Build your knowledge. Build your practice.

THE BIG BOOK™ of Taxes 2019

Editors
Lee T. Reams, EA
Marcia Salter, EA

Edition: October 2019

This text is designed to provide the experienced tax professional with theory and practical knowledge for a variety of problems encountered in preparing individual income tax returns. The topics covered are those that often raise questions, or those in which the IRS has shown an interest. Special emphasis is given to the latest tax law changes, court cases, IRS rulings and related 1040 subjects. The text incorporates examples and problems to illustrate points that have a practical application of law.

This text is used for both seminars and correspondence courses. Not all of the material in the text is covered in the seminar, but is included in the text to provide the user with a practical year-round reference source.

TABLE OF CONTENTS – 2019

(Note – Because of changes from year to year, chapter numbers may not be in exact sequence)

FILING STATUS

Overview

- **Single** – Unmarried individual
- **Qualified Widow**
  - Dependent child at home
  - Spouse died in one of two prior years
  - Joint rates – no spouse exemption
- **Head of Household**
  - Unmarried or lived apart from spouse last 6 months
  - Paid more than ½ the cost of maintaining a household for:
    - Qualified child, or
    - Dependent relative.
- **Married Filing Jointly**
  - Married on the last day of the year
  - Can file jointly with spouse deceased during year – but see rules
  - Cannot amend to another status once filed unless done by unextended due date
- **Married Filing Separately**
  - Married on last day of the year
  - Does not file jointly
  - Can amend to joint

TCJA

Head of Household Due Diligence – Effective with 2018 returns, a paid preparer is subject to due diligence requirements in determining a client's eligibility for the head of household filing status. (IRC Sec 695(g), as amended by Sec 11001(b) of the TCJA) For returns filed in 2020, the penalty for failing to exercise due diligence with respect to the head of household status is $530 ($520 for filings in 2019). The IRS has revised Form 8867, Paid Preparer's Due Diligence Checklist, to add a section for this new requirement.

The Details

Filing status depends on marital status at the end of the tax year, with two major exceptions:

1. ***Surviving spouses may*** file a joint return in the year of their spouse's death, and
2. Certain ***married persons living apart*** may file as unmarried (see below).

Taxpayers are considered married if:
- They are married and living together as a married couple. However, individuals who have entered into a registered domestic partnership, civil union, or other similar relationship that is not considered a marriage under state law are not considered married for federal tax purposes.
- They are living together in a ***common law marriage*** that is recognized in the state where they now live or in the state where the common law marriage began.
- They are married and living apart, but not legally separated under a decree of divorce or separate maintenance.
- They are separated under an interlocutory (not final) decree of divorce. For purposes of filing a joint return, they are not considered divorced.

TERMINATION OF MARITAL STATUS: The marital status of husband and wife is terminated when the couple is legally separated under a decree of divorce or of separate maintenance *(Code Sec. 2(b)(2), Code Sec. 7703(a)(2), Code Sec. 6013(d)(2))*. This termination of the marital status for tax purposes is constitutional (Hamilton, Raleigh, (1977) 68 TC 603). An interlocutory (temporary) decree of divorce doesn't end a marriage until the decree becomes final *(Reg § 1.6013-4(a), Rev Rul 57-368, 1957-2 CB 896).* A couple living under a legal separation agreement but without any court decree isn't legally separated for tax purposes, because such an agreement could be abrogated by the parties upon reconciliation and resumption of cohabitation.

UNMARRIED TAXPAYERS:

If single (widowed, divorced or never married) as of the last day of the tax year, the filing status possibilities are:

- **Single**
- **Head of Household:** For a ***single*** individual to claim ***head of household***, the taxpayer must be a U.S. citizen or resident AND must either:
  - (a) Pay more than one-half of the cost of maintaining as his or her home a household, which is the principal place of abode for more than one-half the year for a qualified person. A qualified person generally includes a qualified child (the child's exemption does not have to be claimed – it can be released to the other parent), or a relative for whom the taxpayer may claim a dependency exemption, **OR**
  - (b) Pay more than half the cost of maintaining a separate household that was the main home for a dependent parent for the entire year.

  Relative **–** *The following individuals are treated as related persons (if filing a joint return, the person can be related to either spouse):*
  - Taxpayer's child, stepchild, foster child, or a descendant of any of them (for example, a grandchild). A legally adopted child is considered the taxpayer's child.
  - Taxpayer's brother, sister, half-brother, half-sister, stepbrother, or stepsister.
  - Taxpayer's father, mother, grandparent, or other direct ancestor, but not foster parent.
  - Taxpayer's stepfather or stepmother.
  - The son or daughter of the taxpayer's brother or sister.
  - The son or daughter of the taxpayer's half-brother or half-sister.
  - The brother or sister of the taxpayer's father or mother.
  - Taxpayer's son-in-law, daughter-in-law, father-in-law, mother-in-law, brother-in-law, or sister-in-law.

  Relationship Established by Marriage – In determining qualifications for dependency, a relationship established by marriage is not ended by death or divorce (Reg § 1.152-2(d)).

  One House – One Household Rule - IRS has ruled that a single house cannot contain more than one household. However, the Tax Court overruled the IRS's view in *Fleming, Jean Foster Estate, TC Memo 1974-137* where a family occupied a single house but with a certain amount of divisibility of quarters--one for mother and unmarried daughter, another for married daughter and family.

  Temporary Absences - For head of household purposes, "temporary absences" for school, vacations, illness, military service, etc., do not change place of abode.

  Cost of Maintaining the Household - To figure the cost of maintaining a household, include food consumed at home, rent paid, home mortgage interest and taxes, home insurance, repairs and utilities. Do not include costs of clothes, education, vacations, medical care, life insurance, and transportation. In addition, qualifying costs paid with funds received from a government agency (e.g., Temporary Assistance for Needy Families), don't count toward qualifying a taxpayer for head of household.

  Married Child - A married child (including grandchild, stepchild, or adopted child) who is a dependent will qualify a taxpayer for this filing status. But to be a "qualifying child" the child cannot file a joint return, unless the return was filed only as a claim for refund. Such a child would also qualify if not claimed as a dependent because of the special dependency rules of *Code Section 152(e)(2) or 152(e)(4)* (i.e., children of divorced parents).

  Multiple Support Agreement - A person claimed as a dependent under a multiple support agreement does not qualify a taxpayer for the head of household filing status.

  Foster Child - Revenue Ruling 84-89, 1984-1 CB 5 states that a dependent foster child who lives with a taxpayer all year can qualify that taxpayer for head of household because a foster child is treated as the taxpayer's own child.

- **Qualifying Widow(er)** - If a taxpayer's spouse dies during the tax year, the surviving spouse can use MFJ as their filing status for that year if they otherwise qualify to use that status. Then if the surviving taxpayer has not remarried, the taxpayer may be able to file as qualifying widow(er) for the subsequent two years if the taxpayer has a dependent child in those years. The benefit being the taxpayer can use the MFJ tax rates, and if not itemizing, the MFJ standard deduction.

  For a taxpayer to be eligible to file as a qualifying widow(er) the taxpayer must meet **all** of following tests:

  1. The taxpayer was entitled to file a joint return with his or her spouse for the year the spouse died. It doesn't matter whether the taxpayer actually filed a joint return.
  2. The spouse died in one of the two prior years and the taxpayer didn't remarry by the end of the year. For example, to use the qualifying widow(er) status for 2019, the taxpayer's spouse must have died in either 2018 or 2017 and the taxpayer hasn't remarried as of December 31, 2019.

3. Taxpayer has a son, daughter, stepson, or stepdaughter (no age limits), but not a foster child and not a grandchild, that can be claimed as a dependent either as a qualified child or dependent relative except
    a. The child's gross income is disregarded ((Sec 2(a)(1)(B)), (Sec 152(d)(1)(B)).
    b. The child cannot have filed a joint return ((Sec 2(a)(1)(B)), (Sec 152(b)(2)).
    c. The taxpayer cannot be claimed as a dependent of another ((Sec 2(a)(1)(B)), (Sec 152(b)(1)).

4. The child lived in the taxpayer's home all year, except for temporary absences or in the cases where a child was born or died during the year and for a kidnapped child.

5. The taxpayer paid more than half the cost of keeping up a home for the year.

Example: *John's wife died in 2018. John hasn't remarried. He has continued during 2019 and 2020 to keep up a home for himself and his child, who lives with him and who he can claim as a dependent. For 2018 he was entitled to file a joint return with his deceased wife. For 2019 and 2020, he can file as a qualifying widower. After 2020, he can file as head of household if he so qualifies.*

MARRIED TAXPAYERS: If married at the end of the year (including those taxpayers in the process of divorce and legally married same sex individuals), the filing status alternatives are:

- **Joint** (Even if only one spouse had income):

    Changing joint filing status to married separate: Once a joint return has been filed, the joint filers may not change to filing separate returns after the unextended due date of the tax return.

    Changing married separate status to joint: A taxpayer may file a joint return after filing married separate if the change is made within THREE YEARS from the unextended due date of the original return (Sec 6013(b)).

    Annulment: If a marriage is annulled, joint returns filed prior to annulment and still open by the statute of limitations should be amended.

    Common law marriages: File married joint for common law marriages, but only if they are recognized under the law in the taxpayer's locality.

    Same-sex marriages: Couples legally married in jurisdictions that recognize their marriages, will be treated as married for federal tax purposes (*Windsor, (Sup Ct 6/26/2013*); Rev Ruling 2013-14) even if the state (or foreign country) where they now live does not recognize same-sex marriages.

    Death of a spouse: In the year a spouse dies, and if the executor agrees, the surviving spouse can claim joint status if not remarried by the end of the year. If the survivor does remarry before year-end, the deceased spouse's status is married separate.

- **Head of Household:** A married individual may use this status if he or she:
    (a) ***Lived apart from their spouse*** at least the last six months of the year,
    (b) ***Pays more than one-half of the cost*** of maintaining as his or her home a household which is the principal place of abode for more than one-half the year of a child, stepchild or eligible foster child for whom the taxpayer may claim a dependency exemption. (A nondependent child qualifies only if the taxpayer gave written consent to allow the dependency to the non-custodial parent, or the non-custodial parent has the right to claim the dependency under a pre-'85 divorce agreement).
- **Married Separate**

ELECTION TO TREAT NONRESIDENT ALIEN SPOUSE AS A U.S. RESIDENT: Generally, a U.S. citizen or a U.S. resident who is married to a nonresident alien must file as Married Separate. However, a person who is a nonresident alien at the end of his taxable year, and who is married to a U.S. citizen or a U.S. resident can be treated as a U.S. resident for income tax purposes if the spouses so elect *(Code Sec. 6013(g)(1))*.

In so doing, both spouses must agree to subject their worldwide income for the taxable year to U.S. taxation. *(Code Sec. 6013(g); Code Sec. 6013(h))*

Both parties must make the election. One party must have been, at the close of the taxable year for which the election was made, a nonresident alien individual married to a citizen or resident of the United States *(Code Sec. 6013(g)(2)).* To qualify for the election, the U.S. resident or U.S. citizen spouse needs to be a U.S. resident or U.S. citizen only at the close of the taxable year *(Reg § 1.6013-6(a)(1)).*

How To Make the Choice - Attach a statement, signed by both spouses, to the joint return for the first tax year for which the choice applies. It should contain the following information:

- A declaration that one spouse was a non-resident alien and the other spouse a U.S. citizen or resident alien on the last day of the tax year, and
- That the non-resident alien spouse chooses to be treated as a U.S. resident for the entire tax year.

Provide the name, address, and identification number of each spouse. (If one spouse is deceased, include the name and address of the person making the choice for the deceased spouse.) Generally this will require obtaining an ITIN for the non-resident spouse. (Reference Pub 519)

Once made, and as long as one of the spouses is a U.S. citizen or resident, the election applies not just for the year for which it is made but for all future years until it is terminated. If the election is terminated, neither spouse is eligible to make the election for any subsequent tax year. *(Code Sec 6013(g)(6))*

Terminating the Election – The election terminates at the earliest of any of the following events:

- ***Revocation by taxpayer or spouse*** - Either spouse may revoke the election by filing a statement of revocation by the due date for filing the tax return for the tax year.
- ***Death*** – Death of either spouse terminates the election beginning with the first tax year following the year the spouse died. However, if the U.S. citizen or resident spouse is the surviving spouse and meets the requirements for the qualified widow(er) status, the election continues for two years following the death of the non-resident spouse.
- ***Legal separation*** - If the couple legally separates under a decree of divorce or of separate maintenance, the election terminates as of the beginning of the taxable year in which the legal separation occurs.
- ***IRS action*** – The IRS may terminate the election for any tax year for which it determines that either spouse has failed to keep or provide sufficient books, records, and other information with which to determine tax liability. *(Reg. §1.6013-6(b)(4))*
- ***Other Issues:***

  NIIT **-** Higher income taxpayers with investment income are subject to a 3.8% surtax on net investment income (see Chapter 12.05 for details). However, this tax does not apply to nonresident aliens. Therefore, when weighing the pros and cons of making the election to treat a nonresident alien spouse as a U.S. resident, the effect of the 3.8% tax on the couple's total tax picture must be considered.

  ITIN – The non-resident spouse will need an ITIN if the election to file a joint return is made. An ITIN for the non-resident spouse is not needed if the resident spouse files MFS. Page 15 of the Form 1040 instructions indicates that where a spouse is not otherwise required to have an ITIN or SSN, enter "NRA" in the space on the 1040 for the SSN/ITIN.

  FBAR – There may also be an FBAR filing requirement. For additional details related to FBAR filings see page 01.14.03.

FEDERAL FILING STATUS DETERMINATION CHART – See last page of chapter

CALIFORNIA DIFFERENCES

Filing status for California must generally be the same as the filing status used on the federal income tax return.

Exceptions: Married taxpayers who file a joint federal income tax return may file either a joint return or separate returns if either spouse was:

- An active member of the United States armed forces or any auxiliary military branch during the tax year; or
- A nonresident for the entire year and had no income from California sources during the tax year. However, if the taxpayers file a joint return and if either spouse was a nonresident during the tax year, the taxpayer must file Form 540NR, California Nonresident or Part-Year Resident Income Tax Return.

Registered Domestic Partners (RDP)– See Chapter 1.12 RDP.

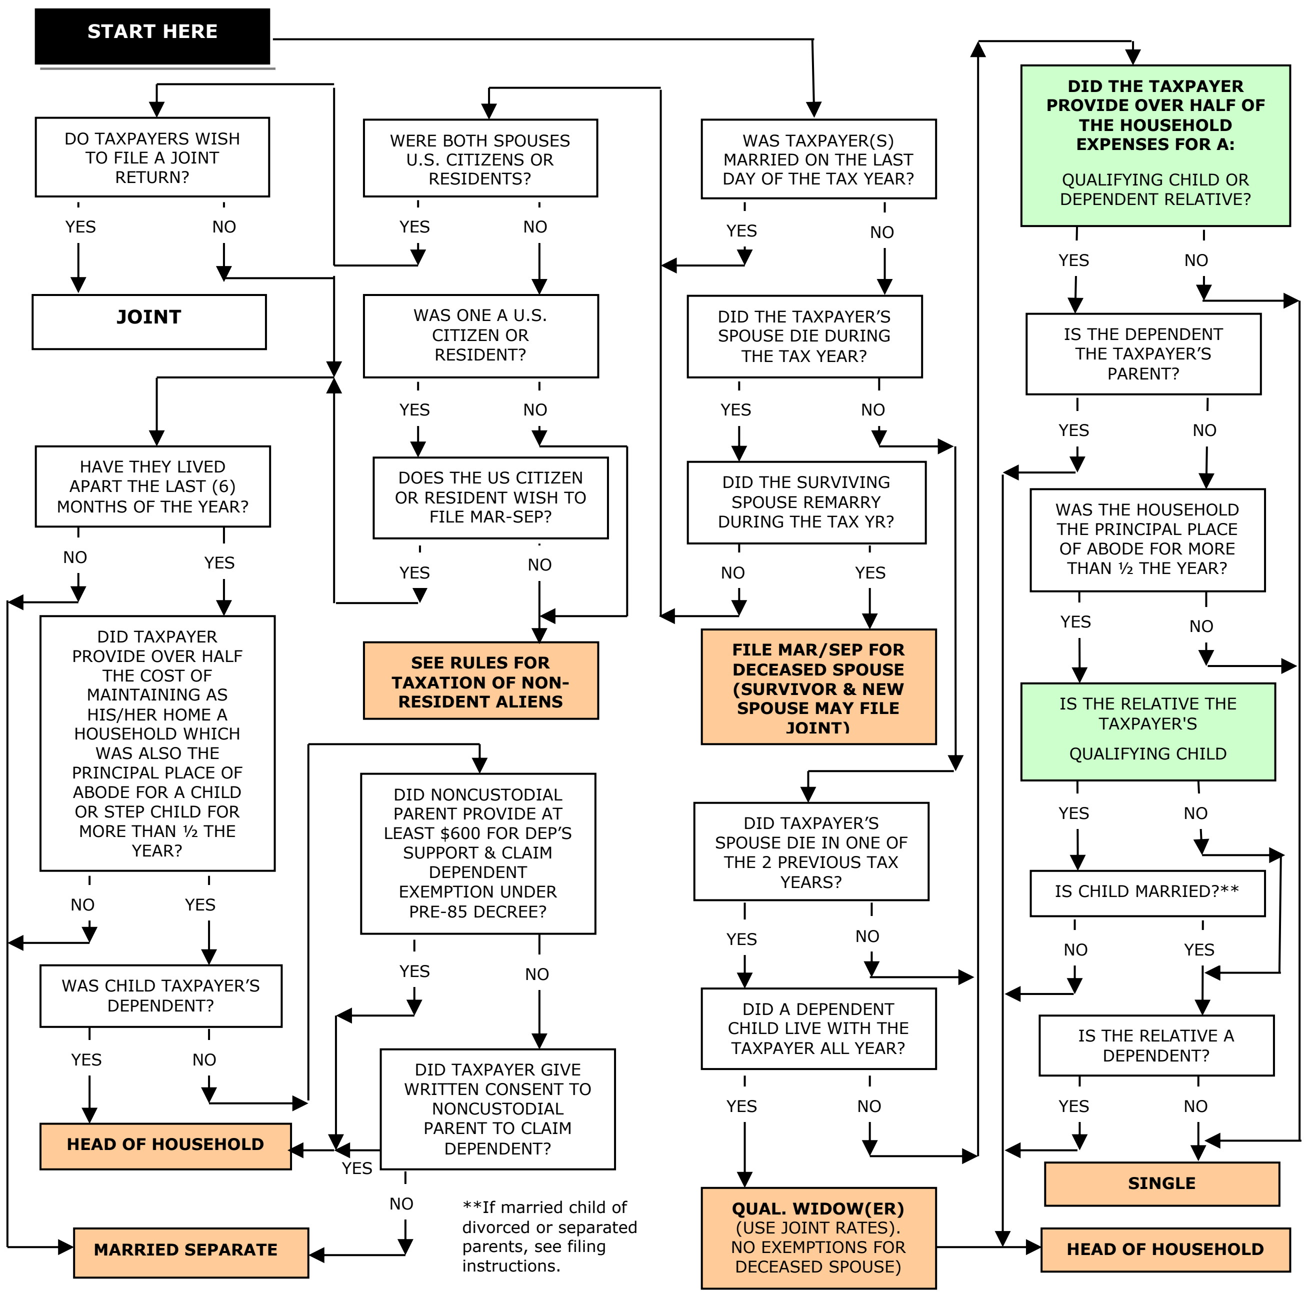
Qualifying for Head of Household While Still Married - California follows the federal rule that allows a married individual to use the head of household status if he or she (a) lived apart from their spouse at least the last six months of the year, and (b) paid more than one-half of the cost of maintaining as his or her home a household which is the principal place of abode for more than one-half the year of a child, stepchild or eligible foster child for whom the taxpayer may claim a dependency exemption. The "lived apart" requirement is unchanged by an amendment to the California Family Code (SB 1255, Stats. 2016, ch. 114, 7/25/16) regarding the definition of "date of separation." Under that revision, date of separation is the date that a complete and final break in the marital relationship has occurred as evidenced by the spouse's expression of his or her intent to end the marriage and conduct that is consistent with that intent. In other words, for purposes of the Family Code, the spouses don't have to live in separate residences to establish a date of separation, but for Head of Household qualification purposes, they must still meet requirement (a) above. (FTB News, Sept. 2017)

FTB Form 3532 - For taxable years beginning on or after January 1, 2015, California requires taxpayers who use the head of household filing status to file form FTB 3532, Head of Household Filing Status Schedule, with their Form 540, 540NR or 540 2EZ to report how the head of household filing status was determined.

Common Law Marriages - California abolished common law marriages by statute in 1895. However, CA has recognized common law marriages originating in states that recognize common law marriages. Reference: ***Appeal of Estate of Lawrence Foley, Deceased,* 77-SBE-100, 7-26-77**

NOTES

FEDERAL FILING STATUS DETERMINATION CHART



DEPENDENTS

To be claimed as a taxpayer's dependent an individual must be either:

- A **QUALIFIED CHILD** – as determined under the uniform definition of a child (Details start on page 1.01.02):
  - Residency Test (Principal place of abode)
  - Relationship test
  - Age test
  - Joint return test
  - Cannot be self-supporting
- A **QUALIFYING RELATIVE** – who meets the following tests (Details start on page 1.01.09):
  - Relationship or member of the household test
  - Gross income test
  - Joint return test
  - Citizenship/residence test
  - Support test

NOTE – for divorce decrees after 2008, only Form 8332 or a similar statement will be accepted – pages from the divorce decree or separation agreement cannot be substituted for Form 8332.

TESTS TO BE A DEPENDENT: As explained below, to be claimed as a taxpayer's dependent, an individual must be:

- A **qualified child** – as determined under the uniform definition of a child, **or**
- A **qualifying relative.**

TESTS FOR MEETING UNIFORM DEFINITION (QUALIFIED CHILD)

In general, a child is a qualifying child of a taxpayer if the child satisfies each of these tests: a **residency test**, a **relationship test**, a **joint return test**, and an **age test**. In addition, with one exception (see "self-supporting children" below), the child may not have provided over one-half of his or her own support for the year. The support and gross income tests for determining whether an individual is a "qualifying relative" generally do not apply to a child who meets the requirements of the uniform definition.

- **Residency test -** To satisfy the residency test, the child must have the ***same principal place of abode as the taxpayer for more than one half of the tax year.*** Exceptions apply for temporary absences, when the child is born or dies during the tax year, for children of divorced or separated parents, and for certain missing children. Temporary absences due to special circumstances, including absences due to illness, education, business, vacation, or military service, are not intended by Congress to be treated as absences. Further, the child must be a U.S. citizen, resident or national, or a resident of Mexico or Canada.

  Adopted nonresident alien exception - There are exceptions to this test for the dependency of certain adopted children who are nonresident aliens. For such a child to qualify as a taxpayer's dependent, the *taxpayer* must be a U.S. citizen or national, and the child must live with the taxpayer all year. The child need not have been adopted for the entire year, as long as he/she lived with the taxpayer for the whole year (except for temporary absences).

  Residency test for kidnapped children **-** A child who has been kidnapped is treated as meeting the residency test if both of the following requirements are met:
    - The child is presumed by law enforcement authorities to have been kidnapped by someone who is not a member of the child's or taxpayer's family, and
    - In the year of the kidnapping, the child lived with the taxpayer for more than half of the part of the year prior to the date of the kidnapping.

  If both requirements are met, the child is treated as meeting the residency test for the following tax benefits:
    - The child's dependency exemption deduction (TCJA suspended 2018 through 2025 by treating the amount of the deduction as $0).
    - The child tax credit.
    - Earned income tax credit.
    - Head of household or qualifying widow(er) with dependent child filing status.

  This treatment applies for all tax years ending during the period that the child is kidnapped. However, it ceases to apply as of the first tax year beginning after the calendar year in which the child is determined to be dead, or, if earlier, the year in which the child would have reached age 18 (age 17 for purposes of the child tax credit).

- **Relationship test -** To meet the relationship test, the child must be the taxpayer's son, daughter, stepson, stepdaughter, brother, sister, stepbrother, stepsister, or a descendant of any such individual. An individual who is legally adopted by the taxpayer, or an individual who is lawfully placed with the taxpayer for legal adoption by the taxpayer, is treated as a child of the taxpayer by blood. A foster child is treated as a child of the taxpayer only if the child qualifies as an "eligible foster child," meaning that the individual was placed with the taxpayer by an authorized placement agency or by judgment, decree or other court order.

- **Joint return test –** An individual who is married and files a joint return for the tax year beginning in the calendar year in which the tax year of the taxpayer claiming the individual begins can't be a qualifying child, unless the return is filed only as a refund claim. (Code Sec. 152(c)(1)(E))

- **Age test -** The age test varies depending upon the tax benefit involved. The child is treated as reaching a given age on the anniversary of the date the child was born (e.g., a child born January 1, 2000 attains age 19 on January 1, 2019). In general, to be a qualifying child, an individual must be:
    - Under age 19* or
    - Under age 24 in the case of a full-time student*;
    - Under age 13 (if he or she is not disabled) for purposes of the dependent care credit;
    - Under age 17 (whether or not disabled) for purposes of the child credit.

    **These age requirements are as of the end of the tax year, and they don't apply if the individual is permanently and totally disabled at any time during the calendar year.*

  Regardless of the individual's age: to be a qualifying child, the **individual (child) must be younger than the taxpayer** who claims him or her. (Code Sec. 152(c)(3)(A)) This rule does not apply if the individual is totally and permanently disabled. (Code Sec. 152(c)(3)(B))

  This provision addresses the problem where a taxpayer caring for a younger sibling in a home with no parents would be ineligible to claim the earned income credit based solely on the fact that the taxpayer is a qualifying child of the younger sibling if the taxpayer meets the age, relationship, and residency tests. Accordingly, the taxpayer would not be a qualifying child of the younger sibling and thus would not be barred from claiming the earned income credit with respect to the younger sibling.

OLDER CHILD MAY QUALIFY AS DEPENDENT (Qualified Relative)

The qualified relative rules may apply for someone other than a qualifying child of the taxpayer(s). Whether an older child can be claimed as a dependent is determined under the rules for qualifying dependents. As a result, they will need to meet five dependent qualification tests to be claimed as a dependent.

Full-Time Student - A full-time student is one enrolled for some part of five calendar months (whether or not consecutive) for the number of hours or courses considered full-time attendance by the school. (Reg Sec 1.151-3(b)).

The enrollment in school needn't be for full months—or for five consecutive months. So, if the student is enrolled from mid-February to mid-June, the five months' qualification is met. On the other hand, if the student is enrolled from September to December or February to May, the student has been enrolled for only four months and there must be full-time enrollment during at least one other month during the calendar year. Any part of a month counts as a full month.

Enrolled means registered. That is, an individual will qualify as a student if the individual is registered for a semester in a full-time course of study at an educational organization. (IRS Letter Ruling 9838027).

Self-supporting children - A child who provides over one half of his or her own support generally is not considered a qualifying child of another taxpayer. However, a child who provides over one half of his or her own support may constitute a qualifying child of another taxpayer for purposes of the earned income tax credit.

The term "support" and "income" have entirely different meanings. The question is, does a child **provide** over half of his or her own support? A child may have income, save it and not contribute to their own support, in which case the child may very well be the qualifying child of his or her parents, who would be entitled to claim the child as a dependent and claim a higher education tax credit for the tuition they paid. It may present an odd looking dependent of another return, but it is what it is. Also remember there is no gross income test for a "qualified child."

For a "qualifying child," the support requirement will be that the dependent had not provided over one-half of his or her own support for the calendar year in which the taxpayer's tax year begins. In determining whether a child provided more than one-half of his or her own support (for a qualifying child), or whether a taxpayer provided more than one-half of a relative's support (for a qualifying relative), the amount of support provided by the child, or by the taxpayer, will be compared to the total amount of support from all sources. The term "support" will include amounts incurred for support and/or the fair market value (FMV) of an item of support, if the item is property or lodging. The amount of total support will include support provided for the dependent's own support, and income that's excludable from gross income. Support will include amounts spent (and FMV of goods or property used) to provide: food and clothing; lodging (shelter); medical and dental care; education (but not certain scholarships); and similar items. Worksheet 2 in IRS Pub 501 is useful for determining support.

From Pub 929 – Page 18 – Support - All amounts spent to provide the child with food, lodging, clothing, education, medical and dental care, recreation, transportation, and similar necessities. To figure your child's support, count support provided by you, your child, and others. However, a scholarship received by your child isn't considered support if your child is a full-time student.

Qualifying child tax benefits generally limited to child's parents - If an individual's parents may claim the individual as a qualifying child but no parent does so, no other taxpayer may claim the individual as a qualifying child unless that taxpayer's adjusted gross income (AGI) is higher than the highest AGI of any parent of the individual. (Code Sec. 152(c)(4)(C))

Tie-breaker rules – The tie-breaker rules apply if an individual **may be claimed** as a qualifying child by two or more taxpayers and the taxpayers cannot agree between themselves who will claim the child, or if the child is actually claimed by more than one taxpayer and the IRS has to step in and determine who can claim the child. The tie-breaking rules are as follows:

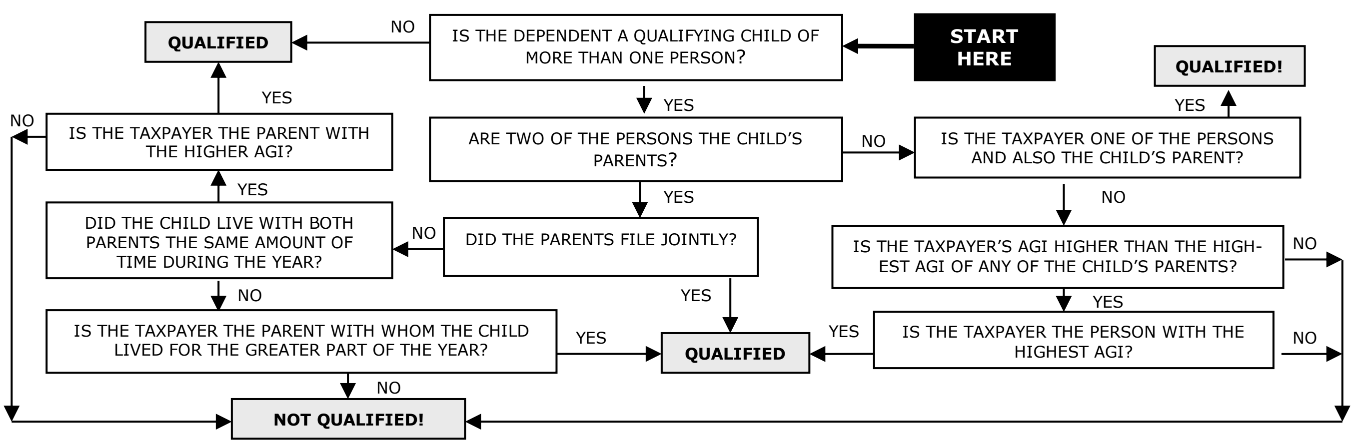
- **Parent and Other Relative** - If only one of the taxpayers who may claim the individual as a qualifying child is the individual's parent (e.g., where a child lives with his or her mother and grandmother in the same residence), the individual is treated as the qualifying child of his or her parent. (Code Sec. 152(c)(4)(A)(i))
- **Parents Not Filing Jointly** - If more than one parent may claim the child as a qualifying child and the parents don't file a joint return together, the child is treated as the qualifying child of: (a) the parent with whom the child resided for the longer period of time during the tax year, or (b) if the child resides with both parents for the same amount of time during the tax year, the parent with the higher adjusted gross income. (Code Sec. 152(c)(4)(B)(ii)) However, a child is treated as the qualifying child of the noncustodial parent if the custodial parent releases a claim to the dependency as discussed below.
- **Parents Not Claiming** – If an individual may be but isn't claimed by either parent, the individual may be claimed as the qualifying child of another taxpayer only if that taxpayer's adjusted gross income is higher than the highest AGI of any parent of the individual. (Code Sec. 152(c)(4)(C))

TIE-BREAKER RULES	
IF more than one person may claim the same qualifying child and . . .	**THEN the child will be treated as the qualifying child of the. . .**
Only one of the persons is the child's parent.	Parent.
Two of the persons are parents of the child and they do not file a joint return together.	Parent with whom the child resided for the longer period of time during the year.
Two of the persons are parents of the child, they do not file a joint return together, and the child lived with each parent the same amount of time during the year.	Parent with the higher adjusted gross income (AGI).
No parent claims the child	Person with the highest AGI, but only if that person's AGI is higher than the AGI of any parent of the child.

In **Notice 2006-86** the IRS has indicated that the rule that goes into effect when two or more taxpayers claim a child as a qualifying child must be applied uniformly to all tax provisions that rely on the same definition of a qualifying child. The only exception is where the Code Sec. 152(e) rule for non-custodial parents applies, in which case a child may be the non-custodial parent's qualifying child for child tax credit and dependency deduction purposes and may be the custodial parent's qualifying child for other provisions. (The dependency deduction is suspended for years 2018-2025.)

In other words, except to the extent that the special rule for non-custodial parents applies, when more than one taxpayer may claim a child as a qualifying child, the child is treated as the qualifying child of only one taxpayer for **ALL** the provisions that employ the uniform definition of a qualifying child: head of household, child and dependent care credit, child tax credit, EITC, and the exclusion for dependent care assistance. The notice says the **tiebreaker rules are applied** to these provisions **as a group**, rather than on an IRC section-by-section basis.

QUALIFIED CHILD TIE-BREAKER CHART*



*Applies when a child can be claimed as the qualifying child of more than one person.

Special rule for non-custodial parents – A special rule allows a non-custodial parent to claim the child as a qualifying child for purposes of the Code Sec. 24 child tax credit and the Code Sec. 151 dependency deduction, the latter being suspended for years 2018 through 2025. The non-custodial parent may claim the child as a qualifying child under Code Sec. 152(e) (notwithstanding the rule of Code Sec. 152(c)(4)(B)), if:

(1) The child is in the custody of one or both parents for more than one-half of the calendar year;
(2) The child receives over one-half of the child's support during the calendar year from the child's parents;
(3) The parents:

- Are divorced or separated under a decree of divorce or separate maintenance,
- Are separated under a written separation agreement, or
- Live apart at all times during the last 6 months of the calendar year; and

(4) The custodial parent releases the claim to the dependency of the child to the non-custodial parent in a written declaration that the non-custodial parent attaches to the non-custodial parent's tax return.

Final regulations §1.152-4 includes the following definitions and clarifications relating to the special rule for non-custodial parents:

Custody – A child is in the custody of one or both parents for over one-half the calendar year if one or both parents have the **right under state law to physical custody** of the child for more than one-half the calendar year. Thus, for purposes of Sec. 152(e), a child is not in the custody of either parent once the child reaches the age of majority under state law. Whether a child who is not in one or both parents' custody over half the year is the qualifying child or qualifying relative of either parent is determined under the rules of code sections 152(c) or (d).

> ***Example 1:*** *Duane and Ellie are the divorced parents of Carol. Under a custody decree, Grandmother has the right under state law to physical custody of Carol from January 1 to July 31, 2019. Because Duane and Ellie do not have the right under state law to physical custody of Carol for over one-half of the 2019 calendar year, Carol is not in the custody of one or both parents for over one-half of the calendar year. Therefore, section 152(e) does not apply. Whether Carol is the qualifying child or qualifying relative of Duane, Ellie, or Grandmother is determined under section 152(c) ("qualifying child") or (d) ("qualifying relative").*

> ***Example 2:*** *Frank and Ginnie are the divorced parents of Chris. In May of 2019, Chris turns age 18 and is emancipated under the law of the state where Chris resides. Therefore, in 2019 and later years, Frank and Ginnie do not have the right under state law to physical custody of Chris for over one-half of the calendar year, and Chris is not in the custody of Frank and Ginnie for over one-half of the calendar year. Section 152(e) does not apply, and whether Chris is the qualifying child or qualifying relative of Frank and Ginnie is determined under section 152(c) or (d).*

> ***Example 3:*** *The facts are as in Example 2, except Chris turns age 18 on August 1, 2019. In 2019, Chris resides with Frank from January 1 through May 31 and with Ginnie from June 1 through December 31. Frank executes a Form 8332 releasing his right to claim Chris as a dependent for 2019. Chris is considered to be in the custody of Frank and Ginnie for over one-half the year, but he is treated as not residing with either parent after his emancipation on August 1. Therefore, Chris resides for 151 nights with Frank and 61 nights with Ginnie. As long as Ginnie attaches a copy of the Form 8332 that Frank executed to her return, she may claim Chris as a dependent for 2019.*

Custodial Parent – The IRS defines "custodial parent" to be the parent with whom the child resides for the **greater number of nights** during the year. A child resides with a parent for a night if the child sleeps at the residence of that parent (whether or not the parent is present) or in the company of the parent when the child doesn't sleep at the parent's residence, such as when the parent and child are on vacation together. The time that the child goes to sleep is irrelevant. Provisions for special circumstances include:

- Absences of Child - If a child is temporarily absent from a parent's home for a night, the child is treated as residing with the parent with whom the child would have resided for the night. A night is not counted for either parent if the child would not have resided with either parent for the night (for example, because a court awarded custody of the child to a third party for the period of absence) or it cannot be determined with which parent the child would have resided for the night.

- Equal Number of Nights - If a child resides with each parent for the same number of nights, then the parent with the higher AGI for the year is treated as the custodial parent.

- Night Spans Two Years – A night that extends over two tax years is allocated to the tax year in which the night begins. Thus, the night that begins on December 31, 2019, is counted for taxable year 2019.

- Parent Works at Night – If, due to a parent's nighttime work schedule, a child resides for a greater number of days but not nights with the parent who works at night, that parent is treated as the custodial parent. On a school day, the child is treated as residing at the primary residence registered with the school.

> ***Example 4:*** *Hector and Jana are the divorced parents of Claudia. Claudia generally resides with Hector during the week and with Jana every other weekend. Claudia resides with Jana in Hector's residence for 10 consecutive nights while Hector is hospitalized. Under Regs Sec 1.152-4(d)(1)(i) Claudia resides with Hector for the 10 nights.*
>
> ***Example 5:*** *Karl and Lisa, who are separated under a written separation agreement, are the parents of Charles. In August 2019, Karl and Charles spend 10 nights together in a hotel while on vacation. Under the regulations Charles resides with Karl for the 10 nights that Karl and Charles are on vacation.*

Example 6: *Oscar and Pam, who never married, are the parents of Cora. In 2019, Cora spends alternate weeks residing with Oscar and Pam. During a week that Cora is residing with Oscar, he gives Cora permission to spend a night at the home of a friend. The night Cora spends at the friend's home is treated as a night that Cora resides with Oscar.*

Example 7: *Same facts as in Example 6, except Cora also spends 6 weeks away at summer camp. Because she resides with each parent for alternate weeks, Cora would have resided with Oscar for 3 weeks and with Pam for 3 weeks of the period that she is at camp. Cora is treated as residing with Oscar for 3 weeks and with Pam for 3 weeks.*

Example 8: *Same facts as in Example 7, except that Cora does not spend alternate weeks residing with each parent, and it cannot be determined whether Cora would have resided with Oscar or Pam for the period she was at camp. Therefore, she is treated as residing with neither parent for the 6 weeks.*

Written Declaration Releasing Claim to Noncustodial Parent – The final regs state that if the custodial parent releases to the noncustodial parent the claim to the child as a dependent, the release must be a **written declaration** and it must be **unconditional** (no strings attached such as requiring the noncustodial parent to meet support payment obligations). It must name the noncustodial parent and specify the year or years for which it is effective. If it specifies "all future years," it is treated as specifying the first taxable year after the year in which it is executed and all subsequent years. The written declaration may be made on Form 8332, or successor form designated by the IRS. If the release is not made on the official IRS form, it must conform to the substance of that form, and it must be executed for the sole purpose of serving as a written declaration under this section. **A court order or decree or separation agreement may not serve as a written declaration*** (because it has other purposes than releasing the dependency to the non-custodial parent). The IRS also will not accept a state court's allocation of dependents because IRC Sections 151 and 152, not state law, determine who may claim a child as a dependent for federal income tax purposes. The noncustodial parent **must attach a copy** of the written declaration to his or her return for each year in which the child is claimed as a dependent. * Swint, (2014) 142 TC No. 6

Effect on Prior Multi-Year Releases **-** Although the final regs apply prospectively, they clarify that a multi-year written declaration will be treated as satisfying the release format requirements under the final regs, if it satisfied the requirements for the form of a written declaration at the time it was executed. The regulations also provide that a release executed on or before July 2, 2008 may be revoked.

In Ltr Rul 200925041, a Chief Counsel Advice that may not be used or cited as precedent, the IRS said that a noncustodial parent may continue to attach pages of a divorce decree or separation instrument **executed on or before July 2, 2008,** that unconditionally allows the noncustodial parent to claim an exemption for a child, if the pages constitute a statement substantially similar to Form 8332 under the requirements in effect at the time the decree or agreement was executed.

Revoking the Release - The declaration releasing the claim to the child's dependency may be revoked if:

- A written notice of revocation is provided to the other parent.
- The parent revoking the declaration makes reasonable efforts to provide actual notice to the other parent. Facts and circumstances will determine what attempts are "reasonable," but mailing a copy of the written revocation to the noncustodial parent at the last known address or "at an address reasonably calculated to ensure receipt" will satisfy the requirement.
- The revocation is effective no earlier than the taxable year that begins in the first calendar year after the year in which the parent revoking the written declaration provides, or makes reasonable efforts to provide, the written notice.
- The revocation may be made on Form 8332 or its successor. If not made on the IRS form, the revocation must conform to the substance of the 8332; it must be a document executed solely for the purpose of making the revocation and must specify the year or years the revocation is effective. A copy of the revocation must be attached to the parent's return for each taxable year for which the parent claims a child as a dependent as a result of the revocation. The parent revoking the written declaration must keep a copy of the revocation as well as evidence of delivery of the notice to the other parent, or of the reasonable efforts to provide actual notice.

CAUTION:

The custodial parent's release of the claim is a condition of the non-custodial parent claiming the child as a dependent. Absent the written release, the non-custodial parent may not claim the child for the dependency exemption (years before 2018 and after 2025) or the child tax credit. Further, under Reg. 1.152-4, if the custodial parent does not release the claim to the dependency, only the taxpayer who is entitled to claim the child as a dependent under the qualifying child or qualifying relative rules (Sec. 152 (c) or 152 (d)) may treat the child as a dependent for purposes of claiming the child's medical expenses (Sec. 213 (d) (5)) and treating the child as a dependent with respect to fringe benefits (Sec. 132 (h) (2) (B)) and amounts received from employer health plans (Sec. 105 (b)).

Never Married Parents – The Tax Court held in *King, (2003) 121 T.C. No. 12*, that a never-married non-custodial parent is entitled to a dependency exemption because the custodial parent signed Form 8332 waiving the dependency. Regs § 1.152-4 follow the holding in *King*.

When a Child Is a Dependent of Both Parents - In Revenue Procedure 2008-48, 2008-36 IRB, IRS has described the circumstances under which it will treat a child of parents who are divorced, separated, or living apart as the dependent of both parents for purposes of the:

- Exclusion from gross income of certain employer-provided reimbursements of expenses incurred for the medical care of the employee's dependent child under Code Sec. 105(b);
- Exclusion from gross income of employer contributions to an accident or health plan on behalf of the employee's children under Code Sec. 106(a) and Reg. §1.106-1;
- Exclusion from gross income of fringe benefits qualifying as no-additional-cost services or qualified employee discounts under Code Sec. 132(a) that are treated as used by the employee due to use by an employee's child under Code Sec. 132(h)(2);
- Deduction of medical expenses of the taxpayer's child under Code Sec. 213(a); and
- Exclusions under Code Secs. 220(f)(1) and 223(f)(1) for distributions from Archer Medical Savings Accounts and Health Savings Accounts, respectively, if the distributions are used to pay qualified medical expenses of the account beneficiary's child.

IRS says that it will treat a child as the dependent of both parents for purposes of the above whether or not the custodial parent releases the claim to the dependency under Code Sec. 152(e)(2) if the taxpayers are:

- Divorced, legally separated under a decree of divorce or separate maintenance, legally separated under a written separation agreement, or live apart at all times for the last 6 months of the calendar year; and
- The parents of a child who: (1) receives over one-half of the child's support during the calendar year from the child's parents; (2) is in the custody of one or both parents for more than one-half of the calendar year; and (3) qualifies as a qualifying child or qualifying relative of one of the child's parents.

<u>SPECIFIC AREAS OF IMPACT</u>

Several tax attributes are affected by the "Uniform Definition of a Child." The table below highlights the special requirements associated with each attribute followed by a discussion of each.

	QUALIFIED CHILD – ADDITIONAL ATTRIBUTE REQUIREMENTS			
	Dependency Exemption **	**Child Tax Credit (CTC)**	**Dependent Care Credit**	**EITC**
Lived with Taxpayer Requirement	More than half the year (except 8332 release)	More than half the year (except 8332 release)	More than half the year	More than half the year
Age Requirements*	**Under age 19,** full-time **Student under 24** or **Totally disabled**	**Under age 17** at end of year	**Under age 13,** or incapable of **self-care,** when care provided	**Under age 19,** full-time **Student under 24** or **Totally disabled**
Self-Supporting Restriction	Must not be self-supporting	Must not be self-supporting	Must not be self-supporting	Not considered
Citizenship Requirement	U.S. Citizen, national, resident alien or resident of Canada or Mexico	U.S. Citizen, national, or resident alien	U.S. Citizen, national, resident alien or resident of Canada or Mexico	U.S. Citizen, national, or resident alien
ID Number	SSN or ITIN***	SSN only 2018-2025 Or ITIN other years	SSN or ITIN	SSN Only
Other Issues	Parents together must furnish more than 50% support for custodial releasey	Qualifying child must be taxpayer's dependent	Custodial parent eligible, if dependency released	Custodial parent eligible, if dependency released

*Child must be younger than taxpayer who is claiming the child

**Dependency exemption deduction has been suspended for years 2018 through 2025.

***While a qualified child *could* have an ITIN, a timely obtained SSN is needed to qualify for the CTC or EITC.

Multiple support agreements - The rules relating to multiple support agreements do not apply with respect to qualifying children because the support test does not apply to them.

Taxpayers can apply dependency rules to claim a dependency for a qualifying relative who does not satisfy the qualifying child definition. In such cases, gross income and support tests, including the special rules for multiple support agreements, the special rules relating to income of handicapped dependents, and the special support test in case of students, apply for purposes of the dependency.

Earned income tax credit (EITC) - A qualifying child must be a qualifying child under the dependency rules (except for the requirement that the child not provide more than one-half of his or her own support). If a taxpayer claims the earned income tax credit on the basis of a qualifying child, the child must have a Social Security number. The same tie-breaker rules apply for the EITC as for dependency.

Child credit –A qualifying child for the child tax credit is defined the same as for determining dependency, except the child must be under age 17, regardless of whether the child is disabled, and a taxpayer cannot claim a child for the child tax credit unless the taxpayer is entitled to the child's dependency. For years 2018 through 2025 the ID number of the child must be a Social Security number and the SSN must be obtained before the due date of the return.

If the child doesn't meet the requirements to be a qualified child but is eligible to be a qualifying relative (i.e., "other dependent"), the taxpayer may claim the $500 nonrefundable dependent credit instead of the child tax credit.

Dependent care credit - If other applicable requirements are satisfied, a taxpayer may claim the dependent care credit for a child who lives with the taxpayer for more than one half of the year, even if the taxpayer does not provide more than one half of the cost of maintaining the household.

Head of household filing status - A taxpayer is eligible for head of household filing status only with respect to a qualifying child or an individual who qualifies as the taxpayer's dependent (qualifying relative). Thus, a taxpayer may claim head of household filing status if the taxpayer is unmarried (and not a surviving spouse) and pays more than one half of the cost of maintaining as his or her home a household which is the principal place of abode for more than one half the year of:

- A qualifying child, or
- An individual who is a relative the taxpayer may claim as a dependent.

A taxpayer cannot claim head of household status using as a qualifier an individual who is the taxpayer's dependent only because the individual is part of the taxpayer's household. Thus, the taxpayer and qualifying individual must be related. A taxpayer may claim head of household status with respect to a parent who qualifies as the taxpayer's dependent even if the parent does not live with the taxpayer if certain requirements are satisfied.

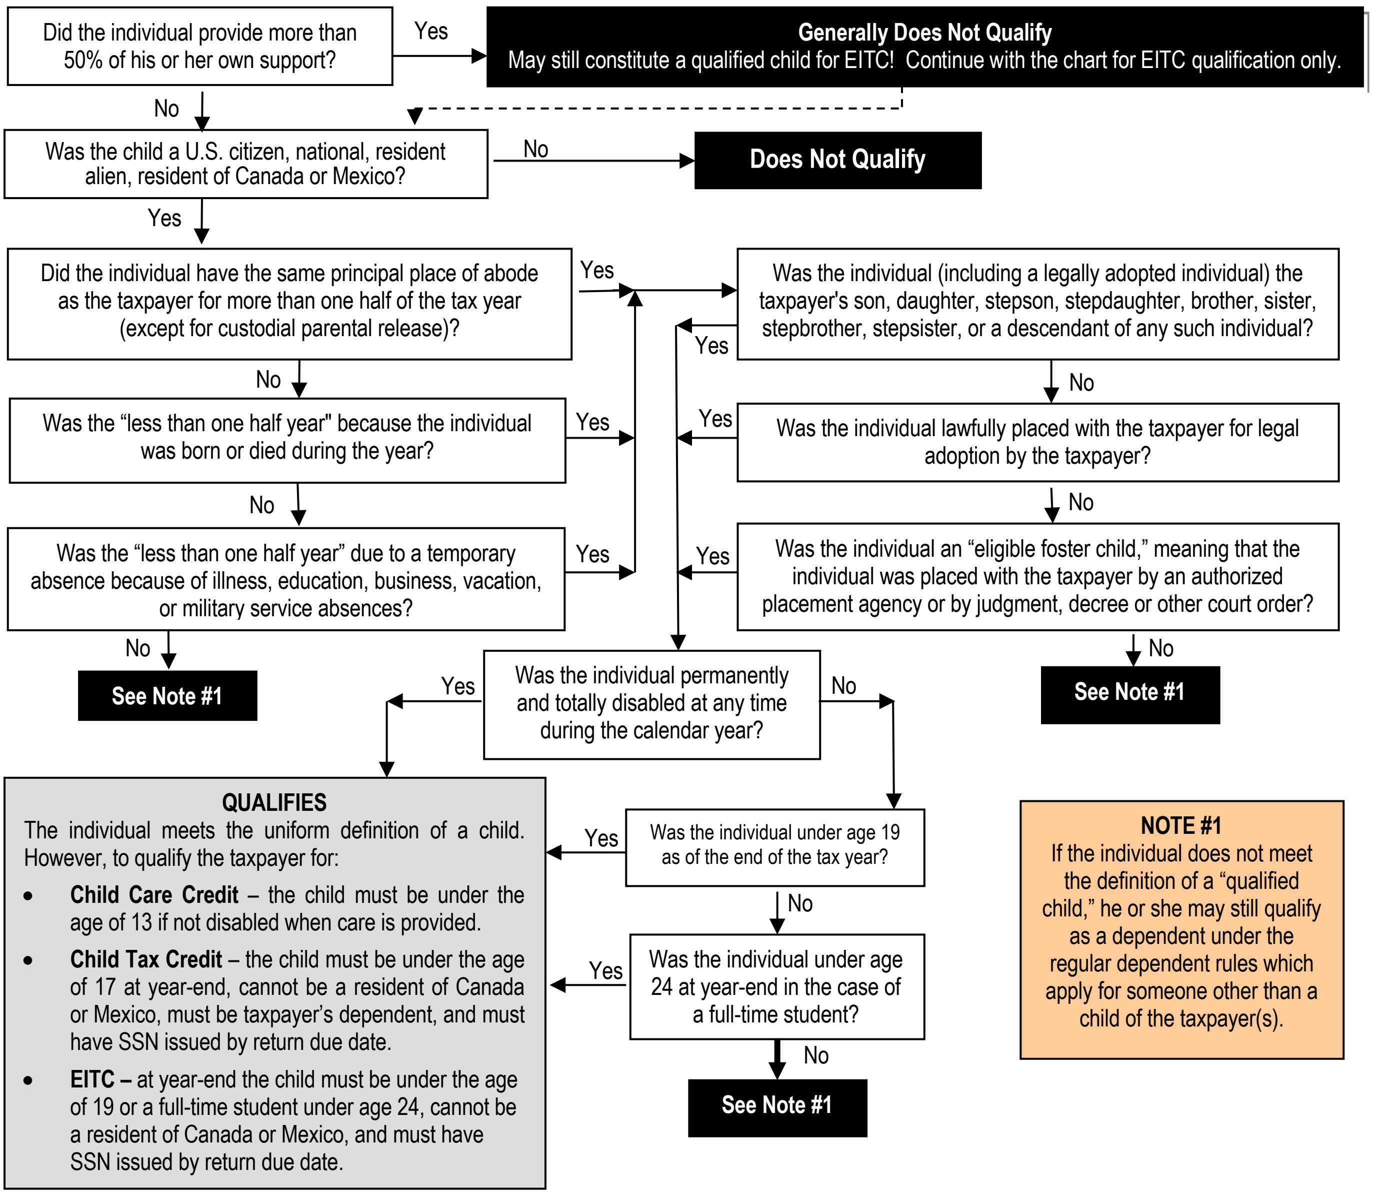
FLOW CHART
QUALIFICATION UNDER THE UNIFORM DEFINITION OF A CHILD

(For a taxpayer (or spouse, if joint) who is not claimed as a dependent by someone else)



TESTS TO BE A QUALIFYING RELATIVE:

1. The person **cannot be a qualifying child** of the taxpayer or anyone else. Notice 2008-5 clarifies that an individual is not a qualifying child of "any other taxpayer" if the individual's parent (or other person with respect to whom the individual is defined as a qualifying child) is not required by section 6012 to file an income tax return and (i) does not file an income tax return, or (ii) files an income tax return solely to obtain a refund of withheld income taxes.

   Example 1 *- Joe supports as members of his household for the taxable year an unrelated friend, Susan, and her 3-year-old child, Marty. Susan has no gross income, is not required to file an income tax return, and does not file an income tax return for the taxable year. Accordingly, because Susan does not have a filing requirement and did not file an income tax return, Marty is not treated as a qualifying child of Susan or any other taxpayer, and Joe may claim both Susan and Marty as his qualifying relatives, based upon the fact that Susan and Marty meet the relationship or* ***member of the household*** *test, provided all other requirements to qualify for the deduction are met.*

Example 2 *- Same facts as Example 1, except that Susan has earned income of $1,500 during the taxable year, had income tax withheld from her wages, and is not required by section 6012 to file an income tax return. With one qualifying child, Susan may claim the earned income tax credit (EITC) for the taxable year. Susan files an income tax return solely to obtain a refund of withheld income taxes and <u>does not claim the EITC.</u> She forgoes the EITC because the tax benefit to Joe by claiming both her and Marty as dependents is greater than what the EITC would be to her. Accordingly, because Susan does not have a filing requirement and filed only to obtain a refund of withheld income taxes, Marty is not a qualifying child of Susan or any other taxpayer, and Joe may claim both Susan and Marty as his qualifying relatives, provided all other requirements to qualify for the deduction are met. Note, however, that Joe does not qualify to use the Head of Household filing status since neither Susan nor Marty are related to him.*

Caution: *If in example #2 Susan had filed an income tax return to obtain the EITC, and not solely to obtain a refund of withheld income taxes, Marty would be the qualifying child of another taxpayer, Susan, and Joe may not claim Marty as a qualifying relative.*

2. The person must either:
   (a) Be related to the taxpayer in one of the ways listed below under *relatives who do not have to live with the taxpayer*, or
   (b) Live with the taxpayer all year as a member of the taxpayer's household.[1]
3. The person's gross income for the year must be less than $4,200 for 2019 ($4,150 for 2018).[2]
4. The taxpayer must provide more than half of the person's total support for the year.[3]

[1] There are exceptions for temporary absences, children who were born or died during the year, children of divorced or separated parents, and kidnapped children.
[2] There is an exception if the person is disabled and has income from a sheltered workshop.
[3] There is an exception for multiple support agreements.

AGE TEST DOES NOT APPLY FOR QUALIFYING RELATIVE!
Unlike a qualifying child, who (unless permanently and totally disabled) must be younger than the person claiming the child, a qualifying relative can be any age because there is no age test for a qualifying relative.

<u>RELATIONSHIP OR MEMBER OF HOUSEHOLD TEST</u>: To meet this test, an individual must live with the taxpayer all year or be related to the taxpayer.

- ***Relative –*** *The following are treated as related persons (Note* - a relationship established by marriage is not ended by death or divorce (Reg § 1.152-2(d)))*:*
  - Taxpayer's child, stepchild, foster child, or a descendant of any of them (for example, a grandchild). A legally adopted child is considered the taxpayer's child.
  - Taxpayer's brother, sister, half brother, half sister, stepbrother, or stepsister.
  - Taxpayer's father, mother, grandparent, or other direct ancestor, but not foster parent.
  - Taxpayer's stepfather or stepmother.
  - Son or daughter of taxpayer's brother or sister.
  - Son or daughter of taxpayer's half brother or half sister.
  - Brother or sister of taxpayer's father or mother.
  - Taxpayer's son-in-law, daughter-in-law, father-in-law, mother-in-law, brother-in-law, or sister-in-law.

- **Unrelated individuals** must live with the taxpayer all year in order to qualify as dependents under this test. But keep the following special rules in mind:
  - ***Temporary absences from home***, such as for school or for care in a nursing home don't count as time living out of the home.
  - An ***unrelated person*** can also qualify under this test in the year of birth or death provided the person lived with the taxpayer at all times (prior to death or after birth).
  - Those ***"foster" relationships*** excluded under the qualifying relative test can qualify under this test.
  - A person will not be counted as a member of the taxpayer's household if the relationship of that person to the taxpayer is in ***violation of local law***.
  - Although cousins, great-nieces/nephews, and wife or husband of uncles or aunts do not qualify under the relationship test, they could all qualify if ***they lived with a taxpayer all year***.
  - Even if eligible to be the taxpayer's dependent, an unrelated person ***cannot qualify*** the taxpayer for the ***Head of Household*** filing status.

Domestic partner as member of taxpayer's household - Unless the domestic partner meets one of the relationship tests, he or she must be a member of the taxpayer's household as defined for "unrelated person" above (***Code Sec. 152(d)(2)(H))*** to qualify as the taxpayer's dependent. The same rule applies with respect to the domestic partner's children. Thus, an unmarried taxpayer couldn't claim as his dependents the children of a woman he lived with, where the woman and her children (who weren't his adopted or foster children) left in the latter part of the year and weren't members of his household for the entire year.

Relationship in violation of local law - Under the member-of-household requirement, an individual qualifies as a dependent if the individual is a member of the taxpayer's household for the entire tax year. However, if at any time during the taxpayer's tax year, the relationship between that individual and the taxpayer "is in violation of local law", the individual won't be considered to be a member of the taxpayer's household. ***Code Sec. 152(f)(3); Reg § 1.152-1(b)*** This day and age it would be extremely rare to encounter such laws.

GROSS INCOME TEST: The ***"dependent's" gross income must generally be less than the personal exemption amount*** in order for an individual to qualify as a dependent. As part of tax reform, the federal deduction for exemptions has been suspended for tax years 2018 through 2025. However, the exemption amount ($4,200 for 2019, $4,150 for 2018) continues to be used elsewhere in the tax code for other purposes, including for the definition of a qualified relative. The amount is subject to inflation adjustment annually.

All ***gross income which is taxed counts towards this test*** (e.g., gross rents before expenses), but exempt amounts such as worker's compensation or gifts are not counted. Social Security benefits are only counted to the extent they are taxable.

Gross income under this test does not include certain income from ***sheltered workshops for permanently and totally disabled individuals***. To be excludable, the income must come from activities that are incidental to medical care during special training and it must be paid by an exempt organization or government agency.

JOINT RETURN TEST: An individual does not qualify as a dependent of another if the individual filed a joint return. However, this rule will not apply if:

a) Neither the "dependent" nor his/her spouse was required to file;
b) Neither the "dependent" nor spouse would have a tax liability if they filed separate returns; and
c) The couple filed only to claim a refund of withholding.

EXAMPLE – Joint Return No EITC – John is 25 years old. He and his 21-year-old wife live with John's parents and had $1,500 of wages from part-time jobs and no other income. Neither John nor his wife is required to file a tax return. They do not have a child. Taxes were taken out of John's pay, so John files a joint return only to get a refund of the withheld income taxes. John's parents are not disqualified from claiming John as a dependent just because he filed a joint return. They can claim John and his wife as dependents if all the other tests to do so are met. If they can claim John as a dependent, John cannot claim the EITC.

EXAMPLE – Joint Return Claiming EITC – The facts are the same as in the previous example except no taxes were taken out of John's pay. Also, John and his wife are not required to file a tax return, but they file a joint return to claim an EITC of $117 and get a refund of that amount. Since they filed a return to get the EITC, they are not filing only to claim a refund of withholding tax. Thus John's parents cannot claim either John or his wife as a dependent.

CITIZENSHIP/RESIDENCE TEST: Under this fourth dependency test, a person must be:

- A ***citizen or resident of the U.S***., ***or***
- A U.S. "national" (e.g., an American Samoan), ***or***
- A resident of Canada or Mexico at some time during the calendar year in which the taxpayer's tax year begins.

Non-resident child & Multiple Support Agreements - A resident alien taxpayer may not claim a dependency for his or her child who is a citizen-resident of a country contiguous to the U.S. where the basis for such a claim is a multiple support agreement between the taxpayer and nonresident aliens not engaged in a trade or business within the U.S. (Rev Rul 82-183, 1982-2 CB 54).

Resident aliens - A person who is not a citizen and is living in the U.S. must have "resident" status, i.e., must not be a visitor. A foreign student participating in an educational exchange program who is placed by the program's organizer in the home of a U.S. taxpayer generally would not be a U.S. resident and would not be eligible to be the taxpayer's dependent. To determine resident status, use the same tests that are used to determine whether an alien is a resident for the purpose of filing his/her own tax return.

Citizen – Generally taxpayers and dependents become U.S. citizens either at birth or after birth by the naturalization process. To become a citizen at birth, the person must:

- Have been born in the United States or certain territories or outlying possessions of the United States, and be subject to the jurisdiction of the United States; OR
- Have had a parent or parents who were citizens at the time of his/her birth (if born abroad) and meet other requirements.

SUPPORT TEST: A taxpayer must provide ***more than half of the cost of a qualified relative's support***. Exceptions to the test include multiple support agreements and children of divorced parents (see more below).

What is "support"? Consider support from all sources, including the "qualified relative's" own funds; compare the total with amounts the taxpayer contributed. Amounts an individual receives for support aren't considered support unless they are actually spent for support. To determine support, consider items like food, lodging, clothing, education, entertainment and travel, childcare, medical care, etc. Worksheet 2 in IRS Publication 501 is useful in determining the support test for dependency.

Support is not limited to necessities, nor does the amount paid for support have to be reasonable or depend on what different parents would spend to support a child. However, one case ruled differently. In ***Flowers, Harriet v. U.S., 52 AFTR 1383,*** the District Court ruled that a boat, rifle and lawn mower were not necessities and could not be included in the support provided by the taxpayer.

Lodging as support - For a qualified relative who lives with the taxpayer, the amount to include for lodging is the "fair rental value" (FRV) of the qualified relative's share of the home, not the actual mortgage payment, repairs, etc. "Fair rental value" generally covers maintenance (so do not add it to support); it might or might not include utilities (include utilities if rent for houses in the local vicinity usually includes the cost of utilities). For a qualified relative that lives in his/her own home, the taxpayer's actual contributions to lodging are support, and the balance of the FRV is considered support provided by the "qualified relative."

> ***EXAMPLE - Qualified Relative's Home Ownership Affects Support*** *- Blair provides $2,500 to support his father, Mr. Doats. Doats lives in his own home, which has a fair rental value (FRV) of $4,200 a year, including an allowance for utilities, furnishings, etc. Mr. Doats actually uses $1,500 from his savings to provide for taxes and upkeep items on his home. His total support is $6,700 ($2,500 provided by Blair and the FRV of the home, $4,200). Since Blair does not provide more than half of his father's support, he is unable to claim his father as his dependent. Note that the $1,500, which Mr. Doats paid for taxes, etc., is not used in the calculation of support because it is taken into account in the FRV of the house.*

The following items are included in support:

a) Certain ***capital expenditures***, e.g., cars and home furnishings. Be careful in determining whether capital items should be included in support. Two examples in ***Rev Rul 77-282, 1977-2 CB 52*** came to different results: (1) a car gifted by a parent to a child was regarded as support provided by the parent versus (2) the cost of a car owned by a parent and used equally by the parent and child, was not considered support provided by the parent (only the operational costs of the child's use and paid by the parent were parental support);

b) ***Incarceration*** - For a person in a state facility due to antisocial behavior, the ***cost of state or agency care*** is support provided by the government;

c) ***Welfare*** is support provided by the government;

d) Support ***does not include Medicare benefits***;

e) ***Tax-exempt income*** such as social security, life insurance proceeds, nontaxable pensions, child support, and interest must be considered if used to provide support.

Timing and calculations - Items are included in the support calculation in the year provided. It does not matter if they are actually paid for later (or earlier). Determine the total amount used for support during the year, and how much was provided by each person (e.g., taxpayer, "qualified relative" himself, other parties, government agencies). If the taxpayer provided more than one half of the total, then he/she can claim the dependency.

Designate support - Where a single taxpayer is helping to support both parents and is having difficulty showing over half of the support for both, it may be appropriate for the taxpayer to designate the support to only one of the parents. This will overcome the 50% dependency support requirement for one of them and possibly allow the taxpayer to qualify as head of household.

To qualify for this break, the taxpayer must maintain a household that constitutes one or both of his parents' principal abode, and at least one of the parents must be the taxpayer's dependent, i.e., must individually have gross taxable income for the year of less than the personal exemption amount (or for years 2018-2025 what that amount would be if the exemption deduction wasn't suspended by the TCJA, e.g., $4,200 for 2019) and receive over half of his or her support from the taxpayer. The taxpayer himself need not reside in the household he or she maintains for the parents. The home could even be a retirement home or facility.

To accomplish this, the taxpayer must be able to provide proof that the support is for one of the parents only. Otherwise, the support will be designated as a "fund" equally allocated to both. The IRS suggests a notation on a check as an acceptable designation procedure. It says, "Notations by the maker on support checks purporting to allocate funds to particular household members made payable to an individual having custody of a claimed dependent, will be regarded as evidence of actual support." ***(Rev Rul 72-591, 1972-2 CB 84)***

Multiple support agreements - When several people together provide over 50% of support, all that provide ***MORE THAN 10%*** of the support can agree about which of them will claim the dependent. Of course, the agreeing parties must also otherwise qualify to claim the dependent. The taxpayer claiming the qualifying relative's dependency under this provision needs to attach a completed IRS Form 2120 to his/her return listing each other eligible person who paid over 10% of the support and obtain from each one a signed statement waiving their right to claim the dependency. The statement must include the calendar year the waiver applies to, the name of the qualifying relative for whom the support was provided, and the name, address and Social Security number of the person waiving the dependency. The person claiming the dependency is to retain the signed statement(s) in case the IRS later requests them; they are not to be attached to the tax return.

EXAMPLE - Meeting the Support Test - *Hal and Betty Norman and their young child lived in a rented home near Phoenix, AZ. Their monthly rent was $1,000, which included the cost of gas and electricity. Hal's parents, Woody and Cyd, were retired and also lived with the Normans. Woody received social security income of $8,400 ($4,000 was spent on Woody's support, $3,500 on Cyd's, and the remainder was deposited in savings). Woody and Cyd received no other income for the tax year.*

Hal and Betty paid $7,500 for food. They also paid $1,500 to Dr. Akida for Cyd's dental expenses. In addition, Hal and Betty paid the total cost ($1,200) of a week's vacation in New Mexico for the whole family (including Woody and Cyd). Computation of Woody and Cyd's total support:

Support Item	***Woody***	***H&B***	***Cyd***	***H&B***
Lodging ($12,000/5)……………………………	*$2,400 **	*$2,400*	*$2,400 **	*$2,400*
Social security………………………………………	*4,000*		*3,500*	
Food ($7,500/5)…………………………………..	*1,500 **	*1,500*	*1,500 **	*1,500*
Dental…………………………………………………			*1,500 **	*1,500*
Vacations ($1,200/5)……………………………..	*240 **	*240*	*240 **	*240*
Total	*$8,140*	*$4,140*	*$9,140*	*$5,640*
** Amounts provided by Hal and Betty.*		*>50%*		*>50%*

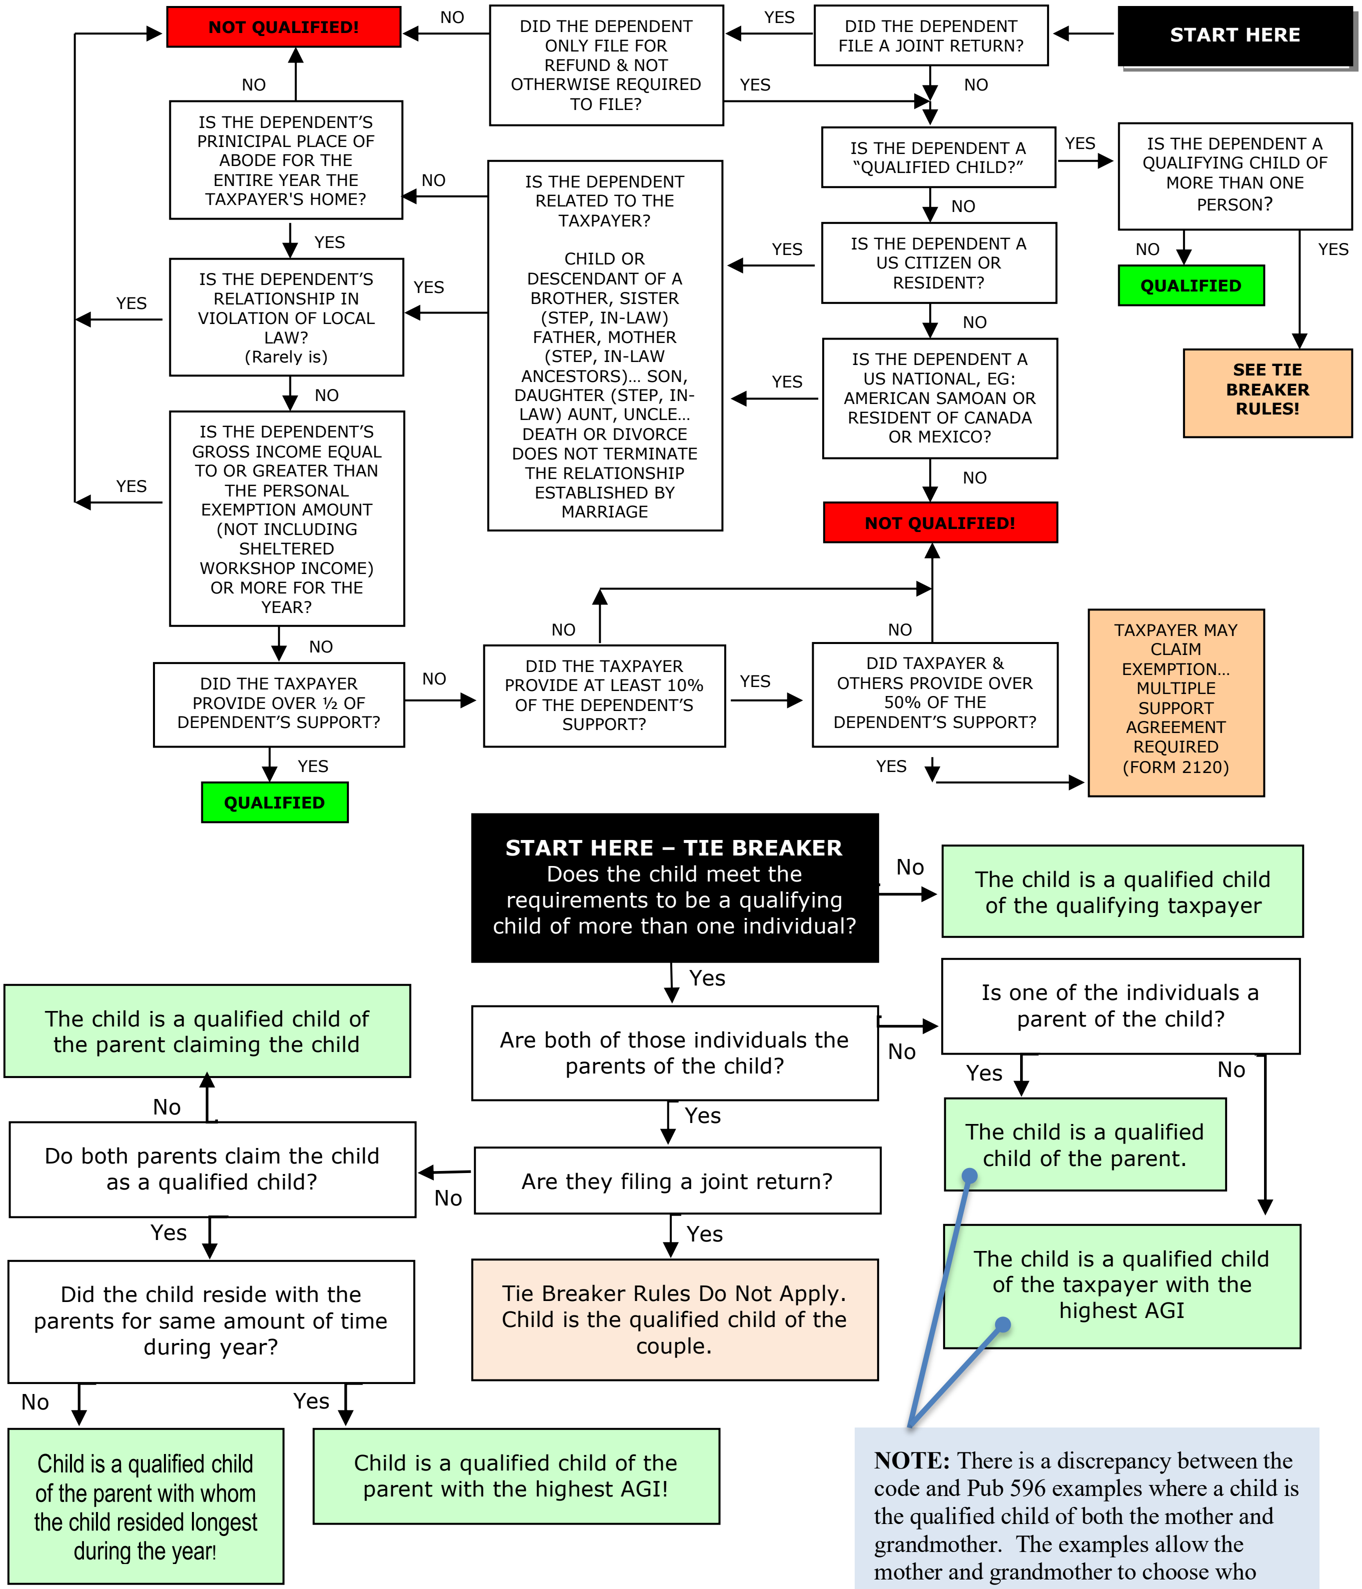
Hal and Betty may claim Cyd as their dependent because they contributed over half of her support ($5,640 of $9,140). They may also claim Woody as their dependent because they contributed $4,140 (over half of Woody's total support of $8,140).

California conforms to Federal law for the determination of dependency. California allows a nonrefundable credit for the taxpayer, spouse and each dependent. See Chapter 1.03 for the amounts.

Dependent determination chart on next page

NOTES

DEPENDENT DETERMINATION CHART



NOTE: There is a discrepancy between the code and Pub 596 examples where a child is the qualified child of both the mother and grandmother. The examples allow the mother and grandmother to choose who claims the child where the mother's AGI is less than the grandmother's AGI. The decision tree follows the specific wording of the code.

DEPENDENCY WORKSHEET – TAX YEAR 2019

Taxpayer's Name:____________________________

Complete a separate worksheet for each person the taxpayer (T/P) is trying to establish as a dependent. The person must be either a "Qualifying Child" or a "Qualifying Relative" to be a dependent. Refer to Notes *for definitions and exceptions and additional instructions.*

PART I – **QUALIFYING CHILD** - Answer the following questions to determine if the T/P has a ***qualifying child*** who is a dependent:

1. If any of the following individuals **lived with the T/P for more than half of 2019**[(1), (6)], check the applicable box:
   a. ☐ Son, daughter, or stepchild
   b. ☐ Foster child placed with the T/P by an authorized placement agency or by judgment, decree or other court order.
   c. ☐ Brother, sister, stepbrother, or stepsister.
   d. ☐ Descendant of any of those listed in a, b or c above.
   e. If 1a, 1b, 1c, or 1d is checked, enter the individual's name and continue:____

2. Is the individual named on 1e, younger than the taxpayer? ☐ Yes *(continue to item 3)* ☐ No – *not a qualifying child, but complete Part II to see if the individual is a "qualifying relative"*

3. The individual named on line 1e was:
   a. ☐ Under age 19 at the end of 2019, **or**
   b. ☐ Under age 24 at the end of 2019 and a student [(2)], **or**
   c. ☐ Any age and permanently and totally disabled [(3)].

If box 3a, 3b or 3c was marked, the individual is a "qualifying child" – continue. If none of the item 3 boxes were checked, the individual cannot be a "qualifying child" – do not complete the rest of Part I (but complete PART II to see if the individual can be a "qualifying relative").

4. Did the individual named on line 1e provide over half of his or her own support in 2019?
   ☐Yes - *this person cannot be the T/P's dependent*
   ☐No - *this individual is a qualifying child [(4)]; continue to item 5 (to determine if the T/P can claim the qualifying child as a dependent).*

5. Was the child a U.S. citizen, U.S. National or a resident of the U.S., Canada or Mexico? (Or if the T/P is a U.S. citizen or U.S. National and the child is adopted, did the adopted child live with the T/P all year as a member of the T/P's household?)
   ☐Yes – *continue* ☐No – *does not qualify as a dependent*

6. Was the child married [(5)]? ☐Yes – *does not qualify as a dependent (but see Notes before answering)* ☐No – *continue*

7. Can T/P (or spouse if filing married joint) be claimed as a dependent on someone else's 2019 return?
   ☐Yes – *child does not qualify as a dependent* ☐No – *child qualifies as a dependent*

PART II – QUALIFYING RELATIVE - Answer the following questions to determine if the T/P has a qualifying relative who is a dependent (someone other than the qualifying child from PART I).

8. The individual is the T/P's:
   a. ☐ Son, daughter, stepchild, foster child (defined the same as at 1b) or descendant of any of these.
   b. ☐ Brother, sister, son or daughter of either (i.e., T/P's nephew or niece).
   c. ☐ Father, mother, ancestor or sibling of either (i.e., grandparent, aunt or uncle).
   d. ☐ Step -brother, -sister, -father, -mother; son-in-law, daughter-in-law, father-in-law, mother-in-law, brother-in-law or sister-in-law.
   e. ☐ Any other person (non-spouse) who lived *all year* as a member of T/P's household, if the relationship doesn't violate local law.
   f. If 8a, 8b, 8c, 8d or 8e is checked, enter individual's name and continue: ____

9. Did the person named on 8f have gross income less than $4,200 in 2019? ☐ No – *stop – not qualified* ☐ Yes – *continue*

10. Did the T/P provide over half of the support in 2019 for the individual named on line 8f?
    ☐ No – *stop – not qualified* ☐ Yes – *continue*

11. Was the person named in line 8f a U.S. citizen, U.S. National or a resident of the U.S., Canada or Mexico?
    ☐ No – *stop – not qualified* ☐ Yes – *continue*

12. Was the person named on line 8f married[5]? ☐ Yes *(but see Notes before answering)* ☐ No – *continue*

13. Can the T/P (or spouse if filing married joint) be claimed as a dependent on someone else's 2019 return?
    ☐ Yes – *individual on line 8f is not qualified as a dependent* ☐No – *qualifies as a dependent*

Notes – Dependency Worksheet – Tax Year 2019

(1) **Exception to time lived with T/P**: If a person was born or died in 2019 and the T/P's home was this person's home for the entire time alive, he or she is considered to have lived all year with the T/P. Temporary absences for school, vacation, medical care, military service or detention in a juvenile facility count as time lived with the T/P.

(2) **Student** is defined as someone enrolled full-time during any part of 5 calendar months in 2019 at a school, including a technical, trade or mechanical school, but not an on-the-job training course, correspondence or Internet school. A full-time on-farm training course given by a school or government agency qualifies.

(3) **Permanently and totally disabled**: In 2019, the person couldn't engage in any substantial gainful activity due to a mental or physical condition that a doctor has determined (a) lasted or can be expected to last continuously for at least a year, or (b) can be expected to lead to death.

(4) **Tie-breaker rules:** (If the child is the **qualifying child of more than 1 person**, only 1 person may claim the child for dependency, child tax credit, Head of Household filing status, credit for child and dependent care and earned income credit.) These rules apply if 2 or more taxpayers may claim an individual. Tie-breaking rules are as follows:

- If only one of the persons is the child's parent, the child will be treated as the qualifying child of the parent.
- If two of the persons are the child's parents, the child will be treated as the qualifying child of the parent with whom the child lived for the longer period of time in 2019. If the child lived with each parent for the same amount of time, the child will be treated as the qualifying child of the parent who had the higher adjusted gross income (AGI) for 2019.
- If the child could be, but is not, claimed by either parent, the child will be treated as the qualifying child of another person only if that person's AGI is higher than the highest AGI of any parent of the child.

(5) If the person is **married** and does not file a joint return, answer "NO." If the person is married and files a joint return only as a claim for refund and no tax liability would exist for either spouse if they had filed separate returns, answer "NO." If neither exception applies, the dependency is not allowed.

(6) **Rules for Children of Divorced or Separated Parents**: A child will be treated as a qualifying child or qualifying relative of his or her noncustodial parent (the parent with whom the child lived for the lesser part of 2019) if all of the following apply.

1. The parents are divorced, legally separated, separated under a written separation agreement, or lived apart at all times during the last 6 months of 2019.
2. The child received over half of his or her support for 2019 from the parents (without regard to the rules on Multiple Support Agreements).
3. The child is in the custody of one or both of the parents for more than half of 2019.
4. The custodial parent signs Form 8332 (or a substantially similar statement) that he or she will not claim the child as a dependent for 2019. Pertinent pages from divorce decree or separation agreement may not be substituted for Form 8332 (or similar statement).

If the rules above apply and this child would otherwise be the qualifying child of more than one person:

- Only the non-custodial parent can claim the child for purposes of the child tax credits.
- For head of household filing status, the credit for child and dependent care expenses, and the earned income tax credit (EITC), only one person can claim these three benefits. No other person can claim any of these three benefits unless he or she has a different qualifying child.

If more than one person can claim the child as a qualifying child, see Note 4 above.

FILING STATUS & DEPENDENT CASE STUDIES

Overview

Some of the most complicated issues in tax preparation revolve around filing status and dependency issues. This lesson combines the issues of some uncommon filing circumstances with those of claiming dependency in a series of case studies that apply to both the filing status qualifications and dependency qualifications. In addition, the case studies occasionally mention the impact on other tax issues such as child tax credit and EITC. Use the Rapid Finder below to locate case studies of interest.

RAPID FINDER

CASE STUDY #1: Unmarried Couple, One With No Income - Al and Janice, both U.S. Citizens lived together for the entire year but are not married to each other. Janice has no income for the year, and Al provided her entire support for the year.

Dependency Janice – For Al to claim Janice as a dependent she would have to meet the five qualifying relative tests. The first test is the **relationship or member of the household test**. She is not related to him, but she was a member of the household for the entire year, so she meets that test. The next test is the **gross income test**, which she passes since she has no income. Since he provides over half of her **support** and she is an **unmarried U.S. Citizen**, he can claim her as his dependent.

Filing Status Al – Al cannot file as head of household (HH) because the individual qualifying him for HH must be related to him. So even though Janice qualifies as his dependent, she is not a qualifying person for purposes of the HH filing status. Thus he must file as single.

CASE STUDY #2: Unmarried Couple, Both Employed - Al and Janice, both U.S. Citizens lived together for the entire year (2019), but are not married to each other. Al provided over half her support. Janice was employed and had earnings in excess of the personal exemption amount for the year.

Exemption Janice – Because Janice's earnings were in excess of the personal exemption amount, she fails the **gross income test**, and therefore cannot be claimed as a dependent of Al.

Filing Status Janice – If Janice's earnings exceed the standard deduction for a single person, she is required to file her own return and would file as single. Even if Janice had no filing requirement, she may want to file to recover withholding. (For years prior to 2018, the personal exemption allowance amount is added to the standard deduction when determining if there's a filing requirement based on gross income. With the exemption deduction suspended starting in 2018, only the standard deduction amount is used for the filing requirement test.)

Filing Status Al – Al cannot file as head of household (HH) because Janice is not a qualified individual (qualifying child or dependent relative) for purposes of HH. Thus he must file as **single**.

CASE STUDY #3: Unmarried Couple, With Minor Child - Al and Janice, both U.S. Citizens, have lived together for the entire year. They are not married to each other. They have a minor child, Susan, who lived with them the entire year. Al is employed, but Janice is not and she has no income.

Dependency Janice – Janice meets the **member of the household** and the **other four dependency tests**, so Al can claim her as a dependent.

Dependency Susan – Susan, Al's daughter meets all of the tests for a **qualified child** (principal place of abode, relationship and age). Thus Susan qualifies as Al's dependent.

Filing Status Al – Although Janice is not a qualifying individual for purposes of the head of household (HH) filing status, Susan is, since she is Al's qualifying child, and Al's filing status for the year will be **Head of Household**.

CASE STUDY #4: Unmarried Couple, Each with Minor Child - Al and Janice, both U.S. Citizens, have lived together for the entire year but are not married to each other. They each have a minor child by a previous relationship: Bob is Al's son and Susan is Janice's daughter. Both of the children have lived with Al and Janice the entire year. Both Al and Janice are employed and share the household expenses.

Dependency Bob – Since Bob meets the age, residency and relationship tests with Al, he is a qualifying child of Al's and thus a dependent of Al.

Dependency Susan – Since Susan meets the age, residency and relationship tests with Janice, she is a qualifying child and thus a dependent of Janice.

Filing Status Al & Janice – Since Al and Janice are not married they cannot file a joint return. Both Al and Janice have a qualified person (their respective children) for purposes of filing as head of household. However, there are two issues that come into play regarding HH:

(1) The HH rules specify that a taxpayer must pay over half the costs of maintaining as his or her home a household which is the principal place of abode for more than one-half the year for a qualified person. With Al and Janice sharing the household expenses, the issue is who paid over half of the costs?

(2) The IRS also contends that there can only be one HH in a single home, unless there is a certain amount of divisibility of quarters (TC Memo 1974-137)

Thus, either Al or Janice will file HH and the other will file as single.

Other Issues: Each, if they otherwise meet the requirements would qualify for child credit, EITC and child care credit. They would each be a separate tax family for purposes of the ACA.

CASE STUDY #5: Married Couple, Separated With Minor Child - Married Couple, Al and Janice, have a minor daughter Susan. They separate and Al moves out on May 5th. Susan continues to live with her mother Janice who pays more than one-half of the cost of maintaining the household, which is the principal place of abode for more than one-half the year for Susan.

Dependency Susan – Susan is the qualified child of the couple and continues to reside with Janice, making Janice the custodial parent and entitled to claim Susan as her dependent unless she releases Susan's dependency to Al using Form 8332.

Filing Status Janice – When married individuals file they must file using the married joint or married separate status. An exception to that rule applies for an individual who lived apart from his or her spouse for the last six months of the year and pays more than one-half of the cost of maintaining as his or her home a household which is the principal place of abode for more than one-half the year of a child, stepchild or eligible foster child for whom the taxpayer may claim the dependency. An individual meeting this exception may use the HH status. (A nondependent child may be the HH qualifier only if the custodial parent gave written consent to allow the dependency to the non-custodial parent.) Thus, Janice qualifies for the Head of Household filing status.

Filing Status Al – Since Al is married he must file as married filing separately.

> **Variation: Each Has Minor Child** - However, if Al had another qualifying child who lived with him after the separation, and Al pays more than one-half of the cost of maintaining as his home a household which is the principal place of abode for more than one-half the year for that child, Al would also qualify for the Head of Household filing status.

Other Issues: If Janice otherwise meets the requirements, Janice would qualify for the child credit, EITC and child care credit. The same would apply to Al in the variation.

CASE STUDY #6: Non-Resident Alien Spouse - Married Couple, Al and Janice, with no children. Al is a U.S. Citizen (or a resident alien) and Janice is a non-resident alien spouse residing abroad.

Filing Status Janice – Since Janice is a non-resident alien she does not have a U.S. filing requirement, unless she elects to file a joint return with Al as discussed under Al's filing options below.

Filing Status Al – Since Al is married, he must either file jointly with Janice or file as married separate. Al has the following filing options:

- **Married separate**, or
- **Married Joint**. However to file married joint he and Janice must make a joint election to treat Janice as a resident alien (Code Sec. 6013(g)(1)). In so doing, both spouses must agree to subject their worldwide income for the taxable year to U.S. taxation (Code Sec. 6013(g); Code Sec. 6013(h)). One party must have been, at the close of the taxable year for which the election was made, a nonresident alien individual married to a citizen or resident of the United States (Code Sec. 6013(g)(2)). An ITIN will be required for Janice (Form W-7).

Variation: U.S. Citizen Passes Away – Al is a U.S. Citizen married to a non-resident alien. Al passes away during the year. The filing options for Al in his year of death are the same as if he were alive. However, the executor for Al's estate is the one that acts on Al's behalf, and if the executor and Janice both agree, she and Al can file married filing jointly and include their worldwide income. The other option is married filing separately.

CASE STUDY #7: Non-Resident Alien Spouse & Alien Child - Married Couple, Al and Janice. Al is a resident alien and Janice is a non-resident alien spouse residing in Italy with their non-U.S. citizen daughter, Susan.

Filing Status Janice – Since Janice is a non-resident alien she does not have a U.S. Filing requirement, unless she elects to file a joint return with Al as discussed under Al's filing options below.

Filing Status Al – A resident alien has the same filing requirements as a U.S. citizen. Since Al is married, he must either file jointly with Janice or file as married separate. Al has the following filing options:

- **Married separate**, or
- **Married Joint**. However to file married joint he and Janice must make a joint election to treat Janice as a resident alien (Code Sec. 6013(g)(1)). In so doing, both spouses must agree to subject their worldwide income for the taxable year to U.S. taxation (Code Sec. 6013(g); Code Sec. 6013(h)). One party must have been, at the close of the taxable year for which the election was made, a nonresident alien individual married to a citizen or resident of the United States (Code Sec. 6013(g)(2)). An ITIN will be required for Janice (Form W-7).

Dependency Susan – In order for Al to claim Susan as a dependent, she would need to be a qualifying relative or a qualified child. To be a **qualified child**, Susan must meet the residency test. To satisfy the residency test, the child must have the same principal place of abode as the taxpayer for more than one half of the tax year (Sec 152(c)(1)(B)). Therefore Susan is not a qualified child of Al.

To be a **qualifying relative** she must meet the five qualifying relative tests and not be a qualifying child. Assuming Susan meets the relationship, the gross income test, the support test and the joint return test, she would still fail the citizenship or resident of the U.S test since she is not a U.S. Citizen, U.S. resident or a resident of Canada or Mexico. Thus Susan is not a qualifying relative, and Al cannot claim her as a dependent.

Variation: Child is U.S. Citizen - Even if Susan were a U.S. Citizen, she would still not be a qualified child of Al's, since she does not meet the residency test. However, she could be Al's dependent if she meets the qualifying relative test. The qualifying relative test requires Susan to be related or a member of the household. She meets the related test. She also needs to meet the citizenship or residence test, which she passes since she is a citizen. If she also satisfies the gross income test, joint return test and Al provides over half of her support, she would qualify as Al's dependent.

CASE STUDY #8: Self-Supporting Qualified Child - Susan is the 21 year-old daughter of Al and Janice. Her sources of funds for support include distributions from a Sec 529 plan funded by her parents (Al & Janice), a part-time job and student loans.

Generally, a child is a qualifying child of a taxpayer if the child satisfies each of three tests: a residency test, a relationship test, and an age test (Code Sec. 152(c)). However, a self-supporting child (one that provides over one half of his or her own support) is not a qualifying child of another taxpayer (Code Sec. 152(c)(1)(D)).

In determining whether Susan is self-supporting, in addition to the usual accounting of support, a major question is whether the Sec 529 plan counts as support provided by Susan or her parents. Contributions to Sec 529 plans are completed gifts (Sec. 529(c)(2)) and any non-qualified distributions from the 529 plan would be taxable to Susan, supporting the premise the distributions from the Sec 529 plan are support Susan provided. The argument could also be made that because the account owner controls whether a distribution is made and the amount of the distribution, and can even withdraw funds for him or herself, the distribution from a QTP should be considered provided by the account owner for purposes of the support test. The IRS has provided no guidance on this issue.

At stake here, in addition to Susan's dependency, is who gets the education credits. If Susan were self-supporting, then she would get the education credits on her return. This would be desirable where her parents' income phases out the credit, and especially in the case of the American Opportunity Credit, where a portion is refundable.

CASE STUDY #9: Single Parent With Child Away At College - Janice is a single parent with her 21-year-old daughter, Susan, a full-time student attending a university out of state. Janice provides over half of Susan's support in the form of tuition, room and board and expenses.

Dependency Susan – Susan meets the requirements of a qualified child since she is under the age of 24, a full time student and is not self-supporting. Thus Janice will claim Susan as a dependent.

Filing Status Janice – For Janice to claim Head of Household, she must pay over half the cost of maintaining her home, which is the principal place of abode for more than one-half the year for Susan. Susan being away at college is considered a temporary absence and does not change Susan's place of abode for tax purposes; thus Janice can claim the Head of Household filing status.

Other Issues - Since Janice is claiming the dependency she would also be the taxpayer claiming the education tax credits.

CASE STUDY #10: Daughter and Daughter's Child living with Daughter's Mother - Susan, Janice's daughter, and her minor child Whitney, age 4, have lived with Janice the entire year. Susan is age 22, unmarried, not a full-time student and has no income.

Dependency Susan –As a 22-year-old who is not a student, Susan does not meet the requirements of a qualified child. She would have to be under the age of 19 to be a qualified child. However, Susan does meet the requirements of a qualifying relative since she meets the relationship test, gross income test, joint return test, citizenship test and support test and therefore is a dependent of Janice.

Variation: Child's Income in Excess of Exemption Amount - However, if Susan had income in excess of the personal exemption amount for the year she would not be a qualified relative.

Dependency Whitney – Whitney meets the principal place of abode test, age test, and gross income test and therefore is a qualifying child of both her mother, Susan, and her grandmother, Janice. Thus, either Susan or Janice can claim the dependency for Whitney and they can decide between themselves who will claim Whitney. In this circumstance since Susan is not filing, Janice will claim Whitney's dependency.

Variation: Mother & Grandmother Claim Child - If Susan had to file a return and Whitney was the qualifying child of both Susan and Janice, they could still decide who would claim Whitney's dependency. If they could not agree, or if both actually claimed Whitney as a dependent, the tie-breaking rules would apply. The tie-breaker rules specify that in the case where a parent and another relative claim or could claim a qualified child, the dependency defaults to the parent. Therefore, Susan would be entitled to claim Whitney's dependency.

Filing Status Janice– For Janice to claim Head of Household, she must pay over half the cost of maintaining her home, which is the principal place of abode for more than one-half the year for a qualified child or a dependent relative. Janice can claim Head of Household since she has a qualifying individual, either Susan or Whitney.

Other Issues – Since Janice is claiming Whitney, who is under age 17, and meets the relationship test, member of the household test, is not self supporting and is claimed as Janice's dependent, Janice can claim the child tax credit for Whitney subject to the AGI phase-out. Janice can also claim EITC subject to disqualifying income limits and AGI phase-out provided she has earned income. Since Janice is claiming both Susan and Whitney she is also subject to the ACA penalty for not being insured if Susan and Whitney do not have qualified insurance. (This penalty does not apply to years after 2018.)

CASE STUDY #11: Divorced Parents, Court Awards Dependency - Al and Janice are divorced and have a minor child, Susan. Janice is the custodial parent, but the family court judge specified in the divorce decree that Al should be able to claim Susan as a dependent.

Dependency Susan – Tax law specifies that the custodial parent is the one that can claim the dependency for the child. A divorce court judge cannot override federal tax law. The IRS also will not accept a state court's allocation of dependency because IRC Sections 151 and 152, not state law, determine who may claim a child's dependency for federal income tax purposes. Unless Janice completes a Form 8332 (or other form conforming to TCJA), releasing Susan's dependency to Al, Janice is the one entitled to claim Susan as a dependent.

Other Issues:

Child Credit – To claim the child credit, the child must have lived with the taxpayer over half the year and be claimed as the taxpayer's dependent. However, when the custodial parent releases the dependency to the non-custodial parent they also release the right to claim the child credit to the non-custodial parent. (Code Sec. 152(e)) Thus, if Janice releases the dependency to Al, if otherwise qualified, he would be the one to claim the child credit.

Earned Income Tax Credit (EITC) – Unlike the child credit, the EITC does not include the requirement for the child to be the taxpayer's dependent. However, it does include the requirement that the qualifying child, except for temporary absences, reside with the taxpayer over half the year. Thus in this case even if Janice releases the dependency to Al, she is the one that can claim EITC if she otherwise qualifies.

Child Care Credit – Like the EITC, there is no requirement for the child to be the taxpayer's dependent. In the case of a child of divorced or separated parents, only the custodial parent may claim the credit, even if the non-custodial parent may claim the dependency for that child under Code Sec. 152(e). Regulations define a custodial parent as the parent with whom a child shares the same principal place of abode for the greater portion of the calendar year. *(Reg. Sec. 1.21-1(b)(5)(ii))* Thus in this case Janice would be the only one able to claim the childcare credit even if Al incurred some work related childcare expenses during the periods he had custody.

CASE STUDY #12: Divorced Parents, Joint Custody - Al and Janice are divorced and have a child, Susan, age 12. The divorce decree specifies that Al and Janice have **joint custody** of Susan.

Dependency Susan – The qualified child rules specify that the child must have the same principal residence as the taxpayer for more than one half of the year. It may be difficult and argumentative to determine which parent had custody the longer period during the year. However, for a practical matter, either parent can claim Susan, but not both. So a problem arises if they both attempt to claim Susan, in which case the qualified child rules specify **if more than one parent claims the child** as a qualifying child and the parents don't file a joint return together, the child is treated as the qualifying child of:

(a) the parent with whom the child resided for the longer period of time during the tax year, or

(b) if the child resides with both parents for the same amount of time during the tax year, the parent with the higher adjusted gross income. (Code Sec. 152(c)(4)(B)(ii)).

For purposes of determining who had custody for the greater portion of the year, custody for a specific day is determined by where a child slept that night (there are some elaborate rules relating to determining where a child slept that are included in Chapter 1.02). Any rational individual understands it is virtually impossible for a child to reside with both parents equally. But try telling that to some divorced parents. Remember that someone else is preparing the other parent's return and making the same decisions as you.

Filing Status Parents – For either of the parents to qualify for head of household (HH) filing status they would have to pay for more than one-half of the cost of maintaining as his or her home a household which is the principal place of abode for more than one-half the year for a qualified person. A qualified person generally includes a qualified child (in this case Susan). So the HH goes to the one that actually did have physical custody for over half the year. Here again, in joint custody cases, where both parents believe they had the child over half the year, they both may attempt to file as HH.

Other Issues – Child credit, EITC, and childcare credit can only be claimed by the parent who had custody for the greater portion of the year.

CASE STUDY #13: Permanently and Totally Disabled Older Child - Janice is unmarried and her permanently and totally disabled unmarried child Susan, age 33, lives with her; Janice takes care of Susan.

Dependency Susan – To meet the qualified child tests, the child must meet four tests: principal place of abode, joint return, relationship and age test. Susan clearly meets all but the age test, which she would normally fail because she is older than 18, and not a full time student under the age of 24. However, the age requirement is waived when a child is permanently and totally disabled. Thus, Susan is Janice's qualified child and Janice can take her as a dependent.

Other Issues:

Child Credit: Even though the qualified child age requirements are waived for a permanently disabled child, the child credit age 17 requirements continue to apply, so Janice does not qualify for a child credit.

Earned Income Tax Credit (EITC): For purposes of the EITC, a qualifying child is the same definition as under the rules that apply to the dependency. Thus Susan is a qualified child for EITC, and therefore, if Janice otherwise qualifies she can claim EITC based on one child.

Child & Dependent Care: Generally this credit is thought of as allowed only for children under the age of 13. However, if otherwise qualified, a taxpayer can claim it for the care of a spouse or dependent who is physically or mentally unable to care for themselves if they live with the taxpayer more than half of the year.

Variation: Older Child Only Temporarily Disabled - Suppose Susan was only temporally disabled (not permanently) as a result of an accident or medical condition and had W-2 income of $10,000. Thus she would not be a qualified child because of her age and neither would she be Janice's qualifying relative because her income exceeds the personal exemption amount. However, if Susan would have been Janice's dependent except for failing the gross income test, Susan would have been what is referred to as a medical dependent, and although Janice cannot claim Susan as a dependent, she can deduct any medical expenses she pays for Susan's care, and if she otherwise qualifies, except for the gross income, she can also claim the child and dependent care credit.

CASE STUDY #14: Parent Living with Adult Child - Susan is a single adult taxpayer. Her mother, Janice, lives with her in Susan's home. Janice is a single, U.S. citizen, age 70, and receives $15,000 per year in Social Security benefits (SS).

Dependency Janice: In order for Janice to be claimed as Susan's dependent the five dependency tests must be met. Since she lives with Susan, she meets the relationship-member of the household test. She also meets the gross income test, since that only applies to taxable income and her SS is not taxable. She also meets the citizenship and joint return tests. So the issue here is whether or not Janice provides over half of her mother's support.

Consider support from all sources, including the "dependent's" own funds; compare the total with amounts the taxpayer contributed. Amounts an individual receives for support aren't considered support unless they are actually spent for support, so if Janice saved part of her SS benefits, the amount saved would not be counted towards her own support.

For a dependent who lives with the taxpayer, the amount to include for lodging is the "fair rental value" (FRV) of the dependent's share of the home, not the actual mortgage payment, repairs, etc. FRV generally covers maintenance (so do not add it to support); it might or might not include utilities (include utilities if rent for houses in the local vicinity usually includes the cost of utilities).

Filing Status Susan: The next question is whether Susan files as single or head of household (HH). To file as HH Susan must pay more than one-half of the cost of maintaining as her home a household, which is the principal place of abode for more than one-half the year for a qualified person. A qualified person generally includes a qualified child or a relative the taxpayer may claim as a dependent. So, if Susan is able to claim her mother (meet the support test) then she is also qualified to file as head of household.

CASE STUDY #15: Parent Supported by Adult Child – Susan helps to support her elderly, U.S. citizen (or resident alien), married parents, Al and Janice, who do not reside with Susan. Al and Janice have a combined Social Security (SS) income of $20,000, which is their only income.

Dependency Al and Janice: To claim either or both of her parents as dependents, they must meet the five qualified relative tests. Since they meet the relationship test they don't need to live with Susan. Their only income is the SS income (all nontaxable), so they are not required to file a return and thus meet the joint return test. They also meet the gross income test because the gross income test only counts taxable income, and if their income was just the $20,000 of SS, it would not be taxable. Since they also meet the citizenship test the only issue is, does Susan pay over 50% of her parents' support?

Consider support from all sources, including the "dependent's" own funds; compare the total with amounts the taxpayer contributed. Amounts an individual receives for support aren't considered support unless they are actually spent for support, so if Al and Janice saved part of their SS benefits, the amount saved would not be counted towards their own support.

Variation: Designate Support - If Susan's support for dependency purposes is insufficient to meet the 50% requirements for both parents, she can designate her support payments to only one of her parents. To accomplish this, she must be able to provide proof that the support is for one of the parents only. Otherwise, the support will be designated as a "fund" equally allocated to both. The IRS suggests a notation on a check as an acceptable designation procedure.

Variation: Care Facility - Suppose one or both of Susan's parents are in a rest home. Where they reside makes no difference in the support calculation, so they could be living in their own home, a rental or a care facility. Note also, that if Susan made support payments directly to the care facility and her parents qualify as her dependent, she would be able to deduct the care facility payments, if they qualify, as a medical expense.

Variation: Multiple Support - If Susan and others, such as siblings, all chip in to support Al and Janice, and the combined support exceeds 50% of the total support, all the individuals who provide over 10% can agree upon which one of them claims the dependents by filing the Form 2120 multiple support agreement. Where the group is supporting both parents, two Forms 2120 can be filed permitting two of the contributors to an exemption. Careful consideration should be given to who claims the dependent(s). The two issues to consider are high-income exemption phase-out (for years before 2018) and the current medical deduction floor.

Filing Status Susan: Does Susan file single or head of household? To file as head of household, Susan would have to pay more than half the cost of maintaining a separate household that was the main home for her dependent parent for the entire year. The fact that Susan can claim one or both of her parents as dependents does not necessarily mean she paid more than half the cost of maintaining a separate household for a dependent parent. An accounting will need to be done to determine if Susan provided more than half the cost of maintaining her parents' home.

CASE STUDY #16: Qualified Widow with Dependent Child – Al and Janice were married but Al passed away in 2019. For 2020 and 2021 Janice continues to maintain a home for herself and her minor dependent daughter, Susan.

Filing Status Janice: If Janice does not remarry after Al's passing, Janice files married joint with Al in 2019 and files as qualified widow with dependent child in both 2020 and 2021. After 2021, if Susan is still a dependent, Janice would file as head of household.

Variation: Dependent Not Taxpayer's Child - Al and Janice were caring for a minor grandchild that they claimed as a dependent when Al passed away. If Janice does not remarry after Al's passing, she would file married joint with Al in 2019. However, she would not be eligible for the qualified widow filing status in 2020 and 2021 because the dependent must be her child. Grandchildren and foster children do not qualify the surviving spouse for the qualified widow(er) filing status. However, Janice would qualify as head of household.

Variation: Spouse Remarries - Janice remarries in the same year as Al passes away. In this case, Al's return would be filed using the married filing separate status and Janice would file married filing jointly (or separately) with her new spouse.

CASE STUDY #17: Military Spouse Missing In Action – Al and Janice are married but Al is in the Marines and deployed to Afghanistan. Al went missing in action in 2017 and remains on missing status. What is Janice's filing status in 2019?

Filing Status Janice: The date of death for a member of the Armed Forces who was in a missing status (missing in action or prisoner of war) is the date his or her name is removed from missing status for military pay purposes. This is true even if death actually occurred earlier. Thus Janice would still be considered married until Al's name is removed from missing status, and she would file using the status married filing joint. Of course she could file as married filing separately, but that makes no sense since there is no tax advantage for doing so.

CASE STUDY #18: Resident Alien Parents Living In Foreign Country – Phil's parents lived in a foreign country the entire tax year. Here are the facts about the parents:

Parents as dependents

- They are green card holders and thus resident aliens.
- They meet the relationship or member of the household test – they are his parents.
- They meet the gross income test – their income is less than the personal exemption amounts.
- They are married, but the joint return test does not apply because they are not required to file.
- They meet the U.S. citizen or resident test since they are green card holders (resident aliens).
- They meet the support test since Phil provides over half their support.

Thus the parents qualify as Phil's dependents.

Phil's Filing Status

- Phil's parents qualify as his dependents.
- Phil provided over half the cost of maintaining a separate household that was the main home for a dependent parent for the entire year.

Thus Phil qualifies to use the head of household status.

NOTES

EXEMPTIONS

As part of tax reform, the federal deduction for exemptions has been suspended for tax years 2018 through 2025. However, the exemption amount ($4,200 for 2019) is used elsewhere in the tax code for other purposes. For instance, it is used in the definition of a qualified relative, where the gross income cannot exceed the exemption amount.

- **Personal & Dependent Exemption Allowance**
- 2019: $4,200
- Annually adjusted for inflation

Related IRC and IRS Publications and Forms

- **IRC Sec 151**
- **Form 1040 –** Instructions
- **Form 8332 –** Exemption Release – Custodial Parent
- **Pub 17 –** Your Federal Income tax
- **Pub 501 –** Exemptions, Standard Deductions and Filing Information
- **Pub 929 –** Tax Rules for Children & Dependents

EXEMPTIONS: Prior to 2018, the tax law, via Form 1040, allowed a deduction for personal and dependent exemption allowances. These allowances are permitted for each filer and each dependent claimed on the federal return. For years 2018 through 2025 the exemption deduction has been suspended. However, the dollar value of what would have been the exemption deduction is still used for other purposes in the code, and therefore, an amount is shown for 2018 and 2019 in the table below. This amount is subject to inflation-adjustment in future years.

Year	2014	2015	2016	2017	2018	2019	2020
Exemption	3,950	4,000	4,050	4,050	4,150	4,200	4,300

EXEMPTION PHASE OUT: For years before 2018, the otherwise allowable exemption amounts are reduced by 2% for each $2,500, or part of $2,500 ($1,250 for married filing separately), that the taxpayer's AGI exceeds the threshold amount shown in the table below for the taxpayer's filing status. If the AGI exceeds the amount shown by more than $122,500 ($61,250 if married filing separately), the amount allowed for exemptions is reduced to zero.

FEDERAL EXEMPTION PHASEOUT - AGI THRESHOLDS					
Tax Year	**2014**	**2015**	**2016**	**2017**	**2018-25**
Single	254,200	258,250	259,400	261,500	N/A
Head of Household	279,650	284,050	285,350	287,650	N/A
Joint & Surviving Spouse	305,050	309,900	311,300	313,800	N/A
Married Filing Separate	152,525	154,950	155,650	156,900	N/A

Example: *George and Kate file a married joint return and claim an exemption for their child William. Their 2017 AGI is $334,750, so they have exceeded the threshold for the exemption phase-out. The calculation of their reduced exemption allowance is as follows:*

Federal AGI	*$334,750*
Phase-out threshold	*<313,800>*
Balance (not less than zero)	*20,950*

Increments of $2,500 = 20,950/2,500 = 8.38 – Must round up, so it is 9.
Phase-out percentage: 9 x 2% = 18%

Exemption allowance ($4,050 x 3)	*$12,150*
Phase-out amount (12,150 x 18%)	*<2,187>*
Allowed exemption amount	*9,963*

California allows a nonrefundable exemption tax credit for the filer, spouse (if married filing jointly) and dependents, and additional exemption credits for the filer and spouse if blind and/or a senior. A phase out applies to the credit (see below).

CA Blind Exemptions - The first year claimed requires attachment of a doctor's statement. It must indicate that the filer and/or spouse (not allowed for dependents) cannot see better than 20/200 while wearing glasses or contact lenses, or that their field of vision is not more than 20 degrees.

CA Senior Exemptions - Taxpayer or spouse (not allowed for dependents) must be 65 years of age or older by December 31 of the tax year to qualify for an additional credit. However, if the 65th birthday falls on January 1, the taxpayer (or spouse if applicable) is considered to be age 65 on December 31 of the preceding year.

CA Exemption Credit and Phase-out Threshold Amounts:

Tax Year		2014	2015	2016	2017	2018	2019*
Exemption Credit		108	109	111	114	118	
Dependent		333	337	344	353	367	
Phase-out Threshold	Single & MS	176,413	178,706	182,459	187,203	194,504	
	Joint & SS	352,830	357,417	364,923	374,411	389,013	
	Head of Household	264,623	268,063	273,692	280,808	291,760	

*If any amount is not shown, it is not available at publication date
CA does not release the current year's amount until the Fall of the current year.

Phase out - The California credits are reduced $6 ($12 for Joint and SS) for every $2,500 ($1,250 for MS) or part thereof that the federal AGI exceeds the California threshold amounts.

Example – CA Exemption Phase Out *- Susan is a single taxpayer with one dependent. Her 2018 federal AGI is $202,145. Her exemption credits and phase out for 2018 is computed as follows:*

Federal AGI $ 202,145
Phase-out threshold <194,504>
Balance (not less than zero) 7,641
Increments of $2,500 = 7,641/2,500 3.06 – Must round up, so it is ***4.***
Phase-out amount: 4 x $6 = ***$24***
Susan's personal exemption credit.................................... 118.00
Less phase-out amount..<24.00>
Personal exemption credit allowed.. 94.00
Susan's dependent exemption credit.............................. 367.00
Less phase-out amount...< 24.00>
Dependent exemption credit allowed.. 343.00
Total exemption credits allowed.. 437.00

NOTES

DIVORCE & SEPARATION ISSUES

Taxpayers must resolve many tax-related matters, some listed below, when they separate or divorce. Some of these topics (e.g., filing status) are covered elsewhere in this text. This chapter primarily discusses such issues as joint and several liability, alimony, property transfers between spouses, etc.

(a) *Determining a New Filing Status – See Chapter 1.00;*
(b) *Claiming Dependents – See Chapter 1.01;*
(c) *Joint and Several Liability – This Chapter;*
(d) *Alimony Issues – This Chapter;*
(e) *Community Property Issues – See Chapter 1.10;*
(f) *Property Settlements and Transfers Between Spouses - This Chapter;*
(g) *Family Support – This Chapter;*
(h) *Pension Distributions under Qualified Domestic Relations Orders – See Chapter 4.01.*

TCJA CHANGES	**See Page**
Post -2018 Alimony	1.04.04

Strategy - Spousal Buy-Out Debt - When deducting home mortgage interest, for years 2018 through 2025, taxpayers are limited to deducting interest on acquisition debt (up to $1 million of acquisition debt or the grandfathered debt limit, or up to $750,000 for indebtedness incurred after 2017).

Beginning with tax year 2018 equity debt interest is not deductible. What happens in a divorce situation where one spouse refinances to buy out the other spouse?

Notice 88-74, 1988-2 CB 385 states that, in divorce situations, secured debt incurred to buy out a former spouse's interest in a home is acquisition debt. This rule is applied without regard to Code Section 1041, which treats certain transfers of property between spouses incident to divorce as nontaxable events.

Strategy - Alimony and IRA Contributions - In order to contribute to an IRA, an individual must receive "compensation." Compensation includes: Wages, Tips, Bonuses, Professional Fees, Commissions, taxable Alimony received, and Net Income from self-employment.

Thus, for purposes of determining IRA contribution and deduction limits, individuals who receive taxable alimony and separate maintenance payments may treat the alimony as compensation even if it is the only income they have. This allows alimony recipients to save for their retirement by making either Traditional or Roth IRA contributions. *(Code Sec. 219(f)(1))*

Alimony received from divorce agreements entered into after December 31, 2018, or pre-existing agreements that are modified after that date to treat alimony as non-taxable, are non-taxable to the recipient, and therefore cannot be treated as earned income for purposes of an IRA contribution.

JOINT AND SEVERAL LIABILITY

When married taxpayers file joint returns, both spouses are responsible for the tax on that return. What this means is that one spouse may be held liable for all the tax due on a return, even if all the income on that return was earned by the other spouse.

Innocent Spouse Exception - An exception to the joint and several liability rule is allowed for an ***innocent spouse*** (not to be confused with injured spouse relief discussed next)***.***

Payment of Spouse's Debts - If a taxpayer's spouse has not paid child or spousal support payments or certain federal debts (e.g., student loans), the refund on a joint return may be used to pay the past-due amount even though the debt arose prior to marriage to the present spouse. An injured spouse may be able to get his/her share of any refund, however. A person qualifies as an injured spouse under the following circumstances:

- He/she is not required to pay the past-due amount;
- He/she received and reported income on the joint return;
- He/she made and reported tax payments (estimated payments or withholding) on the joint return.

An injured spouse can get his/her portion of a joint return refund by filing Form 8379, Injured Spouse Claim and Allocation. See also Chapter 11.01. **Note:** Taxpayers residing in community property states must divide refunds according to local law. If a taxpayer lives in a community property state in which all community property is subject to the debts of either spouse, the entire joint refund is subject to offset. Claims from California, Idaho, Louisiana and Texas will usually result in no refund for an injured spouse.

Calmes v. U.S., (DC Tex, 05/21/96). This case prevented the IRS from levying on an individual's earnings to satisfy tax debts of her husband that occurred before their marriage. Even though the couple resided in a community property state (see Chapter 1.10), they had entered into a prenuptial agreement where they agreed that the future earnings of each would be his/her own.

TAXABLE ALIMONY ISSUES

Alimony is the term used for payments to a separated or ex-spouse as part of a divorce or separation agreement. Payments cannot be treated as alimony if the spouses file a joint return with each other. If the divorce was prior to 2019, the payments generally are taxable to the recipient and deductible by the payer. Per IRC Sec 71(b)(1)(B), a pre-2019 agreement can designate the payments as non-taxable (and non-deductible). If designated as non-taxable, the alimony isn't considered compensation for IRA contribution purposes.

No deduction for alimony paid before final decree — A taxpayer was denied an alimony deduction for payments he made to his ex-wife, before the final divorce decree was signed. (Milbourn v. Comm., TCM 2015-13)

Since 1985, two ways of defining alimony have been in effect: one for payments under decrees and agreements dated after 1984 and another for payments under decrees and agreements made in 1984 or earlier (and not later changed to incorporate the new rules). TRA '86 made modifications to the post-'84 rules, as indicated below.

POST–2018 - ALIMOMY

Under TCJA the taxability of alimony is modified effective for divorce or separation instruments **entered into after 12/31/2018**. There are also special rules for divorce or separation instruments in existence before 2019 that are modified after 12/31/2018.

- **Pre-2019 divorce agreements** – For divorce or separation instruments entered into before 2019 the old rules continue to apply. Alimony continues to be deductible by the payer and is taxable income to the recipient and qualifies as earned income for an IRA deduction.

- **Post-2018 divorce agreements** - For divorce or separation instruments entered into after 12/31/2018, alimony is no longer deductible by the payer and it is not income to the recipient and no longer qualifies as earned income for an IRA deduction.
- **Modifications after 12/31/18** – Divorce or separation instruments entered into before 2019 and modified after 12/31/18 continue to follow the pre-2019 rules and alimony continues to be deductible by the payer and taxable to the recipient. However, if a pre-2019 divorce or separation instrument is modified after December 31, 2018, the alimony can be subject to the post-2018 rules if the modification expressly provides for post-2018 treatment. (Committee reports, TCJA Section 11051) This gives couples the ability to choose between the pre-2019 rules or the post-2018 rules when they modify their agreement after December 31, 2018. This flexibility allows them to negotiate what is best both financially and tax wise for both parties.

> ***Example***: *An alimony recipient spouse requests a post-2018 increase in alimony of $12,000, from $20,000 to $32,000, and the paying spouse counters with a proposal to keep the alimony at $20,000 but to make the alimony tax free by a "modification" to the original decree.*

"Executed" Date - TCJA specifies that the tax treatment of alimony changes for any divorce or separation agreement "executed" after December 31, 2018. The issue is with the terminology "executed." It is not a question of when the divorce is final or when the paperwork was signed by the judge or recorded – it's when the "divorce or separation instrument… is executed". (TCJA Sec 11051(c))

Note: Although TCJA repealed section 71 it still referred to it for the definition of a divorce or separation agreement.

"Separation Agreement" - **Sec 71(b)(2)** defines a **"Divorce or separation instrument"** - *The term 'divorce or separation instrument' means—*

(A) a decree of divorce or separate maintenance or a written instrument incident to such a decree,

(B) ***a written separation agreement****, or*

(C) a decree (not described in subparagraph (A)) requiring a spouse to make payments for the support or maintenance of the other spouse."

The following are quotations from tax court cases.

- *Keegan v Comm TC Memo 1997-511):* "The term 'written separation agreement' (as used in section 71(b)(2)) is not defined by the Code, the legislative history, or applicable regulations".
- *Bogard v. Commissioner 59 TC 97, 100 (1972):* "Logically, it appears Congress was interested in a clear statement in written form of the terms of support where the parties are separated; correspondence between the attorneys representing the husband and wife does not constitute a written separation agreement within the meaning of section 71(a)(2)".
- *Ewell v. Commissioner TC Memo. 1996-253* – "The term "written separation agreement" is not defined by section 71(b)(2), its legislative history, or the Commissioner's regulations. A written separation agreement is a clear, written statement of the terms of support for separated parties. It must be a writing that constitutes an agreement".
- *Other court cases of interest include:* Grant v. Commissioner TC 809, 823 (1985); Kronish v. Commissioner TC 684, 693 (1988; Nemeth v. Commissioner TC Memo 1982-646; and Osterbauer v. Commissioner TC Memo. 1982-266

POST-1984 THROUGH 2018 DECREES AND AGREEMENTS – (*See flow chart page 1.04.04).* Payments:

(1) ***Must be in cash***, paid to the spouse, ex-spouse or a third party on behalf of a spouse or ex-spouse, and the payments must be made after the decree (Reg § 1.71-1(b)(1)(i)). If made under a separation agreement, the payment must be made after execution of that agreement (Reg § 1.71-1(b)(2)).

(2) Must be ***required by a decree or instrument*** incident to divorce, a written separation agreement, or a support decree (IRC § 71(b)(1)(A));

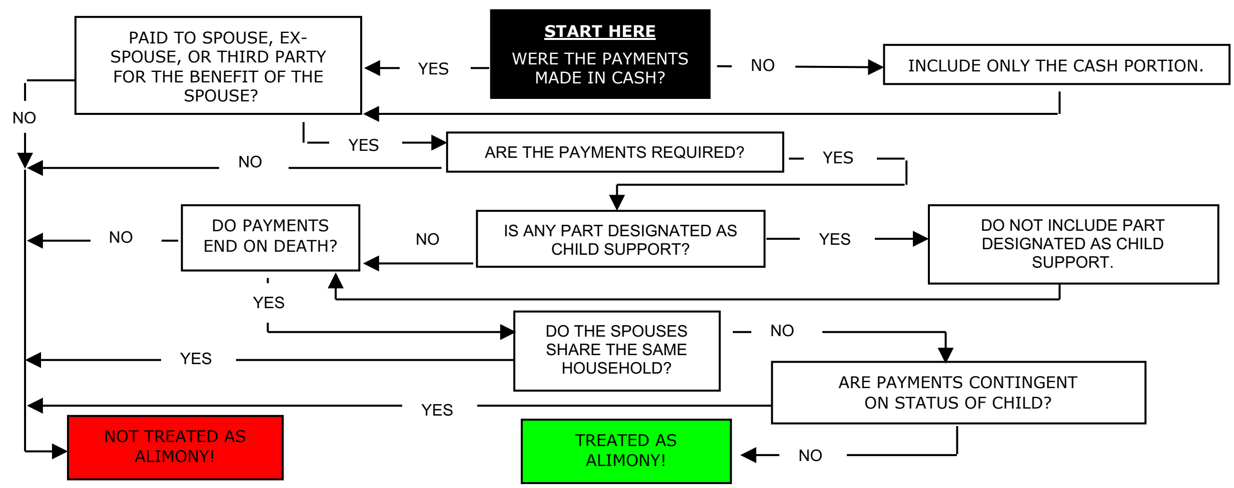
(3) ***Cannot be*** designated as ***child support*** (IRC § 71(c)(1);

(4) Are valid alimony only if the ***taxpayers live apart after the decree***. Spouses who share the same household can't qualify for alimony deductions. This is true even if the spouses live separately within a dwelling unit. (IRC § 71(b)(1)(C))

(5) Must ***end on the death*** of the payee (IRC § 71(b)(1)(D)); ***Linda Hoover, (1995) TC Memo 1995-183*** held that failure to include terminate-at-death language in a final divorce decree converted

(6) payments that would have been deductible as alimony into a nondeductible property settlement. Where the divorce decree is silent, courts will generally consider state law and where state law is vague may make their own decision based on the facts and circumstances of the case.

(7) ***Cannot be contingent on the status of a child*** (IRC § 71(c)(2)) – that is, any amount that is discontinued when a child reaches 18, moves away, etc., is not alimony—contrast the former treatment of the Lester-type agreement described on page 5 of this chapter.



Payments need not be for support of the ex-spouse or based on the marital relationship. They can even be payments for property rights as long as they meet the above requirements. Payments need not be periodic, but there are dollar limits and "recapture" provisions (see below). Even if payments meet all the alimony requirements, the couple may designate in their agreement or decree that the payments are not alimony and that designation will be valid for tax purposes (i.e., not deductible by payer and not taxable to recipient).

Excess front-loading for instruments executed after 1986 and through 2018 – IRC §71(f). The rules affect the first three post-separation years. Recapture may apply to part of the payments made in the first two post-separation years that are more than $15,000. Post-separation years begin the year alimony payments begin. Excess alimony payments are defined as the total of the excess payments in the first and second post-separation years.

These rules apply to divorce instruments executed after Dec 31, 1986 and before January 1, 2019. However, they can also apply to instruments executed before Jan 1, 1987, if the decrees are amended to stipulate that the 1986 law is to apply.

Computing the recapture amount - The following computations cannot be made until the completion of the third post-separation year. The excess amounts from the first and second years are totaled and reported as income (or deducted) in the third year. The following steps are used to compute the recapture:

(1) Add alimony payments made in the third post-separation year to $15,000.

(2) Subtract the result in (1) from alimony payments made in the second post-separation year (not less than zero).

(3) Find the average alimony payments for the second and third post-separation years by adding the alimony paid in the second post-separation year less recapture amount computed in (2) and third post-separation year and dividing the result by 2. Add $15,000 to this average.

(4) Subtract the result in (3) from alimony payments made in the first post-separation year (not less than zero).

(5) Add the results of (2) and (4). This amount must be recaptured at the end of the third post-separation year.

Example - Excess Front-Loading: Agreements Executed After 1986 and before 2019 - *Sammy and Sandra were divorced in Year #1 (which was prior to 2019). He has deducted the alimony he paid her each year; she has reported the alimony as income. The divorce decree stipulated that Sammy must pay alimony as follows: Year #1, $35,000; Year #2, $9,000; Year #3, $5,000. The following worksheet shows Sammy's alimony recapture computation:*
Do NOT enter an amount less than zero on any line.

1. *Alimony paid in 2nd year 9,000*
2. *Alimony paid in 3rd year 5,000*
3. *Floor...15,000*
4. *Add lines 2 and 3 .... 20,000*
5. *Subtract line 4 from line 1 ....0*
6. *Alimony paid in 1st year.. . 35,000*
7. *Adjusted alimony paid in 2nd year (line 1 less line 5)................................ 9,000*
8. *Alimony paid in 3rd year 5,000*
9. *Add lines 7 and 8 ....14,000*
10. *Divide line 9 by 2 .... 7,000*
11. *Floor...15,000*
12. *Add lines 10 and 11 .... 22,000*
13. *Subtract line 12 from line 6...................................... .... 13,000*
14. ***Recaptured alimony**. Add lines 5 and 13 .... 13,000*

Post-1986 recapture rules do not apply if:
(1) either spouse dies;
(2) the alimony recipient remarries within certain time limits;
(3) the payments made are "temporary support payments";
(4) the payments fluctuate due to conditions beyond the payer's control because of a continuing liability to pay, for at least 3 years, a fixed part of business income.

Reporting the recapture amount - The excess amount is reported as income by the alimony PAYER in the year the excess is computed. This is shown as "alimony received" on Form 1040 (Sch 1, line 11 for 2018). Cross out the word "received" and write in "recapture" on the 1040. Also, indicate the social security number of the former spouse. Conversely, the alimony recipient is allowed a deduction in the same year the excess is reported by the payer. The amount is reported on the "alimony paid" line of Form 1040 (Sch 1, line 31(a) for 2018). "Paid" is crossed out and "recapture" is inserted on the form. The recipient must also include the social security number of the payer.

> ***Kitch v. Comm, (CA10, 12/31/96)-*** *The Tenth Circuit Court held that estate beneficiaries were liable for tax on amounts received from their mother's estate that had been received from the estate of her ex-husband under an alimony arrearage settlement. The Court disagreed with the beneficiaries' argument that § 682 (Income of an Estate or Trust in Case of Divorce, Etc.) limited their income to the distributable net income of the ex-husband's estate.*

Pension Substitute Payments to Ex-Spouse - The Court of Appeals for the Ninth Circuit, reversing the Tax Court, has held that a divorced individual who resided in a community property state was taxable on amounts he paid from his wages to his ex-spouse as ordered by a state court. The court had awarded the spouse one-half of the individual's retirement benefits, but because he had not retired, these benefits were not yet payable so the court ordered him to make alternative payments to the spouse until he retired.

Thus, the Ninth Circuit Court of Appeals ruled that even though the pension payments would be made under a qualified domestic relations order (QDRO) agreement and taxable to the spouse, the alternative payments were taxable to the taxpayer and not deductible as alimony under Code Sec. 71(b) since they were required to be made to the ex-spouse or her estate. One of the definitions of alimony is that the payments terminate upon the death of the alimony recipient. ***Comm. v. Dunkin (CA 9 8/31/2007)***

PAYMENTS UNDER PRE-1985 DECREES AND AGREEMENTS - There are three basic requirements for payments to be classified as alimony:

(1) They are required under a written agreement or decree. Gifts or voluntary payments are not considered alimony. Payments made before a divorce was final may be alimony if they are made under court order or written agreement; and

(2) They are for support ("based on the marital relationship"), and are not compensation for PROPERTY RIGHTS, DEBTS, etc. Note that if the agreement says payments are "FOR SUPPORT OF SPOUSE AND CHILDREN" but does not set a specific amount for children, the payments are fully taxable as alimony if other requirements

are met. This is true even if the payments are reduced when the child reaches eighteen, moves away, etc. The latter kind of arrangement is sometimes called a "Lester Agreement;" and

(3) They are "PERIODIC," i.e., not installment payments on a fixed total amount. There is an exception for payments over a period longer than ten years or payments that are "contingent," even if for ten years or less. Contingencies include death of either spouse, remarriage of the alimony-receiving spouse, etc. Payments need not be on any fixed schedule to be "periodic."

TAX ATTRIBUTES

Capital Loss Carryovers – Capital loss carryovers are allocated to the spouse who originally incurred the loss. That can become complicated depending upon whether the carryovers were incurred before or during marriage and whether the loss was incurred as a result of selling community or separate property (2018 Pub 17, Page 117).

Passive Loss Carryovers – For separately owned property, the carryover goes to the spouse that owns the property. Where the property is jointly owned by both or is community property:

- And continues to be owned by both after the divorce, 50% of the carryover would go with each spouse.
- Where one spouse retains the property as part of a property settlement, 50% of the carryover becomes an adjustment to the basis of the property and the other 50% continues to be carryover for the spouse that retained the property.

Net Operating Loss (NOL) Carryovers - If taxpayers haven't been married to each other in all NOL years, the deduction may only be taken by the spouse who incurred the loss and only to offset income generated by that spouse in the carryback or carryforward years. (The TCJA eliminated carrybacks for most NOLs incurred in 2018 or later. See Chapter 3.16 for details.) As example, an NOL sustained by one spouse before her marriage could not, when carried to a year in which she was married, be used to offset the income of her husband (Calvin, Asa E. v. U.S., (1965, CA10)).

> ***Example:*** *George and Joyce, residents of a community property state filed a joint return in 2015. In 2016 George and Joyce divorced and he married Janice in the same year. If George and Janice incur an NOL in 2017, George's share would carry back to 2015, the year he was married to Joyce, and can only offset George's share of the 2015 income. Janice's share of the 2017 loss would be carried back to her 2015 separate or joint return (if she was married in 2015). Any balance of the 2017 loss not used on the 2015 return may be applied against George and Janice's 2016 joint return, and if a balance still remains, it is carried forward to 2018.*

Joint estimated tax payments. If the divorced spouses made joint estimated tax payments but file separate returns, they can divide the payments in any way on which they can both agree. If they cannot agree, the estimated tax each can claim equals the total estimated tax paid times the fraction which is the tax on their individual return divided by the sum of the tax shown on their individual returns for the year (2018 Pub 17, Page 43).

> ***Example:*** *Bill and Jane were divorced during the year. Prior to the divorce they paid $5,000 in joint estimates. They are unable to agree upon how to divide the payments. Bill's tax on his separate return is $10,000 and Jane's tax on her separate return is $7,000. Thus Bill's share of the estimated taxes would be $2,941 ($5,000 x ($10,000/($10,000 + $7,000) and Jane's would be the difference, $2,059.*

When allocating joint estimated tax payments, include the former spouse's SSN in the spouse block on page 1 of the 1040. If the taxpayer has remarried, enter the present spouse's SSN in the spouse block on the 1040 and the former spouse's SSN, followed by "DIV" to the left of line 66 on Form 1040, Schedule 5 (2018).

BASIS OF PROPERTY

When one spouse transfers property to another spouse the basis of the recipient spouse is the same as the transferor-spouse's adjusted basis in the property (Code Sec. 1041(b)).

This rule applies even where the transaction is a sale between the spouses or where the transferee-spouse pays the transferor-spouse (as required under the divorce settlement) for the transfer of title to the property to the transferee- spouse (Reg § 1.1041-1T(a), Q&A-2).

This carryover basis rule applies whether the adjusted basis of the transferred property is less than, equal to, or greater than its fair market value at the time of transfer and applies for purposes of determining loss as well as gain, upon later sale by the transferee (Reg § 1.1041-1T(d)). There are exceptions that may apply to certain transfers in trust (Sec 1041(e)) and transfers of installment obligations into a trust (Sec 453B(g)).

> ***Example:*** *George owns land in which his basis is $10,000. He sells it to his wife Allison for $18,000, its fair market value. George does not report any gain on the sale. Allison is the new owner, but her basis is $10,000 (George's basis), even though she actually paid $18,000 for it.*

PROPERTY SETTLEMENTS BETWEEN SPOUSES

No gain or loss is recognized when property is transferred between spouses during marriage. This rule applies also to transfers between former spouses if "incident to a divorce." A transfer is considered incident to divorce if it occurs within one year after a marriage ends or is related to the ending of a marriage (i.e., occurs within 6 years after a marriage ends and the transfer is made under a divorce or separation agreement). A transfer that occurs later than 6 years after a marriage ends can be considered incident to divorce if the taxpayer can show that legal factors prevented earlier transfer of the property.

The Tax Court has held that where a couple provided in their divorce agreement that they would each own 50% of their businesses, but decided over a year later that this arrangement wasn't working, the ex-husband's sale of his 50% interest to the ex-wife was nontaxable because it was incident to the divorce. **Belot, TC Memo 2016-113**

The basis of the property received in a transfer between spouses or former spouses is the adjusted basis the transferring spouse had in the property. In effect, the recipient spouse has received a gift of the transferred property.

> ***Example - Transfers of Property between Spouses –*** *Ed and Elaine were married in 2013. Prior to their marriage, Ed owned some raw land with an adjusted basis of $40,000. In 2019, while still married to each other, Ed sells the property to Elaine for $50,000. Ed realizes no gain on the transaction, but Elaine's basis in the property is $40,000.*

Transfers and Passive Loss Carryovers - Under ***§1041(b)*** and ***469(j)(6),*** if a taxpayer transfers property to a spouse incident to a divorce, the exchange is treated as though it were a gift. Therefore, any suspended losses attributable to the spouse giving up the interest in the passive activity are added to the basis of the property transferred to the other spouse. For the receiving spouse, the basis will be increased by the ex-spouse's suspended losses, but the receiving spouse's suspended losses on the same property will still be considered suspended losses, which are available currently to offset passive income.

Holding Period - For an individual holding property transferred between spouses or transfers incident to divorce, the period the individual owns the property includes the period the transferor owned the property.

Sale After Ex-spouse Retains Property for Some Period of Time - Only for purposes of the Sec 121 home gain exclusion is an individual treated as using property as the individual's principal residence during any period of ownership while the individual's spouse or former spouse is granted use of the property under a divorce or separation instrument. This means that if a husband (or wife) continues to own the home after a divorce, and his/her former wife (husband) is granted use of the property under a divorce instrument, the exclusion could be available when the husband (wife) sells the house if he (she) meets the ownership requirement and his wife (her husband) meets the use requirements. ***(Reg. §1.121-4(b)(2))***

Homebuyer Credit Recapture - Where a home is sold that is subject to a homebuyer or long-term resident credit recapture, and the credit had been claimed on a joint return, each spouse is treated as having received half the credit for recapture purposes. Where one spouse retains the home in a property settlement, recapture or repayment is not triggered as a result of the settlement. However, that spouse takes full responsibility for any subsequent repayment or recapture of the credit. This rule is similar to the Sec 121 home gain rules.

FAMILY SUPPORT

"Family support" payments frequently combine spousal and child support without allocating the payments between deductible alimony and nondeductible child support.

The issue of whether "family support" is deductible as alimony has been to Tax Court on several occasions with conflicting results. However, in the most recent cases, the courts have looked at the termination requirements of alimony. Alimony must terminate on the payee spouse's death. Most family support agreements do not include the provision for the support to terminate on the death of the payee spouse and therefore have failed to qualify as alimony in the recent court cases.

DeLong, TC Memo 2013 – An interesting Tax Court decision in 2013. In this case the Tax Court ruled the entire amount paid towards family support was deductible alimony.

CAUTION – There are unique circumstances with this case. Even though the payments were stipulated by the divorce court as both spousal support and child support, the Court did not fix the amount of either.

Court's conclusion - The Tax Court first examined the issue of whether the family support obligation terminated upon the death of the payee spouse, as required to qualify as alimony. Relying on *Berry, TC Memo 2005-91*, the Tax Court found that Mr. DeLong had no continuing liability for the family support payments past Ms. DeLong's death.

The Tax Court noted that whether a family support obligation terminates upon the death of the payee spouse was not specifically addressed in the California Family Code. Nor had case law conclusively decided the question. In *Berry,* after a careful and comprehensive analysis of California law, the Tax Court found that there was no continuing payment liability past the death of a payee spouse with respect to a family support obligation. The facts of *Berry* were similar to the facts in Mr. DeLong's case, and the Tax Court found no distinguishable facts that would merit a different result in Mr. DeLong's case.

The California Superior Court hearing the Delong case indicated in a temporary and subsequent support order that the family support payments were for both spousal support and child support. It didn't allocate any specific portion of the family support payments as spousal support or child support in either of the support orders. Nor did it provide for a reduction of the family support payment when the children reach maturity.

The Court noted that the statutory directive that child support payments be "fixed" was generally taken literally. Child support cannot be inferred from intent, surrounding circumstances or other subjective criteria. (Comm. v. Lester, (Sup Ct 1961) 7 AFTR 2d 1445, 366 U.S. 299) Mr. DeLong's support orders made an unallocated award of spousal and child support. Consequently, they did not "fix" any portion of the family support payments as a sum that was payable for the support of his children for purposes of Code Sec. 71(c)(1). In addition, there was no amount specified in the support orders that was to be reduced upon the occurrence of a contingency specified in the support orders relating to Mr. DeLong's children or at a time that could clearly be associated with that kind of contingency under Code Sec. 71(c)(2).

COBRA Coverage and Divorce - A group health plan of an employer must provide that each qualified beneficiary who would lose coverage under the plan because of a qualifying event may elect continuation coverage under the plan within a specified at-least-60-day election period (Code Sec. 4980B(f)(1)). Qualified beneficiaries include the covered employee, spouse or dependent child and qualifying events include divorce or legal separation from the covered employee. Coverage for a qualified beneficiary must begin on the date of the qualifying event and end not earlier than 36 months later, the end of the plan, the failure to pay a premium, or the eligibility for group health plan coverage or Medicare.

A WORD OF CAUTION

If you are contemplating preparing both returns of a divorcing couple you must understand that preparing the returns of both can involve inherent conflicts of interest (Cir 230 §10.29) and it may be in your firm's best interest not to represent both parties and in some cases not to represent either individual.

If you reasonably believe that you will be able to provide competent and diligent representation to each affected client, you must inform each affected client of the potential conflict and each so affected client must waive the conflict of interest and provide informed consent, confirmed in writing. For further details consult Cir 230 §10.29.

California follows Federal law. However, California conforms to federal law as it existed on January 1, 2015, with specific significant differences, so most of the TCJA changes, including the treatment of alimony as nondeductible by the payer and nontaxable to the recipient for post-2018 divorce decrees, won't apply for California purposes absent conforming California legislation. For the years California continues to treat alimony from post-2018 decrees as taxable/deductible, adjustment to federal income is made on California Schedule CA

ALIMONY RECAPTURE WORKSHEET

Use only if divorce or separation agreement was entered into before 2019 and has not been modified to adopt the TCJA provision that alimony is not taxable and not deductible.

Recapture only applies to the first three post-separation years. Recapture may apply to part of the payments made in the first two post-separation years that are more than $15,000. Post-separation years begin the year alimony payments begin. Excess alimony payments are defined as the total of the excess payments in the first and second post-separation years. The excess amounts are reported as income (or deducted) in the third post-separation year.

CHECK ANY BOX THAT APPLIES:

- ☐ Either spouse died in the first 3 years of alimony payments.
- ☐ The alimony recipient remarried in the first 3 years of alimony payments.
- ☐ The payments were "temporary support payments."
- ☐ Payments fluctuate due to conditions beyond the payer's control because the payments are based on a fixed part of business income.

IF ANY OF THE ABOVE BOXES IS CHECKED, THE TAXPAYER MAY NOT BE SUBJECT TO THE RECAPTURE PROCESS.

TAXPAYER IDENTIFICATION:

1. Payer:____
2. Payer's taxpayer ID number:.................... ________________________
3. Recipient:____
4. Recipient's taxpayer ID number:.............. ________________________
5. Date of first payment:...____/____/____

ALIMONY PAYMENTS:

6. Payments in first year.. _________
7. Payments in second year... _________
8. Payments in third year.. _________

COMPUTATION OF RECAPTURE:

9. Statutory floor amount... **15,000**
10. Add line 8 plus line 9... _________
11. Line 7 less line 10, but not less than zero... _________
12. Add lines 7 and 8... _________
13. Average payment 2nd and 3rd years - line 12 divided by 2.. _________
14. Line 9 plus line 13.. _________
15. Line 6 less line 14, but not less than zero... _________
16. ***ALIMONY RECAPTURE*** - line 11 plus line 15...................................... _________

REPORTING:

PAYER: Report on alimony "received" line, but cross out word "received" and write in "recapture." Enter social security number of recipient.

RECIPIENT: Report on alimony "paid" line, but cross out word "paid" and write in "recapture." Enter social security number of payer.

NOTES

DEATH OF A TAXPAYER

Overview

- **Filing Status year of death**
  - Joint if married
  - If estate executor agrees
- **Final 1040 Return**
  - ***Medical Expenses***
    - Those up to date of death
    - If estate elects – those within a year of death
  - **Moving Expenses -** 39 or 78 week qualification period waived (2018-2025: moving expense deduction generally not allowed; see detail)
  - **Net Operating Loss Carryovers -** On final return – balance lost*
  - **Investment Interest Carryover -** On final return – balance lost
  - **Charitable Contributions**
    - Carryover useable on final return within normal AGI-based limits – balance lost
    - Post-mortem contributions claimed by beneficiaries
  - **Capital Loss Carryovers -** On final return – balance lost*
  - **Business Credit Carryovers -** On final return – balance lost
  - **Foreign tax credit carryovers -** can be used by the taxpayer's estate or heirs.
  - **Minimum tax credit carryovers -** On final return – balance lost
  - **Passive Loss Carryovers**
    - Accumulated losses deductible
    - Deduction limited to the excess of the property's basis at date of death over the decedent's adjusted basis in the property just before death
  - **Passive activity credits** - Passive activity credits are effectively lost if not used on the final return (See detail).
  - **Exemption -** Full amount allowed (Not allowed 2018-2025)
  - **Unrecovered Basis in Pension Plan**
    - Deductible on final return (Tier 1 Misc. Deduction)
    - If pension is for joint lives, deduction goes to last to die
  - **Inherited Property Basis**
    - Generally FMV at date of death*
    - FMV at alternate valuation date if elected (only applies if value of estate and estate tax would be less)
    - Must equal the value of that property for estate tax purposes, effective for property with respect to which an estate tax return is filed after July 31, 2015 and resulted in increased estate tax.
    - Holding period is automatically long-term
  - **Refund**
    - Surviving Spouse – automatic (note in signature block)
    - All others – file Form 1310

**but see "2010 modified carryover basis" in chapter 11.05*, Form 706-NA, or Form 706-A

Pub 925 – Passive Activity and At-Risk Rules

VERY IMPORTANT – CAN CREATE A PREPARER FINANCIAL LIABILITY

For spouses dying after 2010 their unused estate tax exclusion can be passed on to the surviving spouse by **electing** the portability feature. However, to make that election, a Form 706 must be timely filed whether or not the estate's value exceeds the statutory filing limit. Typically individuals with small estates will reason they will have no need for the unused amount from their spouse's estate and/or do not want to pay the additional cost of preparing a 706. But that is not a sure thing…there is no guarantee that they might not hit the lotto, receive a sizable inheritance, or Congress might decide to reduce the estate tax exclusion. You as a practitioner must bring this issue to the attention of the executor and surviving spouse, and if they refuse to file a 706, have them sign a statement to that effect. Don't put yourself in jeopardy for the tax on the unused exemption. See suggested statement at the end of the chapter. (Page 01.05.10)

The Details

At the death of a taxpayer, a personal representative (e.g., estate executor/executrix) takes charge of the decedent's property. This person may be named in the decedent's will or trust document, or appointed by the court if there is no will or trust. The duties of the representative include collecting all of the decedent's property, paying creditors, and distributing assets to the heirs. In addition, the representative is responsible for filing various tax returns and seeing that the taxes owed are properly paid. This chapter will primarily be concerned with providing an overview of the various returns and forms, which may have to be filed at a taxpayer's death. A checklist of these forms may be found at the end of the chapter.

FINAL RETURN OF THE DECEDENT

Filing Requirements - Use the same filing requirements for a deceased taxpayer as would otherwise be used if the taxpayer were still living—based on income level, age, and filing status—to determine if an individual income tax return must be filed.

CAUTION!

Do not assume that the filing status will be joint on the final return of a taxpayer who was married at the time of death. If an estate executor (or other representative) has been appointed, the executor must agree to the joint filing, as must the surviving spouse. The executor needs to consider whether a joint filing is the most advantageous status for the overall estate. An executor who is appointed after a joint return has already been filed may revoke the joint return election, provided the revocation is made within one year of the extended due date of the return. ***Reg. 1.6013-1(d)(5)*** A joint return of the decedent and his or her spouse cannot be filed if the surviving spouse remarries during the decedent's year of death.

Refunds – See "Deceased Taxpayer Return Signature"

Income to Include - The decedent's income on the final return includes that income derived up to the date of death. If the decedent was reporting on the ***cash method***, include only items actually or constructively received before death. If the ***accrual method*** was used, report all income that was earned prior to death, whether or not it had actually been received.

Tax Attributes (Exemption, Dependents, Deductions and Carryovers) - The general rules for exemptions (note: the deduction for exemptions is suspended for 2018 through 2025), dependents, deductions and carryovers apply to the final return.

Note - For married couples be sure to separate carryover losses and deductions between the decedent and the surviving spouse according to joint, individual and community property (where applicable) ownership before applying the following rules.

- **Medical Expenses:** Medical expenses paid before death are claimed on the decedent's final return as itemized deductions in the usual manner. Medical expenses not deductible on the final return become liabilities of the estate and are claimed on the estate tax return (Form 706). However, expenses that were paid out of estate funds within one year after death can be treated as if paid by the decedent and claimed on the decedent's final return instead. To make the election, file a statement with the decedent's final return that the expenses are not being claimed on the estate tax return (with the approval of the executor of the estate). Medical expenses cannot be claimed on the estate's income tax return (Form 1041).
- **Moving Expense Deductions:** The 39-week employee or 78-week self-employed qualification periods are waived if the taxpayer fails to meet the qualification period because of the taxpayer's death. ***(Code Sec 217(d)(1)(A)) Note:*** *Per the TCJA of 2017, moving expense deductions are not allowed for tax years 2018 through 2025, except for Armed Forces members on active duty who move pursuant to a military order.*

- **NOLs:** Except for deaths occurring in 2010 and where no estate tax was elected, net operating loss (NOL) carryovers are lost if not used on the individual's final return. However, an NOL resulting from a net business loss on a final return in a year before 2018 may be carried back to earlier years under the normal Code Sec. 172 rules (Note: NOLs incurred in years after 2017 can only be carried forward). ***(Rev Rul 74-175, 1974-1 CB 52).*** Thus the NOL carryover of the decedent (except for those dying in 2010 and using the modified carryover basis) can <u>only</u> be deducted on his/her final return. Death before termination of a bankruptcy estate prevented survivor from using remaining NOL carryovers. An IRS Field Service Advice (FSA) has concluded that where a bankruptcy estate terminated in the same year as but after the debtor died, his surviving spouse lost the unused NOL carryovers that the debtor would have succeeded to had he lived. ***Field Service Advice 200118003.***

- **Investment Interest:** Investment interest carryovers are lost if not used in the deceased taxpayer's final return. ***(Code Sec. 163(d)(2))***

- **Charitable Contributions:** Charitable contribution carryovers are lost if not used on the final return. ***(Reg. § 1.170A-10(d)(4)(iii))*** If a decedent made charitable contributions in his or her final year, or was carrying forward charitable contributions from an earlier year, and total contributions are in excess of the AGI limitation, the excess cannot be claimed as a deduction on the estate tax return. Property of an individual that is donated to charity after the individual's death cannot be claimed as a charitable contribution on the decedent's final return. Instead, the beneficiary who was designated to inherit the property generally claims the deduction on his or her personal return.

- **Capital Losses:** Except for deaths occurring in 2010 and where no estate tax was elected, capital losses do not carry over from the decedent to his or her estate or heirs. ***Rev. Rul. 74-175*** If a joint return was filed in a net capital loss year, and separate returns are filed in the succeeding year, long-term and short-term carryovers must be separately allocated to each spouse. The carryovers are allocated on the basis of their individual net long-term and short-term capital losses for the preceding taxable year, which gave rise to the carryovers. Each spouse carries over from the joint return his separate net long- or short-term loss only to the extent that it wasn't offset, on the joint return, by the other spouse's net long- or short-term gain. ***Reg § 1.1212-1(c)***

- **Domestic production deduction** – Where the decedent performed qualifying section 199 production activities with respect to property transferred to a successor in interest, the successor in interest is treated as having performed the qualifying section 199 production activities. Thus if the successor in interest satisfies other relevant requirements the successor in interest will be entitled to a domestic production activities deduction with respect to the transferred property. *(Reg. § 1.199-8(e)(1)(ii)(B))* ***Caution****: A domestic production deduction is no longer allowed after 2017.*

- **Business credit carryovers** - Business credit carryovers may not be carried over to the decedent's estate or to heirs. However, a deduction is allowed on the individual's final return for any unused "qualified business credits." ***(Code Sec. 196(b))***

- **Foreign tax credit carryovers** - Foreign tax credit carryovers can be used by the taxpayer's estate or heirs. ***(Code Sec. 691(b))***

- **Minimum tax credit carryovers** – The Code Sec. 53 minimum tax credit carryovers are lost if not used on the individual's final return. The Tax Court, in a case involving a widow's attempt to claim the unused minimum tax credit that arose when her deceased husband incurred AMT from an incentive stock option in a year prior to their marriage, noted that neither the statute nor the relevant regulations specified whether the widow was entitled to the carryover of the AMT credit, and held that case law and certain indirectly related regulations dictated that she was not entitled to the credit. **(*Vichich, (2016) 146 TC No. 12)***

- **Passive Losses** – When a passive interest is transferred due to death, the accumulated suspended losses from the activity are deductible on the decedent's final return. The deduction amount is limited to the excess of the basis of the property in the hands of the transferee (heir) over the decedent's adjusted basis in the property just before death. In other words, the amount of the passive activity loss that equals the step-up in basis due to the decedent's death is not allowed as a deduction to anyone in any tax year. ***(Code Sec. 469(g)(2))***

  Example: *Robert was the sole owner of a residence used as a rental, a passive activity, when he died in 2019. In his will he left the property to his brother Tom. At Robert's date of death, the value of the rental was $500,000, his adjusted basis was $494,000, and he had unused passive activity losses of $8,000. Since Tom's basis of the rental is increased by $6,000, the deduction on Robert's final return for the year of death would be limited to $2,000 ($8,000 - $6,000). If the stepped-up basis had been $502,000 or more, none of the suspended passive loss would have been deductible ($502,000 – 494,000 = $8,000; $8,000 - $8,000 = $0).*

- **Passive activity credits -** Passive activity credits are effectively lost if not used on the final return. Although an elective adjustment to pre-death basis is available for the amount of the unused credit ***(Code Sec.***

469(j)(9)), the adjustment has no benefit, since the basis of property after death is equal to the value at death, under current rules.

- **Exemptions:** The exemption deduction is suspended for years 2018 through 2025. For deaths in other years, the full value of the decedent's exemption is claimed on the final return; proration based on the time the taxpayer was alive for the final year is not required.

- **Unrecovered Investment in Pensions:** If a retired person dies before recovering the entire basis in a pension or annuity (that started after 1986), the unrecovered portion is allowed as a tier 1 miscellaneous deduction on the retiree's final return. If the annuity is for the joint lives of a retiree and a designated beneficiary, the deduction would apply to the final return of the last to die. Otherwise, it would be allowed on the final return of the retiree decedent. See Chapter 7.09 for additional information. ***(Code Sec. 67(b)(10); Code Sec. 72(b)(3)(A))***

- **Cancellation of Debt Income:** COD income is reportable on the decedent's return if the cancellation occurred prior to death. If the decedent was married and the surviving spouse was also personally liable, the spouse would report the COD income on his or her 1040.

  If a debt of a taxpayer is cancelled after the death of the taxpayer, the cancellation of debt (COD) income is income to the estate or the non-grantor trust of the decedent and reportable as income on the 1041 return for the estate or non-grantor trust (Reg. 1.108-9(c)(2)) to the extent the estate or non-grantor trust is solvent.

  The Code Sec 108(a)(1)(B) insolvency exclusion applies to estates and non-grantor trusts just as it applies to individuals, so the COD income is only taxable to the extent the estate or non-grantor trust is solvent and would be reportable on the 1041 return. Section 108 does not apply to partnerships or a disregarded entity (Reg. 1.108-9(a)(1)) and thus the COD income is passed through to the partners or a Schedule C owner (i.e., a single member limited liability company not electing to be taxed as a C corporation). With regards to Sub S corporations, the Sec 108(a)(1)(B) insolvency exclusion applies at the corporation level (Sec 108(d)(7)(A)).

  Generally COD income is taxable to the estate under Section 61(a)(12) and reported on Form 1041. The resulting tax liability is payable by the estate. However, if the estate is insolvent, COD income is excludable to the extent section 108 applies, i.e., to the extent the estate's liabilities exceed its assets.

  But watch out; the IRS has the authority to assess the beneficiaries of the insolvent estate for the tax owed by the estate under the transferee provisions of IRC Sec 6901. A transferee for purposes of Sec 6901 includes beneficiaries who have received property from the estate. While the transferee assessment and collection process is the same under Sec 6901, strict statute of limitations periods apply and the burden of proof is on the IRS. (See Section 6902)

  31 U.S.C. 3713 gives priority to claims of the government to be satisfied before other creditors are paid and before distributions are made to beneficiaries. The language of 31 U.S.C. 3713 is "A claim of the United States Government shall be paid first…." Under this provision an executor who distributes estate assets instead of using them to pay the estate's tax obligations can be held personally liable for the unpaid taxes up to the extent of the distributions. (Sec 6901(a)(1)(B))

- **Deceased Taxpayer Return Signature**

  If a taxpayer died before filing a return, the taxpayer's spouse or personal representative can file and sign a return for the taxpayer. In all such cases, enter "Deceased," the deceased taxpayer's name, and the date of death across the top of the return (2018 1040 instructions, Pg. 82). Generally, your software will include a provision for this by entering the date of death.

  Surviving Spouse – Where the surviving spouse is filing a joint return with the deceased spouse in the year of death or any year preceding the year of death in which they qualified to file a joint return, the surviving spouse may sign on behalf of the deceased spouse. In that case, in the signature block include "filing as surviving spouse" (2018 Pub 559, Pg. 4).

  If there is a refund on the return, the surviving spouse is **not** required to file Form 1310, Statement of Person Claiming Refund Due a Deceased Taxpayer. However, where the IRS issues a refund check in the joint names of the deceased and surviving spouses, the surviving spouse should then complete Form 1310, checking box A, and return the check to the IRS to have a new check issued in only the survivor's name.

  Personal Representative – Other than the taxpayer's spouse discussed earlier, a personal representative can file and sign a return for the deceased taxpayer. A personal representative can be an executor, administrator, or anyone who is in charge of the deceased taxpayer's property (2018 Pub 559 Pg. 3).

  - **Executor or Administrator** – Where the return is filed and signed by a court appointed or certified personal representative, the return is signed by the personal representative followed by "Personal Representative" after the signature. If there is a refund due on an original return, Form 1310 is **not** required, but a copy of the court certificate must be attached to the return (unless previously filed). If filing an amended return (Form 1040X) or a claim for refund (Form 843), complete Form 1310, checking box B, and attach it to the return.

- **Other Than Executor or Administrator** – Sign the return followed by "personal representative" after the signature. If there is a refund due, also complete a Form 1310, checking Box C and completing Part II of the Form 1310. Part II includes a certification that the refund "will be paid out in accordance with the laws of the decedent's resident state," meaning if the estate has any claims against it the refund must be used to pay those.

Due Date - Due date for the decedent's return is the same as for any other taxpayer, regardless of the date of death during the year.

INCOME IN RESPECT OF A DECEDENT (IRD)

What is IRD? Income which the decedent would have received had the death not occurred and which isn't properly included on the decedent's final return is IRD. It retains the same character as it would have had if the decedent had received it. Examples of typical types of IRD include amounts received after the decedent's death as compensation for his or her personal services, retirement plan distributions, investment income, and installment notes collected.

Who Reports IRD? The income must be reported by the decedent's estate, beneficiary, or any other person whom the estate designates as having the right to receive it.

> ***Example 1:*** *James was a cash-basis farmer who grew avocados. Although he sold and delivered 1,000 bushels of avocados for $3,000, he died before receiving payment for them. When the estate was settled, payment had still not been made. The estate transferred the right to receive the $3,000 to James' wife, Shirley. Shirley will include the income on her return for the year she receives it.*
>
> ***Example 2:*** *Assume the same facts as in Example 1 except that James used the accrual instead of the cash method. The $3,000 would be reported on James' final tax return.*

ESTATE TAX DEDUCTION (Not applicable for deaths in 2010 where no estate tax was elected)

IRD Gets Double-Taxed - IRD is included in the decedent's gross estate and is subject to estate tax. The income is also taxed when received by the beneficiary or estate.

How To Deduct Estate Tax - To make up for the double taxation inequity, a deduction for estate tax is allowed to the ultimate recipient of the income. If the recipient is an individual, it is claimed as a tier 1 miscellaneous itemized deduction. If the estate receives the income, the deduction is claimed on Form 1041.

Amount Deductible - The deductible amount of estate tax is the part representing the net value of all items in the estate which are IRD.

> ***Example A:*** *Sergei, a lawyer, was a cash-basis taxpayer. He died this year, and at the time he was entitled to $12,000 from clients in payment for services. He had also accrued $8,000 in bond interest at the time of his death. He owed $5,000 in expenses for which his estate became liable. The income and expenses were reported on Sergei's estate tax return. After credits, the estate owed $9,460 in tax. The net value of items included as IRD is $15,000 ($20,000 income less $5,000 expense). The estate tax determined without including the $15,000 is $4,840. The estate tax that qualifies for the deduction is $4,620 ($9,460 minus $4,840).*

> ***Example B:*** *Assume Diane inherited Sergei's estate (Example A). She collected the $12,000 from the clients in the year he died and will include that amount in her income for the year. She itemizes deductions and will claim a tier 1 miscellaneous deduction of $2,772, figured as follows: $12,000/$20,000 x $4,620 = $2,772*

INSOLVENT ESTATE - Generally, if a decedent's estate is insufficient to pay all the decedent's debts, the debts due the United States government must be paid first. Both the decedent's federal income tax liabilities at the time of death and the estate's income tax liability are debts due the United States. The personal representative of an insolvent estate is personally responsible for any tax liability of the decedent or of the estate if he or she had notice of such tax obligations or had failed to exercise due care in determining if such obligations existed before distribution of the estate's assets and before being discharged from duties.

The extent of such personal responsibility is the amount of any other payments made before paying the debts due the United States, except where such other debt paid has priority over the debts due the United States. The income tax liabilities need not be formally assessed for the personal representative to be liable if he or she was aware or should have been aware of their existence.

For estate tax purposes, if there is no executor or administrator appointed, qualified, and acting within the United States, the term "executor" includes anyone in actual or constructive possession of any property of the decedent. It includes, among others, the decedent's agents and representatives; safe-deposit companies, warehouse companies, and other custodians of property in this country; brokers holding securities of the decedent as collateral; and the debtors of the decedent who are in this country.

INHERITED PROPERTY

Property Inherited - The property inherited is not included in the heirs' income. However, the income produced on the property is income to the inheritor. An exception to the general rule that the inherited property is not income to the beneficiary is a Traditional IRA, which is taxable to the beneficiary as distributions are received to the extent the income would have been taxable if it had been received by the decedent. See also Chapter 4.17 of this text.

Inherited Basis - Basis of inherited property is generally one of the following (and must be consistent with the value of that property used on the estate tax return, Form 706; see Chapter 11.07 - Basis for additional information):

- FMV at date of death (Step Up – Step Down Basis);
- FMV at an alternate valuation date if eligible and elected by the personal representative; or
- Value under a special-valuation method for real property used in farming or other closely-held business.
- Value determined under the modified carryover basis for decedents dying in 2010 where no estate tax was elected.
- Value as reported to the beneficiary on Schedule A of Form 8971 for certain estate tax returns filed after July 31, 2015.

2010 Modified Carryover Basis - The modified carryover basis is determined as follows:

Begin with the lesser of:

(1) the decedent's adjusted basis, or
(2) the FMV at the date of death

Plus allowable increases to basis allocated to specific assets not to exceed FMV and the total of:

(3) An allowable aggregate basis increase of $1,300,000, plus
(4) the decedent's unused capital loss carryovers and built in losses, plus
(5) the decedent's unused net operating loss carryovers, and,
(6) If applicable, a spousal property basis increase of $3,000,000.

Aggregate Basis Increase & Spousal Increase Worksheet

Aggregate Basis Increase for an Estate	1,300,000[1]	
Decedent's Carryovers[2]:		
Capital Loss		
Net Operating Loss		
Decedent's Built-in Losses[3]		
Total Aggregate Basis Increase[4]		
Spouse Beneficiary additional amount[5]		3,000,000
Total Aggregate Basis Increase plus Spousal Amount		

[1] Substitute $60,000 for a non-resident alien.
[2] Tax loss carryovers that would have carried over to a subsequent tax year but for the death of the decedent.
[3] Losses from the sale of the decedent's property if it had been sold at FMV immediately before the decedent's death. Only losses that would be allowable under Sec 165 are permitted (i.e., losses from personal-use property are not allowed).
[4] Aggregate basis increase that is allocated among all the assets of the decedent.
[5] Additional basis increase that is allocated only to the surviving spouse's "qualified spousal property". Note: If the spouse were the sole beneficiary then the spouse would be entitled to $4,300,000 of basis increase plus allowable carryovers and built-in losses.

Additional Issues – 2010 Modified Carryover Basis:

Form 8939 – If no estate tax is elected for 2010, then the modified carryover basis applies, and Form 8939 is used to establish basis for income tax purposes of property acquired from a person who died in 2010 and the modified carryover basis was used. The 8939 takes the place of Form 706 (Estate Tax Return); the filing due date for this form was January 17, 2012.

Who Made The Allocation? **-** The executor of the estate was generally charged with the responsibility of allocating the allowable FMV step-up to specific assets.

Determining FMV – The process for establishing FMV under Sec 1022 follows the same rules for evaluating assets for an estate tax return. Thus qualified appraisals were required for all assets other than marketable securities or fixed value assets. Since the alternate valuation date under Sec 2032 only applies to estates subject to the estate tax, it was not a factor in determining FMV for the Sec 1022 election.

Informing Beneficiaries of Their Basis – Within 30 days of timely filing Form 8939 the executor was required to provide a statement – generally a copy of Schedule A from Form 8939 – to each recipient acquiring property from the decedent and reported on Form 8939. The statement described the property, the fair market value and the decedent's basis, regardless of whether the executor allocated any basis to the property.

Community Property - Similar to the rule under Code Sec. 1014(b)(6) (which, generally, applies where at least one-half of the whole community interest is included in the decedent's estate), both the decedent's and the surviving spouse's share of community property could be eligible for a basis increase. (H Rept No. 107-37 (PL 107-16) p. 27)

BASIS CONSISTENCY FORM 8971

For estate tax returns filed after July 2015, an estate and others who are required to file Form 706 must complete and file Form 8971 and Schedule A to report the final estate tax value of property distributed or to be distributed from the estate. A copy of Schedule A must be provided to the beneficiary of the property. Due to delays in issuing regulations and the new form, IRS extended the filing deadline of Form 8971 and Schedule A until June 30, 2016 for some estates; normally the due date is 30 days after the earlier of the due date (with extensions) of the 706, or the date filed. The 8971 and Schedule A are filed separately from the 706.

A beneficiary may not use a value higher than the value reported on Schedule A of Form 8971 as their initial basis in the property, and if the beneficiary reports a basis that is inconsistent with the amount reported on Schedule A, the beneficiary may be liable for a 20% accuracy-related penalty. The consistency in reporting applies only to property that was includible in the decedent's gross estate and resulted in increased estate tax liability (reduced by applicable credits) on the estate. If a 706 is not required because the value of the estate is less than the lifetime exclusion amount, but is filed only to preserve the deceased spouse's unused exclusion for the surviving spouse, Form 8971 is not required to be filed. See Chapter 11.07 (Basis) for further information.

FORMS TO BE FILED: Use the chart on page 1.05.10 as a guide to the various forms that must be filed following a taxpayer's death. The following are the basic returns, which may need to be filed (dependent on the filing requirements of each):

Form 1040 - File the decedent's final return as usual on Form 1040 and comparable state return.

Form 1041 - This is the income tax return of the estate--used to report income on the assets in the estate, including sales of property. The estate exists until final distribution of its assets. Tax year can be a calendar year or a fiscal year--the type of year is chosen when the first 1041 is filed for the estate. Once chosen, the tax year can only be changed with IRS permission. If distributions have been made to beneficiaries, the income of the estate generally passes to them via Schedule K-1 for tax reporting purposes. Losses incurred by the estate generally are not passed to the beneficiaries other than on the return and K-1 for the estate's final year.

Form 1041 is also used to file the income tax return of a trust. Many individuals will establish a revocable trust during their lifetime, which will become irrevocable upon the individual's death. If the individual is unmarried, commonly the trust serves merely to administer the assets until they can be distributed to the beneficiaries and then it terminates. Form 1041 is used to report the income during the administrative period, which may include more than one tax year; a 1041 will then be needed for each year. If the individual was married, frequently the revocable trust splits into two or more trusts; the surviving spouse's trust continues to be revocable while the other trust(s) become irrevocable. In most cases Form 1041 need only be filed for the irrevocable trust(s). Refer to the instructions for Form 1041 for more information.

- ***Filing Requirement –*** An income tax return (1041) must be filed if the estate has gross income of $600 or more. However, if one or more beneficiaries is a nonresident alien, Form 1041 must be filed even if the gross income is less than $600.
- **K-1s -** K-1s are filed with the 1041 for each beneficiary showing the income, deductions, etc., allocable to each. A copy of the K-1 must be furnished to each beneficiary.

Form 706 - Used to compute the tax on the <u>value of the assets</u> in the estate. Required if the gross estate exceeds the exclusion amount which is $11.4 Million for deaths in 2019 ($11.18 Million in 2018). See chapter 11.05 for exclusion amounts for other years.

- ***For deaths in 2010 -*** there was a choice to be subject to the estate tax and use FMV basis for beneficiaries or not be taxed and use modified carryover basis (Sec 1022 election). If the option to be not taxed was selected, then no 706 was required and instead the Form 8939 was filed (see previous discussion of Form 8939). Generally, executors of estates valued at no more than $5 million (the 2010 exclusion amount) opted to be subject to the estate tax, but because the estate's value did not meet the filing threshold, the 706 was not required to be filed.
- ***For deaths after 2010 -*** To be eligible for the decedent's unused portion of the exclusion to be transferred to the surviving spouse (the so-called portability election), Form 706 must be timely filed

(including extension), even if the value of the decedent's assets are less than the inflation-adjusted exclusion noted above. See Reg. Sec. 20.2010-2(a) and Form 706 instructions for further details.

- ***NOTE:*** *Relief provided by Rev Proc 2017-34 generally will eliminate the need for a private letter ruling to request an extension of time to file a Form 706 that is being filed only to make the portability election. This revenue procedure provides a permanently available simplified method for estates to obtain an extension of time to make the estate tax portability election. See Chapter 11.05 and Rev Proc 2017-34 for additional information.*

  Prior to Rev Proc 2017-34, the IRS Chief Counsel had indicated that if the gross value of the estate was less than the exclusion amount for the year of death, and a 706 was not timely filed, the "only recourse for obtaining the portability election is to seek relief through the private letter ruling process. The relief will likely be granted. Merely filing a late Form 706 would be ineffective in making this election and the election will not be respected." If the gross estate exceeds the exclusion amount, there is an absolute obligation to file a Form 706 within 9 months of date of death, and if no 706 were filed, the election for portability would be missed. Therefore, no relief would be available to the taxpayer, even if the estate was nontaxable due to the marital deduction. (Chief Counsel Advice 201650017)

Example - Income Reporting at Death of Taxpayer *– Don Drew died on April 9, 2019 at age 62. His daughter, Dana, was named executrix under his will. The will stipulated that Don's wife, Dot, was to receive Don's car and the family home. Don also left $5,000 to Community Church. All other assets in the estate were to be divided between Dot and Don's brother, Dillon. These assets were as follows:*

Checking account	*$ 2,550*
Savings account	*53,650*
(Interest after death was $2,250)	
Family home (FMV at death)	*150,000*
(Home inherited by Don in '87 when FMV was $42,000). Home was debt-free.	
500 shares ABC stock, value $25/share on 04/09/19	*12,500*
(Purchased in 2014 for a total of $5,100)	
500 shares XYZ stock, value $62/share on 04/09/19	*31,000*
(Purchased in 2019 for a total of $10,000, dividends after death were $750)	
Appraised value of car	*6,300*
Appraised value of household property	*18,500*
Don's coin collection	*2,800*
(Face value was $600, sold for $3,000 8/04/19)	
Don's stamp collection	*3,500*
Salary due at Don's death (W-2)	*12,000*
(Check received by estate was for $11,082 net of social security and Medicare tax)	
Good Life Insurance Company check (life insurance paid to Dot as beneficiary)	*$275,000*
Cost of Series EE Bonds (Dot was co-owner)	*2,500*
Accrued interest on Series EE Bonds, 04/09/19	*840*
(Was not reported as income in prior years)	
Original cost of rental home	*89,250*
Appraised value of rental home	*110,000*
Don's income prior to death:	
Wages	*39,000*
FIT Withholding	*2,305*
SIT Withholding	*1,400*
Interest on savings account	*1,900*
Other income:	
Rental property	*$8,400*
(Property in joint tenancy for Don & Dot; will states that Dot is to directly receive all income from the property)	
Deductions:	
Hospital and medical bills for Don's expenses	*$1,311*
(Bills of $1,090 rec'd by Dana as executrix, paid 07/15/19)	
Health insurance premiums	*3,250*
State income tax paid 02/15/19 for prior year return	*791*
Real estate taxes ($4,050 but $2,250 paid by estate)	*4,050*
Charity	*4,800*
Rental expenses	*1,545*
Attorney fee (administration of estate)	*1,325*
Rental depreciation	*$ 2,847 ****

Dana and Dot have agreed that Dot and Don will file a joint return for 2019.

**** Dot's basis in the rental property is $79,000, found by adding the $55,000 value of 1/2 of the property included in Don's estate to $44,625 (Dot's share of cost). The property had been depreciated using a 27.5-year life and $15,000 as land value. Depreciation through date of Don's death was $41,250; Dot's share was $20,625. Her share is subtracted from her share of the cost ($44,625 less $20,625 = $24,000).*

For the period before Don's death, the property is depreciated using the same method and same basis and life used by Don and Dot in previous years. The amount deductible for 1/4 of year is $675.

For the period after Don's death, two computations are necessary to figure depreciation: (1) Dot's basis of $44,625 less half of land value ($7,500) = depreciable basis of $37,125. Dot will continue to use the same life and depreciation method that was originally used on the property. Amount deductible for 3/4 of year is $1,013; (2) The other half of the property must be depreciated using a depreciation method acceptable for property placed in service during the current tax year, which in this case is the same as originally used (MACRS, 27.5 years). Value in the estate is $55,000 less land value of $10,000. Depreciable basis is $45,000. Using the IRS-provided table for 27.5 years, mid-month convention, and starting in April (the month Don died), the depreciation is $1,159 ($45,000 x .02576). Reporting of the above items is as follows

Form 1040, Joint Return

Salary	*$39,000*	
Interest income	*2,740*	
Net rental income	*4,008*	
AGI		*$32,252*
Less: Standard deductions		*-24,400*
Balance		*7,852*
Less: Sec 199A Deduction (20% of 4,008)		*- 802*
Taxable Income		*$7,050*

Don's w/h will also be reported on the 1040.

Form 1041

Unpaid salary	*12,000*	
Interest income	*2,250*	
Dividends (XYZ)	*750*	
LTCG-Coin collection sale (Sch D)	*200*	
Total income		*$15,200*
Taxes (RE)		*-2,250*
Attorney fees		*-1,325*
Adjusted total income		*11,625*

Itemized Deductions: [Medical = ($1,311 + $3,250) – ($32,252 x 10%)] + [taxes = ($1,400 + $791) + ($4,050 – $2,250)] + [charitable contributions = $4,800]. Note: less than the standard, standard used.

EXECUTOR'S CHECKLIST FOR FORMS AND DUE DATES

This is not an exhaustive list and every form doesn't apply to every estate or trust.

Form #	Title	Due Date
FinCEN 114	Report of Foreign Bank & Financial Accts	04/15 of yr after decedent's death/automatic 6-mo. extension
SS-4	Application for EIN	As soon as possible
56	Notice Concerning Fiduciary Relationship	When all necessary info available
706	U.S. Estate (and GST) Tax Return*	9 mos after date of decedent's death
706A	U.S. Add'l Estate Tax Return*	6 mos after cessation or disposition of special-use valuation property
706-CE	Certificate of Pmt of Foreign Death Tax*	9 mos. after death. Filed with 706
706GS(D)	Generation-Skipping Transfer Tax Return*	See form instructions
706GS(D-1)	Notification of Distribution From A GS Trust*	See form instructions

Client Portability Notice – The following has had no legal review. Use at your own discretion.

STATEMENT

Regarding Deceased Spouse Unused Estate Tax Exclusion Portability Election

I would like to call your attention to the fact that a surviving spouse can carry over a deceased spouse's unused estate tax exclusion by electing the portability feature. Why is this important? It can save taxes on your estate when you pass away by allowing your estate to add your deceased spouse's unused exclusion to your exclusion amount, thus avoiding inheritance taxes on a larger amount of money (value of your estate).

However, to make that election, a Form 706 (Estate Tax Return) must be filed whether or not the value of your deceased spouse's estate exceeds the statutory filing limit. Typically individuals with small estates will reason they will have no need for the unused exclusion amount from their spouse's estate and/or do not want to pay the additional cost of preparing the Form 706. But that is not a sure thing…there is no guarantee that you might not hit the lotto, or receive a sizable inheritance, or Congress might decide to reduce the amount of the estate tax exclusion, which they have done in the past.

However, the decision to file a 706 solely for the purpose of preserving your spouse's unused estate tax exclusion is up to you. You will need to indicate your decision below, sign and return this statement before your 1040 can be completed

❐ NO, do not prepare a 706

❐ YES, please prepare a 706

CALIFORNIA DIFFERENCES

Federal Estate Tax – Federal estate tax paid on income in respect of a decedent is not deductible for California. Enter the amount of Federal estate tax shown on Federal Schedule A as a negative adjustment on CA Schedule CA.

Forms to File - If the decedent was a California resident and federal Form 1041 is required, California Form 541 must generally be filed. California does not have an estate or inheritance tax, so there is no state form comparable to federal Form 706.

Inherited Basis of Property of Decedent's Dying in 2010 – California does not conform to the federal modified carryover basis rules for 2010, so for California purposes, the inherited basis of assets of a decedent dying in 2010 is fair market value on the date of death. (R&TC 18031, 18035.6)

NOTES

COMPENSATION OF CLERGY

RAPID FINDER

Overview

- **Parsonage Allowance**
    - Excludable from income
    - Subject to SE tax
    - Fair rental value or rental allowance
    - Cannot exceed fair rental value of home
    - Can still deduct mortgage interest and home taxes

Pubs Forms

Related IRC and IRS Publications and Forms

- **IRC Sec 107** – Rental Value of Parsonages
- **Pub 517** - Clergy
- **Pub 1828** - Tax Guide for Churches and Other Religious Organizations
- **Schedule C** – Self-Employment Income
- **Schedule SE** – Self-Employment Tax

Strategies

Parsonage Allowance – Generally, ministers will receive a certain amount of their compensation as a nontaxable parsonage allowance. This is true even for those who own their homes. Thus, a minister may be paying mortgage interest and taxes on the home and at the same time be receiving a nontaxable housing allowance. Even so, the minister may still deduct the mortgage interest and taxes as an itemized deduction.

New Law & Stuff

Parsonage Allowance Upheld by 7th Circuit - In US District Court for the western district of Wisconsin, Judge Barbara B. Crabb, in Gaylor v. Mnuchin (the Treasury Secretary) concluded that 26 IRC Sec. 107(2), which excludes from the gross income of a "minister of the gospel" a "rental allowance paid to him as part of his compensation," is unconstitutional. Specifically, she concluded that IRC Sec. 107(2) violates the establishment clause of the First Amendment.

On appeal, the Seventh Circuit has overturned the district court, ruling on March 15, 2019, that the Code Sec. 107(2) provision is constitutional on the grounds that it has a secular legislative purpose; its principal effect is neither to endorse nor to inhibit religion; and it does not cause excessive government entanglement.

TCJA EFFECTS	**See Page**
SE Tax for Clergy	1.06.02

The Details

CLERGY COMPENSATION INCLUDES

- Salary paid by the church,
- Fees collected for marriages, funerals, etc.,
- Voluntary contributions made directly to and for support of employee-missionaries of tax-exempt missions.

PARSONAGE/RENTAL ALLOWANCE EXCLUSION - For a "minister of the gospel" to qualify for the rental allowance exclusion from income, the home or rental allowance must be provided as remuneration for services which are ordinarily the duties of a minister of the gospel. A minister's gross income doesn't include the rental value of a home (parsonage) provided, or the rental allowance paid, as part of compensation for ministerial services. Thus, a minister can exclude from income the Fair Rental Value (FRV) of the parsonage, or a rental allowance, for income tax purposes. The allowance is excludable only to the extent **it is used for expenses in providing the minister's home**--e.g. rent, mortgage payments, utilities, repairs, etc. This exclusion from income applies for income tax only; the FRV (or rental allowance) is considered income for the purpose of calculating the minister's self-employment tax. In the case of a minister of the gospel, gross income does not include—

Code § 107(1): The rental value of a home furnished to him as part of his compensation, or

Code § 107(2): The rental allowance paid to him as part of his compensation, to the extent used by him to rent or provide a home, and to the extent such allowance does not exceed the fair rental value of the home, including furnishings and appurtenances such as a garage, plus the cost of utilities.

"Minister of the gospel" defined for purposes of the rental allowance exclusion - Examples of specific services the performance of which will be considered duties of a minister of the gospel for these purposes include sacerdotal functions, conduct of religious worship, administration and maintenance of religious organizations and their integral agencies, and teaching and administrative duties at theological seminaries (Reg § 1.107-1(a)).

Rental Allowance Cannot Exceed Reasonable Compensation - The rental allowance is not excludable to the extent it exceeds reasonable compensation for the minister's services. ***Rev Rul 78-448, 1978-2 CB 105*** said that where a minister had a full-time outside job and performed only occasional services for a small church, only 1/15 of his church compensation was excludable.

Qualifications - To qualify for income exclusion of a rental allowance by the minister, his/her employing organization must designate the allowance by official action in advance of the payment ***(Reg § 1.107-1(b))***. For a minister employed by a local congregation, the designation must come from the local church instead of the church's national organization. A national church agency may make the allowance designation for ministers it employs. The minister must qualify as a "minister of the gospel," as defined above.

Effect on Expenses - The tax-free parsonage or rental allowances can present a problem for deduction of a minister's expenses. The portion of the expenses attributable to tax-free income is <u>not deductible</u> (this rule does not apply to home mortgage interest or taxes, which are deductible in full, subject to the usual acquisition debt limitation and SALT cap for years 2018-2025, if the minister itemizes deductions).

> ***Example - Allocating a Minister's Expenses:*** *Pastor Smith received a $4,800 parsonage allowance plus $600 of compensation for services as a minister. Her expenses from ministerial activities were $6,000 (no interest or taxes). Since 89% [$4,800/($4,800 + $600)] of Smith's income relates to the tax-exempt parsonage allowance, $5,340 of her expenses ($6,000 x .89) are disallowed. This is true even if the ministerial expenses are paid out of income from other sources.*

No Parsonage Exclusion for Second Residence: - The IRS successfully appealed the Tax Court decision in Driscoll, (2010) 135 TC No. 27 which had ruled that a minister may exclude under Code Sec. 107 the parsonage allowance he received for a second residence as well as his principal residence. In overturning the tax court ruling the Appeals Court concluded that the word "home" in Code Sec. 107 is not plural, especially when the statutory context of the word does not support a plural connotation. The consistent use of the singular in the legislative history of Code Sec. 107 demonstrated that Congress intended for the parsonage allowance exclusion to apply to only one home. (P.A. Driscoll, CA-11, 2012-1)

<u>RETIRED CLERGY</u> - Rev Rul 63-156, 1963-2 CB 79 allows retired clergy to exclude the rental value of a home or a rental allowance furnished as compensation for past services authorized under a convention of their national church organization. However, the exclusion does not extend to the widow(er) of a retired clergyperson (***Rev Rul 72-249, 1972-1 CB 36***).

<u>REIMBURSEMENT OF EXPENSES</u> - Reimbursements of expenses to a minister by a church are treated in the same manner as reimbursements to employees in secular organizations.

<u>W-2 REPORTING SALARY OF CLERGY</u> - According to Publication 1828, Tax Guide for Churches and Other Religious Organizations, salary a church pays ordained clergy is neither subject to mandatory federal income tax withholding nor to the FICA provisions. However, churches are still required to report the minister's earnings on Form W-2 and the minister may request that the church withhold income tax.

<u>SE TAX FOR CLERGY</u> - A minister who hasn't taken a vow of poverty is subject to self-employment tax on income from services as a minister. A clergy member may have the following sources of income from his occupation as a pastor:

- **W-2 from the church** – The income is subject to income tax but the church does not withhold FICA, and if the cleric has not taken the vow of poverty the income is also subject to SE tax.
- **Schedule C** – Typically this income would be for a cleric who does not work for a specific church, or for one that does but also receives income for presiding over weddings, funerals, etc. This income is taxable and also subject to SE tax but based upon the Schedule C net profit after deducting the expenses. These expenses are those specifically associated only with the Schedule C income.
- **Housing allowance from the church** – To the extent allowed by law, this income is not subject to income tax but is subject to SE tax. Prior to tax reform members of the clergy could deduct their business expenses on Schedule A. However, the expenses had to be prorated between taxable income and non-taxable housing allowance with only the proration attributable to taxable income being deductible. In addition, those expenses attributable to taxable income could be used in offsetting the income subject to SE tax.

TCJA

Although TCJA suspended the deduction for employee business expenses as itemized deduction, they are still allowed as a deduction against a member of the clergy's income subject to SE tax.

Reg 1.1402(a)-11(a) says "In general.—For each taxable year ending after 1954 in which a minister or member of a religious order is engaged in a trade or business, within the meaning of Section 1402(c) and § 1.1402(c)-5, with respect to service performed in the exercise of his ministry or in the exercise of duties required by such order, net earnings from self-employment from such trade or business include the gross income derived during the taxable year from any such service, less the deductions attributable to such gross income."

In addition, the instructions for Schedule SE for 2018 say "If you were a duly ordained minister who was an employee of a church and you must pay SE tax, the unreimbursed business expenses that you incurred as a church employee are not deductible as an itemized deduction for income tax purposes. However, when figuring SE tax, subtract on line 2 [of Sch. SE] the allowable expenses from your self-employment earnings and attach an explanation."

> ***Example*** *- Pete receives a salary from the church of $30,000 and a parsonage allowance of $10,000. He has unreimbursed employee business expenses of $6,000 (before excluding nondeductible amounts attributable to his exempt income). Pete's net earnings from self-employment are $34,000 ($30,000 + $10,000 - $6,000). All of Pete's unreimbursed business expenses are deductible for self-employment tax purposes. The requirement of allocating business expenses to exempt income applies to the income tax computation, not the self-employment tax computation.*

CLERGY EXEMPTION FROM SE TAX

An ordained minister may be granted an exemption from SE tax from ministerial services only. To qualify, the church employing the minister must qualify as a religious organization under ***Code Section 501(c)(3)***. Application for exemption is filed in triplicate on Form 4361, Application for Exemption from Self-Employment Tax for Use by Ministers, Members of Religious Orders and Christian Science Practitioners.

The application must be filed on or before the extended due date of the return for the second tax year for which the individual has net earnings from self-employment of $400 or more (part of which is from services as a minister). A late application will be rejected. Time for applying starts over when a minister who was not opposed to accepting public insurance (i.e., Social Security benefits) re-enters a new ministry (e.g., adopts a new set of beliefs that include opposition to public insurance with a different church). However, the IRS has said that there is no second chance to apply for exemption by a minister who is ordained in a different church but whose belief regarding public insurance doesn't change (i.e., the minister opposed acceptance of public insurance in both faiths). **(CCM 200404048)**

CALIFORNIA DIFFERENCES

Although California conforms to federal law allowing clergy members to exclude rental allowances received as part of their compensation, California does not conform to the federal provision that limits the exclusion to the fair rental value of the home, including furnishings and appurtenances, plus the cost of utilities. ***(R&TC 17131.6)*** Consequently, clergy members that are required to limit the amount of their exclusion for federal purposes are allowed to exclude an additional amount on their California personal income tax returns.

Itemized Deductions - California conforms to federal law as it existed on January 1, 2015, with specific significant differences, so most of the TCJA changes, including the suspension of Tier 2 miscellaneous itemized deductions for 2018-2025, won't apply for California purposes absent conforming California legislation. If California continues to allow employee business expenses as a miscellaneous itemized deduction, adjustment (increase in this case) to federal itemized deductions would be made on California Schedule CA.

Renter's Credit – If the minister resides in church property that is exempt from real property tax, the minister is not eligible for the CA renter's credit.

NOTES

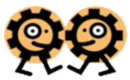
CO-OWNED REAL PROPERTY

A single taxpayer's ownership of real property with another single individual brings up several good tax questions such as:

- What basis does each have in the property?
- Who gets the deductions related to the property?
- What happens when the property is sold?
- What are the consequences if one owner dies?

RAPID FINDER

TYPES OF JOINT OWNERSHIP FOR SINGLE INDIVIDUALS:



Joint Tenancy - In joint tenancy, each tenant gets an undivided interest in the entire property. Title to the property automatically goes to the survivor at the death of an owner.

Tenants in Common- This is a form of joint ownership in which the parties own a specific share of the property. Tenants in common have no rights of survivorship. If one owner dies, his/her interest goes to named beneficiaries, or if no beneficiary is indicated in the decedent's will or trust, to his/her estate, not the remaining co-owners (unless they were designated as the beneficiaries).

BASIS OF CO-OWNED PROPERTY: The usual rules for basis apply, with basis being split according to each owner's investment in the property.

A surviving joint tenant in joint tenancy property applies the FMV at date of death rule to the deceased joint tenant's share of the property. (**Caution**, this rule may not apply to some deaths in 2010.)

Example - Inheriting Property as Joint Tenant - *Ramon and Al owned business property as joint tenants. Ramon had furnished 2/3 of the $30,000 purchase price and Al the remainder. Prior to Ramon's death, depreciation deductions of $12,000 had been claimed on the property. When Ramon died, the property was worth $60,000. Local law mandates that Ramon and Al as joint tenants each have a half interest in the property. Al's basis at Ramon's death is computed as follows:*

Al's interest purchased with his own funds (1/3 of original cost)	*$10,000*	
Interest inherited from Ramon (2/3 of $60,000 FMV)	*40,000*	*$50,000*
Less: 1/2 of depreciation		*<6,000>*
Al's basis at Ramon's death		*$44,000*

If Al hadn't contributed any part of the purchase price, his basis at Ramon's death would be $54,000 ($60,000 FMV less $6,000 depreciation on the half interest he acquired before the date of death).

If local law had determined that Al had no interest in the income from the property and if he contributed no part of the purchase price, his basis at Ramon's death would be $60,000 (the FMV).

Note: *If the surviving joint tenant is a spouse, a more liberal rule than shown in the example above applies.*

INCOME FROM JOINTLY HELD PROPERTY: For co-owners other than married couples, joint ownership of real estate provides a simple way of splitting income from the property. For example, annual rents are divided among co-owners according to their ownership interest and the allocable share is reported on each one's separate return.

Transfer of rented property may shift the tax burden on rental income. In order for the shift to be valid, however, the transferor has to give up control of the property and intend that a transfer occur. In ***Hutcherson, George (1984) TC Memo 1984-165***, a taxpayer was taxed on rent paid to his business associates from rental property he owned. He had transferred the property to the associates in order to get it out of the reach of creditors.

Permission to use property is not conveyance of a property interest that transfers tax burden ***(Helm, Muriel, (1956) 27 TC 270).*** **Note:** A taxpayer who switches ownership of income-producing property to joint ownership with a dependent (e.g., to a son or daughter) may lose the dependency exemption. This must be compared to the income tax savings of switching ownership. The transfer is considered a gift that would most likely require filing a gift tax return (Form 709).

DISPOSITIONS OF JOINTLY OWNED REAL PROPERTY: If jointly owned real estate is sold, gain or loss from the sale is generally divided among the co-owners in proportion to their share of the property. There is an exception to this rule if joint ownership is created during sale negotiations for tax saving purposes. In that case, gain is not divided but is fully taxed to the original owner of the property ***(Lannan, Robert v. Kelm, (1955, CA8) 47 AFTR 741).***

Different Uses By Co-Owners-The way in which one co-owner uses a co-owned property is not necessarily attributed to the other. Where a nonactive co-owner's interest is as an investor, profit from the sale of a property is capital gain to that person even though the other owner holds the property for sale to customers. Two factors should be looked at in determining whether property is held for sale:

- Whether the contemplated purchasers are "customers" of the taxpayer;
- Whether the business activity of others should be imputed to the taxpayer so as to be considered "taxpayer's business".

Case in point: A doctor invested with one of his patients in the purchase of unimproved property. He was allowed capital gain treatment on land subdivided and sold in lots over a six-year period where the subdivision was carried out because the doctor's co-owner needed money and the land couldn't be sold as acreage. The co-owner did all the work of the subdivision and received a 10% commission on the sale. ***(Van Drunen, Jacob, TC Memo 1964-15)***

PROBLEM AREA: A taxpayer was co-owner of both depreciable and nondepreciable property and bought out the other owner's interest in an "exchange" that lacked economic substance. Then the taxpayer exchanged his joint interest in the depreciable property for the co-owner's interest in the nondepreciable property. On the same day, the depreciable assets were purchased from the co-owner. The taxpayer was hoping for a basis for depreciable assets equal to the purchase price. The court allocated the purchase price between both the depreciable and nondepreciable property. ***Harris, Era v. Comm (1971, CA9) 27 AFTR 2d 71-824.***

SALE OF JOINTLY-OWNED HOME: When a jointly-owned home which is the principal residence of two (or more) single owners is sold, each owner applies the rules of Sec. 121 separately. Thus, each is entitled to exclusion of gain privileges under Sec. 121. A former exclusion of gain election by one owner does not affect the other's right to elect the exclusion.

DEDUCTIONS RELATED TO CO-OWNED PROPERTY:

Interest Expense - An interest expense deduction is available only to those who are primarily liable on an underlying debt. However, when two or more persons are jointly and severally liable for a debt, each is primarily liable for the debt; each is entitled to a deduction for the interest on that debt that he/she pays. When co-signers make a gift to another co-signer who paid the interest, this has no effect on the rule.

A father was allowed to deduct the interest he paid on a note that he co-signed with his son as evidence of a student loan to the son for tuition, fees, etc. ***(Rev Rul 71-179, 1971-1 CB 58).***

A father was allowed to deduct mortgage interest paid on property held in common with his daughter. It didn't matter that he had temporarily conveyed legal title to his daughter to avoid creditors' claims ***(Conroy, Thomas, (1958) TC Memo 1958-6).***

Where mortgaged property is owned jointly, and joint owners are jointly liable on the mortgage, each owner is entitled to a deduction for the mortgage interest he/she actually pays out of his own funds.

However, when there isn't joint liability on the mortgage or where there is right to reimbursement, and one joint owner pays all or part of the mortgage interest, the deductibility is the same as under the rules for taxes (see below).

Rev Rul 78-362, 1978-2 CB 248. Are a joint tenant's monthly payments of a mortgage debt on property held jointly regarded as gifts to the other joint tenants?

FACTS: An individual provided funds for the downpayment for a purchase of real property and then conveyed two-thirds of the property to his two children; the property was held in joint tenancy. The individual subsequently made payments on the mortgage without expecting reimbursement from the children.

FINDING: Transfer of the property was termed a gift to each child--after the transfer, the taxpayer and each of the children held a one-third interest in the property. The subsequent mortgage payments were also considered monthly gifts to each child, each equal to one-third of the mortgage payment. ***Amundson, Brent, (1990) TC Memo 1990-337.***

FACTS: A taxpayer's sister bought a home that she financed with a mortgage. She then agreed to sell one-half of the property to the taxpayer in return for the taxpayer paying the mortgage. The taxpayer made the mortgage payments, but didn't disclose his ownership or become directly obligated to the mortgagee (he didn't want to incur the fees required for refinancing). However, an unrecorded quitclaim was made on the property.

FINDING: The taxpayer had an enforceable, interest-bearing debt to his sister. His payments to the mortgagee were, in effect, payments to his sister. Taxpayer gets an interest deduction for his payments.

FORM 1098: Interest payments on a mortgage are reported to the payer on Form 1098. This information is also reported to the IRS for matching purposes. The 1098 will usually be issued to only one co-owner, creating reporting and matching problems for the other(s). To avoid the problem of getting unwanted correspondence from the IRS, the co-owners who didn't receive a 1098 should report the interest they paid on line 8b of Schedule A (2018). They should also attach a statement to their tax return showing the name and address of the person who did receive the 1098. Next to line 8b, write "See Attached" (1040, Sch. A Instructions, Pg. A-9, 2018). Also see Chapter 7.05 for more information on Form 1098.

Does Acquisition Debt Limit Apply to Residence or Individual Co-Owners?

According to a Chief Counsel Advice (CCA 200911077) where two or more individuals own a residence with acquisition debt in excess of $1 Million dollars, the individuals jointly can only deduct the interest on the first $1 Million of acquisition debt.

An appeals court overturned an earlier Tax Court ruling (*C. J. Sophy, 138 TC No. 8, Dec. 58,965)* and took the same position the IRS put forward in the 2009 Chief Counsel Advice cited above.

The Ninth Circuit Court of Appeals reversed the Tax Court's decision and the IRS has announced its acquiescence with the Ninth Circuit's decision. Under this interpretation, the two ***unmarried co-owners are collectively limited to a deduction for interest paid on a maximum of $2.2 million, rather than $1.1 million, of acquisition and home equity indebtedness*** (Voss - IRB 2016-31, p. 193). Applying the *Voss* ruling to the changes made by the TCJA, it would seem that for years 2018 through 2025 the collective limit for acquisition indebtedness incurred after December 15, 2017 for two unmarried co-owners would be $1.5 million (2 x $750,000). No equity debt interest is deductible in 2018 through 2025; therefore, no equity debt is included in determining the collective limitation.

This can have significant implications for unmarried co-owners of a home.

AMENDED OPPORTUNITY: Taxpayers who previously limited their interest deduction in accordance with the IRS' position and Tax Court ruling may be able to amend open-year prior returns for a refund.

TAXES: Where a taxpayer is not 100% owner of property on which a deductible tax is paid, deductibility of the tax that was paid depends on the form of joint ownership. Some forms of joint ownership entail joint and several liability on the part of each owner for taxes on the property. Where there is joint and several liability for a tax, the tax may be deducted by the one who pays it.

In ***Conroy, Thomas, (1958) TC Memo 1958-6,*** a father and daughter owned property as tenants in common. The father's payment of the whole property tax bill was fully deductible since each owner has equal liability for the whole tax bill.

Where a court wasn't able to determine whose funds were used to make the tax payment, each party was entitled to one-half of the deduction ***(Finney, Barbara, (1976) TC Memo 1976-329).***

Where tenants in common don't have joint and several liability for a tax, each tenant is entitled to deduct only his/her proportionate share of the tax.

Where a taxpayer and his mother owned property as equal tenants in common, and local law (PA) obligated the taxpayer to pay only his share of the real estate taxes on the property, he could deduct only his share even though he paid all the taxes ***(James, Joseph J., (1995) TC Memo 1995-562)***.

Other cases indicate that a taxpayer will be allowed to deduct only his proportionate share of taxes on co-owned property, where he paid all of those taxes, but had a right to be reimbursed by the other co-owners for the latter's proportionate shares of the taxes owed (e.g., ***Smith, John (1955, DC NH) 48 AFTR 615).***

When a co-tenant pays all (or a part) of taxes on co-owned property to avoid personal liability or to preserve his/her interest in the property, he/she is entitled to a deduction for the full amount of the payment ***(James, Joseph J., (1995) TC Memo 1995-562).***

In ***Powell, Lulu, (1967) TC Memo 1967-32,*** the court felt that the taxpayer had a beneficial interest in the entire property (right to occupy) and the payment was needed to protect this interest, even without joint and several liability.

Movius, Mary Est, (1954) 22 TC 391 states that a taxpayer who owns a beneficial interest in property and pays taxes on it to protect that interest, may deduct the payment even though legal title is in someone else's name and the tax is assessed against the latter.

Applying "substance over form," the Tax Court in ***Lang, Judith F, (2010) TC Memo 2010-286***, held that real estate tax payments made by a mother to a local government on behalf of her daughter were deductible by the daughter. The payments were considered gifts to the daughter who then transferred them to the tax agency, even though the mother had made the payments directly to the government. Since the mother didn't claim a deduction for them, and wasn't eligible to deduct the taxes because they were not imposed on her, there was no chance of double deduction.

SHARED EQUITY ARRANGEMENTS: Rental of a dwelling to a person having an equity interest in the home won't be considered personal use by the taxpayer if the rental is done under a "shared equity financing agreement". ***Sec. 280A(d)(3)(B)(i).*** These agreements, often entered into between parents and children, enable the latter to purchase a home. A "shared equity financing agreement" is one where two or more people acquire qualified ownership interests in a home and one (or more) of the owners is entitled to occupy the home as a principal residence. That person pays rent to the non-occupant owner(s) at fair rental value (FRV). ***Sec. 280(d)(3)(C).***

Proposed Reg 1.280A-1(e)(3)(v) provides that a shared equity financing arrangement may exist, even if one or more of the owners doesn't charge the occupant fair rent for use of the home. However, the exception to the personal use rules for fair rental to other persons for use as a principal residence, applies only to those owners who do charge FRV.

Fair rental is determined at the time the shared equity financing agreement is entered into and must take into account the occupant's qualified ownership interest. "Qualified ownership interest" is an undivided interest for more than 50 years in the entire dwelling and any appurtenant land acquired in the transaction to which the shared equity financing agreement relates.

CASUALTY LOSSES ON CO-OWNED PROPERTY: Where the same casualty damages co-owned property (other than property owned by spouses), the $100 floor applies separately to each person. In general, one joint owner can't have a theft loss deduction for jointly owned property taken by the other joint owner, since the latter has a right to possession. However, if the other owner can show that he/she has a superior interest in the property, a theft loss between owners may be allowed ***(Dandeneau, Alice, (1971) TC Memo 1971-128).***

Note: *For years 2018-2025, per the TCJA, the only deductible personal casualty losses are those incurred in federally declared disaster areas are deductible.*

TAX LIENS ON CO-OWNED PROPERTY: The Supreme Court held that a district court could enforce a tax lien of a delinquent taxpayer. A forced sale of an entire property was allowed even though a non-delinquent person also had an interest in the property. However, the non-delinquent person was entitled to an appropriate portion of the sales proceeds. Under some circumstances, the district court can use its discretion to disallow a request for the forced sale.

California is a community property state and as such provides married couples with three options for holding title to property: joint tenancy, community property, and community property with right of survivorship

Joint tenancy - guarantees that the surviving spouse will inherit the property with little or no transfer cost. The survivor is also assured of inheriting the decedent's share since a secret will cannot divest a joint tenancy interest. However, the surviving spouse receives a step-up (or step-down) in basis of only 50 percent of the FMV at the time of the decedent's death. The remaining 50 percent retains the surviving spouse's original basis.

Community Property - provides a 100-percent step-up (or step-down) of the property's basis. Both the decedent's and the survivor's halves get a new basis of the FMV upon the death of the first spouse. Unlike joint tenancy, each spouse can will his or her share of the community property to anyone at all. Changing title requires filing a "spousal property petition" and generally will cause the surviving spouse to incur legal costs and can take up to 6 to 8 weeks.

Community Property with Right of Survivorship - combines the tax benefits of holding title as community property with the ease of property transfer available to the survivor of joint tenancy property. Holding title this way results in a double step-up in basis; requires that the surviving spouse inherit the property; and allows the property to pass to the surviving spouse without court action.

General Presumption of Community Property – There is a general presumption that all real property in California and all personal property wherever situated, that is acquired by a spouse during marriage, is community property (Family Code Sec 760). The presumption may be overcome (rebutted) by certain types of evidence to prove that the property is actually separate. Some property acquired during marriage is specifically excluded from the community property presumption (Family Code Sec. 802 and 803). The general community property assumption specifically applies to:

- All real property (including leased) that is located in California and acquired during marriage by a spouse while domiciled in California (Family Code Sec 760).
- All personal property, wherever located that is acquired during marriage by a person while domiciled in California (Family Code Sec 760).
- All community property transferred by husband and wife to a trust pursuant to Family Code Sec 761.

Type of Ownership By Decedent	Date of Death	Beneficiary of Decedent's Share	Basis of Decedent's Share	Basis of Surviving Spouse's Share
Separate Property		Beneficiary	FMV	---
Community Property	After 12/31/86	Spouse or anyone other than spouse	FMV	FMV
Joint Tenancy with Spouse	After 12/31/84	Spouse or anyone other than spouse	FMV	Cost
Community Property with Right of Survivorship		Spouse	FMV	FMV

MILITARY ISSUES

Overview

- **Taxable Pay**
  - Basic Pay
  - Bonus
- **Nontaxable Pay** (normally not included in W-2)
  - Combat Zone Pay
    - Enlisted personnel – 100%
    - Commissioned Officers - limited to the highest rate of enlisted pay.
  - Living (Housing) & Family Allowances
    - Property taxes still deductible within TCJA limit.
    - Mortgage interest still deductible.
  - Death Allowances
  - Moving Allowances
  - Treatment of Combat-Excluded Wages for Other Tax Considerations:
    - Treat as "earned" income for IRA Contributions
    - Elect to treat as Earned Income for EITC purposes
    - Treated as "earned" income for purposes of the refundable portion of the child credit.
- **Home Sale** – 5-yr look back can be suspended up to 10 years while on qualified extended duty.
- **Reservist Travel** – Overnight and more than 100 miles = AGI adjustment
- **Military Base Closure** – Excludable HAP payments: Sales price – 95% of value before closure announcement
- **Missing Status** – Date of death is date removed from missing status
- **State Benefit Payments** – Excludable if in combat zone.
- **Early Withdrawal Penalty** – Reservist Exception.
- **Death Gratuity Payments** – Rollover to Roth or Coverdell accounts.
- **Retired Military Disability Compensation -** VA payments nontaxable, DFAS payments taxable
  - Retroactive Disability – Refund opportunity for previously taxed retirement payments
- **Combat Zone Forgiveness** – Tax liability forgiven for:
  - Year of death, and
  - Any earlier year ending on or after first day in combat zone.
- **Spouse of Military Member** – Can elect military member's state of residence starting 2018

New Law & Stuff

NONMILITARY SPOUSE STATE OF RESIDENCE ELECTION

The Veterans Benefits and Transaction Act of 2018, sponsored by Senator Jon Tester of Montana, became public law on 12/31/2018. Sec. 302 of that legislation added the following election:

"**Election**—For any taxable year of the marriage, the spouse of a servicemember may elect to use the same residence for purposes of taxation as the servicemember regardless of the date on which the marriage of the spouse and the servicemember occurred."

The election "shall apply with respect to any return of State or local income tax filed for any taxable year beginning with the taxable year that includes the date of the enactment of this Act." Thus, this provision is effective for 2018 and future years.

RAPID FINDER

Benefit - The benefit of this election is that a spouse of a servicemember stationed in a high-income tax state can elect the state of residency of the servicemember whose resident state has no or low state income tax and not be subject to the state taxes where his or her spouse is stationed. Previously, under the Military Spouses Residency Relief Act of 2009, a military spouse could claim the same resident state as the servicemember only if the spouses had the same domicile and the nonmilitary spouse moved to be with the servicemember.

Example – Jack, a servicemember whose state of residence is Texas, is stationed in California. Sally, Jack's spouse, is employed in California and prior to this law change was required to pay California tax on her wages earned in California. Under this new law, Sally can elect her residency to be the same as Jack's – in this case Texas – which has no state income tax.

The Details

TAXABLE – NONTAXABLE PAY & ALLOWANCES

Taxable Pay - These items are included in gross income, ***unless*** the pay is for service in a combat zone.

- **Basic pay –** including active duty, back wages, reserve training, training duty and drills.
- **Special pay –** including aviation career incentives, diving duty, foreign duty, hazardous duty, hostile fire or imminent danger, medical and dental officers, nuclear-qualified officers and special duty assignment pay.
- **Bonuses –** enlistment and reenlistment, overseas extension, career status and officer.
- **Other payments –** including accrued leave, personal money allowances paid to high-ranking officers, student loan repayment from programs such as the Department of Defense Educational Loan Repayment Program when year's service (requirement) is not attributable to a combat zone.

Nontaxable Pay & Allowances

- **Special pay –** including compensation for active service, while in a combat zone or a qualified hazardous duty area (limited amount for commissioned officers – see "Combat Zone Exclusion" below).
- **Living allowances** - basic allowance for housing (BAH), housing and cost-of-living allowances abroad whether paid by the U.S. Government or by a foreign government and overseas housing allowance.
- **Family allowances -** certain educational expenses for dependents, emergencies, evacuation to a place of safety and separation.
- **Death allowances** - burial services, death gratuity payments to eligible survivors and travel of dependents to burial site.
- **Moving allowances** – including relocation, move-in housing, moving household and personal items, moving trailers or mobile homes, storage, temporary lodging and temporary lodging expenses, and military base realignment and closure benefits (see below).
- **Travel allowances –** including annual roundtrip for dependent students, leave between consecutive overseas tours, and reassignment in a dependent restricted status, transportation for military taxpayer and dependents during ship overhaul or inactivation and per diem.
- **State Benefit Payments** - Any bonus payment made by a state or political subdivision to any member or former member of the U.S. uniformed services, or to his dependent, only by reason of the member's service in a "combat zone" as defined under Code Sec. 112(c)(2) shall be treated as a "qualified military benefit" excludable from gross income. (Code Sec. 134(b)(6))
- **Other payments** - defense counseling, disability (including payments received for injuries incurred as a direct result of a terrorist or military action), group-term life insurance, professional education, ROTC educational and subsistence allowances, survivor and retirement protection plan premiums, uniform allowances and uniforms furnished to enlisted personnel.
- **In-kind military benefits –** including legal assistance benefits, space-available travel on government aircraft, medical/dental care and commissary/exchange discounts.

DEATH GRATUITY MAY BE ROLLED TO ROTH IRA AND COVERDELL ACCOUNTS

A military death gratuity and amounts received under the Service members' Group Life Insurance (SGLI) program may be rolled over to a Roth IRA or Coverdell education savings account without regard to the Roth or Coverdell contribution limits that otherwise apply. (Code Sec. 408A(e) and Code Sec. 530(d)(9))

The rollover must be made no later than one year after the date on which the military death gratuity or SGLI payment is received. The maximum amount that can be contributed to a Roth IRA or Coverdell Savings Account is limited to the sum of the military death gratuity and SGLI payments that the individual receives. (Act § 109(d)(1))

HOME MORTGAGE INTEREST & TAXES

The military taxpayer can deduct mortgage interest and real estate taxes as an itemized deduction, even if they are paid with nontaxable military housing allowance pay. The home mortgage interest is, however, still subject to the general rules for deducting home mortgage interest (see Chapter 7.05). The TCJA limits the real property tax and state/local income or sales tax deductions to $10,000 annually, effective 2018 through 2025. (See Chapter 7.04)

HOME SALE GAIN EXCLUSION

Code Sec. 121 allows taxpayers to exclude gain on a home sale if they have owned and used the home as a principal residence for 2 of the 5 years prior to the sale. A reduced maximum exclusion may apply if the 2-year rule is not met because of an unforeseen circumstance that was not anticipated when the home was purchased, such as a work-related move of over 50 miles. Thus, a military taxpayer who sells his or her primary residence and does not meet the two-out-of-five-years ownership and use tests due to a move to a new permanent duty station may qualify for a reduced maximum exclusion amount.

Exception to Test Period - A military taxpayer may choose to suspend the 5-year test period for ownership and use during any period the taxpayer (or spouse) serves on ***qualified official extended duty*** as a member of the Armed Forces. This means that the 2-year use test may be met even if, because of military service, the taxpayer did not actually live in his or her home for at least the required 2 years during the 5-year period ending on the date of sale.

<u>Suspension Period</u> - The period of suspension cannot last more than 10 years and can be revoked by the taxpayer at any time. The 5-year period cannot be suspended for more than one property at a time.

<u>Qualified Official Extended Duty</u> - A taxpayer is on qualified official extended duty when at a duty station that is at least 50 miles from his or her main home, or while residing under orders in government housing, for more than 90 days or for an indefinite period.

> ***Example*** *– Sarge bought and moved into a home in 2011 that he lived in as his main home for 2½ years. For the next 6 years, he did not live in the home because he was on qualified official extended duty with the Army. He sold the home for a gain in 2019. To meet the use test, Sarge chooses to suspend the 5-year test period for the 6 years he was on qualifying official extended duty – he disregards those 6 years. Sarge's 5-year test period consists of the 5 years before he went on qualifying official extended duty. He meets the ownership and use tests because he owned and lived in the home for 2½ years during this test period.*

> ***Example*** *– Col. Potter owned and lived in his home in Virginia for 3 years until he was stationed overseas in January 2004. He was still overseas in January 2019 when he sold the house. He may disregard just 10 of the 15 years he was overseas, with the result that the 5-year test period covers only years he did not live in the house. Col. Potter will not be eligible for the home sale gain exclusion.*

MOVING EXPENSES

TCJA suspended the moving deduction for all moves except for members of the Armed Forces on active duty and required to move because of a permanent change of station. Moves because of a permanent change of station do not need to meet the normal distance or time tests for conventional moves.

Permanent change of station - A permanent change of station includes:

- A move from home to the first post of duty when appointed, reappointed, reinstated, called to active duty, enlisted or inducted (Reg § 1.217-2(g)(3)(i)),
- A move from one permanent post of duty to another permanent post of duty at a different duty station, even if the member separates from the Armed Forces immediately or shortly after the move (Reg § 1.217-2(g)(3)(iii)), and
- A move from the last post of duty to home or to a nearer point in the U.S. in connection with retirement, discharge, resignation, separation under honorable conditions, transfer, relief from active duty, temporary disability retirement, or transfer to a fleet reserve, if the move occurs within one year or the termination of active duty or within the period prescribed by the Joint Travel Regulations promulgated under the authority in sections 404 through 411 of title 37 of the U.S. Code (Reg § 1.217-2(g)(3)(ii)).

RESERVISTS' TRAVEL EXPENSES

Armed Forces reservists who travel more than 100 miles away from home and stay overnight in connection with service as a member of a reserve component can deduct travel expenses as an adjustment to gross income. This is in lieu of deducting those expenses as a miscellaneous itemized deduction (subject to the 2% of AGI limitation). Thus, this deduction can be taken even if the taxpayer does not itemize their deductions. The TCJA suspended Tier 2 miscellaneous deductions for years 2018 through 2025 but the reservists' above-the-line travel expenses deduction is not affected.

Limit on Travel Expenses – Unreimbursed expenses for the reservist's transportation, meals (subject to the 50% limit) and lodging qualify for the above-the-line deduction, but the deduction is limited to the amount the federal government pays its employees for travel expenses, i.e., the general federal government per diem rate for lodging, meals and incidental expenses applicable to the locale and the standard mileage rate for car expenses plus parking and ferry fees and tolls.

Member of Reserve Component – A member of a reserve component of the Armed Forces is an individual who is in the:

- Army, Navy, Marine Corps, Air Force, or Coast Guard Reserve;
- Army National Guard of the United States;
- Air National Guard of the United States; or
- Reserve Corps of the Public Health Service.

MILITARY BASE REALIGNMENT AND CLOSURE BENEFIT

Under the Dept. of Defense's Homeowners Assistance Program (HAP), payments are made to compensate qualifying uniformed service members and federal employees for the loss in value of a residence at or near a military installation that is partially or totally closed. These HAP payments are generally excluded from income. The excludable amount is limited to:

- 95% of the property's fair market value, determined by the Secretary of Defense, before public announcement of intent to close all or part of the military facility, minus
- The property's fair market value at the time of sale.

Any portion of the payment in excess of the limit is included in income.

MISSING STATUS

The date of death for a member of the Armed Forces who was in a missing status (missing in action or prisoner of war) is the date his or her name is removed from missing status for military pay purposes. This is true even if death actually occurred earlier.

COMBAT ZONE EXCLUSION

A member of the U.S. Armed Forces, who serves in a combat zone, can exclude certain pay from income. Generally, combat pay is not included in the individual's pay reported on Form W-2.

Excludable Pay - The amount excludable generally includes:

- Active duty pay earned in any month served in a combat zone.
- Imminent danger/hostile fire pay.
- A reenlistment bonus, if the voluntary extension or reenlistment occurs in a month served in a combat zone.
- Pay for accrued leave earned in any month served in a combat zone. The Department of Defense must determine that the unused leave was earned during that period.
- Pay received for duties as a member of the Armed Forces in clubs, messes, post and station theaters, and other non-appropriated fund activities. The pay must be earned in a month served in a combat zone.
- Awards for suggestions, inventions, or scientific achievements the service member is entitled to because of a submission made in a month served in a combat zone.
- Student loan repayments that are attributable to the period of service in a combat zone (provided a full year's service is performed to earn the repayment).

Amount of Exclusion

- **Enlisted Military** - Enlisted members, warrant officers, or commissioned warrant officers are allowed to exclude their entire pay while serving in a combat zone. Any part of a month in a combat zone counts as an entire month. Periods hospitalized as the result of wounds, disease and injury in combat zone are also excluded. Hospitalization beginning more than two years after combat activities cannot be excluded. Hospitalization need not be in the combat zone.
- **Commissioned Officers** - Commissioned officers may exclude pay; however, the amount of their exclusion is limited to the highest rate of enlisted pay (plus imminent danger/hostile fire pay received) for each month served in a combat zone or where hospitalized, as a result of service there.

Partial Month of Service - If service in a combat zone is for one or more days during a particular month, the service member is entitled to an exclusion for that entire month.

Combat Zones - A combat zone is any area the President of the United States designates by Executive Order as an area in which the U.S. Armed Forces are engaging or have engaged in combat. An area usually becomes a combat zone and ceases to be a combat zone on the dates the President designates by Executive Order.

- **Afghanistan area.** By Executive Order No. 13239, Afghanistan (and airspace above) is designated as a combat zone beginning September 19, 2001. Since direct support of military operations in Afghanistan is provided in the following locations, service in these areas was designated as eligible for combat zone benefits effective December 14, 2001 (Notice 2002-17):
  - Pakistán, Tajikistan, Jordan, Uzbekistán, Kyrgyzstán
  - Philippines (from January 9, 2002 through September 30, 2015).
  - Djibouti (as of July 1, 2002).
  - Yemen (as of April 10, 2002).
  - Somalia and Syria (as of January 1, 2004).
  - **The Kosovo area.** By Executive Order No. 13119 and Public Law 106–21, the following locations (including air space above) were designated as a combat zone and a qualified hazardous duty area beginning March 24, 1999.
  - Serbia/Montenegro, Albania, Kosovo, The Adriatic Sea, The Ionian Sea—north of the 39th parallel, Airspace in connection with the operation
- **Arabian Peninsula Areas.** By Executive Order No. 12744, the following locations (and airspace above) were designated as a combat zone beginning January 17, 1991.
  - The Persian Gulf, The Red Sea, The Gulf of Oman, Arabian Sea (part of), The Gulf of Aden, Iraq, Kuwait, Saudi Arabia, Oman, Bahrain, Qatar, United Arab Emirates.
  - Jordan (certified by Dept. of Defense for combat zone tax benefits as of March 19, 2003).
  - Lebanon (certified by Dept. of Defense for combat zone tax benefits as of Feb. 12, 2015).
  - Sinai Peninsula – Retroactive designation – As of June 2015 (IR-2018-95) – see more below

Treatment of Combat-Excluded Wages for Other Tax Considerations:

- **Child Credit** - Excluded combat pay is treated as earned income for purposes of the refundable portion of the child credit.
- **Earned Income Tax Credit (EITC)** - A taxpayer may elect to treat combat pay that is otherwise excluded from gross income as earned income for purposes of the EITC. The amount of the service member's nontaxable combat pay should be shown on Form W-2, in box 12, with code Q.
  Making this election for EITC purposes may or may not be advantageous. If the taxpayer has earned income below the maximum amount of earned income on which the credit is calculated, including the combat pay will increase the credit amount. On the other hand, if the taxpayer's earned income is already in the phase-out range, electing to include combat pay as earned income will decrease the amount of credit that can be claimed.
- **IRA Contributions** – Excluded combat pay is treated as if it were includible compensation for IRA purposes.

RETROACTIVE COMBAT ZONE DESIGNATION – SINAI PENINSULA

U.S. Armed Forces members who served in the Sinai Peninsula of Egypt may qualify for combat zone tax benefits retroactive to June 2015. (IR-2018-95)

Under TCJA, members of the U.S. Army, U.S. Navy, U.S. Marines, U.S. Air Force, and U.S. Coast Guard who performed services in the Sinai Peninsula can now claim combat zone tax benefits. The bill extended the limitation on time for filing a claim for a credit or refund under Code Sec. 6511(a) to one year after the Defense Secretary provides notice to affected service members of the amount of improperly withheld taxes, and instructions for filing amended tax returns to recover the taxes.

Combat pay received on or after Jan. 1, 2018 and through 2025, will be correctly reported on any W-2 forms issued to any service member who serves in the Sinai Peninsula. Service members who served in the Sinai Peninsula in 2015, 2016, or 2017 can provide documentation of their service to their finance officer and ask for a Form W-2c, Corrected Wage and Tax Statement.

COMBAT ZONE FORGIVENESS

If a member of the U.S. Armed Forces dies while in active service in a ***combat zone*** or from wounds, disease, or other injury received in a combat zone, the decedent's income tax liability is forgiven for:

- The tax year in which death occurred, and

- For any earlier tax year ending on or after the first day the member served in a combat zone in active service. If the individual served in more than one combat zone prior to his or her death, no tax is imposed for the years preceding the death starting with the year the individual first served in a combat zone. However, imposition of the statutory time limits for claiming refunds could limit the years for which tax already paid may be refunded. ***(CCM 200447035)***

Any forgiven tax liability for the year of death that has already been paid will be refunded, and any unpaid tax liability for that year at the date of death will be forgiven. In addition, any unpaid taxes for prior years will be forgiven and any prior year taxes paid after the date of death will be refunded (but see "Claims for Tax Forgiveness" below). This provision also applies to a member of the Armed Forces serving outside the combat zone if the service:

- Was in direct support of military operations in the zone, **and**
- Qualified the member for special military pay for duty subject to hostile fire or imminent danger.

TERRORISTIC OR MILITARY ACTION FORGIVENESS (IRC Sec 692)

Tax liability is forgiven for an individual who:

1) Is a military or civilian U.S. employee at death, and
2) Dies from wounds or injury incurred while a U.S. employee in a terroristic or military action regardless of where the terroristic or military action occurred.

Tax is forgiven for the year in which the individual dies and any prior taxable year in the period beginning with the last tax year ending before the decedent's wounds or injury occurred.

Terroristic or Military Action - is any terroristic activity primarily directed against the United States or its allies, or any military action involving the U.S. Armed Forces resulting from violence or aggression against the United States or its allies. Any multinational force in which the United States participates is considered an ally of the United States.

Example - *Army Private John Kane died in 2019 of wounds incurred outside the United States in a terroristic attack in 2018. His income tax liability is forgiven for all tax years from 2017 through 2019. Refunds are allowed for the tax years for which the period for filing a claim for refund has not ended.*

CLAIMS FOR TAX FORGIVENESS

If the tax-forgiveness provisions apply to a prior year's tax that has been paid and the period for filing a refund claim has not ended, the tax will be refunded. If any tax is still due, it will be canceled. Generally, the period for filing a claim for credit or refund of income tax is 3 years from the time the return was filed, or 2 years from the time the tax was paid, whichever is later. If death occurred in a combat zone, or from wounds, disease, or injury incurred in a combat zone, the deadline for filing a claim for credit or refund is extended. See Combat Zone Extension below.

Procedures for claiming forgiveness - All returns and refund claims claiming the tax benefits under Code Sec. 692(c) should be identified by writing the applicable designation provided in IRS Publication 3 (or in other IRS guidance) in bold letters on the top of page one of the return or refund claim and on the total tax line. If the death occurs in the U.S. special procedures apply; See Rev Proc 2004-26.

Attachments - All returns and claims for refund must include the following attachments:

- Form 1310, Statement of Person Claiming Refund Due a Deceased Taxpayer, and
- An attachment that includes a computation of the decedent's tax liability before any amount is forgiven and the amount that is to be forgiven, and
- A certification from the Department of Defense or the Department of State. For military and civilian employees of the Department of Defense, the Department must make certification on Form DOD 1300. The certification must include the deceased individual's name and social security number, the date of injury, the date of death, and a statement that the individual died in a combat zone or from a terroristic or military action.

Where to file - Internal Revenue Service, 333 W. Pershing, Stop 6503, P5, Kansas City, MO 64108 (per 2018 IRS Pub. 3)

Spousal Allocation - Joint returns - Only the decedent's part of the joint income tax liability is eligible for the refund or tax forgiveness. To determine the decedent's part, the person filing the claim must:

1) Figure the income tax for which the decedent would have been liable as if a separate return had been filed,
2) Figure the income tax for which the spouse would have been liable as if a separate return had been filed, and

3) Multiply the joint tax liability by a fraction. The top number of the fraction is the amount in (1) above. The bottom number of the fraction is the total of (1) and (2).

The amount determined in (3) is the decedent's tax liability that is eligible for the refund or tax forgiveness. If you are unable to complete this process, you should attach a statement of all income and deductions, indicating the part that belongs to each spouse. The IRS will make the proper allocation.

Residents of community property states - If the member of the Armed Forces was domiciled in a community property state and the spouse reported half the military pay on a separate return, the spouse can get a refund of taxes paid on his or her share of the pay for the years involved. The forgiveness of unpaid tax on the military pay would also apply to the half owed by the spouse for the years involved.

COMBAT ZONE/QUALIFIED HAZARDOUS DUTY AREA EXTENSION

For military taxpayers in a combat zone/qualified hazardous duty area, the deadlines for taking actions with the IRS are extended. The extension also applies to service members involved in contingency operations, such as Operation Iraqi Freedom or Enduring Freedom. The extension is for 180 consecutive days after the later of:

- The last day a military taxpayer was in a combat zone/qualified hazardous duty area or served in a qualifying contingency operation, or have qualifying service outside of the combat zone/qualified hazardous duty area (or the last day the area qualifies as a combat zone or qualified hazardous duty area), or
- The last day of any continuous qualified hospitalization for injury from service in the combat zone/qualified hazardous duty area or contingency operation, or while performing qualifying service outside of the combat zone/qualified hazardous duty area. The hospitalization must be the result of an injury received while serving in a combat zone or a contingency operation, and includes any hospitalization outside the United States, and up to 5 years of hospitalization in the United States (2018 Pub 3, page 28).

In addition to the 180 days, the deadline is also extended by the number of days that were left for the individual to take an action with the IRS when they entered a combat zone/qualified hazardous duty area or began serving in a contingency operation.

Example - *Captain Margaret Jones entered Saudi Arabia on December 1, 2016. She remained there through March 31, 2018, when she departed for the United States. She was not injured and did not return to the combat zone. The filing deadlines for Captain Jones' 2016, 2017 and 2018 returns are as follows:*

- ***2016 tax return:*** *The deadline is January 13, 2019. This deadline is 288 days (180 plus 108) after Captain Jones' last day in the combat zone (March 31, 2018). The 108 additional days are the number of days in the filing period that were left when she entered the combat zone (January 1 – April 18, 2017).*
- ***2017 tax return:*** *The deadline is January 12, 2019. The deadline is 287 days (180 plus 107) after Capt. Jones' last day in the combat zone (March 31, 2018).* The *107 additional days are the number of days in the 3.5 month filing period that were left when she entered the combat zone (January 1– April 17, 2018).*
- ***2018 tax return:*** *The deadline is not extended because the 180-day extension period after March 31 2018, plus the 105 days left in the filing period when she entered the combat zone, ends on January 10, 2019, which is before the normal due date of her 2018 return, April 15, 2019. Note: The taxpayer could extend the filing date of her 2018 return under the normal automatic 6-month extension rules by filing Form 4868 by April 15, 2019.*

Notifying the IRS About Combat Zone Service - So that the IRS may suspend audit or collection actions until after 180 days after the taxpayer has left the combat zone, the IRS works with the Dept. of Defense to identify taxpayers who are serving in a combat zone. Rather than relying solely on the IRS and Dept. of Defense to communicate, taxpayers qualifying for combat zone relief may also notify the IRS directly of their status by email at combatzone@irs.gov and should include their name, stateside address, date of birth and date of deployment to the combat zone. Social Security number should **not** be included in the email. The taxpayer, spouse or authorized agent or representative may make notification. While the IRS may provide general answers to questions regarding the status of individual combat zone updates, it cannot provide tax account information by email. Instead the IRS will send responses to questions about the taxpayer's account by regular mail to the address on record within 2 business days. ***(IRS Pub 4491, 2018, pg 32-5; IRS website article "Notifying the IRS by E-Mail about Combat Zone Service")***

TAX TREATMENT OF DIFFERENTIAL PAY

Differential pay is compensation that some employers pay to service members during their active duty to make up the difference between the employee's regular salary and his or her military pay. Differential pay is:

- Subject to income tax withholding (not subject to FICA withholding).
- Treated as compensation for retirement plan purposes.
- Qualifies as compensation for purposes of an IRA contribution.
- Taxable and cannot be excluded as combat pay.

Differential pay is pay:

(1) Made by an employer to individuals with respect to any period during which they are performing service in the uniformed services while on active duty for a period of more than 30 days; and

(2) Represents all or part of the wages that they would have received from the employer if they were performing services for the employer. (Code Sec. 3401(h)(2))

An employer must have a written plan providing differential pay.

EXTENSION TO PAY TAX WHEN NOT IN A COMBAT ZONE

A member of the Armed Forces may delay payment of income tax (but not the employee's share of Social Security and Medicare taxes) that becomes due before or during military service. To qualify, the service member must be performing "military service" AND notify the IRS in writing that his or her ability to pay the income tax is materially affected by the military service. The request must include the:

- Service member's name,
- Social Security number,
- Monthly income and source of income before military service,
- Current monthly income,
- Military rank, and
- Date entered military service and date eligible for discharge.

If IRS approves the request, the service member will be allowed up to 180 days after termination or release from military service to pay the tax. If the tax is paid in full by the end of the deferral period, no interest or penalty will be charged for that period.

"Military service" means the period beginning on the date the service is entered and ending on the date released from military service, or date of death while in military service. For National Guard members, this includes service under a call to active service authorized by the President or Secretary of Defense for a period of more than 30 consecutive days for purposes of responding to a national emergency declared by the President and supported by federal funds.

COLLECTION OF OTHER TAXES

Provisions of the Servicemembers Civil Relief Act provide that if a tax or assessment (other than income tax) related to a service member's personal or real property is due and remains unpaid before or during a period of military service, the affected property may not be sold to enforce the collection of the tax or assessment except by court order. To allow the sale, the court must determine that the military service does not materially affect the service member's ability to pay the unpaid tax or assessment. The court may stay a proceeding to enforce collection of the tax or assessment, or sale of the property during the period of the member's military service, plus 180 days.

During the period of military service or within 180 days after being released from military service, a service member has the right to redeem or start an action to redeem personal or real property that was sold or forfeited to enforce the collection of a tax or assessment.

For this provision, real property is that which was occupied for dwelling, professional, business or agricultural purposes by a service member, or his or her dependents or employees:

- Before entry into military service, and
- During the time the tax or assessment remains unpaid.

RESIDENCE OR DOMICILE

The Servicemembers Civil Relief Act of 2003 provides that a service member does not lose or acquire a residence or domicile for tax purposes with respect to his or her person, personal property, or income due to being absent or present in any tax jurisdiction in the U.S. solely to comply with military orders. Further, military compensation is not considered income for services performed or from sources within a tax jurisdiction of the U.S. if the service member is not a resident of or domiciled in the jurisdiction in which he or she is serving.

A state (or other tax jurisdiction) may not use the military compensation of a nonresident service member to increase the tax liability imposed on other income earned by the nonresident service member (or spouse) that is taxed by the state or other jurisdiction.

NONRESIDENT MILITARY SPOUSE EARNED INCOME TAXABLE TO RESIDENT STATE

The Military Spouses Residency Relief Act (MSRRA) (Public Law 111-97) exempts personal service income and wages earned by taxpayers who reside with their military spouses from being taxed by a state other than the spouse's resident state. The couple must have relocated to another state under military orders for the income to be exempt from the nonresident state's taxes. They must also share the same "domicile" or true home outside the duty station state where they intend to return and locate permanently.

The act does not exempt nonmilitary income of military personnel. States were already prohibited from taxing any military pay of nonresident military personnel.

Effective for 2018 and future years – Sec 302 of the Veterans Benefits and Transaction Act of 2018, for any taxable year of the marriage, permits the spouse of a servicemember to elect the same residence for purposes of taxation as the servicemember regardless of the date on which the marriage of the spouse and the servicemember occurred. The election shall apply with respect to any return of State or local income tax filed for any taxable year beginning with 2018.

Benefit - The benefit of this election is that a spouse of a servicemember stationed in a high-income tax state can elect the state of residency of the servicemember whose resident state has no or low state income tax and not be subject to the state taxes where his or her spouse is stationed.

QUALIFIED RESERVIST DISTRIBUTION EARLY WITHDRAWAL EXEMPTION

Qualified reservists are permitted penalty-free withdrawal from IRAs, 401(k)s and other arrangements if ordered or called to active duty. (Code Sec. 72(t)(2)(G)(iv)).

A "qualified reservist distribution" is any distribution to an individual if:

(a) the distribution is from an individual retirement plan, or from amounts attributable to employer contributions made as elective deferrals described in Code Sec. 402(g)(3)(A) , Code Sec. 402(g)(3)(C), or Code Sec. 501(c)(18)(D)(iii);

(b) the individual was, by reason of his being a member of a "reserve component" (as defined in 37 USC 101), ordered or called to active duty for: (i) a period in excess of 179 days, or (ii) an indefinite period;

(c) the distribution is made during the period: (i) beginning on the date of the order or call to active duty, and (ii) ending at the close of the active duty period.

RETIRED MILITARY DISABILITY COMPENSATION

When excludable payments are made to a retired military individual, the payments are made by the Department of Veterans Affairs (VA) and an informational return (i.e., 1099-R) is not issued. The taxable portion of the retirement is paid by the Defense Finance and Accounting Services (DFAS) and included on a 1099-R. In other words the non-taxable portion is not included on the 1099-R.

Example *– Robert is retired from the military with a 30% disability. His annual military retirement is $40,000 of which $12,000 (30% of $40,000) is paid by the Dept. of Veterans Affairs, is not reported on a 1099-R and is not taxable income. His military retirement pay is reduced to $28,000 ($40,000 less the $12,000 amount paid by the VA), reported on a 1099-R and is fully taxable.*

CAUTION – reducing a retired military individual's 1099-R reported income by his or her disability percentage is **INCORRECT**. The disability portion is paid separately by the Dept. of Veteran's Affairs and is not included in the 1099-R from the Defense Finance and Accounting Services (DFAS).

Retroactive Disability Determinations - When the VA determines that a veteran qualifies retroactively for disability compensation, all or part of the taxable retirement pay that was previously received is designated as nontaxable disability compensation, and the veteran is eligible for a refund of taxes previously paid on the retirement income. For initial awards, the retroactive portion is the disability compensation entitlement from the effective date shown on the VA award letter through the day before the reduction of retired pay. For increased awards, the retroactive portion is the difference between the increased award and the amount by which retired pay was reduced, from the effective date of the increased award as shown on the VA award letter through the day before the reduction of retired pay. The excludable amount may not exceed the monthly taxable retired pay for any given month.

When the retired pay is reduced after the effective date of the award, the retroactive portion applicable for the year of the reduction is excludable on that year's return. Enter the retroactive portion as a negative amount on Form 1040, Schedule 1, line 21, and attach an explanation. The DFAS suggests that a copy of the VA award letter and the DFAS-Cleveland Retiree Account Statement (DFAS-CL 7220/148) and, if received, a DFAS-CL waiver notice (DFAS-CL 1800/30) be included with the return. ***(DFAS-CL 1800/36, rev. 6/11)***

To obtain a refund when retroactive disability compensation is awarded for a prior year, that year's return will need to be amended. Until passage of the Heroes Act, veterans' claims for refunds because of retroactive disability classification were subject to the same time period rules for filing claims as for all other reasons.

- **Extended Claims** - The time period for filing a refund claim, which is normally within three years of the filing of the tax return or within two years of the payment of the tax, is extended until one year after the date of the disability determination (if later than the time allowed under the general limitations period for filing a claim for refund or credit). However, the extended time period does not apply with respect to any tax year beginning more than five years before the date of the disability determination. ***(Code Sec. 6511(d)(8), as amended by the Heroes Earnings Assistance and Relief Tax Act of 2008, § 106(a))***

SOME COMBAT INJURED VETERANS ENTITLED TO TAX REFUND

New Law & Stuff

As a result of the 2016 Combat-Injured Veterans Tax Fairness Act, more than 133,000 injured vets may qualify for a federal tax refund. The minimum refunds are estimated to be $1,750, meaning the government will be paying out an estimated minimum of $228 million if all eligible veterans file a claim.

The tax refunds are owed to veterans who received disability severance payments after Jan. 17, 1991, and included that payment as income on their tax returns. According to the IRS, most vets who received a one-time lump-sum disability severance payment when they separated from their military service will receive a letter from the Department of Defense (DOD) explaining the process to follow in order to claim their refund.

For years for which the normal statute for claiming a refund has expired, the vets will have one year from the date of the DOD letter to file a 1040X to claim their refund. Vets have two options in determining the amount of their refund:

- Amend the original return using actual numbers from the original return, or
- Claim a standard refund amount based on the calendar year in which they received the severance payment.

When claiming the standard amount, that amount should be entered on lines 15 and 22 of the 1040-X and "Disability Severance Payment" entered on line 15. The standard amounts are:

- $1,750 for tax years 1991 – 2005
- $2,400 for tax years 2006 – 2010
- $3,200 for tax years 2011 – 2016

Claiming the standard tax refund amount is no doubt the simplest way to claim the refund, because the veteran doesn't need to access the original tax return from the year of their lump-sum disability severance payment.

For returns claiming this refund write either "Veteran Disability Severance" or "St. Clair Claim" across the top of the front page of the Form 1040X. Returns should be mailed to:

Internal Revenue Service
333 W. Pershing Street, Stop 6503, P5
Kansas City, MO 64108

Veterans who are eligible for a refund and don't receive a letter from the Defense Department can still file Form 1040-X to claim a refund but need to include both of the following to verify the disability severance payment:

- A copy of documentation displaying the exact amount of and reason for the disability severance payment, such as a letter from the Defense Finance and Accounting Services explaining the severance payment at the time of the payment or a Form DD-214, and
- A copy of either the VA determination letter confirming the veteran's disability or a determination that the veteran's injury or sickness was either incurred as a direct result of armed conflict, while in extra-hazardous service, or in simulated war exercises, or was caused by an instrumentality of war.

Vets who don't have the necessary documentation indicating the exact amount of their disability severance payment and the reason for it will have to contact the Defense Finance and Accounting Services for the needed documents. See below for California treatment.

CALIFORNIA DIFFERENCES

Exceptions for Married Taxpayers Who File a Joint Federal Income Tax Return – Generally, taxpayers who are required to file a California return and who file a joint federal return must also use the joint status on their California return. However, separate California returns may be filed if either spouse was:

- An active member of the United States Armed Forces or any auxiliary military branch during the tax year; or
- A nonresident for the entire year and had no income from California sources during the year.

California Source Income – California law is compatible with the federal Service Members Civil Relief Act, including treatment of service members' military income. Service members domiciled outside of California and their spouses may exclude the member's military compensation from gross income when computing the tax rate on nonmilitary income. Service members domiciled in California must include their military pay in total income and must include it in California source income when stationed in California.

Permanent Change of Station - A service member stationed outside of CA on Permanent Change of Station orders ceases to be subject to CA income tax. A service member that is attached to a unit whose home is in CA, such as a ship home ported in CA or a unit based in CA is subject to CA income tax – even if the unit is temporarily deployed. File a 540NR, and pro-rate the income: the days in CA are subject to CA taxes, and the days after the transfer are not. Domicile does not change (FTB Pub 1032, Pg 5). For the definition of "permanent change of station" see "Moving Expenses" in the Federal section of this chapter.

Military Spouses' Income – The federal Military Spouses Residency Relief Act (MSRRA) exempts personal service income and wages earned by taxpayers who reside with their military spouses at a duty station outside their state of legal residence from being taxed by the nonresident state or other tax jurisdiction. The couple must have relocated to California under military orders for the income to be exempt from California taxes. They must also share the same "domicile" or true home outside California where they intend to return and locate permanently. But see "Veterans Benefits and Transition Act of 2018," below.

The act does not exempt nonmilitary income of military personnel. States cannot tax any military pay of nonresident military personnel. Both the military member stationed in California and accompanying spouse who are domiciled in another state will now be considered nonresidents of California. As nonresidents, interest, dividends and other intangible income is not taxed by California.

Veterans Benefits and Transition Act of 2018 – This legislation modifies the MSRRA rules to allow the spouse of a servicemember to make the election to use the same residence for purposes of taxation as the servicemember **regardless of the date on which the marriage of the spouse and the servicemember occurred**. This change also applies to California. Income of a servicemember's spouse for services performed in California is not subject to tax if the spouse elects to use the same residence as the servicemember who is a nonresident of California. If the spouse makes the election, write "VBTA" at the top of the tax return in RED INK, or include it according to your software's instructions. (FTB Pub 1032, rev. 02-19)

Domicile and military - The state of domicile for a taxpayer serving in the military is generally the state where he or she was living when the taxpayer first entered military service.

Conformity to Military Family Tax Relief Act – California conforms to the following provisions:

- Suspension for up to 10 years of the 5-year test period for personal residence gain exclusion.
- Above-the-line deduction for overnight travel expenses of reservists traveling over 100 miles away from home to attend Reserve and National Guard meetings.
- Amounts received under HAP.
- Expansion of extension period to include those military members serving in contingency operations as well as those serving in combat zones and hazardous duty areas.

Death Gratuity Exclusion - California permits an exclusion of federal death benefit gratuities and the rollover of military death gratuities to a Roth IRA or a Coverdell Education Savings Account. (R&TC §17160.5)

CA Death Gratuity Payment - CA law provides a $10,000 death gratuity payment to CA National Guard, State Military Reserve or Naval Militia members dying or killed in the line of duty if the legislature appropriates funds for the payments - nontaxable CA, if payment received 1/1/05 or later; taxable federal. (R&TC 17132.4)

DMV Penalty Waiver - The DMV will waive all penalties related to late payment of California vehicle registration renewal fees for members of the armed forces, armed forces reserve, and National Guard who are deployed outside California. "Deployed" means ordered to temporary military duty during a period when a presidential executive order specifies that the United States is engaged in combat or homeland defense. Penalty relief does not apply to:

- People relocated outside California for temporary duty for the sole purpose of training or processing or as a result of a permanent change of station.
- People who apply for registration renewal more than 60 days after termination of their deployment. (AB 1787, Ch. 04-188)

Heroes Act of 2008 –CA conforms to the Heroes Act of 2008 with respect to the following issues:

- Differential compensation is treated as wages for purposes of withholding, retirement plans and IRAs. R&TC §17501(c), IRC §408A(e)(2) and IRC §530(d)(9)
- Differential wages paid for active duty services in excess of 30 days are subject to income tax withholding <u>but are not subject to SDI and UI.</u>
- Tax-Free Rollovers of military death gratuity payments to Roth IRA or Coverdell accounts.

Combat-Injured Veterans Tax Fairness Act 0f 2016 – California does not conform to the special rules extending the statute of limitations for veterans who received disability severance payments after Jan. 17, 1991, that were erroneously included as income on their tax returns, and also does not conform, or have the authority to allow, the use of standard refund amounts. However, Revenue and Taxation Code (R&TC) Section 19311 allows taxpayers to file a claim for refund with FTB within 2 years from the date of a final federal determination, which is defined in R&TC Section 18622 as the date the adjustment or resolution is "assessed" or posted to the taxpayers' IRS account.

Therefore, in those instances where the normal California statute of limitation has closed, taxpayers who file these claims with the IRS may then file claims with FTB within 2 years after the claims are allowed by the IRS. This is true even if the taxpayer used the simplified method and claimed the standard refund amount shown in IR-2018-148, instead of filing an Amended U.S. Individual tax Return (1040X), with the actual excluded amount.

For California purposes though, claims must be based on the actual amount to be excluded and ideally a California Explanation of Amended Return Changes (Schedule X) will be filed with that information. However, under R&TC Section 19322, a taxpayer can file a refund claim in any format, as long as it is in writing, signed by the taxpayer or the taxpayer's representative, and states the grounds of the claim, which in this case, is that they improperly included disability severance pay in income.

Taxpayers claiming a refund as a result of the Combat-Injured Veterans Tax Fairness Act of 2016 should follow FTB's procedures for filing a general claim for refund. Additionally:

1. The taxpayer should include a copy of the letter they received from the Defense Finance and Accounting Service (DFAS) or the Internal Revenue Service, a copy of the IRS Form 1040X, and substantiation indicating the IRS allowed the refund (determination letter, refund issued, etc.).
2. Depending on the taxpayer's situation, the refund may be claimed on either a California Form 540X or through a letter claim.

NONRESIDENT & RESIDENT ALIEN STATUS

Overview

- Generally file as "residents" if they have a green card or meet the "substantial presence test"
- Otherwise file as non-residents
- Require an ITIN (File W-7) with tax return

Pubs Forms

RAPID FINDER

The Details

RESIDENT & NONRESIDENT ALIEN STATUS

Immigration Status - The immigration laws of the United States refer to aliens as immigrants, nonimmigrants, and undocumented (illegal) aliens. A Foreign person in the U.S. will have one of the following statuses for immigration purposes.

- *Immigrant* - An immigrant has been granted the right by the U.S. Citizenship & Immigration Services (USCIS) to reside permanently within the U.S. and to work without restriction. They may also be referred to as an LPR or Lawful Permanent Resident. They will have a "green card" (form I-551) or for those awaiting issuance of the green card, their foreign passport will bear an I-551 stamp. Immigrants are treated as residents for withholding and tax purposes.
- *Nonimmigrant* - A nonimmigrant may reside temporarily within the U.S. according to the terms corresponding to the visa with which they entered the United States.
- *Undocumented (Illegal) Alien* - An undocumented alien is generally someone who has entered the U.S. without any documentation, or an alien who entered the U.S. legally but has fallen "out of status". An undocumented alien will be treated as a nonresident for tax purposes unless they pass the "substantial presence test" (see definition below). If they pass the substantial presence test then they are treated as a resident for tax purposes.

Tax Status – The tax laws of the United States do not refer to the same three categories as the immigration laws and refer only to the following two controlling principles:

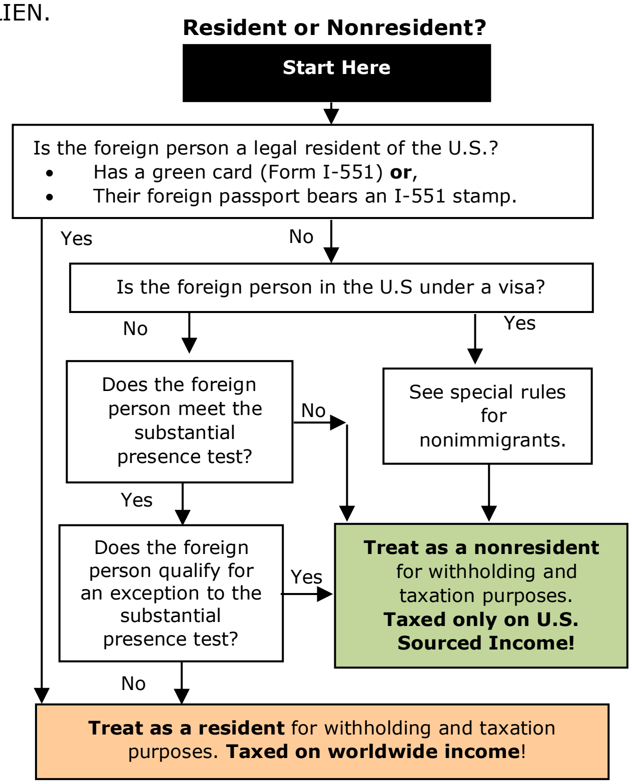
- RESIDENT ALIENS are taxed in the same manner as U.S. citizens on their worldwide income, and
- NONRESIDENT ALIENS are taxed according to special rules contained in certain parts of the IRC.

A major distinguishing feature of this special tax regime concerns the source of income: a nonresident alien (with certain narrowly defined exceptions) is subject to federal income tax only on income which is derived from sources within the United States and/or income that is effectively connected with a U.S. trade or business.

The residency rules for tax purposes are found in IRC § 7701(b). Although the tax residency rules are based on the immigration laws concerning immigrants and nonimmigrants, the rules define residency for tax purposes in a way that is very different from the immigration laws. Under the residency rules of the Code, any alien who is not a RESIDENT ALIEN is a NONRESIDENT ALIEN. An alien will become a RESIDENT ALIEN in one of three ways:

1. By being admitted to the United States as, or changing status to, a Lawful Permanent Resident under the immigration laws (the Green Card test);
2. By passing the Substantial Presence Test (which is a numerical formula which measures days of presence in the United States); or
3. By making what is called the "First-Year Choice" (a numerical formula under which an alien may pass the Substantial Presence Test one year earlier than under the normal rules). Refer to the discussion of "First-Year Choice" in Chapter 1 of Publication 519.

Under these rules, even an undocumented (illegal) alien under the immigration laws who passes the Substantial Presence Test will be treated for tax purposes as a RESIDENT ALIEN.



Alien Residency - Green Card Test – Taxpayers are considered residents, for tax purposes, if they are a Lawful Permanent Resident of the United States at any time during the calendar year. This is known as the "green card" test. They generally have this status if the U.S. Citizenship and Immigration Service (USCIS) has issued them Form I-551, also known as a "green card," or their foreign passport bears an I-551 stamp while awaiting issuance of the actual green card. That status continues unless voluntarily renounced and abandoned or terminated by the USCIS or a U.S. federal court. Their residency starting date is the first day on which they are present in the United States as a Lawful Permanent Resident or they choose to be taxed as a resident alien for the entire calendar year.

Substantial Presence Test – An individual will be considered a U.S. resident for tax purposes if they meet the substantial presence test for the calendar year. To meet this test, they must be physically present in the United States on at least:

1. 31 days during the current year, AND
2. 183 days during the 3-year period that includes the current year and the 2 years immediately before that, counting:
   - All the days present in the current year, and
   - 1/3 of the days present in the first year before the current year, and
   - 1/6 of the days present in the second year before the current year.

Example - Substantial Presence Test *- A foreign individual, Maria, has been visiting the U.S. during the current and past two calendar years. For the current year (2019) Maria spent 112 days in the U.S, 119 days in 2018 and 136 days in 2017. She meets the first half of the test by being in the U.S. for at least 31 days in 2019. However, she does not meet the 183-day test (see below), and therefore must be treated as a non-resident for withholding and taxation purposes.*

Year	*Days*	*Multiplier*	*Test Days*
2019	*112*	*1.0*	*112*
2018	*119*	*0.333*	*39.63*
2017	*136*	*0.167*	*22.71*
Total			*174.34 (required 183, thus failed the test)*

What Constitutes a Day – Generally, any portion of a day is considered a full day for purposes of this test. However, there are exceptions to this rule. Do not count the following as days of presence in the United States for the substantial presence test.

- Days the individual commutes to work in the United States from a residence in Canada or Mexico, if he or she regularly commutes from Canada or Mexico.
- Days in the United States for less than 24 hours, when in transit between two places outside the United States.
- Days in the United States as a crew member of a foreign vessel.
- Days the individual is unable to leave the United States because of a medical condition that develops while he or she is in the United States.
- Days the person is an exempt individual.

For details on days excluded from the substantial presence test for other than exempt individuals, refer to Publication 519, U.S. Tax Guide for Aliens.

Exempt Individual **-** Do not count days for which the individual is an exempt individual. The term "exempt individual" does not refer to someone exempt from U.S. tax, but to anyone in the following categories who is exempt from counting days of presence in the U.S.:

- An individual temporarily present in the United States as a foreign government-related individual.
- A teacher or trainee temporarily present in the United States under a "J" or "Q" visa, who substantially complies with the requirements of the visa.
- A student temporarily present in the United States under an "F", "J", "M", or "Q" visa, who substantially complies with the requirements of the visa.
- A professional athlete temporarily in the United States to compete in a charitable sports event.

If days of presence in the United States are excluded because the individual falls into a special category, a fully-completed Form 8843, Statement for Exempt Individuals and Individuals with a Medical Condition, must be filed.

Closer Connection Exception to the Substantial Presence Test **-** Even if the substantial presence test is met the individual can avoid being treated as a U.S. resident if he or she is:

1. Present in the U.S. on fewer than 183 days during the year, and
2. Establishes that for the year, he has a tax home in a foreign country to which he has a **closer connection** than to the U.S.

To claim the closer connection exception, the taxpayer must include Form 8840, Closer Connection Statement, which must be attached to either the taxpayer's 1040NR or 1040NR-EZ for the year. If the individual is not required to file for the tax year, the 8840 must be filed separately (follow the instructions for the 8840).

First Year of Residency
If an individual is a U.S. resident for the calendar year, but not a U.S. resident at any time during the preceding calendar year, he or she is a U.S. resident only for the part of the calendar year that begins on the residency starting date, and is a nonresident alien for the part of the year before that date (Pub 519).

U.S. SOURCED INCOME

Generally, income is considered U.S. sourced income if it is paid by a domestic corporation, a U.S. citizen, a resident alien or an entity formed under the laws of the United States. *If the property that produces the income is located in the U.S. or if the services for which the income is paid were performed in the U.S. the income is considered U.S. sourced income.* Some examples of income that may be from sources within the U.S. include:

- Compensation for personal services
- Interest and dividends
- Pensions and annuities
- Rental and royalty income
- Taxable scholarship and fellowship grants
- Other taxable grants, prizes and awards

Income sourcing rules are contained at IRC 861 through IRC 865. *Caution:* income tax treaties can modify these rules.

Remember - A nonresident alien is only taxed on U.S. sourced income.

U.S. Sourced Income is broken down into three categories:

- **Effectively Connected Income (ECI)** - if the U.S. source income paid to a foreign person is determined to be from the conduct of a trade or business within the United States it is considered ECI.
  - ECI is subject to the *graduated income tax rates applicable to U.S. persons*, not the 30 percent rate (discussed below).
  - A *foreign person receiving ECI is required to file a U.S. income tax return* because they are conducting a trade or business within the United States.
  - *ECI is subject to reporting requirements by the U.S. payer* or withholding agent.
  - *ECI is not subject to* a withholding obligation.

- **U.S. Source Non-business Income (FDAP)** – Is income that is U.S. source non-business income paid to a foreign person or corporation that is not ECI. FDAP is the acronym for Fixed or Determinable, Annual or Periodic.
  - FDAP is subject to the *30 percent (or lower treaty) tax rate*.
  - A foreign person receiving only FDAP income upon which the 30 percent (or lower treaty) rate has been withheld is not required to file a U.S. income tax return.

- What may seem to fall under the category of FDAP income may in fact be ECI income. See explanation later.
- Examples of FDAP income where the income is U.S. Sourced but not ECI:
  - Portfolio income: interest (excluding OID but see other 30% income below), dividends
  - Annuities, rents,
  - Salaries, wages, premiums and compensation (this applies only to services preformed in the U.S. Those performed by a non-resident alien in a foreign country are not taxable to the U.S.), and other fixed or determinable annual or periodic gains, profits and income.

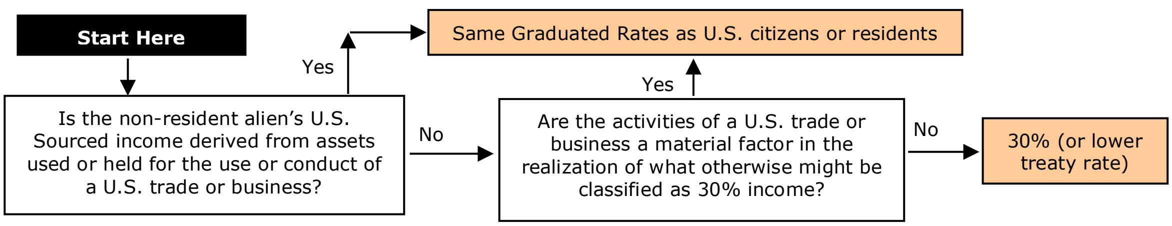
When FDAP income may become ECI – FDAP income can become effectively connected income if:

- The income is derived from assets used in or held for the use in the conduct of that trade or business; or
- The activities of that trade or business in the US are a material factor in the realization of that income.

Example - applying the Asset Use Test *- If the foreign person receives a payment for interest related to an "account receivable" from a U.S. business activity, the interest payment would be treated as ECI and not FDAP income.*

- **Other Income Subject to the 30% Withholding (or other treaty) Tax Rate:**
  - Payments on bonds with OID received at the time of disposition (i.e. does not follow the OID reporting rules for a U.S. resident).
  - 85% of U.S. Social Security benefits paid to non-resident aliens.
  - Gains on sale or exchange of patents, copyrights and the like, where payments are contingent on productivity.
  - Gains from the disposal, with a retained economic interest, of timber, coal, or iron ore.
  - Only in the case of a nonresident alien present in the U.S. for 183 days or more during the tax year, the excess of U.S.-source gains over losses from sales or exchanges of capital assets.

Non-Resident Alien Taxation & Withholding Rates



EMPLOYEE ISSUES – NONRESIDENT ALIENS – Note: These requirements only apply to non-resident aliens working within the U.S. There are no withholding requirements or income tax liabilities for non-resident aliens working outside the U.S.

Withholding Documentation – Nonresident individuals working in the U.S. – Foreign workers must file withholding documents with their U.S. employer or withholding agent. Which form they file will depend upon their circumstances.

Form 8233 - Claiming Tax Treaty Exemptions from Withholding - If a foreign worker claims a tax treaty exemption from Social Security and Medicare, the foreign individual must complete a Form 8233 and provide it to the employer. The employer must review, accept and sign the form, and within 5 days of acceptance forward a copy to the IRS. The employer must wait 10 days to see if the IRS has any objections to the withholding. See the instructions for Form 8233 for more detailed information. **Publication 515** identifies countries that have treaties with the United States.

IRS Recommendation - Even if a nonresident alien employee submits a Form 8233, it is a good business practice to secure a Form W-4 from the employee and withhold accordingly until the submitted Form 8233 is not rejected by the IRS.

- *W-4 – Employee's Withholding Certificate* - All compensation not exempt under the tax treaty will be subject to employment taxes in conjunction with the nonresident alien's Form W-4, which is also subject to special adjustment, for the applicable number of withholding allowances claimed. U.S. employers should advise nonresident aliens to review IRS Notice 1392, Supplemental Form W-4 Instructions for Nonresident Aliens, before completing the Form W-4. U.S. employers should know that nonresident aliens:
  - Cannot write "exempt" on line 7 of the Form W-4 (line 7, 2019 version);
  - Must enter a Social Security number on line 2 of Form W-4 and may not enter an ITIN; and
  - May only claim "single" for their filing status on line 3 of Form W-4, regardless of their actual marital status.

- With limited exceptions, a nonresident alien cannot claim more than one withholding allowance on their W-4.
- They must write "Nonresident Alien" or "NRA" above the dotted line of line 6 (2018).

A nonresident alien who fails to file a valid Form W-4 should have federal income taxes withheld at the rates pertaining to an individual who is single status and zero withholding allowances.

Since the foreign employee is not allowed a standard deduction when filing, the U.S. Employer cannot use the regular withholding table and instead must use a gross up procedure outlined in Publication 15.

Note: Under the tax treaty with India, nonresident alien students and business apprentices from India use the regular withholding tables.

Totalization (International Social Security) Agreements - These agreements are like tax treaties, but are between the Social Security Administration and various foreign countries. The agreement is to address a situation where dual Social Security taxation occurs when a foreign employee is working within the United States and required to pay these taxes to both the U.S. and the NRA's country of residence on the same wages. Totalization agreements must be honored by a U.S. employer.

The foreign worker who claims an exemption under a totalization agreement needs to provide the U.S. employer with a certificate of coverage from the resident country that will be collecting the taxes. The U.S. employer should keep a copy of the certificate in the event the IRS questions why FICA taxes are not being withheld.

More information on totalization agreements is available in Section 7, Page 23 of 2019 IRS Publication 15-A, 2018 Publication 519 (page 45), and at www.socialsecurity.gov/international.

Employer Reporting - Resident alien and nonresident alien employees' wages are reported on the Forms 941 or 944 and W-2 in the same manner as normal payroll reporting. However, when the wages for a nonresident alien are exempt under a tax treaty those payments are reported on Forms 1042 and 1042-S.

State Reporting Obligations - A form W-2 is usually required to report state and local wages and income taxes withheld even in situations in which all of a nonresident alien's wages are exempt from federal income tax under a treaty, and all federal wages would be reported on Form 1042-S. A tax treaty only applies to the Federal tax regime and not state taxes. **There are no tax treaties between a foreign government and a state.**

LIABILITY – FAILURE TO PROPERLY WITHHOLD
Both the foreign person receiving the payment and the U.S. payer are personally responsible for the taxes on U.S. sourced income. If the U.S. payer fails to withhold, and the foreign person does not satisfy its tax obligation, the IRS will approach the U.S. payer for any related tax liability, including interest and penalties.

CAUTION – WAGES TO UNDOCUMENTED (ILLEGAL) ALIENS
A U.S. employer, who hires undocumented (illegal) aliens or aliens who are working in violation of their nonimmigrant status, is expected to correctly report and withhold all required taxes on these wages.

INDEPENDENT CONTRACTOR PAYMENTS

Generally, a U.S. payer must withhold 30 percent of any payment of U.S. sourced income to a foreign person unless they can reliably associate the payment with documentation that:

- Establishes the payee is a US person;
- Claims a reduced rate or exemption with a valid and properly completed series W-8 form; or
- Establishes that the payee is covered under a tax treaty with an accepted Form 8233.

W-8 Series Forms - The W-8 series of forms is the equivalent of a Form W-9, Request for Taxpayer Identification Number and Certification, for a U.S Citizen or Resident. There are a number of W-8 series forms but the following two are the commonly encountered ones when dealing with independent contractors and small businesses:

- W-8BEN - Certificate of Foreign Status of Beneficial Owner for United States Tax Withholding
- W-8ECI- Certificate of Foreign Persons Claim That Income Is Effectively Connected With the Conduct of a Trade or Business in the United States

When should the tax be withheld - Withholding is required at the time that the payment is made. A payment is considered to be made when the beneficial owner of the payment realizes the income. There does not need to be a transfer of cash or other property.

Remember: only U.S. source FDAP income is subject to withholding. Effectively connected income (ECI) is not subject to withholding.

NONIMMIGRANTS TEMPORARILY IN THE U.S.

Individuals such as alien students, teachers, researchers, trainees, etc., are allowed into the U.S. on a temporary (nonimmigrant basis). Their stay is subject to the terms of their visa. For more detailed information than is provided in this overview please refer to Pub 515.

Visa Designations – The following are the more common visas:

F-1 - Generally a foreign student
H-1b - Specialty occupations such as teachers, trainees and researchers;
H-1c - Foreign nurses.
H-2a – Foreign Agricultural Workers (See special treatment this chapter)
J-1 – Generally a foreign student
M-1 – Vocational or technical student
O-1 - Foreign scholars, teachers, researchers or trainees
P - Artists, athletes and entertainers
Q-1 – Cultural exchange visitor
TN - Foreign scholars, teachers, researchers or trainees arriving from Canada or Mexico under a NAFTA treaty.

Students – Generally wages paid to nonresident alien students with F-1, J-1, M-1 and Q-1 nonimmigrant status are not subject to FUTA tax or social security and Medicare taxes on pay for services performed to carry out the purpose for which the alien was admitted to the United States.

> ***Example -*** *A nonresident alien is issued a visa to teach for a university. While in the United States, he takes a part-time job working for a chemical company. The wages earned while teaching at the university are exempt from social security and Medicare taxes. The wages earned at the chemical company are subject to social security and Medicare taxes.*

Wages, salaries, or other compensation paid to a nonresident alien student, trainee, or apprentice for labor or personal services performed in the United States are subject to graduated withholding.

Scholarship or Fellowship Income – A portion or all of a scholarship or fellowship may be taxable. Where there are treaty provisions to exclude the income from withholding the student should file form W-8BEN. There are two types of scholarship or fellowship income:

- **Non-compensatory** – where the student does not provide any personal services. If the student is a degree candidate, the amount of this type of income used for expenses other than tuition and course-related expenses (fees, books, supplies, and equipment) is generally taxable. For example, amounts used for room, board, and travel are generally taxable. Where the individual is not a degree candidate the entire amount is taxable. The withholding rate for the taxable amount is 30% (14% for nonresident aliens temporarily in the U.S on an F, J, M or Q visas).
- **Compensatory -** In general, scholarship or fellowship income is compensatory to the extent it represents payment for past, present, or future services (for example, teaching, research, etc.) performed by a nonresident alien as an employee and the performance of those services is a condition for receiving the scholarship, fellowship or tuition reduction. The withholding rate for this compensation is 30%.

> ***Example -*** *XYZ University awards a scholarship to N, a nonresident alien student. The only condition of the scholarship is that N attends classes and maintains a minimum level of academic performance. The scholarship income is not compensatory because N is not required to perform services as an employee as a condition for receiving the scholarship.*

Artists, Athletes and Entertainers - Because many tax treaties contain a provision for pay to visiting artists, athletes and entertainers, a separate category is assigned these payments for withholding purposes. Withholding rates for this category are:

- 30% for services performed as independent contractors.
- Graduated rates for services performed as employees.
- A central withholding agreement (CWA) allows for lower withholding rates if IRS approved.
- Form 8233 is used to claim special treaty provisions.

However, where the nature of the relationship between the payer of the income and the artist or athlete is not ascertainable, the withhold rate is 30%. See Pub 515 for additional details.

Agricultural Workers – H2-A Visas –IRS issued guidance indicates that a W-2 should be used with the income reported in box 1. Income for these workers should not be reported on Form 1099-MISC. Guidance for reporting the income of H2-A foreign agricultural workers is included in Pub 51, Circular A, and the Agricultural Employer's Tax Guide. Also see the IRS web site for additional information: https://www.irs.gov/individuals/international-taxpayers/foreign-agricultural-workers.

H2-A foreign workers are exempt from Social Security tax, although it seems that those reviewing the returns at the IRS may not be aware of that. If you need proof refer to SERP Alert 12A0537 (SERP is the IRS' abbreviation for Servicewide Electronic Research Program).

The IRS is stepping up filing enforcement on these foreign workers including for prior years. Sec 6012 requires everyone whose income exceeds the exemption amount to file a return. A nonresident alien (NRA) individual engaged or considered to be engaged in a trade or business in the United States during the year is required to file a return. Prior to 2018 if the NRA's only U.S. source income was wages that were less than the personal exemption amount, there was no requirement to file. Effective for 2018 (and presumably later years), exemption from filing only applies if any of the following conditions are met (IRS Pub 519, page 35 and 36 (2018)). The individual:

- Is a nonresident alien student, teacher, or trainee temporarily present in the United States under an F, J, M, or Q visa, and has no income that is subject to tax, such as wages, tips, scholarship and fellowship grants, dividends, etc.
- Is eligible for the benefits of Article 21(2) of the United States–India Income Tax Treaty, is a student or business apprentice, is single or a qualifying widow(er), and gross income is no more than the standard deduction amount for the year.
- Is a partner in a U.S. partnership that was not engaged in a trade or business in the U.S. during the year and Schedule K-1 (Form 1065) includes only income from U.S. sources that is not effectively connected with a U.S. trade or business.
- Has gross income less than $5.

To determine how an H-2A agricultural worked is taxed, apply the substantial presence test on page 01.09.02.

- *Nonresident Alien* – Use Form 1040NR, no standard deduction, report U.S. source income only.
- *Resident Alien* – Use Form 1040, taxed the same as a U.S. Citizen, include worldwide income.
- *Dual-Status Alien* – Use Form 1040 with unsigned 1040NR attached, no standard deduction, only U.S. source income while a nonresident and worldwide income while a resident.

WITHHOLDING AGENT PENALTIES

A U.S. withholding agent must be able to identify all non-U.S. citizens and nonresident payees in order to meet its withholding responsibilities. Who is a withholding agent?

- A withholding agent is a person or entity that has control, receipt, custody, or payment of any item of income belonging to a foreign person that is subject to withholding.
- A withholding agent is often described as the last person in the United States who has control over the money before it is paid to the foreign person.
- The term "withholding agent" includes, but is not limited to individuals, U.S. corporations, foreign intermediaries, and U.S. branches of a foreign entity.

A withholding agent is personally liable for any taxes that were required to be withheld. What is the potential cost of not complying with these withholding regulations? Read on.

Civil Penalties for Failure to Withhold - Aside from owing the amount of tax that should have been withheld and interest, a withholding agent who fails to comply with these withholding requirements can face such civil penalties as:

- The 100 percent penalty equal to the total amount of tax evaded;
- The 20 percent accuracy-related penalty of the amount of the underpayment of withheld tax in the case of negligence;
- A 75 percent penalty for the underpayment of withheld taxes in the case of civil fraud;
- Additional taxes of five percent to a maximum of 25 percent for the negligent failure to file a return; and
- Additional taxes of 15 percent to a maximum of 75 percent for the fraudulent failure to file a return.

Invalid TINS – Normally the IRS will not impose a penalty on a withholding agent for any invalid TINs reported on Form 1042-S, Foreign Person's U.S. Source Income Subject to Withholding, unless the withholding agent knew or should have known that the TIN was incorrect. When penalties are appropriate, they should be assessed under Code Sec. 6721, Failure to File Correct Information Returns. (Chief Counsel Advice 201615012)

Taxpayer ID Problem & ITINS – To file a return a taxpayer must have a taxpayer ID number. Since nonresident aliens do not have and cannot obtain a legal SSN they must use an ITIN. IRS issues ITINs to foreign nationals and others who have federal tax reporting or filing requirements and do not qualify for SSNs. Overall, some 11-million individuals have ITINs.

E-Filing Tip - Undocumented aliens may (illegally) use someone else's SSN to obtain employment. However, they cannot file using that SSN and must obtain an ITIN for filing. This creates a mismatch for e-filing. Practitioners familiar with these type returns indicate using SSN on the W-2 screen but the ITIN on the return will avoid e-filing problems. Of course the individual gets no SS credits for the W-2 wages but they can at least satisfy the filing requirements. According to the instructions to IRS Form W-7, e-filing cannot be done for a return on which an ITIN is used in the calendar year the ITIN is issued. For example, if an ITIN is applied for and received in 2019, no return using that ITIN (including prior year returns) can be e-filed until 2020.

The following individuals qualify for an ITIN:

- U.S. resident alien (based on days present in the United States) filing a U.S. tax return and not eligible for a SSN
- Dependent or spouse of a U.S. citizen/resident alien
- Dependent or spouse of a non-resident alien visa holder

Applying for an ITIN - The IRS provides the following instruction for obtaining an ITIN for the first time.

1. Complete Form W-7.
2. Attach an original, valid federal income tax return behind the Form W-7.
3. Include supporting documents to establish identity and connection to a foreign country (see W-7 instructions) - The IRS will only accept original identification documents or certified copies of these documents from the issuing agency along with a completed Form W-7 and Federal tax return when an individual applies for an ITIN directly to IRS.
4. The package can be filed in one of the following ways:
    a. By submitting it in person, by appointment, at certain IRS Taxpayer Assistance Centers (TACS). Appointments can be scheduled by calling 1-844-545-5640; see https://www.irs.gov/help/tac-locations-where-in-person-document-verification-is-provided for a list of designated TACs that offer ITIN document authentication service;
    b. By mailing the W-7, tax return and required documentation to Internal Revenue Service, ITIN Operation Center, P.O. Box 149342, Austin TX 78714-9342; or
    c. By submitting the W-7 through and signed by an Acceptance Agent or Certified Acceptance agent who verifies the information and signs the W-7 prior to submission and forwards the application to the IRS at the address noted in "b" above.

ITIN Renewal - The IRS announced that approximately 2 million Individual Taxpayer Identification Numbers (ITINs) will be expiring by the end of 2019 and need to be renewed.

All ITINs begin with the digit 9 and are otherwise formatted like an SSN, 9XX-XX-XXXX. The fourth and fifth digit ranges are from 50-65, 70-88, 90-92, and 94-99.

Per a provision in the PATH Act of 2015, ITINs that have not been used on a federal tax return at least once in the last three consecutive years will expire Dec. 31, 2019. In addition, ITINs with middle digits 83, 84, 85, 86 or 87 that have not already been renewed will also expire at the end of the year. ITINs with middle digits of 70 through 82 expired in past years. Taxpayers with these ITIN numbers who haven't already renewed their ITIN can renew at any time. Note: It is important to understand that ITINs with middle digits 83 through 87 will expire whether or not they were used for filing returns in the last three years. Taxpayers whose ITIN is expiring and who need to file a tax return in 2020 must submit a renewal application on Form W-7, along with required documentation (originals or certified copies from the issuing agency). Federal returns that are submitted in 2020 with an expired ITIN will be processed. However, exemptions and/or certain tax credits will be disallowed, and the taxpayers will be notified by mail advising them to renew their ITIN. Once the ITIN is renewed, any applicable exemptions and credits will be reinstated, and any applicable refunds issued. Therefore, renewing early will avoid these last-minute hassles and delays in receiving refunds.

To reduce the paperwork burden on households where several people will need to renew their ITIN, the IRS has created the family option. An individual receiving a renewal letter from the IRS can choose to renew the ITINs of all of their family members at the same time even if family members have an ITIN with middle digits that have not been identified for expiration. Family members include the tax filer, spouse and any dependents claimed on the tax return. However, spouses and dependents residing outside the U.S. do not need to renew their ITINs unless they anticipate being claimed for a tax benefit (for example, after they move to the U.S.) or if they file their own tax return. That's because the deduction for personal exemptions is suspended for tax years 2018 through 2025 by the TCJA. Consequently, spouses or dependents outside the U.S. who would have been claimed for this personal exemption benefit and no other benefit do not need to renew their ITINs this year.

Acceptance Agents or Certifying Acceptance Agents – A practitioner can become an acceptance agent as part of the IRS program by completing Form 13551, Application to Participate in the IRS Acceptance Agent Program, submitting a fingerprint card or proof of professional status and certifying they have completed the on-line training provided on IRS.gov. Forms 13551 are accepted year-round, but the form's instructions caution that it can take up to 4 months for the application to be processed and that renewal requests should be submitted 6 months before an Acceptance Agent's agreement expires. (Form 13551, June 2019) The role of the Acceptance Agent is to verify the documentation being submitted meets the submission requirements.

A Certifying Acceptance Agent (CAA) is an individual who is allowed to submit a W-7 on behalf of an individual without furnishing supporting documentary evidence and who accepts some record keeping responsibilities. CAA applicants must complete forensic training to aid in identifying fraudulent identification documents. This training is at the CAA's own expense.

For more information refer to the instructions for Form 13551, IR-2018-137, and search on "How to become an Acceptance Agent" on the IRS web site. See also on the IRS web site: https://www.irs.gov/individuals/new-itin-acceptance-agent-program-changes.

CALIFORNIA DIFFERENCES

An individual who is a nonresident alien for federal tax purposes is required to file a California resident return reporting worldwide income if he or she meets the state's residency requirements, regardless of the individual's federal immigration status.

The following is an overview of the withholding requirements for non-resident taxpayers; consult FTB Publication 1017 for full details.

Non-resident Income Subject to Withholding

California Revenue and Taxation Code (R&TC) Section 18662 requires withholding of income or franchise tax on payments of California source income made to nonresidents of California. The withholding rate is generally 7%. The following California source income is subject to withholding (FTB Publication 1017):

- Payments to nonresidents for services rendered in California.
- Payments made to nonresident entertainers for services rendered in California.
- Payments received for a covenant not to compete in California.
- Payments releasing a contractual obligation to perform services in California.
- Income from options received because of performing personal services in California.
- Bonuses paid for services performed in California.
- Rents and royalties from assets located in California.
- Prizes and winnings received by nonresidents for contests in California.
- Distributions of California source income.

Withholding is optional and at the discretion of the withholding agent on the first $1,500 of income paid for the calendar year to each payee.

Withholding Exemption Certificate

California Form 590, Withholding Exemption Certificate, is used to certify an exemption from nonresident withholding. It does not apply to payments of wages to employees. It does not apply to sellers of real estate, which must use Form 593-C. Form 590 is certified by the payee.

Reduced Withholding for Foreign Partners

The FTB conforms to Federal Treasury Regulation 1.1446-6 procedures, which allow foreign partners to request reduced or no withholding of California tax on effectively connected taxable income from California sources allocable to a foreign partner. The foreign partner certifies to the partnership, and to the FTB, that no or reduced California tax will be due. If the FTB approves the request, the FTB will notify the foreign partner and the partnership.

Foreign partners can request reduced withholding from the FTB annually before the first installment period using FTB Form 589, Nonresident Reduced Withholding Request. See FTB Form 589 instructions for details.

A foreign partner must submit a completed and signed IRS Form 8804-C, Certificate of Partner-Level Items to Reduce Section 1446 Withholding, with FTB Form 589. On line 10 of the Form 589, enter the total of California amounts from 8a through 8f of Form 8804-C.

How to request and report foreign partner reduced withholding - If a partnership allocates California source income to a foreign partner, **all** of the following must be true for the partnership to withhold a reduced amount for a foreign partner:

- The foreign partner submits to the partnership a completed and signed IRS Form 8804-C, and
- The foreign partner submits to the FTB Form 589 with a signed copy of IRS Form 8804-C attached, allowing the FTB at least 21 business days before the first installment period, and
- The FTB has provided the foreign partner and the partnership a Request for Reduced Withholding - Approved letter.

How to report foreign partner reduced withholding - If the above requirements are met, then the partnership withholds the amount approved by FTB, and:

- Submits the withheld amounts using FTB Form 592-A, Payment Voucher for Foreign Partner or Member Withholding. See Form 592-A for payment due dates.
- At the close of the taxable year, completes and files FTB Form 592-F, Foreign Partner or Member Annual Return. Form 592-F allows reporting of total withholding for the year and allocates to foreign partners the income or gain and related withholding.
- Provides the foreign partner with a statement showing the total income allocated and the total amount withheld. The partnership can use a printed or electronic FTB Form 592-B, Resident and Nonresident Withholding Tax Statement, for this purpose. See FTB Form 592-B instructions for due dates and details.
- Keeps the approved letter, and FTB Forms 592-A, 592-F, and 592-B for a minimum of four years.

In general, the FTB conforms to IRC 1446 and the 10-day notification of withholding for foreign payees. The foreign partner claims credit for the withholding by attaching a copy of the FTB Form 592-B when filing a California tax return. The FTB Form 592-B is proof of California source income and withholding.

On-line requests available The FTB website – www.ftb.ca.gov – has information, forms, and details on how foreign partners can request reduced withholding online. Type in "electronic Form 589" in the search box on the FTB web page.

NOTES

COMMUNITY PROPERTY

Overview

Federal tax law recognizes the principle of community income in community property states (AZ, CA, ID, LA, NV, NM, TX, WA and WI) or countries, which treats half of community income and expenses as belonging to each spouse.

The Details

COMMUNITY INCOME

Community income is all the income from community property (including business property) and salaries, etc., for the services of either or both spouses. Income from separate property during marriage is community income only in ID, LA, TX and WI. Community income for Federal purposes is community income as defined by state law.

Community income rules do not apply to income from property that was formerly community property, but in accordance with state law, has ceased to be community property, becoming, e.g., separate property or property held by joint tenancy or tenancy in common.

Community Property States	Community Property	Separate Property
Arizona	Community Income	Separate Income
California	Community Income	Separate Income
Idaho	Community Income	Community Income
Louisiana	Community Income	Community Income
Nevada	Community Income	Separate Income
New Mexico	Community Income	Separate Income
Texas	Community Income	Community Income
Washington	Community Income	Separate Income
Wisconsin	Community Income	Community Income

Note: *Alaska, although not a community property state, does permit a married couple to identify property and income to be classified as community property by agreement or trust.*

Community property laws of foreign countries, related to the taxation of U.S. citizens or residents, are recognized and applied for U.S. tax purposes.

Thus where a determination must be made of whether a property located in a foreign country or income derived from a foreign country is community property or separate property, the community property laws of that country will apply.

In addition to the list at the right, taken from IRM 3.38.147.18.1 (01-01-2016), the Canadian province of Quebec, and most countries of the world with a European law tradition have community property as part of their overall civil law system.

DOMICILE

Whether for federal tax purposes taxpayers have community property and community income depends upon their domicile and the laws of the state in which the taxpayers are domiciled (IRS Pub 555 - 2019, Pg 2).

The determination of domicile for income tax purposes is essentially a question of federal law. Hence federal decisions and rulings on questions of domicile relating to one state are generally equally applicable to other states.

A taxpayer has only one domicile even though the taxpayer may have more than one residence. Domicile is a permanent legal home that a taxpayer intends to use for an indefinite or unlimited period, and to which the taxpayer intends to return. Domicile is generally a matter of intent based upon a taxpayer's actions. So there is no bright line definition of domicile and a taxpayer must be able to show factually that he or she intends a given place or state to be his or her permanent home. Time spent in one place doesn't always define the difference between a residence and a domicile. Some of the factors considered in determining domicile are:

- Citizenship,
- Length of residence,
- Voting place,
- State to which income taxes are paid,
- Location of taxpayer's property, and
- Business and social ties (IRS Pub 555 - 2019, Pg 3).

The fact that a taxpayer is living in the U.S. under a visitor's visa doesn't exclude the intent necessary for U.S. domicile (May, (1939) 39 BTA 946, nonacq).

An intention by spouses living in a foreign country to move to a community property state, and their oral agreement that their present income will be community income, isn't sufficient to make the income community income (Hampton, (1962) 38 TC 131).

TREATMENT OF COMMUNITY INCOME

Married Filing Jointly - For a married couple in a community property state who files a joint tax return, separating community income to each spouse is unnecessary.

Married Filing Separate - If the spouses file separate returns, each spouse must report one-half of community income, and if the couple is estranged or uncooperative, determining the correct amount of income that each should report may be difficult. Exceptions to the general rule that community income is to be reported equally by the spouses may apply:

- **§ 66(a)** – **Spouses Live Apart** - provides rules for treating community income when the spouses live apart and don't share income for the entire year.
- **§ 66(b)** – **Traditional Relief** - allows the IRS to disregard community property laws when one spouse is not notified of the type and amount of community income. **CAUTION**: This rule can be used only by IRS in order to disallow the benefits of community property laws to a taxpayer and cannot be used by a taxpayer to avoid his or her liability for tax on community income paid to and/or earned by the taxpayer's spouse. This relief is not considered until after the IRS initiates an audit.
- **§ 66(c) – Equitable Relief** - permits the IRS to grant relief from the operation of community property laws under certain circumstances (this is akin to the "innocent spouse" relief granted certain married joint filers), and further authorizes IRS to grant equitable relief from operation of community property laws if a taxpayer is unable to meet specific requirements of this code section. This relief cannot be requested in advance and is requested only after traditional relief has not been granted.

These three items of relief are discussed in detail later in this chapter.

WHAT IS COMMUNITY AND WHAT IS SEPARATE?

Keep in Mind: the following issues only apply where spouses do not file a joint return for the year and must allocate their income per the community property rules.

Separate Property - Separate property includes property owned by either spouse before marriage or acquired afterward by a gift, bequest, devise, or descent, together with the rent, profits and income derived from this property (Winship, (1947) 8 TC 744). Some states characterize income from separate property as community income. These states include Idaho, Louisiana, Texas, and Wisconsin.

Community Property - Community property is all property (other than separate property) acquired after marriage by either spouse, including all real and personal property within the state, and personal property situated outside the state but acquired while the parties were domiciled within the state. It includes property acquired by purchase. However, a decree of separation or divorce will turn community property into separate property. Earnings from community property assets retain their character as community until such time as the asset is awarded to one spouse.

Personal Property Acquired In a Non-community Property State - If a spouse acquires personal property while domiciled in a non-community property state, it remains the separate property of that spouse even though the couple thereafter moves to CA (Shea v. Com., (1936, CA9)).

Wages – Earned income from personal service received by a husband and wife domiciled in a community property state is generally community income during the period the community is in existence. Thus wages are community income during the period the community is in existence and must be split evenly.

Credit for Tax Withheld on Wages - Reg § 1.31-1(a) - If a husband and wife domiciled in a State recognized as a community property State for Federal tax purposes makes separate returns, each reporting for income tax purposes one-half of the community wages received during the tax year, the credit for tax withheld on the community wages that are reported on separate returns is taken one-half by each spouse.

Wage FICA Withholding – The FICA withholding cannot be allocated. It has already been reported to the Social Security Administration and credited under the SSN of the individual who actually earned it.

Net earnings from self-employment – Where the net self-employed earnings of a taxpayer is community property, then:

- **Self-Employment Tax** – Is assessed on the taxpayer who actually earned the income. If the spouses jointly operate the trade or business, for SE tax purposes, the gross income and related deductions are allocated between the spouses based on their distributive shares of the gross income and deductions.
- **Income Tax** – For purposes of income tax, the SE income that is community income is divided 50-50 between the spouses and the SE income that is separate income is allocated 100% to the spouse who owns it.

> **Example:** Where a married couple lives in a community property state and only one spouse is self-employed, that spouse must pay SE tax on his total gross SE income, less total business deductions, despite the fact that half of that income is attributable to the other spouse for income tax purposes (Code Sec. 1402(a)(5)(A)).

Estimated Tax Payments

- ***Separate Returns – Separate Estimates -*** If the taxpayer and spouse made separate estimated tax payments for the year and file separate returns, they can take credit only for their own payments.
- ***Separate Returns – Joint Estimates -*** If the taxpayers made joint estimated tax payments, they must decide how to divide the payments between the returns. One can claim all of the estimated tax paid and the other none, or they can divide it in any other way they agree on. If they cannot agree, they must divide the payments in proportion to each spouse's individual tax as shown on their separate returns for the year.

> ***Example -*** *James and Evelyn Brown made joint estimated tax payments totaling $3,000. They file separate returns and cannot agree on how to divide estimates. James' tax is $4,000 and Evelyn's is $1,000.*
>
> *James' share = 4,000/5,000 x 3,000 = $2,400*
> *Evelyn's share = 1,000/5000 x 3,000 =$ 600*

- ***Divorced Taxpayers -*** If the taxpayers made joint estimated tax payments for the year and were divorced during the year, either spouse can claim all the payments or they each can claim part of them. If the taxpayers cannot agree on how to divide the payments, they must divide them in proportion to each spouse's individual tax as shown on their separate returns for the year.

Multi-Year Compensation - Where compensation is paid for several years' services, the part attributable to services while the taxpayer was a resident of a non-community property state is separate income (Loew (1946) 7 TC 363, acq.).

Unemployment Income **–** Since unemployment income is a substitute for current earnings it is treated as community income.

Disability Income **–** Since disability income is a substitute for current earnings it is treated as community income.

Dividend & Interest Income **–** Interest and dividend income can be either separate or community income depending whether the underlying investment that produces the income was acquired with joint or separate funds and the domicile at the time of acquisition.

Social Security and Equivalent Railroad Retirement Benefits - Are treated as the income of the spouse who receives the benefits (IRS Pub No. 555, (2019), pg 8).

Pension Income **–** Income from qualified plan distributions can be either community income or separate income based upon the amount of separate and community income used to fund the pension account. One possible proration scenario would be prorating by the respective periods of participation in the pension while married and domiciled in a community property state or in a noncommunity property state during the total period of participation in the pension.

Example – Prorating by Years – Suppose Dave has had a 401(k) plan since January 1 of 2009. He and Shirley are married on Jan 1, 2016. On January 1 of 2019 Dave retires and begins taking distributions from his 401(k) plan. Dave had the 401(k) plan for 10 years, three of which were during the period of marriage to Shirley. Thus prorating by years, Dave's 401(k) distributions would be 70% separate income and 30% community income. If they filed married separate Dave would report 85% of the income (70% plus ½ of 30%) and Shirley would report 15%.

IRA & SEP Accounts **–** Traditional IRAs, Roth IRAs, SIMPLE IRAs, and SEP IRAs are separate property by law, thus:

- **Distributions** - are reported by the individual who owns the IRA.
- **Contributions** - when deductible the deduction is claimed by the individual who owns the IRA.

Lump Sum Distributions – Community property rules are disregarded for qualifying lump sum distributions where the 10-year averaging option is utilized.

Federal Civil Service Retirement – Whether a civil service annuity is separate or community income depends on the employee's marital status and domicile when the services were performed for which the annuity is paid. Even if the taxpayer now lives in a non-community property state and receives a civil service annuity, it may be community income if it is based on services performed during the period married and while domiciled in a community property state.

Partnership Income – Income from a partnership is based upon if:

- **Income Is Attributable to the Personal Services of Either Spouse** – Where the income from the partnership is attributable to the efforts of either spouse, the partnership income is community property.
- **Income Is Not Attributable to Personal Services –** Then income can be either community or separate based upon whether the partnership is community or separate property.

Tax-exempt income **-** Community income exempt from federal tax generally keeps its exempt status for both spouses. For example, under certain circumstances, income earned outside the United States is tax exempt. If either spouse met the conditions that made the income exempt, the income retains its exempt status for both.

Military Compensation

- **Retirement Pay** - Generally, the pay is either separate or community income based on the marital status and domicile of the couple while on active military service.
- **Active Duty** - Active military pay earned while married and domiciled in a community property state is also community income. This income is considered to be received half by the member of the Armed Forces and half by the spouse.

When determining the domicile of a servicemember and the servicemember's spouse keep in mind two laws pertaining to their domicile:

- **The Servicemembers Civil Relief Act of 2003** - provides that a service member does not lose or acquire a residence or domicile for tax purposes with respect to his or her person, personal property, or income due to being absent or present in any tax jurisdiction in the U.S. solely to comply with military orders.
- **The Military Spouses Residency Relief Act (MSRRA) (Public Law 111-97)** - exempts personal service income and wages earned by taxpayers who reside with their military spouses from being taxed by a state other than the spouse's resident state. The couple must have relocated to another state under military orders for the income to be exempt from the nonresident state's taxes. They must also share the same "domicile" or true home outside the duty station state where they intend to return and locate permanently.

Gains & Losses – Gains and losses are classified as separate or community depending on if the gain or loss was from separate or community property.

Income Derived from Capital – Capital can be either separate or community property and income derived from capital follows ownership. Thus community property generates community income and separate property generates separate income.

Coverdell Education Savings Account (ESA) Distributions – ESAs, like IRAs, are by law separate property, and the distributions are reported to the individual who owns the account.

Cancellation of Debt – Treatment generally follows state law. Generally personal debt will be community debt and business debt depends upon whether the debt is secured by community or separate property such as a business or rental.

Alimony - Note: For federal tax purposes, alimony from divorce decrees entered into after 2018 is not taxable to the recipient nor deductible by the payer (a TCJA change). This treatment also applies to pre-2019 agreements that are modified after 2018 and incorporate the TCJA change.

Pre-2019 Agreements (unmodified):

- **Received From Former Spouse** - Alimony arising from a previous marriage is treated as separate income of the spouse who receives the alimony.
- **Paid To A Former Spouse**
  - **Paid From Community Funds** - Where the obligation to pay alimony was paid out of the community property funds of the couple, they each were entitled to deduct ½ of the payment on separate returns. (Newcomb, Dorothy Vs Commissioner, United States Court of Appeals, CA-9, Feb 1953)
  - **Paid From Separate Funds** – If paid by the one obligated to make the alimony payments, the payments would be 100% deductible by that individual.
  - **Current Spouse Before Divorce Is Final** - Alimony or separate maintenance payments received from the current spouse are only taxable to the extent the payments exceed 50% (his or her share) of the reportable community income. Alimony paid deduction under these circumstances is limited to the amount treated as income by the recipient spouse.

Entity Income – Where an entity produces both earned, personal services income and investment income, such as an S-Corporation, the earned income is community income and the investment income can be either community or separate based upon whether the ownership of the corporation is community or separate.

Marriage Voided - Where a taxpayer's marriage is void, his or her income isn't community income (Barr (1948) 10 TC 1288).

Drug Trafficking – Income derived from illegal sources by one spouse, even without the knowledge of the other, is community income (Costa, TC Memo 1990-572).

Stock Options - A stock option for services rendered while a taxpayer was domiciled in a non-community state, and amounts, under a profit-sharing contract, earned by the taxpayer while a resident of a non-community state, are separate property (Veit, (1947) 8 TC 809, acq.).

Dependency – When community funds are used to provide support, the spouses can agree to claim dependencies in any manner they can agree upon. Where the spouses are separated and one spouse has legal custody of a child, then the custodial parent would need to formally waive the dependency to the noncustodial parent for the noncustodial parent to be able to claim the child as a dependent.

Deductions – Generally deductions are allocated by whether they were paid for with community or separate funds. Deductions paid from jointly held accounts are allocated as paid from community funds.

Personal expenses– Expenses that are paid out of separate funds, such as medical expenses, are deductible by the spouse who pays them. If these expenses are paid from community funds, divide the deduction equally between the spouses.

Business and Investment Expenses **-** Expenses incurred to earn or produce community business or investment income are generally divided equally between the spouses. Expenses incurred by a spouse to produce separate business or investment income is deductible by the spouse who earns the corresponding separate business or investment income. Note: prior to 2018, investment expenses were deductible as miscellaneous itemized deductions subject to 2% of AGI reduction; for years 2018-2025 these miscellaneous deductions are suspended for federal tax purposes per the TCJA.

Child Tax Credit - Only one parent can claim the child tax credit with respect to a qualifying child, and that would be the parent who claims the child as a dependent. Where the spouses are separated and one spouse has legal custody of a child, then the custodial parent would need to formally waive the dependency to the noncustodial parent. In either case, if married filing separately the AGI phase-out is half that of married filing jointly.

HEAD OF HOUSEHOLD FILING STATUS

In certain situations, one or both of the spouses may qualify for head of household. Married individuals may use this status if they:

(a) ***Lived apart from their spouse*** at least the last six months of the year,

(b) ***Pay more than one-half of the cost*** of maintaining as his or her home a household, which is the principal place of abode for more than one-half the year of a child, stepchild or eligible foster child for whom the taxpayer may claim a dependency exemption.

YEAR THE COMMUNITY ENDS

Tax liability for a tax year in which community status ends may be in part due from community income and in part due from separate income (earned in that tax year, e.g., after the marital community ended). In all states the marital community ends when there is a final divorce decree or annulment. In other situations, such as when there is a separation agreement or a court issues a decree of legal separation or separate maintenance, the end of the marital community depends on state law. For example, in some states, including California, the community may end when the spouses permanently separate, even if there is no written separation agreement.

Example - Income Allocation in Year Community Ends *- Jim and Jen, California residents, separated on 06/30; their final divorce decree was 10/31. Jim worked as a hospital administrator for the entire tax year. Jen began working in a bank on 08/01. The couple had the following income for the tax year:*

	Wages	***Jan-June***	***July-Oct***	***Nov-Dec***
Jim	*100,000*	*$47,000*	*$40,000*	*$13,000*
Jen	*23,000*		*13,800*	*9,200*
Joint Bank Account Interest		*$100*	*$50*	*$0*
Reportable income*:*		***Jim***	***Jen***	
Wages (Jan-June)		*$23,500*	*$23,500*	
Wages (July-Oct)		*40,000*	*13,800*	
Wages (Nov-Dec)		*13,000*	*9,200*	
Interest (Jan-June)		*$50*	*$50*	
Interest (July-Oct)		*$25*	*$25*	
Total		*$76,575*	*$46,575*	

Note: *Withholding taxes on the income would be allocated in the same manner as the income.*

Filing Status – Filing status is determined as of December 31 of the tax year. If the couple is still legally married as of that date, neither can file using the single status. While they are still legally married they will need to file either a joint return or two married separate status returns, unless either or both qualifies for the head of household status as explained above.

ALLOCATION FORM 8958

IRS requires Form 8958, Allocation of Tax Amounts Between Certain Individuals in Community Property States, to be prepared and included with Form 1040 by married taxpayers (and registered domestic partners) filing separately in community property states. Form 8958 is set up to list all of the income, deductions, credits, etc., being reported by the two taxpayers, and then these amounts are separated into columns to show how much of each item is allocated to each spouse.

SPECIAL RULE REPORTING EARNED INCOME WHEN SPOUSES LIVE APART

A special rule (Sec 879(a)) permits spouses to allocate earned income to the spouse that earned it if they so choose. This rule was created to aid abandoned spouses but can apply in cases where **ALL** the following conditions are met:

- The spouses are married to each other at any time during the calendar year;
- They live apart at **all times** during the calendar year (Regulation Sec 1.66-2(b)).
  - Taxpayers are considered living apart if they maintain separate residences.
  - Spouses who maintain separate residences due to temporary absences aren't considered to be living apart.
- **One or both of the spouses has earned income** (the term earned income includes both profits and losses from self-employment, and pass through business entities) for the calendar year that is community income, and
- No portion of that earned income is transferred directly or indirectly between the spouses during the calendar year.
  - Any amount of earned income transferred for the benefit of the spouses' child won't be treated as an indirect transfer to one spouse (Reg Sec 1.66-2(c)).
  - Husband's payments on the mortgage on the residence where taxpayer and their children lived, and on loans on other properties awarded to taxpayer under the divorce decree were indirect payments for the taxpayer's benefit (Lytle TC Memo 1992-185).
  - Transferred income doesn't include a de minimis amount of earned income that is transferred between spouses (Reg Sec 1.66-2(c)).

CAUTION: This special **rule applies to earned income only**. All other income must be divided according to community property rules. This rule does not apply to partners in registered domestic partnerships, civil unions, or other similar formal relationships that aren't marriages under state law.

Note: This is an exception to the general community property rules where earned income is split 50-50 between the spouses.

TRADITIONAL RELIEF FROM COMMUNITY PROPERTY LAW

When a taxpayer omits (does not include) an item of community income from his or her gross income, relief is not requested until the IRS challenges the omission (Reg Sec.1.66-4). Thus, there is no assurance the taxpayer will prevail.

Qualifications - The requesting spouse does not include an item of community property in his or her gross income if **ALL** of the following apply:

(1) The requesting spouse doesn't file a joint return for the tax year,

(2) The requesting spouse did not include in gross income for the taxable year an item of community income properly includible therein, which, under the rules contained in section 879(a) (treatment of community income when one or both spouses is a nonresident alien), would be treated as the income of the non-requesting spouse, and

(3) The individual establishes that he or she didn't know of, and had no reason to know of, that item of community income. All the facts and circumstances are considered in determining whether a requesting spouse had reason to know of an item of community income. The relevant facts and circumstances include, but aren't limited to:

- The nature of the erroneous item;
- The amount of the erroneous item relative to other income items;
- The couple's financial situation;
- The requesting spouse's educational background and business experience;
- The extent of the requesting spouse's participation in the activity that resulted in the erroneous item; and
- Whether the item of community income was reflected on earlier year's returns (e.g., investment income that was regularly reported on earlier years' returns).

If the requesting spouse is aware of the source of community income or the income-producing activity, but is unaware of the specific amount of the non-requesting spouse's community income, the requesting spouse is considered to have knowledge or reason to know of the item of community income. The requesting spouse's lack of knowledge of the specific amount of community income does not provide a basis for relief under this section.

(4) Taking into account all **facts and circumstances**, it's inequitable to include that item of community income in the individual's gross income. A factor in determining inequitability is whether the requesting spouse benefited, directly or indirectly, from the omitted item of community income.

CAUTION: Traditional relief is on an item-by-item basis.

Requesting Relief – Relief is not requested until the requesting spouse receives notification of an audit or a letter or notice from IRS stating there may be an outstanding liability with regard to that year. File Form 8857 - Innocent Spouse.

The latest time for requesting relief is six months before the expiration of the statute of limitations on assessments, including extensions, against the non-requesting spouse for the tax year that is the subject of the claim for relief, unless the examination of the requesting spouse's return starts during that six-month period. If the examination of the requesting spouse's return starts during that six-month period, the latest time for requesting relief is 30 days after the start of the examination.

A requesting spouse who doesn't meet the above time limitations may be eligible to request equitable relief, since the timing requirements for requesting equitable relief are broader.

EQUITABLE RELIEF FROM COMMUNITY PROPERTY LAWS

When traditional relief is not available, the IRS may relieve a taxpayer of liability for any unpaid tax or any deficiency (or any portion of either) attributable to an item of community income if taking into account all the facts and circumstances, it's inequitable to hold the taxpayer liable. The equitable relief applies to any deficiency, or underpayments of tax, including those arising from disallowed deductions or credits.

This equitable relief provision (under Code Sec. 66(c)) is similar to the equitable relief provision in Code Sec. 6015(f) – relief from joint and several liability – which relieves a spouse from liability for any deficiency or unpaid tax reported on a joint return.

The following threshold conditions must be met before the IRS will consider a request for equitable relief under Code Sec. 66(c):

(1) The spouse requesting relief must apply for relief timely. A claim is timely filed under the following circumstances:

- If applying for relief from a liability or a portion of a liability that remains unpaid, the request for relief must be made on or before the Collection Statute Expiration Date (CSED). Generally, that period expires 10 years after the assessment of tax, but other provisions of the Code may extend it.

- Claims for credit or refund of amounts paid must be made before the expiration of the period of limitation on credit or refund. Generally, that period expires three years from the time the return was filed or two years from the time the tax was paid, whichever is later.

(2) No assets were transferred between the spouses filing the joint return as part of a fraudulent scheme by the spouses;

(3) No disqualified assets were transferred to the requesting spouse by the non-requesting spouse; and

(4) The requesting spouse didn't knowingly participate in the filing of a fraudulent joint return.

(5) The income tax liability from which the requesting spouse seeks relief is attributable (either in full or in part) to an item of the non-requesting spouse with whom the requesting spouse filed the joint return.

WHEN THE IRS CAN DISREGARD COMMUNITY PROPERTY RULES

Sec 66(b) Denial of Community Property Benefits - If a taxpayer acts as if he or she is solely entitled to the community income and fails to timely notify his or her spouse of the nature and amount of the income, IRS may deny any benefit of community property laws to that taxpayer (Reg Sec. 1.66-3(a)).

- *Timely Notification* – Taxpayer fails to notify the other spouse of the nature and amount of the income before the due date (including extensions) for filing the return for the tax year in which the income was derived.
- *Acted as if Solely Entitled to the Item of Income* - Whether a spouse has acted as if solely entitled to the item of income is based upon facts and circumstances. This determination focuses on whether the spouse used, or made available, the item of income for the benefit of the marital community.

Example 1 - *Where a spouse's wages are deposited into a joint bank account from which both spouses pay bills and household expenses, the wage-earning spouse isn't acting as if solely entitled to the wages (Reg Sec. 1.66-3(c), Example 1)).*

Example 2 *– Same as example #1 except the wife had a savings account that was not known to the husband and did not share the 1099-INT from the account with him and used the funds to help support her unemployed brother. In this case the wife is acting as if solely entitled to the interest income (Reg Sec. 1.66-3(c), Example 1)).*

CAUTION: This rule can be used only by IRS in order to disallow the benefits of community property laws to a taxpayer and cannot be used by a taxpayer to avoid his or her liability for tax on community income paid to and/or earned by the taxpayer's spouse.

OTHER ISSUES

Effect of Prenuptial and Postnuptial Agreements - Taxpayers can, with a prenuptial or postnuptial (also termed pre- and post-marital) agreement, opt out of state community property laws and elect to have income treated as if they were domiciled in a non-community property state, in which case IRC § 66 would not apply. (Internal Revenue Manual, 25.15.5.3 (7-24-2017); 25.18.1.3.25 (6-6-2017))

Separate Maintenance – A decree of divorce or separate maintenance ends the community and makes later earnings separate property. However, an interest in a community property may not end where there is no division or settlement of property (Hunt, (1954) 22TC 228). In spite of a separate maintenance agreement, the parties' subsequent actions such as commingling funds could cause income to be community income.

Additional Medicare Tax – Married taxpayers filing separately who reside in a community property state must compute their additional Medicare tax based on each spouse's own wages or self-employment income.

Example *– Jack and Sally are domiciled in a community property state and are married filing separate. Jack has $200,000 in wages and Sally has $100,000 in self-employment income. Jack is liable for additional Medicare tax on $75,000, the amount by which Jack's wages exceed the $125,000 threshold for married filing separate. Sally's self-employment income of $100,000 doesn't exceed the $125,000 threshold, so Sally doesn't owe additional Medicare tax.*

Non-Resident Alien Spouse - The compensation of a U.S. citizen or resident alien, domiciled in a U.S. community property state, married to a nonresident alien retains its character as compensation for personal services derived from sources within the U.S. and taxable to the U.S. (Rev Rul 66-239).

No Relief From Community Property Available - A requesting spouse isn't entitled to relief from the federal income tax liability resulting from the operation of the community property rules under any of the four exceptions provided by Code Sec. 66 for any tax year:

- For which the requesting spouse has entered into a closing agreement with IRS (there are some exceptions not covered here), or
- Has entered into an offer in compromise with IRS.

Gifts of Community Property - Gifts of community property to a third party are generally considered to have been made one half by each spouse.

Entities owned by husband and wife as community property - *Rev Proc 2002-69* - The classification of an unincorporated business entity depends in part on the number of its members or owners. A business entity with only one owner may be classified for tax purposes as a corporation or its entity status may be disregarded. If the entity is disregarded, the activity is treated as a sole proprietorship. A business entity with two or more owners is classified as either a corporation or a partnership.

Rev Proc 2002-69: If a qualified entity and the husband and wife as community property owners treat the entity as a disregarded entity for tax purposes, IRS will accept the position that the entity is a disregarded entity. If a qualified entity and the husband and wife as community property owners treat the entity as a partnership for tax purposes and file the appropriate partnership returns, IRS will accept the position that the entity is a partnership. For this purpose, a business entity is a qualified entity if:

1. It is wholly owned by a husband and wife as community property under the laws of a state, foreign country, or a U.S. possession;
2. No person other than one or both spouses would be considered an owner for tax purposes; and
3. The business entity is not treated as a corporation under Reg. § 301.7701-2.

A change in reporting position will be treated for tax purposes as a conversion of the entity.

Inherited community property - *Code Sec. 1014(b)(6)* - Where a spouse dies owning community property and at least one-half of the entire community interest is includible in the deceased spouse's gross estate (whether or not an estate tax return is required or an estate tax is payable), the surviving spouse's interest is treated as property acquired from a decedent. Accordingly, the basis of the community property inherited by the surviving spouse gets a full step up or step down to fair market value as of the decedent's date of death (or alternate valuation date, if applicable), with some exceptions if the deceased spouse died in 2010.

Military Combat Zone Compensation - *Reg § 1.112-1(d)* - In the case of a husband and wife domiciled in a State recognized for Federal income tax purposes as a community property State, any exclusion for Combat Zone Compensation of a member of the armed services operates before apportionment of the gross income of the spouses under community law. For example, a husband and wife are domiciled in a community State and the member spouse is entitled, as a commissioned officer, to the benefit of the exclusion under section 112(b) of $500 for each month*. The member receives $7,899 as compensation for active service for 3 months in a combat zone. Of that amount, $1,500 is excluded from gross income under section 112(b) and $6,399 is taken into account in determining the gross income of both spouses.

> **The $500 per month exclusion was changed, effective Nov. 21, 1995 (see Chapter 1.08), but the monetary amounts in this example from the regulation have not been revised.*

Married to a Non-resident Alien - *Reg § 1.879-1* - Community income for this purpose includes all gross income, whether derived from sources within or without the United States, which is treated as community income of the spouses under the community property laws of the State, foreign country, or possession of the United States in which the recipient of the income is domiciled. Income from real property also may be community income if so treated under the laws of the jurisdiction in which the real property is located. Generally the following rules apply:

1) ***Earned income***. Wages, salaries, or professional fees, and other amounts received as compensation for personal services actually performed, which are community income for the taxable year, shall be treated as the income of the spouse who actually performed the personal services.

2) ***Trade or business income***. Generally for any income derived from a trade or business carried on by the husband or wife that is community income for the taxable year, all of the gross income, and the deductions attributable to that income, shall be treated as the gross income and deductions of the husband. However, if the wife exercises substantially all of the management and control of the trade or business, all of the gross income and deductions shall be treated as the gross income and deductions of the wife. The term "management and control" means management and control in fact, not the management and control imputed to the husband under the community property laws of a State, foreign country or possession of the United States.

3) ***Partnership income***. If any portion of a spouse's distributive share of the income of a partnership, of which the spouse is a member, is community income for the taxable year, all of that distributive share shall be treated as the income of that spouse and shall not be taken into account in determining the income of the other spouse.

4) ***Income from separate property*** - Income which is derived from the separate property of one of the spouses shall be treated as the income of that spouse. The determination of what property is separate property for this purpose shall be made in accordance with the laws of the State, foreign country, or

possession of the United States in which the recipient of the income is domiciled or, in the case of income from real property, in which the real property is located.

5) ***Other community income*** - Any other income for the taxable year shall be treated as income of that spouse who has a proprietary vested interest in that income under the laws of the state, foreign country, or possession of the United States in which the recipient of the income is domiciled or, in the case of income from real property, in which the real property is located.

Multiple Support Agreements in Community Property States - Compensation earned by one spouse in a community property state is community income. This means for example, that half of the funds earned by the husband and used for support are considered to be support furnished by the wife. (Rev Rul 61-52).

Example: *John and Mary are married, live in a community property state, and file a joint return. They have a 28-year old son, Leo. John and Leo are both employed; Mary does not work outside the home. John and Leo provide all the support for Angie, John's mother (Leo's grandmother). Leo provides 15% of the support. Under community property rules John and Mary would each be providing less than 50% of the support (100% - 15% = 85%/2 = 42.5%). Therefore, no one is providing over 50% of Angie's support, and for either John or Leo to claim Angie as a dependent, they would need to enter into a multiple support agreement.*

CALIFORNIA DIFFERENCES

California is a community property state and follows community property rules. The following are some special issues related to community income for California.

When Does the Community End in California? – To end a community in California does not necessarily require the couple to be legally separated or have filed for separation or divorce. The community ends when the couple separates with no intention of reuniting and is based upon the "facts and circumstances" of the situation.

Living Under the Same Roof - On July 25, 2016, Governor Brown signed SB 1255, which reverses a Supreme Court ruling (*Davis 2/20/15),* and effective January 1, 2017, defines the date of separation so that taxpayers may "separate" while continuing to live under the same roof. **CAUTION**: this law does not change the "lived apart" rule for someone still married to claim head of household filing status.

IRM 25.18.1.3.4.5 - Physical Separation (03-04-2011)- California and Washington hold that the community property estate is terminated when spouses physically separate and both spouses intend to permanently end the marriage. This mutual intent must be established through the actions and conduct of the spouses. This requires an examination of the facts and circumstances of each case, with the burden of proof on the party asserting that the community property estate was terminated. Siezer v. Sessions, 132 Wash. 2d 642, 940 P.2d 261 (1997), citing Wash. Rev. Code § 26.16.140; In re Marriage of Hardin, 38 Cal. App. 4th 448, 45 Cal. Reptr. 2d 308 (Ct. App. 1995), citing Cal. Fam. Code § 771. In these states, the Service should continue to apply community property laws to separated spouses unless both spouses have affirmatively alleged that they do not intend to resume the marriage and community property rules do not apply, and their conduct supports this.

If the clients do not have a written affirmation of separation or a legal state termination of the relationship, then this is where you should suggest the partners consult with an attorney to draw up a written document meeting the IRM's requirements.

Earned Income (Income from personal services) – Income from personal services is governed by the laws of the state of the owner's "domicile". For a California domiciled taxpayer income from personal services is considered community property.

- ***Earned in CA, Domiciled in a Non-Community Property State*** - Earnings in CA by a taxpayer domiciled in a non-community property state would NOT be community income.
- ***Domiciled in a Non-Community Property State, Married to a Spouse Domiciled in CA*** – Where a spouse is a resident and domiciled in another state, the status of that spouse's earnings as either separate or community are determined by the laws of the other state.

  BOE Decision *- Wife was domiciled in WA but a resident of CA and husband was resident of and domiciled in WA – since WA is a community property state, ½ of his wages were reportable to CA.: (Appeal of George F. and Magdalena Herrman, 8/6/1962, 62-SBE-041)*

- *Change of Domicile Before Tax Return's Due* - A spouse's income from separate property in a non-community state remains separate property even though the spouses change their domicile to CA before the tax return's due (Klise (1928) 10 BTA 1234, acq.).

Deductions - Otherwise allowable deductions paid out of community income are generally deductible one-half by each spouse. Liabilities arising against the spouse of the taxpayer while the couple was domiciled in a non-community property state, and settled while they were domiciled in California, were not deductible one half by the taxpayer-spouse (Zukor, Lottie, (1941) 43 BTA 825).

AGE RELATED ISSUES

Age - Birthday or Day Before? Since tax law includes a number of age-related issues, the date on which a taxpayer attains a specified age can have an impact on his or her income tax and the income tax of others. Per common law, a person attains a given age on the day before his/her birthday. This common law rule is why the IRS has held a person whose 65th birthday is Jan. 1 gets the additional standard deduction for the prior year.

However, in other circumstances, the common law rule has a negative impact on the taxpayer. So the IRS in Rev Ruling 2003-72 (IRB 2003-33, 8/18/2003) has ruled for purpose of various provisions included in the list below that a child attains a given age on the anniversary of the date that the child was born. For example, a child born on January 1, 2002 attains the age of 17 on January 1, 2019. The IRS reiterated this provision in Notice 2010-38 with respect to the items on the list related to changes enacted as part of the 2010 health care reform legislation.

Many of these provisions allow a credit, exclusion, or deduction to the taxpayer, provided, among other requirements, an individual has not attained a specific age. For example, under § 24(c), one of the requirements for a qualifying child for the child tax credit is that the child "has not attained the age of 17 as of the close of the calendar year in which the taxable year of the taxpayer begins." So, for example, a child born on January 1, 2002 attains the age of 17 on January 1, 2019, and would be a qualifying child for the credit for 2018 but not 2019 or later.

2019 PERTINENT AGES

BORN	***AGE***	***BORN***	***AGE***
2002	17	1969	50
2000	19	1960	59
1995	24	1954	65
1994	25	1949	70
1992	27		

ISSUE	AGE	CODE SEC.
Dependent Care Credit⬩	Under Age 13*	§ 21
Kiddie Tax	Under Age 18**	§ 1
Child Credit⬩	Under Age 17	§ 24
Adoption Credit ⬩	Under Age 18	§ 23
Adoption Assistance Program⬩	Under Age 18	§ 137
Dependency⬩	Under Age 19	§ 151
Dependent Care Assistance⬩	Under Age 13*	§ 129(e)(1)
Foster Care Payment Exclusion⬩	Under Age 19	§ 131
Full Time Student & Dependent	Under Age 24	§ 151
EITC ⬩	Under Ages 19 and 24	§ 32
Child for Purposes of Health Care Benefits⬩⬩	Under Age 27 (end of year)	Various
Catch Up Contributions	Age 50 and over	§ 414
Early Distribution Penalty	Under Age 59 ½	§ 72
Extra Standard Deduction	Age 65 and over	§ 63
Medical Expense Floor 7.5% through 2016★	Age 65 and over	§ 213(f)
Required Minimum IRA Distributions	Age 70 ½ and over	§ 401
Lump Sum Distributions (Form 4972 tax)	Born Before 1/2/36	§ 402(d)

*At time care is provided. No age limit for a dependent qualifying child or qualifying relative who is physically or mentally incapable of caring for him- or herself

** Also if age 18 with earned income less than half of support or student under age 24 with earned income less than half of support (not including scholarships)

⬩ Addressed in Rev Rul 2003-72

⬩⬩ Includes for purposes of cafeteria plans, FSAs and HRAs (§105(b)), SE health insurance deduction (§162(1)) and retiree health accounts in pension plans (§401(h))

★The percentage of AGI that reduces medical expenses, regardless of taxpayer's age, is 7.5% for 2017 and 2018 and 10% thereafter.

NOTES

REGISTERED DOMESTIC PARTNERS

Filing Status

- California – JT, MS (HH if meeting the normal HH rules)
- Federal – Single (HH if meeting the normal HH rules, though use of non-community property income to pay housing expenses is generally required)

2015 Supreme Court Same Sex Marriage Ruling –The U.S. Supreme Court ruled that the 14th Amendment to the Constitution requires a state to license a marriage between two people of the same sex and to recognize a marriage between two people of the same sex that was lawfully licensed and performed out of state. *(Obergefell v Hodges, SCt, June 26, 2015)* Since the ruling only concerns marriages, the status of registered domestic partners is not affected, and for federal purposes, RDPs still may not file as married.

Age Requirement Removed - SB 30, signed by the governor on July 30, 2019, removes the requirement that persons be of the same sex, or of the opposite sex and over 62 years of age, in order to enter into a domestic partnership, effective 1/1/2020.

RDP Registration Requirements

To be bound by the rules for RDPs, the taxpayers must be registered with the California Secretary of State or with another state that allows registration of domestic partners. Registration at the city or county level does not count for purposes of the CA filing status rules.

Registration Qualifications – Generally, to qualify to register as a domestic partner in CA, the individuals must meet the following criteria (CA Family Code Sec 297-297.5). At the time of registration:

- Neither person is married to someone else nor is a member of another domestic partnership,
- They share a common residence,
- They are not related in a manner that would prevent them from being married in CA, and
- Both are able to consent to the domestic partnership.

In addition, there are age and gender requirements:

- If the partners are the same sex, then both must be age 18 or older unless there is a court order granting permission to establish the partnership; a certified copy of the order must be filed with the Secretary of State.

RAPID FINDER

- If the partners are of opposite sexes, then one must be age 62 or older.

Other State Status – California recognizes unions originating in another state.

Filing Status

CA State – California enacted SB 1827 as law, beginning January 1, 2007, which **requires** (it is not elective) registered domestic partners (RDPs) to use the same filing status as married couples. Thus, they must use the married joint or married separate filing status for CA. If one **RDP dies, the surviving RDP can file as married filing joint for the year the RDP dies** if he or she does not enter into a new registered domestic partnership or marriage. If the surviving RDP has a dependent child, that RDP may use the **qualifying widow(er)** status in the two years after the death.

Federal – The Federal tax system does not have an RDP status, and therefore, for Federal purposes an RDP cannot file a joint return and instead must file individually (but not married separate status). Chief Counsel Advice 201021050 has concluded that, for tax years beginning with 2007, a California registered domestic partner (RDP) is subject to the community property laws and therefore should report one-half of all community income, including compensation for personal services or income from property, on their Federal tax return.

IRS Does Not Recognize RDPs as Married

Prior to its *Obergefell* ruling, the Supreme Court held in *U.S. v. Windsor*, (Sup Ct 6/26/2013) that limiting marriages to opposite-sex couples only was unconstitutional. After the *Windsor* ruling, the IRS, in **Rev. Rul. 2013-17**, made quite clear that its position is that persons in registered domestic partnerships, civil unions, or other similar formal relationships that aren't marriages under State law aren't considered as married or spouses for federal tax purposes.

This position applies regardless of whether the individuals who've entered such relationships are of the opposite or same sex. Accordingly, they can't file federal tax returns using a married filing jointly or married filing separately status.

Head of Household - To qualify as a head-of-household under Code Sec. 2(b), a taxpayer must provide more than half the cost of maintaining his or her household during the tax year, and that household must be the principal place of abode of the taxpayer's dependent for more than half of the tax year. Where registered domestic partners pay all of the costs of maintaining the household from community funds, each partner is considered to have incurred exactly half the cost, and, therefore, neither can qualify as head of household. Where one of the partners pays more than half by contributing separate funds, that partner cannot file as head of household if the only dependent is his or her RDP because a qualifying person must be a qualified child or related even if the partner is the taxpayer's dependent. (IRS Website FAQ No. 2 & 10)

Dependency

A registered domestic partner can potentially be the dependent of his or her partner for purposes of the federal dependency deduction if (IRS Website - Q&A 11):

(i) that partner has gross income of less than the exemption amount ($4,150 for 2018), taking into account that each partner reports half of the community income of both;
(ii) more than half of that partner's support for the year is provided by the person seeking the dependency deduction from separate funds; and
(iii) other requirements for dependency are satisfied.

To satisfy the support requirement, more than half of an individual's support for the year must be provided by the person seeking to claim the dependency. If a registered domestic partner's (Partner A's) support comes entirely from community funds, that partner is considered to have provided half of his or her own support and cannot be claimed as a dependent by another. However, if the other registered domestic partner (Partner B) pays more than half of the support of Partner A by contributing separate funds, Partner A may be a dependent of Partner B if they otherwise qualify.

Qualifying Child

If a child is a qualifying child of both parents who are registered domestic partners, either parent, but not both, may claim a dependency deduction for the qualifying child. If both parents claim a dependency deduction for the child on their income tax returns, the IRS will treat the child as the qualifying child of the parent with whom the child resides for the longer period of time. If the child resides with each parent for the same amount of time during the taxable year, the IRS will treat the child as the qualifying child of the parent with the higher adjusted gross income. (IRS Website - Q&A 3)

Community or Separate Property?

IRS Publication 555 provides the following guidance for determining what property is community and which is separate property:

Community property is property:

- Acquired during registration while domiciled in a community property state. (Includes the part of property bought with community property funds if part was bought with community funds and part with separate funds.)
- Property that the partners agreed to convert from separate to community property through an agreement valid under state law.
- That cannot be identified as separate property.

Separate property is:

- Property that was owned separately before registration.
- Money earned while domiciled in a non-community property state.
- Property received as a gift or inherited separately during registration.
- Property bought with separate funds, or exchanged for separate property, during registration.
- Property that the partners agreed to convert from community to separate property through an agreement valid under state law.
- The part of property bought with separate funds, if part was bought with community funds and part with separate funds.

However, notwithstanding the guidance above, a partner's premarital separate property can become marital through transmutation or active appreciation.

- *Transmutation (a legal term)* - occurs when RDPs demonstrate an intent, by virtue of their words and actions during the period of registration, to treat one partner's separate property as joint property. (This action will require the filing of a federal gift tax return, if the annual gift tax exemption is exceeded.)
- *Active appreciation* - occurs when both partners' joint funds or joint efforts cause a partner's separate property to increase in value during their period of registration.

Another issue that can affect the separate or community property status is prenuptial and postnuptial agreements. **Caution:** These are legal documents and advice and drafting should be left to those that are licensed to practice law. Generally, five elements are required for a valid prenuptial agreement:

1. The agreement must be in writing;
2. It must be executed voluntarily;
3. There must be full and/or fair disclosure at the time of execution;
4. The agreement cannot be unconscionable;
5. It must be executed by both parties (not their attorneys) in the manner required for a deed to be recorded, known as an acknowledgment, before a notary public.

Ending the Community – To end a community in California does not necessarily require the couple to be legally separated or have filed for separation or divorce. The community ends when the couple separates with no intention of reuniting and is based upon the "facts and circumstances" of the situation.

Living Under the Same Roof - On July 25, 2016, Governor Brown signed SB 1255, which reverses a Supreme Court ruling (Davis 2/20/15), and effective January 1, 2017, defines the date of separation so that taxpayers may "separate" while continuing to live under the same roof. CAUTION: this law does not change the "lived apart" rule for someone still married to claim head of household filing status.

> IRM 25.18.1.3.4.5 - Physical Separation (03-04-2011) - California and Washington hold that the community property estate is terminated when spouses physically separate and both spouses intend to permanently end the marriage. This mutual intent must be established through the actions and conduct of the spouses. This requires an examination of the facts and circumstances of each case, with the burden of proof on the party asserting that the community property estate was terminated. Siezer v. Sessions, 132 Wash. 2d 642, 940 P.2d 261 (1997), citing Wash. Rev. Code § 26.16.140; In re Marriage of Hardin, 38 Cal. App. 4th 448, 45 Cal. Reptr. 2d 308 (Ct. App. 1995), citing Cal. Fam. Code § 771. In these states, the Service should continue to apply community property laws to separated spouses unless both spouses have affirmatively alleged that they do not intend to resume the marriage and community property rules do not apply, and their conduct supports this.

If the clients do not have a written affirmation of separation or a legal state termination of the relationship, then this is where you should suggest the partners consult with an attorney to draw up a written document meeting the IRM's requirements.

Community or Separate Income?

IRS Publication 555 provides the following guidance for determining what income is community and which is separate income:

Community income is generally income from:

- Community property.
- Salaries, wages, or pay for services while registered.
- Real estate that is treated as community property under the laws of the state where the property is located.

Separate income is generally income from:

- Separate property. Separate income belongs to the partner who owns the property.

Income & Deduction Allocations

When preparing RDP returns a preparer must carefully distinguish and allocate community income, separate income and mixed income on each partner's separate return taking into consideration federal law as it applies to treatment of certain types of income. One must also do these allocations and adjustments in such a way to accommodate the IRS informational return matching and the professional software used to prepare the returns.

Thus it becomes an accounting issue. Some practitioners like to refer to this process as "forensic accounting." You may wish to avoid the use of that term since the definition of forensic means "suitable for use in a court of law." There are also professionals that specialize in and have degrees in forensic accounting.

Keep in mind that taxpayers sign returns under penalty of perjury. Allocating separate property income or deductions related to separate property could be interpreted by opposing counsel in a separation or divorce as a transmutation to community property. Therefore care should be taken to properly allocate income and deductions on the separate federal returns. When making the determinations:

- Employ a reasonable basis;
- Document your methodology; and
- Have partners or spouses agree in writing to the allocations.

Allocation Form 8958 – IRS requires Form 8958, Allocation of Tax Amounts Between Certain Individuals in Community Property States, to be prepared and included with Form 1040 by registered domestic partners domiciled in California, Nevada and Washington. Form 8958 is set up to list all of the income, deductions, credits, etc., being reported by the two taxpayers and then these amounts are separated into columns to show how much of each item is allocated to each partner.

In the past we provided a ClientWhys-designed worksheet that developed a plus or minus adjustment for each partner or spouse to be entered on the "other income" line of Form 1040. However, we have withdrawn that worksheet and advocate only using Form 8958 and not making an overall adjustment on just one line (but there still may be specific types of income where using this method to back out income from one RDP and adding it to the other RDP's return is still the better way to accurately reflect the income). Reports from preparers indicate that the use of 8958 draws significantly fewer CP2000s and the form can be e-filed.

Income Issues

Following is a list of various types of income and whether each is community or separate income for Federal filing purposes. In years where a registration began or ended, income shown as community income would be separate income before the registration and after the registration ends, and would need to be prorated accordingly. In addition, federal law sometimes dictates how certain income must be reported.

Gross Income – In determining gross income, AGI, and MAGI registered domestic partners must each report half the combined community income earned by the partners. In addition to half of the community income, a partner who has income that is not community income must report that separate income. (IRS Website - Q&A 9 and 15)

Earned Income – Even though community property laws are taken into account in determining adjusted gross income (AGI) or modified AGI (MAGI) (IRS Website Q&A 9), community property laws are NOT taken into account in determining earned income for purposes of certain credits. (IRS Website Q&A 18) Thus the following credits would be based on the individual partner's earned income without respect to community property rules:

- Earned Income Tax Credit (Sec 32(a))
- Child and Dependent Care Credit (Sec 21(d))
- Additional (Refundable Portion) Child Tax Credit (Sec 24(d))

However, for purposes of the AGI limitations for the above credits, use the return's AGI, i.e., the AGI determined using community property rules. (IRS Website Q&A 19)

Alimony – Alimony arising from a previous heterosexual relationship is treated as separate income of the RDP who receives the alimony and deductible by the payer. (Note: Alimony from a divorce agreement entered into after 2018 is not income to the recipient nor deductible by the payer.) However, if the alimony is the result of an RDP relationship that is not recognized for federal purposes, the treatment of such payments and income is uncertain. IRC Sec 71 allows a deduction for alimony paid to a spouse. For federal purposes the partners are not spouses, so Sec 71 does not apply. Also see "RDP Spousal Support" below.

- <u>Payments prior to divorce or termination of the registered domestic partnership</u> – Pre-divorce or pre-termination payments of alimony or separate maintenance presumably are taxable to the recipient RDP partner only to the extent the payments exceed that individual's share of reportable community income. In this situation in heterosexual or legal same-sex marriages, the payer is allowed an alimony deduction for the amount that exceeds his or her part of community income. Whether an RDP would be entitled to a deduction is not clear but probably no.
- <u>Payments after divorce or termination finalized</u> – The IRS has not issued a ruling on how to treat these payments. If the regular alimony rules do not apply (because the union isn't recognized under federal law), then for federal purposes the recipient most likely would be taxed on the income and the payer would not be eligible to claim a deduction. Could these payments be considered a gift? Probably no, because they are not being made voluntarily but under court order.

Social Security Income – Generally, state law determines whether an item of income constitutes community income. Accordingly, if social security benefits are community income under state law, then they are also community income for federal income tax purposes. If social security benefits are not community income under state law, then they are not community income for federal income tax purposes. (IRS Website Q&A 14)

Social Security benefits are based on the contributions of the individual; in the case of married individuals, a spouse who does not qualify based upon his/her own contributions can qualify for benefits based upon his/her spouse's earnings and attaining retirement age. Here again, the term spouse is used and the RDPs are not spouses for Federal purposes. <u>*Thus for purposes of RDPs, Social Security benefits are separate income.*</u>

Interest Income – Funds (accounts) generating interest income can be either separate or community funds. Thus depending upon the source of the interest income it can be either separate or community income.

Dividends – Funds (accounts) generating dividend income can be either separate or community funds. Thus depending upon the source of the dividend income it can be either separate or community income.

Unemployment Income – Since Unemployment income is a substitute for current earnings it is treated as Community income.

Disability Income – Since disability income is a substitute for current earnings it is treated as Community income.

IRA & SEP Distributions – Traditional IRAs, Roth IRAs, SIMPLE IRAs, and SEP IRAs are separate property by definition and the distributions are reported to the individual who owns the IRA. This is not to say that at separation or dissolution of the registration that a judge might not consider some portion of them to be community property for purposes of dividing up the community assets.

Spousal IRA – There can be no spousal IRA for RDPs and the special provisions that apply to a spouse inheriting an IRA also do not apply.

Coverdell Education Savings Account (ESA) Distributions – ESAs, like IRAs, are deemed to be separate property, and the distributions are reported to the individual who owns the account.

Cancellation of Debt – Treatment generally follows state law. Generally personal debt will be community debt and business debt depends upon whether the debt is secured by community or separate property such as a business or rental.

> ***Example - CA Family Law Section 910(a)*** - Except as otherwise expressly provided by statute, the community estate is liable for a debt incurred by either spouse before or during marriage, regardless of which spouse has the management and control of the property and regardless of whether one or both spouses are parties to the debt or to a judgment for the debt. Sections 911 through 916 include a number of exceptions.

Employment Stock Options – Are stock options community or separate property? Is that decision based upon the grant, vesting or exercise date? Perhaps the decision is based upon whether the stock was purchased with community or separate property funds. Presently there is no official guidance. Without official guidance it is up to the taxpayers to decide on the appropriate methodology. Again this decision can have implication if the partners subsequently separate so it may be appropriate to have them agree in writing to the methodology used.

Generally W-2 income is treated as current income which is community income. However, when an individual exercises a non-qualified option or has an early disposition of a qualified (incentive) option the difference between the option price and FMV at the date of exercise gets added to the individual's W-2 income. Again, no guidance is provided but it would seem that the portion of the W-2 income representing the imputed stock appreciation may need to be allocated between community and separate income.

Sales to Each Other – IRC Sec 267 bars losses derived from sales to related parties. For federal purposes RDPs are not related, and therefore Sec 267 will not apply. This creates some interesting tax planning opportunities as the laws now stand. However, California follows Sec 267, creating a difference in loss allowances and basis from the Federal transaction. One might not be too aggressive here for fear of a retroactive ruling.

Capital Gains and Losses – Here an RDP may have both separate property and community property capital gains and losses. Allocate as appropriate. However keep in mind that on Form 1099-B (or substitute statement) the gross proceeds, and in some cases the basis (under the basis reporting requirements effective as of 2011 returns), will be reported under the SSN of only one RDP. Splitting the gains and losses will necessitate adjustment entries on IRS Form 8949 to avoid a mismatch with the IRS and follow-up correspondence.

Example – Splitting Gains/Losses: *Todd and Ron are registered domestic partners who maintain a joint brokerage account that was funded with community property funds. In 2019, they purchased 100 shares of XYZ Co. on Feb. 13 for $9,500 and sold the shares on May 8 for $10,422, resulting in a short-term profit of $922. The 1099-B from the broker was issued with Todd's Social Security number. For federal purposes, Todd and Ron each include half the profit ($461) on their individual returns. Todd's Form 8949 is completed by including 100% of the sales price and cost in columns (d) and (e), respectively, and showing a negative 461 (the half of the profit that belongs to Ron) in column (g). The code for column (f) is "N" (nominee). Todd's Form 8949 is shown next.*

Form **8949** — Department of the Treasury, Internal Revenue Service

Sales and Other Dispositions of Capital Assets

▶ Information about Form 8949 and its separate instructions is at *www.irs.gov/form8949.*
▶ File with your Schedule D to list your transactions for lines 1b, 2, 3, 8b, 9, and 10 of Schedule D.

OMB No. 1545-0074 — 2019 — Attachment Sequence No. 12A

Name(s) shown on return: TODD EXAMPLE — Social security number or taxpayer identification number: 111-22-3333

Before you check Box A, B, or C below, see whether you received any Form(s) 1099-B or substitute statement(s) from your broker. A substitute statement will have the same information as Form 1099-B. Either will show whether your basis (usually your cost) was reported to the IRS by your broker and may even tell you which box to check.

Part I **Short-Term.** Transactions involving capital assets you held 1 year or less are short term. For long-term transactions, see page 2.

Note: You may aggregate all short-term transactions reported on Form(s) 1099-B showing basis was reported to the IRS and for which no adjustments or codes are required. Enter the totals directly on Schedule D, line 1a; you aren't required to report these transactions on Form 8949 (see instructions).

You *must* check Box A, B, *or* C below. Check only one box. If more than one box applies for your short-term transactions, complete a separate Form 8949, page 1, for each applicable box. If you have more short-term transactions than will fit on this page for one or more of the boxes, complete as many forms with the same box checked as you need.

☑ **(A)** Short-term transactions reported on Form(s) 1099-B showing basis was reported to the IRS (see **Note** above)
☐ **(B)** Short-term transactions reported on Form(s) 1099-B showing basis was **not** reported to the IRS
☐ **(C)** Short-term transactions not reported to you on Form 1099-B

1

(a) Description of property (Example: 100 sh. XYZ Co.)	(b) Date acquired (Mo., day, yr.)	(c) Date sold or disposed of (Mo., day, yr.)	(d) Proceeds (sales price) (see instructions)	(e) Cost or other basis. See the **Note** below and see *Column (e)* in the separate instructions	Adjustment, if any, to gain or loss. If you enter an amount in column (g), enter a code in column (f). See the separate instructions. (f) Code(s) from instructions	(g) Amount of adjustment	(h) Gain or (loss). Subtract column (e) from column (d) and combine the result with column (g)
100 SHARES XYZ	2/13/19	5/08/19	10,422	9,500	N	-461	461

Ron's Form 8949, shown below, is completed using half of the sales price and cost amounts, and with box C checked since no 1099-B was issued in Ron's SSN. By entering only 50% of the sales price and cost, no adjustment is needed in column (g) and no code entry is made for column (f). Since the 1099-B was not issued to Ron, box C of the 8949 is checked. When completing Form 8958 (not illustrated), enter 100% of the gain in column 1 on line 6 (identified as "total short-term capital gain/loss") and 50% of the gain in each of columns 2 and 3.

Form **8949** — Department of the Treasury, Internal Revenue Service

Sales and Other Dispositions of Capital Assets

▶ Information about Form 8949 and its separate instructions is at *www.irs.gov/form8949.*
▶ File with your Schedule D to list your transactions for lines 1b, 2, 3, 8b, 9, and 10 of Schedule D.

OMB No. 1545-0074 — 2019 — Attachment Sequence No. 12A

Name(s) shown on return: RON EXAMPLE — Social security number or taxpayer identification number: 222-11-3333

Before you check Box A, B, or C below, see whether you received any Form(s) 1099-B or substitute statement(s) from your broker. A substitute statement will have the same information as Form 1099-B. Either will show whether your basis (usually your cost) was reported to the IRS by your broker and may even tell you which box to check.

Part I **Short-Term.** Transactions involving capital assets you held 1 year or less are short term. For long-term transactions, see page 2.

Note: You may aggregate all short-term transactions reported on Form(s) 1099-B showing basis was reported to the IRS and for which no adjustments or codes are required. Enter the totals directly on Schedule D, line 1a; you aren't required to report these transactions on Form 8949 (see instructions).

You *must* check Box A, B, *or* C below. Check only one box. If more than one box applies for your short-term transactions, complete a separate Form 8949, page 1, for each applicable box. If you have more short-term transactions than will fit on this page for one or more of the boxes, complete as many forms with the same box checked as you need.

☐ **(A)** Short-term transactions reported on Form(s) 1099-B showing basis was reported to the IRS (see **Note** above)
☐ **(B)** Short-term transactions reported on Form(s) 1099-B showing basis was **not** reported to the IRS
☑ **(C)** Short-term transactions not reported to you on Form 1099-B

50 SHARES XYZ	2/13/19	5/08/19	5,211	4,790			461

Capital losses - In the case of capital losses, for federal purposes since the RDPs each file individual returns, each would be allowed up to $3,000 of loss, while on their CA joint return they would only be allowed a single $3,000 ($1,500 if filing separate), which will create different carryovers on the federal and state returns.

Wages – IRS Pub 555 indicates that wages should be split on line 7 of the 1040 (versions 2017 and prior; line 1 of 2018 and 2019 versions). However, in doing so the tax software will treat the community property allocation to the other partner as earned income for a number of issues, such as IRA deductions and the dependent care credit, the refundable portion of the child tax credit, and the earned income tax credit, which is not correct. The IRS website (Q&As 18 and 24) clearly states that earned income for these purposes is determined without respect to community property rules.

> ***Recommendation:*** *include the entire W-2 on the return of the individual who earned it and make the appropriate community property adjustments on the 1040, Schedule 1, Line 21 (2018) or line 8 (draft 2019 version), for each partner.*

Wage Withholding – Pub 555 indicates that withholding associated with community income should be split between the partners. The IRS website (Q&A 16) states (emphasis added), "Because each registered domestic partner is taxed on half the combined community income earned by the partners, each is *entitled* to a credit for half of the income tax withheld on the combined wages." However, splitting the withholding is inviting correspondence from the IRS since the entire W-2 is reported to the individual who earned the income. Where the W-2 income can be split using 1040, Schedule 1, line 21 (2018) or line 8 (draft 2019), while matching and thus giving the IRS computer a matching number with regards to W-2 income, there is no similar ability to split the withholding. This essentially leaves two options: leave all the withholding on the return of the partner who earned the W-2 income or split the withholding and deal with the potential post-filing correspondence. (Form 8958 appears to be helping IRS sort out the allocation for matching purposes; practitioners have indicated that there are fewer CP2000s on this issue than before the 8958 was created.) Where a practitioner wishes to split the withholding, most commercial software packages provide an entry for "other withholding" which allows positive and negative entries to accommodate the allocation.

Wage FICA Withholding – The FICA withholding cannot be allocated. It has already been reported to the Social Security Administration and credited under the SSN of the individual who actually earned it.

Employer Reimbursed Medical Care Plans – Employer-paid medical plans are excludable from taxable income (Sec 105(b)) if the care is for the taxpayer, spouse or dependents. Thus, unless the partner qualifies as a dependent (as discussed earlier), any employer-provided care for the non-employee partner would not be excludable for Federal tax purposes. Unlike the requirements for the dependency of a qualifying relative, Sec. 105(b) does not require that the non-employee partner's gross income be less than the exemption amount in order for that partner to qualify as a medical dependent of the employee-partner, provided the dependency support requirement is satisfied (IRS Website Q&A 12). Whether or not the exclusion applies will depend on individual circumstances. However, on the joint California return it would be excludable. When the exclusion does not apply for federal, the employer may or may not have taken the differences into account, and the W-2 should be analyzed to see how the employer dealt with the situation.

If the employer handled it correctly, then the CA taxable W-2 income should be lower by the amount of the non-dependent partner's plan costs that were not excludable for Federal taxable W-2 income. If not handled correctly on the W-2, an adjustment can be made on the California Schedule CA.

Self-Employment Income – Treat self-employment income as community income for income tax purposes. This includes sole proprietorships and distributive income from partnerships. Half of the income, deductions, and net earnings of a business operated by a registered domestic partner must be reported by each registered domestic partner on a Schedule C (or Schedule C-EZ). In addition, each registered domestic partner owes self-employment tax on half of the net earnings of the business. (IRS Website Q&A 15)

Self-Employment Tax – Pub 555 states that RDPs in California report community income for self-employment tax purposes in the same way they do for income tax purposes. Thus Pub 555 dictates that partners that split SE income each also compute the SE tax based upon their share of the split income. Although the employment tax rules prohibit spouses from treating net earnings as community income (section 1402(a)(5)), registered domestic partners are not spouses as defined by federal law and this provision does not apply to them. (IRS Website Q&A 15)

Splitting SE Tax or Not

Although it is clear that the SE income should be split according to community property rules, there are many practitioners who disagree with Pub 555 and the IRS Website Q&A and believe the SE tax should be applied solely to the individual who actually earned the income. IRS pubs and the IRS Website are neither code nor regulation and can be ignored with impunity so long as there is a basis for doing so. Thus many practitioners are applying the SE tax to the individual who actually earned the income.

The following are recommended ways of dealing with splitting the SE income depending upon whether you wish to split the SE tax or not:

Splitting the SE Tax – If you wish to follow Pub 555 and the IRS website guidance, then:

- Enter the entire Schedule C income and deductions on the return of the one who actually earned the income.
- On Schedule SE input for the one who actually earned the income, make a negative adjustment for 50% of the SE income.
- On the actual self-employed person's 1040, Schedule 1, "other income" line (line 21 (2018) or line 8 (2019)) back out 50% of the net SE Income.
- On the return of the other partner add a Schedule C and label it RDP Community Income Split and enter the community property share of net income under gross income. Ensure that this income is reported on Schedule SE for the partner to whom the income was transferred.

Not Splitting the SE tax – If you wish to apply the SE tax entirely to the one that actually earned it:

- Enter the entire Schedule C income and deductions on the return of the one who actually earned the income.
- On 1040, Schedule 1, "other income" line (line 21 (2018) or line 8 (2019)) back out 50% of the net SE Income. Make no adjustment for Schedule SE.
- On the other partner's 1040, Schedule 1, "other income" line (line 21 (2018) or line 8 (2019)) add in 50% of the net SE Income.

Self-Employed Retirement Contributions – Self-employment income is community income for income tax purposes and each partner is required to report 50% of the income and pay the self-employment tax on the income on his or her federal return. (IRS Website Q&A 15) Therefore, based upon the presumption that each partner is subject to SE tax, then it would seem that each partner is able to make contributions to an SE retirement plan based on their 50% of the reported income in the normal manner.

Out Of Whack – The retirement plan contribution issue still seems out of whack! If one of the RDPs is a wage earner contributing to a 401(k), those contributions are presumably based on all of that person's wages, even though the wages have to be split for income tax reporting. So why should the non-self-employed RDP be allowed to contribute to an SE retirement plan based on the other partner's SE income just because the income has to be split for income tax and self-employment tax reporting purposes? Is it OK to use the 50% of net SE income reported by the non-SE RDP to qualify to fund a regular or SEP IRA?

IRA (which include SEP IRAs) rules are applied without regard to community property rules. (Code Sec 408(g)) To compute the amount that can be contributed to a SEP, the net SE income is reduced by a portion of the SE tax deductible on line 27 (2018) or 14 (draft 2019), Schedule 1, of Form 1040, and then the applicable contribution rate is applied.

Neither Pub 555 nor the IRS Website Q&A provides any guidance in this area of how to determine the SE tax to use – probably because there is no rational answer in light of the SE Tax treatment discussed above. However, the IRS Website clearly states the partner is subject to the SE tax on his or her portion of the net SE income.

As an example*, the net from the Schedule C of an RDP before the community property allocation is $40,000. Each RDP includes $20,000 in income and pays SE tax on $20,000 (according to Pub 555). The RDP who actually owns/operates the business wants to contribute to a 25% SEP. Would the contribution amount be 20% x ($40,000 – 50% of SE tax figured on $20,000) or would it be 20% x ($40,000 – 50% of SE tax figured as if this RDP had reported all $40,000)?*

Pension Income – Income from qualified plan distributions can be either community income or separate income based upon the amount of separate and community income used to fund the account. One possible proration scenario would be prorating by the years before and after the registration. Other methods of allocation may be possible; however Pub 555 only talks about "periods of service".

Example – Prorating by Years – Suppose Dave has had a 401(k) plan since January 1 of 2009. He and Don register as domestic partners on Jan 1, 2016. On January 1 of 2019 Dave retires and begins taking distributions from his 401(k) plan. Dave had the 401(k) plan for 10 years, three of which were during the registration period. Thus prorating by years, Dave's 401(k) distributions would be 70% separate income and 30% community income. In this example, Dave would back out 15% (50% of 30%) of his pension on Form 1040, Schedule 1 "other income" line (line 21 (2018) or line 8 (2019)), and Don would add 15% of the pension income to his 1040, Schedule 1 "other income" line (line 21 (2018) or line 8 (2019)).

Lump Sum Distributions – Community property rules are disregarded for qualifying lump sum distributions where the 10-year averaging option is utilized.

Federal Civil Service Retirement – Whether a civil service annuity is separate or community income depends on the employee's status as an RDP and domicile when the services were performed for which the annuity is paid. Even if the taxpayer now lives in a non-community property state and receives a civil service annuity, it may be community income if it is based on services performed during the registered domestic partnership and while domiciled in a community property state.

Example – Mixed Income - Jake retired in January of 2016 after 30 years of civil service. He and his partner have been registered in CA since January of 2012. They have been domiciled in CA for the entire period. Thus 13.33% (4/30) of the pension payments are community income and the balance is separate income. Assuming Jake's 2019 pension income is $40,000, the following is the allocation between Jake and his partner:

		Jake	Partner
Separate Income (86.67%):	$34,668	$34,668	
Community Income (13.33%):	5,332	2,666	$2,666
Total	$40,000	$37,334	$2,666

Sec 199A Deduction – The TCJA added a new deduction used to figure federal taxable income, effective with 2018 returns, that is generally 20% of the "pass-through" income from the taxpayer's trades and businesses (see details in Chapter 3.24). This deduction presents us with the same issues discussed above related to self-employment. Should 100% of the deduction be claimed only on the federal return of the RDP whose business or rental income is the basis for the deduction, or because of the IRS' requirement to treat such income as community property income, should each RDP claim the deduction on their individual federal return based on the split of community income? This is but one of many questions awaiting guidance from the IRS on this new code section.

California has not conformed to this deduction, and isn't likely to do so.

Other Issues

Expenses – The principle of community income in community property states treats **half of community income and expenses as belonging to each spouse.** Thus 50% of the expenses directly associated with community income should be split between the spouses on their Federal returns. The IRS says the same principle applies for the returns of registered domestic partners in California.

The treatment of expenses not related to community income should be based upon the expense and whether it was paid from community or separate funds. Not all expenses paid with community funds can be split 50-50. An example is home mortgage interest where one of the partners does not have an equitable interest in the property. In such a case only the equitable-interest partner would be able to deduct one half of the interest and the other partner could deduct none (see Home Mortgage Interest and Equitable Ownership below).

Similar problems could arise where the education or medical expense of one partner is paid from community income. On their Federal tax returns they are not allowed to deduct education or medical costs for the other partner, and careful planning should be employed when determining if an expense is paid with community or separate funds. Do keep in mind gifts to pay for education and medical expenses are excludable from the gift tax rules when payments are made directly to the educational institution or medical providers. However, in Lang v. Commissioner TC Memo 2010-286 direct donor transfers made to a donee's medical care provider by a third party (in this case the mother) were treated as gifts to the donee and subsequently deductible by the donee.

Transferring Property – Placing a partner on the title of a separate property is a gift and subject to the normal gift rules and gift tax filing requirements. Keep this issue in mind when establishing an equitable interest in a property for purposes of splitting interest and tax deductions (see Home Mortgage Interest and Taxes below). To avoid gift tax issues consider a tenant-in-common ownership that can provide for a specific, less than 50%, ownership for the donee.

Basis Step Up – Step Down – Presumably, for federal purposes, there is no community property basis adjustment on both halves of the property when one of the RDPs dies (because they are not "spouses"). Only the inherited portion will receive a basis adjustment and the inheriting partner will retain his or her basis on their portion. For California, however, the usual full step-up/step-down basis adjustment will apply to the entire community property, creating a difference in basis for federal and state.

Itemized – Standard Deductions - For federal purposes, a registered domestic partner may itemize or claim the standard deduction, regardless of whether his or her partner does the same. (IRS Website Q&A 4) Typically this situation can arise when some of the deductible items are paid with separate property funds. When filing married separate status on California returns, RDPs must use the same deduction method, i.e., both must itemize or both must use the standard deduction. When filing a joint California return, the use of itemized deductions or the standard deduction is not dependent on which method was used on the partners' federal returns.

Estimated Tax Payments – The Federal estimated tax payments must be claimed by the one who pays them. There is no way to allocate them at this time in the Federal processing system. It is therefore necessary that careful consideration be given to preparing estimates based on the community property allocation lest you end up with one partner being underpaid and subject to underpayment penalties while the other has a substantial refund. (IRS Website Q&A 17)

Extensions – Each partner is required to file their own individual federal extension. However, for state purposes they can file a joint extension just like a married couple.

Bank Accounts – It may be appropriate for the RDPs to maintain a joint checking account and for each RDP to also have a separate checking account. Deductions are generally allowed to the taxpayer who is liable for the payment and who actually makes the payment. Having a joint and two separate accounts will allow the partners to selectively pay expenses either jointly or separately to take advantage of certain tax benefits. An example would be where one might qualify for head of household if that partner pays over half the cost of maintaining the household for a qualified individual.

Treatment of Community Income Where Spouses Live Apart – IRC Sec 66 provides that where spouses live apart at all times during the year, community property rules can be disregarded. However, because for federal tax purposes registered domestic partners are not "spouses," Sec 66 does not apply to registered domestic partners. Therefore they are always subject to the community property rules as long as the RDP agreement is in place. (IRS Website – Q7)

Rental Income or Loss - IRC 469 limits the rental real estate passive loss of an individual to a maximum of $25,000 and phases out that maximum loss when federal AGI is between $100,000 and $150,000. Attempting to make the community property rental gain or loss adjustment on Form 1040, Schedule 1 "other income" line (line 21 (2018) or line 8 (2019)) can lead to inaccurate passive loss limitation and carryover calculations. Therefore it is recommended that the adjustments be made on Schedule E where the appropriate apportionment of income and expenses can be made between the two partners.

<u>*Caution:*</u> Since for CA the partners are filing jointly they only have a $25,000 maximum passive loss limit, whereas for federal purposes they each enjoy the $25,000 maximum loss limit. In addition, on a joint return the partners' incomes are combined, which will create a faster phase out than on the individual Federal returns when the phase out floor is exceeded.

Home Mortgage Interest - IRC 163(h) limits the deduction for qualified residence interest to interest on $1 million of acquisition debt ($750,000 for debt incurred after December 15, 2017) and, for years before 2018 and after 2025, $100,000 of equity debt. Chief Counsel Advice CCA200911077 took the position that the $1 Million of acquisition debt limitation applies to the residence not the individual owners. Although not addressed in the Chief Counsel Advice it would seem that the IRS would also say that the $100,000 equity debt would also apply to the residence and be limited to a single $100,000. **Note**: Home equity debt interest is not deductible on Schedule A for years 2018 through 2025. However, it may be traceable to another deductible purpose using the general interest tracing rules; see chapter 2.15.

The Tax Court backed up the IRS by ruling in *C. J. Sophy, 138 TC No. 8, Dec. 58,965* that the unmarried co-owners are collectively limited to deducting interest paid on a maximum of $1.1 million of acquisition and home equity indebtedness. However, the Ninth Circuit Court of Appeals reversed the Tax Court's decision and has held that the mortgage-interest deduction debt limits are applied to the unmarried co-owners on a per-taxpayer, not a per-residence, basis. The IRS has announced its acquiescence with the Ninth Circuit's decision. Under this interpretation, two unmarried co-owners are collectively limited to a deduction for interest paid on a maximum of $2.2 million, rather than $1.1 million, of acquisition and home equity indebtedness (Voss - IRB 2016-31, p. 193). For post-12/15/2017 debt, two unmarried co-owners would be collectively limited to deduct interest paid on $1.5 million of acquisition debt. This can have significant implications for unmarried co-owners of a home. However, because the RDPs are filing married joint or married separate status for California, the $1.1 million (or $550,000 for MFS) indebtedness cap will apply on their California return. (As of early July 2019, California has not conformed to the reduced acquisition debt limit and the no-equity-debt interest deduction changes of the TCJA.)

AMENDED OPPORTUNITY -Taxpayers who previously limited their interest deduction in accordance with the IRS' position and Tax Court ruling may be able to amend open year federal returns for a refund.

Home Mortgage Interest and Equitable Ownership – Individuals are allowed to deduct interest only if they are liable on the loan or have an equitable interest in the property, and they make the mortgage payment. Where an individual makes the mortgage payment but is not liable on the loan, and does not have an equitable interest in the property, that individual cannot deduct the mortgage interest and neither can the individual who is liable on the loan.

Home Gain Exclusion - IRC 121 allows an exclusion of gain on sale of a principal residence up to $250,000 on an individual return where the individual owned and used the home as a principal residence for 2 of the 5 preceding years. It also permits a $500,000 exclusion on a joint return where both filers used the home as their principal residence and **one** of the filers owned the home for 2 of the prior 5 years. Thus it is possible that where only one of the filers owned the home they would qualify for the $500,000 exclusion on the CA joint return but only one of them would qualify for a $250,000 exclusion when filing individual Federal returns.

Tuition Credit – Who Claims the Credit? – This question sometimes arises related to the education credits on the federal returns. By law the credit goes to the individual who claims the student as a dependent, no matter who pays the tuition. So each partner could pay tuition for a particular student but the credit goes to the one who claims the student's dependency. If community funds are used to pay the education expenses, the student partner may determine the credit as if he or she made the entire expenditure. In that case, the student partner has received a gift from his or her partner equal to one-half of the expenditure. (IRS Website – Q23)

Higher Education Interest Deduction – On a joint CA return the interest deduction is limited to $2,500 but on individual Federal returns each RDP would be allowed a deduction of up to $2,500. In addition, the AGI phase-out may impact the joint return differently than the individual returns.

Child & Dependent Care Credit – For individuals the federal credit is limited by the individual's earned income, with community property rules being disregarded for purposes of determining earned income. However, on a joint return for CA purposes the credit is limited to the earned income of the lower earning partner. Thus where only one partner has earned income no credit would be allowed on the CA return even though credit was allowed on the federal individual return of the working partner. Even where both have earned income, because the credit is limited to the earned income of the lower earning partner, the credit may be reduced from the amount allowed for federal purposes.

Investment Interest Expense Deduction & Carryover – The Schedule A deduction for investment interest expense is limited to net investment income. On a joint CA return the investment income, investment expenses and investment interest of the individuals are combined and can produce results that are quite different from that of the individual federal returns of the partners. The currently deductible and carryover investment interest expense deductions can also be affected by pre-registration carryovers, and amounts related to separate and community incomes.

Net Operating Loss Carryback or Carryforward - If taxpayers haven't been married to each other in all net operating loss years, the net operating loss deduction may only be taken by the spouse who incurred the loss and only to offset income generated by that spouse in the carryback or carryforward years (Rev Rul 60-216). Here again the ruling refers to a spouse and the RDPs are not spouses for Federal purposes**. Note**: For federal NOLs incurred after 2017 there is no carryback provision. For CA NOLs occurring in taxable years beginning after December 31, 2018, the 2-year carryback period is repealed. See Chapter 3.16 for details.

California Joint Return – Based on the foregoing, where the NOL occurred in a year prior to becoming RDPs, the NOL loss would retain its character as a separate property deduction and can only offset the income of the partner to whom the carryforward is attributable.

Federal Returns – Since RDPs are filing individual returns the NOL goes on the return of the individual to whom the carryback or carryforward is attributed.

Employer Dependent Care Assistance (Sec 129) - Maximum W-2 exclusion per year is $5,000 ($2,500 for MFS). However on individual federal returns it is possible that each partner may have had dependent care benefits exempted from their pay, thus exceeding the $5,000 limit on the joint CA return. When this occurs, the Federal AGI for CA limitation purposes is increased by the amount that exceeds $5,000.

Adoption Expenses - The question has arisen whether the Federal tax credit can be claimed for the adoption expenses of an RDP adopting their partner's child. The Sec 36C(d) definition of qualified adoption expenses includes the following statement: "*(C) Which are NOT expenses in connection with the adoption by an individual of a child who is the child of such individual's spouse*."

Federal Returns - According to the IRS website, registered domestic partners are not considered spouses and therefore each registered domestic partner may qualify to claim the adoption credit maximum $14,080 per child in 2019; Rev Proc 2018-57) on the amount of the qualified adoption expenses paid or incurred for the adoption. However, the partners may not both claim credit for the same qualified adoption expenses, and the sum of the credit taken by each RDP may not exceed the total amount paid. Thus, if both RDPs paid qualified adoption expenses to adopt the same child, and those expenses total more than $14,080, the maximum credit available for the adoption is $14,080. This maximum may be allocated between them in any way they agree, and the amount of credit claimed by one partner can exceed the adoption expenses paid by that person, as long as the total credit claimed by both partners does not exceed the total amount paid by them. (Q&A 5) Additionally, if a registered domestic partner adopts his or her partner's child, the adopting parent can claim the adoption credit. (IRS Website Q&A 6) Where a registered domestic partner adopts his or her partner's child and the adoption expenses are paid from community property sources, then the adopting partner would only be able to use 50% of the expenses.

California Joint Return – Adoption of a partner's child does not give rise to a CA credit since the CA adoption credit only applies to adoptions of children from a CA public agency or political subdivision.

CA AGI Limitations – Federal AGI is used to determine various limits on CA returns, including: medical expenses, miscellaneous itemized deductions, IRA contributions and certain other phase-outs. The federal AGI of an RDP or former RDP for limitation purposes will be the AGI determined as if the RDP or former RDP filed a federal income tax return using the same filing status as used to file their California income tax return. If no RDP adjustments, simply use the AGI(s) on the federal return(s). If an adjustment is necessary, use the worksheet in FTB Pub.737 or a pro forma federal return. (SB 105-2007)

Exemption Allowances – For years before 2018 and after 2025, each RDP claims his or her own exemption deduction on their individually filed federal returns. The TCJA suspended the filer, spouse and dependent exemption deductions for years 2018 through 2025 but enhanced the child tax credit by doubling the credit amount and making up to 40% refundable, as well as adding a new nonrefundable credit of $500 per dependent who is not a qualified child. If community funds are used to support more than one person who would otherwise qualify as a dependent, but neither RDP qualifies on his or her own to claim the dependency, the RDPs can agree which one of them will claim the dependent(s). They cannot, however, each claim half of the total exemption allowance amount in years when the exemption deduction is allowed.

Form DE-4, Withholding Allowance Certificate– Because of the RDPs' different federal and CA filing statuses careful consideration should be given to the differences in the DE-4 and the W-4. Without careful planning, RDPs may encounter over- or under-withholding. Under-withholding of taxes may result in penalties.

Form 593-B, Real Estate Withholding Tax Statement - RDPs who sell or transfer jointly owned CA real property are treated as spouses for purposes of completing Form 593-B Real Estate Withholding Tax Statement. Therefore, Real Estate Escrow Persons may complete and provide RDP's with a combined Form 593-B listing both partners for the completed real estate transaction

RDP Spousal Support – If a California Family Law Court awards spousal support (alimony), and the payment satisfies the requirements under tax law for alimony, it would be deducted by the payor and included by the payee on their CA returns. (As of early July 2019, California has not conformed to the TCJA change that makes alimony from post-2018 divorce decrees nontaxable to the recipient and nondeductible by the payer.) Since federal tax law does not include an RDP category, the federal treatment of these payments is uncertain. See "Alimony," above.

RDP Property Settlements - If a California Family Law Court orders a division of mutually acquired property (acquired with separate and/or community funds), the treatment is the same as for a property transfer by married individuals in a divorce: no taxable event and each individual would assume the joint basis of the property he or she receives. However, since federal tax law does not recognize RDPs as being married, the treatment of the transactions is uncertain at this time. For federal purposes it could be a gift, sale or part gift and part sale.

California Schedule CA Adjustments (line number references are for 2018 version)

- **Accident and Health Insurance Exclusion of Income –** CA law does, and federal law does **not**, allow exclusion for accident and health insurance paid by the employer for a registered domestic partner and the partner's dependents. (IRC §106(a), California R&TC §17021.7). Enter as an adjustment on Schedule CA (540 or 540NR), line 1, column B the amount included in federal income.
- **Medical Expense Reimbursement as an Exclusion from Income -** CA law does, and Federal law does **not,** allow exclusion for medical expense reimbursement paid by the employer for a registered domestic partner and the partner's dependents. (IRC Code §105(b), California R&TC §17021.7). Enter as an adjustment on Schedule CA (540 or 540NR), line 1, column B the amount included in federal income.

- **Employer Reimbursement of Federal Tax for the Non-Employee RDP's Non-excludable Insurance Premiums** – When the benefits for an RDP are not excludable for federal purposes, some employers choose to reimburse their employees for the additional federal tax they pay on the non-excludable benefits. Effective October 1, 2013, Assembly Bill 362 provides that, if an employer reimburses an employee for the federal tax on the non-dependent RDP partner's health care benefits, the employee may exclude that reimbursement from California tax, with the adjustment made on the FTB Schedule CA. The reimbursement is taxable for federal purposes. This provision ends after 2018.

  Example *– Ted and Harry are RDPs. Ted's employer provides health care benefits for its employees, and the employer's plan also includes benefits for RDPs. Both Ted and Harry utilize Ted's employer's plan and the annual cost of insurance for them is $4,500 each. In addition Ted's employer reimburses Ted $1,125 for the federal tax on Harry's insurance cost, which is not excludable for federal purposes. Thus for Ted's 1040 only the cost of his own insurance is excluded, but the $4,500 value of Harry's insurance and the $1,125 tax reimbursement are taxable. On their joint California return both the $4,500 cost of Harry's insurance and the $1,125 federal tax reimbursement from the employer are excluded.*

- **Medical Expenses -** CA law does, and federal law does **not**, allow a deduction for medical expenses or qualified long term care insurance incurred for a registered domestic partner and the partner's dependents. (IRC Code §213(a), California R&TC §17021.7). Enter as an adjustment on Schedule CA (540 or 540NR), Adjustments to Federal Itemized Deductions, under the line for Other adjustments. Enter the allowed amount as a positive number.

Compliance Issues

- **Conflict of Interest –** Preparing the separate federal returns of both parties involves inherent conflicts of interest. In addition, when representing both taxpayers, conversations or other communications between either party and the preparer is not considered confidential and is available to the other party. The RDPs must consent to the sharing of tax return information needed to complete and file both parties' returns. **A recommended engagement letter dealing with these issues is included at the end of this chapter.**

- **Section 7216 Consent -** Preparing the tax returns of registered domestic partners includes some unique complications. For CA purposes, the partners must file as married individuals but for Federal purposes the partners must file as unmarried individuals. Under Federal law, Registered Domestic Partners are not recognized as being married, and so Registered Domestic Partners would be considered "third parties" with respect to disclosure rules. Sec 7216 of the Internal Revenue Code bars disclosure of tax return information to third parties without informed consent. Thus for Federal tax purposes disclosing the tax information of one partner to the other partner is technically a violation of Sec 7216 even though the IRS asks for the name and social security number of the other partner on allocation Form 8958.

  It is unlikely that the IRS would initiate any Sec 7216 sanctions against a practitioner since IRS instructions say to include the allocation form that includes the name and SSN of the RDP along with the allocated income, etc., items, and disregards the provisions of Section 7216. The potential risk of not having a disclosure consent is a disgruntled client with an aggressive attorney in a civil suit against the practitioner. **A recommended consent form is included at the end of this chapter.**

CAUTION

The Section 7216 consent cannot be combined with an engagement letter. All Section 7216 consents must be included in a separate document that contains the mandatory Sec 7216 language and must be in 12 point font. Thus the RDP partners must sign a separate Sec 7216 disclosure and engagement letter.

Federal Filing Suggestions

E-File versus Paper – Because of the non-standard treatment of income and deductions which causes mismatches with the IRS, most practitioners who specialize in RDP returns recommend they be filed by paper. If the filing recommendations suggested here are followed, the top of the 1040 will be flagged as an RDP return.

Filing Together – The IRS has indicated that the returns should NOT be filed together in the same envelope and should not be attached to each other.

Flag the Return – It is recommended that RDP returns be flagged by including the following statement in the margin at the top of the 1040: ***"This Return Filed in Accordance with CCA201021050"***

Section 7216 Disclosure Consent and Engagement Letter

ClientWhys™ has developed a Section 7216 Consent and Engagement Letter for RDPs. However, the documents have not been reviewed by an attorney, legal authority or sanctioned by any governmental agency. Therefore you use them at your own risk.

The third page following (01.12.15) illustrates a possible Section 7216 Consent for RDPs. Modify as needed for your practice. You may wish to have your legal counsel review the final form.

The fourth page following (01.12.17) illustrates a possible engagement letter for RDPs. Modify as needed for your practice. You may wish to have your legal counsel review the final form.

The Section 7216 Consent and engagement letter were drafted for the sole use of ClientWhys™ students in their personal tax practices. Any other use or reproduction in whole or in part is not authorized.

NOTES

Consent to Disclosure of Tax Return Information between Registered Domestic Partners

Federal law requires this consent form be provided to you. Unless authorized by law, we cannot disclose, without your consent, your tax return information to third parties for purposes other than the preparation and filing of your tax return. If you consent to the disclosure of your tax return information, Federal law may not protect your tax return information from further use or distribution.

Preparing the tax returns of registered domestic partners includes some unique complications. For California purposes, the partners must file as married individuals(1) but for Federal purposes the partners must file as unmarried individuals(2). Sec 7216 of the Internal Revenue Code(3) bars disclosure of tax return information to third parties without informed consent. Thus, for Federal tax purposes, disclosing the tax information of one partner to the other partner is technically a violation of Sec 7216, even though the community and separate property allocation form provided by the IRS asks for the name and SSN of both partners.

Therefore, this firm requires your mutual consent to disclose and share tax return information with your Registered Domestic Partner before your 2019 Federal tax returns can be prepared.

You are not required to complete this form. However, because this firm's ability to disclose tax return information to your registered domestic partner affects this firm's ability to provide tax preparation, we may decline to provide you with service if you do not complete the form. <u>You have the opportunity to have your own legal representative review and advise you on all matters related to the services, including this letter, prior to signing the acknowledgement that this letter contains.</u> If you agree to the disclosure of your 2019 tax return information to your registered domestic partner, your consent is valid for the amount of time that you specify (but not less than one year). We strongly suggest the period of time be 4 years so that it includes the statute of limitations for the 2019 return. If you do not specify the duration of your consent, your consent is valid for one year.

Federal law requires community property rules(4) to be applied in the preparation of Registered Domestic Partner returns. You must also understand and acknowledge that preparing the returns of both parties involves inherent conflicts of interest(5) for the person being asked to prepare the returns. Therefore, before this firm can prepare your return, you must acknowledge that this firm cannot place information on either return that conflicts with information used in preparing your registered domestic partner's return. Additionally, if this firm represents both parties, conversations or other communications between either party with this firm are not considered confidential and are available to the other party. You must consent to the sharing of tax return information needed to complete and file both parties' returns.

We, [insert names of RDPs: __________ and _________], Registered Domestic Partners, consent to the disclosure of our tax return information to [insert preparer's name] for the purposes described above and acknowledge that conflicts of interest may exist in the preparation of our separate federal tax returns.

Duration of our joint consent (defaults to one year if left blank): _____________

This consent is not valid unless signed by both Registered Domestic Partners.

RDP Taxpayer Signature: ______________________________ Date: _________

RDP Taxpayer Signature: ______________________________ Date: _________

If you believe your tax return information has been disclosed or used improperly in a manner unauthorized by law or without your permission, you may contact the Treasury Inspector General for Tax Administration (TIGTA) by telephone at 1-800-366-4484, or by e-mail at complaints@tigta.treas.gov.

(1) *California Law (SB 1827 effective January 1, 2007)* – requires registered domestic partners (RDPs) to use the same filing status as married couples. Thus, they must use the married joint, married separate or surviving spouse (if otherwise qualified) filing status for their California return(s).

(2) *Defense of Marriage Act (DOMA), Public Law 104-199* –The Supreme Court ruled in the *Windsor* case that DOMA §3 violates the Equal Protection Clause of the Fifth Amendment. Following the *Windsor* ruling, the Internal Revenue Service (IRS) in Revenue Ruling 2013-14 provided guidance for same-sex married (SSM) couples that treats SSM couples legally married in jurisdictions that recognize their marriages as married for federal tax purposes. The Supreme Court in 2015 ruled in *Obergefell* that the 14th Amendment requires a state to license a marriage between two people of the same sex and to recognize a same sex marriage that was lawfully licensed and performed out of state. However, the Supreme Court rulings and IRS' revenue ruling do not extend to registered domestic partnerships, civil unions or similar formal relationships that aren't marriages recognized under state law. Therefore, for federal purposes a RDP individual cannot be considered a "spouse," which affects certain issues related to RDP individuals' Federal tax returns.

(3) *IRC §7216* – is a section of the Internal Revenue Code that prohibits preparers of tax returns from knowingly or recklessly disclosing or using tax return information for purposes other than preparing the return.

(4) *Chief Counsel Advice 201021050* – has concluded that California registered domestic partners are subject to the community property laws and therefore should report one-half of all community income, including compensation for personal services or income from community property, on their Federal tax returns.

(5) *Treas. Dept. Circular 230 §10.29, Conflicting Interests* **–** a practitioner may not represent potential conflicting interests in his or her practice before the IRS unless the practitioner reasonably believes that the representation of any party before the Service will not be adversely affected; and all parties represented by the practitioner who have an interest in the matter before the Service expressly consent in writing to the representation after the practitioner has fully disclosed the potential conflict. A practitioner may not represent a party in his or her practice before the IRS if the representation of the party may be materially limited by the practitioner's own interests, unless the practitioner reasonably believes the representation will not be adversely affected and the client consents after the practitioner has fully disclosed the potential conflict, including disclosure of the implications of the potential conflict and the risks involved.

Engagement Letter – Registered Domestic Partners

This firm appreciates the opportunity to prepare your **personal income tax returns for 2019 and 2020 estimated taxes**. This letter sets forth the services this firm provides as part of the tax preparation process, states potential conflicts of interest and outlines your responsibilities as clients.

The returns will be prepared based on information and documentation you provide without independent verification by this firm. This firm will provide you with tax organizers to assist you in gathering and organizing the required tax return data in order to keep the tax preparation fees to a minimum. You will make available information about all of your income and deductions so that substantially correct amounts of income and tax can be properly reported. It is your responsibility to maintain, in your records, the documentation necessary to support the data used in preparing your tax returns. This firm is not responsible for the disallowance of doubtful deductions or inadequately supported documentation, nor for resulting taxes, penalties and interest.

You are expected to promptly provide requested follow-up materials and any missing information. If this firm has not received all of your tax return information in early April, we may not be able to complete the return before the filing due date. If your returns are not filed by midnight on April 15, **2020**, you may be subject to late filing and/or late payment penalties.

This firm is responsible for preparing only the returns listed above. The preparation fee does not include responding to inquiries or examination by taxing authorities. However, the firm is available to represent you and the fees for such services are at the firm's standard rates and would be covered under a separate engagement letter.

It is understood that anything you tell this firm during the interview for the preparation of your tax return is confidential, but not protected from the IRS or state tax authority. In addition, the firm cannot disregard the implications of any information you provide in the process of preparing your return. Any of the work papers used to prepare your returns, as well as the communications between you and this firm, can be summoned by the IRS in a legal action against you. If this is of concern to you, you should discuss this with legal counsel prior to engaging this firm for the preparation of your returns.

This firm will use its best judgment to resolve questions in your favor where a tax law is unclear, if there is a reasonable justification for doing so. Whenever we are aware that a possibly applicable tax law is unclear or that there are conflicting interpretations of the law by authorities (e.g., tax agencies and courts), we will explain the possible positions that may be taken on your return. We will follow whatever position you request, so long as it is consistent with the codes, regulations and interpretations that have been promulgated. If the IRS or a state tax agency should later contest the position taken, there may be an assessment of additional tax plus interest and penalties. We assume no liability for any such additional tax, penalties or assessments.

If you were registered as domestic partners as of 12/31/2019, you are required to file as married individuals for California purposes and unmarried individuals for Federal purposes applying community property rules. For California, you and your partner have the option of filing a joint return or filing married separate returns for **2019**. Where one partner passed away in 2017 or 2018, the surviving partner may qualify to file using the surviving spouse with qualified dependent filing status.

If you file a joint California return, you are accepting joint and/or separate responsibility for any California tax assessed on the return. Be especially concerned if there is an unpaid liability on the final return as submitted; you can be held separately liable for the full amount of the underpayment. If you have any questions about your potential liability, please ask.

- If a jointly filed California return is later challenged by the California Franchise Tax Board (FTB) and any additional tax is assessed, each filer can be held liable for the full additional tax. If you are separated or contemplating termination of the domestic partner registration, you may wish to make sure any dissolution agreement reflects that any additional California tax for the **2019** year will be paid by the individual who generated the additional income. However, this will not prevent the FTB from assessing the tax or attempting to collect it from both parties if the return was filed jointly.
- If a joint CA return is prepared for you that is later challenged by the FTB, this firm will not be allowed to represent either of you separately, and will only be able to represent both of you if the representation can be provided objectively and with written consent from both of you.
- If you are contemplating termination of the domestic partner registration or were previously married or registered to another client of this firm, you must understand that preparing the returns of both can involve inherent conflicts of interest for the person being asked to prepare the returns. Therefore, before this firm can prepare your return, you acknowledge that this firm cannot place information on your return that conflicts with information used in preparing a former registered domestic partner's or former spouse's return. Additionally, if this firm represents both parties, conversations or other communications by either party with this firm are not considered confidential and are available to the other party. In fact, this firm may be required to disclose any oral or written communications between this firm and one party to the other party.

Sec 7216 of the Internal Revenue Code bars disclosure of tax return information to third parties without informed consent. Under Federal law, Registered Domestic Partners are not recognized as being married, and so Registered Domestic Partners would be considered "third parties" with respect to disclosure rules. Thus, for Federal tax purposes, disclosing the tax information of one partner to the other partner is technically a violation of Sec 7216. In addition, community property rules must be applied when preparing individual Federal returns for Registered Domestic Partners. For that reason you will also be required to jointly consent to the disclosure of your tax information and acknowledge the inherent conflicts of interest when preparing your separate Federal returns. A separate document is used for this purpose.

Fees for services will be at the firm's standard rates for preparing returns plus out-of-pocket expenses, plus charges for extra time required to segregate community and separate income and to allocate community income. In some circumstances, a retainer may be required. Payment for service is due when rendered and, in some circumstances, interim billings may be submitted as work progresses and expenses are incurred.

You will be provided with copies of the completed returns. It will be your responsibility to review the documents carefully to verify that the information is correct and accurate before signing and filing the returns or signing the authorization for this firm to electronically file the returns.

Both Registered Domestic Partners Must Sign:

RDP Taxpayer Signature: ______________________________ Date: _________

RDP Taxpayer Signature: ______________________________ Date: _________

FOREIGN RELATED REPORTING ISSUES

FOREIGN REPORTING REQUIREMENTS INCLUDED IN THIS CHAPTER

NOTE: For the tax and withholding treatment of **resident and non-resident aliens** see chapter 1.09.

Related IRS & FinCEN Publications and Forms

- **Form 3520** - Annual Return To Report Transactions With Foreign Trusts and Receipt of Certain Foreign Gifts
- **Form 3520A -** Annual Information Return of Foreign Trust With a U.S. Owner
- **Form 5471 –** Information Return of U.S Persons With Respect to Certain Foreign Corporations
- **Form 8938** - Statement of Specified Foreign Financial Assets
- **FinCEN 114** - Report of Foreign Bank and Financial Accounts (formerly TD F 90-22.1)

FBAR Filing Due Date - The Report of Foreign Bank and Financial Accounts (FBAR - FinCEN Form 114) due date is April 15 (was June 30 for 2015 and prior FBARs) and a maximum 6-month filing extension is available.

The same weekend/holiday rule applies for FBARs as income tax returns. Thus FBARs reporting 2019 account information are due April 15, 2020 (Oct. 15, 2020 if on extension). The 2018 FBAR due date was April 15, 2019 (Oct. 15, 2019 if on extension).

MOST COMMONLY ENCOUNTERED FOREIGN REPORTING REQUIREMENTS

The following table provides an overview of various types of foreign assets and the reporting requirements associated with them – the 8938 or 114 form needs to be filed when the applicable monetary threshold (discussed below) for each form is exceeded. (Source IRS Website)

RAPID FINDER

<table>
<tr><th></th><th>Form 8938</th><th>FinCEN Form 114 (FBAR)</th></tr>
<tr><td>Financial (deposit and custodial) accounts held at foreign financial institutions</td><td>Yes</td><td>Yes</td></tr>

FOREIGN ACCOUNT REPORTING REQUIREMENTS (FBAR)

The Tax Return Questions – The IRS includes detailed questions related to foreign account report filing and foreign trusts on the 1040 Schedule B (see wording below). Similar questions appear on Forms 1041 and 1065. These questions and answers are covered by the correctness and completion attestation the taxpayer makes under penalty of perjury when signing the return (also shown below). **Be sure to advise the client of their FBAR filing obligations. It may be appropriate to advise them in writing due to the severe penalties for not filing.**

From Schedule B (1040, 2018), The 2019 version was not available when this chapter was updated:

You must complete this part if you (a) had over $1,500 of taxable interest or ordinary dividends; (b) had a foreign account; or (c) received a distribution from, or were a grantor of, or a transferor to, a foreign trust.

Part III Foreign Accounts and Trusts

7a At any time during 2018, did you have a financial interest in or signature authority over a financial account (such as a bank account, securities account, or brokerage account) located in a foreign country? See instructions

If "Yes," are you required to file FinCEN Form 114, Report of Foreign Bank and Financial Accounts (FBAR), to report that financial interest or signature authority? See FinCEN Form 114 and its instructions for filing requirements and exceptions to those requirements

7b If you are required to file FinCEN Form 114, enter the name of the foreign country where the financial account is located ▸ ___________________

8 During 2018, did you receive a distribution from, or were you the grantor of, or transferor to, a foreign trust? If "Yes," you may have to file Form 3520. See instructions

From 1040 signature attestation:
Under penalties of perjury, I declare that I have examined this return and accompanying schedules and statements, and to the best of my knowledge and belief, they are true, correct, and complete. Declaration of preparer (other than taxpayer) is based on all information of which preparer has any knowledge.

Caution: Care should be exercised in answering those questions correctly since they are part of the return and the return is signed under penalty of perjury.

FINCEN FORM 114 - FOREIGN ACCOUNT REPORTING REQUIREMENTS (FBAR)

FBAR Reporting Requirement - Each United States person who has a financial interest in or signature or other authority over any foreign financial accounts, including bank, securities, or other types of financial accounts, in a foreign country, **if the aggregate value of these financial accounts exceeds $10,000** at ***any time*** during the calendar year, must report that relationship to the U.S. government each calendar year. This is done by filing **FinCEN Form 114.**

Due Date **-** Beginning for the 2016 tax year, the annual due date for filing Reports of Foreign Bank and Financial Accounts (FBAR) is April 15 of the subsequent year. As with the 1040, if April 15 falls on a Saturday, Sunday or legal holiday, the FinCEN 114 due date is extended to the next business day. So it will always be the same as the 1040 due date. Reports due in years before 2017 had a due date of June 30.

Extension - To implement the statute with minimal burden to the public and the government, FinCEN will grant filers failing to meet the FBAR annual due date of April 15 an automatic extension to October 15 each year. Accordingly, specific requests for this extension are not required (instructions to FinCEN Form 114, available at https://www.fincen.gov/sites/default/files/shared/FBAR%20Line%20Item%20Filing%20Instructions.pdf).

Purpose of the FBAR Filing Requirement - The Treasury Department's Financial Crimes Enforcement Network (FinCEN) uses the FBAR filings in conjunction with Suspicious Activity Reports, Currency Transaction Reports, and other BSA (Bank Secrecy Act) reports to provide law enforcement and regulatory investigators with valuable information to fight fraud, money laundering, terrorist financing, tax evasion and other financial crime.

Reportable FBAR Accounts – Financial account includes the following types of accounts:

- Bank accounts such as savings accounts, checking accounts, and time deposits,
- Securities accounts such as brokerage accounts and securities derivatives or other financial instruments accounts,
- Commodity futures or options accounts,
- Insurance policies with a cash value (such as a whole life insurance policy),
- Mutual funds or similar pooled funds (i.e., a fund that is available to the general public with a regular net asset value determination and regular redemptions),
- Any other accounts maintained in a foreign financial institution or with a person performing the services of a financial institution.

A financial account is foreign when it is located outside of the United States, defined for this purpose as the 50 states, the District of Columbia, U.S. territories and possessions (Commonwealth Northern Mariana Islands, American Samoa, Guam, Commonwealth of Puerto Rico, U.S. Virgin Islands and Trust Territories of the Pacific Islands), and Indian lands as defined in the Indian Gaming Regulatory Act. Typically, then, a financial account that is maintained with a financial institution located outside of the United States is a foreign financial account.

An account maintained with a U.S. financial institution is generally not considered a foreign account for FBAR purposes, even if the account contains holdings or assets of foreign entities. In general, the FBAR rules also don't apply to certain types of custodial arrangements in which a U.S. bank, acting as a "global custodian," combines the assets of multiple investors and creates pooled cash and securities accounts in non-U.S. markets. U.S. customers with these types of accounts typically have no rights in the foreign accounts and can access their holdings only through the U.S. financial institution. Caution: a U.S. customer is considered to have a foreign financial account if the custodial arrangement allows him to directly access his foreign holdings maintained at the foreign institution.

***Example** – Adam has an account with a branch of a U.S. bank that is physically located in Germany. This is a foreign financial account.*

***Example** - Bonnie maintains an account with a branch of a French bank that is physically located in California. This is not a foreign financial account.*

***Example** - Carl, who is a U.S. citizen, purchased securities of a French company through a securities broker located in New York. Carl is not required to report these securities on a FBAR because he purchased the securities through a financial institution located in the U.S.*

<u>Signature or other authority</u> - FinCEN has ruled that under the definition of "signature or other authority" for FBAR purposes an individual has such authority over an account if the foreign financial institution will act upon a direct communication from the individual regarding the disposition of assets in the account. The signature authority definition applies only to individuals.

Proposed rule change – FinCEN has proposed an amendment to the FBAR regulations to eliminate the requirement for officers, employees, and agents of U.S. entities to report signature authority over entity-owned foreign financial accounts for which they have no financial interest, if those accounts are already required to be reported by their employer or any other entity within the same corporate or other business structure as their employer. (FinCEN Proposed Rule (RIN 1506-AB26, Mar. 2, 2016)) Employers would be required to maintain for 5 years information identifying all officers, employees, or agents with signature authority over, but no financial interest in, those same accounts. However, if the entity that has a financial interest in the foreign financial account over which the officer, employee, or agent has signature authority does not have an obligation to report to FinCEN its financial interest in such accounts, the employee, officer or agent would still be required to file a FBAR.

Filing extension – Until the matters raised in the proposed rule change are settled, certain individuals who have signature authority over one or more foreign financial accounts, but no financial interest in the accounts, have been given an additional extension for filing a FBAR for signature authority they held during calendar year 2018. The extension also applies to reporting deadlines previously extended for years 2011 through 2017. The extended due date is April 15, 2020. (FinCEN Notice 2018-1) This extension applies **only** to the following individuals:

(1) an employee or officer of a covered entity who has signature or other authority over, and no financial interest in, a foreign financial account of another entity that is more than 50-percent owned, directly or indirectly, by the covered entity (a controlled person);

(2) an employee or officer of a controlled person of a covered entity who has signature or other authority over, and no financial interest in, a foreign financial account of the entity or another controlled person of the entity; or

(3) officers and employees of investment advisors registered with the Securities and Exchange Commission with signature or other authority over, and no financial interest in, the foreign financial accounts of persons that are not registered investment companies.

<u>Financial Interest</u> - A United States person has a financial interest in a foreign financial account for which:

(1) The United States person is the owner of record or holder of legal title, regardless of whether the account is maintained for the benefit of the United States person or for the benefit of another person; or

(2) The owner of record or holder of legal title is one of the following:

- (a) An agent, nominee, attorney, or a person acting in some other capacity on behalf of the United States person with respect to the account;
- (b) A corporation in which the United States person owns directly or indirectly:
  - (i) more than 50 percent of the total value of shares of stock or
  - (ii) more than 50 percent of the voting power of all shares of stock;
- (c) A partnership in which the United States person owns directly or indirectly:
  - (i) an interest in more than 50 percent of the partnership's profits (e.g., distributive share of partnership income taking into account any special allocation agreement) or
  - (ii) an interest in more than 50 percent of the partnership capital;
- (d) A trust of which the United States person:
  - (i) is the trust grantor and
  - (ii) has an ownership interest in the trust for United States federal tax purposes. See 26 U.S.C. sections 671-679 to determine if a grantor has an ownership interest in a trust;

(e) A trust in which the United States person has a greater than 50 percent present beneficial interest in the assets or income of the trust for the calendar year; or
(f) Any other entity in which the United States person owns directly or indirectly more than 50 percent of the voting power, total value of equity interest or assets, or interest in profits.

Record Keeping Requirements - Persons required to file an FBAR must retain records that contain the name in which each account is maintained, the number or other designation of the account, the name and address of the foreign financial institution that maintains the account, the type of account, and the maximum account value of each account during the reporting period. The records must be retained for a period of **5 years** from the filing due date.

NOTE: The FBAR generally contains all of the required information and retaining copies of the FBAR returns should satisfy the record keeping requirements.

Individuals who have signature authority over their employer's foreign financial accounts and who are required to file Form 114 are not personally required to maintain the records of that employer for 5 years.

Definition of "U.S. resident" - FinCEN, in rules issued in 2011, clarified that, in determining whether an individual is a U.S. resident, the elections under Code Sec. 6013(g) (under which a nonresident alien married to a U.S. citizen or resident can elect to be treated as a resident for tax purposes) and Code Sec. 6013(h) (where a nonresident alien who becomes a U.S. citizen or resident before the close of the tax year and is married to an individual who is a U.S. citizen or resident on the last day of that tax year is treated as a citizen for the entire year) are disregarded.

Retirement and other financial accounts - Life insurance policies and annuities are accounts for FBAR purposes. The obligation to file an FBAR rests with the policy holder and not the beneficiary.

Proposed rule change – In the rules changes proposed in March 2016, FinCEN clarifies that participants and beneficiaries in retirement plans under IRC sections 401(a), 403(a), or 403(b), as well as owners and beneficiaries of Traditional and Roth IRAs, are not required to file an FBAR with respect to a foreign financial account held by or on behalf of the retirement plan, IRA, or Roth IRA.

Interests in trusts - FinCEN clarified in the 2011 rules that, to avoid confusion for discretionary beneficiaries or remaindermen, only beneficiaries who have a present beneficial interest in excess of 50% of a trust's assets or who are receiving more than 50% of a trust's current income are subject to the FBAR rules. (31 CFR 1010.350(e)(2)(iv))

Proposed rule change – The March 2016 rules change would relieve the beneficiary of a trust described in the paragraph above from having to report the trust's foreign financial accounts if the trust, trustee of the trust, or agent of the trust is a United States person that files a FBAR disclosing the trust's foreign financial accounts.

Person - A person means an individual and legal entities including, but not limited to, a limited liability company, corporation, partnership, trust, and estate.

United States Person - United States (U.S.) person means U.S. citizens; U.S. residents; entities, including but not limited to, corporations, partnerships, or limited liability companies created or organized in the U.S. or under the laws of the U.S.; and trusts or estates formed under the laws of the U.S.

Note: The federal tax treatment of an entity does not determine whether the entity has an FBAR filing requirement. For example, an entity that is disregarded for purposes of the Internal Revenue Code must file an FBAR, if otherwise required to do so. Similarly, a trust for which the trust income, deductions, or credits are taken into account by another person for purposes of the IRC must file an FBAR, if otherwise required to do so.

Filing Exceptions

Certain Accounts Jointly Owned by Spouses. The spouse of an individual who files an FBAR is not required to file a separate FBAR if the following conditions are met:

(1) All the financial accounts that the non-filing spouse is required to report are jointly owned with the filing spouse;

(2) The filing spouse reports the jointly owned accounts on a timely filed FBAR electronically signed; and

(3) The filers have completed and signed Form 114a, Record of Authorization to Electronically File FBARs (maintained with the filer's records).

Otherwise, both spouses are required to file separate FBARs, and each spouse must report the entire value of the jointly owned accounts.

Consolidated FBAR **-** If a United States person that is an entity is named in a consolidated FBAR filed by a greater than 50 percent owner, such entity is not required to file a separate FBAR.

United States Military Banking Facility - A financial account maintained with a financial institution located on a United States military installation is not required to be reported, even if that military installation is outside of the United States.

Watch for Overlooked Accounts - Some taxpayers may not realize that they have accounts that fall under this reporting requirement, such as:

- Family Accounts – Recent immigrants to the U.S. may still have parents or other family members residing in the "old" country, and those relatives may have included them on an account in the foreign country. This is common practice for some ethnic groups. The taxpayer does not really consider the account theirs, but it falls under the reporting requirement if they have signature or other authority over the account.
- Inherited Accounts – Accounts that are in a foreign country and are inherited fall under the FBAR reporting requirement even if the funds are subsequently transferred to the U.S. The FBAR rules state that reporting is required if at any time during the year the foreign account exceeds $10,000. CAUTION: An inheritance may also require the filing of Form 3520 (see Reporting Receipt of Foreign Gifts in this chapter).
- Business Accounts – An officer or board member may have signature authority over a business account held in a foreign country and inadvertently overlook the need to meet the FBAR reporting requirements.
- Foreign Retirement Savings Accounts – For example a U.S. Resident with Canadian RRSPs and RRIFs retirement plans with values exceeding $10,000.
- Clients With On-Line Gambling Accounts – The Tax Court has held that an on-line gambler was required to file an FBAR for on-line gaming accounts with out-of-the-country on-line casinos. He was fined for not making an FBAR reporting of his online account and the tax court sided with the government. Upon appeal, the court ruled that only the account where the taxpayer's financial institution acted as an intermediary between his U.S. bank account and the online poker sites he used was a foreign account that was reportable on the FBAR. (*Hom (DC CA, 6/4/2014); J.C. Hom, CA-9, 2016)*

Determining Maximum Account Value **-** For each foreign account, it is necessary to determine the maximum value in the currency of that account for the calendar year being reported. The maximum value of an account is a reasonable approximation of the greatest value of currency or nonmonetary assets in the account during the calendar year. If periodic account statements fairly reflect the maximum account during the year, they may be relied on to determine the maximum value of the account. Each account must be valued separately.

For accounts in non-U.S. currency, the maximum account value must be converted into U.S. dollars by using the Treasury Department's Bureau of Fiscal Service rate, which can be found at https://www.fiscal.treasury.gov/reports-statements/treasury-reporting-rates-exchange/ from the last day of the calendar year. If the Treasury's rate is not available, another verifiable exchange rate can be used if the source of the rate is identified. If the aggregate of the maximum account values exceeds $10,000, an FBAR must be filed.

> ***Example:*** *A U.S. person has a bank account that is denominated in Euros at a bank in Bucharest, Romania. The highest value of the account during 2019 was on October 4, 2019. To convert the October 4th value to U.S. dollars, use the exchange rate for a Euro as of December 31, 2019 as found on the Treasury Department's web site.*

Filing Information – The Form 114 is not included with an individual's 1040; must be submitted electronically; and is not filed with the IRS. Instead it is filed through the BSA E-filing System.

Tax Preparers - Tax preparers intending to submit their clients' 114 forms to FinCEN will need to enroll with FinCEN to do so. According to FAQs on the FinCEN website:

> "An attorney, CPA or an Enrolled Agent always may assist its clients in the preparation of electronic BSA forms for BSA E-Filing, including the FBAR. Consistent with FinCEN's recent proposal to provide for approved third-party filing of the FBAR, if an attorney, CPA or Enrolled Agent has been provided documented authority [such as a Form 2848 power of attorney or similar form unique to FinCEN] by the legally obligated filers to sign and submit FBARs on their behalf through the BSA E-Filing System, that attorney, CPA or Enrolled Agent can do so through a single BSA E-Filing account established for the attorney, CPA or Enrolled Agent. If such authority is not provided, the filings must be signed and submitted through a BSA E-Filing account unique to each client."

FinCEN has provided Form 114a, Record of Authorization to Electronically File FBARs, on which persons with an obligation to file a FBAR (e.g., your clients) can authorize a third party (you or your firm) who is registered with FinCEN to submit the filing electronically. A copy of the completed Form 114a should be retained for 5 years by both you and your client; a copy is not sent to FinCEN. Check the FinCEN website for additional information and to register to be authorized to file on behalf of your clients: http://bsaefiling.fincen.treas.gov/main.html or contact the BSA E-Filing Help Desk at 1-866-346-9478 with questions.

Amending an FBAR - To amend a previously filed FBAR, check the "Amended" box in the upper right hand corner of the first page of the FBAR and enter the prior report BSA identifier (which was provided in a secure message from BSA when the original FBAR was filed). Complete the form in its entirety and include the amended information.

Statute of Limitations **-** The statutes of limitations on assessment (ASED) and collection (CSED) of FBAR penalties are defined under Title 31, the Bank Secrecy Act. (MSSP Guide 8.11.6.3.1)

- **Failure to file FBAR report** (either willful or negligent): **6 years** from the due date of the FBAR report
- **Failure to maintain required records** (either willful or negligent): **6 years** from the date the IRS first asks for the records.

Note: If both types of violations have occurred, examiners can assert both the failure-to-file an FBAR report penalty and failure to maintain required records penalty on the same account for the same period. However, Compliance policy in IRM 4.26.16.6.7 allows examiners discretion over whether to assert multiple violations against one FBAR report.

FBAR Penalties Mitigation Threshold Conditions (IRM 4.26.16.6.6.1 (11-06-2015)) -

For most FBAR cases, if IRS has determined that a person meets four threshold conditions, then that person may be subject to less than the maximum FBAR penalty depending on the amounts in the accounts. For violations occurring after October 22, 2004, the four threshold conditions are:

- The person has no history of criminal tax or Bank Secrecy Act convictions for the preceding 10 years, as well as no history of past FBAR penalty assessments.
- No money passing through any of the foreign accounts associated with the person was from an illegal source or used to further a criminal purpose.
- The person cooperated during the examination (i.e., IRS did not have to resort to a summons to obtain non-privileged information; the taxpayer responded to reasonable requests for documents, meetings, and interviews; and the taxpayer back-filed correct reports).
- IRS did not sustain a civil fraud penalty against the person for an underpayment for the year in question due to the failure to report income related to any amount in a foreign account.

FBAR Penalties - Examiner Discretion (IRM 4.26.16.6.7 (11-06-2015)) - The examiner may determine that the facts and circumstances of a particular case do not justify asserting a penalty. When a penalty is appropriate, IRS has established penalty mitigation guidelines to aid the examiner in applying penalties in a uniform manner. The examiner may determine that a penalty under these guidelines is not appropriate or that a lesser penalty amount than the guidelines would otherwise provide is appropriate or that the penalty should be increased (up to the statutory maximum). The examiner must make such a determination with the written approval of the examiner's manager and document the decision in the work papers.

1. Factors to consider when applying examiner discretion may include, but are not limited to, the following:
   A. Whether compliance objectives would be achieved by issuance of a warning letter;
   B. Whether the person who committed the violation had been previously issued a warning letter or has been assessed the FBAR penalty;
   C. The nature of the violation and the amounts involved; and,
   D. The cooperation of the taxpayer during the examination.
2. Given the magnitude of the maximum penalties permitted for each violation, the assertion of multiple penalties and the assertion of separate penalties for multiple violations with respect to a single FBAR, should be considered and calculated to ensure the amount of the penalty is commensurate to the harm caused by the FBAR violation.

Penalty Mitigation Guidelines (IRM Exhibit 4.26.16-1). Note this is an overview; for more details consult the IRM.

Non-willful:

BALANCE	PENALTY
LEVEL I: If the maximum aggregate balance for all accounts to which the violations relate **did not exceed $50,000 at any time during the year.**	$500 for each violation, not to exceed an aggregate penalty of $5,000 per year.
LEVEL II: If the maximum aggregate balance of all accounts to which the violations relate **exceeds $50,000 but does not exceed $250,000.**	$5,000 for each violation.
LEVEL III: If the maximum aggregate balance of all accounts to which the violations relate **exceeds $250,000.**	$10,000 for each violation (the statutory maximum for non-willful violations).

Willful:

BALANCE	PENALTY
LEVEL I: If the maximum aggregate balance for all accounts to which the violations relate did not exceed $50,000 during the calendar year, penalty applies to all accounts	The greater of $1,000 per year or 5% of the maximum aggregate balance of the accounts during the year to which the violations relate.
LEVEL II: If the maximum aggregate balance for all accounts to which the violations relate exceeds $50,000 but does not exceed $250,000, Level II penalties are computed on a **per account** basis.	For each account for which there was a violation, the greater of $5,000 or 10% of the maximum account balance during the calendar year at issue.
LEVEL III: If the maximum aggregate balance for all accounts to which the violations relate exceeds $250,000 but does not exceed $1,000,000, Level III penalties are computed on a **per account** basis.	For each account for which there was a violation, the greater of 10% of the maximum account balance during the calendar year at issue or 50% of the account balance on the day of the violation.

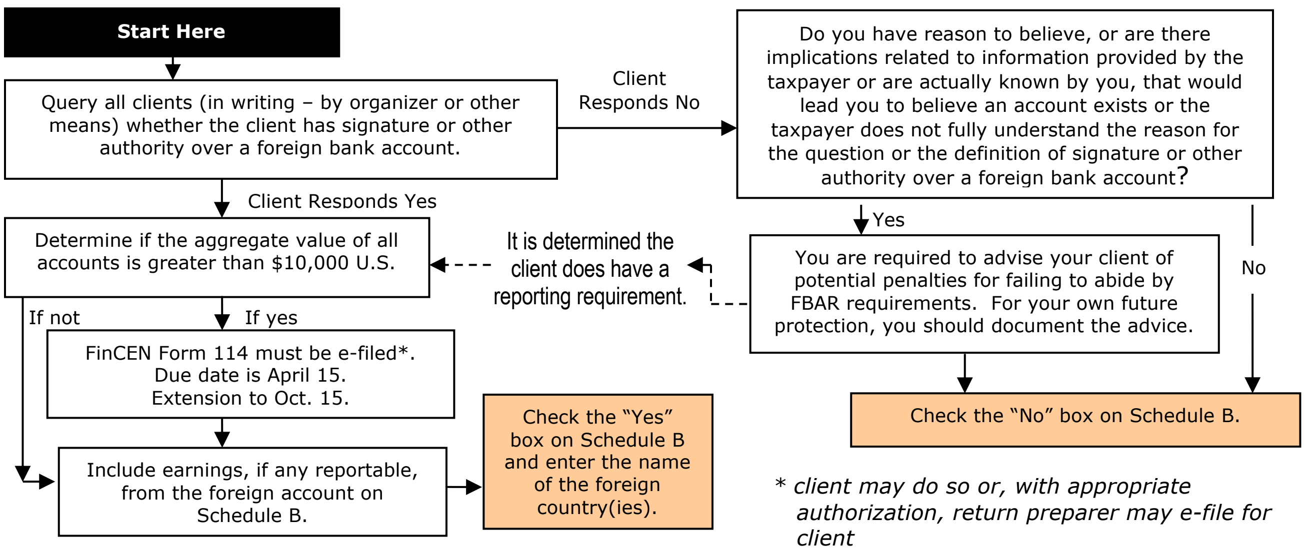
LEVEL IV: If the maximum aggregate balance for all accounts to which the violations relate exceeds $1,000,000, Level IV penalties are computed on a **per account** basis.	For each account for which there was a violation, the greater of 50% of the balance in the account at the time of the violation or $100,000 (i.e., the statutory maximum penalty).

If an account is co-owned with one or more other persons, a penalty determination must be made separately for each co-owner. The penalty against each co-owner will be based on his or her percentage of ownership of the highest balance in the account. If the examiner cannot determine each owner's percentage of ownership, the highest balance will be divided equally among each of the co-owners.

<u>*Practitioner Responsibility*</u> - Some practitioners are taking the position that the FinCEN 114 reporting form is not a tax document and therefore not within their legal responsibility to comply with the reporting requirement.

THIS IS NOT TRUE – The Office of Professional Responsibility (OPR) has made it quite clear that practitioners must comply with the FBAR filing rules and use due diligence in determining if a client has a reporting requirement. The flow chart below is provided as an overview to a practitioner's responsibilities.

FBAR Reporting Flow Chart



<u>*Offshore Voluntary Disclosure Program (OVDP)*</u> **-** The IRS has, for several years, offered "disclosure programs," aimed at getting taxpayers with hidden offshore accounts to voluntarily come forward and comply with FBAR and foreign income reporting. Under these programs participants must file all original and amended tax returns and include payment for back-taxes and interest for up to eight years as well as paying accuracy-related and/or delinquency penalties.

The most current program was the 2014 OVDP, which the IRS shut down as of September 28, 2018 (IR-2018-52). The discontinuance of this program is a reflection of advances in third-party reporting (as a result of FATCA) and increased awareness by U.S. taxpayers of their tax reporting obligations. Only 600 disclosures were made under the program in 2017, down from a peak of 18,000 disclosures under an earlier OVDP. The Streamlined Filing Compliance Procedures program, discussed below, will continue to be available to eligible taxpayers.

<u>*IRS's Streamlined Voluntary Filing Compliance Program*</u> - A U.S. taxpayer who has not reported their foreign financial assets on their tax returns and **can certify that the reporting failure and nonpayment of all tax due related to those assets did not result from willful conduct** on the taxpayer's part, can come into compliance with the IRS by doing the following:

(1) For each of the most recent three years for which the U.S. tax return due date (including extended due dates) has passed, file amended tax returns, together with all required information returns (e.g., Forms 3520, 3520-A, 5471, 5472, 8938, 926, and/or 8621). These three years are referred to as the "covered tax return period";

(2) For each of the most recent six years for which the FBAR (foreign bank account report) due date has passed, file any delinquent FBAR returns (FinCEN Form 114). These six years are referred to as the "covered FBAR period"; and

(3) Pay a 5% miscellaneous offshore penalty plus any tax and interest due on the amended returns. The full amount of the tax, interest, and miscellaneous offshore penalty due in connection with these filings should be remitted with the amended tax returns.

Penalty – The miscellaneous offshore penalty is equal to 5% of the highest aggregate balance/value of the taxpayer's foreign financial assets during the years in the "covered tax return period" and the "covered FBAR period." For this purpose, the highest aggregate balance/value is determined by aggregating the year-end account balances and year-end asset values of all the foreign financial assets and selecting the highest aggregate balance/value from among those years.

Taxpayers who have completed the streamlined filing compliance procedures, will be expected to comply with U.S. law for all future years and file returns according to regular filing procedures.

Returns submitted under the streamlined offshore procedures will not automatically be subject to IRS audit, but they may be selected for audit under the IRS's audit selection processes applicable to any U.S. tax return. If selected, they will be checked for accuracy and completeness, just as with any other audit. If errors or omissions are discovered, the taxpayer could be subject to additional civil penalties, and even criminal liability, if appropriate.

FORM 8938 - REPORTING REQUIREMENT FOR INDIVIDUALS WITH FOREIGN ASSETS – SEC 6038(D)

> **Caution:** This requirement is in addition to the FBAR requirement discussed elsewhere in this chapter. Certain foreign financial accounts are reported on both Form 8938 and the FBAR. However, the information required by the forms is not identical in all cases. Different rules, key definitions (for example, "financial account"), and reporting requirements apply to Form 8938 and FBAR reporting. Because of these differences, certain foreign financial accounts may be reportable on one but not both forms.

Any individual who, during the tax year, holds any interest in a "**specified foreign financial asset**" must attach to his or her income tax return for that tax year the information described below in "Required Information" for each specified foreign financial asset if the aggregate value of all the individual's specified foreign financial assets exceeds $50,000 or a dollar amount higher than $50,000 as IRS may prescribe. (Code Sec. 6038D(a)) Temporary and final regulations (TD 9706, 12/11/14; Reg. Sections 1.6038D-0 through 1.6038D-8) provide for varying thresholds, some of which are more than $50,000, depending on marital status and whether the individual resides in the U.S. or abroad. (Reg. § 1.6038D-2)

The Code Sec. 6038D reporting requirement also applies to any domestic entity formed or availed of for purposes of holding, directly or indirectly, specified foreign financial assets, in the same manner as if the entity were an individual. (Code Sec. 6038D(f)) For additional details related to these entities, see proposed regulations NPRM REG-130302-10 and final regulations, TD 9706.

Filing Exception – An individual is not required to file a foreign financial assets report for a tax year in which he or she is not required to file an income tax return, even if the value of the individual's specified foreign financial assets for that year exceeds the filing threshold amount. (Reg. § 1.6038D-2(a)(7)) Caution**:** this filing exception does not apply for FBARs, so even if an individual is not required to file an income tax return, an FBAR still must be filed if the value of the individual's foreign financial accounts exceeds the $10,000 threshold.

Reporting Thresholds - Reporting (on Form 8938) is required if the total value of specified foreign financial assets is **greater than** the amounts shown in the following table, either as of the end of the tax year or at any time during the tax year, based on marital status and residency in the U.S. or abroad.

	Living In The U.S.		**Living Abroad**	
Filing Status	**Year-End Value**	**During Year Value**	**Year-End Value**	**During Year Value**
Married Filing Joint	$100,000	$150,000	$400,000*	$600,000*
Others	$50,000	$75,000	$200,000	$300,000

**Applies even if only one spouse lives abroad*

The ***presence abroad test*** is satisfied if a U.S. citizen has been a bona fide resident of a foreign country or countries for an uninterrupted period that includes an entire tax year, or if a U.S. citizen or resident was present in a foreign country or countries at least 330 full days during any period of 12 consecutive months that ends in the tax year being reported. (Form 8938 Instructions)

Specified Foreign Financial Asset - For purposes of the reporting requirement for individuals with foreign assets, a "specified foreign financial asset" (Code Sec. 6038D(b)) is:

- Any "**financial account**" maintained by a "**foreign financial institution**", and
- Any of the following assets which are held for investment and are not held in an account maintained by a "**financial institution**":
  - Any stock or security issued by a person other than a U.S. person (Code Sec. 6038D(b)(2)(A)),

- Any financial instrument or contract held for investment that has an issuer or counterparty that is other than a U.S. person (Code Sec. 6038D(b)(2)(B)), and
- Any interest in a "foreign entity" (as defined in Code Sec. 1473). Examples of non-financial account assets that may be considered other specified foreign financial assets include: Stock issued by a foreign corporation; a capital or profits interest in a foreign partnership; a note, bond, debenture, or other form of indebtedness issued by a foreign person; an interest in a foreign trust; an interest rate swap, currency swap, basis swap, interest rate cap, interest rate floor, commodity swap, equity swap, equity index swap, credit default swap, or similar agreement with a foreign counterparty; and any option or other derivative instrument with respect to any of the items listed as examples in this paragraph or with respect to any currency or commodity that is entered into with a foreign counterparty or issuer (Reg. § 1.6038D-3(d)).

An interest in a foreign social security, foreign social insurance or other similar program of a foreign government is **not** a specified foreign financial asset.

Financial Account (Code Sec. 1471(d)(2)) **-** Except as otherwise provided by the Secretary, the term "financial account" means, with respect to any financial institution—

(A) any depository account maintained by such financial institution,

(B) any custodial account maintained by such financial institution, and

(C) any equity or debt interest in such financial institution (other than interests which are regularly traded on an established securities market).

Foreign Financial Institution (Code Sec. 1471(d)(4)) - The term "foreign financial institution" means any financial institution which is a foreign entity. Except as otherwise provided by the Secretary, such term shall not include a financial institution which is organized under the laws of any possession of the United States. A foreign financial institution includes investment vehicles such as foreign mutual funds, foreign private equity funds and foreign hedge funds.

Financial Institution (Code Sec. 1471(d)(5)) **-** Except as otherwise provided by the Secretary, the term "financial institution" means any entity that—

(A) accepts deposits in the ordinary course of a banking or similar business,

(B) as a substantial portion of its business, holds financial assets for the account of others, or

(C) is engaged (or holding itself out as being engaged) primarily in the business of investing, reinvesting, or trading in securities, partnership interests, commodities, or any interest including a futures or forward contract or option in such securities, partnership interests, or commodities.

Required Information **–** With respect to any specified foreign financial asset, in addition to the maximum value of the asset during the year, the following information must be provided:

- For ***accounts***: The name and address of the financial institution in which the account is maintained, and the account number.
- For ***stock or securities***: The name and address of the issuer and enough information as is necessary to identify the class or issue of which the stock or security is a part.
- For any other ***instrument, contract or interest***: Such information as is necessary to identify the asset, and the names and addresses of all issuers and counterparties with respect to the asset.

This information will be reported on IRS **Form 8938**, Statement of Specified Foreign Financial Assets. In addition to the information listed above, if a foreign currency exchange rate was used to convert the value of the foreign asset to U.S. dollars, the rate and source of the exchange rate must be disclosed. In most cases, the U.S. Treasury Bureau of the Fiscal Service foreign currency exchange rate for purchasing U.S. dollars must be used. This rate can be found on the following government web site (Form 8938 instructions):

https://www.fiscal.treasury.gov/reports-statements/treasury-reporting-rates-exchange/

One section of the 8938 requires a recap by type of income from the foreign asset(s) that is reported on the return and a description of the form or schedule and line number where it is reported. Refer to the instructions for the 8938 regarding valuing the assets and other useful information.

Failure to Timely Disclose Information - If any individual fails to furnish the information related to foreign assets as described in Code Sec. 6038D(c) for any tax year at the time and in the manner described, he or she must pay a penalty of $10,000. If this failure continues for more than 90 days after the day on which IRS mails notice of the failure to the individual, the individual will be penalized (in addition to the penalties imposed under Code Sec. 6038D(d)(1), discussed above) $10,000 for each 30-day period (or fraction of the 30-day period) during which the failure continues after the expiration of the 90-day period. The penalty imposed for any failure can't exceed $50,000.

Example - *An individual who is notified of his failure to disclose for a single tax year, and who takes remedial action on the 95th day after the notice is mailed, incurs a penalty of $20,000 comprised of the base amount of $10,000, plus $10,000 for the fraction (i.e., the five days) of a 30-day period following the lapse of 90 days after the notice of noncompliance was mailed.*

To the extent IRS determines that the individual has an interest in one or more foreign financial assets but he or she doesn't provide enough information to enable IRS to determine the aggregate value of those assets, the aggregate value of those assets will be presumed to have exceeded $50,000 (or other applicable reporting threshold amount) for purposes of assessing the penalty. (Joint Comm Staff, Tech Expln (JCX-4-10), 2/23/2010, p. 61)

No penalty will be imposed by Code Sec. 6038D on any failure that is shown to be due to reasonable cause and not due to willful neglect. The fact that a foreign jurisdiction would impose a civil or criminal penalty on the taxpayer (or any other person) for disclosing the required information isn't reasonable cause. (Code Sec. 6038D(g))

Accuracy-Related Penalty for Certain Undisclosed Foreign Assets **-** A 40% accuracy-related penalty is imposed for underpayment of tax that is attributable to an undisclosed foreign financial asset understatement (IRC Sec. 6662(b)(7) and (j)). This is double the normal accuracy-related penalty rate.

Statute of Limitations Extensions **-** If Form 8938 is not filed when it is required, or the taxpayer fails to report a required specified foreign financial asset, the statute of limitations for the tax year may remain open for all or a part of the return until 3 years after the date on which the Form 8938 is filed.

In addition if the taxpayer omits more than $5,000 from gross income attributable to a specified foreign financial asset, the statute of limitations is extended to six years after the return is filed. (IRC Sec. 6501(e)(1)(A))

FOREIGN RENTAL PROPERTY

Generally, except for the following differences, foreign rental property is reported on a tax return in the same manner as a domestic rental.

Depreciation **–** The ADS method of depreciation is applied for tangible property predominantly used outside the U.S. (Code Sec. 168(g)(1)(A)). This would include both residential and nonresidential foreign rental property. Under ADS, the straight line method is used, and the recovery periods for assets commonly found in rentals are:

- 40 years for the real property (building portion) (30 years for residential rental property placed in service in 2018 or later);
- 9 years for appliances, carpets and furniture (Ann 99-82, 1999-32 IRB 244); and
- 20 years for land improvements such as fences and landscaping.
- Personal property for which there is no class life has a recovery period of 12 years.

Passive Loss Rules – The passive loss rules apply to a foreign rental in the same manner as a domestic rental.

Real Estate Professional Issue – Generally it would be difficult to qualify for real estate professional treatment for a rental located in a foreign country unless both the rental and the tax home of the landlord were close to the border of an adjacent country (Canada or Mexico) so the owner can meet the personal services and material participation requirements. However, there is no restriction against including a foreign rental in the aggregation election (Code Sec. 469(c)(7)(A)).

1031 Exchange **-** Real property located in the U.S. and real property located outside the U.S. aren't property of a like-kind for purposes of the like-kind exchange rules under Code Sec. 1031(h).

Sec 199A Deduction – The 20% of qualified business income (QBI) deduction (Sec 199A) does not apply to rental income from real property located outside the U.S. since QBI must be from the conduct of a trade or business within the United States.

Converting Foreign Currency Rental Profits to U.S. Dollars – Rev Ruling 75-90 provides the following method of converting rental profits or losses expressed in a foreign currency to profit or losses expressed in U.S. Dollars. The following worksheet follows that ruling:

1. Profit or loss before depreciation expressed in foreign currency……………………….................. _________
2. Enter the sum of transfers to the U.S during the year computed in foreign currency……………. _________
3. Balance: Subtract Line 2 from Line 1……………………………………….................................. _________
4. Sum up the closing currency exchange rate(1) for each month of the year……………………….. _________
5. Divide Line 4 by 12 (average exchange rate for the year)……………………….…………….. _________
6. Multiply Line 3 by Line 5 (unremitted profit or loss before depreciation in U.S. dollars)…… _________
7. Enter the transfers from Line 2 converted to U.S. Dollars at the time of transfer…..……………… _________
8. Depreciation (expressed in U.S. dollars)(2) …………………………………………………………. <_________>
9. Profit or loss (expressed in U.S. dollars) ……………………………………………………………………………. _________

(1) The rate of exchange for foreign currency to U.S. Dollars
(2) The basis and depreciation would have been established in the year of purchase based upon the exchange rate in effect at the time of purchase, inheritance or gift.

FBAR Reporting – If a foreign bank account is maintained to receive rental income and disperse rental expense payments, and the owner of the property has signature or other authority over the account, that account aggregated with other foreign accounts in which the taxpayer has signature or other authority may require an FBAR filing. On the other hand, if a property management firm handles all the financial transactions, then the rental would not fall under the FBAR reporting requirements.

W-8BEN – If the landlord hires a non-resident alien working in the foreign country to perform services related to foreign rental activity, there are no U.S. reporting or withholding requirements. However, the foreign person providing those services should complete Form W-8BEN and return it to the landlord as proof that the individual is not subject to U.S. taxation.

Form 8938 – Foreign Assets Reporting – The outright ownership of a rental property in a foreign country does not meet the definition of "Specified Foreign Financial Asset" (See Foreign Assets Reporting above). However, if the taxpayer is an owner or partial owner in an entity that owns the rental activity, then it would be included when determining if Form 8938 must be filed.

FOREIGN PENSIONS

A foreign pension or annuity distribution is a payment from a pension plan or retirement annuity received from a source outside the United States such as a:

- foreign employer
- trust established by a foreign employer
- foreign government or one of its agencies (including a foreign social security pension)
- foreign insurance company
- foreign trust or other foreign entity designated to pay the annuity

Taxable Amount - Just as with domestic pensions or annuities, the taxable amount *generally* is the Gross Distribution minus the Cost (investment in the contract) unless there is a tax treaty provision covering the pension.

Tax Treaties

- **General Rule** - As a general rule, the pension/annuity articles of most tax treaties allow the country of residence to tax the pension or annuity under its domestic laws. This is true unless a treaty provision specifically amends that treatment.
- **Special Treaty Rules -** Some treaties, for example, provide that the country of residence may not tax amounts that would not have been taxable by the other country if the taxpayer were a resident of that country. In some cases, government pensions/annuities or social security payments may be taxable by the government making the payments. There also may be special rules for lump-sum distributions. Practitioners need to look at each treaty carefully. The treaties are available on the IRS website at:

https://www.irs.gov/businesses/international-businesses/united-states-income-tax-treaties-a-to-z

Foreign Residents - If your client lives in a foreign country and receives a pension/annuity paid by a U.S. payer, claim exemption from withholding of U.S. Federal Income Tax (FIT) under a tax treaty by completing Form W-8BEN and delivering it to the U.S. payer. The taxpayer must include their U.S. Taxpayer Identification Number (TIN) on Form W-8BEN for it to be valid for treaty purposes.

U.S. Residents - If the taxpayer resides in the U.S. and receives a pension/annuity paid by a payer from a foreign country and a treaty provision applies, the taxpayer can claim the desired treaty withholding exemption on the form, and in the manner specified by the foreign government. If the foreign government, and/or the foreign withholding agent, refuses to honor the treaty claim, make the treaty claim on the taxpayer's income tax return, or other prescribed form, filed with the foreign country. Note: Don't overlook claiming a Foreign Tax Credit on your client's U.S. federal individual income tax return for any foreign income tax withheld from the foreign pension or annuity which isn't refundable by filing a return or refund claim with the foreign country.

Foreign Social Security Pensions - Most income tax treaties have special rules for social security payments. In many cases, foreign social security payments are taxable by the country making the payments. Unless specified otherwise in an income tax treaty, foreign social security pensions are generally taxed as if they were foreign pensions or foreign annuities. Unless a tax treaty allows it (see, e.g., the USA-Canada treaty), they are not eligible for exclusion from taxable income the way a U.S. social security pension might be.

Selected Treaty Provisions – Caution: these treaty provisions are with the U.S. Federal government and not with the individual states. Consult the state's rules. For example California does not recognize foreign treaties and all pension income is taxable to CA including foreign social security equivalents.

- **Canada Treaty** - Under the treaty, Canadian Old Age Security (OAS) pensions and Canada/Quebec Pension Plan (CPP/QPP) benefits received by U.S. residents are treated for tax purposes as if they were U.S. social security payments. U.S Social Security benefits received by a Canadian resident are taxable to Canada.
- **Canadian IRA Equivalent Plans** - Guidance has been provided by Rev. Proc. 2014-55, which supersedes Rev. Proc. 2002-23, and Notice 2003-75, in regards to the US-Canadian Tax Treaty, and individuals who are citizens or residents of the U.S. and beneficiaries of one of the following Canadian plans which are taxable to the U.S. if the recipient is a U.S. Resident:
  - A registered retirement savings plan (RRSP),
  - A registered retirement income fund (RRIF),
  - A registered pension plan, or
  - A deferred profit-sharing plan.

  Distributions received by any U.S. citizen beneficiary or annuitant from a Canadian retirement plan, including the portion of the distribution that constitutes income that has accrued in the plan and has not previously been taxed in the United States, must be included in gross income by the beneficiary or annuitant in the manner provided under IRC Sec. 72, subject to any applicable provision of the Convention (treaty). (Rev. Proc. 2014-55, Sec. 6) Thus, for example, the gross distribution from an RRSP is reported on line 4a of Form 1040 (2018 version), and the taxable amount (as determined under Sec. 72) is included on line 4b of the 1040.
- **United Kingdom Treaty** - Pensions and other similar remuneration beneficially owned by a resident of one State are taxed only in that State ("state" is used in the treaties in lieu of "country"). Thus UK pensions received by a U.S. Resident are taxable to the U.S. and U.S. pensions received by a resident of the UK are taxable to the UK. Each country can only tax the amount that would have been taxed in the other country. Therefore UK residents would not be taxed on qualified Roth distributions or non-deductible IRA distributions. (U.K. Treaty, Art. 17(1))
- **German Treaty** – German pension benefits, other than equivalent social security benefits, paid to a U.S Resident are taxable to the U.S. just as if they were earned in the U.S. German equivalent social security benefits paid to a U.S. Resident are taxed in the same manner and same exclusion as U.S. Social Security benefits. CAUTION – Germany recently altered its domestic tax policy and the above rules may change in the near future.
- **French Treaty** – According to the French treaty, pensions paid for past employment in France are only taxable to France. However, French pension payments made to a U.S. resident are also taxable by the U.S., and the only relief is through claiming a foreign tax credit.
- **India Treaty** – Under a treaty with India, social security benefits and other public pensions paid by India to a resident of the U.S. are taxable only by India and not included in U.S. income. Social security benefits paid to individuals who are both residents and nationals of India are exempt from U.S. tax if the benefits are for services performed for the United States, its subdivisions, or local government authorities.

CANADIAN REGISTERED RETIREMENT SAVINGS AND INCOME PLANS

With respect to information reporting rules for a U.S. beneficiary of foreign trusts, simplified reporting rules apply to taxpayers who hold interests in Canadian registered retirement savings plans (RRSPs) and registered retirement income funds (RRIFs) in lieu of the filing obligations under Code Sec. 6048 that otherwise apply to U.S. citizens and resident aliens who hold interests in Canadian RRSPs and RRIFs. Rev Proc 2002-23 provided a simplified procedure that allowed individuals with these Canadian plans to elect to defer reporting the undistributed income from these plans by filing Form 8891. Rev Proc 2002-23 and Notice 2003-85 were superseded by Rev Proc 2014-55, published in October 2014.

Deemed deferral election – Rev Proc 2014-55, Section 4.02 provides that an "eligible individual" who did not previously make an election under Article XVIII(7) of the U.S.-Canada Income Tax Treaty to defer current U.S. income taxation on the undistributed income of Canadian registered retirement savings plans (RRSPs) or Canadian registered retirement income funds (RRIFs), will be treated as having made the election in the first year in which the individual would have been entitled to make such an election with respect to the plan.

As a result, the eligible individual will not be required to make the election for that first year or for any later years either on Form 8891 or under the procedures in Rev Proc 2002-23. If an eligible individual has an interest in more than one Canadian retirement plan, this provision applies separately to each plan. The relief in Rev Proc 2014-55 applies only to income accrued in a Canadian retirement plan and not to any contributions to the plan. Once an election is made under Rev Proc 2014-55, Sec. 4.02, that election is in effect for all later tax years through the year in which a final distribution is made from the plan, unless the election is revoked with IRS's consent.

Eligible individual - is a beneficiary of a Canadian retirement plan who:

- Is or at any time was a U.S. citizen or resident while a beneficiary of the plan;
- Has satisfied any requirement for filing a U.S. Federal income tax return for each tax year during which the individual was a U.S. citizen or resident;
- Hasn't reported as gross income on a U.S. Federal income tax return the earnings that accrued in, but were not distributed by, the plan during any tax year in which the individual was a U.S. citizen or resident; and
- Has reported any and all distributions received from the plan as if the individual had made an election under Article XVIII(7) for all years during which the individual was a U.S. citizen or resident.

Eligible individuals must report on their U.S. Federal income tax return any income that has accrued in the plan when it is distributed. Distributions received by any beneficiary or annuitant from a Canadian retirement plan, including the part that constitutes income that has accrued in the plan and hasn't previously been taxed in the U.S., must be included in gross income by the beneficiary or annuitant under the usual Code Sec. 72 rules, subject to any applicable treaty provision.

Rules for non-eligible individuals - Beneficiaries who have reported on their U.S. Federal income tax return undistributed income that has accrued in a Canadian retirement plan during a tax year are not eligible individuals able to apply the Rev Proc 2014-55, Sec. 402 relief, and will remain currently taxable on the undistributed income. If such beneficiaries want to make an Article XVIII(7) election with respect to a Canadian retirement plan, they must get IRS's consent.

Form 8891 obsoleted - A taxpayer who previously made an Article XVIII(7) election with respect to a Canadian plan on Form 8891 or under Rev Proc 2002-23, or an eligible individual who is treated as having made the election under Rev Proc 2014-55, Sec. 4.02, isn't required to file Form 8891 or a similar statement for tax years ending after Dec. 31, 2012. Filing of FinCEN 114 (FBAR) is still required if the filing threshold is met.

FORM 3520 - REPORTING RECEIPT OF FOREIGN GIFTS OR BEQUESTS

If the value of the **aggregate** "foreign gifts" (described below) received by a U.S. person (other than an exempt organization) exceeds specified amounts, the U.S. person must report each foreign gift to the IRS. (Code Sec. 6039F) These amounts are:

a. More than $100,000 from a nonresident alien individual or a foreign estate (including foreign persons related to that nonresident alien individual or foreign estate) that are treated as gifts or bequests (Notice 97-34); or

b. More than $16,389 in 2019 ($16,076 in 2018) (Rev Procs 2018-57 and 2018-18) from foreign corporations or foreign partnerships (including foreign persons related to such foreign corporations or foreign partnerships) that are treated as gifts. The threshold amount for gifts from foreign corporations or partnerships is adjusted annually for inflation.

Foreign Gifts - Foreign gifts generally include any amounts received from a person that isn't a U.S. person that the recipient treats as a gift or bequest. The term doesn't include any qualified tuition or medical payments made on behalf of a U.S. person.

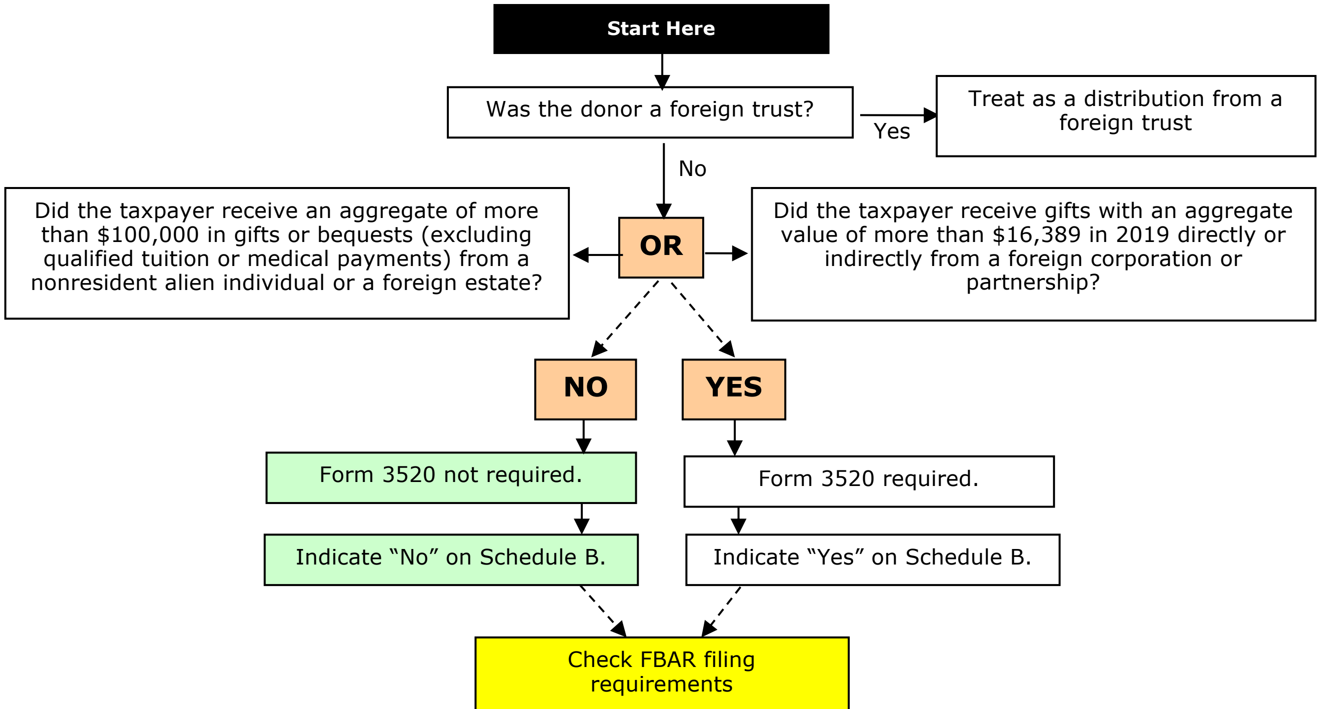
Reporting Forms:

- **1040 Schedule B** – Individuals with foreign gifts need to answer the line 8 question correctly at the bottom of the Schedule B.
- **Form 3520** - Complete the identifying information on page 1 of Form 3520 and Part IV. See the instructions for Part IV.
- **FBAR** - Taxpayers may also be required to file FinCEN Form 114 if the conditions of transfer and account balance require it.

Caution - If the ultimate donor is a foreign trust, then treat the amount as a distribution from a foreign trust and see "reporting ownership of or transactions with foreign trusts" later.

Penalties - The penalty for not reporting a foreign gift that must be reported is 5% of the amount of the gift for each month the failure to report continues, up to a maximum of 25%. The penalty will be excused if reasonable cause for the failure to report can be established. (Code Sec. 6039F(c)(1)(B)).

Foreign Gift & Bequest Reporting Flow Chart



Form 3520 Common Issues

Form 3520 is used for several purposes including:

- Certain Transactions with Foreign Trusts
- Ownership of foreign trusts under the rules of sections 671 through 679
- Receipt of large gifts or bequests from certain foreign persons.

Each of these purposes is addressed separately in this material.

Joint Return Filers: Two transferors or grantors of the same foreign trust, or two U.S. beneficiaries of the same foreign trust, may file a joint Form 3520, but only if they file a joint income tax return.

Due Date – Form 3520's due date is the 15th day of the 4th month (April 15th for calendar year taxpayers). Six-month extension available; use Form 7004 for filing extensions.

Filing - The form is **NOT included with the 1040** and instead is mailed to P.O. Box 409101, Ogden UT, 84409. However double check the current version of the 3520 instructions for possible changes in filing address.

Consistent Treatment - The U.S. beneficiary and U.S. owner's tax return must be consistent with the Form 3520-A, Annual Information Return of Foreign Trust With a U.S. Owner, filed by the foreign trust unless the taxpayer reports the inconsistency to the IRS. If items are being treated on the tax return differently from the way the foreign trust treated them on its return, file Form 8082, Notice of Inconsistent Treatment or Administrative Adjustment Request (AAR). See Form 8082 for more details.

Foreign Trust - A foreign trust is any trust other than a domestic trust. A domestic trust is any trust if:

1. A court within the United States is able to exercise primary supervision over the administration of the trust; and
2. One or more U.S. persons have the authority to control all substantial decisions of the trust.

FORM 3520 - REPORTING OWNERSHIP OR TRANSACTIONS WITH FOREIGN TRUSTS

Form 3520 is also used by a U.S. Person or the executor of the estate of a U.S. Person to report:

- Ownership in a foreign trust under the rules of Section 671 through 679 or
- Transactions carried out with a foreign trust.

Failure to file the 3520, or providing incomplete or incorrect information, will result in a penalty of the greater of $10,000 or (a) 35% of the gross value of any property transferred to a foreign trust for failure by a U.S. transferor to report the creation of or transfer to a foreign trust, (b) 35% of the gross value of the distributions received from a foreign trust for failure by a U.S. person to report receipt of the distribution, or (c) 5% of the gross value of the portion of the trust's assets treated as owned by a U.S. person for failure by the U.S. person to report the U.S. owner information.

A reportable event includes:

1. The creation of a foreign trust by a U.S. person.
2. The transfer of any money or property, directly or indirectly, to a foreign trust by a U.S. person, including a transfer by reason of death. This includes transfers that are deemed to have occurred under sections 679(a)(4) and (5).
3. The death of a citizen or resident of the United States if:
   - The decedent was treated as the owner of any portion of a foreign trust under the rules of sections 671 through 679, or
   - Any portion of a foreign trust was included in the gross estate of the decedent.

Responsible Party

Responsible party means:

- The grantor in the case of the creation of an inter vivos trust,
- The transferor, in the case of a reportable event other than a transfer by reason of death, or
- The executor of the decedent's estate in any other case (whether or not the executor is a U.S. person).

See the instructions for Form 3520 and Code Sec. 6048 for additional information.

FORM 3520-A - ANNUAL INFORMATION RETURN FOR FOREIGN TRUST WITH A U.S. OWNER

A foreign trust with a U.S. owner must file Form 3520-A in order for the U.S. owner to satisfy its annual information reporting requirements under section 6048(b). Each U.S. person treated as an owner of any portion of a foreign trust under sections 671 through 679 is responsible for ensuring that the foreign trust files Form 3520-A and furnishes the required annual statements to its U.S. owners and U.S. beneficiaries. *Exception* **-** Canadian registered retirement savings plans (RRSPs) and Canadian registered retirement income funds (RRIFs) are not required to file Form 3520-A with respect to a U.S. citizen or resident alien who holds an interest in a RRSP or RRIF.

Due Date - 15th day of the 4th month after the close of the trust's tax year. Six-month extension available; use Form 7004 for filing extensions.

Penalties - The U.S. owner is subject to an initial penalty equal to the greater of $10,000 or 5% of the gross value of the portion of the trust's assets treated as owned by the U.S. person at the close of that tax year, if the foreign trust: (a) fails to file a timely Form 3520-A or (b) does not furnish all of the information required by section 6048(b) or includes incorrect information. See section 6677(b). Additional penalties will be imposed if the noncompliance continues after the IRS mails a notice of failure to comply with the required reporting. For more information, see IRC section 6677.

U.S. Criminal penalties may be imposed under sections 7203, 7206, and 7207 for failure to file on time and for filing a false or fraudulent return. Penalties may also be imposed under section 6662(j) for undisclosed foreign financial asset understatements.

Reasonable Cause - No penalties will be imposed if the taxpayer can demonstrate that the failure to comply was due to reasonable cause and not willful neglect. Reluctance on the part of a foreign fiduciary or provisions in the trust instrument that prevent the disclosure of required information is not reasonable cause.

Mexican Land Trusts - In Revenue Ruling 2013-14, the IRS has determined that "Mexican Land Trust" arrangements (MLTs) with Mexican banks, which allow non-Mexican persons to hold residential real properties in certain areas of Mexico (within 100 kilometers of its inland borders or 50 kilometers of its coastline ("restricted zones")) that they are legally prohibited from holding directly, don't qualify as trusts under Reg. § 301.7701-4(a).

IRS found that the banks aren't acting in a true trustee capacity where their only function is to hold property. However, IRS noted that if the banks hold title to additional assets or have duties beyond merely holding legal title, then the tax classification of the MLT is determined under the regs.

Therefore simply having an MLT does not trigger the filing of Forms 3520 or 3520-A if the MLT does not hold title to additional assets. It will not trigger the filing of Form 8938 since merely holding title to foreign real estate does not require the filing of the 8938. However, if the MLT holds other assets, it may require the filing of an 8938. When there is ownership of foreign real estate, be sure to ask the client about any foreign bank accounts that may be maintained to pay for taxes and upkeep.

FORM 5471 - INFORMATION RETURN OF U.S. PERSONS WITH RESPECT TO CERTAIN FOREIGN CORPORATIONS

This information is awareness only. The filing requirements for Form 5471 are complicated and if your client has an ownership interest, has substantial voting power, or is an officer or director of a foreign corporation, you should consult the instructions for Form 5471. Generally, a U.S. citizen or resident alien (or one who files a joint return with a U.S. citizen or resident alien) who owns a 10% interest in a foreign corporation or commands control over 50% of the voting power in a foreign corporation must file Form 5471.

FORM 709 - TAX ON NON-RESIDENT ALIEN GIFTS OF PROPERTY SITUATED IN THE U.S

A non-resident alien is subject to gift tax when he makes a gift of real or tangible personal property situated in the U.S. (IRC §2501(a)(1)) A gift of U.S. intangible personal property is generally not subject to gift tax but there are exceptions. (IRC §2501(a)(2).

Unified Credit - Non-resident aliens are not entitled to the unified credit. However, non-resident aliens are entitled to:

1. $15,000 in 2019 and 2018 ($14,000 for 2013 thru 2017) annual exclusion for gifts to any person.
2. Unlimited exclusion for gifts to defray educational or medical expenses.
3. The unlimited exclusion for gifts to citizen spouses.
4. $155,000 for 2019 (see table below for other years) annual exclusion for gifts to noncitizen spouses.

Annual Exclusion for Gifts to Noncitizen Spouses

Year	2015	2016	2017	2018	2019	2020
Exclusion	147,000	148,000	149,000	152,000	155,000	

If value not shown, it was not available at publication date

5. Unlimited amount of property to U.S. charity free of gift tax (IRC §2522(b)).
6. Unlimited amount of property to a trust, or foundation, only if the gift is to be used within the U.S.
7. Basis of property, acquired by gift from a non-resident alien, is determined in the same manner as property basis acquired by gift from a resident alien (IRC §1015, 1015(d)).

Form 709 – Use Form 709 to compute the gift tax for non-resident aliens following the special instructions for Part 2, Line 7 that apply to non-resident aliens.

CALIFORNIA DIFFERENCES

Foreign Information Reporting - Starting with tax years beginning on or after January 1, 2016, California conforms to the federal foreign financial assets reporting requirements by certain individuals. The information required to be reported to the FTB is satisfied by filing a copy of the information filed with the federal return, for example, Form 8938. The requirement applies not just to California residents, but to all individuals required to file a California return. When Form 8938 is required for federal purposes, and a copy is not filed with the California return, without reasonable cause for the failure, the individual is subject to a state penalty of a minimum of $10,000 plus an additional $10,000 for each 30-day period in which the failure continues. (AB 154, Ch. 15-359; R&TC 19141.5(d)).

Foreign Rentals – California conforms to the federal reporting for rentals.

Foreign Pensions – California does not have treaties with foreign countries. Thus pensions from foreign sources, even if not taxable for Federal purpose, will be taxable for California. Even though U.S. Social Security is not taxable in California, foreign Social Security payments to U.S. Citizens or residents are fully taxable in California for California residents.

Taxation of Canadian RRSPs and RRIFs - California does not recognize the U.S.-Canada treaty provision allowing deferral of taxation of the earnings of these plans until distributions are received. Thus, the interest, dividends or capital gains earned by these plans annually are taxed by California and are an adjustment on Schedule CA. The amount taxed becomes the taxpayer's basis in the plan for CA purposes and will not be taxed again when distributions are actually received.

NOTES

GOLD & OTHER PRECIOUS METALS

RAPID FINDER

Overview

Jewelry Sales – Generally not a collectible
Capital Gain (max. 20% capital gains rate) and losses not allowed.

Collectible Sales – Capital Gain or loss (max. 28% capital gains rate). Generally includes any metal, gem or coin

Commodity Futures – Capital Gain or Loss, Long-term is 6 months and a day

IRA – Generally cannot invest in collectibles. Some gold and other precious metals coins and bullion are allowed

Sec 1031 Like Kind – Very narrow definitions

Capital Gains Rates – The capital gains rates vary from 0 to 20%. See chapter 2.04 for income thresholds. Collectibles – 28% max. Recaptured Sec 1250 gains – 25%.

Pubs Forms

Related IRS Publications and Forms

- **Form 1099-B** - Proceeds from Broker and Barter Exchange Transactions
- **Pub 590 –** Individual Retirement Arrangements
- **Pub 550 –** Sales and Trades of Investment Property

The Details

When the values of gold and other precious metals reach record levels, many taxpayers are prompted to:

- Invest in gold and other precious metals and gems.
- Sell their personal jewelry for the gold, silver and precious gem values.
- Sell gold and silver coins they have owned for many years.

This chapter deals with some of the unique tax issues associated with precious metals and gems.

SELLING JEWELRY

Generally personal jewelry is excluded from the definition of a collectible and is taxed as the sale of personal property. This would presumably include silverware and silver service pieces not considered antiques. Excluded from this category would be jewelry that includes gold or silver coins that are classified as collectibles.

Personal use property - Property held for personal use is a capital asset (Code Sec. 1221). Personal use property is treated as follows for tax purposes:

- Gains, if long-term, are taxable at capital gains rates (currently 0%/15%/20% - see Chapter 2.04 for income breakpoints).
- Short-term capital gains are taxed at ordinary rates.
- Losses are not allowed.

Thus clients who sell their jewelry would treat any gain as a capital gain on Form 8949 (Schedule D), and be eligible for the preferential capital gains rate if the jewelry was held for over one year.

Big Problem – Establishing basis for the jewelry sold. Foreseeing an economic climate where jewelry is worth far more than its original purchase price isn't something most individuals think about when they acquire jewelry, so very few people will have kept receipts or other documentation for the purchase, inherited value, or the donor's basis in the case of a gift.

The following table may assist you in determining a basis at least for the value of the gold content of the jewelry. One could take the position that, for example, if the jewelry they sold netted 10 ounces of gold, then the basis generally cannot be less than the cost of ten ounces of gold in the year purchased. Of course, you would have to somehow tie the date to some event such as a special birthday, wedding, anniversary, etc., and convince an auditor to accept this approach. Absent a verifiable basis, cost will be considered zero and the entire proceeds of the sale (minus any applicable selling expenses) will be taxable.

PROBLEM
1099s are not generally (see reporting requirements later in this chapter) issued by the buyers and most taxpayers probably don't realize the sale could be a taxable event. Thus taxpayers will probably not voluntarily fess up to their preparer about selling the family jewels. Tax preparers should make it standard office practice to inquire.

Historical Average Annual Gold Prices

Year	$/oz	Year	$/oz	Year	$/oz	Year	$/oz	Year	$/oz
1970	36.02	1980	615.00	1990	383.51	2000	279.11	2010	1,224.53

SELLING COLLECTIBLES

Collectibles gains and losses are derived from the sale or exchange of a collectible as defined in Code Sec. 408(m) (without regard to paragraph 3) held for more than one year. "Collectible" gains are taxed at a maximum rate of 28%. A taxpayer in a lower tax bracket, will be taxed at that lower rate. Code Sec 408 lists the following as collectibles:

- Works of art,
- Rugs,
- Antiques,
- **Any metal or gem,**
- Any other tangible personal property specified by IRS for this purpose (Code Sec. 408(m)(2)).
- Stamps
- **Coins**,
- Alcoholic beverages, or

This designation includes all forms of gold (other than jewelry), such as…

- All denominations of gold bullion coins and numismatic/rare coins, gold bars, and gold wafers.
- Any electronic form of gold where the metal is purchased and held in a virtual account. Examples include: GoldMoney.com and BullionVault.com
- Any "paper" or certificate forms of gold, such as Perth Mint Certificates and EverBank accounts.
- All forms of pool gold, rounds, and commemorative coins.

The "collectibles" designation and rules also apply to silver, platinum, and palladium.

Exchange Traded Fund (ETF) – An ETF is a security that tracks an index, a commodity or a basket of assets like an index fund, but trades like a stock on an exchange. According to IRS, ETFs that directly invest in precious metals ("physically backed metal ETFs") generate collectibles gain or loss to their investors (Internal Legal Memorandum PMTA2008-01809). This analysis won't apply if the ETF is not structured as a trust, or if the ETF doesn't directly invest in the metal. Examples of ETFs operating as grantor trusts are SPDR Gold Trust and iShares Silver Trust. Thus, the structure of each "physically backed metal ETF" must be considered to determine the tax consequences of an investment in that ETF.

For ETFs structured as grantor trusts, the preparer will need to carefully review the details included in the 1099 package provided by the taxpayer's broker, or a tax information booklet issued by the trust. The latter may be found online (search by the name of the ETF plus "tax information") if the taxpayer doesn't have a copy. The information in these documents is used to compute the adjusted basis of any metal sold by the trust during the year, and considered a pass-through transaction to the ETF shareholder, so that the proper amount of gain or loss is reported by the taxpayer. Any long-term capital gain is taxable at a maximum rate of 28%. In addition, investment expenses (deductible on Schedule A as a miscellaneous itemized deduction subject to the 2%-of-AGI reduction for years before 2018 and after 2025) must also be separately calculated.

Other Issues related to collectibles:

- Collectibles gain includes gain from the sale of an interest in a partnership, S corporation, or trust due to unrealized appreciation of collectibles.
- Form 1099-DIV – Collectibles gain is reported in box 2d.
- Form 2439 – Undistributed collectibles gain is included in box 1d.

COMMODITY FUTURES

A commodity future is a contract for the sale or purchase of a commodity at a future date for a fixed price. Commodity futures contracts are classified as capital assets, resulting in capital gain or loss. However, when used as part of a hedging transaction, they result in an ordinary gain or loss.

Holding period – The long-term holding period for a commodity future that is subject to the rules of a board of trade or commodity exchange is 6 months and a day.

GOLD STOCKS

Gold mining stocks are not designated as a collectible and therefore, when sold, are subject to the standard capital gains tax rates like all other stocks.

IRAS INVESTED IN COLLECTIBLES

The acquisition by an IRA of any "collectible" is treated as a distribution from the IRA in an amount equal to the cost to the IRA of the "collectible." (Code Sec. 408(m)(1))

Exception - An IRA can invest in one, one-half, one-quarter, or one-tenth ounce U.S. gold coins, or one-ounce silver coins minted by the Treasury Department. It can also invest in certain platinum coins and certain gold, silver, palladium, and platinum bullion. (IRS Pub 590)

An investment in a coin that has been made into a piece of jewelry is considered an investment in a collectible and will be considered a distribution. That is, the exception from treatment as a collectible for gold or silver coins, etc., will not apply. (Notice 87-16)

Exception to the Collectible Rule - The acquisition of shares of a trust invested in gold or silver by either an IRA, or an individually-directed account under a qualified retirement plan, won't be considered the acquisition of a collectible. Thus, the amount invested will not be considered a distribution. However, a redemption of shares that results in a distribution of gold bullion would be treated as an investment in collectibles and as a distribution (IRS Letter Ruling 200732026; IRS Letter Ruling 200732027).

SEC 1031 EXCHANGES

After 2017: Coins and precious metals do not meet the definition of a Sec 1031 exchange. TCJA of 2017 limits Sec 1031 exchanges to real estate transactions only.

Prior To 2018: Certain trades in coins and precious metals meet the definition of a Sec 1031 exchange. When it comes to coins and precious metals the like-kind definition is very narrow. For instance, gold coins are broken down into two categories, those which are numismatic in character (i.e., where the value of the coins is determined by their age, number minted, history, art and aesthetics, condition, and metal content) and those that are bullion-type gold coins. An exchange of numismatic coins for bullion-type coins is not like-kind. Silver exchanged for gold does not qualify for Sec 1031 treatment.

> **Example** - The exchange of U.S. $20 gold coins (numismatic-type coins) for South African Krugerrand gold coins (bullion-type coins) does not qualify as a Sec 1031 exchange. (Rev. Rul. 76-214)
>
> **Example** – The exchange of gold bullion for Canadian Maple Leaf gold coins (bullion-type coins) qualifies as a Sec 1031 exchange. (Rev. Rul. 82-96)
>
> **Example** - The exchange of gold bullion held for investment for silver bullion held for investment does not qualify for Sec 1031 treatment. (Rev. Rul. 82-166)

REPORTING REQUIREMENTS

Form 8300 – Form 8300 is part of the U.S. government's effort to combat money laundering, and whenever a trade or business receives payment of $10,000 or more in cash or cash equivalents in one transaction, or in two or more related transactions, the dealer must file the form. Transactions are considered related even if they occur over a period of more than 24 hours if the recipient knows, or has reason to know, that each transaction is one of a series of connected transactions. ***Precious metal, gem and coin dealers, jewelers, etc., are subject to these rules***.

Cash – For purposes of Form 8300, cash is defined as:

- U.S. and foreign coin and currency received in any transaction; or
- A cashier's check, money order, bank draft, or traveler's check having a face amount of $10,000 or less that is received in a designated reporting transaction, or that is received in any transaction in which the recipient knows that the instrument is being used in an attempt to avoid the reporting of the transaction under either section 6050I or 31 U.S.C. 5331. Note: Cash does not include a check drawn on the payer's own account, such as a personal check, regardless of the amount.

Example: *Don, an individual, buys gold coins from Max, a coin dealer, for $13,200. Don tenders payment to Max in the amount of $6,200 cash and a cashier's check in the face amount of $7,000, which Don had bought. Because the sale is a designated reporting transaction, the cashier's check is treated as cash. Therefore, because Max has received more than $10,000 in cash with respect to the transaction, Max must complete and file the Form 8300 for the transaction.*

Form 8300 requires the name, SSN and contact information of the individual making the payment.

Form 1099-B **-** A sale of a precious metal (gold, silver, platinum, or palladium) in any form for which the Commodity Futures Trading Commission (CFTC) has not approved trading by regulated futures contract (RFC) is not reportable on Form 1099-B. Further, even if the sale is of a precious metal in a form for which the CFTC has approved trading by RFC, the sale is not reportable if the quantity, by weight or by number of items, is less than the minimum required quantity to satisfy a CFTC-approved RFC (2019 1099-B Instructions). For example, at the time this chapter was last updated, sales of fewer than 25 1-ounce Krugerrand or Maple Leaf gold coins or 1,000 US 90% silver dollars, do not fall under the RFC trading rules and thus are exempt from the 1099-B reporting requirements.

Sales of precious metals for a single customer during a 24-hour period must be aggregated and treated as a single sale to determine if this exception applies. This exception does not apply if the broker knows or has reason to know that a customer, either alone or with a related person, is engaging in sales to avoid information reporting.

CALIFORNIA DIFFERENCES

California taxes long- and short-term capital gains as regular income. No special rate for long-term capital gains exists.

The TCJA provision that limits Sec 1031 treatment only to exchanges of real property was adopted by California in AB 91 (signed by the governor 6/27/2019), with two significant differences: the provision only applies to taxpayers with AGI of $500,000 or more ($250,000 for those filing single or married separate) and only applies to exchanges completed after January 10, 2019. Thus gains on exchanges of coins and precious metals that are of like-kind, and that meet the other Sec 1031 requirements and were completed January 10, 2019 or earlier would be eligible for tax deferral on the state return, as would exchanges done by taxpayers with AGI less than $500,000 ($250,000 if filing single or MFS).

California has not conformed to the suspension of tier 2 miscellaneous deductions imposed by the TCJA for 2018 through 2025. Therefore, investment expenses such as those related to ETFs would be deductible on the state return, provided the total miscellaneous deductions exceeds 2% of the federal AGI.

NOTES

CROWDFUNDING

The term "crowdfunding" generally refers to a process of raising money by an individual or business to fund a project or business venture, generally through an online site such as GoFundMe, Kickstarter or Indiegogo, that bypasses traditional lenders such as banks or venture capitalists, and instead appeals directly to the local, or even global, community for financial backing. Originally used by artists, filmmakers and musicians as a way to fund their artistic or musical endeavors, the use of crowdfunding has expanded to include activists, entrepreneurs and even those in need of medical treatment.

How Crowdfunding Works – Crowdfunding is generally done using an online platform that allows the fundraiser to explain the nature of the project or venture, including the amount of money they hope to raise, and the time frame (deadline) for the money-raising campaign. Often, the fundraiser will offer some type of reward to those who contribute (usually termed a backer). The rewards are often really just tokens – a coffee cup or t-shirt with a logo, tickets to an event, a CD – or in some cases an equity interest in the endeavor, or the right to be repaid with interest if the campaign is financially successful. Typically, backers who are interested in participating use their credit card to make a pledge, and if the campaign meets its financial goals within the deadline, the crowdfunding site will process the card-based pledges and fund the campaign.

Types – There three main types of crowdfunding:

- **Equity-Based**: Equity crowdfunding is the process by which an individual is able to invest in an early-stage company in exchange for shares in that company. This type of crowdfunding is best suited for businesses that are established but in need of capital for expansion. However, this type of fundraiser is subject to Securities Exchange Commission (SEC) regulations discussed below.

- **Donation Based**: Donor platforms allow money to be raised without any obligations to investors. Contributions to the stated cause are donations or gifts with no strings attached. Common donation-based causes include philanthropy; medical, funeral or living expenses for individuals; and disaster-relief.

- **Rewards-Based** fundraising is most commonly associated with platforms like Kickstarter and Indiegogo. Through the rewards system, individuals and businesses raise money by offering a product or service in exchange for a campaign contribution.

SEC Issues – Under the Securities Act of 1933, the offer and sale of securities must be registered unless an exemption from registration is available. Title III of the Jumpstart Our Business Startups (JOBS) Act of 2012 added Securities Act Section 4(a)(6) that provides an exemption from registration for certain crowdfunding transactions. The Securities and Exchange Commission (SEC) issued final regulations, effective May 16, 2016, implementing these JOBS Act provisions. These regulations permit companies to offer and sell securities through crowdfunding and create a regulatory framework for the broker-dealers and funding portals that facilitate the crowdfunding transactions. These rules, which have a substantial impact on crowdfunding, include the following provisions:

- **Companies Raising Capital:**
  - The maximum amount a company can raise through crowdfunding in a 12-month period is $1.07 Million.
  - Non-U.S. companies, businesses without a business plan, Exchange Act reporting firms, certain investment companies and companies who have failed to meet their reporting responsibilities may not participate.

- **Individuals -** Amounts individuals can invest in any 12-month period is limited. These numbers are inflation adjusted. If the individual's:
  - Annual income or net worth is less than $107,000, an equity investment through crowdfunding is limited to the greater of $2,200 or 5% of their annual net worth.
  - Annual income or net worth are both at least $107,000, investment via crowdfunding is limited to 10% of the lesser of their net worth or annual income up to an aggregate limit of $107,000.

For details on these regulations, see: https://www.sec.gov - enter *crowdfunding* in the search box.

Section 61(a) of the Internal Revenue Code provides the general rule that, except as otherwise provided by law, gross income includes all income from whatever source derived. Gross income includes all accessions to wealth, whether realized in the form of cash, property or other economic benefit. However, some benefits that a taxpayer receives are excludable from income, either because they do not meet the definition of gross income or because the law provides a specific exclusion for certain benefits that Congress chooses not to tax.

In general, money received without an offsetting liability (such as a repayment obligation), that is neither a capital contribution to an entity in exchange for a capital interest in the entity nor a gift, is includible in income. The facts and circumstances of a particular situation must be considered to determine whether the money received in that situation is income.

What that means is that crowdfunding revenues generally are includible in income if they are not

1) Loans that must be repaid,

2) Capital contributed to an entity in exchange for an equity interest in the entity, or

3) Gifts made out of detached generosity and without any "quid pro quo." However, a voluntary transfer without a "quid pro quo" is not necessarily a gift for federal income tax purposes. In addition, crowdfunding revenues must generally be included in income to the extent they are received for services rendered or are gains from the sale of property.

Section 1.451-2 of the Income Tax Regulations sets forth the constructive receipt doctrine and provides that income although not actually reduced to a taxpayer's possession is constructively received by him in the taxable year during which it is credited to his account, set apart for him, or otherwise made available so that he may draw upon it at any time, or so that he could have drawn upon it during the taxable year if notice of intention to withdraw had been given. The regulation further provides that income is not constructively received if the taxpayer's control of its receipt is subject to substantial limitations or restrictions. However, a self-imposed restriction on the availability of income does not legally defer recognition of that income.

Thus, the income tax consequences to a taxpayer of a crowdfunding effort depend on all the facts and circumstances surrounding that effort.

A taxpayer may request a private letter ruling from the Internal Revenue Service that applies the law to the taxpayer's particular facts and circumstances. The procedure for obtaining a private letter ruling is set forth in Rev. Proc. 2016-1, 2016-1 I.R.B. 1.

Does the IRS track crowdfunding payments? Maybe. It depends on the aggregate number of backers contributing to the campaign and the total amount of the payments. Code Sec. 6050W requires third party transaction companies (credit card, PayPal, etc.) to issue a 1099-K reporting the gross amount of such transactions. There is a de minimis reporting threshold of $20,000 or 200 reportable transactions per year. Question is, will the third party follow the de minimis rule?

Is the income received by the fundraiser taxable or is it a tax-free gift? It depends. Code Sec. 61(a)(1) defines gross income as "all income from whatever source derived." This definition is construed broadly and unless the taxpayer can demonstrate that the income fits into one of the exclusions provided by law it will be taxable. One of those exceptions is provided in Code Sec. 102, where the amount received is a gift if it: comes from a detached and disinterested generosity; is made out of affection, respect, admiration, charity or like impulses; is not made from any moral or legal duty, nor from the incentive of anticipated benefit of an economic nature; and is not in return for services rendered. (*Comm. v. Duberstein, (S Ct, 1960) 5 AFTR 2d 1626*) Recipients may exclude payments that they receive under Code Sec. 102 if they meet the *Duberstein* standard. If there is a quid pro quo in which the donor receives a tangible economic benefit in return for his contribution, then there isn't a gift.

So are the rewards that backers sometimes receive for their crowdfunding participation of significant enough value that the donor receives an economic reward (thus negating a gift) or is it an inconsequential economic incentive that can be ignored? While we do not have the IRS' opinion on the question, the consensus of commentators is that if the crowdfunding is, for example, for the purpose of paying someone's medical bills, it is likely that the funds will be considered a nontaxable gift. On the other hand, if the purpose of the campaign is, for example, to fund the fundraiser's independent film project or start or expand a business, the income is likely taxable.

If the fundraising provides equity in a company, then the one raising the capital must treat each contributor as an investor with equity or stock ownership in whatever business entity the venture is using. The SEC, under the regulations noted above, requires that each investor be included in the normal information reporting requirements, which can be quite extensive. In other words, the entity must be treated as a real business.

If a gift, is the amount subject to gift tax? Maybe. Depending on the amount of the contribution, the relationship between the fundraiser and backer, and the total amount of gifts made during the year by the backer to the fundraiser. For 2019 the annual exclusion of $15,000 is available for gifts to each donee.

Are crowdfunding project expenses deductible? It depends. Sec. 162(a) allows a deduction for all "ordinary and necessary expenses" paid or incurred during the tax year in carrying on any trade or business provided the taxpayer can show that he engaged in the activity with an actual and honest profit objective. So to answer the question, you need to know whether the crowdfunding project is a "trade or business" carried on with an expectation of profit, or whether it is an endeavor with no expectation of profit where the payback is other than monetary (e.g., "vanity" publishing).

If it is a hobby, and not a for-profit activity, deductions are only allowed to the extent of income from the activity (and only as a miscellaneous itemized deduction subject to the 2% of AGI reduction, but these deductions are suspended by the TCJA for years 2018 through 2025).

If a trade or business, the service fees charged by the crowdfunding platform would be deductible by an ongoing business, as would the cost of the rewards (mugs, shirts, etc.) discussed above and the costs related to the actual funded project. Start-up expenses up to $5,000 would be deductible if elected by the taxpayer, with start-up costs in excess of $5,000 amortized over 180 months.

Are charitable contributions allowed to the backer for his/her contribution? Only if the crowdfunding was sponsored by a qualified Sec 501(c)(3) organization and that organization was the recipient of the funds, and the donor meets all other requirements for claiming a charitable contribution (i.e., itemizes, has required receipt and/or acknowledgment, etc.). Contributions to an individual would not be deductible.

California conforms to federal treatment

NOTES

IDENTITY THEFT & TAX FRAUD ISSUES

Overview

Identity theft and tax fraud are growing at an alarming rate. These issues see potential tax dollars fraudulently diverted to offshore accounts to be used for who knows what purpose, and we see our clients defrauded out of their hard earned money and their lives turned upside down because of ID theft.

As a tax practitioner you have a fundamental responsibility to do every thing you can to combat ID theft and tax fraud committed against your clients.

Pubs
Forms

A SUGGESTION – MINIMIZE CONNECTION TO THE INTERNET

A great deal of ID theft is accomplished by hacking into computers connected to the Internet via all sorts of schemes developed by ID thieves. Tax practitioners are targets because of the client data contained on their computers. One way to minimize exposure is to have one computer dedicated to only processing tax returns and then only connect to the Internet for the short periods when you are downloading software or e-filing. All other times work off line. Have another computer you use for other purposes.

IRS & TAX INDUSTRY BAND TOGETHER TO COMBAT TAX FRAUD

Starting in 2015 the IRS began working with state tax administrators and tax preparation and software companies on a major effort to combat identity theft tax refund fraud, including several initiatives to improve taxpayer authentication and detect refund fraud, share and assess information about fraudulent activity, and increase public awareness of the need to protect personal information.

Among the results for 2016 are the following *(IR 2016-94, 6/29/16)*:

- New protocols required all individual tax software customers to update their security credentials to a minimum eight-digit password and establish security questions.
- Software providers shared approximately 20 data elements from tax returns with the IRS and states to help identify possible fraud. These elements are confidential but include information to identify returns prepared quickly by automated programs. From January through April 2016, the IRS stopped $1.1 billion in fraudulent refunds claimed by identity thieves on more than 171,000 tax returns. Better data from returns and information about schemes meant better internal processing filters to identify identity theft tax returns.
- Participants from the tax industry performed regular reviews to identify possible identity theft schemes and report them to the IRS and state agencies to help stay on top of emerging schemes. Thanks to leads reported from the tax industry, the IRS suspended for further review 36,000 suspicious returns January through May 8, 2016, and $148 million in claimed refunds. A "Taxes. Security. Together" campaign was launched to increase public awareness about the need for computer security and provide people with tips on how to protect their personal information.

Additional initiatives were put in place for the 2017 filing season, and like the earlier ones, they generally were invisible to taxpayers. A few of the 2017 initiatives were:

- Expanding a W-2 Verification Code test to cover approximately 50 million forms in 2017. The selected forms contain a 16-digit code that taxpayers and tax preparers enter when prompted by software. The code helps validate not only the taxpayer's identity but also the information on the form.
- Identifying additional data elements from tax returns that will help improve authentication of the taxpayer and identify possible ID theft scams and sharing data elements from corporate tax returns.
- Creating an Identity Theft Tax Refund Fraud Information Sharing & Analysis Center (IDTTRF-ISAC) to collect and analyze tax-related ID theft schemes and serve as the early warning system for the IRS, state agencies and the tax industry.

- Expanding the "Taxes. Security. Together." awareness campaign to tax return preparers to ensure they have the information they need to protect themselves from cyberattacks and to safeguard taxpayer data.
- Creating a process for financial institutions to identify questionable state tax refunds and return them to states for validation.
- Continuing enhancement by the software industry of software password requirements for individuals and tax professional users – providing additional safety prior to filing.

The IRS announced results from calendar year 2018 that show major progress in the fight against tax-related identity theft (IR-2019-66 (April 9, 2019), including:

- Between 2015 and 2018, the number of taxpayers reporting they were identity theft victims (i.e., they filed ID theft affidavits) fell 71%. In 2018, the IRS received 199,000 ID theft reports from taxpayers compared to 677,000 in 2015. The number of reports in 2017 was 242,000 compared to 401,000 for 2016.

- Between 2015 and 2018, the number of confirmed identity theft returns that the IRS stopped declined by 54%. For 2018, there 649,000 confirmed ID theft returns, compared to 597,000 in 2017, a 9% increase. But the 2018 count is still significantly less than the 883,000 in 2016 and the 1.4 million in 2015.

- Between 2015 and 2018, the IRS protected a combined $24 billion in fraudulent refunds by stopping the confirmed identity theft returns. In 2018 the 649,000 confirmed fraudulent returns tried to collect $3.1 billion in refunds. In 2015, 2016 and 2017 the IRS stopped fraudulent refunds of $8.7 billion, $6.4 billion and $6 billion, respectively. On top of the fraudulent refunds the IRS protected, the financial industry recovered an additional $1.4 billion in fraudulent refunds from 2015 through 2018.

However, in spite of the progress the IRS and its Security Summit partners have made, the ID thieves are continuously changing their tactics and targets. Most worrisome now are business identity theft and data theft from tax professionals, particularly thieves hacking into practitioners' computer systems, stealing client data and filing fraudulent tax returns, often before a preparer even knows they have been victimized. Thieves are also aiming to steal tax practitioners' Electronic Filing Identification Numbers (EFIN) or Preparer Tax Identification Numbers (PTIN) to use in filing fraudulent returns. Tax professionals who experience a data theft should contact their IRS stakeholder liaison immediately for assistance.

ID THEFT PROTECTION SERVICES

The IRS won't assert that an ID theft victim has to include in gross income the value of free ID theft protection services, etc., provided by the entity that was hacked. (Ann. 2015-22, 6/13/15) In a follow-up announcement, the IRS said that Announcement 2015-22 should be extended to include identity protection services provided to employees or other individuals *before* a data breach occurs. Therefore, the IRS will not assert that an individual must include in gross income the value of identity protection services provided by the individual's employer or by another organization to which the individual provided personal information such as name, SSN, or banking or credit account numbers. Employers providing ID protection services should not include the value of those services in employees' gross income and wages. However, if cash is received in lieu of ID protection services, the cash amount is included in gross income and does need to be reported on Form W-2 or 1099-MISC, as applicable. Proceeds received under an ID theft insurance policy are treated the same as other insurance recoveries under existing law, and are not covered by the announcement. (Ann. 2016-02, 12/30/15)

CLIENT EDUCATION

Scammers – So why is it so easy for criminals, by phone or e-mail, to perpetrate these crimes on your clients? It is most likely attributable to clients' inherent fear of the IRS. The same reason they send the IRS money when they get one of those CP notices without first contacting you and then informing you afterwards. It is the false belief by clients that the IRS never makes any mistakes. They simply want to avoid contact with the IRS at all costs without asking why. That is why it so important that you educate them and let them know:

- Scammers pretending to be IRS agents are calling taxpayers every day trying to dupe them.
- The IRS almost never initiates contact by phone or e-mail.*
- Never to open links on a suspicious e-mail.
- The IRS never asks for credit card, debit card, prepaid card information or account PINs over the telephone.
- The IRS never insists that taxpayers use a specific payment method to pay tax obligations.
- The IRS never requests immediate payment over the telephone.
- The IRS will not take enforcement action immediately following a phone conversation. Taxpayers usually receive prior written notification of IRS enforcement action involving IRS tax liens or levies.

The best practice is for clients to simply hang up on the caller. If they harass a client suggest the client block that phone number if possible.

*Apparently it had been long-standing IRS policy, in some cases, to make initial examination appointments by phone. However, because of the ongoing threat of phishing, phone scams and ID theft, as of May 20, 2016, all initial contacts with taxpayers to commence an examination must be done by mail. (Memo from John Dalrymple, Deputy Commissioner for Services and Enforcement, 5/20/16) Per the IRS web site: "IRS employees conducting audits may call taxpayers, but not without having first attempted to notify them by mail. After mailing an official notification of an audit, an auditor/tax examiner may call to discuss items pertaining to the audit." The IRS "may visit the taxpayer's home or business without notification to the taxpayer if attempts to communicate with the taxpayer in other ways, such as letters or phone calls, are not successful."

ID Theft – Impress on your clients the importance of not divulging key information about themselves or their family members. A combination of name, address, SSN and birth date is a bonanza to ID thieves. It is important to know that not all ID thieves use the data they collect. Some sell the information to others who commit the crimes. Stolen IDs can easily be purchased on line.

E-FILING FACILITATES TAX FRAUD

The IRS promotes e-filing because it eliminates the need (and costs) for thousands of data entry personnel at the IRS service centers around the country (thus eliminating thousands of jobs nationwide). In addition, e-filing provides them with all the data included on a return, not just the crucial information they key in from paper-filed returns, enhancing their abilities to perform computer analysis and matching programs. But it also opened the door for clever crooks who quickly found weaknesses in the system.

One such weakness was that the IRS would begin accepting e-filed returns near the end of January, well over a month before the employer deadline for filing W-2s with the government. So here is what has been happened: the crooks would.

- Buy, steal or appropriate the IDs of two unrelated male and female taxpayers.
- Appropriate the employer identification number (EIN) of any company.
- Make up phony W-2s using the company's EIN.
- Open a bank account using the stolen IDs of the two individuals.
- Make up a phony 1040 with a large refund.
- E-file the return right after e-file season opened.
- Use Direct Deposit to have the refund deposited into the bank account within 2 weeks or less.
- Clean out the bank account as soon as the refund arrived.
- Disappear without a trace.

In the meantime you would try to file your client's return and it would be rejected as already filed. You attempt to get a copy of the return but can't because you don't have the ID of the other unfortunate taxpayer who was used as the other spouse on the return. All the while the scammers were enjoying their ill-gotten gains with impunity.

Earlier W-2 Filing Deadline - To combat this type of fraud, which has cost the government many millions of dollars over the years, Congress, as part of the PATH Act of 2015, standardized the W-2 filing due date. Beginning in 2017, both the employee and government copies of Forms W-2, W-3 and 1099-MISC (when nonemployee compensation is reported) are due by January 31, regardless of whether the forms are filed on paper or electronically. In addition, and also starting in 2017, the IRS eliminated automatic extensions for W-2s, but will allow an employer a 30-day non-automatic extension, likely to be granted only under extraordinary circumstances such as a natural disaster or fire. The request for extension is done on Form 8809, Application for Extension of Time to File Information Returns, and must be requested by the January 31 due date. (*Reg. §1.6081-8T*)

Delayed Refund Payments – Another change that started in tax season 2017 also has helped combat tax fraud. This law prohibits the IRS from issuing refunds from returns claiming the earned income tax credit or the additional (refundable) child tax credit prior to the 15th day of the second month following the close of the year (February 15 for calendar year filers). (PATH Act Sec 201(a)).

QUEEN OF IRS TAX FRAUD

Rashia Wilson, a 27-year old mother of three from Wimauma, FL employed the con described above and over a 3-year period she and her boyfriend defrauded the IRS out of more than $30 million with bogus tax returns. She would have never been caught except for the fact that she taunted authorities on Facebook. She was sentenced to 21 years in prison for tax fraud.

DIRECT DEPOSIT - TAX PREPARER ABUSE & FRAUD

As a way to reduce the cost of issuing refund checks the IRS developed the Direct Deposit method. If the taxpayer wants their refund directly deposited to one bank account, all they need to do is enter the bank routing number and their bank account number on page 2 of Form 1040. By completing and submitting Form 8888, the refund can be routed to multiple accounts, which opens the door to abuse. Here again, the IRS failed to anticipate potential abuses, which resulted in taxpayers' refunds being improperly used or outright stolen.

The first issue, and less concerning, is some practitioners had their fee taken out of the refund and direct deposited to their own account. This is a direct violation of Circular 230, Sec 10.31, which bars the negotiation of a taxpayer's refund by a tax preparer.

The second situation involves dishonest practitioners who prepare an individual's return, give them a copy of their return that shows the refund they are expecting to be direct deposited, and then after the client leaves, alter the return to produce a larger refund before e-filing the return and directing the extra refund amount to their own account.

The IRS was slow to respond to Direct Deposit abuses, but now they will allow only three tax refunds to be deposited electronically into a taxpayer's account or prepaid credit or debit card. Subsequent refunds will be issued by paper check. Further, direct deposits will be made only to accounts bearing the taxpayer's name. As a result, preparer fees cannot be paid by using Form 8888 to split a refund or by preparers opening a joint bank account with taxpayers.

This will put a damper on preparers getting their fee out of the refund, but will not curtail the "Wilson" type fraud.

CONTRIBUTION FRAUD

Another fraud and ID theft scam associated with tax preparation involves charity scams. The fraudsters pop up whenever there are natural disasters such as earthquakes, floods, etc., trying to coax your client into making a donation that will go into the scammer's pockets and not to help the victims of the disaster. These same crooks might also steal your client's identity for other schemes. They use the phone, mail, e-mail, websites and social networking sites to perpetrate their crimes.

When disaster strikes, you can be sure that scam artists will be close behind. It is a natural instinct to want to provide assistance right away but potential donors should exercise caution and make sure their hard-earned dollars go for the purpose intended, not to line the pockets of scam artists. You need to make your clients aware of this type of fraud. The following are some tips to avoid fraudulent fund raisers.

- Donate to known and trusted charities. Be alert for charities that seem to have sprung up overnight in connection with current events.
- Ask if a caller is a paid fundraiser, who they work for, and what percentage of the donation goes to the charity and to the fundraiser. If a clear answer is not provided — consider donating to a different organization.
- Don't give out personal or financial information — including credit card or bank account number — unless the charity is known and reputable.
- Never send cash: The organization may never receive the donation, and there won't be a record for tax purposes.
- Never wire money to a charity. It's like sending cash.
- If a donation request comes from a group claiming to help a local community agency (for example, local police or firefighters), ask the local agency if they have heard of the group and are getting financial support.
- Check out the charity with the Better Business Bureau's (BBB) Wise Giving Alliance, Charity Navigator, Charity Watch, or GuideStar.

PHISHING

Phishing (pronounced fishing) is the attempt to acquire sensitive information such as usernames, passwords, and credit card details (and sometimes, indirectly, money) by masquerading as a trustworthy entity in an electronic communication. Communications purporting to be from popular social web sites, auction sites, banks, online payment processors or IT administrators are commonly used to lure the unsuspecting public. Phishing e-mails may contain links to websites that are infected with malware. Phishing is typically carried out by e-mail spoofing or instant messaging and it often directs users to enter details at a fake website whose look and feel are almost identical to the legitimate one.

There have been a number of phishing scams utilizing look-a-like IRS website pages. These sites use cons such as "get your refund on your Visa and MasterCard" where unsuspecting individuals enter their name, address, date of birth, SSN, mother's maiden name, credit card number, and even the 3 digit code on the back of the card. Another one that has made the rounds claimed there was a problem with an electronic funds tax payment system (EFTPS) payment. Others are just plain malicious and attempt to get individuals to open e-mails and go to websites where malware will download and infect your computer.

Increasingly, tax professionals are being targeted by identity thieves who are looking for real client data to better impersonate the taxpayer when filing fraudulent returns for refunds. One such phishing email emerged in the spring of 2017 purporting to be from a tax software education provider. It was seeking an unusual amount of sensitive preparer data that would enable the thieves to steal client information and file fraudulent tax returns. Tax professionals are reminded that legitimate businesses and organizations never ask for usernames, passwords or sensitive data via email. Nor should a preparer ever provide such sensitive information via email if asked.

Targets of phishing scams can help by forwarding phishing e-mail purportedly from the IRS to phishing@irs.gov For more information visit IRS.gov and search "phishing".

IDENTITY THEFT

To understand just how big a problem identity theft has become for the IRS, they've had more than 3,000 employees working on identity theft cases and have trained more than 35,000 employees who work with taxpayers to recognize and provide assistance when identity theft occurs.

When ID theft happens it becomes a huge problem for the taxpayer and the taxpayer's tax preparer. So, the best way to combat ID theft is to protect against it in the first place and avoid becoming one of those unfortunate individuals that has to deal with it. Here are some tips to protect from becoming a victim:

- Never carry a Social Security card or any documents that include your Social Security number (SSN) or Individual Taxpayer Identification Number (ITIN).
- Don't give anyone your or a family member's SSN or ITIN just because they ask. Give it only when required.
- Protect financial information.
- Check credit report every 12 months.
- Secure personal information at home.
- Protect personal computers by using firewalls and anti-spam/virus software, updating security patches and changing passwords for Internet accounts. Don't use the same password for all accounts.
- Portable computers, tablets and smartphones can be stolen or lost. Limit the amount of personal information they contain that can be used for ID theft. Be extra vigilant against theft.
- Don't give personal information over the phone, through the mail or on the Internet without validating the source.

Indicators of ID Theft:

- More than one tax return for the taxpayer was filed;
- There is a balance due, refund offset or collection actions have been taken for a year the taxpayer did not file a tax return;
- IRS records indicate the taxpayer received more wages than actually earned; or
- State or federal benefits were reduced or cancelled because the agency received information reporting an income change.

IDENTITY THEFT AND THE IRS

IRS Discovery - In some situations, the IRS will discover an ID theft before the taxpayer recognizes it. When this occurs, the IRS will issue one of the two following letters indicating they need to verify certain tax return information with the taxpayer. Although the letters do not say that suspicious or multiple returns have been filed using the taxpayer's information, this is a pretty good indicator that the taxpayer's ID has been compromised. The taxpayer should respond to the IRS immediately at 800-830-5084.

IRS 4883C LETTER

Why are we contacting you?

We received your federal income tax return; however, we need more information to verify your identity in order to process it. The letter you received provides a toll-free IRS Identity Verification telephone number to call.

This contact information is only for taxpayers who received Letter 4883C. The toll-free number is for identity verification only. No other tax-related information, including refund status, is available.

What should you do?

Please call the toll-free IRS Identity Verification telephone number provided in your letter. You will need to have a copy of your prior year tax return and your most recently filed tax return. The toll-free IRS Identity Verification telephone number is available for you to call even if you haven't filed a tax return for this year.

Continue to next page

IRS 5071C LETTER

Why are we contacting you?

We received a federal income tax return with your name and/or social security number. We want to protect you from potential identity theft so we are asking you to verify your identity and tell us if you submitted the return. The letter you received provides two options for responding. Both options enable you to verify your identity with us so we can continue processing your tax return.

This contact information is only for taxpayers who received Letter 5071C. The toll-free number and website are for identity verification only. No other tax-related information, including refund status, is available.

What is involved in this process?

We will continue processing your tax return once we verify your identity. Follow the identity verification described under "What should you do?" below to provide us with the necessary information.

What should you do?

- Use our secure Identity Verification Service website idverify.irs.gov. It's quick and secure. To complete the entries, you will need to have a copy of your prior year tax return and your most recently filed tax return.
- If you cannot use the Idverify website, you can call us using the toll-free Identity Verification telephone number provided in your letter. Again, you will need to have a copy of your prior year tax return and your most recently filed tax return.
- If you did not file the return in question, you can use either option to notify us.

How can I learn more about the IRS's identity protection efforts?

The IRS is continually looking at ways to increase data security and protect taxpayers' identities. To learn more, view these topics [Pub 4535] on IRS.gov.

Information that will be required when responding to the IRS **-** Taxpayer should have a copy of the most recently filed return and the one for the preceding year. The taxpayer will be asked questions about the data included on those two returns. Birth date, SSN or ITIN, and contact information will need to be available.

Client Documents Compromised - If a client believes they are at risk due to a lost or stolen purse or wallet, questionable credit card activity or credit report, they should contact the IRS Identity Protection Specialized Unit at 800-908-4490 (Monday - Friday, 7 a.m. - 7 p.m. local time; Alaska and Hawaii follow Pacific time). The client should also complete and file Form 14039 – IRS Identity Theft Affidavit.

The following actions are recommended:

- Report incidents of identity theft to the Federal Trade Commission at www.consumer.ftc.gov or the FTC Identity Theft hotline at 877-438-4338.
- File a report with the local police.
- Contact the fraud departments of the three major credit bureaus:
  - Equifax – www.equifax.com, 800-525-6285
  - Experian – www.experian.com, 888-397-3742
  - TransUnion – www.transunion.com, 800-680-7289

Close any accounts that have been tampered with or opened fraudulently.

IRS PROCEDURES AFTER ID THEFT IS VALIDATED

- The first step in the process is for the taxpayer to complete and file IRS Form 14039, Identity Theft Affidavit.
- The IRS flags the taxpayer's account to show ID theft documentation has been submitted.
- IRS reconciles the taxpayer's account to reflect the correct tax return information.
- The IRS places an identity protection indicator on the taxpayer's account and notifies the taxpayer with a CP01 notice.
- Prior to the next tax season the IRS will assign the taxpayer a unique IP protection PIN to verify the return.
- If a taxpayer is identified as being deceased, the IRS locks the account to prevent any future filings.
- The IRS assigns a six-digit IP PIN number to a verified ID theft victim that is specific to the tax year, which is used to file their return for that year.

- A new six-digit IP PIN number is issued every year.
- This process is only required if the primary taxpayer is the ID victim.
- E-filed returns requiring IP PINs will be rejected if an IP PIN is missing or incorrect.
- Taxpayers who misplace their IP PINs must contact the IRS for a replacement.

The IRS is requesting the help of tax professionals: Please refer only taxpayers who receive Letter 5071C or Letter 4883C to the Taxpayer Protection Program (TPP) toll-free line. The TPP line is set up for identity verification for letter recipients. TPP assistors do not have information to help your clients with other issues such as refund inquiries.

IP PIN Program Expansion - Within five years of the date of enactment (July 1, 2019) of the Taxpayer First Act, the Treasury Department is required to establish a program to issue an IP PIN to any U.S. resident individual who requests one. And, for each calendar year beginning after the date of enactment, the Treasury Department is required to expand the issuance of IP PINs to individuals residing in such states as IRS deems appropriate, provided that the total number of states served by the program continues to increase. (Act Sec. 2005)

Notification of Suspected Identity Theft – Often identity theft and refund fraud victims may be unaware that their identity has been used fraudulently or, when they are aware, may not be fully informed of the outcome of their case. The Taxpayer First Act addresses this situation by requiring the IRS to notify a taxpayer if it determines there has been any suspected unauthorized use of a taxpayer's identity, or that of the taxpayer's dependents, if an investigation has been initiated and its status, whether the investigation substantiated any unauthorized use of the taxpayer's identity, and whether any action has been taken (such as a referral for prosecution). Furthermore, when an individual is charged with a crime, IRS must notify the victim as soon as possible, giving such victims the ability to pursue civil action against the perpetrators. (Code Sec. 7529(a), as added by Act Sec. 2007(a)) Effective for determinations made after the date that is six months after the date of enactment (July 1, 2019).

Penalty Relief - As part of the Taxpayer First Act, Congress directs the Secretary of the Treasury (or a delegate, i.e., the IRS) to establish procedures to ensure that income reported in connection with the unauthorized use of a taxpayer's identity is not taken into account in determining any penalty for underreporting of income by the victim of identity theft. Applies to determinations made after the date that is 6 months after the date of the Act's enactment (July 1, 2019). (Act Sec. 2007(b))

WHAT YOU SHOULD AND ARE REQUIRED TO DO TO PROTECT YOU CLIENTS' IDENTITIES

Your records would be a bonanza for anyone wanting to steal money from your clients or the IRS, and if they get ahold of your tax return data, that could be the end of your business, because your clients, no matter how understanding, will be put through a lot to straighten out their financial affairs and will not be happy. So it is important that you take every precaution to protect your clients' data from ID thieves. You are also legally required to protect client data and limit disclosures.

IRC §7216 – Disclosure or use of information by preparers of returns - is a criminal provision that prohibits preparers of tax returns from knowingly or recklessly disclosing or using tax return information. It is a misdemeanor offense that is punishable by a fine of not more than $1,000, imprisonment of not more than one year, or both, plus costs of prosecution. [Code § 7216(a) – Regulation § 301.7216-1(a)]

The Taxpayer First Act increases the criminal penalty for knowing or reckless conduct to $100,000 in the case of disclosures or uses made on or after July 1, 2019 in connection with taxpayer identity theft. (Code Sec. 7216(a), as amended by Act Sec. 2009(b))

Neither the Code nor Committee Reports define "knowingly" or "recklessly." The term "recklessly" is not used anywhere in Chapter 75 of the Code (criminal penalties), while "knowingly," which is used in connection with two other criminal penalties, does not appear to be further explained by regs or judicial interpretation. However, in most criminal connotations, "knowingly" means that the action was deliberate as opposed to it being accidental. The effect of adding the "knowingly" or "recklessly" requirement was to decriminalize improper uses and disclosures not "knowingly" or "recklessly" made.

IRS authorization of use or disclosure does not affect legal or ethical rules which prohibit professionals, such as attorneys and accountants, from using or disclosing information to their own advantage or their clients' disadvantage.

IRC §6713 – Disclosure or use of information by preparers of returns - imposes a civil penalty of $250 on any person who…for compensation prepares a return for another person, and discloses any information furnished to him for, or in connection with, the preparation of any such return, or uses any such information for any purpose other than to prepare, or assist in preparing, any such return. <u>Imposition of the penalty under IRC §6713 does not require that the disclosure be knowing or reckless.</u>

New Law & Stuff

Effective with respect to disclosures or uses made on or after July 1, 2019, the Taxpayer First Act increases the civil penalty for the unauthorized disclosure or use of information by tax return preparers from $250 to $1,000 for cases in which the disclosure or use is made in connection with a crime relating to the misappropriation of another person's taxpayer identity ("taxpayer identity theft"). The Act also increases the calendar year limitation from $10,000 to $50,000 in identity theft situations. The calendar year limitation is applied separately with respect to disclosures or uses made in connection with taxpayer identity theft. (Code Sec. 6713(b), as amended by Act Sec. 2009(a)(2))

Who is Subject to Sec. 7216 – Sec. 7216 applies only to tax preparers and then only to those in possession of tax return data of which he or she makes an unauthorized disclosure or use. It does not apply to client data acquired outside of tax return information, as long as the tax preparer can adequately document and prove that it is not tax return information, which might be difficult. It does not apply to the third party who receives the unauthorized disclosure. It also applies to contractors supplying certain ancillary services to which you have given proper notice under the regulations.

Effect of Gramm-Leach-Bliley Act – Generally, tax return preparers are also subject to the privacy provisions of the Gramm-Leach-Bliley Act, PL 106-02, 11/12/99, which imposes requirements on financial institutions to protect personal information. Those provisions do not supersede, alter, or affect pre-existing Code Sec. 7216 requirements restricting preparer disclosure or use of return information. Similarly, Code Sec. 7216 and its associated regulations don't override any requirements or restrictions of the Gramm-Leach-Bliley Act that are in addition to the requirements or restrictions of Code Sec. 7216 and its associated regulations. [Reg § 301.7216-1(c) - Notice 2002-6, 2002-1 CB 326]

FTC "Red Flag" Regulations - The regulations are referred to as "Red Flag Rules" because they require programs to be placed in operation by those affected businesses that will identify, detect, and respond to business practices or specific activities (referred to as "Red Flags") that could result in identity theft. The programs must include procedures to protect against potential identity theft and provide a remedial procedure should identity theft occur. These rules apply to any company that extends credit to clients or accept credit and debit cards as payment for services. Since virtually every preparer extends credit at some time virtually all tax practitioners are affected by the "Red Flag" regulations.

What are Red Flags? - Applicable sections of the Fair and Accurate Credit Transactions Act of 2003 (FACTA), also known as the Red Flags Rule, define a red flag as a pattern, practice or specific activity that indicates the possible existence of identity theft. The regulations provide guidance by listing five specific categories of red flags:

1. Alerts, notifications or other warnings received from consumer reporting agencies or service providers such as fraud detection services.
2. The presentation of suspicious documents.
3. The presentation of suspicious personal identifying information, such as a suspicious address change.
4. The unusual use of, or other suspicious activity related to, a covered account.
5. Notice from customers, victims of identity theft or law enforcement authorities.

Each organization is responsible for coming up with its own list of Red Flags, and the list should be as exhaustive as possible. Unfortunately, there is no specific set of red flags for every business. Even though a business belongs to the same industry as another, it may have different Red Flags because of the manner in which the business is operated. Each business must include every situation that can be envisioned.

CALIFORNIA DIFFERENCES

California conforms to the non-taxable treatment of ID theft protection services provided to potential ID theft victims whose data was compromised. This treatment is the same as announced by the IRS in Ann 2015-22.

As is the case with the IRS, the California Franchise Tax Board (FTB) does not send e-mails asking for personal taxpayer information. If your clients receive this type of request, they should not respond.

To resolve tax-related identity theft issues with the FTB, a taxpayer may complete and submit Form **FTB 3552,** Identity Theft Affidavit.

This form is used if a taxpayer is an actual or potential identity theft victim who thinks their tax account is currently or could potentially be affected and who would like the FTB to update his or her account status to identify questionable activity. The taxpayer should be prepared to send copies of the following documents to the FTB with the 3552:

- Passport
- Driver's license or DMV identification card
- Social Security card
- Police report
- IRS letter of determination

See the 3552 instructions for where to mail or fax the form.

CRYPTOCURRENCY

(Virtual Currency)

Overview

- Use is treated and reported like stock transactions
- Sec 1031 exchanges no longer apply after 2017

Pubs

Forms

- Notice 2014-21 – Taxability of virtual currency transactions
- Currency Converter – https://www1.oanda.com/currency/converter/
- IR-2018-71

TCJA

After 2017, TCJA only allows Sec 1031 tax deferral for domestic real estate exchanges. Thus Sec 1031 cannot be used for virtual currency exchanges.

The Details

This is a primer on how cryptocurrencies (virtual currencies) function, along with information on IRS's guidance included in Notice 2014-21 for dealing with taxable transactions involving virtual currency. Virtual currency that has an equivalent value in real currency, or that acts as a substitute for real currency, is referred to as "convertible" virtual currency. Bitcoin is one example of a convertible virtual currency. Bitcoin can be digitally traded between users and can be purchased for, or exchanged into, U.S. dollars, Euros, and other real or virtual currencies.

"Virtual currency" may be used to pay for goods or services, or held for investment. Virtual currency is a digital representation of value that functions as a medium of exchange, a unit of account, and/or a store of value. In some environments, it operates like "real" currency -- i.e., the coin and paper money of the United States or of any other country that is designated as legal tender, circulates, and is customarily used and accepted as a medium of exchange in the country of issuance -- but it does not have legal tender status in any jurisdiction.

Bitcoin, first released as open-source software in 2009, is generally considered the first decentralized cryptocurrency. Since the release of Bitcoin, over 4,000 altcoins (alternative variants of Bitcoin, or other cryptocurrencies) have been created.

Value of One Bitcoin XBT	
September 1, 2016	$575
August 1, 2017	$2,778
April1, 2018	$6,855
June 1, 2018	$5,984
August 1, 2018	$7,835
September 1, 2018	$6,958
July 1, 2019	$10,880

For a more detailed (and complex) understanding of cryptocurrencies, research the Internet. One such informative site is: https://www.genesis-mining.com/how-cryptocurrency-works

Owner Demographics – Individuals who deal in virtual currency are generally tech savvy, might also have an inherent distrust of the government and like the lack of government regulations controlling and tracing virtual currency transactions.

Market Value Determination – The FMV of virtual currency is based on market value, i.e., what a willing buyer will pay a willing seller – much like trading in stocks. That is why the IRS made the decision to treat virtual currency transactions as property transactions.

Treated as property for federal tax purposes - Virtual currency is treated as property. General tax principles applicable to property transactions apply to transactions using virtual currency (IRS Notice 2014-21, Q&A #1).

Example A: *Taxpayer buys Bitcoin (BTC) so he can use it to make on-line purchases without the need for a credit card. He buys one BTC for $2,425 and later uses it to buy goods worth $500 (BTC was trading at $2,500 at the time he made his purchase). He has a $75 ($2,500 - $2,425) reportable capital gain. This is the same result that would have occurred if he had sold the BTC at the time of the purchase and used cash to purchase the goods. This example points up the complicated record-keeping requirement to track BTC basis. Since this transaction was personal in nature no loss would be allowed if the value of BTC had been less than $2,425 at the time the goods were purchased. Of course if the taxpayer in this example only sold a fraction of a Bitcoin, enough to cover the $500 purchase, the gain would only be $15: $500/$2500 = .2 x 2425 = 485; 500 – 485=15*

Example B: *Taxpayer buys Bitcoin (BTC) as an investment. The same rules apply as for stock transactions, including gain/loss rules, $3,000 per year net loss allowed against other income, and the short- and long-term holding period rules.*

Character of the gain or loss - The character of the gain or loss generally depends on whether the virtual currency is a capital asset in the hands of the taxpayer. A taxpayer generally realizes capital gain or loss on the sale or exchange of virtual currency that is held as a capital asset. For example, stocks, bonds, and other investment property are generally capital assets. A taxpayer generally realizes ordinary gain or loss on the sale or exchange of virtual currency that he or she does not hold as a capital asset. Inventory and other property held mainly for sale to customers in a trade or business are examples of property that is not a capital asset.

Foreign Currency Transactions - Under currently applicable law, virtual currency is not treated as currency that could generate foreign currency gain or loss for U.S. federal tax purposes (IRS Notice 2014-21, Q&A #2).

Virtual Currency FBAR and Form 8938 Filings - The AICPA recently asked FinCEN if cryptocurrency held in foreign cryptocurrency exchanges requires FBAR and 8938 reporting.

- **FBAR** - FinCEN responded that regulations (31 C.F.R. §1010.350(c)) do not define virtual currency held in an offshore account as a type of reportable account. Therefore, it was FinCEN's opinion that virtual currency is not reportable on the FBAR, at least for now. In addition, the IRS (at the date of this publication) has not officially taken a position on whether a virtual currency account over $10,000 is subject to FBAR reporting.

  However, in a similar situation a few years back FinCEN told tax preparers they didn't need to report on-line gambling accounts with out-of-the country on-line casinos on the FBAR, but a tax court ruled differently and the taxpayer was penalized for failure to report his on-line gambling account where a foreign financial institution was involved (see Hom CA-9, 2016 page 01.13.06). So, to be conservative and on the safe side, we are recommending cryptocurrency held in foreign cryptocurrency exchanges be reported. But of course, that is a decision you and your client will have to make. There is no penalty for over-reporting but there are severe penalties for under-reporting. See page 1.13.02 for FBAR reporting.

- **8938 - Statement of Specified Foreign Financial Assets** – However cryptocurrency held in foreign cryptocurrency exchanges requires reporting on Form 8938 (assuming the taxpayer meets the Form 8938 filing threshold). See page 1.13.09 for Form 8938 reporting.

Payment for Goods & Services - A taxpayer who receives virtual currency as payment for goods or services must, in computing gross income, include the fair market value of the virtual currency, measured in U.S. dollars, as of the date that the virtual currency was received (IRS Notice 2014-21, Q&A #3).

Get Around Money Reporting Laws - There is no bank to report transfers to the government.

How Does One Acquire Bitcoins – One can go to online exchanges and purchase Bitcoins. But care should be taken to make sure the exchange is reputable. There are even Bitcoin ATMs (kiosks) where cash can be exchanged for Bitcoins. Then you have Bitcoins in your on-line wallet and are free to spend them with anyone that accepts Bitcoins.

Bitcoin Mining – Mining is a term used to describe how cryptographic information distributed within a Bitcoin network is secured, authorized, and approved. In essence it is the processing of payments that have taken place once they occur. It takes the place of banks, merchant's accounts, and clearing houses like Visa. It essentially eliminates all the third parties' cuts of income from the transaction. It involves complex mathematical logarithms that need to be solved and the mining process, which requires high-powered computers, completes this task autonomously.

What do miners get for dedicating computer hardware and for the cost of electricity to handle the transactions? After adding a block to the ledger, the miner is given a reward for their efforts, which varies based on the cryptocurrency. For example, Bitcoin originally awarded 50 BTCs, but that award halves at preset times and today has decreased to 12.5 BTCs. It is anticipated that sometime in 2020 it will be halved again to 6.25 BTCs.

If an individual mines virtual currency, it is a trade or business subject to self-employment tax (IRS Q&A #9). The income is the value of the generated income equal to the value of the Bitcoin when mined. Although the IRS has provided no guidance at this time, it would appear that the expenses of producing the mined Bitcoins would have to be capitalized. Luckily there are only a very few individuals or businesses doing mining (estimated to be over 300,000 by btcwires.com in February 2019), so the odds of doing a miner's tax return are slim to none.

Apparently, Bitcoin miners are subject to Form 1099-K filing requirements if certain requirements are met. In general, a third party that contracts with a substantial number of unrelated merchants to settle payments between the merchants and their customers is a third-party settlement organization (TPSO). A TPSO is required to report payments made to a merchant on a Form 1099-K, *Payment Card and Third Party Network Transactions*, if, for the calendar year, both (1) the number of transactions settled for the merchant exceeds 200, and (2) the gross amount of payments made to the merchant exceeds $20,000.

Employee Payments - The fair market value of virtual currency paid as wages is subject to federal income tax withholding, Federal Insurance Contributions Act (FICA) tax (Social Security and Medicare A), and Federal Unemployment Tax Act (FUTA) tax and must be reported on Form W-2, *Wage and Tax Statement*. (IRS Notice 2014-21, Q&A #11) Of course, these amounts are to be reported in U.S. dollars.

Independent Contractor Payments - The fair market value of virtual currency received for services performed as an independent contractor, measured in U.S. dollars as of the date of receipt, constitutes self-employment income and is subject to the self-employment tax (IRS Q&A #10). Payment may also be subject to informational reporting (IRS Notice 2014-21, Q&A #13).

Informational Reporting **-** A payment made using virtual currency is subject to information reporting to the same extent as any other payment made in property. For example, a person who in the course of a trade or business makes a payment of fixed and determinable income using virtual currency with a value of $600 or more to a U.S. non-exempt recipient in a taxable year is required to report the payment to the IRS and to the payee (IRS Notice 2014-21, Q&A #12).

Backup Withholding **-** Payments made using virtual currency are subject to backup withholding to the same extent as other payments made in property. Therefore, payers making reportable payments using virtual currency must solicit a taxpayer identification number (TIN) from the payee. The payer must backup withhold from the payment if a TIN is not obtained prior to payment or if the payer receives notification from the IRS that backup withholding is required (IRS Notice 2014-21, Q&A #14).

THE IRS HAS CRYPTOCURRENCY ON ITS RADAR

Back in 2018 Coinbase, a company handling cryptocurrency transactions, released the data of 14,000 of its users to the IRS after the information was subpoenaed, and cryptocurrency traders have been holding their breath as to what comes next. Well, that next is upon us, in the form of a wave of correspondence which most certainly will result in some serious enforcement actions.

IRS Compliance Program – The IRS has begun sending letters to taxpayers about their cryptocurrency activity; by the end of August, more than 10,000 taxpayers will receive one of three varieties of letters. A taxpayer who receives one of these letters, should not ignore it! The IRS compiled this list of taxpayers that it feels has not been reporting their cryptocurrency transactions from various ongoing IRS compliance efforts. The following is a synopsis of the types of letters:

> **Letter 6173** – Requires a response from the taxpayer, either by the taxpayer providing a statement to the IRS that they have already complied with the required reporting or by filing a return that reports their cryptocurrency transactions. For situations where the taxpayer had already filed a return but had left off the cryptocurrency transactions, an amended return (Form 1040X) will need to be filed. Taxpayers who ignore this letter may face a full-blown audit by the IRS and could be subject to penalties.
>
> **Letter 6174** – This is a "soft notice" that does not require a response, and the IRS says it won't be following up on it. However, the notice also warns that if the taxpayer had cryptocurrency gains and fails to amend their return or continues to be noncompliant on future returns despite receiving the letter, the taxpayer will be in hot water.
>
> **Letter 6174-A** – The taxpayer isn't required to respond to the letter but does need to correct their prior returns in which cryptocurrency transactions have been omitted. The IRS warns of future enforcement action if the taxpayer doesn't amend their return(s) or file their delinquent returns. After receiving the letter, the taxpayer can't use an excuse of not knowing the law for failing to report their cryptocurrency gains.

Last year, the IRS announced a virtual cryptocurrency compliance campaign to address tax noncompliance related to virtual currency use through outreach and examinations of taxpayers. The IRS has announced that it will remain actively engaged in addressing non-compliance related to virtual currency transactions through a variety of efforts, ranging from taxpayer education to audits and criminal investigations.

Taxpayers who do not properly report the income tax consequences of virtual currency transactions are liable for the tax, penalties and interest. In some cases, taxpayers could be subject to criminal prosecution.

So, if your clients receive one of the above letters, especially letter 6173, be sure your clients (or you if tasked to do so by your clients) respond timely. For anyone receiving a letter be sure to counsel them on the need to report the transactions and amend any return where reporting was omitted.

As this material was being prepared a second wave of correspondence was launched.

Potpourri Index

BE AWARE OF PARTNERSHIP AUDIT REGIME

Although this is not a partnership course, we feel it is important to bring this issue to your attention. Under IRC Sec. 6223(a) added by Public Law 114-74, the Bipartisan Budget Act of 2015 and effective as of 2018 and future years, every partnership must select what is now called a Partnership Representative (PR) unless the partnership, under section 6221(b), elects not to be subject to this new "centralized partnership audit regime."

The issue being that a PR will have the power to unilaterally deal with the IRS and any resulting consequences. Under the centralized partnership audit regime, upon an audit of the partnership, any adjustments will be taken into account by the partnership and not the individual partners in the year that the audit or any judicial review is completed (the adjustment year) and any tax owed would be collected from the partnership.

Certain small partnerships (generally 100 or fewer partners) can elect out of the centralized partnership audit regime and not be required to designate a PR.

Here is an overview of the election:

- The partnership must have 100 or fewer partners and if an S-corporation is a partner each shareholder is counted toward the 100 or fewer limit.
- Cannot have any foreign partners.
- The election can be made on any timely filed 1065 partnership return.
- Once made it cannot be revoked without IRS permission.
- The election is made on line 25 of the 1065 and by completing 1065 Schedule B-2 by listing in Part I each eligible partner's name, the partner's U.S. tax ID number (TIN), and one of the following codes:

  I— Individual
  C—Corporation
  S—S corporation
  E— Estate of deceased partner
  F— Foreign partner that would be treated as a C corporation if it were a domestic entity.

  Part II of the Schedule B-2 is used when an S corporation is a partner to list the correct name of each shareholder for the tax year of the S corporation ending with or within the partnership tax year, the correct U.S. TIN for each shareholder, and the type of person code from the following list:

  I— Individual
  T—Trust
  E— Estate of deceased shareholder
  O—Other (such as Employee Stock Ownership Plans (ESOPs); section 501(c)(3) charitable organizations; or eligible disregarded entities).

- Each partnership that elects out of the centralized partnership audit regime must complete Schedule B-2 for every tax year that the election is to be effective. If the form is not completed correctly, the IRS may determine that the election is not valid.

- For any year which the election applies a designated PR is not required.

When a partnership elects out of the centralized audit regime, the IRS will then have to deal with each partner to adjust items associated with the partnership, resolve issues, and assess and collect any tax resulting from the adjustments.

DRAFT 1040-SR RELEASED

The IRS in July released a draft of the new, Congress-mandated and supposedly simplified, 1040 for taxpayers age 65 and older. The draft strangely looks like the old 1040 before tax reform and the ill-advised and politically motivated breakup of the 1040 into 6 postcard-size schedules (repackaged into 3 schedules per the 2019 drafts). The Bipartisan Budget Act of 2018 did what lawmakers have wanted to do for a long time: provide seniors with a simplified tax form rather than having to file a 1040. In the past, seniors could not file a 1040-EZ because of its limitations, especially since it did not include Social Security income and retirement income. Of course, now the 1040-EZ and 1040-A have been discontinued anyway. Use of 1040-SR will be optional.

The draft form can be viewed at: https://www.irs.gov/pub/irs-dft/f1040s--dft.pdf

Form **1040-SR** Department of the Treasury—Internal Revenue Service (99) **U.S. Tax Return for Seniors** **2019** OMB No. 1545-0074 IRS Use Only—Do not write or staple in this space.

FORM 1099-NEC RESURRECTED

The Internal Revenue Service has resurrected a form that hasn't been used since the early 1980s, Form 1099-NEC, Nonemployee Compensation. Draft version is shown below. Since 1983, the IRS has required businesses to instead file Form 1099-MISC for contract workers and freelancers. The revival of Form 1099-NEC is part of an effort mandated by Congress in the PATH Act of 2015 to require businesses to file information returns with any non-employee compensation by Jan. 31 of each year. However, there were problems with the IRS's processing systems because there was still a March 31 due date for any Form 1099-MISC that didn't contain non-employee compensation. The draft form is dated 2020, so it would be used for reporting nonemployee compensation paid in 2020, not for 2019.

DRAFT AS OF July 24, 2019 DO NOT FILE

Form 1099-NEC www.irs.gov/Form1099NEC Department of the Treasury - Internal Revenue Service

IRS HAS POSTED LONG AWAITED 2020 W-4

The IRS has released the second version of the 2020 draft W-4 and indicated there would be no substantial changes going forward. They have previously released a draft of Pub 15-T (it replaces the former Pub 15). The second draft should be released by the time this webinar is presented.

Form **W-4**

Department of the Treasury
Internal Revenue Service

Employee's Withholding Certificate

▶ Complete Form W-4 so that your employer can withhold the correct federal income tax from your pay.
▶ Give Form W-4 to your employer.
▶ Your withholding is subject to review by the IRS.

OMB No. 1545-0074

2020

Step 1: Enter Personal Information

(a) First name and middle initial | Last name | (b) Social security number

Address

City or town, state, and ZIP code

▶ **Does your name match the name on your social security card?** If not, to ensure you get credit for your earnings, contact SSA at 800-772-1213 or go to *www.ssa.gov*.

(c) ☐ **Single or Married filing separately**
☐ **Married filing jointly** (or Qualifying widow(er))
☐ **Head of household** (Check only if you're unmarried and pay more than half the costs of keeping up a home for yourself and a qualifying individual.)

Complete Steps 2 through 4 ONLY if they apply to you. To see if you are exempt from withholding or if you have concerns about your privacy, see page 2. Everyone must complete Step 5. See instructions on page 2.

Step 2: Multiple Jobs or Spouse Works

Complete this step if you (1) hold more than one job at a time, or (2) are married filing jointly and your spouse also works. The correct amount of withholding depends on income earned from all of these jobs.

Do **only one** of the following.

(a) Use the estimator at *www.irs.gov/W4App* for most accurate withholding; **or**

(b) Use the Multiple Jobs Worksheet on page 3 and enter the result in Step 4(c) below for roughly accurate withholding; **or**

(c) If there are only two jobs total, you may check this box. Do the same on Form W-4 for the other job. This option is accurate for jobs with similar pay; otherwise, more tax than necessary may be withheld . . . . . . ▶ ☐

CAUTION: If you have privacy concerns, choose **(a)** or **(b).** If you and/or your spouse have income from self-employment, including as an independent contractor, choose **(a).**

Complete Steps 3 through 4(b) on Form W-4 for only one of these jobs. Leave those steps blank for the other jobs. (Your withholding will be most accurate if you complete Steps 3 through 4(b) on the Form W-4 for the highest paying job.)

Step 3: Claim Dependents

If your income will be $200,000 or less ($400,000 or less if married filing jointly):

Multiply the number of qualifying children under age 17 by $2,000 ▶ $

Multiply the number of other dependents by $500 . . . . ▶ $

Add the amounts above and enter the total here . . . . **3** $

Step 4 (optional): Other Adjustments

(a) Other income. If you want tax withheld for other income you expect this year that won't have withholding, enter the amount of other income here. This may include interest, dividends, and retirement income. You should not include income from any jobs . . **4(a)** $

(b) Deductions. If you expect to claim deductions other than the standard deduction and want to reduce your withholding, use the Deductions Worksheet on page 3 and enter the result here . . . . **4(b)** $

(c) Extra withholding. Enter any additional tax you want withheld each **pay period** . **4(c)** $

Step 5: Sign Here

Under penalties of perjury, I declare that this certificate, to the best of my knowledge and belief, is true, correct, and complete.

▶ **Employee's signature** (This form is not valid unless you sign it.) ▶ **Date**

Employers Only

Employer's name and address | First date of employment | Employer identification number (EIN)

For Privacy Act and Paperwork Reduction Act Notice, see page 3. Cat. No. 10220Q Form **W-4** (2020)

CODE'S TIMELY MAILING RULE REPLACES COMMON-LAW RULE

The Court of Appeals has reversed a district court decision that the taxpayers timely filed their refund claim because they met the requirements of the common-law mailbox rule.

In 1954, Congress enacted Code Sec. 7502 which provides that if a filing is delivered by U.S. mail to the agency, officer, or office with which it is required to be filed, then the U.S. postmark on the cover in which the document or payment is mailed is considered to be the date of delivery or date of payment. In addition, Sec 7502(c)(1) provides that when a document is sent by registered mail, the registration date will be treated as the postmark date.

However, the courts have been split as to whether Sec. 7502 replaces the common-law mailbox rule or just provides a supplemental safe harbor. Under the common-law mailbox rule, proof of proper mailing - including by testimonial or circumstantial evidence - gives rise to the presumption that a document was physically delivered to the addressee in the time such a mailing would ordinarily take to arrive.

In a timely mailing dispute with the IRS the taxpayer relied on the common-law mailbox rule to establish that the return was timely filed and two of the taxpayer's employees testified they timely deposited the amended return in the mail at the post office.

<u>*District court agreed with taxpayer*</u> - The district court credited the testimony of the taxpayer's employees and found, on the basis of the common-law mailbox rule, that the taxpayer's claim for a refund had been timely filed.

<u>*Circuit Court reverses*</u> - The 9th Circuit Court of Appeals reversed the holding of the district court, finding that Code Sec. 7502 and Reg. § 301.7502-1(e)(2) **replaced** the common-law mailbox rule **rather than supplementing it**, and are the exclusive rules for proving timely delivery of a return to IRS and that the taxpayer did not meet those rules. Baldwin, (CA 9 4/16/2019)

So, make sure you have documentary evidence of mailing!

CALIFORNIA DIFFERENCES

<u>CA AB 91 – CONFORMITY TO TCJA -</u> <u>(Signed by the governor 6/27/2019)</u>

Accounting Methods - Generally brings California into conformity with the accounting method simplifications made by the TCJA, effective for tax years beginning on or after January 1, 2019, with a provision allowing taxpayers to elect to have the new rules apply to tax year 2018.

NOLs – For NOLs occurring in taxable years beginning after December 31, 2018, AB 91 repeals the 2-year carryback period. California continues to allow a 20-year carryover period and has not adopted the federal rule limiting the NOL deduction to 80% of the carryover year's taxable income. Thus, 100% of the unused CA NOL is carried over.

Tax-Deferred Exchanges - The TCJA provision that limits Sec 1031 treatment only to exchanges of real property was adopted by California in AB 91, with two significant differences: the provision only applies to taxpayers with AGI of $500,000 or more ($250,000 for those filing single or married separate) and only applies to exchanges **completed** after January 10, 2019.

Excess Business Loss - California adopts the TCJA change relating to the limitation on excess business losses of noncorporate taxpayers, with the following exceptions:

- California law says that any loss which is disallowed under this provision is to "be treated as a carryover excess business loss for the following taxable year" instead of as a net operating loss carryover as it is for federal. This means the carryover amount is used in determining if there's an excess loss in the carryover year for California.
- The federal provision applies only for years 2018 through 2025, while the California law is effective for taxable years beginning after December 31, 2018 and continues indefinitely.
- California's, rather than the federal's, passive activity loss provisions are used in determining any excess loss.

529 Plans - Generally conforms to the changes relating to Sec 529 plans made by the TCJA and the Consolidated Appropriations Act of 2016, including the following:

- A distribution is not taxable, if, within 60 days of distribution, it is transferred to the credit of another beneficiary who is a "member of the family" as defined in IRC Sec 529(e)(2) or is rolled into an ABLE account for the same beneficiary or a family member.

- Refunded amounts re-contributed to the plan within 60 days will not be taxable.

- Distributions used to purchase computers, computer software, internet access and related services are qualified education expenses and thus not taxable.

- California did not conform to the TCJA provision allowing tax-free distributions from 529 plans for amounts used to pay Kindergarten through grade 12 tuition expenses. Therefore, these distributions are taxable for California and subject to a 2.5% penalty.

ABLE Accounts - AB 91 generally conforms CA law to the changes relating to qualified ABLE accounts made by the TCJA and the Consolidated Appropriations Act of 2016. Thus, California conforms to the TCJA provision allowing ABLE account beneficiaries to contribute their own earnings, up to an amount equal to the federal poverty level amount, to their own account. No effective date included in the legislation.

Higher Education Interest Deduction - AB 91 conforms California law to the TCJA provision that certain student loan debt cancelled upon the death or disability of the student is not taxable, effective for loans cancelled after December 31, 2018.

Earned Income Tax Credit – As of 2020, if a taxpayer's earned income is $30,000 or more, the phaseout will reduce the California EITC to zero. The bill also makes other changes in the phaseout calculation, which will be reflected in the table provided by the FTB in the Form 540 instructions.

Young Child Tax Credit - AB 91 adds new R&TC Sec 17052.1 that, effective for years beginning on or after January 1, 2019, allows a refundable "young child tax credit." The credit is per taxpayer, not per child, and is $1,176 times the EITC adjustment factor, which is 85% for 2019. However, the credit cannot be greater than $1,000 for any year. Thus, the maximum credit for 2019 is $1,000 ($1,176 x .85 = $999.60 = $1,000).

The credit phases out when the taxpayer's earned income exceeds a threshold amount of $25,000. The phaseout rate is $20 per $100 or fraction thereof that the taxpayer's earned income exceeds $25,000. Therefore, the credit is fully phased out once earned income reaches $30,000 ($30,000 – $25,000 = $5,000/$100 = 50 x $20 = $1,000). The threshold amount will be annually adjusted beginning in the year after the year the minimum wage is set at $15 per hour, which is scheduled to be 2022 unless the scheduled increases are suspended by the governor (Labor Code Sec 1182.12).

To be eligible for the young child tax credit, the taxpayer must also be eligible for the CA EITC, have at least one qualifying child as defined for the EITC, and the child must be younger than 6 years old at the end of the tax year.

NOTES

CALIFORNIA RESIDENCY ISSUES

CALIFORNIA DIFFERENCES

Overview

Resident - A California resident includes:

- Anyone who is in California for other than a temporary or transitory purpose, or
- An individual who is domiciled (has his permanent home) in California (CA), but outside CA for a temporary or transitory purpose. ***(Cal. Rev. & Tax. Code Sec. 17041)*** A California resident who is outside the state for a temporary or transitory purpose is still considered to be a California resident.

Related FTB Publications and Forms

Pubs Forms

Pub 1017 – Resident and Nonresident Withholding Guidelines
Pub 1031 – Guidelines for Determining Resident Status
Pub 1100 – Taxation of Nonresident Individuals Who Change Residency
Forms 587, 588, 589 590P – Nonresident withholding adjustment forms
Form 540NR – Nonresident and Part Year Resident Return

The Details

Resident - A resident of California is taxed on income from all sources - both from within and outside of California.

Example - Resident*: Taxpayer is a CA resident and has the following income:*

	Total	***CA Income***
Wages earned in California	*$ 50,000*	*$ 50,000*
Wages earned in Canada	*30,000*	*30,000*
Canadian Equivalent SS	*5,000*	*5,000*
Rental income from Colorado	*1,000*	*1,000*
Sale of land in Nevada	*15,000*	*15,000*
Pension from New York State	*12,000*	*12,000*
Interest from an Arizona bank account	*20,000*	*20,000*
Total	***$ 133,000***	***$ 133,000***

Nonresident - A nonresident of California is any person who is **NOT** a California resident. Nonresidents are taxed only on income from California sources. **(*Cal. Rev. & Tax. Code Sec. 17015)***

Example – Nonresident: *Taxpayer is a CA nonresident and has the following income:*

	Total	***CA Income***
Wages earned in California	*$50,000*	*$50,000*
Interest from a CA bank account	*1,000*	
Rental income from CA property	*1,000*	*1,000*
Sale of land in Nevada	*15,000*	
Wages earned in New York	*30,000*	
Interest from Arizona bank account	*20,000*	
Total	***$117,000***	***$51,000***

Part-Year Resident - A part-year resident means a taxpayer who meets the following conditions:

- Is a resident of California for a period of the taxable year, and
- Is a nonresident of California for a period of the taxable year.

A part-year resident is taxed on:

- All income while received as a resident of California, and
- Income from California sources while a nonresident. ***(Cal. Rev. & Tax. Code Sec. 17015.5)***

RAPID FINDER

Example –Part-year resident - *Taxpayer became a California resident on July 1 of the tax year. He earned the following income during the tax year:*

		Total	***California Income***
NV wages	*Jan 1 to Jun 30*	*$50,000*	*-0-*
NV Rental Income	*Jan 1 to Dec 31*	*8,000*	*4,000*
CA Rental Income	*Jan 1 to Dec 31*	*8,000*	*8,000*
California wages	*Jan 1 to Jun 30*	*15,000*	*15,000*
California wages	*July 1 to Dec 31*	*30,000*	*30,000*
CA PERS Pension	*Jan 1 to Dec 31*	*12,000*	*6,000*
Int. from a CA bank	*Jan 1 to Dec 31*	*2,000*	*1,000*
Arizona wages	*July 1 to Dec 31*	*5,000*	*5,000*
Int. from an AZ bank	*Jan 1 to Jun 30*	*2,400*	*-0-*
Total		*$132,400*	*$69,000*

PRESUMPTION OF RESIDENCE

Nine-month presumption - There is a nine-month California residency presumption. If a taxpayer is in California for more than nine months during the taxable year, that person is said to be a California resident. This nine-month presumption may be overcome with satisfactory evidence that the individual is in California for a temporary or transitory purpose. In addition, if an individual is in California for less than nine months, no presumption of nonresidency exists. ***(Cal. Rev. & Tax. Code Sec. 17016)***

Definition of "temporary" **-** Temporary means that if a person is passing through California, either for a brief rest or for a vacation, or for a short period or to complete a transaction, they are considered to be here temporarily. The Board of Equalization, the CA government entity that, through June 30, 2017, heard audit appeals of the Franchise Tax Board, ruled that the amount of time spent in a location is of substantial importance in determining residency **(*in the Appeal of Louis and Betzi Akerstrom 60 SBE 009).***

Date residence established **-** In general, the date used for determining when a taxpayer's residence changes is the date they enter or leave California. ***(Appeal of George W. and Gertrude Smith Davis 64 SBE 043)***

Foreign citizen performing services in CA **-** A resident of a foreign country performing services in California and/or receiving income from California sources may have a CA filing requirement even if there is no IRS filing requirement.

In a perfect world, all taxpayers would move in to CA and move out of CA only on January 1 or December 31. That would simplify the preparation of a 540 NR. However, the reality is that taxpayers move in and out of California every day of the year. That factor alone creates interesting and complex tax scenarios**.**

DOMICILE – Domicile is defined as the location of your permanent home or the place you intend to return to whenever you leave. Domicile is the location where the taxpayer has the most permanent connections (including home and principal establishment) and intends to remain. Taxpayer intent is important but not enough on its own to determine domicile. An individual can only have one domicile at a time. ***(Cal. Code Regs. Title 18 Sec. 17014, Appeal of Anthony and Ann Eustachio 85 SBE 040)***

In the Noble case, an appeals court ruled in favor of the FTB. This audit focused on the date the taxpayer moved out of California. The taxpayer claimed they had moved from California to Colorado during March 1994. They bought a home in Colorado in February 1994. The facts of the case showed that the taxpayer never moved into that property and eventually made it a rental. The taxpayers ultimately purchased and moved into a principal residence in Colorado during June 1994. The taxpayers were found to be residents of California until July 1994 for these reasons:

1- They did not list their home in California for sale until June 1994.
2- Their cars were registered in California.
3- They had California driver's licenses.
4- Mr. Noble had a business in California.
5- Their business and financial institutions were in California.
6- They did spend more time in California during the period in question.
7- Their doctors and dentists were located in California.
8- They belonged to California clubs.

FTB ruled Noble was a resident of California during the audit period. The Court of Appeals agreed with the lower court that the taxpayers had greater ties to California than Colorado. They also ruled that the date the Noble's residence changed was later than claimed by the taxpayers. ***(Noble v. Franchise Tax Board (2004) 118 Cal. App. 4th 560)***

"Residence" and "Domicile" can be different - Individuals may be residents of California while domiciled outside of the state when here for an indefinite period of time. On the other hand, it may happen that individuals domiciled in California may be treated as a nonresident of California if they are outside California for an indefinite period of time. To illustrate the importance of domicile, in the event of any doubt about domicile, the FTB will presume the domicile has not changed.

Domicile Criteria:

- California has separate definitions for domicile and for residence.
- It is possible to be domiciled in CA but not be a California resident.
- It is possible to be domiciled in another state and still be a California resident.
- For tax purposes, the meaning of the term "domicile" is the place where you establish yourself and your family, not merely for a limited purpose.
- It is your true, fixed and permanent home.
- It is the place where, whenever you are absent, you intend to return.
- You can only have one domicile at a time.

Maintenance of a marital abode in California is an important factor in determining domicile.

NONRESIDENT SAFE HARBOR RULES

California does not have an equivalent to the Federal foreign earned income exclusion provision. Since residents of California are taxed on ALL income, including income from sources outside California, the key is whether or not the taxpayer is a resident.

A safe harbor is available for certain individuals leaving California under employment-related contracts. The safe harbor provides that an individual domiciled in California, who is outside California under an employment-related contract for **at least 546 consecutive days** (18 months), will be considered a nonresident unless:

- The individual has intangible income exceeding $200,000 in any taxable year during which the employment-related contract is in effect; or
- The principal purpose of the absence from California is to avoid personal income tax.

The spouse of the individual covered by this safe harbor rule will also be considered a nonresident while accompanying the individual outside California for at least 546 consecutive days. Return visits to California that in the aggregate do not exceed 45 days during any taxable year covered by the employment contract are considered temporary. Individuals not covered by this safe harbor must determine their residency status based on their facts and circumstances. The determination of residency status cannot be solely based on an individual's occupation, business or vocation. Instead, all activities must be considered in the determination of residency status.

Away-from-home expenses - Taxpayers, who by the facts and circumstances are determined to be California residents, may be able to deduct away-from-home business expenses (for travel, meals and lodging) on their California tax return.

COMMON LAW MARRIAGES

California abolished common law marriages by statute in 1895. California recognizes common law marriages originating in states that recognize common law marriages ***(Appeal of Estate of Lawrence Foley, Deceased 77-SBE-100, 7-26-77)***

SPOUSES RESIDING IN TWO STATES – ONE IN CA AND ONE IN ANOTHER STATE

Today, it is not uncommon for an individual to reside in California and his or her spouse to reside in another state. Therefore, the spouse who remains a California resident may be taxable on ½ of the non-resident spouse's community income. (See FTB Publication 1031).

FEDERAL TAX ELECTIONS

For California tax purposes, taxpayers who move into California are said to have elected, for California tax purposes, the same federal elections they made prior to moving to California. ***(Cal. Rev. & Tax. Code Sec. 17024.5(e)3(B)(i))***

NONRESIDENT AND PART-YEAR RESIDENT TAX CALCULATION

Nonresidents and part-year residents determine their California tax by multiplying California taxable income by an effective tax rate.

Effective Tax Rate - The effective tax rate is the California tax on all income as if taxpayers were California residents for the current tax year and for all prior tax years for any carryover items, deferred income, suspended losses or suspended deductions, divided by that income. ***(Cal. Rev. & Tax. Code Sec. 17041(b), FTB Publication 1100 – Revised 11/2007)***

$$\textbf{Effective Tax Rate} = \frac{\textbf{CA Tax on All Income}}{\textbf{CA Income as if Full-Year Resident}}$$

Prorated Tax = CA Taxable Income (CTI) x Effective Tax Rate

California Taxable Income (CTI) is California adjusted gross income (AGI) less California itemized or standard deductions.

California Deductions - Nonresidents and part-year residents are allowed to claim itemized or standard deductions in computing their California taxable income in the ratio that California adjusted gross income is to total worldwide adjusted gross income ***(Cal. Rev. & Tax. Code Sec. 17304)***

$$\textbf{Prorated Deductions} = \frac{\textbf{California AGI}}{\textbf{Total AGI}} \times \textbf{Total Deductions}$$

California Tax Credits **-** Part-Year and Nonresidents may be able to qualify for California credits on a prorated basis if they meet all credit requirements. They will be allowed all California tax credits in the same proportion as the ratio used to calculate their tax. ***(Cal. Rev. & Tax. Code Sec. 17041)***

$$\textbf{Prorated Credit} = \frac{\textbf{California Taxable Income}}{\textbf{Total Taxable Income}} \times \textbf{Full Credit}$$

Exceptions - The percentage does not apply to the following credits, which are allowed in full for the:

- Renter's credit,
- Other state tax credit, or
- Any credits conditional upon a transaction occurring wholly within California.

OTHER STATE TAX CREDIT

California law allows a taxpayer to take a credit for tax that is paid to another state if the other state and California tax the same income. There are limitations. The credit is taken on California 540, Schedule S if the same income is taxed by Calif. and another state. ***(Cal. Rev. & Tax. Code Sec. 18001(c))***

Residents of California may claim a credit only if the income taxed by the other state has a source within the other state under California law. **No credit is allowed** if the other state allows California residents a credit for net income taxes paid to California.

California Resident - California resident individuals or estates and trusts that derived income from sources within any of the following states or U.S. possessions and paid a net income tax to that state or U.S. possession on income that is also taxed by California may claim the other state tax credit on their California return:

Alabama
American Samoa
Arkansas
Colorado
Connecticut
Delaware
Georgia
Hawaii
Idaho
Illinois
Indiana*
Iowa
Kansas
Kentucky
Louisiana
Maine
Maryland
Massachusetts
Michigan
Minnesota
Mississippi
Missouri
Montana
Nebraska
New Hampshire *(Business Profits Tax)*
New Jersey
New Mexico
New York
North Carolina
North Dakota
Ohio
Oklahoma
Pennsylvania
Puerto Rico
Rhode Island
South Carolina
Tennessee *(excise tax only)*
Utah
Vermont
Virginia *(dual residents)*
Virgin Islands
West Virginia,
Wisconsin
District of Columbia *(Unincorporated business tax and income tax, the latter for dual residents only)*

*Effective for tax years beginning on or after Jan. 1, 2017; for prior years the credit was claimed on the Indiana return

California residents who are included in a group nonresident partnership, S corp, LLC, etc., tax return, filed with the states listed above, as well as Arizona (AZ), Oregon (OR), or Virginia (VA) may also claim a credit for their share of income taxes paid to these states, unless any of these states allow a credit for taxes paid to California on the group nonresident tax return. See more about group nonresident returns starting on page 1.50.18.

Nonresidents - Nonresidents of California may claim a credit only for net income taxes imposed by and paid to their states of residence and only if such states do not allow their residents a credit for net income taxes paid to California. They may claim the out-of-state tax credit on their Form 540 NR return. Only states and territories allowed for nonresidents are:

Arizona
Guam
Oregon
Virginia

California nonresidents who are residents of any state or U.S. possession not listed may not claim this credit.

Part-Year Residents - Part-Year Residents follow the instructions for residents for the part of the year that they were a California resident and follow the instructions for nonresidents for the part of the year that they were a nonresident. Their allowable credit is figured on Form 540, Schedule S. ***(CA Rev. & Tax. Code Sec. 17041)***

The **Other State Tax Credit** is allowed for net income taxes paid to another state (not including any tax comparable to California's alternative minimum tax) on income that is also subject to California tax. The credit is applied against California net tax less other credits. The credit cannot be applied against the California alternative minimum tax.

An **Estate or Trust** may claim a credit if it is treated as a "resident" of California and also as a "resident" of another state. For this purpose, an estate or trust is considered to be a "resident" of any state that taxes all its income, regardless of whether the income is derived from sources within that state.

FORMS TO USE FOR PART-YEAR AND NONRESIDENT RETURNS

- **540 NR – Short Form** - may be used for taxpayers with up to $100,000 of total income and no more than 5 dependents. Adjustments to income are allowed only for unemployment compensation, military pay adjustment and paid family leave insurance (not taxable to CA). Not available if (a) filing married separate, (b) either taxpayer or spouse/RDP is age 65 or over, (c) interest income on the federal return includes U.S. government interest, (d) using itemized deductions, (e) claiming credits other than the personal and dependent exemption credits or renter's credit, (f) CA estimated tax payments were made or the taxpayer has an estimated tax transfer available from the prior year return, or (g) tax is withheld on Forms 592-B or 593.
- **540 NR – Long Form** - may be used for all other nonresident and part-year resident taxpayers.
- **540 NR, Schedule CA** - the 540NR CA form is used to calculate worldwide income, worldwide income using California law, California source income and the ratio of California source income to worldwide income. California tax is computed on the basis of worldwide income. The procedure for computing the California tax when using Form 540NR is summarized in the following steps:
  - Determine worldwide income.
  - Determine California source income.
  - Calculate the ratio.
  - Calculate tax on worldwide income.
  - Apply the ratio of tax on worldwide income to find the California tax due.

> **NOTE -** Since Residency is a question of fact, not law, the FTB will not issue a written opinion on whether an individual is a California resident for a certain period of time.

FTB WRITTEN ADVICE

Requests for written advice must include the name of the taxpayer and an identification number (social security number, corporation number or federal employer identification number). Requests require a complete statement of all the facts regarding the transaction or activity. Taxpayers or their tax representatives requesting written advice on behalf of a client must include a legal analysis and cite the authority for their position. In some cases, tax may be cancelled if the advice is requested and received prior to taking the contemplated action. **(*Rev. & Tax. Code Sec. 21010)***

The FTB will **not issue written advice under certain conditions**:

- Sections of law where state and federal law are the same.
- **Questions of fact (residency, unity)**
- Issues that are currently in audit, protest, appeal, settlement or litigation.

Refer to Franchise Tax Board Notice 2009-8 for more detail on how the Board provides written advice to taxpayers. This document is available on the FTB web site at: https://www.ftb.ca.gov/tax-pros/law/ftb-notices/2009-08.pdf

GUIDELINES FOR DETERMINING RESIDENCY

The following is a list of factors used in determining residency (*FTB Publication 1031 – 2018*):

- Physical Presence - Amount of time spent in CA vs. elsewhere
- Location of spouse/RDP, children and family
- Principal residence – Where is it located (and is it owned or leased)?
- State where professional licenses are maintained
- Voter Registration – What state?
- Location of financial institutions, and point of origin of financial transactions (bank accounts, credit cards)
- Location of professionals, physician, accountant, attorney, insurance agent and broker
- Location of investments and real property
- Location of social, family, religious and business connections
- Permanence of work assignments in California

When the FTB challenges a residency position by a taxpayer, the documentation requested as part of the audit may include the following:

- Real Property
  - Purchase/Sale/Lease Information
  - Escrow Documents
  - Insurance Records
- Personal Property
  - Vehicle/Vessel Registration
- Business Activity Information
  - Travel Logs or Personal Calendars
  - Employment Contracts

- Financial Records
  - Cancelled Checks/Statements
  - Credit Card Receipts/Statements
- Personal Records and/or Information
  - Voter Registration
  - Service Providers (e.g., utility statements)

Voter Registration **-** To illustrate the importance of the above items, just registering to vote in California and/or claiming the California homeowner's property tax exemption can create a presumption that makes a taxpayer a resident. **(See the following BOE cases: Appeal of Pierre and Nicole Salinger 1980 SBE 089 and Appeal of Anthony and Ann D'Eustachio 1985 85 SBE 040)**

Residency Audits – A residency audit – which the FTB aims to complete within 18 months – focuses on:
1. Claimed state of residency
2. Personal records, business activity info and financial records
3. Real property (sale, purchase, lease)
4. Personal property (car, boat, plane)
5. Business activity logs/calendars – possible related business entities
6. Personal records (Voting, Medical Services)

Residency Appeal Board of Equalization Case - A 2003 Residency case that went to Appeal was won by a taxpayer by the name of Stephen D. Bragg. It was an interesting case in which Mr. Bragg had homes and business activities in two states, CA and AZ. He had bank accounts in CA and cars registered in CA. The taxpayer had all of his professional services done in CA. The taxpayer spent substantial time in Arizona. He spent the majority of time during the tax year in his Arizona home. Bragg conducted most of his business in AZ. He also had full-time employment in Arizona. The kicker was the taxpayer had no intention of returning to CA to reside. The Board's findings were made with Bragg's many CA ties.

Appealing FTB Residency Audit Determination - When the audit is complete, FTB will also issue one or more of the following:
- A letter stating FTB accepted the return or the claim for refund as taxpayer filed it.
- A letter stating FTB denied or partially denied taxpayer's claim for refund.
- A Notice of Proposed Assessment indicating the additional tax FTB believes is owed.
- A Notice of Overassessment indicating the refund FTB owes.
- A Notice of Proposed Adjusted Carryover Amount indicating FTB changed a carryover item but taxpayer owes no additional tax.

If FTB issues a Notice of Proposed Assessment and taxpayer does not agree, taxpayer has the right to protest FTB action. Taxpayer must file a written protest by the date shown on the front of the FTB notice. FTB provides specific protest procedures with the notice. If FTB does not grant taxpayer's claim for a refund, taxpayer has the right to appeal the FTB action. Prior to July 1, 2017 such written appeal was filed with the California State Board of Equalization (SBE) within 30 days of the date of the FTB denial letter. A new agency, the Office of Tax Appeals, took over part of the SBE's functions as of July 1, 2017 but didn't begin full operations and hearing appeals until January 1, 2018. For more information regarding taxpayer protest and appeal rights, refer to California Taxpayers' Bill of Rights publications (FTB 4058, 4058B and 4058C – available on the FTB's web site) or visit the Office of Tax Appeals website at ota.ca.gov.

Notice of Proposed Assessment **-** The Notice of Tax Proposed Assessment (NPA) gives the taxpayer a 60-day right of appeal within FTB. After the taxpayer's protest or appeal is ruled on by FTB, a Notice of Action will be issued by FTB. The taxpayer then has 30 days to appeal the FTB determination to the new Office of Tax Appeals, where a 3-member panel of administrative law judges will hear the case. In a residency determination case, the taxpayer is granted a big exception to file an appeal of an FTB notice of action in the California Superior Court with no prepayment of tax required. In general, tax must be paid prior to going to Superior Court.

ALIMONY AND THE NONRESIDENT

Code section 17302 conforms FTB and California law to the U.S. Supreme Court decision **Lunding v. N.Y Appeals Tribunal-1998**, allowing a prorated alimony deduction to nonresidents and part-year residents. Nonresidents or part-year residents are allowed an alimony paid deduction in the same ratio, not to exceed 1.00, as California adjusted gross income for the entire year, computed without regard to the alimony deduction, bears to total adjusted gross income, computed without regard to the alimony deduction. *Note: California has not conformed to the TCJA treatment of alimony (nontaxable by recipient/nondeductible by payer) from decrees entered into after 2018.*

$$\textbf{Prorated Alimony} = \frac{\textbf{California AGI (w/o Alimony Deduction)}}{\textbf{Total AGI (w/o Alimony Deduction)}} \textbf{ X Total Alimony}$$

FOREIGN TAX TREATIES AND FOREIGN TAX CREDITS - California does not conform to the Internal Revenue Code as it relates to treaties that exempt certain income from federal taxation. The result is that, although foreign pensions and social security may be exempt from federal taxation under U.S. treaties, the income is subject to California tax.

Federally Exempt Foreign Pensions - Federally Exempt Foreign Pensions are taxable to California residents. The state's position has been that tax treaties between the U.S. and other countries do not prevent California from taxing persons otherwise covered by such treaties. ***(Appeal of M.T. de Mey van Streefkerk, Cal. St. Bd. Of Equal., Nov. 6, 1985)*** In support of this position, the U.S. Supreme Court has ruled that tax treaties the U.S. enters into generally do not prohibit the taxing activities of sub-national governments.

Foreign Social Security - Only U.S. Social Security Benefits are exempt from CA taxation - There is no provision under either the California statute or the Internal Revenue Code to specifically exempt foreign social security from taxation by California. ***(Cal. Rev. & Tax. Code Sec 17087(a))***

Foreign Tax Treaties and Foreign Tax Credits – Below are three important facts regarding Foreign Tax Treaties and Foreign Tax Credits:

- California does not recognize U.S. Government and foreign country treaties and doesn't allow a tax credit for foreign income taxes paid.
- Federal rules that may exempt certain foreign income from federal tax do not apply to California.
- Any foreign earned income excluded under IRC Sec 911 for federal purposes must be added back to California income on Schedule CA for California tax purposes.

MOVING EXPENSES

Part-Year Residents – Even though the TCJA no longer allows a moving deduction for federal purposes after 2017 (except for Armed Forces members on active duty who move pursuant to a military order), California conforms to the pre-2018 federal treatment of moving expenses as an adjustment to income. California also conforms to the Federal limits (e.g., no meal expenses allowed) regarding moving expenses.

If a part-year resident taxpayer:

- ***Moved Into California*** - in connection with a new job, the moving expenses are deductible.
- ***Moved Out of California*** - in connection with a new job, the moving expenses are not deductible in CA.

Exception: If the taxpayer moved out of California in connection with a new job and received compensation from that job attributable to a California source, the moving expense adjustment will be limited by the ratio of California source compensation from the new job to total compensation from the new job.

NONRESIDENT OR REAL ESTATE WITHHOLDING CREDIT

- If your clients are nonresidents, they may have a nonresident withholding credit. If so, they should have received form FTB 592-B, Resident and Nonresident Withholding Tax Statement, to document their nonresident withholding credit.
- If your clients are individuals (either residents or nonresidents) and sold California real property that was not their principal residence, withholding was probably performed as part of the transaction and they should have received Form 593, Real Estate Withholding Tax Statement, to document how much real estate withholding credit they have.
- To claim these credits on the clients' California income tax return, enter the credit on the Real Estate or Other Withholding line.
- Do not claim it on any other line or the credit will be delayed or denied during processing.

PENSIONS AND ANNUITIES

California generally conforms to Federal treatment of pensions. However, foreign equivalents to Social Security are generally taxable to CA. See Chapter 2.03.

Taxation of Out-of-State Pensions - P.L. 104-95 prevents states from taxing the pensions of **former** residents of any state received after December 31, 1995 (R&TC 17952.5). Benefits received from the following plans are not subject to out-of-state taxation:

- IRC Sec. 401(a) trusts exempt from taxation under IRC Sec. 501(a)
- IRC Sec. 403(a) annuity plans
- IRC Sec. 403(b) annuity contracts
- IRC Sec. 408(k) plans
- IRC Sec. 414(d) government plans
- IRC Sec. 457 deferred compensation plans
- IRC Sec. 501(c)(18) trusts
- IRC Sec. 7701(a)(37) individual retirement plans
- IRC Sec. 401(k) plans)
- IRC Sec. 3121(v)(2)(C) plans (Nonqualified Deferred Compensation Plans) - if payments are made at least annually and spread over the actuarial life expectancy of the beneficiaries or if they are spread over at least a 10-year period; and
- Plans that are trusts under IRC Sec. 401(a) but exceed limits laid down in IRC Sec. 401(a)(17) and IRC Sec. 415.

Taxation of Canadian RRSPs and RRIFs – These Canadian retirement plans do not qualify as IRAs under either federal or California law. California does not recognize the U.S.-Canada treaty provision allowing an election to defer taxation of the earnings of these plans until distributions are received. Thus the interest, dividends or capital gains earned by these plans annually are taxed by California and are an adjustment on Schedule CA. The amount taxed becomes the taxpayer's basis in the plan for CA purposes and will not be taxed again when distributions are actually received.

WAGES AND SALARIES

Wage and Salary Income has a source where the services are performed. When a California resident receives compensation for services, the compensation is taxable by California. Location of the employer, where the payment is issued or the location where the taxpayer received the payment does not affect the source of this income. The most important factor is the place where the services are ultimately performed.

CA Nonresident - A California Nonresident must include the income for services performed in CA. ***(Cal. Rev. & Tax. Code Sec 17954*****)**

Compensation Accrued Before CA Residency - Compensation received by the taxpayer as a California resident that accrued before becoming a resident is taxable by California. Therefore, if a taxpayer is a California resident when compensation is **received**, the compensation is taxable by California.

> ***Example – Accrued before becoming a resident –*** *The taxpayer lived and worked in New York until March 30. He permanently moved to California on April 5. On April 15, he received his last monthly paycheck of $5,000 in the mail from his out-of-state employer. Therefore, the wage income of $5,000 is taxable income to California, because the taxpayer was a California resident when he received the wages. If the taxpayer also paid tax to New York on the $5,000, he may be allowed an other state tax credit on this double-taxed income-Form 540NR, Schedule S.*

INTEREST AND DIVIDENDS – INTANGIBLE INCOME

Intangible income such as interest and dividends has a source where the taxpayer is a resident.

- **CA Resident** – Generally, intangible income from worldwide sources is taxable to CA.
- **CA Nonresident** – Intangible income received from California by a nonresident is not taxed by California. ***Exception*** - interest and dividends have a source in CA if the account or security is used in a trade or business or pledged as security for a loan, the proceeds of which are used in a trade or business in CA.

> ***Example – CA Nonresident -*** *Taxpayer, a California nonresident, owns stock in a California corporation and received $10,000 in dividends. Dividends have a source in the owner's state of residence. Therefore, the dividends the taxpayer received are not California source income and not taxable by California.*
>
> ***Example – CA Part-year resident –*** *The taxpayer moved from New York and became a California resident on June 1. However, he kept his money in a bank account in New York. From January 1 to December 31, the New York bank account earned $5,000. Interest income, which is intangible, has a source in the recipient's state of residence. Because the taxpayer became a California resident on June 1, the interest earned by the taxpayer from June 1 to December 31, is considered California source income. If the $5,000 of interest had been earned ratably through the year, then $2,917 ($5,000 x 7/12) of the interest would be taxable to California.*
>
> ***Example: CA Part-year resident -*** *During the tax year, the taxpayer was a part-year resident. He sold 500 shares of stock at a $20,000 gain after becoming a California resident. Since he was a California resident at the time of sale, the gain on the sale of the stock is taxable by California even though the stock appreciation had taken place over a number of years in a different state.*

BUSINESS INCOME

Nonresident - Nonresidents and resident individuals eligible for the other state tax credit who have income or loss from a trade or business activity conducted within and outside California generally must apportion their income in accordance with the provisions of R&TC Sections 25120 through 25141 (see Cal. Code Regs., tit. 18 section 17951-4). Items of income or loss that would be treated as nonbusiness income under those sections if earned by a corporation should be sourced using the normal sourcing rules that apply to individuals under R&TC Sections 17951 through 17955, and reported on the appropriate line of Schedule CA (540) or Schedule CA (540NR. Individuals complete only Schedule R-1, R-2, and lines 17, 18a, and 18b on Schedule R. Enter on line 17 the total income from the trade or business after any adjustment for federal and state differences. Nonresidents or part-year residents should enter the amount from line 18b on Schedule CA (540NR), Part II line 12 or line 17, column E. Note: In completing these schedules, the term "corporation" should be read as "apportioning business activity."

If an apportioning trade or business is (1) operating as a sole proprietorship owned by a nonresident individual or (2) operating as a single-member disregarded LLC owned by a nonresident individual and therefore treated as a sole proprietorship, for income arising from activities that occur both within and outside California, the single-sales factor formula must be used to determine the California source income of the individual on Schedule R-1. For more information, see Cal. Code Regs., tit. 18 section 17951-4(c)(2).

Nonresident individuals with service or intangible income from a trade or business or profession may have California source income if they have income from California as result of market assignment. See market assignment information in the General Information section of the Schedule R instructions for more information:
https://www.ftb.ca.gov/forms/2018/18-100R-instructions.html

> ***Example*** *- Jill, a nonresident of California, owns a web design business that she holds as a sole proprietorship. She works from her home out of state but has customers in various states including California. For the taxable year, Jill's sales receipts from California customers are $300,000 out of the total sales receipts everywhere of $1,000,000. Since nonresident individuals are taxed on all California source income and Jill's sole proprietorship is carrying on a business in and out of California and will be required to apportion its income to California, she will be required to file a California return. Under market assignment, sales of services are assigned to California if the purchaser of the service received the benefit of the service in California. Accordingly, $300,000 will be assigned to the California sales factor numerator for Jill's sole proprietorship and Jill would apportion 30% ($300,000 CA sales/$1,000,000 total sales) of the business income from her sole proprietorship to California.*

STOCKS AND BONDS

Gains and losses from sales of stocks and or bonds have a source where the taxpayer is a resident at the time of the sale. *(Cal. Rev. & Tax. Code Sec 17952)*

SALE OF A PARTNERSHIP INTEREST

The sale of a partnership interest is considered a sale of an intangible asset. It has a source where the taxpayer is a resident at the time of the sale. *(Appeal of Amyas and Ames SBE 87-042)*

LUMP SUM DISTRIBUTIONS

California Residents - Any lump sum distributions (not rolled over) are taxable by California.

Nonresidents - Lump sum distributions from a qualified plan or annuity are not taxable by California. However, nonqualified plan distributions are still taxable by California.

SALE OF REAL ESTATE

Residents and Nonresidents - Gains or losses from the sale of real estate have a source where the property is located. Thus, both residents and nonresidents are taxed on the gain from the sale of California real estate, and include a loss from sale of California real property on their California return if the loss is otherwise allowed under the usual loss recognition rules. Gains from real estate sales of property located outside of California are only taxable to California if the taxpayer is a resident of California at the time of the sale. Losses from out-of-state real property sales – if the loss is permitted under the normal loss recognition rules – are allowed to California residents the same as if the property were located in California. A California resident selling real property located in another state may be required to file a nonresident return for the other state, depending on the other state's filing requirements.

TAX WITHHOLDING FOR CA FLOW-THROUGH ENTITIES

The withholding applies to Interest, Dividends and Compensation for personal services.

Domestic (non-foreign) Nonresident Partners - Partnerships are required to withhold income taxes when distributing current or prior year income to domestic nonresident partners. Withholding is not required if distributions to a partner are $1,500 or less during the calendar year (*R&TC Sec 18662))* The withholding rate is 7 percent of distributions of California source income to domestic nonresident partners.

Foreign (non-U.S.) Partners - Withholding is required on income from California sources which is allocated to foreign partners. R&TC Section 18666 generally conforms to federal Internal Revenue Code (IRC) Section 1446 to the extent that the income is from California sources. ***(CA R&TC Section 18666)*** The **withholding rate is 12.3 percent** of distributions of California source income to foreign nonresident, noncorporate partners.

- The FTB allows foreign partners to request reduced or no withholding of California tax on effectively connected taxable income from California sources allocable to a foreign partner by certifying to the FTB and the partnership that no or reduced California tax will be due. See FTB Form 589 instructions for details.

Withholding Exceptions - Withholding is not required if one of the following exceptions is met:
- The partner is a California resident.
- The partner is a corporation that is qualified through the California Secretary of State to do business in California or has a permanent place of business in California.
- The partner is a partnership that has a permanent place of business in California.
- The total distributions of California source income to the partner are less than or equal to $1,500 for the calendar year.
- The partner or partnership receives a withholding waiver from the FTB.

- The partner is a tax-exempt entity under either California or federal law.
- The distribution is exempt income.
- The partner has certified that income was previously reported on the partner's California tax return.

Forms – The following are the required withholding forms and instructions:
- 592 - Resident and Nonresident Withholding Statement (submitted to FTB by withholding agent)
- 592B –Resident and Nonresident Withholding Tax Statement (provided to payees by withholding agent)
- FTB Publication 1017

RESIDENCY BY PROFESSION

Airline Employees **-** Wages of nonresident flight personnel are NOT taxable by California unless more than 50% of the individual's scheduled flight times are in California. ***(49 U.S.C. section 40116(f)(2)(B))*** If more than 50% of a nonresident airline employee's pay is earned in California, that California-sourced income can be taxed by the FTB. If more than 50% of flight time is scheduled in California, the wages taxable to CA are determined as follows:

$$\textbf{CA Source Wages} = \frac{\textbf{Scheduled flight time in CA}}{\textbf{Total scheduled flight time}} \times \textbf{Wages}$$

California residents are taxed on all wages received regardless of where flight time is spent.

Railroad or Motor Carrier **-** The wages of these nonresident employees are only taxed by the employee's state of residence. ***(49 U.S.C. sections 11502(a) and 14503(a))***

Merchant Seamen - The following are considered CA nonresidents:
- Any merchant seaman, who is in CA due to the fact that this state is a port of call and who maintains no other contacts or connections with this state, is a nonresident.
- Merchant seamen are normally taxed by state of residence.
- Merchant seamen are normally considered to be domiciled at the location where their family resides. (***Appeal of W.J. Sasser 1963 SBE 126)***

Students **–** Out-of-State students that attend California universities are generally considered to be nonresidents if they are in CA just to attend school and pay out-of-state tuition fees. *(**FTB Legal Ruling 122)*** However, CA source income, such as a CA W-2, would be taxable to California.

Example – Out-of-state Student *- The taxpayer is an out-of-state student attending UCLA. She earned $2,000 from working in the school's library. She also earned $50 of interest from a CA bank and $100 from a bank in her home state of Oregon. She also had a stock sale gain of $24,000 during the year. She would file a 540NR for the year, and her income is allocated as follows:*

	Total Income	***CA Reportable Income***
CA W-2	*2,000*	*2,000*
CA bank interest	*50*	
OR bank interest	*100*	
Capital gain	*24,000*	

Military – Military nonresidents cannot be taxed by California for income from military service earned while on station in California. Only their state of residence can tax military income. ***(Appeal of Cecil L and Bonai G. Sanders 1971 SBE 018)***

The **Service Members Civil Relief Act of 2003** provides that a service member does not lose or acquire a residence or domicile for tax purposes with respect to his or her person, personal property or income due to being absent or present in any tax jurisdiction in the U.S. solely to comply with military orders. Furthermore, military compensation is not considered income for services performed or from sources within a tax jurisdiction of the U.S. if the service member is not a resident of or domiciled in the jurisdiction in which he or she is serving.

A state (or other tax jurisdiction) may not use the military compensation of a nonresident service member to increase the tax liability imposed on other income earned by the nonresident service member (or spouse) that is taxed by the state or other jurisdiction. Military compensation of an armed service member not domiciled in California cannot be used to increase the tax liability imposed on other income earned by that military member or their spouse. Military compensation is therefore excluded from AGI, taxable income and AMT. ***(Revenue & Taxation Code 17140.5)***

- **Military Pay Adjustment For Nonresident Military Service Members ONLY** - If a taxpayer is serving on active duty military and domiciled in AZ, ID, LA, NV, TX, NM, WA, WI or Puerto Rico (community property states) AND the taxpayer's spouse is a California resident, the spouse is entitled to an adjustment of ½ of taxpayer's military pay.

  For tax purposes, income is allocated between spouses based upon whether the person receiving the income is domiciled in a community property or separate property state. The community property states are: Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas, Washington and Wisconsin.

> ***Example:*** *Lt. Dan is domiciled in New York, a separate property state, and Mrs. Lt. Dan is domiciled in California, a community property state. Wages earned by Lt. Dan are his separate income for tax purposes. Wages earned by Mrs. Lt. Dan are community property for tax purposes, and each spouse must report his or her community half if they are filing separate returns. Income from joint accounts is assumed to belong equally to each party. Therefore, if the taxpayer and spouse file separate returns, each must report one-half of any taxable income from a joint account.*

- **Nonresident Military Personnel Domiciled Outside California: Military Pay Adjustment (MPA) -** Military pay of a service member domiciled outside of California cannot be used to determine the amount of California tax this taxpayer (or their spouse) must pay. Since the California return starts with federal adjusted gross income, which includes their military pay, they must make an adjustment on their California return.

  If they file:

  - Long Form 540NR, enter their military pay on Schedule CA (540NR), Part II, line 1, column B. Write **"MPA"** to the left of column A or include it according to your software's instructions and enter only the amount of the active duty military pay in column B. Do not include their military pay in column E.
  - Short Form 540NR, enter their military pay on Short Form 540NR, line 14. Write **"MPA"** on the dotted line to the left of line 14. Do not include their military pay on line 32.

  > ***Example*** *- Lt. Dan is a nonresident domiciled outside of California. Mrs. Lt. Dan is a resident of California. They should enter Lt. Dan's military pay on Schedule CA (540NR Long Form), line 7, column B.*

- **Nonresident Military Spouses Residing in California -** The Military Spouses Residency Relief Act (MSRRA) (Public Law 111-97) exempts, as of January 1, 2009, personal service income and wages earned by taxpayers who reside with their military spouses from being taxed by a state other than the spouse's resident state. The couple must have relocated to another state under military orders for the income to be exempt from the nonresident state's taxes. They must also share the same "domicile" or true home outside the duty station state where they intend to return and locate permanently.

  Thus, a servicemember's spouse is considered a nonresident of California for tax purposes if the servicemember and spouse have the same legal residence or domicile outside of California, and the spouse is in California solely to be with the servicemember who is serving in compliance with military orders.

  This means that a qualified spouse's wages or other income received for services performed in California is not considered to be California source income and is not taxed by California. This income is not included in California taxable income, Schedule CA (540NR), column E, but it is included in total taxable income, Schedule CA (540NR), column D, to arrive at the applicable California tax rate.

  A servicemember's spouse who meets the MSRRA qualifications will be subject to California tax on income from real or tangible personal property located in California, as well as income from a trade or business located in California other than income for services performed for the trade or business by the servicemember's spouse.

  The nonmilitary income of military personnel is not exempt. States are prohibited from taxing any military pay of nonresident military personnel.

  <u>*Veterans Benefits and Transition Act of 2018*</u> – This legislation modifies the MSRRA rules to allow the spouse of a servicemember to make the election to use the same residence for purposes of taxation as the servicemember regardless of the date on which the marriage of the spouse and the servicemember occurred. This change also applies to California. Income of a servicemember's spouse for services performed in California is not subject to tax if the spouse elects to use the same residence as the servicemember who is a nonresident of California. If the spouse makes the election, write "VBTA" at the top of the tax return in RED INK, or include it according to your software's instructions. (FTB Pub 1032, rev. 02-19)

<u>*Filing Status CA Military and Nonresidents*</u> **-** Filing status for California must generally be the same as the filing status used on the federal income tax return. Exception: Married taxpayers who file a joint federal tax return may either file a joint return or separate returns if either spouse was:

- An active member of the U.S. Armed Forces or any auxiliary military branch during the tax year; or
- Was a nonresident for the entire year and had no income from California sources during the tax year.

However, if the taxpayers file a joint return and if either spouse was a nonresident during the tax year, the taxpayer must file Form 540NR, California Nonresident or Part-Year Resident Income Tax Return.

Native American Service Members **-** whose legal residence or domicile is a federal Indian reservation are treated as living on the federal Indian reservation. The military compensation is, therefore, treated as income earned from federal Indian reservation sources.

Professors/Teachers on Sabbatical **-** California residents who are professors and teachers remain California residents while on sabbatical. ***(Appeal of Mortimer and Catherine Chambers, 1987 SBE 001)***

Salespeople **-** Sales commissions earned by nonresident taxpayers will be sourced to California based on the ratio of sales in California to total sales everywhere. ***(Rev & Tax Code Sec 17954)***

$$\textbf{Ratio} = \frac{\textbf{Business transacted in CA}}{\textbf{Business transacted everywhere}}$$

Entertainers **-** Income and royalties earned by nonresident entertainers are sourced to California if the performance took place in California. Nonresident entertainers under contract to perform services both within and without California are taxed by California based on the percentage of services performed in California vs. services performed on the entire project. ***(CA Code of Reg 17951)***

The court upheld a nonresident taxpayer to include total time that the actor is "on-call" to be included in "duty days" (for time spent within CA) for actual filming of a project. ***(Newman v. FTB 208 Cal App 3d 972. (1989))***

$$\textbf{Ratio} = \frac{\textbf{Working Days in CA}}{\textbf{Working Days Everywhere}}$$

Withholding on Entertainers **-** California requires withholding at the rate of 7% of gross receipts when payments to an entertainer who is a nonresident of California exceed $1,500 in a calendar year. FTB is authorized to accept a lower rate of withholding if the taxpayer has a history of compliance (both filing and paying the tax due).

Athletes **-** Following special rules for entertainers, compensation paid to professional athletes who are nonresidents of California must be allocated to CA sources based on working days or the duty days formula, which has been upheld by the Board of Equalization. ***(Appeal of Carroll, Joseph 04/07/1987)***

The nonresident athlete's total salary is multiplied by the formula that total number of days the athlete works in CA bears to the total number of working days elsewhere.

In a case involving a nonresident professional football player his California income was based on working days spent in CA from the first practice day and running from the first regular season football game until any post-season playoff games. ***(Appeal of Michael D. and L. Joy Eischeid, SBE 10/6/76)***

Exception: Any signing bonuses that professional athletes receive for signing a contract are not considered to be for services rendered and not subject to the above formula. Nonresident athletes would report signing bonuses to their state of residence. Playing bonuses are considered to be compensation and subject to the working days formula. ***(Appeal of Garrison Hearst, et. Al., 2002 SBE 007)***

Professionals (Doctors, Lawyers and Accountants) - Fees received for services performed in CA are sourced to CA.

COMMUNITY PROPERTY

Separate returns - In California, community income or deductions must generally be split equally between the spouses. When spouses separate with no intention of resuming marital status, the income of each spouse during the period of separation is his or her separate property. Salaries and wages earned during marriage are community income.

Community Income - When a married couple files separate returns, each spouse is required to report all income from his or her separate property and one-half of any community income. Nonresident spouses follow the rules of their state of domicile to determine whether or not income is considered community income. A nonresident spouse that is domiciled in a separate property state would report his or her earnings as separate income.

COVENANT NOT TO COMPETE

There is a State Board of Equalization decision that a payment received in return for an agreement not to compete is taxable by California to the extent income had been earned in California. ***(Appeal of W.W. George, 2/3/1994)***

INSTALLMENT SALES

California taxes installment gains received by a nonresident from the sale of tangible and intangible property on a source basis. ***(FTB Pub 1100)***

- Real property - based upon where the property is located.
- Intangible property - generally sourced to the taxpayer's state of residence at the time of sale.

Nonresident - Installment payments received by a nonresident from the sale of CA property is taxable by California to the extent the income was from a California source. However, the interest earned by a nonresident on the installment sale note is not taxable by California.

> ***Example:*** *The taxpayer has always been a nonresident of California. In a prior year, the taxpayer sold a California rental property in an installment sale. During the tax year, the taxpayer received installment proceeds comprised of capital gain income and interest income. The capital gain income is taxable by California because the property was located in California. The interest income is not taxable by California and has a source in the taxpayer's state of residence.*

Change of Residency to California **-** If the taxpayer is a California resident who sold property located outside of California on an installment basis while a nonresident, the installment proceeds received while a California resident are taxable by California.

> ***Example - Change of Residency to CA:*** *In a prior year, while a nonresident of California, the taxpayer sold a Texas rental property in an installment sale. On May 15 of the current tax year, the taxpayer became a California resident and on August 1, the taxpayer received installment proceeds comprised of capital gain income and interest income. The taxpayer's capital gain income and interest income received on August 1 are taxable by California, because he was a California resident when he received the proceeds.*

Change of Residency from California **-** If the taxpayer is a former California resident, the installment sale proceeds received from the sale of a property located **outside** of California that was sold while a California resident are not taxable by California.

> ***Example – Change from resident to nonresident – sale of CA real property:*** *In March, while a California resident, the taxpayer sold a parcel of real property located in California in an installment sale. On June 1, the taxpayer became a Washington resident, and on August 1, the taxpayer received installment proceeds comprised of capital gain income and interest income. The capital gain income is taxable by California, because the property the taxpayer sold was located in California. The interest income, however, is not taxable by California, because the taxpayer was a nonresident of California when he received the proceeds.*

> ***Example – Change from resident to nonresident – sale of non-CA real property:*** *Same facts as in the prior example, except that the real property that was sold on the installment basis in March was located in Texas. None of the installment payment received on August 1 is taxable to California because the taxpayer is a nonresident when the payment is received and the property was not located in California.*

> ***Example – Change from resident to nonresident – sale of intangible property:*** *In a prior year, while a California resident, the taxpayer sold stock in an installment sale. On Feb 1 of the current year, the taxpayer became a Washington resident, and on May 1, she received installment proceeds consisting of capital gain income and interest income. California will tax the capital gain income, because the taxpayer was a resident when the stock was sold, but will not tax the interest income, because the taxpayer was a nonresident of California when she received the proceeds.*

INDIVIDUAL RETIREMENT ACCOUNTS

Nonresidents **-** California does not tax distributions from IRAs, Qualified Pension, Profit Sharing and Stock Bonus Plans of nonresidents.

Change of Residency to California – Prior to 2002 taxpayers who became residents received a stepped-up basis for annual contributions and earnings on retirement plans due to the fact they were nonresidents when the contributions were made. But since 2002 the law treats taxpayers as though they were residents for all prior years for all items of deferred income, which includes IRAs.

Taxpayers will be allowed a basis for contributions that were actually made, which would not have been allowed under California law had they been a resident.

California did not conform to federal law regarding IRA contributions from 1982 to 1986. During these years, California limited the deduction to 15% of compensation or $1,500, not the federal amounts of 20% or $2,000. For tax years 2007 through 2009, California did not conform to the higher federal phaseout amounts that became effective as of 2007. However, beginning with 2010, California does conform to the federal phaseout amounts.

Historical Limitations: We have provided a table summarizing the various limitations, changes and differences between Federal and California law since the inception of the Traditional IRA. For Federal tax purposes, a basis in an IRA could not be possible until the advent of the nondeductible IRA in 1987. However, because of the delayed conformity to Federal rules and different limitations, a California basis could have been established as early as 1975. **See basis chart in IRA chapter 04.05.**

ROTH IRA

California conforms to the Federal Roth IRA rules, including the phaseout amounts. Thus, for California purposes, taxpayers may use the same elections for state purposes as they use on their Federal returns.

STOCK OPTIONS - See Chapter 2.06 for CA Treatment of Stock Options

DEFERRED GAINS AND LOSSES (Like-kind exchanges IRC 1031)

A gain or loss from the sale or exchange of real or tangible personal property located in California is sourced to California at the time the gain or loss is realized. The TCJA limited the type of property eligible for tax deferral under IRC Sec 1031 to real property only, effective for exchanges after 2017. This TCJA provision was adopted by California in AB 91 (signed by the governor 6/27/2019), with two significant differences: the provision only applies to taxpayers with AGI of $500,000 or more ($250,000 for those filing single or married separate) and only applies to exchanges completed after January 10, 2019.

Nonresident - California property - If a taxpayer is a nonresident and exchanges real or tangible property located within California for real or tangible property located outside California, the realized gain or loss will be sourced to California. Tax will not be imposed until the gain or loss is recognized.

> ***Example:*** *As a resident of Texas, Mr. Round Tax exchanged a condominium located in California for like-kind property located in Texas. Mr. Round Tax realized a gain of $15,000 on the exchange that was properly deferred under IRC section 1031. He then sold the Texas property in a non-deferred transaction three years later and recognized a gain of $20,000.* ***Determination:*** *The $15,000 deferred gain (the lesser of the deferred gain or the gain recognized at the time he disposed of the Texas property) has a source in California and is taxable by California.*

Nonresident – Out-of-State Property - If a taxpayer exchanges real or tangible property located outside California for real or tangible property located within California, the gain recognized when the California property is sold or otherwise disposed of in a non-deferred transaction has a California source and is taxable by California.

> ***Example****: As a resident of Nevada, in 2018 the taxpayer exchanged Nevada business property for like-kind California business property. The taxpayer realized a $10,000 gain on the exchange that was properly deferred under IRC section 1031. A few years later, and while still a Nevada resident, he sold the California business property in a non-deferred transaction and recognized a gain of $50,000.* ***Determination:*** *Because the property is located in California, the $50,000 gain has a California source and is taxable by California.*

Sec 1031 Annual Reporting Requirement for Some 1031 Exchanges **-** Beginning with Sec. 1031 exchanges occurring on or after January 1, 2014, taxpayers who exchange California real property for like-kind property located out of state will be required to file an information return with the FTB for the sale year and each subsequent year the gain is deferred. (New R&TC §§18032, 24953 added by AB 92) See also chapter 3.20.

GAINS AND LOSSES FROM THE SALE OF TRADE OR BUSINESS PROPERTY

When taxpayers sell property used in a trade or business or certain involuntary conversions (IRC section 1231 property), losses are netted against gains. If section 1231 losses exceed section 1231 gains, the losses receive ordinary tax treatment. If section 1231 gains exceed section 1231 losses, the gains receive capital gain tax treatment. Section 1231 gains and losses retain this characterization regardless of whether the taxpayer changes their residency status. ***For purposes of computing California taxable income, net only California source section 1231 gains and losses.***

> ***Example – Sale of Trade or Business -*** *The taxpayer is a resident of Washington. His California and non-California source section 1231 gains and losses for the year included a $3,000 California gain, a $2,000 California loss, a $4,000 Washington gain and a $5,000 Washington loss. Based upon the netting of the taxpayer's total and California source section 1231 gains and losses, determine his capital gain or ordinary loss as follows:*

	Total taxable	***CA taxable income***
CA section 1231 gain	*$ 3,000*	*$ 3,000*
CA section 1231 loss	*<2,000>*	*<2,000>*
WA section 1231 gain	*4,000*	
WA section 1231 loss	*<5,000>*	
Capital gain	*$ 0*	*$1,000*

CAPITAL GAINS AND LOSSES

Always a Nonresident **-** If the taxpayer is always a nonresident of California, capital loss carryovers and capital loss limitations are based only upon California source income and loss items in order to compute California taxable income.

Change of Residency to California **-** If a taxpayer had capital loss carryovers and was a nonresident of California in prior years, the capital loss carryovers need to be restated as if the taxpayer had been a California resident for all prior years.

Change of Residency from California **-** If a taxpayer had capital loss carryovers from sales while a California resident, and then becomes a nonresident of California, the capital loss carryovers need to be restated as if the taxpayer had been a nonresident for all prior years.

Part-Year Resident **-** If a taxpayer changes residence during the year, they must compute income and deductions using resident rules for the period of the year they were a California resident and nonresident rules for the period of the year they were a nonresident. Compute any prior year carryover loss as if they were a California resident for all prior years and as if they were a nonresident for all prior years. Prorate both capital loss carryover amounts based upon the periods of California residency and nonresidency during the year.

PASSIVE ACTIVITIES

The laws provide rules for determining the amounts of allowed passive activity losses and suspended losses if taxpayers are nonresidents of California or if they change residency status.

Always a Nonresident **-** If the taxpayer has always been a nonresident, the allowed passive activity losses and suspended losses are determined based only upon California source passive income and loss items to compute California taxable income. Only California source passive losses carry forward into the following year.

Change of Residency to California **-** If a taxpayer had suspended passive losses and was a nonresident in prior years, the suspended losses need to be restated as if they were a California resident for all prior years.

Change of Residency from California **-** If a taxpayer had suspended passive losses and becomes a nonresident of California, the suspended losses need to be restated as if they were a nonresident for all prior years.

Part-Year Resident **-** Compute income and deductions using resident rules for the period of the year they were a California resident and nonresident rules for the period of the year they were a nonresident. Compute any suspended passive activity losses as if they were a California resident for all prior years and as if they were a nonresident for all prior years. Prorate both suspended passive loss amounts based upon the periods of California residency and nonresidency during the year.

NET OPERATING LOSSES

The taxpayer's net operating loss (NOL) deduction is not limited by the amount of NOL from all sources if taxpayers are nonresidents or part-year residents of California. The California NOL was suspended for the 2002 and 2003 taxable years; for taxable years 2008 and 2009, except for "small businesses" with net business income of less than $500,000; and for taxable years 2010 and 2011, except for taxpayers with modified AGI less than $300,000 or with disaster loss carryovers. See Chapter 3.16 for additional details.

Always a Nonresident **-** The taxpayer is allowed a net operating loss deduction carryover for California taxable income based upon California sourced income and deductions, regardless of whether they have an NOL in computing taxable income.

Change of Residency to California **-** If the taxpayer had NOL carryovers and was a nonresident of California in prior years, the NOL carryovers need to be restated as if they had been a California resident for all prior years.

Change of Residency from California **-** If the taxpayer had NOL carryovers and became a nonresident of California in prior years, their NOL carryovers need to be restated as if they had been a nonresident for all prior years.

Part-Year Resident **-** If the taxpayer changes residency during the tax year, the NOL deduction is computed using resident rules for the period of the year they were a resident and nonresident rules for the period of the year they were not a resident. Compute any NOL carryovers as if they were a California resident for all prior years and as if they were a nonresident for all prior years. Prorate both NOL carryover amounts based upon the period of California residency and the period of nonresidency during the year.

BASIS IN PASS-THROUGH ENTITIES

Pass-though entities include partnerships, S corporations and limited liability companies that elect to be treated as partnerships.

Always a Nonresident **-** The taxpayer's basis in a pass-through entity for California purposes is equal to their contributions to capital, adjusted by California sourced items only.

Change of Residency to California **–** A taxpayer's basis in a pass-through entity needs to be restated under California law as if they had been a California resident for all prior years. Basis is adjusted for their share of flow-through items, regardless of source, during their period of nonresidency.

Change of Residency from California **-** If the taxpayer becomes a nonresident of California, their basis in a pass-through entity needs to be restated as if they had been a nonresident of California for all prior years.

PARTNERSHIPS, S CORPORATIONS AND CERTAIN TRUSTS

Nonresident - Generally, California taxes taxpayers' distributive share of partnership, s-corporations and trust income derived from California sources if taxpayers are nonresidents of California.

***Example**: The taxpayer is a nonresident of California and holds a partnership interest in a California partnership. He received a Schedule K-1 from the California partnership that included net income of $10,000 from California sources. **Determination:** His $10,000 distributive share of partnership net income has a source in California and is taxable by California.*

<u>*Part-Year Resident*</u> **-** If a taxpayer changes their residency during the year, California taxes distributive shares of partnership, S Corp and certain trust income based upon the period of California residency and the period of nonresidency during the partnership's, S corp's or simple trust's (distributes income annually) taxable year.

Under **Legal Ruling 2003-1**, items of income and deductions are treated as though they were received ratably over the year and allocated according to the ratio of the amount of time the taxpayer was a resident and nonresident of California. Under this ruling, the allocation of income between the period of residency and nonresidency must be made in a manner that reflects the actual date of realization using a daily pro rata method unless the taxpayer has actual dates when income was realized by the entity.

***Example – Allocating Partnership Income**: Jim was a resident of Arizona until September 15 when he became a California resident. He has a 50% interest in the J&B Partnership that has a December 31 year-end. The partnership conducts business within and outside California. Jim's Schedule K-1 (565) from the partnership shows that he has $10,000 of taxable income from all sources, $5,000 of which is sourced to CA.*

Jim was a California nonresident for 257 days of the partnership's tax year and a resident for 108 days. He will include in California taxable income for the year, $6,480 of income from J&B, computed as follows:

- *Nonresident period: 257/365 X $ 5,000 = $3,521*
- *Resident period: 108/365 X $10,000 = $2,959*

<u>ALTERNATIVE MINIMUM TAX</u>

<u>*Nonresident & Part-year Resident*</u> - The AMT computation for nonresidents and part-year residents is parallel to the regular tax computation. The California AMT of a nonresident or part-year resident is the amount by which the California tentative minimum tax exceeds the prorated regular tax.

CA AMT = CA Tentative Minimum Tax – Prorated Regular Tax

$$\text{CA Tentative Min Tax} = \frac{\text{TTMT}}{\text{TAMTI}} \times \text{CAMTI}$$

Where:

- <u>**CAMTI (CA Alternative Minimum Taxable Income)**</u> - is the combined total of the following:
  - The **AMTI** derived from California sources for any part of the year the taxpayer was a nonresident. For the period of nonresidency, any carryovers, deferred income, suspended losses, or suspended deductions are included or allowable only to the extent they were derived from California sources.
  - The **AMTI** from all sources for any part of the taxable year the taxpayer was a resident.

- <u>**TAMTI (Total Alternative Minimum Taxable Income)**</u> **-** is the **AMTI** determined as if the nonresident or part-year resident were a California resident in both of the following:
  - Current year
  - All prior years for any carryovers, deferred income, suspended losses or suspended deductions.

- <u>**TTMT (Total Tentative Minimum Tax)**</u> **-** is the tax on the total alternative minimum tax income (TAMTI).

***Example**: Mr. Round Tax and his spouse moved to California and became residents on May 1. Combined wages for the year totaled $170,000. He received $100,000 after his move to California. On October 1 of the same year, he exercised an incentive stock option valued at $90,000, for which he paid $10,000 (preference amount $80,000). His total taxable income for the year was $150,000, with $20,000 in itemized deductions. Five thousand dollars ($5,000) of the itemized deductions were real and personal property taxes, which are preference items. The prorated regular tax was $6,000.*

Less: Prorated regular tax . . . . - 6,000
California alternative minimum tax ***1,039***

GROUP NONRESIDENT RETURNS

A business entity, acting as an authorized agent, may choose to file a group nonresident return for certain nonresidents. To participate, nonresidents must receive distributive shares of income from business entities that derive income from CA sources, or that are doing business in California. The business entity pays tax on behalf of the nonresident taxpayers who elect to file a group return.

A group nonresident return is really a group of individual returns that meets the CA individual income tax return filing requirement. A qualified nonresident individual who elects to be included in the group nonresident return is not required to file a separate income tax return for the same tax year. Group nonresident returns may include less than two nonresident individuals. *(FTB Pub. 1067)*

If your clients filed as part of a group nonresident return, there are complex rules and requirements that often result in special handling. To expedite processing of these returns, follow these rules:

1. **Taxpayers where California taxable income exceeds $1 million.**
   These individuals are subject to an extra 1% Mental Health Services Tax. Even so, nonresident individuals with more than $1 million of California taxable income are eligible to be included in group nonresident returns. However, these individuals are subject to an additional 1% on their *entire* California taxable income when included in the group return. If each of these individuals filed their own return, only their taxable income in *excess* of $1 million is subject to the 1% surtax. So, these individuals should be made aware of this difference when making the election, which is irrevocable, to be included in the group return.
2. **Must use a calendar year for the group nonresident return, even if the business has a fiscal year end.** Any estimated tax payments must be made on a calendar-year basis.
3. **Use FTB 540-ES to make estimated tax payments for the group nonresident return.**
   Estimate payments made for a nonresident group return must be made on FTB Form 540-ES. Please see the example in FTB Pub. 1067 for detailed instructions on how to complete the estimate voucher.
4. **Use FTB Long Form 540NR - attach Schedule 1067A and signed FTB Form 3864.**
   The California Nonresident or Part-Year Resident Income Tax Return (Long Form 540NR) is required for filing a nonresident group return. The following FTB forms must be attached to the return:
   - Schedule 1067A Nonresident Group Return Schedule
   - Form 3864 Group Nonresident Return Election

   An authorized general partner, member-manager, corporate officer, or an attorney-in-fact **must sign** FTB Form 3864. A new election form must be signed and attached each year.

5. **Include only individuals in the group nonresident return.**
   Only individuals, not Partnerships, LLCs, C corporations, S corporations, Estates, or Trusts, are eligible to use a group return. There is an exception to this - grantor trusts, described under IRC Section 675-677, and not recognized as a separate taxable entity for income tax purposes.

   In addition, the individuals must be full-year nonresidents of California, and the only California source income must be from the business entity.
6. **Election to be included in the group nonresident return is irrevocable.**
   Make sure you tell your clients that once a group return is filed, it cannot be amended to either include or exclude a nonresident individual.
7. **Income is taxed at the highest marginal rate.**
   The income reported on a group nonresident return is taxed at the highest marginal rate, currently 12.3%.
8. **Moving estimated payments**
   Use Schedule 1067B to authorize FTB to move estimated tax payments from either the group to the individual's account, or the individual's account to the group.
9. FTB Pub. 1067 contains information regarding the Group Nonresident Returns.

<u>LLCs and FTB 3832</u>

When a multiple member LLC has one or more members who are nonresidents of California, taxpayers must use Form FTB 3832. The form lists the following information:

- The names and social security numbers or federal employer identification numbers (FEIN) of all such members; and
- The signatures of each nonresident member evidencing consent to the jurisdiction of the State of California to tax that member's distributive share of income attributable to California sources.

If an LLC member fails to sign a Form FTB 3832, the LLC is required to pay tax on the member's distributive share of income at the highest marginal rate (currently 12.3%). The tax paid by the LLC will be considered a payment made by the member (*Revenue & Taxation Code Sec 18633.5*). See FTB Form 568.

If the nonresident member has a spouse, the spouse must also sign Form FTB 3832.

When to File FTB 3832
- Filed for the first taxable period for which the LLC became subject to tax with nonresident members; or
- Filed for any taxable period during which the LLC had a nonresident member who has not signed FTB 3832.

Nonresidents Who Must File a California Return

Nonresident members (individuals, estates, trusts, corporations, etc.) are required to file the appropriate California tax returns, in addition to the Form FTB 3832. An individual nonresident must file a California nonresident or part-year resident return if the individual had income from California sources and meets California gross income and adjusted gross income filing requirements. See FTB Form 540NR for additional information.

Group Nonresident Member Return

Certain nonresident members of entities doing business in California may elect to file a group nonresident return using Form 540NR (Long). A group nonresident (composite) return may be filed by:

1. A business entity, acting as the authorized agent for its electing nonresident individual shareholders/partners/members, to report the distributive shares of income from the business entity (LLC, S-Corporation or Partnership) derived from California sources or from doing business in California. See Revenue and Taxation Code (R&TC) Section 18535.
2. A corporation, acting as the authorized agent for its electing nonresident directors, to report the directors' wages, salaries, fees, or other compensation from that corporation for director services performed in California, including attendance of board of directors' meetings in California. See R&TC Section 18536.

The business entity/corporation files the return and pays the tax on behalf of the electing nonresident individuals. A group nonresident return is considered a group of individual returns that meets the California individual income tax return filing requirement. Thus, a qualified nonresident individual who elects to be included in the group nonresident return does not file a separate personal income tax return for the tax year. The election is made on a yearly basis and once made is irrevocable for that year.

A group nonresident return is available to one or more nonresident individuals, and the income will be taxed at the highest CA marginal rate. For more information, see FTB Pub. 1067.

STATE/FEDERAL COMPENSATION ISSUES

This chapter deals with issues associated with employee compensation.

- **Maximum FICA Wage** (2019): 132,900
- **FICA Tax Rate** (2019): 6.2%
- **Maximum FICA Tax** (2019): 8,239.80
- **Medicare (HI) Rate** (2019): 1.45% - No cap
- **Additional HI Tax High Income Taxpayers**: 0.9%
- **Monthly Parking Exclusion** (2019): $265
- **Monthly Transit Pass** (2019)**:** $265
- **Monthly Vanpooling Exclusion** (2019)**:** $265
- **CA SDI Rate** 2019: 1.0%
- **CA SDI Max Wage** 2019: $118,371
- **CA SDI Max Tax** 2019: $1,183.71

RAPID FINDER

SOCIAL SECURITY & MEDICARE TAX WITHHOLDING:

If, due to having multiple employers, a taxpayer pays more than the annual maximum Social Security (FICA) tax, the amount in excess of the maximum for the year is refundable on the taxpayer's 1040. Medicare (Hospital Insurance) tax has no maximum and therefore never results in an overpayment. *Also see Chapter 8.03 on self-employment tax.*

BACK PAY & FICA:

The U.S. Supreme Court has held that back wages are subject to FICA and FUTA taxes for the year in which the wages are in fact paid, and not in the earlier year for which the wages are paid. *U.S. v. Cleveland Indians Baseball Co., (S Ct, 4/17/2001) 87 AFTR2d ¶ 2001-798.*

DIFFERENTIAL PAY NOT SUBJECT TO FICA:

Revenue Ruling 2009-11 (IRB 2009-18) provides that differential pay that employers pay to their employees that leave their job to go on active military duty is subject to income tax withholding, but is not subject to Federal Insurance Contributions Act ("FICA") or Federal Unemployment Tax Act ("FUTA") taxes. Additionally, the ruling provides that employers may use the aggregate procedure or optional flat rate withholding to calculate the amount of income taxes required to be withheld on these payments, and that these payments must be reported on Form W-2.

Historical Table - FICA Rates

Year	FICA Max Wage	FICA Rate	FICA Max Tax	HI Rate
2012	110,100	4.20	4,624.40	1.45
2013	110,100	6.20	7,049.40	1.45
2014	117,000	6.20	7,254.00	1.45
2015	118,500	6.20	7,347.00	1.45
2016	118,500	6.20	7,347.00	1.45
2017	127,200	6.20	7,886.40	1.45
2018	128,400	6.20	7,960.80	1.45
2019	132,900	6.20	8,239.80	1.45
2020		6.20		1.45

SSA Estimated Future Wage Base

The SSA provides three kinds of forecasts for Social Security wage bases (low, intermediate and high cost). The SSA intermediate forecasts through 2028 are as follows:

2020 – $136,800
2021 – $142,200
2022 – $149,100
2023 – $155,700
2024 – $162,300
2025 – $168,900
2026 – $175,800
2027 – $183,300
2028 – $191,100

Source: 2019 Annual Report of the Board of Trustees of the Federal Old-Age & Survivors Insurance & Federal Disability Insurance Trust Funds, Table V-C1, page 115

FICA Rates for other years are available at:
https://www.ssa.gov/oact/progdata/taxRates.html

WITHHOLDING COMPLIANCE:

The IRS advised employers they are not required to routinely submit to the IRS Forms W-4, Employee's Withholding Allowance Certificate, when employees claim complete exemption from withholding or claim a large number of allowances. However, the IRS may require employers to submit Forms W-4 in certain circumstances. (*IR 2005-45, 04/13/2005, IRC Sec(s). 3402*)

STUDENT FICA EXCEPTION:

The IRS has provided safe harbor guidelines for determining whether or not services performed by employees of certain institutions of higher education are eligible for the student exception from the Federal Insurance Contribution Act (FICA). (TDNR JS-2165; Rev. Proc. 2005-11)

The student exception to FICA applies with respect to services performed by a half-time undergraduate, graduate or professional student for an institution of higher education. An institution of higher education is defined as a public or private nonprofit school, college or university (SCU), or affiliated private foundations under Code Sec. 509(a)(3).

The "safe harbor" generally does not apply to full-time employees or employees that qualify for pension or employee benefit programs. Notwithstanding, an employee will not be ineligible under this safe harbor if receipt of employment benefits is mandated by state or local law.

The safe harbor also does not apply to post-doctoral students and fellows, medical residents, or medical interns. Services performed by these employees cannot be assumed to be incident to and for the course of study.

These standards, however, do not constitute the exclusive method for determining whether or not the student exception to FICA applies. Where the safe harbor does not apply, qualification for the student exception to FICA for services performed for a SCU is determined based on all the facts and circumstances.

Medical Residents and FICA Exemption - The Supreme Court handed down a unanimous decision in January 2011, ruling that Reg. § 31.3121(b)(10)-2(d(e)(iii) was valid, thus permitting the IRS to classify medical residents who worked over 40 hours per week as employees who are ineligible for the student FICA exemption and subject to FICA taxes ***(Mayo Foundation for Medical Education and Research, SCt, Jan. 12, 2011)***.

COMPENSATION VS. GIFT:

Under federal law, outright gifts aren't included in income. However, when received from someone who is also paying for services or who is receiving services without paying adequately for them, the "gifts" may be deemed compensation. To decide whether or not an item received is a gift or compensation, look at the payer's intent. If the payer takes no deduction for an amount on his/her own return, it is evidence that the amount paid is considered to be a gift (and vice versa).

SEVERANCE PAY AND FICA:

The Supreme Court, in U.S. v. Quality Stores, Inc., et al, (Sup Ct 03/25/2014), and reversing the Sixth Circuit Court of Appeals, has held that severance payments that were made to involuntarily terminated employees and that weren't tied to the receipt of State unemployment insurance, are subject to FICA taxes.

In Announcement 2015-8, the IRS announced it will disallow all claims for refund of FICA or Railroad Retirement Tax Act (RRTA) taxes paid with respect to severance payments that do not satisfy the narrow exclusion contained in Rev Rul 90-72, and will take no further action on appeal requests that were suspended pending the resolution of *Quality Stores.* This will allow the IRS to disallow more than 2,400 refund claims from companies and their ex-employees.

PAYROLL AGGREGATING: The Federal Circuit, affirming the Court of Federal Claims, has held that for purposes of calculating the FICA contribution and benefit wage base and the FUTA wage base, a payroll service company couldn't aggregate wages paid to workers who performed services during the year for several of its clients (Cencast Services L.P., (CA-FC 9/10/2013) 112 AFTR)

ELECTION WORKER COMPENSATION:

State and local governments hire individuals to work temporarily to perform services at polling places during primary and general elections. An individual so engaged is most often referred to as an election worker, but may also be known as an absentee ballot counter, ballot clerk, checker, deputy head moderator, machine tender, moderator, poll worker, polling place manager, or voting official. Compensation paid to these individuals, including for attendance at training or meetings related to the election, is includible as wage income and may or may not be subject to withholding for Social Security and Medicare (FICA) taxes. If these workers are reimbursed for mileage or other expenses, the reimbursement may be excludable from wages if it is made under an accountable plan.

Income tax is not required to be withheld from compensation paid to election workers but an employer and employee may agree to voluntary withholding from wages paid for the election services. FICA withholding is only required if the election worker's compensation is greater than $1,800 (2019), unless the worker is covered under a "Section 218 Agreement." A Section 218 agreement is a voluntary agreement between the Social Security Administration and a state government to provide Social Security and Medicare coverage for the state and local government employees. In some cases election workers are excluded from the Sec 218 Agreement and in other cases a threshold lower than $1,800 (2019) applies. If the election worker's compensation is $600 or more, or if less than $600 but FICA or income tax was withheld, the employing government is required to issue a Form W-2. When an election worker is also employed by the governmental entity in another capacity, separate W-2s may be issued for the two types of payments.

For more information on this topic, please see the IRS web site at: https://www.irs.gov/government-entities/federal-state-local-governments/election-workers-reporting-and-withholding.

EXCLUDABLE EMPLOYEE FRINGE BENEFITS:

Group Term Life Insurance - The first $50,000 of group term life insurance (GTLI) coverage provided by an employer is excluded from taxable income. The employer-paid cost of group term coverage in excess of $50,000 is taxable income to the taxpayer even if they never receive it (i.e., it is "phantom income"). If two or more employers provide GTLI coverage totaling more than $50,000, the wages reported on the W-2 forms will not be correct, and the taxable amount of GTLI coverage must be recalculated (see table below). Subtract any amount reported as Code C in Box 12 of the W-2 forms from the recalculated amount of GTLI cost, and then add the result to wages reported on the return.

Strategy - Group Life Policy – The first $50,000 of group term life insurance coverage provided by an employer is a tax-free fringe benefit that does not add anything to the employee's overall tax bill. But the cost of employer-paid group term coverage in excess of $50,000 is treated as taxable income and added to the W-2. What's worse, the cost of that insurance coverage is based on an IRS table that is frequently higher than the employer is actually paying for the insurance, which creates phantom income.

Cost of $1,000 of Protection per Month			
Age Bracket	**Cost**	**Age Bracket**	**Cost**
Under 25	$0.05	50-54	.23
25-29	0.06	55-59	.43
30-34	0.08	60-64	.66
35-39	0.09	65-69	1.27
40-44	0.10	70 Plus	2.06
45-49	0.15		

For older employees, the after-tax cost of the additional coverage frequently exceeds the cost for an individual term policy. It may be appropriate for certain employees to only utilize the first $50,000 in coverage and acquire an individual policy for any additional needed coverage.

IRS Regulation §1.79-3(d)(2) provides the table shown above to be used for figuring the cost of group term life insurance. These amounts have been in effect since July 1, 1999.

Exclusion for Qualified Employee Discounts - The amount of an employee discount on qualified property or services provided by an employer is excludable from the employee's income. The exclusion is limited to: (1) for property, the employer's gross profit percentage, and (2) for services, 20% of the price at which the employer sells the services to non-employee customers. Qualified property or services are property or services offered for sale to non-employee customers in the ordinary course of a line of business of the employer. For the exclusion to apply, the employee must provide substantial services in the line of business of the employer in which the employer offers the property or services in question to non-employee customers. The exclusion does not apply to highly compensated employees if the qualified employee discounts are available on a discriminatory basis.

Qualified transportation fringe exclusion **-** The amount an employee receives, as a fringe benefit must be included in income, based on its fair market value. But any fringe benefit that qualifies as a "qualified transportation fringe" is excluded from income up to the amount of the dollar limitation.

The amount of "qualified transportation fringe" that may be excluded is subject to certain dollar limitations. The amount of the limit depends on the type of benefits provided. The maximum amount of the monthly exclusion, adjusted for changes in the cost of living is shown in the table. Qualified transportation fringe exclusions include transit passes and transportation in a commuter highway vehicle (van pool), if in connection with travel between the employee's residence and place of employment.

A commuter highway vehicle has a seating capacity of 6 adults (excluding the driver) for which 80% of the mileage must be reasonably expected to be for employee commuting and to be for trips where the vehicle is half full (excluding the driver).

Qualified Monthly Transportation Fringes Maximum Monthly Exclusion Amounts			
Tax Year	Qualified Parking	Transit Passes, Commuter Transportation	Bicycle Commuting
2020	270	270	-0-
2019	265	265	-0-
2018	260	260	-0-
2017	255	255	20
2016	255	255	20
2015	250	250	20
2014	250	250	20
2013	245	245	20

If amounts not shown, they were not available at publication date

CAUTION: TCJA made the following changes for years after 2017.

TCJA

1. Bicycle commuting expense reimbursement is no longer treated as a nontaxable fringe benefit, through 2025.
2. Parking and mass transit reimbursement is still excluded by employees through 2025.
3. After 2017 employers can no longer deduct the amounts reimbursed for parking or mass transit. No deduction is permitted for reimbursing the employee for commuting expenses, except as necessary for ensuring the safety of an employee.

Value of clothing NOT exempt from taxation under de minimis fringe benefit rule – The IRS had previously issued a private letter ruling (PLR 201005014) that allowed employees to exclude the value of employer-provided clothing and related accessories from their taxable income as a de minimis fringe benefit. However, the IRS subsequently determined that based on the variations related to the acquisition and distribution of the clothing and other items that it could not conclude that the items were eligible to be de minimis fringe benefits. Therefore, the IRS revoked that exemption in PLR 201135022 (but did not make the revocation retroactive).

Health FSA Limit - Health FSAs are benefit plans established by employers to reimburse employees for health care expenses, such as deductibles and co-payments, and are usually funded by employees through salary reduction agreements. Sometimes employers may contribute as well. Qualifying contributions to and withdrawals from FSAs are tax-exempt.

Under a change included in the Affordable Care Act in order for a health FSA to be a qualified benefit under a cafeteria plan, the maximum salary reduction contribution an employee may make cannot exceed $2,500, indexed for cost-of-living adjustments as shown in the table below. The health FSA cap doesn't limit the amount permitted under other employer-provided coverage, such as an FSA for dependent care assistance (Notice 2012-40)

HEALTH FSA CONTRIBUTION LIMITS					
2015	**2016**	**2017**	**2018**	**2019**	**2020**
2,550	2,550	2,600	2,650	2,700	2,750

If amounts not shown, they were not available at publication date

<u>UNEMPLOYMENT BENEFITS</u>:

Although some states don't tax unemployment compensation, it is taxable income for Federal purposes.

<u>GOVERNMENT-FUNDED PAID FAMILY LEAVE</u>

Paid family leave (PFL) is a form of compensation paid to eligible individuals who are unable to work because they are caring for a seriously ill or injured family member, or bonding with a minor child within one year of the birth or placement of the child in connection with foster care or adoption.

Payments are a form of unemployment (Sec. 85) and reported on a 1099-G. For federal purposes, unemployment is taxable income to the extent it exceeds any basis the recipient might have in the payments (see later). For state purposes the PFL may or may not be taxable based upon a particular state's treatment of unemployment benefits. The Tax Foundation provides an overview of state taxation: https://taxfoundation.org/state-taxation-unemployment-benefits/

Generally PFL programs are funded through payroll taxes levied by the state. In IRS Chief Counsel Advice CCA 200630017 the IRS held that amounts mandatorily withheld by a state government from an employee's payroll under the PFL program are taxes, under Sec 164(a)(3), and a taxpayer who itemizes his or her deductions can deduct the amounts withheld as taxes (Note: Payments to a private plan would not be tax deductible but would form a basis as discussed below).

In that same CCA, the IRS noted that provisions of Regulation 1.85-1(b)(1)(iii) apply to those who do not itemize their deductions. Thus where taxpayers were unable to deduct the family temporary disability insurance contributions as an itemized deduction, they established a basis and PFL income can be reduced by the accumulated basis. Regulation 1.85-1(b)(1)(iii) actually says "which is not deductible by the employee"; thus taxpayers subject to AMT would also not be able to deduct the payments as taxes and therefore basis is also created.

As an aside, Regulation 1.85-1(b)(1)(iii) applies both to unemployment compensation taxes and temporary disability insurance contributions, but separately. The instructions for the 1099-G specifically require unemployment and PFL to be reported on separate 1099-Gs.

EMPLOYER-FUNDED PAID FAMILY LEAVE

TCJA

TCJA of 2017 provides a 2-year credit for employers who provide paid family and medical leave. However, the leave pay would be fully taxable to the employee. For details of that program see chapter 9.17.

RESIDENT APARTMENT MANAGER TAX ISSUES

Landlords will often hire a resident manager to handle the day-to-day tasks of running an apartment building. In some locales and depending upon the number of units in the apartment complex, resident managers are required. For example, in California, resident managers are required where there are 16 or more units, while the requirement applies for 9 units in NY City.

The managers may be compensated for their services, provided reduced or free rent, or a combination of both. The tax implications to the landlord and resident manager are:

Resident Manager – If the resident manager is compensated monetarily, they are treated as an employee and as such are subject to payroll withholding, and FICA. If they are provided reduced or free rent, that reduction is not included in taxable income (Reg. Sec. 1.119-1(b)) if:

1. The lodging is at the landlord's rental property,
2. The lodging is furnished for the convenience of the landlord, and
3. The manager is required, as a condition of employment, to live in the apartment building. (Code Sec 119 – Meals or lodging furnished for the convenience of the employer)

If the above conditions are **NOT** met, the rental FMV is taxable income to the manager reported on a W-2 by the landlord or other employer (Letter Ruling 9404005).

From Pub 15-B, pg 17 (2019):

> ***Example of nonqualifying lodging -*** *A hospital gives Joan, an employee of the hospital, the choice of living at the hospital free of charge or living elsewhere and receiving a cash allowance in addition to her regular salary. If Joan chooses to live at the hospital, the hospital can't exclude the value of the lodging from her wages because she isn't required to live at the hospital to properly perform the duties of her employment.*

Landlord **-** If the resident manager is compensated monetarily, then the manager is a W-2 employee of the landlord and subject to the normal W-2 withholding and reporting requirements. Where the landlord reduces or provides free rent, whether or not also compensating the manager monetarily, and the three conditions listed under resident manager are met, the landlord has no reporting requirements regarding the free rent and no deduction for the free rent since the lack of the rental income constitutes his adjustment for the lost rental income.

TAXABLE VALUE OF NONCASH PRIZES

Every so often tax practitioners will encounter a client who has won a noncash prize or vacation trip from a game show or won a car or even a house from the purchase of a charity raffle ticket. Whatever the noncash prize or the source of the prize, one thing is for certain, the winner must pay taxes on the fair market value (FMV) of the prize (Reg. Sec. 1.74-1(a)(2)).

This is where things get complicated. The definition of FMV that has been adopted by tax courts for general income tax purposes is *"the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts."*

Where the prize value is $600 or more and no services were performed, the FMV of the prize is reported in box 3 of Form 1099-MISC (2019 1099-MISC Instructions, Pg. 5). Since the awarding entity has no way of determining what a willing buyer might pay a willing seller, they quite often use the manufacturer's suggested retail price of the item or some other means of determining the amount they enter in Box 3, which may not be the true measure of FMV.

Thus, the amount in box 3 is disputable if it can be reasonably established and documented that the FMV is different. Tax courts have frequently taken special factors into consideration in determining the fair market value of awards and prizes.

It is understandable that a prizewinner may not be able to resell the prize for as much as the awarding entity valued it. The Tax Court says in this situation, resale value, not cost, determines the amount of income reportable by the taxpayer (McCoy, Lawrence W, (1962) 38 TC 841, acq 1963-2 CB 5).

Where a taxpayer argued a trip prize was not worth the retail price to him, the court agreed (Turner, Reginald (1954) TC Memo 1954-38). In another case the court reduced the retail price to the discounted price the awarding entity paid for the trip (Wade, Nathan, (1988) TC Memo 1988-118). In the latter case, the court wrote: "In valuing taxable prizes and awards for Federal income tax purposes, courts do not always adopt the same methodology. In some situations, the retail value of prizes and awards is used. In other situations, a wholesale or other discounted value is used. Objective factors are emphasized, but subjective factors also are given weight in determining the value of prizes and awards to particular taxpayers."

For some items a retail advertisement for the item around the time the prize was won could help to determine FMV. If someone is lucky enough to buy the winning ticket for a high-value item such as a home, it might be appropriate to obtain a certified appraisal.

WORKERS' COMPENSATION

Amounts received under a workers' compensation act or similar law for personal injuries or sickness are excludable from the employee's (or survivor's) income. This rule doesn't apply to the extent payments are determined by reference to the employee's age or length of service or his prior contributions, even if his retirement is occasioned by occupational injury. (Reg § 1.104-1(b))

Workers' compensation is includible in income to the extent it's attributable to medical expense deductions taken in an earlier year. (Code Sec. 104(a)(1); Reg § 1.104-1(b)).

Legal costs are only deductible for the production or protection of taxable income. If the settlement is not taxable, then the legal expenses are not deductible. ***Caution***: The TCJA of 2017 suspended the tier 2 miscellaneous itemized deductions for years 2018 through 2025, so even if a settlement is taxable in those years, the legal expenses aren't deductible. The exception that permits an above-the-line deduction for legal fees and associated expenses related to certain unlawful discrimination awards is unaffected by the TCJA provision.

SICK PAY

The taxability of sick pay depends upon whether the taxpayer paid the sick pay insurance premiums, or the employer funded the sick pay.

Employee-Funded Sick Pay – Where the employee pays the premiums on sick pay insurance, the sick pay is tax free and not subject to withholding or payroll taxes. In such cases, the sick pay is not included in W-2 Box 1 as taxable wages and instead is included in Box 12, Code J.

Employer-Funded Sick Pay – Where the employer funds the sick pay, either by being self-insured or through a third-party insurer, the sick pay is taxable to the employee and subject to payroll taxes.

Sick pay may be included in the employee's regular W-2 or in a separate W-2 issued by the employer or by a third-party payee (including an insurance company) using the third party's EIN. Where the W-2 is issued by a third party, Box 13 will be checked "Third Party Sick-Pay".

In some cases, Box 13 will be checked, and Box 12 will be coded J, meaning the third-party payment is not taxable, in which case Box 1 of the W-2 should be blank.

Form W-4S – Where the sick pay is paid by a third-party payee that handles the payroll taxes, withholding, and reporting separately from the employer, Form W-4S must be filed with the third party by the employee in order to have tax withheld.

Railroad Sick Pay - Payments received as sick pay under the Railroad Unemployment Insurance Act are taxable and must be included in income. However, they are not included if they're for an on-the-job injury.

AUTOMOTIVE MANUFACTURERS' SALES INCENTIVES

It is common practice for automotive manufacturers to provide incentive payments, including bonuses, prizes, or other awards, to individual salespersons. These can be made directly to the individual or through the dealership that employs the salesperson.

Salespersons are under direct control of the dealership and are employees of the dealership and there is no employee/employer relationship with the manufacturer. Thus, the payments are not wages (Rev Ruling 70-337). These payments, whether paid directly by the manufacturer or through the dealer, are taxable but not subject to federal withholding tax or FICA (IRS Publication 3204).

These payments are generally reported on Form 1099-MISC and Publication 3204 provides the following guidance on reporting the incentive payments:

- Report the income as "other income" (line 8 of draft Schedule 1 of the 2019 Form 1040).
- **Do Not** report the income on a Schedule C, because recipients of these payments are not engaged in an individual trade or business and are therefore not self-employed. Similarly, no expenses may be taken on Schedule C to offset incentive payment income.
- Any expenses associated with this income are employee business expenses that, prior to 2018, would be reported on Schedule A, subject to the 2% of adjusted gross income limitation. However, per the TCJA of 2017 these types of expenses are not deductible for years 2018 through 2025.
- Since the payments are not considered to be self-employment income, they are not subject to self-employment tax.

MEDICAID WAIVER PAYMENTS

Background: As a means of reducing the government's cost of caring for individuals who otherwise would be institutionalized (because they require the type of care normally provided in a hospital, nursing facility, or intermediate care facility), Medicaid will pay wages to care providers to care for these ill individuals in the care provider's home under a state Medicaid Home and Community-Based Services waiver program. Until the release of Notice 2014-7, the IRS had taken the position that these payments, which generally are reported on a W-2 (but sometimes on a 1099-MISC), were taxable for the caregiver.

Notice 2014-7 changed all that. The IRS has given notice that it will no longer challenge the excludability of these wages and instead will treat them in the same manner as difficulty of care payments excludable from gross income under IRC Sec 131 (qualified foster care payments) if they meet certain requirements. Note: IRC Sec 131(a) specifies that the exclusion of qualified foster care payments is mandatory, and since the Medicaid waiver payments are considered difficulty of care foster care payments, a taxpayer may not choose to include them in gross income.

To qualify as compensation for the exclusion:

- The compensation must be required due to a physical, mental, or emotional handicap with respect to which the State has determined that there is a need for additional compensation.
- The care must be provided in the home of the foster care provider.
- The payments must be designated as qualified foster care or difficulty of care compensation.
- To be excludable, the care payments are limited to a maximum of five individuals age 19 and older or ten individuals age 18 and younger.

Only payments that are for the care of the disabled individual are excludable, so if payments to the care provider include vacation pay, for example, the vacation pay is not excludable. (IRS Website Q&A #8, 2/23/15)

If the agency paying the care provider considers the care provider an employee, the agency will issue a Form W-2. Box 1 of the W-2 should be blank if all of the payments are excludable; otherwise, only the amount of non-excludable wages should be reported in Box 1. (IRS Website Q&A #17, 2/23/15) (If the care provider is an employee of the agency, the excluded income is subject to FICA withholding of Social Security and Medicare taxes, but if the care provider is an employee of the care recipient the FICA tax rules for household employees will apply, so in some cases no FICA tax withholding is required.) (IRS Website Q&A #19, 2/23/15)

There may be cases where the amount in Box 1 of the W-2 erroneously includes Medicaid waiver payments that are excludable. If the client is unable to get a corrected W-2 from the paying agency, the full amount of the payments reported in box 1 should be reported on the wages line of Form 1040. Then the excludable portion of the amount in box 1 should be subtracted on lthe "Other income" line (draft 2019 Form 1040, Schedule 1, line 8) and "Notice 2014-7" should be the explanation for line 8 of Schedule 1.

CAUTION: If you follow these instructions, the computer program will still use the W-2 amount in the EITC computation. If you handle it that way, be sure to remove the W-2 waiver payments from the EITC computation.

Care providers who are not treated as employees will likely be issued a Form 1099-MISC. If the provider does not have a separate trade or business of providing these services (likely the situation if the care recipient is a relative), a zero should be entered on l line 8 of Form 1040, Schedule 1 (draft 2019), and "Notice 2014-7" noted on that line. In this case the payments are not subject to self-employment tax (IRS Website Q&A #13, 2/23/15).

If the care provider is a sole proprietor in the business of providing home care services, and the 1099-MISC included payments that are excludable under Notice 2014-7, these payments should be included on line 1 of Schedule C and then the excludable portion reported as an expense in Part V with "Notice 2014-7" as the explanation for the expense. In this manner the payments will not be subject to SE tax (IRS Website Q&A #14, 2/23/15) and won't be included as income for the EITC.

Live-In Self-Certification Program - The California Department of Social Services (CDSS) initiated a self-certification of "live-in" status for providers beginning in 2017. After the caregiver self-certifies that he or she lives in the same home as the recipient of the services, the state will no longer report the qualified Medicaid waiver payments (In-Home Supportive Services (IHSS) and/or Waiver Personal Care Services (WPCS)) on the caregiver's W-2. Form SOC2298 is used for self-certification.

Earned Income Tax Credit – The Tax Court in *Feigh, (2019) 152 TC No. 15* has ruled that Medicaid Waiver payments, even though excluded from income, are still earned income for purposes of claiming EITC and additional child tax credit. This is opposite to the IRS's position in Notice 2014-7 and may open the door to some substantial refunds from open years.

Background: IRS Notice 2014-7 specified the IRS would no longer challenge the excludability of Medicaid waiver wages and instead will treat the payments as excludable from gross income under IRC Sec 131 (qualified foster care payments) if they meet certain requirements. Note: IRC Sec 131(a) specifies that the exclusion of qualified foster care payments is mandatory, and since the Medicaid waiver payments are considered difficulty of care foster care payments, the notice ruled a taxpayer may not choose to include them in gross income.

This change was a double-edged sword, as some caregivers qualified for the earned income tax credit (EITC) and additional child tax credit (ACTC) in the past based upon this income. As a result of these payments being mandatorily excluded from income, these caregivers lost their EITC and ACTC based upon that income.

Tax Court Case: The taxpayers in the court case received payments under a state Medicaid waiver program for providing care to their adult disabled children in the family home, and excluded the Medicaid waiver payments from income but still treated them as earned income when computing the EITC and ACTC, disregarding Notice 2014-7. The IRS disallowed the credits and the taxpayers filed a timely Tax Court petition.

The Tax Court held that Notice 2014-7 could not reclassify the taxpayer's Medicaid waiver payment to remove a statutory tax benefit. Specifically, the Court found that where income does not fall within the plain text of a statutory exclusion from gross income, IRS cannot reclassify that income through a Notice so that it no longer qualifies as "earned income" for the purpose of determining tax credits.

The Court reasoned that IRS cannot remove a statutory benefit provided by Congress. Interpretive rulings do not have the force and effect of regulations, and they may not be used to overturn the plain language of a statute which was exactly what IRS sought to do with Notice 2014-7. The EITC and the ACTC are acts of legislative grace provided by Congress. While deductions and credits are allowed only to the extent authorized by statute, the IRS is not free to circumscribe the credits that the legislature has chosen to authorize through statute; that is a power only Congress has. Accordingly, to the extent IRS sought to use Notice 2014-7 to deprive the taxpayers of a benefit bestowed by Congress, the Court held that it was prohibited from doing so.

Not addressed in the Tax Court case was the question of whether the taxpayers should have included their Medicaid waiver payment in gross income as IRS did not raise this issue in its notice of deficiency or plead it in this case. IRS chose not to argue in the alternative that the taxpayers' Medicaid waiver payment should be included in gross income, but instead argued that the taxpayers were precluded by Notice 2014-7 from including their payment in gross income for purpose of the credits.

The IRS has since modified their Q&A on the subject. Q&A #9 asked whether a taxpayer could choose to include the Medicaid waiver payments in gross income (thus qualifying for EITC). The IRS's original answer was no. Now Q&A #9 says "reserved".

Amended Opportunity? This is an apparent amended opportunity for all open years. Even though the court case constitutes substantial authority, the IRS has not stated whether they will acquiesce to the case. So, since an amended return would be taking the court's position over Notice 2014-7, it would be wise to attach a Form 8275, Disclosure Statement, stating the Tax Court case as the reason for disregarding the provisions of Notice 2014-7. (See Reg Section 1.6662-3(a) & Reg Section 1.6662-4(d)(2) for rules for disclosure of return reporting positions that are contrary to an IRS Notice).

It may be best practice to wait and see how this plays out. Currently open years are not affected until April 15, 2020.

SURROGACY FEES

If you go on the Internet, you will find a wide variety of opinions related to the taxability of the surrogate fee to the surrogate mother. Some will say it is a gift; however, in a case decided by the U.S. Supreme Court (Commissioner vs. LoBue, Philip, (1956, S Ct)) to be a gift for tax purposes, gifts must be made out of a detached or disinterested generosity. Any payment made by the parents to a surrogate mother is hardly detached or disinterested, so surrogate fees are not gifts.

You will also find many surrogacy agencies are taking the position and advising their clients that surrogacy payments are for pain and suffering, and thus exempt under IRC Sec 104. The title of Sec 104 is "compensation for injury or sickness" and the term "pain and suffering" does not appear anywhere in that code section. Surrogacy hardly meets the definition of physical injury as would be found in a car accident, bungled surgery or other accidental injury. So, surrogacy fees hardly fall under the compensation exclusion for injury or sickness.

IRC Sec 61 states: "Except as otherwise provided, gross income means all income from whatever source derived." There is no exception in the code for surrogacy fees, and as a result, a surrogacy fee is taxable income to the surrogate mother. To complicate matters, the surrogate mother is providing a "personal service" and personal services are subject to self-employment tax as well as income tax when received in the course of a business. Does the surrogacy arrangement rise to the level of a trade or business? The answer depends on the facts and circumstances of each situation. If the surrogate has entered into such an arrangement before or intends to do so again, the fee would likely be considered self-employment income. But if being a surrogate is a one-time activity, an argument could be made that it is not a business, in which case the surrogate fee would be reported as "other income" (for 2019 on line 8 of draft Schedule 1 of Form 1040), but not subject to SE tax.

If the fee *is* self-employment income, it may be offset with benefits available to any self-employed taxpayer including the ability to deduct health insurance above-the-line rather than as an itemized deduction and to make deductible contributions to a self-employed retirement plan or IRA. Although there is not much in the way of deductible expenses, legal or other costs associated with drafting and executing the surrogate contract would be a deductible business expense.

A self-employment surrogacy activity would fall into the category of a specified service business for purposes of the new deduction for self-employed and pass-through businesses available in years 2018 through 2025. So provided the surrogate mother's return has a taxable income not exceeding $210,700 ($421,400 if she is married and files a joint return with her spouse) for 2019, she would be eligible for this Sec 199A deduction, generally equal to 20% of the net self-employment income.

Unfortunately, we have tax novices making their interpretations of the tax code on the Internet and a great many of them attempt to justify what they would like the result to be as opposed to what it actually is.

As a result, many, dare we say most, surrogate mothers are not reporting the income, and the IRS is not catching up with them because neither the parents nor the agency is issuing a 1099-MISC to surrogate mothers. The parents are under no obligation to issue a 1099-MISC because it is not related to a business for them. The agency on the other hand is a business, and if the surrogacy fee passes through them, they would have an obligation to issue a 1099-MISC.

RENTER LEASE BUY-OUT

What are the consequences of a landlord buying out the remaining lease term of a tenant either by cash or a period of free rent? Section 61 provides that a taxpayer's gross income includes all income from whatever source derived, except as otherwise provided by law. A taxpayer's Section 61 gross income is not limited to the actual receipt of gain, but also includes the receipt of any economic benefit unless excluded by law. See Glenshaw Glass Co. v. Commissioner, 348 U.S. 426 (1955).

Stotis v. Commissioner, T.C. Memo. 1996-431, involves the case of a residential leasehold. Mr. Stotis, the petitioner, leased space in an apartment building that he used as a residence. The landlord, desiring to use the real estate for other purposes, entered into a surrender agreement with the petitioner whereby the petitioner exchanged his right in the property for a cash payment. The Tax Court held that the petitioner's leasehold interest in a residence was a capital asset, and that the petitioner's sale of the leasehold interest constituted a sale or exchange, taxable as capital gain.

Further, a taxpayer's interest in a leasehold is either a capital asset under Section 1221 or real property used in a trade or business under Section 1231. Either way the sale of a leasehold interest is treated as a long-term capital gain if held over one year.

W-2 AFTER DEATH

When a taxpayer passes away, employers frequently incorrectly handle and report wage payments, often to their own detriment, and end up paying matching payroll taxes when they are not required to do so. According to the IRS W-2/W-3 Instructions (page 8):

- *Payment made after death but in year of death* – Withhold SS and Medicare taxes and only report the income in boxes 3 and 5 to ensure proper Social Security and Medicare credit was received. Do not show the payment in box 1. Also issue a 1099-MISC and report the payment in Box 3 for payment to the estate or beneficiary.

- *Payment made after the year of death* - Do not report it on Form W-2 (thus no withholding or payroll taxes). Issue a 1099-MISC and report the payment in Box 3 for payment to the estate or beneficiary.

Where an employer has handled the wage payment made in a year after death incorrectly, the correct thing to do would be to have the employer amend the W-2 to no W-2 and refund the taxpayer's estate all the withholding, payroll taxes and issue a 1099-MISC. No doubt the employer will be reluctant to do all that especially after the 1099 and W-2 due dates have gone by. As a work-around the estate could forego the SS and Medicare taxes and report the W-2 wages on a 1041.

UTILITY REBATE

Energy Conservation Rebates - Taxpayers can exclude from gross income any subsidy provided, either directly or indirectly, by public utilities for the purchase or installation of an energy conservation measure for a dwelling unit. This includes installations or modifications that are primarily designed to reduce consumption of electricity or natural gas, or improve the management of energy demand. (IRC Sec 136) However, the cost of the energy conservation property must be reduced by the amount of the nontaxable subsidy before computing any federal tax credit that's based on the costs of that property, as for example when claiming the 30% solar electric or solar water property credit. (2018 Form 5695 instructions)

Water Conservation Rebates – Federal tax law does not include water conservation rebates with energy rebates. Although there is extensive lobbying by utilities to change that law, at the present time it appears such rebates are taxable for federal purposes. This would also include the rebates to replace grass with artificial turf. Utilities require water conservation rebate recipients to complete a W-9 and will issue them a 1099 where the rebates are $600 or more.

EMPLOYEES MISCLASSIFIED AS INDEPENDENT CONTRACTORS:

The IRS has a form that is to be used by certain employees who have been misclassified as independent contractors by their employer. Form 8919 – Uncollected Social Security and Medicare Tax on Wages – is used to pay an employee's half of the Social Security and Medicare taxes when one of the following reasons applies.

Form 8919 - Reason for Filing Codes (2018 version) – One must be designated when filing the form.

Code A. I filed Form SS-8 and received a determination letter stating that I am an employee of this firm.
Code C. I received other correspondence from the IRS that states I am an employee.
Code G. I filed Form SS-8 with the IRS and have not received a reply.
Code H. I received a Form W-2 and a Form 1099-MISC from this firm [for the same tax year]. The amount on Form 1099-MISC should have been included as wages on Form W-2.

If none of the reason codes apply, but the worker believes he or she should have been treated as an employee, the form instructs that reason code G is to be indicated and the worker should file Form SS-8 on or before the date the return is filed. The SS-8 must be filed separately and not attached to the 1040. If code H is used, do not file an SS-8.

If reason code G is used, the employee or the firm that paid the employee may be contacted for additional information. Use of this reason code is not a guarantee that the IRS will agree with the worker's opinion as to his/her status. If the IRS does not agree that the worker is an employee, the worker may be billed for the additional tax, penalties, and interest resulting from the change to the worker's status.

Does the 8919 Mean Troubles for Employers? Employer information is also required on the form including the employer's firm name, federal ID number, associated "reason" code from the list above, date IRS determination or correspondence was received, whether a 1099-MISC was issued, and the dollar amount of the wages received without SS or Medicare tax withholding. See chapter 3.06 for additional details.

ITIN/SSN W-2 MISMATCH

Tax preparers should take extra care to confirm that the correct taxpayer identification number is reported on the tax return. This will avoid mismatch errors and correspondence from the IRS, and if filing the return electronically, will also prevent rejection of the return. IRS suggests confirming the number by seeing social security cards, ITIN letters, etc. The IRS requires taxpayers filing tax returns using an Individual Taxpayer Identification Number (ITIN) who are reporting wages paid to show the Social Security number under which the wages were earned. This creates an identification number (ITIN/SSN) mismatch. Taxpayers should use their correct ITIN as the number on the face of Form 1040, but when inputting Form W-2 information for electronic filing purposes, the taxpayer's SSN exactly as shown on the W-2 issued by the employer should be entered. (IRS Pub. 1345, page 11)

CALIFORNIA DIFFERENCES

CA WAGES ON FORM W-2:

Generally, the California wages reported on a taxpayer's W-2 will be the same as the federal. Watch for the following which could cause state wages to differ:

- Ridesharing benefits or sick pay: California excludes from income ridesharing benefits (see more below) and sick pay received under the Federal Insurance Contributions Act and Railroad and Retirement Act.
- Income exempted by U.S. tax treaties: Certain income may be excluded from a taxpayer's income under a U.S. tax treaty, or a taxpayer may claim a foreign earned income exclusion for federal purposes. This income is generally not excludable for California purposes.
- Health savings accounts: California has not adopted health savings accounts, so employer-provided contributions are not excludable from California wages.
- Health benefits for non-dependent RDPs: Unlike Federal, California does not tax employer-provided health insurance and medical reimbursements for registered domestic partners (RDPs) who are not dependents. See chapter 1.12.

LOCAL INCOME TAX: On Form W-2 from a California employer, an amount in the local income tax box normally reflects the amount of state disability insurance ***(SDI)*** withheld from wages. However, instead of SDI, certain voluntary plan disability insurance ***(VPDI)*** may be withheld if an employer elected to carry its own voluntary plan. Such a plan must be approved by the state of California and a portion of the premiums must be sent to the state.

Federal deductibility - For federal purposes, a taxpayer's SDI payments are treated for Schedule A as state income taxes paid. However, contributions to VPDI are not deductible as such ***(Rev Rul 81-194, 1981-2 CB 54)***.

California excess withholding credit - If a taxpayer pays more than the annual maximum into the disability insurance fund, the employee may take a credit on the state return for the excess amount which was withheld. According to the FTB, SDI (or VPDI) amounts withheld must be combined; then subtract the maximum contributions due for the tax year. The balance is a refundable credit. Remember that the credit may be claimed only if taxpayers had excess withholding because they had two or more employers who each withheld SDI or VPDI. For the purpose of claiming the credit, payments to both SDI and VPDI will count.

> ***Example*** *– Martin Lewis has two employers for 2019: One withholds $810 of SDI and the other withholds $475 of VPDI. On Martin's Schedule A he includes $810 of SDI as part of his state income tax deduction. The total of the SDI and the VPDI is $1,285. The maximum for 2019 is $1,183.71, giving Martin a $101.29 overpayment credit on his CA return.*

Historical SDI Rates

Year	2014	2015	2016	2017	2018	2019	2020
Tax %	1.0	0.9	0.9	0.9	1.0	1.0	
Max Wages	101,636	104,378	106,742	110,902	114,967	118,371	
Max Tax	1,016.36	939.40	960.68	998.12	1,149.67	1,183.71	

If values not shown, they were not available at publication time.

COMPENSATION FOR SERVICES: In general, California adopts the federal rules with regard to inclusion of compensation in income.

NON-RESIDENT COMPENSATION FOR PERSONAL SERVICES PERFORMED IN CALIFORNIA: A frequent question is what constitutes CA personal services income (i.e., wages) for an individual who is not a resident of California. The answer to that question generally depends on whether the services were performed in California (18 CA Reg § 17951-5). Thus, if all the services were performed in another state, none of the income is taxable to CA.

Example #1 - If a CA nonresident individual provides services to a CA resident or CA entity, but all of those services were performed outside of CA, the income for those services is not taxable to CA. Instead they are taxable to the state where the services were performed assuming that state has a personal income tax.

Example #2 – If a nonresident individual travels to CA and performs services in CA, the compensation for services he or she performs within CA are taxable to CA. Thus, his or her gross income will be allocated and apportioned between CA and other states where the individual has performed services. CAUTION: Where an individual has a workplace both in and outside of CA, and provides services to CA residents or CA entities both in the CA workplace and the out of state workplace, the proration burden of proof will lie with the individual and the allocation might be a hard hill to climb.

Example #3 - Where an individual who is not a CA resident is employed in California at intervals during the year, compensation received for personal services includes that portion of the total compensation for personal services which the total number of working days employed within CA bears to the total number of working days both within and without CA. (R&TC Regs Sec 17951-5(b))

See also chapter 1.50 for additional information on how California taxes income of nonresidents and part-year residents.

RIDESHARING FRINGE BENEFITS: Under federal law, qualified transportation benefits are excluded from gross income with monthly limits for parking and transit passes and commuter highway vehicle benefits (see table in federal section). California places no monthly limits for the exclusion on these benefits and California's definitions are more expansive. Therefore, income that was includible for federal purposes may be excludable from state income. California has not conformed to the TCJA change that prevents employers from deducting the costs of transportation fringe benefits provided to their employees.

QUALIFIED MEDICAID WAIVER PAYMENTS: In Notice 2014-7 the IRS announced that it is discontinuing its historical opposition to excluding these payments under Sec 131. California conforms to IRC Section 131.

PAID FAMILY LEAVE INSURANCE: California provides paid family leave insurance (PFL) benefits to eligible individuals who are unable to work because they are caring for a seriously ill or injured family member, or bonding with a minor child within one year of the birth or placement of the child in connection with foster care or adoption. Payments under this plan are reported on Form 1099-G, Certain Government Payments. The program is funded by increasing the SDI contribution rate by 0.08 percent (which is included in, not additional to, the annual SDI tax rate). The following table shows the amount a taxpayer can pay into that program based upon the maximum earnings for that year.

Year	2014	2015	2016	2017	2018	2019	2020
FTDI Tax	81.31	83.50	85.39	88.72	91.97	94.70	

If values not shown, they were not available at publication time.
Rate is 0.08% of the max SDI earnings for the year – For 2019: 118,371 *x .0008= 94.70*

In PLR CCA 200630017 the IRS held that amounts withheld from an employee's payroll under the PFL program were deductible as taxes (under Sec 164). In that same PLR the IRS held that the PFL payments were includable income as Sec 85 unemployment insurance but the provisions of Regulation 1.85-1(b)(1)(iii) apply to those who do not itemize their deductions. Thus where taxpayers were unable to deduct the family temporary disability insurance (FTDI) contributions as an itemized deduction, they established a basis and subsequent FTDI income can be reduced by the accumulated basis.

> ***Example:*** *Marcia went on paid family leave on Jan 1, 2019 to care for an injured son and collected $1,560 of PFL income. Assuming Marcia has worked continuously only since 2015, and has paid the maximum SDI in all of those years, she would have had $349.58 (the total of the amounts in the chart above for years 2015 through 2018) withheld. Assuming she did not itemize in all of those years, she established a basis of $350. Therefore only $1,210 of the $1,560 paid during the leave period would be taxable on her federal return.*

Other Issues: Taxpayers who itemized but received only partial benefit because of the tax benefit rule would seemingly be able to include in their basis the amount from which they received no benefit. Also those subject to the AMT (taxes are not deductible under AMT) received no benefit from the tax deduction, so it would seem that the no-benefit portion would also add to basis. This can become quite complicated.

UTILITY REBATES – An exclusion from gross income is allowed for vouchers, rebates or other financial incentives received from the California Energy Commission, the Public Utilities Commission or a local publicly-owned utility for the purchase and installation of specified energy production systems.

Water Conservation and Turf Removal Rebates - California law allows an income exclusion for rebates or vouchers from a local water agency, energy agency, or energy supplier for the purchase and installation of water conservation appliances and devices.

For taxable years beginning on or after January 1, 2014, and before January 1, 2019, taxpayers can exclude from CA gross income any amount received as a rebate, voucher, or other financial incentive issued by a local water agency or supplier for participation in a turf removal water conservation program (R&TC Secs 17138.2 and 24308.2).

Financial Incentive for Seismic Improvement - For tax years beginning on or after July 1, 2015 (i.e., 2016 for calendar year individuals), CA allows an income exclusion for loan forgiveness, grant, credit, rebate, voucher or other financial incentive issued by the California Residential Mitigation Program or California Earthquake Authority to assist a residential property owner or occupant with expenses paid, or obligation incurred for earthquake loss mitigation (seismic retrofitting). An adjustment will need to be made on CA Schedule CA, line 21 (2018), for income of this type that was included on the federal return.

TIP INCOME

Synopsis of Tip Reporting Requirements

Type of tips	Reported Form W-2?	Emp W/H FICA?	Need 4137?	Report As Wages?
Reported to employer	Yes	Yes	No	Yes
Allocated by employer	Yes	No	Yes	Yes Req'd
$20 or more per month NOT reported to employer	No	No	Yes	Yes
Less than $20 per month NOT reported to employer	No	No	No	Yes

- **Pub 5080** - Form 4137 Compliance Program Frequently Asked Questions

Employee Tip Reporting Requirements - Employees are required to ***report tips of $20 or more received while working with any one employer in any given month.*** The reporting is to be made in writing to the employer by the ***tenth day of the month following the receipt of tips.*** The employer withholds FICA (social security and (Medicare) hospital insurance) and income taxes on these reported tips and then includes the tips and wages on the employee's W-2. If tips aren't reported to the employer when required, the IRS can assess a penalty equal to 50% of the employee FICA on the tips. Employees may keep records of their tips on Form 4070A and submit Form 4070 to the employer (both forms are in the IRS Publication 1244). The online version of Pub 1244, available on the IRS web site, allows the employee to enter the information on Forms 4070A and 4070 and print out the completed forms. Alternatively, electronic reporting to the employer is permitted.

Tip Splitting and Cover Charges - Tips given to others under a "splitting" arrangement are not subject to the reporting requirement by the employee who initially receives them. That ***employee should report to the employer only the net tips received***. Service (cover) charges, which are arbitrarily added by the business establishment, are excluded from the tip reporting requirements. The employer should add the employee's share of service charges to the employee's wages.

> ***Example – Service Charge:*** *A restaurant's menu specifies that an 18% charge will be added to all bills for parties of 6 or more customers. A customer's bill for food and beverages for her party of 8 includes an amount on the "tip line" equal to 18% of the price for food and beverages and the total includes this amount. The restaurant distributes this amount to the wait staff and bussers. Under these circumstances, the customer did not have the unrestricted right to determine the amount of the payment because it was dictated by employer policy. And the customer did not make the payment free from compulsion. The 18% charge is not a tip within the meaning of IRC Sec 3121. The amount included on the tip line is a service charge dictated by the restaurant.*

> ***Example – Tip:*** *A restaurant includes sample calculations of tip amounts beneath the signature line on its charge receipts for food and beverages provided to customers. The actual tip line is left blank. A customer's charge receipt shows sample tip calculations of 15%, 18% and 20% of the price of food and beverages. The customer inserts the amount calculated at 15% on the tip line and adds this amount to the price of food and beverages to compute the total. Because the customer was free to enter any amount on the tip line or leave it blank and the customer determined who would get the amount, the amount entered on the tip line is a tip.*

Tips versus service fees - In ***Rev Rul 2012-18,*** which modifies and supersedes Rev Rul 95-7, the IRS clarified that the absence of any of the following factors creates a doubt as to whether a payment is a tip and indicates that the payment may be a service charge: (1) the payment must be made free from compulsion; (2) the customer must have the unrestricted right to determine the amount; (3) the payment should not be the subject of negotiation or dictated by employer policy; and (4) generally, the customer has the right to determine who receives the payment. All of the surrounding facts and circumstances must be considered. To the extent any portion of a service charge paid by a customer is distributed to an employee, it is wages for FICA tax purposes.

Payments from Clubs to Taxi Drivers for Delivering Patrons – In a Chief Counsel Advice (CCA 201106010), IRS determined that amounts paid by clubs to taxicab drivers who deliver passengers to the clubs are income to the drivers, but are not tips received by the drivers in the course of their employment with taxicab companies. Rather, the payments are for services separate and distinct from the drivers' employment, and the clubs making the payments are responsible for complying with 1099 reporting requirements.

Customers' Contributions to "Tip Jars" - A Chief Counsel Memo (CCM) concludes that customers' cash contributions to "tip jars" placed in each of a retailer's locations may be treated as tips (not wages) by the employer. As such, the amounts distributed to the employees from the tip jars are governed by Code Sec. 3121(q), which provides that unreported tips won't be subject to the employer share of FICA until IRS makes a notice and demand for taxes from the employer. PLR 200929004

FICA Taxes on Unreported Tips - No FICA (i.e., social security and (Medicare) hospital insurance taxes) is assessed on tips which are not required to be reported to the employer (i.e., if under $20 in a month), but this does not exempt those amounts from income taxes. All tips should be reported as wages on Form 1040. Tips not reported to the employer, and over the $20 monthly limit, are also reported on Form 4137, Social Security Tax on Unreported Income.

Form 4137 "Gotcha" Program - The IRS has a Form 4137 Compliance Program that uses data from employees' Forms 4137, Social Security and Medicare Tax on Unreported Tip Income, to determine the **employer's** share of Social Security and Medicare taxes on unreported tips. While employers in industries where tipping is common generally know that they must pay the employer's share of Social Security and Medicare taxes on tips, other employers may not realize that they also may be liable for these taxes on tips in excess of $20 per month that their employees don't report to them is intended to ensure the employers pay their share of the employment taxes on their employees' unreported tip income. However, the employer's liability for the employer's share does not arise until IRS issues a "Section 3121(q) Notice and Demand." Employers will be sent a Form 4520P "pre-notice" prior to receiving a notice (Form 4520) that requires them to pay the unreported FICA tax. An employer can request an extension. The IRS will not assess penalties or interest on the amount due if the employers cooperate and include the taxes owed on their next Form 941, Employers QUARTERLY Federal Tax Return. (Headliner Vol. 298, May 25, 2010, IRS web site; Pub 5080)

FICA Taxes on Reported Tips - FICA is assessed on both employee and employer for <u>all tips</u> the employee reports to the employer up to the FICA limits.

Employer Allocation of Tips - Tip allocation is applicable to "large food and beverage establishments" (i.e., food service businesses where tipping is customary and that have ten or more employees). These establishments must allocate a portion of their gross receipts as tip income to those employees who "underreport". Underreporting occurs if an employee reports tips which are **less than 8%** of the employee's applicable share of the employer's gross sale. The employer must allocate to those underreported employees the difference between what the employee reported and the 8%. The 8% allocation is made only among those employees who normally receive tips. The allocation amount is noted on the employee's W-2 but does not have to be reported as additional income if the employee has adequate records to show that the amount is incorrect. Note that the allocated tips are not included in the total wages shown on the employees' W-2. (The IRS has issued inquiries where the taxpayer's W-2 showed an allocation of tips and none were reported on the tax return.)

A Method of Lowering the Allocation Percentage - If customers at an establishment tip lower than the regular allocation percentage (8%), either the employer or a majority of the direct employees may petition to have the percentage reduced from 8% (but not below 2%). The petition is made in writing to the Internal Revenue Service, National Tip Reporting Compliance, 3251 N Evergreen Dr., NW, Grand Rapids, MI 49525. See the instructions to IRS Form 8027 for the specific information and documentation required to accompany the petition. Payment of the user fee for determination letters is required at the time the request for a lower rate is filed with the IRS.

Employer Social Security Credit (IRC Sec 45B) - Food and beverage establishments can get a tax credit for a part of employer social security taxes paid on their employees' cash tips. This credit is part of the general business credit (Form 3800); however, Form 8846 is used to compute the amount of credit. The credit amount is equal to the "excess employer social security tax" paid (or incurred) for the year. <u>The credit is elective by the employer in lieu of deducting the excess social security tax as a business expense.</u>

"Excess employer social security tax" is that social security tax paid by the employer on tips received and reported to the employer by the employee during the given month, to the extent the tips are:

- Considered to have been paid by the employer to the employee under Code Section 3121(q), and
- More than the amount by which the employees' actual wages for the month (without inclusion of any tips) are less than $5.15 an hour. If each employee was paid an amount equal to or more than $5.15 per hour (excluding tips), then the credit is computed on all reported tips. (Form 8846 line 2 instructions)

Example* – *Employer Social Security Credit: *Jerry, a waiter, worked 100 hours and reported $400 worth of tips to his employer during January. Jerry's regular wages (at $3.25 per hour), without considering tips, during that period were $325, bringing the total to $725. If Jerry had been paid $5.15 per hour, he would have received $515. The result is that only $210 ($725 - $515) of the employee's tips for January is taken into account for the purpose of computing credit. The employer's credit amount is $210 x .0765= $16.07. If Jerry's hourly wage had been $7.00, then his employer's credit would be $30.60 ($400 x .0765).*

Reporting Employee Tips on Tax Return - The tip allocation procedures often cause confusion when reporting tip income on an employee's tax return. The following example illustrates the employee tip reporting procedure.

Example – Tip Reporting, W-2 to 1040: *Jan is a waitress at Walton's, a large food and beverage establishment. She reported $2,000 in tips to her employer during the year, but did not keep adequate records of tip income. Jan's Form W-2 showed the following information:*

Wages, Tips, etc. (Box 1)	*9,200.00*	*Fed tax withheld (Box 2)*	*1,840.00*
SS Wages (Box 3)	*7,200.00*	*SS Tax Withheld (Box 4)*	*570.40*
Medicare Wages (Box 5)	*9,200.00*	*Medicare Tax Withheld (Box 6)*	*133.40*
SS Tips (Box 7)	*2,000.00*	*Allocated Tips (Box 8)*	*1,000.00*

Explanation of Jan's Tip Income *- Jan will report $10,200 in wages on her Form 1040 ($9,200 in wages plus $1,000 in allocated tips). The allocated tips indicate that the restaurant found a "shortfall" of $1,000 when comparing the tips Jan reported ($2,000) to 8% of her allocable share of the employers' gross sales. She did not keep a good record of tips so she had nothing to verify that she had only received $2,000. The allocated tips are added to Jan's wages and are reported on Form 1040, line 1 of the draft 2019 form. Since no social security tax was paid on the allocated tips, Jan must also complete Form 4137 as an attachment to her return – it will include the total OASDI and HI tax assessed on the allocated tips of $76.50. This amount must also be added to Jan's tax on (draft of 2019) Schedule 2, line 5, then carried as part of the Schedule 2 total to Form 1040, Page 2, line 15.*

Recordkeeping Regulations - Reg. Sec. 31.6053-4 explains that employees must keep a timely record or copies of receipts and charge slips showing their tips (oral statements generally are not enough). The record should include the taxpayer's name and signature, establishment's name, amounts, payments received from or made to other employees, and date.

Employer Tip Reporting Agreements (Ann 2000-19, 2000-19 IRB 973) – The Tip Rate Determination/Education Program (TRD/EP) is intended to improve tip-reporting of tipped employees by means of education and voluntary agreements (instead of the traditional audit). Under this program, employers can enter into either:

- ***Tip Rate Determination Agreements (TRDAs).*** With these agreements the IRS and employer determine the amount of tips employees generally receive and should report, or
- ***Tip Reporting Alternative Commitments (TRACs).*** Employers agree to educate employees and set up tip reporting procedures under TRACs. The agreements are available to taxpayers in food and beverage, cosmetology, barber, gaming, taxicab, limousine, skycap, and car wash operations.

TRDA and TRAC agreements can be advantageous to both employees and employers who follow them--the IRS won't initiate a tip-related audit of an employer or employees who adhere to the terms of the agreements.

Under TRACS in the food and beverage industry, employers agree to:

1. Provide education for newly hired employees and existing employees on cash and charged tip reporting requirements;
2. File all required federal tax returns for payroll taxes; and
3. Set up procedures to make certain employees report tips accurately.

With a TRAC agreement, the IRS agrees that when employees underreport tips to the employer, any notice and demand to the employer for FICA taxes on that underreported income will be based only on amounts shown on Form 4137 filed by the employees.

Tip compliance program for the gaming industry - Gaming Industry Tip Compliance Agreement Program is designed to promote tip compliance and to reduce disputes under Code § 3121(q), which allows IRS to serve a demand on employers for their share of FICA taxes on unreported tip amounts without also serving a demand on the employees.

Under the Gaming Industry Tip Compliance Agreement Program, a gaming industry employer and IRS may work together to reach a Gaming Industry Tip Compliance Agreement that objectively establishes minimum tip rates for tipped employees in specified occupational categories, prescribes a threshold level of participation by the employer's employees, and reduces compliance burdens for the employer and enforcement burdens for IRS. ***(Rev Proc 2003-35, Sec. 2)***

Deemed compliance with tip reporting provision - An employer who complies with the reporting requirements of Section V of its Gaming Industry Tip Compliance Agreement, and participating employees of the employer who report in accordance with the agreement, will be deemed to comply with the tip reporting requirements of Code Sec. 6053 for the tax periods during which the agreement remains in effect. ***(Rev Proc 2003-35, Sec. 5)***

IRS and Gaming Industry Partner on Voluntary Tip Compliance Agreements (IR-2003-145)
The Internal Revenue Service expanded its tip compliance agreement nationwide to the gaming industry. For employers, the agreement substantially reduces the recordkeeping and reporting burden. For employees, the improved income reporting procedures could potentially make them eligible for higher Social Security or other pension, Medicare, unemployment and worker's compensation benefits. This could also help qualify them when applying for loans or other financial arrangements.

The voluntary compliance process allows a gaming industry employer, employees and the IRS to work together to objectively determine tip rates for tipped employees in specified occupational categories.

There are several steps to the process:

- The employer and the IRS sign a Gaming Industry Tip Compliance Agreement, which incorporates tip rates specific to that employer's establishment and prescribes a minimum level of participation by the employer's employees.
- The employer recruits his employees to voluntarily participate.
- Participating employees must then report their tip income to their employer at or above the established tip rates, unless their tip logs can substantiate a lesser amount.
- The employer withholds income tax from the employees and reports income on the employees' Forms W-2 based on the rates or the substantiated lesser amount.

As long as tips are reported at or above the established tip rate, the compliance agreement generally prevents the IRS from auditing the employees' tip income. In addition, as long as the employer meets certain commitments, the IRS will not assert a liability against the employer with respect to the tip income of participating employees while the agreement is in effect. The agreement may be renewed every three years.

All employers operating a gaming establishment may participate in the Gaming Tip Compliance Agreement. Either the IRS or an employer may initiate participation.

For further details on the compliance agreement, see Revenue Procedure 2003-35, Gaming Industry Tip Compliance Agreement Program.

CALIFORNIA DIFFERENCES

California conforms to federal tip rules but does not have a credit similar to the Sec 45B credit for employers.

SOCIAL SECURITY BENEFITS

And Tier 1 Railroad Retirement

RAPID FINDER

- Taxable Thresholds – ½ SS plus other income
  - Married filing jointly – $32,000
  - Others (except MS lived together) – $25,000
  - MS lived together – 85% of all SS is taxable
- Excess Earnings limit (2019): $17,640
- Quarter of Coverage (2019): $1,360

The current law (IRC Sec 86) is a two-tier method of taxing Social Security benefits (or Tier 1 Railroad Retirement). Social Security benefits include **monthly survivor and disability benefits**, but not supplemental security income (SSI) payments, which aren't taxable. The following discussion refers to Social Security income only; however, the rules cited ***apply to Tier 1 Railroad Retirement as well***.

SS AND OPTIMIZING IRA DISTRIBUTIONS

For taxpayers, their Social Security (SS) income is not taxable until their modified AGI (MAGI), which is regular AGI (without Social Security income) plus 50% of their Social Security income plus tax-exempt interest income, and plus certain other infrequently encountered additions exceeds a specific threshold. The threshold is $32,000 for married taxpayers filing jointly, zero for married taxpayers filing separately and $25,000 for all others. Few taxpayers understand this threshold for SS taxation and do not employ strategies to minimize the SS taxability.

Generally, retired taxpayers attempt to avoid taking any more out of their IRA accounts than they actually need to and then take distribution for special purposes such as a new car. Many are not aware of the impact of the Required Minimum Distributions (RMD) once they reach age 70 ½. There is also an estate issue of leaving an IRA to a beneficiary who probably will be in a higher tax bracket than the decedent, or worse yet, the IRA gets taxed to the estate and the beneficiaries.

Strategy – Lower-Income Retirees - It may be appropriate for clients to withdraw enough from their IRA (or other qualified plans) so that the overall income closely matches the taxable Social Security AGI threshold, even if they do not need the funds. Then they can put those excess withdrawals away for a future major expense item and avoid a large distribution in one year that would cause the SS to be taxed. Also counsel your clients receiving SS to call you if they have large deductible expenses, such as medical (reducing their tax bracket), so you can determine an amount to maximize their IRA distributions for the year.

Example *– Married taxpayers, both age 64, have a pension income of $12,000, taxable Interest Income of $1,000 and a combined Social Security (SS) Income of $18,000. The wife also has an IRA account worth $400,000. They don't have any financial need to withdraw from the IRA account. Their AGI without SS is $13,000 ($12,000 + $1,000) and 50% of the SS = $9,000. $13,000 + $9,000 = $22,000, which is $10,000 short of the $32,000 SS threshold for married taxpayers. The wife could have withdrawn up to $10,000 from the IRA and they would still have avoided tax on their SS income. What does it cost them in tax (using 2019 rates) to withdraw $10,000? Nothing!*

Pension income	*12,000*	*12,000*
SS ($18,000)	*0*	*0*
Interest income	*1,000*	*1,000*
IRA distribution	*-0-*	*10,000*
Total	*13,000*	*23,000*
Standard deduction	*<24,400>*	*<24,400>*
Taxable	*-0-*	*-0-*
Tax	*-0-*	*-0-*

The wife could withdraw even more than $10,000 from her IRA, and pay little tax:

Pension income	*12,000*	*12,000*
Interest income	*1,000*	*1,000*
IRA distribution	*11,000*	*12,000*
SS	*500*	*1,000*
Total	*24,500*	*26,000*
Standard deduction	*<24,400>*	*<24,400>*
Taxable	*100*	*1,600*
Tax	*10*	*160*

By taking a distribution and reducing the IRA account balance, they are effectively reducing both the amount that is required to be distributed when the wife reaches 70 ½ and the amount of the Social Security that may be taxable in those years.

SOCIAL SECURITY - TAXABLE PORTION – WORKSHEET

1. Enter the total amount of all Social Security Income* . . . . **1.** _________

2. Enter one-half of line 1 . . . . **2.** _________

3. Total Income including tax-exempt interest but excluding SS income . . . . **3.** _________

4. Enter the total of any exclusions/adjustments for:

- Qualified U.S. savings bond interest
- Adoption benefits
- Foreign earned income or housing
- Certain income of bona fide residents of American Samoa or Puerto Rico …... **4.** _________

5. Add lines 2, 3, and 4 . . . . **5.** _________

6. Enter the total amount of all adjustments except for student loan interest, tuition and fees**, and for years before 2018 the domestic production deduction . . . . **6.** _________

7. Is the amount on line 6 less than the amount on line 5?
No. None of the social security benefits are taxable – Stop!
Yes. Subtract line 6 from line 5 . . . . **7.** _________

8. Enter one of the following amounts:

- **Married filing jointly**, enter $32,000
- **Married filing separately and lived with spouse at any time during tax year**, skip lines 8 through 15; multiply line 7 by 85% (.85) and enter the result on line 16. Then go to line 17.
- **All others**, enter $25,000. . . . . **8.** _________

9. Is the amount on line 8 less than the amount on line 7?
No. None of the benefits are taxable– Stop!
Yes. Subtract line 8 from line 7 . . . . **9.** _________

10. Enter $12,000 if married filing jointly; $9,000 for all others. **10.** _________

11. Subtract line 10 from line 9. If zero or less, enter -0- . . . . **11.** _________

12. Enter the **smaller** of line 9 or line 10 . . . . **12.** _________

13. Enter one-half of line 12 . . . . **13.** _________

14. Enter the **smaller** of line 2 or line 13. . . . . **14.** _________

15. Multiply line 11 by 85% (.85). If line 11 is zero, enter -0- . . . . **15.** _________

16. Add lines 14 and 15 . . . . **16.** _________

17. Multiply line 1 by 85% (.85). . . . . **17.** _________

18. Taxable benefits. Enter the **smaller** of line 16 or line 17. . . . .**18.** _________

*Social Security income for line 1 is the amount from box 5 of Form SSA-1099; if filing a joint return, combine both spouses' SS amounts for line 1.

**Not applicable after 2017 unless Congress extends this adjustment

TAX WITHHOLDING ON SS BENEFITS

Taxpayers can elect to have federal income tax withheld from their Social Security benefits and/or the SSEB portion of Tier 1 Railroad Retirement benefits. Use Form ***W–4V***. They can choose one of the following withholding rates: ***7%, 10%, 12%, or 22%*** of the total benefit payment (flat dollar amounts aren't permitted).

LEGAL EXPENSES AND SOCIAL SECURITY

Sometimes individuals will incur legal expenses to produce or collect taxable income or in connection with the determination, collection, or refund of any tax. The legal expenses cannot be used to offset the SS benefits and can only be deducted as a Tier 2 miscellaneous itemized deduction. In addition, the deduction is limited to legal expenses for collecting only the ***taxable*** part of the taxpayer's benefits. Thus, prorate to determine the amount of legal expense attributable to the taxable Social Security (Rev Rul 87-102).

TCJA ***Caution***: The TCJA of 2017 suspended the Tier 2 miscellaneous itemized deductions for years 2018 through 2025, so even the legal fees prorated to the taxable Social Security award aren't deductible.

DIVORCE

An ex-spouse's benefits are the same as a spouse's as long as the marriage lasted at least 10 years and the ex-spouse who is receiving benefits has not remarried. Multiple ex-spouses can claim benefits if they meet the 10-year rule and have not remarried. If an ex-spouse remarries, the benefits cease and cannot be reclaimed. A worker will not be notified if an ex-spouse has applied for spousal benefits.

SURVIVOR BENEFITS

Unless the death was accidental, the couple must have been married for 9 months and the survivor must be at least 60 years of age (50 if disabled) to collect benefits. The benefits range from 71.5% to 99% of the deceased worker's basic amount. The survivor's benefits are the greater of the benefits that would be due to the decedent or the benefits the surviving spouse would be entitled to, based on their own work history. Other survivor benefits:

- Disabled widow or widower aged 50 through 59 -- 71½ percent;
- Widow or widower, any age, caring for a child under age 16 -- 75 percent.
- A child under age 18 (19 if still in elementary or secondary school) or disabled -- 75 percent. (Note: the benefits are taxable to the child on the child's tax return. But like any single individual the child's MAGI would have to exceed the $25,000 threshold before any of the SS is taxable.)
- Dependent parent(s) of the deceased worker, age 62 or older:
  - One surviving parent -- 82½ percent.
  - Two surviving parents -- 75 percent to each parent.

SAME-SEX MARRIED COUPLES

On June 26, 2015, the Supreme Court issued a decision in Obergefell v. Hodges, holding that same-sex couples have a constitutional right to marry in all states. As a result, more same-sex couples will be recognized as married for purposes of determining entitlement to Social Security benefits or eligibility for Supplemental Security Income (SSI) payments.

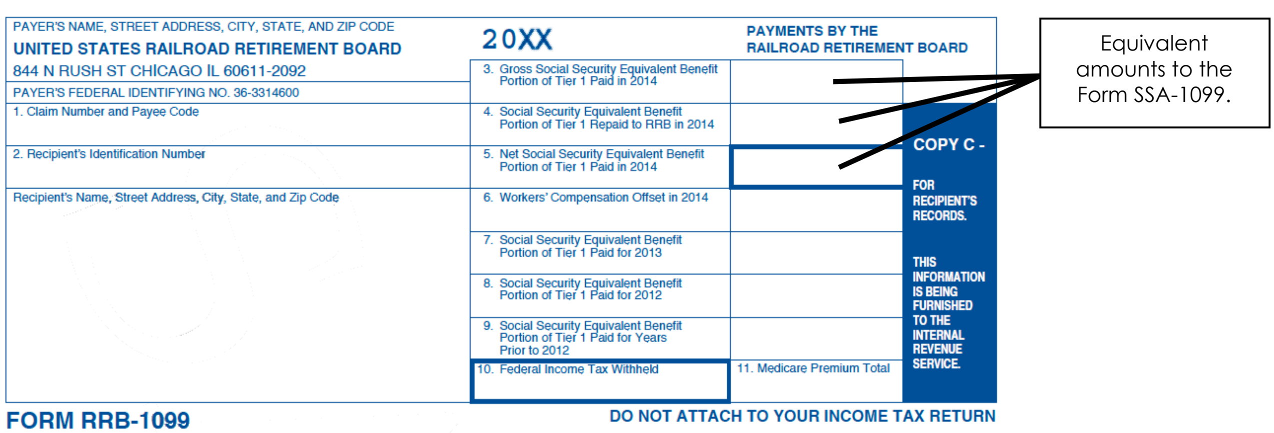
TIER 1 RAILROAD RETIREMENT BENEFITS

For railroad workers, Form RRB-1099 reports their social security equivalent benefits (SSEB) payments. The form is blue, as distinguished from RRB-1099-R which is green, and reports pension payments (see chapter 4.01 for pension reporting information).

The equivalent payments are reported as, and combined with, the taxpayer's Social Security benefits and taxed in the same manner as Social Security income.

Form RRB-1099 - is the Railroad equivalent to the SSA-1099. Boxes 3, 4 and 5 are same on both forms, and the RRB-1099 amounts are reported the same as SSA-1099 amounts.

Railroad Social Security Equivalent – RRB 1099



NONRESIDENT ALIENS

Nonresident aliens are not taxed on their SS benefits in the same manner as residents.

General rule - 85% of the Social Security benefits are taxed at the 30% rate unless exempt (or subject to a lower tax rate) by treaty. For example, a resident of Switzerland is taxed on 15% of total U.S. Social Security benefits received. Generally the Social Security Administration will withhold at the correct rate.

Countries where SS benefits are exempt from tax - Under treaties with the following countries, residents of those countries who are U.S. nonresident aliens are exempt from U.S. tax on U.S. Social Security benefits.

- Canada
- Egypt
- Germany
- India*
- Ireland
- Israel
- Italy
- Japan
- Romania
- United Kingdom

*Exempt only for individuals who are residents and nationals of India if the benefits are for services performed for the U.S., its subdivisions or local government authorities.

US - CANADIAN TREATY & SOCIAL SECURITY BENEFITS

Note: In the language of treaties, "State" means the United States or the foreign country that the treaty is with; it does not mean one of the 50 U.S. states or similar subdivisions of the foreign country.

Benefits under the social security legislation of a State (including tier 1 railroad retirement benefits, but not including unemployment benefits) paid to a resident of the other State shall be taxable only in the State of residence, subject to the following conditions:

(1) a benefit under U.S Social Security legislation paid to a resident of Canada is taxable in Canada as though it were a benefit under the Canada Pension Plan, except that 15% of the benefit is exempt from Canadian tax; ***Can. Treaty, Art. XVII(5)(a)*** and

(2) a benefit under Canadian social security legislation paid to a resident of the U.S. is taxable in the U.S. as though it were a benefit under the Social Security Act, except that a type of benefit that is not subject to Canadian tax when paid to residents of Canada is exempt from United States tax. ***Can. Treaty, Art. XVII(5)(b)***

Thus, a maximum of 85% of Canadian social security paid to a U.S. resident may be subject to U.S. taxes. However, if Canadian social security law is amended to make benefits means-tested at the source and not subject to tax, the benefits will not be subject to U.S. tax. ***Can. Protocol Treas. Tech. Expl. p4.***

GERMAN SOCIAL SECURITY BENEFITS RECEIVED BY U.S. RESIDENTS

Under the tax treaty with Germany, social security benefits paid by Germany to U.S. residents are treated for U.S. income tax purposes as if paid under U.S. legislation. In other words, these benefits are taxed the same way U.S. Social Security benefits are, with up to 85% of the German social security benefits subject to U.S. tax.

U.S. CITIZENS RESIDING ABROAD

A U.S. citizen who is a resident of one of the following countries is exempt from U.S. tax on their U.S. Social Security benefits:

Canada	Ireland	Romania
Egypt	Israel	United Kingdom
Germany	Italy (must also be a citizen of Italy)	

LUMP-SUM ELECTION

Taxpayers must include the taxable part of a lump-sum (retroactive) Social Security payment received during a tax year in that year's income, even if the payment includes benefits for an earlier year. However, this may cause the SS benefits to be taxed at a higher rate than they would have been if they had been reported in the prior year. To adjust for this inequity, a taxpayer may choose to use the lump-sum election if it generates a lower tax.

Lump-sum death benefits - Lump sum death benefit payments should not be confused with retroactive lump-sum payments. In some cases the SSA and the RRB will pay beneficiaries a lump-sum death benefit which is NOT subject to taxation.

Lump-sum computation - To determine if the lump-sum election is beneficial, complete the worksheets provided in IRS Publication 915. ***Revoking the lump-sum election*** - Once elected, the election can only be revoked with the consent of the Internal Revenue Service.

Reporting on the tax return - Most preparation software provides specific entries to accommodate the lump sum election. "LSE" is entered to the left of the Social Security reporting line on Form 1040 or Form 1040SR. The IRS instructions indicate there is no requirement to include the completed worksheets with the filed return.

REPAYMENTS MORE THAN GROSS BENEFITS

In some situations, a taxpayer may be required to repay Social Security benefits and the repaid benefits may exceed the gross benefits for the tax year. If this occurs, first combine the negative amount with benefits paid to the spouse if applicable. If the result is still negative and the repayments were for:

The current year - then no portion of the Social Security benefits is taxable and there is no other adjustment to make on the return.

A prior year - then to the extent that the negative amounts represent taxable Social Security in a prior year the taxpayer will have an itemized deduction or a credit.

TCJA

- ***Deduction $3,000 or less –*** *If the deduction is $3,000 or less, it can be claimed as a Tier 2 (subject to 2% of AGI reduction) miscellaneous itemized deduction under the "Claim of Right" doctrine. However, for years 2018 through 2025, the TCJA of 2017 does not allow Tier 2 miscellaneous deductions with the result that a taxpayer who has had to make a Social Security benefit repayment of $3,000 or less gets no tax deduction.*
- ***Deduction more than $3,000 -*** *If the deduction is more than $3,000 the taxpayer can choose between a Tier 1 miscellaneous deduction and a "Claim of Right" credit.*

See chapter 9.05 - Claim of Right for details on claiming the deduction or taking the credit.

SEPARATE FILERS MUST LIVE IN SEPARATE RESIDENCES TO REDUCE TAX ON SS BENEFITS

A married taxpayer who files a separate return and who lived with his or her spouse at any time during the year will generally be taxed on up to 85% of Social Security benefits. See line 8 of the worksheet above, where zero is entered, unless the taxpayer and spouse lived apart all year. The Tax Court has held that separate-filing spouses must live in separate residences to qualify as living apart, so that a smaller amount of their Social Security benefits would be includible in their gross incomes. Meaning of *"lived apart"* - The Tax Court concluded that living apart under Code Sec. 86 means living in separate residences. ***(McAdams, (2002) 118 TC No. 24))***

Nursing home as separate residence - It is not uncommon for one elderly spouse to live in a nursing home for the entire tax year while the other spouse lives in the marital residence with all mail for both spouses going to the marital residence. The spouse in the nursing home clearly should be considered to live in a separate residence. On the other hand the substantial medical deduction may preclude taxpayers from filing separately.

IRS CAN LEVY SS BENEFITS **-** The IRS can levy against SS benefits under a law enacted in 1997.

LIMITS ON EARNINGS AFTER RETIREMENT (EXCESS EARNINGS)

If a worker, spouse, divorced spouse, or minor child works after Social Security benefits start, special rules apply as to the amount of money that can be earned without impacting benefits. The following types of income will reduce the amount of a Social Security check if they exceed the limits:

(1) Gross wages,
(2) Net earnings from self-employment,
(3) Some government pensions,
(4) Insurance renewals, sales commissions, royalties and severance pay.

In the case of items (3) and (4), complicated rules apply. Call the Social Security Administration for additional information. The following types of income are not considered when computing the limitation:

Rental income [1]	Inheritances
Pension income [4]	Court case settlements
Interest & dividends [2]	Worker's compensation
Unemployment compensation	Lottery/contest winnings
Sick pay (after 6 months of retirement)	Tips less than $20 per month
Reimbursement for moving [3]	Reimbursement for travel [3]
Jury duty pay	Delayed payment from self-employment [5]

[1] If not in the real estate business. [2] If not in the broker business. [3] Income not counted by the IRS. [4] Some government pensions can reduce the amount of Social Security benefits. [5] SE income paid in a year after the year of entitlement to Social Security that is attributable to services performed prior to the first month of entitlement to Social Security

The earnings limit for those under full retirement age for 2019 is $17,640 (up from $17,040 in 2018). If full retirement age is reached in 2019, the earnings limit is $3,910 per month for each month in 2019 prior to the month full retirement age is attained.

Excess Earnings Reduction Amount - An individual can get Social Security retirement benefits and work at the same time. However, if the retiree is younger than full retirement age and makes more than the yearly earnings limit, the benefits will be reduced $1 for every $2 of earnings exceeding the annual limit. The annual limit for 2019 is $17,640 (up from $17,040 in 2018). Starting with the month the individual reaches full retirement age, the benefits will no longer be reduced.

In the year the individual reaches full retirement age the benefits will be reduced $1 for every $3 of earnings exceeding $46,920 (up from $45,360 in 2018). The earnings for this limit only include earnings prior to the month the iindividual reached full retirement age.

Mid-year Retirement **–** Some people who retire in mid-year have already earned more than their yearly earnings limit. That is why the Social Security Administration has **a special rule that applies to earnings for one year**, usually the first year of retirement. The special rule allows the Social Security Administration to pay a full Social Security check for any whole month they consider an individual retired, regardless of yearly earnings. If the individual will:

- Be under full retirement age for all of 2019, they are considered retired in any month that their earnings are $1,420 (2019) or less **and** they did not perform substantial services in self-employment.
- Reach full retirement age in 2019, they are considered retired in any month that their earnings are $3,910 or less **and** they did not perform substantial services in self-employment. "Substantial services in self-employment" means the individual devoted more than 45 hours a month to the business or between 15 and 45 hours to a business in a highly skilled occupation.

Full Retirement Age or Over – The excess earnings limitation does not apply to individuals who have reached full retirement age or over beginning the month that full retirement age is attained.

BIRTH YEAR*	FULL RETIREMENT AGE	BIRTH YEAR*	FULL RETIREMENT AGE
1937 or earlier	65	1955	66 and 2 months
1938	65 and 2 months	1956	66 and 4 months
1939	65 and 4 months	1957	66 and 6 months
1940	65 and 6 months	1958	66 and 8 months
1941	65 and 8 months	1959	66 and 10 months
1942	65 and 10 months	1960 and later	67
1943–1954	66		

**If born Jan 1 refer to previous year*

Quarter of Coverage (QC) - Is the basic unit for determining whether a worker is insured under the Social Security program. No matter how high the earnings may be, an individual cannot earn more than 4 QC's in one year.

Year	Earnings
2014	$1,200
2015	$1,220
2016	$1,260
2017	$1,300
2018	$1,320
2019	$1,360

If amount not shown it was not available at date of publication

CALIFORNIA DIFFERENCES

California does not tax Social Security benefits or Tier 1 Railroad retirement benefits which are treated the same as Social Security benefits.

FEDERALLY EXEMPT FOREIGN PENSIONS TAXABLE TO CA

The California BOE has a long-held position that U.S. treaties with foreign countries do not apply to California tax. So California does not conform to the Internal Revenue Code as it relates to treaties that exempt certain income from federal taxation. ***The result is that, although foreign pensions and social security may be exempt from federal taxation under U.S. treaties, the income is subject to California tax***.

In the ***Appeal of George S. Gilmour****, November 28, 2000, Case No. 34337* the taxpayer argued that a treaty between the U.S. and Great Britain exempts Social Security from taxation and Social Security is exempt from taxation by statute. The BOE position has been that tax treaties between the U.S. and other countries do not prevent California from taxing persons otherwise covered by such treaties *(****Appeal of M.T. de Mey van Streefkerk****, Cal. St. Bd. Of Equal., Nov. 6, 1985).* In support of this position, the U.S. Supreme Court has ruled that tax treaties the U.S. enters into generally do not prohibit the taxing activities of sub-national governments.

Only U.S. Social Security Benefits Exempt From CA Taxation - R&TC Sec. 17087(a) exempts only U.S. Social Security and there is no provision under either the California statute or the Internal Revenue Code to specifically exempt foreign social security from taxation by California.

SCHEDULE D ISSUES

- **Holding period for capital gains rates**: Over one year
- **Capital Gains Rates**
  - 0 %, 15% or 20%
  - See chapter details for breakpoints
- **Excluded from 0%, 15%, and 20% rates:**
  - Unrecaptured Sec 1250 gain – Maximum 25%
  - Collectibles – Maximum 28%
- **Annual Loss Limitation**
  - $3,000 ($1,500 MFS)
- **Capital Gain Deferral:** Election to invest capital gains in Opportunity Zone Funds defers and potentially eliminates tax – see Chapter 2.18

For several years, long-term capital gains (LTCG) and qualified dividends have been taxed at preferential rates of 0%, 15% or 20%, with the capital gains rate depending on the taxpayer's ordinary income tax bracket. If ordinary income was generally taxed at a rate below 25%, the capital gains and qualifying dividends were taxed at a 0% rate. If subject to a 25%-or-greater, but less than 39.6%, rate on ordinary income, the rate on LTCG and qualified dividends was 15%. For individuals whose taxable income exceeded the threshold for the 39.6% rate, the LTCG and qualifying dividends rate was 20%.

The Tax Cuts and Jobs Act, passed in December 2017, retained the 0%/15%/20% capital gains rates but specified taxable income amounts determine the breakpoints for the 15% and 20% rates instead of tax brackets. These amounts are shown on page 2.04.03 and are subject to inflation adjustment for years after 2018.

The maximum rate continues to be 28% for collectibles, and 25% for recaptured Sec. 1250 gains. The thresholds at which the 3.8% surtax on net investment income (see Chapter 12.05) apply do not match the capital gains rate thresholds and were not changed by the TCJA.

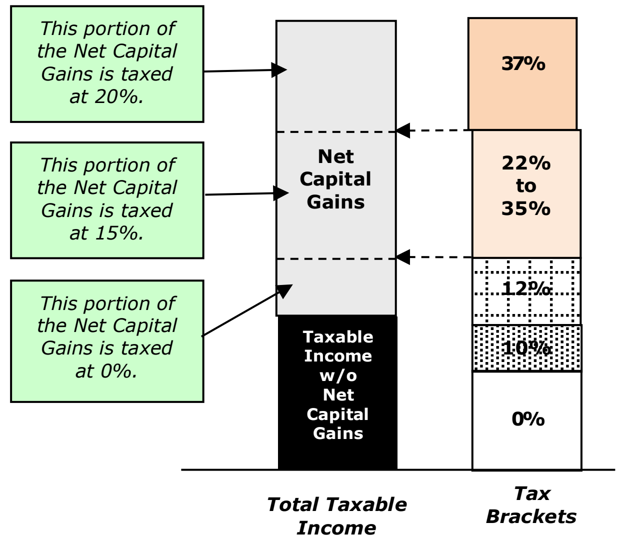
RAPID FINDER

UNDERSTANDING THE SCHEDULE D COMPUTATION (POST-2012):

The Schedule D has become one of the most complicated calculations on a tax return. Although the IRS publishes lengthy worksheets, and computerized tax programs transparently make the calculations (if data has been entered correctly), tax practitioners need to have an understanding of how the tax is determined (computed) on the Schedule D. Adjacent is a graphic 3-step illustration of the Schedule D tax computation.



Determine NET CAPITAL GAINS.

(+) Qualified Dividends

(-) Dividends Elected to be Treated as Investment Income (for Form 4952 limitation) (not exceeding the qualified dividends)

(+) Net Long-Term Gains

(-) 25% and 28% Gains (not exceeding the long-term gains)

NET CAPITAL GAINS

Net capital gains are taxed in the sequence shown in the illustration to the right. Where there are unrecaptured Sec 1250 gains taxed at 25%, or long-term collectibles and qualified small business stock gain taxed at 28%, the computation can become very complicated and the Schedule D and associated worksheets must be used to determine the tax.

DEFINITION OF NET CAPITAL GAIN:

For purposes of the maximum capital gains rates, the term "adjusted net capital gain" means the sum of:

(1) The excess of net long-term capital gains over net short-term losses, subject to certain netting rules, but *without* taking into account the otherwise applicable increase for qualified dividend income, reduced (but not below zero) by the sum of:
- (a) Unrecaptured Section 1250 gain, and
- (b) "28% rate gain", plus

(2) Qualified dividend income.

CAPITAL LOSSES:

When the net result on the Schedule D line 16 is a loss, the loss is limited to a maximum of $3,000 ($1,500 if married filing separately). Losses in excess of those limits can generally be carried forward to future years.

Preserving Capital Loss Carryovers - The question frequently arises whether or not an individual must file a return, even if not otherwise required to file, in order to preserve a capital loss carryover.

In reading the IRS instructions, it seems the answer is no based upon the following statement that appears in both IRS Publications 550 (Pg. 66) and 17 (Pg. 116), 2018 versions:

> *"When you figure the amount of any capital loss carryover to the next year, you must take the current year's allowable deduction into account, whether or not you claimed it and whether or not you filed a return for the current year".*

However, to claim a capital loss carryover the Schedule D instructions indicate the taxpayer needs a copy of their prior year 1040 and Schedule D to complete the capital loss worksheet to determine how much loss is carried forward from the prior year.

In figuring the carryover, the amount of the capital loss carryover is the amount of taxpayer's total net loss that is more than the **lesser** of the taxpayer's:

1. Allowable capital loss deduction for the year, $3,000 (1,500 MFS), or

2. Taxable income increased by the taxpayer's allowable capital loss deduction for the year and, in years before 2018 and after 2025, the taxpayer's deduction for personal exemptions.

It appears there is no actual requirement to file a return where one is not otherwise required to be filed. However, since the carryover is based upon the results of a prior year return, the taxpayer would have to be able to reconstruct the prior year return to prove the carryover if challenged on the amount of the carryover.

According to the Tax Court, and referencing Reg. Sec. 1.6001-1(e), if a capital loss is to be carried forward from one year to another, the taxpayer must keep records substantiating (1) that the taxpayer incurred a loss, (2) that the taxpayer is entitled to deduct the loss, (3) the character of the loss, and (4) the amounts of any capital gain offset during any subsequent years. (Xing F. Wang and Kathleen P. Lee v. Commissioner, T.C. Memo. 2017-081, May 15, 2017). So, not only is it necessary to keep a copy of the tax return and the documentation of the transactions that created the loss (1099-B, purchase records, etc.) for the year the loss originated, the taxpayer will need these records for each year until the loss is used up (plus at least 3 years thereafter for the statute to run out).

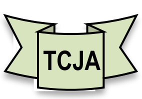
Best Practice: We believe that the best practice may be to actually file a return and run the statute of limitations even though a return is not actually required.

QUALIFIED DIVIDENDS:

Qualified dividends are also taxed at capital gains rates. To be "qualified" dividends, the dividends must generally be from a domestic corporation or a "qualified foreign corporation," and the taxpayer must have owned the stock for 60 days during the 121-day period beginning 60 days before the ex-dividend date (in the case of preferred stock, 90 days during the 181-day period beginning 90 days before the ex-dividend date).

TAX STRATEGIES & REMINDERS:

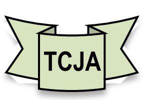
- **Reduced tax rates on homes** - Homeowners benefit from the reduced maximum capital gain rate which cuts taxes on sales of homes on which gains exceed the $250,000/$500,000 exclusion limits.
- **Reduced tax rates on second homes** - Second homes that are sold do not qualify for the home sale gain exclusion, but the owners benefit from the reduced capital gains rates.
- **Level I - 0% Tax Rate** - The 0% rate for net capital gains of taxpayers with taxable income below the amounts shown in the 15% table will be available for gains on stock transferred to low-bracket children and grandchildren who are not subject to the Kiddie Tax rules.
- **Level II - 15% Tax Rate** – The 15% rate applies to the portion of the gain starting at the amounts shown in this table and up to the amount in the 20% table.
  - **Taxable Income Where the 15% Capital Gains Rate Kicks in**



Filing Status	2015	2016	2017	2018	2019	2020
Single	$37,450	$37,650	$37,950	$38,601	39,376	40,001
Head of household	$50,200	$50,400	$50,800	$51,701	52,751	53,601
Married Joint	$74,900	$75,300	$75,900	$77,200	78,751	80,001
Married Separate	$37,450	$37,650	$37,950	$38,601	39,376	40,001

If values not shown they were not available at publication date.

- **Level III - 20% Tax Rate** – The 20% rate applies to the portion of the gain that exceeds the amounts shown below.



Filing Status	2015	2016	2017	2018	2019	2020
Single	$413,200	$415,050	$418,400	$425,800	434,550	441,451
Head of household	$439,000	$441,000	$444,550	$452,400	461,700	469,051
Married Joint	$464,850	$466,950	$470,700	$479,000	488,850	496,601
Married Separate	$232,425	$233,475	$235,350	$239,500	244,425	248,301

If values not shown they were not available at publication date.

- **Use Appreciated Stock to Help Support Low-Income Parents** – Aging parents with limited income often receive financial help from their more affluent adult children. Instead of giving the parent(s) after-tax cash, a child (taxpayer) who owns long-term appreciated stock should consider gifting the stock to the parent, who would then sell the stock and keep the proceeds. Depending on the parent's other income, there may be zero tax due on all or part of the gain from selling the stock.

While tax law generally restricts the transfer of assets (gifts) between individuals, an annual exclusion allows up to $15,000 (for 2019) to be transferred without gift or estate tax implications. This annual exclusion applies to each taxpayer and to each recipient. So a taxpayer could gift up to $15,000 to each parent per year. Non-cash gifts are valued at fair market value.

Careful planning is required, however, to maximize the amount of the gift while ensuring that the capital gain from selling the stock doesn't increase the parent's AGI to the point that other tax benefits are adversely affected (for example, making Social Security benefits taxable) or cause a jump in taxable income so that the zero capital gains tax rate won't apply.

- **Off-Set Short-Term Gains with Long-Term Capital Losses -** Short-term capital gains do not receive benefits of the special rates afforded long-term capital gains. Long-term capital losses, if used to offset long-term capital gains, reduce a gain that would be taxed at no more than 20%. The problem:
  - ST capital gains are taxed at regular rates.
  - LT capital losses if used to offset LTCG reduce 10% or 15% income.

  Therefore, taxpayers achieve a better overall tax benefit if they can arrange their transactions so as to offset short-term capital gains with long-term capital losses. Although this cannot always be achieved in light of investment strategies, when implemented, it will offset income that would otherwise be taxed at ordinary rates.

TRANSACTIONS EXCLUDED FROM THE SPECIAL RATES:

The following types of transactions are not eligible for the general reduced capital gains rates and instead are taxed at their own specific maximum rate:

- Collectibles (taxed at 28%),
- Unrecaptured Section 1250 gain (taxed at 25%), and
- Section 1202 gain on small business stock (taxed at 28% in some cases) – See Chapter 2.07.

Section 1202 Gain **–** Unless the gain qualifies to be 100% excluded, Sec. 1202 gain is equal to the gain on the sale of small business stock that is not excluded from gross income under Code Sec. 1202. This amount usually is 25% or 50% of the gain depending on when the qualifying stock was issued and whether the total gain on the sale of small business stock exceeds certain specified levels. ***Caution: A portion of Sec. 1202 gains is a tax preference item (unless the gain is 100% excludable). See special chapter on Small Business Stock – Chapter 2.07.***

Recaptured and Unrecaptured Real Estate Rental Section 1250 Gain

A frequent question we receive is the tax treatment of recaptured depreciation from the sale of real estate rental property. Gain from selling Sec 1250 property (real estate) is subject to recapture – the excess of the actual amount of depreciation previously claimed for the property over the amount of depreciation that would have been allowable under the straight-line method, limited to the gain on the sale, is taxed as ordinary income. However, this means that as long as the property is being depreciated using a straight-line method and held over a year, there is no Sec 1250 recapture but there will be "unrecaptured Sec 1250 gain," which is taxed at a maximum rate of 25%. The balance of the gain, if any, is taxed at the normal capital gains rate as explained above.

Rental real estate depreciation rates have been mandatorily straight line since 1987 with residential rentals being depreciated over 27.5 years and commercial property depreciated over 31.5 years or 39 years if placed in service after 5/12/1993. Thus in nearly all cases it is impossible for real estate property sold these days to have been depreciated at other than straight-line, and therefore no amount of depreciation is recaptured as Sec 1250 gain (Code Sec. 168(b)(3)(A)). But the amount of depreciation claimed on Sec 1250 property that is not recaptured as ordinary income under the Sec 1250 recapture rules is unrecaptured section 1250 gain, and is subject to a special capital gain tax rate of 25%.

> ***Example:*** *Jack, an individual, sells nonresidential real property on Aug. 15 for $200,000, realizing a gain of $50,000. This is Jack's only transaction involving a capital asset for the year. Jack held the property for more than one year. He depreciated the property using MACRS (straight-line), and claimed $25,000 of depreciation during his ownership. There is no depreciation recapture under Sec 1250 because Jack didn't claim accelerated depreciation. However, $25,000 of Jack's gain, representing depreciation deductions he had claimed, is unrecaptured Sec. 1250 gain. Lines 26a and 26g of Jack's Form 4797 will be zeroes because straight-line depreciation was used. The Unrecaptured Section 1250 Gain Worksheet in the Schedule D instructions will need to be completed before Jack's Schedule D Tax Worksheet can be computed. The* ***maximum*** *amount of tax he'll pay on the $25,000 of unrecaptured Sec 1250 gain is $6,250 (25% x $25,000) but his tax on the unrecaptured 1250 gain could be much less depending on his other income and the tax bracket he falls into.*

Special Recapture Situations

Even if straight-line depreciation is used to claim the regular depreciation deduction, depreciation recapture will apply in the following situations:

- *Bonus Depreciation* – If bonus depreciation is claimed on qualified leasehold improvement property placed in service before 2016 or qualified improvement property placed in service after 2015, the Sec 1250 recapture rules apply. The recapture amount is equal to the difference between the bonus deduction claimed and straight-line depreciation that could have been claimed on the bonus deduction.
- *Sec 179* - If a Sec 179 deduction is claimed on Sec 1250 property (e.g., qualified leasehold improvement property, qualified restaurant property and qualified retail improvement property), the Sec 179 allowance is subject to recapture under the recapture rules of Sec 1245. In this case, to the extent the gain is allocable to the expensed portion of the property, the Sec 179 amount may be recaptured in full as ordinary income.

1244 Stock – Section 1244 allows an ordinary loss (Form 4797) on the sale of stock from a domestic corporation of up to $50,000 annually ($100,000 on a joint return, even if the stock is only owned by one of the spouses), even though the loss would otherwise be treated as a capital loss. Losses in excess of the ordinary loss treatment retain the capital loss treatment. Sec 1244 stock sold at a gain is eligible for capital gain treatment. A corporation's stock generally qualifies for this treatment if, at the time the stock was issued, the corporation's gross receipts did not exceed $1 million. This is for awareness only; consult Sec 1244 rules for further details.

GENERAL RULES FOR CAPITAL TRANSACTIONS:

Income from gains on dispositions of property may be classified as either ordinary or capital gain, depending on the type of property involved in the disposition. Capital gains (and more favorable tax rates) are generated from the sale of "capital assets."

Capital assets include:

- Personal or investment-use property;
- Options, if the underlying property is capital.

Capital assets do not include:

- Inventory;
- Accounts or notes receivable;
- Supplies of a type regularly used or consumed in the ordinary course of a trade or business;
- Depreciable property used in business (this may receive capital gain treatment, however);
- Hedging transactions;
- Certain financial instruments held by commodities derivative dealers;
- Copyrights or letters created by the taxpayer;
- Government publications received free or at a discount; and
- Effective for dispositions after December 31, 2017, self-created property such as a patent, invention, model or design (whether or not patented), and a secret formula or process.

HOLDING PERIOD:

Whether a sale of a capital asset generates a long- or short-term capital gain depends on the length of time the asset sold has been held by a taxpayer. Under current law the short-term holding period is one year or less and the long-term period is more than one year. Start counting the holding period the day after the property is acquired and continue through the date of sale. Use the trade date as the disposition date for the sale of stocks and bonds.

Special holding period rules:

- If a taxpayer ***acquires an asset in exchange*** for another and the basis of the new asset is dependent on the basis of the old, the holding period of the new property includes the holding period of the old.
- For dispositions prior to 2018, ***patent property*** is generally deemed to have been held long-term, no matter how long the taxpayer held it.
- ***Inherited property*** is generally considered held long-term regardless of how long either the decedent or heir owns it.
- The holding period of ***repossessed property*** includes the time the taxpayer held it before original sale plus the time owned after repossession.
- ***Nonbusiness bad debts*** are always short-term.
- ***Worthless stock*** is treated as if sold on the last day of the tax year, and accordingly will be either long- or short-term depending when it was acquired.

CAPITAL GAINS RATES

2013 THRU 2017

Ordinary Income Bracket	Long-Term
To the extent the bracket is 10% or 15%	0%
To the extent the bracket is 25%, 28%, 33% or 35%	15%
To the extent income exceeds 39.6% bracket threshold*	20%
Unrecaptured Sec 1250 Gain	25%
Qualified Small Business Stock – 25% or 50% of Gain	Max 28% (AMT Pref)
Collectibles	28%

*thresholds are subject to inflation adjustment

Caution:
Capital gains are included in investment income and are subject to the 3.8% surtax on net investment income unless derived from a non-passive trade or business.

2019

Capital Gains Tax Rate	MFJ	MFS	HH	SINGLE
Zero	0 to 78,750	0 to 39,375	0 to 52,750	0 to 39,375
15%	78,751 to 488,850	39,376 to 244,425	52,751 to 461,700	39,376 to 434,550
20%	488,851 & Up	244,426 & Up	461,701 & Up	434,551 & Up
25%	Unrecaptured Sec 1250 Gain

20%	479,001 & Up	239,501 & Up	452,401 & Up	425,801 & Up
25%	Unrecaptured Sec 1250 Gain			
28% Max. (AMT Pref)	Qualified Small Business Stock – 25% or 50% of Gain			
28%	Collectibles			

<u>NETTING CAPITAL GAINS AND LOSSES</u>:

The law provides that capital gains and losses are netted as outlined below.

1. Short-term capital losses (including any short-term loss carryover) are applied first to reduce short-term capital gains.
   a. The net short-term capital loss is then applied to reduce any net long-term capital gain from the 28% rate group.
   b. Any remainder after the reduction in (a) is used to reduce unrecaptured section 1250 gain (25% rate group), and
   c. Finally, after the reductions in (a) and (b), the balance is used to reduce adjusted net capital gain 0%/15%/20% group.

   Thus, a net short-term capital loss reduces adjusted net capital gain only to the extent it exceeds the sum of 28% rate gain and 25% rate gain.

   Example – Netting capital gains and losses - *Marie has a short-term capital loss of $20,000. She also has:*
   - *Collectibles gain of $10,000 in the 28% rate group,*
   - *Unrecaptured section 1250 gain of $15,000 in the 25% rate group, and*
   - *Long-term capital gain of $25,000 in the 0%/15%/20% rate group.*
   - *Her net capital gain is $30,000.*

   Result:
   - *Marie's short-term capital loss is first used to completely offset the collectibles gain of $10,000.*
   - *The balance is then used to offset $10,000 of the unrecaptured Sec 1250 gain of $15,000.*
   - *No part of the short-term capital loss is available to offset any of the gain in the 0%/15%/20% group.*

2. Within each of the three long-term capital gain groups, gains and losses are netted to arrive at a net capital gain or a net capital loss for the group.
3. A net loss from the 28% rate group (including long-term capital loss carryovers) is used first to reduce gain from the 25% rate group. Any balance is then used to reduce net gain from the 0%/15%/20% rate group.
4. A net loss from the 0%/15%/20% rate group is used first to reduce gain from the 28% rate group. Any balance is then used to reduce net gain from the 25% rate group.

There can only be a capital loss in the 28% and 0%/15%/20% rate groups since the 25% group only applies to gain on the recapture of depreciation. If there were a loss on the sale of Sec 1250 property, the loss would be a Form 4797 ordinary loss that totally bypasses the Schedule D computation.

DIFFERING BASIS AMT AND REGULAR TAX

Depreciated Assets **–** Certain assets are depreciated differently for AMT than for Regular tax and consequently have a different basis (generally higher) for AMT purposes than for regular tax purposes even if the taxpayer has never been subject to the AMT. For example residential real estate rentals placed in service before 1999 are depreciated 27.5 Years for regular tax purposes and 40 Years for the AMT.

ISO Shares - If a stock option is a qualified option, sometimes referred to as an incentive stock option (ISO), generally no amount of income is included in income either at the time the option is granted or at the time it is exercised for regular tax purposes but not for AMT purposes. Income or loss is recognized when the stock is sold. Stock acquired under an ISO option is treated as a capital gain or loss if it is held:

- ***More than 1 year after*** the stock option was ***exercised***, ***and***
- ***More than 2 years after*** the option was, ***granted.***

Clients are not generally aware of the alternative minimum tax (AMT) and will forget that the stock acquired through an ISO has one basis for regular tax purposes and another for alternative minimum tax.

- **Regular Tax Basis** – is the option price per share.
- **AMT Tax Basis** – is the exercise price per share.

Thus, in the sale year, there is a negative adjustment for AMT purposes which will lower the tentative minimum tax, reducing or eliminating the AMT and possibly allowing a larger AMT tax credit if the tentative minimum tax is less than the regular tax.

BROKER BASIS REPORTING:

Every broker that is required to file an information return reporting the gross proceeds of a "covered security" must include in the return the customer's adjusted basis in the security and whether any gain or loss with respect to the security is short-term or long-term. (Code Sec. 6045(a))

The customer's adjusted basis is determined:

1. **Average Basis Method Not Permitted** - In the case of any security (other than any stock for which an average basis method is permissible under Code Sec. 1012), in accordance with the first-in first-out (FIFO) method unless the customer notifies the broker by means of making an adequate identification of the stock sold or transferred, and
2. **Average Basis Method Permitted** - In the case of any stock for which an average basis method is permissible under Code Sec. 1012, in accordance with the broker's default method unless the customer notifies the broker that he elects another acceptable method under Code Sec. 1012 with respect to the account in which the stock is held.
3. **Wash Sales** - Customer's adjusted basis is determined without regard to the wash sales rules unless the transactions occur in the same account with respect to identical securities. This will create matching problems for those sales where the basis has been adjusted under the wash sale rules.

Covered Security **-** The term "covered security" means any "specified security" acquired on or after January 1, 2011 (January 1, 2012 where the average basis method is permissible) if the security was:

1. Acquired through a transaction in the account in which the security is held, or
2. Was transferred to the account from an account in which the security was a covered security, but only if the broker received a statement under Code Sec. 6045A with respect to the transfer.

Short Sale - Reporting is in the year in which the sale is closed.

Specified Security - The term "specified security" means any:

(a) Share of stock in a corporation,

(b) Note, bond, debenture, or other evidence of indebtedness – to apply to acquisitions of less complex debt instruments acquired on or after 1/1/14 (see Reg. 1.6045-1(a)(14)(ii) and (n)(2) for definitions) and to more complex debt instruments with a fixed yield and maturity date and for more complex debt without a fixed yield and maturity date acquired on or after 1/1/2016 (Reg. 1.6045-1(a)(14)(ii) and (n)(3)),

(c) Commodity, or contract or derivative with respect to the commodity, if IRS determines that adjusted basis reporting is appropriate, and

(d) Other financial instrument with respect to which IRS determines that adjusted basis reporting is appropriate.

Form 1099-B – The 1099-B includes the basis and profit or loss information required by the broker reporting rules. The official format is shown below. Substitutes from brokers that incorporate the same information as required on the official form are permitted. Unfortunately, it seems no two are alike, making interpreting the information and entering it correctly into software a challenge to the return preparer. Broker statements that aren't categorized in such a fashion that permit copies of the statements to be submitted, and allow the practitioner to say "see attached" on the Form 8949, means that each transaction has to be separately listed – a real nightmare with clients who have a significant number of transactions for the year. IRS instructions clearly state that it is not permissible to enter "available upon request" and summary totals in lieu of reporting details on summary statements or Form 8949.

The 2019 version of 1099-B is the same as the 2018 form, except the years in boxes 8 & 10 are 2019 and in box 9 12/31/18

Form 1099-B (Keep for your records) www.irs.gov/Form1099B Department of the Treasury - Internal Revenue Service

Form 8949 – It is used to show the individual transactions and Schedule D is used for summary and calculation. For Form 8949 the transactions must be segregated into three categories for both long-term and short-term transactions. This will facilitate the IRS' ability to match transactions with the broker reporting requirements. The three categories are:

- Gains and Losses when 1099-B, Box 3 is checked – basis has been provided (check box A (Part I) or D (Part II) on 8949).
- Gains and Losses when 1099-B, Box 3 is not checked – basis is not provided (check box B (Part I) or E (Part II) on 8949).
- Gains and Losses where no 1099-B received (check box C (Part I) or F (Part II) on 8949).

The three categories cannot be mixed on a single Form 8949. Thus for example if you have one transaction in each category for long-term and one each for short-term, six separate 8949s will be required.

Part I is for the short-term transactions and Part II is for the long-term transactions.

Form 8949 has space for an entry for each transaction called "Adjustment, if any, to Gain or Loss." For example, this box is used to adjust for wash sales or to make an adjustment when the taxpayer disagrees with the broker's basis determination. A code corresponding to the reason for the adjustment must be entered in column (f). The list of codes and instructions for column (g) entries is included at the end of the chapter.

Example – Wash Sale*: Joe purchased 100 shares of X Corp on April 4, 2019 for $1,200 and sold the shares on August 8, 2019 for $1,000, resulting in a short-term capital loss of $200. On August 14, 2019 he purchased 100 shares of X Corp for $1,100. Because he purchased identical shares within 30 days of selling the first batch of X Corp at a loss, Joe has a wash sale and cannot deduct the $200 loss from the sale. On Form 8949, in addition to entering the description, purchase and sale dates, and sales price and cost amounts, he will enter 200 (positive number) in column (g) and code "W" in column (f). The positive 200 in column (g) offsets the $200 loss from the sale, thus resulting in zero gain or loss for the transaction.*

Form **8949** Department of the Treasury Internal Revenue Service

Sales and Other Dispositions of Capital Assets

► Go to *www.irs.gov/Form8949* for instructions and the latest information.

► File with your Schedule D to list your transactions for lines 1b, 2, 3, 8b, 9, and 10 of Schedule D.

OMB No. 1545-0074 2019 Attachment Sequence No. **12A**

Name(s) shown on return: JOE EXAMPLE | Social security number or taxpayer identification number: 111-11-1111

Before you check Box A, B, or C below, see whether you received any Form(s) 1099-B or substitute statement(s) from your broker. A substitute statement will have the same information as Form 1099-B. Either will show whether your basis (usually your cost) was reported to the IRS by your broker and may even tell you which box to check.

Part I **Short-Term.** Transactions involving capital assets you held 1 year or less are generally short-term (see instructions). For long-term transactions, see page 2.

Note: You may aggregate all short-term transactions reported on Form(s) 1099-B showing basis was reported to the IRS and for which no adjustments or codes are required. Enter the totals directly on Schedule D, line 1a; you aren't required to report these transactions on Form 8949 (see instructions).

You *must* check Box A, B, *or* C below. Check only one box. If more than one box applies for your short-term transactions, complete a separate Form 8949, page 1, for each applicable box. If you have more short-term transactions than will fit on this page for one or more of the boxes, complete as many forms with the same box checked as you need.

☑ **(A)** Short-term transactions reported on Form(s) 1099-B showing basis was reported to the IRS (see **Note** above)
☐ **(B)** Short-term transactions reported on Form(s) 1099-B showing basis **wasn't** reported to the IRS
☐ **(C)** Short-term transactions not reported to you on Form 1099-B

1 (a) Description of property (Example: 100 sh. XYZ Co.)	(b) Date acquired (Mo., day, yr.)	(c) Date sold or disposed of (Mo., day, yr.)	(d) Proceeds (sales price) (see instructions)	(e) Cost or other basis. See the **Note** below and see *Column (e)* in the separate instructions	Adjustment, if any, to gain or loss. If you enter an amount in column (g), enter a code in column (f). See the separate instructions. (f) Code(s) from instructions	(g) Amount of adjustment	(h) Gain or (loss). Subtract column (e) from column (d) and combine the result with column (g)
100 SH X CORP	4/4/19	8/8/19	1000	1200	w	200	0

Entering multiple transactions on Form 8949 – For individuals, instead of reporting each transaction on a separate row of Part I or Part II, a statement containing all the same information and in a similar format to the 8949 may be attached. The combined short-term total from all of the statements is entered in Part I with the appropriate box A, B, or C checked and the long-term total is entered in Part II with box D, E or F checked. If attaching a broker-provided statement, enter the name of the broker followed by the words "see attached statement" in column (a). Leave columns (b) and (c) blank. Enter code M in column (f), along with any other applicable codes. If there are statements for more than one broker, report the totals from each broker on a separate row. E-filers who don't report each transaction on a separate row must either include the 8949 as a PDF attachment to the return or attach the 8949 to Form 8453 and mail the forms to the IRS. Statements that are in the same format as the 8949 may be attached instead. (Form 8949 instructions, 2018)

Form 8949 not required in some cases – Certain transactions may be aggregated and reported directly on either line 1a (short-term) or 8a (long-term) of Schedule D in lieu of completing Form 8949. This option applies to transactions (other than sales of collectibles) for which:

- Form 1099-B or substitute statement shows basis was reported to the IRS and does not show any adjustments in box 1(f) (accrued market discount) or 1(g) (disallowed wash sale loss),
- The ordinary box in box 2 isn't checked, and
- No adjustments to basis, type of gain or loss (long- or short-term), or to the gain or loss are needed.

This exception for completing Form 8949 can be used for some of the transactions and the attachment of broker's statements may be used for other transactions to eliminate the need to list all transactions separately on the 8949. (Form 8949 instructions, 2018)

Schedule D **-** The column totals on Form 8949 for sales price (gross proceeds), basis and adjustments to gain or loss are transferred to the Schedule D. Also entered on Schedule D are the capital gains and losses passed through from partnerships, S corps, estates and trusts; amounts transferred from Forms 4797, 6252, etc.; capital gain distributions; and capital loss carryforwards. Thus the Schedule D is used to summarize and combine the information flowing from one or more Form 8949s and other forms.

Practice Tip

Most larger brokerage firms can generally provide the transactions on an Excel spreadsheet and most tax preparation software will map and read the spreadsheet data into the tax program, although you may still have to tag each transaction to denote whether it is a covered or uncovered transaction – covered transactions being those that are "covered" by the basis reporting requirements.

DETERMINING BASIS WHEN DOCUMENTATION IS MISSING:

The rules requiring brokers to report basis when stock is sold only apply to stocks acquired on January 1, 2011 or after. Even so, many brokers will report basis information, when known, for uncovered securities, such as those purchased before 2011 or otherwise not considered a covered security. Not only do clients need to confirm that the basis information reported by the broker is correct, but they may need to supply basis information for stocks for which the broker has no basis information. If the taxpayer cannot prove their basis amount (such as with trade confirmation tickets or brokerage statements), there may be no option but to use a zero basis. Sometimes internet research can help. For example, say a client inherited stock but doesn't know what the value was on the date of death, but does know what that date was. Using web sites such as http://bigcharts.marketwatch.com/historical/ to get the historical data could provide enough information to establish a basis.

Form 8937 – Report of Organizational Actions **–** Issuers of "specified securities" are required to file Form 8937, Report of Organizational Actions Affecting Basis of Securities, with the IRS when events occur such as nontaxable cash distributions or nontaxable stock distributions to shareholders, including stock splits. The report need not be filed with IRS and a copy is not required to be given to individual shareholders if the company posts a completed copy of the 8937 on its web site and keeps it accessible to the public for 10 years. The information included on the form may be helpful in determining basis when there have been mergers or spin-offs and your client doesn't have the details of how their original basis should be adjusted.

MONEY MARKET FUNDS:

A money market fund (MMF) is a type of mutual fund that generally holds short-term and low risk securities such as cash or cash equivalents, with the result that shares in these funds have typically been issued, valued and redeemed at $1.00 per share, and therefore no gain or loss resulted when shares were redeemed. However, the Securities and Exchange Commission (SEC) issued final rules in July 2014 that would require certain MMFs to value securities using market-based factors (floating value) that could result in redeemed MMF shares producing a gain or loss.

In response to the SEC's rules change, the IRS proposed regulations to simplify the recognition of gain or loss on floating-net asset value (NAV) MMF shares; the regulations were finalized, generally applicable to tax years ending on or after July 8, 2016. (Reg. Sec. 1.446-7; T.D. 9774, 7/7/16) Under the accounting method permitted and described in the regulations, aggregate gain or loss is determined for each "computation period," and no gain or loss is determined for any particular redemption of a taxpayer's shares in the MMF. Generally, under the NAV method, the net gain or loss for each computation period for the shares in an MMF to which the NAV method applies equals the ending value, minus the starting basis, minus the net investment in the MMF for the computation period. The net gain or loss for a tax year on shares in an MMF is the sum of the net gains or losses on shares in the MMF for the computation period or periods that make up the tax year. The final rules allow computation periods to be of equal or varying length whereas the proposed regs required them to be of approximately equal duration.

The proposed regs had allowed only floating-NAV MMFs to use the NAV method, while the final rules allow stable-NAV MMFs to use the NAV method as well. Capital gains and losses determined under the NAV method are treated as short-term capital gains and losses. The final regs allow MMF shareholders to use different methods of accounting for shares in different MMFs or for shares in a single MMF held in different accounts.

Accounting Method Change - Reg Sec 1.446-7(c)(8) provides that a change to or from the NAV method is a change in method of accounting and as such, the taxpayer will need to secure the consent of the Commissioner before changing accounting methods. Rev Proc 2016-39, issued as a companion to the final regs, provides that, under certain circumstances, such a change must be made under the automatic change procedures in Rev. Proc. 2015-13. Any such change will be made on a cut-off basis, and therefore no Sec 481(a) adjustment will be required or permitted.

In certain circumstances, Rev. Proc. 2016-39 permits taxpayers to change to the NAV method without filing a Form 3115, "Application for Change in Accounting Method." This simplified procedure applies to a taxpayer that holds shares in a stable-NAV MMF and wants to change to the NAV method for a taxable year if (1) the taxpayer has not used the NAV method for shares in the MMF for any taxable year prior to the year of change, and (2) prior to the beginning of the year of change, either (a) the taxpayer's basis in each share of the MMF has been at all times equal to the MMF's target share price ($1 in most cases), or (b) the taxpayer has not realized any gain or loss with respect to shares in the MMF.

Information Reporting - Brokers are not required to include the sale of NAV method shares on Form 1099-B for a sale of shares in a money market fund, effective for sales of shares in calendar years beginning on or after July 8, 2016 (i.e., 2017 for calendar year taxpayers). However, taxpayers and brokers can rely on the rules for sales of shares in calendar years beginning before July 8, 2016.

Wash Sales – See chapter 2.05.

INSURANCE COMPANY DEMUTUALIZATIONS:

Demutualization is the term that is used when a mutual owned insurance company converts to a stock company. ***Tax consequences for policyholders receiving stock or cash -*** IRS has issued a number of private letter rulings in which a conversion from a mutual life insurance company to a stock life insurance company in which policyholders exchange their membership interests in the company for stock is treated as a tax-free recapitalization under Code Sec. 368(a)(1)(E) with these results for policyholders (see e.g., PLR 200111013 and PLR 200112014):

- **No gain or loss recognized** – Policyholders don't recognize gain or loss on their exchange of membership interests for company stock under Code Sec. 354(a)(1).
- **Holding period includes membership period** - Under Code Sec. 1223(1), their holding period for the stock includes the period they held the membership interest if it was held as a capital asset on the date of the exchange.
- **Capital gain** - Policyholders receiving cash for their membership interests generally recognize capital gain under Code Sec. 302 and Code Sec. 1001. See holding period above to determine if gain is long- or short-term.
  - **Stock Basis –** The IRS position related to basis of stock received in a demutualization is that it is zero. However in *Fisher v. United States, 2008-2 ustc ¶50,481* a taxpayer was ruled to have no gain from a cash option (in lieu of stock) received in demutualization. That position was upheld by the U.S. Court of Appeals. The IRS decided not to appeal to the U.S. Supreme Court. However, although the IRS lost this case, the Service has not acquiesced; their position that the stock received from the demutualization has a zero basis has not changed. In another case the U.S. District Court of Arizona held that shareholders had basis in stock received in a demutualization, but the Ninth Circuit reversed this decision and agreed with the IRS that the taxpayers' basis in the stock received was zero. (*Dorrance v. United States, D. Ariz., 2013-1 ustc ¶50,236, rev'd, CA-9, 2015-2 ustc ¶50,588)*

CAPITAL GAINS ON INHERITED PROPERTY:

Holding period - Property acquired from a decedent is treated as having been held for more than a year if:

1. The person selling the property has a basis that is determined under the rules for inherited property, and
2. The property is disposed of within one year after the date of the decedent's death. Of course, if the person who received the property held it for more than one year before selling it, the sale would get long-term treatment under the normal holding period rules.

Basis - Under the rule of Code § 1014(a), the basis of inherited property is ordinarily stepped-up (or down) to its fair market value as of the date of decedent's death or alternate valuation date. The alternate valuation date is the date six months after a decedent's death, or if the property has been distributed within that six months, then the date of the distribution. *Code Sec. 1014(a); Code Sec. 2032* However, an alternate valuation date only applies if there is a taxable estate and using the alternate valuation results in a lower estate tax. (**Caution:** these rules do not apply to property inherited from an individual who died in 2010 if the "no estate tax" provision was elected by the executor – See Chapter 1.05).

Consistency reporting – When an estate tax return is filed after July 2015, an estate and others who are required to file Form 706 must complete and file Form 8971 and Schedule A to report the final estate tax value of property distributed or to be distributed from the estate. A copy of Schedule A must be provided to the beneficiary of the property. A beneficiary may not use a value higher than the value reported on Schedule A of Form 8971 as their initial basis in the property, and if the beneficiary reports a basis that is inconsistent with the amount reported on Schedule A, the beneficiary may be liable for a 20% accuracy-related penalty. The consistency in reporting applies only to property that was includible in the decedent's gross estate and resulted in increased estate tax liability (reduced by applicable credits) on the estate. If a 706 is not required because the value of the estate is less than the lifetime exclusion amount, but is filed only to preserve the deceased spouse's unused exclusion for the surviving spouse, Form 8971 is not required to be filed.

If no Federal estate tax return is required, an appraisal as of the date of the decedent's death for state inheritance or other transmission (e.g., legacy) taxes is used for basis purposes. In this situation, no alternate valuation date is used. These appraisals govern unless there is sufficient evidence of another value. *(Reg § 1.1014-3(a))*

GAINS ON BONDS PURCHASED AT A PREMIUM:

If you buy a bond at a premium, the following rules apply:

- *Tax Exempt Bonds* - the premium **must** be amortized over the term of the bond (Code Sec. 171(a)(2)). While no deduction is permitted for the amount of premium amortized in each year, the effect is to reduce basis in the bond by a corresponding amount. Thus, if the taxpayer holds it to maturity, no loss is recognized when the bond is paid off.
- *Taxable Bonds* - the premium **may** be amortized at the holder's election.

Normally, the sale, call before maturity or redemption of a municipal bond is treated the same as a taxable bond. If the bond was held long enough, any gain is taxed at long-term capital gain rates.

MARKET DISCOUNT BONDS (IRC SECTIONS 1276 & 1278):

If the value of a bond decreases after its issue date (usually because interest rates have increased), it is considered to have market discount. Bonds purchased on the secondary market at less than face value often have market discount. However, market discount bonds do NOT include obligations maturing within one year of issue, tax-exempt obligations purchased before May 1, 1993, U.S. savings bonds, and installment bonds.

What is Market Discount? – Market discount is the amount of the stated redemption price of the bond at maturity that is more than the taxpayer's basis in the bond immediately after it is acquired. Under a *de minimis* rule, market discount is zero if it is less than 1/4 of 1% (.0025) of the stated redemption price of the bond multiplied by the number of full years to maturity after acquisition by the taxpayer.

Election to Report Accrued Market Discount Currently - Taxpayers who purchase market discount bonds may elect to accrue the market discount and include the discount in income each year the bond is owned. The amount is reported as interest income. Additionally, the bond's basis is increased by the accrued discount. Once this method is elected, it applies to all market discount bonds acquired during the tax year and in future years. The election is irrevocable without consent of the IRS. To make the election, attach a statement to a timely filed return that states the market discount has been included in gross income for the year under IRC Sec 1278(b) and describe the method used to figure the accrued market discount for the year.

In the year the bond matures or is sold, Form 1099-B may show accrued market discount in box 1f. In that case, enter code "D" in column f and zero in column g of Form 8949; if the basis reported in box 1e of the 1099-B hasn't been increased by the accrued market discount for all years, also enter code "B" in column f of the 8949 and increase the basis entered in column e as necessary.

How to Report if Election Not Made - If the taxpayer does not elect to include the discount in income as it accrues, then when the bond is disposed of, any gain is treated as ordinary interest income, rather than capital gain, up to the amount of the accrued market discount. In either the long-term or short-term section of Form 8949, as applicable, report the sale as usual, but enter the accrued market discount amount included in box 1f of Form 1099-B as a negative amount in column g and enter code "D" in column (f). Also report the accrued market discount as interest income. (Caution: if the broker has provided a basis that is already adjusted for the accrued market discount amount, but the taxpayer did not make the election to report the discount annually, use code B in column f and in column g adjust the gain by the amount needed to correct the basis that was reported.) While each tax program functions slightly differently, the following entries should work on most programs – this example assumes that the broker had not adjusted the acquisition cost by the accrued market discount:

Description	Date Acq.	Date Sold	Sales Price	Cost	Col f Code	Adjust-ment	Gain/ (Loss)
2000 ABC Inc 4.5% 8/1/19	11/25/17	8/1/19	2000	1829	D	(171)	0

Also report the amount of accrued market discount as interest income on Schedule B, identified as "accrued market discount." In the illustration above, $171 will be entered in the interest income section of Schedule B.

Figuring Accrued Market Discount – The simplest way to figure the accrued market discount is the ***ratable method***: treat the market discount as accruing in equal daily installments during the period the bond is held. The daily amount is figured by dividing the market discount by the number of days after the date the taxpayer acquired the bond, up to and including the maturity date, and multiplying the result by the number of days the bond was held.

An alternative method is the constant yield method. Once made for a particular bond, this method cannot be changed. For information on computing the constant yield method, see IRS Pub. 1212.

Other Issues – See IRS Pub. 550, Chapter 1, for information on the effect on market discount bonds if the bond was originally issued at a discount, the treatment of partial principal payments and how to handle the discount on obligations with a fixed maturity date of one year or less from the issue date.

SECTION 1256 CONTRACTS & REGULATED FUTURES CONTRACTS:

Taxpayers report gains and losses from regulated futures contracts and other "Section 1256 contracts" annually under the "mark-to-market" rules. All Section 1256 contracts must be marked to market at year-end. Each contract held by a taxpayer is treated as if it were sold for FMV on the last business day of the year.

If a taxpayer holds Section 1256 contracts at the beginning of a tax year, any gain or loss later realized on the contracts must be adjusted to reflect any gain or loss taken into account with respect to the contracts in an earlier year. Any capital gain or loss on a Section 1256 futures contract is treated as if 40% of the gain or loss is short-term capital gain or loss, and 60% of the gain or loss is long-term capital gain or loss. Use Form 6781.

SETTLEMENT WITH STOCKBROKER YIELDED CAPITAL GAIN:

The IRS has privately ruled that an amount taxpayers received under a settlement agreement with their stockbroker after they accused him of mishandling their account was properly reportable as capital gain rather than as ordinary income. The IRS ruling specifies the loss recovery takes on the same character as the original losses, and therefore is treated as a long-term capital gain on Schedule D rather than ordinary income. (PLR 200724012)

CAPITAL GAINS FOR SELF-CREATED MUSICAL WORKS:

Capital gains treatment is allowed for musical compositions or copyrights of musical works created by the taxpayer's personal efforts when so elected by the taxpayer. (IRC Sec 1221(b)(3)) The election is made separately for each composition or copyright in a musical work by treating the sale as the sale of a capital asset, in accordance with the Schedule D/Form 8949 and its instructions. The election must be made on or before the extended due date of the return for the year of the sale.

PATENTS NO LONGER GET CAPITAL GAIN TREATMENT:

Prior to 2018, IRC Sec 1235 allowed the transfer (other than by gift, inheritance, etc.) of all substantial rights in a patent by an inventor and by certain individuals who acquired their interest before the invention was put into use to be treated as a sale or exchange of a capital asset held more than a year.

TCJA

The TCJA, effective for dispositions after December 31, 2017, amends section 1221(a)(3), which defines "capital asset," resulting in the exclusion of a patent, invention, model or design (whether or not patented), and a secret formula or process from the definition of a "capital asset." This change applies to the taxpayer who created the property and a taxpayer with a substituted or transferred basis from the taxpayer who created the property (or for whom the property was created). Thus, even though Sec 1235 wasn't repealed by TCJA, because of the change to Sec 1221, gains or losses from the sale of a patent, etc., will not receive capital gain treatment.

SHORT-SALE HOLDING PERIOD RULES:

Even if property used to cover a short sale was held more than the short-term holding period, under Code Section 1233(b) capital gain on the short sale is treated as short-term capital gain if the seller owns substantially identical property for not more than the short-term holding period. If property covering a short sale was held not more than the short-term holding period, capital loss on the sale is treated as long-term capital loss if the seller owns substantially identical property held for more than the short-term holding period.

STOCK OPTIONS:

Call Options – A call option (or simply a "call") is an option contract giving the owner thereof the right to purchase from the writer of the call, at any time before a specified future date and time, a stated number of shares of a particular stock at a specified price (the "strike price"). *(Rev Ruling 78-182, 1978-1 CB 265; 58-234, 1958-1 CB 279)*

Put Options – A put option (or simply a "put") is an option contract giving the owner thereof the right to sell to the writer of the put (i.e. "put it to him"), at any time before a specified future date and time, a stated number of shares of a particular stock at a specified price. *(Rev Ruling 78-182, 1978-1 CB 265; 58-234, 1958-1 CB 279)*

> ***Why options?*** Typically, an individual purchases a call option expecting the value of the stock to increase. The option writer expects the value to remain the same or decline. The option holder will exercise the option if the price of the stock increases beyond the strike price, but if the value declines, the holder will allow the option to lapse.

Caution - *Adverse tax effects can be triggered if the purchaser or seller of an option also has a position in the underlying security. The following are some of the potential tax ramifications:*

- *Certain combinations of options held contemporaneously with offsetting positions which have the effect of reducing both the taxpayer's risk of loss and opportunity for gain may trigger constructive sales treatment under IRC Sec 1259.*
- *Purchase of an option may trigger the wash sale rules if it occurs 30 days before or after the sale of substantially identical stock or securities (IRC Sec 1233(b)).*
- *The purchase of a put is treated under Section 1233(b) in the same manner as a short sale and may result in the creation of a tax straddle with respect to the underlying stock.*
- *If the underlying stock upon which the option contract is written becomes worthless, a contract will be deemed closed. (IRC Sec 1233(h)(1))*

Treatment by the Option Owner (Purchaser):

Purchase of Option – Puts and calls are capital assets in the hands of an investor. The amount the purchaser pays the writer of the option is referred to as the "premium" or the "option premium". Generally, no gain or loss is incurred upon the purchase of puts or calls and expenses incurred are not deductible but are added to the basis.

Sale of Call or Put Options before Exercise or Expiration – If a call option is sold prior to being exercised or expiring, the transaction is treated as the sale of a capital asset and any gain or loss is a capital gain or loss. Holding period will determine whether it is long- or short-term.

Put options other than "married options" are deemed to be short-term. The taxpayer's basis in the option is the total "premium" paid plus commissions.

Closing Sale – Listed Call or Put Options – A closing sale (i.e., the sale in the market of a call option identical to the one held) is taxed as the sale of a capital asset. To the extent any premium received in the sale (less commissions) exceeds the taxpayer's basis in the call option, the taxpayer will recognize a capital gain. If the taxpayer's basis exceeds the premium received, the taxpayer will recognize a capital loss. Holding period for call options will determine if it is long- or short-term. Put options other than "married options" are deemed to be short-term.

Call or Put Option Expires – If the option expires, it is deemed sold on the expiration date and the taxpayer recognizes a loss to the extent of the basis in the option. Holding period will determine if it's long- or short-term.

Call Option Exercised – If the taxpayer exercises the call option, no taxable event takes place. The taxpayer's basis in the call is added to the purchase price of the stock.

Put Option Exercised – When a put is exercised, the owner of the put sells the underlying stock to the writer of the put and it is the sale of the stock that is taxed. The put premium paid is added to the basis of the underlying stock. Any gain or loss resulting from the transaction is a capital gain or loss.

"Married" Put Options – Married put options receive special treatment when all of the following conditions apply:

- The put must be purchased on the same day as the stock the taxpayer intends to use for exercising the option, and
- The option must specify that such stock is to be used in exercising the option of the taxpayer within 15 days of when it identifies it as such, and
- If the put is exercised, it must be exercised through the stock identified. If all of the conditions are met, the sale will not be treated as a short sale for tax purposes.

Treatment by the Option Writer (Seller)***:***

Sale of an Option – There is no taxable event at the time the option is sold. It is treated as an uncompleted transaction until such time as the option is exercised, sold, lapses, or until the writer's obligation is terminated in closing the transaction.

Sales Commissions – The sales commissions are not deductible as investment expenses. They reduce the amount of premium recognized from the sale of the option(s).

Put or Call Expires – When a put or call expires, the writer recognizes a short-term capital gain to the extent of the deferred premium income less commissions.

Call Exercised – When the owner exercises the call, the call writer sells the underlying stock to the owner. For the option writer, the call premium is added to the strike price received and the gain or loss, recognized on the date of sale, is the difference between the total amount realized and the writer's basis in the stock. Short-or long-term treatment is based upon the holding period for the underlying stock.

Put Exercised – When the owner exercises a put, the writer is forced to buy the underlying stock from the owner. This is treated as the purchase of a security and the premium received by the writer reduces the basis in the stock. The holding period for the stock purchased begins when the stock was purchased, not when the put was sold (Rev Ruling 78-182, 1978-1 CB 265).

Closing Purchase – Listed Call or Put Options – A closing sale (i.e., the sale in the market of a call option identical to the one held) is taxed as a short-term capital gain or loss. The gain or loss is determined by subtracting the premium paid for the closing purchase from the premium received from the original sale of the option.

Repurchases Unlisted Options from the Holder – If the writer repurchases the option contract from the holder, the taxpayer will recognize a short-term capital gain or loss to the extent of the difference between the premium paid and the premium received.

NONRECAPTURED SECTION 1231 LOSSES/GAINS:

Under Code Section 1231(c), net Section 1231 gain for a tax year is treated as ordinary income to the extent of nonrecaptured net Section 1231 losses (if any) for the five most recent preceding tax years. If any amount is treated as ordinary income under Code Sec. 1231(c), that amount is to be allocated among the categories of net Section 1231 gain as indicated in IRS forms or regulations.

DAY TRADER:

Very active traders generally are in the same boat as regular investors when it comes to gains and losses. Regardless of how frequently they trade, their sales generate long- or short-term capital gain or loss reported on Schedule D.

Whether a taxpayer's investment activities are sufficient to constitute carrying on a trade or business requires an examination of the facts in each case.

CAUTION

The vast majority of taxpayers who manage their own investments are investors rather than traders. **Proving that one's investment activities rise to the level of carrying on a trade or business is a difficult hill to climb**.

In determining whether a taxpayer who manages his own investments is a trader, who is engaged in a trade or business, or an investor, who isn't, courts consider the:

- Taxpayer's investment intent;
- Nature of the income to be derived from the activity; and
- Frequency, extent, and regularity of the taxpayer's securities transactions.

According to the Tax Court (and this issue has frequently been there), the distinction between a trader and an investor is that a trader buys and sells securities with reasonable frequency in an effort to catch the swings in the daily market movements and thus profit on a short-term basis. On the other hand, an investor purchases securities to be held for capital appreciation and income, usually without regard to short-term developments that would influence the price of the securities on the daily market.

Written Election Required – To be a day trader a taxpayer must make the mark-to-market (MTM) rules election. To make that election, the taxpayer generally must file a required statement no later than the due date (without regard to extensions) of the original federal income tax return for the tax year immediately *preceding* the "election year." The statement must be attached to that return or, if applicable, to a request for an extension of time to file that return. (Rev Proc 99-17, 1999-7 IRB 52, 5.03(1))

It May Be Too late
For the election to apply to the 2019 year, it must have been made by Apr. 15, 2019.

Tax Treatment - Day traders who have elected to follow the mark-to-market (MTM) rules apply the following tax treatment to their transactions:

(1) Gain or loss is recognized on any security (or commodity) held in connection with his trade or business at the close of any tax year as if the security (or commodity) were sold for its fair market value on the last business day of the tax year, and

(2) Gain or loss is taken into account for the tax year as ordinary income or loss.

(3) Wash sale rules do not apply.

(4) Form 4797 and not Schedule D/Form 8949 is used to report the gains and losses.

In other words, a stock trader who closes out the year with a net loss can use it to offset ordinary income without any limitations, and may wind up with a net operating loss that, starting in 2018, can be carried forward. NOLs occurring prior to 2018 could be carried back 2 years and forward 20 years.

MATCHING GROSS PROCEEDS:

One of the most important aspects of preparing a Schedule D is making sure the gross proceeds from all transactions for the year are reported. Failing to match gross proceeds reported to the IRS will certainly trigger service center inquiry and on occasion, when a large discrepancy exists, it can trigger an audit.

However, frequently for a variety of reasons, it is necessary to make adjustments in the gain or loss. When this happens, be sure to report the full gross proceeds and make adjustments in the cost basis or adjust the gain or loss by entering an adjustment amount and using the appropriate adjustment code on Form 8949, if applicable.

Example – Matching gross proceeds - *After they are divorced, John and Jane sell their jointly-owned investment land for $300,000 ($150,000 allocated to each), but the entire gross proceeds are reported under John's social security number on Form 1099-S. Their basis in the property is $100,000 ($50,000 each), which results in a gain of $100,000 each for John and Jane. John's return might be prepared showing the entire $300,000 as the sales price and $200,000 as his basis, resulting in the correct gain of $100,000. However, this overstates his basis. Instead, a more accurate reporting method would be to enter John's basis on Form 8949 as $50,000 (his true basis) and an adjustment in col (g) of the 8949 of 150,000 and code the transaction with an N (nominee). Jane's return reports her sales price as $150,000 with a $50,000 basis, which also results in a $100,000 gain.*

Short Sale – Short sale transactions are not a taxable event until the short sale position is closed out. Prior to 2011, short sales that were still open at the close of the tax year resulted in a taxpayer having unaccounted for gross proceeds to deal with (because the broker was required to report the proceeds on Form 1099-B even if the position hadn't been closed). For sales closed on or after January 1, 2011, brokers will report as follows:

- If using covered securities, both the information concerning the securities sold to open the short sale and the information concerning the securities acquired to close the short sale will be reported on a single information return (1099-B).
- If using non-covered securities, brokers will report only the information related to the securities sold to open the short sale. Brokers may, but are not required, to report adjusted basis for the securities acquired to close the short sale and whether any gain or loss on the short sale is long-term or short-term.

When completing Form 8949, the following instructions apply for the dates in columns (c) and (d):

Acquisition date - col. (c): Enter the dat 02.04.16 acquired the stock delivered to the broker to close the short sale.

Sale date – col. (d): Enter the date the taxpayer delivered the stock to the broker to close the short sale.

Completing Form 8949, Columns (f) and (g) - The following chart is adapted from Form 8949 Instructions (2018).

NOTES: (1) Where "1099-B" is used, the same instructions apply if a substitute statement were received. (2) When instructed to enter a negative number, enter in parentheses. (3) If more than one code applies, net the adjustment amounts for entry in column (g).

Situation	Code to Enter in Col (f)	Other actions required
Received a Form 1099-B (or substitute statement) and the basis shown in box 1e is incorrect.	B	▪ If box B is checked at the top of Part I or if box E is checked at the top of Part II, enter the correct basis in col. (e) and -0- in col. (g). ▪If box A is checked at the top of Part I or if box D is checked at the top of Part II, enter the basis shown on Form 1099-B (or substitute statement) in column (e), even though that basis is incorrect. Correct the error by entering an adjustment in column (g). To figure the adjustment needed, see Worksheet for Basis Adjustments in Column (g) in 8949 instructions.
Form 1099-B received and the type of gain or loss (short-term or long-term) shown in box 2 is incorrect *If box 2 (Ordinary) is checked on the 1099-B and the security is a taxable contingent payment debt instrument subject to the noncontingent bond method, enter code O in column (f); use the* Worksheet for Contingent Payment Debt Instrument Adjustment in Column (g) *in the 8949 instructions.*	T	Enter -0- in col. (g) unless adjustment is required due to another code. Report the gain or loss in the correct part of Form 8949.
Form 1099-B or 1099-S received as a nominee for the actual owner of the property	N	Report the transaction on Form 8949 as if the actual owner, but also enter any resulting gain as a negative adjustment in column (g) or any resulting loss as a positive adjustment in column (g). As a result of this adjustment, the amount in column (h) should be zero. However, if the taxpayer received capital gain distributions as a nominee, report them instead as described under *Capital Gain Distributions* in the Instructions for Schedule D (Form 1040).
Sold or exchanged main home at a gain, must report the sale or exchange on Part II of Form 8949 (as explained in Sale of Your Home in the Instructions for Schedule D (Form 1040)), and can exclude some or all of the gain.	H	Report the sale or exchange on Form 8949 as if no exclusion were being claimed. Then enter the amount of excluded (nontaxable) gain as a negative number in column (g). See the example in the 8949 instructions for column (g)
Form 1099-B shows accrued market discount in box 1(f)	D	Use the *Worksheet for Accrued Market Discount Adjustment in Column (g)* in the instructions to figure the amount to enter in column (g). However, if a partial payment of principal on a bond was received, do not use the worksheet. Instead, enter the smaller of the accrued market discount or the proceeds in column (g). Also report it as interest income. If market discount has been included in income currently (i.e., each year), enter -0- in column (g). Before figuring the gain or loss, increase basis in the bond by the market discount included in income for all years. See the instructions for code B, above. If the disposition of a market discount bond results in a loss subject to the wash sale rules, enter "W" in column (f) and enter only the disallowed wash sale loss in column (g).
Sold or exchanged qualified small business stock and can exclude part of the gain.	Q	Report the sale or exchange on Form 8949 as if not taking the exclusion and enter the amount of the exclusion as a negative number in column (g). However, if the transaction is reported as an installment sale, see "Gain from an installment sale of QSB stock" in the Instructions for Schedule D (Form 1040)
All or part of gain for DC Zone assets or qualified community assets is excludable (see Sch D. instructions for further details)	X	Report the transaction on 8949 as if not taking an exclusion. Then enter the exclusion amount as a negative number in col. (g).

NOTES: (1) Where "1099-B" is used, the same instructions apply if a substitute statement were received. (2) When instructed to enter a negative number, enter in parentheses. (3) If more than one code applies, net the adjustment amounts for entry in column (g).

Situation	Code to Enter in Col (f)	Other actions required
Electing to postpone all or part of the gain under the rules explained in the gain under Schedule D instructions for any rollover of gain (for example, rollover of gain from QSB stock or publicly traded securities).	R	Report the transaction on 8949 as if not making the election. Then enter the amount of postponed gain as a negative number in col. (g).
Wash sale (nondeductible loss)	W	Enter the amount of the nondeductible loss as a positive number in col. (g). If the amount shown on Form 1099-B, box 1g (nondeductible loss) is incorrect, enter the correct amount of the nondeductible loss as a positive number in column (g) of the 8949, and if this amount is less than that shown on the 1099-B, attach an explanation of the difference. If no part of the loss is a nondeductible loss from a wash sale, enter -0- in column (g).
Nondeductible loss for other than a wash sale	L	Enter the amount of the nondeductible loss as a positive number in col. (g).
An expense of sale or certain option premiums are not reflected on 1099-B or 1099-S (or substitute statement) by an adjustment to either the proceeds or basis shown	E	Enter in column (d) the proceeds shown on the form or statement received. Enter in column (e) any cost or other basis shown on Form 1099-B (or substitute statement). In column (g), enter as a negative number any selling expenses and option premium paid (and that are not reflected on the form or statement received) and enter as a positive number any option premium received (and that is not reflected on the form or statement received).
Loss from sale, exchange or worthlessness of Sec 1244 (small business) stock that exceeds the maximum amount that can be treated as an ordinary loss	S	See "Small Business (Section 1244) Stock" in the Schedule D (Form 1040) instructions.
Collectibles were disposed	C	Report the disposition as usual but enter -0- in col. (g).
Multiple transactions are reported on a single row of Form 8949	M	See "Reporting" in text. Enter -0- in col. (g) unless another adjustment applies.
Adjustment not explained in this chart	O	Enter the adjustment amount in col. (g). Although the instructions don't require attachment of an explanation, doing so is recommended by the author.
Electing to postpone all or part of gain invested in Qualified Opportunity Funds (QOF)	Z	Report the transaction that generated the gain being deferred as usual (do not make any deferral adjustments in col. (g)). Report the deferral on its own row of Form 8949; check box C on Part I or Part II depending whether the holding period of the gain being deferred is short- or long-term. In col. (a), enter only the EIN of the QOF into which the gain was invested. In col. (b) enter the date invested in the QOF. Leave columns (c), (d) and (e) blank. Enter "Z" in col. (f), and in col. (g) enter as a negative the amount of deferred gain. Use separate lines if multiple investments were made in different QO Funds or in the same QO Fund on different dates. Gains of the same character (but from different transactions) that were invested on the same date into the same QOF, can be grouped on the same row.

CALIFORNIA DIFFERENCES

California does not have capital gains rates and all such income is taxed at the regular tax rates.

California does not conform to the TCJA amendment to IRC Sec 1221 that excludes a patent, invention, model or design (whether or not patented), and a secret formula or process held by the taxpayer who created the property (and certain other taxpayers) from the definition of a capital asset. Sales of these assets should be reported as capital assets on Schedule D (540), California Capital Gain or Loss Adjustment.

California does not conform to the deferral and exclusion of capital gains reinvested or invested in qualified opportunity zone funds under IRC Sections 1400Z-1 and 1400Z-2.

WASH SALES

WASH SALE DEFINITION: A "wash sale" is a sale or other disposition of stock or securities, **resulting in a loss**, in which the seller, within a ***61-day period (which begins 30 days before and ends 30 days after the date of such sale or disposition),*** replaces the stock or securities by acquiring (by way of purchase or exchange on which the full gain or loss is recognized for tax purposes), or entering a contract or option to acquire, substantially identical stock or securities. (IRC Sec. 1091(a); Reg. Sec. 1.1091-1(a))

RAPID FINDER

OBJECTIVE OF A WASH SALE: Typically, the objective of a wash sale would be to take advantage of the deduction for any capital losses, and then repurchase the shares immediately thereafter.

TAX TREATMENT:

Gains - No special tax rules apply if an investor realizes a gain on a wash sale of stock or other securities; rather, the sale will be taxed under the rules peculiar to both the type of disposition and to the particular stock or securities sold.

Losses - On the other hand, to the extent that shares of stock or securities sold are replaced in a wash sale, any loss realized on the stock or securities sold ***may not be recognized for income tax purposes.*** (IRC Sec. 1091(b); Reg. Sec 1.1091-1(c))

REPLACEMENT:

By gift, inheritance or tax-free exchange - The replacement of stock and securities by way of gift, inheritance, or tax-free exchange will not result in a wash sale. See Reg. Sec. 1.1091-1(f).

Stock warrants, convertible stock - For purposes of the wash sale rule, a stock warrant is considered to be an option to acquire stock of the issuing corporation. (Rev Rul 56-406, 1956-2 CB 523) Preferred stock which is convertible into common stock of the same corporation without restriction is considered to be an option to acquire such common stock. (Rev Rul 77-201, 1977-1 CB 250)

Reducing purchaser's holdings - A bona fide sale of a portion of the shares of stock purchased in a single lot for purposes of reducing the purchaser's holdings in that stock is not a wash sale even though the sale occurs within 30 days after the lot was acquired. (Rev Rul 56-602, 1956-2 CB 257)

Delayed stock delivery - A disposition of stock or securities may not be taken out of the definition of a "wash sale" by merely postponing delivery until more than 30 days after the date of the shares of stock or securities are replaced. (Rev Rul 59-418, 1952-2 CB 184) A purchase of substantially identical stock or securities during the 61-day period will trigger the wash sale rule even though the purchase is made on margin or pursuant to subscription rights acquired prior to the beginning of the 61-day period. See Rev Rul 71-316, 1971-2 CB 311; Rev Rul 71-520, 1971-2 CB 311.

Stock bonus shares - Where a taxpayer received 10 shares of stock as a bonus from his employer, sold them at a loss, and then within the 61-day period received another bonus of 10 shares of the same stock, the Service ruled that a wash sale had occurred; the tax basis of shares received as a bonus is their fair market value at the time of payment. (Rev Rul 73-329, 1973-2 CB 71)

Employee stock options - An employee who, under an employer-employee restricted stock option plan was granted an option to purchase stock of his employer was deemed for purposes of the wash sale rule to have entered into an option to acquire that stock on the date the option is granted; the stock purchased pursuant to such option is deemed to have been acquired on the date the certificates are issued. (Rev Rul 56-452, 1956-2 CB 525)

REPLACEMENT STOCK OR SECURITIES BASIS: The code does not disallow the loss permanently. The code provides that:

1. The ***tax basis*** of the replacement stock must be adjusted to account for the unallowed loss. (This generally has the effect of adding the amount of the unrecognized loss to the cost basis of the replacement stock or securities.) IRC Sec. 1091(d); Reg Sec 1.1091-2, and
2. The ***holding period*** of the replacement stock or securities must be adjusted. This is accomplished by tacking on the holding period of the security sold to the holding period of the replacement securities.

MATCHING TRANSACTIONS: Where identical quantities of stock or securities are sold and replaced in a wash sale, there is little problem in applying the rules discussed above. However, where unequal quantities are sold and replaced or where sales and/or replacements are made in multiple lots (or transactions), the stock or securities sold and the replacement stock or securities must be matched on a chronological basis (beginning with the earliest loss and earliest replacement) before the rules can be properly applied. (IRC Secs. 1091(b) and (c); Reg. Sec. 1.1091-1)

SUBSTANTIALLY IDENTICAL: Whether stocks or securities are substantially identical depends on the facts and circumstances of each case. (Reg. Sec. 1.1233-1(d)(1)) Ordinarily, stocks or securities of one corporation are not substantially identical to stocks or securities of another corporation; however, a different result may occur as, for example, in a reorganization, where facts and circumstances indicate that the stocks and securities of predecessor and successor corporations are substantially identical. (Reg. Sec. 1.1233-1(d)(1)) Where voting trust certificates eventually could be exchanged for common stock held by the trust, the certificates were held to be substantially identical to the common stock of the same corporation. See Kiddler v. Comm., 30 BTA 59 (1934).

Convertible preferred - Where preferred stock is convertible into common stock of the same corporation, the relative values, price changes and other circumstances may make the preferred and common stocks substantially identical. (Reg. Sec. 1.1233-1(d)(1); Rev Rul 77-201)

Stock warrants - A sale of a stock warrant followed within 30 days by purchase of stock are substantially identical only if the relative values and price changes are similar. (GCM 39036 (9-22-83))

Options - Options to buy securities apparently can be considered substantially identical not only to the underlying stock, but to other options or contracts to buy stocks or securities. (Sec 1091(a))

Bonds - Generally, bonds are substantially identical if they are not substantially different in any material feature and are not substantially different in several material features considered together (each of which, if considered alone, would not be regarded as substantial). (Rev. Rul. 58-211) The following are considered material features:

- The interest rate of a bond – Rev Rul 60-195, 1960-1 CB 300
- Maturity dates - Rev Rul 76-346, 1976-2 CB 247
- Differences in bonds as they exist at purchase and at sale - Rev Rul 58-211

MONEY MARKET FUNDS

If a shareholder of a floating-NAV MMF (see Chapter 2.04 for details on this type of money market fund) were to report each redemption of their funds as a sale, then that shareholder would typically experience frequent wash sales. Revenue Procedure 2014-45 provides relief for such a shareholder. If the redemption results in a loss, the IRS will not treat the redemption as part of a wash sale. (Rev. Proc. 2014-45) The final regulations issued in July 2016 did not extend the exemption in Rev Proc 2014-45 to stable-NAV MMFs because the regulations allow shareholders of stable-NAV MMFs to use the NAV accounting method, under which net gain or loss is determined for each computation period rather than each redemption. Thus without a loss on a specific redemption, the wash sale rule does not apply.

WASH SALES & IRA ACCOUNTS: Where a taxpayer sells securities at a loss and purchases substantially identical securities in the taxpayer's IRA or Roth IRA, the IRS in Revenue Ruling 2008-5 has determined that the wash sale rules apply to such a sale and the loss is disallowed. The basis of the securities in the IRA is increased by the amount of the loss (but the basis of the IRA itself is not increased).

CALIFORNIA DIFFERENCES California conforms to the federal wash sale rules.

EMPLOYEE STOCK OPTIONS

Overview

- **Non-qualified stock options**
  - FMV at exercise minus option price = W-2 Income at time of exercise
  - Basis for later sale: FMV at exercise
- **Qualified stock option**
  - Also known as Incentive Stock Options (ISO)
  - Regular tax basis: Option price
  - AMT tax basis: FMV at exercise
  - AMT Preference in year of exercise: FMV at exercise minus option price
  - Qualifications - holding period for capital gains treatment at sale:
    - **More than 1 year after** the stock option was **exercised**, **and**
    - **More than 2 years after** the option was **granted**.
    - Otherwise treatment similar to non-qualified option

Pubs Forms

- **Pub 525** – Taxable and Non-Taxable Income
- **Form 3921** - Exercise of an Incentive Stock Option Under Section 422(b)
- **Form 3922** - Transfer of Stock Acquired Through an Employee Stock Purchase Plan Under Section 423(c)

Note: As complicated as this subject is, there is no specific IRS publication dealing with the sale of qualified (ISO) and non-qualified options.

The Details

This section will explore the two types of stock options, nonstatutory and incentive stock options (statutory) plus the tax treatment for various transactions involving those two options. In order to provide comparative examples of the various tax treatments, ***the same set of circumstances (illustrated below) will be used for all examples.*** Assume no sales costs.

Comparative Example Data: Employer Stock: Sharp, Inc.
Number of Shares…………………………..1,000
Exercise FMV (per share)…….…..$ 120.00
Option Price (per share)……………….$20.00
Bargain Element (per share)….…..$100.00
Regular W-2 Wages (for year)……$75,000
Filing status: Single

<u>NONSTATUTORY OPTIONS</u>

In the year a nonstatutory option is exercised, the taxpayer's employer will usually include the bargain element gain in the taxpayer's W-2 for that year and treat that income as wages subject to the usual withholding (income tax, FICA, etc.) The amount included in wages should be noted and coded "V" in Box 12 of the W-2.

<u>When is the Option Taxable?</u> If the FMV of the stock on the date the option is granted is greater than the option price, the taxpayer will generally incur taxable income in the year of the grant to the extent of the difference between the grant price and the FMV. If the exercise price at the time of the grant is higher than the FMV, or if the FMV of the stock is not readily determined, the income is included in the year the stock option is exercised.

<u>Stock Sold in Year of Exercise -</u> Typically, the stock is sold by a brokerage house, withholding taxes deducted and remitted to the employer, and the taxpayer issued the net check. Since the gain is already included in the taxpayer's W-2, the stock transaction may or may not need to be reported on Form 8949 as short-term with the cost basis being equal to the FMV at exercise and the sale price being the proceeds amount per the 1099-B (if one is issued or the same amount as the cost basis if not). If the cost and sales price amounts are the same, there will be zero net gain or loss. Otherwise there may be a small loss, accounting for the sales costs. You may wish to use a special ID for the transaction's description such as "[Company Name] NQ Opt" or "NQ Stk Opt – W2 Gain". If a 1099-B was issued and the proceeds amount has not been reduced by selling expenses (e.g., commissions), enter the amount of the selling expenses as an adjustment in column (g) of Form 8949 and use adjustment code E in column (f). If no 1099-B was issued, reduce the gross proceeds by the selling expenses, but do not make a code E adjustment for columns (f) and (g). If no 1099-B was issued and no selling expenses were incurred, the transaction does not need to be included on Form 8949 (taxable income has been included in W-2 wages).

Description	Acquired	Sold	Sales Price	Cost Basis	Gain
NQ Stk Opt - W2 Gain	06/12/19	06/12/19	120,000	120,000	-0-

Gain added to W-2 ($100 x 100)………………..	$ 100,000
Stock Basis for Regular Tax Purposes………..	$ 120,000
Stock Basis for AMT Purposes………………….....	$ 120,000
Tax Preference……………………………...........	None (1)
AMT Tax Credit Carryover……………………….....	No (1)

(1) Unlike Incentive Stock Options (ISO), non-qualified options do not in themselves create an Alternative Minimum Tax. There is no deferral preference; then there can be no AMT Tax Credit Carryover as a result of a non-qualified option.

Stock Not Sold in Year of Exercise: This would be an extremely rare case since the taxpayer would be required to front both the cost of the stock ($20,000 in our example) and be required to pay the employer an amount equal to the withholding taxes on the imputed gain ($100,000 in our example) which is being added to the taxpayer's W-2. If this occurs, nothing is required other than to report the W-2 income. The stock basis will be the exercise price ($120/per share in our example) and the holding period starts on the date the option was exercised (stock was purchased). The decision to hold the stock is an investment decision and the tax implications are the same as having purchased the stock on the open market on the date of the exercise.

Planning Issues:

1. The taxpayer's tax bracket in the year of exercise. Try to plan the exercise in a year when the bracket is low or there are offsetting deductions.
2. FICA Limit. Since the gain will be subject to FICA taxes, the taxpayer would minimize those taxes by exercising the option in a year the taxpayer will have already reached the maximum Social Security wages. The gain will also be subject to the additional 0.9% Medicare (Hospital Insurance) withholding tax if the taxpayer's FICA wages exceed $200,000. Since the gain is treated as ordinary (wage) income, it will not be subject to the 3.8% net investment income surtax, but its inclusion in income does count toward the employee's MAGI, and could push the employee above the threshold at which the 3.8% surtax applies.

Restricted Stock Units **-** Restricted stock units (RSUs) are not the same as restricted stock options. RSUs are an unsecured promise by the employer to grant a set number of shares of stock to the employee upon the completion of a vesting schedule. The stock is not issued at the time of the grant but only after the recipient of the unit satisfies the vesting requirements, which may be met once a predetermined amount of time has gone by or by either the company or the individual attaining pre-established, objective performance goals. If the requirements are not met or the employee leaves the employ of the company prior to the end of the vesting period, the units are typically forfeited to the company. Some types of plans permit a cash payment to be made in lieu of the stock, while most plans require that actual shares of the stock can't be issued until the underlying vesting requirements are met.

Taxation of RSUs **-** Normally, an employee receiving restricted stock units is not taxed at the time of the grant but at vesting, when the restrictions lapse and the employee actually takes receipt of the shares or cash equivalent (depending on the company's plan rules). The amount of income subject to tax is the difference between the fair market value of the grant at the time of vesting, minus the amount paid for the grant, if any. This income is ordinary (compensation) income. There is **no AMT preference** as there is with ISOs. However, the taxpayer could still end up in AMT territory, but this would be due to the increased income, not any other specific attribute of the RSU.

Treatment When Shares Are Sold - When the shares acquired through the RSU plan are sold, the employee recognizes capital gain income or loss, either short- or long-term depending on the actual time the shares are held. The holding period of the shares begins at the date the shares are distributed (which may or may not coincide with the vesting date). The basis of the shares is equal to the amount paid for the stock plus the amount included as ordinary income.

Strategies

Strategy – for same day sales of stock acquired via a stock option, ***Rev. Proc. 2002-50*** provides that the broker is not required to issue Form 1099-B if certain conditions are met, such as when the broker doesn't charge a commission and the employer certifies in writing to the broker that any compensation income generated in the transaction will be reported in the employee's W-2 (or 1099 for an independent contractor).

When the exception in Rev. Proc. 2002-50 doesn't apply, the broker must report the gross proceeds of sale for the transaction on Form 1099-B. In turn, even though the profit is included in the employee's W-2, the taxpayer must report the sale on Form 8949 for the Schedule D to account for those gross proceeds of sale or risk generating correspondence from the IRS. However, frequently overlooked are the broker sales charges, which can generate a short-term capital loss. For example, assuming a 1099-B shows gross proceeds of $55,000, the option cost was $5,000, a brokerage charge of $300 was not reflected in the proceeds amount, and a nonstatutory gain of $50,000 was added to the W-2, there would be a short-term capital loss of $300, and the Form 8949 entry for the transaction would look like:

(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)
Non-stat Opt (Gain in W-2)	7/3/19	7/3/19	55,000	55,000	E	(300)	(300)

INCENTIVE STOCK (STATUTORY) OPTIONS

TCJA

Note: Under TCJA the AMT exemption amounts have been increased and the phase-out threshold for the exemptions has been substantially increased (see chapter 8.00). As a result, larger blocks of incentive option stock can be exercised and held long term without triggering the AMT. Of course you will have to run the numbers to determine where the AMT is triggered.

If the option is an incentive stock option, generally no amount of income is included in income either at the time the option is granted or at the time it is exercised. <u>Income or loss is recognized when the stock is sold</u>. If the stock acquired under the option is held for:

- ***More than 1 year after*** the stock option was ***exercised***, ***and***
- ***More than 2 years after*** the option was ***granted***,

the gain or loss from the sale of the stock is generally a capital gain or loss. The gain for regular tax purposes will be the difference between the exercise price and the sales price. If the stock is sold prior to the required holding period, the income to the extent of the bargain element will be treated as ordinary income (wages).

<u>No FICA Tax on ISOs</u> **-** Both the income from exercising an ISO and the proceeds received upon disposition of the stock acquired in exercising the ISO are exempt from FICA tax. Thus, if not considered FICA wages, the income from exercising the ISO won't be subject to the extra 0.9% Medicare (Hospital Insurance) withholding when wages exceed $200,000. This also means that the ISO income isn't taken into account for purposes of determining Social Security benefits. (This provision does not apply to nonstatutory stock options; when income from a nonstatutory stock option is recognized, it is subject to FICA.) However, when the stock acquired from the ISO is sold in a qualifying disposition, any capital gain from the sale is considered investment income for purposes of the 3.8% surtax on net investment income when the taxpayer's MAGI exceeds the NII MAGI threshold.

<u>AMT Deferral Preference</u> **-** When a taxpayer exercises an incentive stock option, he/she generally recognizes alternative minimum taxable income equal to the excess of the fair market value of the stock on the exercise date over the exercise price; since the ISO preference is a deferral item of preference, an Alternative Minimum Tax Credit carryover may be generated. The basis of the purchased stock, for alternative minimum tax purposes, would be increased by the amount of the AMTI that was recognized when the stock was purchased via the exercise of the option.

The best way to understand incentive stock options is to look at the various possibilities using our comparative example.

Example - Year of Exercise - Stock Sold: This is the more frequently encountered situation, simply because if the stock is held, the taxpayer must have the available financial resources to purchase and hold the stock. More typically the stock is purchased and sold immediately without any cash being required from the taxpayer. The bargain element portion is added to the taxpayer's W-2. The stock transaction is reported on Schedule D with the sales price and the cost basis being the same when entered on Form 8949. On rare occasions, the brokerage firm may sell the stock higher or lower than the exercise price, which will cause some gain or loss on the 8949 and Schedule D.

Year of Exercise & Sale:

Single Filing Status
Gain added to W-2…………………………………….. $100,000
Tax Preference in Year of Exercise…………… None
AMT Tax Credit Carryover……………………….. Not Applicable

Form 8949: *Result is zero gain to Schedule D*

Description	Acquired	Sold	Sales Price	Cost Basis
NQ Stk Opt - W2 Gain	6/12/19	06/12/19	120,000	120,000

Tax Computation:

Exemptions …………………………….		-0-	<71,700>
Exemption Phase Out.............		-0-	-0-

Taxable Income......................	229,480	162,300
Tentative AMT........................		**42,198**
Regular Tax...........................	**55,512**	**<55,512>**
AMT		**-0-**

Example - Option Exercised – Stock Not Sold: In order to obtain long-term capital gain treatment on the ultimate sale of the stock, the taxpayer must hold the stock for more than one year after the exercise and two years after the option was granted. In this situation, the bargain element becomes a tax preference item, which may, depending upon the size of the bargain element, create an AMT in the year of the exercise. ISO preference is a "deferral" item of preference, which, if the AMT applies, will generally create an AMT Tax Credit Carryover.

Year of Exercise:

Gain added to W-2...	None
Tax Preference in Year of Exercise................	100,000
AMT Tax Credit Carryover..............................	Yes
Form 6251 - Line 2i (2018 version)..........	100,000
Schedule D...	No

Tax Computation:

Description		Reg Tax	AMT	AMT w/o Pref
W-2 Income..............................		150,000	150,000	150,000
ISO Preference..........................			100,000	
Deductions:				
Taxes................	4,520			
Home Interest....	15,400		<15,400>	<15,400>
Contributions......	600		< 600>	< 600>
Deduction Total...............................		<20,520>		
Exemptions...............................		-0-	<71,700>	<71,700>
Exemption Phase out........................		-0-	-0-	-0-
Taxable Income.........................		129,480	162,300	62,300
Tentative AMT...........................			**42,198**	**16,198**
Regular Tax...............................		**25,250**	<25,250>	<25,250>
Alternative Minimum Tax.................................			**16,940**	- 0 -
Tentative AMT Credit Carryover..............................				**16,940** (16,940 - 0)

Tax Planning Considerations:

- **State income taxes** - *Since state income tax is not deductible against the AMT, care should be taken not to pay more during the year than can be used without incurring the AMT (in this example, none). Generally defer to the 4th quarter paid in January of the following year. It may even be appropriate to reduce withholding. But consider if incurring the underpayment penalty, if any, is worth it.*
- **Other taxes** - *Since taxes are not deductible against the AMT, attempt to prepay in a prior year or defer to the next year if the deduction will be wasted in the current year, also keeping in mind the TCJA imposed $10,000 annual deduction limit for state and local taxes.*

Year of Qualified Stock Sale: After meeting the qualified holding period of more than one year after the exercise and two years after the option was granted, the taxpayer qualifies for the long-term treatment and sells the stock. When this occurs, there is a stock basis for regular tax ($20,000) purposes and another for AMT ($120,000). This will create a negative capital gains adjustment on Form 6251 of $100,000 ($20,000 - $120,000). There is also an AMT Credit carryover in the amount of $16,940 (assuming the taxpayer did not utilize the credit in the intervening years).

Year of Qualified Sale:

Stock Basis for Regular Tax Purposes	20,000
Stock Basis for AMT Purposes	120,000
Tax Preference Adjustment (120,000 - 20,000)	
Form 6251 - Line 2k (2018 version)	<100,000>
AMT Tax Credit	Perhaps*

Form 8949: Result to Sch. D is $100,000 gain

Description	Acquired	Sold	Sales Price	Cost Basis
Stock Sale	06/12/19	10/16/21(2)	120,000	20,000

*The AMT tax credit is used against the regular tax but cannot reduce the regular tax below the AMT. Whether or not there will be an AMT tax credit depends upon whether one was generated in a prior year(s) and if so, is the regular tax greater than the AMT tax.

Tax Computation:

Description		Reg Tax	AMT
W-2 Income...		150,000	150,000
Capital Gains.......................................		100,000	100,000
AMT Capital Gains Adjustment.....................			<100,000>
Deductions:			
Taxes................	4,520		
Home Interest....	15,400		<15,400>
Contributions......	600		< 600>
Deduction Total....................................		<20,520>	
Exemptions.........................		-0-	<71,700>
Taxable Income..........................		229,480	62,300
Tentative AMT............................			**16,198**
Regular Tax (using cap gains rates)		**40,250**	<40,250>
Alternative Minimum Tax..			-0-
Tentative AMT Credit Carryover......		**<16,940>**	
Tax Due**.................................		**23,310**	

*** Greater of Regular Tax (figured using capital gains tax rates) less AMT Credit or AMT*

EMPLOYER REPORTING

Under final regulations § 1.6039-1 and § 1.6039-2, corporate employers are required to make an information return with the IRS, in addition to providing information to the employee, about the transfer of stock pursuant to the exercise of an incentive stock option (ISO), and certain stock transfers regarding employee stock purchase plans (ESPPs).

ISO reporting - For ISOs, the information that is required in the information return to IRS and the statement furnished to employees consists of:

1. The name, address, and employer identification number (EIN) of the corporation transferring the stock, or, if other than the corporation, the name, address and EIN of the corporation whose stock is being transferred;
2. The name, address, and identifying number of the person to whom the share or shares of stock were transferred pursuant to the option exercise;
3. The date the option was granted to the person;
4. The exercise price per share, the date the option was exercised, and the fair market value of a share of stock on the date the option was exercised; and
5. The number of shares of stock transferred pursuant to the exercise of the option.

ESPP reporting - For transfers of stock by the employee under an ESPP where the stock was acquired pursuant to the exercise of an option described in Code Sec. 423(c), and where the exercise price is less than 100% of the value of the stock on the grant date or is not fixed or determinable on the grant date, the regs require the following information to be provided to IRS and the employee:

1. The name, address, and identifying number of the transferor (the person who acquires the shares pursuant to exercising the option);
2. The name, address and EIN of the corporation whose stock is being transferred;
3. The date the option was granted to the transferor;
4. The fair market value of the stock on the date the option was granted;
5. The actual exercise price paid per share;
6. The exercise price per share determined as if the option were exercised on the date the option was granted to the transferor (only required if the exercise price per share is not fixed or determinable on the grant date);
7. The date the transferor exercised the option and the FMV on that date;
8. The date the legal title of the shares was transferred by the transferor; and
9. The number of shares to which legal title was transferred by the transferor.

Forms 3921 and 3922– To accomplish these reporting requirements IRS has developed two forms: Form 3921 is for ISO reporting and Form 3922 is for ESPP reporting.

RESTRICTED STOCK UNDER SEC 83

CAUTION: The following is an overview of restricted stock under Sec 83. Consult the regulations for additional details.

Under normal circumstances where an employer compensates an employee for his or her service in the form of stock, the excess of the fair market value of the stock over any amount paid for the stock is treated as income to the employee at the time he or she receives the stock.

However, if the stock is subject to substantial risk or forfeiture because it is restricted (cannot be sold) then income is deferred until the interest in the property either: (1) is no longer subject to that risk, or (2) becomes transferable free of the risk, whichever occurs earlier.

The employee has the option to include the FMV of restricted stock (less any amount paid for the stock) in income in the year the stock is received by filing the so-called Sec 83(b) election within 30 days of the transfer of the restricted stock. The amount of the income recognized as a result of the election is based on the fair market value (FMV) of the shares on the date of grant less any amount the employee paid for the stock. This amount becomes the basis of the stock. The stock's FMV isn't reduced to reflect the restrictions on the stock, unless there is a permanent limitation on the transfer of the stock that would require the employee to resell the stock to the employer at a price determined under a formula.

The benefit of making the election is to permanently fix the compensation element and then any appreciation over and above the basis (the compensation that was included in income) will be eligible for long-term capital gains rates if the stock is held for more than one year (two years if the stock is acquired from an incentive stock option). Caution: If the stock is subsequently forfeited, any loss is a capital loss subject the annual $3,000 overall capital loss limitation.

Note: Prior to 2016 a copy of the Sec 83(b) election had to be attached to the filed 1040. Since many software packages are unable to include attachments, per the final Sec 83 regulations it will no longer be a requirement to attach it to the 1040 (applicable for property transferred on or after January 1, 2016). Rev Proc 2012-29 includes sample language an employee may use for making the election statement.

New Sec 83 Gain Deferral Option

TCJA

Code Sec. 83 governs the amount and timing of income inclusion for employer stock, transferred to an employee in connection with the performance of services. Under Code Sec. 83(a), an employee must generally recognize income for the tax year in which the employee's right to the stock is transferable or isn't subject to a substantial risk of forfeiture. The amount includible in income is the excess of the stock's fair market value at the time of substantial vesting over the amount, if any, paid by the employee for the stock.

Elective Gain Deferral – Under TCJA and generally effective for stock options exercised or restricted stock units (RSUs) settled after Dec. 31, 2017 (subject to a transition rule), a qualified employee can elect to defer, for income tax purposes, recognition of income attributable to qualified stock transferred to the employee by the employer. The election applies only for income tax purposes; the application of FICA and FUTA is not affected. (Code Sec. 83(i))

Timing - The election must be made no later than 30 days after the first time the employee's right to the stock is substantially vested or is transferable, whichever occurs earlier.

Deferral Period - If the election is made, the employer has to include the deferred income in the employee's income for the tax year that includes the ***earliest*** of:

(1) The first date the qualified stock becomes transferable, including, solely for this purpose, transferable to the employer.

(2) The date the employee first becomes an "excluded employee" (i.e., an individual: (a) who is one-percent owner of the corporation at any time during the 10 preceding calendar years; (b) who is, or has been at any prior time, the chief executive officer or chief financial officer of the corporation or an individual acting in either capacity; (c) who is a family member of an individual described in (a) or (b); or (d) who has been one of the four highest compensated officers of the corporation for any of the 10 preceding tax years.

(3) The first date on which any stock of the employer becomes readily tradable on an established securities market;

(4) The date five years after the first date the employee's right to the stock becomes substantially vested; or

(5) The date on which the employee revokes his or her election. (Code Sec 83(i)(1)(B))

Thus, under the Sec 83(i) election the longest possible deferral period is 5 years.

Qualified Stock - The election is available for "qualified stock" (defined in Code Sec. 83(i)(2)(A), attributable to a statutory option. In such a case, the option is not treated as a statutory option, and the rules relating to statutory options and related stock do not apply. In other words, if an employee makes a Section 83(i) election with respect to the exercise of an incentive stock option (ISO), the ISO preferential tax treatment will no longer apply.

Deferred income inclusion also applies for purposes of the employer's deduction of the amount of income attributable to the qualified stock. That is, if an employee makes the election, the employer's deduction is deferred until the employer's tax year in which, or with which, ends the tax year of the employee for which the amount is included in the employee's income as described in (1) - (5) above.

The new election applies for qualified stock of an eligible corporation. A corporation is treated as such for a tax year if: (1) no stock of the employer corporation (or any predecessor) is readily tradable on an established securities market during any preceding calendar year, and (2) the corporation has a written plan under which, in the calendar year, not less than 80% of all employees who provide services to the corporation in the US (or any US possession) are granted stock options, or restricted stock units (RSUs), with the same rights and privileges to receive qualified stock. (Code Sec. 83(i)(2)(C))

Detailed employer notice, withholding, and reporting requirements also apply with regard to the election. (Code Sec. 83(i)(6))

As noted above, the income deferral election generally applies with respect to stock attributable to options exercised or RSUs settled after Dec. 31, 2017. However, under a transition rule, until IRS issues regs or other guidance implementing the 80% and employer notice requirements under the provision, a corporation will be treated as complying with those requirements if it complies with a reasonable good faith interpretation of them. The penalty for a failure to provide the notice required under the provision ($100 per failure, subject to a $50,000 maximum penalty for all failures during a calendar year) applies to failures after Dec. 31, 2017. (Code Sec. 6652)(p), as amended by Act Sec. 13603(e)) In December 2018, the IRS released initial guidance (IR-2018-246) on Code Sec. 83(i) that covers the following topics:

- The requirement that eligible corporations must make grants to not less than 80% of all employees who provide services to the corporation in the U.S.;
- Federal income tax withholding regarding the deferred income related to the qualified stock; and
- An employer opt out of permitting employees to elect the deferred tax treatment even if the requirements under Code Sec. 83(i) are otherwise met.

Please see IR-2018-246 on the IRS web site for details: https://www.irs.gov/site-index-search?search=IR-2018-246&field_pup_historical_1=1&field_pup_historical=1 The IRS plans to issue further guidance on these and other issues in the form of proposed regulations at a later date.

CALIFORNIA DIFFERENCES

California conforms to the same treatment as the federal return, but has its own AMT and nonrefundable AMT credit carryover computation based upon the California Alternative Minimum Tax computation. It is conceivable that the AMT could apply to either the federal or CA and not the other depending upon all the factors affecting the make-up of the tax return. At this time it is unknown if CA will conform to the new 83(i) election.

The California Franchise Tax Board has issued guidance ***(California Tax News, May 2001)*** explaining how the state taxes stock option income when taxpayers change their state of residence to or from California. It also addresses the incentive stock option (ISO) alternative minimum tax adjustment.

TAXABILITY OF STOCK OPTIONS TO CA NONRESIDENTS – OVERVIEW

When an individual was a CA resident when the option was granted and is a nonresident when the option is exercised. . .

- **Nonqualified Options (NQSO)** – Always treated as CA source income and taxable to CA.
- **Qualified Options (ISOs)**:
    - *Qualified Disposition* – If the disposition meets the requirements of a "qualified" ISO disposition then the gain is **NOT** taxable to CA.
    - *Nonqualified Disposition* – Where the disposition does not meet the requirements of a "qualified" ISO disposition then the disposition is treated as a NQSO and thus the gain **IS** taxable to CA.

See below for additional details of CA Non-resident taxation

NONQUALIFIED STOCK OPTIONS

- **Change of residency to California.** When a taxpayer is granted an NQSO while a nonresident of California and later exercises it while a California resident, the difference between the fair market value of the stock on the date of exercise and the option price is subject to California tax. The state recognizes income at the point of exercise because the taxpayer acquires stock with a value greater than the exercise price. The income is subject to California tax because the taxpayer is a California resident when the income is recognized.
- **Change of residency from California.** When a taxpayer is granted an NQSO while a California resident and later exercises it while a nonresident, the Franchise Tax Board will properly characterize the income from its exercise as compensation for services with a source in-state where the taxpayer performed the services. Nonresident taxpayers who performed services both within and outside of California must allocate to California that portion of total compensation reasonably attributed to services performed in California (California Regulation §17951-5). One reasonable method is an allocation based on time. The period of time includes the total amount of time from the date of grant to the date of exercise (or the date employment ended, if earlier). The basis for this position is that the state properly characterizes the income upon exercise as compensation for services during the time the stock increased in value.

Income taxable by CA = total stock option income × allocation ratio.

*The **allocation ratio** is California workdays from date of grant to date of exercise ÷ total workdays from date of grant to date of exercise.*

If a taxpayer performs services for the corporation entirely within California, but exercises the option after terminating employment and becoming a nonresident, the difference between the fair market value of the stock on the date of exercise and the option price has a source in California even though the underlying value of the stock may have increased after the taxpayer became a nonresident.

INCENTIVE STOCK OPTIONS

- **Change of residency to California**. When a taxpayer exercises an ISO while a nonresident of California and later sells the stock in a qualifying disposition (the holding period requirements under ***IRC §422*** are met) while a California resident, California taxes the difference between the amount realized on the sale and the option price because the taxpayer is a California resident when the stock is sold.
- **Change of residency from California.** When a taxpayer exercises an ISO while a California resident or while a nonresident and then disposes of the stock in a disqualifying disposition (the holding period requirements under ***IRC §422*** are not met) while a nonresident, the income from the disqualifying disposition is functionally equivalent to income from the exercise of an NQSO and the FTB will properly characterize it as wages. The wage income is equal to the difference between the fair market value (FMV) of the shares on the date of exercise (or the sale price, if lower) and the amount paid for the shares. If the FMV of the shares on the date of sale is greater than the FMV of the shares on the date of exercise, the FTB will treat the further increase in value as capital gain income. ***(Proposed Treasury Regulation §1.422A-1(b)(3))***

Example 1 - ISO Change of residency from California: *Mr. Smith, a resident of California, worked for X Company. He performed all his services in California during his entire career. On April 1, 2015, Mr. Smith's company granted him an option to purchase stock under its incentive stock option plan. On April 1, 2018, while still living and working in California, Mr. Smith exercised his option to purchase 30,000 shares of his company's stock. The option price on April 1, 2015 was $10 per share. The FMV on April 1, 2018 was $50 per share. On December 30, 2015, Mr. Smith retired and permanently moved to Florida. On March 15, 2019, he sold the 30,000 shares for $35 per share. The FTB will characterize income from the disqualifying disposition of ISOs as wages. Because Mr. Smith performed all his services in California between the grant date and the date of exercise of the option, 100% of the income is treated as wages from a California source as follows:*

- *FMV of stock, date of sale: $1,050,000 (30,000 shares @ $35* per share)*
- *Less: Option price, date of grants: $300,000 (30,000 shares @ $10 per share)*
- *Equals: Wage income, California source: $750,000.*

**The FTB used the sale price of $35 to compute the wage income because it is less than the exercise price of $50.*

Example 2 - ISO Change of residency from California: *Assume the same facts as Example 1, except Mr. Smith sold the stock on March 15, 2020, when the FMV of the stock was $60 per share. The FTB will determine the amount of income treated as wages from a California source as follows:*

- *FMV of stock, date of exercise: $1,500,000 (30,000 shares @ $50 per share)*
- *Less: Option price, date of grant: $300,000 (30,000 shares @ $10 per share)*
- *Equals: Wage income, California source $1,200,000.*

The FTB characterized the increase in the FMV of the stock from the exercise price of $50 to the sale price of $60 as capital gain income. The capital gain income has a source in Florida, Mr. Smith's state of residence when he sold the stock.

- *FMV of stock, date of sale: $1,800,000 (30,000 shares @ $60 per share)*
- *Less: FMV of stock, date of exercise: $1,500,000 (30,000 sh @ $50 per sh)*
- *Equals: Capital gain, Florida source $300,000.*

- **Incentive stock option alternative minimum tax adjustment.** For federal and California AMT, the taxpayer must include, as an adjustment in figuring alternative minimum taxable income, the amount by which the FMV of the stock exceeds the option price in the year the stock is substantially vested (the taxpayer's rights in the stock are transferable or no longer subject to substantial risk of forfeiture). The FTB requires no adjustment if the taxpayer disposes of the stock in the same year of exercise.

Summary of California Treatment of NQOs and ISOs – Residents/Nonresidents

Type of Stock Option	If a California Resident. . .	If a California Nonresident. . .
Nonqualified stock option (NQO)	**on the date NQO is exercised:** ▸CA taxes the wage income. ▸Possible other state tax credit.	**on date NQO is exercised:** ▸CA taxes the wage income to the extent services were performed in CA from the grant date to the exercise date. ▸Possible other state tax credit.
	on the date stock is sold: ▸CA taxes the capital gain.	**on the date stock is sold:** ▸CA does not tax the capital gain.
Incentive stock option(ISO)	**on the date ISO is exercised:** ▸Make an AMT adjustment if stock is not sold in year of exercise. ▸Increase AMT basis by the AMT adjustment.	**on the date ISO is exercised:** ▸Make an AMT adjustment if stock not sold in year of exercise. ▸Include an AMT adjustment to the extent services were performed in CA from the grant date to the exercise date. ▸Increase AMT basis by the AMT adjustment.
	on the date stock is sold in a qualifying disposition at a gain: ▸CA taxes the capital gain. ▸Possible AMT credit.	**on the date the stock is sold in a qualifying disposition at a gain:** ▸CA does not tax the capital gain. ▸Possible AMT credit.
	on the date stock is sold in a disqualifying disposition: ▸CA taxes the wage income and capital gain (if any). ▸Possible other state tax credit. ▸Possible AMT credit.	**on the date stock is sold in a disqualifying disposition:** ▸CA taxes the wage income to the extent services were performed in CA from the grant date to the exercise date. ▸CA does not tax the capital gain (if any). ▸Possible other state tax credit. ▸Possible AMT credit.

NOTES

QUALIFIED SMALL BUSINESS STOCK

Overview

- Definition
  - C-corporation stock
  - **Does not apply to S-Corp Stock**
  - Assets not in excess of $50M when stock issued
  - Meets "active business requirement"
- Sec 1202 Treatment – Is not elective
- Holding requirements: 5 Years
- Gain Exclusion: 50%, 75% or 100%, depending when stock issued
- Maximum tax: 28% on non-excluded gain
- AMT: 7% of the excluded amount treated as a preference when 50% or 75% of the gain is excluded
- Investor Exclusion Limitations – cannot exceed:
  - $10 million ($5M if MS) or
  - 10 times taxpayer's adjusted basis
- May apply to gain from pass-throughs that sold QSBS stock
- Rollover to another Sec 1202 – within 60 days

The Details

GAIN EXCLUSION - Noncorporate taxpayers may ***exclude 50%*** (60% in empowerment zones for gains realized before 2019 on stock acquired after 12/21/2001), ***75% or 100%,*** *depending when the stock was issued,* ***of any gain*** realized on the sale or exchange of ***"qualified small business stock" held more than 5 years.***

Congress has authorized exclusion amounts for qualified stock meeting the more than 5 year holding period as follows:

- **50% gain exclusion for stocks issued** after 8/10/1993 and before 2/18/2009. Of the excluded gain, 7% is a tax preference item.
- **75% gain exclusion for stocks issued after 2/17/2009 and through 9/27/2010.** However, 7% of the excluded gain is a tax preference item. Caution: Not all Sec 1202 stock issued in 2009 or 2010 that is sold in 2019 will qualify for the 75% exclusion – check the **issued** date carefully.

Example – Qualifies for 50% exclusion *– On February 1, 2009, Andrew purchased Sec 1202 stock that was issued on January 15, 2009. He sold the stock on August 1, 2019 for a gain of $20,000. He can exclude $10,000 of the gain. He held the stock over 5 years, but because it was issued before February 18, 2009, his exclusion will be 50% rather than 75% of the gain. $700 (7% x $10,000) of the gain will be a preference item for AMT.*

Example – Qualifies for 75% exclusion *– On March 1, 2010, Corporation X issued Sec 1202 stock, which Barbara bought on March 15, 2010. She sold the stock for a gain of $28,000 on November 1, 2019. Because she held it for over 5 years and the stock was issued after February 17, 2009 and before Sept. 28, 2010, 75% of her gain, or $21,000, is excludable. Of the $21,000, $1,470 (7%) is included as an AMT preference item.*

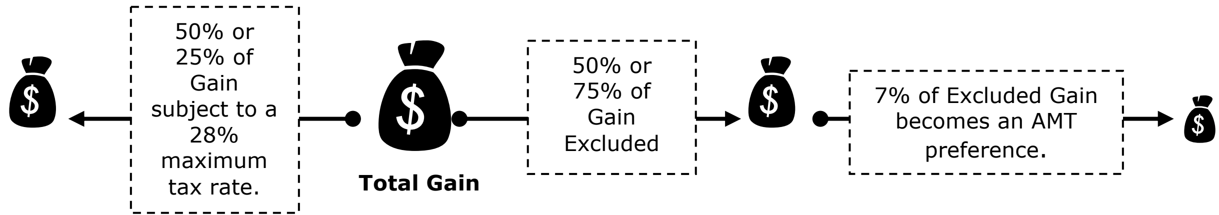
- **100% gain exclusion for stocks issued after September 27, 2010.** There is no AMT preference when the exclusion percentage is 100%. The 100% gain exclusion was initially intended as a temporary economic stimulus, but the provision was made permanent by the PATH Act of 2015.

Example –Qualifying for the 100% exclusion *– If Corporation X from the prior example had issued the Sec 1202 stock on October 1, 2010 instead of March 1, 2010, and Barbara had purchased the stock on October 15, 2010, her entire gain from the sale on Nov. 1, 2019 would be excludable and she would have no AMT preference related to this stock sale.*

CAUTION! Gain from the sale of Sec 1202 stock that isn't excludable does not benefit from the current 0%, 15% and 20% capital gains rates. The maximum tax rate for the taxable portion of 1202 stock is 28%.

IS SEC 1202 TREATMENT ELECTIVE? Should circumstances make it more beneficial for a taxpayer to treat the stock sale as an investment sale, can a taxpayer disregard the Sec 1202 provisions? Sec 1202(a)(1) says: "*In the case of a taxpayer other than a corporation, gross income **SHALL** not include 50 percent of any gain from the sale or exchange of qualified small business stock held for more than 5 years."* [Substitute 75% or 100% as applicable based on issue date.] This language seems definitive and there is no mention of an election other than the rollover election discussed below.

AMT RAMIFICATIONS: 7% of the 50% or 75% excluded Sec 1202 gain is treated as a tax preference. However, for dispositions of qualified Sec 1202 stock issued after September 27, 2010, and held for over 5 years, the excluded gain (100%) does not count as a preference item. (Code Sec. 1202(a)(4)). The illustration below applies only when 50% or 75% of the gain is excluded.



***Example – Sale of QSBS -** Assume a taxpayer has a gain of $100,000 from the sale of QSBS to which the 50% exclusion applies. If the taxpayer is being taxed by the AMT method at the highest rate, the tax on the QSBS can be estimated as follows:*

CG Tax = ($100,000 x .50 x .28) =	*$ 14,000*
AMT Tax = ($100,000 x .50 x .07 x .28) =	*$ 980*
TOTAL TAX =	***$14,980***

DEFINITION OF QSBS ***(Sec 1202(c)(1))***

The term "qualified small business" means any domestic corporation which is a C corporation if:

(A) The aggregate gross assets of such corporation (or any predecessor thereof) at all times on or after the date of the enactment of the Revenue Reconciliation Act of 1993, and before the issuance did not exceed $50M,
(B) The aggregate gross assets of such corporation immediately after the issuance (determined by taking into account amounts received in the issuance) does not exceed $50M, and
(C) Such corporation agrees to submit such reports to the Secretary and to shareholders as the Secretary may require to carry out the purposes of this section.
(D) Meet the "Active Business Requirement".

Options to Acquire Stock - The Tax Court has concluded that the term "stock" for purposes of the exclusion from gain on the sale of "qualified small business stock" (QSBS) in Code Sec. 1202 doesn't include options to acquire stock. (Natkunanathan, TC Memo 2010-15)

ACTIVE BUSINESS REQUIREMENT ***(IRC § 1202(c)(2))***

During substantially all of the taxpayer's holding period for the stock, at least 80% of the value of the corporation's assets must be used by the corporation in the active conduct of one or more "qualified trades or businesses."

A qualified trade or business ("QTOB") is any trade or business ***other than:***

(A) One involving the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, consulting, athletics, financial services, brokerage services;
(B) One where the principal asset of the trade or business is the reputation or skill of one or more of its employees;
(C) Any banking, insurance, financing, leasing, investing, or similar business;
(D) Any farming business, including the business of raising or harvesting trees;
(E) Any business involving the production or extraction of products of a character for which percentage depletion is allowable; and
(F) Any business of operating a hotel, motel, restaurant or similar business.

INVESTOR (STOCKHOLDER) EXCLUSION LIMITATION: The amount of gain eligible for exclusion for each taxable year of the investor can't exceed:

(a) $10 million ($5 million, if married separate), less the amount of gain taken into account under these rules by the taxpayer with respect to dispositions of stock issued by that corporation in an earlier year, or
(b) 10 times the taxpayer's adjusted basis in the stock of that corporation. The gain that qualifies for exclusion is allocated equally between spouses filing joint returns.

Stock Disqualification - Generally, stock will not be treated as small business stock if:

(1) The issuing corporation directly or indirectly purchased any of its stock from the shareholder (or party related to the shareholder as defined in ***§267(b) or §707(b)***, anytime during the period beginning two years before or after the stock issue date, or

(2) During the two-year period that starts on the date that is one year before the stock is issued, the issuing corporation purchased some of its own stock at the beginning of the two-year period.

Transfers of small business stock by gift or bequest - Such stock received as a gift or inheritance does not lose its character as small business stock. The transferee picks up the transferor's holding period in the stock.

PASSTHROUGH ENTITIES: Gain from disposition of a qualified small business stock by a partnership, S corporation, regulated investment company, or common trust fund that is taken into account by a partner, shareholder or participant (other than a C corporation) is eligible for the exclusion if:

(1) all eligibility requirements with respect to qualified small business stock are met;

(2) the stock was held by the entity for more than five years; and

(3) the partner, shareholder, or participant held his interest in the entity on the date the entity acquired the stock and at all times thereafter before the disposition of the stock.

The limits on the amount that can be excluded from income are applied at the ownership level and not the entity level.

Partnership acquiring QSBS for partners - Reg. 1.1045-1 allows a partnership to acquire qualified small business stock on behalf of its partners, thereby allowing the partners to defer any gains they may have realized on sales of qualified small business stock. The partnership must acquire the replacement stock within 60 days of the partnership's sale of the relinquished stock. All of the other requirements for the stock to be treated as qualified small business stock also apply. The regulation also provides guidance for determining a partner's basis in the partnership that acquires the replacement stock.

ROLLOVER OF GAIN ON QUALIFIED SMALL BUSINESS STOCK (*IRC § 1045*): The gain from the sale of qualified small business stock held by a taxpayer (not a corporation) for more than six months can be rolled over tax-free to other qualified small business stock. This means that the benefit of a tax-free rollover on sale of qualified small business stock by a partnership will flow through to a partner who is not a corporation, if the partner held its partnership interest at all times that the partnership held the small business stock. A similar rule applies to S corporations. There is no provision limiting the types of partners or shareholders that a partnership or S corporation may have for the benefits of the rollover rules to apply to a noncorporate partner or shareholder. Thus, even if a corporation is the majority partner in a partnership, it won't prevent any noncorporate partner from being able to exclude from income his share of the gain on the sale of qualified small business stock that is rolled over into other qualified small business stock.

How the rollover works - The rollover rules let taxpayers electively roll over capital gain from the sale of qualified small business stock held for more than 6 months by buying other qualified small business stock within 60 days of the sale of the original stock. If the rollover option is chosen, no tax is due currently on the transaction. In addition, the QSBS gain exclusion can be used later when the replacement stock is sold.

If rollover is elected, capital gain from the sale is recognized only to the extent that the amount realized from the sale exceeds:

- The cost of any replacement QSBS purchased within the 60-day period, reduced by
- Any portion of the cost previously taken into account under this rollover rule.

Example - Small Business Stock Rollover - *Tim had the following transactions in small business stock during the year:*

DATE	*DESCRIP.*	*ORIG. COST*	*AMT. REALIZED*	*TIME HELD*
04/01	*Sale-ABC Stock*	*$100,000*	*$500,000*	*9 months*
04/02	*Sale-XYZ Stock*	*50,000*	*300,000*	*5+ years**
05/30	*Buy-RST Stock*	*700,000*	*N/A*	

**assume stock was issued other than during the periods for which 75% or 100% of gain is excludable*

RESULT:

- *Tim elects to roll over gain from the sale on 04/01 so none of the $400,000 of gain from that sale will be recognized (because the amount realized, $500,000, doesn't exceed the $700,000 he paid for the replacement stock purchased 05/30).*
- *He also elects to roll over gain from the sale on 04/02. The amount of gain that isn't recognized is $150,000, while gain recognized is $100,000 (i.e., $300,000, the amount realized on the 04/02 sale, less $200,000, the amount of the $700,000 left after the rollover from the 04/01 sale).*
- *Since the XYZ Corp stock had been held by Tim for more than five years, $50,000 of the recognized gain can be excluded from income under the rules for small business stock ($100,000 x 50%). The remaining $50,000 is a capital gain.*

Gain from any sale not recognized due to the rollover election reduces the basis for determining gain or loss of any qualified business stock purchased by the taxpayer during the 60-day period beginning on the date of the sale.

> ***Example - Basis Reduction Rule -*** *On 04/01, Ted sold small business stock in DEF Corp; he had owned the stock for 2 years. He realized $500,000 from the sale and his basis was $100,000. On 05/29, he purchased more small business stock in GH Corp for $150,000. On 05/30, he purchased small business stock in LM Corp for $600,000. Ted's basis in the GH Corp stock is zero and his basis in the LM Corp is $350,000 ($600,000 minus $250,000 (the amount left after $400,000 of unrecognized gain on the DEF Corp stock is reduced by the $150,000 of unrecognized gain applied against the basis of the GH Corp stock)).*

Partners may opt out of partnership's Sec. 1045 election (Reg. Sec. 1.1045-(b)(4) and (5)) - An eligible partner may opt out of the partnership's Sec. 1045 election with respect to QSB stock either by recognizing the partner's distributive share of the partnership Sec. 1045 gain, or by making a partner Sec. 1045 election with respect to the partner's distributive share of the partnership section 1045 gain. Opting out of a partnership's election does not constitute a revocation of the partnership's election, and such election continues to apply to other partners of the partnership. An eligible partner that opts out of a partnership's Sec. 1045 election must notify the partnership, in writing, that the partner is opting out. Effective for sales 8/14/2007 and after.

COMPLETING FORM 8949: For sales of QSBS where part of the gain is excludable, report the sale on Form 8949, line 1 (Part II, long-term) as if not taking the exclusion. Then enter code Q in column (f) and the amount of the exclusion as a negative number (in parentheses) in column (g). (2018 Form 8949)

If qualified to postpone all or part of the gain and to make the rollover election, report the sale on line 1 of either Part I or Part II (depending on holding period) of Form 8949 as if not making the election. Then, enter code R in column (f) and the amount of the postponed gain as a negative number (in parentheses) in column (g).

CALIFORNIA DIFFERENCES

California does not allow an exclusion or deferral of gain from the sale of small business stock for sales after December 31, 2012.

SALE OF HOME

Overview

RAPID FINDER

- **Maximum Gain Exclusion** on the sale of a ***principal home*** is:
  1) **$250,000** ($500,000 surviving spouse who meets certain requirements), or
  2) **$500,000** if all of the following are true. The taxpayer is married and files a joint return for the year, and
     a) **Either** the taxpayer or spouse meets the **ownership test**.
     b) **Both** the taxpayer and spouse meet the **use test**.
     c) During the 2-year period ending on the date of the sale, neither excluded gain from another sale.
- **Qualifications** to exclude: During the five-year period preceding the sale:
  1) ***Owned*** the home for at least ***2 years (5 years*** *if acquired by* ***§1031***), ***and***
  2) ***Lived in*** the home as the taxpayer's main home for at least ***2 years.***
- **Military – Change of station -** use period suspended up to 10 years – Min 50 miles & 90 days
- **Short temporary absences** - Such as for vacation or other seasonal absence *(even though accompanied with rental of the residence)*, are counted as periods of use.
- **Divorce** – where one spouse continues to live in home and then later jointly sell – out-spouse's use period mirrors in-spouse's use period.
- **Disability exception** – Taxpayers who are physically or mentally unable to care for themselves, *and who during the five-year period before the sale,* ***lived in the home at least 1 year are considered*** to have lived in the home during any time they live in a licensed care facility.
- **Home used as rental –** Ok if otherwise meets the ownership & use tests except that gain from nonqualified use is not excludable.
- **Non-Qualified Use** – Any use after 2008 in which the home was not used as taxpayer's principal residence.
- **Depreciation - Prior to 5/7/97** adjusts basis
  - Post 5/6/97 adjusts basis, plus gain up to this depreciation amount cannot be excluded and can be taxed up to a 25% tax rate.
- **Home Mortgage Debt Relief Forgiveness (2007 –2017)** – basis reduced by exclusion if home retained.
- **Sale of Partial Interest** – can exclude but reduces exclusion on future sale.
- **Sale of Attached Land** – can exclude but must sell rest of home 2 years before or after; is also treated as a sale of a partial interest.
- **Each spouse sells a separate home** – base each sale as a separate sale by a single individual.
- **Reduced exclusion** – taxpayer(s) do not meet the ownership & use tests because of:
  - **Change of employment** – 50 mile rule – tp, sp, co-owner, and occupant.
  - **Medical Reasons** – tp, sp, co-owner, occupant, and family.
  - **Unforeseen circumstances –** includes foreclosure.
  - **Pro-ration** – (qualifying days /730) x exclusion amount.
- **Prior Section 1034 gain deferral** – adjust home basis in determining gain before exclusion.
- **Home office sale**
  - Same structure (and day care use) – treat as one sale – losses not deductible
  - Separate structures – treat as separate sales – losses deductible on office portion
- **Qualifies for both §121 and §1031** – apply §121 first and §1031 to the balance
- **Peace Corp Volunteers** – can suspend 5-year period while in service (post 2007)
- **Intelligence Community Employees** – can suspend 5-year period while in service (post 12/20/06)
- **Life Estate** – Donor still owner for tax purposes and for Sec 121 exclusion

CAUTION - If a residence is sold that qualified for a federal or state homebuyer credit when it was purchased, recapture of the credit may be required, depending on how long the home was used as a principal residence. See Chapter 9.14 for details.

EXCLUSION OF GAIN

If a taxpayer meets the ownership and use tests, they can exclude the gain on the sale of their ***principal home*** up to:

1) **$250,000**, or
2) **$500,000** for surviving spouse (see details in text), or
3) **$500,000** if all of the following are true.

a) The taxpayer is married and files a joint return for the year.
b) Either the taxpayer or spouse meets the ownership test.
c) Both the taxpayer and spouse meet the use test.
d) During the 2-year period ending on the date of the sale, neither the taxpayer nor spouse excluded gain from the sale of another home (not counting any sales before May 7, 1997).

OWNERSHIP AND USE TESTS

To claim the exclusion, the taxpayer must meet the ownership and use tests. This means that during the ***5-year period*** ending on the date of the sale, the taxpayer must have:

1) ***Owned*** the home for at least ***2 years*** (the ownership test), ***and***
2) ***Lived in*** the home as the taxpayer's main home for at least ***2 years*** (the use test).

The requirements of ownership and use for periods aggregating 2 years or more may be satisfied by establishing ownership and use for 24 full months or for 730 days (365 x2). *(Reg. §1.121-1(c))*

Special Rule for Decedents Dying in 2010 - if a decedent's estate or heir sells the decedent's principal residence, $250,000 of gain can be excluded provided the decedent met the two-out-of-five years use and ownership requirements. In addition, if an heir occupies the property as a principal residence, the decedent's period of occupancy and ownership can be added to the heir's when determining if the Sec 121 requirements have been met.

$500,000 EXCLUSION FOR SURVIVING SPOUSE

For sales and exchanges after Dec. 31, 2007, surviving single spouses qualify for the up-to-$500,000 exclusion if the sale occurs not later than 2 years after their spouse's death and the requirements for the $500,000 exclusion under Code Sec. 121(b)(2)(A) were met immediately before the spouse's death. (Code Sec. 121(b)(4)).

Note: Keep in mind that the surviving spouse, depending upon the state of residence and the manner in which title is held, will have a 50% or 100% step up (or step down) in basis of the home as a result of the spouse's death. This comment may not apply for a home inherited from a decedent who died in 2010 if the executor chose to use the modified carryover basis rules.

GAIN ATTRIBUTABLE TO NONQUALIFIED PERIODS NOT EXCLUDABLE

Effective for sales beginning in 2009, the amount of gain allocated to periods of nonqualified use is the amount of gain multiplied by a fraction the numerator of which is the aggregate periods of nonqualified use during the period the property was owned by the taxpayer and the denominator of which is the period the taxpayer owned the property.

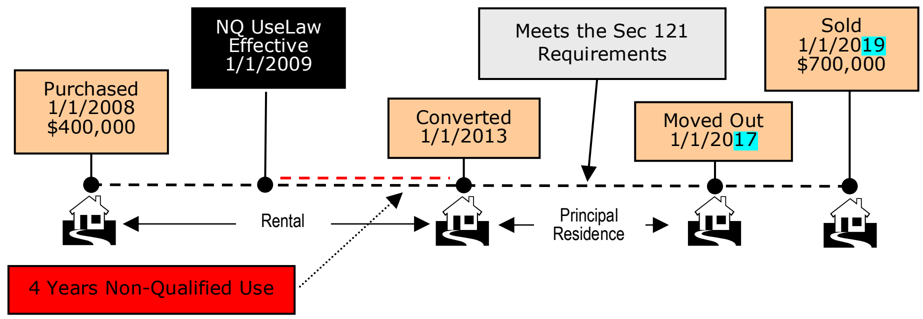
Nonqualified Use - A period of nonqualified use means any period during which the property is not used by the taxpayer or the taxpayer's spouse or former spouse as a principal residence except as noted below. Examples of nonqualified use include using the home as a vacation residence, renting it out, allowing a relative to live in it, and simply letting it stand vacant. For this purpose periods of nonqualified use **do not include** any period:

- Before January 1, 2009
- After the last date the property is used as the principal residence of the taxpayer or spouse (regardless of use during that period), and
- Not to exceed two years that the taxpayer is temporarily absent by reason of a change in place of employment, health, or, to the extent provided in regulations, unforeseen circumstances.

The present-law election for the uniformed services, Foreign Service and employees of the intelligence community is unchanged.

If any gain is attributable to post-May 6, 1997 depreciation, the exclusion does not apply to that amount of gain and that gain is not taken into account in determining the amount of gain allocated to nonqualified use.

Example *–Assume that a married couple buys a property on January 1, 2008, for $400,000, and uses it as rental property for five years claiming $30,000 of depreciation deductions. On January 1, 2013, the taxpayers convert the property to be their principal residence. On January 1, 2017, the taxpayers move out, and they sell the property for $700,000 on January 1, 2019.*



Without considering purchase or sales costs and assuming there were no improvements or other basis adjustments, the sale would result in a gain of $330,000 ($700,000 – (400,000 – 30,000)). The $30,000 gain attributable to the depreciation deductions is included in income. Of the remaining $300,000 gain, 36.4% of the gain (4 years of non-qualified (2009-2012) use divided by the 11 years of total ownership), or $109,200 is attributable to the non-qualified use period. Since it is less than the maximum gain of $500,000 that may be excluded, the remaining gain of $190,800 ($300,000 - $109,200) is excluded from gross income.

MILITARY, FOREIGN SERVICE AND INTELLIGENCE COMMUNITY 5-YEAR TEST

Military personnel often retain ownership of a home while away on duty but eventually sell it without returning to live in it, perhaps failing the use test completely. Those on qualified extended duty in the U.S. Armed Services or the Foreign Service can suspend this five-year test period for up to 10 years of such duty time, effective for home sales after May 6, 1997. A taxpayer is on qualified extended duty when at a duty station that is at least 50 miles from the residence sold, or when residing under orders in government housing, for more than 90 days or for an indefinite period.

A taxpayer may use this provision for only one property at a time and may exclude gain on only one home sale in any two-year period.

Example *– Sarge bought and moved into a home in 2011 that he lived in as his main home for 2½ years. For the next 6 years, he did not live in the home because he was on qualified official extended duty with the Army. He sold the home for a gain in 2019. To meet the use test, Sarge chooses to suspend the 5-year test period for the 6 years he was on qualifying official extended duty – he disregards those 6 years. Sarge's 5-year test period consists of the 5 years before he went on qualifying official extended duty. He meets the ownership and use tests because he owned and lived in the home for 2½ years during this test period.*

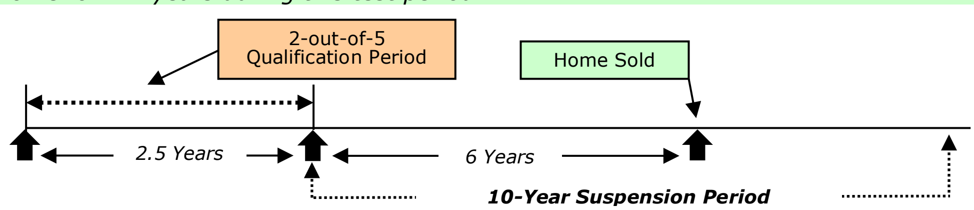


Illustration – Meeting the Qualification Period

Example *– Col. Potter owned and lived in his home for 3 years in Virginia until he was stationed overseas in January 2004. He was still overseas in January 2019 when he sold the house. He may disregard just 10 of the 15 years he was overseas, with the result that the 5-year test period covers only years he did not live in the house. Col. Potter will not be eligible for the home sale gain exclusion.*

Illustration – NOT Meeting the Qualification Period

PEACE CORP VOLUNTEERS – SUSPENSION OF FIVE-YEAR PERIOD

Peace Corps volunteers have a rule similar to the suspension rules applicable to members of the uniformed services, Foreign Service, and intelligence community. At the election of an individual with respect to a property (i.e., the residence), the running of the five-year ownership and use period in Sec 121 is suspended during any period that the individual or the individual's spouse is serving outside the U.S on qualified official extended duty as an employee of the Peace Corps, or as an enrolled volunteer or volunteer leader under §5 or §6 of the Peace Corps Act (22 USC 2504, 22 USC 2505). Thus, an individual may elect to suspend the five-year test period for ownership and use during certain absences due to volunteer service in the Peace Corps. (Com Rept)

INTELLIGENCE COMMUNITY EMPLOYEES – SUSPENSION OF FIVE-YEAR PERIOD

Employees of the CIA, National Security Agency, Homeland Security, Defense Department and other governmental intelligence agencies (defined in IRC Sec 121(d)(9)(C)(iv)) have the option to elect to suspend the running of the 5-year test period for purposes of the home sale gain exclusion while they are serving on official extended duty (i.e., serving at a duty station at least 50 miles from their main home or living in government quarters under government orders; for more than a 90-day period or indefinitely).

HOME ACQUIRED VIA TAX-DEFERRED EXCHANGE

Taxpayers will sometimes occupy a property that has been used as a rental and then live in that property long enough to meet home sale gain exclusion qualifications (own and use as their primary residence for the two out of five years prior to sale). They then qualify for the exclusion to the extent the gain exceeds the taxable depreciation recapture. Taxpayers can also exchange other real estate property for a single-family residence and then later occupy that residence. If the ownership and use tests are subsequently met, the home sale exclusion can be utilized to the extent the gain exceeds the taxable depreciation recapture.

- ***Five-Year Ownership Requirement*** - If a home was originally acquired via a §1031 tax-deferred exchange, the home must be owned for a ***minimum of five years*** before the home sale exclusion can be utilized, provided the taxpayer also meets the 2-year use test. *Code Sec. 121(d)(10).*

  Example – Exclusion not Qualified *- On 1/1/Yr#1 Jack acquires a residence to be used as rental property in a §1031 tax-deferred exchange. Jack rents the residence to unrelated parties during Years #1 and #2. Then on 1/1/Yr#3, Jack moves into the rental and uses it as his principal residence until he sells it on 1/2/Yr#5. Because Jack acquired the residence in a tax- deferred like-kind exchange four years before the date of the sale, the five-year holding period has not been satisfied. Therefore, Jack does not qualify for the §121 home gain exclusion even though he met the two-year ownership and use requirements for the exclusion.*

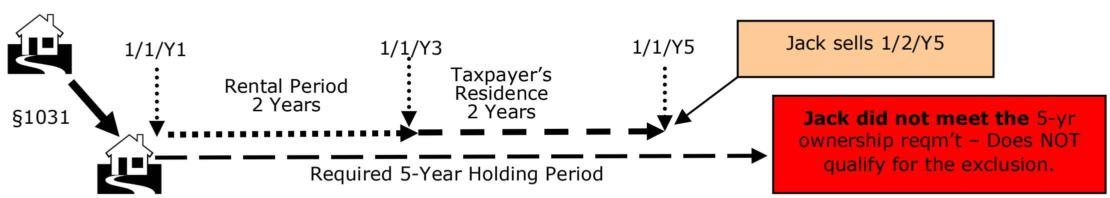

Illustration - Exclusion not Qualified

- ***Reduced Exclusion*** - This 5-year ownership restriction also applies to partial exclusions. Under the §121 reduced exclusion rules, a taxpayer who does not meet the two-year ownership and use requirements by reason of a change in place of employment, health or unforeseen circumstances is allowed a prorated exclusion as discussed later in this course. However, partial exclusions DO NOT apply to a home acquired via a §1031 tax-deferred exchange unless the five-year ownership requirement is met.
- ***Transfer Date*** – The five-year period begins on the date the property is acquired.
- ***Like-Kind Property*** - For a like-kind exchange to be tax-deferred under §1031, both the property exchanged ("relinquished property") and the property received in the exchange ("replacement property") must be held by the taxpayer either for productive use in a trade or business or for investment. Neither may

be used for personal purposes, such as a residence. *Code Sec. 1031(a)(1); IRS Pub No.544 (2017), p. 12.* A limited exception applies for certain vacation home rentals that have been used personally – see Chapter 3.20.

- ***Possible Scenarios*** – Virtually any real estate within the U.S. exchanged for any other real estate in the U.S. is considered like for like under §1031, provided that both the property relinquished and the property acquired in the exchange are used for the active conduct of a trade or business or held for investment. It also must be your client's **intent** to acquire the replacement property for business or investment; if that is not the case, the replacement property is not like-kind. Since both primary and second homes (not rented) are "personal use" property and not "business or investment," they are NOT like-kind real estate. The following are some possible acceptable scenarios you may encounter:
    - **Vacant land** §1031 exchanged for **residential rental** then converted to primary residence.
    - **Residential rental** §1031 exchanged for **residential rental** then converted to primary residence.
    - **Residential apartment building** §1031 exchanged for **residential rental** then converted to primary residence.
    - **Commercial real estate** §1031 exchanged for **residential rental** then converted to primary residence.
- ***Intent*** – Intent is an important issue. If a taxpayer exchanges into a property with the intent of not using that property for business or investment, then the property is not like-kind and therefore would not qualify for gain deferral. There is little to go on in regards to "intent" other than the two citations below:
    - ***Click, Dollie (1982) 78 TC 225*** - If a taxpayer had an intent at the time of the exchange to make a gift of the exchange property (i.e., the replacement property received in the exchange), the exchange does not qualify as a like-kind exchange because the taxpayer did not intend to hold the replacement property for productive use in a trade or business or for investment. For example, an exchange didn't qualify for non-recognition treatment, where seven months after the exchange of a farm for two residential properties, the taxpayer gave the residential properties to her two children and their families who then occupied them. The children selected the properties and paid insurance on them from the inception. Furthermore, the taxpayer was 72 years old and was working on an estate plan with her attorney. Under those circumstances, the court held that the taxpayer acquired the residences with the intent of making gifts of them to her children and not to hold as investments.
    - ***IRS Letter Ruling 8429039*** - Exchange by a trust where the trust represented that the property to be received would be held for productive use in a trade or business or for investment for a period of at least two years after the exchange. Under the facts of the ruling, the trust owned a beach house that had been rented out. An individual who owned a personal residence wanted to exchange the residence for the beach house held by the trust. The residence had been rented to an unrelated party. The trust represented that the property to be received would be held as rental property for at least two years. IRS ruled that the two-year period is sufficient to ensure that the residence to be acquired will meet the holding period test prescribed by Code Sec. 1031.

      Note: In the case of exchanges between related persons, non-recognition treatment under Code Sec. 1031 doesn't apply if either the property transferred or the property received is disposed of within **two years** after the exchange. (Code Sec. 1031(f))

INHERITED HOME

A beneficiary who inherits the residence of a decedent generally acquires it with a basis equal to the fair market value at the decedent's date of death, and since it is inherited property, it is treated as held for long-term. (Rules for the basis of inherited property acquired from decedents dying in 2010 may be different depending on the election of the executor. These rules are covered in Chapter 1.05.) Generally, a beneficiary will sell the residence through a broker and will have substantial sales costs. These sales costs quite often translate into a loss on the sale (Sales price – sales costs – inherited basis).

Beneficiary loss - Loss on the sale of inherited property which was the residence of the decedent can be deductible if the beneficiary immediately attempts to rent or sell the property. *(Campbell, N. Stuart, (1945) 5 TC 272; Carnrick, George, (1947) 9 TC 756, acq.)* If the beneficiary was living in the house at the decedent's death, a loss will be allowed if he indicates his intention to move and does so as soon as he can locate other quarters. A reasonable time is allowed to do this. *(Crawford, Mary, (1951) 16 TC 678, acq.)*

PRINCIPAL RESIDENCE DEFINED

The home sale exclusion only applies to the taxpayer's principal residence. Final regulations address the definition of principal residence. In the case of a taxpayer using more than one property as a residence, which one qualifies depends upon all the facts and circumstances. If a taxpayer alternates between two properties, using each as a residence for successive periods of time, the property that the taxpayer uses a ***majority of the time during the year will ordinarily be considered the taxpayer's principal residence***. *(Reg. §1.121-1(b))*

Relevant factors – In addition to the taxpayer's use of the property, relevant factors in determining a taxpayer's principal residence include, but are not limited to (*Reg. §1.121-1(b)):*

- The taxpayer's place of employment;
- The principal place of abode of the taxpayer's family members;
- The address listed on the taxpayer's Federal and state tax returns, driver's license, automobile registration, and voter registration card;
- The taxpayer's mailing address for bills and correspondence;
- The location of the taxpayer's banks; and
- The location of religious organizations and recreational clubs with which the taxpayer is affiliated.

Example #1 – Taxpayer owns two residences *- Taxpayer K owns two residences, one in New York and one in Florida. From 2015 through 2019, K lives in the New York residence for 7 months and the Florida residence for 5 months in each year. Thus, K used the New York residence a majority of the time in each year from 2015 through 2019. Therefore, in the absence of facts and circumstances indicating otherwise, the New York residence is K's principal residence, and only the New York residence would be eligible for the §121 exclusion if it were sold at the end of 2019.*

NEW YORK HOME Months			FLORIDA HOME Months	
Lived In	**Qualified**	**Year**	**Lived In**	**Qualified**
7	7	2015	5	0
7	7	2016	5	0
7	7	2017	5	0
7	7	2018	5	0
7	7	2019	5	0
35	**35**	Total	25	**0**

Figure #1 *– Example #1*

Note: *Example #1 is interesting in the fact that even though both properties meet the 24-month use and ownership tests, only the New York property qualified as the primary residence during any of the five-year-period. Therefore, only the New York home will qualify for the exclusion. In example #2 that follows, both properties qualified as a primary residence during the 60-month qualification period.*

Example #2 – Taxpayer owns two residences *- Taxpayer L owns two residences, one in Virginia and one in New England. During 2015 and 2016, L lives in the Virginia residence. During 2017 and 2018, L lives in the New England residence. During 2019, L lives in the Virginia residence. L's principal residence during 2015, 2016 and 2019 is the Virginia residence. L's principal residence during 2017 and 2018 is the New England residence. Either residence would be eligible for the 121 exclusion if it were sold during 2019.*

VIRGINIA HOME Months			NEW ENGLAND HOME Months	
Lived In	**Qualified**	**Year**	**Lived In**	**Qualified**
12	12	2015	0	0
12	12	2016	0	0
0	0	2017	12	12
0	0	2018	12	12
12	12	2019	0	0
36	**36**	Total	24	**24**

Figure #2 *– Example #2*

Example #3–Taxpayer owns two residences *– This uses the same homes as example #2 except the lived-in and qualifying months have been changed to demonstrate that it is possible to have two homes with neither clearly qualifying as principal residence. When a situation like this occurs, you will have to rely on "facts and circumstances" to determine if the home being sold qualifies as the taxpayer's principal residence.*

VIRGINIA HOME Months			NEW ENGLAND HOME Months	
Lived In	**Qualified**	**Year**	**Lived In**	**Qualified**

5	0	2019	7	7
36	**21**	Total	24	**21**

Figure #3 *– Example #3*

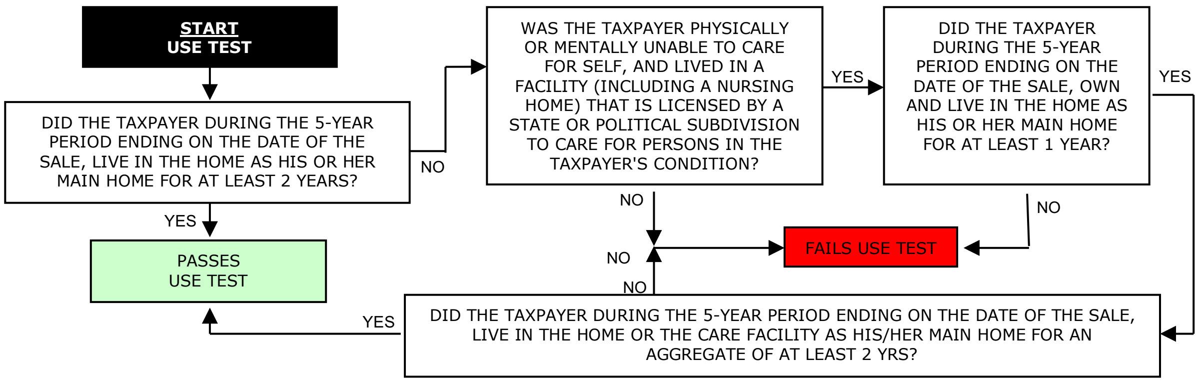
EXCEPTION FOR INDIVIDUALS WITH A DISABILITY *(Reg. §1.121-1(c)(2)(ii))*

There is an exception to the ***use test*** if, during the 5-year period before the sale of the home the taxpayer:

1) Becomes physically or mentally unable to care for themselves, ***and***
2) Owned and lived in the home as their main home for a total of at least 1 year.

Under this exception, the taxpayer is considered to have lived in the home during any time that he or she owns the home and lives in a facility (including a nursing home) that is licensed by a state or political subdivision to care for persons in the taxpayer's condition. A taxpayer meeting this exception to the use test, still has to meet the 2-out-of-5-year ownership test to claim the exclusion.

Use Test Qualification Chart - Before using this chart, refer to the Use Test Chart for each taxpayer to see if they meet the use test or use test exemption**.** **CAUTION: This is the use test only - do not confuse it with the separate ownership test.**



TEMPORARY ABSENCE - USE TEST *(Reg. §1.121-1(c)(2)(i))*

The taxpayer must occupy the residence (except for short temporary absences) for at least 2 years during the 5-year period ending on the date of the sale or exchange. However, short temporary absences, such as for vacation or other seasonal absence ***(even though accompanied with rental of the residence)***, are counted as periods of use.

> ***Example – Meeting Use Requirements*** - *Taxpayer D, a college professor, purchased and moved into a house on May 1, 2017. He used the house as his principal residence continuously until September 1, 2018, when he went abroad for a 1-year sabbatical leave. On October 1, 2019, 1 month after returning from the leave, D sold the house. Because his leave is not considered to be a short temporary absence for purposes of §121, the period of the leave may not be included in determining whether D used the house for periods aggregating 2 years during the 5-year period ending on the date of the sale. Consequently, D is not entitled to exclude gain under section 121.*

TEMPORARY ABSENCE & HOME-USE TEST

Generally, taxpayers must occupy their residence (except for short temporary absences) for at least 2 years during the 5-year period ending on the date of the sale or exchange in order to take advantage of the home sale exclusion.

Exception – Temporary Absence - However, short temporary absences, such as for vacation or other seasonal absence (even though accompanied with rental of the residence), are counted as periods of use. *(Reg. §1.121-1(c)(2)(i))* Two-month vacations are short temporary absences, but a one-year stay abroad (e.g., while on sabbatical) is not. *(Reg. § 1.121-1(c), Exs. (4) and (5))*

> ***Example:*** *John and Maria celebrate John's retirement by taking a nine-month tour of the United States in their motor home. They were concerned about leaving their home vacant for that length of time so they rented it out while they were gone. Under the temporary absence rule, their use period includes the 9 months they were on their tour of the U.S. even though the home was rented out while they were absent.*

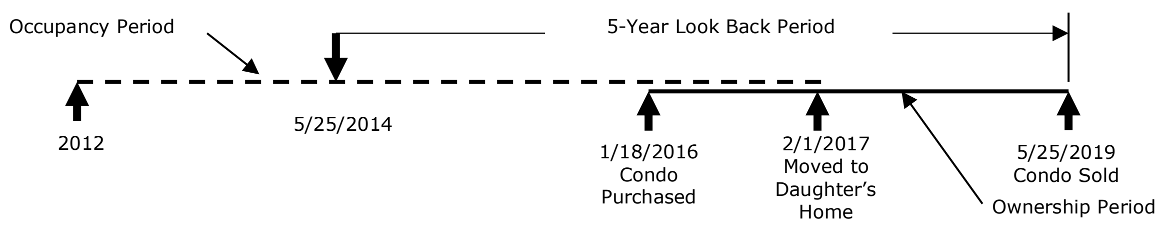
HOME USED AS A RENTAL *(Reg. §1.121-1(c)(4))*

The fact that a home is rented for some period of time does not preclude the home sale from qualifying for the exclusion, provided the nonqualified use rules discussed above do not apply. As long as the ownership and use tests are satisfied, the exclusion can be used (but will be limited if there has been nonqualified use). However, any gain to the extent of the depreciation taken after May 6, 1997 would not be excludable and would be treated as §1250 gain.

Example – Home Used as a Rental *- Taxpayer A owned and used his house as his principal residence from 2004 until January 31, 2017, when A moved to another state. A rents his house to tenants from that date until April 18, 2019, when he sells it. A is eligible for the section 121 exclusion because he has owned and used the house as his principal residence for at least 2 of the 5 years preceding the sale. The taxpayer will not run afoul of the nonqualified use rule that would limit exclusion of gain from the sale because he meets the exception of not using the house as his principal residence from the time he moved out of the house and it was sold.*

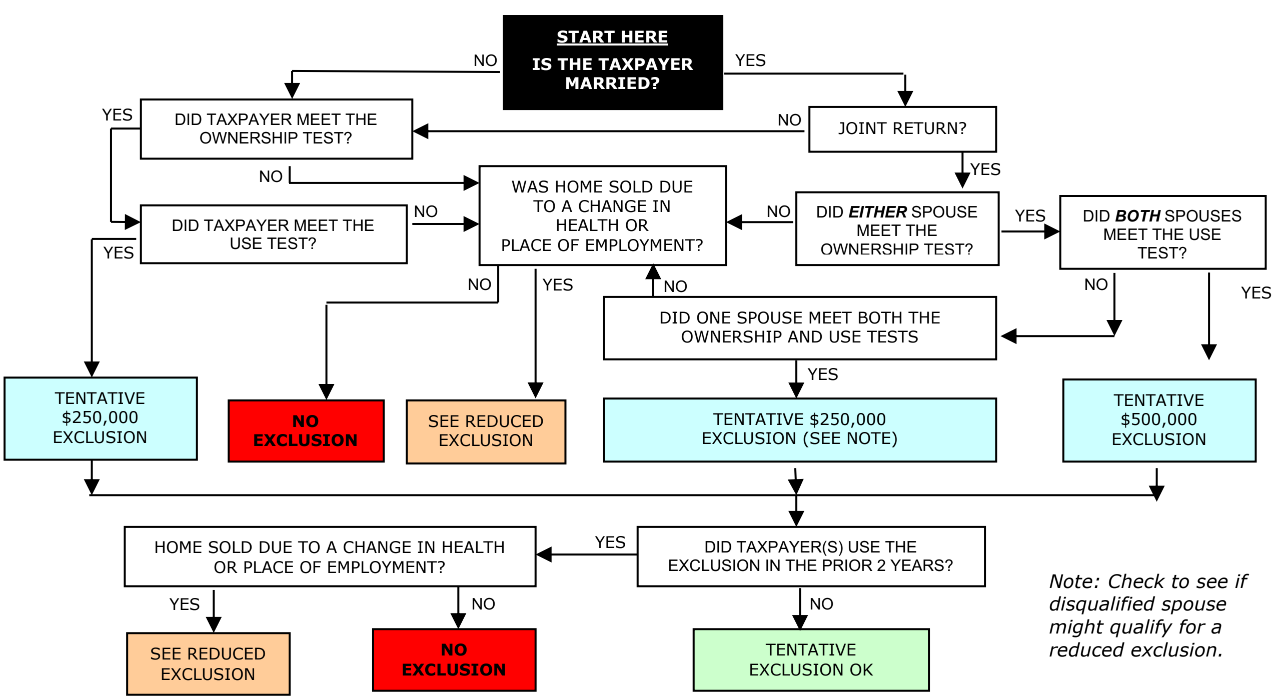
OWNERSHIP & USE TEST PERIODS ARE DIFFERENT *(Reg. §1.121-1(c)(4)):*

Example – Ownership & Use Periods Different *- Taxpayer C lives in a townhouse that he rents from 2012 through 2015. On January 18, 2016, he purchases the townhouse. On February 1, 2017, he moves into his daughter's home. On May 25, 2019, while still living in his daughter's home, he sells his townhouse. The section 121 exclusion will apply to gain from the sale because C owned the townhouse for at least 2 years out of the 5 years preceding the sale (from January 19, 2016 until May 25, 2019) and he used the townhouse as his principal residence for at least 2 years during the 5-year period preceding the sale (from May 25, 2014 until February 1, 2017).*



Exclusion Qualification Chart

Exclusion Flow Chart - Before using this chart, refer to the "Use Test Qualification Chart" for each taxpayer to see if they meet the use test or use test exemption.



ONE-SALE-EVERY-TWO-YEARS LIMIT

The exclusion doesn't apply to any sale if, during the two-year period ending on the date of the sale, there was any other sale by the taxpayer to which the exclusion applied. The exclusion is allowed each time a taxpayer meets the eligibility requirements, but generally no more frequently than once every two years.

Marital Issue – One Spouse Violates the One-Sale-Every-Two-Years Rule - If a single taxpayer who is eligible for an exclusion marries someone who has used the exclusion within the two years before the marriage, the newly-married taxpayer is allowed a maximum exclusion of $250,000. Once both spouses satisfy the eligibility rules and two years have passed since the last exclusion was allowed to either of them, the taxpayers may exclude $500,000 of gain on their joint return.

Marital Issue – Both Spouses Qualify With Separate Residences - This rule limiting the exclusion doesn't prevent a husband and wife filing jointly from each excluding up to $250,000 of gain on the sale or exchange of each spouse's principal residence provided that each spouse would be permitted to exclude up to $250,000 of gain if they filed separate returns.

REDUCED EXCLUSION

The reduced exclusion applies to any sale or exchange if a taxpayer doesn't meet the ownership, use or once-every-two-years requirements due to ***a change in the place of employment, health or (to the extent provided in regs) unforeseen circumstances.*** The reduced exclusion applies if any of the following are true:

(1) Taxpayer did not meet the ownership and use tests for a home sold due to a change in health, place of employment or unforeseen circumstances (as defined in regulations), **or**

(2) Exclusion would have been disallowed because taxpayer sold more than one home during the two-year period, except if the taxpayer sold the home due to a change in health, place of employment or regulations-defined unforeseen circumstances.

Change in Employment - is a change in the location of the employment (including self-employment) of a qualified individual (taxpayer, spouse, co-owner of the residence, or a person whose principal place of abode is in the same household as the taxpayer). This condition is treated as met (a safe harbor) if: (1) the new place of employment is at least 50 miles farther from the residence sold or exchanged than was the former place of employment (for the unemployed, 50 miles between the new place of employment and the residence sold or exchanged); and (2) the change in place of employment occurs during the period of the taxpayer's ownership and use of the home as his principal residence. *(Reg. § 1.121-3(c))*

The Health Condition - is met if the primary reason for the sale is: (1) To obtain, provide, or facilitate the diagnosis, cure, mitigation, or treatment of disease, illness, or injury of a qualified individual, or (2) To obtain or provide medical or personal care for a qualified individual suffering from a disease, illness, or injury.

A qualified individual is:

- The taxpayer,
- The taxpayer's spouse,
- Co-owner of the residence,
- A person whose principal place of abode is in the same household as the taxpayer,
- Family members (son/daughter and descendants; stepson/stepdaughter; brother/sister/step-brother/step-sister; father/mother and ancestors; stepfather/stepmother; son/daughter of sister/brother; sister/brother of father/mother; son-/daughter-in law, father-/mother-in law, brother-/sister-in law) of any individual in the four bullets above, even if they aren't the taxpayer's dependents, or
- Descendants of the taxpayer's grandparent (e.g., first cousins).

A sale or exchange doesn't qualify for the health condition if it is merely beneficial to the general health or well-being of the individual. The health condition is treated as met if a doctor recommends a change of residence for the health reasons listed above in (1) and (2). *(Reg. § 1.121-3(d))*

Strategies - The definition of a **"qualified individual"** opens up some interesting possibilities and, although we cannot cover all of them, the following are some examples:

Incapacitated Parent – Suppose an elderly parent for health reasons can no longer care for themselves. A child, or other qualified relative, could sell their home and use the partial exclusion in order to relocate closer to an elderly parent or vice versa.

Joint Owners – Suppose two unrelated individuals buy a home together. Things don't work out and one loses a job, etc., while the other relocates and changes jobs (meeting the 50-mile requirement). Because the co-owner is a qualified individual, the owner that did not relocate can still utilize the partial exclusion.

Unforeseen Circumstances - The regulations for partial home sale exclusions are quite liberal. Some taxpayers who are unaware of the unforeseen circumstances reduced exclusion provisions may have unnecessarily paid taxes on gain when they sold their homes. Taxpayers who would otherwise qualify under this section to exclude gain from a sale or exchange on or after May 7, 1997, may elect to apply all of the provisions of this section for any years for which the statute of limitations has not expired.

Foreclosure & Unforeseen Circumstances
Loss of a home due to foreclosure or voluntary reconveyance would be unforeseen circumstances.

(1) In general - A sale or exchange is by reason of unforeseen circumstances if the primary reason for the sale or exchange is the occurrence of an event that the taxpayer could not reasonably have anticipated before purchasing and occupying the residence.

If the taxpayer qualifies for a safe harbor described in this section, the taxpayer's primary reason is deemed to be a change in place of employment, health, or unforeseen circumstances. If the taxpayer does not qualify for a safe harbor, factors that may be relevant in determining the taxpayer's primary reason for the sale or exchange include (but are not limited to) the extent to which:

- The sale or exchange and the circumstances giving rise to the sale or exchange are proximate in time;
- The suitability of the property as the taxpayer's principal residence materially changes;
- The taxpayer's financial ability to maintain the property materially changes;
- The taxpayer uses the property as the taxpayer's residence during the period of the taxpayer's ownership of the property;
- The circumstances giving rise to the sale or exchange are not reasonably foreseeable when the taxpayer begins using the property as the taxpayer's principal residence; and
- The circumstances giving rise to the sale or exchange occur during the period of the taxpayer's ownership and use of the property as the taxpayer's principal residence.

(2) **Specific safe harbor events** - The primary reason for the sale or exchange is deemed to be unforeseen circumstances if any of the events specified below occur during the period of the taxpayer's ownership and use of the residence as the taxpayer's principal residence. *(Reg. § 1.121-3(e)(2))*

(1) **Involuntary conversion of the residence**; *Reg. § 1.121-3(e)(2)(i)*

(2) A natural or manmade **disaster or act of war or terrorism** resulting in a casualty to the residence; *Reg. § 1.121-3(e)(2)(ii)*

(3) **Death of a qualified individual**; *Reg. 1.121-3(e)(2)(iii)(A)*

(4) A qualified individual's **cessation of employment making him eligible for unemployment compensation**; *Reg. § 1.121-3(e)(2)(iii)(B)*

(5) A qualified individual's **change in employment or self-employment** status that results in the taxpayer's **inability to pay housing costs and reasonable basic living expenses** for the taxpayer's household – but not for maintenance of an affluent or luxurious standard of living; *Reg. § 1.121-3(e)(2)(iii)(C)*

(6) A qualified individual's **divorce or legal separatio**n under a decree of divorce or separate maintenance; *Reg. § 1.121-3(e)(2)(iii)(D)* and

(7) **Multiple births** resulting from the same pregnancy of a qualified individual. *Reg. § 1.121-3(e)(2)(iii)(E)*

A qualified individual is defined the same way as for the change-in-employment condition. IRS may designate other events or situations as unforeseen circumstances.

Sale to Facilitate Adoption - The IRS has concluded that the sale of a home and rental of a larger one to facilitate an adoption was an "unforeseen circumstance" for purposes of the reduced home sale exclusion rule. (PLR 200613009)

Home Sale to Accommodate Pregnant Joint Owner - Two unmarried taxpayers jointly purchased a home and used it as their principal residence. Approximately seven months after buying the home, the female partner became pregnant. The mother to be and the father of the expected child were no longer in a relationship and plan to sell the home and find separate residences because the home isn't large enough to accommodate two adults and a child and neither one of them can afford to make the monthly mortgage payments on the home alone. The private ruling concludes that the sale qualified as an unforeseen circumstance. (PLR 200652041)

Big Family Qualified for Reduced Maximum Exclusion - IRS has privately ruled that a taxpayer's second marriage and resulting large combined new family were unforeseen circumstances under the home sale exclusion rules. As a result, he qualified for a reduced maximum exclusion for gain on the sale of a home he had owned and used as a principal residence for less than 2 of the preceding 5 years. (PLR 200725018)

Birth of Second Child Qualified for Reduced Maximum Exclusion – In a private letter ruling, the IRS allowed a married couple to use the reduced maximum gain exclusion when they sold their home after the birth of their second child. When they purchased the 2-bedroom condo, the couple had only one child. The child's bedroom was also used as the husband's home office and a guest room. After having a second child, the taxpayers moved out of the condo and sold it. The IRS approved the reduced maximum exclusion on the basis of unforeseen circumstances and that the suitability of the residence changed significantly with the arrival of the second child. (PLR 201628002)

Caution: *Other taxpayers shouldn't assume that the decision to sell a home in order to facilitate an adoption or expansion of the family automatically qualifies as an unforeseen circumstance. Under Reg. § 1.121-3(e)(3), unforeseen circumstances include events determined by IRS to be unforeseen to the extent provided in published guidance of general applicability or in a ruling directed to a specific taxpayer. A ruling directed to a specific taxpayer (i.e., a private letter ruling) does not establish a generally applicable safe harbor.*

Specific Examples

Example (1) *- In 2018, A buys a house in California. After A begins to use the house as her principal residence, an earthquake causes damage to A's house. A sells the house in 2019. The sale is within the safe harbor of item (2), above, and A is entitled to claim a reduced maximum exclusion.*

Example (2) *- H works as a teacher and W works as a pilot. In 2018, H and W buy a house that they use as their principal residence. Later that year, W is furloughed from her job for six months. H and W are unable to pay their mortgage during the period W is furloughed. H and W sell their house in 2019. The sale is within the safe harbor of item (5), above, and H and W are entitled to claim a reduced maximum exclusion.*

Example (3) *- In 2018, H and W buy a two bedroom condominium that they use as their principal residence. In 2019, W gives birth to twins and H and W sell their condominium and buy a four bedroom house. The sale is within the safe harbor of item (7), above, and H and W are entitled to claim a reduced maximum exclusion.*

Example (4) *- B buys a condominium in 2018 and uses it as his principal residence. B's monthly condominium fee is $X. Three months after B moves into the condominium, the condominium association decides to replace the building's roof and heating system. Six months later, B's monthly condominium fee doubles. B sells the condominium in 2019 because B is unable to pay the new condominium fee along with the monthly mortgage payment. The safe harbors listed above do not apply. However, under the facts and circumstances, the primary reason for the sale is unforeseen circumstances, and B is entitled to claim a reduced maximum exclusion.*

Example (5) *- In 2018, C buys a house that he uses as his principal residence. The property is located on a heavily trafficked road. C sells the property in 2019 because the traffic is more disturbing than he expected. C is not entitled to claim a reduced maximum exclusion under Section 121(c)(2) because the safe harbors of the regulations (listed above) do not apply and, under the facts and circumstances, the traffic is not an unforeseen circumstance.*

Example (6) *- In 2018, D and her fiancé E buy a house and live in it as their principal residence. In 2019, D and E cancel their wedding plans and E moves out of the house. Because D cannot afford to make the monthly mortgage payments alone, D and E sell the house in 2019. The safe harbors do not apply. However, under the facts and circumstances, the primary reason for the sale is unforeseen circumstances, and D and E are each entitled to claim a reduced maximum exclusion.*

CAUTION – UNFORESEEN CIRCUMSTANCES

Taxpayer Preference or Financial Gain - The final regulations clarify that a sale because of unforeseen circumstances (other than a sale within a safe harbor) does not qualify for the reduced maximum exclusion if the primary reason for the sale is a preference for a different residence or an improvement in financial circumstances. (Reg. § 1.121-3(e)(1))

Published Guidance - The final regulations clarify that taxpayers may rely on only those determinations made by IRS in published guidance of general applicability. A ruling directed to a specific taxpayer (i.e., a private letter ruling) does not establish a safe harbor of general applicability. (Reg. § 1.121-3(e) (3))

Amount of Reduced Exclusion - For those who qualify for the reduced exclusion, the gain excluded from gross income can't be more than the $250,000/$500,000 maximum exclusion amount multiplied by a fraction. The denominator of the fraction is <u>730</u> and the numerator of the fraction is of the ***shorter of***:

(1) the number of days, during the five-year period just prior to the current sale that the property was owned and used by the taxpayer as his/her principal residence, ***or***

(2) the number of days after the date of the most recent earlier sale to which the exclusion applied and which occurred before the date of the current sale.

Reduced Exclusion Worksheet

Complete both columns if married filing a joint return.

		(A) *Taxpayer*	(B) *Spouse*
1.	Maximum amount………………………………………………………………………………	250,000	250,000
2a.	Number of days that taxpayer used the property as a main home during the 5-yr period ending on the date of sale. (If filing jointly, fill in col (A) and (B)) …………..	________	________
2b.	Enter the number of days the taxpayer owned the property during the 5-yr period ending on the date of sale. (If filing jointly and one spouse owned the property longer than the other spouse, both spouses are treated as owning the property for the longer period)…..	________	________
2c.	Enter the smaller of line 2a or 2b………………………………………………………………	________	________
3.	Did the taxpayer (or spouse if filing jointly) exclude gain from the sale of another home during the 2-yr period ending on the date of this sale? **NO.** Skip line 3 and enter the number of days from line 2c on line 4. **YES.** Enter the number of days between the date of the most recent sale of another home on which t/p excluded gain and the date of sale of this home……………..	________	________
4.	Enter the smaller of line 2c or 3..………………………………………………………………	________	________
5.	Divide the amount on line 4 by 730 days. Enter the result as a decimal (rounded to at least 3 places). Do not enter an amount greater than 1.000…………………………..	________	________
6.	Multiply the amount on line 1 by the decimal amount on line 5 ……………….………….	________	________
7.	Add the amounts in column (A) and (B) of line 6. This is the reduced maximum exclusion. …………………………………………………………………………………………..		________

Example - Reduced Exclusion Calculation - *Sally sold her principal residence because she got a new job in another city. On the date of the sale, she had used and owned the home as her principal residence for the last 18 months; she had never excluded gain under these rules before. However, since she fails to meet the full use and ownership requirements (i.e., two years of five) by the sale date, the amount of gain she can exclude is reduced using the following calculation (computed using months):*

$250,000 (maximum exclusion for Sally is limited to her gain)
times
[18 months (aggregate time of use under (1) above)/24 months]

Result: Sally can exclude up to $187,500 (250,000 x (18/24)) of her gain on the sale of her principal residence.

Strategies

Partial Home Sale Exclusion and the Sale of a Rental - A single taxpayer sells a home for $600,000. The home was originally purchased on January 1, 2009 for $250,000. The taxpayer lived in the home through March 31, 2015 at which time the taxpayer began renting the home out. It continued to be used as a rental up to the date of sale on February 28, 2019. The reason the taxpayer sold the home was due to a job-related move to Florida in February of 2019. The sales costs were $32,000, and the depreciation taken during the rental period was $27,800. What is the taxpayer's taxable gain from this sale?

This problem is unique in that the taxpayer sold the home while it was in rental service, and the underlying question is whether the taxpayer qualifies for a partial exclusion. The answer to that question lies in Code Sec. 121(c)(2), which says:

The reduced exclusion applies to any sale or exchange of a principal residence if:

- *The exclusion would not (but for these rules relating to the reduced exclusion) apply to the sale or exchange by reason of:*

  (1) A failure to meet the ownership and use requirements, or

  (2) The limit of only one sale every two years, and

- *The sale or exchange is by reason of a change in place of employment, health, or (to the extent provided in regulations), unforeseen circumstances.*

Therefore, the partial exclusion applies to **any** sale or exchange of a principal residence, and in this case, by virtue of the job-related move by the taxpayer. Thus, since the taxpayer used the home as a residence for 13 months of the 60-month qualifying period, the solution is as follows:

- Home used as a rental - April 1, 2015 to February 28, 2019= **47 Months**
- Home used several years prior to April 1, 2015 as principal residence = **13 Months** of the 60-month look back period.
- Section 121 Exclusion: (13/24) x $250,000 = **$135,425**
- Total time owned: 2009 thru 2018 = 10 yrs x 12 mos = 120 + 2 mos in '19 = 122 mos.

Sales price:		$ 600,000
Cost	$ 250,000	
Depreciation	<$ 27,800>	
Basis		<$ 222,200>
Sales costs		<$ 32,000>
Gain before Exclusion		$ 345,800
Section 121 Exclusion		<$135,425>
Taxable Gain		**$210,375**

Note: if the exclusion had been figured based on the number of days instead of months, the exclusion would be $200 more: 396 days/730 = .5425 x 250,000 = 135,625.
In addition, part or all of the balance of the gain could be deferred under Section 1031 if the taxpayer acquired a replacement rental and meets all the requirements for a Section 1031 exchange.

FORECLOSURE & DEBT RELIEF ISSUES – Also see chapter 2.09 Foreclosures & Abandonment

Sales Price Determination – When there is a foreclosure or voluntary reconveyance the sales price is determined based upon whether there is debt relief or not. Where the debt is a non-recourse debt the sales price is the balance of the loan at the time of disposition. Where the debt is recourse, the sale price is the FMV of the home at the time of disposition.

Debt Relief Basis Adjustments – There may be a home basis adjustment to be accounted for in a debt relief computation. Where the taxpayer excludes gain under the insolvent taxpayer exclusion there is no home basis adjustment. However, if a taxpayer utilizes the special homeowner's exclusion for 2007 through 2017, then the homeowner must reduce the basis of the home for which the debt relief income is attributable. This basis adjustment must be reported on IRS Form 982, Reduction of Tax Attributes Due to Discharge of Indebtedness, by checking box 1e of Part I of that form and entering the amount of basis reduction on line 10b of Part II. This in effect transfers the debt relief to the home where it can be excluded under Sec 121, or if any portion of it is taxable, it becomes capital gains income.

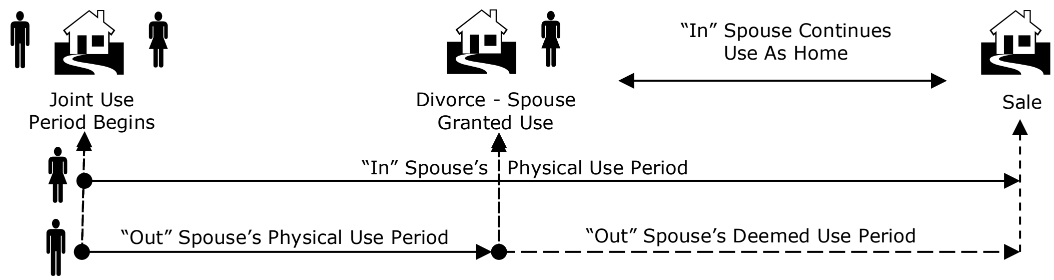
LOSS OF EXCLUSION WHEN PRIOR PRINCIPAL RESIDENCE REACQUIRED (BUYERS DEFAULT)

The Tax Court has concluded that, where a taxpayer sold his primary residence and excluded gain under Code Sec. 121, then reacquired the property after the buyers defaulted, the taxpayer had to recognize long-term capital on the reacquisition including amounts previously excluded under Code Sec. 121. The Court found that subjecting the taxpayer to the general gain recognition rules of Code Sec. 1038 was required under the statute and consistent with the economics of the transaction. Debough, (2014) 142 TC No. 17

SPECIAL RULES FOR MARRIED TAXPAYERS

Transfers between spouses or transfers related to divorce - For an individual holding property transferred between spouses or transfers incident to divorce, the period the individual owns the property includes the period the transferor owned the property. However, the period that the transferor spouse or former spouse used the property is not included in the period that the individual used the property. So, it seems that the transferee spouse would still have to satisfy the use requirement in order to qualify for the exclusion. ***(Reg. §1.121-4(b)(1))***

Sale after ex-spouse retains property for some period of time - Only for purposes of this exclusion is an individual treated as using property as the individual's principal residence during any period of ownership while the individual's spouse or former spouse is granted use of the property under a divorce or separation instrument. This means that if a husband (or wife) continues to own the home after a divorce, and his/her former wife (husband) is granted use of the property under a divorce instrument, the exclusion could be available when the husband (wife) sells the house if he (she) meets the ownership requirement and his wife (her husband) meets the use requirements. ***(Reg. §1.121-4(b)(2))***



Deceased spouse's property – A surviving spouse is treated as owning and using property as the taxpayer's principal residence during any period that the taxpayer's deceased spouse owned and used the property as a principal residence before death if ***(Reg. §1.121-4(a):***

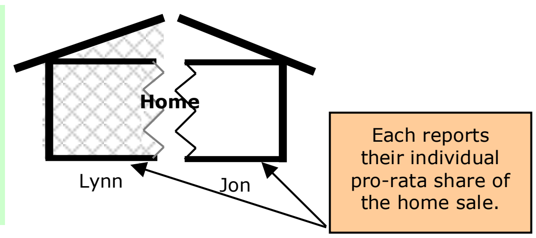
1) The taxpayer's spouse is deceased on the date of the sale or exchange of the property; and
2) The taxpayer has not remarried at the time of the sale or exchange of the property.

Special Note: *Remember a surviving spouse will have a step-up (or step-down) in basis for half or all of the property. In addition, the capital gains holding period for inherited property is always long-term.* (This note is not applicable for property acquired from a decedent dying in 2010 if the executor chose the "no estate tax" and carryover basis method.)

OTHER RULES

Jointly Owning a Home – Unmarried Individuals - (Reg. §1.121-2(a)(4), Ex. 1). If two unmarried individuals jointly own and use one principal residence, the $250,000 exclusion provisions apply independently to each upon a sale of the residence. Each individual must report their separate gain (or loss) on their personal tax return and, therefore, may be eligible to exclude from gross income up to $250,000 of gain that is attributable to each taxpayer's interest in the property.

Example – Unmarried Taxpayers - *Lynn and Jon, who are unmarried, own a house as joint owners, each owning a 50-percent interest in the house. They sell the house after owning and using it as their principal residence for 2 full years. The gain realized from the sale is $256,000. Lynn and Jon are each eligible to exclude $128,000 of gain because the amount of realized gain allocable to each of them from the sale does not exceed the available limitation amount of $250,000 available to each separately.*

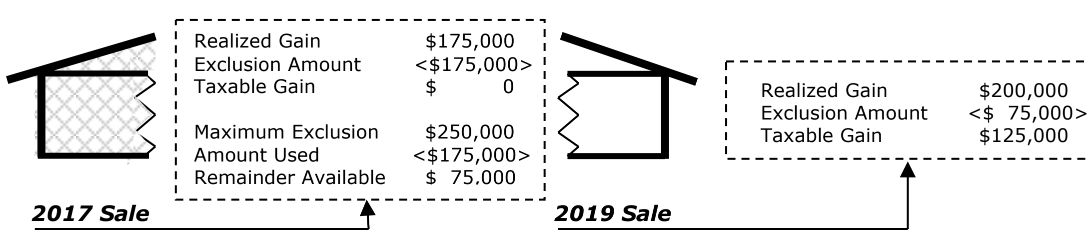


Sales of Partial Interests and Remaining Interests - (Reg §1.121-4(e)(1)(ii))

Only one maximum limitation amount of $250,000 ($500,000 for certain joint returns) applies to the combined sales or exchanges of the partial interests. In applying the maximum limitation amount to sales or exchanges that occur in different taxable years, a taxpayer may exclude gain from the first sale or exchange of a partial interest up to the taxpayer's full maximum limitation amount and may exclude gain from the sale or exchange of any other partial interest in the same principal residence to the extent of any remaining maximum limitation amount, and each spouse is treated as excluding one-half of the gain from a sale or exchange relating to the limitation for certain joint returns apply.

Caution: *The provisions for sales of partial interests do not apply to sales or exchanges to related parties.*

Example – Sale of a Partial and Remaining Interest - *In 2011, Gil buys a house that he uses as his principal residence. In 2017, Gil's friend Dave moves into Gil's house and Gil sells Dave a 50-percent interest in the home. Gil realized a gain of $175,000 in the transaction. Gil may exclude the $175,000 of gain. In 2019, Gil gets married and Gil's new wife Connie owns a home. Gil and Connie decide to live in Connie's home so Gill sells his remaining 50-percent interest in the home to Dave, realizing an additional gain of $200,000. Gil may exclude $75,000 ($250,000 - $175,000) of gain from sale of his remaining interest and the balance of $125,000 will be taxable.*

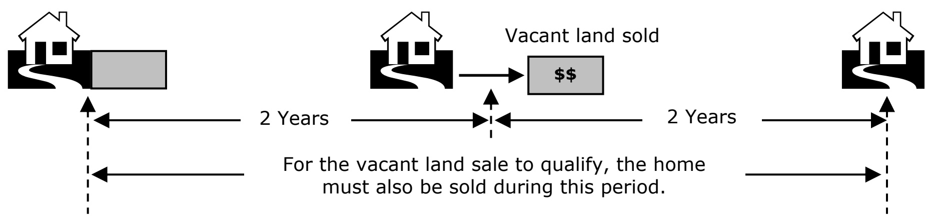


The one-sale-every-two-year rule is disregarded for sales of partial interests in the same home. However, in the example above, the taxpayer could not have had another sale two years prior to the 2017 sale nor can he have one for two years after the 2019 sale. Should he, for some reason, wish to elect not to take the exclusion on the 2019 sale, he can do so by reporting the gain on his 2019 return in which case the one-sale-every-two-year rule would be based solely on the 2017 sale date.

Sale of Vacant Land Adjacent to a Home - (Reg. §1.121-1(b)(3))

In general, the sale or exchange of vacant land is not a sale or exchange of the taxpayer's principal residence unless:

- The vacant land is adjacent to land containing the dwelling unit of the taxpayer's principal residence;
- The taxpayer owned and used the vacant land as part of the taxpayer's principal residence;
- The vacant land was not used for non-residential purposes (Reg § 1.121-1(e)(1));
- The taxpayer sells or exchanges the dwelling unit in a sale or exchange that meets the requirements of Section 121 within 2 years before or 2 years after the date of the sale or exchange of the vacant land; and
- The requirements of Section 121 have otherwise been met with respect to the vacant land.



The gain exclusion for the two transactions would be in accordance with the provisions of selling partial or remaining interests discussed previously. **Caution:** The Sec. 121 provisions do not apply for partial interest and remaining interest sales to related parties.

Home Sale - Revocable Trust - If a residence is owned by a trust, for the period that a taxpayer is treated as the owner of the trust or the portion of the trust that includes the residence, the taxpayer will be treated as owning the residence for purposes of satisfying the 2-year ownership requirement of Section 121, and the sale or exchange by the trust will be treated as if made by the taxpayer. *(Reg. § 1.121-1(c)(3)(i))*

Home Sale Exclusion – Irrevocable Trusts - Some individuals use revocable trusts as an alternative to having their property transferred by will. While there is no income or estate tax advantage to a revocable trust, there is a benefit in having the property pass to beneficiaries on the death of the owner without having to go through the probate process. A private ruling reveals a potential pitfall where a married couple transfers their residence to a revocable trust that becomes irrevocable after the first spouse dies – the $250,000 home sale exclusion may be completely lost or available only to a limited extent even though the surviving spouse has the continued right to occupy the residence.

In the ruling (PLR 200104005), the exclusion was available only to the extent the survivor was considered to own trust property. The couple, living in a community property state, established a revocable trust while both were living. Upon the death of the spouse, the trust was split into two trusts, the irrevocable bypass trust and the survivor's revocable trust. The home was assigned to the irrevocable bypass trust and the survivor was only allowed to withdraw from the principal of the trust in each calendar year an amount not to exceed the greater of $5,000 or 5% (5 or 5 power) of the then aggregate market value of all property included in the trust.

In the letter ruling, the IRS concluded that gain on the trust's sale of the residence is taxable to the trust except for the portion of the gain that is taxable to the surviving spouse, by virtue of his 5 or 5 power. Thus, the surviving spouse may only use the Code Sec. 121 exclusion to shelter gain on the portion of the residence attributable to his 5 or 5 power.

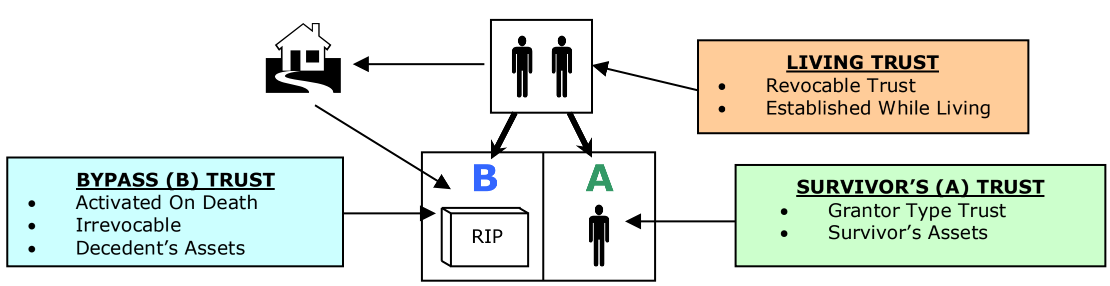


Figure #4 – Home in Irrevocable Bypass Trust

***Example** – Assume the taxpayers have a revocable living trust. Upon the first spouse's death, the irrevocable bypass (B) trust is created. If some portion of the taxpayers' home is assigned to the bypass trust, that portion of the home does not qualify for future § 121 gain exclusion. This initially creates no problem, because the home's basis is stepped up when it goes into the trust (and it won't be stepped up again when the surviving spouse passes). However, if the surviving spouse continues to use the home for a number of years and the home appreciates in value and is then sold, the resulting gain for the portion of the home in the irrevocable trust would not be excludable under § 121.*

<u>RESIDENCE USED PARTIALLY FOR BUSINESS – MIXED-USE PROPERTY</u>

The final regulations provide that no allocation of gain is required if both the residential and nonresidential portions of the property are within the same dwelling unit; gain to the extent of any post-May 6, '97, depreciation adjustments isn't excludible. However, gain is allocated if the portion of the home used for business is separate from the dwelling unit and the separate structure fails the residential qualification tests. *(Reg. § 1.121-1(e)(1))*

Treatment where business use is within the same dwelling unit:

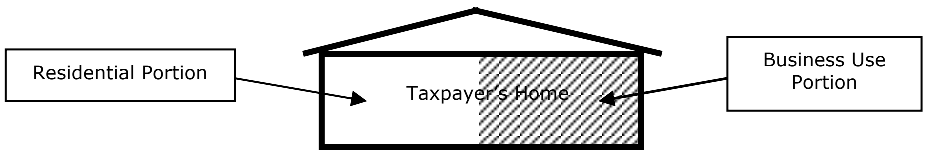

Illustration – Business Use within Home Structure

No allocation of gain is required if both the residential and nonresidential portions of the property are within the same dwelling unit. The gain from the sale is treated as if the entire home qualified for the home gain exclusion except that any gain to the extent of any post-May 6, '97 depreciation adjustments isn't excludible. Any depreciation taken, including post-May 6, '97 depreciation, adjusts the basis of the home.

Example #1 – Assuming a single taxpayer and the home meets the exclusion qualifications:

1.	Sales price		$450,000
2.	Sales expenses		< $35,000>
3.	Basis	$250,000	
4.	Improvements	$ 15,000	
5.	Depr. pre-5/7/97	<$ 1,200>	
6.	Depr. post-5/6/97	<$ 1,000>	
7.	Adjusted basis	$262,800	<$262,800>
8.	Pre-exclusion gain		$152,200
9.	Depr. Post-5/6/97		<$ 1,000>
10.	Gain		$151,200
11.	Tentative exclusion		$250,000
12.	Exclusion (smaller of LN10 or LN11)		<$151,200>
13.	Gain		$ 0
14.	Unrecaptured Sec 1250 Gain (smaller of LN8 or LN9)		$1,000
15.	Capital Gain (LN13 less LN14)		$0

<u>HOME QUALIFYING FOR SEC 121 EXCLUSION AND SEC 1031 DEFERRAL</u>

Rev Proc 2005-14 has made it quite clear that the ***exchange*** of a home can qualify for both the §121 home sale exclusion and §1031 like-kind exchange deferral treatment. This can occur where the property was used as a principal residence and a business <u>consecutively</u> (e.g., used as a principal residence followed by rental of the property) or <u>concurrently</u> (a portion of the home used as a principal residence and a portion used as a home office). (Rev. Proc. 2005-14) **Caution:** in real life, how many people selling their principal residence would structure the deal as an exchange? Merely selling a home where part has been used as an office and buying a new one where part is going to be used as an office won't qualify as an exchange.

Consecutive Use – This would occur when a taxpayer's home is converted to a rental property and is still being used as a rental property at the time of the exchange AND still meets the two-out-of-five ownership and use qualifications. Thus, the §121 home sale exclusion would apply and since the property is in business use, it also would qualify for §1031 like-kind exchange deferral treatment.

Example #2 *– Jack buys a house for $210,000 that he uses as his principal residence from 2014 to 20172018. From 2018 until 2019, he rents the house to tenants and claims depreciation deductions of $20,000. In 2019, Jack, who is single, exchanges the house for $10,000 of cash and a townhouse with a fair market value of $460,000. Jack intends to use the townhouse as rental property. This is the way the transaction plays out:*

The Exchange	***GIVEN***	***RECEIVED***
Fair Market Value	*470,000*	*460,000*
Cash		*10,000*
Total	*470,000*	*470,000*

***Gain Computation**:*	
FMV of Property Given	*$470,000* (1)
Less cost	*<210,000>*
Depreciation	*20,000*
Gain	*$280,000*
§121 Exclusion	*<250,000>*(2)
Profit	*$ 30,000*
§1031 Deferral	*< 30,000>* (3)
Taxable Gain	*0*

(1) Townhouse worth $460,000 plus $10,000 in cash.
(2) There is no limitation on the exclusion for "nonqualified use" because the rental occurred after the last date the property was used by Jack as his principal residence.
(3) Jack defers the remaining gain of $30,000, including the $20,000 gain attributable to depreciation, under Code Sec. 1031. Moreover, although Jack received $10,000 of cash (boot) in the exchange, he is not required to recognize gain because the boot is taken into account for purposes of Code Sec. 1031(b) only to the extent the boot exceeds the amount of excluded gain.

Concurrent Use – This would occur when a taxpayer's home is used as a primary residence and for business purposes at the same time. A frequently encountered example would be a taxpayer with a home office.

Example #3 *- Charlie pays $210,000 for a house that constitutes a single dwelling unit (1). From 2015 until 2019, he uses 2/3 (by square footage) as his principal residence and 1/3 as an office in his business. In 2019, he exchanges the entire property for a residence and a separate property to be used as an office in his business. The total FMV of the replacement properties is $360,000. The FMV of the replacement residence is $240,000 and the FMV of the replacement business property is $120,000, which is equal to the FMV of the business portion of the relinquished property. From 2015 to 2019, Charlie claims depreciation deductions of $30,000 for the business use. Thus, he realizes gain of $180,000 on the exchange ($360,000 amount realized − $180,000 adjusted basis ($210,000 cost − $30,000 depreciation)). Charlie is single. There was no "nonqualified use." He qualifies for both tax breaks as follows:*

	TOTAL	HOME	OFFICE
Sales Price	*360,000*	*240,000*	*120,000*
Home Cost	*<210,000>*	*<140,000>*	*<70,000>*
Depreciation	*30,000*	*---*	*30,000*
Realized Gain	*180,000*	*100,000*	*80,000*
§121 Exclusion	*<150,000>* (2)	*<100,000>*	*<50,000>* (2)
Tentative Taxable Gain	*30,000*	*0*	*30,000*
§1031 Deferral	*<30,000>*(3)	*---*	*<30,000>* (3)
Taxable Gain	*0*	*0*	*0*

(1) Under Code Sec. 1.121-1(e)(2) the sale of a home that is a single dwelling unit and is also used for business purposes is treated as one sale and the §121 exclusion applies to all gain except that gain attributable to depreciation taken after May 6, 1997.

(2) Under Reg. § 1.121-1(e), Charlie may exclude $50,000 of the gain allocable to the office because the office and residence are part of a single dwelling unit and any gain in excess of the depreciation taken after May 6, 1997 is subject to the §121 exclusion.

(3) Charlie defers paying tax on the office portion since he acquired a replacement. His basis in the separate replacement business property is $90,000 ($40,000 basis in the relinquished business property at the time of the exchange + $50,000 gain excluded under Code Sec. 121 attributable to the relinquished business property). (Code Sec. 1031. (Rev Proc 2005-14, Sec. 5, Ex. 3))

Treatment where business use is in a separate structure *(Reg. § 1.121-1(e)(1)):*

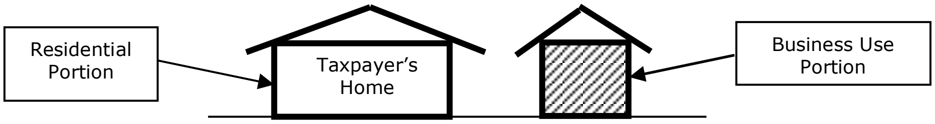

Illustration – Business Use in a Separate Structure

If the residence was mixed-use property and the business portion was in a separate structure, only that part of the gain allocable to the residential portion is excludable under §121. Therefore, the 2-out-of-5 years rule must be applied separately to the separate structure used for nonresidential (business) purposes.

EXCLUSION TEST: Does the separate structure meet the 2-out-of-5 years qualification rules?

Yes – Then the separate structure qualifies for the home sale exclusion right along with the rest of the home and the gain computation will be the same as if it were included in the same structure as illustrated previously.

No – Then the two structures are treated as separate sales. No part of the gain on the separate structure used for nonresidential purposes will qualify for the §121 exclusion. The same rules will apply to depreciation recapture with depreciation after May 5, 1997 treated as unrecaptured §1250 gain. Depreciation before May 6, 1997 adjusts the basis of the separate structure.

Example #4– Same as example #1 except that the business-use portion was in a separate structure representing 10 percent of the overall home unit. In this case, the home portion (A) and the business portion (B) must be treated as separate sales:

		A		B
1. Sales price		405,000		45,000
2. Sales expenses		< 31,500>		< 3,500>
3. Basis	225,000		25,000 (1)	
4. Improvements	13,500		1,500 (1)	
5. Depr. pre-5/7/97	< 0> (2)		< 1,200>	
6. Depr. post-5/6/97	< 0> (2)		< 1,000>	
7. Adjusted basis......................	238,500	<238,500>	24,300	<24,300>
8. Pre-exclusion gain		135,000		17,200
9. Depr. Post-5/6/97		< 0>		< 1,000>
10. Gain		135,000		16,200
11. Tentative exclusion	250,000 (3)		0	
12. Exclusion (smaller of LN10 or LN11)		<135,000>		< 0>
13. Gain		0		16,200
14. Sec 1250 Gain (smaller of LN8 or LN9) ...		0		1,000
15. Capital Gain (LN13 less LN14)		0		15,200

(1) In the example, the improvements have been allocated 90% to the home structure and 10% to the business structure. In actual application, the improvements are allocated to the structure where the improvements were made. If the separate business structure was built or required substantial improvements after the home structure was acquired, the specific allocation of improvements can provide a substantial benefit to a client.

(2) The depreciation may not always be allocated all to the separate structure. There could be situations where the business use was originally in the home structure and later moved to the separate structure.

(3) The tentative exclusion would be $250,000 for an individual or $500,000 for a qualifying couple. The amount could also be a partial exclusion based on either of those two amounts.

LOSS ON SALE WITH AN OFFICE

The question may arise on how to treat a loss on a home sale where the home was also used for business.

- **Mixed Use** - If the home was "mixed use" property at the time of sale, no loss is allowed. Mixed use means it is used both for personal and business use. ("Reg 1.165-9(a) LOSSES NOT ALLOWED. A loss sustained on the sale of residential property purchased or constructed by the taxpayer for use as his personal residence and so used by him up to the time of the sale is not deductible under section 165(a)." Thus, this regulation presumably applies in a mixed use situation.)

- **Separate Structure** - If the business use was in a separate structure then there would be two separate sales with no loss allowed on the personal use portion. The gain or loss would be recomputed for the business use portion taking into account the depreciation taken. If the result is a loss, the loss is allowed on the business part (Form 4797). If the result is a gain, the gain is taxable and does not qualify for the Sec 121 exclusion.

SPECIAL CONSIDERATIONS

Nonexclusive use of home as a daycare facility – The liberalized rules for mixed-use property generally clarify the issues pertaining to a home used as a daycare center. But what happens if the daycare operation utilizes a separate structure but not exclusively? The space in a home that is used as a daycare facility does not have to be used exclusively for providing daycare services to children, handicapped individuals and the elderly. (S Rept No. 95-66 (PL 95-30) p. 91) Neither the IRS Publications nor the temporary regulations deal with this issue. However, if the business use is generally only 5 or 6 days a week and only 8 to 10 hours a day, then the residential use is the predominate use and one could take the position that the separate structure also qualifies for the exclusion to the extent of any gain in excess of the post May 6, 1997 depreciation.

Main home - The definition of the term "main home" usually means the home the taxpayer lives in most of the time and can be a:

- House,
- Houseboat,
- Mobile home,
- Cooperative apartment, or
- Condominium.

Tenant-stockholder in cooperative housing corporation - The exclusion is available for a tenant-stockholder in a cooperative housing corporation. The ownership requirements apply to the holding of the stock, and the use requirements apply to the house or apartment underlying the stock. ***Reg. §1.121-4(c)***

Life Estate – It is not uncommon for elderly parents, and sometime others, to deed over their property to their children or other relatives, thinking that is a way to avoid inheritance issues down the road. In actuality it is not the thing to do since the gift beneficiaries assume the property at the donor's basis and cannot exclude any property gain from the Sec 121 home sale exclusion if the home is sold while still in possession of the donor. However, such actions generally create a life estate which would still permit a Sec 121 exclusion should the property be sold while the donor is living and in possession of the property and allow a basis adjustment when the donor passes while still in possession of the property. See page 11.05.03 for a more detailed discussion of Life Estates.

Involuntary conversions - For purposes of the exclusion, the destruction, theft, seizure, requisition, or condemnation of property is treated as sale of the property. In applying the rules for involuntary conversions, the amount realized from the sale is deemed to be the amount determined without regard to this exclusion, reduced by the amount of gain not included in gross income under the exclusion. ***Reg. §1.121-4(d)(3)***

> ***Example – Involuntary conversion*** *- On February 18, 2019, a fire destroys the taxpayer's house that has an adjusted basis of $80,000. She had owned and used this property as her principal residence for 20 years prior to its destruction. Her insurance company pays her $400,000 for the house, and she realizes a gain of $320,000 ($400,000 - $80,000). On August 27, 2019, she purchases a new house at a cost of $100,000.*
>
> *Because the destruction of the house is treated as a sale for purposes of Section 121, she will exclude $250,000 of the realized gain from the sale. For purposes of the involuntary conversion rules of §1033, the amount realized is then treated as being $150,000 ($400,000 - $250,000) and the gain realized is $70,000 ($150,000 amount realized - $80,000 basis). She elects under § 1033 to recognize only $50,000 of the gain ($150,000 amount realized - $100,000 cost of new house). The remaining $20,000 of gain is deferred and her basis in the new house is $80,000 ($100,000 cost - $20,000 gain not recognized).*
>
> *She will be treated as owning and using the new house as her principal residence during the 20-year period that she owned and used the destroyed house. After the two-year period expires for the one-sale-every-two-years rule, she may sell the replacement home and utilize the full home gain exclusion.*

EXCEPTIONS TO THE EXCLUSION RULES

Recognition of gain attributable to depreciation: The exclusion doesn't apply to that part of the gain from the sale of any property that doesn't exceed the portion of the depreciation adjustments (under ***§1250(b)(3)***) for periods after 05/06/97. Thus, a taxpayer recognizes gain to the extent of any depreciation allowable with respect to the rental or business use of the principal residence for periods after 05/06/97.

Denial of exclusion to expatriates: The exclusion doesn't apply to any sale by an individual to whom the rules related to expatriation to avoid tax apply.

Election out of the exclusion: The exclusion does not apply to any sale if the taxpayer elects out. This could be an advantage where a taxpayer has owned and used two residences as principal homes at different times during the five-year period prior to sale and he/she is planning to sell both of the residences within two years of each other. If the sale of one residence would generate a smaller gain than the other, he/she may want to elect out of the exclusion for the sale of the residence with the smaller gain in order to preserve the benefits of the exclusion for the other sale.

HOME SALE TRANSACTIONS GET BREAK ON INFORMATION REPORTING REQUIREMENTS

For sales relating to the Sec 121 exclusion, the law creates an exception from the real estate transaction reporting requirements for any sale or exchange of a residence for $250,000 or less ($500,000 or less for a married taxpayer). To take advantage of the exception, however, the reporting person must receive written assurance, in a form the IRS approves, from the seller that:

- The residence is the seller's principal home,
- If the real estate sale information return requires disclosure about whether there is federally subsidized mortgage financing assistance for the mortgage on the residence (whether old mortgage or new mortgage is unspecified in the law), that there is no such assistance,
- The full amount of the gain on the sale is excludable from gross income, and
- There has been no period of nonqualified use after December 31, 2008.

Strategies

Avoid CP-2000 Notice – Home Sale Gross Proceeds

The instructions for 1099-S, "Proceeds from Real Estate Transactions", generally require the gross proceeds of sale to be reported for real estate transactions. However, it provides for an exception for the sale or exchange of a principal residence as noted above.

Problem – The instructions say the escrow company *may* issue a 1099-S even if the transaction meets the principal residence exclusion. Just because the selling price of a client's home is under the exclusion limits, don't assume a 1099-S has not been issued. Many times they are and the client may not be aware that one was issued.

Solution – Always report the sale on Form 8949 even if the sales price is under the $250,000/$500,000 gain exclusion limits.

Example: *Married taxpayers sell their home for $400,000. Their home's basis is $300,000 and they qualify for the exclusion. No Form 1099-S was received. The sale is reported in Part II of Form 8949, where Box F is checked.*

Description	***Purchase Date***	***Sale Date***	***Sales Price***	***Cost Basis***	***Col. (f) Code***	***Col. (g) Adj***	***Gain or Loss***
Home	*9/10/09*	*8/15/19*	*400,000*	*300,000*	*H*	*(100,000)*	*0*

PROCEDURE TO EXEMPT GAIN FROM 1099-S REPORTING (REV PROC 2007-12)

The IRS has issued a set of written assurances (certification) that a real estate reporting person must obtain from the seller of a primary residence in order to exempt the sale from the 1099-S reporting requirements. The procedure is effective for sales occurring after 1/22/2007. The certification must be signed by each owner of the residence and must include the following:

(1) The seller owned and used the residence as his principal residence for periods aggregating 2 years or more during the 5-year period ending on the date of the sale or exchange of the residence.

(2) The seller has not sold or exchanged another principal residence during the 2-year period ending on the date of the sale or exchange of the residence.

(3) No portion of the residence has been used for business or rental purposes after May 6, '97 by the seller (or by the seller's spouse or former spouse, if the seller was married at any time after May 6, '97).

(4) At least one of the following three statements applies:

- The sale or exchange is of the entire residence for $250,000 or less.
- The seller is married, the sale or exchange is of the entire residence for $500,000 or less, and the gain on the sale or exchange of the entire residence is $250,000 or less.
- The seller is married, the sale or exchange is of the entire residence for $500,000 or less, and (a) the seller intends to file a joint return for the year of the sale or exchange, (b) the seller's spouse also used the residence as her principal residence for periods aggregating 2 years or more during the 5-year period ending on the sale date, and (c) the seller's spouse also has not sold or exchanged another principal residence during the 2-year period ending on that date.

(5) During the 5-year period ending on the date of the sale or exchange of the residence, the seller did not acquire the residence in an exchange to which Code Sec. 1031 applied.

(6) In cases where the seller's basis in the residence is determined by reference to the basis in the hands of a person who acquired the residence in an exchange to which Code Sec. 1031 applied, the exchange to which Code Sec. 1031 applied occurred more than 5 years before the sale date.

Rev. Proc. 2007-12 does not reflect a law change made after its release which added IRC Sec. 121(b)(4 [sic (5)]). The sample certification in Rev. Proc. 2007-12 does not include an assurance that there has been no period of nonqualified use after December 31, 2008. Also, the sample certification included in Rev. Proc. 2007-12 does not include an assurance, as required by Sec. 6045(e)(5)(A)(iii), that the full amount of the gain from the sale is excludable under Sec. 121.

The following provisions apply to the real estate reporting person:

- The certification may be obtained no later than February 15 of the year following the year of sale. The sample certification form included in Rev Proc 2007-12 (modified to account for the two items noted above in the preceding paragraph) may be used or a substitute form containing all the required information may be used.
- The reporting person will not be liable for "failure to file an informational return" or "failure to provide statement to the seller" penalties if the certification is obtained, unless the reporting person has actual knowledge that the certification is incorrect.

CALIFORNIA DIFFERENCES

California generally conforms to Federal Home Sale Exclusion Rules except for the following differences.

- **Peace Corp Home Sale Exception** - For sale or exchanges after 5/6/97, federal law allows an exclusion of gain on the sale of a personal residence in the amount of $250,000 ($500,000 if married filing jointly). The taxpayer must have owned and occupied the residence as a principal residence for at least 2 of the 5 years before the sale. California conforms to this provision. However, California taxpayers who served in the Peace Corps during the 5 year period ending on the date of the sale may reduce the 2 year period by the period of service, not to exceed 18 months.
    - California does not conform to the provision that, for federal purposes, extends to Peace Corps volunteers the same election opportunity as is granted to certain military members and employees of governmental intelligence agencies allowing suspension of the 5-year use and ownership test period for up to 10 years while on extended active duty. (California does conform to this benefit for military and intelligence community members.)
- **Assisted Living Housing Development Sale Exclusion** - Federal law does not allow special treatment on gains related to the sale of certain assisted housing for low-income residents. California law permits the deferral of such gain, under certain conditions, if the proceeds are reinvested in residential real property (other than a personal residence) within two years of the sale. See R&TC §§ 18041.5 and 24955 for details.
- **Home Mortgage Debt Relief Basis Adjustment** – California belatedly (September 25, 2008) enacted its own version of mortgage debt relief that was effective for years 2007 and 2008, and in mid-2010 enacted conformity – with major differences – effective for principal residence debt relief occurring from January 1, 2009 through 2012. This provision was extended through 2013 (the extension is through 2017 for federal). Therefore, the basis of the home may be different for federal and California because the amount of the basis adjustment, if any, resulting from home mortgage debt relief may not be the same. Governor Brown vetoed AB 99 in October 2015; this bill would have extended California principal residence debt relief for another year. Subsequently, another bill (SB907) passed by the California legislature that would retroactively extend the California principal residence debt relief provisions through 2016, but it was also vetoed by the governor. Many taxpayers may qualify for relief by using the insolvency provision. See Chapter 2.09.
- **Surviving Spouse $500,000 exclusion** – For sales occurring on or after January 1, 2010, California conforms to the $500,000 exclusion of gain for surviving spouses who would have qualified for the $500,000 exclusion immediately prior to their spouse's death, and where the sale takes place within 2 years of the spouse's death. For federal purposes, the effective date was January 1, 2008; thus for CA purposes, prior to conformity the surviving spouse was limited to a $250,000 exclusion.
- **Nonqualified Use Exclusion Reduction** –For sales on or after January 1, 2010, California conforms to the federal rule (effective for federal purposes for principal residence sales in 2009 and later) that limits the home sale gain exclusion when there have been periods of nonqualified use after 2008.
- **Special Rule for Decedents Dying in 2010** - California does not conform to the provisions of IRC Sec 121(d)(11) allowing (a) up to $250,000 gain exclusion to the estate or heir of a decedent dying in 2010 if the estate or heir sells the decedent's principal residence and the decedent had met the two-out-of-five years use and ownership tests, and (b) tacking on the decedent's ownership and use periods to that of an heir who occupies the home as a principal residence to determine if the heir meets the two-out-of-five years tests.

HOME SALE WORKSHEETS:

On the following pages are worksheets for the sale of a home that was or is also used for business (home office).

ADJUSTED BASIS OF HOME – WORKSHEET #1

Use this worksheet to determine the basis of the home before using Worksheets 3 or 4.

Part 1. General Information

Taxpayer Name: ______________________ Last Four Digits of SSN: __________

Property Description: ______________________

Method of Acquisition: ❑Purchase ❑Gift ❑Inherited ❑Other: __________

Date Acquired .... ____/____/______

Date Sold: .... ____/____/______

Part 2. Gain or (Loss) on Sale

1. Enter the purchase price of the home sold. (If the taxpayer(s) filed Form 2119 when they originally acquired that home to postpone gain on the sale of a previous home before May 7, 1997, enter the adjusted basis of the new home from that Form 2119.)........................1. ________
2. Seller-paid points for home.
   Do not include any seller-paid points already subtracted to arrive at the amount entered on line 1........................2. ________
3. Subtract line 2 from line 1........................3. ________
4. Settlement fees or closing costs (do **not** include fees/costs for getting a mortgage loan).:
   If line 1 includes the adjusted basis of the new home from Form 2119, skip lines 4a–4g and 5; go to line 6.
   a. Abstract and recording fees........................4a. ________
   b. Legal fees (including fees for title search and preparing documents)........................4b. ________
   c. Survey fees........................4c. ________
   d. Title insurance........................4d. ________
   e. Transfer or stamp taxes........................4e. ________
   f. Amounts that the seller owed that the buyer agreed to pay (back taxes or interest, recording or mortgage fees, and sales commissions)........................4f. ________
   g. Other.:__________________........................4g. ________
5. Add lines 4a through 4g........................5. ________
6. Cost of additions and improvements. Do not include any additions and improvements included on line 1........................6. ________
7. Special tax assessments paid for local improvements, such as streets and sidewalks........................7. ________
8. Other increases to basis........................8. ________
9. Add lines 3, 5, 6, 7, and 8........................9. ________
10. Depreciation allowed or allowable, related to the business use or rental of the home........................10. ________
11. Other decreases to basis........................11. ________
12. Add lines 10 and 11........................12. ________
13. Adjusted basis of home sold. Subtract line 12 from line 9........................13. ________

SEC 121 REDUCED EXCLUSION AMOUNT – WORKSHEET #2

Use this worksheet to determine the Sec 121 exclusions where the full amount is not available before using Worksheets 3 or 4.

Part 1. General Information

Taxpayer Name: ____ Last Four Digits of SSN: ______________

Property Description: ____

Method of Acquisition: ❑Purchase ❑Gift ❑Inherited ❑Other: ____________________

Date Acquired .... _____/_____/________

Date Sold: ...._____/_____/________

1. Maximum amount..	1.	$250,000	$250,000
2a. Enter the number of days (or months) that the property was used as a main home during the 5-year period* ending on the date of sale..	2a.	_________	_________
2b. Enter the number of days (or months) that the taxpayer owned the property during the 5-year period* ending on the date of sale. If days were used on line 2a, days must also be used on this line and on lines 3 and 5. If months were used on line 2a, months must also be used on this line and on lines 3 and 5. (If married filing jointly and one spouse owned the property longer than the other spouse, both spouses are treated as owning the property for the longer period.)..	b.	_________	_________
2c. Enter the smaller of line 2a or 2b..	c.	_________	_________
3. Has the taxpayer (or spouse, if filing jointly) excluded gain from the sale of another home during the 2-year period ending on the date of this sale? ☐No ☐Yes **No** - Skip line 3 and enter the number of days (or months) from line 2c on line 4. **Yes** - Enter the number of days (or months) between the date of the most recent sale of another home on which gain was excluded and the date of sale of this home......	3.	_________	_________
4. Enter the smaller of line 2c or 3..	4.	_________	_________
5. Divide the amount on line 4 by 730 days (or 24 months). Enter the result as a decimal (rounded to at least 3 places). But do not enter an amount greater than 1.000.....................	5.	_________	_________
6. Multiply the amount on line 1 by the decimal amount on line 5..	6.	_________	_________
7. Reduced maximum exclusion. Add the amounts in columns (a) and (b) of line 6.................	7.	_________	

*If the taxpayer was a member of the uniformed services or Foreign Service, an employee of the intelligence community, or an employee or volunteer of the Peace Corps during the time the home was owned the 5-year period may have been suspended (extended) while on assignment. See details in chapter.

SALE OF A HOME – WORKSHEET #3

The worksheet can be used for all principal residence sales except where a home office is a separate structure

Part 1. General Information

Taxpayer Name: ______________________ Last Four Digits of SSN: __________

Property Description: ______________________

Method of Acquisition: ❑Purchase ❑Gift ❑Inherited ❑Other: __________

Date Acquired .... ____/____/______

Date Sold: .... ____/____/______

Part 2. Gain or (Loss) on Sale

1. Selling price of home..1. __________
2. Selling expenses (including commissions, advertising and legal fees, and seller-paid loan charges)………..............2. __________
3. Subtract line 2 from line 1. This is the amount realized..3. __________
4. Adjusted basis of home sold (including § 1034 deferrals). Amount from Worksheet #1 if used ....4. __________
5. Gain or (loss) on the sale. Subtract line 4 from line 3. If this is a loss, stop here..5. __________

Part 3. Exclusion and Taxable Gain

6. Enter any depreciation allowed or allowable on the property for periods after May 6, 1997.If none, enter -0-............6. __________
7. Subtract line 6 from line 5. If the result is less than zero, enter -0-..7. __________
8. Aggregate number of days of nonqualified use after 12/31/2008..8. __________
9. Number of days taxpayer owned the property..9. __________
10. Divide the amount on line 8 by the amount on line 9. Enter the result as a decimal (rounded to at least 3 places). But do not enter an amount greater than 1.00..10. __________
11. Gain allocated to nonqualified use. (Line 7 multiplied by line 10)..11. __________
12. Gain eligible for exclusion. Subtract line 11 from line 7..12. __________
13. If the taxpayer(s) qualify to exclude gain on the sale, enter the maximum exclusion ($250K or $500K).
    If the taxpayer(s) qualify for a reduced maximum exclusion, enter the amount from Worksheet 2, line 7.
    If taxpayer(s) do not qualify to exclude gain, enter -0-........ ....13. __________
14. Exclusion. Enter the smaller of line 12 or line 13..14. __________
15. Taxable gain. Subtract line 14 from line 5.
    If the amount on this line is zero, do not report the sale or exclusion on the tax return.
    If the amount on line 6 is more than zero, complete line 16..15. __________
16. Enter the smaller of line 6 or line 15.
    Enter this amount on line 12 of the Unrecaptured Section 1250 Gain Worksheet in the instructions
    for Schedule D (Form 1040)..16. __________

SALE OF A HOME – WORKSHEET #4

Use this worksheet where a home office is in a separate structure

Part 1. General Information

Taxpayer Name: ______________________ Last Four Digits of SSN: __________

Property Description: ______________________

Method of Acquisition: ❑Purchase ❑Gift ❑Inherited ❑Other: __________

Date Acquired…… ____/____/______

Date Sold: …… ____/____/______

Home Office or Other Business Use:

A. Enter the number of days in the five-year period immediately preceding the sale that the separate structure was used for ***residential*** purposes…… __________

> ***NOTE:*** *If line A is 730 or more days,* ***STOP!*** *Do not use this worksheet!* ***Use Worksheet #1****. The office portion of the gain also qualifies for §121.*

B. Enter the office area of the home in square feet…… __________

C. Enter the total home area in square feet…… __________

D. Business (Office) use (separate structure) percentage ((line B divided by line C) Enter the result as a decimal (rounded to at least 3 places). But do not enter an amount greater than 1.00…… __________

E. Home use percentage - §121 qualified (1.00 minus line D)…… __________

Allocate the sales price and selling expenses (lines 1 and 2 below) according to the home and business percentages (lines E and D above).

Part 2. Gain or (Loss) on Sale

		Total (A)	Home (B)	Office (C)
1. Selling price of home……	1.	________	________	________
2. Selling expenses……	2.	________	________	________
3. Subtract line 2 from line 1. This is the amount realized……	3.	________	________	________
4. Adjusted basis of home sold (excluding depreciation)** ……	4.	________	________	________
4a. Depreciation taken**……	4a.		________	________
5. Gain or (loss) on the sale (line 3 less lines 4 and 4a)……	5.		________	________

If line 5 column B is a loss, the loss is not allowable and there is no need to complete column B past line 5. Report the sale information in column C on Form 4797.

** **Caution**: The depreciation taken on the home portion and separate structure office portion must be accounted for separately as they are sold as separate parcels. Do not reduce the adjusted basis on line 4 for any depreciation taken. Instead, enter the depreciation claimed on each separate portion on line 4a.

SALE OF A HOME – WORKSHEET #4
(Continued)

Part 3. Exclusion and Taxable Gain of Home Portion

	Total (A)	Home (B)	Office (C)
6. Enter any depreciation allowed or allowable for periods after May 6, 1997.If none, enter -0-...6.		__________	
7. Subtract line 6 from line 5. If line 7 column B is less than zero, enter -0-..7.		__________	
8. Aggregate number of days of nonqualified use after 12/31/2008.............8.	__________		
9. Number of days taxpayer owned the property...9.	__________		
10. Divide the amount on line 8 by the amount on line 9. Enter the result as a decimal (rounded to at least 3 places). But do not enter an amount greater than 1.00...10.	__________		
11. Gain allocated to nonqualified use. (Line 7 multiplied by line 10).............11.		__________	
12. Gain eligible for exclusion. Subtract line 11 from line 7............................12.		__________	
13. If the taxpayer(s) qualify to exclude gain on the sale, enter the max exclusion ($250K or $500K). If the taxpayer(s) qualify for a reduced maximum exclusion, enter the amount from Worksheet 2, line 7. If taxpayer(s) do not qualify to exclude gain, enter -0-..............................13.		__________	
14. **Exclusion.** Enter the smaller of line 12 or line 13...................................14.		__________	
15. **Taxable gain**. Subtract line 14 from line 5. If the amount in Column B is less than zero, enter zero in Column B......15.		__________	
16. Recaptured Sec. 1250 Gain (smaller of line 6 or line 15). Include amount on line 12 of the Unrecaptured Section 1250 Gain Worksheet in the instructions for Schedule D (Form 1040)………………….……… 16.		__________	

NOTES

DEBT CANCELLATION AND FORECLOSURE ISSUES

Overview

Debt Relief Income - Whenever a debt of a taxpayer is forgiven, whether it is credit card debt, home mortgage debt or other debt, the forgiven debt (debt relief) is generally taxable income to the taxpayer unless: (1) the debt was discharged in a bankruptcy proceeding or (2) the taxpayer qualifies for one of the **exclusions** providing relief from cancellation of debt (COD) income.

Exception Overview – The tax code provides for a number of exceptions to the recognition of debt cancellation income. The following is an overview of the various aspects of exceptions:

- **In General:**
  - Non-recourse loan forgiveness = no COD income.
  - Attributes and carryovers of and to the year of discharge can be used in year of discharge and carried back to prior years before being reduced in the subsequent year.
  - Attributes are reduced 1st day of subsequent tax year (see exception under Real Property Business Indebtedness Exclusion).
  - The total of the COD income reported in box 2 of the 1099-C must appear as income on the 1040 (see where to report in text), and/or to the extent excludable, included on Form 982 line 2.
  - Generally multiple exclusions can be used if applicable.
  - Use only one Form 982 per tax return.
  - If Box 3 of the 1099-C would have been deductible if paid, reduce the amount of Box 2 by the amount in Box 3.
  - Basis reduction generally recaptures as ordinary income in future years.
  - California conforms to federal except for Principal Residence Acquisition Debt Relief.
- **Insolvency Exclusion:**
  - Used first unless debtor elects to use Principal Residence Acquisition Debt Relief (when available).
  - Good for both **acquisition and equity debt exclusion**.
  - Exclusion allowed to the extent of insolvency.
  - Insolvency is determined immediately before the debt discharge.
  - Must reduce tax attributes to the extent of the exclusion (exclusion can exceed attributes).
- **Principal Residence Acquisition Debt Relief Exclusion:**
  - Available only for debt discharged on or after 1-1-2007 and before 2018. Is on Congress' possible extender list.
- **Real Property Business Indebtedness Exclusion:**
  - If the taxpayer is insolvent, must use insolvency exclusion first.
  - Limited to **acquisition debt exclusion only**.
  - Limited to basis in depreciable property.
  - Limited to Mortgage over FMV (equity limit)
  - Reduce basis in depreciable property – no other attribute reduction required.
  - **Caution:** If property is disposed of in the year of debt relief the basis of the property must be reduced immediately prior to the disposition.

RAPID FINDER

NOTE - Bankruptcy

One method of discharging debts is through bankruptcy. Basically what happens in a bankruptcy stays in a bankruptcy and does not impact an individual's 1040 return. This material only deals with issues that must be reported on a taxpayer's 1040 and **only provides a very basic overview of what occurs in a bankruptcy**. COD income that results from a bankruptcy discharge is reportable on the return for the bankruptcy estate not on an individual's 1040. Any debt which is forgiven under a Title 11 bankruptcy is excludable from income.

Overview of Debt Discharge in Bankruptcy - When an individual files a Chapter 7 (liquidation) or Chapter 11 (reorganization) petition, a bankruptcy estate is established! A bankruptcy estate is treated as a separate taxable entity from the individual debtor and generally includes all legal and equitable interests in property of the debtor as of the initiation of the case. A bankruptcy estate continues until the bankruptcy proceeding is closed and the bankruptcy trustee is responsible for filing the estate's tax returns and paying its taxes (Sec 6012(b)(4)).

When a bankruptcy petition is filed, tax attributes of the individual debtor that existed on the first day of the debtor's taxable year (i.e., January 1st for calendar year filers) are deemed to be transferred to the bankruptcy estate. (Sec 1398(g)) These "tax attributes" include:

1. NOL Carryovers
2. Charitable contribution carryovers
3. Recovery of tax benefit items
4. Tax credit carryovers
5. Capital loss carryovers
6. Asset basis
7. Asset holding periods
8. Character of assets
9. Method of accounting
10. Unused passive losses
11. Unused losses limited by at risk rules
12. Principal residence exclusion and
13. Other tax attributes as provided by the regulations

Upon termination of the bankruptcy estate, the unused portions of the same tax attributes are deemed to be transferred back to the debtor (Sec 1398(i)). COD income that results from a bankruptcy discharge is reportable on the return for the bankruptcy estate. For Chapter 7 and 11 cases, the tax attributes to be reduced are those of the bankruptcy estate not the individual debtor (Sec 108(d)(8)).

Principal Residence Acquisition Debt Relief Exclusion – Expired at the end 2017, except for discharges made under a binding written agreement entered into in 2017. Originally expired after 2016; extended on 2/9/18 as part of the Budget Reconciliation Act of 2018. Will Congress extend again? Stay tuned.

Step-by-step Approach – Although the issues related to debt relief and foreclosure can seem overwhelming, it can be greatly simplified by approaching it in a step by step manner:

Step #1 – Determine if there is COD income and if so the amount and applicable year.
Step #2 – Determine if the taxpayer qualifies for one or more of the exclusions.
Step #3 – Determine if there is also an asset sale that must be dealt with.
Step #4 – Complete Form 982 and reduce tax attributes if required.

STEP #1 – DETERMINE IF THERE IS COD INCOME AND IF SO THE AMOUNT

Determining the amount of the COD income and the year in which it is taxable is not always readily apparent for the following reasons:

1. **Personal Liability** – There is no COD income where the debtor is not personally liable for the debt. That is where the lender's only recourse is against the property secured by the debt.
2. **Date of Debt Discharge** – Debt discharge generally does not occur until the lender no longer has any legal opportunity for collection from the debtor, which is defined by IRS Regulations as an identifiable event. See list of identifiable events in the "Date of Debt Discharge" paragraph below.

Determining if a Loan is Recourse or Non-Recourse – Determining whether a loan is recourse or non-recourse has a huge bearing on how the COD is treated on the borrower's tax return. If a loan is non-recourse then the borrower is not personally liable for a deficiency and the lender's only recourse is against the secured property. Where the borrower is not personally liable there is no COD income. Therefore it is extremely important to determine if the borrower is personally liable. Generally it is necessary to read the actual loan documents to determine whether a loan is recourse or non-recourse. Both the 1099-A and 1099-C include an entry (Box 5) for the lender to indicate whether the taxpayer is personally liable or not, but the box is frequently left blank or in some cases answered incorrectly.

Several states have statutes that prohibit lenders from seeking deficiencies from borrowers and are referred to as non-recourse states. Each non-recourse state has its own anti-deficiency statutes that prohibit lenders from seeking judgments. Not all non-recourse statutes are the same so it is important to understand the law as it applies to your state. For example in California the statutes only apply to purchase money loans (acquisition debt) and then only if the loan is for 4 residential units or less and at least one unit is owner occupied. Almost all home equity line of credit loans – abbreviated HELOCs – and home equity loans are considered recourse loans, and lenders for these loans may sue borrowers to recoup loss, although most do not go to that expense.

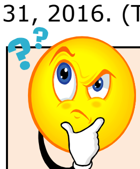
The following is a list of anti-deficiency/non-recourse states. The list is from the IRS' Real Estate Property Foreclosure and Cancellation of Debt Audit Technique Guide (2/22/19). Each of these states has its own rules and the anti-deficiency rules are not applied in the same manner.

Alaska	**California**	**North Carolina**	**Minnesota**	**Utah**	
Arizona	**Connecticut**	**Idaho**	**North Dakota**	**Texas**	**Washington**

Date of Debt Discharge – The debt discharge generally does not occur until the lender no longer has any legal opportunity for collection from the debtor. IRS regulations (§ 1.6050P-1(a)(1)) set forth identifiable events that trigger cancellation of debt income **whether or not an actual discharge of indebtedness has occurred <u>on or before</u> the date on which the identifiable event has occurred**. Although the list is long the following are the more commonly encountered identifiable events:

- Discharge of indebtedness under title 11 of the United States Code (bankruptcy);
- Cancellation or extinguishment of an indebtedness that renders a debt unenforceable in a receivership, foreclosure, or similar proceeding in a federal or State court;
- A cancellation or extinguishment of an indebtedness upon the expiration of the statute of limitations for collection of an indebtedness;
- A cancellation or extinguishment of an indebtedness pursuant to an election of foreclosure remedies by a creditor that statutorily extinguishes or bars the creditor's right to pursue collection of the indebtedness;
- A cancellation or extinguishment of an indebtedness that renders a debt unenforceable pursuant to a probate or similar proceeding;
- A discharge of indebtedness pursuant to an agreement between an applicable entity and a debtor to discharge indebtedness at less than full consideration; or
- A discharge of indebtedness pursuant to a decision by the creditor, or the application of a defined policy of the creditor, to discontinue collection activity and discharge debt.

In the past, an identifiable event included the expiration of a nonpayment testing period, generally a 36-month period ending on December 31. If a bank, savings and loan, credit union, or certain government agencies hadn't received a payment on the debt of a taxpayer during that period, the lender was required to issue an information return (1099-C) reporting the debt as being canceled. However, this rule created confusion for taxpayers and, according to the IRS, did not increase tax compliance by debtors or provide the IRS with valuable third-party information that could be used to ensure taxpayer compliance. In regulations finalized in November 2016, the IRS dropped this testing period rule, applicable to information returns required to be filed, and payee statement required to be furnished, after December 31, 2016. (T.D. 9793)



No 1099-C or a 1099-C Issued in a Subsequent Year

Because of the identifiable event rules the 1099-C may show up in a year other than the year when a 1099-A is issued. The IRS provides no special guidance in situations such as this <u>even though the regulations acknowledge that the debt relief may have occurred prior to the issuance of the 1099-C</u>.

To deal with this problem, a practitioner needs to carefully review the facts and circumstances to determine when and if debt relief actually took place. It may not necessarily be in the year when the 1099-C was issued and may have not occurred at all. Financial institutions frequently do not actually relieve the debt in the year of the foreclosure. Others may not relieve the debt at all in hopes of collecting on the liability in a future year before the state statute for the collection of a debt expires. When no 1099-C is issued there is generally no debt relief and a practitioner should exercise caution in arbitrarily adding COD income to a client's tax return.

Where no 1099-C is issued and the practitioner has determined debt relief has occurred, the amount of the debt relieved is generally the amount in 1099-A Box 2 minus the amount in Box 4. Practitioners may wish to utilize the Form 8275 Disclosure Statement to provide an explanation of why the COD income was reported in a year when a 1099-C was not issued or why the COD income is not included in the year the 1099-C was issued.

A 1099-C issued many years after a taxpayer defaults on a debt may be incorrect, as the debt relief may actually have taken place long before the year of issuance. The taxpayer and practitioner need to examine all of the events surrounding the COD to determine whether the 1099-C was issued for the correct year, as the following case demonstrates. In a Tax Court summary opinion (which cannot be treated as precedent), the court ruled against the IRS, which contended debt was discharged in 2008 when the 1099-C was issued, and agreed with the taxpayer that, while it is often impossible to find just one event that clearly establishes the moment at which a debt is discharged, there was no cancellation of debt in 2008 because the debt was discharged at the end of the 36-month nonpayment testing period, which was in 1999. (TC Summary Opinion 2012-46)

1099-C & 1099-A

Box 6 –Codes are as follows:
A – Bankruptcy
B – Other judicial debt relief
C – Statute of limitations or expiration of deficiency period
D – Foreclosure election
E – Debt relief from probate or similar proceeding
F – By agreement of creditor and debtor
G – Decision or policy of creditor to discontinue collection
H– Other actual discharge before identifiable event

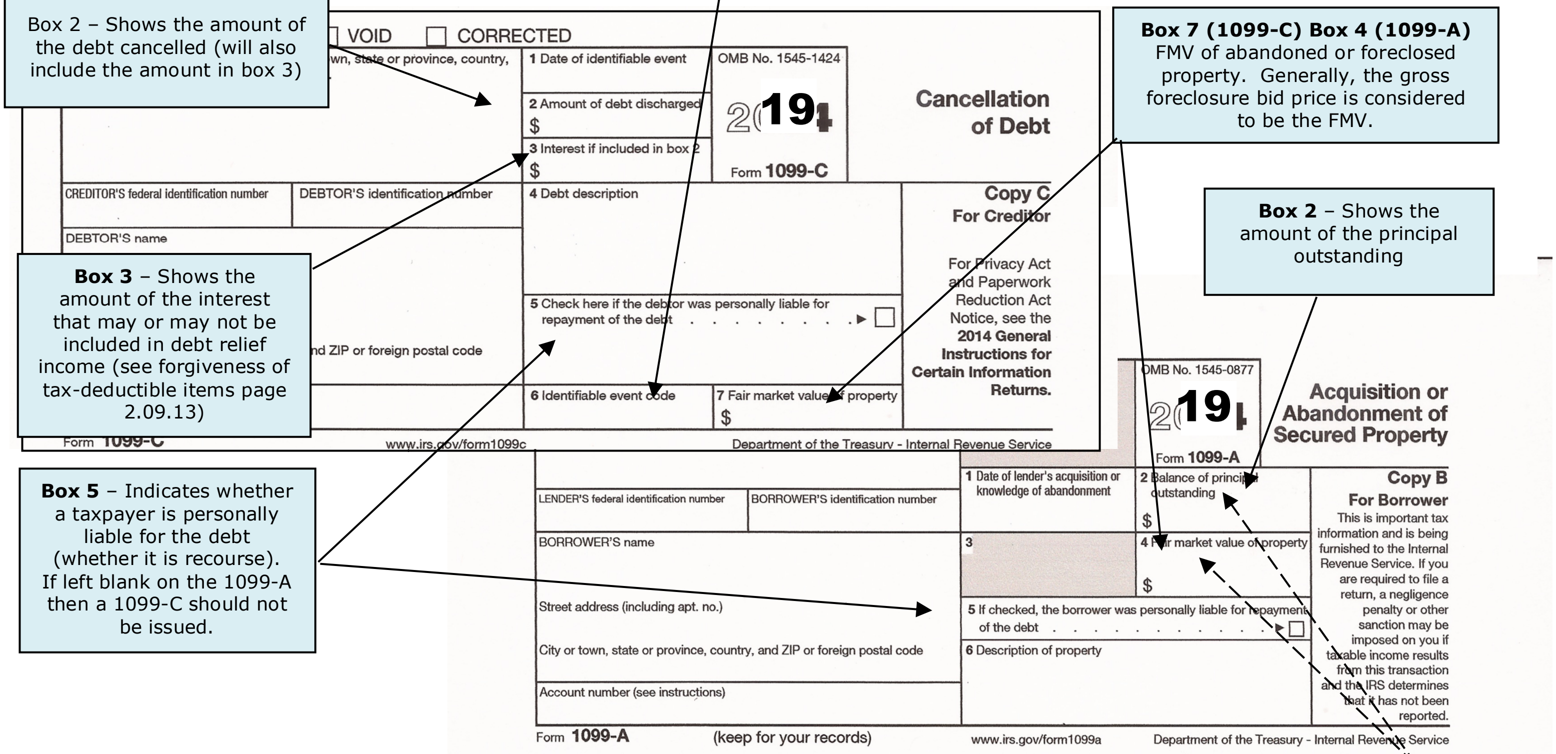
Box 2 – Shows the amount of the debt cancelled (will also include the amount in box 3)

Box 7 (1099-C) Box 4 (1099-A) FMV of abandoned or foreclosed property. Generally, the gross foreclosure bid price is considered to be the FMV.

Box 2 – Shows the amount of the principal outstanding

Box 3 – Shows the amount of the interest that may or may not be included in debt relief income (see forgiveness of tax-deductible items page 2.09.13)

Box 5 – Indicates whether a taxpayer is personally liable for the debt (whether it is recourse). If left blank on the 1099-A then a 1099-C should not be issued.



1099-A - FMV (Box 4) Greater than Balance of Mortgage (Box 2)

It is not uncommon for a 1099-A to have the amount shown in Box 4 – "Fair market value of property" – to be equal to or greater than the "Balance of principal outstanding" shown in Box 2. If the FMV of the property is greater than the debt then there is no cancellation of debt income and only the disposition of the property need be dealt with. Generally, the gross foreclosure bid price is considered to be the FMV.

CAUTION - In some cases there may be additional mortgages on the property which may make the outstanding debt greater than the property's FMV. Check for other subordinate mortgages and additional 1099-C forms.

1099-C: A financial institution, credit union, federal government agency or others in the business of lending money must issue a 1099-C if the debt relief is $600 or more. Individual lenders such as the seller of the property are not required to file the 1099-C. This form will generally provide the information needed to determine the amount of debt relief. The 1099-C can be issued for a variety of circumstances related to debt forgiveness including credit card debt, vehicle repossessions, home foreclosures, etc.

1099-A: A lender who acquires an interest in a property in a foreclosure or repossession should issue Form 1099-A showing the information needed to figure the taxpayer's gain or loss. However, if the lender also cancels part of the debt and must file Form 1099-C, the lender can include the information about the foreclosure or repossession on that form instead of on Form 1099-A. The 1099-A includes the amount of the debt relieved and the FMV of the property which should be the auction price.

Multiple Debtors - For debts for more than $10,000 that involve debtors who are jointly and severally liable for the debt, the 1099-C instructions tell the creditor (lender) to report the **entire** amount of the canceled debt on **each** debtor's Form 1099-C. Multiple debtors are jointly and severally liable for a debt if there is no clear and convincing evidence to the contrary. However, the amount, if any, of the canceled debt income that each debtor must report depends on all the facts and circumstances, including:

- State law,
- The amount of debt proceeds each person received,
- How much of any interest deduction from the debt was claimed by each person,
- How much of the basis of any co-owned property bought with the debt proceeds were allocated to each co-owner, and
- Whether any of the COD income qualifies for any of the COD exclusions or exceptions.

If joint and several liability does not exist, a 1099-C is required for each debtor for whom canceled debt is $600 or more. The lender is only required to issue Form 1099-C for the primary or first-named debtor for debts of less than $10,000.

If the lender knows that the multiple debtors were husband and wife who were living at the same address when the debt was incurred, and the lender has no information that these circumstances have changed, then only one 1099-C need be filed. Where there are co-signers, the COD income can be allocated according to the facts and circumstances of the situation. (Chief Counsel Advice 200023001) For example where parents co-sign for a child and the child made all the payments, it would be appropriate to allocate the entire COD income to the child.

Pass-through entities - If a partnership's liability is discharged, the partnership allocates the income from discharge of debt to the partners as a separately stated item. The debt relief is thus reported on Form 1040 by the partners. Any available exclusion is also applied at the partner level.

- ***Special rules for partnerships*** - Under the final regs, partnerships don't have to inform their partners of COD income before the date the partnership return is filed.

  Instead of reducing tax attributes according to the usual order specified by Code Sec. 108(b)(2), a taxpayer may elect under Code Sec. 108(b)(5) first to reduce the adjusted bases of depreciable property to the extent of excluded COD income. Excluded COD income from cancelled qualified real property business debt must, under Code Sec. 108(c), be applied against depreciable real property. A partnership interest is treated as depreciable property when applying Code Sec. 108(b)(5), and as depreciable real property when applying Code Sec. 108(c), to the extent the partnership correspondingly reduces the partner's proportionate interest in the adjusted bases of depreciable property (or depreciable real property) held by the entity (inside basis). (Code Sec. 1017(b)(3)(C))

  Partnership Consent - A partnership must consent to reduce its partners' shares of the partnership's depreciable basis in property only if consent is requested by:

  (a) partners owning (directly or indirectly) an aggregate of more than 80% of the partnership's capital and profits interests, or

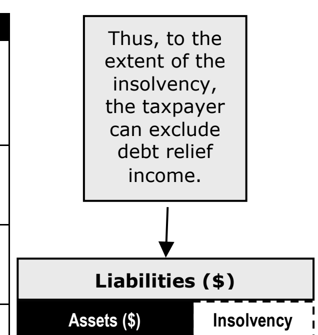
  (b) five or fewer partners directly or indirectly owning more than 50% of those interests.

  If partners meeting either of these tests elect to exclude COD income from the partnership, the partnership must consent to reduce the basis of its depreciable property (or depreciable real property). (Reg. § 1.1017-1(g)(2)(ii)) In other situations, partners may request the partnership to reduce basis and the partnership may or may not consent to do so.

  The partner must request and receive the consent of the partnership before the due date (including extensions) of the partner's return for the year the COD income is received. However, the partnership does not have to attach its consent statement to its return until the filing date for the tax year following the year that the partner excludes the COD income. (Reg. § 1.1017-1(g)(2)(iii))

STEP #2 – DETERMINE IF THE TAXPAYER QUALIFIES FOR ONE OR MORE EXCLUSIONS.
Choosing an Exclusion Method – Generally the insolvency exclusion takes precedence over the other available exclusions except in the case of the principal residence (for years when available) and student loan exceptions. Not all incidences of debt relief qualify for the possible exceptions. The table below matches type of debt with possible exceptions:

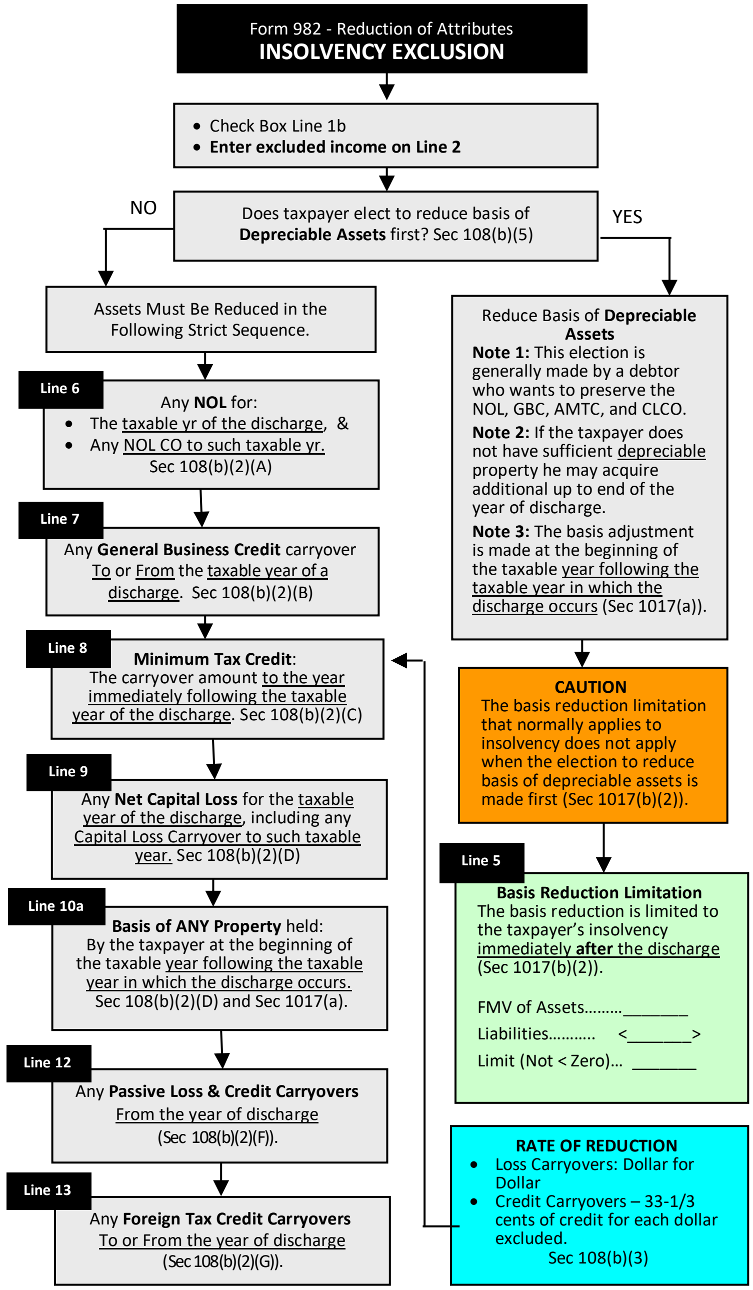
Type of Debt	Possible COD Exceptions
Primary Residence	Home Mortgage Debt Relief Income (Applied 1st unless taxpayer elects otherwise (Sec 108(2)(C)) – limited to acquisition debt. '07 – '17 only (or '18 if prior binding agreement). Insolvency
Second Home Vacant Land Credit Card	Insolvency
Rental Commercial Real Estate	Insolvency (Must be applied 1st to extent insolvent (Sec 108(2)(B))) Qualified Real Property Indebtedness – generally limited to acquisition debt
Student Loans	Insolvency Student Loan Exception
Farm Debt	Insolvency (Must be applied 1st to extent insolvent (Sec 108(2)(B))) Qualified Farm Indebtedness - indebtedness is attributable to the trade or business of farming.



INSOLVENCY EXCLUSION

If the indebtedness is discharged when the debtor is insolvent (but not in a bankruptcy case), the discharge is excluded from the debtor's gross income up to the amount of the insolvency (Sec 108(a)(1)(B)).

> **Note:** COD income to a grantor trust or disregarded entity is treated as income of the owner of the grantor trust or disregarded entity.



Definition of Insolvent - The term "insolvent" means the excess of liabilities over the fair market value (FMV) of assets determined with respect to the taxpayer's assets and liabilities immediately before the discharge.

This means that the discharged debt counts as a liability and the property's FMV as an asset (unless the discharge is in a subsequent year and the taxpayer no longer owns the property) for purposes of determining the taxpayer's insolvency. The taxpayer's financial status immediately after the discharge is irrelevant. (Code Sec. 108(d)(3))

Calculating Insolvency – There are a number of court cases and rulings that need to be taken into consideration when determining insolvency:

- **Some debt may not count as liabilities** - A taxpayer claiming to be insolvent must prove by a preponderance of the evidence—i.e., must prove that it is more likely than not—that he or she will be called upon to pay an obligation claimed to be a liability, and that the total amount of liabilities so proved exceeds the FMV of his or her assets. (Merkel, Dudley B. v Commissioner, 1999, CA9).
- **Nonrecourse liabilities** - Where a debtor has property subject to nonrecourse debt in excess of the value of the property, the excess of the amount of the nonrecourse debt over the FMV of the property securing the debt is taken into account in determining whether, and to what extent, the debtor is insolvent only to the extent that the excess debt is discharged. The reason is that the excess nonrecourse debt that isn't discharged does not affect the debtor's solvency. So even though the cancellation of nonrecourse debt in excess of the value of the property is treated as taxable income, the excess nonrecourse debt is not taken into account in determining solvency. (Rev Rul 92-53, 1992-2 CB 48).
- **Assets exempt from claims of creditors** - Tax courts have ruled that assets exempt from claims of creditors must be included as assets for purposes of determining insolvency.
- **Pension Plans** – Although they are exempt from creditors, pensions or annuities (including Social Security) must be taken into account when adding the assets. The IRS says the value of an individual's benefits under a *defined contribution* plan is simply the value of the individual's account or accounts under the plan. If an individual has started receiving benefits under a *defined benefit* plan and has elected to receive benefit payments as an annuity or in installment payments, the value of the benefit should be the actuarial present value of the payments as of the date on which the insolvency determination is made. If the individual has not started receiving benefits, then the value of the benefit should be the greater of (1) the actuarial present value of the accrued benefit payable at the plan's normal retirement age or (2) the amount of any single-sum distribution that the participant could receive under the plan on the date insolvency is determined. (Service Center Advice 1998-039) The Tax Court has held that the part of a retirement plan that can be withdrawn as a loan is an asset. If an outstanding plan loan is listed as a liability, then the collateral that secures the loan must be listed as an asset. (Shepherd, Bernard R., (2012) TC Memo 2012-212)

- **Married Taxpayers** - The filing of a joint return by taxpayer and a spouse, who isn't insolvent, doesn't cause the spouse's separate assets to be taken into account in determining the taxpayer's insolvency. (IRS Letter Ruling 8920019).
- **Measuring partner's insolvency when partnership discharges excess nonrecourse debt** – For purposes of measuring a partner's insolvency, each partner treats as a liability an amount of the partnership's discharged excess nonrecourse debt that is based on the allocation of debt relief income to that partner under IRC Sec. 704(b) and the regs. (Rev. Rul. 2012-14)

When is Insolvency Determined? – Immediately before the debt is discharged. (Code Sec. 108(d)(3))

Reduction of Tax Attributes – If the debtor has tax attributes, they must be reduced to the extent of the insolvency exclusion. If the attributes are less than the exclusion, they are simply reduced to zero and the debtor is still able to exclude the debt to the extent of insolvency. (Code Sec. 108(b)(3))

> If, after going through the attribute reductions sequence shown below, and the taxpayer surrenders attributes with a total value of LESS than the excludable debt relief, the balance of the debt relief is still forgiven and there is never a tax impact.

Sequence of Attribute Reduction - Attributes include loss and credit carryovers and basis in assets. Credit carryovers are reduced 33-1/3¢ per dollar of debt discharge amount while the others are reduced dollar for dollar. For insolvency, attributes are reduced in this strict order (but see a special election to first reduce the basis of depreciable assets on the next page).

(1) Any **NOL** for: the taxable year of the discharge, and any NOL carryover to such taxable year, dollar for dollar. (Sec 108(b)(2)(A))

(2) **General business credit carryovers** to or from the taxable year of discharge are reduced, $1 for each $3 of debt relief. (Sec 108(b)(2)(B))

(3) **Minimum tax credits** - The carryover amount to the year immediately following the taxable year of the discharge is reduced $1 for each $3 of debt relief. (Sec 108(b)(2)(C))

(4) Any **Net Capital Loss** for the taxable year of the discharge, including any Capital Loss Carryover (CLCO) to such taxable year. (Sec 108(b)(2)(D))

> **Carryovers and Carrybacks**
> Sec 108(b) – Makes it clear that a taxpayer may:
> (1) Utilize carryovers to the year of discharge
> (2) Utilize carrybacks from the year of discharge to prior years before reducing the attributes in the subsequent year.

(5) **Basis of assets -** is reduced at the beginning of the year *following the year* of debt cancellation, based on the assets owned at that time. Here again, there is a strict ordering for which property bases get reduced first:
   (a) Trade or business property purchased with the proceeds of the debt which was forgiven;
   (b) Trade or business property securing the loan;
   (c) All other trade or business assets;
   (d) Inventory and notes and accounts receivable;
   (e) Property held for investment;
   (f) Other assets.

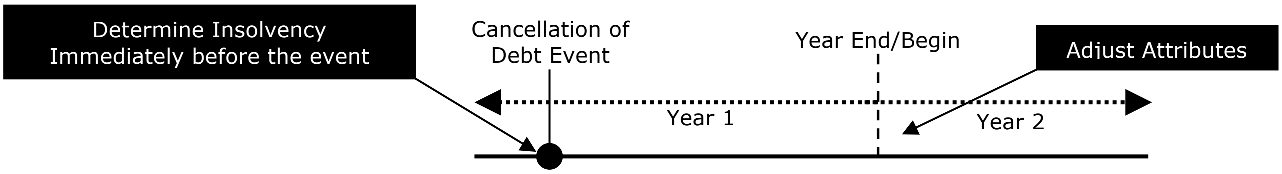
   The limit for basis reduction under the insolvency rule is the extent to which basis of assets (not the FMV) after debt relief exceeds liabilities after the debt relief. This limit will not apply if the taxpayer elects to reduce basis first (see special election below).

   Where there are multiple assets in a particular category the basis reduction is allocated to the basis of the properties in proportion to their aggregate basis.

(6) **Suspended passive losses** - Reduce the suspended passive activity losses from the year of discharge $1 for each $1 of excluded debt relief; reduce suspended passive loss credits from the year of discharge by $1 for each $3 of excluded debt relief (Sec 108(b)(2)(F)).

(7) **Foreign tax credit carryovers** - Reduce the foreign tax credit carryovers from the year of discharge $1 of credit for each $3 of debt relief (Sec 108(b)(2)(G)).

When Are the Attributes Reduced? - The reductions are generally made after the tax is computed for the tax year of the discharge (but see NOL and Capital Loss details above). That means a calendar year taxpayer will adjust the attributes at the beginning of the year subsequent to the debt relief year. Thus, the debtor can utilize many of the attributes in the year of the relief. (Code Sec. 108(b)(4)(A)).



Election To First Reduce The Basis of Depreciable Assets - Rather than reduce the loss and credit carryovers first, a taxpayer can elect (on Form 982) to apply any or all of the excluded amount *first* to reduce his basis in *depreciable* assets (or real property held as inventory) before any other tax attributes are reduced under the normal ordering rules. (Code Sec. 108(b)(5)(A))

This special rule may be attractive to taxpayers who have net operating losses or other attributes that can be carried over and used in subsequent years and where the concern for basis reduction is a secondary issue. However, it should be noted that if the basis reduction is insufficient to offset the COD income, then the other tax attributes must be reduced beginning in the normal manner.

Reason for Making the Basis Reduction Election

This election is generally made by a debtor who wants to preserve the Net Operating Loss deduction, General Business Credit, Alternative Minimum Tax Credit, and Capital Loss Carryovers. If the taxpayer does not have sufficient depreciable property basis to cover the excluded debt income he may acquire additional up to end of the year of discharge. However, the reduced basis will recapture as ordinary income when and if the property whose basis was reduced is sold. So the decision is whether or not to utilize the tax benefit currently and suffer the consequences in the future.

Basis Reduction limitations - A debtor making the election to first reduce basis may not reduce the aggregate adjusted bases of his depreciable property below zero, and can't elect to have excluded debt discharge income applied to first reduce depreciable property basis in an amount greater than the aggregate adjusted bases of depreciable property held by the debtor as of the beginning of the tax year following the tax year in which the discharge occurs. (Code Sec. 108(b)(5)(B))

Special Election – Dealers in Real Property **-** Dealers in real property may elect to treat real property held for sale in the ordinary course of business as depreciable. This election must be made on the original return for the year of debt forgiveness and can only be revoked or elected on a later return with reasonable cause and IRS consent. (Sec. 1017(b)(3)(E))

Calculating Insolvency **–** The IRS provides an insolvency worksheet in Publication 4681 – page 6 (2018). Another possibility would be to use Form 433-A (for individuals) or 433-B (for businesses) that IRS Collections uses as a financial statement.

PRINCIPAL RESIDENCE ACQUISITION DEBT FORGIVENESS EXCLUSION

This provision allows taxpayers to exclude home debt forgiveness income from their income. The following is an overview of the provision:

- **Effective:** For tax years 2007 through 2017 (2018 if the discharge is made under a binding written agreement entered into in 2017). If Congress acts in 2019 on "extenders," verify if this exclusion is included in the bill.
- **Exclusion:** Up to $2 Million ($1 Million MS)
- **Home:** Principal Residence Only (same definition as for Sec 121 gain exclusion rules)
- **Debt:** Acquisition Debt Only
- **Basis of Home:** Reduced by the amount of the exclusion if retained after relief

Application - This exclusion applies where a taxpayer:

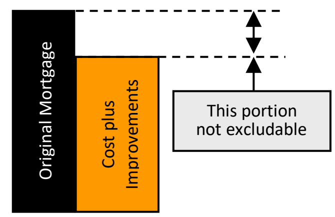
- Restructures the acquisition debt on a principal residence,
- Loses a principal residence in a foreclosure, or
- Sells a principal residence in a short sale.

Limitations:

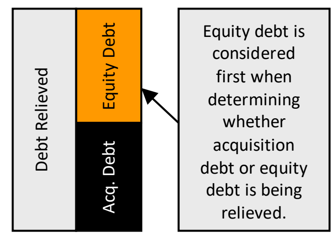
- The exclusion **does not** apply to a taxpayer's designated 2nd (vacation) residence.
- The exclusion doesn't apply to the discharge of a loan if the discharge is on account of services performed for the lender or any other factor not directly related to a decline in the value of the residence or to the taxpayer's financial condition.
- The exclusion **only applies to the discharge of qualified principal residence acquisition debt**. Thus equity debt is not included as part of the exclusion. Acquisition indebtedness of a principal residence is indebtedness incurred in the acquisition, construction, or substantial improvement of an individual's principal residence that is secured by the residence. It includes refinancing of debt to the extent the amount of the refinancing doesn't exceed the amount of the refinanced indebtedness. (Joint Committee on Taxation, JCX-86-07)

- Debt used to refinance qualified principal residence indebtedness is eligible for the exclusion up to the amount of the old mortgage principal just before the refinancing. (H Rept No. 110-356 (PL 110-142) p. 5)
- If the amount of the taxpayer's original mortgage is more than the cost of the principal residence plus the cost of any substantial improvements, only the debt that doesn't exceed the cost of the principal residence plus improvements is qualified principal residence indebtedness. (Form 982 Instructions, 3/2018, p. 3)

- **Forgiveness ordering rule** -If only a part of a loan is qualified principal residence indebtedness, the exclusion applies only to the extent the amount discharged exceeds the amount of the loan (immediately before the discharge) that is not qualified principal residence indebtedness.

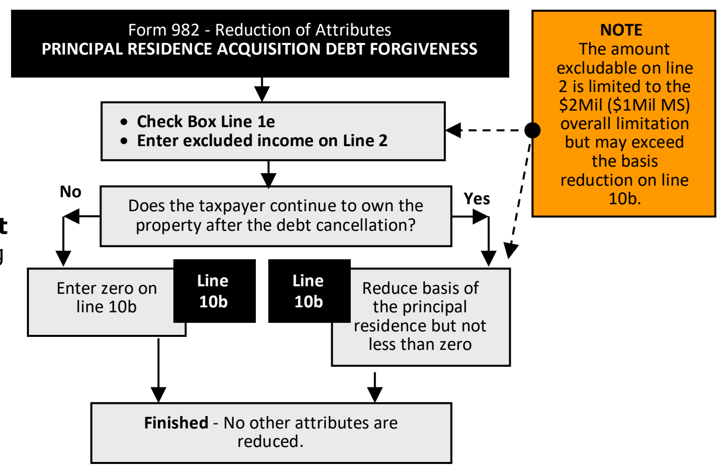


***Example** - assume a principal residence is secured by a debt of $1 million, of which $850,000 is qualified principal residence indebtedness. If the residence is sold for $800,000 and $200,000 of debt is discharged, only $50,000 of the debt discharged can be excluded (the $200,000 that was discharged minus the $150,000 of nonqualified debt). The remaining $150,000 of nonqualified debt may qualify in whole or in part for one of the other exclusions, such as the insolvency exclusion.*



Definitions:

- **Qualified principal residence indebtedness** - Qualified principal residence indebtedness means acquisition indebtedness on the taxpayer's principal residence, up to a $2 million limit ($1 million for married individuals filing separately).
- **Acquisition indebtedness** - Acquisition indebtedness is defined as in Code Sec. 163(h)(3)(B) for purposes of the interest deduction rules. (Code Sec. 108(h)(2))



<u>*Ordering rule*</u> **-** The principal residence exclusion takes precedence over the insolvency exclusion **unless elected otherwise** (Code Sec 108(a)(2)(C)). If only a part of a loan is qualified principal residence indebtedness, the exclusion from income for canceled qualified principal residence indebtedness applies only to the extent the amount canceled exceeds the amount of the loan (immediately before the cancellation) that is **not** qualified principal residence indebtedness. The remaining part of the loan may qualify for another Sec 108 exclusion.

<u>*Basis Adjustment*</u> **-** If the taxpayer excludes canceled qualified principal residence indebtedness from income **and continues to own the residence after the cancellation**, the taxpayer must reduce the basis of the residence (but not below zero) by the amount of the canceled qualified principal residence indebtedness excluded from income. Enter the amount of the basis reduction on line 10b of Form 982. Thus basis adjustment would be required in a loan modification where the taxpayer retains the home. However, no basis adjustment is required in a foreclosure, short sale or abandonment because the taxpayer no longer owns the residence.

This may or may not create a problem in the future since any gain will be subject to the Sec 121 home sale gain exclusion. But keep in mind: any basis adjustment as a result of COD exclusion recaptures as ordinary income and cannot be excluded using the Sec 121 exclusion (same treatment as depreciation recapture).

<u>*Electing Out of Mortgage Relief Exclusion*</u> **–** An insolvent taxpayer (other than one in a Title 11 bankruptcy) can elect to have the mortgage forgiveness exclusion not apply and can instead rely on the Code Sec. 108(a)(1)(B) exclusion for insolvent taxpayers. (Code Sec. 108(a)(2)(C)) Thus, where a taxpayer has significantly tapped the equity in the home, and has a significant amount of debt discharge that does not qualify for the exclusion, it may be to their advantage to forgo the mortgage relief exclusion and instead use the insolvent taxpayer exclusion.

Things to Consider

- The home mortgage debt forgiveness only applies to "Acquisition Indebtedness" while the insolvency rule applies to all debt.
- The home mortgage forgiveness rule allows up to $2 mil of debt relief while the insolvency exclusion only allows exclusion to the extent of insolvency.
- Some states do not conform to the home mortgage forgiveness rule and only allow the insolvent taxpayer exclusion.

DISCHARGE OF QUALIFIED REAL PROPERTY BUSINESS INDEBTEDNESS

Rental as a Trade or Business - Some practitioners have reported that auditors are taking the position that a passive rental is not a trade or business for purposes of this exclusion. However, the authors disagree based upon the following. (See also the discussion in Chapter 3.24 relating to rental real estate as a trade or business.)

- Rentals qualify for trade or business ordinary (4797) loss as opposed to capital loss and a rental loss may result in an NOL.
- Publication 4681 details where to report non-excludable COD income. It indicates that non-business COD income is reported on the "other income" line of the 1040 [line 8 of Schedule 1, draft 2019 1040] and goes on to describe in detail where business income is reported, including rental income on the Schedule E. Further, in defining qualified property for this exclusion, Pub 4681 (page 8, 2018 edition) says, "*Residential rental property generally qualifies as real property used in a trade or business unless you also use the dwelling as a home."*
- Rental property has always been held to be used in a trade or business where:
    - An investor in mortgages rented out properties acquired by foreclosure, pending resale (Gibney, Annie Est, (1945) PH TCM ¶45290, 4 CCH TCM 878).
    - A taxpayer rented out his former residence (Hazard, Leland, (1946) 7 TC 372, acq; Wasnok, Stephen, (1971) TC Memo 1971-6, PH TCM ¶71006, 30 CCH TCM 39).
    - A taxpayer rented out a single house (Hajos, Stephen, (1964) TC Memo 1964-328, PH TCM ¶64328, 23 CCH TCM 2015.
    - The inheritor of a residence immediately offered it for rent or sale (Campbell, N. Stuart, (1945) 5 TC 272).
    - A lawyer rented out a business building he held under a 99-year renewable lease (Fackler, John v. Com., (1943, CA6) 30 AFTR 932, 133 F2d 509, 43-1 USTC ¶9270).
    - A corporation (insurance brokers) sold rental property (Mather & Co (1949, CA3) 37 AFTR 689, 171 F2d 864, 49-1 USTC ¶9127).

The exclusion of income from the discharge of qualified real property business indebtedness applies only to taxpayers who are not C corporations and **applies only where the insolvency exception does not apply** (Code Sec. 108(a)(2)(B)). The exclusion is limited to the taxpayer's equity in depreciable properties **and the basis cannot be reduced below zero.** (Sec 108(c)(2)(A)(ii))

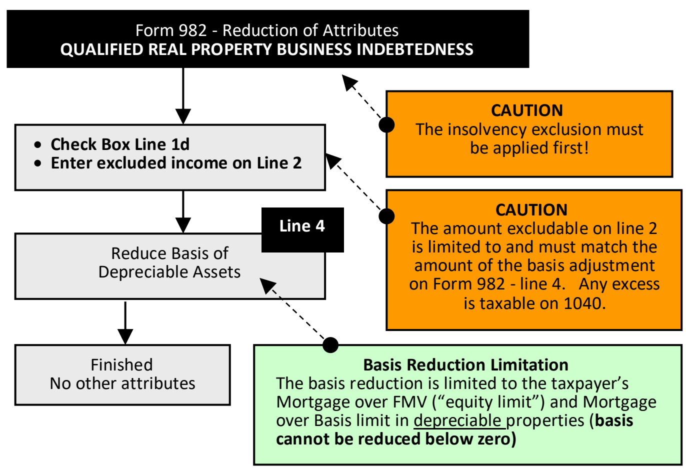
Disregarded Entity - Rev Proc 2014-20 provides a safe harbor, effective for taxpayers (other than a C corp) who make an election under § 108(c)(3) (qualified real property business indebtedness) regarding discharged indebtedness on or after February 5, 2014, under which the IRS will treat indebtedness that is secured by 100% of the ownership interest in a disregarded entity holding real property as indebtedness that is secured by real property. See the revenue procedure for the requirements that must be satisfied.

Limitations – In addition to the basis in depreciable property there are two limitations on the amount that can be excluded.

- *Mortgage over FMV ("equity") limit* - The amount eligible for the exclusion is limited to the excess (if any) of:

    (1) The outstanding principal amount of the qualified real property business indebtedness immediately before the discharge, over

    (2) The fair market value of the real property immediately before the discharge, less the outstanding principal amount of any other qualified real property business indebtedness secured by the property at that time. (Code Sec. 108(c)(2)(A)(ii))



- *Mortgage over Basis Limit* - The exclusion cannot reduce the basis below zero, thus the depreciated basis of the property also becomes a limit. (Code Sec. 108(c)(2)(B))

Example: *Jack, who qualifies as a real estate professional, owns a rental with a FMV of $200,000 and a depreciated basis of $80,000 that is subject to a first mortgage of $160,000 and second mortgage of $90,000. Jack makes a deal with the second mortgagee to reduce the second mortgage to $30,000. This results in debt relief income of $60,000.*

Mortgage over FMV = 90K – (200 – 160) =	***$50,000*** *(FMV Limit)*
Depreciated Basis =	***$80,000*** *(Basis Limit)*
Exclusion is limited to lesser of the two or:	***$50,000***

Thus in this example, of the $60,000 debt relief only $50,000 can be excluded and the $10,000 balance is added to gross income.

Definition Of Qualified Real Property Business Indebtedness (QRPBI) - Qualified Real Property Business Indebtedness is indebtedness (Code Sec 108(c)(3):

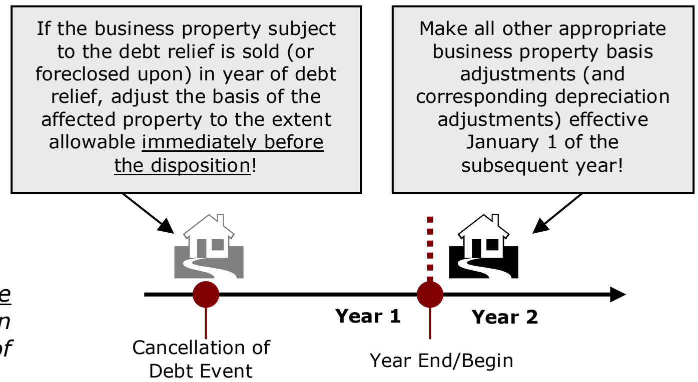
- that was **incurred or assumed** by the taxpayer in connection with real property used in a trade or business;
- that is **secured by the real property**, at the time the debt is incurred or assumed;
- that is qualified acquisition indebtedness (including refinanced acquisition debt); and
- which the taxpayer elects to treat as qualified real property business indebtedness.

The IRS has said that if a taxpayer holds real property and develops it for lease in its leasing business, it qualifies as real property used in a trade or business for the purpose of Sec 108(c)(3). But if the real property is developed and held by the taxpayer primarily for sale to customers in the ordinary course of business, the indebtedness on this property is not eligible for this exclusion. When claiming the QRPBI cancellation of debt exclusion, the taxpayer must reduce basis in depreciable real property by the same amount. Property held for sale to customers is not depreciable, so debt incurred or assumed in connection with this type of property is not QRPBI, and thus relief if the indebtedness is canceled is not excludable. (Rev. Rul. 2016-15, obsoleting Rev Rul 76-86)

Definition of Qualified Acquisition Indebtedness - qualified acquisition indebtedness means indebtedness incurred or assumed to acquire, construct, reconstruct, or substantially improve such property.

When Does the Basis Adjustment Take Place?

- *If the taxpayer retains the property*, the basis adjustment takes effect on the first day of the tax year following the tax year in which the discharge takes place. (Code Sec. 1017(a))
- *If the taxpayer disposes of the real property before the beginning of the next tax year, the reduction in basis is made immediately before the disposition of the property. Code Sec. 1017(b)(3)(F)(iii).*



SPECIAL NOTE: Under special rules for Qualified Real Property Indebtedness (Code Sec. 1017(b)(3)(F)) the basis of the property subject to the debt relief must be reduced in the year of debt relief. This substantially mitigates the benefits of this exclusion method.

What is the advantage of claiming the Qualified Real Property Business Indebtedness exclusion? When the property is disposed of in the same year as the debt relief, using this exclusion reduces the loss or increases the gain and at first glance results in the same net result as not taking the exclusion (a wash). In either case the result is ordinary income (not capital gains), since basis reduction recaptures as ordinary income.

However, should the taxpayer have any Sec 1231 gains in the next five years, the gain would be treated as ordinary gain to the extent of any unrecaptured Sec 1231 losses that occurred in the prior five years. By claiming the exclusion and minimizing the Sec 1231 loss, any potential Sec 1231 ordinary recapture is minimized in the future.

Disposition of a Passive Activity - In Chief Counsel Advice, 201415002, the IRS has concluded that a foreclosure on real property subject to recourse debt qualifies as a fully taxable disposition for purposes of the disposition-of-passive-activity rules, even though the taxpayer's cancellation of debt (COD) income that resulted from the foreclosure was excluded under Code Sec. 108.

DISCHARGE OF QUALIFIED FARM INDEBTEDNESS

The qualified farm indebtedness exclusion applies only to the discharge of qualified farm indebtedness by a qualified person. No amount is included in a debtor's gross income by reason of a discharge of qualified farm indebtedness. Indebtedness of a taxpayer is treated as qualified farm indebtedness (Code Sec. 108(g)(2)) if:

(1) The indebtedness was incurred directly in connection with the operation by the taxpayer of the trade or business of farming, and

(2) 50% or more of the aggregate gross receipts of the taxpayer for the three tax years before the tax year in which the discharge of the indebtedness occurs is attributable to the trade or business of farming.

Limitations

- **Only Applies to Amount if Solvent** - This exclusion is applied after the insolvency exclusion. Thus, it doesn't apply to the extent the debtor is insolvent. (Code Sec. 108(a)(2))

- **Limited to Adjusted Tax Attributes & Basis of Qualified Property** - The amount excluded from income can't exceed the sum of the adjusted tax attributes of the taxpayer and the aggregate adjusted bases of qualified property (defined below) held by the taxpayer as of the beginning of the taxable year following the taxable year in which the discharge occurs. (Code Sec. 108(g)(3)(A))

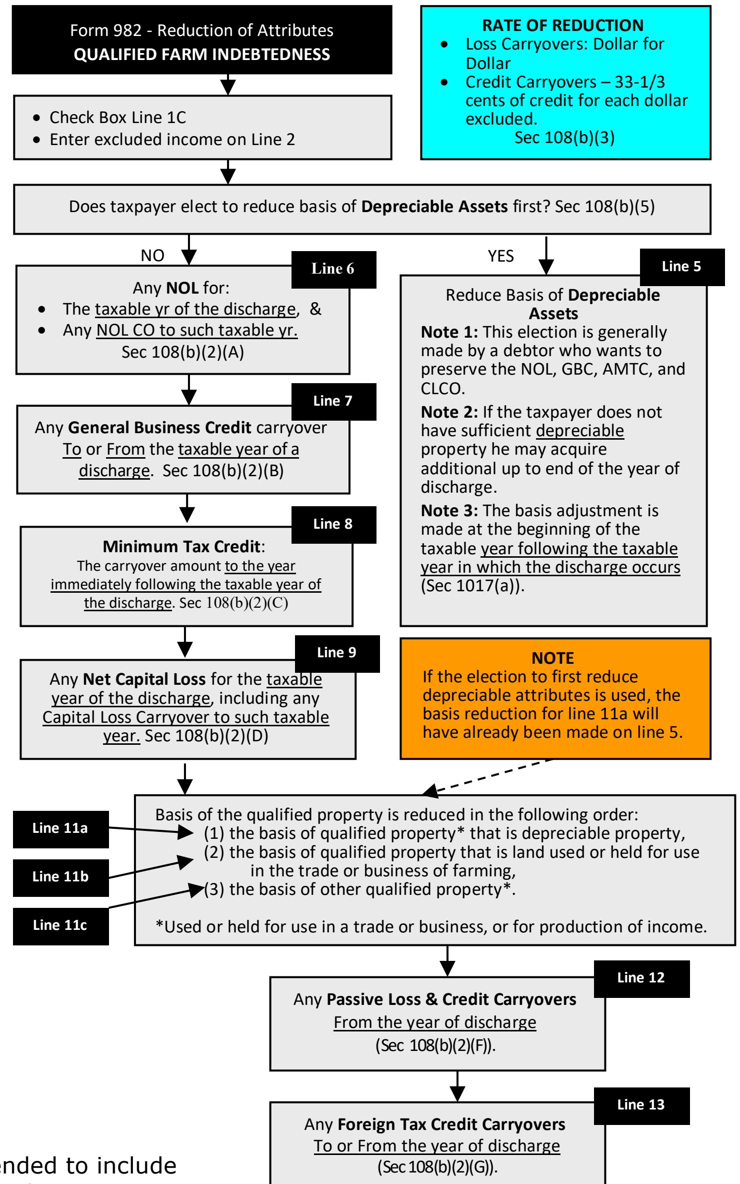
  To the extent there is unabsorbed discharge of indebtedness income after the taxpayer has reduced tax attributes and basis, income is recognized. (H Rept No. 100-795 (PL 100-647) p. 29)

<u>*Definitions*</u> –

- **Qualified Property** - Qualified property means any property used or held for use in a trade or business or for the production of income. (Code Sec. 108(g)(3)(C))
- **Qualified Person** - A qualified person generally means a lender who is unrelated to the debtor or to the seller of the property. In addition, the term qualified person includes any federal, state or local government or agency or instrumentality of a government. (Code Sec. 108(g)(1)(B)).

<u>*Order of Basis Reduction (Code Sec. 1017(b)(4)(A)(ii))*</u> – Basis of the qualified property is reduced in the following order:

(1) the basis of qualified property that is depreciable property,
(2) the basis of qualified property that is land used or held for use in the trade or business of farming,
(3) the basis of other qualified property.



STUDENT LOAN CANCELLATION FORGIVENESS

An individual does not include as income COD income if the discharge was made under a provision of the loan that all or part of the indebtedness would be discharged if the individual worked for a certain period of time in certain professions for any of a broad class of <u>generally public employers</u>. An example is a doctor for any public hospital in a rural area of the U.S. (Code Sec. 108(f)(1))

> ***Example:*** *Taxpayer student received $200,000 under a medical educational loan program. Under the terms of the program, one-fifth of the loan (or $40,000) is canceled each year he practices medicine in a qualifying state hospital. He doesn't include the forgiven amounts in income.*

As part of the Affordable Care Act, the law has been amended to include amounts received by an individual in tax years beginning after Dec. 31, 2008; the gross income exclusion for amounts received under the National Health Service Corps loan repayment program or certain State loan repayment programs is modified to include <u>any amount</u> received by an individual under <u>any State loan repayment or loan forgiveness program</u> that is intended to provide for the increased availability of health care services <u>in underserved or health professional shortage areas</u> as determined by the State. (<u>Code Sec. 108(f)(4)</u>)

The Tax Cuts and Jobs Act (TCJA) of 2017 includes a provision that the discharge of an eligible student loan in 2018 through 2025 because of the student's death or total and permanent disability does not result in discharge of debt income. (Code Sec. 108(f)(5)(A))

The IRS has said that certain discharged student loans are not considered income. These include discharges under the Department of Education's Defense to Repayment or Closed School programs for loans taken out to finance attendance at schools owned by Corinthian Colleges, Inc. (CCI), (Rev Proc 2015-57) and American Career Institutes, Inc. (ACI)

(Rev Proc 2017-24), as well as loans discharged based on a settlement of a legal cause of action against CCI, ACI, or certain private lenders (Rev Proc 2018-39).

Forgiveness of Tax-Deductible Items

Discharge of a liability that would have given rise to a deduction by the debtor doesn't result in debt cancellation income. (**Code Sec. 108(e)(2))** Typically this is encountered when the lender includes unpaid interest with the principal amount of debt cancelled on the 1099-C. The key here is to remember that to be excluded from COD income the interest would have had to be deductible had the taxpayer paid it.

Example – Credit Card Debt Cancellation – *Rob had credit card consumer debt cancelled. In Box 2 of the 1099-C was an amount of $10,000 and in Box 3 an amount of $1,000. The $1,000 represents unpaid consumer interest which is not deductible so the COD income is $10,000 which includes the $1,000 interest. However, if the card had been used exclusively for Rob's Schedule C business, the COD income would only be $9,000 ($10,000 - $1,000) since the interest would have been deductible as a business expense.*

Example – Home Mortgage Debt Cancellation *– Mike lost his home to foreclosure in 2017. He had refinanced the home's original purchase money debt of $270,000 and at the time of the foreclosure the debt was $500,000. None of the extra debt was used for substantial home improvements nor can any excess debt be traced to other deductible purposes. Mike's original loan would have been $250,000 at the time of the foreclosure. The amount in Box 2 of the 1099-C is $200,000 and Box 3 includes an amount of $55,000. Thus the amount in Box 3 must be prorated between deductible and non-deductible interest. Mike can deduct the interest for acquisition debt and $100,000 of equity debt. Thus the amount of the interest that would have been deductible is $38,500 (((250,000 +100,000)/$500,000) x $55,000). As a result Mike's COD income is reduced to $161,500 ($200,000 - $38,500). If the foreclosure were to occur after 2017 but before 2026 when equity debt interest isn't deductible, only the acquisition debt portion of the interest will be deductible and the COD income will be reduced to $172,500 ($200,000 – (250,000/500,000 x $55,000)).*

Example – Business Debt - *Suppose you are the accountant for a small cash basis business. The business falls on hard times and cannot meet all of its liabilities. You decide to forgive a portion of the amount the business owes you. The forgiven amount becomes debt relief income to the business but is excluded from that company's income because it would have been deductible if paid.*

Gift Exception

If a debt cancelled by a private lender, such as a relative or friend, is intended as a gift, there is no income. Likewise, a debt cancelled by a private lender's Last Will and Testament triggers no income to the borrower. (Code Sec. 102)

Reduction of Purchase Price

If a debt from a **solvent** buyer of property to the seller which arose out of the purchase is reduced, the reduction is treated as an adjustment of the purchase price not as debt cancellation income. (Code Sec. 108(e)(5)(A))

Caution - this exclusion only applies where the seller is also the lender. If the lender is a third party the reduction is COD income.

Example *– Ken purchased property from Jeff for $125,000. Ken made a $25,000 down payment and Jeff carried back the $100,000 balance secured by the property. In year three, Jeff agreed to reduce the $100,000 debt by $20,000. Assuming Ken wasn't in bankruptcy and remained solvent, the $20,000 debt reduction was an adjustment to the purchase price rather than debt cancellation income. If instead of Jeff financing Ken's purchase, Ken had gotten a loan from a bank (the third party), and in Year 3 the bank had agreed to reduce the debt by $20,000, the debt reduction can't be treated as a price reduction, and Ken would have $20,000 of debt cancellation income.*

However, in third-party lender cases the IRS will allow a debt reduction to be treated as a purchase price adjustment if the debt reduction is based on an "infirmity" that clearly relates back to the original sale, such as if the seller induced the purchaser to pay a higher purchase price by fraud or misrepresentation of a material fact (Rev Rul 92-99, 1992-2 CB 35).

STEP #3 – DETERMINE IF THERE IS ALSO AN ASSET SALE THAT MUST BE DEALT WITH.

If the debt cancelled was secured by an asset, then the disposition of the asset must also be taken into account. Here are some possible scenarios:

- **Short Sale** – In a short sale, by agreement with the lender, the property is sold for a value less than the mortgage balance. Even though the lender ends up with all the net proceeds from the sale, the borrower must report the transaction as a sale on the tax return in the normal manner. Determine the sales price from the table below.
- **Foreclosure (or abandonment)** – In a foreclosure, the lender has taken possession of the property through legal channels. This usually generates a Form 1099-A. The property sale must be reported on the tax return in the normal manner. Determine the sales price from the table below.

- **Repossession** – Generally a term associated with having a vehicle reclaimed by the lender of personal property. If that personal property was also business property (in whole or in part) the disposition of the business portion of the property must be reported as a sale. Report the sale in the normal manner for the asset using the table below. Note: Generally all debts on personal property are recourse; thus the sales price would be the lesser of the FMV or the loan balance.

> **Caution:** Remember that personal use property such as a principal residence, 2nd home, personal use vehicles, etc., cannot result in recognizable loss. So when reporting the sale the loss must be zeroed out. On Form 8949, enter code "L" in col. (f) and the nondeductible amount as a positive number in col. (g)

Computing "Sale Price"

	"SALE" PRICE OF PROPERTY	
Type of Loan	**Foreclosure (or abandonment)**	**Voluntary Reconveyance (also "short sale")**
Recourse	Lesser of: FMV or Loan Bal.	Lesser of: FMV or Loan Bal.
Nonrecourse	Greater of: Loan Bal. or FMV	Loan Balance

IMPORTANT ISSUE – HOME SALE

If a property subject to the debt relief is the taxpayer's primary home then the Sec 121 (home sale gain) exclusion applies, or if needed, the unforeseen circumstances reduced-gain exclusion applies. If there is a loss, the loss would not be deductible since it is personal use property.

- If the home was partially business "mixed use" property at the time of sale, no loss is allowed. Mixed use means it is used both for personal and business use. ("Reg 1.165-9(a) LOSSES NOT ALLOWED. A loss sustained on the sale of residential property purchased or constructed by the taxpayer for use as his personal residence and so used by him up to the time of the sale is not deductible under section 165(a)." Thus this regulation presumably applies in a mixed use situation.)
- If the business use was in a separate structure then there would be two separate sales with no loss allowed on the personal use portion. The gain or loss would be recomputed for the business use portion taking into account the depreciation taken. If the result is a loss, the loss is allowed on the business part. If the result is a gain, the gain is taxable and does not qualify for the Sec 121 exclusion.
- The sale of the home must be reported on Form 8949 if there's a gain and all of the gain isn't excludable under Sec 121, or if Form 1099-S was received for the sale, even if the sale results in a nondeductible loss.

Example 1 – Car Repossession *– Sonja purchased a car for $15,000 which was not used for business. She paid $2,000 down and took out a $13,000 recourse loan from a credit company. Sonja stopped making her loan payments and the credit company repossessed the car. The balance on the loan at the time of repossession was $10,000 and the FMV of the car was $9,000. The credit company decided they would not be able to collect the $1,000 balance on the loan because Sonja had insufficient assets and forgave it. Following the worksheet provided in Publication 4681, we compute the cancellation of debt income and the gain or loss resulting from the repossession:*

PART I

1a *Enter the amount of outstanding debt immediately before the transfer of property........ $10,000*

1b *Enter any amount of line 1a for which the taxpayer remains personally liable* *<u>immediately after the transfer of property</u>*........ *0*

1c *Subtract 1b from 1a $10,000*

2. *Enter the fair market value of the transferred property........ 9,000*

3. Ordinary income from the cancellation of debt
(Subtract line 2 from line 1c. If less than zero, enter zero)........ $1,000

PART II

4. *If Part 1 was completed enter the* ***smaller*** *of line 1c or line 2. If Part 1 was not completed, enter the amount of outstanding debt immediately before the transfer of property........ $9,000*

5. *Enter any proceeds the taxpayer received from the foreclosure sale... .... 0*

6. *Add line 4 and line 5 .... $9,000*

7. *Enter the adjusted basis of the transferred property........ $15,000*

8. Gain or loss from foreclosure or repossession.
Subtract line 7 from line 6........ <$6,000>

> ***Note:*** *Just because the worksheet results in ordinary income does not necessarily mean it is taxable. It may be excludable under one of the provisions discussed in Step #2.*

Sonja's tax return: *1040, Schedule 1, Line 8 (draft 2019) – If no exclusion applies enter $1,000*
Since it was personal use property (no loss allowed) and no gross proceeds have been reported on a 1099-B or 1099-S, there is no need to report the non-deductible loss.

Note: *Since the car was personal use property the loss is not allowed. Had it been partially business use property, the business portion of the gain or loss after taking into account the depreciation recapture would be reportable on Form 4797.*

Example 2 – Home Foreclosure - *Joan paid $200,000 for her home. She paid $15,000 down and took a recourse loan of $185,000 from a bank. Joan was unable to continue making payments and the bank foreclosed. When the bank foreclosed on the loan, the balance due was $180,000, the FMV of the house was $170,000, and Joan's adjusted basis was $175,000 due to a casualty loss she had previously deducted. At the time of the foreclosure, the bank forgave the $10,000 debt in excess of the FMV ($180,000 minus $170,000). In this case, Joan has ordinary income from the cancellation of debt in the amount of $10,000. Following the worksheet provided in Publication 4681:*

PART I

1a	*Enter the amount of outstanding debt immediately before the transfer of property……*	*$180,000*
1b	*Enter any amount of line 1a for which the taxpayer remains personally liable immediately after the transfer of property……*	*0*
1c	*Subtract 1b from 1a ……*	*$180,000*
2.	*Enter the fair market value of the transferred property……*	*$170,000*
3.	***Ordinary income from the cancellation of debt*** *(Subtract line 2 from line 1c. If less than zero, enter zero)……*	*$10,000*

PART II

4.	*If Part 1 was completed enter the* ***smaller*** *of line 1c or line 2. If Part 1 was not completed, enter the amount of outstanding debt immediately before the transfer of property……*	*$170,000*
5.	*Enter any proceeds taxpayer received from the foreclosure sale…… ….*	*0*
6.	*Add line 4 and line 5 ……*	*$170,000*
7.	*Enter the adjusted basis of the transferred property……*	*$175,000*
8.	***Gain or loss from foreclosure or repossession.*** *Subtract line 7 from line 6……*	*<$5,000>*

Note: *Assuming the home is personal use property the loss is not allowed. But see "Important Issue – Home Sale" above.*

Note: *Just because the worksheet results in ordinary income does not necessarily mean it is taxable. It may be excludable under one of the provisions discussed in Step #2.*

Joan's tax return: *1040, Schedule 1, Line 8 (draft 2019) – If no exclusion applies enter $10,000.*
Form 8949 *– When a 1099-A is issued there is a presumption of a sale. When a home's sale price is less than the Sec 121 exclusion, and a 1099-S hasn't been issued, technically the home sale need not be reported. However, those, including the author, who like to ensure all gross proceeds are accounted for on the tax return can show the transaction on Form 8949, and then enter the loss amount as a positive number in column (g) as an adjustment, thus zeroing out the loss. Code L is entered in column (f) to indicate a nondeductible loss.*

Example 3 – Rental foreclosure - Gain *– Joe purchased a rental six years ago for $120,000. He had refinanced the original $100,000 acquisition debt and used the refinanced funds for uses other than substantial improvements on the rental. The debt is recourse and in the current year the bank foreclosed on the rental since Joe had stopped making payments. The outstanding debt at the time of the foreclosure was $225,000 and the FMV was $150,000. The accumulated depreciation to the date of foreclosure was $16,000. The 1099-C shows a FMV in Box 7 of $150,000 and the debt relieved in box 2 of $87,000 and $12,000 in Box 3. As a result of the foreclosure Joe has the sale of a rental and COD income.*

Sale Computation *– Sales price for a recourse loan in foreclosure is the lesser of FMV or loan balance.* ***Thus reported on Form 4797:***

Sales Price (FMV)		*$150,000*
Cost	*120,000*	
Depreciation	*<16,000>*	
Basis		*<104,000>*
Net Gain		***46,000***

COD Income Determination *– This example assumes the lender correctly completed the 1099-C.*

Mortgage	*$225,000*	
FMV (Box 7)	*<150,000>*	
Debt Relief		*75,000*
Unpaid Interest (Box 3)		*12,000*
Debt Cancelled (Box 2)		*87,000*
Unpaid Acquisition debt Interest		*< 5,400>*
COD Income (Line 8 – 1040, Sch 1)		***81,600***

Where the unpaid interest would have been deductible if paid, it can be excluded from COD income. However, in this case the loan is only partially acquisition debt. For the example, assume the refinanced loan is attributed 45% to the acquisition debt and the balance is untraceable to another deductible use.

Excludable?
Because it represents equity debt, only with insolvency exclusion!

Joe's tax return: *1040, Schedule 1, Line 8 (draft 2019) – If no exclusion applies enter $81,600.*
4797 *– Report the sale of a rental – Result will be $16,000 carried to line 4 of 1040, Schedule 1 (draft 2019), And $30,000 to Schedule D as a long-term capital gain**.** **Form 982*** *– Form 982 is only required if a portion of the debt relief is excludable*

Example 4 – Rental foreclosure – Loss *– Assume the facts as in example #3 except the purchase price of the rental was $300,000 and the loan is the original recourse acquisition debt. In such situations the ordinary loss from the rental can offset some or all of the COD income.*

Sale Computation *– Sales price for a recourse loan in foreclosure is the lesser of FMV or loan balance. Thus:*

Sales Price (FMV)		*$150,000*
Cost	*300,000*	
Depreciation	*<16,000>*	
Basis		*<284,000>*
Net Ordinary 4797 Loss		***<134,000>***

COD Income Determination *– This example assumes the lender correctly completed the 1099-C.*

Mortgage	*$225,000*	
FMV (Box 7)	*<150,000>*	
Debt Relief		*75,000*
Unpaid Interest (Box 3)		*12,000*
Debt Cancelled (Box 2)		*87,000*
Unpaid Acquisition debt Interest		*< 12,000>*
COD Income		***75,000***

Exclusion & Basis

In this example, if Joe is insolvent he can exclude the COD income to the extent he is insolvent and still benefit from the 4797 loss. However, if the loss generates an NOL, that NOL will be subject to the attribute reductions shown in Step #4. If, to the extent he is solvent, he attempts to use the qualified real property business indebtedness exclusion he would have to reduce the sale basis by the amount of the forgiven debt, which would reduce the loss by the same amount of the COD income exclusion, simply offsetting each other and providing no benefit.

Example 5 – Rental Mortgage Modification *– Pete, who is not insolvent, owns a rental that cost $200,000 on which the mortgage has a current balance of $150,000. The FMV of the rental is $110,000. Pete negotiates a loan modification with the bank and they reduce the mortgage to $110,000 and issue Pete a 1099-C in the amount of $40,000. Pete can utilize the Qualified Real Property Business Indebtedness exclusion rules and defer this $40,000 of COD income by reducing the basis of his rental property by $40,000 on January 1 of the succeeding year.*

Pete's tax return: *1040, Schedule 1, Line 8 (draft 2019) – No entry (or enter "see Form 982") Form 982 - check Box 1d, enter $40,000 on line 2 and $40,000 on line 11a.*

Step #4 – Complete Form 982 and Reduce Tax Attributes if Required

The final step is completing Form 982 and reducing tax attributes as required for the particular exclusion method.

Only One Form 982 – Potential for Confusion

It is possible that a taxpayer can have multiple discharges of debt during the year or use multiple exclusion methods for a single discharge of debt. However, only one Form 982 can be submitted. The instructions for the 982 say to check the appropriate box(es) indicating the type of exclusion or exclusions used. This can create some confusion down the road if the exclusion of income or reduction of attributes is subsequently challenged. The author recommends that practitioners complete a separate Form 982 (use it as a worksheet) for each separate event and each different exclusion method used for each event. Number them in sequence and combine the results for the single Form 982 to be filed. This will provide an audit trail for the future.

Supplemental Attachment to Identify Property Subject to Basis Reduction – The instructions for Form 982 state that when basis is required to be reduced under Code Section 1017 a list of the property and the amount of basis reduction for each must be attached to the filed return. The following is a suggested format for such a statement.

FORM 982 - Supplemental Worksheet
Identifying Property Subject to Basis Reduction (Sec 1017)

Transaction Creating Basis Reduction: ____________________

Date of Event: __________

Property Subject to Reduction	Adjusted Basis Before Reduction	Amount of Reduction	Basis After Reduction

CAUTION - Basis Reduction Recaptures As Ordinary Income!

To ensure that ordinary income treatment eventually will be given to the full amount of basis reduction made to depreciable or non-depreciable assets when debt discharge amounts are excluded from a debtor's income, any gain upon a debtor's subsequent disposition of reduced-basis property is generally subject to recapture as y income. For recapture purposes, any reduction of the basis of property due to debt discharge amounts is treated as a deduction allowed for depreciation. (Code Sec. 1017(d)(1)(B)). This rule even applies to the sale of a home where the Sec 121 exclusion cannot be used to offset gain that is depreciation recapture.

Exception – With respect to Sec 1250 property, the amount of basis reduction that is recaptured as ordinary income is reduced whenever the taxpayer's depreciation deductions are reduced because of the basis reduction (H Rept No. 103-11 (PL 103-66) p. 625.)

Because each exclusion method has a different sequence of attribute reductions and specials rules pertaining to the exclusion method the following charts were developed to assist with this final task.

Form 982 - Part I – This part is completed to indicate which method(s) of discharge was used

Most recent revision is March 2018 – no significant differences to this version

Part I **General Information** (see instructions)

1 Amount excluded is due to (check applicable box(es)):
a Discharge of indebtedness in a title 11 case ☐
b Discharge of indebtedness to the extent insolvent (not in a title 11 case) ☐
c Discharge of qualified farm indebtedness ☐
d Discharge of qualified real property business indebtedness ☐
e Discharge of qualified principal residence indebtedness ☐
2 Total amount of discharged indebtedness excluded from gross income 2
3 Do you elect to treat all real property described in section 1221(a)(1), relating to property held for sale to customers in the ordinary course of a trade or business, as if it were depreciable property? ☐ Yes ☐ No

Enter the amount of COD excludable

Form 982 - Part II – This part is used when the taxpayer has tax attributes that must be reduced by the amount of the excluded debt relief or when the special rule for qualified principal residence indebtedness applies.

customers in the ordinary course of a trade or business, as if it were depreciable property

Part II **Reduction of Tax Attributes.** You must attach a description of any transacti basis under section 1017. See Regulations section 1.1017-1 for basis reduction required partnership consent statements. (For additional information, see the

Enter attribute reductions in appropriate boxes

Enter amount excluded from gross income:

4 For a discharge of qualified real property business indebtedness, applied to reduce the basis of depreciable real property	4	
5 That you elect under section 108(b)(5) to apply first to reduce the basis (under section 1017) of depreciable property	5	
6 Applied to reduce any net operating loss that occurred in the tax year of the discharge or carried over to the tax year of the discharge	6	
7 Applied to reduce any general business credit carryover to or from the tax year of the discharge	7	
8 Applied to reduce any minimum tax credit as of the beginning of the tax year immediately after the tax year of the discharge	8	
9 Applied to reduce any net capital loss for the tax year of the discharge including any capital loss carryovers to the tax year of the discharge	9	
10a Applied to reduce the basis of nondepreciable and depreciable property if not reduced on line 5. *DO NOT use in the case of discharge of qualified farm indebtedness.*	10a	
b Applied to reduce the basis of your principal residence. *Enter amount here ONLY if line 1e is checked*	10b	
11 For a discharge of qualified farm indebtedness, applied to reduce the basis of:		
a Depreciable property used or held for use in a trade or business, or for the production of income, if not reduced on line 5	11a	
b Land used or held for use in a trade or business of farming	11b	
c Other property used or held for use in a trade or business, or for the production of income	11c	
12 Applied to reduce any passive activity loss and credit carryovers from the tax year of the discharge	12	
13 Applied to reduce any foreign tax credit carryover to or from the tax year of the discharge	13	

Where To Report COD Income

1. To the extent it is excludable, the COD income would be reported on line 2 of the Form 982.
2. To the extent it is taxable, report as follows (Pub 4681):
   - Nonbusiness debt – pre-2018: line 21 on Form 1040 or Form 1040NR; 2018 – line 21 is on Schedule 1; 2019 – line 8 on Schedule 1
   - Non-farm sole proprietorship – Line 6 Schedule C or Line 1 Schedule C-EZ
   - Non-farm rental of real property – Schedule E, line 3
   - Farm rental activity – Form 4835, line 6
   - Farm debt and the taxpayer is the farmer – Schedule F, line 8

COD Income as Investment Income – If the COD income is from property held for investment, then it is treated as investment income and increases the limitation for deducting investment interest expense and allows a larger deduction of investment interest. (IRS Letter Ruling 200952018, 9/17/2009). As investment income it could also be subject to the 3.8% net investment income tax should the taxpayer's AGI exceed the taxation threshold.

Home Affordable Modification Program (HAMP)

The HAMP program expired at the end of 2016. However the tax consequences continue through 2018:

Mortgage Reduction – Where the borrower satisfies certain conditions during a trial period, the principal of the borrower's mortgage may be reduced over three years by a predetermined amount called the "PRA Forbearance Amount."

Trial Period – Before a loan modification becomes permanent, the borrower must meet certain conditions during a three-year trial period. If those conditions are met, the borrower will be offered a permanent modification of the terms of the mortgage loan. Until the effective date of a permanent modification, the terms of the existing mortgage loan continue to apply.

After the mortgage loan is permanently modified under HAMP, if the loan is in good standing on the first, second and third annual anniversaries of the effective date of the 3-year trial period, the loan servicer reduces the unpaid principal balance of the loan by one-third of the initial PRA Forbearance Amount on each anniversary date. Accordingly, if the borrower continues to make timely payments on the loan for three years, the entire PRA Forbearance Amount is forgiven.

Tax Consequences (Rev Proc 2013-16)

- **COD Income** - The borrower realizes COD income equal to any excess of the balance of the old mortgage loan (which was satisfied in the deemed exchange) over the issue price of the new (post-modification) mortgage loan.
- **Exclusions** – Where the taxpayer qualifies, the COD income can be excluded using either or both the Sec 108(a)(1)(B) insolvency exclusion and the Sec 108(a)(1)(E) principal residence acquisition debt relief exclusion. The latter exclusion is only available through 2017 (2018 if the discharge is made under a binding written agreement entered into in 2017), unless further extended by Congress.
- **When Income Is Realized** – To the extent the COD income cannot be excluded, the borrower may treat the COD income as being realized in either of the following ways (Rev Proc 2013-16, Paragraph 4.5) —

  (1) One hundred percent of the PRA Adjusted Forbearance Amount at the time of the permanent modification; or

  (2) One third of the PRA Adjusted Forbearance Amount on each of the first three annual anniversaries of the trial period plan effective date, when, as required by the terms of the new mortgage loan, the servicer reduces the unpaid principal balance of the new mortgage loan. If some or all of the reduction in the unpaid principal balance is accelerated because the HAMP-PRA borrower prepays the non-forbearance portion of the mortgage loan, then the HAMP-PRA discharge represented by the amount of the reduction that was accelerated is treated as being realized at the time of the accelerated reduction.
- **Incentive Payments to Lenders** – Incentive payments made by the HAMP administrator to mortgage lenders to encourage their participation in the program are treated as payments on the mortgage loans by the U.S. government on behalf of the borrowers. The borrower treats these payments as follows:
  - *Personal residence* - Under the "general welfare exclusion" (Rev Rul 2005-46; Rev Rul 75-246) the borrower excludes the incentive payments from income if the property that is encumbered by the mortgage is used by the borrower as his principal residence or the property is occupied by his legal dependent, parent, or grandparent without rent being charged or collected. No information return (1099) will be issued.
  - *Rental property* - If the borrower uses the property as a rental, or it is vacant but available to be rented, the incentive payments made to the lender are includible in the borrower's income in the year in which the payments are applied to the loan. The lender is obligated to issue a Form 1099-MISC reporting the amount.

TENANT RIGHTS IN FORECLOSURE – The Protecting Tenants at Foreclosure Law (PL 111-22), enacted in 2009, offers some protection to those who are renting a home that has been foreclosed upon and is based upon whether the new owner of the property intends to occupy the property or not.

- *New Owner Plans to Occupy* - The tenant must be given 90-day notice to vacate.
- *New Owner Does Not Plan to Occupy* – The tenant must be given 90-day notice to vacate. If the tenant has a valid lease the new owner must honor the term of that lease.

However, for the provisions of this law to apply, the tenant must be "bona fide," the rental agreement must be for fair rental value and must be the result of an "arm's-length" transaction. There also must be documented evidence of rent paid. The previous owner's spouse, children and parents are specifically excluded from the terms of this law.

UNPAID EMPLOYER LOAN - The Tax Court (John. E. McAllister, Jr., TC Memo 2013-96) has held that an individual who received loans from his former employer (Suncoast Roofers) that went unpaid did not receive fully taxable compensation but rather cancellation of debt (COD) income. Furthermore, the Court found that a portion of the income qualified for the insolvency exclusion under Code Sec. 108.

CO-SIGNER HAD NO COD – The Tax Court (F. Bullock, TC Memo. 2017-219) held that a taxpayer did not receive cancellation of debt income because she was not the primary obligor on the loan that her son and daughter-in-law had taken out. The Court reasoned that her net worth had not increased over what it would have been if the original transaction had never occurred. She was merely a secondary obligor who did not realize until trial that she had unwittingly signed paperwork indicating that she was the primary obligor on the loan. The lender was aware that the taxpayer only intended to be a cosigner, had never contacted her for repayment (although Form 1099-C was issued to her), and that the son and daughter-in-law were responsible for the loan payments.

TAX PROFESSIONAL ISSUING 1099-C TO NONPAYING CLIENTS - IRS's Office of Professional Responsibility (OPR) did not look kindly on a proposal by a Cir 230 tax practitioner to send Form 1099-C, Cancellation of Debt, to delinquent or nonpaying clients. Said OPR, "If a tax professional repeatedly uses Forms 1099-C, as a business strategy to collect unpaid fees, when the tax professional knows, or should know, that the facts and circumstances do not provide a basis for doing so, the conduct calls into question the tax professional's fitness to practice before IRS. A pattern of issuing Form 1099-C with a reckless disregard as to the existence of a debt (because, for example, the former client does not have a fixed contractual liability to **repay** a sum previously received), or the absence of an "identifiable event" triggering a reporting requirement, is inconsistent with the standards of competency and professionalism embodied in the rules of practice." Bottom line: it isn't a good idea. For those who wish to read OPR's full discussion, go to: http://content.govdelivery.com/accounts/USIRS/bulletins/eee455

CALIFORNIA DIFFERENCES

California law generally conforms to the provisions of the IRC Sec 108. Thus it conforms to all the federal debt relief income exclusions with the exception of the home mortgage debt relief exclusion. California's version of the principal residence debt relief exclusion expired at the end of 2013. California is an anti-deficiency (non-recourse) state (see page 2.09.02). In addition CA has a special anti-deficiency law for short sales (see below).

New Law & Stuff

AB 91 (signed by the governor 6/27/2019) conforms California law to the TCJA provision that certain student loan debt cancelled upon the death or disability of the student is not taxable, effective for loans cancelled after December 31, 2018**. Note:** That means for 2018, CA did not conform.

California Primary Residence Purchase Money Trust Deed Anti-Deficiency Law – Sec 580b of the California Code of Civil Procedure, provides that no deficiency shall be owed or collected, and no deficiency judgment shall be awarded, with regard to a purchase money trust deed on a dwelling for not more than four families given to a lender to secure repayment of a loan that was used to pay all or part of the purchase price of that dwelling, occupied entirely or in part by the purchaser. Under Sec 580b(a)(3), a "purchase-money loan" includes a loan used to refinance a purchase-money loan, or subsequent refinances of a purchase-money loan, except to the extent that lender lends new principal that is not applied to an obligation owed or to be owed under the purchase-money loan.

Thus in such cases there is no COD income as a result of the foreclosure or short sale of such property. The COD income is not included on the return and no Form 982 is required. Report only the disposition of the property as if the loan was non-recourse and use a sale price as determined from the table on page 2.09.14. If a 1099-C is issued it may be appropriate to attach a Form 8275 – Disclosure Statement explaining why the COD income is not dealt with on the 1040. Suggested wording for the 8275 is shown below.

FORM 8275 - The taxpayer is not reporting cancellation of debt income that was included on the Form 1099-C issued by (enter lender's name) because the 1099-C was the result of a disposition of the taxpayer's primary residence secured by a purchase money trust deed that is non-recourse under California Anti-Deficiency Law (California Code of Civil Procedure Section 580b). Under this law, no deficiency shall be owed or collected, and no deficiency judgment shall be requested or rendered, for any deficiency with regard to a purchase money trust deed on a dwelling for not more than four families given to a lender to secure repayment of a loan that was used to pay all or part of the purchase price of that dwelling, occupied entirely or in part by the purchaser.

California Short Sale Anti-Deficiency Law - Section 580e of the California Code of Civil Procedure was amended by SB 458 and was signed by Governor Brown on July 11, 2011. Under this law, no deficiency shall be owed or collected, and no deficiency judgment shall be requested or rendered for any deficiency upon a note secured solely by a deed of trust or mortgage for a dwelling of not more than four units, in any case in which the trustor or mortgagor (borrower) sells the dwelling for a **sale price less than the remaining amount of the indebtedness outstanding at the time of sale**. These rules only apply where:

- The short sale is in accordance with the **written consent of the** holder of the deed of trust or mortgage (**lender**).
- **Title has been voluntarily transferred** to a buyer by grant deed or by other document of conveyance that has been recorded in the county where all or part of the real property is located.
- The **proceeds of the sale have been tendered to the** mortgagee, beneficiary, or the agent of the mortgagee or beneficiary (**lender**), in accordance with the parties' agreement.
- A holder of a note (**lender**) **shall not require the** trustor, mortgagor, or maker of the note (**borrower**) to **pay any additional compensation**, aside from the proceeds of the sale, in exchange for the written consent to the sale.
- **No fraud or waste has been committed** with respect to the real property secured by the debt. If fraud or waste was committed, then the holder of the deed of trust or mortgage (lender) may seek damages and use existing rights and remedies against the trustor or mortgagor (borrower) or any third party for fraud or waste.

Section 580e applies the same treatment to any secondary or junior loans involved in the transaction.

IRS's Views on CA's Sec 580e of the CCP – Originally in a letter to then-CA Senator Boxer, the IRS Office of Chief Counsel indicated that a homeowner's obligation under the anti-deficiency provision of section 580e would be a nonrecourse obligation to the extent that, for federal income tax purposes, the homeowner will not have cancellation of indebtedness income.

A few months later the IRS Office of Chief Counsel decided to change their position, and said the short sale legislation does not change the character of a recourse loan to non-recourse. A lot of unanswered questions remain related to this issue, and the Chief Counsel's letters indicate the Service's opinion and are not statutory. The aggressive position would be to treat a short sale with recourse debt as non-recourse for purposes of cancellation of debt. If doing so, the 8275 disclosure form is probably appropriate and suggested language is provided below.

FORM 8275

The taxpayer is not reporting cancellation of debt income included on a 1099-C because the 1099-C was the result of a short sale qualifying under California Short Sale Anti-Deficiency Law (California Code of Civil Procedure Section 580e).

Under this law, no deficiency shall be owed or collected, and no deficiency judgment shall be requested or rendered for any deficiency upon a note secured solely by a deed of trust or mortgage for a dwelling of not more than four units, in any case in which the trustor or mortgagor (borrower) sells the dwelling for a sale price less than the remaining amount of the indebtedness outstanding at the time of sale.

Thus the loan subject to this short sale is non-recourse and does not result in any cancellation of debt income. This position is confirmed by IRS Office of Associate Chief Counsel letter number 2013-0036 (9/19/13) addressed to then-CA Senator Barbara Boxer. The following is an excerpt from that letter: *"We believe that a homeowner's obligation under the anti-deficiency provision of section 580e of the CCP would be a nonrecourse obligation to the extent that, for federal income tax purposes, the homeowner will not have cancellation of indebtedness income."*

Since the loan is treated as non-recourse and this is a short sale, the sales price used for the property disposition is the balance of the outstanding loans on the property.

California Acquisition Debt and Acquisition Refinanced Debt Anti-Deficiency Protection (589b(c)) - California homeowners who default on their refinance loans may be protected against personal liability for any deficiency following foreclosure. Under pre-2013 anti-deficiency law, a borrower is protected from personal liability for a purchase money loan secured by an owner-occupied property with one-to-four residential units.

The new law extends that anti-deficiency protection to include any loan used to refinance the purchase money loan, plus any loan fees, costs, and related expenses for the refinance. The anti-deficiency protection, however, does not extend to any cash out in a refinance. This new law only applies to refinance loans or other credit transactions used to refinance a purchase money loan, or subsequent refinances of a purchase money loan, that are **executed on or after January 1, 2013**.

For purposes of this law, any payment of principal shall be deemed to be applied first to the principal balance of the purchase money loan, and then to the principal balance of any new advance and interest payments shall be applied to any interest due and owing. Senate Bill 1069 (codified as Cal. Code of Civ. Proc. § 580b(c)) (effective January 1, 2013).

Multiple Loans – If the same lender holds both the first and second mortgages and foreclosed using the non-judicial foreclosure procedure, the second mortgage is deemed cancelled (California Code of Civil Procedure Section 580b).

NOTES

DAMAGES

RAPID FINDER

- **Nontaxable** (by suit or agreement)
  - Physical injury
  - Physical illness
  - Wrongful Incarceration
- **Taxable** (examples)
  - Emotional Distress
  - Employment Discrimination
  - Sexual Harassment
  - Punitive damages - always taxable

- **Business damages** (examples)
  - Related to employment – taxable as ordinary income
  - Injury to capital – reduce basis – excess taxable
  - Lost profits – ordinary income
- **Legal expenses**
  - Nontaxable income = nondeductible expenses
  - Taxable income:
    - If related to business entity – on that entity's schedule
    - If related to personal – Is a Schedule A Tier 2 deduction (subject to the 2% of AGI floor), suspend by TCJA. for years 2018 through 2025. Thus, for those years no federal deduction is allowed.
    - If related to capital – add to basis
    - Exceptions – see text page 02.10.05

- **Pub 957 –** Reporting Back Pay and Special Wage Payments to the Social Security Administration
- **IRC Sec 104**
- **IRC Sec 139F**

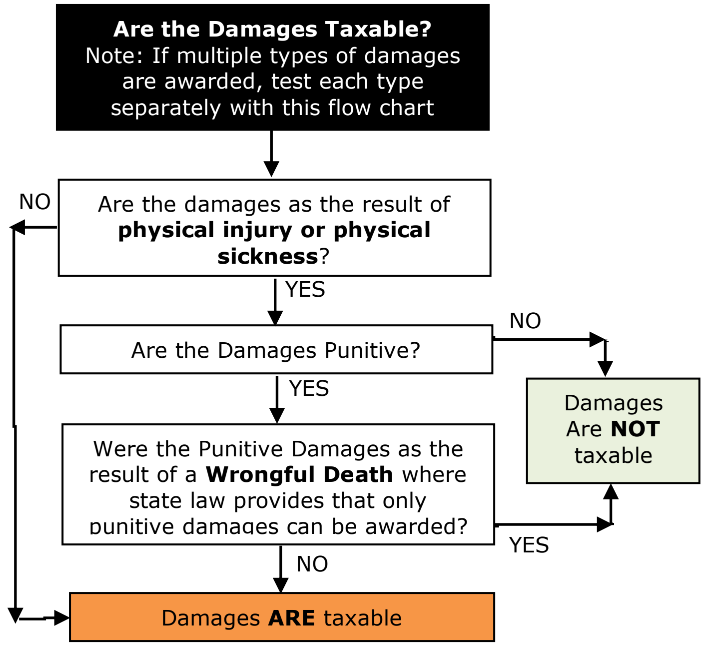
The following table is a summary of the Chief Counsel Memo (CCM) 2009-035, which provides a detailed account of IRS's position on how to handle the income and employment tax consequences and reporting duties relating to employment related judgments and settlements.

Type of Judgment or Settlement	Document	Taxable	ITW	FICA
Back Pay (1)	W-2	Yes	Yes	Yes (2)
Severance Pay	W-2	Yes	Yes	Yes
Front Pay	W-2	Yes	Yes	Yes
Compensatory damages				
Physical injury or physical sickness	None	No	No	No
Emotional distress	1099-MISC	Yes	No	No
Other	1099-MISC	Yes	No	No
Punitive/liquidated damages (3)	1099-MISC	Yes	No	No

(1) *Back pay (other than for lost wages received on account of personal physical sickness or physical injury) is taxable, subject to FICA and income tax withholding (ITW) and must be reported on Form W-2. The CCM reiterates IRS's rulings position that back pay awarded for an illegal refusal to hire is wages for federal employment tax purposes but acknowledges the Eighth Circuit's decision to the contrary in Newhouse v. McCormick & Co., (CA 8 10/2/1998). There, the Eighth Circuit (covering Minnesota, North and South Dakota, Iowa, Nebraska, Missouri, and Arkansas) held that FICA tax and ITW do not apply unless an actual employer-employee relationship existed.*

(2) FICA tax based on rates and limits for year paid and included on a W-2 in the year of payment. However, IRS Pub. 957 notes that payments for back pay awarded under a statute will remain posted to the employee's social security earnings record in the year reported on Form W-2, unless the employee or employer notifies the SSA of such a payment, via a separate special report procedure explained in IRS Pub. 957.

(3) See exception for wrongful death under physical sickness or physical injury



PHYSICAL INJURY OR SICKNESS:

Damages received on account of ***personal physical injuries or physical sickness*** are excludable from income whether:

- Recovery is by suit or agreement, or
- Amounts are received as a lump sum or in periodic payments.

Damages for personal injuries are monetary amounts (other than worker's compensation payments) received as the result of a judgment or settlement. Final regulations removed the requirement that, to qualify for exclusion from gross income, damages received from a legal suit, action or settlement agreement must be based upon "tort or tort type rights." Instead, the exclusion may apply to damages recovered for a personal physical injury or physical sickness under a statute that does not provide for a broad range of remedies, and that the injury need not be defined as a tort under state or common law. For example, damages for personal physical injuries or physical sickness awarded under "no-fault" statutes are eligible for exclusion.

When an action originates with a ***physical injury or physical sickness***, then all damages (other than punitive) are treated as payments due to physical injury or physical sickness (***whether or not the recipient of the damages is the injured party***).

- ***Wrongful Death*** – Is considered physical injury or physical sickness for purposes of the income exclusion. In addition, where state law provides that only punitive damages can be awarded in wrongful death suits, punitive damages are excludable (Code Sec. 104(c)).
- ***Emotional Distress -*** Emotional distress isn't considered physical injury or physical sickness for purposes of the income exclusion.
- ***Employment Discrimination -*** No exclusion is allowed for damages received in a suit involving employment discrimination or injury to reputation, which is accompanied by a claim of emotional distress. However, the exclusion would apply to a claim of emotional distress, which was related to a physical injury or physical sickness.

WRONGFULL INCARCERATION

Gross income doesn't include compensation received for a wrongful incarceration. A wrongfully incarcerated individual is defined as either (Code Sec. 139F):

(1) an individual who was convicted of a criminal offense under Federal or state law, who served all or part of a sentence of imprisonment relating to such offense, and who was pardoned, granted clemency, or granted amnesty because of actual innocence of the offense; or

(2) an individual for whom the conviction for such offense was reversed or vacated and for whom the indictment, information, or other accusatory instrument for such offense was dismissed or who was found not guilty at a new trial after the conviction was reversed or vacated.

The Bipartisan Budget Act of 2018 provision that allowed wrongfully incarcerated individuals that previously received an award, and did not exclude it, to file a related refund claim expired on Dec. 17, 2018.

SEXUAL HARASSMENT DAMAGES AND SETTLEMENTS

Impact on a Business - Under TCJA, and effective for amounts paid or incurred after December 22, 2017, no business deduction is allowed for any settlement, payout, or attorney fees related to sexual harassment or sexual abuse if such payments are subject to a nondisclosure agreement (IRC Sec. 162(q)(1) as amended by TCJA Sec. 13307(a)).

Impact on an Award Recipient – Damages for sexual harassment and gender discrimination are not excludable under Code Sec. 104(a)(2) and thus are fully taxable. The issue of sexual harassment qualifying as excludable physical injury or sickness has been in court on several occasions, always with the same result. Here is an example:

> *Payment was received to settle a sexual harassment/discrimination law suit against an employer. The employee did not allege physical injury or sickness in his complaint, but the settlement agreement was broad and encompassed all possible causes of action, including physical injuries. However, there was no allocation of a specific amount of the settlement as compensation for physical injuries or physical sickness. Accordingly, without the allocation, no amount of the settlement proceeds was excludable from income. (Hellesen, Jon. E., (2009) TC Memo 2009-143),*

Recipients of settlements or payments related to sexual harassment or sexual abuse, whose settlement or payment is subject to a nondisclosure agreement, are not precluded by section 162(q) from deducting attorney's fees related to the settlement or payment, if otherwise deductible. (IRS website; Section 162(q) FAQ)).

However, the deduction for legal fees is a Tier 2 miscellaneous itemized deduction and these deductions are suspended 2018 through 2025, thus not deductible during that period of time.

EMOTIONAL DISTRESS DAMAGES

A frequent question has to do with the taxation of damages awarded for emotional distress. Damages for physical injury or physical sickness are clearly tax-exempt and damages for emotional distress are generally taxable.

However, Code Sec. 104(a) allows the exclusion of damages received for emotional distress to the extent not in excess of the amount paid for medical care related to emotional distress.

Care should be taken in identifying the portion of the damages awarded for emotional distress, especially where the total of the damages includes awards for both physical injury or sickness and emotional distress.

Chief Counsel Memo (CCM) 2009-035, provides a detailed account of IRS's position on how to handle the income and employment tax consequences and reporting duties relating to employment related judgments and settlements. In that memo, the Chief Counsel indicates the following:

- For **physical injury** or physical sickness, no 1099 shall be issued and damages are not taxable.
- For **emotional distress**, a 1099 shall be issued and the damages are taxable.

Sometimes a suit for damages will be settled out of court. When this occurs, and no allocation is specified in the settlement, it is generally necessary to look back at the original suit and prorate (allocate) the settlement according to the original suit.

Care should also be taken with any advice provided by the taxpayer's attorney. It is not uncommon for them to suggest that emotional distress is tax exempt.

OTHER ISSUES

Allocating Awards - If a taxpayer receives an award, which is only partially excludable from income, he/she must establish the amount of the award that is excludable. Generally, look to the original complaint to make the proration between taxable and nontaxable.

> ***EXAMPLE - Allocating Injury Awards*** *- Drew filed a personal injury claim for $10,000. His claim was for $5,000, physical injury; $1,000, lost wages; $4,000, punitive damages. Drew received a settlement of $2,000 with no stipulation between the various kinds of award. One thousand dollars of the award is nontaxable ($2,000 x $5,000/$10,000).*

Compensatory vs. Punitive Damages - State law determines whether damages are compensatory or punitive.

- **Compensatory damages** are payments made as a substitute or to make amends for the injury sustained. These payments are intended to "make the injured party whole." Such payments are nontaxable if they meet the rules outlined above for personal physical sickness or physical injury.

- **Punitive damages** are made as a punishment for unlawful conduct. **Punitive damages are always taxable**; they cannot be excluded from income as damages received on account of personal physical injury or physical sickness except as noted above for wrongful death.

***Interest* (also referred to as delayed interest) -** The portion of a judgment that's attributable to interest because of delay in receiving settlement proceeds (or because the proceeds are received in periodic payments) is taxable income. It doesn't matter that the judgment itself is nontaxable.

Payments for Pain and Suffering to Egg Donor Are Taxable - The Tax Court ruled that the payments received by a woman to provide her eggs for infertile couples was taxable as compensation for services rendered and was not tax-free damages for the pain and suffering she incurred during a prolonged series of painful injections, operations and physical injuries that she endured as part of the egg-retrieval process, even though the contracts between the egg donor and the egg recipients identified the sums she was to receive as compensation for pain and suffering. The Tax Court concluded that compensation for pain and suffering resulting from the consensual performance of a service contract is not "damages" under Code Sec. 104(a)(2), and is therefore taxable. (*Nichelle G. Perez v. Commissioner, Jan. 22, 2015*)

DAMAGES RELATED TO BUSINESS INTERESTS

- Damages received ***related to employment*** are normally taxable as ordinary income. Such payments could include awards to employees for breach of an employment contract by an employer or awards for back pay.
- When a taxpayer receives damages for ***injury to capital*** the basis of the property is reduced and, no income results (unless the amount exceeds the basis of the asset involved).
- Recoveries of ***lost profits*** are taxable as ordinary income.
- Damages received as a result of a ***broken agreement*** to purchase property are taxable.
- Amounts received from ***business interruption insurance*** policies to compensate for lost profits are taxable ordinary income.

LEGAL EXPENSES

Business or Employment Related - Legal fees for defending and filing damage suits in a taxpayer's business or in employment are deductible. Examples are:

- Defending suit for wrongfully taking property.
- Corporation's defense of its position before the National Labor Relations Board related to liability for compensatory damages to employees.
- Settlement of damage suit in business that could help avoid adverse publicity and controversy.
- Getting a judgment for damages to rental real estate.
- Teacher's action of sex discrimination against a university.

***Damages for Personal Injury or Sickness* -** To the extent a taxpayer can't exclude from income a portion of an otherwise tax-free personal damage award--e.g. due to payment of interest accruing on the settlement funds-- the legal costs are deductible (but see next item).

WHERE TO DEDUCT LEGAL EXPENSES

- **Related to Individuals** - Depends upon when the expenses are incurred:
  - **2018 through 2025 Tier 2 Treatment**: As part of the TCJA, Tier 2 miscellaneous deductions are suspended for years 2018 through 2025. Therefore, any expenses incurred in obtaining a personal taxable award or settlement, including legal fees, will not be deductible for years 2018 through 2025 and the taxpayer will be liable for the tax on the entire taxable amount. On the bright side, the miscellaneous deduction often triggered the AMT – no longer the case now.
  - **Pre-2018 Tier 2 Treatment:** Generally, prior to 2018, legal expenses related to non-business awards or settlements are deducted on Schedule A as Tier 2 miscellaneous itemized deductions. The entire amount of the legal fees included in a taxable damages award or settlement must be included in the taxpayer's income, even if the taxpayer receives the award net of the attorney fees. This issue has been hashed out in court numerous times, all with the same unfavorable result for the taxpayer. The following are some citations:
    - When an attorney is paid under a contingent fee arrangement, the client must include in gross income the amount paid to the attorney as a contingent fee. (Campbell v. Commissioner, affirmed CA-11, 2011-2)
    - Under the assignment-of-income doctrine, a taxpayer may not avoid taxation by assigning income to another party. The amount paid to the attorney is includible in gross income regardless of whether the attorney-client contract or state law gives the attorney any special rights, such as a lien. (Commissioner v. Banks, 2005-1 USTC)

- **Related to business:** If related to the taxpayer's: (1) self-employed business, deduct expenses on Schedule C or Schedule F if a farm sole proprietorship; (2) real estate rental, deduct on Schedule E.
- **Related to capital items:** If the expenses must be added to basis, sale of the related property would be reported on Form 8949 (Schedule D) or Form 4797.
- **Above-the-line deduction for some discrimination awards -** An above-the-line deduction is allowed for attorneys' fees and costs paid by, or on behalf of, a taxpayer in connection with a claim of unlawful discrimination, certain claims against the federal government, or a private cause of action under the Medicare Secondary Payer statute. This provision applies to judgments or settlements occurring after October 22, 2004 and is unchanged by the TCJA. ***(Code Sec 62(a)(20))***

HUMAN TRAFFICKING RESTITUTION PAYMENTS NONTAXABLE

Under 18 U.S.C. § 1593 a defendant convicted of a human trafficking offense is required to make restitution payments to the victim. IRS issued guidance that these payments are excludable from gross income for federal income tax purposes. The payments may be to compensate the victim for costs of medical services, physical and occupational therapy or rehabilitation, transportation, temporary housing, child care expenses, lost income, attorneys' fees and other costs and losses the victim suffers as a result of the offense. ***(Notice 2012-12)***

CALIFORNIA DIFFERENCES

California conforms to federal law except for (1) elimination of the Tier 2 miscellaneous itemized deductions (for legal expenses related to taxable damage awards) and (2) the denial of a business deduction for sexual harassment settlements and related legal expenses.

With regard to claims for amounts previously included in income by wrongfully incarcerated individuals, if the normal CA statute of limitations has expired for the year the income was included, an amended return to claim a refund for CA income taxes paid on that income must be filed before January 1, 2019. (AB 454; FTB Tax News 2/1/18)

NOTES

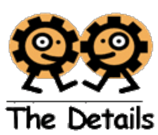
STATUTORY EMPLOYEE

- **Wages:**
  - FICA withholding required
  - Federal withholding not required but may occur
- **Statutory employees:**
  - Agent and commission drivers
  - Full-time life insurance sales agent
  - Home Workers
  - Full-time traveling or city salespeople
- **Reporting**
  - Income is reported on Schedule C (Do not combine with non-statutory income)
  - Do not include a Schedule SE for the statutory employee income (Software should handle if properly coded)

RAPID FINDER

Related IRC and IRS Publications and Forms

- **Forms W-2 and W-3** Instructions
- **Publication 15-A** -Employer's Supplemental Tax Guide (Supplement to Circular E, Employer's Tax Guide, Publication 15)
- **IRC Sec 3121**



DEFINITION: Statutory employees occupy a sort of middle ground between independent contractors and regular employees. They can be defined as workers in certain occupations who would not be considered employees under the usual rules, but who have been declared employees under the federal tax laws so that their employers must withhold FICA taxes on their income.

Thus a statutory employee is one whose earnings are subject to social security and Medicare taxes but **not** subject to Federal income tax withholding (although some employers may withhold income tax). These are workers who are independent contractors under the common-law rules but are treated by statute as employees. They are called statutory employees. The following are statutory employees:

1. **Agent and commission drivers** - Agent-drivers and commission-drivers who distribute meat, vegetable, fruit or bakery products, beverages other than milk, or laundry or dry-cleaning services for their principal *(Code Sec. 3121(d)(3)(A))* and who meet the requirements of Code Sec. 3121(d)(3) are employees for FICA purposes. *(Code Sec. 3121(d)(3)(A)).*

   For purposes of determining if someone is an agent-driver or commission-driver, it isn't relevant whether:

   - He operates his own truck or the truck of his principal;
   - He services customers designated by the principal or those solicited on his own;
   - His compensation is a commission or the difference between what he charges his customers and the price he pays the principal *(Reg § 31.3121(d)-1(d)(3)(i))*.

   A driver, who purchased his territory, set his own hours and established methods of conducting his business without supervision from his principal was an employee for FICA tax purposes *(Rev Rul 75-269, 1975-2 CB 401).*

2. **Full-time life insurance sales agent** - A full-time life insurance sales agent whose principal business activity is selling life insurance or annuity contracts, or both, primarily for one life insurance company.

3. **Home Workers -** An individual who works at home on materials or goods that are supplied by the employer and must be returned to the employer, if the employer must also furnish specifications for the work to be done.

4. **Full-time traveling or city salespeople** - A full-time traveling or city salesperson who works on behalf of an employer and turns in orders to the employer from wholesalers, retailers, contractors, or operators of hotels, restaurants, or other similar establishments. The goods sold must be merchandise for resale or supplies for use in the buyer's business operation. The work performed for the employer must be the salesperson's principal business activity.

   A person is a full-time traveling or city salesperson if he:

   - Is not an agent- or commission-driver;
   - Is engaged on a full time basis soliciting orders on behalf of his principal and transmitting those orders to that principal (but he may conduct side-line sales activities on behalf of other persons as well);
   - Obtains the orders from wholesalers, retailers, contractors, or operators of hotels, restaurants *(Code Sec. 3121(d)(3)(D))* or other businesses whose primary function is the furnishing of food and/or lodging (Social Security Handbook ('97));
   - Sells merchandise for resale or for use as supplies in his customers' business operations (Code Sec. 3121(d)(3)(D));
   - Is not a "direct seller."

   Salespersons who operate off the premises of their principals and who are generally compensated on a commission basis are included in this occupational group. Such individuals are generally not controlled as to the details of their services or the means by which they cover their territories, but they are generally expected to call on regular customers with a fair degree of regularity (Reg § 31.3121(d)-1(d)(3)(iv)(a)).

FILING & REPORTING:

Employer – The employer reports on Form W-2 and must check "statutory employee" in box #13. Both SS and Medicare must be withheld, but no income tax is required to be withheld.

Statutory employees - must use Schedule C or C–EZ to report their wages and expenses related to the statutory wage income. Because FICA taxes have already been paid the employee does not file a Schedule SE for this income. If the taxpayer has both statutory employee income and other income from their business, do not combine these two types of income on a single Schedule C. Instead file two Schedule Cs with only the income (net of expenses) from non-statutory-employee business activities flowing through to the Schedule SE.

MUST MEET TESTS: To be classified as a statutory employee, the employee must meet the following tests:

(a) The contract of service contemplates that the worker performs substantially all of the services himself;

(b) The worker doesn't have a substantial investment in facilities used for doing the work, other than transportation facilities;

(c) The services are part of a continuing relationship with the person for whom they are performed, i.e., they aren't in the nature of a single transaction *(Code Sec. 3121(d)(3)).* The fact that the services aren't provided on consecutive workdays doesn't disqualify a worker *(Reg § 31.3121(d)-1(d)(4)(iv))*.

STATUTORY WAGES & SEC 199A: For purposes of the Sec 199A 20% deduction of qualified business income (QBI), statutory wages paid by a business (i.e., where box 13 of the W-2 is marked) are not wages includible for the wage limitation computation.

The trade or business of performing services as an employee is not a trade or business for purposes of section 199A. Therefore, any amounts reported in box 1 of Form W-2, amounts reported in box 1 where the "Statutory Employee" box in box 13 is checked, are not QBI.

See Chapter 3.24 for details about the Sec 199A deduction.

NOTES

NATIVE AMERICAN INCOME

Overview

- **Federally Tax Exempt Income**
  - Income directly derived from restricted lands by enrolled members of the tribe
  - Examples
    - Farming and ranching
    - Sale of standing timber
    - Sale of allotted lands
  - Tribal programs benefits (general welfare exception)
  - Payments from Tribal Trust Funds
- **Federally Non-Exempt Income**
  - Income not directly derived from the restricted land
  - Investment income
  - Examples
    - Income from lodging
    - Retail businesses
    - Per-capita gaming income

RAPID FINDER

The Details

EXEMPT INCOME

Noncompetent Indians who are wards of the U.S. government are exempt from tax on all income directly derived from restricted lands allotted to them or to an ancestor and held in trust by the government for their benefit under the General Allotment Act of 1887.

Heirs - Where land held under a trust patent is transferred from an original allottee by devise or inheritance to a noncompetent heir, the income directly derived from that land by the heir continues to be exempt. The exemption is lost, however, if the heir later receives a fee simple title. *TR FR-051, 4/9/57.*

Exempt Income Tests - IRS will recognize the exempt status of income received by enrolled members of an Indian tribe where all of the following tests are met:

(1) The land is held in trust by the U.S. government;

(2) The land is restricted and allotted and is held for an individual noncompetent Indian, and not for a tribe;

(3) The income is "derived directly" from the land;

(4) The statute, treaty, or other authority involved evinces Congressional intent that the allotment be used as a means of protecting the Indian until such time as he becomes competent; and

(5) The statute in question contains language indicating clear Congressional intent that the land, until conveyed in fee simple to the allottee, is not subject to taxation.

Examples of Exempt Income - Income directly derived from the allotted lands held exempt under the rules described above includes:

- Rent (whether in crops or otherwise), royalties, and proceeds from the sale of natural resources or crops.
- Ground rent paid to Indians by their wholly-owned S corporation to lease their possessory interests in reservation land. Although the S corporations operated motels, the rent was for the bare land and the lease agreement was legitimate and provided for a fair rental value based on prior appraisals.
- Proceeds from the sale of standing timber.
- Proceeds from the sale of the allotted lands.
- Appreciation in value of the lands during the period of trust allotment, which is later realized on a sale.
- Farming income, grazing fees and oil lease bonuses.
- The proceeds of sale or exchange of livestock raised on the land.
- Income from farming and ranching.
- Government payments under agricultural conservation programs.

NONEXEMPT INCOME

The exemption doesn't apply to the following, which are taxable in the absence of a contrary statute or treaty:

- ***Investment income*** - Income not directly derived from the allotted lands and therefore taxable includes income realized on the reinvestment of the above-exempt income. *Squire v. Capoeman, Horton, (1956, S Ct) 49 AFTR 178*
- ***Income of a competent Indian from a tribal mineral trust****. Shelton, Jacqueline Est, (1977) 68 TC 15*
- ***Income of any kind derived from the allotted land after the Indian has been declared competent*** and has received a fee simple deed to the property from the government. Thus, a gain realized on the sale of the land after the deed has been received is taxable. *Rev Rul 58-341 , 1958-2 CB 400*
- ***Income from the operation of a motel, restaurant and gift shop, and from the rental of buildings***, although all their facilities were situated on tax-exempt reservation land. *Shelton, Jacqueline Est, (1977) 68 TC 15*
- ***Income from the sale of artifacts to tourists*** - although the sales took place on tribal trust lands. *Chief Counsel Advice 200111044*
- ***Per capita payments under the Indian Gaming Regulatory Act*** - see more below.
- ***Rental income from an apartment complex situated on exempt land*** - The income wasn't generated by the direct exploitation or use of the land itself as would be the case with farming, ranching, or timber value. Beck, George v. Com., (1995, CA4) 76 AFTR 2d 95-6139
- ***Income from a trust allotment rented from another Indian***. *Rev Rul 57-523, 1957-2 CB 51*
- ***Income of a noncompetent Indian, where the income was allocable to cattle grazing on other's trust land***. *U.S. v. Anderson, George, (1980, CA9) 46 AFTR 2d 80-5703*
- ***Dividends attributable to a noncompetent Indian's mineral lease*** of tribal or allotted land. *Wynecoop, Thomas, (1981) 76 TC 101*
- ***Income from land other than that held in trust*** for the Indian by the government*. TR FR-051, 4/9/57.*
- ***Income from operating a smokeshop*** - The income wasn't "directly derived" from the exploitation of trust land. *Cross, Silas, (1984) 83 TC 561*
- ***Income from operation of a smokeshop*** - *Dillon, Harry Sr. v. U.S., (1986, CA9) 58 AFTR 2d 86-5226 , 792 F2d 849 , 86-2 USTC ¶9492*
- ***Income from logging operations on unallotted tribal lands*** - *Kieffer, Joe T., (1998) TC Memo 1998-202*
- ***Income from shops, restaurants, a motel and a gas station -*** *Saunooke, Charles E. v. U.S., (1986, Cl Ct) 57 AFTR 2d 86-814*
- ***Income from the training and sale of horses on allotted land***, where taxpayer bought the horses and their feed off the reservation, and added to their value primarily through her labor and skill in training and showing them. *Arviso, Gloria, (1992) TC Memo 1992-685*
- ***Income from sale of gravel mined from tribal land -*** was not exempt to the taxpayers under the General Allotment Act, the Canandaigua Treaty, and the Treaty of 1842 because these documents do not apply to individual tribal members. *Alice Perkins and Fredrick Perkins v. Commissioner., U.S. Tax Court, Dkt. No. 28215-14, 150 TC —, No. 6, March 1, 2018*

INDIAN GAMING REGULATORY ACT

Under the terms of the Indian Gaming Regulatory Act, 25 United States Code Sections 2701 et seq. ("IGRA"), the tribe is limited in the uses to which it may put profits derived from gaming conducted on its reservation. The only purposes for which gaming revenues may be used are:

(i) To fund tribal government operations or programs;
(ii) To provide for the general welfare of the Indian tribe and its members;
(iii) To promote tribal economic development;
(iv) To donate to charitable organizations; or
(v) To help fund operations of local government agencies.

However, the IGRA permits per capita payments to members of a tribe. Tribes making such distributions are required to notify members that such per capita payments are subject to Federal tax. *(25 U.S.C. section 2710(b)(3)(D))* Tribes are also required to withhold Federal tax from such payments. *(IRC section 3402(r))*

PER CAPITA PAYMENTS:

Per capita payments—equal payments not based on the recipient's financial status, health, educational background, or employment status—made to tribal members under the Indian Gaming Regulatory Act (IGRA) are includible in gross income. *25 USCS 2710(b)(3)*

This result isn't affected by the fact that tribal members receiving per capita payments designated what portion of their payments they used for “qualified expenses” (not otherwise described) and each member designated a different amount. *IRS Letter Ruling 9717007*

Similarly, where the payments are paid into an irrevocable trust established by a tribe (as settlor) for the sole benefit of a tribal member who is a minor, the payments are includible in the income of the beneficiary (who is treated as the grantor of the trust). *Letter Ruling 199906015*

But where the trust was revocable, and an amendment to the tribe's plan removed the provision that prohibited the denial of payments or benefits to the minor beneficiaries, the payments paid into the trust weren't taxed to the minors. There was nothing to guarantee that the minors would ever receive payments from the trusts. *IRS Letter Ruling 200106007*

Similarly, where the agreement and amended plan for an irrevocable trust provided that the beneficiaries' rights to all principal and income of the trust would be subject to the claims of the tribe's general creditors in the event of insolvency, the beneficiaries weren't taxed on the accumulated per capita distributions that were placed into the trust, or on the income earned on those amounts, until actual receipt of distributions from the trust. *IRS Letter Ruling 200222003* See also ***Rev. Proc. 2011-56*** which provides a safe harbor under which the beneficiaries aren't taxed on the gaming revenue and income earned by the trust until actually or constructively received.

The tribe must notify its members of their tax liability when the payments are made. However, the payments are taxable whether or not the notice is given.

Kiddie Tax - Per capita payments made to children under the Indian Gaming Regulatory Act would be taxable to the child. Since the payments are not compensation for personal services, they would be unearned income for purposes of the kiddie tax rules.

TRIBAL TRUST FUNDS – Per Capita Payments

Under 25 U.S.C. § 117b(a) and 25 U.S.C. § 1407, per capita distributions made from funds the Secretary of the Interior holds in a Trust Account for the benefit of a tribe are generally excluded from the gross income of the members of the tribe receiving the per capita distributions. For example, if proceeds from timber sales, an agricultural lease, or a grazing permit are deposited into a tribe’s Trust Account and that tribe subsequently makes a per capita distribution using funds from the Trust Account, the per capita distributions are excluded from the tribal members’ gross income.

Exceptions to the excludable rule include distributions that (1) constitute compensation, (2) business profits and (3) gaming revenues. Further, distributions to tribal members from a tribal Trust Account are gross income to the members of the tribe receiving the distributions if a tribal Trust Account is used to mischaracterize what would otherwise be taxable income as nontaxable per capita distributions. For example, distributions from a tribal Trust Account constitute gross income if, based on the facts and circumstances, the distributions are mischaracterized compensation to tribal members for their services, mischaracterized distributions of business profits, or mischaracterized gaming revenues. (Notice 2015-67)

Tribal Trust Fund Settlements - Under 25 U.S.C. §117b(a), per capita payments made from the proceeds of an agreement between the United States and an Indian tribe settling the tribe's claims that the United States mismanaged monetary assets and natural resources held in trust for the benefit of the tribe by the Secretary of the Interior are excluded from the gross income of the tribal members receiving the per capita payments. Per capita payments that exceed the amount of the Tribal Trust case settlement proceeds and that are made from an Indian tribe's private bank account in which the tribe has deposited the settlement proceeds are included in the gross income of the members of the tribe receiving the per capita payments. For example, if an Indian tribe receives proceeds under a settlement agreement, invests the proceeds in a private bank account that earns interest, and subsequently distributes the *entire* amount of the bank account as per capita payments, then a tribal member excludes from gross income their portion of the per capita payment attributable to the settlement proceeds and must include the remaining portion of the per capita payment in gross income. (Notice 2013-1) The IRS has updated the list of the Indian tribes participating in the settlement; see Notice 2019-23, which can be found on page 941 of IRB 2019-15 at: https://www.irs.gov/pub/irs-irbs/irb19-15.pdf.

States - Personal Income Tax Regulation 17071(p) provides that income derived from allotted and restricted Indian land held by the United States as Trustee under Section 5 of the General Allotment Act of 1887 is exempt from taxation. Such exempt income includes rentals, royalties, proceeds of sale of cattle raised on or of crops grown upon the land and income from the use of the land for grazing purposes. *California FTB Legal Ruling 399, 01/19/1977*

BENEFITS FROM TRIBAL PROGRAMS

To qualify under the general welfare exclusion, which exempts certain government benefit payments from being taxed, the payments must (1) be made pursuant to a governmental program, (2) be for the promotion of the general welfare (that is, based on need), and (3) not represent compensation for services. Over the years, the IRS and Native American tribal governments have disagreed as to which programs provided by tribal governments qualify for the general welfare exception.

Rev Proc 2014-35 provides safe harbors under which the IRS will conclusively presume that the individual need requirement of the general welfare exclusion is met for benefits provided under certain Indian tribal governmental programs, making these benefits nontaxable to the recipient tribal members and "qualified nonmembers" (a spouse, former spouse, legally recognized domestic partner or former domestic partner, ancestor, descendant, or dependent of a member of an Indian tribe).

To be eligible the benefits cannot be lavish or extravagant. Rev Proc 2014-35 contains an extensive list of the types of benefits provided by tribes for housing, education, elder and disabled, cultural and religious, and other programs that qualify as safe harbor programs.

IRC Sec 139E – Subsequent to publication of Rev Proc 2014-35, the Tribal General Welfare Exclusion Act of 2014 was enacted on September 26, 2014. This Act created IRC Sec 139E, which codifies the general welfare exclusion for certain benefits provided under Indian tribal government programs. IRS has advised taxpayers in Notice 2015-34 that they may continue to rely on the safe harbors provided in Rev. Proc. 2014-35, which is broader than new Sec 139E.

The Act provides that certain Indian general welfare benefits that were reported as taxable are eligible for refund or credit. Use Form 1040X to apply for a refund (a one-year waiver of the statute of limitations provided in the Act has expired so only open years may be amended to claim a refund), and send it to:

Internal Revenue Service
1973 North Rulon White Blvd
M/S 1110 Attn: GECS
Ogden, UT 84404-7843

Write "Tribal General Welfare Exclusion Act" at the top of the form to ensure the claim is properly processed.

CALIFORNIA DIFFERENCES

California - The income derived from reservation sources by Native Americans living on a reservation is not subject to the California personal income tax. For this income to be excluded on 2017 and prior returns, the Native American must be a tribal member of the reservation on which he or she resides. The exemption of income with respect to reservation Indians does not apply to income earned outside the reservation (also see special rules relating to per capita gaming distributions).

New Law & Stuff

Residency Requirement Eased - The requirement that the Native American be a tribal member of the reservation where he or she resided was liberalized by SB 855, signed by the governor June 27, 2018, effective for tax years beginning on or after January 1, 2018. This provision allows American Indian tribal members living in Indian country in California, *whether their own or another tribe's reservation*, to exclude from California gross income their earned income that is derived from sources within *any* Indian country in California. Any per capita distributions received by an individual not residing on their tribe's reservation would remain includible in gross income.

PORTFOLIO INCOME

RAPID FINDER

Overview

- **Qualified Dividends**
  - Taxed at capital gains rates
  - From domestic & some foreign corporations
  - Excludes dividends from stock not held more than 60 days during the 121-day period beginning 60 days before the ex-dividend date
- **Capital Gain Dividends (Distributions)**
  - Currently treated the same as long-term capital gains
- **Other Dividends** - Taxed at regular rates
- **Interest Income**
  - **U.S. Government Obligations - Interest**
    - Not taxable to states (Examples):
      - Series E, EE, H, HH and I Bonds
      - Treasury bills, notes and bonds
    - Taxable to the states (Examples):
      - Fannie Mae Bonds
      - Ginnie Mae Bonds
      - FHLMC securities
  - **Tax-Exempt (Federal)**– State and municipal obligations
  - **Private Activity Bonds** – Exempt for regular tax but generally not for AMT
  - **Taxable** – Taxed at ordinary income rates

CAUTION – FOREIGN ACCOUNT REPORTING REQUIREMENTS

1. Individuals with a financial interest in or signature or other authority over any foreign financial accounts, including bank, securities, or other types of financial accounts, in a foreign country, if the <u>aggregate value</u> of these financial accounts exceeds $10,000 at any time during the calendar year, must file FinCEN Form 114 on or before April 15 of the succeeding year (automatic 6-month extension if April deadline missed).
2. Code Sec. 6038D requires an individual with an interest in a "specified foreign financial asset" during the year to attach a disclosure statement to their income tax return for any year when the aggregate value of all such assets exceeds $50,000 or other amount set by IRS. Form 8938 is used to make the disclosure.
3. See details of these reporting requirements in Chapter 1.13.

The Details

TCJA

DIVIDEND INCOME

"Qualified" dividends from domestic corporations and qualified foreign corporations received by noncorporate taxpayers are treated as net capital gain taxed at 0%, 15% or 20% determined according to the taxpayer's taxable income as shown in the following table. Prior to 2018, the rate breakpoints exactly matched the breakpoints for the ordinary income tax brackets: 0% capital gains rate for taxpayers in the two lowest tax brackets, 15% for those in the 25% through 35% brackets, and 20% to the extent a taxpayer's income exceeds the threshold for the 39.6% rate. While the TCJA kept the 0%/15%/20% capital gains rates, the breakpoints no longer exactly match the ordinary tax bracket breakpoints. The capital gains rates apply for both regular income tax and alternative minimum tax.

CAPITAL GAINS & QUALIFIED DIVIDENDS TAX RATES - 2019

Capital Gains Rate	Taxable Income 2019			
	Single	Head of Household	Married Joint*	Married Separate
0%	0 – 39,375	0 – 52,750	0 – 78,750	0 – 39,375
15%	39,376 – 434,550	52,751 – 461,700	78,751 – 488,850	39,376 – 244,425
20%	434,551 & up	461,701 & up	488,851 & up	244,426 & up

CAPITAL GAINS & QUALIFIED DIVIDENDS TAX RATES - 2018

Capital Gains Rate	Taxable Income 2018			
	Single	Head of Household	Married Joint*	Married Separate
0%	0 - 38,600	0 – 51,700	0 – 77,800	0 – 38,600
15%	38,601 – 425,800	51,701 – 452,400	77,801 – 479,000	38,601 – 239,500
20%	425,801 & up	452,400 & up	479,001 & up	239,501 & up

*also includes Qualifying Widow(er)

Qualified dividend income does NOT include:

- Dividends on stock ***not held for more than 60 days during the 121-day period*** beginning 60 days before the ex-dividend date (longer for preferred stock – see below). *Code Sec. 1(h)(11)(B)(iii)(I)*

  If a taxpayer receives dividends with respect to preferred stock which are attributable to a period or periods aggregating more than 366 days, the holding period is 90 days during the 181-day period beginning 90 days before the ex-dividend date.
- Dividends on any share of stock to the extent that the taxpayer is under an obligation (whether pursuant to a short sale or otherwise) to make ***related payments*** with respect to positions in substantially similar or related property *Code Sec. 1(h)(11)(B)(iii)(II)); see Payment in Lieu of Dividends below.*
- Any amount ***taken into account as investment income*** under Code Sec. 163(d)(4)(B) (which treats qualified dividend income as investment income only where taxpayer so elects) allowing the dividend to support a deduction for investment interest. *Code Sec. 1(h)(11)(D)(i))*
- Dividends from ***corporations that are exempt from tax*** under Code Sec. 501 (charitable, religious, scientific, etc., organizations) or Code Sec. 521 (farmers' cooperatives).
- Amounts allowed as a deduction under Code Sec. 591 (***dividends paid by mutual savings banks***).
- Dividends paid on employer securities held by an employee stock ownership plan (***ESOP***). *Code Sec. 1(h)(11)(B)(ii))*

What Is a Dividend? A dividend is defined in Code §316 as a distribution by a corporation to its shareholders out of its current or accumulated earnings and profits. The distribution, therefore, must be:

- Made by a corporation, not some other kind of entity,
- Must be received by shareholders, in their capacity as shareholders, not by lenders, employees or customers, and
- The corporation must have earnings and profits.

Types of Dividends and Do They Qualify? The following is a discussion of the various types of dividends and whether or not they qualify for the lower rates. Those noted as qualifying will qualify only if the holding period stated above is met.

- **Common Stock –** Common stock dividends will generally qualify for the lower rate.
- **Preferred Stock –** Generally, dividends paid on preferred stock should be eligible for the reduced dividend rate. However, some preferred stock is not preferred stock; it is debt masquerading as preferred stock. It has been developed and marketed to corporations to enable corporations to deduct the distributions as interest expense on the corporate tax return. If the corporation is entitled to an interest expense deduction, it is not preferred stock, and the distributions, with respect to that instrument, are not dividends.
- **Return of Capital** - A distribution to shareholders by a corporation without earnings and profits is a return of capital, not a dividend. Return of capital is not taxable, but reduces the basis of the investor's stock. Once basis is entirely recovered, the distribution gets capital gain treatment (long- or short-term depending on how long the stock is held).
- **Mutual Funds –** Mutual fund companies pass through earnings to fund holders in the form of ordinary dividends or capital gains. Short-term capital gain distributions from mutual funds are treated as ordinary dividends. Mutual fund ordinary dividends are classified into qualifying and nonqualifying dividends on Form 1099-DIV.
- **Money Market and Bond Funds -** Interest on money market and bond funds is taxable as dividend income but may not be qualifying dividends because the mutual fund may not hold the underlying financial instruments for the required time period. The 1099-DIV issued by the fund should identify the portion of the total dividends paid that can be treated as qualified dividends.
- **S Corporations -** S corporations are corporations that make distributions to shareholders, but those distributions will, in general, not qualify as dividends for the reduced tax rates. S corporations typically do not have earnings and profits because they are allocated to the shareholders each year for pass through taxation. It is possible for an S corporation to have accumulated earnings and profits from a prior life as a C corporation, and therefore it is possible for an S corporation to pay dividends with respect to those earnings and profits, but that would be the exception rather than the rule.
- **Real Estate Investment Trusts (REITs) -** REITs are corporations that make distributions to shareholders. However, they are required to distribute to their shareholders most of the REIT earnings for the year. If some portion of REIT earnings is retained in the REIT, it is taxed at the REIT level, and distributions with respect to those earnings would qualify for the reduced dividend tax rates. Also, if a REIT happened to be a shareholder in a corporation and passed dividends it received from the corporation through to its shareholders, that distribution would also qualify for favorable dividend treatment. These would be exceptions to the general rule; however, most REIT distributions would not qualify for the favorable dividend tax rates.

TCJA

Under TCJA, REIT dividends qualify for the Sec 199A deduction (the 20% deduction for pass-through income). See chapter 3.24 for details.

- **Payment in Lieu of Dividends -** Brokerage houses typically support the short sale industry by borrowing stock held by customers in brokerage accounts and using the borrowed stock to provide the stock needed by short sellers. If a dividend is paid while the stock is not part of the customer's account, it has customarily resulted in a payment in lieu of dividend to make sure that the customer received the equivalent of the dividend that would have been received had the stock actually remained in the account. Since these payments are not being made by a corporation with respect to its shareholders, these payments in lieu of dividends would not qualify for the favorable tax treatment accorded dividends. In fact, these payments are reported by the broker on Form 1099-MISC (box 8) and not on Form 1099-DIV. They are to be included on the miscellaneous income line of the customer's Form 1040 (2019 draft Schedule 1, line 8) and not on Schedule B.
- **Credit Union Dividends –** Dividends from credit unions are not paid from earnings and profits and therefore do not qualify for the lower rates. These payments are reported as interest income on the tax return.
- **Foreign Corporations -** The House and Senate had different views as to whether the favorable dividend rates should apply to dividends received from foreign corporations as well as domestic corporations. The result, as with most compromises, is complexity—some foreign corporate dividends meet the definition of qualified dividend income, while others do not. In general, for dividends from a foreign corporation to qualify for favorable treatment, the foreign corporation must be (1) incorporated in a U.S. possession, (2) traded on a U.S. exchange or (3) incorporated in a country covered by a comprehensive tax treaty with the United States (see Table 8-1 in IRS Pub 17 for a list of these foreign countries).

Dividends & Investment Income – Dividends qualifying for the reduced tax rates are not considered investment income for purposes of the investment interest deduction calculation unless the taxpayer elects to have them taxed at ordinary rates in the same manner as the election to treat capital gains as investment income. Dividends are treated as investment income for the 3.8% surtax on net investment income.

Exempt-Interest Dividends - Exempt-interest dividends received from a regulated investment company (mutual fund) are not included in taxable income. However, these payments must be reported on the return for information purposes and may affect the taxability of Social Security benefits. Payers include exempt-interest dividends on Form 1099-DIV, box 11. Exempt-interest dividends paid by the fund on private activity bonds will be shown in box 12 of the 1099-DIV. These dividends are generally subject to AMT in the same way as directly-paid private activity bond interest as explained in the "Interest Income" section below.

Dividends & AMT – Qualified dividends are taxed at the capital gains rate for both regular income tax and alternative minimum tax.

Retirement Accounts – There is no tax benefit associated with dividends qualifying for the lower rates that are earned within a qualified retirement account. Just as capital gains earned in retirement accounts do not qualify for favorable capital gain treatment when eventually distributed, dividends earned in those retirement accounts will not qualify for the favorable dividend rates when eventually distributed. Payers of dividends do not issue 1099-DIV forms for dividends paid to IRA or other retirement accounts.

INTEREST INCOME

- **Private Activity Bond Interest** - Tax-exempt interest on certain private activity bonds is a tax preference item. Private activity bonds include those which finance mass-transit facilities, sewage and solid waste disposal facilities and certain multi-family dwellings. Tax-exempt interest, and the portion of it that is private activity interest, is required to be included on Form 1099-INT, boxes 8 and 9, respectively. The tax preference amount is the private activity interest income reduced by the related expenses not allowed for regular tax purposes because the income is nontaxable.
- The Housing Assistance Act of 2008 exempts from the AMT three special classes of bonds issued after July 30, 2008:
  (1) Certain exempt facility bonds used at least 95% for qualifying residential rental projects;
  (2) Qualifying mortgage bonds; and
  (3) Qualifying veterans' mortgage bonds.

  Tax-exempt interest on specified private activity bonds issued in 2009 or 2010 is not an item of tax preference and therefore is not subject to the AMT. This provision also applies to a private activity bond issued in 2009 or 2010 to currently refund a private activity bond issued in 2004 through 2008. For bonds that refund bonds issued in 2009 or later years, the refunding bond is treated as being issued on the date of the issuance of the refunded bond or, in the case of a series of refundings, the original bond. *(IRC Sec. 57(a)(5(C)(vi), as added by ARRA of 2009)*
- **Interest on VA Dividends -** Interest on insurance dividends left on deposit with the Department of Veterans Affairs (VA) is not taxable. This includes interest paid on dividends on converted United States Government Life Insurance and on National Service Life Insurance policies.
- **Dividends that are Actually Interest -** Certain distributions commonly called dividends are actually interest and should be reported as such. These include payments from:
  - Cooperative banks,
  - Credit unions,
  - Domestic building and loan associations,
  - Domestic savings and loan associations,
  - Federal savings and loan associations, and
  - Mutual savings banks.
- **Interest on Insurance Dividends -** Interest on insurance dividends left on deposit with an insurance company that can be withdrawn annually is taxable in the year it is credited to the account. However, if withdrawal can only be made on the anniversary date of the policy (or other specified date), the interest is taxable in the year that date occurs.
- **Bonds Traded Flat -** If a bond is purchased when interest has been defaulted or when the interest has accrued but has not been paid, that interest is not income and is not taxable as interest if paid later. When payment of that interest is received, it is a return of capital that reduces the remaining cost basis. Interest that accrues after the date of purchase is taxable interest income for the year it is received or accrued.
- **Bond Premium –** Generally, bond premium occurs when the stated interest rate on the bond is higher than the market yield for the bond when it is purchased. The bond premium amount is the excess of the holder's basis in the bond immediately after its acquisition over the sum of all amounts payable on the bond after its purchase (other than payments of qualified stated interest) – in other words, face value of the bond. Special rules (not covered here) apply for convertible bonds, variable rate debt instruments and bonds subject to contingencies. The tax treatment of the premium depends on whether the bond pays tax-exempt or taxable interest.
  - **Tax Exempt Bonds –** Any premium on tax-exempt bonds cannot be deducted but must be amortized, and the basis of the bond must be reduced by the nondeductible amount. *(IRC Sec 171(a)(2); IRC Sec. 1016(a)(5))* As a result, even though no deduction is allowed of the amortized premium, no loss is available when a tax-exempt bond is acquired at a premium and held to maturity.
  - **Taxable Bonds –** At the bondholder's election, a premium may be amortized, and a deduction is allowed for the year's amortized amount. *(IRC Sec. 171(a)(1); Sec. 171(b)(3))* The bond premium is

computed under a constant-yield method based on yield to maturity. *(Sec. 171(b)(3)(A))* The deduction is an offset on Schedule B to the stated interest allocable to the same period. When the amortization election has been made, the basis of the bond is reduced by the offset amount. The amortization deduction amount in any one year cannot exceed the income reported from the bond during the year. However, excess premium amortization can be carried forward to the next accrual period to offset that period's interest income. *(Reg §1.171-2(a)(4))*

Making the election - The amortization election is made by (1) offsetting the interest income with the bond premium on a timely filed return for the first tax year to which the bond holder wishes the election to apply, and (2) attaching an election statement to the return. Unless revoked with IRS consent, the election, once made, is binding for the year made and all future years for all taxable bonds held by the taxpayer at the beginning of the election year and to all taxable bonds subsequently acquired by the taxpayer.

Example - Amortizing The Premium –During the year Jack purchased a bond maturing in 5 years for which he paid a $6,000 premium. The 1099-INT he received for the year reported $10,000 of taxable interest from the bond and in box 11 showed $600, which is the premium amortization allocable to the year's interest payments. He has not advised the payer that he doesn't want to amortize the bond premium. The $600 was figured by dividing the premium amount by the number of months to maturity and multiplying the result by 6 months, the period he owned the bond during the year ($6,000/60 x 6 = $600). See the 1099-INT instructions for Box 11.

Reporting the Amortization - Report the bond's interest on Schedule B (Form 1040), line 1. Under your last entry on line 1, put a subtotal of all interest listed on line 1. Below this subtotal, enter the amortizable bond premium allocable to the interest payments for the year and label this amount "ABP Adjustment". Subtract this amount from the subtotal, and enter the result on line 2. (Pub 550 (2018) Page 33)

No election - If the election is not made, the premium is recovered when the bond is redeemed or sold. Because the election provides a current offset to interest income, generally making the election is preferable to having a future capital loss deduction. But each taxpayer's situation needs to be analyzed before making an election.

CAUTION

Most debt instruments are considered covered securities either as of Jan. 1, 2014 or Jan. 1, 2016, so brokers are required to report on Form 1099-B (or substitute statement) not only the gross proceeds from sales or maturities of these bonds, but also the adjusted basis of the debt instrument (and whether any gain or loss is short-term, long-term, or ordinary). However, in certain circumstances, an adjusted basis different from the one reported by the broker will need to be used to arrive at the correct amount of gain or loss. This will be the case, for example, with market discount or premium amortization for taxable bonds if the taxpayer's and broker's treatments aren't the same. The regulations specify which elections the brokers are to assume for basis reporting purposes, but these elections can be overridden by the taxpayer if the broker is timely notified. Taxpayers need to inform their broker in writing (an email is acceptable) by no later than December 31 of the year for which they want the broker to begin to apply or cease to apply the applicable election. See also IRS FAQs at: http://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/Cost-Basis-Reporting-FAQs

- **Bonds Traded Between Interest Dates**
  - **Bond Sold -** If a bond is sold between interest payment dates, part of the sales price represents interest accrued to the date of sale. The part of the sales price that represents interest must be reported as interest income for the year of sale.
  - **Bond Purchased** - If a bond is purchased between interest payment dates, part of the purchase price represents interest accrued before the date of purchase; this interest belongs to the seller of the bond. At the next interest payment date after the purchase, the buyer will receive interest from the bond issuer that includes both the accrued interest at purchase and post-purchase interest. Only the interest in excess of the amount paid to the seller for the accrued interest is taxable. The buyer purchased the interest that had accrued up to the purchase date, so the interest payment equal to that amount is a return of capital. There is no effect on the cost basis of the bond since the purchase of the interest was not included in the basis of the bond. On Schedule B, report the full amount of interest received for the year (so as to match the 1099-INT), subtotal all interest income, enter the accrued interest paid as a negative amount on the next line, and then enter the net total of line 1 on line 2. If the first interest payment after purchasing the bond does not occur until the following tax year, deduct the accrued interest paid on the following year's return, not on the return for the year the bond was purchased.

Example *– On May 25, in the secondary market, Chuck purchased a bond with a face value of $10,000 for $9,810. The coupon rate on the bond is 5%, which is payable semi-annually on April 15 and October 15. At the time of the purchase, interest of $58.91 had accrued, which Chuck paid the seller, thus making his total cost for the purchase $9,868.91. On October 15 he receives an interest payment of $250, which he offsets with the $58.91 of accrued interest he purchased, leaving $191.09 as taxable interest and a zero basis in the purchased interest (original basis $58.91 – return of principal 58.91 = 0). His basis in the bond is $9,810.*

- **Original Issue Discount (OID) -** A debt instrument generally has OID when the instrument is issued for a price that is less than its stated redemption price at maturity. OID is the difference between the stated redemption price at maturity and the issue price. All instruments that pay no interest before maturity are presumed to be issued at a discount. Zero coupon bonds are one example of these instruments.

Original issue discount (OID) is a form of interest and is generally included in income as it accrues over the term of the debt instrument, whether or not the taxpayer receives any payments from the issuer. The discount or OID is treated as zero ("de minimis" OID) if it is less than one-fourth of 1% (.0025) of the stated redemption price at maturity multiplied by the number of full years from the date of original issue to maturity.

- **State or Local Government Obligations -** Generally, interest on obligations used to finance government operations is not taxable if the obligations are issued by a state, the District of Columbia, a possession of the United States, or any of their political subdivisions. This includes interest on certain obligations issued after 1982 by an Indian tribal government treated as a state. Interest on arbitrage bonds issued by state or local governments and interest on private activity bonds generally is taxable.

CAUTION:

If a taxpayer is required to file a tax return, they are required to show any tax-exempt interest and exempt-interest dividends received during the year (line 2a of draft 2019 Form 1040).

Bond and Acquisition Premium Broker Reporting Final Regs Issued – These regulations relate to information reporting by brokers for bond premium and acquisition premium, as well as final and temporary regulations relating to brokers' information reporting for transactions involving debt instruments and options. The regulations address the reporting of original issue discount (OID) on tax-exempt obligations, the treatment of certain holder elections for reporting a taxpayer's adjusted basis in a debt instrument, and transfer reporting for Code Sec. 1256 options and debt instruments. These regulations adopt, with certain clarifications and one change, the 2013 proposed interest reporting regulations (NPRM REG-154563-12, I.R.B. 2013-20, 1097). The text of the temporary regulations also serves as the text of the proposed regulations (NPRM REG-143040-14). The regulations are effective on March 13, 2015.

U.S. GOVERNMENT OBLIGATIONS

Interest on U.S. obligations, such as U.S. Treasury bills, notes, and bonds, issued by any agency or instrumentality of the United States is taxable for Federal income tax purposes.

- **Treasury Bills** generally have a 4-week, 13-week, or 26-week maturity period, although shorter and longer periods (a few days to up to 52 weeks) are possible. They are issued at a discount in the amount of $1,000 and multiples of $1,000. The difference between the discounted price paid for the bills and the face value received at maturity is interest income. Generally, this interest income is taxable when the bill is paid at maturity.
- **Treasury Notes** are currently issued with maturity periods of 2, 3, 5, 7 or 10 years. Generally, interest (fixed-rate) is paid every 6 months and taxable in the year paid.
- **Treasury Bonds** are currently sold only with 30-year terms, although they used to be sold with shorter maturity periods. Treasury bonds pay interest every 6 months. The interest income is reported in the year paid.
- **Series HH Bonds** were issued at face value. Interest is paid twice a year by direct deposit to the bond owner's bank account. Cash method taxpayers must report interest on these bonds as income in the year it is received. Series HH bonds mature in 20 years. They were available prior to Sept. 1, 2004 in exchange for Series EE/E bonds or upon reinvestment of matured H bonds; they are no longer issued.
- **Series H Bonds** were issued before 1980 and had the same tax treatment as series HH bonds. The income was reported as received. Series H bonds had a maturity period of 30 years. The last Series H bond matured in 2009.
- **Series EE and Series I Bonds** have interest payable when the bonds are redeemed. The difference between the purchase price and the redemption value is taxable interest.

1. ***Series I Bonds*** - These are inflation-indexed bonds, first offered in 1998, issued at their face amount with a maturity period of 30 years. The face value plus accrued interest is payable at maturity. If they are redeemed within the first 5 years, the bond owner forfeits the most recent 3-months' interest.
2. ***Series EE Bonds*** – First offered in July 1980, Series EE Bonds issued before May 1997 earn various rates for semi-annual earnings periods beginning between May 1 and October 1, 2005, depending on

dates of issue. Series EE bonds issued from May 1997 through April 2005 earn market-based interest rates set at 90% of the average 5-year Treasury securities yields for the preceding six months. A fixed rate of 3.50% applies for Series EE savings bonds issued from May 1 through October 31, 2005. Fixed rates for future issues are set each May 1 and November 1. Interest accrues monthly and compounds semi-annually. Bonds held less than five years are subject to a three-month interest penalty. EE bonds have an original maturity of 20 years, and an interest-bearing life of 30 years. If purchased electronically from the U.S. Treasury, the bonds are sold at face value; if purchased before 2012 in paper form from a bank, they were sold at 50% of face value but are not worth face value until redeemed.

3. ***Series E Bonds –*** Issued at discount with face value payable at maturity, these bonds originally had a 10-year maturity period. The maturity period was extended as follows:

Issued	Maturity
By Nov 1965	40 Years
After Nov 1965 thru July 1980	30 Years

Reporting Series E, EE and I Interest - If the cash method of reporting income is used, the taxpayer can report the interest on series EE, series E, and series I bonds in either of the following ways:

Method 1 Postpone reporting the interest until the earlier of:

- The year the bonds are redeemed, or
- The year they mature.

Method 2 Choose to report the increase in redemption value as interest each year. The same method must be used for all series EE, series E and series I bonds owned.

Change of Method

- ***Change from Method 1 -*** The method of reporting interest can be changed from Method 1 to Method 2 without permission from the IRS. In the year of change, the taxpayer must report all interest accrued to date and not previously reported for all bonds.
- ***Change from Method 2*** - Permission to switch from Method 2 to Method 1 is required, but is automatic if the taxpayer submits the required information (see Pub 17). As part of that agreement, the taxpayer must agree to:

  a) Report all interest on any bonds acquired during or after the year of change, when the interest is realized upon disposition, redemption, or final maturity, whichever is earliest, and

  b) Report all interest on the bonds acquired before the year of change, when the interest is realized upon disposition, redemption, or final maturity, whichever is earliest, with the exception of the interest reported in prior tax years.

Choice to Report Interest in Year of Trade – A taxpayer could have chosen to treat all of the previously unreported accrued interest on the series EE or series E bonds traded for series HH bonds as income in the year of the trade.

SAVINGS BONDS – ELECTRONIC PURCHASES ONLY

Effective 1/1/12, U.S. savings bonds are no longer sold in paper form at financial institutions. U.S. savings bonds and other Treasury securities are available for purchase at www.treasurydirect.gov. Paper bonds continue to be redeemable at some, but no longer all, financial institutions.

SURTAX ON NET INVESTMENT INCOME

Beginning in 2013 a surtax referred to as the Net Investment Income Tax (NIIT) is imposed on individuals, estates, and trusts. For individuals, the surtax is 3.8% of the lesser of: (1) The taxpayer's **net** investment income or (2) The excess of modified adjusted gross income over the threshold amount ($250,000 for a joint return or surviving spouse, $125,000 for a married individual filing a separate return, and $200,000 for all others). These amounts are **not** adjusted for inflation. See Chapter 12.05 for additional details.

CALIFORNIA DIFFERENCES

Ordinary Dividends – California does not provide reduced tax rates for dividends. Generally, there is no difference between the amount of dividends reported for Federal purposes and the amount reported using California law.

Exempt-Interest Dividends - California taxes interest derived from obligations of other states and their municipalities, but interest from U.S. obligations and California obligations is not taxed by California. When a mutual fund holds state and municipal bonds, the interest income from these obligations that the fund passes through to the shareholders is considered dividend income that is termed an "exempt-interest dividend" and is not taxable for federal purposes. If the mutual fund has at least 50% of its assets invested in tax-exempt U.S. obligations and/or in California obligations or those of its municipalities, that portion of the dividend derived from tax-exempt U.S. obligations and/or California or its municipalities' obligations is exempt from California income. If the exempt percentage is less than 50%, the entire amount is taxable. (R&TC Sec 17145)

Muni-Interest Taxability; 50% Rule

A lawsuit was filed in July 2016 in the Los Angeles Superior Court challenging the California law discussed above that U.S. obligations and California muni-interest is taxable to California where the interest is passed through from mutual funds and the mutual fund is invested less than 50% in the tax-exempt bonds. *(Ronald & Pamela Mass v. FTB (July 2016) Case #BC627648, Los Angeles Superior Court)* The tax amount in dispute on the taxpayer's 2010 return is $7,384. After hearing the case in September 2017, on October 30, 2017, the court issued judgment in favor of FTB, holding that the Legislature's enactment of Revenue and Taxation Code section 17145 was appropriate and does not violate Article XIII section 26(b) of the California Constitution.

The taxpayers appealed, but in August 2019 the Court of Appeal's ruling confirmed the lower court's decision that R&TC section 17145 does not directly tax the municipal bond interest income, and therefore does not conflict with Article XIII of the state Constitution that prohibits taxing interest from California municipal bonds, based on the premise that the distributions from the mutual funds do not retain their status as tax-exempt interest.

Interest from U.S. Obligations

- **Direct Obligations** - Interest from the following obligations is not taxable to CA:
  - U.S. Savings Bonds;
  - U.S. Treasury bills, notes, and bonds; or
  - Any other bonds or obligations of the United States and its territories. Territories include Puerto Rico (U.S. Code Title 48, Chapter 4, Sec 745). By federal law interest on Tennessee Valley Authority (TVA) Power Bonds is exempt from taxation by any state (16 U.S.C. Sec 831n-4(d)).
- **Indirect Obligations –** The following are indirect obligations that are fully taxable to CA:
  - Federal National Mortgage Association (Fannie Mae) Bonds;
  - Government National Mortgage Association (Ginnie Mae) Bonds; and
  - Federal Home Loan Mortgage Corporations (FHLMC) securities.

Tax-Exempt Interest – Generally, California only treats as tax-exempt interest from California state bonds or municipal bonds issued by a county, city, town, or other local government unit within California. Therefore, interest from the following obligations that are tax-exempt for Federal purposes are fully taxable in California:
- Non-California state bonds;
- Non-California municipal bonds issued by a county, city, town, or other local government unit;
- Obligations of the District of Columbia issued after December 27, 1973; and
- Non-California bonds, if the interest was passed through from S corporations, trusts, partnerships, or Limited Liability Company (LLCs).

Interest from Loans Made in an Enterprise Zone (EZ) – Through 2013 California law allowed a deduction from income for the amount of net interest received from loans made to a trade or business located within an enterprise zone. Federal law has no comparable deduction. This provision expired January 1, 2014.

NOTES

LIFE INSURANCE AND TAXES

Life Settlements

- Policy Holder
  - Surrender Policy – Gain in Excess of basis is ordinary Income
  - Sale of Policy with Cash Value - "Inside buildup" = ordinary income
    Balance is capital gain
  - Sale of Policy without cash value – gain is capital gain
- Policy Purchaser
  - Death Proceeds – gain is ordinary income
  - Contract Resold – gain is capital gain

Viatical Settlements

- Terminally Ill – All benefits excludable
- Chronically Ill – Benefits excludable to extent used for qualified long-term care

Death Benefits – Generally income excludable

RAPID FINDER

The TCJA of 2017 added new IRC Section 6050Y, information return reporting rules for "reportable policy sales" of life insurance contracts and "reportable death benefits" paid after December 31, 2017. Implementation is delayed until proposed regulations are issued. See page 02.14.04 for more information.

LIFE SETTLEMENTS

In times past, an individual who no longer needed a life insurance policy had few options. In general, he could surrender the policy to the issuing insurance company for its cash surrender value or he could stop paying the premiums and let the policy lapse. For a term insurance or other policy without cash surrender value, the only choice was to let the policy lapse. Now, for some individuals, there is a secondary insurance market in which they may be able to sell a policy for more than its cash surrender value or even sell a policy without cash surrender value, such as a term policy. These transactions are called life settlements.

CAUTION

When counseling your clients, be aware there is little transparency with respect to this market, as well as a significant amount of confusion and variation among state and federal authorities as to the appropriate regulatory approach to the transactions involved. On the seller side of the transaction, there is potential for seniors to have unexpected tax liability, loss of insurability, undisclosed commissions or even bid-rigging by brokers, and possible legal liability to their insurance companies in certain circumstances.

Reasons for considering a life settlement - include:

- Funds are needed to pay medical or long-term care expenses;
- The insured can no longer afford the premiums;
- The primary beneficiary has died and the policy is no longer needed;
- The insured got divorced;
- Business circumstances have changed and the coverage is no longer needed to fund a buy-sell agreement; and
- Expected death tax costs have been reduced or eliminated and the coverage is no longer needed to pay death taxes.

Factors bearing on the settlement amount - The settlement amount will depend on the unique circumstances of the specific case. Some reports say that the average payout is 24% of the face amount of the policy but they can vary widely. Factors bearing on the amount that may be realized include the insured's age, gender, health, life expectancy, type of policy, its face amount, and any cash value. Obviously, individuals with a shorter life expectancy can expect to realize more than those with a higher life expectancy in otherwise equivalent situations. There may be fees and commissions and state law may impose a cap on the amount that may be realized.

Disposition of a Contract by the Policy Holder - Rev Ruling 2009-13 explains the tax treatment of policyholder surrenders and sales of life insurance contracts with and without cash value. The ruling initially explains the tax treatment of a surrender and then modifies the facts slightly to explain a sale.

Surrender of policy – The Rev Ruling provides the following example: In Year-1, John enters into a "life insurance contract" with cash value. John is the insured and a member of John's family was the beneficiary. John had the right to change beneficiaries or surrender the contract for its cash value. In Year-8 John surrenders the contract for its cash value of $78,000 which reflects the subtraction of $10,000 for the "cost of insurance." John paid total premiums on the policy of $64,000. John was not terminally or chronically ill at the time of the surrender. John's resulting gain from the sale would be:

Surrender Cash Value:	$78,000 (this figure is net of insurance costs)
Paid Premiums:	<64,000>
Ordinary Income:	$14,000

Since the surrender of a life insurance contract does not produce capital gain, the income was ordinary income.

Sale of policy with cash value - The facts are the same, except that John sells the insurance contract for $80,000 to George who is unrelated to John and who would suffer no economic loss upon John's death. Here, John's resulting gain from the sale would be determined as follows:

Contract Sales Price:		$80,000
Paid Premiums:	64,000	
Cost of Insurance	<10,000>	
Contract Basis		<54,000>
Total Profit:		$26,000
Ordinary Income		$14,000 (Difference between cash value & paid premiums)
Capital Gains		$12,000 (Balance of gain)

To determine the character of the income, the IRS applied the "substitute for ordinary income" doctrine. Application of the substitute for ordinary income doctrine is limited to the amount that would be recognized as ordinary income on surrender of the policy, and income received on sale of a life insurance policy may qualify as gain from the sale of a capital asset to the extent that it exceeds the cash surrender value minus the premiums paid (that is, the "inside build-up" under the contract). Thus, of the income received, the amount equaling the inside buildup on the contract was taxed as ordinary income. The excess was taxed as long-term capital gain.

Sale of policy without cash value - The facts are the same, except: the contract is a level premium term life insurance contract without cash surrender value; monthly premiums were $500 per month and through the date of sale John had paid premiums of $45,000; John sold the contract on June 15th (89.5 months into the contract) to Dave (unrelated and who will suffer no economic hardship upon John's death) for $20,000.

John's adjusted basis in the contract is equal to the total premiums paid, less charges for the provision of insurance before the sale. Thus, there generally would be no tax basis in a term policy except in this example provided by the IRS, John technically had insurance coverage for 89.5 months, and so he received the benefits from $44,750 ($500 x 89.5) of premium coverage but paid $45,000 in premiums, thereby creating a basis of $250.

Contract Sales Price:	$20,000
Contract Basis	< 250>
Capital Gain:	$19,750

In this case since the term life insurance contract had no cash surrender value, no inside build-up to which the substitute for ordinary income doctrine could apply. Thus, the entire gain is a long-term capital gain.

Disposition of a Contract by the Purchaser - Rev Ruling 2009-14 explains the tax treatment of the death benefits paid to a purchaser of a life settlement insurance contract or the resale of a contract.

Death Benefits – Dave purchased a term insurance contract from the policy holder John for $20,000. Dave continued to make the $500 per month premium payments on the contract. Dave had no insurable interest in John's life and, except for the purchase of the contract, Dave had no relationship to John and would suffer no economic loss upon John's death and purchased the contract with a view to profit.

Dave continued to make the $500 monthly payments (totaling $9,000) on the contract up to the time of John's death and received $100,000 in death benefits.

Death Benefits:		$100,000
Contract Purchase Price:	$20,000	
Additional Premiums Paid:	9,000	
Contract Basis		<29,000>
Total Profit (ordinary income):		$71,000

Neither the surrender of a life insurance or annuity contract nor the receipt of a death benefit from the issuer under the terms of the contract produces a capital gain. Accordingly, the $71,000 income recognized by Dave upon the receipt of death benefits under the contract is ordinary income.

Resells the Contract – The facts are the same as the receipt of death benefits (above), except that John did not die and Dave sold the contract to Alan (a person unrelated to John or Dave) for $30,000.

Contract Sales Price:		$30,000
Contract Purchase Price:	$20,000	
Additional Premiums Paid:	9,000	
Contract Basis		<29,000>
Total Profit (capital gain):		$1,000

Since the contract represented a capital asset in Dave's hands, the character of income recognized is a capital gain.

VIATICAL SETTLEMENTS

Any amounts received under a life insurance contract on the life of a **terminally ill** individual are excluded from gross income. Amounts received under a life insurance contract by **chronically ill** individuals are also excluded from gross income if certain requirements are satisfied. Similar exclusions apply when the amounts are received as a result of a sale or assignment of the life insurance contract to a viatical settlement provider.

Special Requirements for Chronically Ill Individuals – The nontaxable part of any amounts received under a life insurance contract on the life of an individual who is chronically ill is limited to the cost of qualified long-term care services.

Definitions:

Terminally Ill Individual - the term "terminally ill individual" means a person who has been certified by a physician as having an illness or physical condition that reasonably can be expected to result in death within 24 months of the date of certification.

Chronically Ill Individual – a "chronically ill" individual is one who has been certified within the previous 12 months by a licensed health care practitioner as:

(A) being unable to perform, without "substantial assistance" from another individual, at least two activities of daily living for at least 90 days due to a loss of functional capacity,

(B) having a similar level of disability as determined under IRS regs prescribed in consultation with the Dept of Health and Human Services, or

(C) requiring "substantial supervision" to protect the individual from threats to health and safety due to "severe cognitive impairment," even if the individual is physically able.

DEATH SETTLEMENTS

Amounts received under a "life insurance contract" that are paid by reason of the insured's death aren't included in the gross income of the recipient (i.e., beneficiary) unless the policy was transferred for value – see "life settlements" above. The exclusion applies to lump sum payments made at the time of the insured's death, and to amounts paid later to the extent the payment doesn't exceed the amount payable at death.

Payments made under life insurance or endowment contracts before the death of the insured (e.g., loans, refunds, dividends) generally are treated as amounts "not received" under an annuity contract and are fully taxable if received *on or after* the annuity starting date. "Non-annuity" amounts received *before* the annuity starting date are:

(1) *Not taxable,* to the extent that, as of the date of distribution, they don't exceed the cost of the contract (i.e., accumulated net premiums paid) and

(2) *taxable,* to the extent allocable to income (i.e., excess of the contract's cash value over the owner's investment) at that time.

Veteran's insurance dividends are tax-free, regardless of the policy's cost.

INFORMATION REPORTING RULES

The TCJA of 2017 added new IRC Section 6050Y information reporting rules for "reportable policy sales" of life insurance contracts and "reportable death benefits" paid after December 31, 2017. The IRS issued proposed regulations, NPRM REG-103083-18, in late March 2019 that include transitional guidance delaying any reporting until final regulations are issued. A reportable policy sale is the direct or indirect acquisition of an interest in a life insurance contract, if the acquirer has no substantial family, business, or financial relationship with the insured other than the acquirer's interest in the life insurance contract. A reportable death benefit is any amount paid by reason of the death of the insured under a life insurance contract that has been transferred in a reportable policy sale.

Under new Sec 6050Y(a)(1), any person who acquires a life insurance contract or any interest in a life insurance contract in a reportable policy sale during a tax year must file a return for the tax year (at the time and in the manner as the Secretary of the Treasury shall prescribe) that includes the:

- Name, address, and TIN of the reporting person and of each recipient of payment in the reportable policy sale;
- Date of the sale;
- Name of the issuer of the life insurance contract sold and the policy number of the contract, and
- Amount of each payment (defined in Sec 6050Y(d)(1) as the amount of cash and the fair market value of any consideration transferred in any reportable policy sale).

In addition, the person required to file the return must furnish to each person named in the return a written statement showing (1) the name, address, and phone number of the information contact of the person required to make the return, and (2) the information required to be shown on the return with respect to such person (except that in the case of an issuer of a life insurance contract, the statement is not required to include the amount of each payment). (Code Sec 6050Y(a)(2))

There is also a requirement that the life insurance company, upon receipt of the statement described above or upon notice of a transfer of a life insurance contract to a foreign person, must file an information return that reports the name, address and TIN of the seller who transfers an interest in the contract, the seller's investment in the contract and the policy number of the contract. (Code Sec 6050Y(b)(1))

Every person required to file a return reporting the seller's basis must furnish to each person whose name is required to be reported in the return a written statement showing (1) the name, address, and phone number of the information contact of the person required to file the return, and (2) the information required to be shown on the return with respect to each seller whose name is required to be set forth in the return. (Code Sec 6050Y(b)(2))

The IRS has developed two new forms, 2019 version shown below, for these Sec 6050Y filing requirements: 1099-SL, Reportable Life Insurance Sale, and 1099-SB, Seller's Investment in Life Insurance Contract..

CALIFORNIA DIFFERENCES

California follows Federal taxation rules.

INTEREST TRACING RULES

How to treat interest expense for tax purposes is sometimes complicated. The simple answer is that it depends on the character of the interest. That is, we know personal interest is not deductible while business interest is. The character of the interest depends on the character of the loan and the character of the loan depends on what the loan proceeds were spent on. In other words the use of the loan funds must be "traced". If the loan was used for personal purposes, like funding a cruise, the character of the loan is personal and may not be deducted (Section 163(h)(1)). If the funds were used for purchase of a business car (assume 100%) or for funding working capital in a business, the interest is business and is deductible (Section 163(a) & Section 162).

In the same way, if a taxpayer borrows money secured by rental #1 and uses the loan proceeds to purchase rental #2, then the character of the interest would be related to and deductible on the Schedule E of rental #2. If loan proceeds are used to buy stocks and bonds, then the interest paid is allocable to purchase of the securities and therefore becomes investment interest.

Related IRS Publications and Other References

- Reg. Sec. 1.163-8T (the IRS has never issued final regulations)
- Big Book of Taxes Chapter 6.02 – Higher Education Interest
- Big Book of Taxes Chapter 7.05 – Home Mortgage Interest
- Big Book of Taxes Chapter 7.07 – Investment Interest

One of the more complicated, misunderstood and often overlooked tax issues is this concept of interest tracing. The income tax regulations refer to it as "allocation" of debt and interest. Though the concept is straightforward, it can get complicated. The tracing rules are generally summed up as follows:

> *In general, interest expense on a debt is allocated in the same manner as the debt to which such interest expense relates is allocated. Debt is allocated by tracing disbursements of the debt proceeds to specific expenditures. This section prescribes rules for tracing debt proceeds to specific expenditures. (Reg Section 1.163-8T(a)(3))*

Interest expenses generally fall into commonly understood categories, and the treatment of the interest for tax purposes depends upon which category it falls into:

1. **Personal interest** – Not deductible says Section 163(h)(1);
2. **Trade or business interest -** Generally deductible under Section 163(a) and Section 162**;**
3. **Investment interest –** Generally deductible under Section 163(a) and Section 212(1) and/or (2) but investment interest is limited, however, by Section 163(d) to net investment income;
4. **Interest related to a passive activity**, which is taken into account under Section 469 in computing income or loss from a passive activity.
5. **Qualified residence interest** within the meaning of Section 163(h)(3);
6. **Educational loans. –** Any interest paid on educational loans and allowable as a deduction under Section 221. (Note that educational loans are personal and would not be deductible because of Section 163(h)(1) were it not for Section 221.)

Home Equity Debt – Interest on home equity debt is suspended for years 2018-2025. But there is an opportunity to trace the use of the home equity debt to another deductible purpose such as investment or business. How this is accomplished was changed by TCJA. The following explains how it was handled pre-TCJA (and supposedly after 2025 when the suspension of the home equity debt interest deduction expires) and during the years 2018 through 2025 while the suspension is in place.

- Pre-TCJA - Under the pre-TCJA law the interest on the first $100,000 of equity debt secured by a taxpayer's home had to be deducted as "qualified residence interest" (home mortgage interest) regardless of how the funds were used **unless** the election to unsecure the debt under regulation Section 1.163-10T9(o)(5) was made.

> ***CAUTION:*** *If before the passage of TCJA (before 2018) a taxpayer had utilized the unsecured election, that election is irrevocable without IRS consent and thus the loan continues to be treated as unsecured, and since home acquisition mortgage debt is defined as being secured by the home, none of the interest allocated to home acquisition mortgage debt is deductible on Schedule A or anywhere else.*

- *2018 through 2025* - For 2018 through 2025, the interest tracing rules can be applied to **ALL** debt secured by the home – both home acquisition debt and equity debt – since home equity interest is suspended during that period. That means there is no need to use the unsecured election, since all the interest on a refinanced loan (secured by the home), both home acquisition and excess debt, can be traced to the use of the loan proceeds.

  Example – 2018 through 2025: A home has an existing home acquisition debt balance of $40,000 and the taxpayer refinances the home for $200,000. The $40,000 portion of the refinanced debt continues to be home acquisition debt and thus 20% ($40,000/$200,000) x 100)) of the interest on that portion of the refinanced mortgage is deductible on Schedule A. The deductibility of the balance of the interest (80%) depends (is traceable) to the use of the $160,000 proceeds from the refinance.

Special Issues:

- *Home Equity Line of Credit (HELOC)* – Just because banks refer to them as equity debt does not mean the interest on a HELOC loan is not traceable to purposes other than non-deductible personal interest. Like any other debt the use of the loan proceeds determines if the interest on the loan is deductible and where it is deducted. Thus, it is possible for the interest on a HELOC loan to be home acquisition interest, business interest, investment interest, personal interest, etc.
- *Debts Traced to the Purchase of Tax Exempt Securities* – The interest on loan proceeds used to acquire tax exempt securities is non-deductible investment interest. This rule also applies to any interest paid on a loan to produce any tax-exempt income (Sec 265).
- *Higher Education Loans* - If a student loan is not subsidized, guaranteed, financed, or is not otherwise treated as a student loan under a program of the Federal, state, or local government or an eligible educational institution, a payee (lender) must request a certification from the payor (borrower) that the loan will be used solely to pay for qualified higher education expenses (Reg.1.6050S-3(e)(2)). Form W-9S, Request for Student's or Borrower's Social Security Number and Certification, is used for this purpose. See chapter 6.02 for more on higher education loan interest.

Examples: The best way to understand the tracing rules is by example. The following are a variety of situations to help understand the application of the tracing rules.

- **Example 1:** A taxpayer takes out a loan secured by his rental property and uses the proceeds to finance a European vacation. The use of the funds was to pay for a vacation and thus the interest on the loan is non-deductible personal interest expense.
- **Example 2:** A taxpayer refinances an existing loan ($150,000 amortized balance) secured by his rental property for $200,000 and uses the excess proceeds to buy for $50,000 a car for personal use. The taxpayer must trace the use of the refinanced loan proceeds ("allocate the proceeds") to the portion used to pay off the existing amortized rental loan of $150,000 and the $50,000 portion, used to purchase the car. The loan interest expense is then proportionally allocated between rental interest ($150,000/$200,000) and personal interest ($50,000/$200,000) for the purchase of the car. So 75% ($150,000/$200,000) is related to the rental property and is deductible on Schedule E and 25% ($50,000/$200,000) is non-deductible personal interest. **Note:** it does not matter that the new loan is secured by the business property; the interest allocated to the personal use of the loan proceeds is not deductible.
- **Example 3:** The taxpayer borrows $50,000 secured by his home to be used as working capital in his consulting business. He has no other debt on his home. He deposits the $50,000 into a checking account that's devoted to his business, and he uses the money in that account only for his business.
  - *For years before 2018 and after 2025* – He must deduct the interest as home equity debt interest on his Schedule A since the debt is secured by his home and the debt is less than the $100,000 limit for equity indebtedness. However, the election to unsecure the debt from the home could have been used, in which case the interest on the debt would have been traceable to the use of the loan proceeds.
  - *For 2018 through 2025*– He must trace the use of the funds and since the loan proceeds were used in his business, the interest is an expense of the business.
- **Example 4:** The taxpayer wants to acquire an additional rental so she refinances one of her existing rentals to obtain the down payment. Here the tracing rules are used to trace the use of the funds. The interest on the refinanced loan must be allocated between the portion of the refinanced debt used to refinance the existing rental loan and the portion of the debt used to acquire the new rental. Thus, the interest is proportionally allocated between the two rentals

- **Example 5:** The taxpayer owns a rental property and wants to purchase a personal residence. So he obtains a loan on the rental to refinance the existing amortized acquisition debt of $40,000 and to purchase the personal residence for $160,000. Under the tracing rules the taxpayer must trace the use of the refinance proceeds to its uses. Since $40,000 of the new debt was used to pay off the debt related to the rental property, the character of $40,000 of the new debt takes on the same character as the old debt. The $160,000 balance of the refinance proceeds is traced to the purchase of the taxpayer's home. However, the definition of home acquisition loan debt requires the debt to be secured by the home, which it is not. Thus the interest on the $160,000 portion of the refinanced debt is not deductible.

- **Example 6:** The taxpayer wants to purchase a lot and build a rental on it. He plans to purchase the lot with cash savings and then build the house with a construction loan. Once the construction is complete he intends to refinance the construction loan with a take-out loan and use part of the debt to restore the savings account for the funds used to purchase the lot. Under the tracing rules he must trace the interest based upon the use of the refinanced loan proceeds. The portion of the loan used to refinance the construction loan can be traced to the rental, and thus is deductible as rental interest. The portion reimbursing the taxpayer for the cost of the lot must be traced to the use of those funds, and assuming the taxpayer banked those proceeds, that portion of the interest would be treated as investment interest.

- **Example 7:** The taxpayer borrows $20,000 on a margin account held by his broker. He uses the $20,000 to buy additional securities. The interest he pays on the margin account is treated as investment interest.

- **Example 8:** Taxpayer purchases a property he intends to use as a rental. The property is in such bad condition that he cannot obtain a loan. So, he purchases it with cash from his savings and fixes up the property, also using cash from his savings. When the work is complete, and the property is available for rent, he finances the rental and deposits the proceeds in his savings account. Following the tracing rules, we trace the use of funds to determine if the interest is deductible and where. In this case funds were deposited in the taxpayer's savings account and as a result the interest on the loan becomes investment interest.

  But that is not the end of the story. Since the proceeds of the loan are now in the taxpayer's savings account, if he subsequently uses some of those proceeds (takes money out of the savings account) and uses it for another purpose, we again have to trace the use of the savings withdrawal to follow the money. If used for a personal purpose the interest on that portion of the loan is not deductible. If used for a business purpose then the interest on that part of the original loan would become business interest.

  As you can imagine, this would become a tracing recordkeeping nightmare.

- **Example 9 - Special rule that only applies to first and second homes:** The taxpayer has an opportunity to purchase a home in a quick sale and does not have time to obtain financing and make the purchase with cash. Then after escrow has closed, he obtains financing for the home. Notice 88-74 states that where a taxpayer is purchasing a residence the debt may be treated as incurred to acquire the residence ("acquisition debt") to the extent of expenditures to acquire the residence made within 90 days before or after the date that the debt is incurred.

See chapter 7.05 for additional examples where debt secured by the home is used for other purposes.

CALIFORNIA DIFFERENCES

California conforms to the interest tracing rules. However, California has not conformed to the TCJA provision that home equity debt interest is not deductible as mortgage interest for 2018-2025.

NOTES

TCJA

QUALIFIED OPPORTUNITY FUNDS

Overview

The TCJA created new code Sections 1400Z-1 and 1400Z-2 related to qualified opportunity zones (QOZ), which are intended to promote investments in certain economically distressed communities through qualified opportunity funds (QOF). Tax incentives were included in the legislation to encourage investment in these funds.

- Form 8996 - Qualified Opportunity Fund
- Form 8949 – Sales and Other Dispositions of Capital Assets

The Details

Reinvesting Gain – Starting in 2018, a taxpayer who has a capital gain on the sale or exchange of any property to an unrelated party may elect to defer, and potentially partially exclude, the gain from gross income if the gain is reinvested in a QOF within 180 days of the sale or exchange. Only one election may be made with respect to a sale or exchange. If less than the full amount of the gain is reinvested in the QOF, the part not reinvested is taxable as usual in the sale year. Unlike Sec 1031 deferrals, the amount of the gain, not the amount of the proceeds of sale, is what needs to be reinvested in order to defer the gain.

Making the Election – According to the instructions of the 2018 Form 8949, when electing to defer the gain on an eligible asset, report the sale as usual on Form 8949, and then report the deferral of the eligible gain on its own row of Form 8949 (Part I with box C checked if short-term gain or Part II, box F, if long-term gain). If multiple investments were made in different QOFs or in the same QOF on different dates, a separate row needs to be used for each investment. If eligible gains of the same character (i.e., ST or LT) but from different transactions on the same date were invested in the same QOF, these can be grouped on the same row. In column (a), enter only the EIN of the QOF into which the investment was made and in column (b), enter the date of the investment. Leave columns (c), (d) and (e) blank, and enter code Z in column (f) and put the amount of the gain being deferred as a negative number in column (g).

There is no need to trace or allocate the funds invested in a QOF to the specific gain being deferred, but the QOF investment must have occurred within the 180-day period beginning on the date the deferred gain was realized. If both short-term and long-term gains were realized during the 180-day period the taxpayer can choose how much of each gain to defer by reporting the deferral in Part I or Part II, as applicable. The character of the eligible gain transfers to the investment in the QOF so that when the eligible gain is recognized, the gain recognized will be the same character as the gain deferred.

Deferral Period - The gain income is deferred until the earlier of the date the investment in the QOF is sold or December 31, 2026. If the taxpayer continues to hold the investment after December 31, 2026, the taxpayer still has to include the deferred gain in the 2026 tax return. If that is the case, the gain reported in 2026 adds to the basis of the QOF.

Qualified Opportunity Fund Basis - To the extent the QOF is purchased with the deferred gain, the basis in the QOF is zero. Then when the QOF is sold, the deferred gain subject to tax is the excess of the lesser of (a) or (b), below, over the QOF's basis (or enhanced basis (explained next), if applicable):

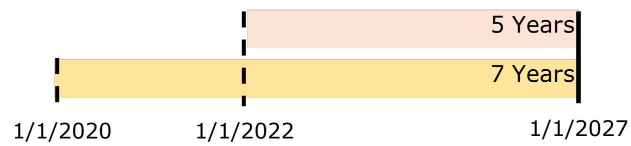
(a) The deferred gain, or

(b) The fair market value of the investment as determined at the end of the deferral period.

Enhanced Basis – If the taxpayer holds the QOF for 5 years, the basis of the QOF investment is increased by 10% of the deferred gain, and if held for 7 years, the basis is increased by an additional 5%, for a cumulative increase of 15%. In other words, if held at least 5 years, 10% of the original gain is excluded, or if held 7 years, 15% of the original gain is excluded. When the deferred gain is included in income – either as of 12/31/2026 or when sold, if before 12/31/2026 –the amount of the deferral that is taxable also increases basis. (IRC Sec.1400Z-2(b)(2)(B)(ii))

Example 1: Phil sold a rental apartment building June 30, 2018 for $3 million, which resulted in a gain of $1 million. He invests the $1 million within the statutory 180-day window into a QOF and elects the temporary gain deferral exclusion. On July 1, 2026 the QOF is sold for $1.5 million. Since Phil had held the investment over seven years, his basis is enhanced by $150,000 (15% of $1 Million). The deferral period ends on the date of sale since the investment is sold before 12/31/2026. The deferred gain that will be included in Phil's 2026 income is $850,000 ($1,000,000, which is the lesser of the deferred gain or the FMV of the QOF on the sale date, less basis of $150,000). The $850,000 reportable deferred gain then increases his basis back to $1 million, and so the difference between the sales price of $1.5 million and $1 million, or $500,000, is a long-term capital gain. Thus, the total gain that's taxable is $1.35 million.

CAUTION: Because only gains incurred before 2027 can be deferred, the clock is ticking on the extra 5% basis increase, since the gain must be incurred before 1/1/2020 (see adjacent diagram). That means gains incurred after 2019 will not qualify for the 5%. In addition, to qualify for 10% basis adjustment the gain must be incurred before 2022 meaning gains after 2021 will not qualify for the 10% basis adjustment.



10 Year Election - If the QOF is held for 10 years or longer before it is sold, the taxpayer can elect to increase the basis to the fair market value amount. The effect of this adjustment is that none of the appreciation since the QOF was purchased is taxable when it is sold. This provision applies only to the investment in the QOF that was made with deferred capital gains. (Prop. Reg. 1.1400Z-2(c)-1(a))

All qualified opportunity zones now in existence will expire on December 31, 2028. So after the relevant qualified opportunity zone loses its designation, will investors still be able to make a basis step-up election for QOF investments from 2019 and later? Yes, according to proposed regulations. Although the statute doesn't so specify, the proposed regulations would permit taxpayers to make the basis step-up election under section 1400Z-2(c) after a qualified opportunity zone designation expires for dispositions of QOFs up to December 31, 2047. (Prop. Reg. 1.1400Z-2(c)-1(b))

Example 2: Same facts as Example 1, except Phil didn't sell the QOF until 2030, having held it nearly 12 years. Since he had the investment on December 31, 2026, he was required to include $850,000 ($1 million – ($1 mil x 15%)) of deferred gain on his 2026 return, and his basis in the QOF was increased from zero to $850,000. The QOF's sale price was $1.5 million. Phil elects to permanently exclude the gain by increasing his basis to $1.5 million, the fair market value at the date of sale. Thus, there is no gain ($1.5 mil – $1.5 mil).

Mixed Investments – Investment in a QOF isn't limited to deferred capital gain from the sale of another asset; a taxpayer can purchase an interest in a QOF with other funds. Where a taxpayer's investment in a QOF consists of both deferred gain and additional investment funds, the investment is treated as two separate investments with the tax benefits of both the gain deferral election and the 10-year gain exclusion election applying only to the deferred gain portion.

Qualified Opportunity Funds (QOF) – To take advantage of the tax deferral of gains available from the TCJA-enacted opportunity zone program, taxpayers must invest in a QOF, which is any investment vehicle which is organized as a corporation or a partnership for the purpose of investing in qualified opportunity zone property (other than another qualified opportunity fund) acquired after December 31, 2017. The fund must hold at least 90% of its assets in qualified opportunity zone property, determined by the average of the percentage of qualified opportunity zone property held in the fund on the last day of the first 6-month period of the fund's tax year and on the last day of the fund's tax year. Taxpayers may not invest directly in QOZ property.

Partnerships – Because the basis of the QOF purchased with deferred capital gains is zero, taxpayers that invest in QOFs organized as a partnership may be limited in deducting losses that may be generated by these partnerships.

Qualified Opportunity Zones (QOZ) – These are population census tracts that are low-income communities that are specifically designated as QOZs after being nominated by the governor of the state or territory in which the community is located. After the governor notifies the Treasury Secretary in writing of the selected QOZs, the Treasury Secretary must certify the community as a QOZ. Qualified opportunity zones retain this designation for 10 years. More information about QOZs and a link to a list of designated opportunity zones is available at https://www.cdfifund.gov/Pages/Opportunity-Zones.aspx.

More Details to Come - The Treasury Department and the IRS will be providing further details, including additional legal guidance on this new incentive in the coming months. See also: https://www.irs.gov/newsroom/opportunity-zones-frequently-asked-questions

The following are selected and sometimes reworded excerpts from the IRS Q&As modified for the current year:

Question: I sold stock for a gain in 2019 and during the 180-day period beginning with the date of the sale, I invested the amount the of the gain in a QOF. Can I defer paying tax on that gain?

Answer: Yes, you may elect to defer the tax on the amount of the gain invested in a Qualified Opportunity Fund. Therefore, if you only invest part of your gain in a Qualified Opportunity Fund(s), you can elect to defer tax on only the part of the gain which was invested.

Question: How do I elect to defer my gain on the 2019 sale of stock?

Answer: You may make an election to defer the gain, in whole or in part, when filing your 2019 Federal Income Tax return. That is, you may make the election on the return on which the tax on that gain would be due if you do not defer it. For additional information, see How to Report an Election to Defer Tax on Eligible Gain Invested in a QO Fund in the Form 8949 instructions.

Question: Can I elect to defer tax on gain if I already filed my tax return?

Answer: Yes, but you will need to file an amended return, using Form 1040-X and attaching Form 8949.

Question: I deferred gain into a QOF and now the QOF has dissolved before the end of my deferral period. What happens to my deferred gain?

Answer: When the QOF dissolved, the deferral period ended, and you must include the deferred gain when you file your return, reporting the gain on Form 8949.

Question: I deferred a gain into a QOF and then gave the investment to my children before the end of the deferral period. Is there anything I need to do?

Answer: Yes, the deferral period ended when you gave away the QOF investment. You must include the deferred gain when you file your return for the year of the gift, reporting the gain on Form 8949.

> **Note**: Inheritance by a surviving spouse is not a taxable transfer, nor is a transfer, upon death, of an ownership interest in a QO Fund to an estate or a revocable trust that becomes irrevocable upon death.

Question: Can I defer section 1231 capital gains net income for a taxable year into a QOF

Answer: Yes, if a taxpayer's section 1231 gains for any taxable year exceed the section 1231 losses for that year, the net gain is long-term capital gain. A taxpayer can elect to defer some or all of this capital gain under section 1400Z-2 by making an investment of a corresponding amount in a Qualified Opportunity Fund (QOF) during the 180-day period that begins on the last day of the taxpayer's taxable year.

Question: Can I transfer property other than cash as an investment in a QOF?

Answer: Yes. A taxpayer can transfer property other than cash as an investment to a QOF. However, a transfer of non-cash property may result in only part of the investment being eligible for opportunity zone tax benefits, so that not all of the taxpayer's capital gain is able to be deferred. See proposed regulations §1400Z2(a)-1(b)(9) & (10).

Question: When I transfer property to a QOF, does my holding period of the property also transfer to the QOF?

Answer: No. The opportunity zones tax incentives provisions determine a taxpayer's holding period in a qualifying investment in a QOF without regard to the holding period of the cash or other property transferred to the QOF.

Question: I made an investment in a QOF. After holding it for at least 10 years, I sell or exchange it. Can I adjust the basis to fair market value?

Answer: Yes, but only if you made the investment in connection with a proper deferral election. Also, the election must have remained in effect until that post-10-year sale or exchange. The election didn't cease to be in effect solely because – on December 31, 2026 – the law requires you to include in your income the gain that you had deferred under that election.

Question: I had ordinary gain from the sale of property in 2018. During the 180-day period beginning on the date of the sale, I invested the amount of that gain in a QOF. In 2029, I sell my interest in the QOF. Can I adjust my basis to fair market value?

Answer: No. Because the gain wasn't capital gain, you can't elect to defer it. So, your investment in the QOF wasn't made in connection with a proper deferral election. For this reason, the basis adjustment to FMV isn't available for that investment.

Question: What is a Qualified Opportunity Fund?

Answer: A Qualified Opportunity Fund is an investment vehicle that files either a partnership or corporation federal income tax return and is organized for the purpose of investing in Qualified Opportunity Zone property.

Question: How does a corporation or partnership become certified as a Qualified Opportunity Fund?

Answer: To become a Qualified Opportunity Fund, an eligible corporation or partnership self-certifies by filing Form 8996, Qualified Opportunity Fund, with its federal income tax return. For additional information, see Form 8996 and its instructions. The return with Form 8996 must be filed timely, taking extensions into account.

Question: Can a limited liability company (LLC) be an Opportunity Fund?

Answer: Yes, a LLC that chooses to be treated either as a partnership or corporation for federal tax purposes can organize as a Qualified Opportunity Fund.

Question: When is tangible property "original use" tangible property?

Answer: Tangible property is original use on the date first placed in service in the qualified opportunity zone for purposes of depreciation or amortization. Used tangible property satisfies the original use requirement if the property has not been previously placed in service in the qualified opportunity zone.

Question: Can inventory in transit be "Qualified Opportunity Zone business property"?

Answer: Yes, inventory of a QOF, including raw materials, does not fail to be "used in a Qualified Opportunity Zone" solely because the inventory is in transit from a vendor to the QOF or from the QOF to a customer.

Question: What is the 50-percent-of-gross-income test?

Answer: A Qualified Opportunity Zone business must earn at least 50 percent of its gross income from business activities within a QOZ. It must do so for each taxable year. The proposed regulations provide three safe harbors that a business may use to meet this test. These safe harbors are the:

- Hours-of-services-received test.
- Amounts-paid-for-services test.
- Necessary-tangible-property-and-business-functions test.

Question: Must a Qualified Opportunity Zone business meet all three safe harbors to satisfy the 50-percent-of-gross income test?

Answer: No. It's enough for a QOZ business to satisfy just one safe harbor.

For example, 50 percent or more of all the hours of services that a business receives and uses were performed in one or more QOZs. This business satisfies the hours test and, therefore, the 50-percent-of-gross-income test.

Second example, a QOF owns a business that operates in multiple QOZs. The business received and used 100,000 hours of services during the year. Of those:

- Employees spent 25,000 hours in QOZ 1.
- Independent contractors spent 20,000 hours in QOZ 2.
- Employees of independent contractors spent 10,000 hours in QOZ 3.
- The remaining 45,000 hours were outside of a QOZ.

This business satisfies the hours test and therefore the 50-percent-of-gross-income-test. The aggregate hours of services in QOZs during the tax year were at least 50 percent of all hours of services obtained by the business in all locations.

At publication the states that have not yet conformed to the OZ program, include: California, Arizona, Hawaii, Massachusetts, Minnesota, North Carolina and Pennsylvania.

CALIFORNIA DIFFERENCES

Sec 1400Z-1 allows each Governor to designate up to 25% of census tracts that either have poverty rates of at least 20% or median family incomes of no more than 80% of statewide or metropolitan area family income. There are 3,516 census tracts in 54 California counties that would qualify under one or both of the mandatory criteria, which allowed Governor Brown to designate up to 879 tracts. After he did so the U.S. Department of the Treasury certified those 879 tracts as qualified opportunity zones.
http://dof.ca.gov/Forecasting/Demographics/opportunity_zones/

California has not conformed to the tax benefits of QOZs, so any deferred gains reinvested under this program will be taxable in the sale year for California, and the basis of the investment in a QOF will be different for federal and state.

SELF-EMPLOYMENT ISSUES

This chapter is devoted to several issues that apply to self-employed individuals. However, there are many other issues pertaining to self-employed taxpayers that are covered elsewhere in this text; they are listed below and cross-referenced to the applicable chapter:

RAPID FINDER

UBER DRIVER TAX TREATMENT

This analysis does not address the potential employee/independent contractor issue related to Uber divers; it only deals with the tax treatment of drivers who are independent contractors.

How Uber Works – Each fare (customer) establishes an account with Uber using a credit card, Paypal, or other method. The fare uses the Uber app to request a ride, and an Uber driver picks up that person and takes him or her to the destination. Generally, no cash money changes hands, as Uber charges the fare's credit card (CC), deducts both its fee and the credit card processing fee and deposits the net amount into the driver's bank account.

Uber Reporting – Uber issues each driver a Form 1099-K reflecting the total amount charged for the driver's fares. Because the IRS will treat the 1099-K as gross business income, it must be included on line 1 (gross income) of the driver's Schedule C before adjusting for the CC and Uber fees. The net amount that Uber deposits into the driver's bank account reflects the fares minus the CC charges and the Uber fee. Thus, the sum of the year's deposits from Uber can be subtracted from the 1099-K amount, and the difference can be taken as an expense or as a cost of goods sold. Currently, a third party operates the billing, coordinates the drivers' fares and issues the drivers' 1099-Ks.

Uber also provides an online statement to its drivers detailing the miles driven with fares, and the dollar amount for both the fares and the bank deposits.

Automobile Deductions – Although the Uber statement mentioned above includes the miles driven for each fare, this figure only represents the miles between a fare's pickup point and delivery point. It does not reflect the additional miles driven between fares. Drivers should maintain a mileage log to track their total miles and substantiate their business mileage.

Luxury Auto Rules – *Regulation 1.280F-6(c)(3)(ii) exempts from the luxury auto rules any vehicle used by a taxpayer directly in the trade or business of transporting persons or property for compensation or hire.*

Tips – As originally designed, tips were supposedly included in the fare charged by Uber, but it was not uncommon for a driver to receive additional cash tips. These should be included in Schedule C gross income. Beginning in July 2017, fares may add a tip via the Uber app or they may continue to pay tips by cash. Presumably the on-app tips will be included in the gross income on the 1099-K issued by Uber. Care should be taken that tip amounts are properly reported – neither double-counted nor omitted on Schedule C.

Business Use of the Home – When deciding whether an Uber or Lyft driver qualifies for a home office deduction, remember the home office must be used **exclusively** in a taxpayer's trade or business on a **regular**, continuing basis. A taxpayer must be able to provide sufficient evidence to show the use is regular. Exclusive use means there can be no personal use (other than de minimis) at any time during the tax year. Use of only a portion of a room is acceptable as long as the taxpayer shows that section is totally for business. The office must also be the driver's **principal place of business.**

Both Uber and Lyft provide their drivers with detailed accounting information (see Uber reporting above). The only additional record keeping required is the miles traveled between fares and that is accomplished while in the vehicle. So justifying a home office is problematic. Without a qualified home office, the distance to pick up the first fare and the distance to return home at the end of the shift would be considered nondeductible commuting.

Some would contend that a portion of the garage where the vehicle is parked could be used toward a business use of the home deduction. Remember, the use must be exclusive, which means the vehicle must be used 100% for business. Since the distance between home and the first and last fares is commuting, it is not realistic to believe that the vehicle is never used for personal purposes and justifying business use of the home for garage parking is also challenging.

Neither the courts nor the IRS have provided any specific guidance on this subject related to Uber drivers, so it is up to the tax practitioner to make the determination on a case-by-case basis.

Deductions Other Than the Vehicle – Possible other deductions might include:

- Cell phone service, prorated if the phone isn't used 100% for Uber activity
- Liability insurance
- Water for the fares

Lyft is a competitor to Uber, and they operate in a manner similar to Uber.

PAYMENT CARD AND THIRD-PARTY PAYMENT TRANSACTIONS (Code Sec 6050W)

Payment settlement entities (e.g., a bank) have to make an annual information report in settlement of reportable payment transactions (e.g., a credit or debit card transaction) and transactions settled through third-party payment networks, such as third-party organizations (e.g., PayPal or Google Pay (previously Google Wallet)) that settle online transactions to the merchant **and** the IRS stating the gross amount paid to the merchant during the previous calendar year. Form 1099-K is used for this reporting.

We can probably expect IRS to develop statistics for various types of businesses related to the ratio of cash payments to credit payments as a means of imputing cash payments for merchants that do not report a reasonable amount of income over and above that reported by the payment processors.

Continue to next page

TIGTA Report: IRS is Underutilizing Form 1099-K Data to Identify Tax Returns for Audit
According to a September 2017 report from the Treasury Inspector General for Tax Administration (TIGTA), an IRS pilot program that used merchant card third-party reporting for the assignment of productive audits failed to detect the more obvious examples of noncompliance, and the IRS missed opportunities to audit tax returns with large discrepancies between payments reported on Forms 1099-K and the income reported on taxpayers' tax returns. The IRS generally agreed with recommendations made by TIGTA that the IRS consider implementing compliance projects to test the use of Form 1099-K data to identify certain types of tax returns for audit. TIGTA also recommended that the Service identify and address the reasons tax returns with large discrepancies between income reported on tax returns and the amounts reported on Forms 1099-K were not selected for audit or other treatment. The IRS disagreed with TIGTA as to the magnitude of the issues. (TIGTA Reference Number: 2017-30-083)

Currently, there is no requirement to separate the 1099-K amounts from cash receipts when entering gross income on Schedule C, E or F.

Payment Card - A payment card, as defined under the regulations, includes, but is not limited to, credit cards, debit cards, and stored-value cards (e.g., gift cards or similar cards with a prepaid value). A payment card also includes the acceptance as payment of any account number or other indicia associated with a payment card. A payment card issued in connection with a flexible spending arrangement or a health reimbursement arrangement is not exempted from the reporting requirements. The final regulations also clarify that the withdrawal of cash from an automated teller machine and the use of a payment card to obtain a loan or cash advance do not constitute payment card transactions. (Reg. 1.6050W-1(b))

Backup Withholding – If a merchant fails to provide his correct tax ID number and other required information for reporting, the merchant may be subject to a 24% (28% before 2018) backup withholding on any payments forwarded to the merchant. The backup-withholding requirement began after 12/31/2012. The lower 24% rate is a result of the revised tax brackets in the TCJA of 2017. (Notices 2011-88 and 2011-89) The lower 24% rate is a result of the revised tax brackets in the TCJA of 2017. Backup withholding that was made is reported in box 4 of the 1099-K.

On-line Business Transactions – If clients sell their merchandise through eBay accounts or other on-line businesses, they can expect transactions for those accounts to be reported.

Exception: No reporting is required by a third-party settlement organization with regard to a specific business unless the aggregate payments to the business from third-party network transactions exceed $20,000 and the aggregate number of transactions is 200 or more in the calendar year. This exception does not apply to payments in settlement of payment card transactions.

REPORTING CASH PAYMENTS OF OVER $10,000

As part of the Financial Crimes Enforcement Network (FinCEN) efforts to combat money laundering and to detect tax evasion, terrorist financing and drug dealings, business transactions of over $10,000 require the filing of Form 8300.

Who must file Form 8300? **-** Any persons who receive more than $10,000 while conducting their trade or business must file a Form 8300. The $10,000 may occur in a single transaction, or a series of related transactions.

What payments must be reported? **-** A business must file Form 8300 to report cash (U.S. or foreign coin and currency) paid to it if the cash payment is:

- Over $10,000,
- Received as:
  1. One lump sum of over $10,000,
  2. Two or more related payments that total in excess of $10,000, or
  3. Payments received as part of a single transaction (or two or more related transactions) that cause the total cash received within a 12-month period to total more than $10,000.
- Received in the course of trade or business,
- Received from the same buyer (or agent), and
- Received in a single transaction or in two or more related transactions.

What is and isn't cash? **–** U.S. and foreign coins and currency are cash, but a personal check is not considered cash for purposes of filing Form 8300. A cashier's check, money order, bank draft or traveler's check with a face amount of over $10,000 is **not** treated as cash (because the issuer of these instruments was required to file a separate Currency Transaction Report). However, certain payments of $10,000 or less made by cashier's check, money order, bank draft or traveler's check must be reported for retail sales of consumer durable goods, a collectible, a travel or entertainment activity *(Reg. § 1.6050I-1(c)(iii))* or if the recipient knows the payer is trying to avoid the transaction being reported on Form 8300.

What is the definition of a transaction? A transaction is the underlying event resulting in the transfer of cash. Examples include:

- Sale of goods, services or real or intangible property
- Rental of goods or real or personal property
- Cash exchanged for other cash
- Establishment, maintenance of or contribution to a trust or escrow account
- A loan repayment
- Conversion of cash to a negotiable instrument such as a check or a bond

What is a related transaction? Transactions between a buyer, or agent of the buyer, and a seller that occur within a 24-hour period are related transactions.

When and where to file? – Form 8300 must be filed by the 15th day after the date the cash was received (or the next business day if that date is a Saturday, Sunday, or legal holiday). The form is filed with the Internal Revenue Service, Detroit Computing Center, P O Box 32621, Detroit, MI 48232. Alternatively Form 8300 may be electronically filed using FinCEN's Bank Secrecy Act (BSA) Electronic Filing (E-Filing) System. More information is available at http://bsaefiling.fincen.treas.gov/main.html. In addition, a written or electronic statement must be given to each person named on a required Form 8300 by January 31 of the year following the calendar year in which the cash was received. The statement must show the business name and contact information, aggregate amount of reportable cash received, and that the information was furnished to the IRS.

FAILED BUSINESS EXPENSES

Rev Rul 67-12, 1967-1 CB 29 Jan. 1, 1967 allows ordinary and necessary expenses incurred in a trade or business in prior years and paid in the current year by a cash-basis individual to be deducted under section 162 even though the trade or business has been discontinued. Unfortunately, those expenses must be deducted on a Schedule C, which provides a very poor audit profile. Some practitioners attempt to hide these expenses on other forms and could run afoul of Cir 230 Sec 10.51(4), providing false or misleading information.

Voluntary payments of another's business expenses, where there is no legal obligation to pay them, are not deductible. This is true even though the payments are made to preserve the individual's reputation, credit or professional standing.

SPOUSES MAY ELECT OUT OF PARTNERSHIP RULES

A husband and wife who file a joint return may elect out of the partnership rules. Thus, when the election is made, a joint venture between them is not treated as a partnership for tax purposes.

All items of income, gain, loss, deduction, and credit are divided between the spouses according to their respective interests in the venture, and each spouse takes into account his or her respective share of these items as if they were attributable to a trade or business conducted by the spouse as a sole proprietor. Accordingly, each electing spouse will report his or her shares on the appropriate form, such as Schedule C.

Limited Scope - This rule does not apply to spouses who operate in the name of a state law entity (including a general or limited partnership or a limited liability company). The election can be made only for a business operated by spouses as co-owners that is, or should otherwise be, taxed as a partnership (whether or not there is a formal partnership).

A qualified joint venture means any joint venture involving the conduct of a trade or business if:

(1) The only members of the joint venture are a husband and wife,
(2) Both spouses materially participate in the trade or business, and
(3) Both spouses elect the application of this rule.

Notwithstanding other self-employment rules, each spouse's share of income or loss from a qualified joint venture is taken into account under the above rules in determining the spouse's net earnings from self-employment.

Similarly, each spouse's share of income or loss from a qualified joint venture is taken into account under the above rules in determining the spouse's net earnings from self-employment for purposes of the Social Security benefits rules. Thus, each spouse will receive credit for his or her self-employment tax contributions for purposes of receiving Social Security benefits. However, this rule is not intended to prevent allocations or reallocations, to the extent permitted under pre-2007 law, by courts or by the Social Security Administration of net earnings from self-employment for purposes of determining Social Security benefits of an individual.

Material Participation - Generally to qualify as materially participating in the activity, and therefore avoid loss limitations under § 469, 500 hours of participation are required during the year, or if participation is less than 500 hours, the taxpayers must provide substantially all of the participation.

Code § 761(f)(2)(B) says one of the requirements is that both spouses materially participate "within the meaning of § 469(h) without regard to paragraph (5) thereof". Paragraph (5) of 469(h) says "in determining whether a taxpayer materially participates, the participation of the spouse of the taxpayer shall be taken into account." So for this purpose, the spouse's participation is NOT taken into account. You would look at each spouse separately, i.e., as if each was operating a separate activity, and disregard the other spouse's involvement.

DEDUCTING START-UP AND ORGANIZATIONAL COSTS

Start-up costs include amounts paid or incurred to create an active trade or business or to investigate the creation or acquisition of an active trade or business. Organizational costs include the costs of creating a corporation or a partnership. These costs are generally capital expenses, but by election, can be deducted or amortized, starting with the month the active trade or business begins. The discussion in this section deals primarily with business start-up costs.

Election to Deduct Start-Up Costs **-** Taxpayers can elect to deduct up to $5,000 of start-up and $5,000 of organizational expenses in the first year of a business. Each of the $5,000 amounts is reduced by the amount by which the total start-up expense or organizational expense exceeds $50,000. Expenses not deductible in the first year of the business must be amortized over 15 years. *(IRC § 195)* If a taxpayer who incurred start-up expenses does not make the election, the start-up costs must be capitalized, meaning that the expenses can only be recovered upon the termination or disposition of the business. (Under prior law, start-up costs were capitalized unless an election was made to amortize them over no less than 60 months.)

All start-up and organizational costs related to a particular business, regardless of when incurred are to be considered in determining whether the cumulative cost of the start-up or organizational expenditures exceeds $50,000.

How to Make the Election to Deduct Start-Up Costs – The election to deduct start-up costs is made by claiming the deduction on the return for the year in which the active trade or business begins. The return must be filed by the extended due date. On Schedule C, the deduction is taken as part of the "Other Expenses" in Part V. If the entire amount of start-up costs isn't deductible in the business's first year, use Form 4562 to amortize the excess amount over 180 months.

Qualifying Start-Up Costs – A qualifying start-up cost is one that would be deductible if it was paid or incurred to operate an existing active business in the same field as the new business, and the cost is paid or incurred before the day the active trade or business begins. Examples of qualified start-up costs include:

- Surveys/analyses of potential markets, labor supply, products, transportation facilities, etc.;
- Wages paid to employees, and their instructors, while they are being trained;
- Advertisements related to opening the business;
- Fees and salaries paid to consultants or others for professional services; and
- Travel and related costs to secure prospective customers, distributors and suppliers.

Start-up costs don't include interest, taxes, or research and experimental costs. Depreciable items aren't included in start-up expenses either--begin depreciation when the business actually begins (i.e., when the assets are "placed in service").

For a purchase of an active trade or business, only investigative costs incurred while conducting a general search for or preliminary investigation of the business (i.e., costs that help the taxpayer decide whether to purchase a new business and which one to purchase) are qualified start-up costs. Costs incurred attempting to buy a specific business are capital expenses that aren't treated as start-up costs.

If a business closes operations before start-up costs are fully amortized, deduct remaining costs as an ordinary loss (Form 4797).

EMPLOYING A FAMILY MEMBER

One way of reducing the overall family tax bite is to employ family members in your business. This will allow you to shift income to them and possibly provide them with employment benefits.

Strategy - Employing a Child **-** By employing a child, the income tax advantages include obtaining a business deduction for a reasonable salary paid to that child and reducing the self-employment income and tax of the parents (business owners) by shifting income to the child. Since the salary paid to a child is considered earned income, it is not subject to the "Kiddie Tax" rules that apply to children through age 18 and full-time students ages 19 through 23. The Kiddie Tax won't apply at all to the 19- through 23-year-old student if his or her earned income exceeds one-half of total support, another incentive to employ a child in some situations.

The maximum standard deduction available to the child in 2019 is $12,200 (up from $12,000 in 2018). Therefore, the standard deduction eliminates all tax on that amount of income if the child is paid $12,200 in compensation. * If the business is unincorporated, wages paid to the child under age 18 are not subject to social security taxes. Not only are there significant income tax advantages to employing the child, but the parent-employer may provide him or her with fringe benefits, such as group-term life insurance and qualified pension plan contributions.

The child may also make deductible contributions to an IRA for 2019 of the lesser of earned income or $6,000. By combining the standard deduction and the maximum deductible IRA contribution, a child could earn $18,200 of wages and pay no income tax. If the child balks at contributing his or her hard-earned money to an IRA, the parent might consider giving the child part or all of the IRA contribution as a gift.

Strategy - Employing a Spouse **-** Reasonable wages paid to a spouse entitles the employer-spouse to a business deduction. The wages are subject to FICA taxes, and the spouse may qualify for Social Security benefits to which he or she might not otherwise be entitled. In addition, the spouse may also be eligible to receive coverage under the business' qualified retirement plan, and the employer-spouse may obtain a business deduction for health insurance premium payments made on behalf of the employed spouse. While maintaining the same family coverage, the business deductions could be increased by providing the spouse with family health insurance coverage as an employee. These wages are subject to income tax.

Please keep in mind that when a family member is employed in a family business, the wages should be reasonable for the work performed and that the services performed are necessary to the business.

*Actually, only $11,850 of wages would need to be paid since the Kiddie Tax rules allow as the standard deduction for 2019 the lesser of $12,200 or the sum of $350 plus earned income, with a minimum standard deduction of $1,100. Thus $12,200 - $350 = $11,850.

ADVERTISING EXPENSES

The Tax Court's view is that advertising and promotional expenses cannot be charged to future years as deferred charges nor amortized over future years where the taxpayer fails to show that "the future benefits can be determined precisely and are not of indefinite duration *(Finkenberg's Sons Inc, A., (1951) 17 TC 973)*

Where the period over which the benefit will be derived is definitely ascertainable, the expenditure must be capitalized and amortized over the period. Thus, IRS ruled that advertising expenses incurred in connection with a fair which operated for six months in each of two years must be spread over the periods during which the fair was in operation *(Rev Rul 68-283, 1968-1 CB 63)*. Tax Court held that signs and clocks which a Coke company placed on its dealers' premises, and scoreboards which it placed at high school ball fields, were capital expenses amortizable over a five-year useful life *(Alabama Coca-Cola Bottling Co, (1969) TC Memo 1969-123)*.

But expenses incurred by business or professional people to build up their reputations are capital expenditures to develop or enhance goodwill, unless the expenses can be tied directly to the production of added income.

Website costs – Although the IRS has not issued guidance on when Internet website costs can be deducted, the costs should generally be treated under the same principles as other business expenses. Generally, website costs will be either a software expense or an advertising expense, but if they are paid or incurred before a business begins, they would be treated as start-up expenses.

Website designs such as the part of a website's design produced from sophisticated programming languages (example: C++) will be treated as software. However, whether a design produced from HTML (hypertext markup language) will qualify as software is questionable.

Purchased software - If the business owner starting the website purchases the design from another individual or company that would be at economic risk if the software doesn't perform, the design costs are amortized over 3 years, starting with the month the website is put into service. If the software is off-the-shelf computer software placed in service in a tax year beginning in 2003 or later, it qualifies as Sec. 179 property.

In-house developed software – If the website design is developed by the proprietor who is launching the website (or his or her employee or an independent contractor who isn't at risk for lack of performance of the software), the costs may be:

- Deducted in the year paid or accrued (depending on the proprietor's accounting method), or
- Amortized over three years (as if the design had been purchased).

Non-software design costs – The portions of the website design costs that aren't software generally must be amortized over the number of years that the non-software portions of the design are expected to be used in the business. If the expected use is one year or less, the costs are currently deductible.

Website content - Costs of the website content that is advertising are deductible currently as an advertising expense. Non-advertising content may be deductible or amortized, depending on its useful life. Also treated as advertising expenses are website monthly fees paid for a generic customized site.

Domain name purchased on secondary market – In IRS CCA 201543014, the Chief Counsel opined that:

(1) Costs incurred by a taxpayer to acquire either a generic or a non-generic domain name from the secondary market for use in the taxpayer's trade or business must be capitalized under § 263(a) as an intangible asset. A non-generic domain name is usually a company or product name. A generic domain name is not a company or product name, but typically describes a product or service using generic terms people associate with the topic.

(2) If a non-generic domain name is registered as a trademark or functions as a trademark, the capitalized costs of acquiring the name from the secondary market for use in the taxpayer's trade or business meets the definition of a trademark in Sec 1.197-2(b)(10) and would be an amortizable Sec 197 intangible. Alternatively, if the name does not meet the definition of a trademark but will be used by the acquiring taxpayer in its trade or business to

provide goods or services through an already constructed website and will be maintained by the taxpayer, the capitalized costs of acquiring the name meets the definition of a customer-based intangible and will be an amortizable Sec 197 intangible.

(3) If a generic domain name is associated with a website that is already constructed and will be maintained by the acquiring taxpayer who acquired the generic domain name for use in its trade or business either to generate advertising revenue by selling space on the website or to increase its market share by providing goods or services through the website, the capitalized costs of acquiring the generic domain name from the secondary market for use in the taxpayer's trade or business meets the definition of a customer-based intangible and is an amortizable Sec 197 intangible.

Intangibles are amortizable over 15 years. See Chapter 3.08 for more information on Intangibles.

AUTO LOAN INTEREST

A self-employed individual may deduct on Schedule C interest paid on a loan to acquire a business vehicle even if the loan is consumer debt. This is so even if the standard mileage rate method is used because the standard rate does not include an allowance for interest to purchase the vehicle. If the vehicle is part for business and part personal, the interest must be allocated between the personal (nondeductible) part and the business part *(§ 163).* In addition, the business portion of any taxes paid on the vehicle during the year is also deductible on Schedule C. *(Rev Proc 2002-61, Sec. 5.04, 2002-39 IRB 616)*

> ***Example – Auto Loan Interest –*** *Assume the self-employed individual paid $600 interest on a car loan and used the car 60% for business and 40% for personal purposes. The taxpayer can deduct $360 (60% × $600) on Schedule C. The remaining interest of $240 is a nondeductible personal expense.*

LEASE PAYMENTS – RENTAL EXPENSE OR PURCHASE COST?

A payment made in connection with the taxpayer's trade or business is deductible as a rental expense if it is an ordinary and necessary expense, but only if the lessee (taxpayer) has not taken or is not going to take title to the property and has no equity interest in it. *(IRC Sec. 162(a)(3))* Therefore, payments made under conditional sales contracts are not deductible as rent. No deductions for rental payments are allowed for a transaction that is structured to look like a lease but is in fact a disguised purchase.

A lease with an option that allows the lessee to buy the property may be construed as a sale, in which case, none of the payments are deductible as rent. For example, lease expenses for a business-use vehicle that are in fact payments toward the vehicle's purchase price are not deductible, but the cost may be recovered through depreciation. The intent of the parties, as shown in the agreement and based on the facts and circumstances when the agreement was made, will determine whether the lease is considered a sale. Factors indicating a sale instead of a lease include a nominal option price, designating part of the payment as interest, excessive rent, application of rent payments to the lessee's equity in the property, and rental plus option price equal to the property's value plus interest.

CHARITABLE CONTRIBUTION VS. BUSINESS EXPENSE

Generally, for a self-employed individual, charitable contributions are not deductible on Schedule C and can only be deducted on Schedule A. However, transfers to a charity that are directly related to a taxpayer's business and are made with a "reasonable expectation of financial return commensurate with" the amount transferred may be deductible as business expenses, and not as charitable contributions. But no business expense deduction is allowed for the transfer if *any* part of it is deductible as a charitable contribution. (Reg § 1.162-15(a)(2))

EDUCATION EXPENSES - A self-employed individual has optional tax benefit strategies for education expenses:

- Take as a business expense and thereby offset both SE and income tax, or
- Take as an education credit (if qualified) where that benefit outweighs the other options.
- When deciding which option to use, be sure to consider the overall tax reduction.
  - Schedule C – Generally SE rate plus Tax Bracket rate.
  - Education credit – American Opportunity up to 100% of first $2,000 plus 25% of next $2,000, Lifetime at 20%.

TRAVEL INSURANCE

The deductible travel expenses, for a business trip, would include the cost of travel insurance, visa fees, customs fees, and books about the destination (TC Memo 1998-272), and would be deductible on Schedule C as a travel expense for a self-employed individual or, in years other than 2018 through 2025, as a Schedule A, miscellaneous itemized deduction for an employee.

Although there are no specific citations to reference, it would seem that the medical portion of the travel insurance premium–if it is separately stated–for a self-employed individual and more-than-2% S-Corporation stockholders (corporate wages count as SE income for purposes of the net income limitation) would qualify for the above-the-line SE medical deduction (see next topic) whether or not the trip was for business (Sec 162(I)(1)(B)).

It would also seem, where the above-the-line SE medical deduction does not apply, the medical portion of the travel insurance would qualify as a Schedule A medical deduction–again, only if the medical portion of the premium is listed separately from other coverage such as for trip delays, lost or damaged luggage, or trip cancelation.

HEALTH INSURANCE DEDUCTION

A self-employed individual (or a partner or a more-than-2%-shareholder of an S corporation) can deduct as an above-the-line expense 100% of the amount paid during the tax year for medical insurance on behalf of himself, his spouse and his dependents subject to the following requirements (Code Sec. 162(l)(1)(B)):

- The deduction cannot exceed the individual's net earnings from self-employment derived from the trade or business for which the plan providing the coverage is established.
- For a more-than-2% S corporation shareholder, that shareholder's wages from the S corporation are treated as his earned income.
- No deduction is available for any month in which the self-employed individual is eligible to participate in a "**subsidized**" health plan maintained by an employer of the taxpayer, the taxpayer's spouse, or any dependent, or any child of the taxpayer who hasn't attained age 27 as of the end of the tax year. This rule is applied separately to (1) plans that provide coverage for qualified long-term care services or are qualified long-term care insurance contracts and (2) plans which don't include such coverage and aren't such contracts (Code Sec. 162(l)(2)(B)). Thus, an individual eligible for employer-subsidized health insurance may still be able to deduct long-term care insurance premiums, so long as he isn't eligible for employer-subsidized long-term care insurance.

  Definition of Subsidized - The term "subsidized" means at least 50% of the cost of the coverage is paid by the employer (Sec 35(f)(1)).

When adding the amounts that qualify as insurance premiums for either the self-employed health insurance deduction or the Schedule A deduction, don't overlook:

- Long-term care insurance premiums (up to the age-based maximum)
- ACA marketplace premiums net of the advance premium tax credit (APTC)
- Payback of any portions of the APTC in the year of the APTC
- Employee costs for employer group coverage
- Medicare parts B, C and D premiums
- Medicare supplemental plan premiums
- Dental insurance premiums
- Vision insurance premiums
- Lost or damaged contact lens premiums
- Travel Medical Insurance (see "Travel Insurance" previously)

If the taxpayer is self-employed and the premiums cannot be used for the above-the-line self-employed health insurance deduction because of the net SE earnings limitation, the excess can be taken as a Schedule A deduction.

Medical expenses paid by an HRA or FSA are not deductible health insurance premiums because they are paid for by pretax dollars. The same goes for medical expenses paid for or reimbursed by an HSA.

Medicare B and the SE Health Insurance Deduction **-** A Chief Counsel Advice (CCA 201228037, July 16, 2012) addresses the question of whether Medicare premiums can be deducted under section 162(l) for the coverage of a self-employed individual's spouse. The answer: **YES**. The Counsel's analysis of the law is as follows (emphasis added):

> *"Medicare is insurance that constitutes medical care under section 162(l). Therefore,* ***all Medicare premiums*** *are similar to other health insurance premiums and can be used to compute the deduction under section 162(l).* ***This rule also extends to Medicare premiums for coverage of a self-employed individual's spouse****, dependent, or child (as defined in section 152(f)(1)) who as of the end of the taxable year has not attained age 27."*

So, in addition to stating that a spouse's Medicare premiums are eligible for the SE health insurance deduction (if all other requirements are met), the CCA also clarifies that all Medicare premiums (B, C and D) are eligible.

Children Under the Age of 27 - As part of the health care reform law medical insurance premiums paid for a self-employed individual's child who is under the age of 27 as of the end of the year can be covered under the SE individual's plan and deducted as part of the self-employed individual's health insurance deduction. (Notice 2010-38) The definition of "child" for this purpose includes:

- The individual's child,
- The individual's stepchild,
- A legally-adopted individual,
- A person lawfully placed with the individual for legal adoption, and
- An eligible foster child.

The child does not have to qualify as a dependent. No other requirements apply so long as the individual meets the definition of a child and has not reached age 27 by the last day of the year. Even a married child is included by this definition! (But the married child's spouse and/or children are not covered.) A child attains age 27 on the 27th anniversary of the date the child was born (for example, a child born on April 10, 1992 attained age 27 on April 10, 2019).

If the self-employed individual utilizes a group policy provided by an association, be aware that although group policies offered by insurers are also required to cover older children, they are only required for children under the age of 26.

Receiving Premium Assistance Credit - The SE health insurance deduction is normally a straight forward above-the-line deduction that is based upon qualified health insurance premiums paid by a self-employed individual and limited to the profit from the business less one-half of the SE tax paid (i.e., the 50% of SE tax deduction that reduces gross income).

However, the ACA adds a whole level of complexity when computing the deduction of SE taxpayers who purchased their insurance through a government exchange (marketplace), since, for the deduction, the insurance premiums paid must be reduced by the premium assistance credit received, and the credit received is based upon the taxpayer's MAGI. Thus, the credit and MAGI are interdependent upon one another. The IRS solution to the problem is to recalculate the credit and MAGI over and over again until the difference is within $1 (Rev Proc 2014-41). The Rev Proc also provides an alternative calculation. Either way it produces a complicated calculation that is best left up to your software.

Partner's Guaranteed Payments - A self-employed individual qualifying for the deduction includes a general partner or a limited partner receiving guaranteed payments (Rev Rul 91-26, 1991-1 CB 184).

Where Taken – The deduction is not taken on Schedule C since the medical expense cannot offset SE taxes. Instead it is taken as an adjustment to gross income.

Annual Limitation – 100% of medical insurance premiums paid.

Net Income Limitation - No deduction is allowed for self-employed individuals to the extent that the deduction exceeds the individual's net earnings from self-employment *(Code Sec. 401(c))* derived from the trade or business with respect to which the plan providing the medical care coverage was established. Does this mean that a health insurance policy purchased by a sole proprietor must be issued in the name of the trade or business? No, according to the IRS' Chief Counsel's Office, the policy may be in the individual's name. However, the sole proprietor may not net the earnings of multiple businesses for the net income limitation unless separate policies are involved. For example, if the self-employed individual purchases a medical plan under Business #1 and a dental plan under Business #2, the earned income from each business may be considered together. *(CCM 200524001)*

Employer Plan Limitation - The deduction isn't available to any taxpayer for any calendar month for which the taxpayer is eligible to participate in any subsidized health plan maintained by any employer of the taxpayer or of the spouse of the taxpayer *(Code Sec. 162(l)(2)(B))*. Thus, if the taxpayer were only covered for one month under the employer's subsidized plan, the SE health insurance deduction is still available for the other 11 months of the year. A former employer generally does not pay part of continuation or COBRA medical insurance premiums, so unless the employer picks up 50% or more of the cost, the COBRA premiums of a self-employed individual will be eligible for the SE health insurance deduction, if other requirements are met.

Additional Medicare Tax - As part of the Affordable Care Act, an additional 0.9% Medicare tax applies to combined wage and self-employment income in excess of $200,000. For married taxpayers, the threshold is instead $250,000 for taxpayers filing jointly and $125,000 for taxpayers filing separately. See Chapter 8.03 for information on self-employment tax and Chapter 12.06 for details on the additional Medicare tax.

PREPAID EXPENSES

Generally, prepaid expenses are not deductible. This rule applies to any expense paid far enough in advance to, in effect, create an asset with a useful life extending substantially beyond the end of the current tax year.

> ***Example – Prepaid Expense -****The taxpayer signs a 3-year insurance contract. Even though he paid the premiums for 2017, 2018 and 2019 when he signed the contract, he can only deduct the premium for 2017 on his 2017 tax return. He can deduct in 2018 and 2019 the premium allocable to those years.*

WHO MAY ESTABLISH A SELF-EMPLOYMENT RETIREMENT PLAN (aka Keogh)

Even though a qualified plan can only be established by an employer *(§ 401(a)),* a sole proprietor *can* establish a Keogh plan, and so can a partnership. Only a sole proprietor or a partnership can set up a Keogh plan. A common law employee cannot and neither can a partner *(Reg § 1.401-10(e)(1)).*

For purposes of establishing a Keogh plan, an individual who owns the entire interest in an unincorporated trade or business is treated as his own employer. And a partnership is treated as the employer of each partner who is considered to be an employee under *§ 401(c)(1), § 401(c)(4).* Therefore, a sole proprietor is considered to be his own employer, and the partnership is considered to be the employer of each of the partners. *(Reg § 1.401-10(e)(1))*

Directors' fees are self-employment income - Since directors' fees are self-employment income *(Rev Rul 72-86),* a taxpayer who is both an officer and director of the same corporation, and is covered as an employee under the corporation's pension plan, may set up a Keogh plan for the separate fees he receives for acting as director *(Letter Ruling 7839059)*.

CREDIT CARD MIXED INTEREST

When it comes to credit card debt where a portion of the debt is for personal purchases and part for business, can any part of the interest charged on the debt be deducted as business interest?

IRC Section 163(h)(2) clearly bars a deduction for personal (consumer) interest but does not mention dealing with mixed charges. IRS Section 163(h)(2)(A) specifically excludes interest paid or accrued on indebtedness properly allocable to a trade or business (other than the trade or business of performing services as an employee) from the definition of personal interest. As such, the interest associated with a credit card used solely for business purposes is plainly deductible as business interest.

An example of allocating interest between personal and business is a vehicle used partially for business and partially for personal purposes. The business use percentage is determined by the miles driven for business as compared to the total miles driven for the entire year. Thus, in this situation, it is easy to determine the percentage of the car's consumer loan on which business interest is deductible.

However, when it comes to allocating the interest on a credit card that is used both personally and for business (mixed use), how does one allocate the interest among all of the ongoing charges and monthly installment payments? Although some part of the interest is deductible business interest, it is difficult to determine a proper allocation and, in an examination, a tough thing to prove.

Moral of the story? Taxpayers should use separate credit cards whenever possible for business and personal purchases. Doing so will make proving the deductibility of the business interest much easier in an examination.

PARTNER EXPENSES

A frequent question that arises is how to handle the deductible business expenses of individuals in a partnership. Generally, the partnership should reimburse each partner for any allowable expenses; those expenses would then be deducted on the partnership's 1065 return.

If the partnership does not reimburse these expenses, the following instructions from Part II of Form 1040, Schedule E apply: "You can deduct unreimbursed ordinary and necessary expenses you paid on behalf of the partnership **if you were required to pay these expenses under the partnership agreement.**"

The inference here is that, if the partnership agreement does not require the partner to pay expenses, those expenses are not deductible.

If they are deductible, the expenses are claimed on Part II of Schedule E. See line 27 (page E-10) of the 2018 Schedule E instructions to learn how to fill in the entry on line 28 based on whether the activity is passive or active. Be sure to check the "yes" box on line 27 to indicate that there are unreimbursed partnership expenses. Refer to your software's instructions on how to achieve the desired result.

Whatever you do, do not adjust the K-1. That is the incorrect place to do so; in addition, not using the numbers from the filed K-1 necessitates that Form 8082 (Notice of Inconsistent Treatment) also be filed.

FARM LOSSES LIMITED

Prior to 2018, the farming loss of a taxpayer, other than a C corporation, is limited for any tax year in which any applicable subsidies are received. The losses are limited to the greater of (a) $300,000 ($150,000 for a married person filing separately), or (b) the taxpayer's total net farm income for the prior five tax years.

Applicable subsidies are (1) any direct or counter-cyclical payments under title I of the Food, Conservation, and Energy Act of 2008 (or any payment elected in lieu of any such payment), or (2) any Commodity Credit Corporation (CCC) loan.

Total net farm income is an aggregation of all income and loss from farming businesses for the prior five tax years. Any loss that is disallowed under this rule in a particular year is carried forward to the next tax year and treated as a deduction attributable to farming businesses in that year. Farming losses arising because of fire, storm, or other casualty, or by reason of disease or drought, are disregarded for purposes of calculating the limitation. (Code Sec. 461(j), as amended by the Heartland, Habitat, Harvest, and Horticulture Act of 2008, § 15351)

TCJA

Under TCJA the IRC Sec 461(j) limitation on "excess farm loss" for non-corporate taxpayers no longer applies after 2017 and through 2025, although an excess farm loss from 2017 will carry over to 2018. For 2018-2025 all non-corporate taxpayers' business loss deductions are limited to a threshold amount *(IRC Sec. 461(l) as modified by TCJA Sec. 11012(a)).* *See chapter 3.25.*

EQUIPMENT RENTAL – SCHEDULE E OR C?

Generally, equipment rental is income for SE tax purposes and cannot be reported on Schedule E. Instead, it should be reported on Schedule C where it will be subject to SE tax. In a Tax Court case, a taxpayer reported rental income for his vehicles and equipment used in the performance of self-employed services. The tax court ruled that the equipment rental in reality was self-employment income reportable on Schedule C (Walker, Charles, (1993) 101 TC 537).

Frequently, 1099-MISCs are issued from the entertainment industry reporting "rents." An example is off-duty police officers who are paid rents for their motorcycles and other equipment. The so-called rents are actually SE income paid as rents to avoid the employer's share of the FICA withholding.

JOINT & SEVERAL LIABILITY

If self-employment income is reported on a joint return, both spouses are jointly and severally liable for the self-employment tax (Reg § 1.6017-1(b)(2)).

OUTSOURCING PAYROLL TASKS – BE ALERT FOR SCAMS

Many employers use a third-party payroll service to prepare their payroll checks and handle related tax duties, including withholding, reporting, and paying social security, Medicare, and income taxes. Third-party payroll service providers can help assure filing deadlines and deposit requirements are met and greatly streamline business operations. If the payroll service fails to perform its tax collection and depositing duties, the employer will still be responsible for the deposit and payment of federal tax liabilities, even though the employer may have forwarded the tax amounts to the third-party to make the tax deposits. The employer is the responsible party, and if the third-party fails to make the federal tax payments, the IRS may assess penalties and interest on the employer's account, and the employer will be liable for all taxes, penalties and interest due. The employer may also be held personally liable for certain unpaid federal taxes, i.e., the "trust fund" taxes.

As a precaution, employers should not change their address of record with the IRS to be that of the payroll service provider because the employer will then not be informed of tax matters involving their business, and if there is any nefarious activity by the payroll service, the business will be in the dark about it until it is too late. The IRS suggests that employers – even those not required to make electronic payroll payments – should ensure their payroll service providers are using EFTPS (Electronic Federal Tax Payment System) so the employers can confirm that payments are being made on their behalf. Employers should register on the EFTPS system to get their own PIN and use this PIN to periodically verify payments. A red flag should go up the first time a service provider misses or makes a late payment. When an employer registers on EFTPS they will have on-line access to their payment history for 16 months. In addition, EFTPS allows employers to make any additional tax payments that their third-party provider is not making on their behalf such as estimated tax payments.

IS CLAIMING EXPENSES ON SCHEDULE C OPTIONAL?

May a taxpayer disregard depreciation and other allowable deductions in computing net earnings from self-employment for self-employment tax purposes? Some taxpayers might like to do this to boost their Social Security contributions and eventually their SS benefits. In some circumstances it could also increase their earned income credit. But is this allowed? The short answer is NO. Here's the explanation why:

IRC Sec 1402(a) defines net earnings from self-employment as "the gross income derived from any trade or business carried on by such individual, less the deductions allowed by this subtitle which are attributable to such trade or business." Gross income from a trade or business does not itself constitute net earnings from self-employment; allowable deductions must be taken for expenses in order to arrive at net SE earnings. Rev. Rul. 56-407 held that under Sec 1402(a), every taxpayer (with the exception of certain farm operators) must claim all allowable deductions in computing net earnings from self-employment for self-employment tax purposes. Since net SE earnings are included in earned income for EITC purposes as defined by cross-reference to the definition of net-earnings from self-employment under I.R.C. §1402(a), the rule that claiming allowable deductions is mandatory applies equally to the EITC. Deliberately not claiming expenses to increase the amount of EITC would be fraud. (Chief Counsel Advice 200022051)

CALIFORNIA DIFFERENCES

E-file Requirement for Businesses - Beginning January 1, 2015, for taxable years beginning on or after January 1, 2014, any business entity that files an original or amended tax return prepared using tax preparation software is required to electronically file (e-file) their return with the FTB unless a waiver is obtained for one of the following reasons:

- Technology constraints – the inability of the tax preparation software used by a taxpayer to electronically file the return due to the inadequacy of the software or the complex nature of the return,

- Where compliance would result in undue financial burden, or
- Circumstances that constitute reasonable cause and not willful neglect.

Waiver requests may be submitted directly to the FTB by an online fillable form on the FTB's website: https://www.ftb.ca.gov/professionals/busefile/Business_eFile_Waiver_Request.asp

For this purpose, "business entity" means a corporation, including an "S" corporation, an organization exempt from tax pursuant to Chapter 4 (commencing with Section 23701) of Part 11, a partnership, or a limited liability company.

A penalty for failing to file electronically will be assessed against the taxpayer (not the preparer) for returns filed for taxable years beginning on or after January 1, 2017. The penalty is $100 for an initial failure and $500 for each subsequent failure unless the failure is due to reasonable cause, and not willful neglect.

E-Pay Requirement - California Assembly Bill (AB 1245) (Chapter 222, Statutes of 2015) requires all employers to electronically submit employment tax returns, wage reports, and payroll tax deposits to the EDD. This law became effective for employers with 10 or more employees January 1, 2017 and for all employers January 1, 2018.

Penalties - Filing paper returns instead of electronically filing when required will result in the following penalties:

- Quarterly Contribution Return and Report of Wages (DE 9) - $50 per return
- Quarterly Contribution Return (DE 3D) - $50 per return
- Quarterly Contribution Return and Report of Wages (Continuation) (DE 9C) *-$20 per wage item*
- Payroll Tax Deposit (DE 88) – 15% of the amount due.

Waiver - Employers may request a waiver from the electronic filing mandate due to:

- Lack of automation,
- Severe economic hardship,
- Current exemption from the federal government, or
- Other good cause.

The E-file and E-pay Mandate Waiver Request (DE 1245W) can be downloaded at: www.edd.ca.gov/pdf_pub_ctr/de1245w.pdf

Waiver requests, which cannot be filed retroactively, must be received by the final filing date of the quarter for which the taxpayer is requesting that the waiver begin. Requests received after the due date for the quarter requested will be processed for the subsequent quarter. An approved waiver will be valid for four consecutive quarters beginning with the effective quarter, and to avoid a non-compliance penalty when the waiver expires, an employer must start to electronically file and pay, or submit a new waiver request.

Above-the-line Health Insurance Deduction - The amount of above-the-line health insurance premiums deductible for California income tax purposes is the same as the amount deductible for federal income tax purposes, so no California adjustment is required. (R&TC Section 17201.1)

Education Expenses - Since California does not allow an education credit, a sole proprietor's business-related education expenses would be deductible only on Sch. C for CA.

Family Employment - No California Unemployment Insurance, Education Training Tax or State Disability Insurance (SDI) is required for wages paid to children under age 18 employed by a parent (or partnership of parents only), a spouse employed by a spouse, or a parent employed by a son or daughter. They are subject to personal income tax withholding and may apply for elective SDI coverage.

NOTES

ACCOUNTING METHODS

Overview

A taxpayer **filing its first return** may adopt any permissible method of accounting in computing taxable income for such year (Reg. Sec. 1.446-1(e)(1)). Permissible methods generally include Cash and Accrual, but the **accounting system used must clearly reflect income** (Reg. Sec. 1.446-1(2)).

- But you generally can't use the cash method if there is inventory unless an exception discussed in the following dialog applies.
- Generally C-corporations and partnerships with a C-corporate partner could not establish the cash method of accounting in their first year if their gross receipts exceeded $10 Million (Sec 448(a) and Rev. Proc. 2002-28) prior to 2018 (TCJA) and cannot use the cash method if their gross receipts exceed $25 Million after 2017 ($26 million for tax years beginning in 2019) (TCJA).

Thus, where inventory is not a material factor a taxpayer can generally use the cash method regardless of the amount of gross receipts (except for C-corporations and partnerships with a C-corporate partner as discussed above).

However, the accrual method of accounting is mandatory where the production, purchase or sale of merchandise is a significant income producing factor (Reg. Sec. 1.446-1(a)(4)(i)). Thus where there is inventory, the accrual method of accounting would be mandatory unless a gross income exception applies.

EXCEPTIONS

There are exceptions to the above rules for mandatory use of the accrual method of accouting.

TCJA

TCJA Post-2017 Exception - TCJA (effective beginning in 2018) allows businesses (termed "small business taxpayers") to use the cash method of accounting if they have average annual gross receipts of $25 million (indexed for inflation after 2018) or less during the preceding three years. The amount is $26 million for tax years beginning in 2019. In addition the taxpayer's method of accounting for inventory won't be treated as failing to clearly reflect income if the method: (Code Sec. 471(c)(1)(B))

(1) Treats inventory as non-incidental materials and supplies (Code Sec. 471(c)(1)(B)(i)), or
(2) Conforms to the taxpayer's method of accounting reflected in an "applicable financial statement" (i.e., an AFS, defined below) of the taxpayer for that tax year or, if the taxpayer doesn't have any AFSs for the tax year, the taxpayer's books and records prepared in accordance with the taxpayer's accounting procedures (Code Sec. 471(c)(1)(B)(ii)).

Sole Proprietorship - In the case of a sole proprietorship, the $25 million gross receipts test is applied as if the sole proprietorship is a corporation or partnership. (Code Sec 471(c)(3))

Exceptions - The provision retains the exceptions from the required use of the accrual method for qualified personal service corporations and taxpayers other than C corporations. Thus, qualified personal service corporations, partnerships without C corporation partners, S corporations, and other pass-through entities are allowed to use the cash method without regard to whether they meet the $25 million gross receipts test, **so long as the use of such method clearly reflects income** (Committee report).

Consistent with present law, the cash method generally may not be used by taxpayers, other than those small business taxpayers, i.e, those that meet the $25 million gross receipts test, if the purchase, production, or sale of merchandise is an income-producing factor. In addition, the cash method may not be used by a tax shelter (Committee report).

Change In Accounting Method – The cash basis accounting exceptions to accrual accounting are permissive and a taxpayer wishing to switch to cash accounting under these TCJA provisions can change accounting methods by using Form 3115 – Application for Change in Accounting Method. Per Rev Proc 2018-40, the IRS will provide automatic consent to a small business taxpayer's application to change to the cash method of accounting.

Applicable Financial Statement (AFS) – For purposes of this exception, an AFS is defined by reference to Code Sec 451(b)(3), and is a financial statement which is certified as being prepared in accordance with generally accepted accounting principles and which is:

- A 10–K (or successor form), or annual statement to shareholders, required to be filed by the taxpayer with the U.S. Securities and Exchange Commission (SEC) (Code Sec 451(b)(3)(A)(i)),
- An audited financial statement of the taxpayer which is used for credit purposes, reporting to shareholders, partners or other proprietors, or to beneficiaries (Code Sec 451(b)(3)(A)(ii)), or any other substantial nontax purpose (but only if the taxpayer doesn't have a statement described in the bullet just above), or
- Filed by the taxpayer with any other Federal agency for nontax purposes, but only if there's no statement as described in the two bullets above (Code Sec 451(b)(3)(A)(iii)).
- A financial statement which is made on the basis of international financial reporting standards and is filed by the taxpayer with an agency of a foreign government which is equivalent to the U.S. SEC and which has reporting standards not less stringent than the standards required by the SEC, but only if there is no statement of the taxpayer described in the three bullets above (Code Sec 451(b)(3)(B)), or
- A financial statement filed by the taxpayer with any other regulatory or governmental body specified by the Treasury Secretary, but only if there is no statement of the taxpayer described in the bullets above (Code Sec 451(b)(3)(C)).

Pre-2018 Exceptions - There are two exceptions to the accrual method:

$1 Million or Less Average Gross Receipts - Taxpayers (other than tax shelters) with 3-year average annual gross receipts of $1 million or less do not have to account for inventories or use an accrual method of accounting. Businesses permitted to use the cash method under this exception that **do not want to account for inventories** (Rev. Proc. 2001-10) must treat all inventoriable items (e.g., items purchased for resale and raw materials purchased for use in producing finished goods) in the same manner as non-incidental materials and supplies, deductible in the year in which they are first used or consumed in the taxpayer's operations (Reg. § 1.162-3(a)(1)).

Taxpayers qualifying for the exception and that do not want to use inventories must treat merchandise inventory in the same way that cash method taxpayers are required to treat materials or supplies (other than incidental costs) under Reg. 1.162-3. Thus, taxpayers using the cash method under Rev. Proc. 2001-10 may not deduct merchandise costs until the year in which the merchandise is consumed, used, or sold. The procedure says that taxpayers may use any reasonable method of estimating the amount of raw materials and finished goods inventory to determine the amount of raw materials used to produce finished goods during the year, provided that method is used consistently. Apart from the simplified bookkeeping this procedure allows, the main advantage of IRS's liberalized allowance of the cash method is deferral of income until payment is received, rather than accounting for the income when billed

Over $1 Million and Up To $10 Million Average Gross Receipts – Another pre-2018 exception applies to taxpayers (other than tax shelters) with 3-year average annual gross receipts of over $1 million and up to $10 Million (Rev. Proc. 2002-28) that also do not wish to account for inventories or use an accrual method of accounting, provided they are **NOT** any one of the following North American Industry Classification System (NAICS) businesses:

- Retailing (NAICS codes 44 – 45);
- Wholesaling (NAICS code 42);
- Manufacturing (NAICS codes 31 – 33);
- Mining (NAICS codes 211, 212);
- Publishing (NAICS code 5111); or
- Sound recording (NAICS code 5112).

Rev. Proc. 2002-28 does not apply to a farming business of a qualifying small business taxpayer. However, farmers generally are allowed to use the cash method for their farming business anyway.

The Details

A taxpayer ***adopts an accounting method*** when he uses it to file his/her first return (a change later requires IRS consent). The method chosen must:

- Clearly reflect income, and
- Be consistent on a year-by-year basis.

The three most commonly used accounting methods are: **Cash - Accrual - Hybrid**

CASH RECEIPT AND DISBURSEMENT METHOD

Under this accounting method, amounts received are included in gross income in the year of actual or constructive receipt, regardless of whether the income is earned in that year. Expenses are usually deducted in the year paid. All that is needed for income recognition is that the amounts have a FMV (i.e., a cash equivalent). So if a cash method taxpayer receives a note in payment of services, there is income in the year of receipt of the note equal to its **FMV**. **Note:** A creditor's promise to pay (without a formal note) is not considered to have a FMV--thus, no income is received.

Example - Cash Basis Gross Receipts: *Rich, a CPA, reports income using the cash method. In 2019, he did an audit for T Corporation for which he billed $5,000. He collected this amount in 2019. He had also performed an audit in 2018 for D, Inc. Unfortunately, D, Inc. was in poor financial condition, and Rich took a secured note for $8,000 from the company for the audit fee. This occurred in 2018. The FMV of the note is $6,000. Rich actually collected $8,000 on the note in 2019. His gross incomes for 2018 and 2019 are:*

	2018	***2019***
FMV of note from D, Inc.	*$6,000*	
Cash received - T Corp's payment		*$5,000*
D, Inc.'s payments		*8,000*
Less: *Recovery of capital*		*<6,000>*
Total gross income	*$6,000*	*$7,000*

Receipt of a check is considered a cash equivalent. For this reason, a cash basis taxpayer recognizes income when a check is received--even if the check is received after banking hours.

Exception to "normal" cash basis rules - constructive receipt: Income that hasn't actually been received by a taxpayer is taxed as though it had been, if the following are true:

- The amount is readily available to the taxpayer.
- The taxpayer's actual receipt isn't subject to substantial restrictions.

The rationale behind constructive receipt is that if income is available, the taxpayer shouldn't be allowed to postpone income recognition. Many times, constructive receipt determination is simply a judgment call--based on the facts and circumstances.

Example 1 - Constructive Receipt: *Randy was a member of a barter club. In 2019, he performed services for several club members and earned 1,500 points. Each point meant that he was entitled to $1 in goods and services sold by others in the club. The points could be used at any time. In 2020, Randy exchanged his points for a big screen TV. He must recognize $1,500 in income in '19 when the points were credited to him.*

Example 2 - Constructive Receipt: *On 12/31/18 Linda's employer gave her a bonus check, but asked her to hold it until 01/19 so that the employer could deposit funds to cover the check. The check amount is income to Linda in 2019 when it became cashable.*

Example 3 - Constructive Receipt: *Ken is a key employee of ABC Company. The company gave stock valued at $12,000 to Ken. However, the stock couldn't be sold for 5 years. Ken isn't required to recognize income for the stock until the restrictions on the stock lapse. (IRC §83)*

Example 4 - Constructive Receipt: *Landlord Lionel received a security deposit from a new tenant to pay for apartment damage during the tenant's period of occupancy. If no damage occurs, Lionel is required to return the deposit to the tenant. The deposit is not income to Lionel in this case. He will recognize income to the extent of the deposit amount he doesn't return to the tenant in the year he returns the deposit to the tenant. If the deposit had been a prepayment of rent, it would be income in the year received.*

Actual Cases:

Patch, TC Memo 1995-449. *A bank robber was required to report stolen cash as income in spite of the fact that he paid it back the next year. The court stated, "a taxpayer who unlawfully acquires cash has possession and receives gross income in the taxable year that he unlawfully acquires the cash, even though he makes restitution in a later year."*

TAM 9519002. *Advances to a life insurance agent after life insurance policies were sold were considered taxable income in the year they were received. These advances were not loans, but compensation for past services.*

Childs, Richard A., 103 TC No. 36 (1994). *Partners in a law firm had fees paid under a structured format; they only reported the cash received. The IRS sought to tax them on the FMV of an arrangement in the year a tentative settlement was made. The Tax Court held, however, that the attorneys never had the right to receive full payment, because they didn't have ownership until actual settlement was received.*

ACCRUAL METHOD

With the accrual method, include amounts in gross income when they are earned, even though payment may be received in another year. Income is earned when:

- All events have occurred that fix the right to receive the income, and
- The amount to be received can be determined with reasonable accuracy.

Generally, a taxpayer's right to income accrues when title to property passes to the buyer or services are performed for customers. If there is potential for refund, the income is reported in the year of sale and a deduction is allowed in subsequent years when actual claims accrue.

When a taxpayer's right to income is contested, the year of income inclusion depends on whether payment has been received. If payment hasn't been received, no income is recognized until the claim is settled. However, if the payment is received prior to settlement of the dispute, the claim-of-right doctrine requires the taxpayer to recognize the income in the year of receipt.

Measurement of the income on accrual basis*:* The amount of income to report is the amount the taxpayer has a right to receive (contrast this with the cash method above).

Expenses: Expenses are claimed when a taxpayer becomes liable for them, whether or not they are actually paid in the same year.

Accrual method must be used for businesses maintaining inventory, except as noted below. The following must use the accrual method:

- Corporations (not S corps);
- Partnerships with a corporate partner;
- Tax Shelters.

The accrual requirement has these exceptions: (a) Family farming corporations; (b) Qualified personal service corporations and partnerships with a qualified personal service corporation as a partner; (c) C corps and partnerships (not tax shelters) with average annual gross receipts for the most recent 3-year period of $5 million or less. **Note:** See above for rules added by Revenue Procedures 2001-10 and 2002-28 for small businesses prior to 2018 and TCJA of 2017 for years after 2017. Situations where accrual method isn't applied even with an accrual basis taxpayer:

- **Prepaid income**: When it comes to financial reporting, advance payments are reflected as prepaid income and liabilities of the seller. For tax purposes, though, prepaid income is often taxed in the year of receipt. When the income should be reported often becomes a sore point between the IRS and taxpayers.
- **Advance payments for goods:** Generally, a taxpayer can elect to defer income recognition for advances paid for goods if the method of accounting for the sale is the same for both tax and financial reporting purposes.

> ***Example - Advance Payment for Goods:*** *Vance & Co. ships goods only after payment for them is received. In December 2019, Vance got $8,000 for goods not shipped until January 2020. Vance can elect to report the income for tax purposes in 2019, assuming they report the income the same way on their 2019 books.*

- **Advance payment for services: *Rev. Proc. 71-21*** allows accrual basis taxpayers to defer recognition of income for services to be performed by the end of the tax year following the year of receipt. No deferral is allowed, however, if the taxpayer might be required to perform any services, under the agreement, after the tax year following the year of receipt of the advance payment.

Example - Advance Payment for Services: *Z Corp, an accrual basis taxpayer, services office equipment under 12-month, 18-month, and 24-month contracts. The services are provided to customers on a monthly basis. In April 2018, Z Corp sold the following contracts:*

Term of Contract	*Advance Payment*
1 Year	*$6,000*
1-1/2 Years	*3,600*
2 Years	*2,400*

- *$1,500 of the $6,000 payment may be deferred to '19 (3/12 x $6,000).*
- *$1,800 of the $3,600 may be deferred (9/18 x $3,600), since those amounts won't be earned until 2019.*
- *The whole $2,400 received on the 2-year contract is taxable in 2018. This is due to the fact that part of the income will still be unearned by the end of the tax year following year of receipt.*

Rev Proc 71-21 doesn't apply to prepaid rent, or prepaid interest.

TCJA change re advance payments for accrual method taxpayers: For tax years beginning after 2017, an advance payment or other prepaid income received during the tax year must either be included in gross income for the tax year of receipt or the taxpayer must make an election to defer the inclusion of the payment in gross income with respect to the category of advance payments to which it belongs. (Code Sec. 451(c)). When the deferral election is made, the part of the advance payment that must be included in gross income in the year payment is actually or constructively received is the portion of the advance payment required to be included as gross income in the taxpayer's AFS. The remainder is included in gross income in the following year. See IRS Notice 2018-35 for further information.

HYBRID METHOD

The most common hybrid accounting method is a combination of cash and accrual. Generally, this combination is used when inventory is an income-producing factor. To simplify recordkeeping, a taxpayer accounts for inventory using accrual and uses the cash method for all other income and expense items.

The hybrid method is primarily used by small businesses - Income that hasn't actually been received is taxed as though received (constructive receipt). Accrual is allowed for sales and purchases, cash for operating expenses. However, if the cash method is used for sales and purchases, then it must also be used for expenses.

ONE TAXPAYER WITH SEVERAL BUSINESSES

Different accounting methods can be used for each business as long as the methods clearly reflect income. Separate books and records must be kept for each business, and a taxpayer can't create or shift income or losses between businesses.

CHANGE OF ACCOUNTING METHOD

A taxpayer's choice of accounting method on his/her first tax return controls the accounting method to be used in future years. To change an accounting method, IRS consent is needed. File Form 3115, Application for Change in Accounting Method, to obtain consent. Unless the change is "automatic" (see below), as of Februar 1, 2019, a user fee of $10,800 applies. A reduced fee of $7,600 applies to taxpayers with a personal or business-related tax issue whose gross income is less than $1 million but over $250,000 or a fee of $2,800 for taxpayers with a personal or business tax issue whose gross income is less than $250,000 (see Rev. Proc. 2019-1, Appendix A). These fees are subject to change annually.

Starting August 16, 2017, when requesting an accounting method change for which a user fee is required, taxpayers will only be able to make the user fee payment through the federal government's Pay.gov system. Since Pay.gov is used only to accept payments, the original, signed request and any supporting materials must still be submitted to the IRS. This electronic payment requirement also applies to requests for letter rulings and certain other rulings. (IR 2017-102) Pay.gov accepts payments using a credit card, debit card, or via direct debit or electronic funds withdrawal from a checking or savings account.

The following are some considered accounting method changes that require IRS approval:

- A change from accrual to cash if not an eligible small business taxpayer;
- A change in the method of basis used to value inventory;
- A change in the method of figuring depreciation (other than permitted changes to straight-line for property placed in service before 1981).

On the other hand, these changes don't require any approval:

- A change from cash to accrual, or for eligible small business taxpayers, from accrual to cash;
- Corrections of math or posting;
- Corrections of errors in computing tax liability;
- Adjustments to income or deductions that involve timing of inclusion or deduction;
- Adjustments to the useful life (not the recovery period of ACRS or MACRS assets) of depreciable property.

NOTE:
Accounting changes related to tangibe property capitalization and repairs are covered in chapter 3.27

Automatic Change Procedures: The automatic change procedures were instigated to simplify and encourage compliance to IRS guidelines. The automatic change procedures may apply to changes in the following:

- Trade and business expenses;
- Depreciation or amortization (including changing impermissible depreciation methods);
- Research and experimental expenses;
- Capital expenses;
- UNICAP rules;
- Plan contributions and deferred compensation under Code Section 404;
- Method of accounting;
- Discount obligations (bonds, etc.);

- Prepaid subscription income;
- Inventories;
- LIFO issues.

For a complete list of accounting method changes to which the automatic change procedures apply see Rev. Proc. 2018-31, modified by Rev. Proc. 2018-35 (related to certain costs for replanting citrus plants after the loss or damage of citrus plants), Rev. Proc. 2018-40 (relates to small business taxpayers changing to overall cash method), Rev. Proc. 2018-44 (concerns the Sec 481(a) adjustment), Rev. Proc. 2018-49 (modifies Rev Procs 2018-31 and 2018-29), Rev. Proc. 2018-56 (modifies Rev. Proc. 2018-31 to provide additional automatic method changes under §1.263A-1, -2, and -3 to assist taxpayers in complying with the final regulations), and Rev. Proc. 2018-60 (modifies Rev Proc 2018-61 related to the timing of income recognition under §451(b) for a taxpayer with an applicable financial statement (AFS)).

Filing Form 3115: Individuals, partnerships, corporations (C and S), personal service corporations, cooperatives, insurance companies, controlled foreign corporations, estates and trusts, and tax-exempt organizations use this form to request an accounting method change. If the change is one for which automatic consent is granted, the completed Form 3115 must be filed in duplicate, and by the due date (including extensions) for the return for the year of the change. The original 3115 is attached to the taxpayer's return, and a signed copy of the application must be filed with the IRS in Ogden, UT no earlier than the first day of the year of the change (and no later than the filing of the original with the return). The mailing address is included in the 3115 instructions, available at: https://www.irs.gov/pub/irs-pdf/i3115.pdf. The IRS does not send acknowledgements of receipt for automatic change requests.

For non-automatic change requests Form 3115 must be filed during the tax year for which the change is requested, unless otherwise provided by published guidance. (See Rev. Proc. 2015-13, section 6.03(2)). Form 3115 is filed with the IRS National Office at the address listed in the address chart in the 3115 instructions. The Form 3115 should be filed as early as possible during the year of change to provide adequate time for the IRS to respond prior to the due date of the taxpayer's return for the year of change. The IRS normally sends an acknowledgment of receipt within 60 days after receiving a Form 3115 filed under the non-automatic change procedures.

No extensions for filing Form 3115 are granted unless for very unusual circumstances and an additional fee may apply. However, a taxpayer filing for an **automatic change** is granted an **automatic extension of six months** from the unextended due date of the return for the year of change if the taxpayer: (1) timely filed (including extensions) its federal income tax return for the year of change, (2) files an amended return within the six-month extension period in a manner consistent with the new accounting method, (3) attaches the original application to the amended return, (4) files a copy of the application with the Ogden office no later than when the original is filed with the amended return, and (5) attaches a statement to the application that the application is being filed pursuant to Reg. §301.9100-2. (Rev. Proc. 2015-13, 6.03(4)(a)).

Income Adjustments: When changing an accounting method under the various revenue procedures noted above, an income adjustment is required under ***§481***. This adjustment must be made to account for changes in taxable income due to the change. The adjustment is made over 4 tax years beginning with the year of the change. However, a taxpayer can elect to account for an adjustment in one year if the total is less than $50,000 (Rev Proc 2015-13). It is probably best for taxpayers to accelerate negative adjustments of less than $50,000 into one year and use the 4-year period for positive adjustments. There are no different adjustment periods for different categories of accounting method changes.

Example - A Change from Cash to Accrual: *Moran got permission from the IRS to change its accounting method from cash to accrual for reporting cost of goods sold. The firm's* ***accrual basis gross profit*** *for 2019 is computed as follows:*

Sales		*$100,000*
Beginning inventory	*$ 15,000*	
Purchases	*60,000*	
Less: Ending inventory	*<10,000>*	
Cost of goods sold		*<65,000>*
Gross profit		*$ 35,000*

- ***Adjustments to above calculation:*** *At the end of 2018, Moran had accounts receivable of $25,000 and accounts payable for merchandise of $34,000.*
- ***Handling the Receivables:*** *The receivables of $25,000 were never included in income since Moran was on the cash basis in 2018. In 2019, the $25,000 wasn't included in the accrual basis sales since the sales were made in the prior year. Thus, a $25,000 adjustment to income is required to prevent the receivables from being left out altogether.*
- ***Handling the Payables:*** *In addition, the $34,000 in payables must be considered. They weren't included in 2019 purchases shown above nor were they taken as deductions in 2018.*

- ***Inventory:*** *Another adjustment is needed to correctly reflect the $15,000 beginning inventory that Moran had deducted in the previous year due to the cash method. The cost of goods sold shown above for 2019 was increased by the beginning inventory and resulted in a double deduction.*
- ***Net Adjustment:*** *The net adjustment due to the accounting method change, then, is:*

Beginning inventory (deducted in both 2018 and 2019)	*$15,000*
Beginning accounts receivable (never included in income)	*25,000*
Beginning accounts payable (not deducted)	*<34,000>*
Net increase in taxable income	*$ 6,000*

INVENTORY

Inventory is a frequent audit target. This audit issue will likely lessen for most small businesses, since for tax years beginning after 2017, a business is not required to use inventories or account for them using the accrual method if it meets the $25 million gross receipts test explained above for using the cash method of accounting. Therefore, the information below will now generally apply only to larger businesses that don't meet the gross receipts test.

Rules for inventory when inventories are required:

- Inventories are necessary for a business to clearly reflect income when there is sale of goods. They must conform to the best accounting practice in a trade or business.
- Inventories include all finished goods, goods in process, and raw materials and supplies that will become part of the product (including containers).
- Physical possession of merchandise is not required for it to be part of inventory.
- Methods used to handle and value inventory must be followed consistently.
- Inventory must be valued at either (1) cost, or (2) lower of cost or market value.

Determining inventory cost:

- **Cost:** Use actual cost of merchandise, less discounts plus freight and other handling charges.
- **Uniform capitalization (UNICAP):** ***§263A*** significantly affects inventory rules. For inventory and property produced by a taxpayer, (a) the direct cost of such property, and (b) such property's share of those indirect costs (including taxes) part or all of which are allocable to such property must be capitalized. To value inventory under UNICAP, a producer must:
    1. Classify all costs into these categories: (a) production, (b) general administration, and (c) mixed services.
    2. Allocate mixed service costs (on a reasonable basis, e.g., according to number of employees, or using an elective method) to production and general administration expenses.
    3. Allocate production costs between the cost of goods sold and ending inventory.
- **Lower of Cost or Market:** This valuation method is available for most taxpayers except those who use the Last-In-First-Out Method (LIFO) method. LIFO users must value inventory at cost. Write-down of damaged merchandise is not considered an application of the lower of cost or market method. To use this method, each item in inventory must be valued at lower of cost or market.

Estimating inventory shrinkage: A taxpayer's inventory must be maintained under a method that clearly reflects income. Normally inventory is valued at cost. Under former law, it was uncertain as to whether a taxpayer was in compliance with allowable inventory valuation rules when the taxpayer made adjustments to year-end inventory for estimated "shrinkage"--i.e., inventory decrease due to items such as undetected theft, breakage, bookkeeping errors, etc.

Under current law, the adjustment for estimated inventory shrinkage may only be claimed by the taxpayer (business) if:

- The taxpayer normally does a physical count of inventories at each location on a regular, consistent basis, and
- The taxpayer makes proper adjustment to those inventories and to estimating methods if those estimates are greater than or less than the actual shrinkage.

CALIFORNIA DIFFERENCES

New Law & Stuff

AB 91 (signed by the governor 6/27/2019) generally brings California into conformity with the accounting method simplifications made by the TCJA. The legislation is effective for tax years beginning on or after January 1, 2019. This is one year later than the Federal effective date of 2018 which creates a disparity for the 2018 tax year between federal and CA law.

Retroactive Elections - However, AB 91 also included a provision allowing taxpayers to make a retroactive election to have the new rules apply to tax year 2018. While CA develops final procedures a taxpayer can retroactively adopt the new Federal small business accounting rules on either an original or amended paper-filed 2018 CA return by doing the following:

- Include a statemenrt stating the taxpayer is electing the Federal TCJA small business accounting for a year beginning on or after January 1, 2018. Specify in the statement which election(s) is/are being adopted.
- Add “AB 91 – Small Business Accounting Election” in blue ink on the top of the first page.
- Mail the return to: Franchise Tax Board, PO Box 942857, Sacramento, CA 94257-0500

Trade or Business	3.02.01

- Profit Presumption
  - Breeding, training, showing or racing horses if a profit in 2 of 7 consecutive years
  - Other businesses if a profit in 3 of 5 consecutive years
- Limit on deductions and losses – order of use
  - Home mortgage interest, taxes, casualty losses
  - Deductions that don't reduce basis
  - Deductions that do reduce basis (i.e., deprecation)

HOBBY LOSS RULES

Although this chapter's title is Profit Motive, these rules are also commonly referred to as the hobby loss rules. Under the hobby loss rules, where an activity of the taxpayer is deemed to be a hobby (not for profit) the income is reported on line 8 (other income), Schedule 1, of the 2019 draft of Form 1040 (Schedule C Instructions, Page 1) and any deductions, to the extent of the income, are reported as an itemized deduction on Schedule A. Since such an activity generally has no profit there are no SE tax issues.

However under TCJA, tier 2 miscellaneous deductions are suspended for years 2018 through 2025. Therefore for those years, hobby expenses will not be deductible, making the entire income from a hobby taxable.

Sporadic or one-shot deals, hobbies, or diversions are not a trade or business and therefore not subject to SE tax (Commissioner v. Groetzinger, SCt, 87-1 and Langford v. Commissioner, Dec. 44,891(M), TC Memo. 1988-300, aff'd, CA-6,). Thus a hobby is taxable for income tax purposes but not for self-employment tax.

DETERMINING IF AN ACTIVITY IS REALLY A BUSINESS

The tax law doesn't really give a definition of the term ***"trade or business,"*** probably because no single definition will apply in all cases. But certainly to be considered a trade or business, an activity must be motivated by the taxpayer's profit motive (even if that motivation is unrealistic!) ***(Reg. §1.183-2(a)***. Along with profit motive, the taxpayer must carry on some kind of economic activity.

In ***Gajewski, R v. Comm., 723 F2d 1062 (USCA 2, 12-15-83)***, the court held that a taxpayer who didn't hold himself out to others as offering goods or services, wasn't in a trade or business. **Note:** Taxpayer was a professional gambler who bet solely for his own account. Denial of his business deductions "above the line" turned the expenses into Schedule A deductions. The result was that minimum tax kicked in for the taxpayer.

In ***Ditunno v. Comm., 80 TC 363 (1983)***, the court ruled that the proper test of whether an individual was carrying on a trade or business required examination of ***all facts involved***. Here a full-time gambler was determined to be in a trade or business of gambling and his gambling losses were business expenses, even though they weren't related to offering goods and services. The taxpayer had no other gainful employment.

In ***Groetzinger (1987, S Ct) 82 TC 792 (1984),*** the Supreme Court held that a full-time gambler who bet solely on his own account was engaged in a trade or business of gambling. This prevented his gambling losses from being tax preference items for the purpose of computing minimum tax.

FACTORS USED TO DETERMINE IF AN ACTIVITY IS ENGAGED IN FOR PROFIT

No one factor is decisive, but all must be considered together in making a determination of whether an activity is for profit. The factors are:

(1) **Is the activity carried on in a businesslike manner?** Maintenance of complete and accurate records for the activity is a definite plus for a taxpayer, as is a business plan that formally lays out the taxpayer's goals and describes how the taxpayer realistically expects to meet those expectations.

(2) **How much time and effort does the taxpayer spend on the activity?** The IRS looks favorably at substantial amounts of time spent in the activity, especially if the activity has no great recreational aspects. Full-time work in another activity is not always a detriment if a taxpayer can show the activity is regular; time spent by a qualified person hired by the taxpayer can also count in the taxpayer's favor.

(3) **Does the taxpayer depend on the activity for a source of income?** This test is easiest to meet when a taxpayer has little income or capital from other sources (i.e., the taxpayer could not afford to have this operation fail).

(4) **Are losses from the activity the result of sources beyond the taxpayer's control?** Losses from unforeseen circumstances like drought, disease, fire, etc., are legitimate reasons for not making a profit. The extent of losses in a start-up phase of a business also needs to be looked at in the context of the kind of activity involved.

(5) **Has the taxpayer changed business methods in attempts to improve profitability?** Document efforts of the taxpayer to turn the activity into a profit-making venture.

(6) **What is the taxpayer's expertise in the field?** Extensive study of this field's accepted business, economic, and scientific practices by the taxpayer before entrance into the activity is a good sign that profit intent exists.

(7) **What success has the taxpayer had in similar operations?** Document how the taxpayer turned a similar operation to a profit-making venture in the past.

(8) **What is the possibility of profit?** Even though losses might be shown for several years, the taxpayer should try to show that there is <u>realistic</u> hope of a good profit.

(9) **Will there be a possibility of profit from asset appreciation?** Although profit may not be derived from current operations of an activity, asset appreciation could mean the activity will realize a large profit when assets are disposed of in the future. However, the appreciation argument may mean nothing without the taxpayer's positive action to make the activity profitable in the present.

PRESUMPTION OF PROFIT MOTIVE

There is a *presumption that a taxpayer has a profit motive* if an activity shows a profit for any **three or more years during a period of five consecutive years**. However, if the activity involves breeding, training, showing or racing horses, the period is two out of seven consecutive years. (Reg Sec 1.183-1)

Election To Delay Determination of Profit Intent - A taxpayer may elect to get an IRS determination of whether an activity is for profit if he/she does so before the end of the fourth tax year (sixth year for horse activities) following the year he/she first engages in the activity. In effect, the election suspends the application of the presumption until the taxpayer has a chance to prove himself/herself in the activity. The election can be made within three years of the unextended due date of the return for the year the taxpayer first engaged in the activity. However, it can't be made later than 60 days after the taxpayer receives a written notice from the IRS that proposes to disallow deductions attributable to a not-for-profit activity.

To make the election, file ***Form 5213, Election to Postpone Determination as To Whether the Presumption That an Activity is Engaged in for Profit Applies.*** This form is not filed with a taxpayer's tax return, but is filed separately with the IRS Service Center where the taxpayer normally files a return or with the office that sent a disallowance of deductions notice if applicable. The election automatically extends the statute of limitations until two years after the date for filing the return for the last year of the presumption period. This extension applies only to the activity for which the taxpayer has made the election.

HOBBY LOSS OR NOT FOR PROFIT LOSS

The question sometimes arises what is the difference between a "hobby loss" and "not for profit determination"? In actuality, they end up being treated the same for income tax purposes. The hobbyist does what he does because he enjoys doing it, didn't do it with the goal of making a profit and maybe gets a little income from it. Someone who thinks they are in a trade or business but doesn't conduct the activity in a businesslike way and ends up with a loss may find the IRS making the determination the taxpayer wasn't in it to make a profit after all.

LIMIT ON DEDUCTIONS AND LOSSES

If an activity is not carried on for profit, deductions are used only in the following order, are limited to three categories, and are allowed ***only if a taxpayer itemizes***.

Category 1. This category includes deductions for home mortgage interest, taxes, and casualty losses. Report them on the appropriate lines of Schedule A.

Category 2. Deductions that don't result in an adjustment to the basis of property are allowed next, **but only to the extent gross income from the activity is more than the deductions under Category 1**. Most business deductions, such as those for advertising, insurance premiums, interest, utilities, wages, etc., belong in this category.

Category 3. Business deductions that decrease the basis of property are allowed last, **but only to the extent the gross income from the activity is more than deductions under the first two categories**. The deductions for depreciation and amortization belong in this category.

Additional limit PRIOR to 2018 - Individuals must claim the amounts in categories (2) and (3) as miscellaneous deductions on Schedule A, subject to the 2% of AGI reduction, **and as a result**, they are not deductible for alternative minimum tax.

Additional limit AFTER 2017 – Due to the itemized deduction limitations imposed by TCJA the ability to deduct not-for-profit activity expenses other than home mortgage interest and taxes has been suspended for the years 2018 through 2025. That is because casualty losses (other than disaster losses) and miscellaneous deductions subject to the 2% of AGI reduction (tier 2 deductions) are suspended and therefore not allowed at all for 2018 through 2025. This includes depreciation which for a not-for-profit activity would be a tier 2 miscellaneous deduction. As result, the calculation illustrated below will not apply for years 2018 through 2025.

EXAMPLE - Not-For-Profit Computation – Allocation of Category 1 through 3 deductions for years other than 2018 through 2025 - *Ray is engaged in a not-for-profit activity. The income and expenses of the activity are as follows:*

Gross income		*$3,200*
Less expenses:		
Real estate taxes	*$700*	
Home mortgage interest	*900*	
Insurance	*400*	
Utilities	*700*	
Maintenance	*200*	
Depreciation on car	*600*	
Depreciation on machine	*200*	
Total expenses		*3,700*
Loss		*$ 500*
Limit on deductions		*$3,200*
Taxes and interest	*1,600*	
Insurance, utilities and maintenance	*1,300*	*2,900*
Available for depreciation		*$ 300*

The $300 for depreciation is divided between the car and machine (and the basis reduced accordingly), as follows:

$600/$800 x $300 = $225 depreciation for car

$200/$800 x $300 = $75 depreciation for machine

The $1,600 for Category (1) items is deductible as part of the taxes and interest expense on the appropriate lines on Schedule A. The remaining $1,600 (the total of Categories (2) and (3)) is added to Ray's other miscellaneous deductions on Schedule A (Form 1040) that are subject to the 2% limit.

Self-Employment Tax – A trade or business for purposes of determining whether an individual has self-employment income, subject to the self-employment (SE) tax, has the same meaning as when used for federal income tax purposes in allowing trade or business expenditures under Code Sec. 162 (i.e., a continuous, regular activity engaged in with a profit motive) (Code Sec. 1402(c); Reg § 1.1402(c)-1).

However, since the gross income from a not-for-profit activity (hobby) is reported on (1040 Schedule 1, line 8, 2019 draft), make sure your software does not assess SE tax on it since the activity isn't a trade or business. Use Schedule C when the activity is a trade or business of a sole proprietor.

SELECTED CASES INVOLVING PROFIT MOTIVE

Anthony Ranciato v. Com., (1995, CA2) and Ranciato, TC Memo 1996-97 - This case points out that the hobby-loss limits can apply to retail businesses and other traditionally for-profit enterprises. Taxpayers engaging in all activities, not just hobby-type activities, need to operate in a businesslike manner and take steps to demonstrate a profit-making intent. The Second Circuit had questioned whether a retail business can be an activity not engaged in for profit and the Tax Court, on review, countered with an emphatic, "Yes, it can."

Three other cases found that taxpayers lacked a profit objective with respect to businesses typically run for profit: ***Houston, TC Memo 1995-159*** (retail gun store); ***Ypsilantis, TC Memo 1992-644*** (import/export commodities business); and ***Hutchinson, TC Memo 1988-568*** (retail cosmetics business).

Lamb, TC Memo 1996-166, shows that a taxpayer whose business suffers hard times won't necessarily be challenged when he or she claims losses. IRS denied losses to a fisherman, but the Tax Court ruled against the Service. It ruled that the taxpayer's failing health, rather than lack of profit motive, business acumen or effort, accounted for the losses.

Drummond v. Comm., TC Memo, 1997 involved a psychologist's horse and cattle activities. The activities were both determined to be not-for-profit. The taxpayer didn't show that the cattle were kept for horse pasture management and animals weren't kept on the same land. The taxpayer didn't keep adequate books or carry on horse activities in a businesslike manner. He didn't show that he expected the horses to appreciate in value or prove the horses' alleged unforeseen injuries affected the profitability.

In ***Phillips et ux. v. Comm., TC Memo, 1997,*** a nurse anesthetist and wife were engaged in Arabian horse breeding for profit, in spite of initial losses. Taxpayers carried on activities in a businesslike manner where they have a valid business expansion plan, kept accurate records and calculated income necessary to produce profit. Expansion delays resulted from the wife's poor health, the death of a champion mare's 1st foal and the taxpayers' bankruptcy. The taxpayers tried to cut costs by constructing small barns and attempting to sell some horses.

In a review of a tax court decision, ***Courville v. Comm., CA 9, 79 AFTR 2d 97-1636,*** a golfing activity was found to be not-for-profit. Taxpayer's golfing activity was denied in spite of the time and effort the taxpayer put into the activity. The taxpayer didn't keep complete and accurate records and made no profit in 4 years after beginning the activity. The activity also had recreational and personal elements.

In Kelly v. Comm., TC Memo 1997-185, the court denied deductions for state and local taxes and unreimbursed employee business expenses in excess of the amount the IRS allowed. The taxpayer didn't prove the claim that her car was used 95% for business. She didn't show that she made payments on or business use of a leased computer and she didn't support tax deductions.

Lucid, et ux. v. Comm., TC Memo 1997-247 involved a full-time plastic surgeon and psychotherapist. They couldn't deduct their S corporation losses from yacht and boating equipment sales due to lack of profit motive. Despite their advertising in boating magazines and their attendance at boat shows, their activities weren't carried on in a businesslike manner.

CALIFORNIA DIFFERENCES

California follows the federal profit motive rules and that a hobby loss is not deductible. However, unlike federal in years 2018-2025, California allows miscellaneous itemized deductions that are subject to the 2% of AGI reduction. Therefore, a hobbyist who itemizes his or her deductions for California will be allowed to deduct hobby-related expenses within the limits described above in the "Limit on Deductions and Losses" section and the "additional limit prior to 2018" provision, which continues to apply for California post-2018.

NOTES

AT-RISK RULES

Overview

- **At Risk** – To take a deduction, a taxpayer must have:
  - Paid the expenses, OR
  - Be responsible for paying them.
- **Applies to:**
  - Individuals
  - Estates and Trusts
  - Closely held C-corporations
- **At-Risk Activities:**
  - Holding, producing and distributing motion picture films/videotapes
  - Farming
  - Leasing Section 1245 property
  - Oil and gas exploration/exploitation:
    - As a trade or business, or
    - For production of income.
  - Any activity where a taxpayer carries on a trade or business or engages in income production.
  - Real property placed in service after 1986
    - Exception for real estate activities subject to non-recourse financing

RAPID FINDER

Pubs Forms

- **Related IRC and IRS Forms and Publications**
  - **Publication 925 –** Passive Activity and At-Risk Rules
  - **Form 6198 –** At-Risk Limitations
  - **IRC Sec 465**

New Law & Stuff

In Chief Counsel Advice 201805013, the IRS has determined that a taxpayer couldn't treat business activities, conducted through three S corporations and a limited liability company (LLC) in which he was a minority owner, as a single activity for purposes of the at-risk rules. Accordingly, the taxpayer, who had personally guaranteed a line of credit that had been utilized by only the LLC, couldn't deduct losses for all four entities on the basis of the personal guaranty.

The Details

AT RISK - Losses from certain activities are limited to the amount a taxpayer has "at risk" in the activities. The at-risk rules apply to individuals, estates and trusts, and certain closely held C corporations. Form 6198, At-Risk Limitations, must be filed by taxpayers who have a loss from an at-risk activity in which they have invested amounts for which they are not at risk.

What Does It Mean To Be "At Risk"? To take a deduction for an item on a tax return, a taxpayer must have either actually paid for the item or be responsible for paying it. Good intentions aren't enough to put a taxpayer at risk. He/she must have either expended cash for something or become liable to pay for it through a credit purchase. A mere promise to pay is not enough.

Example - The Meaning of At Risk - *John, a self-employed engineer using the cash method of accounting, has subscribed to The Journal of Mechanical Engineers for many years. His subscription expired in November 2018, but he didn't actually renew until January 2019, because he was short on cash. He'd like to take a business expense deduction in 2018 based on his intention to renew. However, since he didn't follow through with the intention in 2018, he gets no deduction on his 2018 return. He would claim the expense on his 2019 return. If John had renewed the subscription by December 31 by charging the cost to his credit card, he would have been at risk even though he had not paid any cash out of pocket, and he then could have deducted the expense on his 2018 return.*

At-Risk Activities - The at-risk rules apply to the following types of activities:

(1) Holding, producing and distributing motion picture films and/or videotapes.

(2) Farming.

(3) Leasing Section 1245 property.

(4) Oil and gas exploration/exploitation as a trade or business or for production of income; Geothermal exploration/exploitation for percentage depletion purposes.

(5) Any other activity where a taxpayer carries on a trade or business or engages in income production. Real property placed in service after 1986 is part of this category. However, there is an exception for real estate activities subject to nonrecourse financing (see additional information below).

Computing the At-Risk Amount - To compute the amount a person has at risk in an activity, add the following amounts:

(a) Cash contributed to the activity;

(b) Adjusted basis of property contributed to the activity;

(c) Amounts borrowed for use in the activity (in the case of investors in a partnership, a partner must generally be personally liable for the repayment or must have pledged property to secure the loan).

The amount at risk [(a) + (b) + (c)] is then either reduced by losses/distributions from the activity or increased by its net profits.

Losses and Recapture - Losses from an activity that are not allowed because of the at-risk limits are treated as deductions from that activity in the following year; the loss carried over can be used as a deduction against the following year's income from the same activity (subject to the amount at risk in the following year). If losses can't be used in the following year, they can be carried over indefinitely to later years until they are able to be used.

Application of at-risk merely limits the amount of losses which can be deducted; it doesn't affect the basis of a taxpayer's asset. Thus, for example, a partner's basis in a partnership interest is generally unaffected by at-risk disallowances.

There is recapture of previously allowed losses when the at-risk amount goes below zero. The application of this rule means that if the amount at risk is reduced below zero (whether by distributions to the taxpayer, changes of liabilities from recourse to nonrecourse, etc.), a taxpayer recognizes income to the extent of the negative amount. This amount is limited to the excess of losses previously allowed in an activity over any amounts previously recaptured. The amount added to income is treated as a deduction allocable to the activity in the first succeeding year and is allowed if and when the taxpayer's at-risk amount increases.

Recapture income isn't treated as income from an activity for purposes of determining whether current or suspended losses are allowed under the passive loss rules. This rule prohibits using losses to offset at-risk recapture income.

Special At-Risk Rules for Real Estate - Generally, taxpayers are not at risk for nonrecourse loans (loans for which they are not personally liable). However, there is an exception to the at-risk limitations for nonrecourse loans on real property when the loans are transacted in arms' length transactions. To qualify for this exception, the lender must not be:

(a) Related to the taxpayer, as defined in ***§267(b)*** (unless the loan provides for commercially reasonable interest and terms);

(b) The seller of the property (or a person related to the seller);

(c) A party who is paid a fee, because of the taxpayer's investment in the property (e.g., a realtor).

At-Risk and Partnership Interests - A partner's at-risk amount is determined using the following information:

(1) The type of activity the partnership is involved in (e.g., real estate, etc.),
(2) Analysis of the partner's capital account on Schedule K-1 (Form 1065), and
(3) The partner's share of partnership liabilities (shown on the K-1 in Part II, item K).

Example - Computing a Partner's At-Risk Amount - *On January 15, Megan invested $20,000 in Rhys Key Business, a limited real estate partnership; she was a 12% owner. Her K-1 from the partnership showed the following information:*

Rental loss	*$26,000*
Share of liabilities:	
Qualified nonrecourse *(First Bank)*	*14,000*
Nonrecourse *(loan on real property owned by partnership & payable to property seller)*	*57,600*
Capital account:	
Capital account 01/01	*0*
Capital contributed	*20,000*
Megan's share of loss	*<26,000>*
Capital account 12/31	*<6,000>*

Megan's amount at risk is $34,000 ($20,000 investment plus her share of qualified nonrecourse liabilities). The nonrecourse liability of $57,600 can't be considered as part of her at-risk amount because it is payable to the seller of the underlying property. Megan will be able to deduct a loss of $26,000 on Schedule E of her tax return (subject, of course, to the passive limitations).

Form 6198 - Form 6198, At-Risk Limitations, is a highly misunderstood form. It serves two purposes in a tax return.

(1) It makes certain that the taxpayer doesn't get a deduction once he/she reaches the limit of risk; and
(2) It tracks disallowed deductions so that they may be used in the future when the at-risk position changes.

The at-risk limit goes down when a taxpayer is able to deduct items on his/her tax return, or when he/she gets distributions from the venture. At-risk limit goes up when a taxpayer has income from the activity or makes a capital contribution to it.

The instructions to Form 6198 say that ***if there is any nonrecourse financing*** in an activity, the form must be filed.

Using Form 6198: Assume Dan invested $20,000 in a limited partnership in January Year #1. He received the following K-1s in Years 1-3.

TAX YEAR	ORDINARY INCOME	PORTFOLIO INCOME
Year #1	<$ 9,000>	$200
Year #2	<$10,000>	$100
Year #3	<$ 8,000>	$ 50

The K-1s do not indicate any recourse or nonrecourse liabilities.

- **Part I:** Part I of Form 6198 reports the income (loss) for the current year. Ordinary income is separated from gains and losses and from other income and other deductions.
- **Parts II and III:** Parts II and III allow for two different ways of finding at-risk amounts. Either can be chosen. The bottom line answer is the amount at risk just before preparing the current-year tax return. If Part II is used, the taxpayer's real basis in the partnership must be known from year to year. Part III is designed to be used if the current basis is not known.
- **Part IV:** Part IV compares the income or loss from Part I with the limit from Part II or III.

Dan's Year #1-#3 6198 Data

Form 6198, Part I	**Year #1**	**Year #2**	**Year #3**
LINE 1: Enter the entire amount of income or loss, even if there is a limit.	($9,000)	($10,000)	($8,000)
LINE 3: Enter the portfolio income	$200	$100	$ 50
LINE 5: The total of ordinary loss and portfolio income	($8,800)	($9,900)	($7,950)

Form 6198, Part II - The income items from Part I should not be included here. This section will show any entries that are reflected on the tax return which affect the at-risk limit.

LINE 6: Balance of Investment			
The amount invested	$20,000		
Year #1 C/O ($20,000 less $8,800).		$11,200	
Year #2 C/O ($20,000 less $8,800 less $9,900).			$1,300
LINE 7 & 9	0	0	
LINE 10(b) Net amount at risk prior to preparation	$20,000	$11,200	$1,300

Form 6198, Part IV

LINE 20: The at-risk amount prior to preparation	$20,000	$11,200	$1,300
LINE 21: Allowed Loss (if passive allowed)	($8,800)	($9,900)	($1,300)

Bottom line for Year #1: *The taxpayer can write off a net loss of $8,800, since the basis in the partnership is $20,000. Note that Line 5 plus Line 10 gives the taxpayer's at-risk limit at the end of Year #1. This number will be used to begin the next year's computation.*

Bottom line for Year #2: *The taxpayer started the year with an at-risk limit of $11,200 and had a net loss of $9,900 passed through from the partnership. The loss can be written off, but now the taxpayer's at-risk limit as of the end of Year #2 is just $1,300. (Line 5 plus Line 10).*

Bottom line for Year #3: *The taxpayer started the year with an at-risk limit of $1,300 and had a net loss of $7,950 passed through from the partnership. The Year #3 loss that can be written off is limited to $1,300 due to the at-risk rules. The remaining $6,650 is disallowed. For Year #4, the at-risk limitation is ($6,650), the amount of the disallowed loss (Line 5 plus Line 10). This disallowed loss can be carried to later tax years if not absorbed by profits or additional investment amounts in Year #4 or later years.*

Several other tax limitations may disallow the losses, which are allowed to pass through due to Form 6198 computations. Always compute the at-risk limit first and use the amount allowed on Form 6198 as the basis for computing the other limits on the tax return--passive limits, capital loss limits, etc.

NOTES

MACRS/ADS PROPERTY

MAJOR SUBJECT MATTER INCLUDED IN CHAPTER

RAPID FINDER

- **Bonus Depreciation**

  - Acquired & Placed In Service After 9/27/17
    - 100% through 2022
    - Phase-out 2023 through 2026
  - Acquired Before 9/28/17 and Placed In Service After 9/27/17
    - In Service 2017: 50%
    - In Service 2018: 40%
    - In Service 2019: 30%

Recovery Periods

- **Cost Segregation Depreciation –** See details starting on page 3.04.11.
- **3 Year Property** – Examples: tractor units for over-the-road use, race horses over two years old when placed in service (all race horses regardless of age 2009 through 2017), other horses over twelve years old when placed in service. **5 Year Property** – Examples: computers, typewriters, copiers, duplicating equipment, heavy trucks, trailers, cargo containers, autos, motorcycles, light-duty trucks, certain technological and research equipment.
- **7 Year Property** – Examples: office furnishings, fixtures and equipment, railroad track and theme park structures
- **10 Year Property** - Example: water transportation equipment.
- **15 Year Property** – Examples: municipal sewage treatment plants, telephone distribution plants, two-way communication equipment, parking lots, sidewalks, roads, landscaping and fences.
- **20 Year Property** – Examples: municipal sewers and farm buildings.
- **27.5 Year Property** – Examples: residential rental property and mobile homes.
- **31.5 Year Property** - Any real property which is not residential rental property and which was acquired before 05/13/93.
- **39 Year Property** - Nonresidential real property placed in service after 05/12/93.

Repair & Improvement Regulations

The IRS issued temporary and identical proposed regulations (**T.D. 9564; REG-168745-03**) regarding the treatment of amounts paid to acquire, produce, or improve tangible property, including rules on determining whether costs related to tangible property are deductible repairs or capital improvements. These regulations, which are generally effective for tax years beginning on or after **January 1, 2014** (Notice 2012-73), affect all taxpayers that acquire, produce or improve tangible property. These regulations are discussed in chapter 3.27.

- **Instructions Form 4562** – Depreciation & Amortization
- **IRC Sec 168**

MODIFIED COST RECOVERY SYSTEM (MACRS)

Form 4562, Depreciation and Amortization, is used to report depreciation and amortization deductions.

MACRS Recovery Period

- **Three-year property:** Generally, this includes property with an Asset Depreciation Range (ADR) class life of four years or less. Examples are tractor units for over-the-road use, race horses over two years old (all racehorses regardless of age 2009 through 2017*) when placed in service, other horses over twelve years old when placed in service.
- **Five-year property:** Includes property with an ADR class life of more than four but less than ten years. Examples are computers, typewriters, copiers, duplicating equipment, heavy trucks, trailers, cargo containers, autos, motorcycles, light-duty trucks, certain technological and research equipment. Also, appliances, carpets, furniture, etc., if used in a rental real estate activity.
- **Seven-year property:** Includes property with an ADR class life of ten years or more, but less than sixteen years. This category is also the "catch-all" for assets with no ADR assignment. Examples are office furnishings, fixtures and equipment, railroad track and theme park structures.
- **Ten-year property:** Includes property with an ADR class life of sixteen or more years, but less than twenty years. An example is water transportation equipment.
- **Fifteen-year property:** Includes property with an ADR class life of twenty or more, but less than twenty-five years. Examples are municipal sewage treatment plants, telephone distribution plants, two-way communication equipment, parking lots, sidewalks, roads, landscaping and fences.
- **Twenty-year property:** Includes property with an ADR class life of twenty-five years or more, other than 1250 real property (residential and nonresidential). Examples are municipal sewers and farm buildings.
- **Twenty-seven-and-one-half-year property:** Includes real property (Section 1250) that is residential rental property and mobile homes. To qualify as residential, the property must derive 80% or more of its rental income from its dwelling units. A hotel or motel with more than half of the units used on a transitory basis IS NOT a part of this class, notwithstanding percent of income derived from rental. Buildings used to provide housing to seniors in communities that offer a range of services (e.g., from independent to assisted living to nursing care) as well as housing are properly classified as residential rental property for depreciation purposes according to an IRS Internal Legal Memorandum (ILM 201147025). Thus, the buildings may be depreciated over a 27.5-year recovery period, rather than the 39-year period that applies to nonresidential rental property.
- **Thirty-one-and-one-half-year property:** Includes any real property which is not residential rental property and which was acquired before 05/13/93.
- **Thirty-nine-year property:** For nonresidential real property placed in service after 05/12/93, the depreciation period is 39 years. The old rules continue to apply to property placed in service before 01/01/94, if the taxpayer had a binding contract before 05/13/93, or construction of a property by or for the taxpayer or a "qualified person" began before 05/13/93. A "qualified person" is anyone who transfers his/her rights in a contract or the property itself to the taxpayer before the property is placed in service.
- **Indian reservation property:** "Qualified Indian reservation property" is that which is used predominantly in a trade or business within an Indian reservation and benefits from shortened depreciation periods. The shortened depreciation periods are as follows:

Indian Reservation Property	
Class	**Recovery Period (Yrs)**
3-year	2
5-year	3
7-year	4
10-year	6
15-year	9
20-year	12
Nonresidential rental	22 (31.5 prior to 1993)
Residential	27.5 (Same as non-reservation)

The same shortened lives apply under the AMT system; thus, there is no adjustment for such property under AMT. These rules are effective for property placed in service after 12/31/93 and before 01/01/18*. *(IRC § 168(j)(8))*

**Extended through 2017 by the Bipartisan Budget Act of 2018, signed into law Feb. 9, 2018*

For tax years beginning after December 31, 2015, a taxpayer is permitted to make an election out of the special recovery periods. If the election is made for any class of property for any tax year, the special recovery periods do not apply to all property in that class placed in service during that year for which the election out is made. *(Code Sec. 168(j)(8) as added by the PATH Act of 2015).*

"Qualified Rent-to-Own Property" - Qualified rent-to-own property is that held by a rent-to-own dealer under a rent-to-own contract. A **"rent-to-own dealer"** is a person in the business of entering arrangements like "Lease with Ownership Option," and a substantial portion of the contracts end with the property being returned to the dealer before receipt of all payments needed to transfer ownership of the property. Generally, rent-to-own property placed in service after Aug. 5, 1997 is assigned to the 3-year property class.

Class Life Guidelines - IRS Revenue Procedures give guidelines for class lives - Rev Proc 87-56, Rev Proc 87-57 and Rev Proc 88-22. These Rev Procs are generally effective for property placed in service after 12/31/86. To use the tables shown in Rev Proc 87-57, first determine the asset category by looking for its description in the left-hand column. The Class Life and MACRS recovery period are found to the right of the description. A recovery period labeled "ADS" (Alternative Depreciation System) is to be used to determine life for alternative minimum tax purposes or if ADS is elected for regular tax purposes.

General MACRS Methods – The following table outlines available MACRS methods:

Method	Type of Property	Possible Advantage
200% Declining Balance (DB) using the general depreciation system (GDS)	Nonfarm 3-, 5-, 7-, and 10-year property	Gives greater deduction during earlier years. Changes to SL when that method gives greater deduction.
150% DB using GDS	a. All farm property (except real property) b. All 15- and 20-year property♦ c. Nonfarm 3-, 5-, 7- and 10-year property*	Gives greater deduction in earlier years. Switches to SL when that method gives greater deduction.
SL using GDS	a. Nonresidential real property b. Residential real property c. Fruit or nut trees or vines d. All 3-, 5-, 7-, 10-, 15- and 20-year property*	Provides equal yearly deductions (except for 1st and last years)
SL using ADS	a. Property used outside U.S. b. Tax-exempt property c. Tax-exempt bond-financed property d. Imported property** e. Any property as t/p elects*	Provides equal yearly deductions

♦ From 10/23/04-onward, method is S/L for qualified leasehold improvements and restaurant property.
** Elective method*
*** See Section 168(g)(6) of IRC.*

Mid-Month Convention (applies to nonresidential real and residential rental property) - Consider all property placed in service or disposed of during any month as placed in service or disposed of in the middle of that month.

Example - Mid-Month Convention - *Bill purchased and placed in service a commercial building on 03/08, at a cost of $100,000 (excluding land). A full year's cost recovery on the building is $2,564 ($100,000/39). However, using the mid-month convention, Bill is considered to have placed his new property in service in the middle of March. He gets a MACRS deduction for 9.5 months [this is 79.17% (9.5/12) of the year]. Bill's MACRS deduction is $2,030 ($2,564 x .7917). Note that by using the IRS table for 39-year property, multiplying $100,000 by the percentage for Year 1, Month 3, the result is nearly the same ($100,000 x .02033 = $2,033).*

Half-Year Convention - Under the half-year convention, property gets only a half year of cost recovery in the first recovery year, regardless of what month the property is placed in service. The remaining half is deducted in the year following the last year of the recovery period. Thus, a property placed in service in January gets the same MACRS deduction as it would if it had been placed in service in December (assuming the mid-quarter convention doesn't apply). Property subject to the half-year convention gets half the yearly MACRS deduction in both the year placed in service and the year of disposition.

Example - Half-Year Convention *- Tom placed 7-year property in service on 8/10/13. The cost of the property was $10,000. He did not claim first-year bonus depreciation. Full year recovery deduction is $2,857 ($10,000/7 x 2). This amount must be modified using the half-year convention. Tom's first-year recovery deduction is $1,429 ($2,857/2).*

In 2014, Tom's recovery deduction is figured using the property's adjusted basis on 01/01/14 ($10,000 less $1,429 recovery deduction from 2013 = $8,571). Divide the adjusted basis by 7 and multiply the result by 2 in order to arrive at the 2014 deduction ($8,571/7 x 2 = $2,449).

Deductions for the following years: 2015 $1,749 [($8,571 less $2,449)/7 x 2]
2016 $1,249 [($6,122 less $1,749)/7 x 2]

After 2016, the straight-line method is more favorable. The remaining life of 3.5 years is used to compute Tom's deduction in 2017 and after.
2017-2019 $893 ($3,124/3.5)
2020 $445 remaining basis
IRS tables for 7-year property may be used to produce the same result with a much simpler computation. Multiply the cost of the property by the applicable percentage from the table for each year. Do not reduce the cost by the prior depreciation – use the original cost amount each year.

To use the half-year convention for taxpayers who have a short taxable year, treat an asset as acquired at the midpoint of the short year.

Mid-Quarter Convention - This convention treats property as placed in service (or disposed of) at the midpoint of the quarter in which it is placed in service (or disposed of). It applies when the basis of property placed in service during the last three months of the year is more than 40% of the basis of ALL property placed in service during the year. For assets placed in service when the bonus depreciation allowance applies, do not reduce basis by the bonus allowance for purpose of this test. If the 40% limit is exceeded, then the mid-quarter convention (RATHER THAN THE HALF-YEAR CONVENTION) applies to ALL property placed in service during the year. Disregard the basis of nonresidential real property, residential rental property, and Section 179 deductions, as well as the personal-use portion of the basis, when making the computation to determine whether the mid-quarter convention applies. Property placed in service and disposed of during the tax year is also not included in applying the 40% test.

To compute the deduction using the mid-quarter convention, figure the deduction for the full year, then apply the following percentages, depending on the quarter the property is placed in service:

QUARTER	PERCENTAGE
First	87.5
Second	62.5
Third	37.5
Fourth	12.5

Example - Mid-Quarter Convention *- Jackie purchased the following depreciable assets during the tax year:*

Date	*Asset Description*	*Cost*
02/10	*Office furniture (used)*	*$ 1,000*
10/01	*Computer (used)*	*5,500*
11/08	*Residential rental*	*$ 100,000*

The mid-quarter convention applies to the office furniture and the computer, because more than 40% of the total was purchased in the last three months of the year ($5,500/6,500 = 84.6%). For purposes of determining the 40% limit, disregard the rental property. The office furniture is 7-year property. 1st yr. deduction is figured: [$1,000/7 x 2].875 = $250. The computer is 5-year property. The 1st yr. deduction is figured: [$5,500/5 x 2].125 = $275.

Cost recovery on the residential rental is computed in the usual way, using the mid-month convention. The IRS has published tables that incorporate the mid-quarter convention. The complete tables are published in IRS Publication 946.

BONUS DEPRECIATION

Bonus depreciation was substantially changed under TCJA with one set of rules for property acquired and placed in service after 9/27/17 (the more common occurrence) and another set of rules for property acquired before 9/28/17 and placed in service after 9/27/17.

Although touted as unlimited expensing by the GOP and the press leading up to passage of the TCJA, this change is really the return of the 100% bonus deprecation, but with some differences.

Property Acquired Before 9/28/17 but Placed in Service After 9/27/17 – The old rules continue to apply. Thus depending upon which year the property is placed in service, the allowable bonus depreciation will be:

- 2017: 50%
- 2018: 40%
- 2019: 30%
- After 2019: None

Qualifying property includes that for which the **first use began with the taxpayer**:

- Most tangible personal property with a MACRS life of 20 years or less,
- Qualified improvement property, and
- Computer software (excluding software being amortized under Code Section 197).

Qualified improvement property means "any improvement to an interior portion of a building which is nonresidential real property if such improvement is placed in service after the date such building was first placed in service," except expenditures attributable to the enlargement of the building, any elevator or escalator, and the internal structural framework of the building do not qualify.

***Commentary*:** Bonus depreciation prior to September 28, 2017 only applied to new property while bonus depreciation after September 27, 2017 applies both to new and used property.

Property Acquired and Placed in Service After 9/27/17 - The Act allows 100% expensing of tangible business assets (except structures) acquired after September 27, 2017 and through 2022, at which point it begins to phase out *(IRC Sec. 168(k) amended by TCJA Sec. 13201(a).* The bonus percentage will be:

- 100% After September 27, 2017 and through 2022.
- 80% After Dec. 31, 2022 and before Jan. 1, 2024
- 60% After Dec. 31, 2023 and before Jan. 1, 2025
- 40% After Dec. 31, 2024 and before Jan. 1, 2026
- 20% After Dec. 31, 2025 and before Jan. 1, 2027
- Sunsets after 2026.

A special phase out applies to aircraft and certain long-production period property; see summary table below.

IMPORTANT DIFFERENCE

Note the differences in qualifying property under TCJA as opposed to the old law.

Old Law: first use must begin with the taxpayer
New Law: New or Used

Qualifying property can be **new or used** and the bonus rate applies to:

- All tangible assets except structures, with a MACRS life of 20 years or less,
- Qualified film productions.
- Qualified television productions.
- Qualified live theatrical productions.
- Certain fruit and nut trees grafted or planted after September 27, 2017.

Specifically excluded from qualified property is public utility property and vehicle dealer property.

Bonus Depreciation Percentage Phase-out Summary

Date Placed In Service	Qualified Property	Long-Production Period Property & Aircraft
1/1/17 Through 9/27/17	50%	50%
9/28/17 through 2022	100%	100%
2023	80%	100%
2024	60%	80%
2025	40%	60%
2026	20%	40%
2027	None	20%
Post- 2027	None	None

Commentary: Both the bonus depreciation and the Sec 179 expensing provide means of substantially reducing business profits. However, TCJA has added some new issues that need to be considered before utilizing these provisions.

1. The new Sec 199A deduction is based on qualified business income (QBI). QBI is generally net profits for Schedule Cs and Fs, real estate rentals (Schedule E), and flow-through income from partnerships and S-Corporations. Writing off large capital purchases reduces an entity's profit and in turn will generally reduce the amount of the Sec 199A deduction.
2. On the flip side, lowering a taxpayer's taxable income may be helpful in avoiding certain 199A phase-outs and limitations.

Revoking the Bonus Depreciation Election **-** Generally, the election out of bonus depreciation can only be revoked with IRS consent, except that if made on a timely filed return, the election-out can be revoked on an amended return filed within six months of the original return's due date (excluding extensions). (Reg § 1.168(k)-1(e)(7))

> *Reg § 1.168(k)-1(e)(7)(ii) - Automatic 6-month extension* - If a taxpayer made an election specified in paragraph (e)(1) of this section for a class of property, an automatic extension of 6 months from the due date of the taxpayer's Federal tax return (excluding extensions) for the placed-in-service year of the class of property is granted to revoke that election, provided the taxpayer timely filed the taxpayer's Federal tax return for the placed-in-service year of the class of property and, within this 6-month extension period, the taxpayer (and all taxpayers whose tax liability would be affected by the election) files an amended Federal tax return for the placed-in-service year of the class of property in a manner that is consistent with the revocation of the election.

Qualified Leasehold Improvement, Restaurant and Retail Improvement Property - Qualified leasehold improvement property, qualified restaurant property, and qualified retail improvement property **DO NOT QUALIFY** for bonus depreciation. The final regs issued September 16, 2019 make it clear that TCJA Sec. 13204 amended Code Sec 168(k) to eliminate the 15-year MACRS classification for these properties and therefore they revert to 39-year property. Since bonus deprecation only apples to property with a recovery period of 20 years or less, these properties no longer qualify for the bonus depreciation.

The preamble to the final regulations acknowledges there was confusion related to this issue and it was widely reported that these Act changes were in error. However, they go on to say that a legislative change must be enacted to provide for a recovery period of 20 years or less for qualified improvement property placed in service after 2017 in order for it to be qualified property. As a result, qualified improvement property has a MACRS life of 39 years and is not eligible for the bonus depreciation.

AMT Depreciation Relief – Property for which the bonus depreciation is claimed is exempt from the alternative minimum tax (AMT) depreciation adjustment, which requires that certain property depreciated on the 200% declining balance method for regular income tax purposes must be depreciated on the 150% declining balance method for AMT purposes. Under a change made by the PATH Act of 2015, if a taxpayer elects not to take the bonus depreciation allowance for qualified property, the property will not be subject to an AMT adjustment for depreciation if placed in service after 2015. In other words, AMT depreciation on property eligible for the bonus depreciation is computed the same way as for regular tax purpose with no AMT adjustment, even if the taxpayer elects out of bonus depreciation. (Code Sec. 168(k)(2)(G), as amended by the PATH Act)

Business autos – The so-called "luxury auto" rules impose a maximum annual deduction for depreciation. These limits are included in the table below. In years after 2007 when the bonus depreciation is allowed, the first-year luxury auto limits were increased by $8,000 if the taxpayer elected bonus depreciation. Under the TCJA of 2017 the bonus depreciation element of the luxury auto continues to be $8,000 for years 2015 through 2022, with the following exceptions: In the case of a passenger automobile acquired by the taxpayer before September 28, 2017, and placed in service by the taxpayer:

- September 28, 2017 through 2018, the limit is increased by $8,000.
- During 2019, the limit is increased by $4,800.

Other rules that apply:

- Related party rules.
- Section 179 is applied first and the basis adjusted prior to computing any bonus allowed.
- The bonus depreciation on "qualified property" under Code Sec. 168(k) is not taken into account as a cost in applying the percentage of completion method.

SPECIAL DEPRECIATION ALLOWANCES

Racehorses – All racehorses placed in service after 2008 and before 2018 are assigned a three-year recovery period under MACRS, regardless of their age. However, for racehorses placed in service after 2017, only those animals that are more than two years old when placed in service by the purchaser are in the three-year recovery period (Code Sec. 168(e)(3)(A)).

Computer Software

Purchased Software **-** Generally the costs of acquiring computer software must be capitalized, including the costs of acquiring readily available software, and amortized over 3 years (Reg. Sec. 1.263(a)-4(c)).

Software Acquired with Business - Software that is acquired in connection with the acquisition of a trade or business is generally an amortizable intangible under Sec 197 and as such is amortized over 15 years.

Special Rule for Off-the-Shelf Software – Taxpayers have the option of expensing off-the-shelf software under Sec 179.

Bonus Depreciation – Software amortized over 3-years qualifies for bonus depreciation (Sec 168(k)(2)(A)).

Bundled Software – Software included in the cost of hardware or other tangible property is treated as part of the cost of the hardware or other tangible property and depreciated under the rules applying to that hardware or other property, generally 5-year MACRS.

Self-Developed Software – The costs of developing computer software (other than Sec 197 Intangibles) can be recovered in one of the following ways:

(1) Consistently expensed currently (Sec 174(a)), or

(2) Consistently treated as capital expenditures amortized for 60 months from the date of completion of the development (Sec 174(b)), or

(3) Amortized over 36 months from the date the software is placed in service (Sec 167(f)(1)).

Costs of developing software may also qualify as research and experimental expenditures under Code Sec. 174.

Farm Equipment - For property placed in service after Dec. 31, 2017, in tax years ending after that date, the cost recovery period is shortened from seven to five years for any machinery or equipment (other than any grain bin, cotton ginning asset, fence, or other land improvement) used in a farming business, the original use of which commences with the taxpayer. *IRC Sec. 168(e)(3)(B)(vii) as amended by TCJA Sec. 13203(a)*

The required use of the 150% declining balance depreciation method for property used in a farming business (i.e., for 3-, 5-, 7-, and 10-year property) is repealed. Thus the 200% declining balance method can be used.

The 150% declining balance method continues to apply to any 15-year, or 20-year property used in the farming business to which the straight-line method does not apply, and to property for which the taxpayer elects the use of the 150% declining balance method. *IRC Sec. 168(b)(2) as amended by TCJA Sec. 13203(b)*

Trailer Depreciation - A trailer that includes kitchen, bathroom and sleeping facilities is rented long term to an unrelated party for use as their primary residence. What is the depreciable life of that trailer? Is it 5 years or 27.5 years?

A 27.5-year class is assigned to residential rental property (Sec 168(c)). Residential rental property is defined as a building or structure of which 80% or more of the gross rental income is from dwelling units. A dwelling unit is a house or apartment that provides living accommodations in a building or structure, but doesn't include a unit in a hotel, motel, or other establishment more than half of the units in which are used on a transient basis (Sec 168(e)(2)(A)). Otherwise-qualifying residential rental property can include manufactured homes, and, if permanently anchored, mobile homes.

The five-year MACRS class includes depreciable personal property with a class life of more than four years and less than ten years (Code Sec. 168(e)(1)), such as information systems (computers); heavy general purpose trucks; trailers and trailer-mounted containers; breeding or dairy cattle; and certain assets used in the drilling of oil and gas wells, construction, the manufacture of textile yarns, apparel, and other finished goods and the cutting of timber.

Whether a trailer is 1245 or 1250 property was also addressed in Rev Ruling 77-291. In that Revenue Ruling, the determination depended on the way the trailers are attached to the land and on how permanently the property is designed to remain in place; i.e., whether they are buildings. Where the property isn't affixed to the land and remains at all times movable, it is considered 1245 property.

So, whether the property is 5-year-life property or 27.5-year-life property seems to hinge on whether the trailer is permanently anchored in place (27.5-year life) or remains mobile (5-year life).

SPECIAL MACRS RULES*: MACRS* can't be used for the following property:

(1) Intangible property;
(2) Automobiles, where the taxpayer deducts expenses using the standard mileage rate.
(3) Most personal property if:
   (a) either the taxpayer or a party ***related*** to the taxpayer (according to Code Section 267(b)) owned or used the property prior to 1987, or
   (b) the same person who used the property in 1986 also uses it after the taxpayer acquires it,
   (c) it is leased to a person (or someone ***related*** to that person) who owned or used the property in 1986, or
   (d) the property was acquired in a transaction in which:
      - the user of the property didn't change, and
      - the property wasn't MACRS property in the hands of the person from whom it was acquired because of (b) or (c)
(4) Real property (other than nonresidential real and residential rentals) if:
   (a) either the taxpayer or someone ***related*** to the taxpayer owned the property prior to 1987, or
   (b) the taxpayer leases the property back to the person who owned it in 1986, or
   (c) the taxpayer acquires the property in a transaction where gain or loss isn't recognized with respect to property the taxpayer or a relative owned in 1986 (MACRS doesn't apply to the "carryover" basis). MACRS applies only to that portion of the basis in the acquired property that represents cash paid or unlike property given up. It doesn't apply to the substituted portion of the basis.
(5) Any motion picture film, video tape or sound recording.

If the rules described above allow for a bigger deduction under ACRS than is available under MACRS, then MACRS must be used.

Who Are Related Parties? For this purpose, related parties are the taxpayer and:
   (1) Spouse, children, parents, sisters and brothers (including half-brothers and sisters), grandparents;
   (2) A corporation or partnership in which the taxpayer owns more than 10% of the stock or capital.

THE ALTERNATIVE DEPRECIATION SYSTEM: Under certain circumstances, the alternative depreciation system MUST be used for computing depreciation. In other instances, it is an optional method of recovering the cost of property.

The alternative system must be used:
(1) To compute the portion of depreciation which will be treated as a tax-preference item for alternative minimum tax purposes;
(2) In figuring depreciation for tangible property used outside the U.S.;
(3) For property that is leased or otherwise used by a tax-exempt organization or is financed with tax-exempt bond proceeds;
(4) For property imported from foreign countries with discriminatory trade practices;
(5) For luxury automobiles and other listed property used 50% or more for *personal* use;
(6) For certain pre-production costs of farming property not covered by the inventory-capitalization rules of Code Section 263A.

OPTIONAL (ADS) METHOD FOR PERSONAL AND REAL PROPERTY: Taxpayers who place in service personal property after 12/31/86 may elect to use the alternative depreciation system on a class-by-class basis, but the election is only available on a property-by-property basis for residential rental and nonresidential real property. The election is irrevocable and must be made by the extended due date of the tax return for the year the property is placed in service. ADS generally uses the straight-line method of computation and no salvage value.

Exception: For alternative minimum tax purposes, use 150% declining balance for personal property being depreciated under regular MACRS 200% or 150% declining-balance method.

Like MACRS, ADS uses the half-year, mid-month and mid-quarter conventions. Examples of recovery periods under ADS include:

Nonresidential rentals	40 years
Residential rentals (placed in service before 2018)	40 years
Residential rentals (placed in service after 2017)	30 years
Cars, light trucks	5 years
Personal property not assigned a class life	12 years
Fruit or nut trees/vines	20 years
Other property assigned a class life	The class life
Single-purpose agricultural/horticultural structures	15 years

HOW TO DEPRECIATE PROPERTY WHEN USE CHANGES (Reg. § 1.168(i)-4)

Personal-use property converted to business or income-producing use (e.g., personal residence converted to rental property) would be:

- Treated as placed in service on the conversion date;
- Subject to the MACRS (Code Sec. 168) depreciation method;
- Subject to recovery period and placed-in-service convention applicable to the property beginning in the tax year of the conversion.

The property's depreciable basis in the change year would be the lesser of:

1. Its fair market value, or
2. Adjusted depreciable basis when it is converted.

These rules don't apply when another section of the Code prescribes a specific depreciation treatment for a change to business use, such as under the rules for listed property.

Business use property converted to personal or investment use - The conversion of MACRS property from business or income-producing use to personal use would be treated as a disposition, with depreciation for the conversion year computed by applying the applicable convention. However, the conversion wouldn't result in gain, loss or depreciation recapture (except for recapture under § 280F(b)(2) of excess depreciation upon conversion of listed property to personal use). *(Reg § 1.168(i)-4(c))*

Use changes in MACRS property after placed-in-service year – e.g., a taxpayer may change commercial rental property to residential rental property or vice versa.

- **Generally,** MACRS depreciation for the change year would be determined as though the change occurred on the first day of that year. *(Reg § 1.168(i)-4(d)(2)(iii))*
- **Shorter Recovery Period** – For changes resulting in a shorter recovery period or a faster depreciation method, the property's adjusted depreciable basis as of the beginning of the change year would be depreciated over the shorter recovery period and/or by the faster depreciation method beginning with the year of change as though the property were first placed in service in that year. *(Reg § 1.168(i)-4(d)(3)(i)(A))*

  Where the change results in a shorter recovery period, this rule would require a taxpayer to depreciate the property over the new shorter recovery period even if the remaining portion of the original longer recovery period is less than the new shorter recovery period. To avoid this adverse effect, taxpayers could elect on timely filed returns (including extensions) to continue to depreciate the property as though the change in use had not occurred. The election is made by claiming the depreciation deduction as though no change of use had occurred. *(Reg § 1.168(i)-4(d)(3)(ii))*
- **Longer Recovery Period** - If a longer recovery period and/or slower depreciation results from a use change, the property's adjusted depreciable basis as of the beginning of the change year is depreciated over the remaining portion of the new, longer recovery period as of the beginning of the year of change. *(Reg § 1.168(i)-4(d)(4))*
- **Using Optional MACRS Tables** - A taxpayer that had been using the optional MACRS depreciation tables from the time the property was first placed in service would be allowed (but not required) to continue using the tables after the change in use. The regs provide guidance on how to modify the calculations. *(Reg § 1.168(i)-4(d)(5))*

Use changes during placed-in-service year - The depreciation allowance will generally be determined by the primary use of the property during that tax year, determined in any reasonable manner that is consistently applied to the taxpayer's MACRS property. *(Reg § 1.168(i)-4(e))*

CONVERTING A PERSONAL RESIDENCE TO RENTAL USE: When a personal residence is converted to rental use determine the depreciation using MACRS.

> ***Example - Converting a Residence to Rental Use -*** *Bill bought a personal residence in 1990 for $100,000. In 2019, when the residence had a FMV of $250,000, he purchased a new home and converted the old residence to rental use. Bill will depreciate the rental using MACRS, using $100,000 (the lower of cost or FMV), reduced by the land portion, and a 27.5-year life to compute his cost recovery.*

When converting personal use property to business use, the FMV of the property can be a very important factor. If challenged, the IRS will want to know how the FMV was determined and will require more than a guess. They often require a certified appraisal. Taking short cuts can lead to problems in the future.

Issues When Converting a Home to a Rental **-** When a taxpayer converts their home to a rental, there are a number of tax issues that come into play, see chapter 3.17.

IMPROVEMENTS TO PROPERTY: Figure the MACRS deduction for an improvement made to property based on the date the improvement is placed in service, not the date the original property was placed in service.

Leasehold Improvements – Generally, depreciation allowances for improvements made on leased property are determined under MACRS, even if the MACRS recovery period is longer than the lease term. For example, if a tenant makes an improvement to a nonresidential building, the improvement is depreciated over 39 years (except as noted below for qualified leasehold improvement property), straight-line, even if the tenant's lease is only for 10 years.

Qualified Leasehold Improvements – "Qualified leasehold improvement property" placed in service after October 22, 2004, and before January 1, 2018, is 15-year property instead of being depreciable over 39 years. This provision was made permanent by the PATH Act of 2015, but subsequently repealed as part of the TCJA for property placed in service after 2017*. Generally, for the pre-2018 definition, a qualified leasehold improvement is any improvement to an interior part of a building that is nonresidential real property, if all of the following conditions are met:

- The improvement is made under a lease by the lessee, or any sublessee, or the lessor of that part of the building, which is occupied exclusively by the lessee (or sublessee) of that part;
- The improvement is made more than 3 years after the building was first put into service by any person; and
- The improvement is Sec 1250 property.

*Through apparently a drafting error, the TCJA did not include leasehold improvements as 15-year property as intended by Congress and explained on page 3.04.06. Until corrected by Congress, these costs have a MACRS recovery period of 39 years. Improvements that enlarge the building, relate to escalators or elevators, benefit a common area structural component, or are for the building's internal structural framework don't qualify.

In CCA Letter Ruling 201310028, the IRS Office of Chief Counsel determined that the installation of a heating, ventilation, and air conditioning (HVAC) unit, either located on the roof of a building or located on a concrete pad adjacent to the building, was not qualified leasehold improvement property because the installation of an exterior HVAC unit was not an improvement to an interior portion of a building.

DISPOSITIONS:

Special rules apply when MACRS property is disposed of prior to the end of a recovery period. Under MACRS, a deduction is allowed in the year of disposition, even for Section 1245 property. Use the following rules in the year of disposition:

(1) **Residential and nonresidential real property:** Always consider the property disposed of at the middle of the month. Thus, a residential rental disposed of on March 3 by a calendar year taxpayer is depreciated for 2.5 months in the disposition year. Prorate the full-year's deduction by 2.5/12.

(2) **Property using the half-year convention:** The deduction in the year of disposition is half the depreciation allowed for a full year.

(3) **Mid-quarter convention property:** Determine the depreciation for a full year first. Multiply the result by 12.5%, if the disposition occurs in the first quarter; 37.5%, if in the second quarter; 62.5%, if in the third quarter; 87.5%, if in the fourth quarter.

> ***Example - Disposition of MACRS Mid-Quarter Convention Property -*** *John placed used 5-year property in service on 12/01/17 at a cost of $10,000. He did not claim any bonus depreciation. The mid-quarter convention applied to the property, because no other property was placed in service that year. In 2017 and 2018, and using the IRS mid-quarter table for assets placed in service in the 4th quarter, John's depreciation deductions were $500 (.05 x $10,000) and $3,800 (.38 x $10,000), respectively. On 04/06/19, John disposed of the property. His 2019 depreciation deduction is $855 [($10,000 x .228).375].*

(4) **Short tax year:** Multiply the basis of the property by the depreciation rate for the year. Prorate the result by the fraction, the number of months the property is in service during the year divided by 12 months.

COST SEGREGATION DEPRECIATION

It is common for taxpayers to engage tax professionals, often working with architects, builders or engineers, to (1) distinguish the items of property treated as structural components of a building for tax purposes from items of property (personal property) closely associated with the building and (2) allocate costs between the building components and personal property (and among the various classes of personal property). This process is referred to, by both tax professionals and IRS, as cost segregation. Cost segregation studies are not binding on the IRS.

Retroactive Change – It is possible, where the cost of appraisals, accounting, and tax preparation fees warrant, to retroactively segregate a building's property into its Sec 1250 and Sec 1245 components, thus allowing a shorter depreciable life (generally 7 years for commercial property and 5 years for residential rental property) for the Sec 1245 components. Amending prior returns is not required if the automatic IRS consent to a change in accounting for depreciation is used. However, retroactive change should be approached with caution.

Rental Activities - IRS stated that appliances, carpets, furniture, etc., used in a rental real estate activity are 5-year MACRS class property (Ann 99-82). The IRS has also indicated that such property used in a residential rental real estate activity is 5-year MACRS class property (IRS Pub 527, (2018), page 9). As with most things in taxes there is no all-encompassing list of items than can or cannot be treated as Sec 1245 property. Each item must be looked at on a one-by-one basis. Consider for example kitchen cabinets; most are easily removable and replaceable and might be considered Sec 1245 property. But here are some issues to consider:

- If the structure is purchased as a whole then an appropriate appraisal is required to segregate the costs of the building components.
- Sec 1245 depreciation will recapture as ordinary income on sale.
- The new Sec 199A deduction is based on qualified business income (QBI). QBI is generally net profits for Schedule Cs and Fs, real estate rentals (Schedule E), and flow-through income from partnerships and S-Corporations. Using shorter depreciable lives for assets identified as Sec 1245 property in a segregation study will increase the depreciation deduction and reduce an entity's profit, which in turn will generally reduce the amount of the Sec 199A deduction. On the other hand, lowering a taxpayer's taxable income may be helpful in avoiding certain 199A phase-outs and limitations.
- Under the TCJA of 2017, only real property (i.e., land and Sec 1250 buildings) will be eligible for Sec 1031 tax-deferred exchanges. Unclear at the time this material was updated is whether property identified as Sec 1245 property in a cost segregation study will also qualify for nonrecognition of gain. Some tax commentators argue that 1245 treatment is only for depreciation purposes and shouldn't disqualify such property from 1031 tax deferral. We hope that the IRS will include this issue as one of the numerous TCJA clarifications that they make in the near future. Otherwise, it will be up to the courts to decide down the road.

Most recent cases and rulings related to cost segregation refer to *HCA v. Commissioner* discussed below.

Apartment Building Cost Segregation Study Too Aggressive – The Tax Court found that a taxpayer's cost segregation study that broke down the cost of a residential apartment complex into over 1,000 parts was overly aggressive, and agreed with the IRS that most of the components were structural components, integral to the buildings' operations and maintenance, and were depreciable over 27.5 years rather than the 5 to 15 years used by the taxpayer. Only the following components were re-classified as personal property depreciable at lesser lives: clothes dryer vents; outlets and timers related to watering of the grounds; surveillance components (TV and camera); gate components; outlets for refrigerators, stoves, and washer/dryer machines; and cable, telephone and data outlets. *(AmeriSouth XXXII, Ltd., T.C. Memo 2012-67)*

Post-Purchase Cost Segregation Study Can't Change Purchase Price Allocations – The Tax Court ruled that a taxpayer could not modify purchase price allocations that had been agreed to when two processing plants were acquired. After the purchase, the taxpayer had a cost segregation study done which separated the assets into various subcomponents and reclassified them for depreciation purposes as 7-year or 15-year property instead of the 39-year class applicable to commercial buildings and their structural components. The taxpayer applied for a change in accounting method and claimed a Sec. 481(a) adjustment. The IRS took the position that the taxpayer could not modify the purchase price allocations under Sec. 1060, which provides that in connection with an applicable asset acquisition, the parties to a written agreement as to purchase price allocation are bound by the agreement. The Court agreed with the IRS. *(Peco Foods Inc. et al., T.C. Memo 2012-18)*

Therefore, taxpayers who anticipate purchasing the assets of a business should consider having a cost segregation analysis completed **before** the purchase agreement is written.

Hospital Corporation of America (HCA) – The court ruled that the enactment of ACRS did not redefine § 1250 property to include property that had been § 1245 property for purposes of ITC (investment tax credit). Accordingly, the court determined that §168(f)(1), prohibiting component depreciation, applied only to §1250 property. The HCA ruling effectively reinstated a form of component depreciation for certain building support systems, such as the electrical and plumbing systems that directly serve tangible personal property. Therefore, cost segregation methodologies previously used to allocate the cost of a building between structural components and ITC property can now be used for § 1250 and § 1245 property.

In an Action on Decision (AOD CC-1999-008), the Service acquiesced to the validity of the method approved by the court (i.e., pre-1981 ITC tests remained applicable for determining tangible personal property under both ACRS and MACRS). However, the Service non-acquiesced to the court's findings as to which specific assets qualified as tangible personal property. Two cases, *LaPetite Academy* and *Boddie-Noell*, were specifically referenced in the AOD with respect to the determination of structural components and tangible personal property.

- In *LaPetite Academy*, wall panels, kitchen plumbing, bathroom accessories and a portion of the electrical system were held to be structural components under the regulations.
- In *Boddie-Noell*, the court held that acoustical tile ceilings, a portion of an electrical system and a plumbing system were structural components under the regulations.

Bottom Line

Cost segregation is a valid and acceptable depreciation technique. However, bona fide appraisals or other determinations are necessary when assigning cost to the various components, and keep in mind the IRS acquiesced to the technique but can still argue what is and is not a structural component of a building.

Additional Resources – Additional information related to the IRS' view related to cost segregation can be obtained from the IRS' Audit Technique Guide on Cost Segregation. On the IRS web site put "cost segregation" in the search box to link to the Audit Technique Guide. There are a few industry specific tables that break down (at least in IRS' view) what is 1245 and 1250 property.

CORRECTING PAST DEPRECIATION

When it is discovered that a taxpayer has not been taking the correct amount of depreciation in a prior year, the prior years must be corrected because of the "allowed or allowable" rule. There are two possible procedures for making the correction: filing an amended return or filing for a change of accounting method. The limitations, pros and cons for each are discussed.

Amended Return – A taxpayer that claimed incorrect depreciation on a return may use a 1040X to correct the error **ONLY IF**:

- The statute of limitations is open for the year of the error,
- The taxpayer is **NOT** changing from one permissible method of accounting to another permissible method of accounting.
- The taxpayer has **NOT** adopted a method of accounting for the property.

  Note: *A taxpayer has adopted a method of accounting if an incorrect depreciation amount was deducted on the taxpayer's return in two or more consecutive tax years for reasons other than a mathematical or posting error.*
- The taxpayer is correcting math or posting errors that are not a change in accounting method. However the corrections can only be made for open years.

  Note: *Generally math or posting errors are not possible when using computer-processed returns.*

Disadvantages of Using an Amended Return:

- If the depreciation was overstated, any additional tax liability would be immediately due (if a Form 3115 was used to make the change the tax can be spread over 4 years).
- If there is a tax due, interest will be assessed.
- You must file a separate 1040X for each year (while a Form 3115 corrects all years at issue).

Form 3115 – Generally the Form 3115 is used when a 1040X can't be used or the statute of limitations has expired on the tax year to be changed. Form 3115 rather than Form 1040X is used in the following situations to make depreciation corrections (Pub 946):

- A change from an impermissible method of determining depreciation for depreciable property, if the impermissible method was used in two or more consecutively filed tax returns.
- A change in the treatment of an asset from nondepreciable to depreciable or vice versa.
- A change in the depreciation method, period of recovery, or convention of a depreciable asset. However, a 1040X can be used to change the placed-in-service date of a depreciable asset.

- A change from not claiming to claiming the special allowance (bonus) depreciation if the election to not claim any special allowance hadn't been made.
- A change from claiming 50% bonus depreciation to claiming a 100% bonus allowance for qualified property acquired and placed in service after September 27, 2017 (if the election under section 168(k)(10) to claim 50% bonus depreciation wasn't made).

Changes of accounting method are only allowed if approved in advance by the IRS or if the change is one that IRS will approve automatically. Most changes of depreciation qualify for an automatic approval by the IRS if the required approval procedures are followed, e.g., Form 3115 is properly completed and filed. See Rev Proc 2018-31 for a complete list of current automatic accounting method changes and the specific procedures for each type. There is no user fee charged for automatic accounting method changes, but user fees do apply for those changes not granted automatically by the IRS.

Benefits of Using the Form 3115:

- Multiple years are corrected on one return for the year of adjustment. (Rev. Proc. 97-27, Rev. Proc. 2002-19 and Rev. Proc. 2007-67)
- Eliminates the statute of limitations issues for past returns (changes can be made without regard to the statute of limitations).
- If there is a negative Sec 481(a) adjustment it reduces the business' income in the year of the adjustment which could result in a tax refund in the adjustment year.
- If there is a positive adjustment it increases the business' income and results in an increase in tax for the year of adjustment.
  - If the adjustment is less than $50,000 (was $25,000 prior to 2015), the taxpayer can elect to pay the tax in the year of the adjustment (de minimis election – Rev Proc 2015-13, Sec 7.03(3)(c)).
  - Otherwise add ¼ of the adjustment to the current year's return and ¼ in each of the next three years, thus spreading the additional tax over four years.

Potential Problem – If the taxpayer did not make the election to apply the new cap and repair regulations retroactively for tax years beginning on or after January 1, 2012, then the accounting method change (Form 3115) cannot be used to correct **new-regs-related** depreciation occurring prior to 2014. However, apparently a correction to pre-2014 depreciation could be made if the correction is unrelated to the changes in the repair regulations. Pub 946 does not make any mention of restricting pre-2014 corrections unrelated to the new regulations.

Note: Some seminars strongly advocated filing the Form 3115 to adopt the new cap and repair regulations retroactively. If you did so, then all corrections to prior years related to the new regulations should have been made at that time and a Form 3115 cannot now be used to make a new-repair-regs correction for years prior to 2014. If you did not, then you automatically adopted the regulations prospectively and the chance to adopt the new regulations for years before 2014 has passed (Rev. Proc. 2015-20). ***Bottom Line****:*

1. If the taxpayer **did not retroactively** adopt the new regulations the taxpayer can still use the 3115 to correct pre-2014 depreciation unrelated to the new regulations.
2. If the taxpayer **did retroactively** adopt the regulations then the taxpayer cannot use the 3115 to correct pre-2014 depreciation errors.

Special Issues

- **Taxpayer out of business** – the Sec 481(a) adjustment must be taken in the final year of the business or if a rental, the year of sale.
- **Taxpayer under audit** – Generally a taxpayer will not qualify for an *automatic* accounting method change while the taxpayer is under audit.
- **Previous 3115 filings** – The *automatic* accounting method change cannot be used if Form 3115 was used in the prior five years for the same type of change.

Completing Form 3115 – When making an automatic change the instructions for the 3115 provide us with the following information:

- For automatic changes only Parts I, II, and IV need to be completed (skip Part III).
- For a depreciation change, only Schedule E of the 3115 (not to be confused with the 1040 Schedule E) must be completed; skip the other Form 3115 schedules.

Thus, when making depreciation or amortization corrections only Parts I, II, and IV and Schedule E need to be completed.

Designated Change Number (DCN) – The instructions for the Form 3115 include a great number of DCNs since the form has multiple uses. DCNs are entered at Part I, line 1a. For correcting depreciation for small businesses the DCNs to use are:

- **DCN 7** – Is used when changing from an impermissible method to a permissible method; commonly encountered impermissible methods include:
    - Depreciation not claimed
    - Incorrect asset life used
    - Inheritance FMV basis adjustments not made
    - No land value adjustment made to basis when determining depreciable basis
- **DCN 107** – Same as DCN 7 except used when the property has already been disposed.
- **DCN 8** – Is used when changing from one permissible method to another permissible method. Not normally encountered for small business. Used when switching from individual item accounting to multiple asset accounting.

Part I – in addition to entering the DCN number (see above), lines 2 and 3 must be completed.

- **Line 2** – Generally check NO. Check YES if under audit.
- **Line 3** – Check YES; you will be attaching a statement specifying the changes.

Part II –

- **Line 4** - asks if the business entity ceased doing business in the adjustment year. Check YES if ceased doing business (should have entered DCN 107 on line 1a). Otherwise check NO (should have entered DCN 7 on line 1a). If this question is checked YES a statement must be added and "see statement" entered on the line.

STATEMENT
Rev. Proc. 2015-14, Sec. 6.01 provides that the eligibility rule of Rev. Proc. 2015-13, Sec. 5.01(1)(d) does not apply to depreciation adjustments under DCN 7 or DCN 107.

- **Line 5** – deals with corporate acquisition; check NO.
- **Line 6a** – asks if an affected return is under audit. Generally check NO, but if under audit see the instructions for line 6a and complete 6b and 6c.
- **Line 7a** – generally, the answer to this question is YES, but if in doubt see the 3115 instructions for line 7a and 7b.
- **Line 7b** – if 7a was answered yes, check the appropriate box. Generally check the box "not under exam;" otherwise see the 3115 instructions for line 7b.
- **Lines - 8a and 10,** check NO.
- **Line 11a –** generally check NO. But if the answer is yes, follow the instructions on lines 11b and 11c.
- **Lines 12 and 13** – check NO.
- **Lines 14 and 15** – enter "see attached statement".
- **Line 16** – skip.
- **Lines 17 and 18** – check YES.
- **Line 19a** – enter N/A for not applicable.
- **Line 19b** – skip.

Part IV –

- **Line 25** - check NO unless property disposed of (DCN 107 on line 1a) in which case check YES.
- **Line 26** – enter the amount of the adjustment, either + or –. Note: an increase in the amount of depreciation would be a minus and a decrease would be a plus.
- The adjustment is the difference between the total depreciation actually deducted for the property and the total amount allowable prior to the year of change. If no depreciation was deducted, the adjustment is the total depreciation allowable prior to the year of change. A negative section 481(a) adjustment results in a decrease in taxable income. It is taken into account in the year of change and is reported on your business tax returns as "other expenses." A positive section 481(a) adjustment results in an increase in taxable income.
- **Line 27** – this is where you make the election to take the entire positive adjustment in the year of the adjustment as opposed to spreading it over 4 years. If the adjustment on line 26 is negative (i.e., more depreciation is allowed than was previously deducted), it will reduce the business' income and could result in a refund. In this case, check the NO box. If the

- adjustment on line 26 is positive, the business' income is increased and the taxpayer has the option, where the adjustment is an increase of less than $50,000, to report the entire amount in the year of the adjustment. To make that election check the YES box and check the $50,000 de minimis election. Otherwise check NO and the income will be spread over 4 years.
- **Line 28** – generally check NO.

Schedule E –

- **Line 1** – check NO
- **Line 2** – is asking if the depreciation adjustment needs to be capitalized. Generally check NO.
- **Line 3** – generally check NO for real estate property. The YES box would be checked for elections under Sec 179, or electing out of bonus depreciation (Sec 168(k)).
- **Line 4b** – check YES or NO based upon whether the property was previously used as a primary residence.
- **Line 4c** - check NO.
- **Lines 5, 6, 7** – prepare and include the appropriate statement.

CALIFORNIA DIFFERENCES

California generally conforms to Federal MACRS rules for individuals. CA does **NOT** conform to:

- Bonus Depreciation (none allowed)
- The shortened recovery periods for Indian reservation property,
- The 15-year recovery period, straight-line method, for qualified leasehold improvements, qualified retail property, and qualified restaurant property (CA is 39 years) or treating these types of property as Sec 179 property,
- Inclusion of off-the-shelf computer software as Sec. 179 property., and
- The higher first-year luxury auto depreciation limit when federal bonus depreciation is claimed

Effective January 1, 2010 and through 2017, California conforms to the 3-year recovery period for race horses of any age (personal income tax only).

For California disease-infested vineyards, the recovery period for replacement vines is reduced from 10 years to 5 years for CA purposes (for post-1991 replacements due to phylloxera infestations and post-1996 replantings due to Pierce's disease). A written certification from an independent state-certified integrated pest management adviser, or a state agricultural commissioner or adviser, that specifies that the replanting was necessary to restore a vineyard infested with phylloxera or Pierce's disease is required. The taxpayer must retain the certification for future audit purposes.

LIMITED LIABILITY COMPANIES

NOTE - This chapter does not include information for foreign or multi-state LLCS

Overview

A Limited Liability Company (LLC) is a form of **state** business entity. The IRS did not create a new tax classification for the LLC when LLCs were created by the states; instead IRS uses existing tax entity classifications: corporation, partnership, or sole proprietor. An LLC is always classified by the IRS as one of these types of entities.

RAPID FINDER

LLCs have advantages over both the corporation and the partnership forms of operating a business. The LLC's main advantage over a general partnership is that, like the owners (shareholders) of a corporation, the owners (members) of an LLC are generally not responsible financially for the debts and obligations incurred in the course of the LLC's business. In addition, an LLC has the flexibility to be taxed as a partnership, sole proprietorship, or corporation.

- **Default** Forms of Taxation (Disregarded Entity)
  - Single Member LLC – Sole Proprietorship (Schedule C, E, or F)
  - Multiple Member LLC– Partnership (Form 1065)
- **Elective** Form of Taxation
  - Corporation - Must file IRS Form 8832

The Details

LIABILITY PROTECTION

The primary purpose of an LLC is to provide liability protection to the members. An LLC protects the members of the LLC from liability but not the LLC itself. Since the LLC itself is not protected, it can be sued, and the LLC's assets can be seized to pay court ordered judgments.

Example – LLC Liability Protection - *Dave and Lee acquire a rental and hold it in an LLC. The tenant claims she got sick from mold in the building and sues. If the tenant wins the suit, then the only asset in jeopardy is the rental property itself and no other assets owned by Dave and Lee can be seized to pay the judgment.*

Members, agents and managers are not personally responsible for LLC debts and obligations. However, depending upon state law they may be held liable for:

1. Debts they personally guaranteed.
2. Wrongful acts committed as a member.
3. Promised, but not made, contributions to the LLC.
4. Wrongful distributions (under state law) from the LLC.
5. Improper personal benefits from the LLC.
6. Unremitted sales taxes.
7. Unremitted employment taxes.
8. Criminal acts.
9. Malpractice claims against professionals in states that permit professional LLCs.
10. In some states to the extent the LLC is under-capitalized or under-insured.

Using Multiple LLCs – Property held within an LLC provides protection to its members against claims unrelated to the business. However, property held in that LLC is subject to claims. Liability can be further limited by forming multiple LLCs; thus, only assets within each LLC are subject to claims associated with that LLC.

***Example – Multiple LLCs –** Dave and Lee in the prior example have two rental properties held within a single LLC. Thus, both properties' equity would be in jeopardy to the tenant's mold sickness claims. On the other hand, if each property was held in a separate LLC, the tenant's claims would only be against the assets of the LLC holding the property subject to the mold claim.*

Some states allow the creation of what is referred to as Series LLCs. These are structured to provide separate protection by separating the LLC in separate cells holding different assets and eliminating the need to create multiple entities. States allowing Series LLCs include: AL, DE, DC, IA, IL, KS, MN*, MO, MT, NV, ND*, OK, TN, TX, UT, and WI*. *State allows series LLCs but doesn't specifically provide a liability shield between the different series

LLC ARTICLES OF ORGANIZATION AND OPERATING AGREEMENTS

Articles of Organization – This document starts the process of becoming an LLC and is required by all states (after first naming the business and registering it with the state). The form includes basic business information, including name, address, member names (if a partnership), and details of the registered agent, such as an attorney, who has been authorized to accept legal documents on behalf of the LLC. Sample Articles of Organization can be found on most state web sites. Once filed and approved by the state, the articles of organization legally create the LLC as a registered business entity within the state. The taxpayer can prepare the articles or consult an experienced business attorney for assistance.

Operating Agreements – An LLC's operations are governed by its Operating Agreement, which structures the LLC's financial and functional decisions, and defines each member's duties, powers, and responsibilities. An LLC can alter their Operating Agreement to fit business and member needs as frequently as necessary. This document is not required by most states, but it is recommended that one be created to protect the owner(s) and the interests of the business.

CAUTION - Don't practice law unless you are also an attorney. Best practice is to refer your client to a competent attorney to prepare the Operating Agreement. Circular 230 Sec 10.32 states that nothing in Cir 230 may be construed as authorizing persons not members of the bar to practice law.

LLC FEES

LLCs are available in all 50 states and the District of Columbia. These states all charge a fee for having the LLC. Some look upon the fee as an additional tax. The fee is in addition to the tax on the income paid by the members. If clients squirm when paying the fees remind them that they are essentially buying a form of personal liability insurance.

LIMITED LIABILITY JURISDICTION

The liability protection of an LLC is **limited to the state in which the LLC is established**. This is a routinely misunderstood issue. For example a business establishes a Nevada LLC but the business is in California. The Nevada LLC provides no liability protection for the business in California.

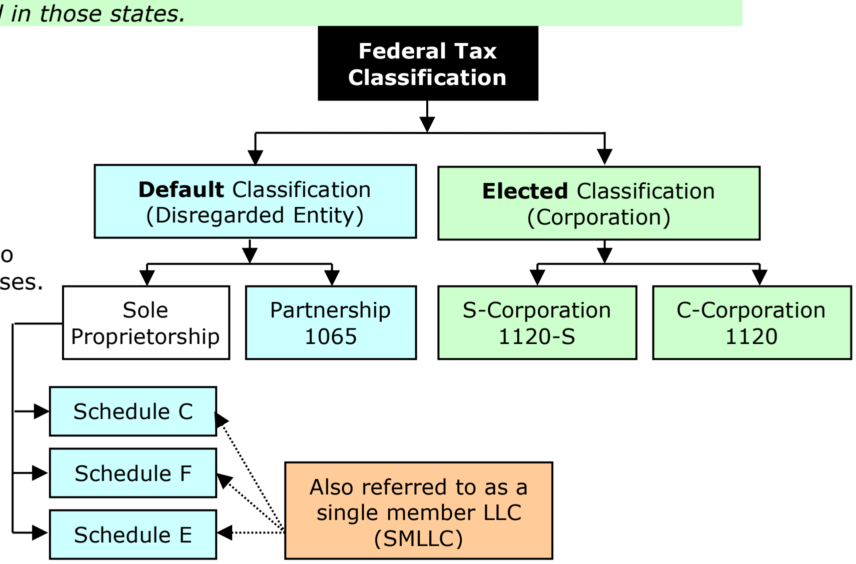
***Example – LLC Operating in Multiple States -** Roy and Louis own a trucking company that is organized as a New York LLC. Their trucks also service customers in New Jersey and Connecticut. Their LLC status in New York affords them **no protection** in New Jersey or Connecticut. On the other hand, if they establish LLCs in both the other states, they would be protected in those states.*

FEDERAL TAX CLASSIFICATION

LLCs are organized under state law and are not recognized as an entity for Federal tax purposes. Therefore for Federal purposes a state LLC is classified as a sole proprietorship, partnership or corporation.

An LLC can opt for a default classification or elect to be classified as a corporation for Federal tax purposes. (Reg §301.7701-3)

Single Member Limited Liability Companies A single member LLC (SMLLC) defaults to be a "disregarded entity" (sole proprietor – Schedule C, E or F) or can file Form 8832 – "Entity Classification Election" – to elect to be taxed as a corporation.



Default Classification – An LLC is classified for federal tax purposes under the default rules unless it files Form 8832 or Form 2553, Election by a Small Business Corporation, to be classified as a corporation. The default classifications are:

- **Sole proprietorship** for one member LLCs (C, E of F)
- **Partnership** for multi-member LLCc (1065)

An eligible entity uses Form 8832 to elect how it will be classified for federal tax purposes: as a corporation, a partnership, or an entity disregarded as separate from its owner.

Making The Election to be Taxed As a Corporation

- **When To File -** An election specifying an eligible entity's classification cannot take effect more than 75 days prior to the date the election is filed, nor can it take effect later than 12 months after the date the election is filed.
- **Late Election Relief -** A newly formed entity may be eligible for late election relief under Rev. Proc. 2002-59, 2002-39 I.R.B. 615 if:
  - The entity failed to obtain its desired classification solely because Form 8832 was not timely filed,
  - The due date for the entity's desired classification tax return (excluding extensions) for the tax year beginning with the entity's formation date has not passed, and
  - The entity has reasonable cause for its failure to make a timely election.

To obtain relief, a newly formed entity must file Form 8832 on or before the due date of the first federal tax return (excluding extensions) of the entity's desired classification. The entity must also write "FILED PURSUANT TO REV. PROC. 2002-59" at the top of the form. The entity must attach a statement to the form explaining why it failed to file a timely election. If Rev. Proc. 2002-59 does not apply, an entity may seek relief for a late entity election by requesting a private letter ruling and paying a user fee in accordance with Rev. Proc. 2006-1, 2006-1 I.R.B. 1 (or its successor).

Form 8832 – The IRS Form 8832 has several uses. The following is an overview of those uses.

- If the LLC initially is to be a default entity (1065, C, E or F) the Form 8832 does not need to be filed.
- If the LLC initially is to be a corporation the 8832 (or the 2553 in the case of an S-Corporation) is used to elect to be taxed as a corporation.
- If the LLC wants to change its previous election.

CAUTION – 60 Month Rule

The entity generally cannot change its classification by election again during the 60 months after the effective date of the election. However, the IRS may (by private letter ruling) permit the entity to change its classification by election within the 60-month period if more than 50% of the ownership interests in the entity, as of the effective date of the election, are owned by persons that did not own any interests in the entity on the effective date or the filing date of the entity's prior election.

DEFAULT ENTITY RULES

Existing entity default rule - If an existing entity decides to change its classification, it may do so subject to the 60-month limitation rule. See Regulations sections 301.7701-3(b)(3) and 301.7701-3(h)(2) for more details.

Domestic default rule - Unless an election is made on Form 8832, a domestic eligible entity is:

1. A partnership if it has two or more members.
2. Disregarded as an entity separate from its owner if it has a single owner.

Automatic Classification as a Corporation – The following business entities are automatically classified by regulation as corporations for federal tax purposes (Reg §301.7701-2(b)(1), (3), (4), (5), (6), (7), or (8)):

- A business entity organized under federal or state law if the statute describes or refers to the entity as incorporated, a corporation, body corporate, or a body politic;
- An association;
- A business entity organized under state law if the statute describes or refers to the entity as a joint-stock company or a joint-stock association;
- An insurance company;
- A federally insured state-chartered bank;
- A business entity wholly owned by a state or any political subdivision of a state;
- A publicly traded business entity taxable as a corporation under IRC Section 7704; and
- Certain foreign business entities.

Change in Number of Members - A change in the number of members:
- Corporation – Does not affect the entity's classification.
- Partnership - Will become a disregarded entity when the entity's membership is reduced to one member.
- Disregarded Entity - Will be classified as a partnership when the entity has more than one member.

EMPLOYMENT TAXES

Filing Employment & Excise Tax Returns- Final regulations (T.D. 9356) require single member LLCs (SMLLCs) to be treated as the taxpayer for employment tax and excise tax obligations. The SMLLC will continue to be disregarded for other federal tax purposes. The SMLLC will be responsible for collecting, reporting and paying over employment tax obligations using the name and EIN assigned to the LLC.

Employment tax requirements apply to LLCs in much the same way as other types of businesses.

For wages paid, the disregarded entity is required to use its name and EIN for reporting and payment of employment taxes. A disregarded entity is also required to use its name and EIN to register for excise tax activities on Form 637, pay and report excise taxes reported on Forms 720, 730, 2290, and 11-C, and claim any refunds, credits, and payments on Form 8849. The Form SS-4 includes more specific details regarding EINs for LLCs. Once you have downloaded the PDF file from IRS.gov, use the PDF search tool and search the form instructions under "disregarded".

SE TAX & LIMITED PARTNERS

In computing net earnings from self-employment, the distributive share of an item of income or loss of a limited partner (other than certain guaranteed payments, discussed below) is excluded (Code Sec. 1402(a)(13)).

Under proposed regulations (Prop Reg § 1.1402(a)-2(h)(2)), an individual would be treated as a limited partner unless he:
(1) Has personal liability for the debts of or claims against the partnership by reason of being a partner;
(2) Has authority (under the law of the jurisdiction in which the partnership is formed) to contract on behalf of the partnership; or
(3) Participates in the partnership's trade or business for more than 500 hours during the partnership's tax year.

> ***Code Sec 1402(a)(13) -*** *there shall be excluded the distributive share of any item of income or loss of a limited partner, as such, other than guaranteed payments described in section 707(c) to that partner for services actually rendered to or on behalf of the partnership to the extent that those payments are established to be in the nature of remuneration for those services;*

Thus LLC Members who are passive investors and do not participate in the management of the business are not subject to SE Tax. Guaranteed payments are always subject to SE tax.

INFORMATION REPORTING

- Employees of all LLCs are subject to withholding taxes.
- Forms W-2 and Forms 1099 must be filed when required.
- As a member, an individual's liability for LLC debts is limited by state law. However, a member may be held personally liable in situations involving unpaid employee withholdings if the member is found to be the person responsible for making the payments. (IRC Section 6671 and 6672)

CONVERTING AN EXISTING BUSINESS INTO AN LLC

Pitfalls - There are two common situations where unintentional errors may occur:

1. When an existing business, such as a corporation, is converted into an LLC there may be tax implications, such as:
   - The conversion may result in a taxable gain;
   - Employment tax wage bases may be affected.
2. Special rules may apply when the LLC has an operating loss:
   - The amount of loss a member can deduct may be limited because of the member's limited liability for LLC debts. (IRC Sec 465)
   - Passive Activity Loss limitation may restrict the amount of loss a member can deduct. (IRC Sec 469)

This chapter does not deal with the complicated issues related to business entity conversions and practitioners are advised to carefully review the laws and procedures relating to entity conversions.

MATERIAL PARTICIPATION

In *Garnett v. Commissioner, Dec. 57,875, 132 TC 19* the IRS contended that because the taxpayers had limited liability with respect to their ownership interests in limited liability companies and limited liability partnerships they should be deemed to have a limited partnership interest, and the losses they incurred from these activities should automatically be considered passive losses under Code Sec. 469(h)(2).

The court disagreed with the IRS that simply being a member of an LLC or an LLP and having limited liability automatically makes losses from an LLC or LLP passive. Instead, all of the facts and circumstances of a taxpayer's participation in the entity must be considered in determining whether the material participation requirements are met.

This is not the only case on this topic that the IRS lost; another is *Thompson v United States 87 Fed Cl 728 (July 20, 2009)* to which the IRS acquiesced "in result only."

It should be noted that Code Sec. 469 and related regulations were enacted prior to the existence of LLPs and the widespread availability of LLCs. Recognizing that litigation wasn't working, the IRS issued Prop. Reg. §1.469-5, which will become effective after being finalized. It clarifies when a member of a partnership or multi-member LLC is a limited partner for determining material participation under the passive activity rules: whether an individual is a limited partner in an LLC depends upon the individual's right to participate in management of the entity, and not on the extent to which the individual has limited liability. An individual's interest in an LLC will be treated as a limited partnership interest if:

1. For federal tax purposes, the entity is classified as a partnership under the check-the-box regulations, and
2. Under state law or the operating agreement of the entity the holder of the interest does not have any rights to manage the entity at any time during the entity's tax year. ***(Prop. Reg. 1.469-5(e)(3)(i))***

The general partnership exception continues to apply under the proposed regs. That is, an individual is not treated as holding a limited partnership interest in a limited partnership if he or she also holds a general partnership interest at all times during the partnership's tax year ending with or within the individual's tax year. ***(Prop. Reg. 1.469-5(e)(3)(ii))***.

<u>DISREGARDED ENTITY AND "OUTSIDE BASIS"</u>

Tracking outside basis is critical to properly taxing a partner on partnership distributions or on the disposition of its partnership interest, because in each case the partner's federal tax consequences derive directly from its outside basis in its partnership interest. Not so for the owner of a disregarded entity said the IRS Associate Chief Counsel in ***AM-2012-001 (2/20/12)***. Tracking outside basis in a disregarded entity is irrelevant to the owner's taxation, and therefore, no authority provides for such tracking.

The legal ruling cites Rev Rul 99-5, 1999-1 CB 434, which explains the taxation of an owner who sells part of its interest in a disregarded entity and doesn't mention a taxpayer's outside basis in the disregarded entity. Therefore, taxpayers owning 100% interest in LLCs that are disregarded entities cannot split their interests into separate classes of membership interests and then allocate income, loss, deduction, credit and basis among those classes for federal tax purposes in an attempt to manipulate the outside basis of the interests.

<u>POWER OF ATTORNEY</u>

A legal opinion from the IRS' Office of Chief Counsel says that a general partner or in the case of an LLC, a member-manager, may sign a power of attorney (POA) for purposes of a TEFRA partnership-level examination or for other tax purposes of the partnership. A POA can also be secured from a limited partner or LLC member for the purposes of securing partnership item information and disclosing partnership information to the POA. In the case of an LLC that has no member who is also a manager, the non-member manager may sign the POA for purposes of establishing that it would be appropriate and helpful to secure partnership item information including securing documents and discussing the information with the designated individual. This advice may not be used or cited as precedent. (Chief Counsel Advice Memorandum 2015-004, 4/3/15)

<u>CALIFORNIA LLC ANNUAL FILING REQUIREMENTS</u>

A California LLC must file its initial report, called the Statement of Information, with the California Secretary of State (SOS) within 90 days of the company's formation. The report is then due to the state biennially by the company's anniversary date. Form LLC-1 accompanied by the LLC's Operating Agreement is used for that purpose. The form is available on the Secretary of State's website at www.sos.gov.org. In addition, the LLC will be required to biennially file Form LLC-12 with the Secretary of State. However, Form LLC-12NC (Statement of No Change) may be used in lieu of Form LLC-12 if a previous complete LLC-12 has been filed with the SOS and if there has been no change in any of the information contained in the previous LLC-12. Changes to information contained in a previously filed LLC-12 can be made by filing a new Form LLC-12, completed in its entirety.

<u>REAL PROPERTY HELD FOR SALE TO CUSTOMERS</u>

The Franchise Tax Board, in Legal Ruling 2016-01 has held the adjusted basis of real property held for sale to customers in the ordinary course of business is included in the cost of goods sold. As a result, the sales price of the real property must be included in the LLC's gross income (adjusted basis added back) to determine the LLC fee. This will have a direct impact on taxpayers who are buying, improving and subsequently selling real property, commonly referred to as flipping.

Where property is held for investment purposes only, the property's adjusted basis is not added back to the taxpayer's gross income for purposes of calculating the fee.

NONRESIDENT MULTI-MEMBER LLCs' FILING REQUIREMENTS

The Franchise Tax Board, in Legal Ruling 14-01, has held that for tax purposes, the business of a partnership is the business of each partner. For this reason, wherever a partnership does business, the activities of the partnership are attributed to each partner, with the consequence that in geographic locations where the partnership is "doing business," the partners are also "doing business."

If an LLC is treated as a partnership for tax purposes, both the LLC and its members, are subject to the same legal principles applicable to any partnership. Thus, if an LLC classified as a partnership for tax purposes is "doing business" in California under Section 23101, the members of the LLC are themselves "doing business" in California. According to the FTB, this is true even in the case of "manager-managed" LLCs. If an LLC is classified as a partnership for tax purposes, the members, who are considered general partners for tax purposes, are "doing business" where the LLC, i.e., a general partnership for tax purposes, is "doing business," even though the members have limited liability protection and are not California residents. Therefore, if the member is deemed to be doing business in California, the member is subject to the LLC filing requirements and taxes.

However, in November 2014, a California Superior Court disagreed with the FTB's position. The court ruled that an Iowa corporation whose only connection with California was its 0.2% ownership interest in a fund organized as a California LLC was not "doing business" in California. Under California law, the fund was organized as a "manager-managed LLC" rather than a "member-managed LLC"; thus, the out-of-state corporation had no control over the management of the fund and did not have a sufficient percentage interest to indirectly control its management. The court said the corporation was entitled to a refund of the annual franchise tax, interest, and penalties previously collected by the FTB. (Swart Enterprises, Inc. v. California Franchise Tax Board, Fresno Superior Court, No. 13CECG02171, Order on Cross-Motions for Summary Judgment, November 14, 2014)

The FTB appealed this case to the 5th Circuit Court of Appeals and lost the appeal. (Swart Enterprises, Inc. v. California Franchise Tax Board (January 12, 2016) California Court of Appeal, Fifth District, Case No. F070922). The Appeals Court opined that California's expansive interpretation of doing business "defies a commonsense understanding of what it means to be 'doing business'. This is a precedent-setting case that other taxpayers can rely on. The FTB provided guidance in FTB Notice 2017-01 that any taxpayers who file a claim for refund and who believe their situation has the same facts as in *Swart*, should cite the holding in *Swart* and explain how their factual situation is the same as the facts in *Swart*. So it appears that to meet the same fact pattern as in *Swart*, a taxpayer's interest in an LLC that meets the other facts of *Swart* can't be more the 0.2%. The FTB has said that it is not going to withdraw Legal Ruling 14-01.

WITHHOLDING TAXES ON LLC MEMBERS – CA CONFORMS TO FEDERAL

Legislation enacted in 2014 (SB 1131) conforms treatment of LLCs to federal law by excluding members of an LLC that is taxed as a partnership from the definition of employee as it relates to personal income tax (PIT) withholding requirements. Thus, the LLC is not required to withhold state PIT from its members. Legislation in 2010 had exempted LLCs taxed as a partnership from unemployment tax and disability insurance withholding. With the passage of SB 1131, California now fully conforms to federal regarding compensation of LLC members.

LLCs AND PROFESSIONAL SERVICES

An LLC may not render professional services. (Corp. Code § 17375) "Professional services" are defined in California Corporations Code sections 13401(a) and 13401.3 as any type of professional services that may be lawfully rendered only pursuant to a license, certification, or registration authorized by the Business and Professions Code, the Chiropractic Act, the Osteopathic Act or the Yacht and Ship Brokers Act.

If the business is required to be licensed, registered or certified, the owner should contact the appropriate licensing authority before registering as an LLC with the California Secretary of State's (SOS) office in order to determine whether the services are considered professional.

Information on legally establishing an LLC can be found on the Small Business Administration's web site, www.SBA.gov, or on the California Secretary of State's web site, www.sos.ca.gov.

HUSBAND & WIFE MEMBERS

A husband and wife who each have a separate interest in the LLC will be treated as separate members. The LLC must file a partnership return and issue a separate Schedule K-1 (FTB Form 568) to each member. A husband and wife who hold a membership interest together are treated as a single member. The LLC must file a return as a disregarded entity if they are the sole owners, and issue them a single K-1 (FTB Form 568).

TAX CREDIT LIMITATIONS
A taxpayer that owns an interest in a single-member LLC that is disregarded for tax purposes may only claim credits or credit carryforwards from the LLC to the extent the member's tax liability is attributable to the LLC. Disallowed credits may be carried forward to future years.

ANNUAL TAX & LLC FEE - LLCs are responsible for a flat **franchise tax of $800.00** assessed by the California Franchise Tax Board. The initial franchise tax is due by the 15th day of the fourth month after the company's formation, and annual franchise taxes must be prepaid by the 15th day of the fourth month of each tax year. California LLCs are also assessed **a fee** (also known as the gross receipts tax) **on annual income exceeding $250,000.00**.

An LLC required to file Form 568 (all entities except corporations) pays an annual tax of $800, and also may be subject to a fee based on the LLC's total California source income (not worldwide income). The annual tax is due by the 15th day of the fourth month of the taxable year, and is paid using CA Form 3522. The fee, based upon total California income, is determined from the chart below:

If Total California Income is. . .		
Equal to or over –	But not over –	Fee
$ 250,000	$ 499,999	$ 900
$ 500,000	$ 999,999	$ 2,500
$ 1,000,000	$ 4,999,999	$ 6,000
$ 5,000,000 and over		$11,790

Estimated Fee Payment Required - The LLC fee must be estimated and paid by the 15th day of the 6th month of the current taxable year. *(R&TC 17942(d)(1))* For calendar year filers that means the payment for tax year 2019 was due June 17, 2019. A penalty of 10% of the underpayment of the estimated fee will apply if the estimated fee is underpaid, although no penalty will be imposed if the timely paid estimated fee is equal to or greater than the total of the preceding year's annual fee. *(R&TC 17942(d)(2))* Form FTB 3536 must be used to pay the estimated fee.

Deducting the LLC tax and fee – For federal purposes both the $800 tax and the income-based fee are deductible on the LLC's tax return, but for California purposes, only the fee paid is deductible.

- In addition, an LLC filing Form 568 that has members that are not residents of California must file the agreements of those non-resident members acknowledging that California may tax them and may collect tax from them, agreeing to file a California return and pay tax on the members' share of California source income of the LLC. For any non-residents that do not sign an agreement, the LLC must pay tax on the nonresidents' share of LLC income.

***Commencing and Dissolving LLCs* -** Commencing and dissolving LLCs are exempt from tax during the year of organization or dissolution if the tax year is 15 days or less and the LLC does no business in California during the tax year. For example, a calendar year LLC that is formed between December 17 and December 31 is exempt from tax during the first tax year if it does no business in California during that period. A calendar year LLC that dissolves by January 15 is exempt from tax during the last tax year if it does no business in California during that period.

KEY LLC FEATURES

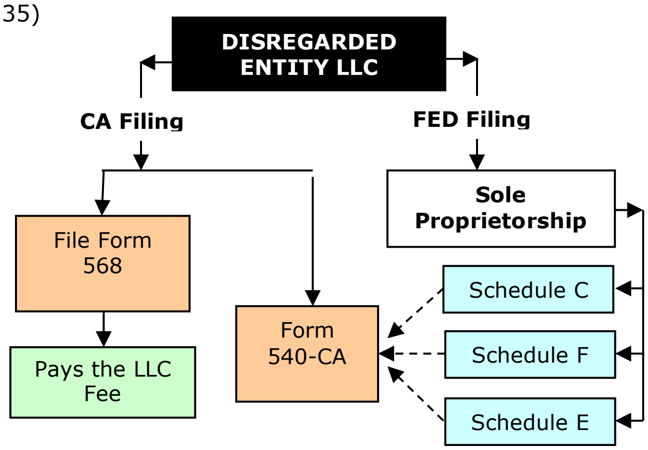
- An LLC may have one or more owners, and may have different classes of owners. In addition, an LLC may be owned by any combination of individuals or business entities. An LLC, therefore, is more flexible than an S-corporation with regards to types and numbers of owners.
- An LLC is treated as a legal entity separate from its owners, similar to how a corporation is treated, regardless of how the LLC is classified for tax purposes.
- In general, the owners (members) are shielded from individual liability for debts and obligations of the LLC.
- An LLC is formed by filing "articles of organization" with the California Secretary of State prior to conducting business.
- Forming an LLC is simpler and faster than forming and maintaining a corporation.

- LLCs do not issue stock, and are not required to hold annual meetings or keep written minutes, which a corporation must do in order to preserve the liability shield for its owners.
- Either before or after filing its articles of organization, the LLC members must enter into a verbal or written operating agreement. A formal, written agreement is advisable.
- An LLC is typically managed by its members, unless the members agree to have a manager manage the LLC's business affairs.
- Generally, members of an LLC that are taxed as a partnership may agree to share the profits and losses in any manner. Members of an LLC classified as a corporation receive profits and losses in the same manner as shareholders of a corporation legally organized as such.
- An LLC's life is perpetual in nature. However, the members may agree in the articles of organization or the operating agreement to a date or event that will cause the LLC to terminate. In addition, members of the LLC may vote at any time to end the business operations of the LLC.

<u>CA PENALTY – LLC FAILURE TO FILE</u>

Effective January 1, 2013, the FTB will assess a $2,000 penalty against an LLC (domestic/foreign) that is doing business within California while not registered to do business within the state or while suspended or forfeited and fails to file its required tax return upon notice and demand. (RTC §19135)

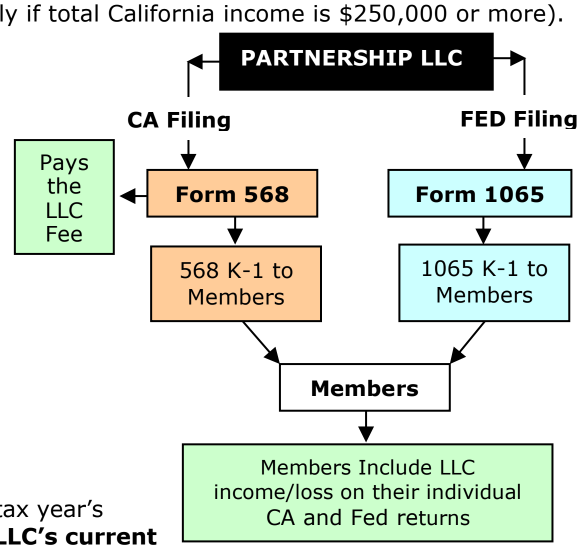
<u>CA & FEDERAL FILING REQUIREMENTS - OVERVIEW</u>



Single Member LLCs (SMLLC)

- <u>Federal Return</u> – Complete **Schedule C, E, or F as appropriate**.
- <u>California Returns</u> -
  - **Form 568** - Complete the following pages of the CA Form 568 LLC Return of Income using income, deductions, credits, etc., from the member's 1040 Schedule C, E or F:
    - Side 1,
    - Side 2,
    - Side 3,
    - Side 7, Sch IW (Income Worksheet)
    - Schedule B (only if income or loss amount reported on line 1 or line 3 through line 11 is $3 million or more),
    - Schedule K (only if total distributable income/payment items on line 21a is greater than or equal to $3,000,000 or less than or equal to <$3,000,000>), and
    - Pay the annual tax and LLC fee.
    - Due April 15th of the following year (calendar year taxpayers)
  - **Form 3522** – Complete the voucher and pay the $800 minimum annual LLC tax. For calendar year taxpayers the tax is due on or before April 15th **of the LLC's tax year** (not the following year).
  - **Form 3536** – Complete the voucher and pay the current tax year's estimated LLC fee by the 15th day of the 6th month of the **LLC's current tax year** (applies only if total California income is $250,000 or more).

Multi-Member LLC



- <u>Federal Return</u> – Prepare a **Form 1065 Partnership Return**
- <u>California Returns</u> -
  - **Form 568** - Complete the CA Form 568 LLC Return of Income using the income, deductions, credits, etc., from the corresponding Federal Form 1065, adjusted for California law differences:
    - Pay the annual tax and LLC fee.
    - Issue the K-1s to the members
    - Due the 15th day of the fourth month after the close of the LLC tax year.
  - **Form 3522** – Complete the voucher and pay the $800 minimum annual LLC tax. For calendar year taxpayers the tax is due on or before the 15th day of the fourth month **of the LLC's tax year** (not the following year).
  - **Form 3536** – Complete the voucher and pay the current tax year's estimated LLC fee by the 15th day of the 6th month of the **LLC's current tax year** (applies only if total California income is $250,000 or more).

Classified as a Corporation –

- Federal Return – Prepare a **Form 1120 or 1120S**
- California Returns -
  - **Prepare California Form 100**
    - Due 15th day of the 4th month after the close of the LLC's taxable year.
    - Taxed at the corporate tax rate of 8.84 percent and subject to a minimum tax of $800.

  - **Form 3522** – Complete the voucher and pay the $800 minimum annual LLC tax. For calendar year taxpayers the tax is due on or before the 15th day of the fourth month **of the LLC's tax year** (not the following year).

E-file Requirement - For taxable years beginning on or after January 1, 2014, California law requires any business entity that files an original or amended tax return that is prepared using tax preparation software to electronically file (e-file) their tax return with the FTB. Thus an LLC must file their Form 568 or Form 100 electronically. For more information, see the California Differences section in Chapter 3.00 or go to ftb.ca.gov and search for "business efile."

Short Form Cancellations for LLCs

California Code provisions allow limited liability companies (LLCs) to cancel and not be required to pay the first year annual tax if they meet certain conditions (Corporations Code Section 17350.5 and California Revenue and Taxation Code (R&TC) Section 17941(e)).

A domestic limited liability company (LLC) may use the Secretary of State's form SOS Form LLC-4/8, Limited Liability Company Short Form Certificate of Cancellation, to cancel (ceasing the LLC's rights, powers, and privileges) if it is filed within twelve months from the date the Articles of Organization were filed with the SOS, and it meets the following requirements:

- Owe no debts or liabilities, except for its final state income tax.
- Filed or will file a timely final tax return.
- Conducted no business since filing its articles of organization.
- Distributed all remaining assets to the entitled persons after providing for payment of all debts and liabilities.
- Voted to dissolve the LLC from a majority of the managers, members, or persons that signed the articles of organization.
- Returned all payments received for interests to the investors.

The short form cancellation is operative for LLC's that filed articles of organization.

The LLC annual tax is not required for the first taxable year if an LLC filed the short form cancellation with SOS and is classified as a partnership or disregarded entity.

If an LLC files SOS Form LLC-4/7, Limited Liability Company Certificate of Cancellation, or is involved in a merger or conversion, it does not qualify for LLC short form cancellation even if it meets all of the requirements.

Currently, the minimum tax is not required for the first taxable year only if the LLC is classified as a corporation.

The FTB can only refund the annual tax or fee that was paid on or after the date the LLC filed the SOS Form LLC-4/8, Limited Liability Company Short Form Certificate of Cancellation, with the SOS.

Example - Annual Tax Unpaid *- Needs Capital, LLC, filed articles of organization on August 1, 2019, with the SOS. The LLC later determined that it was unable to obtain sufficient funding to begin business operations. The LLC filed a short form cancellation (SOS Form LLC-4/8) with the SOS on December 14, 2019. It used a calendar tax year and did not pay any tax or fee. The LLC would file a final 2019 Form 568 without self-assessing the annual tax*

Example - Payment Received Prior to the Cancellation Date *- Use the same facts as in the prior Example, except that the LLC made an annual tax payment on November 16, 2019. The LLC would file a final 2019 Form 568 and self-assess the annual tax. The FTB cannot refund annual tax payments received before the date the LLC filed the short form cancellation with the SOS.*

Example - Payment Received On or After the Cancellation Date *- Use the same facts as in the first example, except that the LLC made an annual tax payment on January 15, 2020. The LLC files a final 2019 Form 568 without self-assessing the annual tax. The FTB will refund the annual tax payment since it was paid on or after the date the LLC filed the short form cancellation with the SOS.*

For additional information related to closing a CA business entity visit:

https://www.ftb.ca.gov/about-ftb/newsroom/tax-news/may-2018/how-to-close-a-california-business-entity.html

https://www.ftb.ca.gov/help/business/index.html

LLC Elects to Be Taxed as a Corporation - If the LLC elects to be taxed as a corporation for federal tax purposes, the LLC must file Form 100-ES and enter the California corporation number, federal employer identification number (FEIN), and California Secretary of State file number (CA SOS), if applicable, in the space provided. The FTB will assign an identification number upon receipt of the first estimated tax payment, tax payment, or the first tax return. The LLC will be subject to the applicable provisions of the Corporation Tax Law and should be considered a corporation for purpose of all instructions unless otherwise indicated.

NOTES

SECTION 179 DEDUCTION

RAPID FINDER

Overview

- An **election** to expense instead of depreciate
- **2019 Annual limit:** $1,020,000 ($510,000 MS)
- **Investment limit:** $2,550,000 (2019). The annual limit is reduced by $1 for every $1 over the investment limit.
- Limited to taxable income from all of the taxpayer's ***active*** trades or businesses.
- SUV (14K pounds or less) Limitation is: $25,500 (2019)
- **Qualifying Property**
  - Tangible personal property
  - Used in an active trade or business
  - Property eligible for MACRS
  - Off-the-shelf software
  - Qualified real property
  - Certain air conditioning and heating units after 2015
  - Roofs, HVAC, fire protection systems, alarm systems and security systems (nonresidential real property only)
- Furnishings used in the living quarters of a lodging facility after 2017
- Not available to estates and trusts
- Not allowed for buildings & structural components - unless "qualified real property"
- Partially recaptured (excess of Sec. 179 over MACRS) if taken out of service early.
- Taxpayers allowed to make, change, or revoke a Sec 179 election on a timely filed amended return. However, once a change has been made it becomes irrevocable.

TCJA

Increased Limits - For property placed in service after 2017, the TCJA increases the annual Sec 179 expensing limit from $510,000 to $1,000,000, and the annual investment limit threshold is upped from $2,030,000 to $2,500,000, with both amounts subject to future inflation indexing. *(Sec. 179(b) as amended by TCJA Sec. 13101)*

Expanded Definition of Sec 179 Property - TCJA expanded the definition of Sec 179 property placed in service after 2017 to include certain furnishings used in the living quarters of a lodging facility. See details on page 3.06.02.

***Post Construction Improvements To Non-residential Real Property* -** As qualified real property, certain improvements to nonresidential real property placed in service after the date such property was first placed in service are qualified Sec 179 property after 2017. Details on page 3.06.02.

***Commentary*:** The Sec 179 deduction was originally created as a small business expensing election allowing up to $25,000 of annual expensing. The higher limits now give larger companies that tend to purchase more and costlier qualifying property the ability to use Sec 179 expensing, a benefit especially in future years as the 100% bonus depreciation phases out.

Pubs Forms

Related IRC and IRS Publications and Forms

- **IRS Publication 946** – How to Depreciate Property
- **Form 4562** – Depreciation and Amortization
- **Section 179**

The Details

Taxpayers, **except trusts, estates and certain noncorporate lessors**, can **elect** (on Form 4562) to expense the cost of qualifying property used in the active conduct of a trade or business. The portion of the cost not expensed under Sec 179 is depreciable. If the taxpayer's use of the property drops to 50% or less in a subsequent year, recapture of some of the deduction benefit is required.

EXPENSE LIMITS

2017	2018	2019	2020
$510,000	$1,000,000	$1,020,000	1,040,000

QUALIFYING PROPERTY

Generally, qualifying property is purchased tangible personal property, either new or used, purchased for use in the active conduct of a trade or business eligible for ACRS or MACRS depreciation. However, buildings and their structural components, **other than** "qualified real property," **do not qualify**. The following are eligible property:

- Tangible personal property, either new or used,
- Off-the-self software
- Portable heating and air conditioning (AC) units (after 2015)
- Vines and fruit bearing trees (once in production stage)
- Qualified Real Property, generally includes:
  - Qualified leasehold improvement property
  - Qualified restaurant property
  - Qualified retail Improvement property
- Non-residential Real Property – certain post construction improvements (listed below)

Examples of Qualifying Property:

Personal Tangible Property **-** Grocery counters, refrigerators, display racks, shelves, neon signs, machinery, equipment, gas pumps, gas storage tanks, grain storage bins, autos, trucks, elevators, escalators, certain livestock, greenhouses, single-purpose livestock structures, and coin-operated vending machines.

Off-the-Shelf Computer Software – Off-the-shelf computer software (made permanent by the PATH Act of 2015).

Air Conditioning and Heating Units - Beginning after 2015, AC and heating units qualify for Sec 179 expensing, but only if they are Sec 1245 property, such as portable units – for example a window air conditioner and portable plug-in unit heaters. An example of an air conditioning or heating unit that will not qualify as Sec. 179 property is any component of a central air conditioning or heating system of a building, including motors, compressors, pipes, and ducts, whether the component is in, on, or adjacent to a building. However, AC and heating units that meet the definition of qualified real property (see below), placed in service after 2015 (Rev. Proc. 2017-33), and HVAC equipment put in service after 2017 in nonresidential real estate (see below), may qualify if the taxpayer so elects.

TCJA

Furnishings – Beginning after 2017 furnishings, e.g., beds and other furniture, refrigerators, ranges, and other equipment – used in the living quarters of a lodging facility such as an apartment house, dormitory, or any other facility (or part of a facility) used predominantly to furnish lodging or in connection with furnishing lodging.

Commentary: Previously Sec. 179 could only be used for a *transient* lodging activity, such as hotels and motels.

TCJA

Post-Construction Improvements to Non-residential Real Property **-** As qualified real property, any of the following improvements to nonresidential real property placed in service after the date such property was first placed in service and after 2017: roofs; heating, ventilation, and air-conditioning property; fire protection and alarm systems; and security systems.

SUV Limitations - The 2019 Sec 179 deduction for SUVs is limited to $25,500 (up from $25,000 in 2018), and applies to sport utility vehicles rated at 14,000 pounds gross vehicle weight or less. **Excluded from this limitation** is any vehicle that:

- is designed for more than nine individuals in seating rearward of the driver's seat;
- is equipped with an open cargo area, or a covered box not readily accessible from the passenger compartment, of at least six feet in interior length, **or**
- has an integral enclosure, fully enclosing the driver compartment and load carrying device, does not have seating rearward of the driver's seat, and has no body section protruding more than 30 inches ahead of the leading edge of the windshield.

The $25,000 limitation is adjusted for inflation in $100 increments for tax years beginning after 2018. (IRC Sec 179(b)(6)(B), as added by the TCJA)

Vineyards **-** In Chief Counsel Advice (CCA201234024), IRS has concluded that vineyards are eligible for the Code Sec. 179 expensing deduction.

Fruit bearing trees and vines aren't considered placed in service until they have reached an income-producing stage. (Reg. § 1.46-3 (d)(2)(iii)) To utilize the Sec 179 deduction, the cost of a newly planted vineyard must be capitalized until such time as the vines reach the income producing stage (placed in service) and then capitalized costs may be expensed under Sec 179.

Qualified Real Property – Includes the following property. (Under TCJA the property in the first 3 bullets below were combined into the single definition of qualified real property.):

- Qualified leasehold improvement property,
- Qualified restaurant property, and

- Qualified retail improvement property.
- Effective for property placed in service after 2017, any of the following improvements to nonresidential real property placed in service after the date such property was first placed in service: roofs; heating, ventilation, and air-conditioning property; fire protection and alarm systems; and security systems.

Qualified improvement property generally means an internal improvement to nonresidential real property if the improvement is placed in service after the date the building was first placed in service but does not include any improvement that enlarges the building, any elevator or escalator, or the internal structural framework of the building. (Code Sec. 168(e)(6)).

For this purpose, the term "**qualified real property**" means property acquired by purchase for use in the active conduct of a trade or business (Sec. 179(d)(1)), is property that is normally depreciated (Sec. 179(d)(1)) and **is not:**

- (prior to 2018) property used for lodging, except for property used by a hotel or motel in which the predominant portion of the accommodations is used by transients;
- property used outside the U.S; and
- property used by governmental units, foreign persons or entities, and certain tax-exempt organizations, and
- (prior to 2016) air conditioning or heating units.

> ***Example:*** *A small business owner with a retail clothing store can expense under Sec 179 improvements that were made inside the store, such as built-in cabinets to better stock clothing or lights to brighten the fitting rooms.*

Special Dollar Limitation: Prior to 2016 no more than $250,000 of the Sec 179 deduction limitation applicable can be used for Qualified Real Property.

NON-QUALIFYING PROPERTY

Examples of Non-qualifying Property include: Buildings, central heating and air conditioning units (unless eligible as qualified real property), swimming pools, paved parking lots, wharves, docks, bridges, fences, horses, property used outside the U.S. and property used 50% or less for business in the year placed in service.

RENTAL PROPERTY

The definition of Sec 179 property specifically states that buildings and their structural components do not qualify for the Sec 179 expense deduction. However, a question that is frequently asked is whether Sec 179 applies to Sec 1245 (personal tangible property), such as a washer or dryer, purchased and installed in a rental. Section 179 property is further defined as property used in an active trade or business. Since a rental generally does not meet the requirement of being an active trade or business the ***Sec 179 expense deduction will not apply to Sec 1245 property used in a rental activity.*** The term "trade or business" has the same meaning as in Sec 162 and the regulations thereunder. (Reg. 1-179-2(c)(6)(i))

Reg. 1-179-2(c)(6)(ii) – active conduct: "For purposes of this section, the determination of whether a trade or business is actively conducted by the taxpayer is to be made from all the facts and circumstances and is to be applied in light of the purpose of the active conduct requirement of section 179(b)(3)(A). In the context of section 179, the purpose of the active conduct requirement is to prevent a passive investor in a trade or business from deducting section 179 expenses against taxable income derived from that trade or business. Consistent with this purpose, a taxpayer generally is considered to actively conduct a trade or business if the taxpayer meaningfully participates in the management or operations of the trade or business. Generally, a partner is considered to actively conduct a trade or business of the partnership if the partner meaningfully participates in the management or operations of the trade or business. A mere passive investor in a trade or business does not actively conduct the trade or business."

FIRST YEAR PLACED IN SERVICE

Section 179 election is ***available only in the first year a property is placed in service.*** If a property is a nonqualifying property in its first year in service, a 179 deduction is not allowed in a later year if the property becomes qualifying. A property becomes a nonqualifying property if it is used for other than a qualifying purpose prior to being placed in service.

CARRYOVER

Any amount which can't be deducted in one tax year because of the taxable income limit (see next item) may be carried over to the next year and added to the cost of qualifying property in that year. Apply carryover amounts on a FIFO basis. The carryover amount is subject to the taxable income limitation and maximum dollar limitation in effect for the carryover year. No carryover is available for deductions lost due to the investment limit or the maximum deduction limit.

TAXABLE INCOME LIMIT

The amount of deduction is further limited to the amount of taxable income from any of a taxpayer's active trades or businesses. Taxable income, for this purpose, is computed without regard to:

1. The cost of any qualified expense property,
2. The above-the-line deduction for a portion of self-employment tax,
3. Any net operating loss carryback or carryforward, and
4. Any deductions suspended under the passive activity rules.

Employees are considered to be engaged in the active conduct of the trade or business of their employment. Thus, **wages, salaries, tips and other compensation** (not reduced by unreimbursed employee business expenses) derived by an employee are included for purposes of the taxable income limit (Reg § 1.179-2(c)(6)(iv)).

Example - Computing Taxable Income Limits for Section 179: *Joe purchased and placed in service office equipment at a cost of $12,000. In the year he purchased the equipment, Joe's taxable income from his business was $7,000 (without regard to any Section 179 deduction for the equipment). Joe has a W-2 for $2,000 from a part-time job. His Section 179 deduction is limited to $9,000, but he may carry $3,000 forward to future years.*

INVESTMENT LIMIT

When the total cost of qualifying property placed in service in any given year exceeds the investment limit, decrease the expense cap amount for the year by one dollar for each dollar over the investment limit. The investment limit is annually inflation adjusted, rounded to the nearest $10,000, after 2015.

Year	2017	2018	2019	2020
Investment Limit	2,030,000	2,500,000	2,550,000	2,590,000

If an amount is not shown, it was not available at publication date

Example – Computing Section 179 Under Investment Limit: *Jack placed business machinery costing $2,600,000 in service during 2019 when the investment limit was $2,550,000 and Sec 179 deduction cap was $1,020,000. Jack's net profit from his business is $2,950,000 before his Section 179 expense deduction. His maximum 179 expense deduction for the placed-in-service year is $970,000, ($1,020,000 reduced by $50,000, the machinery's cost exceeding $2,550,000).*

RECAPTURE

If property is removed from business service (or not used more than 50% for business) AT ANY TIME before the end of its recovery life, recapture is necessary. Add back the excess of the Section 179 amount over the MACRS deduction that would have been allowed. Recapture amount is initially entered on Form 4797, Part IV, and is then reported as income on the same form or schedule where the deduction was originally taken.

Example 1 - Recapture of Section 179 Deductions: *Fran bought a copier on 02/15/18 for $700. The property was used 100% in her secretarial business, and she elected a Section 179 deduction of $700 on her 2018 tax return. In 2019, she closed her business and the copier was used only for personal use. She must recapture $560 [the difference between the Section 179 deduction and the MACRS deduction (five-year property, 20% of $700 = $140), which would have been allowed in 2018 if Sec 179 had not been elected]. The recapture would add to Fran's 2019 net income, if any, on Schedule C and thus could increase her self-employment tax.*

Example 2 - Recapture of Section 179 Deduction When Decrease in Business Use: *Sam bought and placed in service on 10/31/17 three-year property, which cost $10,000. He elected a 179 deduction of $5,000 on his 2017 tax return. He did not claim any bonus depreciation. The property was not listed property and was used 100% in Sam's business in '17 and '18, but in 2019 his business use was only 40%. Since his business use of the property fell to 50% or less in 2019, he is not entitled to the Section 179 deduction. Sam's recapture in 2019 is $816, figured as follows:*

Year	*Deduction*	*Redetermined*
2017	*$6,667* [1]	*$3,333* [4]
2018	*2,223* [2]	*4,445* [5]
2019	*296* [3]	*592* [6]
Total	*$9,186*	*$8,370*
	<8,370>	
Recapture	***816***	

[1] *$5,000 179 deduction + MACRS on remaining basis ($5,000 x .3333 = $1,667)*
[2] *$5,000 x .4445*
[3] *$5,000 x .1481 x .40*
[4] *$10,000 x .3333*
[5] *$10,000 x .4445*
[6] *$10,000 x .1481 x .40*

OTHER ISSUES

Prorating the Expense - A taxpayer can pick and choose the qualifying items to which the Sec 179 expense deduction is to apply. The taxpayer may also expense any portion of a qualifying item, leaving the remaining basis to be depreciated (Reg. 1.179-1(b)).

The full amount of the expense deduction is allowed regardless of when during the year the item was purchased and placed in service. Therefore, even qualified property purchased and place in service on the last day of the tax year will qualify for the full Sec 179 deduction (Reg. 1.179-1(c)).

Listed Property - If a section 179 election is made for "listed property" and there is personal use of the property, the Section 179 deduction may be limited by the listed property rules of section 280F(d)(1), which provides rules that coordinate section 179 with the section 280F limitation on the amount of depreciation that may apply (Reg. 1.179-1(d)(3)).

Basis Adjustment - Reduce the depreciable basis of the section 179 property by the amount of the section 179 expense deductions (Reg. 1.179-1(f)).

The basis of a partnership or S corporation's Section 179 property must be reduced to reflect the amount of section 179 expense elected by the partnership or S Corporation. This reduction must be made in the basis of partnership or S corporation property even if the limitations of section 179(b) and § 1.179-2 prevent a partner in a partnership or a shareholder in an S corporation from deducting all or a portion of the amount of the section 179 expense allocated by the partnership or S corporation. See §1.179-3 for rules on applying the basis provisions when a person has a carryover of disallowed deduction (Reg. 1.179-1(f)).

Alternative Minimum Tax - The Section 179 deduction **is not** an adjustment or preference item for AMT purposes.

Marital Status:

- **Married separate taxpayers** - Treated as one taxpayer for determining the Section 179 limit. Divide the limit equally between the taxpayers, unless they elect an unequal split. Determine the taxable income limitations separately as well.
- **Joint taxpayers** - For purposes of the expense election, a husband and wife filing a joint return are also treated as one taxpayer in applying the dollar limitations, regardless of which spouse purchased the Section 179 property. In applying the taxable income limitation of joint taxpayers, use the aggregate taxable income from active trades or businesses of both taxpayers (Reg. 1.179-2(c)(7)).

Bonus Depreciation - For property eligible for the bonus depreciation and Sec 179 is also being claimed, figure the Section 179 deduction before figuring the bonus allowance and MACRS deduction. Subtract the 179 deduction, as well as the bonus allowance if applicable, from the basis of the property and compute the MACRS deduction on the remainder.

> **NOTE**: Wherever possible, it is best practice to use bonus deprecation and avoid Sec 179 expensing, thus eliminating or minimizing any potential Sec 179 recapture and its ramifications.

Making the Election - The election to expense under Section 179 is made on the return for the year the property is placed in service. Specify the items to which the election applies. Use Form 4562 to make the election. For any taxable year beginning after 2014, a taxpayer may make a Section 179 election with respect to any eligible 179 property without the consent of the IRS on an amended Federal tax return for the taxable year in which the taxpayer places in service the Sec 179 property (Rev. Proc. 2017-33, section 3.02) The Treasury Department and the IRS intend to amend Reg. 1.179-5(c) to incorporate this provision and until that is done, taxpayers can rely on the guidance in Rev. Proc. 2017-33.

Revoking the Election - Taxpayers may make or revoke an expensing election on amended returns without IRS consent if filed within the time prescribed by law for filing an amended return for the tax year for which the election was made, Reg § 1.179-5(c), as verified by Rev. Proc. 2017-33. An amended return must be filed within 3 years (including extensions) after the date the return was filed or within 2 years after the date the tax was paid, whichever is later (1040-X Instructions, Pg. 3 for 2018).

CALIFORNIA DIFFERENCES

The CA Section 179 expense limit is $25,000 with an investment limit of $200,000. Where there is a difference from the Federal, the Section 179 adjustment is made on the Schedule CA. In general, for taxable years starting on or after January 1, 2015, the state conforms – with many exceptions – to the Internal Revenue Code as of January 1, 2015. Exceptions and differences related to Sec 179 expensing, in addition to the dollar limits noted above, include the following:

- Computer software cannot be expensed but must be depreciated or amortized.
- The state does not permit revocation of Section 179 without permission.
- Sec 179 expensing of "qualified real property" is not allowed.
- The state has not adopted the post-2015 inclusion of portable heating and air conditioning units as qualified Sec 179 property.
- The state has not adopted as qualified Sec 179 property the post-2018 inclusion of beds and other furniture, refrigerators, ranges, and other equipment – used in the living quarters of a lodging facility such as an apartment house, dormitory, or any other facility (or part of a facility) used predominantly to furnish lodging or in connection with furnishing lodging.
- The state has not has not adopted as qualified Sec 179 property the post-2018 inclusion of improvements to nonresidential real property placed in service after the date such property was first placed in service: roofs; heating, ventilation, and air-conditioning property; fire protection and alarm systems; and security systems.

NOTES

LISTED PROPERTY

Listed Property:

- Passenger vehicles
- Other property used as means of transportation
- Property used for entertainment, recreation, or amusement:
  - photographic,
  - phonographic,
  - video recording.
- Pre-2018: Computer or peripheral equipment – except when used exclusively at the taxpayer's regular business establishment
- **Limitations**:
  - If business use is 50% or less:
    - No Sec 179 allowed
    - Use straight line depreciation
    - Employees – deduction not allowed unless a condition of employment (no deduction 2018-2025 due to TCJA suspension of tier 2 miscellaneous deductions).
  - Subsequent year if use is 50% or less:
    - Switch to straight line method
    - Sec 179 recapture

- **Pub 946 –** How to Depreciate Property
- **Pub 463 –** Travel, Gift and Car Expenses
- **Form 4562 –** Depreciation and Amortization
- **IRC Sec 280F**

TCJA removes computers and peripheral equipment from the definition of listed property, effective for property placed in service after 12/31/2017. Thus they are no longer subject to the listed property substantiation requirements and special depreciation rules. IRC Sec. 280F(d) as amended by TCJA Sec. 13202(b)

Congress imposes strict limitations on the deductions allowed for so-called "listed" property and provided guidelines (Code Sec. 280F(b)) for determining what property is included in the "listed" category.

WHAT IS "LISTED PROPERTY"?

In general, the following property is considered "listed property":

(1) Any ***passenger automobile*** that is a four-wheeled vehicle for use on public roads and has an unloaded gross vehicle weight (or, for trucks and vans, gross vehicle weight) of 6,000 pounds or less (thus the luxury auto rules). The Section 280F regs specifically exclude vehicles used for hire or commuter highway vehicles from the definition of a passenger auto.

(2) Other property used as means of transportation such as trucks, buses, trains, boats, airplanes, motorcycles, or other vehicles used for transporting persons or goods.

(3) Property used for entertainment, recreation, or amusement (unless used in connection with a taxpayer's trade or business or exclusively at the taxpayer's place of business), e.g., ***photographic, phonographic, and video recording*** equipment.

(4) If placed in service **before 2018**, ***computer or peripheral equipment*** except those owned or leased by the taxpayer, and used exclusively at the taxpayer's regular business establishment (which may include a home office only if the conditions of Sec. 280A(c)(1) are met, i.e., exclusive and regular use as a principal business location, etc.).

(5) Any other property as specified in regulations.

CELL PHONES EXCLUDED FROM THE "LISTED PROPERTY" RULES:

Effective for years beginning after Dec 31, 2009, cellular telephones (cell phones) and other similar telecommunications equipment are not part of the categories of "listed property" under Code Sec. 280F(d)(4). Thus, the heightened substantiation requirements and special depreciation rules that apply to listed property don't apply to cell phones. That is, a taxpayer using his or her own cell phone for business purposes isn't limited to using straight-line depreciation under the ADS system when business use is 50% or less. Further, an employee's use of his own cell phone does not have to be "for the convenience of the employer" and "as a condition of employment" for business-related costs of the phone to be deductible.

Employers may deduct the cost of providing cell phones to their employees for employment-related business use, without having to satisfy the strict substantiation requirements for listed property. To support a deduction for the cell phones, the employer need only substantiate their cost, in much the same way as the employer supports the deduction for other types of business equipment.

Cell Phones as an Excludable Fringe Benefit – IRS Notice 2011-72 provides guidance on the treatment of employer-provided cell phones as an excludable fringe benefit.

Employer Provided Phone **-** When an employer provides an employee with a cell phone primarily for noncompensatory business reasons, the business and personal use of the cell phone is generally nontaxable to the employee (as a working condition fringe benefit for the business portion and a *de minimis* fringe for the personal use). The IRS will not require recordkeeping of business use in order to receive this tax-free treatment.

An employer will be considered to have provided an employee with a cell phone primarily for noncompensatory business purposes if there are substantial reasons relating to the employer's business, other than providing compensation to the employee, for providing the employee with a cell phone. Examples of possible substantial noncompensatory business reasons include:

- The employer's need to contact the employee at all times for work-related emergencies,
- The employer's requirement that the employee be available to speak with clients at times when the employee is away from the office, and
- The employee's need to speak with clients located in other time zones at times outside of the employee's normal work day.

A cell phone provided for the following reasons will **not** be considered as provided primarily for noncompensatory business purposes:

- To promote the morale or good will of an employee,
- To attract a prospective employee, or
- As a means of furnishing additional compensation to an employee.

Employer Reimbursement for Cell Phone Expenses – Although Notice 2011-72 does not cover the situation where an employer reimburses the employee for cell phone expenses, the IRS did issue a memo on September 14, 2011 to all field examination operations bringing this issue and Notice 2011-72 to the attention of the audit staff (Control Number SBSE-04-0911-083).

Where employers reimburse employees for business use of their personal cell phones, tax-free treatment is available without burdensome recordkeeping requirements. However, the employee must maintain the type of cell phone coverage that is reasonably related to the employer's business needs, and the reimbursement must not exceed the employee's actual cell phone expenses. Additionally, the reimbursement for business use of the employee's personal cell phone must not be a substitute for a portion of the employee's regular wages. IRS examiners are directed to closely scrutinize arrangements that replace a portion of an employee's previous wages with a reimbursement for business use of the employee's personal cell phone and arrangements that allow for the reimbursement of unusual or excessive expenses.

The guidance does not apply to the provision of cell phones or reimbursement for cell-phone use that is not primarily business related, as such arrangements are generally taxable.

SOME VEHICLES ARE EXCLUDED FROM THE "LISTED PROPERTY" RULES: *For the rules pertaining to the luxury auto rules, refer to chapter 3.11.*

Some vehicles are generally not thought of as being for personal use. Therefore, they are termed "qualified, nonpersonal-use vehicles" and are not subject to the listed property rules. The regulations §1.274-5(k) define these vehicles in great detail, indicating the features necessary to exempt them from the listed rules. Such vehicles are:

- Clearly-marked police, fire and public safety officer vehicles. A clearly marked public safety officer vehicle is a vehicle owned or leased by a governmental unit or any agency or instrumentality thereof, that is required to be used for commuting by a public safety officer who, when not on a regular shift, is on call at all times. (Reg Sec 1.274-5(k)(3))

  To qualify, any personal use (other than commuting) of the vehicle outside the limit of the public safety officer's obligation to respond to an emergency must be prohibited by the governmental unit. To be "clearly marked" the vehicle's painted insignia or words must make it readily apparent that the vehicle is a public safety officer vehicle. Thus, emergency responders who are not employed by either the fire department or police department receive the same treatment as those who work for the police or fire departments;

- Delivery trucks with seating only for the driver (or driver plus a folding jump seat);

- Any vehicle designed to carry cargo with a loaded gross vehicle weight over 14,000 pounds. Trucks and vans are exempt if the weight requirement is met or if they have been modified so that little personal use is likely. For example, a van that has only a front bench for seating, permanent shelving filling most of the cargo area, carries merchandise or equipment on a constant basis, and is painted with the company name will be considered a nonpersonal use vehicle;

- Passenger buses used as such with a capacity of at least 20 passengers;
- Ambulances and hearses, used as such;
- Bucket trucks (cherry pickers) and flatbed trucks;
- Cranes, derricks, forklifts and cement mixers;
- Dump trucks, including garbage trucks;
- Tractors, combines, and other special purpose farm vehicles;
- Refrigerated trucks;
- School buses;
- Qualified moving vans;
- Qualified specialized utility repair trucks; and
- Unmarked law enforcement vehicles if the use is officially authorized.

Qualified Non-Personal Use Vehicles - A **truck or van that is a qualified non-personal use vehicle** is also a vehicle exempt from the luxury auto rules. The truck or van must have been specially modified with the result that it is not likely to be used more than a *de minimis* amount for personal purposes. The regulations' example of a qualifying nonpersonal use vehicle is a van with only a front bench for seating, in which permanent shelving that fills most of the cargo area has been installed, that constantly carries merchandise or equipment, and that has been specially painted with advertising or the company's name. These specially manufactured or modified vehicles do not provide significant elements of personal benefit, and a taxpayer is not likely to purchase this type of truck or van unless there was a valid business purpose that could not be met with a less expensive vehicle. (Reg. 1.280F-6)

THE LIMITATIONS FOR LISTED PROPERTY

If listed property is not used more than 50% in "qualified business use" during the year, then no Section 179 deduction is allowed, and the property must be depreciated using the straight-line method. If the listed property is a so-called "luxury" vehicle, specific dollar limitations (see chapter 3.11) apply to MACRS deductions.

Although a "heavy" truck or van may not be a "passenger automobile," it is still used as a means of transportation and falls within the definition of listed property. Therefore, if business use is not more than 50%, the heavy truck or van may be depreciated using the straight-line method only and no Sec. 179 deduction is allowed. It would escape the annual depreciation caps, however, because it is not a passenger auto.

QUALIFIED BUSINESS USE

(1) Use for the production-of-income is not considered qualified business use.

Example - Production-of-Income Use of Listed Property - *During 2019 a taxpayer uses a camera for 300 hours during the year. Of that time, 147 hours are for use in the taxpayer's business and 6 hours are used to take pictures of potential investments. The remainder of the time is personal. Though the camera is used over 50% of the time for business/investment purposes, the actual business-use time is only 49% (147/300). The listed property limitations must be applied to the camera; i.e., no Section 179 deduction is allowed and straight-line depreciation over the earnings and profits (ADS) life must be used. On the other hand, when an asset is used for both business and investment purposes and the qualified business-use percentage is over 50%, then both the business and investment use count towards allowable MACRS deductions for the property.*

Example - Computing Business Use of Listed Property *– During 2019 an asset is used 60% for business, 20% for investment, and 20% for personal purposes. The cost recovery deduction will be based on 80% business/investment use. For 2018 through 2025, the investment use portion of the depreciation is not deductible because the TCJA suspended the miscellaneous deduction for items subject to the 2% of AGI reduction, which includes investment expenses. Likewise, if the business use is by an employee, none of the depreciation or related expenses will be deductible.*

(2) Commuting is not a qualified business use.

(3) Leasing of property to a 5% owner (or person related to the owner, as defined in Code Section 267(b)) of the taxed entity is not qualified business use.

(4) The use of listed property which is provided as compensation for services of a 5% owner (or person related to the owner) is not qualified.

> ***Example - Listed Property Limits for Business Owners -*** *Robert owns a clothing store and employs his brother, Jim, in the business. Part of Jim's compensation includes use of a company car for personal purposes. The value of the use of the car is included in Jim's gross income and Robert withholds taxes on it. This use of the property is not considered "qualified business use."*
>
> *However, assume the same facts as above except Jim uses the car 75% for use in the clothing store and 25% for personal use. The personal use portion is included on Jim's W-2 and taxes are withheld. In this case, the company's qualified business use is 75% (and total business use is 100%).*

(5) Use of listed property by any person (other than 5% owner or owner's relative), which is provided as part of that person's compensation, is not qualified business use. However, if the value of the use is added to the user's income (e.g., if the value is treated as wages, subjected to withholding and included on the employee's W-2), then this will be considered qualified business use.

> ***Example - Listed Property Treated as Compensation*** *- India, Inc. owns several automobiles which are used by employees in the course of India's business. The employees also commute back and forth to their homes in these vehicles. The value of the commuting is included in the W-2s of the employees and taxes are withheld. Under these circumstances, the use of the cars by the employees (even the personal use) is qualified business use for India, Inc.*

<u>EMPLOYEES AND THE LISTED PROPERTY RULES</u>

TCJA

Computers and peripheral equipment are removed from the ranks of listed property, effective for property put into service in 2018 and later. Effective 2018 through 2025, the TCJA suspends miscellaneous itemized deductions that are subject to the 2% of AGI reduction. Thus, employee business expenses are not deductible during this period.

When an employee uses his/her own listed property in the course of his/her employment, special rules apply. Such property must be used FOR THE CONVENIENCE OF THE EMPLOYER and must be ***<u>REQUIRED AS A CONDITION OF EMPLOYMENT</u>***. The use of the property must actually be necessary for the employee to properly perform the duties of the job.

Rev Rul 86-129 - Addressed the issue in the use of a computer by an employee. The employee was allowed no deduction (not even straight-line depreciation) for the job-related use of his own computer, even though he had a statement from his employer stating the computer was required.

The IRS ruled that the computer was not necessary for the proper performance of the employee's duties. Though the ruling only addressed the issue of employee use of a computer, it would seem that other types of listed property (i.e., autos, etc.) might have a similar fate under the same circumstances.

> ***Example - Qualified Employee Use of Listed Property -*** *David works as a delivery person for D-Best Courier Service, where he uses his own car in delivering packages for D-Best. The courier service actually requires all its delivery people to own a car for use in their delivery responsibilities and reimburses these employees for their car expenses. Under these circumstances, the "convenience of the employer" test has been met.*

> ***Example – Nonqualified Employee Use of Listed Property -*** *Faith is an inspector for Fieldstone Construction in Fontana. Fieldstone requires Faith to visit their various construction sites in the area. She uses her own vehicle, even though the company has a car available for her to use. Faith does receive reimbursement for the use of her own car. Faith's use of her automobile is not considered for the convenience of the employer and is not required as a condition of employment.*

Cadwallader, TC Memo 1989-356 - This case offers some good news to employees hoping to deduct the cost of home computers used for business use. Mr. Cadwallader was a professor at a university in the Midwest and his job required a large amount of research at home. He didn't have access to a computer at the college. Mrs. Cadwallader also used a computer for extensive number crunching in her job as a transportation planner for the state. However, her employer didn't have a computer nor require her to purchase one in order to keep her job. The Court concluded that the condition of employment test was met by both taxpayers:

(1) The computer enhanced Mr. Cadwallader's job capability by giving him the ability to gather and store his vast research data.
(2) Mrs. Cadwallader's employer had budget restrictions, which prevented the state from providing her with the computer required for her to properly perform her duties.

In addition, the convenience of employer test was met by both taxpayers because the employer was spared the cost of providing computer equipment for their employees.

FIGURING THE DEDUCTION:

To figure the deduction for any listed property, divide the property into segments according to use, i.e., business portion, investment portion, personal portion. Then determine what kind of use is "predominant" (i.e., over 50% of the total). If the "qualified business use" is over 50%, figure the deduction using MACRS (accelerated) or Section 179 (if elected in the

year placed in service). The predominant-use test must be met each year during the recovery period. If that test is not met, the taxpayer must change to the straight-line method and possibly a longer recovery life. Use the alternative depreciation method (ADS) and the lives assigned under it. In the year the property changes to straight-line, excess depreciation and any Section 179 previously deducted must be recaptured. The recapture amount is the excess depreciation and 179 expense deducted in previous years over the depreciation which would have been allowed under the straight-line method.

Example - Recapture of Listed Property Deductions - *On January 1, 2018, Mike purchased and placed in service camera equipment which cost $12,000; he used the equipment exclusively in his trade or business. In 2019, Mike used the camera equipment 50% for business and 50% for personal purposes.*

2018 Section 179 deduction $12,000
2018 MACRS deduction...0
Total 179 and MACRS deductions 12,000
Actual allowable 2018 depreciation...1,200
(5-year life, straight-line, .10 x $12,000)
Total excess--add to 2019 income.. 10,800
2019 Basis ($12,000 x 50%)...6,000
Depreciation allowed in 2019...1,200
(Straight-line, 20% x $6,000)

ADJUSTED BASIS OF LISTED PROPERTY – When listed property is partly used for personal purposes, for determining future depreciation, the basis of the asset must be reduced as though 100% of the depreciation allowable had been claimed. Basis for computing gain or loss will be the actual adjusted basis.

Example – Unrecovered Basis of Listed Property: *Dan purchased a computer in 2013 for $3,000 that was listed property according to the law at that time. In 2013 and the next five years, his qualified business use ranged from 55% to 80%. In total, he deducted $2,144 of depreciation over the recovery period. At the end of that time, his actual adjusted basis was $856 ($3,000 - $2,144). In 2019, Dan uses the computer 100% for business, but since his remaining basis for depreciation is zero, he can't claim a depreciation deduction. His depreciable basis is zero because he has to include the personal portion of each year's depreciation amount when figuring his adjusted basis for computing future depreciation – thus, the full amount of the original cost is deemed depreciated. If Dan were to sell the computer after 2018, his basis for figuring gain or loss would be $856.*

REQUIRED RECORDS

No depreciation or Sec. 179 deduction for the use of listed property (including passenger autos) may be claimed unless the taxpayer can prove business/investment use with "adequate records" or sufficient evidence to support his or her own statements. Records related to listed property must be kept as long as any excess depreciation can be recaptured.

The adequate records requirement will be met if the taxpayer maintains an account book, diary, log, statement of expense, trip sheet, or similar record that, together with a receipt, is sufficient to establish each element of an expenditure or use. If the information is already shown on the receipt, it is not necessary to record the information in an account book, diary, or similar record. However, the records should back up the receipts in an orderly manner. The records or other documentary evidence must support:

- The amount of each separate expenditure, such as the cost of the item, maintenance and repair costs, capital improvement costs, lease payments, and any other expenses;
- The amount of each business and investment use (based on mileage for vehicles and time for other listed property), and the total use of the property for the tax year;
- The date of the expenditure or use; and
- The business or investment purpose for the expenditure or use.

Written documents of expenditure or use are generally better evidence than oral statements alone. A written record prepared at or near the time of the expenditure or use has greater value as proof of the expenditure or use, although a daily log is not required. However, some type of record containing the elements of expenditure or the business or investment use of listed property made at or near the time and backed up by other documents is preferable to a statement prepared later.

CALIFORNIA DIFFERENCES

California generally conforms to the listed property rules as of 1/1/15. California has conformed to the delisting of cell phones from listed property (AB 154 – 2015). However, without conforming legislation, California will continue to treat computers and peripheral equipment as listed property.

NOTES

TAX TREATMENT OF INTANGIBLES

IRC §197 allows acquired intangibles like goodwill, going concern value, etc., to be **amortized ratably over 15 years.**

Different rules apply for self-created intangible assets (e.g., goodwill created through advertising) than for intangibles that are acquired. Self-created intangible assets are either deductible (but see "Regulations" at the end of this chapter) or their capitalized costs are amortized, provided they are of use to the business for only a limited period of time that can be reasonably estimated. Examples are patents and copyrights. If the self-created intangible asset's useful life is not limited or determinable, its cost is not amortizable.

AMORTIZABLE SEC 197 INTANGIBLE ASSETS: Amortizable Section 197 intangible assets are those ***acquired in a trade or business or for the production of income***. They include:

(1) Goodwill and going concern value,
(2) Workforce in place,
(3) Information in place,
(4) Know-how,
(5) Customer and supplier-based intangibles,
(6) Government licenses and permits. These include
   - Liquor License
   - Taxi-cab Medallion (or license)
(7) Franchises, trademarks, and trade names,
(8) Insurance policy expirations, and
(9) Bank deposit base.

The following assets are treated as Section 197 assets, if they are ***acquired in connection with the acquisition of a business:***

- Covenants not to compete,
- Computer software,
- Films,
- Sound recordings,
- Video tapes and books,
- Copyrights and patents,
- Rights to receive tangible property or services,
- Interest in patents and copyrights,
- Mortgage servicing rights secured by residential real property, and
- Contract rights good for less than 15 years or fixed in amount.

The following assets are never Section 197 assets, regardless of how acquired: interests in corporations, partnerships and estates, computer software that is readily available for purchase by the general public, futures, foreign currency contracts, and notional principal contracts, land, leases of tangible property, debt instruments, tax-free transaction costs, accounts receivable.

DEFINITIONS

Going concern value is the value attached to the ability of a business to continue to function and collect income without interruption, even after an ownership change.

Workforce in place refers to the portion of a purchase price attributed to a trained, experienced workforce in place as of the date of acquisition.

LOSSES ON DISPOSITION OF SECTION 197 ASSETS:

A loss deduction is not allowed on disposition, abandonment, or worthlessness of an intangible if any other Section 197 intangible was acquired in the same transaction and a taxpayer still has the other intangible. If the latter is true, the unallowed loss is reallocated to the retained intangible. Thus, the cost of many Section 197 assets must continue to be amortized, although they become worthless for one reason or another.

RESIDUAL METHOD TO ALLOCATE BUSINESS PURCHASE PRICE TO GOODWILL:

When a taxpayer sells a trade or business for a lump sum, and the character of the business is such that goodwill or going concern value could be attached to the assets that make up the business, the seller and purchaser who don't otherwise have a binding written agreement as to how the purchase price is to be allocated among the assets must use a residual allocation method. The result of this method is to determine the purchaser's bases in the acquired assets and the seller's gain or loss, capital or ordinary, on the assets sold. ***The allocation is reported on Form 8594, Asset Acquisition Statement (applicable to both buyer and seller).***

The residual method requires that all assets of an acquired business be divided into seven classes:

(1) **Class I:** Cash and cash equivalents;

(2) **Class II:** Certificates of deposit, U.S. government securities, readily marketable securities, foreign currency;

(3) **Class III:** Assets the taxpayer marks to market at least annually for tax purposes, including accounts receivable.

(4) **Class IV:** Stock in trade or other property that would be included in inventory if on hand at the close of the tax year, property held primarily for sale to customers;

(5) **Class V:** All assets other than Class I, II, III, IV, VI and VII assets (generally including furniture and fixtures, buildings, land, vehicles, and equipment, which constitute all or part of a trade or business);

(6) **Class VI:** Code Sec. 197 intangibles, except goodwill and going concern value;

(7) **Class VII:** Assets in the nature of goodwill and going concern value.

The purchase price (reduced by Class I amounts) is allocated successively to the assets in Classes II through VI based on their fair market value. The excess (residual) of the purchase price over the values of Class I through VI assets is goodwill and going concern value.

Example - Purchase of Goodwill - *Gary bought a business from Ginny for $400,000. The following Class II, III and V assets were included as part of the purchase price: equipment, furniture, land, building, marketable securities, and accounts receivable. These assets had a value of $350,000. Also included in Gary's acquisition are goodwill and a customer list claimed to be worth $26,000. The customer list is a Class VI asset, leaving the residual amount of $24,000 to be goodwill as a Class VII asset. Although both the customer list and goodwill are Sec. 197 assets amortizable over 15 years, they are classed separately for the asset acquisition computation on Form 8594*

Example – Insurance Agent Termination Payments - There was no sale or exchange where assets used by an insurance agent in the conduct of his business, including a computer, customer lists, and books and records, were returned to the insurance company. The assets weren't the agent's to sell because his agreement with the insurance company specified that the assets were the insurance company's property. And while the agent developed goodwill during his tenure (the sale of which would generally produce capital gain), the goodwill, too, belonged to the company and wasn't the agent's to sell. So, termination payments received by the agent were ordinary income. (Baker, Warren L. Jr. v. Com., (2003, CA7)).

NONRECOGNITION TRANSACTIONS:

Prior to 2018 - If any Section 197 intangible is transferred in certain transactions that qualify for nonrecognition of gain, the transferee "steps into the shoes of the transferor" with respect to the portion of the adjusted basis of the transferee that isn't more than the adjusted basis of the transferor. The following nonrecognition transactions fall under this rule: subsidiary liquidations (Section 332), incorporation transfers (Section 351), reorganization transfers (Section 361), partnership contributions (Section 731), like-kind exchanges (Section 1031), involuntary conversions (Section 1033).

Post 2017 - Generally, for exchanges completed after December 31, 2017, Section 1031 applies only to real property exchanges.

REGULATIONS

IRS has issued comprehensive regulations explaining how the Code Sec. 263(a) rule barring deductions for capital expenses applies to amounts paid to acquire, create, or enhance intangible assets.

The regulations generally would require taxpayers to capitalize an amount paid to acquire, create, or enhance an intangible asset, a term that includes the following assets: *Reg § 1.263(a)-4(c)*

Acquired intangibles - amounts paid to another party to acquire an intangible asset from that party in a purchase or similar transaction. Generally, they include:

- An ownership interest in a corporation, partnership, trust, estate, limited liability company, or other similar entity;
- A debt instrument, deposit, stripped bond, stripped coupon (including a servicing right treated for federal income tax purposes as a stripped coupon), regular interest in a REMIC or FASIT, or any other intangible treated as debt for federal income tax purposes;
- A financial instrument, such as a notional principal contract; a foreign currency contract; a futures contract; a forward contract (including an agreement under which the taxpayer has the right and obligation to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property)); an option (including an agreement under which the taxpayer has a right to provide or to acquire property (or to be compensated for such property), regardless of whether the taxpayer provides or acquires the property)); any other financial derivative.
- An endowment contract, annuity contract, or insurance contract.
- Non-functional currency.
- A lease.
- A patent or copyright;
- A franchise, trademark or trade name (as defined in §1.197-2(b)(10)).
- An assembled workforce (as defined in §1.197-2(b)(3)).
- Goodwill (as defined in §1.197-2(b)(1)) or going concern value (as defined in §1.197-2(b)(2)).
- A customer list.
- A servicing right (for example, a mortgage servicing right that is not treated for Federal income tax purposes as a stripped coupon).
- A customer-based intangible (as defined in §1.197-2(b)(6)) or supplier-based intangible (as defined in §1.197-2(b)(7)).
- Computer software.
- An agreement providing either party the right to use, possess or sell an intangible described in paragraphs (c)(1)(i) through (v) of this section.
- *Readily available software.*
- *Intangibles acquired from an employee.* However, if the amount paid to acquire the intangible is includible in the employee's income for performing services under § 61 or 83, the amount paid is not required to be capitalized.

Created intangibles - This broad class of intangibles would include:

- Amounts paid to another party to create or originate with that party any of a number of enumerated financial interests; (*Reg § 1.263(a)-4(d)(2))*
- Prepaid expenses (for example, prepaying a 3-year insurance policy premium or prepaying the rent on a 2-year lease); *Reg § 1.263(a)-4(d)(3))*

- Amounts paid to an organization to obtain or renew a membership or privilege; *(Reg § 1.263(a)-4(d)(4))*
- Amounts paid to a governmental agency to obtain or renew a trademark, trade name, copyright, license, permit, franchise, or other similar right; (*Reg § 1.263(a)-4(d)(5))*
- Amounts paid to another party to induce that party to enter into, renew, or renegotiate an agreement giving the taxpayer the right to (a) use tangible or intangible property or be compensated for the use of such property; (b) provide or acquire services (or be compensated for such services), but not if the amount is allocable to services that the taxpayer must provide or acquire before the end of the tax year in which the payment is made; (c) a covenant not to compete; (d) an agreement not to acquire additional ownership interest in the taxpayer; or (e) an agreement providing the taxpayer with an annuity, endowment or insurance coverage; *(Reg § 1.263(a)-4(d)(6))*
- Certain contract terminations; *(Reg § 1.263(a)-4(d)(7))*
- Amounts paid for realty relinquished to another, or amounts paid to produce or improve realty owned by another, if the realty can reasonably be expected to produce significant economic benefits for the taxpayer; and *(Reg § 1.263(a)-4(d)(8))*
- Amounts paid to another party to defend or perfect title to intangible property where the other party challenges the taxpayer's title to the intangible property. *(Reg § 1.263(a)-4(d)(9)*

Goodwill - Goodwill can be purchased or created. If purchased, it can be amortized over 15 years as a Sec 197 intangible. If created, it has no basis.

<u>Gain from Sale</u> – While no deduction for depreciation is allowable with respect to goodwill, the sale of goodwill is a section 1231 transaction because goodwill, under Section 197(f)(7), is treated as if it was a depreciable asset for all purposes under "chapter 1". Thus a sale of goodwill is reported on Form 4797, and if held for longer than one year, becomes a long-term capital gain.

<u>Loss from Sale or Abandonment</u> - Loss on the sale or abandonment of goodwill is not allowed *unless* goodwill is the only intangible the business owns. (Reg Sec 1.197-2(g)(1)(ii)). If the business owns other intangibles the loss is added to their bases using a pro rata allocation. (Reg Sec 1.197-2(g)(1)(i)(A)(2)). If a loss is allowed, it is a Sec 1231 ordinary loss reported on Form 4797.

<u>CAUTION</u> – Form 8594 must be filed by both the buyer and the seller showing the allocation to the various assets of the business (Sec 1060). See IRS Publication 544 for instructions regarding this allocation process. Goodwill is the last item to be allocated and therefore becomes the residual after all other assets are allocated.
For additional study related to goodwill, Letter Ruling 200243002 includes an extensive analysis.

Capitalization of Transaction Costs - Under Regulation § 1.263(a)-4(b)(1), taxpayers are required to capitalize an amount paid to "facilitate" (a) the acquisition, creation, or enhancement of an intangible asset, (b) a restructuring or reorganization of a business entity, or (c) a transaction involving the acquisition of capital, including a stock issuance, borrowing, or recapitalization.

12-Month Rule - The regulations don't require a taxpayer to capitalize under Code Sec. 263(a) amounts paid to create or enhance an intangible asset (see discussion above), or the related transaction costs, if the amounts do not create or enhance any right or benefit for the taxpayer that extends beyond the earlier of:

(1) 12 months after the first date on which the taxpayer realizes the right or benefit, or

(2) The end of the tax year following the tax year in which the payment is made. *(Regulation § 1.263(a)-4(f))*

The 12-month rule does not apply to amounts paid to create or enhance financial interests or amortizable Code Sec. 197 intangibles.

CALIFORNIA DIFFERENCES

California conforms to Federal treatment of intangibles except with regard to intangibles transferred in Sec 1031 exchanges, where only exchanges of real property qualify for 1031 treatment for federal for years after 2017 while California adopted the TCJA provision that limits Sec 1031 treatment only to exchanges of real property only for exchanges completed after January 10, 2019 and only for taxpayers with AGI of $500,000 or more ($250,000 for those filing single or married separate). (AB 91 (6/27/19))

EMPLOYEE OR INDEPENDENT CONTRACTOR

READ FIRST: The distinction between an employee and an independent contractor is governed by both federal law and state law. Because of the significant payroll tax revenues involved the states are the most aggressive in classifying workers as employees. The first part of this chapter covers the federal issues and the second part covers classification under California Assembly Bill AB5. California preparers should skip to the California section.

Frequently, the Internal Revenue Service and taxpayers disagree about the classification of workers as independent contractors or employees. At stake is the collection of employment taxes, as well as eligibility to participate in the employer's retirement plan. The IRS has developed audit programs that focus on employers who "misclassify" workers as independent contractors. These IRS programs can be expensive for employers and particularly painful for small businesses that may not be able to withstand the "economic strain" of additional employment taxes. And a worker who was misclassified as an independent contractor could also put the business's retirement and benefit plans in jeopardy for failing to cover all employees. This chapter contains guidelines that can be used to help determine the status of workers--whether independent or employee.

THE 20-FACTOR CONTROL TEST

A worker's status as an employee or independent contractor depends on the amount of control the employer has over the worker. The IRS has developed 20 factors to help determine the extent of this control. The importance of each factor varies depending on the kind of work being done. Lack of control isn't necessarily shown if an employer allows a worker freedom of action. The 20 factors are:

(1) **Instructions:** A worker who must comply with instructions about when, where and how to work is considered an employee. An employer has control in this area if he/she has the right to require compliance with instructions.

(2) **Training:** Independent contractors ordinarily use their own methods and receive no training from their customers about how to do the job. On the other hand, training given the worker by the employer usually shows employee status.

(3) **Integration:** Employee status is often shown when a worker's services are integrated into the business' operations and the success of the business depends on the performance of those services. This factor may be one that works against supporting independent contractor status in nearly every situation--it's very difficult to establish whether or not success of a business would depend on the worker's contribution to an overall effort.

(4) **Services rendered personally:** A business which requires the worker to personally perform the services shows that the business is interested in the methods used to accomplish the tasks. This, then, shows control by the employer.

(5) **Hiring assistants:** If a worker hires, pays and supervises assistants to complete a contract that requires the worker to supply materials and labor and be responsible for the result, then the worker is independent. When the employer hires, supervises and pays assistants to help the worker, employee status is indicated for the worker.

(6) **Continuing relationship:** An employer-employee relationship is indicated if there is an on-going relationship between the employer and worker. This kind of relationship often exists where work is performed at frequently recurring (although irregular) intervals.

(7) **Set hours of work:** While employees normally have set hours of work, independents set their own hours.

(8) **Full-time work:** Independents work when and for whom they choose, while employees must work full-time for a business, with restrictions on the worker being able to work elsewhere.

(9) **Work done on the premises:** Work required to be done on the employer's premises often indicates control, especially if the work could be done elsewhere. However, control may even be present when a worker performs services in his/her own office(s). To pinpoint the importance of this factor, look at the nature of the services being performed. Control over the place of work may be indicated when the business has the right to compel the worker to travel a certain route or work at specific places. The worker should be required to work from his/her own office.

(10) **Order of sequence set:** When the employer sets the order of an employee's duties, it shows control by the employer.

(11) **Reports:** If a worker must submit reports (oral or written) to the employer to account for his/her actions, control is also shown.

(12) **Payments:** Employee status is shown if a worker is paid by the hour, week, etc. The worker should not be guaranteed a minimum salary nor be offered any fringe benefits. If a drawing account is set up for the worker, the worker should be required to repay any excess drawn from the account over commissions earned. In effect, the job should be paid on a straight-commission basis.

(13) **Payments of expenses:** If the employer pays business or travel expenses of the worker, the worker is likely to be classed as an employee.

(14) **Tools and materials:** An employer furnishing all the tools and materials to do the job usually shows that an employer-employee relationship is operative.

(15) **Significant investment:** An independent has significant investment in facilities or equipment used to perform services for someone else.

(16) **Profit or loss:** An independent contractor can realize a profit or loss as a result of services performed. For example, a worker who has invested in expensive equipment to do a job runs the risk of incurring a heavy loss from the job. This indicates that the worker is an independent contractor. However, the risk that a worker will not be paid is not sufficient risk to categorically show independent status.

(17) **Working for more than one business at a time:** When a worker performs services for multiple firms at the same time, independent status is indicated.

(18) **Offers service to the general public:** When a worker who regularly and consistently makes his/her services available to the general public, he/she is an independent contractor.

(19) **Right to fire:** Whereas an independent can't be fired as long as he/she produces a result that meets the specifications of the contract, an employee can be fired.

(20) **Right to quit:** The reverse of (19) is true here: an employee can quit a job at any time without incurring liability. However, an independent is responsible to meet the terms of a contract.

MISCLASSIFIED AS AN INDEPENDENT CONTRACTOR

It is not uncommon to encounter a client with 1099-MISC income from an employer that is treating him or her as an independent contractor when your client is actually an employee.

The general distinction, of course, is that an employee is an individual who works under the direction and control of their employer while an independent contractor is a business owner or contractor who provides services to other businesses.

To determine whether a worker is an independent contractor or an employee, IRS examines the relationship between the worker and the business, and considers all evidence of control and independence. The facts that provide this evidence fall into the following three categories:

(1) Behavioral control covers facts that show whether the business has a right to direct and control how the work is done through instructions, training, or other means. Employees are generally given instructions on when and where to work, what tools to use, where to purchase supplies, what order to follow, etc.

(2) Financial control covers facts that show whether the business has a right to control the financial and business aspects of the worker's job. This includes the extent to which the worker has unreimbursed business expenses; the extent of his investment in the facilities being used; the extent to which he makes his services available to the relevant market; how he's paid; and the extent to which he can realize a profit or incur a loss.

(3) Type of relationship includes written contracts describing the relationship the parties intended to create; the extent to which the worker is available to perform services for other, similar businesses; whether the

business provides the worker with employee-type benefits, such as insurance, a pension plan, vacation pay, or sick pay; the permanency of the relationship; and the extent to which services performed by the worker are a key aspect of the company's regular business.

The above three categories condense IRS' 20-factor test used to help determine if the employer has direction and control over an individual.

Form SS-8 – Where the status is in doubt, Form SS-8, Determination of Employee Work Status for Purposes of Federal Employment Taxes and Income Tax Withholding, can be used. The form may be completed by an employer or a worker and asks the IRS to determine whether a worker is an employee or independent contractor for federal tax matters. Form SS-8 is to be filed separately from the requestor's tax return. The IRS does not issue determinations for proposed employment arrangements or hypothetical situations, and will only issue a determination if the statute of limitations for the year at issue hasn't expired.

Form 8919 – For an employee to avoid having to pay SE tax on the 1099-MISC income when he or she has already been determined to be an employee or when the worker has filed an SS-8 and has not received a response, the individual files Form 8919 (Uncollected Social Security and Medicare Tax on Wages), which only requires payment of what would have been withheld if the worker were treated as an employee. By using Form 8919, the employee's Social Security and Medicare taxes will be credited to the employee's social security record. Form 8919 requires the employee to check one of these boxes:

Code A. I filed Form SS-8 and received a determination letter stating that I am an employee of this firm.

Code C. I received other correspondence from the IRS that states I am an employee.

Code G. I filed Form SS-8 with the IRS and have not received a reply.

Code H. I received a Form W-2 and a Form 1099-MISC from this firm [for the same tax year]. The amount on Form 1099-MISC should have been included as wages on Form W-2.

If code H is used, do not file an SS-8. Examples of amounts that are sometimes erroneously included, but not necessarily deliberately misclassified, on Form 1099-MISC that should be reported as wages on Form W-2 include employee bonuses, awards, travel expense reimbursements not paid under an accountable plan, scholarships, and signing bonuses.

If reason code G is used, the employee or the firm that paid the employee may be contacted for additional information. Use of this reason code is not a guarantee that the IRS will agree with the worker's opinion as to his/her status. If the IRS does not agree that the worker is an employee, the worker may be billed for the additional tax, penalties, and interest resulting from the change to the worker's status.

Where the IRS determination is for multiple open years, the employee can amend open years to recover a portion of the SE tax paid. Amend the open year by deleting the SE tax form and adding the Form 8919.

HOME WORKERS

Just because an individual works at home does not necessarily make that individual an independent contractor for self-employment tax purposes. Many will fall under the category of statutory employee. Here is a court case (LaVerne VanZant, TC Summary Opinion 2007-195) dealing with the issue. Note: Tax Court summary opinion cases cannot be treated as precedent for any other case.

The Tax Court has held that an educational consultant who collected data on schools and collated the data at home using a template provided by the firm who engaged her services qualified as a home worker for statutory employee purposes. Thus, she was exempt from self-employment tax.

Several classes of workers are employees for FICA purposes even if they are not subject to an employer's direction and control (i.e., even if they would not be treated as workers under the common-law rules). These workers, who are commonly referred to as statutory employees because they are specifically classified as employees by the Code, include home workers. (Code § 3121(d)(3)(C)) See chapter 2.11 for more on statutory employees.

A home worker is a person who:

- Performs work in accordance with specifications provided by the person for whom the work is performed;
- Works on materials or goods furnished by that person; and
- Must return the finished product to that person or to someone designated by that person. (Code § 3121(d)(3)(C))

An individual will not be a statutory employee, however, if the services are performed as a single transaction rather than part of a continuing relationship, or if the individual has a substantial investment in the facilities used in connection with the performance of the services.

Statutory employees are allowed to deduct trade and business expenses in arriving at AGI (above-the-line deductions) while common law employees may only deduct their business expenses as part of miscellaneous itemized deductions, subject to the 2% of AGI limitation (Tier 2 deductions). However, for years 2018 through 2025, Tier 2 deductions are not allowed, having been suspended by the Tax Cuts and Jobs Act. Therefore, employee business expenses of common law employees will not be deductible during those years.

STATUTORY INDEPENDENT CONTRACTORS

Certain workers are automatically treated as independents by law. These are qualified real estate agents and direct sellers.

A **qualified real estate agent** is a licensed real estate sales person. Substantially all the income earned as an agent must be directly related to sales or other output, not hours worked. There must be a written contract between the agent and the principal; the contract should provide that the agent won't be treated as an employee for tax purposes.

Direct sellers are those in the business of selling consumer products to buyers at other than a permanent retail establishment. The sales must be made on a buy-sell basis, deposit-commission basis, or similar arrangement. Like the real estate agent, payment for the direct seller's services must be on a commission basis, not according to hours worked and there should be a written contract stating nonemployee status for tax purposes.

SECTION 530 RELIEF

Section 530 of the Revenue Act of 1978 lets employers treat certain employees as independent contractors, sometimes even when the employer has classified workers as independents in error. Section 530 gives relief from employment taxes to an employer who treats a worker as an independent (has never treated the worker as an employee) and has consistently filed all Federal returns (including 1099s) required AND has a "reasonable basis" for not treating the worker as an employee.
Reasonable basis is present if any of the following can be shown:

(1) There is judicial precedent (published rulings, IRS technical advice, etc.) to back the way the employer has handled the workers' status.
(2) An IRS audit of the employer did not change the status of the workers (or similar workers).
(3) Recognized practice in the employer's line of business shows that the workers would normally be classed as independents. The practice need not be uniform through the entire industry--it can be a local area practice.

Even when an employer fails to meet one of these tests, he/she can still get Section 530 relief by showing reasonable basis in some other reasonable manner. The section indicates that this reasonable basis is to be construed liberally in favor of the taxpayer.

Boles Trucking, Inc., (CA8 02/22/96): The Eighth Circuit ruled that a taxpayer qualifies for Section 530 relief only if it can be shown by a preponderance of evidence that there was reasonable basis for not treating workers as employees. Boles Trucking leased truck tractors to interstate trucking carriers and supplied drivers with each leased tractor. The lease agreements stated that the drivers were to be employees of Boles, but they were treated as independent contractors by the company. No withholding was done, nor was FUTA paid; Forms 1099 were issued to the workers. The District Court had previously found that Boles had a reasonable basis for treating the workers as independents and was entitled to Section 530 relief. However, the Circuit Court was not so sure--they remanded the case back to the District Court for further review.

Cable TV installers are independent contractors - KM Systems, Inc. v. U.S., (DC NJ, 5/10/2004) 93 AFTR 2d 2004-2458: A district court has granted summary judgment relief to a business that treated the people it engaged to install cable television services in subscribers' homes as independent contractors rather than employees. The company was entitled to relief under the Section 530 safe harbor because it was standard industry practice to treat these workers as independent contractors.

MISCELLANEOUS CASES

Mortgage Loan Officer was Independent Contractor – In ***Cibotti, TC Summary Opinion 2012-21***, the Tax Court held that a mortgage loan officer was an independent contractor even though he was issued a W-2 form for his work, owned part of the company's stock and was its president (albeit in name only). The court weighed the various factors and found the scales tipped to the independent contractor status. The factors that indicated independent status were: (1) degree of control – the company did not have control over or dictate the taxpayer's business or total hours, office location, methods of obtaining clients or route; (2) employee benefits – the taxpayer did not get benefits such as health or life insurance and there was no company retirement plan; (3) investment in work facilities – the company did not provide an office, so he maintained one at his home; (4) opportunity for profit or loss – the taxpayer was paid a commission based on a percentage of the proceeds from mortgage loans he closed and was not guaranteed any compensation. Other factors were either neutral or indicated employee status.

Project-by-Project Construction Workers were Employees - In ***Kurek, TC Memo 2013-64***, the Tax Court found that workers hired on a project-by-project basis by a construction company to work on various residential projects were employees and the company was liable for employment taxes for the year in dispute. The owner of the company was a sole proprietor of a home improvement company. The factors that indicated employee status were: (1) degree of control (the "crucial test" according to the court) – the proprietor set the deadlines, monitored the work done, made site visits to the projects, instructed the workers on the work to be done and had the right to approve its quality. He paid the workers weekly and was ultimately responsible for the success or failure of the project; (2) investment in work tools – while the workers used their own small tools, the company supplied all heavy tools and purchased all materials used by the workers; (3) opportunity for profit or loss – the workers were paid a negotiated flat fee, and so were shielded from suffering a loss or realizing a profit or being able to increase their earnings through their efforts; (4) right to fire – the proprietor could and did replace workers who missed deadlines or performed unsatisfactorily. Other factors were either neutral or indicated contractor status.

THE EMPLOYER'S LIABILITY WHEN A WORKER IS MISCLASSIFIED

When a worker is unintentionally misclassified as an independent by an employer, the employer is assessed as follows: 1.5% of the wages paid to the employee and 20% of the employee's share of FICA that should have been imposed (IRC Sec. 3509). If no 1099s were filed for the worker, the penalty is 3% of wages and 40% of employee's FICA. The employer isn't entitled to recover these amounts from the employee. Of course, the employer is still liable for his/her own share of the FICA and for FUTA taxes.

Penalties and interest for failure to deduct and withhold may also be assessed. The penalties are based on the amount of the employer's liability determined under Code Section 3509. If an employer misclassifies an independent contractor without reasonable cause, the following could apply:

- The employer can be held liable for employment taxes. However, the employer's FICA tax liability can be reduced by the amount of SE tax paid by the employees. This relief does not affect the employer's liability for penalties and additional tax (CCA 201808016)
- The late tax deposit penalty could apply. The penalty is 2% of the underpayment if the deposit is not more than 5 days late; 5% if more than 5 but not more than 15 days late; 10% if more than 15 days late.
- If a deposit is made within 10 days of the taxpayer receiving a demand notice, the penalty is 15% of the underpayment.
- A 100% penalty (plus interest) can be imposed on persons responsible for withholding, accounting for or depositing withholding taxes. This penalty is often referred to as the Trust Fund Recovery Penalty.

In addition to penalties and additional tax liability for employment taxes, employer-maintained retirement and benefit plans (e.g., group health insurance, cafeteria, educational assistance plans, etc.) may be adversely affected when a worker has been misclassified. In the extreme case, the IRS could disqualify a retirement plan for failing to properly cover all workers in accordance with the terms of the plan if a worker who had been treated as an independent contractor is found really to be an employee. Or the plan could fail certain non-discrimination and participation tests when the reclassified worker's compensation is included. Disqualification of such plans would impact both the employer (who would not be allowed to deduct the costs associated with the retirement or benefit plans) and other employees who were participants in the plans.

Interest Free Payroll Withholding Adjustment - In a Chief Counsel Advice (CCA-201109025) dealing with the issue of worker misclassification, IRS has provided guidance on the time frame for paying prior period federal income tax withholding and FICA taxes without incurring any interest charges.

Generally, interest must be paid to IRS on any underpayment of tax. However, Reg. § 31.6205-1(a) allows certain FICA or withholding tax underpayments from previous periods to be corrected on an interest-free basis if the employer files an amended return in the 94X series (e.g., 941-X, 944-X) to report the error, and the taxes are paid in full by the last day for filing the employment tax return for the quarter in which the error is "ascertained." The employer is required to enter the date the error was "discovered" on the "94X" form, and to provide in detail the grounds and facts relied on to support the correction.

The date the error was "discovered" is also provided on Form SS-8, Determination of Worker Status for Purposes of Federal Employment Taxes and Income Tax Withholding. Employers and workers may submit Form SS-8 to IRS to receive a determination regarding an employee's worker status (i.e., employee or independent contractor).

In the CCA, IRS notes that the SS-8 determination letter will provide the date that the error was "discovered," but the standard used in Reg. § 31.6205-1(a) for interest-free adjustments is the date when the error was "ascertained." IRS says that an error is "ascertained" when the employer has sufficient information to correct it. The SS-8 determination letter will not always control the "ascertained" date (e.g., the employer may need to determine which employees are similarly situated and/or go through its records to obtain information to fill out Form 941-X), though some employers may have sufficient information at that point to determine the "ascertained" date. IRS notes that, in all cases, the employer must be able to prove when the error was ascertained for purposes of making an interest-free adjustment.

Note: No interest-free adjustments may be made for an underpayment after the employer has received a statement of notice and demand for payment of the underpayment based on an assessment (Reg. §31.6205-1(a)(6)). Interest-free adjustments also are not allowed after the employer receives from the IRS a Notice of Determination Concerning Worker Classification under Code Sec. 7436.

VOLUNTARY WORKER CLASSIFICATION SETTLEMENT PROGRAM

The Internal Revenue Service has a program that enables many employers to resolve past worker classification issues and achieve certainty under the tax law at a low cost by voluntarily reclassifying their workers. This program allows employers the opportunity to get into compliance by making a minimal payment covering past payroll tax obligations rather than waiting for an IRS audit. To be eligible, an applicant must:

- Consistently have treated the workers in the past as nonemployees,
- Have filed all required Forms 1099 for the workers for the previous three years, and
- Not currently be under an employment tax audit by the IRS, or a worker classification audit by the Department of Labor or a state agency.

Interested employers can apply for the program by filing Form 8952, Application for Voluntary Classification Settlement Program, at least 60 days before they want to begin treating the workers as employees.

Employers accepted into the program will pay an amount effectively equaling just over one percent of the wages paid to the reclassified workers for the past year. No interest or penalties will be due, and the employers will not be audited on payroll taxes related to these workers for prior years. For additional information see the instructions for Form 8952 and the frequently asked questions portion of the IRS web site:

https://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/Voluntary-Classification-Settlement-Program-VCSP-Frequently-Asked-Questions

FORM 1099-NEC RESURRECTED

The Internal Revenue Service has resurrected a form that hasn't been used since the early 1980s, Form 1099-NEC, Nonemployee Compensation. Draft version is shown below. Since 1983, the IRS has required businesses to instead file Form 1099-MISC for contract workers and freelancers. The revival of Form 1099-NEC is part of an effort mandated by Congress in the PATH Act of 2015 to require businesses to file information returns about any non-employee compensation by Jan. 31 of each year. However, there were problems with the IRS's processing systems because there was still a March 31 due date for any Form 1099-MISC that didn't contain non-employee compensation. The draft form is dated 2020, so it would be used for reporting nonemployee compensation paid in 2020, not for 2019.

CALIFORNIA EMPLOYEE OR INDEPENDENT CONTRACTOR

CALIFORNIA DIFFERENCES

New Law & Stuff

Although the federal tax laws have guidelines for determining whether an individual is an employee or an independent contractor, generally the states are the most aggressive in this area because they have significant payroll tax revenues at stake in the classification decision.

This is especially true in California where there have been a rash of court cases dealing with the issue, and now we have California legislation signed by the Governor September 18, 2019. The legislation, AB5, passed both houses of the legislature by large majorities, and adopts the strict ABC test imposed by the California Supreme Court in the Dynamex case.

Dynamex Operations West - In this case the CA Supreme Court confirmed a Los Angeles County Superior Court finding against Dynamex, a trucking company that was treating its drivers as independent contractors. In arriving at a decision, the court adopted the so-called "ABC" Rule being used by other states. In doing so the court has made it tougher for an employer to treat a worker as an independent contractor.

CA Assembly Bill 5 – AB5 was passed by the state Assembly by a margin of 61 to 16 and by the Senate by 29 to 11, mostly along party lines. In general, this is what the legislation provides:

- It codifies the Dynamex decision for using the "ABC" test.
- Where a court rules the ABC test cannot be applied, then contractor status will be determined under the tests adopted in S.G. Borello & Sons, Inc. vs the Dept. of Industrial Relations (1989) 48 Cal.3d 341 (Borello).
- Exempts certain occupations from the provisions.

> **CAUTION:** Be aware that AB5 does not provide a bright line simplified definition for either an employee or independent contractor and is filled with exceptions that should make labor attorneys elated with its passage.

"ABC" Test - Several states, including Massachusetts and New Jersey, have also adopted this so-called "ABC" test. The test is a broad means of determining a worker's status as either an employee or a contractor by considering the following criteria (CA Labor Code 2750.3(a)(1)):

(A) That the worker is free from the control and direction of the hirer in connection with the performance of the work, both under the contract for the performance of such work and in fact;

(B) That the worker performs work that is outside the usual course of the hiring entity's business; **and**

(C) That the worker is customarily engaged in an independently established trade, occupation, or business of the same nature as the work performed for the hiring entity.

"A" follows the federal direction and control criteria, but "B" and "C" apply criteria not specifically included in the federal definition.

The objective of the ABC test is to create a simpler, clearer test for determining whether the worker is an employee or an independent contractor and *presumes a worker hired by an entity is an employee* and places the burden on the hirer to establish that the worker is an independent contractor.

Examples: A plumber temporarily hired by a store to repair a leak or an electrician to install a line would be an independent contractor. But a seamstress who works at home to make dresses for a clothing manufacturer from cloth and patterns supplied by the company, or a cake decorator who works on a regular basis on custom-designed cakes, would be employees.

Borello Application – AB5 provides the determination of employment status will be based upon the criteria set forth in the Borello case instead of the ABC tests where:

- A court of law rules the ABC test cannot be applied to a particular case (CA Labor Code 2750.3(a)(3)), or
- Certain occupations that AB5 exempts from the application of the ABC tests. Those occupations generally include (CA Labor Code 2750.3(a)(1)):

(1) A person or organization who is licensed by the Department of Insurance.

(2) A physician and surgeon, dentist, podiatrist, psychologist, or veterinarian licensed by the State of California.

(3) An individual who holds an active license from the State of California and is practicing one of the following recognized professions: lawyer, architect, engineer, private investigator, or accountant.

(4) A securities broker-dealer or investment adviser or their agents and representatives that are registered with the Securities and Exchange Commission or the Financial Industry Regulatory Authority or licensed by the State of California.

(5) A direct sales salesperson as described in Section 650 of the Unemployment Insurance Code.

(6) A commercial fisherman working on an American vessel – **but only until January 1, 2023** unless extended by the legislature

PROFESSIONS SPECIFICALLY SUBJECT TO BORELLO
(CA Labor Code *2750.3(a)(1)*

- Insurance Agents
- Physician and surgeon
- Dentist
- Podiatrist
- Psychologist
- Veterinarian
- Lawyer
- Architect
- Engineer
- Private investigator
- Accountant
- Securities broker-dealer
- Investment adviser
- Direct sales salesperson
- Commercial fisherman

Professional Services (CA Labor Code *2750.3(c)* – AB5 specifies that certain professional services are not subject to the ABC test and instead are also subject to the Borello criteria if **ALL** of the following are conditions are satisfied:

(A) The individual maintains a business location, which may include the individual's residence, that is separate from the hiring entity. Nothing in this subdivision prohibits an individual from choosing to perform services at the location of the hiring entity.

(B) If work is performed more than six months after the effective date of this section, the individual has a business license, in addition to any required professional licenses or permits for the individual to practice in their profession.

(C) The individual has the ability to set or negotiate their own rates for the services performed.

(D) Outside of project completion dates and reasonable business hours, the individual has the ability to set the individual's own hours.

(E) The individual is customarily engaged in the same type of work performed under contract with another hiring entity or holds themselves out to other potential customers as available to perform the same type of work.

(F) The individual customarily and regularly exercises discretion and independent judgment in the performance of the services.

Professional services mean services provided by an individual providing services through a sole proprietorship, or other business entity that meet any of the following:

PROFESSIONAL SERVICES
(CA Labor Code *2750.3(c)*

- Marketing
- Human Resources Admin.
- Travel Agent
- Graphic Design
- Grant Writer
- Fine Artist
- Enrolled Agent
- Payment Processing Agent
- Still Photographer
- Photojournalist
- Freelance writer
- Editor
- Newspaper Cartoonist
- Esthetician*
- Electrologist*
- Manicurist*
- Barber*
- Cosmetologist*

**See special qualifications; no longer applies to manicurists on 1/1/2022.*

Are ALL of the conditions (A) through (F) satisfied?

NO → Use the **ABC Test**

YES → Use the **Borello** Factors

(i) *Marketing*, provided that the contracted work is original and creative in character and the result of which depends primarily on the invention, imagination, or talent of the employee or work that is an essential part of or necessarily incident to any of the contracted work.

(ii) *Administrator of human resources*, provided that the contracted work is predominantly intellectual and varied in character and is of such character that the output produced or the result accomplished cannot be standardized in relation to a given period of time.

(iii) *Travel agent services* (See CA Labor Code 2750.3(c)(2)(B)(iii) for additional limitations).

(iv) *Graphic design*

(v) *Grant writer*

(vi) *Fine artist*

(vii) *Enrolled agent*

(viii) *Payment processing agent* through an independent sales organization.

(ix) *Still photographer or photojournalist* who do not license content submissions to the putative employer more than 35 times per year. This clause is not applicable to an individual who works on motion pictures. (See CA Labor Code 2750.3(c)(2)(B)(ix) for additional limitations).

(x) *Freelance writer, editor, or newspaper cartoonist* who does not provide content submissions to the putative employer more than 35 times per year. (See CA Labor Code 2750.3(c)(2)(B)(ix) for additional limitations).

(xi) *Licensed esthetician, licensed electrologist, licensed manicurist, licensed barber, or licensed cosmetologist* provided that the individual:

- Sets their own rates, processes their own payments, and is paid directly by clients.
- Sets their own hours of work and has sole discretion to decide the number of clients and which clients for whom they will provide services.
- Has their own book of business and schedules their own appointments.
- Maintains their own business license for the services offered to clients.
- If the individual is performing services at the location of the hiring entity, then the individual issues a Form 1099 to the salon or business owner from which they rent their business space.

This subdivision shall become inoperative, with respect to licensed manicurists, on January 1, 2022.

> This will definitely put a crimp in the way many beauty and barber shops currently function.

Determined by Business and Professions Code *(*CA Labor Code *2750.3(d)* – The following categories are not subject to the holding in Dynamex and instead the status of employee or independent contractor are governed by the Business and Professions code.

- *Real estate Licensees* – Determined by subdivision (b) of Section 10032 of the Business and Professions Code.
- *A licensed repossession agency* – provided repossession agency is free from the control and direction of the hiring person.

Business-to-business Contracting Relationships *(*CA Labor Code *2750.3(e)* – are not subject to the Dynamex holding if the business entity is formed as a sole proprietorship, partnership, LLC, or corporation that contracts to provide services to another business. The determination of employee or independent contractor status of the business services provider shall be governed by Borello, if the contracting business demonstrates that all of the following criteria are satisfied:

(A) The business service provider is free from the control and direction of the contracting business entity in connection with the performance of the work, both under the contract for the performance of the work and in fact.

(B) The business service provider is providing services directly to the contracting business rather than to customers of the contracting business.

(C) The contract with the business service provider is in writing.

(D) If the work is performed in a jurisdiction that requires the business service provider to have a business license or business tax registration, the business service provider has the required business license or business tax registration.

(E) The business service provider maintains a business location that is separate from the business or work location of the contracting business.

(F) The business service provider is customarily engaged in an independently established business of the same nature as that involved in the work performed.

(G) The business service provider actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from the hiring entity.

(H) The business service provider advertises and holds itself out to the public as available to provide the same or similar services.

(I) The business service provider provides its own tools, vehicles, and equipment to perform the services.

(J) The business service provider can negotiate its own rates.

(K) Consistent with the nature of the work, the business service provider can set its own hours and location of work.

(L) The business service provider is not performing the type of work for which a license from the Contractor's State License Board is required, pursuant to Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code

This foregoing does not apply to an individual worker, as opposed to a business entity, who performs labor or services for a contracting business.

The determination of whether an individual working for a business service provider is an employee or independent contractor of the business service provider is governed by the ABC test unless a court of law applies Borello.

The following applies to construction workers and construction truckers

Contractor and Individual Contracting Relationships (CA Labor Code *2750.3(f)* - the holding in Dynamex does not apply to the relationship between a contractor and an individual performing work pursuant to a subcontract in the construction industry, and instead the determination of whether the individual is an employee of the contractor shall be governed by Section 2750.5 and by Borello, if the contractor demonstrates that all the following criteria are satisfied:

(1) The subcontract is in writing.

(2) The subcontractor is licensed by the Contractors State License Board and the work is within the scope of that license.

(3) If the subcontractor is domiciled in a jurisdiction that requires the subcontractor to have a business license or business tax registration, the subcontractor has the required business license or business tax registration.

(4) The subcontractor maintains a business location that is separate from the business or work location of the contractor.

(5) The subcontractor has the authority to hire and to fire other persons to provide or to assist in providing the services.

(6) The subcontractor assumes financial responsibility for errors or omissions in labor or services as evidenced by insurance, legally authorized indemnity obligations, performance bonds, or warranties relating to the labor or services being provided.

(7) The subcontractor is customarily engaged in an independently established business of the same nature as that involved in the work performed.

(8) (A) Paragraph (2) shall not apply to a subcontractor providing construction trucking services for which a contractor's license is not required provided that all of the following criteria are satisfied:

(i) The subcontractor is a business entity formed as a sole proprietorship, partnership, limited liability company, limited liability partnership, or corporation.

(ii) For work performed after January 1, 2020, the subcontractor is registered with the Department of Industrial Relations as a public works contractor pursuant to Section 1725.5, regardless of whether the subcontract involves public work.

(iii) The subcontractor utilizes its own employees to perform the construction trucking services, unless the subcontractor is a sole proprietor who operates their own truck to perform the entire subcontract and holds a valid motor carrier permit issued by the Department of Motor Vehicles.

(iv) The subcontractor negotiates and contracts with, and is compensated directly by, the licensed contractor.

(B) For work performed after January 1, 2020, any business entity that provides construction trucking services to a licensed contractor utilizing more than one truck shall be deemed the employer for all drivers of those trucks.

(C) For purposes of this paragraph, "construction trucking services" mean hauling and trucking services provided in the construction industry pursuant to a contract with a licensed contractor utilizing vehicles that require a commercial driver's license to operate or have a gross vehicle weight rating of 26,001 or more pounds.

(D) **This paragraph shall only apply to work performed before January 1, 2022.**

(E) Nothing in this paragraph prohibits an individual who owns their truck from working as an employee of a trucking company and utilizing that truck in the scope of that employment. An individual employee providing their own truck for use by an employer trucking company shall be reimbursed by the trucking company for the reasonable expense incurred for the use of the employee owned truck.

Relationships Between Referral Agencies and Service Provider (CA Labor Code *2750.3(g))* – If a business entity formed as a sole proprietor, partnership, limited liability company, limited liability partnership, or corporation ("service provider") provides services to clients through a referral agency, the determination whether the service provider is an employee of the referral agency shall be governed by Borello, if the referral agency demonstrates that all of the following criteria are satisfied:

(A) The service provider is free from the control and direction of the referral agency in connection with the performance of the work for the client, both as a matter of contract and in fact.

(B) If the work for the client is performed in a jurisdiction that requires the service provider to have a business license or business tax registration, the service provider has the required business license or business tax registration.

(C) If the work for the client requires the service provider to hold a state contractor's license pursuant to Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, the service provider has the required contractor's license.

(D) The service provider delivers services to the client under service provider's name, rather than under the name of the referral agency.

(E) The service provider provides its own tools and supplies to perform the services.

(F) The service provider is customarily engaged in an independently established business of the same nature as that involved in the work performed for the client.

(G) The service provider maintains a clientele without any restrictions from the referral agency and the service provider is free to seek work elsewhere, including through a competing agency.

(H) The service provider sets its own hours and terms of work and is free to accept or reject clients and contracts.

(I) The service provider sets its own rates for services performed, without deduction by the referral agency.

(J) The service provider is not penalized in any form for rejecting clients or contracts. This subparagraph does not apply if the service provider accepts a client or contract and then fails to fulfill any of its contractual obligations.

The foregoing does not apply to an individual worker, as opposed to a business entity, who performs labor or services for a contracting business.

The determination of whether an individual working for a business service provider is an employee or independent contractor of the business service provider is governed by the ABC test unless a court of law applies Borello.

Retroactive Application (CA Labor Code *2750.3(i))* - Insofar as the application of CA Labor Code *2750.3(b)* through (h) of this section would relieve an employer from liability, those subdivisions shall apply retroactively to existing claims and actions to the maximum extent permitted by law.

Effective Date (CA Labor Code *2750.3(i)* - Except as provided these provisions of the Labor Code shall apply to work performed on or after January 1, 2020.

Injunctive Relief (CA Labor Code *2750.3(i)*- In addition to any other remedies available, an action for injunctive relief to prevent the continued misclassification of employees as independent contractors may be prosecuted against the putative employer in a court of competent jurisdiction.

Borello Test Factors - The *Borello* test involves the principal factor of 'whether the person to whom services is rendered has the right to control the manner and means of accomplishing the result desired' as well as the following nine additional factors.

(1) right to discharge at will, without cause;

(2) whether the one performing the services is engaged in a distinct occupation or business;

(3) the kind of occupation, with reference to whether in the locality the work is usually done under the direction of the principal or by a specialist without supervision;

(4) the skill required in the particular occupation;

(5) whether the principal or the worker supplies the instrumentalities, tools, and the place of work for the person doing the work;

(6) the length of time for which the services are to be performed;

(7) method of payment, whether by the time or by the job;

(8) whether or not the work is part of the regular business of the principal; and

(9) whether or not the parties believe they are creating the relationship of employer-employee."

These individual factors cannot be applied mechanically as separate tests; they are intertwined, and their weight depends often on particular combinations making the outcome subjective.

CIVIL PENALTIES FOR WILLFUL MISCLASSIFICATION

California Senate Bill 459 (Ch 11-706), signed into law by the governor October 9, 2011 and effective January 1, 2012, makes the willful misclassification of employees as independent contractors unlawful and allows California's Labor and Workforce Development Agency, or a court, to impose a civil penalty of $5,000 to $15,000 ($10,000 to $25,000 if there is a pattern and practice of misclassifications) for each violation found to be "willful." Each misclassified individual is one violation. These civil penalties are in addition to other assessments and penalties that may be imposed under other laws. ***(Labor Code Sec. 226.8)***

In addition, any violator will be required, for one year, to post a notice signed by an officer (owner if sole proprietor) on its Internet website (or otherwise prominently display the notice if the violator does not have a website) that explains the violation in detail. The notice must contain the following:

(1) That the Labor and Workforce Development Agency or a court, as applicable, has found that the person or employer has committed a serious violation of the law by engaging in the willful misclassification of employees.

(2) That the person or employer has changed its business practices in order to avoid committing further violations of this section.

(3) That any employee who believes that he or she is being misclassified as an independent contractor may contact the Labor and Workforce Development Agency. (The notice must include the mailing address, e-mail address, and telephone number of the Agency.)

(4) That the notice is being posted pursuant to a state order.

If the violator is a licensed contractor, the Labor Agency is required to notify the Contractors' State License Board, which must initiate an action against the licensee within 30 days.

"Willful Misclassification" - is defined as "avoiding employee status for an individual by voluntarily and knowingly misclassifying that individual as an independent contractor."

Paid Advisors Also Subject to Penalty - Under this law, paid advisors (excluding attorneys and employees of the company) who "knowingly advise" employers to treat an individual as an independent contractor to avoid employee status for that individual **are jointly and severally liable for any penalties** imposed on the employer if the individual is found not to be an independent contractor. (***Labor Code Section 2753)***

CAUTION: Given the advisor liability provision, consultants, Enrolled Agents, CPAs, return preparers and others who might otherwise advise their clients on how to classify workers should instead refer the client to an employment attorney.

NOTES

MEALS AND ENTERTAINMENT

- **Meal Allowance %**
  - Regular: 50%
  - Transportation Workers: 80%
- **Standard Meal Allowance** (Meals & Incidental Expenses)
  - Regular (depending on location):
    - 2019 (effective 10/1/18): $60 - $71
    - 2020 (effective 10/1/19): $60 - $71
  - Find per diems by location at www.gsa.gov/perdiem
  - Transportation Workers:
  - 2019 - $66 CONUS, $71 outside CONUS
  - 2020 - $66 CONUS, $71 outside CONUS
- **Simplified Per Diem Rates** – High-Low Method – Employer reimbursement per diem for substantiation purposes:
  - Low CONUS:
    - 2019, effective 10/1/18 - $195 of which $60 is meals
    - 2020, effective 10/1/19 - $200 of which $60 is meals
  - High CONUS:
    - 2019, effective 10/1/18 - $287 of which $71 is meals
    - 2020, effective 10/1/19 - $297 of which $71 is meals
- **Employees (pre-2018 and post-2025) and Self-Employed**:
  - May use Standard Meal Allowance for business meals
  - May NOT use lodging per diem (actual expense and documentation required)

-

Business Entertainment No Longer Deductible - Under the TCJA, after December 31, 2017, no deduction is allowed with respect to:

(1) An activity generally considered to be entertainment, amusement or recreation,

(2) Membership dues with respect to any club organized for business, pleasure, recreation or other social purposes, or

(3) A facility or portion thereof used in connection with any of the above items. (IRC Sec. 274(a) as amended by TCJA Sec. 13304(a))

So this means that deductions are no longer allowed for the cost of such activities as golf outings, fishing trips, sporting events, concerts, etc., with clients or business associates, even if business is discussed.

Business Meals – In a very business friendly transitional guidance (Notice 2018-76) on the deductibility of business meals, the IRS has announced that taxpayers generally may continue to deduct the food and beverage expenses associated with operating their trade or business. Under this notice, taxpayers may deduct 50 percent of an otherwise allowable business meal expense if:

1. The expense is an ordinary and necessary expense paid or incurred during the taxable year in carrying on any trade or business;
2. The expense is not lavish or extravagant under the circumstances;
3. The taxpayer, or an employee of the taxpayer, is present at the furnishing of the food or beverages;
4. The food and beverages are provided to a current or potential business customer, client, consultant, or similar business contact; and
5. In the case of food and beverages provided during or at an entertainment activity, the food and beverages are purchased separately from the entertainment, or the cost of the food and beverages is stated separately from the cost of the entertainment on one or more bills, invoices, or receipts.

Example *– (This example was taken from Notice 2018-76) Taxpayer invites a business contact to a baseball game. The tickets to the game fall into the entertainment category and are not deductible. However, the taxpayer also purchased hot dogs and a beverage for himself and the business contact. Because food and drinks are purchased separately, they are not disallowed as entertainment and are deductible if they otherwise qualify as an ordinary and necessary business expense. Had the ticket price included the hot dogs and beverages, they would be treated as non-deductible entertainment. If the ticket price separately stated the ticket price and the food and beverage price, then the food and beverage portion would not be disallowed as entertainment*

Employer-Provided Meals - The 50% rule will apply to employers providing meals through an in-house cafeteria effective for 2018 through 2025. (IRC Sec. 274(n)(2) as amended by TCJA Sec. 13304(b)(1)) Previously the employer could deduct 100% of these costs. And as of January 1, 2026 an employer's deduction for meals for the convenience of the employer, including in-house cafeterias, is disallowed. (IRC Sec. 274(o) as amended by TCJA Sec. 13304(d)(2))

NOTE: We have retained the pre-TCJA (pre-2018) rules within the following text. They are pointed out by the notation "**prior to 2018**" throughout.

The Details

<u>50% LIMIT</u>: Deductions for business meal (and **prior to 2018** entertainment) expenses are limited to 50% of their cost. The 50% rule also covers the cost of meals during away-from-home business travel. In addition, deductions for expenses related to the meals (e.g., taxes, tips and cover charges) are also limited to 50% of cost; however, this is not true for costs of transportation to and from the meal or entertainment location. In the case of pre-2018 entertainment, the cost of parking and room rentals is subject to the 50% rule. Because they are not business related, the 50% limitation does not apply to the deduction of meals associated with medical or charitable travel.

The 50% limit doesn't apply to:

- *<u>Expenses Treated as Compensation</u>* - Expenses treated as compensation paid to an employee or otherwise included in the gross income of the recipient of the meal (or entertainment prior to 2018) are fully deductible. (Code Sec. 274(n)(2)(A))
- *<u>Reimbursed Expenses</u>* - Meal (and prior to 2018 entertainment) expenses that are reimbursed are fully deductible, and instead the percentage limit applies to the person making the reimbursement. (Code Sec. 274(n)(2)(A))
- *<u>Recreational, etc., Expenses for Employees</u>* **-** Expenses for recreational, social, or similar activities (including facilities therefor) primarily for the benefit of employees (other than employees who are highly compensated employees (within the meaning of section 414(q))) are fully deductible. For purposes of this paragraph, an individual owning less than a 10-percent interest in the taxpayer's trade or business shall not be considered a shareholder or other owner, and for such purposes an individual shall be treated as owning any interest owned by a member of his family (within the meaning of section 267(c)(4)). A highly compensated employee is an employee who (1) was a 5% owner at any time during the determination year or the preceding year, or (2) for the preceding year, received more than 125,000 in compensation from the employer and, if the employer elects, also was in the "top-paid group" (top 20%) of employees for that year. The compensation figure for years 2015 through 2018 is $120,000.
- *<u>Services and Facilities for General Public</u>* – Expenses for goods, services and facilities made available by the taxpayer to the general public are fully deductible. (Code Sec. 274(n)(2)(A))
- *<u>Entertainment Sold</u>* - Expenses of goods, services, or use of facilities, sold by the taxpayer in a bona fide transaction (entertainment sold to customers) are fully deductible. (Code Sec. 274(n)(2)(A))

- *Employer-provided Food and Beverages* - Expenses for food and beverages (and facilities used in connection therewith) furnished on the business premises of the taxpayer primarily for his employees are fully deductible. (Code Sec 274(e)(1)) Prior to the TCJA, the code said that food or beverage expenses that are excludable from the gross income of the recipient under the de minimis fringe benefit rules are allowed in full. (Code Sec. 274(n)(2)(B) prior to being stricken by TCJA) The term "de minimis fringe" (Code Sec 132(e)) means any property or service the value of which is (after taking into account the frequency with which similar fringes are provided by the employer to the employer's employees) so small as to make accounting for it unreasonable or administratively impracticable.
- *Employee, Stockholder, etc., Business Meetings* – Expenses incurred by a taxpayer which are directly related to business meetings of his employees, stockholders, agents, or directors are not limited by the 50% rule. (Code sec 274(e)(5))
- For years prior to 2018, the operation by an employer of any eating facility for employees shall be treated as a de minimis fringe, and therefore the costs are fully deductible, if:
    - Such facility is located on or near the business premises of the employer, and
    - Revenue derived from such facility normally equals or exceeds the direct operating costs of such facility.

  The preceding shall apply with respect to any highly compensated employee only if access to the facility is available on substantially the same terms to each member of a group of employees which is defined under a reasonable classification set up by the employer which does not discriminate in favor of highly compensated employees.

  Effective in 2018, the 50% rule applies to these expenses, and after 2025, none of these expenses will be deductible.
- For years prior to 2018, an expense that is part of a package that includes a ticket to attend certain charitable sporting events. (Code Sec. 274(n)(2)(C) prior to being stricken by TCJA) The event must: (1) be organized for the primary purpose of benefiting a tax-exempt charitable organization, (2) contribute 100% of the net proceeds to the charity, and (3) use volunteers for substantially all work performed in carrying out the event. The TCJA disallows any portion of the expense, effective with 2018.
- Food or beverage expenses of crews of certain drilling rigs and crews of certain commercial vessels (Code Sec. 274(n)(2)(C) as amended by the TCJA), but not fishing vessels, are fully deductible.

80% LIMIT - "HOURS OF SERVICE" BUSINESS MEAL DEDUCTIONS

TCJA

For years 2018 through 2025, the TCJA suspends the deduction of miscellaneous itemized deductions that are subject to the 2% of AGI reduction. This category includes employee business expenses, so although the 80% deduction for transportation workers' meal expenses was unchanged by the TCJA, employees who would otherwise benefit by the higher deductible percentage will get no deduction for the cost of their meals during the suspension period.

The law allows an increased, deductible percentage of 80% for away-from-home food and beverage costs ***for individuals subject to the hours of service limitations of the Department of Transportation***. Evidently, these individuals must often eat meals away from home in circumstances where choice is limited, prices comparatively high and the opportunity for lavish meals remote.

Individuals subject to the hours of service limitations of the Department of Transportation include:

- Air transportation employees such as pilots, crew, dispatchers, mechanics, and control tower operators under Federal Aviation Administration regulations.
- Interstate truck operators and interstate bus drivers under Department of Transportation regulations.
- Railroad employees such as engineers, conductors, train crews, dispatchers and control operations personnel under Federal Railroad Administration regulations, and
- Merchant mariners under Coast Guard regulations.

GENERAL DEDUCTION REQUIREMENTS*:*

As with travel expenses, meal (and prior to 2018 entertainment) expenses must be "ordinary" and "necessary" in carrying on a trade or business *(Code Sec 162),* and prior to 2018 must be "directly related to" or "associated with" the active conduct of business *(Code Sec 274(a)(1) prior to amendment by the TCJA)****.*** Under the TCJA, no deduction is allowed for the expense of any food or beverages unless the expense "is not lavish or extravagant under the circumstances and the taxpayer (or an employee of the taxpayer) is present at the furnishing of such food or beverages." (Code Sections 274(k)(1)(A) and (B))

Pre-2018 Directly-related Test - In order to meet the prior code's directly-related test, the meal expense must be incurred in the active conduct of business and be for the taxpayer, business guest(s) and spouse(s). Under this test, actual business discussions are required during the meal, and the taxpayer must show that there was anticipation of a specific business benefit from the meal (even if the benefit does not materialize). (Code Sec. 274(a)(1)(A) before amendment by the TCJA)

Pre-2018 Associated-with Test - The associated-with test is somewhat more liberal, because it allows deductions for expenses incurred either preceding or following a bona fide business discussion (Reg. § 1.274-2(d)(3)(i)(A)). Goodwill-generating quiet business meals "in an atmosphere conducive to business" are not deductible.

> ***Example - Associated with business (pre-2018)*** *- Pete treats many of his clients to an expensive lunch or dinner during 2017. He usually doesn't talk business—the treats are intended to promote goodwill and "keep in touch." These goodwill-building meals aren't deductible because they aren't "directly related" to the active conduct of Pete's trade or business. However, he can salvage deductions by scheduling the meals for those days when he makes business calls on the client. This way, the meals can qualify as "associated with business" entertainment.*
>
> ***Example – Associated with business (pre-2018)*** *- Susan Albertson, president of Media Corp. has successfully recruited Dan Baker to be the company's CFO starting July 1, 2017. To celebrate, Albertson and her husband take Baker and his wife for an evening on the town—a night at the theater followed by dinner. Media Corp. foots the bill, and Albertson substantiates the expense under the accountable plan rules. The cost of the entertainment is tax-free to Albertson, and Media Corp. can deduct 50% of the cost because this is entertainment "associated with" its business.*

***Pre-2018** - Directly preceding or following requirement* - Generally, entertainment is considered to have directly preceded or followed a business discussion if both events occur on the same day. However, entertainment can still pass muster, even if it doesn't occur on the same day as the business meeting, if the facts and circumstances warranted a delay. (Reg. § 1.274-2(d)(3)(ii)) **Caution:** Effective after 2017, entertainment expenses are not deductible for federal tax purposes.

> ***Example - Directly preceding or following requirement (pre-2018)*** *- If the taxpayer's client or business associate comes from out of town to hold a substantial business meeting, the entertainment of the business guests and their spouses held the day before or after the meeting would generally be regarded as qualifying under the "associated with business" test. (Reg. § 1.274-2(d)(3)(ii)) Similarly, there may be situations where a client or business associate has a scheduling conflict and asks that the entertainment be put off a day.*
>
> ***Example - Directly preceding or following requirement (pre-2018)*** *– In 2017 Mr. Salter is negotiating a major deal with Mr. Smith, who flew into town with his wife for the occasion. The day after their meetings conclude, Salter invites the Smiths to a catered dinner at his home. Result: 50% of the home-entertainment cost is deductible. What is more, Salter can even invite a few non-business guests (although the portion of the expense allocable to their presence is not deductible – see allocations below).*

***Pre-2018** - When an allocation may be required* **-** If non-business guests are invited to an otherwise allowable "associated with business" entertainment event, the expenses must be allocated between the business and nonbusiness guests. The expenses related to the non-business guests are nondeductible. However, note that the spouse of the taxpayer and his or her business guests or associates are considered business guests for this purpose. (Reg. § 1.274-2(d)(2))

> ***Example (pre-2018) –*** *On April 1, 2017 ABC Corp. concluded negotiations on a major contract with XYZ Corp. ABC celebrates by throwing a party after the papers are signed. Of the 60 guests, 40 are officers, counsel, and accountants of both companies and their spouses. The remaining 20 are friends and well-wishers. Two-thirds of the expense qualifies as "associated with business" entertainment. The remaining one-third, representing the non-business guests, is nondeductible.*

Lavish - Meal (and pre-2018 entertainment) expenses are deductible up to an amount not considered "lavish" (i.e., reasonable under the circumstances). The taxpayer (or a representative of the taxpayer) must be present. The representative could be, for example, the taxpayer's employee, an attorney or an independent contractor who performs significant services for the taxpayer.

Away-From-Home Meals - When taxpayers travel away from home on business, they may deduct 50% of the cost of their own meals. A business traveler who pays for meals consumed with out-of-town clients or associates may deduct the cost of the clients' or associates' meals. However, if the taxpayer is an employee, for 2018 through 2025, unreimbursed employee business expenses are not deductible as part of itemized deductions. For years before 2018, the business traveler was required to meet the directly related or associated with tests in order for the meal costs to be deductible.

> ***Example** - **Away-From-Home Meals -*** *Margaret's employer sent her on a five-day business trip to Minneapolis to make a sales presentation to MM&M, Inc. Margaret received no reimbursement for her meals during the trip. Margaret ate alone in her hotel on the first three nights away, at a total cost of $100. On the fourth night, she met one of her friends from another company for dinner. Margaret paid the tab of $80. The next day, she invited Martie, a purchase representative for MM&M, Inc., to dinner. Their dinner followed a full day of discussion on MM&M's latest order from Margaret. Margaret paid for dinner that night too, a total of $100. Margaret's deductible meal expense is $120 for the trip (50% x ($100, meals alone + $40, her portion of dinner with friend + $100, meal with Martie)).*

Business Meal Recordkeeping - Meal (and pre-2018 entertainment) expenses are deductible only if substantiation requirements are met. Code Section 274(d) requires substantiation of the following:

- The amount
- Date, time and place
- Business purpose
- Names of guests & business relationship

Reimbursed Expenses - If a taxpayer is reimbursed for business meal costs (or pre-2018 entertainment expenses) and makes an adequate accounting, the 50% rule applies to the one who makes the reimbursement, not the taxpayer.

Using Per Diem Rate to Substantiate Employee's Expenses for Lodging, Meals and Incidentals (Rev Proc 2011-47 & Notice 2011-81) – Rev Proc 2011-47 details the rules, effective October 1, 2011, for using a per diem rate to substantiate the amount of an employee's expenses for lodging, meals and incidentals that an employer (or third party) reimburses, and explains how an employee or self-employed individual may use the "standard meal allowance." This revenue procedure will only be updated as necessary in the future.

Rev Proc 2011-47 also clarifies that partners and volunteers who receive reimbursements from payors may use the methods allowed in the procedure to substantiate their expenses.

Instead of an annual revenue procedure, the IRS issues a shorter, annual notice providing the special per diem rates effective as of October 1 of the year issued. The 2019-2020 rates are included in Notice 2019-55; 2018-2019 rates are included in Notice 2018-77; 2017-2018 rates are included in Notice 2017-54; and 2016-2017 rates were published in Notice 2016-58.

Letter Ruling 9414040 states that a real estate broker who provided dinner to prospective purchasers before making a sales presentation, could take a full deduction for the cost of the meal. None of the broker's owners or employees received a dinner.

Pre-2018 Entertainment at Sports or Theatrical Events - The deduction available for years before 2018 for tickets to entertainment events generally is limited to 50% of the face value of the ticket.

> ***Example*** *-* ***Sports/Theater Entertainment (pre-2018) -*** *Allen paid a ticket scalper $300 for two tickets to a popular musical in June 2017 and used them for qualifying business entertainment. The tickets cost $50 each when purchased at the theater box office. Allen's tax deduction for the entertainment is $50 (50% of the face value of the two tickets).*

Club Dues Deductions - No deduction is allowed for amounts paid or incurred for membership in any club organized for business, pleasure, recreation or other special purpose. (Code Sec 274(a)(3)) For years before 2018 specific business expenses incurred at a club are deductible only to the extent they otherwise qualify as business deductions. Effective with 2018, this specific business expense exception does not apply.

Exceptions – According to IRS Pub 535 (page 46, 2018 edition) the following organizations aren't treated as clubs organized for business, pleasure, recreation, or other social purpose unless one of the main purposes is to conduct entertainment activities for members or their guests or to provide members or their guests with access to entertainment facilities.

- Boards of trade
- Business leagues
- Chambers of commerce
- Civic or public service organizations
- Professional organizations such as bar associations and medical associations
- Real estate boards
- Trade associations

Meals & Commercial Fishermen - Affirming the Tax Court, the Eleventh Circuit Court of Appeals has ruled that a seaman's deduction for meals while aboard a fishing vessel is subject to the 50% deduction limit. The Court held that the exception to the deduction limit for commercial vessel crews doesn't apply to fishing vessel crews.

Meals and Lodging of Firefighters – This issue has been to tax court more than once. One of the most significant cases began in the late 1970s and eventually was decided at the appellate level. As a part of a desegregation plan implemented in the late 1950s, Los Angeles firefighters were required to participate in and contribute to a common mess. The meals were organized and prepared by the firemen in kitchen facilities furnished by the employer-fire department. A firefighter by the name of Sibla excluded the contribution to the common mess from his income and ended up in court. The Ninth Circuit held that because firefighters were required to contribute, they never had "complete dominion" over the funds which were contributed. Thus, in substance, the meals were furnished in kind by the employer, rather than paid for by the employees and reimbursed in cash. (Sibla, Richard v. Com., (1980, CA9) 45 AFTR 2d 80-955)

Since that time courts have taken the position that in such cases as outlined above the contribution to the common mess is not an adjustment to income, but, instead, an employee business expense.

It is a common practice for firefighters to eat meals on the premises of their station houses. Ordinarily, the cost of these meals is considered a personal expense and isn't deductible, even where a firefighter is required to remain at the firehouse overnight and cannot leave the premises for meals. (Rev Rul 56-49, 1956-1 CB 152).

An exception to this rule has been applied to permit a firefighter to deduct the payments as a business expense if the following conditions are met:

1. The contribution to the common mess is required by the fire department.
2. The meals are served at the firehouse.
3. The firefighter had to pay for the meals whether he or she was at the firehouse to eat them or away from the firehouse on fire department business. (Sibla, Richard, (1977) 68 TC 422, nonacq 1978-2 CB 4)

Thus, where the above strict conditions apply, the common mess expense is treated as employee business meals (50% deductible) and deducted as a miscellaneous itemized deduction subject to the 2% of AGI reduction.

TCJA

However, **for years 2018 through 2025**, the TCJA suspends the deduction of miscellaneous itemized deductions that are subject to the 2% of AGI reduction. This category includes employee business expenses, so firefighters who would otherwise benefit from deducting their meal costs will get no deduction for them during the suspension period.

Optional Method for Deducting Away-From-Home Meals – Under several revenue procedures meal deductions are allowed using optional meal rates equal to the Federal meal and incidental expenses (M&IE) per diem rate for the location to which the taxpayer is traveling on business (but not for medical or charitable purposes). The optional rate method, also called the **standard meal allowance**, is elective and can be used by employees (in years before 2018 and after 2025) and self-employed individuals. The optional meal allowance must be prorated for both the days of departure on and return from the trip (IRS allows either 75% of the daily rate for each of the first and last days of the trip or any consistently applied method that is in accordance with reasonable business practices).

Under the optional rate method, the same rate is used no matter how long the stay away from home. For travel in 2019 the standard meal allowance is $60 ($51 in 2016, 2017 and from January through September 2018, $60 for October through December 2018) for most small localities in the U.S. The 2020 standard meal allowance is $60. The rate is generally higher for major cities, resort areas and other locations in the U.S., with the highest being $76 for 2019 ($74 for 2016, 2017 and 2018). The applicable rate can be found at the following web site: www.gsa.gov/perdiem

The standard meal allowance rates noted above do not apply to travel in Alaska, Hawaii or other locations outside the continental United States (CONUS). The foreign location rates are normally published by the various tax services in conjunction with explanations of Code Section 274. Or they can be found on the Internet at:

> Non-foreign areas outside CONUS (e.g., Hawaii, Alaska, Puerto Rico):
> *http://www.defensetravel.dod.mil/site/perdiemCalc.cfm*
>
> Foreign per diem rates:
> https://aoprals.state.gov/web920/per_diem.asp

New federal CONUS rates are published each year, effective from October 1 of that year through September 30 of the following year (coinciding with the federal government's fiscal year). However, there may be mid-year changes to some of the high-low rates, which will be reflected on the web site referenced above. For 2019, in lieu of the updated rates that will be effective October 1, 2019, a taxpayer claiming the standard meal allowance may continue to use the CONUS rates in effect for the first 9 months of 2019 for all of calendar 2019. However, the taxpayer must consistently use either the rates for the first 9 months of 2019 or the updated rates for the period October 1, 2019 through December 31, 2019.

Substantiation of time, place and business purpose is still required when claiming the standard meal allowance, and the 50% limit applies if the business traveler is not reimbursed or is reimbursed under a nonaccountable plan. If reimbursement under an accountable plan is less than the optional meal allowance, only 50% of the excess amount is deductible.

CAUTION – LODGING PER DIEM

Although per diem rates may be used to substantiate deductions for lodging, meals, and incidental expenses, or for meal expenses and/or incidental expenses only, they may not be used to substantiate deductions for lodging expenses only. Self-employed individuals are not entitled to use the federal per diem rates to substantiate lodging expenses under any circumstances (*Starr v. Commissioner,* TC Memo. 2000-305). There is no optional standard lodging amount similar to the standard meal allowance. The allowable lodging expense deduction is the taxpayer's actual cost (2018 Pub 17, page 141)

No Double Dipping Allowed – A business traveler who elects to use the standard meal allowance, and who also has a qualified meal expense during the trip, cannot deduct his own meal expense incurred at that event.

Example: *Arnold is a computer software salesperson who traveled away from home for several days to meet with potential clients. He opts to use the standard meal allowance method for his meal expense deduction. He meets with two prospective clients for dinner to discuss the benefits of his company's products and pays for the meals – his guests' meals cost $70 and his was $30. He can deduct the $70 expense plus the full daily standard meal allowance amount, with both amounts subject to the 50% reduction, but he can't also include the $30 he spent for his meal.*

Incidental Expenses - The optional meal allowance is intended to cover both daily meals and incidental expenses while traveling away from home on business. Incidental expenses are defined the same as the definition of incidental expenses in the Federal Travel Regulations, which the General Services Administration says include only fees and tips to:

- Porters,
- Baggage carriers,
- Hotel staff, and
- Staff on ships.

Mailing costs of filing travel vouchers and paying employer-sponsored credit card billings, and transportation between lodging or business sites and places where meals are taken, are not included as incidental expenses. Instead, taxpayers using the per diem rates may separately deduct or be reimbursed for transportation and mailing expenses. Also **not** included as incidental expenses, and therefore separately deductible in addition, are the costs for:

- Laundry
- Clothes cleaning and pressing
- Lodging taxes
- Telephone calls and telegrams

If no meal expenses were paid or incurred, a business traveler may elect to use an optional method for incidental expenses only. The deductible amount for years 2010 through 2020 is $5 per day for incidental expenses paid or incurred during away-from-home business travel. This method cannot be used for any day that the standard meal allowance method is used.

Transportation Workers Meals & Incidentals Standard Daily Allowance					
Calendar Year	**2016 -2017**	**1/1/18-9/30/18**	**10/1/18-12/31/18**	**2019**	**2020**
CONUS (Meals & Incidentals)	$ 63	$63	$66	$66	$66
Outside CONUS (Meals & Incidentals)	$ 68	$68	$71	$71	$71

If amount is not shown it is not available at publication date

Transportation Workers - A special method applies for determining expenses of employees in the transportation industry. **Note:** Unless indicated otherwise, rates for a given calendar year are based on the fiscal year rates effective on October 1 of the prior year.

TCJA

However, for years 2018 through 2025, the TCJA suspends the deduction of miscellaneous itemized deductions that are subject to the 2% of AGI reduction. This category includes employee business expenses, so employees in the transportation industry who would otherwise benefit from deducting the special standard meal allowance will get no deduction for meal expenses during the suspension period.

Per Diem Reimbursement – In lieu of an employer reimbursing the actual substantiated expenses incurred while an employee travels on business, the employer may pay a per diem amount to the employee. This concept is unchanged by the TCJA. The per diem amount generally is intended to cover costs of away-from-home lodging, meals and incidental expenses (M&IE). As long as the rate paid is not more than the maximum amount approved by the IRS, and the employee provides appropriate substantiation (time, place and business purpose), the reimbursement is considered made under an accountable plan. Thus, it is not included in the employee's W-2 wages and is free of income tax and FICA tax withholding. Generally, the per diem maximum allowed by the IRS is equal to the highest per diem rate paid by the federal government to its employees on travel status. This rate varies from locality to locality, sometimes changes seasonally, and is updated periodically (see the web sites noted above). The standard meal allowance is derived from the M&IE component of these government per diem rates. The rates generally are updated as of October 1 each year (to match the federal government's fiscal year). The rates in effect for the first nine months of the year may continue to be used for the balance of the calendar year provided it is done consistently for all travel.

Employers may choose instead to use a simplified per diem method – referred to as the **high-low per diem** – rather than using actual per diems. Under this method there is one rate for designated high-cost areas within the continental United States (CONUS) and another per diem rate for all other areas within CONUS. For example, effective October 1, 2018 (apply to 2019 calendar year taxpayers), the optional high-low per diem for high cost areas is $287; it is $195 for other areas. These rates have two components, lodging (set at $216 in high-cost areas, $135 for other localities) and meals and incidental expenses $71 in high-cost areas and $60 elsewhere). As of October 1, 2019 (for 2020 calendar year taxpayers), the high-low per diem rate for high-cost areas is $297 ($226 lodging, $71 meals) and for low-cost areas $200 ($140 lodging, $60 meals).

Consistency Required - An employer who used the actual per-diem method for an employee for the first nine months of 2019 can't switch to the high-low per-diem method for that employee until Jan. 1, 2020. If the high-low substantiation method was used for an employee during the first 9 months of calendar year 2019, the employer must continue to use the high-low method for the rest of 2019 for that employee, although for travel on or after October 1, 2019, and before January 1, 2020, the employer may continue to use the rates and high-cost localities as of 10/1/18 in lieu of the updated rates and high-cost localities effective 10/1/19, if those rates and localities are used consistently during the last 3 months of the calendar year for all employees reimbursed under the high-low method.

CAUTION

There is no optional standard lodging amount similar to the standard meal allowance. IRS allows the per diem rates for lodging to be used as a way to satisfy adequate accounting and substantiation requirements. They are for the purpose of reimbursing employees who travel away from home for their employers, **not for use by the employee or a self-employed person to claim a tax deduction. The allowable lodging expense deduction is the actual cost and must be substantiated by receipts.** The **standard meal allowance amount is determined from the meals and incidental expenses component of the federal government's per diem allowance for its workers on travel status, based on location of the travel, not from the meals and incidentals portion of the per diem rates for the high-low method.**

CALIFORNIA DIFFERENCES

California has not adopted the TCJA changes discussed in this chapter, including elimination of the deduction for business entertainment expenses and allowance of only 50% of the cost of meals provided by employers for the employer's convenience. Thus, unless conforming legislation is enacted by the state, 50% of entertainment expenses and 100% of employer-provided meals will be deductible on California returns. Employees continue to be able to deduct employee business expenses as a miscellaneous itemized deduction subject to a 2% of federal AGI reduction on their California returns.

NOTES

VEHICLE EXPENSES

Overview

Methods:

- *Actual expense* – must continue in subsequent years if selected in 1st year
- *Standard mileage* – can later switch to actual w/SL Dep.
  - 2019 rate: **58.0**
  - Up to **four vehicles**
  - Leased vehicles ok if std used entire term
  - Interest not included – deduct separately if SE
  - Taxes not included – deduct separately

2019 First Year Luxury Vehicle Limits (6,000# or less, acquired after 9/27/17 & placed in service in 2019):

- $10,100
- $18,100 with bonus depreciation

Sport Utility Vehicles:

- 14,000 pounds gross vehicle weight or less
- Sec 179 limited to $25,500 (2019)

New Law & Stuff

Bonus Depreciation Phase-Out – Included in the PATH Act of 2015 was a provision that extends but phases out bonus depreciation, and correspondingly, the added $8,000 increase to the luxury auto limit.

TCJA

The TCJA further modified the effective dates, as follows: the first-year luxury auto is increased by $6,400 (total limit $16,400) for vehicles acquired before September 28, 2017 but not put in service until 2018 or by $8,000 for post-September 27, 2017 acquisitions of passenger autos put in service in 2018 (total limit $18,000) or 2019 (total limit $18,100).

Heavy SUVs are vehicles with a gross vehicle weight (GVW) rating of more than 6,000 pounds and are exempt from the luxury auto dollar caps and qualify for bonus depreciation.

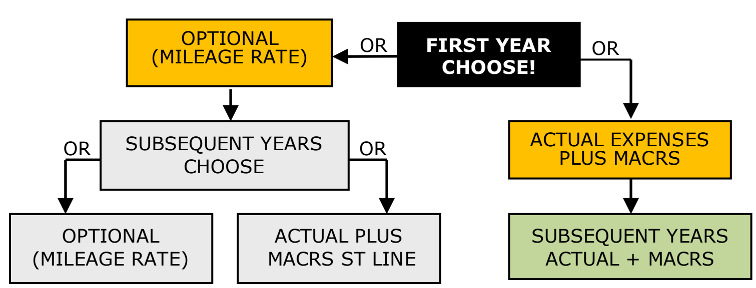
OPTIONAL OR ACTUAL AUTO EXPENSE METHOD

The Details

Taxpayers may choose to deduct automobile expenses using the actual operating expenses of an automobile plus depreciation (or lease payments if leased) or they can use the "optional standard mileage rate" to compute business auto deductions.

If the taxpayer chooses the actual method, which includes MACRS depreciation, in the first business-use year, then the optional method may not be used in any future year. However if the optional mileage rate method is chosen in the first year, the taxpayer can switch back and forth to the actual expense method in subsequent years for that vehicle but is limited to MACRS straight-line depreciation in years they opt for the actual method.



Strategies

Switching Methods - More expensive cars are generally the ones most limited by the luxury auto rules. Choosing the optional mileage rate method the first year of business use may be the better choice for these vehicles, since in subsequent years when the actual method may be elected the use of straight-line depreciation will produce only a small reduction in depreciation, leaving the taxpayer the option to switch methods at will in subsequent years.

Generally, the longer (more years) a vehicle is kept, the more beneficial it becomes to select the optional mileage method in the first year. There are two primary reasons: (1) older vehicles tend to have more substantial maintenance expenses, and (2) the luxury auto limit reaches its lowest level in the fourth and subsequent years. Therefore, the taxpayer would be able to switch to the actual method in years of high-maintenance costs and use the optional mileage rate during the earlier years where the vehicle warranty usually covers most repairs. Besides, once the vehicle is traded or sold, the reduced depreciation will reduce the gain or increase the loss if the vehicle is sold or increase the basis of the replacement vehicle if it is traded in.

TCJA

NOTE: Prior to 2018 a business vehicle trade qualified as a Sec 1031 tax-deferred exchange. Effective for exchanges completed after 2017, for federal tax purposes, only real property used in a trade or business or held for investment is eligible for 1031 treatment. Therefore, when a business vehicle is traded-in for another vehicle in 2018 or later, the transaction will have to be reported as a sale.

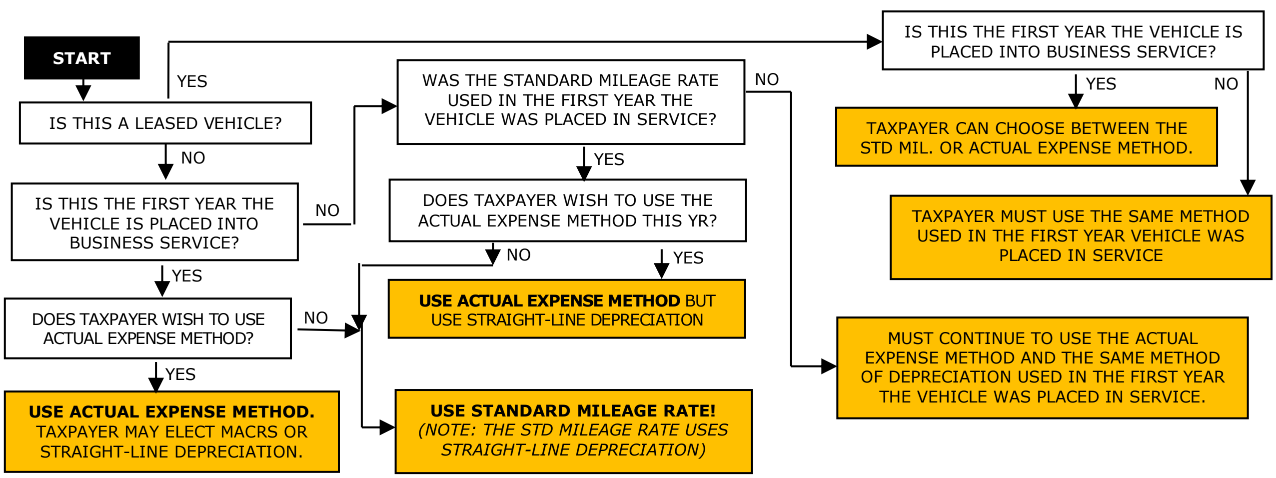
DEDUCTING CAR EXPENSES USING THE OPTIONAL MILEAGE RATE

As an alternative to deducting actual operating expenses of an automobile (and depreciation as described later in this chapter), taxpayers can use the "optional standard mileage rate" to compute business auto deductions for owned and leased vehicles. See the table on page 3.11.03 for current and historical mileage rates.

Motorcycles – The IRS has never established an optional mileage rate for motorcycles; thus the actual expenses method must be used. In Office of Chief Counsel Info letter (INFO 2009-0255) this subject was addressed and indicated that to date no standard mileage rate is available for motorcycles.

Leased vehicles – The optional mileage method may be used for a leased as well as a purchased auto used for business provided the mileage method is used for the entire lease period. (Rev Proc. 97-58, 1997-52 IRB 24)

Method Chart for Vehicles (Chart assumes vehicle is not limited by the fleet operation rules).



Multiple vehicles - Whether the taxpayer is an owner or lessee, the mileage allowance method can't be used to claim business auto deductions for vehicles used for hire or for fleet operations. Fleet operations (after 2003) are defined as 5 or more vehicles used simultaneously. Thus taxpayers who use no more than four vehicles at the same time for business purposes may use the standard mileage rate.

Expenses included in the optional standard mileage rate – The standard mileage rate is determined annually by the IRS using data from a study conducted by an independent contractor of vehicle-operating expenses based on the prior year's costs (Rev Proc 2002-61). The rate covers gas, oil, lubrication, maintenance and repairs, vehicle registration fees, insurance and straight-line depreciation. Parking and tolls, as well as state and local property taxes attributable to business use, may be deducted in addition to the optional rate. This, however, does not include sales tax, which must be capitalized into the business basis of the vehicle.

Car loan interest – Regardless of whether the standard mileage rate or actual expense method is used, a self-employed taxpayer may also deduct the business-use portion of interest paid on an auto loan (claimed as an interest expense on Sch. C). For years 2018 – 2025 employee business expenses aren't deductible for federal purposes because the Tier 2 miscellaneous deduction is suspended. Employees may **not** deduct interest paid on a car loan. (Note: in years before 2018 and after 2025, if a home equity loan is used to buy a vehicle, the employee may be able to deduct the interest as home mortgage interest.)

Employers' reimbursement - Employers may reimburse employees for business-related car expenses using the mileage allowance method for each substantiated employment-connected business mile. The reimbursement is tax-free if the employee substantiates to the employer the time, place, mileage and purpose of employment-connected business travel.

Employees' expenses exceed employer's mileage reimbursement (years before 2018 and after 2025) – Employees whose actual employment-related business mileage expenses exceed the employer's reimbursement can deduct the difference as a miscellaneous itemized deduction subject to the 2%-of-AGI floor on their federal returns. However, an employee who leases an auto and is reimbursed using the mileage allowance method can't claim a deduction based on actual expenses unless he does so consistently beginning with the first business use of the auto.

ACTUAL EXPENSES

The actual expense method includes deducting the cost of gas, oil, lubrication, maintenance and repairs, vehicle registration fees, insurance, interest, state and local property taxes and depreciation (or lease payments if the vehicle is leased – see "Leased Vehicles" later in this chapter for possible limitation on lease deduction). However, these expenses must be allocated between deductible business use and non-deductible personal use where the vehicle is also used personally making it necessary to also keep records of business miles and total miles in order to document the allocation between business and personal.

TCJA

Depreciation – The so-called "luxury auto" rules of IRC Sec 280F(a) impose a maximum annual deduction for depreciation. These limits are included in the table below. In years after 2007 when the bonus depreciation is allowed, the first year luxury auto limits were increased by $8,000 if the taxpayer elected bonus depreciation. Under the TCJA of 2017 the bonus depreciation element of the luxury auto continues to be $8,000 for years 2015 through 2022, with the following exceptions: In the case of a passenger automobile acquired by the taxpayer before September 28, 2017, and placed in service by the taxpayer:

- September 28, 2017 through 2018, the limit is increased by $6,400.
- During 2019, the limit is increased by $4,800.

Definition of a Luxury Auto - Vehicles subject to the luxury auto rules include any four-wheeled vehicle manufactured primarily for use on public streets, roads, and highways, and having an unloaded gross vehicle weight of 6,000 pounds or less. This definition may also include smaller trucks and vans, which meet the weight limitation.

HISTORICAL MILEAGE RATES & LUXURY VEHICLE DEPRECIATION LIMITS

Year	2014	2015	2016	2017	2018	2019	2020
Business Mileage Rate	56.0	57.5	54.0	53.5	54.5	58.0	
Depreciation Component	22.0	24.0	24.0	25.0	25.0	26.0	
Luxury Vehicle Limits							
Automobiles:							
First Year	3,160	3,160	3,160	3,160	10,000	10,100	
First Year w/Bonus	11,160	11,160	11,160	11,160	18,000*	18,100	
Second Year	5,100	5,100	5,100	5,100	16,000	16,100	
Third Year	3,050	3,050	3,050	3,050	9,600	9,700	
Thereafter	1,875	1,875	1,875	1,875	5,760	5,760	
Qualified Trucks & Vans:							
First Year	3,460	3,460	3,560	3,560	Same as autos **		
First Year w/Bonus	11,460	11,460	11,560	11,560			
Second Year	5,500	5,600	5,700	5,700			
Third Year	3,350	3,350	3,350	3,450			
Thereafter	1,975	1,975	1,975	2,075			

Note: Mileage rates are published late in the year for the subsequent year. The luxury auto rates are generally not published until the 2nd quarter of the year to which they apply.

* Per Sec 168(k)(10)(A): In general.—In the case of qualified property placed in service by the taxpayer during the first taxable year ending after September 27, 2017, if the taxpayer elects to have this paragraph apply for such taxable year, paragraphs (1)(A) and (5)(A)(i) shall be applied by substituting "50 percent" for "the applicable percentage".

**The 2018 and 2019 caps for autos and for trucks and vans are identical because the TCJA upped the caps for both to the same amounts.

CAUTION – Luxury auto limits are just as the title implies, a top limit for depreciation, and as example, for that limit to kick in for 2019 the cost of the vehicle will have to be $58,500 or more. Thus, if a vehicle costs less than that, then the deduction for the year will be less than the luxury limit, which is $18,100 for vehicles purchased and put into service in 2019 when bonus depreciation is claimed.

Example: Car was purchased 7/1/19 for $34,000; used 100% in business:

Purchase price:	$34,000
Less max bonus:	< 8,000>
Balance:	26,000
Regular Depreciation ($26,000 x 20%):	5,200
Total ($8,000 + $5,200):	$13,200

Delayed Placement In Service – For vehicles acquired before 9/28/17 and not placed in placed until 2018, the first year depreciation when claiming 100% bonus depreciation will be $16,400 ($10,000 plus $6,400) or if not put into service until 2019, the first year depreciation limit will be $14,900 ($10,100 plus $4,800).

Exempt Vehicles - The luxury auto limitations do not apply to any vehicle used directly in a taxpayer's trade or business of transporting persons or property for compensation or hire (qualified non-personal use vehicle), such as an:

- Ambulance,
- Hearse,
- Taxi, Uber, Lyft (or similar)
- Clean fuel vehicles,
- Bus,
- Qualified non-personal use vehicles (see definition in "Truck or Van" below), and
- Commuter highway vehicles (may still be subject to the listed property rules).

Truck or Van **–** To be a Qualified Non-personal Use Vehicle a truck or van must have been specially modified with the result that it is not likely to be used more than a *de minimis* amount for personal purposes. The regulations' example of a qualifying non-personal use vehicle is a van with only a front bench for seating in which permanent shelving that fills most of the cargo area has been installed, that constantly carries merchandise or equipment, and that has been specially painted with advertising or the company's name. These specially manufactured or modified vehicles do not provide significant elements of personal benefit, and a taxpayer is not likely to purchase this type of truck or van unless there was a valid business purpose that could not be met with a less expensive vehicle.

Public safety officer vehicles - IRS final regulations § 1.274-5 add clearly marked public safety officer vehicles as a type of qualified non-personal use vehicle under Code Sec. 274(i). As such, they are excepted from the strict substantiation requirements of Code Sec. 274(d)(4) that apply to listed property. They also qualify as a working condition fringe benefit so that the value of their use is excluded from income.

DEPRECIATION RATES

Automobiles and small trucks are depreciated using a five-year life. As with other MACRS property, the half-year and mid-quarter conventions apply. Where the business use of a luxury auto is less than 50%, the listed property rules limit the depreciation method to straight line MACRS and prohibit a Sec 179 deduction. See page 3.04.12 for depreciation tables.

First-Year Calculation - When calculating the first-year depreciation, and using 100% of the cost basis, figure the Sec. 179 deduction first (if being claimed), then reduce the vehicle's basis by the amount of the Sec 179 deduction before determining any bonus depreciation. Reduce the basis again by the amount of bonus depreciation claimed and then figure the otherwise allowable depreciation on the remaining basis – keeping in mind at each step the luxury auto first-year depreciation limit if applicable. Prorate the result by the business use percentage (business miles/total miles) if less than 100%.

Calculation after the first year - Beginning with the second year of business use, and for each year thereafter, both the listed property rules and the luxury auto limitations must be applied each year. If the luxury auto was used more than 50% for business in the current year and all prior years, then the listed property restrictions do not apply; depreciation can continue to be calculated using whatever method was used the first year. However, if the business use is less than in any prior year, recapture rules may apply. If the auto was used 50% or less for business in the current year or in any prior year during the earnings and profits (ADS) life of the car, then the listed property limitations do apply; depreciation must be calculated using the straight-line method over the earnings and profits (ADS) life. Under MACRS, the earnings and profits (ADS) life for luxury autos is five years. If the auto was used 50% or less for business in the current year and more than 50% for business in all prior years, then the listed property rules regarding Section 280F recapture must be applied.

CAPITAL IMPROVEMENTS TO LUXURY CARS

A capital improvement to a luxury car (e.g., a new engine) is generally treated as a new depreciable asset placed in service the year the improvement is made. The improvement is also subject to the luxury auto limits. Therefore, the deduction limit for a given year is figured based on both the car and the improvement made to it. However, the de minimis safe harbor rule (see chapter 3.27) of the capitalization and repair regulations would allow such capital improvements to be treated as an expense if the cost is within the safe harbor cost limits.

FASTER WRITE-OFFS FOR HEAVY SPORT UTILITY VEHICLES (SUVs)

Sport Utility Vehicles (SUV) with weight in excess of 6,000 pounds are not subject to the luxury auto depreciation limit rules and can utilize the §179 expense deduction up to a limit of $25,000*. This applies to sport utility vehicles rated at **14,000 pounds** gross vehicle weight or less.

Excluded from the $25,000* limitation is any vehicle that:

- Is designed for more than nine individuals in seating rearward of the driver's seat;
- is equipped with an open cargo area, or a covered box not readily accessible from the passenger compartment, of at least six feet in interior length; or
  has an integral enclosure, fully enclosing the driver compartment and load carrying device, does not have seating rearward of the driver's seat, and has no body section protruding more than 30 inches ahead of the leading edge of the windshield.

*Per the TCJA, the $25,000 amount is adjusted for inflation after 2018, and the 2019 amount is $25,500 (Rev Proc 2018-57).

CAUTION!

Business autos are 5-year class life property. If the taxpayer subsequently disposes of the vehicle early, as many do, a portion of the §179 expense deduction will be recaptured and must be added back to income (SE income for self-employed individuals). The future ramifications of deducting the entire or a significant portion of the vehicle's cost using §179 should be considered.

TIP: As an alternative, by definition, a heavy SUV is over 6,000 pounds and therefore qualifies for bonus depreciation. Thus, the entire business portion of the vehicle can be expensed using 100% bonus deprecation in the first year.

UNRECOVERED BASIS

If the depreciation deductions for a vehicle have been limited due to the luxury auto rules, then at the end of the normal recovery period, the luxury auto will have a remaining (unused) basis. This "unrecovered basis" can be deducted in the subsequent years, subject to the annual limitations for luxury autos. The unrecovered basis is calculated as if the vehicle was used 100% for business in every prior year.

Under a safe-harbor provision (Rev Proc 2019-13), for a vehicle on which the 100% bonus depreciation was claimed, depreciation of the vehicle may continue during each year of the vehicle's recovery period. In this situation the depreciation during the remaining years of the recovery period is the lesser of the cap for that year or an amount computed by multiplying the depreciation table percentage for the year times the vehicle's cost reduced by the first-year cap.

Example – Facts: In June of 2018 Warren purchased and placed in service for his business a new passenger auto that cost $60,000. He uses the auto 100% in his business. He does not claim a Sec 179 deduction. The vehicle is depreciated using the 200% declining balance method, a 5 year recovery period and the half-year convention.

No safe harbor election – If Warren does not adopt the safe harbor method of Rev Proc 2019-13, his 2018 depreciation deduction is limited to $18,000, leaving an excess amount of $42,000 that would be recovered starting in tax year 2024 (i.e., the first year after the recovery period is finished). IRC Sec. 280F(a)(1)(B)(ii) limits the post-recovery period yearly recovery amount to $5,760 so it would take Warren another 8 years to fully recover his purchase cost. The result would be the same if Warren elected to claim $18,000 of the auto's cost as a Sec 179 expense deduction or if he elected not to claim the 100% bonus depreciation.

With safe harbor election – if Warren adopts the safe harbor method of Rev Proc 2019-13, he must determine his depreciation using the depreciation table for the 200% declining balance method, 5-year recovery period and half-year convention. For 2018 this would result in a depreciation amount of $18,400 ($8,000 bonus amount + ((60,000 – 8,000) x .2)). However, the deductible amount is limited by the Sec 280F(a) rules, which for 2018 is $18,000 per Rev Proc 2018-25. This leaves a remaining adjusted depreciable basis of $42,000 ($60,000 – 18,000) as of January 1, 2019 and this amount multiplied by the applicable table amount will be the allowable depreciation for years 2019 through 2023, as shown in the following table:

Year	Depreciation Limit	Depreciation Using Safe Harbor	
2018	18,000	$18,000	
2019	16,000	13,440	(42,000 x .32)
2020	9,600	8,064	(42,000 x .192)
2021	5,760	4,838	(42,000 x .1152)
2022	5,760	4,838	(42,000 x .1152)
2023	5,760	2,419	(42,000 x .0576)
Depreciation 2018 – 2023…………51,599			

As of January 1, 2024 (the first tax year succeeding the recovery period), Warren's adjusted basis of the auto is $8,401 ($60,000 – 51,599), and his 2024 depreciation is $5,760, the lesser of his adjusted basis of $8,401 or the 280F(a)(1)(B)(ii) limitation of $5,760. His adjusted basis as of January 1, 2025 will be $2,641, and since it is less than the code-imposed limit of $5,760, his depreciation deduction for the auto for 2025 will be $2,641.

Making the election is done simply by using the safe harbor to deduct depreciation on the vehicle for the first taxable year succeeding the placed-in-service year of the vehicle.

RURAL MAIL CARRIERS

An employee of the U.S. Postal Service who uses his or her personal vehicle to collect and deliver mail on a rural route may receive an "equipment maintenance allowance" (EMA). This reimbursement is considered paid under an accountable plan so that neither the reimbursement received, nor the expense incurred is reportable on the postal employee's tax return. For years before 2018 and after 2025, the actual expenses that exceed the EMA are deductible as a miscellaneous itemized deduction, subject to the 2% floor.

UBER & LYFT DRIVERS

Regulation 1.280F-6(c)(3)(ii) exempts from the luxury auto rules any vehicle used by a taxpayer directly in the trade or business of transporting persons or property for compensation or hire.

LEASED VEHICLES

A taxpayer who leases a luxury auto, and does not claim the standard mileage rate, is allowed to deduct the business part of actual expenses such as fuel, maintenance, repairs, etc., plus the full business portion of the lease/rental payments. However, the listed property and luxury auto limitations are indirectly imposed by requiring the lessee to add "phantom" amounts, called "inclusion amounts," to income over a period of years. In actuality, the inclusion amounts reduce the deductible lease payments claimed. Self-employed persons make an adjustment to car expense on Schedule C. For years before 2018 and after 20205, employees make a subtraction of the inclusion amounts on Form 2106.

Lease inclusion amounts - "Income inclusion" amounts represent the luxury auto limitations and are based on the fair market value of a vehicle at the beginning of the lease term. Depending on the FMV of the car, there may be an inclusion amount every year, or just for the first few years; if FMV is low enough, there will never be an inclusion amount.

The IRS annually issues tables and formulas for calculating the inclusion amounts. The tables are generally built into your tax software, but can be accessed in IRS Pub 463.

DISPOSITION OF AN AUTOMOBILE USED IN BUSINESS – SALE AND TRADE-IN

TCJA

The tax treatment for the disposition of a vehicle used in business is the same as the disposition of any other Sec 1245 business asset. Prior to TCJA (prior to 2018) a business could trade in a business vehicle when the disposition resulted in a gain and defer the gain into the replacement vehicle. On the flip side they could sell the vehicle and recognize the loss. This is no longer true; for federal tax purposes, every post-2017 business vehicle disposition will now be a Form 4797 reportable transaction regardless of gain or loss.

DEEMED DEPRECIATION

When a vehicle is depreciated, the amount of depreciation taken over the life of the vehicle is generally tracked by your tax software even if it is limited by the luxury auto rules. On the other hand, if the standard mileage rate was used, the depreciation is included in the standard mileage rate. The amounts differ from year to year. See "Depreciation Component" in the Historical Auto Mileage Rates & Luxury Limits table earlier in this chapter (2014 and forward) or IRS Pub 463 for earlier years for deemed depreciation amounts.

Example - Computing the deemed depreciation *– Jack placed a business vehicle into service in December of 2015 and sold the vehicle in 2019. He used the standard mileage rate for all years. His business miles were: 980 in '15, 11,960 in '16, 10,440 in '17, 12,790 in '18 and 5,440 in '19. The deemed depreciation is computed as follows.*

Year	***Miles***	***Rate***	***Deprec.***
2015	*980*	*.24*	*235*
2016	*11,960*	*.24*	*2,870*
2017	*10,440*	*.25*	*2,610*
2018	*12,790*	*.25*	*3,198*
2019	*5,440*	*.26*	*1,414*
Deemed Depreciation……			***10,327***

SALE OF A BUSINESS AUTO

Continue to worksheet on page 3.11.06

WORKSHEET – SALE OF BUSINESS AUTO

1. Odometer when sold.. ___________
2. Odometer when acquired.. ___________
3. Total miles driven - line 1 minus line 2.......................... ___________
4. Total business miles (entire period owned) .... ___________
5. Overall business use factor (line 4 divided by line 3)........... ___________

	Total - 100%	Business Use (Total x line 5)
6. Sales price................................	___________	___________
7. Purchase price..........................	___________	<___________>
8. Purchase costs..........................	___________	<___________>
9. Improvements............................	___________	<___________>
10. Cost of sale...............................	___________	<___________>
11. Depreciation (Actual or deemed)...............................		___________
12. **BUSINESS PROFIT (LOSS)** - sum of business use		___________

Example – Sale of a business auto – Standard mileage rate – Dave purchased a new car in 2016 that he used partially for business. He paid $24,000 for the vehicle, added a $1,500 stereo system and sold it in 2019 for $10,000. The odometer reading on the car when he sold it was 54,940 miles. He used it for business; 5,900 miles in 2016, 16,400 miles in 2017, 14,800 miles in 2018 and 8,500 in 2019. He used the standard mileage rate method in all years.

Year	Business Miles	Rate	Deemed Depreciation
2016	5,900	.24	1,416
2017	16,400	.25	4,100
2018	14,800	.25	3,700
2019	8,500	.26	2,210
Total	**45,600**		**11,426**

1. Odometer when sold.. 54,940
2. Odometer when acquired.. 5 (new car)
3. Total miles driven - line 1 minus line 2.......................... 54,935
4. Total business miles (entire period owned) 45,600
5. Overall business use factor (line 4 divided by line 3)........... 0.83

	Total - 100%	Business Use (Total x line 5)
6. Sales price................................	10,000	8,300
7. Purchase price..........................	24,000	<19,920>
8. Purchase costs..........................	0	<0>
9. Improvements............................	1,500	<1,245>
10. Cost of sale..............................	0	0
11. Depreciation (Actual or deemed)..................................		**11,426**
12. **BUSINESS PROFIT <LOSS>**		<1,439>

The loss in this example is a Form 4797 ordinary loss.

TRADE-IN OF A BUSINESS AUTO

Prior to 2018, when a business vehicle was traded-in for a new business vehicle, the transaction was actually a Section 1031 exchange, reported on IRS Form 8824. After 2017, Sec 1031 only applies to real estate property, and as a result, no longer applies to the trade-in of a vehicle. Thus, whether sold or traded in, the transaction is treated as a sale.

TIP: Since all trade-ins are treated as sales (Sec 1031 no longer applies after 2017), all things being equal, one would want to negotiate a lower trade-in value and higher purchase price as opposed to a higher trade-in value and a lower purchase price to minimize gain or maximize the loss from the disposition of the trade-in.

CALIFORNIA DIFFERENCES

California generally conforms to pre-TCJA Federal provisions related to vehicle expenses. However, there are a number of differences, particularly with the passage of the TCJA, including the following:

- CA has not adopted the first year Bonus Depreciation. Since there is no bonus depreciation conformity, CA does not go along with the higher luxury auto limits for the years when the bonus depreciation applies. Since CA's general conformity is based on the IRC as of January 1, 2015, and without legislation to change the conformity date, the increased luxury auto depreciation limits included in the TCJA will not apply for CA. Therefore, the CA limits for autos placed in service in 2018 are (2019 amounts won't be available until the latter part of 2019):

	Autos	Trucks/vans
Year 1	$3,160	$3,560
Year 2	5,000	5,700
Year 3	2,950	3,350
Year 4 & subsequent yrs	1,775	2,075

California also does not conform to the changes made by the TCJA to the auto lease inclusion amounts. For CA lease inclusion amounts, go to ftb.ca.gov and search for lease inclusion.

New Law & Stuff

CAUTION: California conformity has created a complicated issue for vehicle trade-ins. Read the following very carefully.

- For most individuals, California also has not conformed to the TCJA change limiting Sec 1031 to real property. Therefore, most taxpayers who trade in a business-use vehicle must treat that transaction as a Sec 1031 exchange for CA purposes. However, CA conforms to the Federal treatment for high income taxpayers for exchanges completed after January 10, 2019. High income taxpayers are taxpayers with AGI of $500,000 or more ($250,000 for those filing single or married separate).

CAUTION: Where a trade-in is treated as a 1031 exchange in CA and not for Federal it creates a different basis for each.

- CA continues to allow Tier 2 miscellaneous deductions, including employee business deductions such as employment-related use of a personal auto.

NOTES

TRAVEL EXPENSES

Taxpayers who travel away from their ***"tax home"*** for business purposes can deduct their "ordinary and necessary" expenses of doing so, provided the expenses are not "lavish or extravagant."

RAPID FINDER

Definite	3.12.02
Extravagant	3.12.02
Home Office	3.12.02
Lavish	3.12.02
Local Transportation	3.12.02
Lodging	3.12.02
Necessary	3.12.01
Ordinary & Necessary	3.12.01
Reimbursement	3.12.03
Reservist	3.12.01
Sole Proprietors	3.12.03
Spouse	3.12.01
Tax home	3.12.01
Temporary	3.12.02
Transportation, Local	3.12.02
U.S. Travel	3.12.03

Self-employed taxpayers: deduct these expenses on Schedule C.

Employees:

- 2018 through 2025 - Tier 2 miscellaneous deductions are suspended by the TCJA, so an employee with unreimbursed travel expenses gets no deduction for these expenses.
- Prior to 2018 and after 2025 - Employees' unreimbursed, away-from-home expenses are deductible only if they itemize deductions. Employees' expenses are generally claimed on Form 2106 and are carried to Schedule A as Tier 2 miscellaneous deductions, subject to the 2% floor and not deductible to the extent the taxpayer is taxed by the AMT.

Temporary work locations less than one year: Expenses deductible

Local travel deductible only if:

- The taxpayer has one or more regular work locations away from his/her home; or
- The taxpayer's home is his/her principal place of business (as defined under the home office rules).

Reservist travel (above-the-line deduction): >100 miles and overnight

Spouse, Dependent or Employee's Expenses – generally not deductible unless

1. The spouse, etc., is an employee of the taxpayer, and
2. The travel of the spouse, etc., is for a bona fide business purpose, and
3. The expenses would otherwise be deductible by the spouse, etc.

Related IRC and IRS Publications and Forms

- **Form 2106** – Employee Business Expenses
- **Form 1040 Schedule C** – Profit and Loss from Business
- **Form 1040 Schedule F** - Profit and Loss from Farming
- **Pub 463** – Travel, Gift and Car Expenses
- **Pub 535** – Business Expenses
- **IRC Sec 162**

Strategy - Reservists & Travel Expenses - Armed Forces reservists who travel more than 100 miles away from home and stay overnight in connection with service as a member of a reserve component can deduct travel expenses as an adjustment to gross income (IRC Sec 62(a)(2)(E)). This is in lieu of deducting those expenses as a miscellaneous itemized deduction (subject to the 2% of AGI limitation). Thus, this deduction can be taken even if the taxpayer does not itemize their deductions. The TCJA of 2017 did not change how these expenses are treated.

Limit on Expenses – Unreimbursed expenses for transportation, meals (subject to the 50% limit) and lodging qualify, but the deduction is limited to the amount the federal government pays its employees for travel expenses, i.e., the general federal government per diem rate for lodging, meals and incidental expenses applicable to the locale and the standard mileage rate for car expenses plus parking and ferry fees and tolls.

Member of Reserve Component – A member of a reserve component of the Armed Forces is an individual who is in the:

- Army, Navy, Marine Corps, Air Force, or Coast Guard Reserve;
- Army National Guard of the United States;
- Air National Guard of the United States; or
- Reserve Corps of the Public Health Service.

Strategy – Spousal Travel Expenses (IRC Sec 274(m)(3))- Generally deductions are denied to a business for travel expenses paid or incurred for a spouse, dependent or employee accompanying the business owner on a business trip unless the:

(1) Spouse, etc., is an employee of the taxpayer, **and**
(2) Travel of the spouse, etc., is for a bona fide business purpose, **and**
(3) Expenses would otherwise be deductible by the spouse, etc.

Strategy - The law allows a deduction for the single rate for lodging and frequently there is no rate difference between one or two occupants. Thus, virtually the entire lodging expense for an accompanying spouse will be deductible. When traveling by car the law does not require any allocation because the spouse is also traveling in the vehicle. Thus, if traveling by vehicle the entire cost of the transportation would be deductible. That would generally also apply to taxis at the destination. The only substantial cost that is not allowed is the cost of the spouse's meals which even if they were deductible would be reduced by the 50% rule.

DEFINITIONS:

***"Ordinary and necessary" expense* -** An expense is "ordinary" if it is customary and conventional for the taxpayer's line of business. A "necessary" expense is helpful in the taxpayer's business; but it need not be indispensable.

"Lavish or extravagant" - is not defined in the Code or Regulations, although IRS indicates an expense that is "unreasonable" (also not defined) may be considered extravagant. Facts and circumstances determine.

"Tax home" - is generally the location of a taxpayer's main place of business (not necessarily the place he/she lives). If taxpayers work regularly in more than one area, the main work location controls--look at such factors as total time, amount of work, and relative income at each location to determine main business place (amount of income is first in order of importance).

For a taxpayer with no main business location, residence may be considered tax home if a taxpayer:

(1) Does some business in the area of his/her residence and actually uses it for lodging while doing business;
(2) Duplicates living expenses at his/her residence because the job requires being away from home;
(3) Has not left the area of his/her traditional home, close family resides there, or taxpayer often uses the home for lodging.

If all three factors apply to the taxpayer, tax home is where the taxpayer's home is. If only two factors apply, facts and circumstances determine. If only one factor applies, the taxpayer is an itinerant and no away-from-home expenses are deductible.

> ***Example* - *Determining Tax Home -*** *Tom, an outside salesperson whose territory covers the western U.S., is employed by a firm whose main office is in Denver. Tom spends about one month a year in Denver for both business and nonbusiness purposes, but the majority of the time he is on the road for his sales job. He owns a home in Denver where his wife, Tina, lived all year; the home has been the couple's residence for a number of years. Tom's tax home is Denver, because he meets all three factors listed above.*

GUIDELINES FOR DEFINITE, TEMPORARY ASSIGNMENT

> **TCJA CAUTION:** For 2018 through 2025, employees are not able to deduct their job-related travel expenses because the TCJA of 2017 suspended the Schedule A miscellaneous deductions that are subject to the 2% of AGI reduction, including employee business expenses. Employees should consider negotiating with their employers to be covered by an accountable plan that would provide tax-free reimbursement to them for their employee business expenses.

During employment of short and fixed duration away from a taxpayer's regular business location, tax home does not change. The advantage of this is that a taxpayer on a temporary assignment may deduct the necessary travel expenses in first getting to the temporary place of work and in returning to the tax home after the assignment is completed. Reasonable expenses for meals, lodging, and other ordinary and necessary business expenses are deductible while at the temporary location (even for days off).

A taxpayer is deemed not on a temporary assignment if the stay away from home exceeds one year. This means that for stays away from home of over one year, no travel or living cost deductions at the assignment location are allowed, even though the taxpayer's family remains at the old job location. See chapter 3.14 for details and examples related to "Temporary Work Locations".

Local Transportation Within Tax Home - Transportation between a taxpayer's home and a temporary work location in the same trade or business WITHIN the metropolitan area where the taxpayer lives and normally works is deductible business transportation only if one of the following two conditions is met:

Multiple locations: The taxpayer has one or more regular work locations away from his/her home; or

Home office: The taxpayer's home is his/her principal place of business (as defined under the home office rules).

Lodging Per Diem - Although per diem rates may be used to substantiate deductions for lodging, meals, and incidental expenses, or for meal expenses and/or incidental expenses only, they may not be used to substantiate deductions for lodging expenses only. Self-employed individuals are not entitled to use the federal per diem rates to substantiate lodging expenses under any circumstances (Starr v. Commissioner, TC Memo. 2000-305). From 2018 Pub 17, page 141: There is no optional standard lodging amount similar to the standard meal allowance. Your allowable lodging expense deduction is your actual cost.

Local (Within Tax Home) Lodging - IRS has issued final regulations permitting certain non-away-from-home lodging expenses to be treated as deductible business expenses by the employer and tax-free working condition fringe benefits or accountable-plan reimbursements to the employee. The regulations provide a safe harbor; local lodging expenses are treated as ordinary and necessary business expenses if all these conditions are met (Reg § 1.162-32(b)):

(1) The lodging is necessary for the individual to participate fully in or be available for a bona fide business meeting, conference, training activity, or other business function.

(2) The lodging is for a period that does not exceed five calendar days and does not recur more frequently than once per calendar quarter.

(3) If the individual is an employee, his employer requires him to remain at the activity or function overnight.

(4) The lodging is not lavish or extravagant under the circumstances and does not provide any significant element of personal pleasure, recreation, or benefit.

The final regulations added a provision that, even if the safe harbor conditions aren't met, "facts and circumstances" may still allow favorable treatment of the expenses. According to Reg § 1.162-32(a), "whether local lodging expenses are paid or incurred in carrying on a taxpayer's trade or business is **determined under all the facts and circumstances**. One factor is whether the taxpayer incurs an expense because of a bona fide condition or requirement of employment imposed by the taxpayer's employer. Expenses paid or incurred for local lodging that is lavish or extravagant under the circumstances or that primarily provides an individual with a social or personal benefit are not incurred in carrying on a taxpayer's trade or business."

Example – Safe Harbor: *A business conducts a 2-day business-related sales training program at a hotel and conference center near its main office. The employer requires both its field and in-house sales force to attend the training and stay at the hotel overnight between Day 1 and Day 2 for the bona fide purpose of facilitating the training. If the company pays the lodging costs directly to the hotel, the stay is a working condition fringe benefit to all attendees (even to employees who live in the area who are not on travel status), and the company may deduct the cost as an ordinary and necessary business expense. If the employees pay for the lodging costs and are reimbursed by the company, the reimbursement is of the accountable plan variety and is tax-free to the employees and deductible by the company as an ordinary and necessary business expense.*

Example – Self-Employed: *Continuing the example above. . .If a locally based self-employed consultant who does business with the company was required by the company to attend the sessions and to stay at the hotel, he could deduct the lodging expense if he paid for it himself, or exclude the expense if he were reimbursed by the company after accounting to it in full for his costs.*

Example – Facts and Circumstances*: Able Company conducts a seven-day training session for its employees at a hotel near the company's main office. The training is directly connected with Able's trade or business. Some employees attending the training are traveling away from home and some employees are from the local area. Able requires all employees attending the training to remain at the hotel overnight for the bona fide purpose of facilitating the training. The company pays the costs of the lodging at the hotel directly to the hotel and does not treat the value as compensation to the employees.*

Because the training is longer than five calendar days, the safe harbor does not apply. However, the value of the lodging is excluded from income since the facts and circumstances test is satisfied: The training is a bona fide condition or requirement of employment and Able has a noncompensatory business purpose for paying the lodging expenses and is not paying the expenses primarily to provide a social or personal benefit to the employees. The lodging Able provides is not lavish or extravagant. If the employees who are not traveling away from home had paid for their own lodging, the employee could have deducted the expenses under section 162(a) as ordinary and necessary business expenses. Therefore, the value of the lodging is excluded from the employees' income as a working condition fringe under section 132(a) and (d), and the company may deduct the lodging expenses of all the employees as ordinary and necessary business expenses under section 162(a). (Based on example 1 from final regs)

Effect on Sole Proprietors – Part of paragraph (a) of the final regulations says, "Under certain circumstances, however, local lodging expenses may be deductible under section 162(a) as ordinary and necessary expenses paid or incurred in connection with carrying on a taxpayer's trade or business, including a trade or business as an employee." Therefore, deducting local lodging could apply to a sole proprietor. However, the self-employed individual would still have to meet the "no personal benefit" and "bona fide activity" tests. For example, if a self-employed tax return preparer attends the ClientWhys Fall Seminar in the same city where his office is located, it would be hard to qualify to deduct overnight hotel costs at the meeting location unless there was an evening session, too.

TRAVEL REIMBURSEMENT: Employers often use per diem arrangements to reimburse their employees for away-from-home travel expenses. The per diem rates include both a lodging and meal/incidental expense allowance. However, taxpayers who travel away from home should keep in mind that business travelers can't use per diems in computing their own travel expense deductions. While there are standard meal allowances for meal deductions, lodging expenses MUST BE receipted if they are to be deductible.

TRAVEL IN THE UNITED STATES: IRS Regulation §1.274-4 defines "within the United States" as follows:

(1) The term "United States" includes only the fifty states and the District of Columbia. (§1.274-4(a))

(2) Travel by automobile within the United States is travel between points within the U.S., even though en route to a destination outside the U.S. (§1.274-4(e)(2)(ii))

(3) If a taxpayer travels by private airplane, any trip or portion of a trip in which both the take-off and landing are in the U.S. is travel within the U.S. (even if part of the trip is over a foreign country). (§1.274-4(e)(2)(iii))

(4) If the travel is by bus, train, airline, or other public transportation, any place in the U.S. where that vehicle makes a scheduled stop to take on or discharge passengers is a point within the U.S. (§1.274-4(e)(2)(i))

Deductible U.S. travel expenses (Reg. 1.162-2) include:

(1) All ordinary and necessary travel expenses if a trip is entirely for business.

(2) If the travel is primarily for personal purposes, none of the expenses incurred in traveling to and from the business destination are deductible.

(3) If the trip is primarily for business and the taxpayer engages in some nonbusiness activity, travel expenses to and from the business destination are deductible in full. Regardless of whether the primary purpose of the trip is business or pleasure, expenses incurred at the destination that are directly attributable to a trade or business are deductible.

Expenses of traveling to and from a business destination may include airfare, bus and taxi fare, auto expenses, meals, lodging, and other expenses incidental to these. The deduction for meals is limited to 50% of their cost *(See chapter 3.10 for Meals and Entertainment).*

Example - Travel in the U.S. - *Nancy, a self-employed computer specialist from New York, made a trip to Nashville regarding the installation of a computer system at Nellis Air Conditioners, Inc. Nancy's expenses were: round-trip airport shuttle, $20; round-trip airfare, $740; taxi fares between airport and Nellis, $30; three nights in motel, $240; three days' meals in Nashville, $150; porter, $3; suit cleaning, $6; car rental, $100. On the trip home, Nancy stopped in North Carolina to spend the weekend with a friend. Meals, entertainment and local transportation in North Carolina were $225 (this stop required no additional airfare). Nancy's deduction is $1,214, i.e., $20 + $740 + $30 + $240 + (50% x $150) + $3 + $6 + $100. The expenses in North Carolina are nondeductible.*

CALIFORNIA DIFFERENCES

California conforms to federal law related to job-related travel expenses prior to the TCJA changes. Thus, California still allows employees to deduct unreimbursed job-related travel expenses as part of miscellaneous itemized deductions subject to a 2% of *federal* AGI reduction.

NOTES

TRAVEL OUTSIDE THE UNITED STATES

- **Foreign Travel**
  - Entire time devoted to business – ordinary and necessary expenses are deductible.
  - Primarily vacation – none of the expenses are deductible
  - Business trip with some amount of personal activities – allocate
- **Foreign Conventions (Outside North America)**
  - Qualifications
  - Must be directly related trade or business
  - It is "as reasonable" for the meeting to be held outside the North American area as within
- **Convention on Cruise Ships**
  - Must be directly related to trade or business
  - U.S. Flagship
  - All ports of call in U.S. or possessions
  - Written documentation attached to return
  - Taxpayer statement
  - Cruise sponsor statement
  - Maximum deduction: $2,000 each taxpayer
- **Luxury water travel –** travel instead of auto, train, air
  - Limited to twice the highest per diem rate within the U.S.
  - Meals must be separately stated
  - Meals subject to 50% limitation

RAPID FINDER

Related IRS Publications and Forms

- **Pub 463** – Travel, Gift and Car Expenses
- **Form 2106** – Employee Business Expenses

Tier 2 miscellaneous itemized deductions are suspended by the TCJA for 2018 through 2025, so employees with unreimbursed foreign travel expenses get no deduction for these expenses. These employees should consider negotiating with their employers to be covered by an accountable plan that would provide tax-free reimbursement to them for their employee business expenses.

§274 states: "In the case of any individual who travels outside the United States away from home in pursuit of a trade or business or in pursuit of an activity described in Section 212, no deduction shall be allowed under ***§162*** or ***§212*** for that portion of the expenses of such travel otherwise allowable under such section which, under regulations prescribed by the Secretary, is not allocable to such trade or business or to such activity."

GENERAL RULES FOR FOREIGN TRAVEL INCLUDE:

(1) If the entire time is devoted to business, all ordinary and necessary travel expenses are deductible.

(2) If the travel is primarily for vacation and only a few hours are spent attending professional seminars or meeting with clients, vendors, or business colleagues in the foreign locale, none of the expenses incurred in traveling to and from the business location are deductible.

(3) If, during a business trip, personal activities take place at, near, or beyond the business destination, then the expenses incurred in traveling to and from the business location have to be allocated between the business and nonbusiness expense.

(4) If the travel outside the U.S. meets certain conditions (see below), the expenses incurred in traveling to and from the business destination are deductible in full as long as the primary purpose of the trip is for business (same as for travel within the U.S.).

Travel Outside the U.S. **ClientWhys™**

Travel, otherwise deductible under ***§162*** or ***§212,*** that is outside the U.S., comes under the same rules that apply to travel within the U.S. if a taxpayer meets **any one** of the following conditions:

(1) The travel outside the U.S. is for a period of one week or less (seven consecutive days, excluding the departure day, but including the day of return).

(2) Less than 25% of the total time outside the U.S. is spent in non-business activities. (If 25% or more of the total time is spent on non-business activities, a day-by-day allocation between personal and business activities is necessary.)

(3) The individual incurring the travel expenses can establish that a personal vacation or holiday was not a major consideration.

(4) The taxpayer did not have "substantial control" over arranging the trip.

Business days are:

(a) Days en route to or from the business destination by a reasonably direct route without interruption;

(b) Days when actual business is transacted;

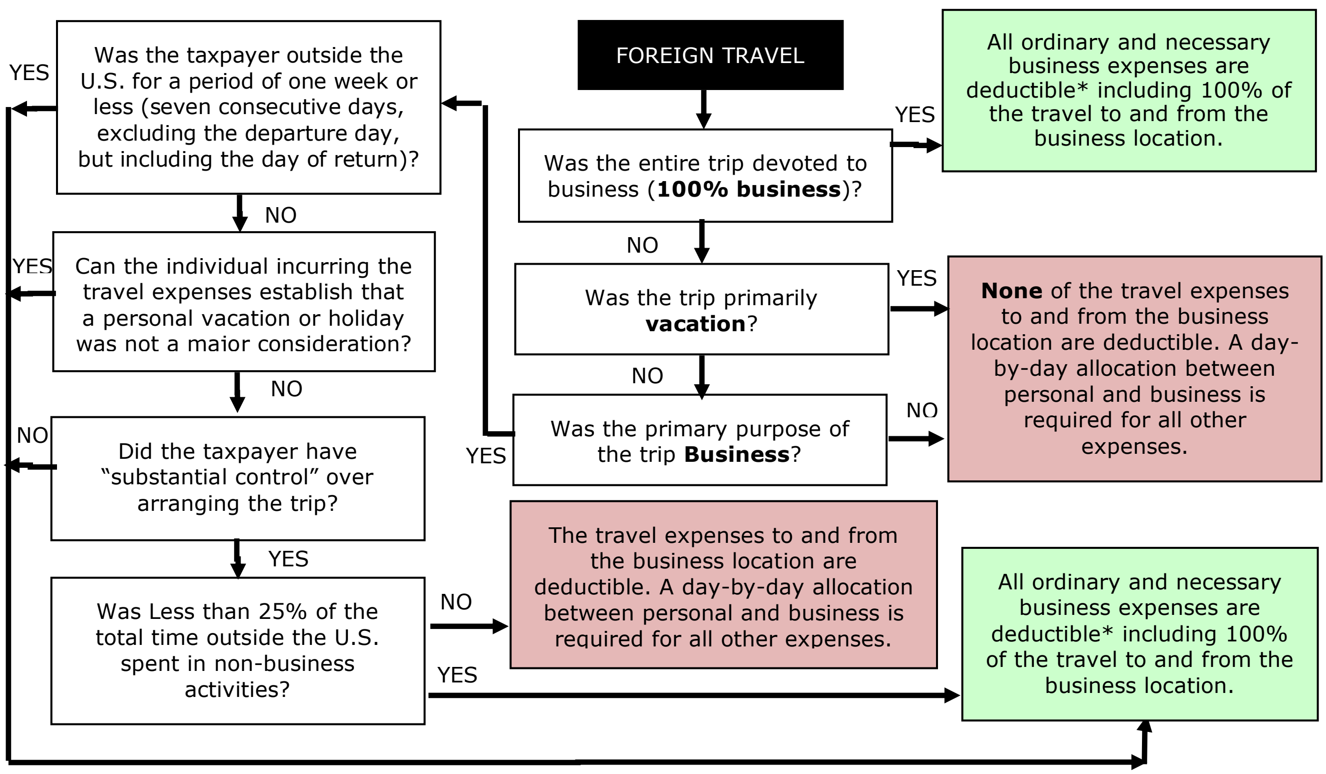
(c) Weekends or standby days which fall between business days;

(d) Days when business was to have been transacted but was canceled due to unforeseen circumstances.

Nonbusiness days are:

(1) Days spent on nonbusiness activities, and

(2) Weekends, holidays, and other standby days that fall at the end of the business activity, if the taxpayer remains at the business destination for personal reasons.



NOTE: **No federal deduction for employees in years 2018-2025 due to TCJA's suspension of Tier 2 miscellaneous itemized* deductions

"Substantial control"

(1) An employee traveling outside the U.S. on behalf of his employer under a reimbursement allowance is not considered to have substantial control over arranging his trip and is subject to the same rules that apply to U.S. travel.

(2) Managing executives (i.e., employees who have authority and responsibility to decide on the need for the business travel, without any effective veto procedures) are presumed to have control. An employee owning over 10% of the employer's stock is in this category.

(3) Being able to control the time of the trip does not indicate substantial control.

(4) A self-employed person is usually regarded as having substantial control.

Reg. 1.274-4(f) requires an allocation of business and nonbusiness expenses, unless one of the exceptions applies. The expenses which have to be allocated depend on where the nonbusiness activity takes place. The allocation is done on a day-by-day basis, unless the taxpayer establishes that some other method more clearly reflects expenses attributable to nonbusiness activity.

Personal Activities at, Near, or Beyond Business Destination - If the personal activities take place at, near or beyond the business destination, travel expenses (including meals and lodging) from the place where travel outside the U.S. began to the place of business activity and return to the U.S. must be allocated between business and personal amounts. The portion allocated to nonbusiness activities is not deductible.

The formula for computing the nondeductible expense when personal activities take place at, near or beyond the business destination is:

Total nonbusiness days/Total business and nonbusiness days

TIMES

Roundtrip transportation + In-transit meals and lodging from a point in U.S. to the business location outside U.S.

Example *-* ***Allocation of Expenses for Travel Outside the U.S. -*** *If an individual travels from New York to London on business, and then takes a vacation in Paris before returning to New York, the amount of the travel expense subject to allocation is the expense which would have been incurred in traveling from New York to London and returning* ***[Reg. 1.274-4(f)(2)].***

Personal Activities En Route to or from Business Destination - If the nonbusiness destination is on the route to or from the business destination, allocate the cost of traveling from the point of departure from the U.S. to the nonbusiness destination and returning to the U.S., including meals and lodging. The expenses incurred on nonbusiness days and the cost of travel to and from nonbusiness locations (except "en route") are nondeductible. The formula for the nondeductible travel when the nonbusiness destination is en route to the business destination is:

Total nonbusiness days/Total business and nonbusiness days

TIMES

Roundtrip transportation + In-transit meals and lodging from a point in U.S. to en route nonbusiness destination outside U.S.

FOREIGN CONVENTIONS, SEMINARS OR MEETINGS: No deduction is allowed for expenses allocable to a convention, seminar, or similar meeting which is held outside the North American area unless the taxpayer establishes:

(1) The meeting is directly related to the active conduct of the taxpayer's trade or business, and

(2) It is "as reasonable" for the meeting to be held outside the North American area as within ***[Code Sec. 274(h)(1)].***

Code Sec. 274(h)(3)(A) - defines the term "North American area" to be the U.S., its possessions (Puerto Rico is considered a possession for this purpose), the Trust Territory of the Pacific Islands, Canada and Mexico. ***Rev Rul 82-151, 1982-2 CB 75*** says that U.S. Virgin Islands, Guam, and American Samoa are also part of the "North American area."

The Jamaica Treaty, Article 25, permits a deduction for expenses of attending a convention in Jamaica. The expenses must be ordinary and necessary in order to be deductible. The "as reasonable" test does not apply to Jamaican conventions or seminars beginning after 1/01/82.

In 1983, legislation expanded the definition of "North American area" to include some Caribbean basin countries and Bermuda (designated "beneficiary countries" by presidential proclamation). To be eligible, the "beneficiary" country must have an agreement with the United States to exchange tax information. The agreement must be in effect at the time the convention begins. The "beneficiary" country cannot discriminate in its tax laws against conventions and similar meetings held in the United States or U.S. possessions.

Rev. Rul. 2011-26, I.R.B. 2011-48, as modified and superseded by Rev. Rul. 2016-16 lists the following geographical areas as "North American area":

(1) The 50 United States and the District of Columbia
(2) Possessions of American Samoa, Baker Island, Puerto Rico, Northern Mariana Islands, Guam, Howland Island, Jarvis Island, Johnston Island, Kingman Reef, Midway Islands, Palmyra Atoll, U.S. Virgin Islands, Wake Island, and "other U.S. islands, cays and reefs not part of the fifty states or District of Columbia"
(3) Canada
(4) Mexico
(5) Republic of the Marshall Islands
(6) Federated States of Micronesia
(7) Republic of Palau
(8) Antigua (after 2/9/03)
(9) Aruba (after 9/12/2004)
(10) Bahamas (after 12/31/2005)
(11) Barbados (after 11/2/84)
(12) Barbuda (after 2/9/03)
(13) Bermuda (after 12/1/88)
(14) Costa Rica (after 2/11/91)
(15) Curacao (after 12/22/13)
(16) Dominica (after 5/7/88)
(17) Dominican Republic (after 10/11/87)
(18) Grenada (after 7/12/87)
(19) Guyana (after 8/6/92)
(20) Honduras (after 10/10/91)
(21) Jamaica (after 12/17/86)
(22)Panama (after 4/18/2011)
(23) St Lucia (after May 5, 2014)
(24) Trinidad (after 2/8/90)
(25) Tobago (after 2/8/90)

The Rev Rul states that expenses for conventions in these areas may be deducted as provided in ***§274(h).*** The factors to be taken into account in determining whether the foreign convention meets the "as reasonable" test are:

(1) the purpose of and the activities taking place at the meeting;
(2) the purposes and activities of the sponsoring organization;
(3) the residences of the active members of the sponsoring organization and the places at which other meetings of the sponsoring organization or groups have been held or will be held; and
(4) other relevant factors that the taxpayer may present.

The Senate Finance Committee explained: "The bill makes clear that the foreign convention provisions do not apply to normal business meetings for employees of a company" [Committee Report (P.L. 96-608, 12/28/86)]. If the seminar is a reward for an employee, it must be included in income on the employee's W-2 or Form 1099, even if less than $600.

CONVENTIONS ON CRUISE SHIPS: Cruise ship convention expenses may be deductible (subject to the $2,000 limitation) if the following requirements are met:

(1) The taxpayer must establish that the meeting is directly related to the active conduct of his/her trade or business.
(2) The cruise ship is a U.S. flagship;
(3) All ports of call on the cruise are located in the U.S. or its possessions; and
(4) The taxpayer claiming the deduction must attach two written statements to the tax return (one signed by the taxpayer and the other signed by an officer of the cruise sponsor group).

Substantiation Statements - The taxpayer's statement must spell out the total days of the trip, excluding days of transportation to and from the cruise ship port, and the number of hours each day of the trip which were devoted to scheduled business activities. A program of scheduled business activities needs to be included, as well as "such other information as may be required in regulations." The second written statement (from the group's officer) must include a meeting schedule, the number of hours the taxpayer attended meetings, and "such other information as required by regulations" ***[§274(h)].***

Maximum Deduction - The maximum deduction of $2,000 applies even in the case of a married individual filing separately. If two married individuals filing a joint return each attended otherwise deductible cruise ship conventions at a cost of $2,000 or more each during a taxable year, they could deduct cruise ship convention expenses of $4,000 on their return for that year. If a married individual attended an otherwise deductible cruise ship convention at a cost of $3,000 (while his spouse attended no such convention), however, only $2,000 would be deductible for that year, whether a joint return or a separate return was filed for that year.

In ***Holswade, M.D., P.C., (1984) 83 TC No. 53,*** the court used five factors to determine whether a cruise seminar was primarily business or pleasure:

- Comparison of the lecture time to the length of the cruise;
- The features of the ship;
- The nature of the ports visited and the sightseeing activities of the taxpayers;
- Availability of similar lectures at less cost in settings more conducive to learning; and
- Amount of study or lecture preparation involved

LUXURY WATER TRAVEL: Business travelers who use cruise ships as a mode of transportation in carrying on their trade or business activities may generally find their deductions limited. The per day deduction for this kind of travel can't be more than twice the highest per diem amount allowed to Federal government employees for travel within the U.S. That rate changes periodically. IRS includes the rates annually in Publication 463. If the expenses for luxury water travel include separately stated meals or entertainment, the meals are subject to the 50% rule (apply the 50% limitation before making the per diem limit), and per the TCJA of 2017, none of the entertainment costs is deductible. If meal and entertainment charges are not separately stated, or are not readily identifiable, the total charge for the travel does **not** need to be allocated.

Example - Luxury Water Travel – *Phyllis, a travel agent, traveled from New York to London via a luxury liner. Her 6-day trip was made for a qualified business purpose at a cost of $5,200. At the time of her travel, the highest per diem rate for government workers was $374 per day.*

Cost of water transportation	*$5,200*
Daily limit ((2 x $374) x 6 days)	*$4,488*
Deduction allowed	*$4,488*

CALIFORNIA DIFFERENCES

California conforms to Federal law related to job-related foreign travel expenses prior to the TCJA changes. Thus California still allows employees to deduct unreimbursed job-related travel expenses as part of miscellaneous itemized deductions subject to a 2% of *federal* AGI reduction.

NOTES

TEMPORARY WORKPLACE

Overview

- **Away from home travel –** Outside the metropolitan area where the taxpayer lives and normally works.
- **Travel within tax home –** only deductible between home and temporary workplace if:
  - Taxpayer has one or more regular work places or
  - Taxpayer's home is his principal place of business.
- **Workplace is temporary if:**
  - Expected to last and does last one year or less.
  - Expected to last one year or less and then the expectation changes to longer – the period up to the change in expectation is a temporary workplace.
- **Workplace is NOT temporary if:** Expected to last for over a year (regardless of the actual duration)

TCJA

Employee business expenses, including local business transportation and away-from-home travel expenses, are not federally deductible in years 2018-2025 because the TCJA suspended miscellaneous itemized deductions subject to the 2% of AGI reduction. The rules explained in this chapter continue to apply to self-employed individuals.

The Details

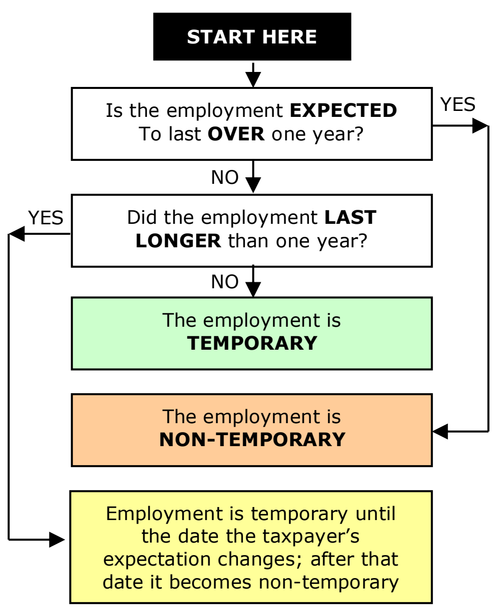
BUSINESS TRANSPORTATION RULES:

Away from tax home - Transportation between a taxpayer's home and a temporary work location OUTSIDE the metropolitan area where the taxpayer lives and normally works is deductible business transportation.

Within tax home - Transportation between a taxpayer's home and a temporary work location in the same trade or business WITHIN the metropolitan area where the taxpayer lives and normally works is deductible business transportation only if one of the following two conditions is met:

Multiple locations: The taxpayer has one or more regular work locations away from his/her home; or

Home office: The taxpayer's home is his/her principal place of business (as defined under the home office rules).



DEFINITION OF TEMPORARY WORKPLACE:

Rev Rul 99-7, 1999-5 IRB outlines the IRS's definition of "temporary workplace" for purposes of determining whether transportation between work and home is deductible.

1. Employment is temporary if it is realistically expected to last (and does last) for a year or less.
2. If employment at a location is expected to last for over a year, the employment isn't temporary, regardless of whether it actually exceeds one year.
3. If employment at a location initially is expected to last for one year or less, but later the expectation is for it to exceed a year, the employment is temporary until the date the taxpayer's expectation changes. After that date, it is non-temporary.

Example - Temporary Job - *Ina Hurry normally takes the train 5 miles to work in the city. However, due to output problems, the manager asked her to work for a few months at the company factory located 35 miles away. Ina drives from home to the factory each day; she is reimbursed for her expenses at the business mileage rate. The work at the factory lasts 3 months. Ina's assignment at the factory is temporary.*

BREAK BETWEEN TEMPORARY ASSIGNMENTS:

The Chief Counsel Advice (Chief Counsel Advice 200018052, Scenario 7) observes that there is no general IRS guidance on how significant a break must be, following a period of temporary employment, for a reassignment to a different work location to be treated as a separate period of work employment that will "restart the clock" on the 1-year limit. The Advice says, however, that a break exceeding 1-year is "clearly significant enough" to restart the clock when the taxpayer begins a 7-month reassignment.

TEMPORARY JOB SITE MUST BE DISTANT:

Courts have held that commuting expenses to a temporary work location are deductible only if the taxpayer's residence is distant from the temporary job site. ***Ellwein, Nester v. U.S., (1985, CA8) 57 AFTR 2d 86-389***

Thus, a taxpayer who lived and normally worked in Stockton, CA, could deduct the expenses of commuting to temporary job locations in Novato, Napa, and Yuba City, round trip distances of 171, 141, and 174 miles, respectively. Those locations were distant from her home in Stockton. ***(Daiz, Teresita T., (2002) TC Memo 2002-192)***

But commuting expenses from Seffner, FL, to New Wales and St. Petersburg, round trip distances of 44 and 30 miles, weren't deductible because the temporary job sites were within the general area of taxpayer's home. ***(Epperson, Jessie Elvin, (1985) TC Memo 1985-382)***

A union boilermaker who was required by the terms of his union membership to accept temporary assignments throughout his home state (Wisconsin) was permitted to deduct transportation expenses incurred in traveling to job sites that were over 35 miles from his home. He could also deduct motel and meal expenses incurred while working at more distant job sites, where it was impractical to drive home each day. In interpreting Rev. Rul. 99-7, the Tax Court found that there was no set definition of "metropolitan area" and that the taxpayer's use of a 35-mile radius as his metropolitan area was reasonable. **(Wheir, T.C. Summary 2004-117, 8/30/04)***

Metropolitan Area - The Tax Court noted that "because the term 'metropolitan area' is ill defined for the purpose of determining whether transportation expenses qualify for deduction under section 162, the Court considers all the facts and circumstances in deciding whether transportation expenses were incurred in traveling to a temporary worksite unusually distant from the area where the taxpayer lives and normally works." The Court would have allowed a heavy-equipment construction worker who lived in Roseville, CA (near Sacramento) to claim mileage from his home to temporary work sites 91 (Richmond), 92 (Modesto) and 293 (Bakersfield) miles from his home if he had had adequate records. But work sites 20 (Sacramento), 51 (Jackson) and 67 (Stockton) miles from his home were not outside the taxpayer's metropolitan area. **(*Tiller, J.B., T.C. Summary Opinion 2017-760)****

*Summary opinions cannot be cited as precedent for any other case

CAUTION

When considering what defines a particular taxpayer's "tax home" (or as frequently mentioned in the tax court cases the "metropolitan area") you must take into account the geographical scope of where the taxpayer resides. The definition of "tax home" or "metropolitan area" has a vastly different meaning for a taxpayer living in the Los Angeles metropolitan area as opposed to one living in Ely, Nevada. The IRS and the tax courts frequently focus on this issue.

ITINERANT WORKERS:

An individual's residence is his tax home if the individual has no principal place of business or employment but changes work locations continually, as happens with a traveling salesperson. If the individual has no regular place of abode in a real and substantial sense, that person has no home and cannot deduct travel expenses. However, in some tax court cases, the taxpayer was able to show that he had a tax home from which he was away so that he could deduct expenses at his temporary job site.

Merchant Marine Captain - The captain of a merchant ship sailed worldwide half the year, and lived at home with his family in Washington the rest of the time. Taxpayer had ownership and primary financial responsibility for the residence. But for the fact that his employer provided his meals and lodging while he was away on business, he would have incurred duplicate living expenses. Because taxpayer incurred substantial living expenses in maintaining his personal residence, that residence was his tax home. ***Johnson, Marin I., (2000) 115 TC 210***

Engineer - An engineer worked and lived in Chattanooga, TN, for eight months and Oak Ridge, TN, for five months. For several weeks between his employment in Chattanooga and Oak Ridge, the taxpayer resided at his wife's residence in Alabama, which he listed as his permanent address on a joint federal income tax return. The court found that the taxpayer's living expenses at his temporary job sites in part duplicated his living expenses at his permanent residence, and that his contacts and family ties in Alabama did not suggest that he was an itinerant worker with no home. ***Odle, Felix, (1985) TC Memo 1985-459***

Ski Patrolman - A ski patrolman worked in Sun Valley, ID, from January through May. He then traveled to Lake Tahoe, NV, where he worked in a casino from June to August of the same year. In September, he returned to Sun Valley and resumed his position in the ski patrol. During the months in Tahoe, taxpayer paid his Sun Valley landlord $100 to maintain his room and store his personal effects. Although the ski patrol position wasn't assured to him, it was assumed that he would return to the job in Sept. The Court held that taxpayer's tax home was in Sun Valley. ***Lanning, George, (1975) TC Memo 1975-313***

Temporary Employee - A taxpayer with temporary jobs was allowed an away from home deduction on the basis of a vacation type cabin. After his divorce, he lived in the cabin for six years. Then he worked at a series of temporary jobs, always returning to the cabin when possible. He spent about one month each year at the cabin. He also maintained his voting registration there and intended to retire to his cabin. He paid income and property taxes in Montana, where the cabin was located. His cabin in the woods was home for this purpose. ***Rambo, Charles, (1978) 69 TC 920***

Professional Athlete - Professional ice skaters employed by Ice Follies traveled with the show to various cities, except for a lay-off period of a few weeks each year. During the lay-off period they returned to their homes. They were allowed to treat their permanent personal residences as their tax home. ***Boyer, Lucien, (1977) TC Memo 1977-331***

CALIFORNIA DIFFERENCES

California follows Federal rules with regard to temporary workplaces. California has not adopted the TCJA provision suspending Tier 2 miscellaneous itemized deductions during 2018-2025. Therefore, employee business expenses continue to be included as part of miscellaneous itemized deductions that are subject to a 2% of federal AGI reduction.

NOTES

BUSINESS USE OF A HOME

Overview

- **Qualification Tests**: Used exclusively on a regular basis **AND** <u>one of the following must apply</u>:
    - **Storing inventory for a wholesale or retail business** for which the taxpayer's home is the only fixed location of the business
    - Used as a **licensed day care center**
    - A **separate structure (caution –** home sale gain exclusion will not apply to the separate structure)
    - Where the **taxpayer meets with customers, patients, or clients**
    - The **principal place of business**
- **Employees** –
    - Office must be for the convenience of the employer
    - Tier-2 Itemized – 2% of AGI Adjustment - not deductible for AMT
    - 2018 – 2025: employee business expense deductions suspended by the TCJA of 2017
- **Self-Employed** – Schedule C
- **Depreciation** - **MACRS straight-line** over **39 years**
- **Deduction Limit –** Limited to the income from the activity
- **Simplified (Safe Harbor) Deduction**
    - $5 per square foot with a maximum square footage of 300.
    - Maximum deduction $1,500
    - No other indirect expenses allowed
    - Interest & Taxes deductible as usual on Schedule A
- **Carryover** (not applicable if Simplified Method used)
    - **Never includes interest or taxes which are always currently deductible**
    - **In two parts –** Depreciation and other expenses (depreciation is used last)
- **Multiple Offices –** Reduced by **all** business expenses
- **Sale of Home with Office – Chapter 2.08**
- **Home Office Worksheet – See Pub 587**

TCJA

Employee business expenses, including the business use of a home, are not deductible in years 2018-2025 because the TCJA suspended miscellaneous itemized deductions subject to the 2% of AGI reduction. The rules explained in this chapter continue to apply to self-employed individuals.

The Details

According to ***§280A***, expenses related to a taxpayer's "dwelling unit" are normally not deductible (with the exception of qualified home mortgage interest, real estate taxes, and casualty losses, but for 2018-2025 only casualties occurring in federal disaster areas). The term "dwelling unit" can mean a house, apartment, condo, mobile home, or boat. ***When a home is used partially for business or as a rental, special rules apply as outlined below.***

<u>OFFICE-IN-HOME QUALIFICATION TESTS</u>

In order to deduct home office expenses, specific tests must be met:

1. The office area must be used **exclusively** in a taxpayer's trade or business on a **regular**, continuing basis. Taxpayer must be able to provide sufficient evidence to show the use is regular. Exclusive use means there can be no personal use (other than de minimis) at any time during the tax year. Use of only a portion of a room is acceptable as long as the taxpayer shows that section is totally for business.

2. ***One of the following must also apply***. The home office must be:

   a. Used for ***storing inventory for a wholesale or retail business*** for which the taxpayer's home is the only fixed location of the business. Use of the area need not be exclusive under this test, but it must be regularly used;

      i. Since the space is used to store inventory, cost of storage space for books, files or equipment can't be deducted unless the taxpayer qualifies under one of the other tests.

      ii. Storage of "product samples" can also produce a home office deduction.

   b. Used as a ***licensed day care center*** (another exception to the exclusive-use test);

   c. A ***separate structure*** not attached to the taxpayer's home but used for business;

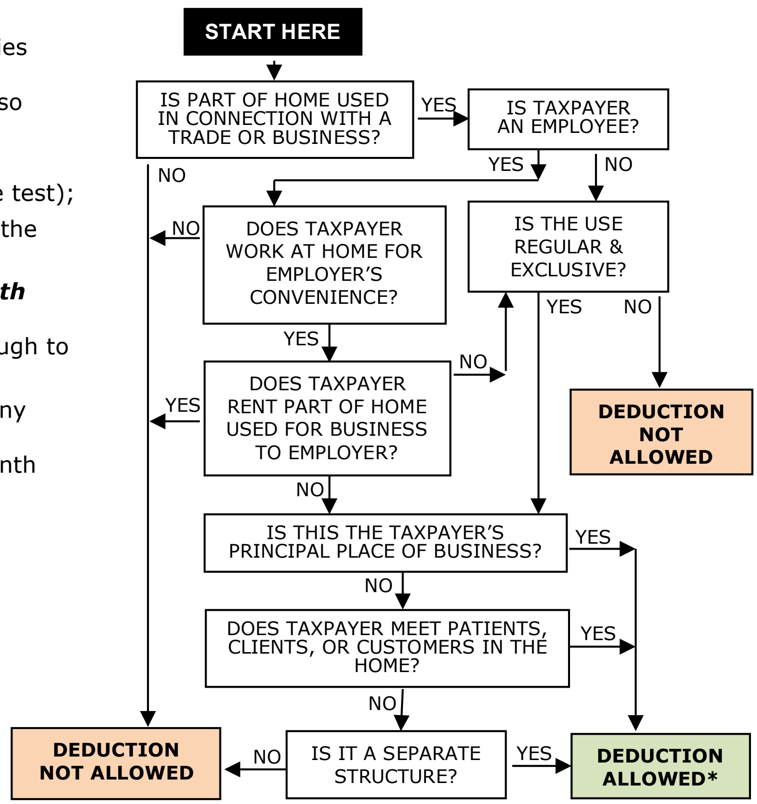
   d. A place where the ***taxpayer meets with customers, patients, or clients*** (just telephone contact with clients isn't enough to meet this test); or

   e. The ***<u>principal place of business</u>*** for any trade or business of the taxpayer (see definition below). Also see following Ninth Circuit ruling:

Musician's long hours of practice yield home office deductions - The Ninth Circuit has reversed the Tax Court and held that a professional musician could claim home office deductions under the Supreme Court's *Soliman* test.

The determining factor was her long hours of practice at home, because the "relative importance" test yielded no definitive answer to whether she used a room in her home as her principal place of business under Code Sec. 280A. *Popov, (CA9 4/17/2001) 87 AFTR 2d ¶2001-804*

Flowchart to Determine Home Office Deduction Qualification



No federal deduction allowed 2018-2025 for employees

- ***Application to current law*** - A home office is used as a principal place of business under Code *Sec. 280A(c)(1)* if a portion of the home is used for the administrative or management activities of any trade or business of the taxpayer, but only if there is no other fixed location where the taxpayer conducts substantial administrative or management activities of that trade or business. Examples of administrative or management activities include billing customers, keeping books and records, and setting up appointments.

  Under the Ninth Circuit's approach, musicians who may not be able to satisfy the statutory test (e.g., their agent handles all booking and billing details) may be able to use their long hours of practice at home to support a home office deduction under the ***Soliman*** principal-place-of-business test.

<u>HOME OFFICE FOR EMPLOYEES</u> – In years **before 2018 and after 2025**, employees are allowed home office deductions using the same criteria as cited above except that the home office use must also be for the ***convenience of the taxpayer's employer.***

Convenience of the employer means a business necessity—the use of the home must be a condition of employment. The employee needs a place to work, but the employer doesn't provide it (or the office provided by the employer is inadequate or unsafe). ***Usage by the employee for personal convenience is not enough.***

Example – Employee's Home Office – *In 2017 Melo Dee, a musician who worked as an employee, used her home for practice because her employer offered no facilities for practice. Melo's use of her home meets the convenience of the employer test and she will be able to deduct the expenses of her office (assuming she meets all the other tests). However, since an employee must deduct employee business expenses as a tier 2 miscellaneous deduction, Melo will be unable to deduct the home office expenses in 2018 through 2025 when tier 2 miscellaneous deductions are suspended.*

RENTAL OF HOME OFFICE SPACE TO EMPLOYER - Rental by an employee of a portion of his/her home to his/her employer doesn't qualify for a home office deduction if the employee uses the office to perform employee duties. The same rule applies to an independent contractor. The only deductions allowed are those which would be deductible regardless of business use—i.e., mortgage interest, real estate taxes, and casualty losses (disaster losses 2018-2025).

Example – Rental of Home to Employer - *Penny Prim owns a two-story building. She rents the ground floor to her solely-owned corporation and lives on the upper floor. Penny is an employee of the corporation.* ***Result:*** *According to LR 8819009, Penny should get no deduction for the portion of the building she rents to a corporation in which she is the sole shareholder. However, the corporation can deduct the rent it pays to Penny. Penny should be allowed to deduct the property taxes, interest and casualty losses, regardless of how the building is used.*

PRINCIPAL PLACE OF BUSINESS - A home office qualifies as a principal place of business if:

a. The office is used on an exclusive and regular basis for ***administrative or management activities of any trade or business of the taxpayer,*** and

b. There is ***no other fixed location*** of the business where the taxpayer conducts substantial administrative or management activities of the business.

If a taxpayer conducts administrative activities at a fixed location outside the home, he/she is still eligible to claim a deduction as long as the administrative activities conducted at the outside location aren't substantial (e.g., a taxpayer may do minimal paperwork at another fixed location of the business).

GROSS INCOME LIMITS - The deduction for the business use of a home is subject to the gross income limit from the business. However, home mortgage interest, property taxes and casualty losses (disaster losses 2018-2025) are always deductible, if the taxpayer itemizes deductions, whether or not the taxpayer claims a deduction for the business use of the home (Sec 280A(b)). Therefore, the prorated deduction for these expenses will always be allowed and is not subject to the gross income test. However, mortgage interest, taxes and casualty (disaster) losses are used in the computation to determine whether the other expenses of the home use and depreciation are deductible as illustrated in the four examples that follow.

Assume the taxpayer uses his home 20% for business.

		Ex #1	***Ex #2***	***Ex #3***	***Ex #4***
Gross income from the business		*$8,000*	*$10,000*	*11,000*	*13,000*

Expenses carryover		***570***	***420***	***0***	***0***
Depreciation carryover		***1,500***	***1,500***	***920***	***0***

TCJA

CAUTION: *Under TCJA, all state and local taxes claimed as a Schedule A itemized deduction are limited to $10,000 for the years 2018 through 2025. The portion of the real property taxes used in the computation of the home office is unaffected by that limitation, i.e., the full amount of property taxes paid is used to determine the portion of the property taxes used in the home office deduction. However, the line on Form 8829 where the real property taxes are deducted will vary, thus affecting the gross income limitation computation and carryover of expenses.* *See "Forms" on page 3.15.08.*

GROSS INCOME - Gross income is defined as total income from the business less:

a. The business portion of expenses deductible even if the home was not used for business (e.g., mortgage interest, taxes, casualties), ***plus***

b. The business expenses relating to the business, but not to the use of the home (e.g., supplies, advertising, etc.).

CARRYOVER - Home mortgage interest, property taxes and casualty losses (limited to losses attributable to federally declared disasters for tax years beginning after 2017, and before 2026) are NEVER included in the carryover because they are allowed without regard to the gross income limitation (Sec 280A(b)). Therefore, the carryover consists of two elements which must be segregated for carryover purposes: (1) Other direct and prorated indirect expenses of the home office (including excess mortgage interest for self-employed taxpayers) that were not deductible because of the gross income limitation and (2) Home depreciation that was not deductible because of the gross income limitation. In subsequent years these two elements of the carryover are combined with like expenses for the subsequent year and then the gross income limitation for that year is applied. If there is any excess the carryover to the next subsequent year is determined and that process continues year to year until the carryover is used up.

Business Closes - Where a business closes with unused home office carryover, the carryover can only be used to reduce the business net profit to zero and cannot be used to create or increase a net loss from the business in any year. (S Rept No. 99-313 (PL 99-514) p. 84)) Thus any excess is lost and cannot be used against any other business.

Depreciation – The reason the carryover is divided into the two elements is because depreciation is always the last expense to be used in the computation for any year, and if not subsequently allowed before the home is sold, the depreciation that wasn't allowed is not subject to recapture (allowed or allowable rule).

Carryover application – The carryover can only be used for the same trade or business in the subsequent years and cannot be used against a positive income from another business.

Home Office and Sec 179 and/or Bonus Depreciation & Sec 199A Deduction

If the deductions for home office are being limited, and the business expenses include Sec. 179 expenses, and those Sec 179 expenses are impacting the home office limitation, it may be appropriate to forgo or reduce the elective Sec 179 expense. That would allow a larger home office deduction. However, this approach would not allow the business to show a negative result. For a year when first-year bonus depreciation is allowed, electing out of the bonus depreciation for eligible business assets should be considered if it results in a greater home office deduction. But remember that if the bonus depreciation is claimed for any asset of a particular class of property, it must be used for all qualifying property of that class; election out cannot be done on an asset-by-asset basis.

To further complicate matters, starting in 2018, the Sec 199A deduction also needs to be considered when deciding whether to claim the Sec 179 deduction and/or bonus depreciation. Higher depreciation or expensing deductions will reduce net profit and taxable income and result in a smaller 199A deduction. On the other hand, a lower taxable income may avoid certain 199A phase-outs and limitations.

MORTGAGE INTEREST - For purposes of the business use of the home, home mortgage interest is broken into two categories.

- Home Mortgage Interest – Which is the amount of the interest that would be allowed on Schedule A taking into consideration the acquisition debt (and prior to 2018, the equity debt) limitations. Do not include mortgage interest on a loan that did not benefit the home, such as an equity loan used to buy a car, pay tuition expenses, or pay off credit card debts.
- Excess Home Mortgage Interest **–**This is mortgage interest that is ***not*** deductible on Schedule A. Even though this interest is not deductible on Schedule A, for self-employed taxpayers, the home-use prorated amount is included with the other expenses attributable to business use of the home. Its deductibility is subject to the home office gross income limitation and unused amounts are included in the carryover. For **employees**, none of the excess home mortgage is deductible, and the business percentage of excess mortgage interest is not included as part of expenses when figuring the expense carryover.

RESIDENCE USED AS DAY CARE FACILITY - Day care facilities are not subject to the exclusive use requirement that applies to other home offices, but the exception to that requirement applies only if the owner or the operator:

(1) Has applied for (and the application has not been rejected) a license, certification, registration or approval as a day care center or as a family or group care home under the provisions of any applicable state law, or

(2) Has been granted (and the grant has not been revoked) a license, certification, registration or approval as a day care center or as a family or group day care home under the provisions of any applicable state law, or

(3) Is exempt from having a license, certification, registration or approval as a day care center or as a family or group day care home under the provisions of any applicable state law. (Code Sec. 280A(c)(4)(B))

The day care facility exception does not apply where the services performed are primarily educational or instructional in nature (e.g., musical instruction). However, the exception does apply if the services are primarily custodial, and the educational, development or enrichment activities are only incidental to the custodial services. The determination depends generally on the facts and circumstances of each particular case. (S Rept No. 3340 (PL 95-30) p. 7) The services must be provided for individuals age 65 or older, children, or individuals who are physically or mentally incapable of caring for themselves.

When calculating the percentage of business use of the home, both the space used to operate the day care business and the amount of time that the space is used to provide day care – including preparation and cleaning time – are factors. (Rev. Rul. 92-3; *Neilson v. Commissioner*, Dec 46,301, 94 TC 1)

***Example** – Edna uses her living room, kitchen, and bathroom ten hours a day, five days a week to provide licensed day care services. The home is 2400 square feet and the living room, kitchen and bathroom are a combined 1,400 square feet. Edna's percentage use of her home for business is determined as follows:*

$$\frac{1{,}400}{2{,}400} \times \frac{10}{24} \times \frac{5}{7} = .1736 \text{ or } \mathbf{17.36\%}$$

<u>SIMPLIFIED HOME OFFICE DEDUCTION</u> - Taxpayers can elect a simplified deduction for the business use of the taxpayer's home. The deduction is $5 per square foot with a maximum square footage of 300. Thus the maximum deduction is $1,500 per year. Here are the details of this simplified method:

<u>Annual Election</u> – A taxpayer may elect the simplified method or the regular Sec 280A method on an annual basis. Thus a taxpayer may freely switch between the methods each year. The election is made by choosing the method on a timely filed original return and is irrevocable for that year.

- *<u>No Form 8829</u>* - Instead of completing Form 8829, Expenses for Business Use of Your Home, a self-employed taxpayer using the simplified method enters their home's total square footage and the office square footage directly on Schedule C next to line 30. The Schedule C instructions include a worksheet for figuring the amount of the deduction using the simplified method
- *<u>Depreciation</u>* – When the taxpayer elects the simplified method, no depreciation deduction (including additional first year or Sec 179) for the home is allowed and the depreciation for the year is deemed to be zero.
- *<u>Additional Office Expenses</u>* – Additional office expenses such as utilities, insurance, office maintenance, etc., are not allowed when the simplified method is used.
- *<u>Home Mortgage Interest and Taxes</u>* – Prorated home mortgage interest and taxes are not allowed as an office expense when using the simplified method. Instead, 100% of the home mortgage interest and taxes are deductible as usual on Schedule A.
- *<u>Deduction Limited by Business Income</u>* – As is the case with the regular Sec 280A method, under the simplified method the home office deduction is limited by the business income. For the simplified method, the deduction cannot exceed the gross income derived from the qualified business use of the home for the taxable year reduced by the business deductions (deductions unrelated to the qualified business use of a home). However, unlike the regular method, any amount in excess of this gross income limitation is disallowed and may not be carried over and claimed as a deduction in any other taxable year.
- *<u>Sec 280A Home Office Carryover</u>* – Cannot be used in a year the simplified method is used. The carryover continues to future years and can only be used when the regular method is used.

  ***Example** – Julie used the regular home office method on her 2016 return and due to the business income limitation was unable to claim $500 of her direct and prorated direct expenses and $800 of depreciation, so she had a carryover of $1,300. On her 2017 and 2018 returns Julie used the simplified method and none of the carryover expenses were deductible. For 2019 she is again using the regular method and will be able to include the $1,300 of carryover expenses in her computation.*
- *<u>Qualifications</u>* – A taxpayer must still meet the Sec 280A qualifications to use the simplified method.
- *<u>Reimbursed Employee</u>* – The simplified method cannot be used by an employee who receives advances, allowances or reimbursements for expenses related to qualified business use of his or her home under a reimbursement or other expense allowance arrangement with the employer.
- *<u>Determining Square Footage</u>* - To determine the average square footage of the business, use these guidelines:
  - **Square Feet Maximum** - Never use more than 300 square feet for any month, even if the taxpayer has multiple businesses. Where there are multiple businesses use a reasonable method to allocate between businesses.
  - **Determining Average Square Feet for the Year** - Use zero for months where there was no business use, or where the business was not for a full year.
  - **15-Day Minimum** – Don't count any month in which the business use is fewer than 15 days.

    ***Example** - A calendar-year taxpayer begins using 400 square feet of her home for business on July 20 and continues using the space as a home office through the end of the year. Her average monthly allowable square footage for the year is 125 square feet (300 x 5 months = 1500/12 = 125). 300 was used instead of 400 in figuring the average because 300 is the maximum square footage that can be used. Since usage in July was fewer than 15 days, only 5 months are counted (Aug. – Dec.).*

- **Multiple Businesses** - Where there are multiple businesses only one method may be used for the year, either the regular or safe-harbor.
- **Mixed Use Property** - A taxpayer who has a qualified business use of a home and a rental use for purposes of § 280A(c)(3) of the same home cannot use the simplified method for the rental use.
- **Move** – A taxpayer who conducts business from a home office and moves during the year and uses part of the new home for the same business may use the simplified method for business use of one home and the regular method for business use of the other home. (Sch. C instructions, 2018, page 12, Example 3) When there is a move during the year, the average allowable square footage for the simplified method will generally be less than the 300 maximum.
- **Taxpayers sharing a home** - Taxpayers sharing a home (for example, roommates or spouses, regardless of filing status), if otherwise eligible, may each use the simplified method, but not for a qualified business use of the same portion of the home.

Example *- A husband and wife, both otherwise eligible to claim a home office deduction and regardless of filing status, may each use the simplified method for a qualified business use of the same home for up to 300 square feet of different portions of the home.*

- **Depreciation Rate When Switching Methods** – When the simplified method is used, and subsequently the taxpayer switches back to the regular method, then use the depreciation factor from the appropriate optional depreciation table as if the property had been depreciated all along.

Example *- A property was placed in service in July of 2014. The simplified method is used in 2017 and 2018, and then in 2019 the taxpayer switched back to the regular method. For 2019 the depreciation factor from the table would be* 2.564 (see non-residential 39 year life table on page 3.04.18).

FACTORS TO CONSIDER WHEN CHOOSING BETWEEN METHODS

When choosing between the methods, the following factors should be considered:

Depreciation – When a home is sold and meets the 2 out of 5 year ownership and use requirements, gain of $250,000 ($500,000 where both spouses on a joint return qualify) can be excluded under Sec 121. However, gain to the extent of depreciation claimed on the home cannot be excluded. When using the simplified method, there is no deprecation claimed and therefore no reduction in basis; thus the entire home gain, if qualified, is subject to the Sec 121 gain exclusion. This is one reason to utilize the simplified as opposed to the regular method.

Home Mortgage Interest & Taxes – The home mortgage interest and taxes included in the regular home office computation is deductible on Schedule A whether or not a home office deduction is claimed. Thus the interest and taxes are generally deductible (as long as the taxpayer can itemize and the taxes paid are within the $10,000 SALT limitation) whether or not the regular home office deduction is claimed. So where the simplified method amount equals or exceeds the depreciation and utility expense portion of the regular method it may be beneficial to utilize the simplified method.

SE Tax – For self-employed individuals the home office deduction generally reduces income for purposes of computing the SE tax except where the individual's SE income is above the current year maximum ($132,900 for 2019) amount. In addition, the 2.9% Medicare element of the SE tax applies to all SE income, with no cap, and the home office deduction will reduce that tax even for higher income taxpayers. This situation generally favors the regular method over the simplified method.

HOME OFFICE AND A CLOSELY HELD CORPORATION OR S CORP

If the business operated out of a taxpayer's home is organized as a corporation, direct and indirect expenses of the home office are the entity's expenses, not the owner-employee's. From a tax standpoint, there are three ways to handle these expenses:

- **Payment of rent -** The Corporation can pay its shareholder-employee rent to offset home office expenses and supply him with an information return (1099). The rent will be deductible by the corporation, assuming it's a reasonable amount for the space and services actually provided, and will be taxable to the shareholder-employee. **Caution** – shareholder-employees need to avoid any appearance of trying to convert wages subject to Social Security tax to rental income not subject to Social Security tax. However, the shareholder-employee/homeowner won't be able to claim offsetting deductions. The rules allowing deductions for business use of a dwelling unit do *not* apply to any expense attributable to the rental of all or part of a taxpayer's dwelling unit to his employer during any period in which he uses the rented portion to perform services as an employee of the employer. For purposes of this rule, an independent contractor is treated as an employee, and the party for whom the independent contractor is performing services is treated as an employer. Where such a lease arrangement exists, the only deductions that are allowable are those that could be claimed in the absence of any business use, e.g., mortgage interest, real estate taxes and casualty losses (limited to losses attributable to federally declared disasters for 2018 through 2025).

- **Unreimbursed employee expenses (before 2018 and after 2025) -** The shareholder-employee can satisfy the convenience of the employer test if he is working in the only location of the business. Assuming that he meets the other home-office requirements, the shareholder-employee can claim home office deductions as if he were a qualifying employee of an unrelated corporation, namely treat them as unreimbursed employee expenses on Schedule A. To ward off a possible IRS attack on the grounds that the shareholder-employee is paying expenses for which he could have sought reimbursement, there should be a written agreement to the effect that the shareholder-employee is required to pay for expenses. Although this approach appears to be clean, neat and simple, there are a number of unattractive consequences:
  - The shareholder-employee can only deduct home office expenses to the extent the total of his miscellaneous deductions exceeds 2% of his AGI—this rule may bar home-office deductions altogether. In years 2018-2025 no deduction is allowed because of the TCJA's suspension of miscellaneous itemized deductions subject to the 2% of AGI reduction.
  - Claiming home office deductions may increase the taxpayer's chances of being audited.
  - The deduction is not allowed against the AMT, which could reduce or eliminate the deduction if the individual is subject to the AMT.
  - Depreciation deductions claimed for the business-use portion of the home reduce the owner's basis in it, and any home sale gain representing depreciation adjustments attributable to post-May 6, '97 periods isn't eligible for the $250,000/$500,000 home sale gain exclusion.
- **Reimbursed employee expenses -** The shareholder-employee can treat his home office expenses as if he were a regular employee, and then, by written pre-arrangement with the corporation, have it reimburse him for these and other employee business costs after he substantiates them in full (amount, time, place, and business purpose of each expense). The shareholder-employee should include on his or her monthly expense report a list of home office-related expenses – for example, homeowner's insurance, utilities (oil heat, gas and electric, water and sewer), alarm or security service, trash disposal, general repairs and maintenance, real estate taxes, and mortgage interest (obtainable from the monthly mortgage billing statement or a loan amortization statement). The total of the office-related expenses multiplied by the business use percentage of the home will be the reimbursable amount by the corporation.

  Results: Assuming the shareholder-employee could have claimed the expenses as business deductions the reimbursement for the expenses is fully deductible by the corporation and is a tax-free accountable-plan reimbursement to the employee. The shareholder-employee avoids having to claim attention-generating home-office deductions, and doesn't have to struggle with depreciation deductions and basis adjustments. However, the shareholder employee can't deduct the business-related portion of his mortgage interest and property tax if the corporation gives him a tax-free accountable-plan reimbursement for these items. Otherwise, he would be getting a double tax benefit—a deduction and tax-free reimbursement—from the same expense.

ADDITIONAL CONSIDERATIONS

- ***Management of a taxpayer's investments*** is never considered a trade or business for purposes of the home office rules.
- A taxpayer who files ***married separate***, can deduct 50% of the home office expenses for home office space shared with a spouse.

RECOVERY PERIOD - Generally, the portion of a single-family residence that is owned by the taxpayer and used as a home office, and the simplified method isn't chosen, is depreciated under ***MACRS straight-line*** over ***39 years*** (i.e., treated as if it were commercial property). In contrast, if a property is used as a residential rental (defined as a building or structure where at least 80% of its gross rental income is from dwelling units), the recovery period is 27-1/2 years.

In a ruling that can't be cited as precedent, the IRS determined that the owner of an 8-unit apartment building who lived in one of the units, which he used partly as a home-office for a single trade or business, which may or may not be the rental of residential property, could depreciate the home office portion over 27-1/2 years instead of 39 years. The IRS considered the building to be residential rental property, and thus depreciable over the shorter period, since over 80% of the building's gross rental income came from dwelling units. ***(Chief Counsel Advice 200526002)***

<u>FORMS</u> - Self-employed taxpayers using the regular method to compute their home office deduction use ***Form 8829***; self-employed taxpayers using the simplified method use a worksheet in the instructions to Schedule C (not Form 8829) and enter square footage information directly on Schedule C. In years when the miscellaneous itemized deductions aren't suspended, an employee reports deductions on ***Schedule A (Tier 2 miscellaneous deductions)*** and can figure the deduction using a worksheet found in IRS Publication 587. Schedule F filers also use the worksheet (not Form 8829). <u>Employees deduct both the business and nonbusiness parts of home mortgage interest, real property taxes and casualty (disaster) losses in their usual places on Schedule A and not as part of the home office deduction in miscellaneous deductions</u>.

When computing the home office deduction on Form 8829 for 2018 (and presumably through 2025), and the total of real property taxes and other state and local taxes exceeds the $10,000 SALT limit imposed by the TCJA of 2017, the "Line 11 Worksheet" in the Form 8829 instructions is used to determine the amount of real property tax eligible to be deducted as part of the home office deduction and in which section of the form it is entered. In some situations, instead of entering the amount on line 11, column b (real estate taxes – indirect expenses) of the 8829, the entry goes on line 17, column a (excess real estate taxes – direct expenses), and the entry is already factored by the home office percentage.

For taxpayers claiming the standard deduction and using the regular method for figuring a home office deduction, the mortgage interest and real property taxes are entered on lines 16 and 17, column b, and not on lines 10 and 11.

The IRS didn't release the Form 8829 and instructions for 2018 until very late in the filing season; some tax software companies may not have properly completed the forms. In most cases the bottom line probably came out correctly, but if the gross income limitation applied, there may have been miscalculations, so be sure to verify any carryovers from 2018 to 2019 are accurate.

<u>SALT LIMIT AND THE HOME OFFICE FORM 8829</u>

There has been some confusion and concern about how the home office taxes are figured on the Form 8829. At first glance most cry foul, and for 2018 returns some software was getting it wrong. We have cut the instruction verbiage down and rewrote it in clearer tax-professional lingo. The way the form works is to allow a prorated amount of the interest (without the $1M/$750K limitations) and the prorated full amount of property tax (before the SALT limitation). However, it goes about it in a very convoluted manner that is hard to follow. Hopefully this will help.

<u>Home Office Interest:</u>

- If not itemizing
  - **Line 10** is to be blank (zero)
  - **Line 16** includes **ALL** acquisition interest (including that which would otherwise be limited on Schedule A by the $1M/$750K).
- If itemizing
  - **Line 10** is the amount that would be allowed on Schedule A if none were allocated to the business use of the home
  - **Line 16** only includes the excess (difference between the total acquisition interest and the amount on Line 10)

<u>Home Office Taxes:</u>

- If not itemizing
  - **Line 11** is blank (zero)
  - **Line 17** enter ALL the home's property taxes.
- If itemizing
  - **Line 11**
    - If total state and local tax amount is $10,000 ($5,000 MFS) or less, enter the amount of the home's property taxes on Line 11
    - If total Sch A tax deduction would be limited because of the SALT limit, complete Line 11 worksheet and include WS Line 10 amount on Line 11
  - **Line 17**
    - If the Line 11 worksheet was completed enter the amount from line 11 of the worksheet.
    - If the Line 11 worksheet was not used leave line 17 blank (zero).

Form 8829 Line 11 Worksheet

1. State & local income taxes or sales taxes
2. **Home** real estate taxes
3. Other nonbusiness real estate taxes
4. Personal property tax
5. Add lines 1 through 4
6. Multiple LN5 times business use %
7. Subtract LN6 from LN2
8. Subtract LN6 from LN5
9. Subtract LN8 from $10K/$5K (zero if neg)
10. RE taxes to 8829 LN 11 – Smaller of LN6 or LN9
11. RE taxes to 8829 LN 17 – LN6 less LN10

CATEGORIZING HOME EXPENSES TO DETERMINE DEDUCTIBILITY - Certain expenses are deductible whether or not a taxpayer has a home business. These include:

- Real estate taxes;
- Deductible home mortgage interest, and
- Casualty losses (limited to losses attributable to federally declared disasters for 2018-2025) .

Other expenses are deductible only if a taxpayer uses the home for business and is using the regular method to figure the home office deduction. These expenses generally include items like:

- Depreciation,
- Excess home mortgage interest,
- Insurance, Rent,
- Repairs, Security system, and Utilities.

The IRS groups home-related expenses into 3 categories:

a. ***Direct expenses*** - are the expenses that benefit only the business part of the home. They are deductible in full (subject to the home office gross-income limit, but they are not prorated by the business-use percentage). **NOTE:** Don't confuse direct expenses with expenses ***directly related to the business***. Directly related expenses aren't subject to the limitation of §280A and are fully deductible as business expenses and include such items as office supplies, postage, advertising, etc.

   The basic charge of the first home ***telephone*** line in the home is nondeductible. However, toll calls on that line related to the taxpayer's business are deductible (without limitation)—i.e., they are directly-related expenses without limitation. The cost of a second telephone used only for the business is a directly related expense ***fully deductible*** without limitation.

b. ***Indirect expenses*** (i.e., the expenses of running the entire home such as general repairs, not directly traced to the business) must be pro-rated in computing the home office deduction. This is normally done on the basis of space in the home office versus total space in the home.

   Unrelated expenses (i.e., those incurred for purely personal purposes) are nondeductible. The IRS would say that ***lawn care and landscaping*** are not related to the use of the home for business purposes. However, cases vary on this view.

   i. ***Letter Ruling 8534021*** disallowed deductions for a landscape architect who claimed landscaping expenses, because he occasionally showed his home landscaping to clients as an example of his work.

   ii. ***Hefti, Charles (1988) TC Memo 1988-22*** allowed a deduction to a taxpayer who had clients regularly visiting his home. The outside appearance of the house was deemed important to taxpayer's audio-visual business operations.

CASUALTY LOSSES - A casualty loss may be considered a direct expense if the loss is confined to the part of the home used for the business. The loss is indirect if it involves both the business and nonbusiness portion of the house. However, if the loss is totally unrelated to a portion of the house used for business, it is nondeductible as a home office expense. (2017 IRS Pub 587, page 8) Note: Personal casualty losses aren't allowed for 2018 through 2025.

PARSONAGE ALLOWANCE - A taxpayer can't deduct expenses that are related to ***tax-exempt allowances***—e.g. a tax-exempt parsonage allowance of a minister. Nonetheless, a tax-exempt housing allowance would not prevent deductions for mortgage interest and real estate taxes. However, no deduction would be allowed for other expenses related to the tax-exempt allowance.

MULTIPLE OFFICES - Where gross income is derived both from the business use of a home office and from the business use of other facilities, a reasonable allocation, based on the facts and circumstances of each case, must be made to determine what portion of the gross income is derived from the business use of the home. (S Rept No. 94-938 (PL 94-455) p. 149) In making the allocation, the time spent at each business location, the business investment in each location, and any other relevant facts and circumstances, should be taken into account. (IRS Publication 587, 2018, pg. 10; Prop Reg § 1.280A-2(i)(2)(ii)) After determining the part of gross income attributable to the home office (as opposed to other business locations), the taxpayer must subtract from that amount the total expenses (other than those related to use of the home) that are ***allocable*** to the business in which the home is used. The result will be the home office deduction limitation. (Form 8829 (2018 Instructions, page 2).

Income attributable to the home office – When determining the income attributable to the home office, consider all business income including Schedule C, Form 8949/Schedule D and Form 4797.

Expenses allocable to the home office (for gross income limitation) – Prorate expenses such as business insurance, professional dues, and education expenses between the home office and the other business locations based upon the income attributable to each location. Other expenses such as utilities, taxes, supplies, salaries, equipment, and similar expenses should be allocated to the specific location where they are used or incurred.

Example: *Jerry is a self-employed attorney with offices in the downtown business district. He also has an office in his home that he uses exclusively and on a regular basis to meet with clients whose work schedules prevent them from seeing him during regular business hours at his downtown office. The office occupies 20% of the space in Jerry's home. His gross income from the practice is $175,000, of which $20,000 is attributable to his home office. Jerry's Schedule C business expenses include the following items that are allocable by business income:*

E&O Insurance	*$10,000*
Website	*2,500*
On-line Legal Research Service	*5,000*
Bar Association Dues	*800*
Continuing Legal Education	*1,400*
Total	*$19,700*

Of the $19,700 of expenses, ***$2,251*** *(19,700 x (20,000/175,000)) is allocable to the income derived from the home office.*

Jerry's expenses for the home office, including utilities, taxes, interest, and depreciation, after applying the 20% business use allocation, totaled $4,500. Jerry's gross income for the home office deduction limitation is $17,749 ($20,000 - $2,251). Since his gross income attributable to the home office is greater than his home office expenses, he can claim the full $4,500 as his home office deduction.

Note: *The $2,251 calculation is only for purposes of figuring the OIH gross income limitation – the expenses underlying the $2,251 aren't actually part of the OIH deduction (i.e., if he filed a Schedule C, those expenses would be included in the general expenses, not on the OIH expenses line).*

MOTOR HOME AS AN OFFICE - In Cartwright, TC Memo 2015-212, the Tax Court has found that an on-call physician and surgeon at a hospital, who was required to work a 24-hour period three days a month, was allowed a home office deduction for his motor home but during audit the IRS determined that his deductions were excessive given the facts and circumstances. The court agreed with the IRS and sustained the IRS determination of approximately 20%.

California conforms to Federal law as of January 1, 2015. Therefore, California does not conform to the changes resulting from the TCJA of 2017 and will continue to allow employees to deduct their unreimbursed job-related expenses, including qualified home-office expenses, as a miscellaneous itemized deduction subject to the 2% of federal AGI reduction. California does not limit the deduction of personal casualty losses after 2017 to just those incurred in federally declared disasters areas.

NOTES

NET OPERATING LOSS (NOL)

Overview

- **Losses incurred prior to 2018:**
  - **Carrybacks**
    - General: 2 years
    - Casualty or theft: 3 years
    - Qual. Small business in disaster area: 3 years
    - Farm & Go Zone: 5 years
    - Specified Liability: 10 years
  - **Waiver of 5-yr and 10-yr carryback:** Reverts to 2 or 3 year carryback
  - **Waiver of all carryback:** Losses carried forward only
  - **Carryforward:** Limited to 20 years
  - **Limitation:** Deduction limited to taxable income of deduction year
- **Losses incurred 2018 or later:**
  - **Carrybacks**
    - **General:** No carryback
    - **Farm:** 2 years
  - **Carryforward:** Until used up
  - **Limitation:** Deduction limited to 80% of taxable income in deduction year
- **Form:** Use Form 1045 to carry back if filed by end of year after NOL year; otherwise use 1040X

TCJA

Carryback Repealed; New 80% Rule - For NOLs arising in years beginning after 2017*, the Act generally repeals the 2-year carryback, except for certain farm losses, and provides that the carryover is no longer limited to 20 years and is indefinite until it is used up. **Note**: NOLS prior to this change are unaffected and are still allowed at 100% and only have a carryforward of 20 years. (IRC Sec. 172(b)(1)(A) amended by TCJA Sec. 13302(b)(1)) Effective for NOLs arising in years beginning after 2017, the NOL deduction is limited to the lesser of:

- The aggregate of the NOL carryovers to that year, plus the NOL carrybacks to that year, or
- 80% of the taxable income computed without regard to the NOL deduction for the year. (IRC Sec. 172(a) as amended by TCJA Sec. 13302(a)(1))

*The language in the TCJA that modifies the NOL deduction says it applies to NOLs arising in taxable years *ending* after 12/31/2017 when, according to a letter from the Senate Finance Committee to the IRS, it was Congress' intent for the changes to be effective for NOLs arising in taxable years *beginning* after 12/31/17. The Committee intends to introduce technical corrections legislation to fix the error. The dates in this chapter are premised on the passage of such legislation.

TCJA

Excess Business Loss Adds to NOL – The TCJA added a provision that non-corporate taxpayers' business loss deductions are limited to a threshold amount (IRC Sec. 461(I) as modified by TCJA Sec. 11012(a)). When there is a nondeductible excess business loss, this amount is carried forward and treated like a net operating loss carryover to the next tax year. See Chapter 3.25 for more about this new limitation.

NET OPERATING LOSS

A net operating loss results from a business loss or a personal casualty loss. In order to have an NOL, a taxpayer generally must have a NEGATIVE AGI, or a casualty loss as part of itemized deductions. However, a positive AGI, which consists of positive nonbusiness income and a business loss may also create a net operating loss, if there are nonbusiness deductions to offset the nonbusiness income.

The net operating loss deduction is an exception to the general rule that computation of income tax for a given year is based on that year's income and deductions only. The reason for this is that when a net operating loss occurs, the loss is computed in the year of occurrence, but that loss is carried to the returns of other years and is used as a deduction in those years, resulting in a reduction of income tax (but not self-employment tax) for the other years. Carrybacks/carryovers of NOLs are explained in more detail later in this chapter.

WHO CAN TAKE AN NOL DEDUCTION

Individuals and C corporations can claim net operating loss deductions, but partnerships may not. However, a partner's share of a partnership loss may generate an NOL on the partner's individual tax return (a similar rule applies to shareholders in S corporations). An estate or trust may take an NOL deduction. Beneficiaries can't take the deduction until termination of the estate or trust. A net operating loss of a decedent can't be carried over to his/her estate (except in the case of decedents dying in 2010 and the executor elected to not be subject to the estate tax and the modified carryover basis rule applies – see Chapter 1.05). This section outlines the net operating loss deduction rules for individuals only.

Computing an NOL **-** The steps in computing an NOL are briefly described below. More detailed instructions for the computations are found later in the chapter. After completing the current year's return:

(1) Calculate the NOL for the current year by determining the excess of allowable deductions over gross income (modified as explained below).

(2) Carry the NOL to another tax year (by amending the return of the other year if carrying back the loss).

- (a) Combine the current year loss computed in (1) with all NOLs being carried back or forward to a given year. For losses arising in 2018 or later, this amount is limited to 80% of the taxable income of the year to which the NOL is being deducted. This total is called the NOL deduction for the carryback/carryforward year.
- (b) Recompute the income tax liability in the carryback/carryover year. Credits that are limited by the amount of income tax and the alternative minimum tax also may have to be revised.

(3) Determine how much of the NOL was "used up" in computing steps (2)(a) and (2)(b) above.

(4) Carry any unused loss from (3) to the next available carryback/carryover year.

CARRYOVER OF NOLS ARISING IN 2018 OR LATER YEARS

General Rule – For losses arising in a year beginning after 2017, the TCJA generally repealed the carryback of net operating losses and removed the limit of 20 years for the carryforward period, making the carryforward indefinite until the NOL is used up. (IRC Sec. 172(b)(1)(A) as amended by TCJA Sec. 13302(b)(1))

Farming Exception - An exception to the repeal of carrybacks is a 2-year carryback period for certain farming losses. For this exception a farming loss is the lesser of:

1. The amount that would be the NOL for the tax year if only income and deductions attributable to farming businesses are taken into account, or
2. The amount of the NOL for the tax year.

80% Rule - The NOL deduction on the return for the year to which the NOL is carried is limited to the lesser of:

- The aggregate of the NOL carryovers to that year, plus the NOL carrybacks to that year, or
- 80% of the taxable income computed without regard to the NOL deduction for the year.

CAUTION

Since the 80% rule only applies to NOLs that occur after 2017, it will be necessary to track pre-2018 and post-2017 NOL carryovers separately in order to correctly apply the 80% limitation. Your tax software should be able to do this but you should verify that it is accurately doing so.

CARRYBACK/CARRYOVER OF NOLS ARISING IN YEARS BEFORE 2018:

- *Two Years* - Generally the **carryback period is 2 years**. There are exceptions to this rule for certain eligible losses as noted below.
- *Three Years* **-** A three-year carryback is allowed for an "eligible loss," including an individual's loss from casualty or theft and a farm or losses of a small business attributable to federally declared disasters.

  Eligible loss - An eligible loss is any part of an NOL that is:
  - From a **casualty or theft**, or
  - a loss attributable to **a federally declared disaster** for a **qualified small business or farming business**.

  Qualified small business - A qualified small business is a sole proprietorship or a partnership that has average annual gross receipts (reduced by returns and allowances) of $5 million or less during the 3-year period ending with the tax year of the NOL. If the business did not exist for this entire 3-year period, use the period the business was in existence
- *Ten Years* – The carryback period for a specified liability loss is 10 years. Only the specified liability loss portion of the NOL can be carried back 10 years.

  Specified Liability Loss - Generally, a specified liability loss is a loss arising from:
  - Product liability, or
  - An act (or failure to act) that occurred at least 3 years before the beginning of the loss year and resulted in a liability under a federal or state law requiring:
    1. Reclamation of land,
    2. Dismantling of a drilling platform,
    3. Remediation of environmental contamination, or
    4. Payment under any workers compensation act.

  Waiving the 10-year carryback – The taxpayer can choose to treat a specified liability loss as if it were not a specified liability loss. If this choice is made, the loss carryback period will be 2 years (3 years to the extent the loss is an eligible loss).

CARRYBACK & DIVORCE

Where one spouse incurs a net operating loss (NOL) in a year following a divorce, which carries back to a year in which a joint return was filed, both spouses are entitled to a share in a joint overpayment resulting from the NOL carryback (Rev Rul 86-57, 1986-1 CB 362; Field Service Advice 1999-881, Vaughn No. 400). In such cases, careful consideration should be given to filing the election to forego the carryback period. *Caution: This is a "timely filed" election!*

ELECTION TO FORGO CARRYBACK PERIOD (PRE-2018 NOLS)

An irrevocable election can be made to forgo the carryback period and carry the loss forward without first carrying it back. This election applies to losses arising in years before 2018 and must be made by the extended due date of the return for the loss year and is advantageous if deductions or credits in carryback years would be lost if the loss were carried back. Another reason to relinquish the carryback period is if the tax rates in the two previous years are lower than the rates expected in the upcoming years. Make the election by attaching a statement to the return for the year of the loss indicating: "Taxpayer elects to forgo the carryback period under IRC Sec 172(b)(3)."

Amended Return Election - If a return was filed timely but did not include the statement electing carryforward, an amended return can be filed for the NOL year through the extended due date of the return whether or not an extension was filed. Enter "Filed pursuant to section 301.9100-2" at the top of the statement.

Amended Return Creates An NOL – Where an amended return is filed, and the requirements for a late election discussed above cannot be met, the carryforward election cannot be made. (Chief Counsel Advice 2016-16009)

CARRYFORWARD SUBSTANTIATION:

Clients who carry forward NOLs should be cautioned not to dispose of records that establish the losses and how much of each NOL has been used up until the statute of limitations has expired for the return in which the last of the carryover has been claimed. Taxpayers were denied NOL carryforward deductions because they were not able to provide the IRS and the Tax Court with books, records, bills, or receipts to establish the income and expenses of the business that suffered the losses. To substantiate the claimed NOLs the taxpayers tried to rely exclusively on copies of tax returns, and the court noted that "it is well settled that tax returns alone do not establish that a taxpayer suffered a loss." (Power v Comm., TCM 2016-157)

FORMS TO FILE FOR REFUND

The carryback, when permitted, can be made by filing a 1040X or Form 1045, Application for Tentative Refund. However, the period during which the 1045 can be used is limited: **the 1045 can only be filed within 1 year after the end of the year in which the NOL arose** – for example, a calendar year individual would need to file Form 1045 by December 31, 2018 for an NOL occurring in 2017. Schedule A (Form 1045) is used to compute the NOL in the loss year. Schedule B (Form 1045) is used to compute the amount of carryback/carryover used up in the carryback/carryover year. See the 1045 instructions for a list of the copies of forms from the loss year return that must be attached. It is generally more expeditious to use Form 1045, but due to the short filing window, if the 1045 time limit is not met, Form 1040X may be used to file for a refund in the carryback year. Form 1040X may be filed within 3 years after the due date, including extensions, for filing the return for the NOL year. Even though the filing due date of the 1045 may have passed, complete and attach Schedule A, and Schedule B if applicable, of Form 1045 to Form 1040X.

STEPS TO FIGURING AN NOL

Figure taxable income in the usual manner for the year the loss occurs (loss year). Several modifications must be made to taxable income in order to determine the actual NOL.

STEP #1 **-** Begin by separating business income and deductions and nonbusiness income and deductions.

Business income includes - wages, tips, commissions, self-employment income (Schedule C or F), gains from sale of depreciable property used in business, rental income, small business stock gains.

> ***NOTE:*** *Whether or not partnerships or S corporations produce business income cannot be clearly stated. Under Rev Rule 66-327, 1966-2, CB 357, Sub S income was nonbusiness income for NOL purposes. According to comments from various research services, it is unclear if this Rev Rule still applies. Partnership income must be characterized at the partnership level (according to the Tax Court). A partnership loss was determined to be nonbusiness in Campbell, (1987-CA5) 59 AFTR 2d 87-917. The partnerships involved in Campbell were formed for investment purposes (real estate partnerships), and the partners failed to prove that the partnerships were in a trade or business. IRS Pub. 536 says to treat nonbusiness income from partnerships and S corporations as nonbusiness income but not to include the taxpayer's share of business income from partnerships and S corps as nonbusiness income. So the facts and circumstances of each situation need to be considered when categorizing the partnership or S corp income.*

Business deductions include - above-the-line educator expenses, Schedule C expenses, unrecovered investment in employee annuity contracts if the employee dies after annuity starting date, casualty losses (business and personal), moving expenses (other than years 2018-2025), losses on sale of business or rental property, small business stock losses, above-the-line deduction for SE tax, SE health insurance deduction, domestic production activities deduction (not applicable after 2017), employee business expenses included as part of itemized deductions (not applicable 2018-2025), state income tax on business profits. The new Sec 199A qualified business income deduction is not included as a deduction when figuring the NOL. (IRC Sec. 172(d)(8)).

Nonbusiness income includes dividends, annuities, interest, state tax refund, gains from sale of nonbusiness property (stocks, bonds, unimproved real estate, etc.), estate/trust income, partnership and S corp income if not classified as business income, taxable alimony received, pension and annuity income, traditional IRA income, and taxable social security.

Nonbusiness deductions include Keogh/IRA/SEP contributions, HSA contributions, medical and interest expenses, taxes (unless related to business), contributions, alimony paid that's deductible in computing AGI, nonbusiness bad debts, standard deduction of non-itemizers.

STEP #2 **-** Use Schedule A of Form 1045 to figure the NOL. The form allows modification of regular taxable income to determine the actual NOL amount. Using Schedule A, make the following modifications to regular taxable income of the loss year:

(a) For years other than 2018 through 2025, add back personal or dependent exemption deductions;
(b) Add back NOL deductions from other years (carryovers/carrybacks aren't part of the current year NOL);
(c) The excess of nonbusiness capital losses over nonbusiness capital gains may not be deducted;
(d) Add back the excess of nonbusiness deductions over nonbusiness income (include in nonbusiness income any nonbusiness capital gains that remain after deducting nonbusiness capital losses in (c));
(e) Subtract the total of nonbusiness capital losses, personal exemptions when applicable, and nonbusiness deductions from nonbusiness capital gains. If there are excess nonbusiness capital gains after this subtraction, add the excess to business capital gains. Compare business capital losses to the result of the previous computation. If the business capital losses are more, the excess can't be deducted.

Example - Capital Gain/Loss and the NOL Computation (2017) - *Marshall is single and has no dependents. His nonbusiness income is $7,600 (interest from bank savings accounts and income from an annuity). His itemized deductions are: $4,750, home mortgage interest; $1,200, taxes; $800, contributions (standard deduction for 2017 would be $6,350). Personal exemption: $4,050 (2017). Marshall also had the following capital gains and losses for the year:*

Nonbusiness capital gains	*$13,000*
Nonbusiness capital losses	*7,000*
Business capital losses	*5,000*

Computation:

Nonbusiness capital gains	*13,000*
Less nonbusiness capital losses	*7,000*
Net capital gain over capital loss	*6,000 (a)*
Nonbusiness deductions: $4,050 personal exemption + 6,750 itemized deductions	*10,800*
Less nonbusiness income	*7,600*
Excess nonbusiness deductions	*3,200(b)*
Subtract (b) from (a) - (remaining nonbusiness capital gain)	*2,800*
Offset against business capital loss	*5,000*
Excess business capital loss	*2,200*

The $2,200 excess can't be used as part of Marshall's NOL deduction.

Example - Computing the NOL *- Keith, a single taxpayer with no dependents, had the following data for 2017:*

Income:

Wages	*$1,225*
Bank of America interest	*425*
Net business long-term capital gains	*2,000*

Deductions:

Schedule C loss	*<$5,000>*
NOL carryover from 2016	*< 185>*
Short-term loss on sale of stock	*<1,000>*
Loss on small business stock	*<700>*
Small business investment co. stock loss	*<300>*

Keith's AGI for 2017 is ($3,535) [$1,225 + $425 + ($2,000 - $1,000) - $300 - $5,000 - $185 - $700]. He did not itemize in 2017. The following computation shows Keith's '17 NOL:

1) ADJUSTED GROSS INCOME OR LOSS(-)........................		*-3,535*	
2) a. Itemized Deductions or	*0*		
b. Standard Deduction...	*6,350*		
3) Personal Exemptions..	*4,050*		
4) Sub Total..		*10,400*	
5) STATUTORY LOSS..			*13,935*
ADJUSTMENTS (ADD BACKS) TO COMPUTE NET OPERATING LOSS			
6) Personal Exemption Deduction..		*4,050*	
7)Net Operating Loss From Other Years..			*185*
8) NONBUSINESS DEDUCTIONS COMPUTATION			
a. Total Deductions (Std or Itemized).........	*6,350*		
b. Add IRA & Keogh Deductions.............	*0*		
c. Less Casualty Losses..............................	*0*		
d. Less Sch. A Business expense...............	*0*		
e. NonBusiness Deductions.................................		*6,350*	
9) NONBUSINESS INCOME COMPUTATION			
a. NonBusiness Income...		*425*	
b. NonBusiness CG..		*0*	
c. NonBusiness Income.....................................		*-425*	
10) EXCESS NONBUSINESS DEDUCTIONS...................................			*5,925*
11) EXCESS OF CAPITAL LOSS OVER CAPITAL GAINS.....................			*0*
12) TOTAL ADJUSTMENTS...			*10,160*
NET OPERATING LOSS...			***3,775***

USING UP AN NOL:

Once the NOL for the current year has been computed, it may be carried back (only if the loss year is before 2018 or the loss is an eligible farm loss occurring in 2018 or later) or forward and used to offset income in other tax years until it is entirely used up. This is done by amending the returns of the carryback years or reporting the NOL deduction as "other income" in carryforward years. The key, of course, is figuring the amount of the NOL which is used in each carryback/carryforward year. The general rules are:

(1) If the NOL is less than or equal to taxable income in the first carryback/carryforward year, the entire NOL is used up in the one carryback/carryforward year.

(2) If the NOL amount is more than taxable income of the first year to which it is carried, certain modifications must be made to the taxable income of the carryback/carryforward year to determine the excess NOL to be carried to the succeeding tax year.

If NOLs from more than one year are being carried to the same year, figure the amount that has been used up for each NOL separately. Start with the NOL from the earliest NOL year.

Post-2017 80% Rule – The TCJA limits the deduction of a net operating loss arising in a year after 2017 to no more than 80% of the taxable income of the year to which the NOL is being carried.

MODIFICATIONS IN CARRYBACK/CARRYOVER YEARS:

The modifications to taxable income in the carryback/carryover years are used only to determine if there is any excess NOL to be carried to the next tax year. Don't use any of the adjustments to figure the NOL deduction or to redetermine the tax liability. Follow these steps to make the modifications:

(1) Start with the AGI of the carryback/carryover year.

(2) Add back the net capital loss deduction of the carryback/carryover year, if any. Also add back any gain excluded from the sale of qualified small business stock.

(3) The NOL being carried forward or back isn't allowed as a deduction at this point. However, allowed NOL carrybacks or carryovers from years before the year of the NOL currently being carried, can be deducted. When carrying two or more NOLs to a tax year, deduct them in the order they occurred. Deduct first the NOL from the earliest year, then the NOL from the next earliest year, and so on.

(4) Make adjustments for the following items:
- Special allowance for passive losses from rental real estate activities;
- Taxable Social Security and tier 1 Railroad Retirement benefits;
- IRA deduction;
- Student loan interest deduction;
- Tuition and fees deduction;
- Excludable savings bond interest; and
- Excludable employer-provided adoption benefits.

Refigure the items that apply in the order listed above. The adjustment for each one is the difference between the refigured amount and the amount actually included on the return. Add the adjustments for the previous items to the revised AGI before refiguring the next item.

(5) The computations of (1) through (4) result in "modified AGI." Then modified taxable income must be computed.
- **First**, use this modified AGI to figure percentage limits on deductions for medical expenses, charitable contributions, Tier 2 deductions (not applicable 2018-2025), and casualty losses.

  Reminder: The deduction for charitable contributions isn't changed because of an NOL carryback. This means that any NOL carrybacks deducted in figuring AGI must be added back to refigure the percentage limit for charitable contributions. (The deduction for charitable contributions will be revised when figuring the amount of NOL available to carry to another year.)
- **Second**, deduct from AGI total itemized deductions (as revised) or standard deduction and the Sec 199A deduction (applicable for years 2018 through 2025). No deduction is allowed, however, for personal or dependent exemptions (applicable for years 2018 through 2025). If these modifications result in a negative amount, treat modified taxable income as zero.

Example - Computing Amount of NOL Used in Carryback Year *- Susan, a single taxpayer under the age of 65, with no dependents, had an NOL of $16,000 in 2017; she is carrying the NOL back to 2015. AGI in 2015 was $29,000 ($30,000 in wages and a $1,000 capital loss deduction). In 2015, Susan gave $17,000 to a qualified charity. Her medical expenses were $3,450, and home mortgage interest was $2,775.*

Susan's 2015 charitable contributions are limited to $14,500 ($29,000 x 50%). Her medical deductions are limited to $550 ($3,450 - ($29,000 x 10%)). Total itemized deductions are $17,825 ($14,500 + $550 +

$2,775). So Susan's taxable income for 2015 is $7,175 ($29,000 - $17,825 - $4,000 (exemption amount)).

*Since the $16,000 net operating loss from 2017 is greater than Susan's 2015 taxable income, she must figure modified taxable income to determine how much of the NOL she will actually use in the carryback year. This is shown in the computation following. Susan's carryover to 2016 is **$4,225.***

CORRECTED 2015 AGI:		
AGI Per Return	*29,000*	
Net Operating Loss Deduction	*-16,000*	
CORRECTED AGI	*13,000*	
CORRECTED ITEMIZED DEDUCTIONS:		
Corrected Excess Itemized Deduction	*-19,425[(1)]*	
Personal Exemptions	*-4,000*	
CORRECTED TAXABLE INCOME		*0*
COMPUTATION OF REMAINING NOL TO ANOTHER YEAR		
Net Operating Loss Deduction		*16,000*
AGI Per Return	*29,000*	
Net Cap. Loss Deduction	*1,000*	
Interim AGI	*30,000*	
Adjustments to AGI		*0*
Medical (use interim AGI)	*450*	
Contributions (use interim AGI)	*15,000*	
Casualty Losses	*0*	
Misc. Tier 2 Deductions	*0*	
Other Itemized Deductions	*2,775*	
Total Itemized Deductions	*18,225*	
MODIFIED TAXABLE INCOME (Not Less Than Zero)	*11,775*	
BALANCE OF THE NOL TO ANOTHER YEAR	*4,225*	

[(1)] ($3,450– (13,000 x 10%)) + 14,500 + 2,775 = 19,425

CALIFORNIA DIFFERENCES

The California NOL is generally figured the same way as the Federal NOL, albeit in most cases with different numbers due to the numerous federal-California differences.

New Law & Stuff

<u>No TCJA Conformity for 2018</u> – For 2018 California still allowed carrybacks and limited the carryover to 20 years and generally conformed to the Pre-TCJA federal NOL rules.

<u>Some TCJA Conformity for Years After 2018</u> - For NOLs occurring in taxable years beginning after December 31, 2018, AB 91(signed by the governor 6/27/2019) repeals the 2-year carryback period. California continues to allow a 20-year carryover period and has not adopted the federal rule limiting the NOL deduction to 80% of the carryover year's taxable income. Thus, 100% of the unused CA NOL is carried over.

Impact of Suspensions on NOL Carryforward – In some years before 2015, because of the severe state revenue deficits, the NOL carryforwards were suspended for some taxpayers and only a percentage of a carryback was allowed. As a result, the carryforward period was extended by two years for losses incurred before January 1, 2002 and by one year for losses incurred in 2002. Although the carryforward period for all post-2007 NOLs remains 20 years, as a result of the NOL suspension during the 2008 through 2011 tax years, the carryforward period for NOLs suspended during this period is extended as follows:

- one year for losses incurred during the 2010 taxable year;
- two years for losses incurred during the 2009 taxable year;
- three years for losses incurred during the 2008 taxable year; and
- four years for pre-2008 taxable year losses incurred.

NOL Carrybacks - NOL carrybacks are only allowed for NOLs incurred after 2012. As a result, taxpayers were first able to claim an NOL carryback on an amended return for the 2011 tax year (a carryback of an NOL from 2013). The NOL carryback was phased in over a three-year period. Consequently, only a 50% NOL carryback is allowed for NOLs incurred in the 2013 taxable year, a 75% NOL carryback is allowed for NOLs incurred in the 2014 taxable year, and 100% of the NOL may be carried back for NOLs incurred after taxable year 2014 and through year 2018. For information related to NOL carryback and carryforward in years before 2015, see the table in the instructions for FTB Form 3805V.

Election to Waive NOL Carryback - Any taxpayer entitled to a carryback period pursuant to IRC Section 172(b)(3) could make an irrevocable election to relinquish/waive the entire carryback period with respect to an NOL incurred in taxable years 2013 through 2018. By making the election, the taxpayer elected to carry an NOL forward instead of carrying it back to the previous two years. The election to waive the carryback could be made separately for California and federal.

The last year for which this election applies for California is 2018, and to be valid the election had to be made by the due date (including extensions of time) for filing the taxpayer's tax return for 2018. If the individual, estate, or trust filed the tax return on time without making the election, the taxpayer can still make the election on the FTB 3805V and attach it to an amended tax return filed within six months of the due date of the tax return (excluding extensions). Thus, October 15, 2019 generally would be the last day for making the election. Once made, the election is **irrevocable**. To make the election to relinquish/waive the entire carryback period for California, check the box in Part I under Section C - Election to Waive Carryback, of California Form FTB 3805V, and attach FTB 3805V to the tax return.

NOTES

RENTAL ACTIVITIES AND PASSIVE LIMITATIONS

- **Passive Activity -** Any trade or business activity in which the taxpayer "DOES NOT MATERIALLY PARTICIPATE" in actual operations of the activity on a "regular, continuous, and substantial basis" is passive.
- **Rental Activity –** Is a passive activity (unless the rental isn't really a rental or the taxpayer qualifies as a real estate professional)
- **Limited Partnership Interest** – is presumed passive (unless material participation standards are met).

- **Material Participation (Generally)**
  - 500 hours or more;
  - Provides substantially all of the participation; or
  - 100 hours and no one spends more time
- **Active Participation**
  - Participates in management decisions
  - Generally must have 10% or more of ownership
  - Does not apply to limited partners
- **Special Rental Real Estate Rule**
  - $25,000 special loss allowance
  - Must show active participation
  - Allowance ratably phases out for AGI $100K to $150K
- **Reporting Schedules**
  - Real Property – Schedule E
  - Personal Property – Schedule C
  - Transient Property – Schedule C
- **Unallowed Losses**
  - Carry forward
  - Allowed in full for a total disposition (not a TFE)
  - Can offset other passive gains
- **Real Estate Professional –**See Chapter 3.26
- **Vacation Home Rental -** See Chapter 3.18
- **Section 199A Deduction** – See Chapter 3.24
- **TCJA Interest Limitation** – See Chapter 3.25

Sec 199A Deduction – The TCJA added new code section 199A that gives a deduction, generally 20% of qualified business income, to most owners of pass-through entities, including rentals. See Chapter 3.24 for details.

The Details

Rental reporting usually is handled on Schedule E of Form 1040 and rentals generally are passive activities. When it comes to real estate rentals, this is generally no problem. Some taxpayers may be limited by the $25,000 loss rule (explained below). But certain "rentals" aren't passive. The goal in this section is to determine the various kinds of rentals, how they are reported on a taxpayer's return and what rentals are NOT covered by the passive rules. Some "rental activities" aren't classed as rentals and certain activities belong on Schedule C. Others are reported directly on Schedule 1 of Form 1040 and still others can be classed as non-passive (under rules for real estate professionals).

In general, passive losses can be offset only by passive income and excess losses are suspended. However, there are exceptions to this rule:

- Up to $25,000 in losses from certain rentals are allowed per year.
- Upon total disposition of a passive activity all losses can be recognized.

The passive rules apply to individuals, estates, trusts, and personal service corporations.

WHAT IS A PASSIVE ACTIVITY?

There must be an "activity," not just a simple holding of an investment. Any trade or business activity in which the taxpayer "DOES NOT MATERIALLY PARTICIPATE" in actual OPERATIONS of the activity on a "REGULAR, CONTINUOUS, AND SUBSTANTIAL BASIS" is passive. This includes any limited partnership interest, which is always presumed passive. However, a taxpayer may rebut the assumption by showing he/she meets the material participation standards (see following paragraph). A rental activity, whether or not the taxpayer materially participates in its operation, is a passive activity – but some "rentals" are not considered rentals for this purpose (see "Exceptions" below).

MATERIAL PARTICIPATION

This is not the same as the "ACTIVE PARTICIPATION" rule under which up to $25,000 of losses from REAL ESTATE RENTALS (more below) may be allowed. Instead, the following tests determine material participation (only one test needs to be met to qualify a taxpayer as a material participant):

Time Tests. A taxpayer is a material participant in an activity if the taxpayer:

(1) Participates **500 HOURS OR MORE** during the tax year;

(2) Provides "**SUBSTANTIALLY ALL THE PARTICIPATION"** in the activity;

(3) **SPENDS MORE THAN 100 HOURS** on the activity and nobody spends more time than this on the activity; or

(4) **SPENDS AGGREGATE TIME** over 500 hours on all "significant participation activities" (SPA's). A SPA is an activity in which the taxpayer spends over 100 hours during the year, but cannot meet one of the three other time tests.

Prior participation tests **-** A taxpayer may be a material participant based on prior participation rather than TIME. The taxpayer may meet either of these criteria:

(5) Participate in the activity "materially" **IN ANY 5 OF THE LAST 10 TAX YEARS**; or

(6) TAXPAYER is in a **PERSONAL SERVICE BUSINESS** and **WAS** a **MATERIAL PARTICIPANT IN ANY 3 PREVIOUS TAX YEARS**.

SPECIAL RULE FOR LIMITED PARTNERS

Limited partners are generally not treated as material participants. If a taxpayer wishes to rebut the presumption, only tests 1, 5, and 6 above may be used. The other tests are not available.

Proposed Regs on Limited Partner's Material Participation – In late 2011, the IRS issued Prop Reg. §1.469-5, which will apply to tax years beginning on or after the date the regulation is finalized, to clarify when a member of a partnership or multi-member LLC is a limited partner for determining material participation under the passive activity rules. Whether an individual is a limited partner will depend upon the individual's right to participate in management of the entity, and not on the extent to which the individual has limited liability. An individual's interest will be treated as a limited partnership interest if:

(1) For federal tax purposes, the entity is classified as a partnership under the check-the-box regulations, and

(2) Under state law or the operating agreement of the entity the holder of the interest does not have any rights to manage the entity at any time during the entity's tax year. ***(Prop. Reg. 1.469-5(e)(3)(i))***

The general partnership exception continues to apply under the proposed regs. That is, an individual is not treated as holding a limited partnership interest in a limited partnership if he or she also holds a general partnership interest at all times during the partnership's tax year ending with or within the individual's tax year. ***(Prop. Reg. 1.469-5(e)(3)(ii)***

RENTAL ACTIVITY EXCEPTIONS

The following are not considered rental activities and DO NOT qualify for the "up to $25,000" rental allowance.

- **Rental of a Dwelling** under §280A(c)(5). This covers home office, use of home for business storage, vacation homes, rental to related parties, and daycare centers. These are NOT PASSIVE ACTIVITIES for the year in question; use the rules of §280A.

  Where a dwelling unit is used by the taxpayer as a residence, and is rented out for less than 15 days during the tax year, then the rent isn't included in the taxpayer's gross income and no deduction due to the rental use of the dwelling unit is allowed, other than the normal interest and tax deductions on Schedule A. (Section 280A(g)) Thus this is not a passive activity and the "active participation" $25,000 loss allowance does not apply.
- **Activities with 7-day or less** periods of use are not considered rentals (See page 3.17.04);
- **Activities with 7-30 day periods** of rental are not considered rentals if significant (10% or more of attributable income) personal services are rendered (See page 3.17.04).
- **Activities where extraordinary personal services** are provided to make the rental incidental to a business activity.
- **Incidental income** is presumed if property is held for sale within the same year, or for use to house employees, and where annual rental income does not exceed 2% of the lesser of FMV or adjusted basis of property.
- **An activity that allows nonexclusive use** during business hours to customers.
- **Rental to self** or for non-rental activities of partnership, S-corp., or joint venture in which TAXPAYER owns an interest. These are allowed if in place on 02/18/88; agreements after this are not considered rentals. See "Recharacterization" below; these are passive if there is a net loss, non-passive if net income.

RECHARACTERIZATION OF PASSIVES

An activity can be either "passive" or "portfolio" depending upon income. (*Reg. 1.469-2T(f)*).

Significant participation activities **-** Losses are passive, but any income in excess of losses is non-passive! Remember that "significant participation" means 100+ hours of participation, but not enough participation to meet the material participation tests (above).

Self-rented property **-** Code Sec 469 includes a self-rental recharacterization rule that applies to taxpayers who rent property to a trade or business in which they materially participate, with the result that net rental income from an item of property is converted from passive to non-passive but net rental loss from an item of property remains passive. (*Reg. 1.469-2(f)(6)*)

> ***Example – Self-Rental Recharacterization:*** *Mike is the sole shareholder in a C corporation that operates a restaurant in which he materially participates and he, as an individual, owns the building in which the restaurant business is located. He had net rental income of $35,000 from the rental in the same year that he has losses of $15,000 from a limited partnership in which he doesn't materially participate. Because Mike materially participates in the restaurant business, the net rental income is recharacterized as not from a passive activity. As a result, he cannot offset the $15,000 loss from the partnership against this rental income.*

This rule recharacterizes rental income from an item of property, rather than from an activity, even where multiple properties are properly grouped as a single economic activity under Reg § 1.469-4(c)(1). *(Carlos, Tony R. (2004) 123 TC 275)*

> ***Example – Self-Rental, Multiple Properties:*** *Glenda owns Property A, which she rented at a profit to S corporation X, and Property B, which she rented at a loss to S corporation Y. Glenda materially participated in the activities of both S corporations. The rental income from Property A is recharacterized as non-passive under the self-rental rule, even though she properly grouped both properties as a single activity. The self-rental rule applies to the income from the rental of Property A (an item of property) and not to the net income from the grouped Properties A/B rental activity. Thus, the income from the rental of Property A (recharacterized as non-passive) cannot be used to absorb the loss from Property B (which is treated as a passive rental activity) or any other passive activity Glenda may have.*

Non-depreciable property rentals **-** Tangible property held for rental will be considered non-depreciable if less than 30% of its unadjusted basis is depreciable. There is no $25,000 allowance for losses.

Rental of property developed by taxpayer is not considered passive. Special rules apply to this, not covered here.

"$25,000 ALLOWANCE," SPECIAL RENTAL REAL ESTATE RULE

A special rule allows aggregate losses from rental real estate activities up to $25,000 per year (IRC Sec 469(i)). To qualify, a taxpayer must be an ACTIVE PARTICIPANT in the activity. This is a less stringent test than for material participation. It means that the taxpayer must participate in management decisions, and at least arrange for others to provide the necessary services such as repairs. DO NOT CONFUSE THESE RULES WITH EARLIER STANDARDS FOR MATERIAL PARTICIPATION. Moreover, keep the following in mind:

- **Less than 10% ownership** is presumed to not be active participation.
- **Limited partners** are not active participants, unless they meet the tougher material participation standards.
- **Different years:** TAXPAYER must be an active participant BOTH in the year of loss AND in the year the loss is allowed.
- **Phase out** of the allowance applies as AGI (without regard to passives) exceeds $100,000. The phase out is 50 cents for each $1 of income over $100,000. No allowance is allowed at gross income of $150,000 and over. Phase out applies to gross income without taking into account passives, taxable social security, or deductions for IRA. For married separate, taxpayers must live apart the entire year or they get no relief under this rule. If they lived apart all year, the allowance is $12,500, and phase out begins at income of $50,000.

REAL ESTATE PROFESSIONAL

The passive activity rules do not apply to the individuals who meet the definition of a "Real Estate Professional." See chapter 3.26 – Real Estate Professionals.

RENTAL OF PERSONAL PROPERTY

Most tax practitioners automatically think of Schedule E when considering rentals. IRS insists ONLY REAL ESTATE RENTALS belong on Schedule E. For rental of **PERSONAL PROPERTY**, IRS gives two different sets of instructions:

- **Trade or business.** If a taxpayer is in the trade or business of renting, the rental belongs on Schedule C. This would apply to most equipment rental operations (a similar rule applies to hotels and motels). The income from the activity is subject to SE tax and belongs on Schedule C. Whether the activity is passive or not depends upon the taxpayer's participation. If the taxpayer is a material participant, this is not a passive activity. If taxpayer is more of an investor, then it's passive.
- **NOT a trade/business.** It is possible for the activity to fit this category. Look at the taxpayer's level of services rendered, prior experience with such business activities, whether the taxpayer deals with the general public rather than a single client, and so on. With this type of rental activity, and provided it is done with a profit motive, IRS instructions say to claim the income on Form 1040, Schedule 1, line 21 as Other Income. The expenses should be detailed on a separate backup sheet and the total expense written on the dotted line next to line 36 of Form 1040, Schedule 1, which is the line where the total of all "adjustments to income" is entered. Identify the amount with the legend "PPR' ("Personal Property Rental") and include it in the line 36 total. IRS does not make it clear whether they consider this income passive. It is easy to argue this is less an activity than an investment. One unconfirmed view is that this is a "portfolio" item that eliminates the use of Form 8582 and classifies the income as "nonbusiness income" for purposes of calculating a Net Operating Loss.

SHORT-TERM RENTALS

Many taxpayers will rent their first or second homes using rental agents or online rental services that match property owners with prospective renters, such as Airbnb, VRBO and HomeAway. When a taxpayer rents property for a short period, special (and sometimes complex) taxation rules come into play, which can make the rents excludable from taxation; other situations may force the rental income and expenses to be reported on Schedule C (as opposed to Schedule E)**.** The following is a synopsis of the rules governing short-term rentals.

Rented for Fewer Than 15 Days During the Year: When a property is rented for fewer than 15 days during the tax year, the rental income is not reportable (*IRC Section 280A(g)*), and the expenses associated with that rental are not deductible. Interest and property taxes are not prorated, and the full amount of the qualified mortgage interest and property taxes, within the limits imposed by the TCJA, are reported on the taxpayer's Schedule A.

The 7-Day and 30-Day Rules: Rentals are generally passive activities. However, an activity is NOT a rental activity if (*Reg Sec 1.469-1T(e)(2)(ii)*):

A. The **average** customer use of the property is for 7 days or fewer—or for 30 days or fewer if the owner (or someone on the owner's behalf) provides significant personal services.

B. The owner (or someone on the owner's behalf) provides extraordinary personal services without regard to the property's average period of customer use. Extraordinary services are where the rental of the property is incidental to providing the services. Examples: Hospital's boarding facilities and a boarding school's dormitory room rental.

Since the activity is a trade or business that is not classified as a rental for Schedule E purposes, the only other option is to report the income and expenses on Schedule C. That opinion is shared by IRS Publication 527, which states: "If you provide substantial services that are primarily for your tenant's convenience, such as regular cleaning, changing linen, or maid service, you report your rental income and expenses on Schedule C." Substantial services do not include the furnishing of heat and light, the cleaning of public areas, trash collection, and such. Thus, the rental income and expenses, including interest and taxes, are included on Schedule C.

Exception to the 30-Day Rule – If the personal services provided are similar to those that generally are provided in connection with long-term rentals of high-grade commercial or residential real property (such as the cleaning of public areas and trash collection), and if the rental also includes maid and linen services, the cost of which is less than 10% of the rental fee, then the personal services are neither significant nor extraordinary for the purposes of the 30-day rule (*Reg. 1.469-1T(e)(3)(viii), Example 4*).

Profits & Losses on Schedule C **–** Profit from a rental activity that is reported on Schedule E is not subject to self-employment (SE) tax. But what about short-term rentals reported on Schedule C – are they subject to SE tax? Even though Pub 527, Page 12, indicates taxpayers "may" have to pay self-employment tax on short-term rental income, the "may" applies to real estate dealers. To quote Pub 334, "You are a real estate dealer if you are engaged in the business of selling real estate to customers with the purpose of making a profit from those sales. Rent you receive from real estate held for sale to customers is subject to SE tax. However, rent you receive from real estate held for speculation or investment is not subject to SE tax." (IRC Sec 1402(a)(1))

A loss from this type of activity is still treated as a passive activity loss and thus is limited under Sec 469 unless the taxpayer meets the material participation test or follows the real estate professional rules. Note that the special allowance for rental real estate activities with active participation, which permits a loss against nonpassive income of up to $25,000 (phasing out when modified adjusted gross income (MAGI) is between $100K and $150K), does **NOT** apply when the activity is reported on Schedule C (*Form 8582, Worksheet 3 and instructions*).

FORMER PASSIVE ACTIVITIES

Former passive activities are not too common but can cause confusion. There are several ways in which a tax return can include an item which is not passive on the current return, but which was passive at some time in the past. For example, tax-deferred exchanges can pass losses from one activity to another, transfers in a divorce, a change in business format and the conversion of a property from rental to personal use are a few possibilities that can cause this. When there are suspended losses from such activities, a taxpayer must wait for one of three events to claim the losses:

- **Income from the same activity.** When the same activity produces net income, this will trigger use of former losses from the same activity.
- **Income from another passive activity.** Form 8582 handles this automatically. Any excess net income from passive activities triggers the allowance of suspended losses from all other passives.
- **Disposition of the activity.** If the activity is disposed of in a fully taxable transaction, all suspended losses from that activity will be triggered.

Suspended Passive Losses – Former Principal Residence **-** In a taxpayer-friendly result in Chief Counsel Advice (*CCA 201428008*), IRS has determined that suspended passive activity losses from the passive rental of a home which was formerly used as the taxpayer's principal residence, did not offset gain excluded under Code Sec. 121 on the property's sale. This leaves suspended losses available to offset taxable passive income in the future. If IRS had reached a contrary result, the suspended losses would be wasted offsetting gain that wasn't taxable because it had already been excluded under the home sale exclusion.

VACATION HOMES; RENTAL TO RELATIVE

These activities are NOT PASSIVE and 280A TAKES PRECEDENCE! **The passive activity rules of *§469* don't even come into play in two** key cases where the prohibitions of §280A govern. (*See §469(j)(10)*)

- **Vacation home rules.** If the property is also used for personal purposes beyond the 14-day or 10% of total rental days standard, don't use passive activity rules (See chapter 3.18 for vacation home rental rules).
- **Rental to relative.** If the property is rented to a relative (either a "relative" in the sense of §267(c)(4))**,** or a co-owner) use the "not for profit" rules, unless it's established that there is fair market rent. If there is fair market rent, move back to the passive activity rules.

ROOM RENTAL – See Chapter 3.18 - Vacation Home Rentals

CATEGORIZING RENTALS

When a rental activity involves real estate, it's usual to automatically picture reporting on Schedule E and Form 8582, subject to the $25,000 loss rule. However, there are several activities that at first glance appear to be "rentals," but upon closer scrutiny are seen to fall under one of the exceptions. How must these be categorized?

(1) ***Golf course condo -*** John and Mary own a condo next to a golf course in Palm Springs. Their personal use never exceeds 14 days per year, and a leasing agent secures several dozen tenants during the year. The property generally shows losses in the $5,000 to $10,000 range. Is this an active participation rental? **ANSWER:** This activity is not likely to be an active participation rental real estate activity. Divide the days rented by the number of tenants. If the average rental period is less than 7 days, this is just a passive activity – much like a K-1. Report it on Schedule C. Suspend the loss if no other offsetting passive income.

(2) ***Vacation homes -*** Same as above – condo by a golf course, but John and Mary use the property for about 30 days each year. Their typical tenant stays for a month or so. Is this a passive activity? **ANSWER:** The vacation home rules take precedence over the passive loss rules. Any net loss MUST be suspended. The activity is NOT passive. The loss is suspended before Form 8582 ever comes into play!

(3) ***Rental to relative -*** Phil owns a residential property and rents it to his brother Bill. What pitfalls must be avoided? **ANSWER:** When a taxpayer rents a home to a relative for long-term use as a principal residence, the tax treatment of the rental depends upon whether the property is rented at fair rental value or rented at less than the fair rental value.

A fair rental is determined based upon facts and circumstances and by taking into account such factors as comparable rentals in the area.

Rented at Fair Rental Value – Where the home is rented to the relative at a fair rental value, it is treated as an ordinary rental reported on Schedule E, and losses are allowed subject to the normal passive loss limitations.

Rented at Less Than Fair Rental Value – When a home is rented at less than the fair rental value, it is treated as being used personally (*Reg Sec 1.280A-1(e)(2)*). Since it is rental property which the taxpayer is treated as using personally, the taxpayer would have to allocate the expenses between the personal and rental portions of the year.

However, since all the rental days (at a bargain rate to a relative) are treated as personal days, the rental portion is zero. So none of the expenses are deductible, other than property taxes and mortgage interest, assuming the interest would otherwise qualify as second home mortgage interest and the taxpayer itemizes.

Since it is not a rental, the income would be reported as "other income" (line 21, Schedule 1 of the 1040) and the mortgage interest and taxes deducted on Schedule A, assuming the landlord is itemizing deductions, and subject to the acquisition debt limitations and SALT cap, respectively, for years 2018 through 2025.

There also could be a gift tax issue depending upon the difference between the fair rental value and rent actually charged to the tenant-relative. Of course, that amount would be pro rated to each occupant of the home, so unless there was a large difference ($15,000 per each occupant, in 2018 and 2019) between the fair rental value and actual rent, or other gifting was involved, a gift tax return probably isn't needed in most cases.

(4) ***Commercial tenant -*** Joe owns a commercial property that he rents out. The tenant literally takes care of everything except the interest and taxes. How does Joe treat the property? **ANSWER:** This is probably NOT AN ACTIVE PARTICIPATION rental! If there is a loss on the property, the $25,000 loss rule will not apply. (This used to be called a "net lease" property. Under those old rules, a property was PRESUMED to be "investment" rather than "business" if expenses other than for interest, taxes and depreciation did not exceed 15% of gross rents.)

DISPOSITION RULES FOR PASSIVE ACTIVITIES

Any gain or loss from the disposition of a passive activity is generally also passive. However, special rules apply to dispositions.

Total disposition - presumes the disposition is a FULLY TAXABLE EVENT. Gains are taxed, and any previously suspended losses are allowed. A special rule accomplishes this.

- **Overall Gain.** If all aspects of the activity are aggregated (current year income/loss, previous suspended losses, gain/loss from disposition) and the aggregate is an overall gain, the overall gain is passive.
- **Overall loss.** If there is an overall loss, the loss shall be allowed. §469 accomplishes this by RECHARACTERIZING the activity as NONPASSIVE. This allows Form 8582 to be bypassed.

Partial dispositions - are more involved (See "Partial Disposition Election" in chapter 3.27.)

Partial recognitions - if only part of the total realized gain is recognized (as with INSTALLMENT SALES or some TAX-DEFERRED EXCHANGES), the gain/loss must be pro-rated. If, for instance, 20% of the total gain is currently recognized, then at least 20% of the overall losses will be allowed.

NON-RECOGNITION TRANSFERS: An exchange of the taxpayer's interest in an activity in a non-recognition transaction does not trigger suspended passive losses. Such transfers include:

- Transfer of property to a controlled corporation (Code Sec. 351),
- Contributions to partnerships (Code Sec. 721), or
- Like-kind exchanges (Code Sec. 1031) in which no gain or loss is recognized.

Following these types of exchanges, the taxpayer retains an interest in the activity and hence has not realized the ultimate economic gain or loss on his investment in the activity. In order for the excess suspended passive losses to be triggered, all gain or loss realized on a disposition must be recognized. *(IRS Letter Ruling 9739004)*

IRS gives as additional examples of transactions that are not fully taxable:

- A transfer to an ex-spouse on divorce, and
- A bankruptcy which has not been finalized *(IRS MSSP Reference Guide, Passive Activity Losses, (2/05), p. 5-2).*
- Suspended passive losses allocable to rental real estate that was sold by taxpayers to their son could not be deducted in the year the son sold the property (after using it as his residence) in a transaction that qualified for gain deferral under the pre-May 7, '97 home sale rollover rule. Instead, the losses remain suspended until the son disposes of the replacement property (his new principal residence) to an unrelated party in a fully taxable transaction (*IRS Letter Ruling 9739004).*

Partially Taxable Event - To the extent the taxpayer does recognize gain on the transaction (e.g., boot in an otherwise tax-free exchange), the gain is treated as passive activity income, against which the taxpayer may deduct passive losses (*S Rept No. 99-313 (PL 99-514) p. 727*).

Related parties **-** A taxpayer is not treated as having disposed of an interest if the disposition is to a related party within the meaning of ***§267(b)*** or ***§707(b)(1)***, including the applicable attribution rules. In the event of such a related-party transaction, suspended losses remain with the taxpayer and may be offset by income from the taxpayer's passive activities.

When a taxpayer's entire interest is transferred to a related transferee followed by a transfer to an unrelated party in a fully taxable disposition, the taxpayer may deduct the suspended losses attributable to his or her interest in the passive activity to the extent the transfer would otherwise qualify as a disposition triggering the suspended losses.

Divorce **-** Under ***§1041(b)*** and ***469(j)(6),*** if a taxpayer transfers property to a spouse incident to a divorce, the exchange is treated as though it were a gift. Therefore, any suspended losses attributable to the spouse giving up the interest in the passive activity are added to the basis of the property transferred to the other spouse. For the receiving spouse, the basis will be increased by the ex-spouse's suspended losses, but the receiving spouse's suspended losses on the same property will still be considered suspended losses, which are available currently to offset passive income.

Publicly traded partnerships - Publicly traded partnerships (PTP) are not passive! If a PTP shows net income for the year, it's portfolio. If a PTP shows a net loss, the loss is suspended, and can only be offset in future years by income from that same PTP. What is a PTP? It is a partnership which is traded on an established securities market, or readily tradable in a secondary market (or its substantial equivalent). FORM 8582 IS NOT USED for reporting PTP income/loss. However, the suspended loss from each PTP must be tracked – which most tax software used by tax professionals will do – so that the loss can be properly used when there is income from the PTP in the future or when the taxpayer's entire interest in the PTP is sold.

AGGREGATING (GROUPING) PASSIVE ACTIVITIES

A taxpayer can elect to treat one or more trade or business activities, or rental activities, as a single activity if those activities form an appropriate economic unit for measuring gain or loss under the passive activity rules.

Benefits of Grouping – If a taxpayer groups two (or more) activities into one larger activity, the taxpayer need only show material participation in the activity as a whole. For rental properties, grouping can be important in determining whether the 10% ownership requirement for active participation in rental real estate is achieved.

Drawbacks of Grouping – The main downside to grouping is that if only one of the activities in the group is disposed of, then the taxpayer has not disposed of his or her entire interest in the activity, and the suspended passive losses cannot be released at that time.

What Constitutes an Economic Unit? – The following factors have the greatest weight in determining whether activities form an appropriate economic unit:

- Similarities and differences in the types of trades or businesses,
- Extent of common control,
- Extent of common ownership,
- Geographical location, and

- Interdependencies between or among activities (for example, the extent to which the activities purchase or sell goods between or among themselves, involve products or services that are generally provided together, have the same customers or employees, or are accounted for with a single set of books).

A rental activity and a trade or business activity cannot be grouped together unless either activity is insubstantial when compared to the other activity. Further, a rental of real property activity and an activity involving the rental of personal property generally cannot be treated as a single activity.

Aggregation Election & Disclosure Requirement – Once the election to aggregate activities is made, the taxpayer is not allowed to regroup the activities unless the original grouping was clearly inappropriate or the facts and circumstances have changed, making the original grouping inappropriate. The IRS may regroup the activities if the taxpayer's grouping fails to reflect economic reality and one of the primary purposes of the taxpayer's original grouping was to avoid the Sec. 469 rules.

Rev. Proc. 2010-13 requires taxpayers to disclose changes made to the grouping of activities by including a statement with the timely filed (including extensions) return for the year in which two or more activities are first grouped together, a new activity is added to an existing group, or an existing group is regrouped. The disclosure requirement is effective for tax years beginning after January 24, 2010. Failing to report these changes results in each activity being treated as a separate activity. Sample election and statement are included as the last page of this section.

Grouping Fresh Start Allowed for Taxpayers Subject to the 3.8% Surtax

Because of the enactment of Sec 1411, the 3.8% tax on net investment income (see chapter 12.05), proposed regulations include amendments to the Sec 469 regulations to permit taxpayers to elect to regroup their activities for passive activity loss purposes in the **first taxable year that they become subject to the 3.8% surtax**. Without permitting regroupings, taxpayers would be bound by their original grouping decisions – some of which may be two decades or more old. Any regrouping must comply with the disclosure and reporting requirements of Reg. 1.469-4(e) and Rev. Proc. 2010-13. A taxpayer may regroup activities only once under this provision, and the regrouping will apply to the taxable year for which the regrouping is done and all subsequent years.

RENTAL INCOME

The taxpayer must generally include in gross income all amounts received as rent during the year. The following are special situations related to payments received by the taxpayer from a tenant:

- **Advance rent** – Included in the year received regardless of the period covered.
- **Security deposits –** Generally not included in income where the landlord plans to return it at the end of the lease. Any amount of the deposit later retained by the landlord becomes income.
- **Expenses paid by tenant – If the tenant** pays any of the landlord's expenses, the payments are rental income. The expenses can be deducted or capitalized under the normal rules.
- **Lease with option to buy -** If the rental agreement gives the tenant the right to buy the rental property, the payments received under the agreement are generally rental income until the tenant exercises the option to buy the property. Payments received after the date of sale are considered part of the selling price.

RENTAL EXPENSES

Typical deductible rental expenses include amounts paid for advertising; janitorial/maintenance and gardening services; utilities; fire, earthquake, flood and liability insurance; taxes; management fees and commissions for collecting rent payments; travel and transportation expenses. An allocable portion of tax preparation fees paid is also deductible.

Equitable Ownership - a taxpayer may deduct, as home mortgage interest, interest he paid on a mortgage on real estate of which he is the legal or equitable owner, even though he is not directly liable on the debt secured by the mortgage. (Reg. § 1.163-1(b)) See chapter 7.05 for additional details.

Mortgage Interest – Mortgage interest paid on rental property is deductible. However, if the loan on a rental property is refinanced for more than the outstanding balance, the portion of the interest allocable to loan proceeds that are not related to rental use are not deductible as a rental expense. And when a personal residence is converted to rental property, the interest on the converted home's acquisition debt continues to be deductible as a rental expense but the interest on any equity debt is not deductible.

Business Interest Limitation – The TCJA added a provision that limits the deduction for business interest to 30% of the taxpayer's "adjusted taxable income," effective in 2018, with an exception for "small businesses" with average gross receipts of $25 million or less. Mortgage interest may be subject to this limitation if the rental activity is determined to be a "trade or business." See chapter 3.25 for additional details.

Deduction vs. Capitalization - Whether an expense is a capital improvement, or a repair has long been an arguable issue between the IRS and taxpayers. The IRS issued temporary regulations, that were to be effective January 1, 2012, but delayed to January 1, 2014, providing guidance with respect to whether costs to acquire, produce or improve tangible property should be currently deductible as repairs (or as materials or supplies) or capitalized. IRS finalized these regulations in 2013. Under these regulations, a qualifying taxpayer may, on an annual basis, elect a safe harbor provision to currently deduct improvements made to an eligible building property that would otherwise have to be capitalized. For details see Chapter 3.27.

Acquisition Costs - While quite complex, the final regs comprehensively restate many long-established concepts about which costs must be capitalized in connection with the acquisition or production of real or personal property. Generally, a taxpayer must capitalize amounts paid to acquire or produce a unit of real or personal property, including leasehold improvement property, land and land improvements, buildings, machinery and equipment, and furniture and fixtures. Amounts paid to acquire or produce a unit of real or personal property include the invoice price and transaction costs (discussed below). Costs for work performed before the date that the unit of property is placed in service by the taxpayer must be capitalized. (*Reg. § 1.263(a)-2(d)(1)*)

Amounts paid to facilitate the acquisition (or production) of real or personal property—i.e., paid in the process of investigating or otherwise pursuing the acquisition—must be capitalized and included in the basis of property acquired or produced. (*Reg. § 1.263(a)-2(f)(3)(i)*) Whether an amount is paid in the process of investigating or otherwise pursuing an acquisition is based on all of the facts and circumstances. The fact that the amount would (or would not) have been paid "but for" the acquisition is relevant but not determinative. (*Reg. § 1.263(a)-2(f)(2)(i)*) An amount is paid in the process of investigating or otherwise pursuing the acquisition of real or personal property if the amount is inherently facilitative. The amounts paid for the following are considered **inherently facilitative**:

1. Transporting the property (i.e., shipping fees and moving costs);
2. Appraisal or other fees for determining the value or price of property;
3. Negotiating terms of the acquisition and obtaining tax advice on the acquisition;
4. Application fees, bidding costs, or similar expenses;
5. Preparing and reviewing acquisition documents such as the bid, offer, sales contract or purchase agreement;
6. Examining and evaluation the title of the property;
7. Obtaining regulatory approval or securing permits, including application fees, related to the acquisition;
8. Conveying property between the parties, including sales and transfer taxes and title registration costs;
9. Finders' fees and brokers' commissions, including contingency fees;
10. Architectural, geological, survey, engineering, environmental, or inspection services pertaining to particular properties; or
11. Services of a qualified intermediary or other facilitator of a Sec 1031 exchange.

Costs relating to the process of determining whether to acquire real property and which real property to acquire generally aren't facilitative expenses (and therefore may be currently deductible), unless they are "inherently facilitative" expenses (e.g., the cost of an engineering study or a broker's fee). (*Reg. § 1.263(a)-2(f)(ii) and (iii)*)

The final regulations clarify the meaning of finders' fees and brokers' commissions and provide a definition of contingency fees. The final regulations provide that for purposes of §1.263(a)-2, a contingency fee is an amount paid that is contingent on the successful closing of the acquisition of real or personal property. The final regulations also clarify that contingency fees facilitate the acquisition of the property ultimately acquired and are not allocable to real or personal property not acquired. Therefore, if a real estate broker's commission is contingent on the successful closing of the acquisition of real property, the amount paid as the broker's commission inherently facilitates the acquisition of the property acquired and, therefore, must be capitalized as part of the basis of such property. However, no portion of the broker's contingency fee is allocable to real property that the taxpayer did not acquire. In addition, the final regulations retain the rule that inherently facilitative amounts allocable to real or personal property are capital expenditures related to such property, even if such property is not eventually acquired or produced.

1099 REPORTING REQUIREMENTS

Two questions to be answered on Schedule E, Part I (rental real estate and royalties section) are: "(A) Did you make any payments in [tax year] that would require you to file Form(s) 1099? and (B) If "Yes," did you or will you file all required Forms 1099?" Does this mean that landlords are responsible for issuing Forms 1099-MISC to their non-employee service providers such as gardeners, plumbers, and other maintenance workers? The instructions to Form 1099-MISC emphatically says to report on Form 1099-MISC only when payments are made in the course of a trade or business, and that "you are engaged in a trade or business if you operate for gain or profit." So, the issue boils down to the question of whether a rental real estate activity is a trade or business.

Unfortunately, there is no bright line definition of a trade or business in the over 70,000 pages of the tax code. There are only case histories and administrative rulings to go on. The determination can be subjective, and the regulations generally leave the determination to the taxpayer (or his preparer) to get it right. Many in the tax profession take the position that renting out even a single property can be a trade or business (*Hazard v. Commissioner*, Dec. 15,273, 7 TC 372, acq., 1946-2 CB3), and surely it is a trade or business if several properties are offered for rental and the property owner's property management activities are considerable, continuous and regular. And, therefore, if the activity is a rental trade or business, it will be subject to the 1099 reporting rules.

However, the 2012 instructions to Form 1099-MISC say the following (this language is absent in the 2013 and later years' instructions):

> Repeal of reporting requirements for certain rental property expenses. The requirement described in the 2011 instructions for persons receiving rental income from real estate to report payments for certain rental property expenses on Form 1099-MISC was repealed by Congress. You do not have to report those payments on Form 1099-MISC.

Given the language of the 2012 instructions, the likelihood that the IRS would assess a landlord a penalty for failing to file a 1099-MISC now seems slim. However, it may be best practice to advise rental owners who are operating a rental trade or business to issue 1099s.

Another consideration is the Sec 199A deduction created by the TCJA that applies to a trade or business, including most rentals. Included in the final 199A regulations is the following under "(e) Taxpayer Consistency" (prologue to final regs page 21) which includes the following caution for taxpayers treating rentals as a trade or business: "taxpayers should consider the appropriateness of treating a rental activity as a trade or business for purposes of section 199A where the taxpayer does not comply with the information return filing requirements under section 6041". In other words, it is not "consistent" for a taxpayer to claim the rental activity is a trade or business for section 199A and not for section 6041 Form 1099 reporting. See chapter 3.24 for more information about the Sec 199A deduction.

PORTFOLIO INCOME

Portfolio income includes interest, dividends, annuities, or royalties not from trade or business. It also results from the disposition gain/loss from investment property never used in a passive activity, or from property that normally yields interest, dividend, annuity, or royalty income.

GIFT/INHERITANCE AND SUSPENDED LOSSES

Passive activities disposed of by gift or inheritance have special rules to deal with suspended losses:

Inheritance **-** Suspended losses may be deducted on the final return of the decedent (as a miscellaneous itemized deduction not subject to a 2% floor) to the extent they exceed any step-up in basis at death *(IRC §469(g)(2))*.

Inherited Property Basis Adjustment
Don't overlook the requirement to adjust the basis of inherited property and start the depreciation anew on the inherited portion. Currently, use FMV at date of death, or alternate valuation date if so used in Form 706, Estate Tax Return (step-up or step-down)

Gift of Passives **-** Suspended losses are used to adjust basis of gifted property upward just before the transfer *(IRC §469(j)(6))*. Two bases are possible: When the losses are added to the donor's basis, there may be a basis that exceeds FMV. In this case, there are two bases. The basis as calculated is used to measure a gain, but FMV at the date of the gift is always used as the basis for loss (*Reg. 1.1015-1(a)(2)*). See the following example.

***Example** - **Gift/Inheritance of Passives –** Taxpayer owns a rental property with a basis of $120,000 and FMV of $150,000. There is $40,000 of previously suspended losses in connection with the property.*

*If taxpayer dies, the beneficiary receives the property with basis of $150,000 (FMV). This represents a step-up of $30,000. $30,000 of the suspended losses is deemed used to produce the step-up, and the remaining $10,000 suspended loss is deductible in full on decedent's final return as a Tier 1 miscellaneous itemized deduction. If the losses had not raised the basis above FMV, there would be no deduction available to the decedent. (**CAUTION:** The example may not apply to inheritances from someone who died in 2010.)*

If the taxpayer gifted the property while alive, the basis of the gift is normally $120,000. But here, the $40,000 of suspended losses is added to bring the basis to $160,000. No deductions are allowed to the donor.

***NOTE:** In this case, the new basis of $160,000 is greater than the FMV of the property, so this is a "dual basis" property. To realize a gain, the property must sell for more than $160,000. To realize a loss, the property must sell for less than $150,000. A sale for a price BETWEEN $150,000 and $160,000 results in neither gain nor loss.*

OTHER ITEMS

Passive credits **-** Convert credits into a "deduction equivalent," then this figure is subject to the same general rule as the losses themselves.

Casualties and passives **-** A casualty loss to a passive activity will be "recharacterized" as non-passive, and thus, it is fully deductible.

Mold Removal **-** IRS has privately ruled that the business cost a taxpayer incurred on a project to remove mold from a building it owned and leased out was deductible as an ordinary and necessary expense under Code Sec. 162. (*PLR 200607003*) Note: Presumably the mold removal would have had to be capitalized if it was done as part of an overall rehabilitation or renovation plan.

Generally, repairs are deductible as an ordinary and necessary trade or business expense under Code Sec. 162 if they merely keep the property in an ordinary, efficient operating condition. But expenses must be capitalized if they're needed to place the property in an ordinarily efficient operating condition (as in the case of expenses to remedy a condition that existed when the property was acquired), or if they add to the property's value, substantially prolong its useful life, or adapt it to a new or different use. See also Chapter 3.27.

Local Transportation - A taxpayer who owns rental property may be able to deduct ordinary and necessary local transportation expenses if the expenses are incurred to collect rental income or to manage, conserve, or maintain the rental property. However, transportation expenses incurred to travel between the property owner's home and a rental property generally constitute nondeductible commuting costs unless the landlord's home is used as his or her principal place of business. (Pub 17, 2018, page 67) For eligible expenses either the standard mileage rate or the actual expenses method can be used.

Converting a Home to a Rental **-** It is not uncommon to have a client convert a personal residence to a rental property. Some even think if they convert to rental use a home that has declined in value, they can then deduct a loss when they sell the property, which is not the case.

When a residence or other nonbusiness property is converted from personal use to business or income-producing use, for purposes of calculating losses or depreciation (but not gain), the basis for the property on the date of its conversion is the lower of its adjusted basis or fair market value on that date (*Regulation Sec 1.167(g)-1*).

However, for purposes of computing gain, the basis continues to be the adjusted basis at the time of the conversion (*Reg § 1.165-7(a)(5); Reg § 1.165-9(b); Reg § 1.167(g)-1*). Thus for property converted from personal use to business use the conversion has created a **dual basis** for the property:

- For computing a **loss:** if the sale results in a loss, the basis is the lower of the FMV or the adjusted basis at the time of conversion.
- For computing a **gain**: if the sale results in a gain, the basis is the adjusted basis at the time of conversion.

A sale of converted property where the sales price is more than the basis for loss but less than the basis for gain results in no gain or loss.

When converting personal use property to business use, the FMV of the property can be a very important factor. If challenged, the IRS will want to know how the FMV was determined and will require more than a guess. They often require a certified appraisal. Taking short cuts can lead to problems in the future.

Sale of Converted Residence – What is the treatment when a residence is converted to a rental and then sold at a loss? When property that was purchased for and used for residential purposes is converted to rental or business use, it loses its character as a residence and becomes business property. When a personal residence is converted to a rental, the property's basis at the time of conversion for computing loss or depreciation is the lesser of the property's adjusted basis or its fair market value. As a result, a taxpayer cannot rent out what was his personal residence for a time before selling it and expect to claim a loss that would otherwise not have been deductible if he'd continued to use the home as his personal residence. To deduct a loss on the sale of a residence, a taxpayer must actually rent the property at a fair rental price before it is sold. (*Newcombe v. Commissioner, Dec. 30,178, 54 TC 1298*)

> ***Example*** *– Lisa purchased a residence for $140,000, lived in it for a few years and then converted it to a rental. At that time the FMV was $115,000. If she had sold it instead of turning it into a rental, the loss would not have been deductible. After conversion, Lisa claimed $7,800 of deprecation during the time it was used as a rental. She sold it after a few years for $95,000. Her depreciable basis at the time of the sale was $107,200 ($115,000 – 7,800). Her loss is not $45,000 ($140,000 - 95,000), but $12,200 ($107,200 – 95,000). Effectively the loss sustained while Lisa used the property as her personal residence is excluded. Further, because the loss is limited by the FMV at the time of the conversion, if Lisa fails to prove the value at that date, any loss deduction is barred.*

*Easement*s – Easements can be permanent or for a period of time. Where they are for a specific period of time, the payments for easements are generally rental income (Wineberg, William, (1961) TC Memo 1961-336), but see GCM 35492 (9/73) for a different outcome). For the tax treatment of permanent easements see chapter 11.07.

CALIFORNIA DIFFERENCES

Generally, California law is the same as federal law concerning PAL limitations. However, for California purposes, all rental activities are passive activities, and California does not conform to federal treatment of Real Estate Professionals' passive losses (*IRC Sec 469(c)(7)*). Therefore, for purposes of California personal income tax, taxpayers should group rental activities without regard to IRC section 469(c)(7). (Real Estate Professionals are covered in chapter 3.26).

California has not conformed to the Sec 199A deduction with respect to rentals or other trade or business activities.

Withholding on Rents Paid to Nonresidents **–** 7% withholding is required from rents paid to nonresidents on real or personal property located in California if the rent is paid in the course of the withholding agent's business (e.g., a property management company). Withholding is not required if the withholding agent's total payments to the payee are $1,500 or less for the calendar year. The FTB issues a determination letter for each waiver request. A withholding agent must have received the determination letter authorizing a waiver of withholding before eliminating withholding on payments made to nonresidents. The withholding agent retains the determination letter and waiver for a minimum of four years and must furnish the form to the FTB upon request. Use FTB Form 588 to request a waiver of withholding and for additional details related to this requirement. Note: No withholding is required to be made by tenants of residential property who make their payments directly to nonresident owners.

Withholding for Real Estate Sales - Withholding on real estate sales includes all individuals, both resident and nonresident. In addition, the FTB will not grant individuals a waiver or reduced rate of withholding for sales with small taxable gains. There are some exceptions in the law. Withholding is not required if:

- The total sales price is $100,000 or less,
- The property sold was a principal residence (including a decedent's residence if being sold by the decedent's estate),
- Sale results in a taxable loss,
- The sale is a tax-free exchange, or
- For some involuntary conversions.

Also exempted are sales where the seller is a tax-exempt entity, a California corporation with a permanent place of business in California, or partnership or LLC (but an LLC treated as a disregarded entity is subject to withholding).

Withholding on Foreclosures and Short Sales – If the total sales price is over $100,000, withholding for real estate foreclosures and short sale transactions is required unless:

- Any of the exemptions certified on Form 593-C apply, or
- The seller is a bank acting as a trustee (other than a trustee of a deed of trust), or
- The buyer is acquiring the property as part of a foreclosure under one of the following conditions:
    - A power of sale required under a mortgage or deed of trust.
    - A decree requiring foreclosure.
    - A deed in lieu of foreclosure.

For additional information see FTB Pub. 1016, Real Estate Withholding Guidelines.

CAUTION

State income tax withholding is not deductible for Federal AMT purposes and therefore can create a Federal AMT and unexpected tax results. Practitioners are cautioned to consider the Federal AMT implications associated with a sale for which CA withholds state income tax which in some cases can be substantially excessive. However, with the $10,000 limitation on the deduction of state and local taxes imposed by the TCJA for years 2018 through 2025, fewer individuals will be subject to the AMT because of their deduction for real property tax (and other reasons). But this doesn't mean that the CA withholding on real estate sales will be any less for these individuals, just that they may more likely be subject to the SALT limitation on their federal returns.

Sellers of California real property will be given the option to select a withholding rate of **3.33% of the sales price** or, one of the following applicable rates multiplied by the **reportable gain from the sale**:

- 8.84% (Corporate franchise rate)
- 10.84% (Bank and financial corporation tax rate)
- 15.8% (Financial S Corporation)
- 13.8% (S Corporation)
- 12.3% (Individuals and non-California partnerships)

Seller Certification - A seller making the election must certify the withholding amount in writing, under penalty of perjury, to the buyer or the real estate escrow person. The seller also must submit a copy of the written certificate and supporting documentation for the withholding amount to the California Franchise Tax Board (FTB) upon request. The written certification must be in a form prescribed by the FTB, currently Form 593-C. The FTB makes the form available on its Web site and provides electronic means for a seller to estimate the amount of gain required to be recognized on a transaction (Form 593-E, Real Estate Withholding – Computation of Estimated Gain or Loss).

Installment Sales – For dispositions subject to real estate withholding, buyers are required to withhold on the principal portion of **each installment payment** if the sale of California real property is structured as an installment sale.

*Withholding responsibility***:**

- **Real estate escrow person** - is responsible to compute the first installment payment, withhold the required amount in escrow, and remit to the FTB within 20 days along with Forms 593, 593-V, 593-I and a copy of the promissory note. Retain copies for 5 years.
- **Buyer** – For all subsequent payments, the buyer is required to withhold the required amount from the installment payment due the seller, and remit it to the FTB within 20 days accompanied by Forms 593 and 593-V.

The withholding amount:

- 3 1/3% of each principal payment (initial payment in escrow and each subsequent payment), OR by election,
- The seller's tax rate (12.3% for an individual regardless of what the individual's actual CA tax rate is) times the product of multiplying the principal payment (initial payment in escrow and each subsequent payment) by the gross profit percentage (called the "installment withholding percent" on the worksheet to Form FTB 593).

Buyer's Certification – The buyer is required to complete and sign Form FTB 593-I, acknowledging the installment sale withholding rules and agreeing to transmit to the FTB (with a copy to the seller) a completed Form 593 and the required amount of withholding by the 20th day of the month following the month of each installment payment. The escrow person is required to attach a copy of the signed promissory note and the seller's certification form (Form 593-C) to Form 593-I and submit them to the FTB along with the required withholding on the first installment payment. The buyer must advise the FTB if there are changes to the terms of the sale, promissory note or payment schedule. The buyer is subject to penalties for failing to withhold or submit the withholding timely to FTB or if a copy of the Form 593 is not timely provided to the seller. These penalties are:

- Buyer (after notification) does not withhold – penalty is the greater of $500 or 10% of the required withholding.
- Form 593 filed late – within 30 days of due date, penalty is $15 per Form 593; filed more than 30 days late, penalty is $50 per Form 593; if failure is due to an intentional disregard of the requirement, penalty is the greater of $100 or 10% of the required withholding.

These mandatory withholding rules don't apply for installment sale payments for sales agreements made prior to 2009.

Withholding When a Trust is the Seller – Oftentimes there is confusion as to what name and ID number should be used on Form 593 when real estate subject to withholding is sold by a trust. The FTB says that if the seller is a grantor trust, Form 593 should be completed using the grantor's individual name and taxpayer identification number. The name of the grantor trust should not be entered on Form 593 since the grantor trust is disregarded for tax purposes and the individual seller must report the sale and claim the withholding on their individual tax return. On the other hand, if the seller is a non-grantor trust, Form 593 should be completed using the name of the trust and the trust's FEIN. Trustee information should not be entered on the Form 593, because the withholding credit belongs to the trust.

NOTES

ELECTION TO GROUP ACTIVITIES PURSUANT TO REG. 1.469-4(c)
STATEMENT IN ACCORDANCE WITH REV PROC 2010-13

Taxpayer's name:____ Tax Year Ending:____________

Taxpayer ID Number:___________________________

The taxpayer hereby reports the following activity in accordance with Rev. Proc 2010-13:

NEW GROUPINGS: The following activities have been grouped as a single activity for the first time during the current tax year:

Name of Activity	Address	ID Number (If Applicable)	Type (Business or Rental)

ADDITION OF ACTIVITIES TO AN EXISTING GROUP: The following activities have been added to a previously existing group during the current tax year:

Name of Activity Existing Activities:	Address	ID Number (If Applicable)	Type (Business or Rental)
Activities Added:			

REGROUPING ACTIVITIES: The following activities have been regrouped due to error in original grouping or a change in circumstances during the current tax year:

Revised Grouping: Name of Activity	Address	ID Number (If Applicable)	Type (Business or Rental)

Reasons for regrouping:____

____

____

I, the above referenced taxpayer, hereby declare that any and all groupings created above constitute an appropriate economic unit for the measurement of gain or loss for purposes of IRC Sec. 469.

VACATION HOME RENTALS

Overview

- **Rented Fewer than 15 days**
  - Exclude rental income
  - Don't deduct expenses
  - Interest & taxes to Schedule A
- **Rented 15 days or more**
  - **Personal Use 10% or less of the rental days**
    - Allocate expenses between personal and rental
    - Loss is allowed (but loss amount cannot include depreciation)
  - **Personal Use greater than 10% of rental days**
    - Allocate expenses between personal and rental
    - Deduct allocated interest and taxes first
    - Deduct other expenses except depreciation
    - Then deduct depreciation
    - No loss allowed!
- **Room Rental** – Follows vacation home rental rules
- **Personal Use Days** – Do not include "fix-up" days
- **Not a passive activity** – If subject to §280A rules, not subject to §469 rules

RAPID FINDER

Pubs Forms

Related IRC and IRS Publications and Forms

- **Pub 925** – Passive Activity and At-Risk Rules
- **Form 8582 -** Passive Activity Loss Limitations
- **Schedule E (Form 1040)** – Supplemental Income and Loss
- **IRC Sec 280A**

CAUTION: Special Rules Apply to Short-term Rentals

When a taxpayer rents property for a short period, special (and sometimes complex) taxation rules come into play, which may force the rental income and expenses to be reported on Schedule C (as opposed to Schedule E). Short-term rental situations also occur where taxpayers will rent their first or second homes using rental agents or online rental services, such as Airbnb, VRBO and HomeAway that match property owners with prospective renters. Short-term rentals are covered in the Rental Activities chapter on page 3.17.04.

CAUTION: Renting To Relative

The days when rented to a relative at less than fair market rent are treated as personal use days and result in some very unfavorable tax treatment. See Rental Activities chapter on page 3.17.05.

The Details

VACATION HOME RENTALS

Section **280A** limits property expense deductions for taxpayers who rent out their home part of the year and also use the same property for their own use. The rules apply to ***"dwelling units"*** including homes, apartments, condos, mobile homes, boats, motor homes, etc. For the same year that the rental of a dwelling unit is subject to the limits imposed by Sec. 280A, it is not subject to the Sec 469 loss limitation rules.

DEFINITION OF A "DWELLING UNIT"

For purposes of the vacation home rules, a dwelling unit is property that provides basic living accommodations, including sleeping space, toilet, and cooking facilities. A single structure may contain more than one dwelling unit.

If a taxpayer rents rooms or other space in a home and the rented portion does not have facilities that would make it a dwelling unit on its own, the taxpayer and the renter may be considered to be occupying one dwelling unit, and loss on the rental may be disallowed under §280A. This does not apply to hotel or motel units, etc., regularly available for occupancy by paying customers, but may apply to a portion of a home used to furnish lodging to tourists or to long-term boarders, such as students. See more about "Room Rental" on page 3.18.04.

WHERE REPORTED

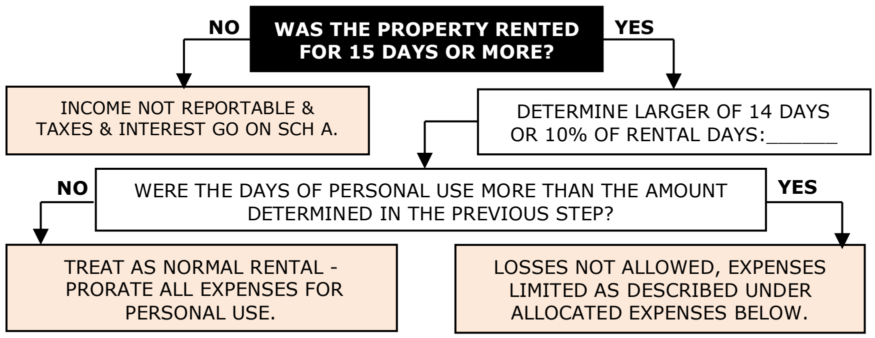
Report income and deductible expenses on Schedule E. Deduct interest, taxes, and personal casualty loss (only disaster losses in federally declared disaster areas for years 2018-2025) expenses attributable to personal use of the property on Schedule A. Worksheet 5-1, Worksheet for Figuring Rental Deductions for a Dwelling Unit Used as a Home, in IRS Pub 527 can be used to determine the allowable expenses and any carryovers of expenses.

APPLYING THE LIMITATIONS

If the "dwelling unit" is rented for fewer than 15 days - exclude the rental income. Claim no deductions (except qualified mortgage interest and taxes).

Strategies

Strategy – Rent 14 days or less – The rule excluding rental income where the home is rented for fewer than 15 days offers some opportunities for substantial tax free income, especially for more expensive homes. Here are some examples:



- **Rental as a film location –** typically film production companies will pay substantial amounts (thousands per day) for the short-term use of properties as a movie set. Individuals with unique properties can register with a local film location company.
- **Home in vacation locale –** individuals with homes in popular tourist or vacation locales can rent their home out while they are on vacation themselves.
- **Home in the area of a special event** – when a one-time or special event such as a major sports event (think the Super Bowl) or convention comes to town, hotel rooms may be scarce or even fill up. Homeowners in these locations may want to rent their homes short-term during the activity while getting out of town to avoid the crowds.

Definition of a day: This is generally "the 24-hour period" for which a day's rental would be paid. Thus, a person using a dwelling unit from Saturday afternoon through the following Saturday morning would generally be treated as having used the unit for seven days, even though the person was on the premises on eight calendar days.

If the unit is rented 15 days or more AND the taxpayer's personal use is for fewer than 15 days or 10% or less of the rental days - allocate expenses according to personal vs. rental days. No further limitation is necessary (except the usual "not-for-profit" rules must be considered). A loss can be claimed.

If taxpayer use is 15 days or more and over 10% of the rental days - first allocate expenses by personal vs. rental days, as in the previous paragraph. Deduct allocable taxes and interest first, then maintenance and other operating expenses, then depreciation until the net is ZERO. A loss cannot be claimed.

CARRYOVER

Any amount of rental expenses not allowable as a deduction because of the income limitations may be carried over to the next tax year, subject to the income limitations of the later year.

PERSONAL-USE DAYS

Include days used by an owner, co-owner or family member of the owner/co-owner or under a reciprocal arrangement as personal-use days. DO NOT include:

- "Fix-up" days (repairing and maintaining but not making improvements);
- Use by a co-owner in a "SHARED-EQUITY FINANCING" arrangement where the taxpayer and occupant both have an ownership interest in the property. The owner-occupant must use the property as a principal residence and PAY FAIR RENTAL VALUE, considering ownership interest. This is a common arrangement where parents wish to help their children buy a home; or
- The use of the property by a FAMILY MEMBER, if the property is the family member's principal residence and the family member pays fair rental value.

> ***Example 1:*** *Lotta Friends and her neighbor, Troodie, co-own a condo at the beach. They rent the unit to vacationers whenever possible. Neither Lotta nor Troodie uses the condo as a principal home; however, Troodie always spends two weeks at the condo during August. Troodie's use is considered personal use by both owners.*

Example 2: *Assume that Lotta and Troodie own the condo under a shared equity agreement. Troodie lives in the condo as her main home and pays fair rental to Lotta for her portion. Under this arrangement, personal use by Troodie is not attributed to Lotta as well. Lotta claims the rental income and expenses on Schedule E in the usual manner. Passive rules apply.*

Example 3: *Assume that Lotta owns the condo separately and rents it to Troodie. Troodie owns a home in the mountains, which she rents to Lotta. On the days Lotta rents the condo to Troodie, she is considered to be using it personally.* ***Reason:*** *She has a reciprocal arrangement with Troodie to rent the mountain cabin.*

ALLOCATING EXPENSES

For repairs, utilities, etc., the business percentage is rental days divided by total days used (i.e., personal plus rental). In ***Bolton v. Comm., 1982, CA9, 694 F2d 556,*** the Tax Court found that, for computing taxes and interest, the business percentage used is business days divided by 365. The portion of interest and taxes above the percentage are deducted as itemized deductions. This method "frees up" greater deductions for cash expenses or depreciation. The IRS, however, says these expenses should be allocated by using the same type of allocation percentage that's used for repairs, etc. (i.e., rental days/total days used).

Exception for principal residence: Personal vs. rental expenses must still be allocated. The overall limit (i.e., "no loss") does not apply if the rental period is at least 12 months, OR the rental period ends in the sale of the residence.

Example - IRS Method of Allocating Vacation Rental Expenses – *Jamie is single and owns a vacation home which she used personally during the month of July. She also rented the house during all of June and August. Rental income was $2,500. Her total expenses for the year were: interest, $1,300; taxes, $700; repairs, $800; utilities, $400; depreciation, $1,300. Because Jamie used the home personally for 31 days out of a total 93 days of use, she is subject to the limitations of §280A, meaning she cannot deduct a loss. Her rental schedule is figured as follows:*

Gross income	*$2,500*	
Taxes and interest (2/3 x $2,000)	*< 1,333>*	
Limit on other deductions		***1,167***
Repairs and utilities (2/3 x $1,200)	*< 800>*	
Subtotal		***367***
Depreciation (2/3 x $1,300)		
Subject to limit	*867*	
Deductible depreciation	*367*	
Carryover ($867 - $367)	*500*	

Example -Tax Court Method of Allocating Vacation Rental Expenses (Bolton) - *Assume the same facts as in the previous example. The Tax Court would figure Jamie's rental schedule like this:*

Gross income	*$2,500*	
Taxes and interest (61/365 x $2,000)	*< 334>*	
Limit on other deductions		***2,166***
Repairs and utilities (2/3 x $1,200)	*< 800>*	
Subtotal		***1,366***
Depreciation (2/3 x $1,300)		
Subject to limit	*867*	
Deductible depreciation	*867*	
Carryover	*0*	

The excess interest and taxes in both the above examples are deductible on Schedule A if Jamie itemizes her deductions.

Rental Days: Rental days are the days actually rented at fair rental value. They do not include days the property is just available for rent or the days it is rented under a reciprocal arrangement.

Fair rental by co-owners: According to ***Prop Regs Sec 1.280A-1(g),*** fair rental by co-owners is "an amount that is equal to the fair rental of the entire unit multiplied by that co-owner's fractional interest in the unit." But elsewhere in the Prop Regs, it is noted that "the totality of rights and obligations of all parties under the agreement is taken into account in determining fair rental." ***(Prop Regs Sec 1.280A-1(e)(3))***

Example - Determining Business vs. Personal Use - *Ted and Tabitha are owners of a fully-equipped recreational vehicle. During the month of July, the vehicle is used by three individuals; all of the usage listed below is deemed personal use by the owners.*

- *Ted used the vehicle on a seven-day trip;*
- *Terri, Tabitha's daughter, rented the vehicle at fair rental for ten days;*
- *Troy rented the vehicle at fair rental for 12 days under an arrangement whereby Tabitha gets to use for nine days, an apartment owned by Troy's friend, Tim.*

Example - Treatment of Maintenance Time - *Lionel owns a lake cottage which he rents during the summer. Lionel and his wife, Leanne, arrived late Thursday evening to prepare the cottage for the rental season. The couple made dinner, but did no work on the unit that evening. Lionel spent normal work days repairing the unit on Friday and Saturday. Leanne helped for a few hours each day, but spent most of the time relaxing. By Saturday evening, the necessary maintenance work was complete. Neither Lionel nor Leanne worked on the unit on Sunday; they departed shortly before noon. The principal purpose of the time spent at the unit from Thursday evening through Sunday morning was to perform maintenance work on the unit. Consequently, the use during this period was not considered personal use.*

ROOM RENTAL

Expenses allocable to a portion of a dwelling unit rented out are deductible under the vacation home rules. The amount of the deductible rental expenses would be the expenses attributable to that portion of the unit. And the days to be taken into account under that limitation rule would be the days on which the portion of the unit is rented at fair rental during the tax year and the days on which the portion of the unit is used for any purpose during the tax year.

Any reasonable method for dividing the expenses may be used. The two most common methods for allocating expenses, such as mortgage interest and heat for the entire house, are based on the number of rooms in the house and square footage of the home.

Example - *Taxpayer's home has 1,800 square feet. He rents out one room that is 180 square feet for the entire tax year. Taxpayer can deduct as a rental expense 10% of any expense that must be divided between rental use and personal use. Thus, if taxpayer's heating bill for the year for the entire house was $600, $60 ($600×10%) is a rental expense and the $540 balance is a nondeductible personal expense. If the home consisted of eight rooms, the taxpayer could presumably deduct 12.5% (one-eighth) of the expenses as rental expenses rather than the 10% that is based on square footage. The expenses that belong only to the rental part of the property, for example painting the room, don't have to be divided.*

If a taxpayer rents rooms or other space in a home and the rented portion does not have facilities (bathroom and kitchen) that would make it a dwelling unit on its own, the taxpayer and the renter may be considered to be occupying one dwelling unit, and any loss on the rental may be disallowed under §280A.

Where a loss is not allowed, the deductions are claimed in the following order. If the result is a loss, the expenses are only allowed until the income is reduced to zero.

1. Mortgage interest and taxes.
2. Operating expenses (examples: repairs, utilities, maintenance, insurance)
3. Depreciation.

Bottom Line: Under these rules if a taxpayer were to rent a bedroom in their home, the income would be reported on Schedule E and the result cannot be a loss. However, the deductions that are not allowable because of the rental income limitation may be carried over to the next tax year and used to offset that year's rental income, subject to the same limitations.

CALIFORNIA DIFFERENCES

California conforms to the Federal treatment.

INSTALLMENT SALES

Overview

- The installment method applies **automatically**
  - Taxpayer must elect out
  - **Election out is irrevocable** without IRS consent
- Depreciation & Sec 179
  - Is ordinary income that recaptures in year of sale
  - Regardless of principal received.
  - Recaptured amounts added to basis to reduce the gross profit %
- **Mortgage assumed** = a mortgage that exists both before and after the sale.
- **Contract Price** = Selling Price less mortgage(s) assumed by the buyer

- **IRC Sec 453**

The Details

Installment sales are those in which part or the entire selling price is paid to the seller after the year of the sale. The installment method may be used to report gains, but not losses. Generally, gains are reported as the payments are received. Part of each principal payment is return of the seller's capital and part is profit. The seller pays tax only on the profit portion. However, recognition of gain may be accelerated by the recapture of "excess" depreciation. In addition, installment sale contracts generally require that interest be paid by the buyer to the seller on the deferred payments. This interest is reported on the seller's Schedule B (1040) as payments are received. If the sale contract does not provide for adequate stated interest, part of the stated principal amount of the contract may be restated as interest. See IRS Pub 537 for additional information on unstated interest.

The installment method applies automatically, unless the taxpayer elects out of it by the (extended) due date of the return for the year of sale. The election is made by reporting the whole gain on the sale and, if applicable, showing the amount of a note reported at less than face value on Form 8949 or Form 4797. (Form 6252 is not used if electing out of the installment method.) ***The election out is irrevocable without showing "good cause" and getting IRS consent.***

Rev Rul 90-46 1990-1 CB 107 provides guidelines which taxpayers can use to justify a late election out of the installment method. Error on the part of a third party might be enough to show "good cause." For example, an accountant's mistake in failing to make the election may be good cause. The following, however, do not show good cause: (1) making the late election to simplify the taxpayer's recordkeeping and reporting requirements; (2) changes in the tax law or taxpayer's circumstances after the election due date.

Revocation Allowed - In a private letter ruling, taxpayers were allowed to revoke their election out of using the installment method, where their accountant had erroneously computed that the installment method would not be beneficial to them. The taxpayers were unaware of the accountant's actions, and the accountant only realized the error when he prepared their second-year return. (PLR 201503005)

Revolving credit plans, publicly-traded property & dealer dispositions - Revolving credit plan sales and sales of certain publicly-traded property (e.g., stock) cannot be reported on the installment basis. Also excluded from installment reporting are dealer dispositions of real or personal property. However, dispositions of property used in the business of farming and dispositions of residential lots or timeshares where the taxpayer elects to pay interest on the deferred tax arising from the use of the installment method are allowed.

Computation of the taxable amount: Form 6252 is used to compute the total gain and the gross profit percentage. Most of the information needed for computing the gain can be found on the closing statement. The taxable amount of the installment sale for the year transfers from Form 6252 to Schedule D – not Form 8949 – (for personal-use capital assets) or Form 4797 (for property used in a trade or business or that earns rent or royalty income).

Definitions:

- **Mortgage assumed or "taken subject to"** is a mortgage that exists both before and after the sale. It does not include the buyer's new mortgage or a second given by the seller, nor does it include the seller's mortgage paid off in escrow.

- **Principal received in the year of sale**:
  1. The down payment equals the selling price less amounts remaining to be paid, such as the assumed mortgage or note carried by the seller. This figure may not appear on the closing statement, but may have to be "backed into";
  2. Principal part of later payments;
  3. Payments received before the year of sale, e.g., in an option arrangement;
  4. Selling expenses paid by the buyer that relate to the property that was sold. These expenses are included in the selling and contract prices when figuring the gross profit percentage.
- **Contract price** is the selling price less any mortgage assumed (but not any amount of mortgage in excess of basis). In effect, this is the amount that will be paid to the seller.
- **Gross profit percentage** is equal to the profit divided by the contract price. The percentage is used to determine the part of each principal payment that will be taxable.

INSTALLMENT SALE COMPUTATIONS

In each of the sales for the following examples, adequate stated interest was included in the contract and will be reported by the seller in addition to the reportable gain.

Example (1)* - *The Basic Computation - *Agreement of sale is for $20,000 down, plus a note to seller for $80,000 = $100,000 total selling price. Adjusted basis of property sold is $70,000.*

Selling price	*$100,000*
Basis	*<70,000>*
Gain	*30,000*

Contract price *equals the selling price, because no mortgage was assumed.*
Gross profit percentage *= $30,000/$100,000 = 30%.*
Taxable in the year of sale*, if $1,000 principal is received in addition to the $20,000 down payment = $6,300 ($21,000 x 30%).*
Taxable in subsequent years *- As the seller gradually receives the remaining $79,000 in principal ($80,000 - $1,000), 30% of each payment is taxable.*
The total gain reported *will be $30,000 ($6,300 in the year of sale plus $79,000 x 30%).*

Example (2)* - *Installment Sale with Mortgage Assumed - *Agreement is for $65,000 down, $85,000 note to seller, plus $50,000 mortgage assumed = $200,000. Adjusted basis of the property sold is $80,000.*

Selling price	*$200,000*
Basis	*<80,000>*
Gain	*120,000*

Contract price *is $150,000 ($200,000 selling price, less $50,000 mortgage assumed).*
Gross profit percentage *= $120,000/$150,000 = 80%.*
Taxable in the year of sale, *if seller receives a $65,000 down payment and an additional $2,000 in installment principal payments = $53,600 ($67,000 x .80).*
Proof: *The seller receives a total of $150,000 (the other $50,000 goes to the lender, because of the assumed mortgage); $150,000 x .80 = $120,000 (the gain).*

Example (3)* - *Installment Sale with Mortgage Assumed Greater Than Basis - *Terms: $25,000 down + seller's $50,000 mortgage assumed by the buyer; $45,000 note to the seller = $120,000. Adjusted basis of the property sold is $40,000, so the mortgage assumed exceeds basis by $10,000.*

Selling price	*$120,000*
Basis	*<40,000>*
Gain	*80,000*

The $10,000 excess of mortgage over basis is treated as a PAYMENT IN THE YEAR OF SALE*. (The reasoning is that the seller realized a profit when the loan was received and must recognize it now at the time of the sale.)* ***The excess of mortgage over basis*** *is ADDED TO THE CONTRACT PRICE.*

Contract price:	*Selling price*	*$120,000*
	Less mortgage assumed	*<50,000>*
	Plus excess mortgage over basis	*10,000*
	Contract price	*80,000*

Gross profit percentage *= 100%.* ***Rule of thumb:*** *Profit % is always 100% when a mortgage assumed (or subject to) is equal to or greater than basis.*
Taxable first year*: $25,000 down payment; $1,000 principal payments; $10,000 excess mortgage over basis = $36,000 x 100% = $36,000 taxable.*
Proof*:* The seller will receive a total of only $70,000 ($25,000 down, plus $45,000 note), which is 100% taxable; taxing excess mortgage of $10,000 in year of sale means that the total $80,000 gain will be reported.

EXAMPLE (4)** - **Installment Sale with Expense of Sale and Excess Mortgage
Agreement for $30,000 down + $104,500 mortgage assumed + $15,500 note to seller = $150,000.
Adjusted basis of property sold is $90,000.

Selling price	*$150,000*
Basis	*<90,000>*
Expense of sale	*<7,500>*
Gain	*52,500*

Expenses of sale increase basis and reduce gain, profit percentage, and excess mortgage. They do not decrease the selling price or principal received.

***Contract price**:*	*Selling price*	*$150,000*
	Mortgage assumed	*<104,500>*
	Excess mortgage over basis	*7,000 (basis = $97,500 for this)*
	Contract price	*52,500*

***Gross profit percentage**: 100% ($52,500 gain/$52,500 contract price = 100%).*
***First year:** $30,000 + $1,500 principal payment + $7,000 excess mortgage over basis = $38,500.*
***PROOF:** The seller will receive a total of $45,500, 100% taxable. Add $7,000 (excess mortgage over basis) in the year of sale = $52,500 gain.*

WRAPAROUND MORTGAGES

A Tax Court decision from the Ninth Circuit (Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, Oregon, Washington) held invalid the treatment of wraparound calculations as outlined in Reg. 15A.453-1(b). [Professional Equities, Inc., (1987) 89 TC No. 15.] The regs treat the wraparound mortgage as a mortgage assumed and require two calculations of profit percentage--one in the year of sale and another in later years. In Professional Equities, the Court allowed computation of the installment sale (which included wrapped mortgages) according to the old method followed in Stonecrest v. Comm. 24 TC 659. In the Stonecrest case, the wrapped mortgage was not considered a mortgage assumed or taken subject to by the buyer. Vincent E. Webb, TC Memo 1987-451 also followed these decisions. The IRS has acquiesced to the findings in the Professional Equities case.

DEPRECIATION/SECTION 179 RECAPTURE UNDER THE INSTALLMENT METHOD

ALL ORDINARY INCOME DUE TO RECAPTURE IS RECOGNIZED IN THE YEAR OF SALE, regardless of the amount of principal received. Basis of the property is then increased by the amount of ordinary income reported, and a new, lower profit percentage is computed for later years.

***EXAMPLE** - **Installment Sale with Depreciation Recapture -** Bob sold a rental property. The adjusted basis of the property was $35,000 (sales price was $50,000). Bob used the installment method of reporting; his profit percentage would be 30% were it not for the depreciation recapture.*

Sales price	*$50,000*
Adjusted basis	*<35,000>*
Gain	*15,000*

$2,000 of the profit is ordinary income, representing "excess" depreciation; $13,000 is Section 1231 capital gain.

***Year of sale:** Ordinary income required to be reported*	*$2,000*	
Balance of gain	*13,000*	
Contract price	*50,000*	
Profit percentage ($13,000/$50,000)	*26 %*	
Principal received	*2,500*	
Taxable portion (26% of $2,500)	*650*	
Total taxable in year of sale ($2,000 ordinary, plus $650 Section 1231)	2,650	
Gain yet to be reported ($15,000 - $2,650)	$12,350	**(A)**
Later years:		
Principal yet to be received	*$47,500*	
Profit percentage	*26 %*	
Profit yet to be reported	*$12,350*	***(B)***

Since (A) = (B), the computation proves accurate. All gain reported in future years will be ***§1231*** (potentially capital) gain.

SEC 179 EXPENSE ELECTION AND INSTALLMENT REPORTING

The Sec 179 amount that was deducted (but not more than the total gain on the sale) is ordinary income in the year of sale, regardless of the date of the sale and regardless of the amount of principal actually received in that year. Add Section 179 deduction back to the adjusted basis in figuring profit percentage (§453(i)).

DISPOSITIONS OF INSTALLMENT OBLIGATIONS

When an installment obligation is disposed of before all gain from the underlying installment sale has been recognized, the seller must usually recognize gain/loss because of the disposition. A disposition can result from any of the following transactions: a sale, exchange, debt cancellation, or bequest, among other possibilities. The character of the gain or loss from the disposition of the obligation is the same as the character of the gain on the original installment sale.

If an installment obligation is sold or exchanged, or if the holder of the obligation accepts less than face value for it, the gain or loss on the transaction is the difference between the basis of the obligation and the amount realized on the disposition. If the obligation is disposed of in any other kind of transaction, the gain or loss is the difference between the holder's basis in the obligation and the FMV of the obligation.

Example* - *Installment Obligation Sale - *Chris sold an investment lot on the installment method. Original sales information is as follows (the only payment received in sale year is the down payment):*

Selling price	*$250,000*
Adjusted basis	*<100,000>*
Gain on sale	*150,000*
Down payment	*50,000*
Note held by Chris	*200,000*
Profit percentage ($150,000/$250,000)	*60%*
Gain recognized in sale year	*30,000*

Unrecovered Cost: *Chris had received no principal payments on the note when he sold it the next year for $180,000. His unrecovered cost in the note is:*

Face value of note	*$200,000*
Gain, if note pd in full ($200,000 X 60%)	*<120,000>*
Unrecovered cost	*80,000*

Gain on sale of note:

Sales price of note	*180,000*
Unrecovered cost	*< 80,000>*
Gain recognized	*100,000*

PROOF: *Total gain recognized was $130,000 ($30,000 in year of sale and $100,000 at sale of the note). In effect, the sale of the note resulted in a reduced selling price of $230,000 for the property; the gain on the property is now $130,000 ($230,000 - $100,000). The gain on the sale of the note is a capital gain, because the gain on the original sale was capital.*

INSTALLMENT SALES OF MULTIPLE ASSETS IN ONE TRANSACTION

The sale of unrelated assets of the same type in a single sale contract is reported as one transaction under the installment method. If any of the assets are sold at a loss, however, those items cannot be reported under the installment method and therefore must be reported separately; the remaining assets are reported together. In order to figure the gain/loss on each asset, the seller must allocate payments received among the various classes of assets sold. The allocation is computed using the ratio of each asset's FMV to the total selling price less mortgage assumed.

If the assets are mortgaged and the mortgage is assumed or the asset taken subject to it by the buyer, use the FMV of each asset, net of mortgages assumed or taken subject to, in order to make the allocation.

Example* - *Multiple Asset Installment Sale - *Ray sold three unrelated investment lots (Lots 1, 2, and 3) for a combined selling price of $130,000. The closing statement did not individually list the amount of the selling price which was to be allocated to each lot. However, an appraisal determined that the FMV of Lots 1 and 2 was $60,000 each. The FMV of Lot 3 was $10,000. Ray's basis in each lot was $15,000; he had owned the lots for five years.*

Under the terms of the sale, the buyer paid $20,000 in cash, assumed Ray's mortgage of $30,000 on Lot 2, and gave Ray a note for the remainder ($80,000).

Since Ray's sale of Lot 3 results in a loss ($15,000 basis less $10,000 sales price), it cannot be reported on the installment method. Ray will report a long-term capital loss of $5,000 on Form 8949 of his tax return. Ray reports the sale of the other two parcels using the installment method. However, he must allocate the portion of the down payment attributable to the sale of Lots 1 and 2 in order to compute the installment sale accurately. The computation is as follows:

	Lots 1 & 2	***Lot 3***	***Total***
1. FMV	*$120,000*	*$10,000*	*$130,000*
2. Less mortgage assumed	*30,000*	*0*	*30,000*
3. Total net FMV	*90,000*	*10,000*	*100,000*
4. % of total net FMV	*90 %*	*10 %*	*100 %*
Proportion of payments:			
5. $20,000 x 90%	*18,000 (a)*		*18,000 (a)*
6. $20,000 x 10%		*2,000 (a)*	*2,000 (a)*
7. Excess of mortgage over basis on Lot 2	*15,000 (b)*	*0 (b)*	*15,000 (b)*
8. Allocation of payments in year of sale (a + b)	*33,000*	*2,000*	*35,000*

INSTALLMENT SALE OF A BUSINESS

A sale of a sole proprietorship usually involves the sale of a number of assets. The transaction is not treated the same as the sale of multiple assets using a single contract. The business assets must be categorized by property type--i.e., inventory, Section 1245 property, Section 1250 property, goodwill, etc. Separate calculations may be required to determine the gain or loss for each asset sold. Certain kinds of property, such as inventory, do not qualify for installment method reporting. Thus, allocations are necessary.

Example - Business Installment Sale *- Glen sold for $220,000, a machine shop which he had operated for several years. He received a down payment of $100,000 from the buyer and the buyer's note for $120,000; no mortgage was assumed by the buyer. Note payments were $30,000. Selling expenses were $11,000. The following assets were included in the sale:*

Asset	***FMV***	***Depr Claimed***	***Adj. Basis***
Land	*$90,000*	*0*	*$51,000*
Inventory	*10,000*	*0*	*8,000*
Machine X	*71,000*	*$27,200*	*63,800*
Truck	*6,500*	*18,624*	*5,376*
Machine Y	*24,000*	*12,960*	*22,040*
Goodwill	*18,500*	*0*	*0*
Total	*$220,000*	*$58,784*	*$150,216*

Compute the gain/loss on each asset as shown in the following example. First, reduce the selling price of each asset by an allocable portion of the selling expenses. Since the selling expenses represent 5% of the selling price ($11,000/$220,000), the allocation of these expenses is calculated by multiplying the FMV of each asset by 5%.

Asset	***Sale Pr***	***Sale Exp***	***Adj Basis***	***Gain***
Land	*$90,000*	*$4,500*	*$51,000*	*$34,500*
Inventory	*10,000*	*500*	*8,000*	*1,500*
Machine X	*71,000*	*3,550*	*63,800*	*3,650*
Truck	*6,500*	*325*	*5,376*	*799*
Machine Y	*24,000*	*1,200*	*22,040*	*760*
Goodwill	*18,500*	*925*	*0*	*17,575*
Total	*$220,000*	*$11,000*	*$150,216*	*$58,784*

The machines and truck are Section 1245 property; all of the gain from these assets is due to depreciation recapture. The $5,209 gain ($3,650, $799, $760) will be reported on Form 4797, Part II as ordinary income. The 1245 property will not be included in the installment sale computation.

Because inventory cannot be sold on the installment method, the $10,000 received from the sale is shown as ordinary income on Schedule C. The expense of sale allocated to the inventory sale ($500) will be deducted as a business expense. The $8,000 basis of the inventory is accounted for automatically in the cost of goods sold on Schedule C (i.e., the ending inventory of the business is zero and the cost of goods sold deduction increases). The remaining items involved in the sale (land and goodwill) are reported on the installment basis. The gross profit percentage is computed for each of these assets by dividing its portion of the gross profit by $108,500, the total contract price attributable to the two assets ($90,000 + $18,500).

Land ($34,500/$108,500)	*31.7972 %*
Goodwill ($17,575/$108,500)	*16.1982 %*

The sales of these assets are reported on Forms 6252 and Schedule D of Glen's tax return.

Glen must report all ordinary income in the year of sale. The down payment must first be allocated to the inventory ($10,000). The remaining down payment ($90,000) will be allocated to the assets which generate ordinary income (2 machines and truck), since the total selling prices of these three items exceed $90,000 ($71,000 + $6,500 + $24,000 = $101,500). In addition, $11,500 of the $30,000 note payments received in the year of sale is allocated to these three assets ($90,000 + $11,500 = $101,500). The remaining $18,500 from the note payments ($30,000 - $11,500) is used to compute the installment sale income.

Land (31.7972% x $18,500)	*$5,883*
Goodwill (16.1982% x $18,500)	*2,997*
Total	*$8,880*

PROOF: *Total gain on the transaction is $58,784. In the first year, gain of $1,500 is reported from the sale of inventory, $5,209 ordinary income from the sale of the truck and the machines is reported on Form 4797, $8,880 from the sale of the land and goodwill is reported as capital gain (Forms 6252 and Schedule D). In subsequent years, the taxpayer will report $28,617 gain from the sale of the land ($90,000 remainder to be paid on the note x 31.7972%) and $14,578 from the sale of goodwill ($90,000 remainder to be paid on the note x 16.1982%). Total gain reported: $1,500 + $5,209 + $8,880 + $28,617 + $14,578 = $58,784.*

Transfer due to death - The transfer of an installment obligation (other than to a buyer) as a result of the death of the seller is not a disposition. Any unreported gain from the installment obligation is not treated as gross income to the decedent. No income is reported on the decedent's return due to the transfer. Whoever receives the installment obligation as a result of the seller's death is taxed on the installment payments the same as the seller would have been had the seller lived to receive the payments. (Reg. Sec. 1.1451-1(b)(2))

CALIFORNIA DIFFERENCES

Real property sold in California may be subject to income tax withholding - see Chapter 3.17. California conforms to the Federal installment sale computation, except that the basis may not be the same, because different depreciation methods were used or because of differences in Federal and California Sec. 179 limitations. In that situation, use two worksheets – one for federal and one for CA.

INSTALLMENT SALES WORKSHEET

(This Worksheet is not a substitute for Form 6252)

SPECIAL INSTRUCTIONS - Complete parts I through IV in the year of sale. Complete only line 16 and part IV in later years.

GENERAL:

1. Description of Property:____

2a. Date property acquired…………………………………………………………… ____/____/____

2b. Date of sale………………………………………………………………………… ____/____/____

3. ❑ ***Check if property on line 1 is a principal residence. (Be sure to complete line 11.)***

I. BASIS OF PROPERTY SOLD:

4. Cost or other basis of property sold……………………………………. __________

5. Depreciation allowed or allowable………………………………………. __________

6. Adjusted basis - line 4 less line 5, but not less than zero………………………………..__________

II. GROSS PROFIT COMPUTATION:

7. Sales price……………………………………………………………………………… __________

8. Expenses of sale………………………………………..…… __________

9. Income recapture……………………………………………... __________

10. Recalculated basis - sum of lines 6, 8, and 9……………………….… __________

11. If line 3 is checked, enter amount of Sec 121 excluded gain… __________

12. GROSS PROFIT - line 7 less total of lines 10 & 11…………………….………………….. __________

III. CONTRACT PRICE & GROSS PROFIT PERCENTAGE COMPUTATION:

13. Mortgage assumed or taken subject to on property sold……… __________

14. Mortgage over basis adjustment - line 13 less line 10
    - but not less than zero………………………………………..………. __________

15. CONTRACT PRICE - line 7 less sum of lines 13 & 14…………….. __________

16. GROSS PROFIT % - line 12 divided by line 15……………………………………………. __________

IV. REPORTABLE INCOME:

17. Principal payments received during the year……………………… __________

18. Total reportable income - sum of lines 14 and 17…………..…….. __________

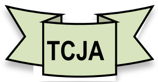
19a. Installment sale income - line 18 times line 16…………….……………………………….. __________

19b. Amount on line 19a that is ordinary income recapture (to 4797)................. __________

19c. Capital gain (to Schedule D or 4797) - line 19a less 19b...………................. __________

CAUTION - special rules apply to installment sales between related parties. Consult IRC 453A and Publication 537 for additional information about these rules.

TAX-DEFERRED EXCHANGES



Only Real Estate Qualifies for Years After 2017 – Prior to the TCJA both personal and real property used in a trade or business or for investment were eligible for the provisions of IRC Sec 1031. In light of the TCJA expanded expensing provisions for personal property and certain building improvements, Congress felt there was no need for Sec 1031 to apply to anything other than real property.

Thus after 2017, TCJA (except for a transition rule) limits the application of Sec 1031 to real property. The references in this chapter to property other than real estate apply only to transactions completed before 2018 or may continue to apply for some states.

Transition Rule - The provision generally applies to exchanges completed after December 31, 2017. However, an exception is provided for any exchange if the property disposed of by the taxpayer in the exchange is disposed of on or before December 31, 2017, or the property received by the taxpayer in the exchange is received on or before such date.

Code Section 1031 allows non-recognition of gain or loss when taxpayers trade properties of like-kind that are used for business or investment.

Qualifications:

- **Both** the property given and received must be **held for business or investment** purposes.
- The property **cannot be merchandise held for sale to customers** (i.e., inventory, raw materials and accounts receivable).
- The properties exchanged **must be like-kind** (similar in nature, but not necessarily of the same quality).
  - **Real estate must be exchanged for real estate** (improved or unimproved)
  - **Animals*** - exchanges of animals of different sexes don't qualify.
  - **Depreciable tangible personal property*** must be exchanged for property of "like-kind or class."
  - **Vehicles*** - Cars, Light Trucks, SUVs & Minivans are like kind (PLR 200912004)
  - **Mixed Use Property** – business portion can qualify (Rev. Proc. 2005-14)

  *Not eligible after 2017

Special Circumstances:

- **Vacation Home Rentals** may qualify
- **Water Rights Stock** – Not eligible beginning 2018

Mandatory if qualified: Section 1031 treatment is not elective. It is mandatory if qualified.

Delayed Exchange:

- Transaction must be completed through a **qualified intermediary**.
- Property to be received in the exchange must be **identified within 45 days**.
- Taxpayer is allowed to **designate a maximum of either**:
  - (a) **Three replacement properties** regardless of FMV; or
  - (b) **Any number** of properties, as long as the **total FMV isn't more than 200%** of the total FMV of all properties given up.
- Receipt of the new property must be completed before the **EARLIER** of:
  - (1) **180 days** after the transfer of the property given, OR
  - (2) The due date (including extensions) of the return for the year in which the property given was transferred.

Reverse Exchange

- Replacement Property is acquired by an exchange accommodation title holder (EAT)
- Property to be exchanged must be **identified within 45 days**.
  - Within 180 days of acquiring replacement properties and after identifying the relinquished property, the title to the replacement property must be transferred to the taxpayer.
  - Within 180 days of acquiring replacement properties, the relinquished property must be sold.

Related IRS Publications and Forms

- **Pub 544 -** Sales or Other Dispositions of Assets
- **Form 8824 –** Like-Kind Exchanges
- **IRC Sec 1031**

CONDITIONS NEEDED TO PRODUCE A TAX-DEFERRED EXCHANGE:

Business-Investment Property - Both the property given and the property received must be held for business or investment purposes.

No Inventory - The property cannot be merchandise held for sale to customers (i.e., inventory, raw materials and accounts receivable).

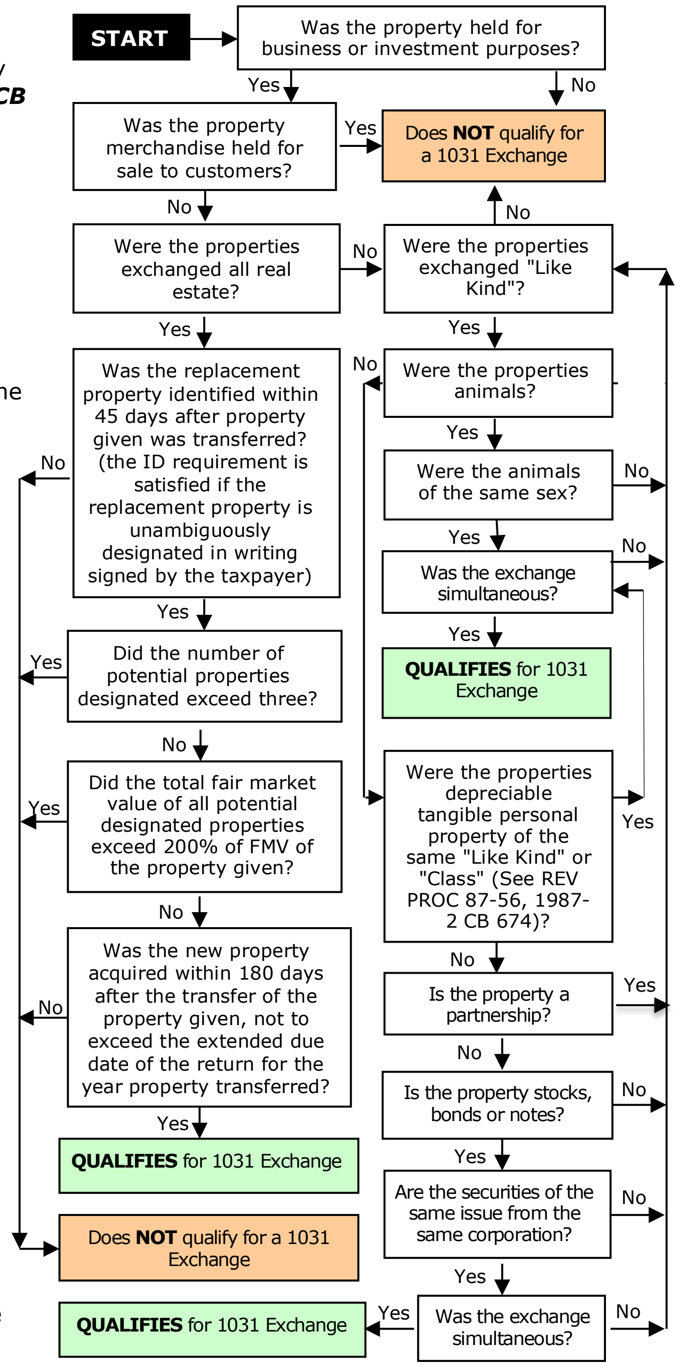
Like-Kind - The properties exchanged must be like-kind (similar in nature, but not necessarily of the same quality). Real estate must be exchanged for real estate. Real estate includes: residential, commercial, storage buildings, warehouses, land, manufacturing plants (improved or unimproved qualifies). For exchanges before 2018, exchanges of animals of different sexes don't qualify, and depreciable tangible personal property could only be exchanged for property of "like-kind or class" as outlined in ***Rev Proc 87-56, 1987-2 CB 674.***

Property NOT considered like-kind:

- Inventory
- Partnership Interests
- Stocks & Bonds
- Goodwill

Section 1031 Qualification Flow Chart

Note: Chart apples to real estate for all year and other property prior to 2018. Chart assumes that: (1) the property acquired is not solely acquired with the intent to exchange it for like-kind property, and (2) the property is exchanged with the sole intent to use the acquired property for business or investment purposes.



SIMULTANEOUS OR DELAYED:

Replacement Property Identified - An exchange can be simultaneous or delayed. If delayed, the property received in the exchange must be identified within **45 days** after the property given is transferred. The identification requirement is met if replacement property is unambiguously (clearly) designated in a written agreement or document signed by the taxpayer. Designation by street address or legal description of real property is considered unambiguous. The identification document must be hand delivered, mailed, faxed, etc., before the end of the identification period.

No matter how many properties are given up in an exchange, a taxpayer is allowed to designate a maximum of either:

- **Three replacement properties** regardless of FMV; or
- **Any number of replacement properties**, as long as the total **FMV isn't more than 200%** of the total FMV of all properties given up.

If a taxpayer identifies replacement properties over these limits, he/she is treated as if none were identified. A taxpayer can, however, revoke an identification at any time before the end of the 45-day time period.

The designated property does not need to exist at the time the relinquished property is transferred. However, the new property must still be unambiguously designated in writing to all involved parties and all time requirements must be met as to receipt of the new property (180-day requirement next).

Replacement Property Received - In a delayed exchange, the receipt of the replacement property must be completed before the **EARLIER** of:

- **180 days** after the transfer of the property given, OR
- **The return due date** (including extensions) of the return for the year in which the property given was transferred.

FOREIGN EXCHANGE LIMITATIONS:

- **Real Property –** Real property in the U.S. and real property located outside of the U.S. are not like-kind property. IRC § 1031(h)
- **Personal Property Predominant Use Requirement** (pre-2018) - Personal property used "predominantly" within the U.S. and personal property used "predominantly" outside the U.S. are not like-kind property (Sec 1031(h)(2)(A). To determine predominant use, a time-based test applies:
  - For the property given in the exchange, it's the two-year period ending on the date of giving up the old property (Sec 1031(h)(2)(B)(i)).
  - For property received in the exchange, it's the two-year period beginning on the date of acquiring the new property (Sec 1031(h)(2)(B)(ii)).

  Thus, to meet the "predominant" test, property received in the exchange must continue in the same use (i.e., foreign or domestic) for the 24 months immediately after the exchange. Alternatively, the property given in the exchange must have been in the same use (i.e., foreign or domestic) for the 24 months just before the exchange.

Except in the case of an exchange structured to avoid these rules, only the periods the property was held by the person giving up a property (or any related person) are used to figure predominant use of the property given. The same rule applies for the property acquired. Thus, the 24-month period is reduced to the actual time a taxpayer held (holds) the property, unless the shorter time is a result of a transaction structured to avoid this rule.

POSTPONEMENTS DUE TO WAR OR DISASTER:

Rev. Proc. 2007-56 provides the most current list of time-sensitive acts that may be postponed under Code Sections 7508 and 7508A for:

- Individuals serving in the armed forces in a combat zone,
- Individuals serving in support of combat zone armed forces, or
- For taxpayers affected by a presidentially declared disaster area.

Those time-sensitive acts include certain Code Sec. 1031 like-kind exchange requirements. With respect to Sec 1031, the postponements affect the:

- 45-day identification period.
- 180-day exchange period limitation.
- Last day of a period described under the QEAA requirements that fall on or after the date of a presidentially declared disaster.

Under these modifications, the respective acts are postponed by the later of:

- 120 days, or
- The last day of the general disaster extension period authorized by the IRS.

However, in no event may a postponement period extend beyond: (a) the due date (including extensions) of the taxpayer's tax return for the year of the transfer (See Treas. Reg. § 1.1031(k)-1(b)(2)); or (b) one year (See IRC § 7508A(a)).

Note: While Rev. Proc. 2007-56 lists the acts which may be postponed, actual postponement generally will be published as an IRS notice, news release or other guidance relating to a specific disaster. (Reg. §301.7501A-1(e)).

RELATED-PARTY EXCHANGES:

(1) When related parties exchange property, gain or loss must be recognized if either party disposes of the property acquired within **two years** of completion of the exchange.

(2) The related party rule does not apply if, within the two-year window, a post-exchange disposition occurs:
- After the death of either related party, **or**
- As a result of an involuntary conversion, **or**
- When income tax avoidance is not a factor.

MULTI-PARTY EXCHANGES:

Two-party exchanges are usually not feasible in reality. Seldom does Seller have the exact property Buyer wants, and vice versa. Complicated multi-party exchanges have become increasingly common.

In order to avoid pitfalls, structuring such exchanges generally requires assistance from experts (which can be expensive). Exchanges are often structured using one of a number of possible formats: e.g., escrow accounts, trusts, and qualified intermediaries. Safe harbor rules outline arrangements that are sanctioned under Section 1031.

The following examples illustrate possible structuring of multi-party exchange transactions, which qualify for Section 1031 treatment:

Example 1 - Multi-Party Exchange - *Tony wants to exchange an investment lot to avoid paying tax on the sizable gain he would have if he sold it. He hopes to replace the lot with a rental property owned by Teresa. Unfortunately, Teresa needs cash and prefers a sale to an exchange. In the meantime, Ted offers to buy Tony's lot for cash.* ***Possible solution:*** *Ted could buy the rental from Teresa and exchange it with Tony for the lot. This would satisfy all parties involved: Ted would have the lot, Tony would accomplish his exchange, and Teresa would have the cash from the sale of the rental.*

Example 2 - Exchange vs. Outright Sale - *Tony owns a duplex, which he wants to exchange for 5 lots owned by Clarence. Pete wants to buy the duplex. Bob acts as accommodator in the exchange transaction. To effect the exchange, Bob sets up a number of escrow agreements, providing for simultaneous transactions in which he:*

(1) Buys the 5 lots held by Clarence.
(2) Exchanges the lots with Tony for the duplex.
(3) Sells the duplex to Pete.

Each transaction is contingent on the successful closing of the others. The cash placed in escrow is earmarked for the acquisition of the 5 lots; and the agreements do not allow Tony access to the cash at any time.

Example 2 is based on Barker (1980) 74 TC 555 in which IRS claimed that Barker's transactions were simply a sale and repurchase and the gain on the sale was taxable. The Tax Court overruled, stating that the transfers of the lots for the duplex were mutually dependent transactions and could not be separated.

SAFE HARBOR RULES:

Four safe harbors have been created to prevent the disputes about actual/constructive receipt of cash and the use of qualified agents in tax-deferred exchange transactions (Preamble to TC 8346, 04/25/91). These safe harbors ensure that an exchange qualifies for nonrecognition.

(1) ***Security or guarantee arrangements -*** Taxpayers use guarantee/security arrangements in deferred exchanges to guard against a transferee's failure to transfer like-kind property. In such arrangements, taxpayers aren't treated as actually or constructively receiving cash or nonqualified property in an exchange when they secure the obligation of the transferee to provide replacement property with:

- A mortgage or similar security interest;
- A standby letter of credit which isn't treated as a "payment" under the installment sale rules and which can't be drawn on unless the obligation transferee fails to transfer the replacement property; or
- A third party's guarantee.

A security agreement that gives a taxpayer an ***unrestricted right*** to receive cash or other property does not qualify as a safe harbor.

(2) ***Qualified escrow accounts and trusts -*** Under this arrangement, a taxpayer isn't treated as actually or constructively receiving cash or property when the obligation of the transferee is (or may be) secured by cash (or equivalent) held in a qualified escrow or trust account. The escrow accountholder cannot be the taxpayer, and the agreement must limit the taxpayer's right to receive cash from the account (through borrowing or otherwise).

Example - Safe Harbor Escrow Account - *Larry and Laura agree to a deferred exchange, with Larry transferring his rental property with no mortgage to Laura. The FMV of the property is $110,000 and its adjusted basis is $50,000. The agreement requires Laura to purchase a replacement rental property and transfer it to Larry. On 6/15/19, Larry transfers his rental to Laura and identifies the property he wants as a replacement. Laura pays $10,000 to Larry at that time and deposits $100,000 in an escrow account as security for her obligation to purchase the replacement rental.*

The escrow provides that Larry can't have access to the escrow funds before 12/13/19 unless he:

a. Doesn't identify the replacement property within the 45-day period; or
b. Identifies and receives the replacement property before the end of the 180-day period.

Under these circumstances, Larry is not considered to have constructively received the funds at the time they are deposited in the escrow account. However, the $10,000, which he received from Laura in cash, is considered boot.

(3) ***Qualified intermediary -*** The law also provides a safe harbor when an exchange is set up using an intermediary to effect the transfer of property. The rules apply to both simultaneous and deferred exchanges. An <u>unqualified</u> intermediary can negate the exchange.

A "qualified intermediary" is one (can't be the taxpayer or a "disqualified party") who has a written agreement with the taxpayer, which calls for the intermediary to acquire and transfer both the property given and received in the exchange. Generally, the intermediary gets legal title to the property. A qualified intermediary can't be the taxpayer or a party related to the taxpayer (as defined in *§267(b)* or *§707(b),* but regarding controlling interests, substitute the words "more than 10%" wherever the words "more than 50%" appear).

Bankrupt Qualified Intermediary **-** A taxpayer who in good faith sought to complete a Sec 1031 exchange using a Qualified Intermediary (QI), but who failed to do so because the QI defaulted on the exchange agreement and became subject to a bankruptcy or receivership proceeding does not have to recognize gain from the failed exchange until the taxable year in which the taxpayer receives a payment attributable to the relinquished property. (Rev. Proc. 2010-4)

(4) ***Interest and growth factors -*** Taxpayers are often entitled to receive a growth factor (really another name for interest) on cash or property involved in a deferred exchange; the amount depends on the length of time between relinquishment of the old property and receipt of the new one. The growth factor amount must be included in income according to the taxpayer's method of accounting. The exchange agreement must limit a taxpayer's right to receive the growth amount.

BASIS OF THE NEW PROPERTY EQUALS

A. The adjusted basis of the old property **LESS** cash and/or unlike property received

B. **PLUS** cash and/or unlike property given, and any gain recognized (taxable).

HOLDING PERIOD

The holding period of the new property includes the holding period of the property given.

DEPRECIATING MACRS PROPERTY ACQUIRED IN A LIKE-KIND EXCHANGE

The replacement property, for depreciation purposes, is divided into the depreciable exchanged basis (i.e., remaining basis of the relinquished property carried over to the replacement property), and the depreciable excess basis (i.e., additional consideration to acquire the replacement property).

- **Where the exchanged properties share the same recovery class and depreciation method** - the depreciable exchanged basis is written off over what's left of the relinquished property's recovery period; and the depreciable excess basis is in effect treated as a separate property with a recovery period that begins anew. This is sometimes referred to as the split basis approach.

  Electing out of the split basis approach - A taxpayer may elect not to apply the "split basis" approach. If the election is made, the exchanged basis and excess basis, if any, in the replacement property are treated as placed in service at the time of replacement and the adjusted depreciable basis of the relinquished MACRS property is treated as being disposed. (Reg § 1.168(i)-6(i))

  The election is made by typing or printing "ELECTION MADE UNDER SECTION 1.168((i)-6(i)(1)" on Form 4562 and must be made by the extended due date of the return for the replacement year. (Reg § 1.168(i)-6(j))

Example: Property Given had a basis of $500,000 with $100,000 allocated to land. It was placed in service on 7/1/14. It was exchanged on 6/30/9. It was a residential rental and thus the depreciation allowance is 3.636% per year (1/27.5); mid-month convention applies so ***only a half-month of depreciation is allowed in the month put into service and in the disposal month***. The total depreciation taken up to the date of the exchange is $64,842 ((400,000 x .03636 x 5.5/12) + (400,000 x .03636 x 4)). The 2019 depreciation for the property given is $6,666 ($400,000 x .03636 x 5.5/12). Thus, the depreciation schedule for the property given would look like this for 2019:

Description	In Service	Basis	Accumulated Depreciation	Current Depreciation
Building	7/1/14	$400,000	$64,842	$6,666[1]
Land	7/1/14	$100,000	-0-	-0-

[1]$400,000 x .03636 x 5.5/12

Property Received, also a residential rental, has an exchange basis of $750,000, of which $300,000 is allocated to land. It was placed in service on 10/1/19. Because the exchange was delayed, there are a few months without depreciation. There are two options for establishing the depreciable basis for the replacement property based on whether or not the election is made:

Non-elective depreciation for the replacement property would look like:

Description	In Service	Basis	Accumulated Depreciation	Current Depreciation
Carryover Basis	7/1/14	$328,492		$3,030[2]
Excess 1031 Basis	10/1/19	$121,508		$ 920 [3]
Land	10/1/19	$300,000	-0-	-0-

[2]$328,492 x .04428 x 2.5/12 $328,492 = $400,000 – 64,842 – 6666 .04428 = 1/22.583 years (remaining life)
[3]$121,508 x .03636 x 2.5/12

Electing out of the split-basis approach, the depreciation would look like:

Description	In Service	Basis	Accumulated Depreciation	Current Depreciation
Building	10/1/19	$450,000	-0-	$3,409[4]
Land	10/1/19	$300,000	-0-	-0-

[4]$450,000 x .03636 x 2.5/12

***Caution – Improvements** - It is not uncommon for the depreciation schedule of the property being relinquished to include a line of depreciation for the original Sec 1250 purchase price and one or more additional lines of depreciation for subsequent Sec 1250 improvements to the property. Thus, when the carryover basis is figured (assuming the election wasn't made), there'll need to be separate entries for the improvement(s) and the original building (because their remaining lives will be different). This is a good reason to elect out of the split approach.*

- **Where the exchanged properties do not share the same recovery class and depreciation method** - complex rules apply. *Reg § 1.168(i)-6(c)(3)(ii)* See situations below.

Replacement property has a longer recovery period *Reg § 1.168(i)-6(c)(4)(i))*

- **Recovery period** = Period appropriate for replacement property less period property given had already been depreciated.
- **Depreciation method** = Appropriate convention for the replacement property.

***Example:** Rental exchanged for a commercial building. Rental has been in service for 10 years. Replacement (commercial building) would be depreciated over 29 (39 – 10) years (treated as if placed in service on the same date as rental property) using the 39-year mid-month convention table.*

Replacement property has a shorter recovery period *Reg § 1.168(i)-6(c)(4)(ii)*

- **Recovery period** = Remaining life of the property given up.
- **Depreciation method** = Same as the property given up.

***Example:** Commercial building exchanged for a Rental. Commercial building has been in service for 10 years. Replacement (rental) would be depreciated over 29 (39 – 10) years (treated as if placed in service on the same date as the commercial property) using the 39-year mid-month convention table.*

Replacement property uses a less accelerated depreciation method
Reg § 1.168(i)-6(c)(4)(iii)(A) and (B)

- **Recovery period** = Remaining life of the property given up.
- **Depreciation method** = Less accelerated method.

Replacement property uses a more accelerated depreciation method
Reg § 1.168(i)-6(c)(4)(iv)(A) and (B)

- **Recovery period** = Remaining life of the property given up.
- **Depreciation method** = Less accelerated method.

UNLIKE PROPERTY (BOOT) AND CASH

Note: It is rare in exchanges (especially real property exchanges) to have boot other than cash. Thus, boot generally represents cash given or received.

A. "Boot" is unlike property or cash given or received in an exchange.

B. When unlike property other than cash is given along with the exchanged like-kind property, gain or loss must be recognized on the "boot."

> ***Example – Unlike Property Given in an Exchange -*** *Tacksmie Knott exchanged investment real estate with a fair market value of $19,000 and an adjusted basis of $15,000 and STOCK (adjusted basis of $4,000, FMV of $1,000) for rental real estate worth $20,000. Knott recognized no gain on the exchange of the real property, but recognized a $3,000 loss on the stock.*

On the other hand, if unlike property or cash is received in an exchange, gain is recognized to the extent of the boot received, while loss is not recognized.

> ***Example – Cash Boot Received in TFE Transaction -*** *Rental real estate with an adjusted basis of $65,000 is exchanged for like-kind property valued at $75,000 AND cash of $25,000. The realized gain on the transaction is $35,000 ($75,000 + $25,000 less $65,000). Taxable gain is limited to the amount of cash boot, $25,000.*

When cash is both given and received, the amounts offset one another and only the net is boot received or given.

EXCHANGE EXPENSES

Rev Rul 72-456, 1972-2 CB 468 states that gain recognized in an exchange can be reduced by exchange expenses incurred in the transaction, but the reduction cannot create a loss.

> ***Example - Exchange Expenses Reduce Recognized Gain -*** *Hank exchanged a property with an adjusted basis of $10,000 for like-kind property worth $21,000 and cash of $11,000. His exchange expenses were $2,500. Hank's recognized gain on the transaction is $8,500 ($11,000 cash received less $2,500 exchange expense).*

ASSUMING LIABILITIES IN AN EXCHANGE

A. A taxpayer who ***assumes a liability*** or receives property subject to a liability gives boot.

B. A taxpayer who ***has a liability assumed*** or gives a property subject to liability receives boot.

C. Just as in a transaction where cash is both given and received***, mortgage boot given and received are netted*** and only the excess is treated as boot given or received.

D. Other ***boot netting rules***:

(1) Exchanger's liabilities assumed by exchangee are also offset by cash paid by exchanger;

(2) Cash or other boot received by exchanger IS NOT offset by exchanger's assumption of exchangee's liabilities.

Comm vs. North Shore Bus Co., Inc., 32 AFTR 931 states that where a taxpayer receives cash specifically for paying off a mortgage on a property involved in an exchange, the cash is not considered boot where the taxpayer is simply a conduit for the payment of the mortgage by the other party.

DETERMINING CASH GIVEN/RECEIVED:

A frequently encountered question is how to determine the cash given or received in a Section 1031 real estate exchange. Practitioners inexperienced in Sec 1031 exchanges may expect to find the answer in the exchange escrow statement; they will be disappointed. To grasp an understanding of the exchange process, you need understand that what is given is exactly equal to what is received. The transaction is a negotiation between a willing buyer and a willing seller who negotiate the exchange and mutually determine the FMV of the properties exchanged. In other words, an exchange is a balanced transaction.

Another issue is boot, which is the unlike property included in an exchange, which does not qualify as like property. Say you exchange a vacant parcel of land for a residential rental and a car. The car is unlike property, and the car's value cannot be included in the exchange computation. Cash is also unlike property. However, it is very rare that an exchange includes any unlike property except for cash, which makes up the differences in equity in virtually all exchange transactions.

Therefore, for exchanges that do not include boot other than cash, the cash given or received can easily be determined using the worksheet below. If, by some rare chance, unlike property other than cash is involved, its agreed upon value will reduce the cash given or received.

	A	B
Column…………………………………………………………	A	B
Property……………………………………………………...	Given	Received
1. FMV (Sales Price Col A & Purchase Price Col B).	_________	_________
2. Mortgage Balance (at time of transfer)..………...	_________	_________
3. Equity Exchanged (LN1 – LN2 Each Column)…..	_________	_________
4. **CASH GIVEN** (LNB3 – LNA3) but not < zero....	_________	
5. **CASH RECEIVED** (LNA3 – LNB3) but not <zero.		_________
6. Proof (LN3 + LN4 or LN5 EACH column)………… *Total of each column must be the same!*	_________	_________

Example: *A property with a FMV (sales price) of $400,000 and a mortgage of $100,000 is exchanged for another property with a FMV (cost) of $450,000 and new mortgage of $125,000.*

Column……………………………………………….	***A***	***B***
Property…………………………………………..	***Given***	***Received***
1. FMV (Sales Price Col A & Purchase Price Col B)……..	*400,000*	*450,000*
2. Mortgage Balance (at time of transfer)..………………...	*100,000*	*125,000*
3. Equity Exchanged (LN1 – LN2 Each Column) ………..	*300,000*	*325,000*
4. ***CASH GIVEN*** *(LNB3 – LNA3) but not < zero………..*	*25,000*	
5. ***CASH RECEIVED*** *(LNA3 – LNB3) but not < zero.*		*0*
6. Proof (LN3 + LN4 or LN5 EACH column)…………..……	*325,000*	*325,000*

WHEN TO AVOID AN EXCHANGE:

There are instances where a like-kind exchange is not appropriate.

- **Sale would result in a loss** – When the sale of the asset will result in a loss, that loss cannot be recognized in a like-kind exchange.
- **Sufficient Carryovers** – When a taxpayer has sufficient carryovers to offset all or a portion of the gain if the property is sold, an exchange may not be beneficial. These carryovers could include capital loss, investment interest (you can make the capital gains election), passive loss, and net operating losses.
- **Capital Gains Rates** – How long will the favorable CG rates be around? The taxpayer's circumstances may dictate taking the gain now as opposed to later.
- **Tax Bracket and Other Issues** – When a taxpayer anticipates that his or her tax bracket will be higher in future years, it may be appropriate to take the gain now as opposed to deferring it. The surtax on net investment income of upper-income taxpayers and the Sec 199A deduction for those with pass-through income should be taken into account. There are other income issues to be considered for elderly clients, including the taxation of Social Security, the income-based Medicare-B insurance premiums, and of course the required minimum distribution from retirement plans.

WHEN AN EXCHANGE MAY BE APPROPRIATE:

One of the most common uses of Section 1031, and for years after 2017 the only situation when Section 1031 applies, is to defer gain from real estate sales. Here are some examples of reasons an exchange should be considered:

- Taxpayer is a hands-on landlord and is relocating and wants his rental property close by where he can keep an eye on it.
- Taxpayer is a hands-on landlord but is getting tired of the day-to-day issues of residential real estate and wants to exchange into a less demanding type of property such as triple net commercial property.

- Taxpayer is approaching retirement and wants to get rid of the work associated with his rental properties, but does not want to pay the taxes currently that will result from a sale. He can exchange into what is commonly referred to as a tenant-in-common (TIC) arrangement where he can receive a guaranteed return without any responsibilities.
- Taxpayer feels his property is poorly located or has maxed out on appreciation and wishes to exchange to another area.
- Taxpayer has significant equity in his property which will allow him to leverage his equity and move up to a more costly property where he hopefully can better benefit from appreciation.

SELLING OR EXCHANGING A BUSINESS VEHICLE

When replacing a business vehicle prior to 2018, it made a difference for tax purposes if it was sold or traded-in for the replacement vehicle. If the vehicle was sold, the result was reported on a taxpayer's return as an above-the-line gain or loss. Since trade-ins were treated as a Section 1031 exchange, any gain or loss was absorbed into the replacement vehicle's depreciable basis. Thus, it was generally better to trade in a vehicle that would result in a gain if it were sold and sell a vehicle if the disposition of it would result in a loss. This is no longer true since Sec 1031 only applies to real estate after 2017; every business vehicle disposition will now be a Form 4797 reportable transaction regardless of gain or loss.

COMPREHENSIVE REAL PROPERTY 1031 EXCHANGE EXAMPLE

Step #1 – Make sure the transaction qualifies for Sec 1031 treatment.

Step #2 – Analyze the sale and purchase escrows determining FMVs, Mortgage Balances, and Exchange expenses.

ABC Escrow Company	**Debits**	**Credits**
Property: 12345 Main St.		
Sale Date: 6/16/19		
Consideration		148,500.00
Trust deed	50,125.00	
Interest (6/1 through 6/16)	82.40	
Property Taxes (6/16 – 7/01)		91.58
Document Transfer Fee	75.00	
Escrow Fee	550.00	
Real Estate Commission	8,800.00	
Security Deposits	2,500.00	
Rent Pro-ration	1,290.00	
1031 Accommodator fee	1,000.00	
Transfer to accommodator Account	84,169.18	
Totals	148,591.58	148,591.58

FMV Property Given

Mortgage Balance on Property Given

Exchange Expenses

FMV Property Received

Mortgage Balance on Property Received

Exchange Expenses Both escrows = $11,750

ABC Escrow Company	**Debits**	**Credits**
Property: 97 Park Place		
Purchase Date: 8/1/19		
Consideration	325,000.00	
Trust Deed		230,000.00
Property Taxes (7/01 – 8/01)		651.89
Title Insurance	775.00	
Escrow Fee	550.00	
Transfer ABC Escrow		84,169.18
Cash Due at Closing		11,503.93
Totals	326,325.00	326,325.00

Step #3 - Determine the cash given or received in the exchange. From the worksheet below, we determine that cash in the amount of $3,375 was received in the exchange. **Note:** Cash generally represents taxable gain, but that gain can be reduced by exchange expenses. Thus, without going any further, we are reasonably sure there is no taxable event in this exchange.

	A	B
Column………………………………………………………	**A**	**B**
Property…………………………………………………....	**Given**	**Received**
1. FMV (Sales Price Col A & Purchase Price Col B).	148,500.00	325,000.00
2. Mortgage Balance (at time of transfer)..………..	50,125.00	230,000.00
3. Equity Exchanged (LN1 – LN2 Each Column)…..	98,375.00	95,000.00
4. **CASH GIVEN** (LNB3 – LNA3) but not < zero....	________	
5. **CASH RECEIVED** (LNA3 – LNB3) but not <zero.		3,375
6. Proof (LN3 plus LN4 or LN5 EACH column)………	98,375.00	98,375.00

Step #4 – Complete the Schedule E and depreciation schedule for the property given which has been used as a residential rental. In this example, we had the following items from the sale escrow that flow over to the Schedule E.

- Income adjustment for prorated rents <1,290>
- Income adjustment security deposits (if originally treated as income) <2,500>
- Credit for property tax pro-ration in escrow <91.58>
- Mortgage Interest (if not already included on 1098 for the year) 82.40

Finish the depreciation schedule since the basis and accumulated depreciation will be needed to complete the Section 1031 computation.

Description	In Service	Basis	Accumulated Depreciation	Current Depreciation
Building	1/1/13	$50,000	$10,833 [2]	$833 [1]
Land	1/1/13	$25,000	-0-	-0-

[1] $50,000 x .03636 x 5.5/12 (Half month convention Jan – May = 5 + ½ for June)
[2] $50,000 x .03636 x 5.95833 = $10,833 5 yrs + 11.5 months = 5.95833

Thus, the:

- Original basis is $75,000 ($50,000 + $25,000).
- Accumulated depreciation to the date of the exchange is $11,666 ($10,833 + $833).
- Adjusted basis at exchange date $63,334 ($50,000 – 11,666 + $25,000), of which the remaining depreciable basis is $38,334 ($50,000 – 11,666).

Now you have accumulated all of the numbers required to complete the exchanges computation.

Continue to Next Page

Step #5 – Complete the 1031 Exchange Worksheet.

(II) BASIS OF PROPERTY CONVEYED:			
a. Cost or Other Basis of Property Conveyed	75,000		
b. Depreciation Allowed or Allowable	11,666		
c. Adjusted Basis of Property Conveyed (a minus b)		63,334	
(III) REALIZED GAIN:			
a. Fair Market Value of Property Received	325,000		
b. Cash Received	3,375		
c. Fair Market Value of Boot Received	-0-		
d. Mortgage Balance on Property Conveyed	50,125		
e. Total Consideration Received (Sum a. through d.)		378,500	
(LESS):			
f. Adjusted Basis of Property Conveyed	63,334		
g. Cash Given	-0-		
h. Adjusted Basis of Boot Conveyed	-0-		
i. Mortgage Assumed on Property Received	230,000		
j. Exchange Expenses	11,750		
k. Total Consideration Given (Sum f. through k.)		305,084	
l. Gain Realized on the Exchange (e. minus k. - but not less than zero)			73,416
(IV) RECOGNIZED GAIN:			
a. Cash or Boot Received	3,375		
b. Cash or Boot Given	-0-		
c. Exchange Expenses	11,750		
d. Net Cash or Boot Received (a-b-c, can be negative)		-8,375	
e. Mortgage on the Property Conveyed	50,125		
f. Mortgage Assumed on Property Received	230,000		
g. Net Mortgage Relief (e. less f. – but not less than zero)		-0-	
h. **GAIN RECOGNIZED (**d. plus g. but not less than zero)			-0-
(V) BASIS OF NEW PROPERTY			
a. Adjusted Basis of Property Conveyed	63,334		
b. Cash or Boot Conveyed	-0-		
c. Mortgage Assumed on Property Received	230,000		
d. Total (Sum a. through c.)		293,334	
e. Cash & Boot Received	3,375		
f. Mortgage on Property Conveyed	50,125		
g. Total (e. plus f.)		53,500	
h. Net Amount (d. less g.)		239,834	
i. Gain Recognized on the Exchange		-0-	
j. Exchange Expenses		11,750	
k. **BASIS OF NEW PROPERTY** (Sum h. through j)			251,584

Step #6 - The hardest part of an exchange is to get the information into your tax preparation software and have the software compute the exchange correctly. Seems they all do it a little differently. But you have the answer and know what the results should be.

Step #7 – Set up the depreciation for the replacement (acquired) property, which is also going to be used as a residential rental. Assuming a land allocation of $100,000, the depreciation options for this property would be:

Non-elective depreciation for the replacement property would look like:

Description	In Service	Basis	Accumulated Depreciation	Current Depreciation
Carryover Basis	1/1/13	$38,334		$833[2]
Excess 1031 Basis	8/1/19	$113,250		$1,544[3]
Land	8/1/19	$100,000	-0-	-0-

[2]$38,334 x .04743 x 4.5/12 = 682 $38,334 = 50,000 – 10,833 – 833 .04743 = 1/21.083 years (remaining life)
[3]$113,250 x .03636 x 4.5/12

Electing out of the split-basis approach, the depreciation would look like:

Description	In Service	Basis	Accumulated Depreciation	Current Depreciation
Building	8/1/19	$151,584	-0-	$2,067[4]
Land	8/1/19	$100,000	-0-	-0-

[4]$151,584 x .03636 x 4.5/12

MIXED CLASS (UNLIKE) PROPERTY OF THE EXCHANGE

More often than not exchanges of rental real estate (Sec 1250 property) will include items of personal property (Sec 1245 property) such as appliances. It is unlikely that the replacement property will be allocated between 1250 and 1245 property and since acquired real property can no longer be depreciated under the component method, the replacement property will generally always be treated as entirely 1250 property. Thus, there is generally no way to accomplish a 1031 exchange for the 1245 property being depreciated with the rental. Furthermore, under the 2017 tax reform, beginning with 2018 exchanges, Sec 1245 property is not eligible for Sec 1031 exchange treatment.

Generally, when mixed assets are sold, the assets must be allocated by class and identified as such in the sales agreement or by using IRS Form 8883. If the allocation has been made and a portion of the sales price allocated to the Sec 1245 property, it can be properly reported on Form 4797 as a sale and the resulting gain or loss carried over to the 1040. The remaining portion of the sales price is used in computing the Sec 1250 like-kind exchange.

If the 1245 property was not identified in the transaction, there is no standard method to subsequently deal with the Sec 1245 element. Here are approaches to the problem that others have taken:

- Assumed the transaction included only 1250 property, i.e., that 1245 property was *de minimis* and simply passed on to the buyer at zero value. However, if the 1245 property is not fully depreciated, the disposition for no value will result in a 4797-ordinary loss, which is really not the case.
- Assumed the Sec 1245 property to be a *de minimis* portion of the sale and reported the sale of the Sec 1245 property on the 4797 at the same price as the depreciated basis, resulting in no gain or loss.

TAX-DEFERRED EXCHANGES AND INSTALLMENT SALE RULES

The installment sale rules allow for "deferral" of gain when an installment note is carried back on a property disposed of in an exchange *(§453(f)(6)).* Regular installment sale rules contain the following two definitions:

1. **Gross profit percentage:** This equals the gross profit divided by the contract price.
2. **Payment received at time of sale:** This equals the contract price minus the face value of the installment note.

When a tax-deferred exchange is structured as an installment sale, 1 and 2 above are redefined.

1. **Gross profit** equals ***recognized gain***; the maximum deferral under ***§453*** will be the gain recognized under ***§1031.***
2. **Contract price** is redefined as ***the greater of***: (a) the recognized gain, or (b) the decline in FMV of the like-kind properties. Compare the FMV of like-kind property relinquished with the FMV of like-kind property received.

Reporting the Installment Sale - To report an installment sale in conjunction with an exchange, use Form 8824; however, the gain goes to Form 6252 rather than to Form 4797 directly. Although Form 6252 instructions don't indicate this, it's probably best to mark "From Form 8824" on Form 6252 when listing the "gross profit" and the "contract price". It may also be a good idea to attach a backup statement showing the computation.

QUICK ANALYSIS CONSIDERATION

Analyzing exchanges can be easier than you think! You need to know three things:

- **Fair market value of the property given and received**
- **Existing mortgages**
- **The equity given vs. equity received**

For an exchange to be 100% TAX-DEFERRED, make sure the following are true:

- ❑ **The taxpayer traded even or up in value.**
- ❑ **The taxpayer traded even or up in equity.***
- ❑ **The taxpayer transferred no other property.**

* Equity is the difference between the FMV and the existing mortgage on the property.

Example: *Taxpayer exchanged a rental with a FMV of $100,000 and a loan of $50,000 for another rental with a FMV of $125,000 and a mortgage of $25,000. Is it 100% tax-free?*

YES! The taxpayer traded up in value from $100,000 to $125,000. He also traded up in equity, from $50,000 to $100,000 and transferred no other property.

MIXED USE PROPERTY - HOME WITH BUSINESS USE

The exchange of a home can qualify for both the §121 home sale exclusion and §1031 like-kind exchange deferral treatment. This can occur where the property was used as a principal residence and a business consecutively (e.g., use as a principal residence followed by rental of the property) or concurrently (a portion of the home used as a principal residence and a portion used as a home office). (Rev. Proc. 2005-14)

> **Caution:** Coupling the tax benefits of the Sec 121 home sale gain exclusion with the Sec 1031 deferral for excess gain will only work if the transaction is an ***exchange***. A non-simultaneous sale of one home and a purchase of another or failure to meet the rules for a deferred exchange means the transaction won't qualify for the 1031 deferral. Unfortunately, most taxpayers don't structure sales of their homes in a way that would qualify to be an exchange.

Consecutive Use – This would occur when a taxpayer's home is converted to a rental property and is still being used as a rental property at the time of the sale AND still meets the two-out-of-five-years ownership and use qualifications. Thus, the §121 home sale exclusion would apply and since the property is in business use, it also would qualify for §1031 like-kind exchange deferral treatment.

Example *– Jack buys a house for $210,000 that he uses as his principal residence from 2013 to 2017. From 2017 until 2019, he rents the house to tenants and claims depreciation deductions of $20,000. In 2019, Jack, who is single, exchanges the house for $10,000 of cash and a townhouse with a fair market value of $460,000. Jack intends to use the townhouse as rental property. This is the way the transaction plays out:*

The Exchange	***GIVEN***	***RECEIVED***
Fair Market Value	*470,000*	*460,000*
Cash		*10,000*
Total	*470,000*	*470,000*
***Gain Computation**:*		
FMV of Property Given		*$470,000 (1)*
Less cost		*<210,000>*
Depreciation		*20,000*
Gain		*$280,000*
§121 Exclusion		*<250,000>*
Profit		*$ 30,000*
§1031 Deferral		*< 30,000> (2)*
Taxable Gain		*0*

(1) Townhouse worth $460,000 plus $10,000 in cash.
(2) Jack may defer the remaining gain of $30,000, including the $20,000 gain attributable to depreciation, under Code Sec. 1031. Moreover, although Jack received $10,000 of cash (boot) in the exchange, he is not required to recognize gain because the boot is taken into account for purposes of Code Sec. 1031(b) only to the extent the boot exceeds the amount of excluded gain.

Concurrent Use – This would occur when a taxpayer's home is used as a primary residence and for business purposes at the same time. A frequently encountered example would be a taxpayer with a home office.

Continue to Next Page For Example

Example *- Charlie pays $210,000 for a house that constitutes a single dwelling unit (1). From 2014 until 2019, he uses 2/3 (by square footage) as his principal residence and 1/3 as an office in his business. In 2019, he exchanges the entire property for a residence and a separate property to be used as an office in his business. The total FMV of the replacement properties is $360,000. The FMV of the replacement residence is $240,000 and the FMV of the replacement business property is $120,000, which is equal to the FMV of the business portion of the relinquished property. From 2014 to 2019, Charlie claims depreciation deductions of $30,000 for the business use. Thus, he realizes gain of $180,000 on the exchange ($360,000 amount realized − $180,000 adjusted basis ($210,000 cost − $30,000 depreciation)). Charlie is single. He qualifies for both tax breaks as follows:*

	TOTAL	HOME	OFFICE
Sales Price	*360,000*	*240,000*	*120,000*
Home Cost	*<210,000>*	*<140,000>*	*<70,000>*
Depreciation	*30,000*	*---*	*30,000*
Realized Gain	*180,000*	*100,000*	*80,000*
§121 Exclusion	*<150,000> (2)*	*<100,000>*	*<50,000> (2)*
Tentative Taxable Gain	*30,000*	*0*	*30,000*
§1031 Deferral	*<30,000>(3)*	*---*	*<30,000> (3)*
Taxable Gain	*0*	*0*	*0*

(1) Under Code Sec. 1.121-1(e)(2) the sale of a home that is a single dwelling unit and is also used for business purposes is treated as one sale and the §121 exclusion applies to all gain except that gain attributable to depreciation taken after May 6, 1997.

(2) Under Reg. § 1.121-1(e), Charlie may exclude $50,000 of the gain allocable to the office because the office and residence are part of a single dwelling unit and any gain in excess of the depreciation taken after May 6, 1997 is subject to the §121 exclusion.

(3) Charlie may also defer paying tax on the office portion since he acquired a replacement. His basis in the separate replacement business property is $90,000 ($40,000 basis in the relinquished business property at the time of the exchange + $50,000 gain excluded under Code Sec. 121 attributable to the relinquished business property). (Code Sec. 1031. (Rev Proc 2005-14, Sec. 5, Ex. 3))

HOME SALES WITH BUSINESS USE – Section 121 exclusion applies first and then the Section 1031 deferral is applied.

Section 1031 is a valuable tax planning and strategizing tool that can be used for a variety of situations provided care is taken to make sure the qualification rules are carefully followed. However, in your planning, be sure you keep in mind that Section 1031 provides tax *deferral* and not tax *forgiveness*. The "tax-free" moniker frequently associated with Sec 1031 exchanges is misleading to taxpayers, and you, as a tax practitioner, must remind your clients of that fact.

VACATION HOME RENTALS MAY QUALIFY

One of the requirements for use of Sec. 1031 is that the exchanged properties be held for productive use in a trade or business or for investment. Thus, personal residences are ineligible. However, IRS recognized that many taxpayers hold dwelling units – commonly referred to as vacation rentals – primarily for the production of current rental income, but also use the properties occasionally for personal purposes.

Rev. Proc 2008-16 provides a safe harbor under which the IRS will not challenge whether a dwelling unit qualifies under Sec. 1031 even though the taxpayer uses it occasionally for personal purposes. All other requirements for a like-kind exchange under Sec. 1031 must still be met.

Safe Harbor – The standards that must be met for the dwelling unit to be considered to be held for productive use in a trade or business or for investment are as follows:

Relinquished property: The taxpayer owns the dwelling unit for at least 24 months immediately before the exchange, and within that period, in *each* of the two 12-month periods immediately preceding the exchange:

- The taxpayer rents the dwelling unit to another person or persons at a fair rental for 14 days or more, and
- The taxpayer's personal use of the property does not exceed the greater of 14 days or 10% of the number of days during the 12-month period that the dwelling unit is rented at a fair rental.

The first 12-month period immediately preceding the exchange ends on the day before the exchange takes place (and begins 12 months prior to that day), and the second 12-month period ends on the day before the first 12-month period begins (and begins 12 months prior to that day).

Replacement property: The taxpayer owns the dwelling unit for at least 24 months immediately after the exchange, and within that period, in *each* of the two 12-month periods immediately after the exchange:

- The taxpayer rents the dwelling unit to another person or persons at a fair rental for 14 days or more, and
- The period of the taxpayer's personal use of the property does not exceed the greater of 14 days or 10% of the number of days during the 12-month period that the dwelling unit is rented at a fair rental.

The first 12-month period immediately after the exchange ends on the day after the exchange takes place, and the second 12-month period begins on the day after the first 12-month period ends.

Filing Return Before Qualifying Use Period Ends – If a taxpayer files a federal income tax return and reports a transaction under Sec. 1031 based on the expectation that a replacement dwelling unit will meet the qualifying use standards noted above, and later determines that the dwelling unit does not qualify, the return should be amended to report the transaction other than as a Sec. 1031 exchange.

SPECIAL RULE FOR WATER RIGHTS STOCK (not applicable after 2017)

A provision of the 2008 Heartland, Habitat, Harvest, and Horticulture Act of 2008 amends Sec. 1031 to permit the exchange of water rights in the form of mutual ditch, reservoir and irrigation company stock, applicable to exchanges after the date of enactment. This is an exception to the general rule that stock is not qualified property for like-kind exchange treatment, but its application is limited to stock representing a holding of water rights that is recognized as real property under state law. Effective for exchanges after May 22, 2008 and before 2018.

REVERSE EXCHANGES

A reverse exchange is a transaction in which a taxpayer receives replacement property and subsequently transfers relinquished property. It is distinguished from a deferred exchange, which is a transaction in which a taxpayer transfers relinquished property and subsequently receives replacement property. Rev. Proc. 2000-37 offers guidance for taxpayers that engage in so-called "reverse" like-kind exchanges.

Until Rev. Proc. 2000-37 was published, there was no authority on which taxpayers could safely rely to structure reverse exchanges. In Rev. Proc. 2000-37, the Service took the position that a taxpayer may use a parking arrangement to effectuate the equivalent of a reverse exchange and thereby qualify for like-kind exchange treatment. The Procedure consists of three parts:

(1.) Safe harbor
(2.) Nine requirements
(3.) Several allowed agreements

Reverse exchanges require financial resources – To accomplish a reverse exchange requires the replacement property be acquired before the equity in the relinquished property is available. Thus, the taxpayer must have the ability to fund the purchase of the replacement property without the benefit of the capital from the relinquished property.

Safe harbor - The Rev. Proc. 2000-37 safe harbor is found in Section 4.01 of the Procedure and states: *The Service will not challenge the qualification of property as either "replacement property" or "relinquished property" (as defined in section 1.1031(k)-1(a)) for purposes of Section 1031 and the regulations thereunder, or the treatment of the **exchange accommodation titleholder [EAT]** as the beneficial owner of such property for Federal income tax purposes, if the property is held in a **QEAA [qualified exchange accommodation arrangement].***

Thus, if either the replacement property or the relinquished property is held in a QEAA, the Service will treat the EAT as the beneficial owner of the property so held. The effect of this rule is that the Service will ignore factors often used by courts in determining who owns property and treat the EAT as the owner of the property. To obtain this treatment, however, the property must be held in a QEAA. Property is treated as being held in a QEAA if all of the requirements listed in the Procedure (discussed below) are met.

1. ***The EAT must satisfy certain requirements.*** A person other than the taxpayer or a disqualified person must serve as the EAT. The Service does not define "disqualified person" in the Procedure. The definition of "disqualified person" found in Reg. 1.1031(k)-1(k) (i.e., the taxpayer's agent or a person related to the taxpayer), however, appears to apply in this context.
2. ***The EAT must be subject to U.S. income tax.***
3. ***The EAT must hold qualified indicia of ownership.*** The Procedure defines "qualified indicia of ownership" to mean "legal title to the property, other indicia of ownership of property that are treated as

beneficial ownership of the property under applicable principles of commercial law (e.g. a contract for deed), or interests in an entity that is disregarded as an entity separate from its owner for Federal income tax purposes (e.g., a single-member limited liability company) and that holds either legal title to the property or such other indicia of ownership."

4*. **The taxpayer must have a bona fide intent to do a Section 1031 exchange**.* At the time the EAT receives the qualified indicia of ownership, the taxpayer must have the bona fide intent that the property held by the EAT represent either replacement property or relinquished property in an exchange that is intended to qualify for nonrecognition of gain (in whole or in part) or loss under Section 1031.

5. The agreement must be in writing. The taxpayer and the EAT must enter into a written agreement no later than five business days after the accommodation titleholder receives qualified indicia of ownership. The agreement must provide that:

- The EAT is holding the property for the benefit of the taxpayer in order to facilitate an exchange under Section 1031 and Rev. Proc. 2000-37.
- The taxpayer and the EAT agree to report the acquisition, holding, and disposition of the property as provided in Rev. Proc. 2000-37.
- The EAT will be treated as the beneficial owner of the property for all Federal income tax purposes.

Furthermore, the taxpayer and the EAT must report the tax attributes of the property on their tax returns in a manner consistent with this agreement. This means that the taxpayer cannot deduct depreciation for property held by the EAT. The EAT must also recognize gain or loss on the disposition of any property it holds unless the gain or loss is otherwise specifically excluded from the EAT's income.

6. Relinquished property must be properly identified. The taxpayer must identify the relinquished property within 45 days after the EAT receives a qualified indicia of ownership of the replacement property. Identification must be made in accordance with Reg. 1.1031(k)-1(c), and the taxpayer may identify alternative and multiple properties, as described in Reg. 1.1031(k)-1(c)(4).

7. Holding period limitation: exchange-last arrangements. In an exchange-last arrangement, within 180 days after the EAT receives qualified indicia of ownership in the replacement property, the replacement property must be transferred either directly, or indirectly, through a qualified intermediary to the taxpayer.

8. Holding period limitation: exchange-first arrangement. If the transaction is an exchange-first arrangement, within 180 days after the EAT receives a qualified indicia of ownership in the relinquished property, the relinquished property must be transferred to a person who is not the taxpayer or a disqualified person.

9. Aggregate holding period limitations. The replacement property and relinquished property cannot be held in a qualified exchange accommodation arrangement for more than a combined total of 180 days.

Allowed agreements - The true benefit of Rev. Proc. 2000-37 is found in its Section 4.03, which states that the Service will allow taxpayers to enter into several agreements with an EAT without affecting the safe harbor. Discussed below are the allowed agreements.

- ***EAT as qualified intermediary -*** The EAT may enter into an exchange agreement with the taxpayer to serve as a qualified intermediary so long as the EAT otherwise qualifies as a qualified intermediary. Thus, if the EAT qualifies as a qualified intermediary, the EAT is not treated as the taxpayer's agent for purposes of determining whether the taxpayer is in constructive receipt of money or other property held by the EAT. Thus, the EAT may sell the taxpayer's relinquished property and use the proceeds from the sale to acquire other replacement property or make improvements on property held by the EAT without causing the transaction to fail to qualify for like-kind exchange treatment.

- ***Guarantee allowed -*** The taxpayer or a disqualified person may guarantee some or all of the obligations of the EAT, regardless of whether such obligations are secured or unsecured. Furthermore, the taxpayer may indemnify the EAT against costs and expenses incurred with respect to the transaction. This provision allows the EAT to protect itself against any unexpected costs that may arise with respect to the transaction. Thus, the EAT may immunize itself from a significant amount of risk to which an owner of property would otherwise be exposed.

- ***Other-than-market loans allowed -*** A taxpayer or a disqualified person is allowed to loan or advance funds to the EAT at other than an arm's-length rate of interest or guarantee a loan or advance to the EAT. This provision allows the EAT to use the taxpayer's money interest-free. As mentioned below, this may come with strings attached since Sections 7872 and 1272 may result in interest income being imputed to the taxpayer.

- ***Other-than-market leases allowed -*** The EAT may lease the property of which it holds a qualified indicia of ownership to the taxpayer or a disqualified person at other than an arm's-length rental amount. This provision allows the taxpayer to take possession of the property rent-free, while the EAT holds title to the property.
- ***Other-than-market services allowed -*** The taxpayer or a disqualified person may manage the property, supervise improvement of the property, act as contractor, or otherwise provide services to the EAT with respect to the property at other than an arm's-length charge during the period the EAT holds title to the property. Thus, a taxpayer may construct an improvement on the property while the EAT holds qualified indicia of ownership of the property, and the EAT may receive such services for a nominal amount. Furthermore, a taxpayer may transfer property to an EAT and continue to manage the property after it is transferred. Under such a situation, there will be no noticeable change in the ownership of the property. These allowances give the taxpayer great latitude in setting up parking arrangements.
- ***Option-type agreements allowed -***The taxpayer and the EAT may enter into option-type agreements or arrangements relating to the purchase or sale of the property. These types of agreements allow the taxpayer to obtain an option to purchase replacement property that the EAT holds and allows the EAT to obtain an option to sell replacement property to the taxpayer at the end of the 180-day holding period. By using this type of agreement, the contract between the taxpayer and the EAT can create a present obligation in the EAT to execute and deliver a deed to the taxpayer and can create a present obligation in the taxpayer to make payments to the EAT either in cash or in the form of relinquished property.
- ***Adjustments for economic risk allowed -*** The taxpayer and the EAT may agree or arrange for the taxpayer to advance additional funds or receive funds from the EAT if the value of the relinquished property fluctuates while held by the EAT. An agreement of this sort allows the parties to shift the economic risk of loss or damage to the property to the taxpayer without affecting whom the Service considers to be the beneficial owner of the property.

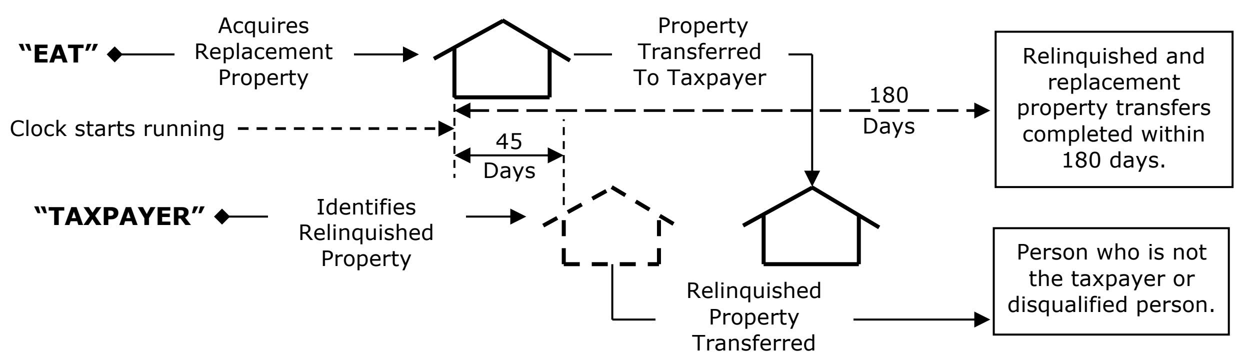


Illustration - Reverse Exchange Example

REAL ESTATE PARTNERSHIPS

Frequently, the question arises whether exchanging interests in a real estate partnership is allowed. Code Sec 1031(e) (see below) addresses this issue by saying if there is a valid Section 761(a) election in force the ownership interest will not be treated as a partnership. The following code excerpts are from Sec 1031 as amended by the TCJA.

1031 Exchange of real property held for productive use or investment.

(a)(1) In general - *No gain or loss shall be recognized on the exchange of real property held for productive use in a trade or business or for investment if such property is exchanged solely for real property of like-kind which is to be held either for productive use in a trade or business or for investment.*

(a)(2) Exception for real property held for sale. *This subsection shall not apply to any exchange of real property held primarily for sale.*

1031(e) Application to certain partnerships.

For purposes of this section, an interest in a partnership which has in effect a valid election under section

761(a) to be excluded from the application of all of subchapter K shall be treated as an interest in each of the assets of such partnership and not as an interest in a partnership.

The instructions for Form 1065 (2018) also say the same thing: *"A qualifying syndicate, pool, joint venture or similar organization may elect under Section 761(a) not to be treated as a partnership for Federal income tax purposes and will not be required to file Form 1065 except for the year of election. For details, see Section 761(a) and Regulations Section 1.761-2."*

Reg § 1.761-2.

(a) Exclusion of eligible unincorporated organizations.

(1) In general. Under conditions set forth in this section, an unincorporated organization described in subparagraph (2) or (3) of this paragraph may be excluded from the application of all or a part of the provisions of subchapter K of chapter 1 of the Code. Such organization must be availed of: (i) for investment purposes only and not for the active conduct of a business, or (ii) for the joint production, extraction, or use of property, but not for the purpose of selling services or property produced or extracted. The members of such organization must be able to compute their income without the necessity of computing partnership taxable income. Any syndicate, group, pool, or joint venture which is classifiable as an association, or any group operating under an agreement which creates an organization classifiable as an association, does not fall within these provisions.

(2) Investing partnership. Where the participants in the joint purchase, retention, sale, or exchange of investment property—

(i) Own the property as co-owners,

(ii) Reserve the right separately to take or dispose of their shares of any property acquired or retained, and

(iii) Do not actively conduct business or irrevocably authorize some person or persons acting in a representative capacity to purchase, sell, or exchange such investment property, although each separate participant may delegate authority to purchase, sell, or exchange his share of any such investment property for the time being for his account, but not for a period of more than a year, then such group may be excluded from the application of the provisions of subchapter K under the rules set forth in paragraph (b) of this section.

FINAL REGS ADDRESS TAX TREATMENT OF INCOME FROM EXCHANGE FUNDS

The IRS released final regulations (**T.D. 9413, 73 FR 39614, July 10, 2008**) addressing (1) the taxation of income earned on escrow accounts, trusts, and other funds used during deferred like-kind exchanges, and (2) below-market loans to facilitators of these exchanges.

- If the exchange funds are treated as loaned by the taxpayer to the exchange facilitator, interest is generally imputed to the taxpayer under Code Sec. 7872, unless the exchange facilitator pays sufficient interest.
- A special applicable federal rate (AFR) that is the investment rate on a 13-week (generally 91-day) Treasury bill may be used when testing for sufficient interest under Code Sec. 7872. Because the normal short-term AFR may be lower than the 91-day rate, taxpayers may apply the lower of the two.
- The regulations provide an exemption from Code Sec. 7872 for an exchange facilitator loan if the amount of the exchange funds treated as loaned is $2 million or less and the loan's duration is six months or less.

CALIFORNIA DIFFERENCES

CA law conforms to Sec 1031 as it existed prior to TCJA, R&TC Sec. 18031 and 24941. Thus except as noted below, CA will not follow the TCJA change to Sec 1031 and vehicles and other non-real estate property would be eligible to receive tax-deferred exchange treatment for CA but not federal. California conforms to Federal computations. However, watch for differences in basis.

New Law & Stuff

The TCJA provision that limits Sec 1031 treatment only to exchanges of real property was adopted by California in AB 91 (signed by the governor 6/27/2019), with two significant differences:

- The provision only applies to taxpayers with AGI of $500,000 or more ($250,000 for those filing single or married separate) and
- Only applies to exchanges **completed** after January 10, 2019.

Exchange into Out-of-State Property - The replacement property in a qualified exchange may be located outside of California. If the out-of-state property is later sold in a taxable transaction at a time when the taxpayer is a California resident, any gain is taxable to California. Further, if the taxpayer who was a California resident when the exchange to out-of-state property took place sells the out-of-state property while a nonresident of California, the previously unrecognized gain is taxable to California.

California's Reporting Requirements for Certain 1031 Exchanges –Effective for exchanges on or after January 1, 2014 if a gain or loss from the exchange of property in California is deferred under IRC Section 1031, and the property acquired in that exchange is **located outside of California**, the taxpayer – whether a resident or nonresident – shall file an information return with the Franchise Tax Board for the taxable year of the exchange *and for each subsequent taxable year* - in which the gain or loss from that exchange has not been recognized. (AB 92 6/27/13; R&TC Sec 18032 and 24953) Taxpayers who exchange only personal property assets are not subject to this requirement. (2018 instructions to FTB 3840)

Form FTB 3840 is a comprehensive 2-page form used for this purpose and is attached to the taxpayer's CA return. However, a taxpayer not otherwise required to file a California return must complete the entire form FTB 3840, including the signature section, and file the form, by the due date for the type of return that they would have filed if one were required, at the following address: Franchise Tax Board, PO Box 1998, Rancho Cordova, Ca 95471-1998.

For taxpayers who fail to comply with the reporting requirement, FTB could make a return based on an estimate of the net income from the exchange and may issue an assessment including tax, interest, and penalties due in the same manner as assessments that are proposed for the failure to file a return.

See the instructions to FTB 3840 for additional information.

Transfer of Property to LLC in 1031 Exchange - In a unanimous and formal opinion, the State Board of Equalization granted the appeal of a group of taxpayers who had tenant-in-common interests in an apartment building that they exchanged for a shopping mall and surrounding property and ruled that there had been a qualified 1031 exchange even though, within a few months, the owners transferred the property to an LLC. "The foregoing record demonstrates that appellants conducted a valid exchange under IRC section 1031, notwithstanding the subsequent change in form of ownership, because the exchange was properly executed, the replacement property was held for investment purposes, and the step transaction doctrine does not apply to disregard appellants' acquisition of the replacement property." The taxpayer-favorable ruling made it clear that a plan to transfer property acquired in an exchange to a different form of holding does not disqualify the exchange as long as the taxpayer retains his or her investment in the property. (*Appeal of Rago Development Corp. et al. (June 23, 2015) 2015-SBE-001)*

CA Real Estate Withholding – Generally, no income tax withholding on a like-kind exchange is required with proper seller certification. However, if boot in excess of $1,500 is received by the seller, withholding is required. If the transaction fails to meet all of the IRC Sec. 1031 requirements (for example, the 45- or 180-day test is failed), then the intermediary or accommodator must withhold at 3 1/3% of the full sales price. *(2018 FTB Form 593-C/593-E Booklet)* See Chapter 3.17 for more information on California real estate withholding.

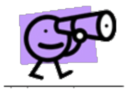
REPOSSESSIONS OF REAL PROPERTY

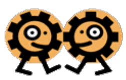


IRC Section 1038 outlines the general rules of real property repossessions. Under 1038, a seller's repossession of real property due to the buyer's default does not result in recognition of loss by the seller and gain is recognized only to a limited extent. The realty repossession rules basically treat all payments received from a sale before repossession as income. However, they limit the taxable gain to the profit the seller expected to receive from the original sale. Application of the realty repossession rules is <u>mandatory</u>, not elective.

Related IRS Forms & Publications

- **Pub 4681** - Canceled Debts, Foreclosures, Repossessions, and Abandonments

<u>THREE CRITERIA ARE NECESSARY FOR THE REALTY REPOSSESSION RULES TO APPLY</u>:



- The buyer's indebtedness to the seller must have originated from the sale of the seller's real property and be secured by that property.
- The seller must have reacquired the real property to either fully or partially satisfy that indebtedness.
- The seller cannot pay additional consideration to the buyer in order to get the property back unless the additional consideration was stipulated in the original sale, or the buyer has defaulted or is about to default on an obligation.

Unless all three of the above conditions are met, the repossession is treated as personal property repossession and reported accordingly. The repossession rules apply whether:

(A) The property is reacquired from the original buyer or a subsequent buyer (but the property must be acquired by the original seller, not a later holder of the loan);
(B) The seller provides additional consideration as provided in the third bullet above (e.g., taking property subject to a mortgage or back taxes);
(C) The sale was reported on the installment method or the gain was fully taxed;
(D) Title to the property has passed to the purchaser or not;
(E) The original sale showed a gain or a loss;
(F) The property has increased or decreased in value since the time of the original sale;
(G) The property is reacquired by voluntary conveyance or foreclosure.

<u>COMPUTING THE GAIN ON REPOSSESSIONS</u>:

The amount taxed on repossession is the <u>SMALLER OF:</u>

(1) The gain realized on the repossession. This equals:
Down payment
\+ Principal payments made by the buyer on the note
\+ Principal payments made by buyer on seller's loan "assumed"
\- Gain already reported

- OR -

(2) The gain recognized (no loss is recognized). This equals:
Gain on the sale
\- Gain already reported
\- Costs of repossession

<u>COSTS OF REPOSSESSION</u>:

These include attorney's fees, court and filing costs, clearing of liens (paying back taxes and interest), costs of obtaining title, and the BALANCE OF THE BUYER'S LOANS "ASSUMED" BY THE SELLER.

<u>HOLDING PERIOD AND BASIS OF THE REACQUIRED PROPERTY</u>:

The holding period of the property includes the time the property was held before the first sale plus the time it was held after the repossession. Holding period of improvements made by the buyer begins the day after repossession. The basis of the repossessed property is equal to the basis of the buyer's obligation to the seller (i.e., the remaining face value less the unreported gain) PLUS the gain recognized on the repossession PLUS the costs of repossession.

Example - Repossession of Real Property - *On 01/01/17, Don sold a parcel of land to Hank for $35,000. Don's adjusted basis in the property was $20,000 (purchased 03/15/11). Hank paid $7,000 down and gave Don a note for the remainder. Under the terms of the note, Hank agreed to make annual principal payments of $5,000 per year beginning 01/01/18. Don used the installment method when he reported the transaction on his 2017 tax return. Hank made the 2018 payment but on 01/01/19, he defaulted on the note and Don repossessed the property. Don paid $1,000 in legal fees to get the property back.*

Selling price	*$35,000.00*
Adjusted basis	*20,000.00*
Gross profit	*15,000.00*
Gross profit % ($15,000/$35,000)	*42.86 %*

36. Basis of unpaid debt - line 33 less line 35 13,142
37. Gain on repossession - line 28.. 6,857
38. Cost of repossession - line 26... 1,000
39. Subtotal - sum of lines 37 and 38 7,857
*40. **BASIS OF THE REPOSSESSED PROPERTY** - sum of lines 36 and 39....... ....20,999*

REPOSSESSION OF PERSONAL RESIDENCE:

Disregard the repossession rules if the gain on the original sale was deferred because of buying another residence (under pre-May 7, 1997 Sec. 1034 rules) or the Sec. 121 exclusion was used AND the property was sold again within one year of the repossession. Treat the resale as part of the original sale, but with a NEW SELLING PRICE (equal to the selling price from the second sale plus the cash received on the first sale). (If gain was deferred under the old Sec. 1034 provisions, then there will be a new basis for the replacement property.) If there is any additional gain to be recognized because of the new higher "selling price," report it in the year of the second sale. IF THE RESALE DOES NOT TAKE PLACE WITHIN A YEAR OF THE REPOSSESSION, THE REGULAR SECTION 1038 REPOSSESSION RULES APPLY.

Example - Resale of Repossessed Residence - *In 2017, Harry, who is not married, sold his residence for $310,000 and excluded all of his $240,000 gain under Section 121. In 2018, he repossessed the home but resold it within one year (in 2019) for $295,000. The adjusted basis of the house was $70,000. Facts:*

Selling price, original sale	*$310,000*
Selling price, post-repossession sale	*295,000*
Adjusted basis	*70,000*
Down payment on original sale	*40,000*
Principal payments on note held from original sale	*4,000*

2019 Sale

Selling price	*$295,000*	
Cash received on 1st sale	*44,000*	
Redetermined selling price		*339,000*
Adjusted basis		*<70,000>*
Gain realized		*269,000*
Sec 121 Exclusion		*<250,000>*
Gain recognized (reported on 2019 return)		*19,000*

Example - Repossessed Home Converted To Rental - *If Harry (previous example) didn't resell the house but converted it to rental after his reacquisition, the regular repossession rules apply and he computes any gain under the regular repossession rules discussed earlier and the home sale gain exclusion would not apply to that computation.*

Taxpayer's reacquisition of principal residence triggers loss of Sec 121 exclusion - The Tax Court has concluded that, where a taxpayer sold his primary residence and excluded gain under Code Sec. 121, then reacquired the property after the buyers defaulted, but did not resell it within one year of reacquiring it, the taxpayer had to recognize long-term capital gain on the reacquisition, including amounts previously excluded under Code Sec. 121. The Court found that subjecting the taxpayer to the general gain recognition rules of Code Sec. 1038 was required under the statute and consistent with the economics of the transaction. (Debough, (2014) 142 TC No. 17)

EFFECTS OF REPOSSESSION ON THE BUYER:

See the section on Debt Cancellation for how repossessions affect a buyer.

CALIFORNIA DIFFERENCES

California conforms to Federal computations. However, watch for differences in basis and installment sale profit percentage for original sale.
