 179 days or for an indefinite period.

Qualifying Child - In general, a child is a qualifying child of a taxpayer if the child satisfies each of these tests: a residency test, a relationship test, a joint return test, and an age test. In addition, with one exception, the child may not have provided over one-half of his or her own support for the year.

Qualifying Property – The definition of IRC Sec 179 expense property is generally: tangible personal property purchased for use in the active conduct of a trade or business. Except qualified real property, buildings and their structural components do not qualify.

Qualified Trade or Business – For 199A deduction, the tax code does not provide a definitive "bright line" definition of a trade or business, and simply adopted an existing subjective definition that relies on the outcomes of past court cases and interpretive rules the IRS has issued under Code Sec. 162, which is the most familiar provision using the term "trade or business."

Real Estate Professional – A real estate professional is an individual, who by meeting certain qualifications, is not subject to the passive loss rules.

Real Property Trades or Businesses – Is any real property development, redevelopment, construction, reconstruction, acquisition, conversion, rental, operation, management, leasing or brokerage trade or business.

Recapture – is when a deduction or credit is recaptured into income because a property is removed from business service before a required period of time.

Recovery Period - The number of years over which the basis of an item of property is recovered.

Refinancing – Generally refers to the replacement of an existing debt obligation with a debt obligation under different terms.

Related-Party – No deduction is allowed for losses from sales or exchanges between certain related taxpayers. (Code Sec. 267(a)) The following are related taxpayers: (1) Members of the seller's family, but only brothers and sisters (whole or half blood), spouse, ancestors, and lineal descendants. In-laws aren't members of the seller's family, (2) Controlled corporations*, (3)* A corporation and a partnership if the same persons own more than 50% in value of the outstanding stock of the corporation, and more than 50% of the capital interest, or the profits interest, in the partnership. (4) An S corporation and another S corporation if the same persons own more than 50% in value of the outstanding stock of each corporation. (5) An S corporation and a C corporation if the same persons own more than 50% in value of the outstanding stock of each corporation. (6) An estate and a beneficiary of that estate, except in the case of a sale or exchange in satisfaction of a pecuniary bequest. (6) Trustees, grantors, and beneficiaries, that is, the grantor and the fiduciary of a trust; the fiduciary and the beneficiary of a trust; the fiduciaries of two different trusts with the same grantor; a fiduciary of one trust and the beneficiary of another trust with the same grantor; and a trust fiduciary and a corporation more than 50% in value of the outstanding stock of which is owned directly or indirectly by or for the trust or its grantor. (7) A person and an exempt organization controlled, directly or indirectly, by that person or the members of his family.

Repossession - Generally a term associated with having a vehicle reclaimed by the lender of personal property.

Required Minimum Distribution (RMD) - IRA distributions may begin at age 59-1/2 without incurring a penalty, but <u>must</u> begin by April 1 of the calendar year following the year the IRA owner reaches age 70-1/2; otherwise, a minimum distribution penalty can apply.

Reservists - A member of a reserve component of the Armed Forces is an individual who is in the: Army, Navy, Marine Corps, Air Force, or Coast Guard Reserve; Army National Guard of the United States; Air National Guard of the United States; or Reserve Corps of the Public Health Service.

Residential rental property - Real property, generally buildings or structures, if 80% or more of its annual gross rental income is from dwelling units.

Reverse Exchange - A reverse exchange is a transaction in which a taxpayer receives replacement property and subsequently transfers relinquished property. It is distinguished from a deferred exchange, which is a transaction in which a taxpayer transfers relinquished property and subsequently receives replacement property.

Reverse Mortgage - A reverse mortgage is a form of equity release (or lifetime mortgage).. It is a loan available to seniors aged 62 or older, under a Federal program administered by HUD. It enables eligible homeowners to access a portion of their equity. The homeowners can draw the mortgage principal in a lump sum, by receiving monthly payments over a specified term or over their (joint) lifetimes, as a revolving line of credit, or some combination thereof. The homeowners' obligation to repay the loan is deferred until owner (or survivor of two) dies, the home is sold, they cease to live in the property, or they breach the provisions of the mortgage.

Revoke – To annul or cancel an act, particularly a statement, document.

Rollover - The tax-free transfer of funds from one individual retirement account to another or from a company plan to an IRA. If the taxpayer takes possession of the funds, the money must be deposited in the new IRA within 60 days. A rollover can also be used to move money from a medical savings account (MSA) to a health savings account (HSA).

Rural – Refers to areas that are not urbanized. They have a low population density, and typically much of the land is devoted to agriculture.

Safe harbor - Is a provision of a statute or a regulation that reduces or eliminates a party's liability under the law, on the condition that the party performed its actions in good faith or in compliance with defined standards

Salvage value - An estimated value of property at the end of its useful life. Not used under MACRS.

Section 1245 property - Property that is or has been subject to an allowance for depreciation or amortization. Section 1245 property includes personal property, single purpose agricultural and horticultural structures, storage facilities used in connection with the distribution of petroleum or primary products of petroleum, and railroad grading or tunnel bores.

Section 1250 property - Real property (other than section 1245 property), which is or has been subject to an allowance for depreciation.

Section 179 – A provision of the tax code that allows personal tangible and certain other specified business assets that would normally be depreciated to be expensed in the year placed in service.

Secured Debt - *A* secured debt has three characteristics for purposes of the home mortgage interest rules: (1) It makes the taxpayer's interest in the home specific security for the loan, (2) If the taxpayer defaults on the loan, the home would provide satisfaction for the debt, as with a mortgage or deed of trust, and (3) the debt must be recorded according to the applicable state law.

Separate income - is generally income from separate property.

Short Sale – In a short sale, by agreement with the lender, the property is sold for a value less than the mortgage balance. The lender ends up with all the net proceeds from the sale.

Short-Term rentals – Real estate property that is rented for periods averaging less than 7 days

Shrinkage - A term used describe a decrease in inventory due to items such as undetected theft, breakage, bookkeeping errors, etc.

Simplified Employee Pension (SEP) - Is a tax-favored retirement plan for self-employed taxpayers. Contributions to the plan can be deducted. The maximum contribution for 2012 is the smaller of 20% of net earnings from self-employment or $50,000.

Specified Service Trades or Businesses: Generally includes any trade or business described in Sec1202(e)(3)(A), but excluding engineering and architecture and trades or businesses that involve the performance of services that consist of investment-type activities.

Spousal Support – Another term for alimony.

Statute of Limitations - A statute prescribing a period of limitation for the bringing of actions of certain kinds.

Statutory – Legislative authority, such as tax law and is used to distinguish law made by legislative bodies from case law, decided by courts, and regulations issued by government agencies

Statutory employees – Individuals who are specifically classified as employees by the Internal Revenue Code.

Start-Up Costs - Start-up costs include amounts paid or incurred to create an active trade or business or to investigate the creation or acquisition of an active trade or business.

Standard mileage rate - The established amount for optional use in determining a tax deduction for automobiles instead of deducting depreciation and actual operating expenses.

Straight-line method - A way to figure depreciation for property that ratably deducts the same amount for each year in the recovery period. The rate (in percentage terms) is determined by dividing 1 by the number of years in the recovery period

Structural components - Parts that together form an entire structure, such as a building. The term includes those parts of a building such as walls, partitions, floors, and ceilings, as well as any permanent coverings such as paneling or tiling, windows and doors, and all components of a central air conditioning or heating system including motors, compressors, pipes and ducts. It also includes plumbing fixtures such as sinks, bathtubs, electrical wiring and lighting fixtures, and other parts that form the structure.

Substantially equal payments -Are one of the exceptions in the United States IRS Code that allows receiving payments without the 10% early distribution penalty from a retirement plan or deferred annuity before the usual $59^1/_2$ age restriction under certain circumstances. The rules for substantially equal payments are set out in IRS code section 72(t) (for retirement plans) and 72(q) (for annuities), and allow for three methods of calculating the allowed withdrawal amount: (1) required minimum distribution method, based on the life expectancy of the account owner (or the joint life of the owner and his/her beneficiary) using the IRS tables for required minimum distributions, (2) fixed amortization method over the life expectancy of the owner or (3) fixed annuity method using an annuity factor from a reasonable mortality table.

The interest rate that can be used in the latter two calculations has been fixed at one not more than 120% of the Applicable Federal Mid Term rate (AFR) for either of the two months prior to the calculation. SEPP payments must continue for the longer of five years or until the account owner reaches $59^1/_2$. The payments cannot be changed beyond a one time allowed change from one of the latter two calculation methods to the first or all of the payments received will be retroactively taxable and penalized.

If the retirement account owner withdraws more or less than the amount calculated under the SEPP formula, the 10% early distribution penalty that was waived would apply in all instances (where it was waived under the SEPP program), and interest on those amounts will also apply.

Surviving spouse – The official term is "qualified widow(er)" and is one where the **t**axpayer's spouse must have died in one of the prior two years and the taxpayer must have a dependent child at home. The joint rates are used, but no exemption is claimed for the deceased spouse.

SUV – an acronym form a sports utility vehicle. A luxury vehicle for tax purposes has a gross unladen weight greater than 6,000 and less than $14,001 pounds. Generally limited to a maximum Sec 179 deduction of $25,000.

Tangible property - Property you can see or touch, such as buildings, machinery, vehicles, furniture, and equipment.

Tax Attributes – include NOL carryovers, general business credit carryovers, AMT credit carryovers, capital loss carryovers, basis in assets, suspended passive losses and foreign tax credit carryover.

Tax Bracket – Federal income tax is levied at graduated rates. Each additional block of taxable income is taxed at higher tax rate. The tax rate for each block of income is referred to as one's tax bracket. A taxpayer is said to be in the 25% bracket if the taxpayer's highest dollar of taxable income falls within that bracket. Thus, for example, in 2012 if a taxpayer is in the 25% bracket, part of his income is taxed at the 10% rate, some at 15% and some at 25%.

Tax-Exempt - Not subject to tax.

Tax Home - is generally the location of a taxpayer's main place of business (not necessarily the place he/she lives). If taxpayers work regularly in more than one area, the main work location controls.

Taxable Income – Income subject to tax after all allowable adjustments and deductions.

Tentative Minimum Tax – Is the Alternative Minimum Tax (AMT) before deducting regular tax.

Term Interest - A life interest in property, an interest in property for a term of years, or an income interest in a trust. It generally refers to a present or future interest in income from property or the right to use property that terminates or fails upon the lapse of time,

Threshold – The lowest (beginning) dollar amount where certain limitations or adjustments begin to apply

Trade or Business - The tax law doesn't really give a definition of the term "trade or business," probably because no single definition will apply in all cases. But certainly to be considered a trade or business, an activity must be motivated by the taxpayer's profit motive (even if that motivation is unrealistic!) (Reg. §1.183-2(a). Along with profit motive, the taxpayer must carry on some kind of economic activity.

Transmutation – Is a legal term and occurs when a married couple demonstrates an intent, by virtue of their words and actions during marriage, to treat one spouse's separate property as marital property. (This action will require the filing of a federal gift tax return, if the annual gift tax exemption is exceeded.)

Transportation Workers – Workers covered under the U.S. Department of Transportation "Hours-of-Service Regulations"

Travel in the U.S. – includes only the fifty states and the District of Columbia. By vehicle, bus or train between points within the U.S. even if the final destination is outside the U.S. Travel by plane requires take-off and landing within the U.S.

Truck or Van – A truck or van that is a qualified non-personal use vehicle

Unadjusted basis - The basis of an item of property for purposes of figuring gain on a sale without taking into account any depreciation taken in earlier years but with adjustments for other amounts, including amortization, the section 179 deduction, any special depreciation allowance, any deduction claimed for clean-fuel vehicles or clean-fuel vehicle refueling property placed in service before January 1, 2006, and any electric vehicle credit.

Unforeseen Circumstances – Unexpected or unplanned events like drought, disease, fire, etc.

Uniform capitalization (UNICAP) - For inventory and property produced by a taxpayer, (a) the direct cost of such property, and (b) such property's share of those indirect costs (including taxes) part or all of which are allocable to such property must be capitalized.

Unit-of-production method - A way to figure depreciation for certain prop- erty. It is determined by estimating the number of units that can be produced before the property is worn out. For example, if it is estimated that a machine will produce 1000 units before its useful life ends, and it actually produces 100 units in a year, the percentage to figure depreciation for that year is 10% of the machine's cost less its salvage value.

Unrecovered Basis – The unrecovered basis in an asset is the remaining basis after reduction in basis for depreciation, casualties, and depletion. When applied to luxury vehicles where the deductions have been limited due to the luxury auto rules, then at the end of the normal recovery period, the luxury auto will have a remaining (unused) basis. This is also referred to as "unrecovered basis".

Unreimbursed Employee Business Expenses – Are employment related business expenses that are not reimbursed by the employer. These expenses are deductible as a miscellaneous itemized deduction subject to the 2% of AGI limitation.

Unrelated Expenses (Home Office) - Those incurred for purely personal purposes. Such expenses are nondeductible.

Useful life - An estimate of how long an item of property can be expected to be usable in trade or business or to produce income.

Unsecured Election - Taxpayers can elect to treat any secured debt as unsecured. *(Reg. 1.163-10T(o)(5))* The election is irrevocable without IRS consent. By making the election, the interest on the loan can be allocated to use of the proceeds by using the general tracing rules of Reg §1.163-8T.

Vacation Home Rentals – Vacation homes are home that are used party for personally and party as rental. Special rules apply: (1) If the "dwelling unit" is rented less than 15 days - exclude the rental income. Claim no deductions (except interest and taxes). (2) If the unit is rented 15 days or more AND the taxpayer's personal use is less than 15 days or less than 10% of the rental days - allocate expenses according to personal vs. rental days. No further limitation is necessary (except the usual "not-for-profit" rules must be considered). A loss can be claimed. (3) If taxpayer use is 15 days or more and over 10% of the rental days - first allocate expenses by personal vs. rental days, as in the previous paragraph. Deduct allocable taxes and interest first, then maintenance and other cash expenses, then depreciation until the net is ZERO. A loss cannot be claimed.
